Candidates for the position must possess a minimum of a Master's degree in business administration, accounting, finance, or another related field, and have broad experience in business or higher education. This individual must also possess the leadership and management abilities to organize the University's financial affairs (approximately $200 million annual budget for the Lakeside Campuses) so as to provide excellent service and efficient operation.

Candidates must have good communication and analytical skills and a demonstrated ability to work effectively with trustees, faculty, staff, students, members of the university community, and other financial, educational, civic, and governmental groups. Experience in computer-based fiscal planning and analysis is required. Candidates must have the ability to integrate computer information technology systems into all aspects of the University's financial affairs. Candidates will be expected to provide a variety of users with financial information, interpretation, and analysis to improve institutional decision-making.

Candidates should support the Jesuit and Catholic mission of the University, be knowledgeable about its mission and indicate the skills they have that will advance the Jesuit and Catholic character of the institution.

Extensive information about Loyola University Chicago is available at www.luc.edu. Review of applications will commence immediately with the expectation of an appointment by August 15. All applications will be handled confidentially. Please send applications, preferably by e-mail or fax, to Ms. Carol Molick, Assistant to the President, Loyola University Chicago, 820 North Michigan Avenue, Chicago, Illinois 60611 Internet: cmolick@luc.edu Telephone: 312-915-6402 Fax: 312-915-6414

BY GUSTAVO A. MELLANDER

Many Hispanic parents have long had an uneasy feeling that their children were not leaving school with the education that they needed. In the last decade, the business world, too, has come to realize that students graduate without the skills that they need to be successful.

Jobs that require strong academic skills remain vacant due to a lack of qualified workers. And remedial training costs are rising. All agree that this lingering issue, one that adversely affects so many Hispanics, has to be resolved.

International Study Results

The scary results from the recent Third International Mathematics & Science Study (TIMSS) compared performance in mathematics and science of a half million students worldwide at grades 4, 8, and 12, including 33,000 Americans. It reinforces starkly the need for all stakeholders in our education system to join together to boost student performance across the board.

While U.S. students at the fourth grade level were near the first in the world in science and were above the international average in mathematics, by the eighth grade, U.S. performance had fallen to slightly above the international average in science and to below the international average in mathematics.

Analyses of eighth grade teaching and curriculum show that our country has a fragmented curriculum and teaching generally is not focused on challenging content nor is it executed in a way that promotes problem-solving skills.

By the 12th grade, U.S. ranking fell to below average in both science and mathematics, even among our advanced students, while our most advanced students in mathematics were at the international average and in science below average. This low performance is part of a larger profile: the majority of our students do not take advanced math or science courses and do not have a solid foundation coming out of middle school, and they are not being taught by teachers fully trained to teach mathematics and science.

Maintaining a Competitive Edge

The National Library of Education reports that management guru Peter Drucker’s claim that “knowledge has become the key resource” is born out by a torrent of evidence that the knowledge content of work is increasing. Education is the key to maintaining a competitive edge.

Economic journalist Robert J. Samuelson elaborates: “Schools are one foundation of the economy. If students leave with poor skills, there are consequences. One is waste. Giving people a third or fourth chance (whether in college or on the job) is expensive. Some people learn skills later that they could have learned earlier. Some skills are never learned. One result is a scarcity of high-skilled workers; another is many low-skilled workers trapped in poverty or semi-permanent unemployment.”

Employers’ and educators’ efforts highlighted in The Formula for Success: A Business Leaders’ Guide to Supporting Math and Science Achievement offer models for business and education leaders to learn from as they develop strategies in their own communities to support math and science achievement.

For American students to be “first in the world,” these types of efforts must be expanded so that every student understands the importance of mastering challenging mathematical and scientific concepts. These efforts should also enable students to be part of an education system that is aligned to support the achievement of these high academic standards.

Formula for Success

Businesspersons and educators have prepared The Formula for Success: A Business Leaders’ Guide to Supporting Math and Science Achievement to address these national problems.

The Guide:

- provides the business community with vital 4th, 8th, and 12th grade TIMSS data on mathematics and science achievement of America’s students;
- makes the link between academic achievement and workplace success by offering workplace examples of the application of both basic academic knowledge and the higher-order thinking skills;
- provides examples of business roles to support increased mathematics and science achievement;
- poses questions that business leaders can use to begin or continue conversations with other stakeholders—parents, educators, students, policymakers—to improve mathematics and science achievement in their community and

- outlines resources that can assist employers in supporting student achievement.

Strategies

The National Alliance of Business has urged its membership to:

- Articulate workplace academic skill requirements; communicate these needs to schools, parents, and students on a regular basis; and ensure these skills are incorporated into academic standards.

- Support more rigorous teacher training that incorporates mastery of content as well as its application to success in the workplace.

- Support programs that expose students to the world of work.

- Support the use of student and system performance data that are clear, reliable, and broadly disseminated.

- Use student achievement in hiring decisions and the message to all students that academic achievement is important.

- Encourage employees, especially those who are parents, and other community stakeholders to increase their involvement with local schools to help students achieve challenging academic standards.

Dr Mellander is a professor at George Mason University
Native Son to Lead UT-San Antonio

Ricardo Romo Goes the Distance

BY ROBERT MECKEL

The record books for The University of Texas at Austin still show Ricardo Romo as its undisputed champion in the one-mile run. This spring, both Romo and the old Memorial Stadium track where he practiced and competed as a student athlete disappeared from the UT-Austin campus.

The track was dug up and lowered to provide more seating for football games. A new track stadium has been built across the street, and a new crop of athletes has begun establishing first-year records for that stadium.

Dr. Ricardo Romo, vice provost for undergraduate education at UT-Austin since 1995, left Austin to begin on May 1 as the new president of the fastest growing universities in the state—The University of Texas at San Antonio.

The UT System Board of Regents selected him in February from among four finalists to succeed President Samuel A. Kirkpatrick.

In his first role as president, Romo, 55, is expected to lead UT-San Antonio into the next millennium with the same kind of enthusiasm, determination, and hard work that helped him succeed as an athlete while growing up in San Antonio's West Side.

"My intent is to do everything I can to move UT-San Antonio into 'flagship university' status," said Romo. We have a regional impact, I think we have an urban impact. I want us to have a state and national impact. That's where we want to go next."

Romo plans to get there by building partnerships and developing mutually beneficial alliances with the UT Health Science Center, the five military bases, and the city's business and industry communities. He said that these partnerships could be instrumental in helping to diversify the local economy and helping workers plan for new careers as workforce needs of the area change.

"UTSA can become an economic engine for San Antonio development and for diversification of the city's economy by possibly bringing in new industries that will develop new revenue streams," he said.

Another key partnership that Romo will pursue is with people
involved in the kindergarten through 12th grade schools in the city and region. They are basically training and developing what will turn out to be our student body. We have to help them to assure that that student group is well developed," he said.

Romo acknowledges that UTSA is, to some extent, a commuter institution, partly due to a limited number of dormitories on campus and partly because limited financial resources require the majority of UTSA students to live at home. He believes the university will grow stronger in the years ahead by expanding its demographic base to a more regional level.

"We should serve a student body population from Laredo to Austin and Corpus Christi to Kerrville. My goal is to see that UT-San Antonio is the school of choice for every student in that region, their top choice," he said. To accomplish that goal, Romo will focus on providing quality programs and dedicated service to the students. Another priority, he said, is to recruit top-quality additional faculty who will attract top-quality students.

Romo has set an ambitious agenda for his new presidency, and he realizes that the next two or three years will be crucial in setting the tone for his administration and convincing state legislators to support him in moving UTSA toward the flagship university status enjoyed by UT-Austin and Texas A&M University.

"I think we can make it a flagship institution in the next 20 to 25 years. My job is to lay that foundation so that we can be better than we are now and move toward that status," he said.

Romo will not be alone in his quest to make UTSA a "top choice" university. He has the support of numerous lawmakers, civic leaders, and educators throughout the state who endorsed his candidacy for the UTSA presidency. Many supporters are local residents who remember Romo from those early years when he brought pride to San Antonio with his athletic accomplishments as a middle-distance runner.

Romo was a student at San Antonio Vocational Tech High School (now known as Fox Technical Vocational High School) when he won the mile race at the University Interscholastic League Class AA state track meet as a junior and senior in 1961 and 1962. In 1961, he also was the UIL state cross-country champion.

Romo looks back on those formative years in San Antonio and realizes how significant some of his teachers were in the shaping of his future.

"I grew up on Guadalupe Street in the deep West Side of town, the first part of my life. We lived in a little house connected to my parents' grocery store until I was 16 years old and we moved to Monterey Street. By all standards, we were lower-middle-class people. We were not poor. We didn't have any dire economic needs, but we did not have a lot of money, and we all had to work," he said, recalling the many hours he helped in the store as well as in his uncle's trucking business.

"Work was a way of life for us. We didn't know any other life. Fortunately, though, work probably kept me out of the kind of trouble that was all around us in the West Side. There was quite a bit of concern among the parents about gangs in the neighborhood.

Ricardo was the second of five children born to Henry and Alicia Romo. When their children grew old enough to start their education, they were sent to parochial school. Later they were enrolled in a middle school outside their district in order to avoid some of the gang problems affecting the public school in their area that had been the scene of some shootings.

We were the first Hispanics admitted to that Anglo school," right after the Brown v. Board of Education ruling by the U.S. Supreme Court, recalled Romo. He said the dozen or so Mexican Americans in the school of about 800 students experienced discrimination but managed to go forth and make friends at their new school.

"Never having attended school with any Anglo kids, it was a new experience for us and them. It was a time of getting to know each other for both sides and breaking down a lot of the myths and stereotypes we had about each other," he said. "Athletics brought a lot of us together.

Ricardo said that his older brother, Henry, Jr., was the trailblazer in terms of the Romo family being recognized for sporting abilities. Henry, Jr., was an all-around athlete who became the first Hispanic on the middle school's football team. One star athlete at a time was about all the Romo family could afford, however, and because there was so much work to do at the store, Ricardo was unable to participate in competitive athletics like his older brother. Ricardo's running at school was limited to his physical education classes, where he worked out with some of the students who were involved in track tournaments. It was during one of those PE classes that Romo found his first mentor — Coach Bill Davis.

He was absolutely instrumental in doing what every teacher should do and that is to help an individual to reach his or her potential. He discovered my running talent during PE courses and encouraged me to develop that talent. The more I developed that talent, the more self-confidence and self-esteem I developed. He always was encouraging and really became my first equivalent of a role model, my first mentor."

By the time he reached high school, Ricardo knew in his heart...
that he was a good runner. He realized also that if he wanted to run competitively with his parents' blessing, he had to continue to do well in school. After he became the city champion, then the regional champion in the mile run his sophomore year, the athletic director at San Antonio Vocational Tech High School, Warren Wieble, had a talk with Ricardo that made him start thinking about his future.

"You're going to go on to college, so you might as well start getting ready and start taking academic courses," Wieble counseled the athlete. It was the first time Ricardo gave any serious thought to the possibility that he might go on to college. Most of his fellow high school students were studying toward technical careers, and until now, he had not planned to do otherwise. With family finances so limited, his only chance was to get a scholarship.

The University of Texas at Austin recognized Romo's talent and lured him away from San Antonio after high school graduation. Romo, who had received 50 scholarship offers from colleges and universities throughout the country, tore up the running track with new record times in the mile, but he also broke new ground at UT toward the development of his academic career.

"My track coach at UT, Jack Patterson, once said to me that I had some good people skills and some good organizational skills and leadership skills, and that if I continued to develop them, I might one day end up in a place like the United Nations. It took me by surprise. He told me never to sell myself short," recalled Romo. He said the conversation inspired him to start thinking about graduate school and the possibilities for the years ahead.

In 1966, Romo became the first Texan to run a mile in less than four minutes. He finished third at a track meet in Los Angeles with a time of 3 minutes, 58.8 seconds. He did that only two weeks after running in the same race in which Jim Ryun set the world record with a time of 3 minutes, 51.1 seconds.

Romo received his bachelor's degree at UT in 1967 and, with his new bride, Harriet, moved to California to begin training for the 1968 Olympics. A lower back injury, however, ended his Olympic aspirations, and his focus shifted to academics. He received his master's degree from Loyola University in Los Angeles in 1970, and in 1975, he earned a doctorate in U.S. history from the University of California at Los Angeles.

He began his career as a social studies coordinator in the Los Angeles public schools system in 1966. He was a faculty member from 1970-75 in the Chicano Studies Department at California State University at Northridge.

He began teaching at the University of California at San Diego in 1973 and was on staff there when he was invited to return to UT Austin as a visiting professor in history for the spring semester of 1980. Within a few months, he accepted an offer of a full-time teaching position at UT Austin. Romo remained on the history faculty after having been appointed in 1985 as vice provost for undergraduate education at UT Austin. His vice provost responsibilities included directing the Freshman Seminars, chairing a committee that oversaw the renovation of 150 campus classrooms, coordinating the Gateway Program for at-risk students, and overseeing the Center for Teaching Effectiveness.

While at UT-Austin, Romo has earned many honors and written numerous publications, including East Los Angeles: History of a Barrio published in 1992 by the University of Texas Press. In addition to his work at UT-Austin, Romo served from 1986 to 1993 as vice president and director of the Tomás Rivera Center at Trinity University in San Antonio.

Romo has earned tremendous respect and admiration from fellow faculty members, staff, students, and administrators at UT-Austin and throughout the Austin community. He was appointed as president of UT-San Antonio in 1995.

UT System Chancellor William H. Cunningham commented, "Dr. Romo has a unique combination of talents and experience as a university administrator, a scholar, and a teacher who has earned his position as president of UTS." He has won wide acclaim for his ability to work effectively with all the diverse constituencies of a complex urban university such as UTSA, and he will bring great distinction to his service as president of the university.

Ed Sharpe, UT System vice chancellor for academic affairs and chairman of an advisory committee that recommended the finalists, said, "Dr. Romo is an outstanding administrator with a proven record of success in academia. The advisory committee was greatly impressed with his command of issues of concern to faculty, students, and staff members, and his ability to relate to and communicate with the wider community to which UTSA belongs."

On the eve of his new career as president of the only public four-year institution in San Antonio, Romo said he is very excited about the challenges ahead.

"I know that town I'm from that town have a good sense as to where it's been and where it's going," he said.
Tenure—the Impossible Dream?

Be Prepared, Get Mentored, and Don't Rock the Boat

Tenure is a word, a concept that has been woven into the web of academia from the beginning—or so it seems. In the early 19th century, the idea of tenure crossed the Atlantic from Germany to teaching institutions throughout the United States but did not become powerful until the 20th century.

Tenure has been upheld as the pillar of First Amendment rights of freedom of speech in institutions where the seeds of ideas are considered most fertile in building and maintaining a democratic society. Fledgling teachers interested in becoming full-time professors strive for tenure from the minute they enter the professional world of higher education. If they play their cards right, the prize of tenure might be theirs.

But what is tenure? And why has this word become a subject of intense debate?

According to the American Association of University Professors (AAUP), tenure does not assure a life-long job, as is sometimes believed. But once faculty members are tenured, they are assured that they will not be released from their position unless the administration can demonstrate that they, the faculty, are not fit to continue. Another reason may be that financial difficulties make it such that the administration has no choice but to let faculty go.

Prior to tenure, the burden is on you to prove why you have to stay,” said Jonathan Knight, associate secretary of AAUP. Tenure is intended to secure economic freedom for teachers who could otherwise be dismissed simply for voicing opinions contrary to those of the institution that hires them. It thus is believed to secure a framework for the tolerance of diverse ideas.

What has served as a stone grounding academic freedom over the past century, however, has been under attack in recent years. Some argue that tenure is an outdated concept, and that in order for institutions to remain competitive, they need to have more flexibility to hire and fire faculty as student needs change. Various institutions have declined to fill tenure-track positions as faculty have retired or resigned, and an increasing number of faculty have been hired on limited-term contracts, increasing the proportion of part-time faculty. According to The National Center for Educational Statistics, only 64 percent of new faculty are in tenure-track positions compared to 74 percent of older faculty.

While some schools are seeking to or have already changed or eliminated the tenure system, it remains a well-established process on 85 percent of the nation’s campuses. For Hispanic professors, who score low in number of tenured positions held (12.16 percent). According to the NCES 1995 National Study of Postsecondary Faculty, understanding the tenure process, and knowing its challenges, is as good a place to start as any.

In 1940, a Statement of Principles of Academic Freedom and Tenure was issued jointly by the American Association of University Professors and the Association of American Colleges, designed to officially set minimum standards and sound academic practices in tenure. Although each college and university effectively establishes its own criteria for tenure, the 1940 statement offered the first clear and comprehensive standards, setting in motion tenure practices throughout the country. The 1940 statement serves as a guideline by which the AAUP still advises and monitors today.

Moving Toward Tenure

The first step toward achieving tenure is to know whether a specific department or institution as a whole offers a tenure track. If so, in most cases, instructors will be provided with a seven-year maximum probation period, during which time they have to prove their merits for tenure. As part of the AAUP’s standards, all faculty should be advised of their department’s standards for tenure before judgment day, and are to be given periodic reviews during the probation period.

Although standards might vary
According to The National Center for Educational Statistics, only 64 percent of new faculty are in tenure-track positions compared to 74 percent of older faculty.

It recommends that instructors prepare for tenure in a number of ways:

- Conduct research that will yield appreciable results within the probation period, noting that quality and readership of material is as important or more important than quantity.
- Teach effectively.
- Behave responsibly: as a member of the academic community, Demonstrate that you can set goals and effectively and independently reach them.
- Serve on committees and volunteer to take on extra sections of first-year student courses.

Instructors will likely be judged more heavily on research if they are at a research-based institution, whereas those at more teacher-based institutions might be judged more on teaching abilities.

The individual departments play the first and most important role in deciding the fate of a professor. They review curriculum vitae, copies of publications, statement of research agenda, course syllabi, and other materials—followed by the entire institutional faculty, represented by an advisory committee on tenure, and the college or university administration. The challenges that can present themselves, however, and especially to minority and younger instructors, is that no matter how well prepared, new ideas or viewpoints can become an issue of contention for the more established departments. As Elsa Gómez, former president of Keck University, commented, I dealt with some cases in which new perspectives brought by the younger faculty were not always appreciated by older colleagues.

Case in Point

In one specific instance, Alfred Arteaga, former assistant professor of English at University of California-Berkeley, was denied tenure in 1988, although he was more than qualified and prepared. With a vitae that extends 11 pages— and includes authoring four books, 17 essays, and 29 lectures, receiving National Endowment grants and fellowships, a Rockefeller Fellowship, and a PEN Oakland Josephine Miles Award for Literary Excellence—he was denied tenure, and transferred to the Department of Ethnic Studies: "I not only met their criteria, but excelled beyond it," said Arteaga.

Arteaga, who was brought into the English Department as a Chancellor's Ethnic Minority Fellow for two years, beginning in 1989, was offered a tenure-track position of assistant professor after one year.

"All along, indications were that I was doing extremely well," he said, describing how colleagues suspected he would tenure early since he had conducted more research than had others on the same tenure track. The final denial of tenure for him was nothing less than "racist.

Arteaga taught the usual English courses—Shakespeare, Creative Writing, and Literary Theory. He also taught Chicano Literature within the department, and much of his lectures, books, and research focused on Latino literature. Arteaga described the English department as "extremely incestuous"—hiring its own for full-time faculty, and being particularly opposed to men of color. (Award-winning poet and author Gary Soto worked in the same department, and quit in 1996 due to failure on the department's part to recognize his merits and do so with appropriate compensation. "They are also extremely narrow in their idea of what literature is," said Arteaga, who has witnessed another colleague fired for presenting Filipino literature.

While Arteaga is engaged in a legal battle, with support from his union, others address the AACP for advice and intervention in these type of issues. Of late, however, the...
AAUP has heard complaints on issues of race less frequently. "More frequent have been gender cases," said Knight. He is concerned, however, that some schools are beginning to make collegiality an official standard for tenure approval. This, he and the AAUP believe, interferes with academic freedom—as Arteaga has discovered.

Although Arteaga's story shows the difficulties and challenges of tenure, he considers it essential that minorities seek tenure. Throughout the UC system, he said, there are only two tenured Latinos in English departments, a definite problem since only full professors decide on the fate of future tenure candidates, and sit on the board that makes decisions on publishing for UC Press. "The young coming up should do what they need to do to be tenured," he said. "We need to have as many viewpoints as possible."

An Insider's Perspective

Once individual departments give their approval or disapproval of a specific tenure candidate, it is up to the institution's instructional faculty committee, and the administrator (who can be deans or presidents) to find any omissions or discrepancies.

During Gómez's term as president of Kean University, she made certain to find any "star" candidates who might have been denied tenure because of differences in their viewpoints and those of their department heads. "We were involved in promoting some of the few Hispanics," she said of her administration. She agreed that Hispanics who want to talk about Latino literature in English class or Latino perspectives in a history class are going to experience an uphill battle. And those who want to publish research on subjects that do not have a broad appeal might also face difficulty in the tenure process. However, these kinds of struggles might get easier, she said, as older faculty and more established ideas are replaced by a new generation of ideas.

When asked what advice she would give to new teachers, she said, "Be sure you know what the process is in your institution, and make sure you are prepared." By "prepared," she meant having done community service and research and having a good presentation and argument for your right to tenure. "In some institutions," she said, "tenure has a step where work is submitted to others in your field in other institutions." Of great importance, Gómez also recommends finding an academic mentor—both like and unlike you—to help you through the process.

The tenure process can be long and arduous, lasting several years among the various departments and committees. There are those who make it through the first two rounds and discover that due to reasons relating to the finances of the institution, they are ultimately denied tenure.

If denied tenure, there are several options. You can appeal to the administrator who made the final decision or even approach civil courts if necessary. Appeals can be costly, however, and seldom result in reversals. Some people request more time to prepare for a second tenure at a later date, while others take the opportunity to seek employment at another institution. Since all tenure decisions must be given a year prior to the end of probation periods, there is ample time to do so.

Clearly the key to the tenure process is to be prepared, to shine in more ways than one, and then to cross your fingers and wait. After all, as Arteaga described it, once you have done all the work, "tenure is a wild card."
The Shared Success of Adelina Silva

Alamo's Award-winning Activist

BY JORGE A. RAMIREZ

District Director, Marketing and Public Relations, Alamo Community College District

When Lina Solis Silva was still in high school, she decided that she would pursue a college career. Even though no one in her family had gone to college, and even though financial resources were scarce.

Twenty-six years later, she holds a doctoral degree and has made a professional career of advancing higher education for those who most need it, and who are least likely to obtain it.

A recent award by San Antonio's Spanish-language newspaper, La Prensa, is only the latest in a long list of accomplishments and honors for Dr. Adelina S. Silva, district vice president for student program development at the Alamo Community College District in San Antonio, Texas.

When La Prensa Foundation presented “A Salute to San Antonio Latina Women in Action,” in March, Silva was the education honoree, recognized for helping to raise the educational level of Hispanics in San Antonio.

A product of the city’s predominantly Mexican American South Side, Adelina “Lina” Silva has carved out an impressive and influential path in higher education during the past 23 years. She is currently the highest-ranking Latina in the second largest community college district in Texas—and the 19th largest in the nation.

Silva's career as an educator began in 1975 when she became a classroom teacher at McCollum High School in the Harlandale Independent School District. The next year, she moved on to work for the counseling center at San Antonio College, the 21,000-student flagship of the Alamo district. Subsequent posts at San Antonio College included an internship as assistant to the president and her eleven-year tenure as counselor and coordinator of its Women's Center.

Silva's dedication bringing the services to students that most need them was manifested in 1993 when she was named president of student services at Palo Alto College, located deep in San Antonio's South Side. By 1985, Palo Alto was an incredible success story. The college...
proved the notion that South Siders weren't interested in higher education, quickly outgrowing its projected enrollment of 2,500 and recently peaking at 7,600 students.

'My years at Palo Alto were incredibly rewarding,' says Silva. 'What we did there was to broaden the scope of the type of work done at the Women's Center to meet the needs of the entire college.' Under Silva's leadership, the Student Service Division further reinforced its 'student first' philosophy.

'We promoted a culture of climate ensuring educational access and opportunity for all who came to our doors. By providing personal attention and individual planning to the students, we impacted the climate at PAC. When students came to us, we had solutions to their problems.' Working with students whose modal age was 19, mostly Hispanic and female, the school addressed the needs generated by cultural limitations and lack of role models, says Silva.

Fine-Tuning the Transitions

According to Pat Terrel, dean of Student Services at Palo Alto, Dr. Silva brought a strong sense of outreach and community to PAC when she started in 1993.

'We had always been a student-centered, consumer-oriented school, and Dr. Silva helped us to fine-tune our efforts. She helped us in providing an easy transition into college for first-generation college students.' With a major in English and a minor in Spanish, Silva quickly progressed to earning a master's in guidance and counseling from the then-fledgling University of Texas at San Antonio. That was in 1976.

At that point, Silva was already engrossed in a professional career in education and decided to work towards a doctorate, but a well-documented lack of doctoral programs in South Texas presented an obstacle.

'There were no Ph.D. programs in South Texas, so I had to go to the University of Texas at Austin for my doctorate,' says Silva. 'I was a single parent at the time, so I couldn't create a fresh start. Instead, I built on my community college leadership experiences and made that my area of study.'

From 1985 to 1988, Silva commuted the 85 miles from San Antonio to Austin several times a week, taking courses during vacation, holding a full-time job, and raising a young son.

'I started my course work for my doctoral degree when my son started first grade. By the time he finished third grade, his mother had her Ph.D. in community college leadership.'

Personal Philosophy

Silva's achievements are closely tied to her belief system. 'Intrinsic motivation, visualization—these are the things that make it happen for me,' she says. 'I knew I could succeed, and that led me to success.' This philosophical attitude has been prevalent throughout Silva's career.

When she established the Women's Center at San Antonio College, she drew from her own

---

"I feel proud of the systems left in place, including retention programs, special population programs, and a returning adult center."

ADELINA SILVA
experiences as a first-generation college-going Latina. Later, she drew from those experiences to conduct research for her doctoral thesis, “Stressful Life Experiences and Career Choices of Re-Entry Women in Community Colleges.” Through questionnaires and surveys with former students, her research concluded that success was closely tied to self-assurance.

“The experiences and the research with students led to the idea that if you thought you had control of our life, you thought you could succeed,” she points out.

Community Centers

Silva was promoted to her District position in student program development in 1998. Since then, her efforts have been concentrated on military base educational offerings, programs for returning women, transfer centers, dual-credit offerings, partnerships with schools, and welfare to work recruitment.

Most recently she has spearheaded the establishment, under the direction of ACCD Chancellor Dr. Robert W. Ramsey, of three community education service centers. The centers are opening in partnership with local school districts and churches and are located in heavily minority communities.

The centers, operated by District staff, provide such services as assessment of basic and academic skills, preparation for state-mandated tests, career exploration and training information, preliminary college registration, on-line financial assistance and college educational networks and referral systems.

“Dr. Silva’s extensive experience in working with under-served populations makes her the right person for this project,” said Chancellor Ramsey. “We want to bring the colleges to the community. The centers will provide easier access and opportunities, bringing the possibility of a college education one step closer for potential students who might need the extra little bit of help. They should prove especially beneficial for first-generation college-goers.”

“At this point, the systems are in place,” says Silva, “and the center operating in conjunction with Harlandale Independent School District is seeing steady traffic.

“Students are being enrolled on site, and financial aid information and assessment are also taking place. Our staff is interacting closely with high school counselors, parent-teacher organizations, and church organizations to get the word out and the response has been overwhelming.”

Although she has made her mark as an administrator, Dr. Silva has also stayed in close contact with the classroom by teaching. She currently holds the academic rank of professor in the ACCD. From 1992 to 1995, she was an adjunct faculty member at Texas A&M University, teaching educational human resources development, and in Spring 1996, she joined the graduate faculty of Webster University in the business, management, and human resources development departments.

Silva also is extremely active on committees and boards. She serves on the Ethics Review Commission of the City of San Antonio and as vice president for finance and resource development of the Texas Chapter of the American Association of Women in Community Colleges. She was State President of the Jr College Personnel Association of Texas from 1993-1995 and a board member for eight years. Silva has been a member of Hispanics Unidos since 1983 and has served with health groups such as the Women’s AIDS Task Force, and the Regional Alcohol and Drug Abuse Advisory Council.

Her many awards include recent commendation by Palo Alto and San Antonio College groups and being named a fellow at the National Community College Hispanic Council Leadership Training Program sponsored by the Ford Foundation. In 1990, she was a member of the First Official City of San Antonio Women’s Delegation to Kumamoto, Japan, in commemoration of the Grand Opening of the Kumamoto Municipal Women’s Affairs and Cultural Center in Kumamoto City. In 1991, she was inducted into the Harlandale School District Hall of Fame as a distinguished graduate of McCollum High School.

A prolific presenter at conferences and programs, Silva has spoken before the American Association of Community Colleges National Conference, employment programs at military bases and chambers of commerce.

Silva is a member of several professional organizations, among them the American Association of Community Colleges, the Texas Association of Chicanos in Higher Education, the Texas Chapter of the American Association of Women in Community Colleges, and LLUAC.

“In the course of a career,” says Silva, “you learn to take advantage of opportunities when it lends itself, whether it be help from an individual, participation in a particular program, or an individual’s mentorship. I think it then becomes our responsibility to try to facilitate these types of opportunities for others. Someone has opened the door for you—you open it for others.”
Hispanics Choosing by Price and Proximity  

Early Search Less than Ideal

BY ROSIE CARBO

U.S. News & World Report has been publishing its annual rankings of the more than 1,400 accredited four-year colleges and universities since 1983. But despite a wealth of eye-catching magazines and state-of-the-art videos and CD-ROMs, the information has not reached many Hispanic high school students.

"Someone gave me a book that listed the top 50 Hispanic colleges. But it wasn't U.S. News & World Report. It was another book," says Michael Vasquez, a 20-year-old sophomore at Southern Methodist University in Dallas.

"I looked at several magazines that have rankings. I also used the Internet. But no, I can't say that I used the U.S. News & World rankings," says Elsie Hernandez, a 23-year-old graduate of SMC.

Michael and Elsie are two Hispanic college students who were unaware of U.S. News's rankings when they began applying to colleges and universities as seniors.

We publish the rankings for the benefit of all high school students. We don't just publish the materials for Hispanic students or other minority groups," says Katie Crocker, director of corporate communications for the New York-based publishing company. "That's why I doubt that we even have any per centages or numbers on how many Hispanic students use our ranking materials each year," adds Crocker.

The comparative information concerning the nation's best colleges and universities includes class sizes, graduation rates, scholastic aptitude test scores, and class standing of accepted applicants. Nevertheless, mouse on a personal computer, enabling students to actually take a tour of universities without leaving home, is often ignored or overlooked. "Some students use the information, and some don't. We think it's going to take a long, long time to change the attitude that college is not for them because we're fighting an uphill cultural battle," says Cohen.

Located in San Francisco's old historic district, Mission High is more than "5 percent Hispanic. In fact, it's known as the Latino high school because no other school in the city has as many Hispanic students. "Our Hispanic students aren't much different from our African American students in that both groups come to us with low percentiles on standardized test scores," Cohen says. Consequently, Hispanic and African American students come to Mission High already predisposed to the idea that they'll never go on to any college. "We see the same things in African American students that we see in Hispanic students. And that is that most of them don't come here thinking they're going to college when they finish here," she says.

"That's something I think is terrible! So we spend the next four years trying to persuade them to believe otherwise. But part of the problem is cultural. They just don't
see education as their ticket out," says Cohen.

Unlike Mission, other high schools around the country might employ counselors who are prejudiced because they assume Hispanic students don't need information concerning the best colleges and universities. "I did some calling around to different schools here in the Chicago area, and what some counselors said really surprised me," says Maria Barba, coordinator for the Office of Policy and Research at the Chicago High School District.

"Some counselors said they didn't make the information about college available to some Hispanic students because they only had a 2.8 grade point average. So they weren't going to college anyway...I couldn't believe that was coming from a counselor," says Barba, a Mexico City native.

"I interviewed two families whose children were seniors and are about to start college. And they said, "U.S. News and who?" Even the five counselors I talked to said they hadn't heard of it," says Barba. Nonetheless, Barba's research did reveal two factors that seem to determine if a Hispanic high school student attends college at all—and if so, where.

"I will say that lack of financial resources to pay for college was the No.1 concern I heard in talking to several parents," Barba says. "The financial concern was followed in every case by a concern about the proximity of the college to the student's home. Rankings were never an issue. "Finances is the No.1 issue—not rankings. Another big concern is distance. That's why most students here go to a city college instead of the University of Illinois or other universities," says Barba.

Other educators consistently echoed Barba's findings about money and distance being more important to Hispanic students overall than college rankings. "I knew that if I wanted to go to college, it would have to be a commuter school. Now I live at home and commute. It's only a 30-minute drive. But economically, that was my only option," says Andres, a 19-year-old first-year student at the University of Texas in Arlington.

With the hard choices that many Hispanic students must face regarding who will pay for college if they decide to go, it's even more imperative that they be able to access the information on colleges for free. Says a Houston counselor, "I hate to say this, but there are some companies out there that just want to make money from the students and their parents." Says Jorge Mercado, a counselor at Houston's Milby High School, where the student population is nearly 100 percent Hispanic.

"I know of one case where the parents bought a computer program about getting into college for $800," says Mercado. "I was a Houston Independent School District counselor since 1989 and a Puerto Rico native. "We could have got it for nothing. Now I tell the parents not to spend money on any of those materials. We can access all the college-related materials they'll need for free." Mercado says that one company, Texas Mentor, recently ensured its message was received by sending a free college program designed for each individual Milby High School student.

"The key information that most Hispanic students are looking for is scholarship money. It's a matter of survival..." says Leonard Dominguez, Chief of Policy, CSD.

Report materials are not free if purchased in bookstores or by mail. But the materials are consistently made available to school districts around the country.

In fact, the World Wide Web has become a great place to find and access college sites across the country, arriving on campus virtually within seconds of clicking a computer keyboard's buttons. Additionally, there are plenty of other more traditional programs available to students free for the asking and through their own school district career office centers.

"I don't think U.S. News has been used here very extensively in the past. But that's just one tool available to students. There are many others, such as Peterson's Guide to College and Princeton Review," says Joe Guerra, a counselor at Skyline High School in Dallas, where the Hispanic student population is nearly 100 percent.

Even if a student doesn't have a personal home computer, several counselors say that there are work stations and career centers where any student can access information about colleges and universities. "All
counselors provide counseling and guidance to students whether they’re Hispanic or not,” says Debra Mayorga, director of counseling for the H1SD (Houston Independent School District). “Counselors have all kinds of resources in their offices. We also have career centers at most schools that have computer any student can use,” Mayorga says.

U.S. News & World, one of the best-known resources for accessing educational information across the board, has always been aware that not every student owns a personal computer.”All our resource materials that focus on the rankings of colleges and universities are published in book or magazine form so that even someone who doesn’t have a computer can access the information,” says Crocker about the giant publishing company.

“Since I don’t have a computer yet, I have to get up at 2 or 3 a.m. and drive to the university’s computer lab to do my homework each night,” says Andres, admitting that his family never had the money to buy a computer when he was growing up.

Michael and Elsie didn’t have home computers either, due primarily to the same financial limitations. The result was further obstruction to early information on colleges and universities. “I’m from a family of 10 children, and we never had the money to buy other basic necessities. So a computer was out of the question,” says Michael, who recently lost his mother to cancer. “But now that I got a scholarship to SMC, I live on campus at the dorm. I just go to the computer lab to do my homework. So does my brother, who also got a scholarship and is a freshman.” Michael says.

In its printed materials, however, U.S. News encourages students to use human resources such as face-to-face interviews with professors as well as students before selecting a college or university.

Olga Math is a career guidance counselor at Skyline High School in Dallas, where going o-line was a recent coming of age for the school.

“Believe it or not, we’ve just gotten online on the Internet here on campus. The district is far behind in counseling office computers. So only the students who have home computers have been able to apply on-line,” says Math, who’s been with the Dallas Independent School District for nearly 30 years. Still, even if the school in the predominantly Hispanic district of Dallas were fully computer equipped, the reality is that economics is what determines whether students go to college—not rankings, she says.

“Many are first-generation children of immigrants who never attended a college or university. So they don’t have a role model or anyone to guide them through the application process but teachers and counselors,” says Math. “Economics and not rankings are what determine whether they go to a four-year college. And sometimes that’s based on if they’re able to earn a scholarship. But they can’t get one unless they pass the Texas Assessment of Skills Test (TAST), which many score low on and find very intimidating,” Math says.

As a result, she says, if they go to college at all, it’s often a two-year community college closer to their home and family, which serves as a support system for them. Skyline has 4,000 students, of whom 600 are graduating seniors. And 44 percent will go to a four-year college while 20 percent will go to a local community college.

“Most of what we do is college night, where about 60 colleges come on campus to talk to students. But I think if U.S. News would advertise in Hispanic magazines, like Latina and Hispanic, they’d reach Hispanic students a lot better.” Math says. “I think the ranking are very important because our top students use them, and I do think our counselors disseminate the information. But you’re always gonna have one or two students who never saw it,” says Mercado.

Rosie Carbo is a Texas-based freelance writer.
Does anyone remember pen and paper? Today, the computer screen, keyboard, mouse, and Internet are more familiar to young people.

One indication of this development on the changing academic landscape is the announcement that students now have the option of applying to The University of Wisconsin System by way of an on-line undergraduate admission program. This includes campuses such as the main campus in Madison, established in 1848, the Stout campus in Menomonie, established in 1894, and the Milwaukee campus, established in 1885. Applying via state-of-the-art electronic means should not come as much of a surprise.

The University of Wisconsin-Madison and the other institutions in the Wisconsin System have always had a reputation for being technologically advanced learning centers and a virtual research powerhouse. Now students who have spent as much time on-line as former generations spent in front of the television set will feel right at home as they log on, fill out, and process their electronic application. Once all the required information is received by a UW System campus admission officer, the student’s application is reviewed and evaluated. If other documents are required, the applicant is notified. The step-by-step instructions are detailed and clear, and there is plenty of on-line help. Just like other computer programs, this one comes complete with a host of message buttons, error buttons, and “Web Masters Tips, Tricks and Techniques” that provide additional information or that flag incomplete or inaccurate responses. It’s like finding a really engrossing computer game called “Your Future in Higher Education at the University of Wisconsin,” but unlike most computer games, getting a high score here and gaining admission to this highly regarded University, really is a win for the participating student.

While students everywhere are filing their UW applications on-line, we welcome The University of Wisconsin to the Hispanic Outlook Honor Roll, in part for bringing the application process that much closer to the reality of today’s high-technology tools.

Last year the State of Wisconsin and the main campus of the University of Wisconsin celebrated sesquicentennials. According to University of Wisconsin-Madison Chancellor David Ward, the formal relationship between the State of Wisconsin and the University of Wisconsin-Madison dates back to 1848, when the State and the University were established. Ward relates, “On May 29 of that year, the Wisconsin Territory was granted statehood by the United States Congress. The Constitution of
this new state provided for the establishment, by law, of a state university 'at or near the seat of state government.' Less than two months later—58 days, to be exact—the Wisconsin Legislature approved the incorporation of the University of Wisconsin." By statute, the university was to be governed by a 13-member board of regents. The institution was divided into four departments: Science, Literature and the Arts; Law; Medicine; and Theory and Practice of Elementary Instruction. The first class was held February 5, 1849. "I am amazed at the foresight of the early state lawmakers to establish a university in Wisconsin's newly settled wilderness, on the pristine shores of Lake Mendota," observes Chancellor Ward. "With many of the State's settlers striving to reap their livelihoods from the undeveloped land of this frontier territory," he notes, "the vision of the first Wisconsin Legislature in laying the foundation for UW-Madison is nothing short of exemplary."

The excellence of the UW System has resonated through the lives of millions of people over many decades. Through teaching, research, and public service, the University has made itself felt in countless ways in Wisconsin and around the world. To honor each of the 150 years of the institutions sesquicentennial, the University of Wisconsin created "150 ways the University of Wisconsin-Madison has touched the world." It is a fascinating read, spanning the history of this fine institution, and is highly recommended for anyone interested in the history of higher education, or just settling down for an enjoyable read. For example: Number 8, Civil War lore. The Civil War prompted great comings and goings for the infant campus. Going were many of the male students and new alumni of the 40 graduates up to 1864. 28 joined the Union Army, and a few served the southern cause.

Honor Roll Facts in Brief

INSTITUTION

Coming were Wisconsin troops who served at Camp Randall, an open
dead on the edge of the academy that in 1894 was acquired by the
university to serve as an athletic field. Then there's number 43, The
Spirit of Madison. "Lucky Lindbergh"—Charles Lindbergh, alumnus from
the UW, completed his first solo flight across the Atlantic in 1927. He finally received a UW degree—an honorary one—in 1928.

Many relate to research and development, like Number 62, Digital
dad, John Atanasoff, a UW physics graduate who in 1941 cobbled
together a crude computing device powered by vacuum tubes that
would be used as part of the first electronic digital computer. Then
there's Nobel Prize winner Joshua Lederberg, who's work with bacte-
ria is seminal to genetics, and professor Arthur Robinson's more
accurate map projection, adopted by the National Geographic
Society. Last but not last, we have number 150, UW student Henry
Anderson, who in May 1998 earned his bachelor's degree in
history—so remarkable an age of — some triumphs are global, some
are more personal.

The University of Wisconsin has so much to be proud about. Here
on Madison's Bascom Hill is where young John Muir attended class-
es. America's foremost conservationist, he later became founder of
the Sierra Club and the founder of the National Park System. Here is
where Aldo Leopold, author of Sand County Almanac, taught, wrote,
and developed his hugely influential "land ethic," that established
the nation's first department of wildlife management.

The first social security legislation was drafted here. Vitamins A
and B were discovered here, the first gene synthesized, the first bone
marrow transplant conducted, the first true space observatory con-
structed.

Today, students can dream their own dream, build their careers,
and make significant contributions based on the remarkable legacy
of UW-Madison researchers, teachers, and alumni.

Majors are offered at UW-Madison in 150 undergraduate, 182
master's, and 125 doctoral programs. Schools and colleges include
Agricultural and Life Sciences, Business, Education, Engineering,
Graduate, Human Ecology, Law, Letters and Science—which includes
Library and Information Studies, Journalism and Mass
Communication, Music and Social Work. Medicine, Natural
Resources, Nursing, Pharmacy, and Veterinary Medicine.

More than 30,000 doctorates have been awarded. Few, if any,
institutions in the world can match that record. UW-Madison awards
the third-largest number of doctorates in the nation each year.

Based on a number of surveys and studies compiled between
1982 and 1994, the University has 65 separate graduate or under-
graduate academic departments rated among the top ten in the
country. UW-Madison ranked third among the nation's universities in
research and development spending in fiscal year 1994-1995, with a
total of $369.5 million. Among public universities, UW-Madison
ranked fourth in federal research grants received. At any one time,
about 9,500 research projects are being conducted on campus.

The University Research Park, which opened in 1981, now has
more than 63 companies as tenants, with nearly 1,800 employees and
more than 60,000 square feet of office and laboratory space. It gen-
erates more than $1 million in property taxes for Madison annually.

The Wisconsin Alumni Research Foundation has obtained more
than 800 U.S. patents for the university since its founding in 1925,
resulting in more than $3.4 million in sales to the University.

Enrollment of 40,100 students in 1998-1999 makes it the sixth
largest university in the nation. Madison University of the class
came from the top 10 percent of their high school class. Students hail
from every state in the union, although according to Board of
Regents policy, no more than 45 percent of the university's under-
graduate students can be from beyond the state's borders (and
Minnesota, because of a reciprocity agreement).

Ethnic minorities enrolled in 1998-1999 totaled 3,148 or 9.34 per-
cent, up from 2,878 or 6.57 percent the ten years before. 1,000 of last
year's students (2.49 percent) were Hispanic.

UW-Madison is among the least expensive schools in the Big Ten
Conference. Annual undergraduate in-state tuition and fees totalled
ranked No.

Of the 1,135 total faculty, 213 or 18.1 percent are minority group
members. Thirteen Nobel Prizes and 22 Pulitzer Prizes have been
awarded to UW faculty or alumni: 46 faculty are members of the
National Academy of Sciences, 44 are members of the National
Academy of Engineering; and three are members of the National
Academy of Arts and Letters. Some faculty members have won the
National Medal of Science, and three are Sharee Scholars.

Chancellor Ward stresses that The University of Wisconsin is com-
mitted to the recruitment and retention of students, faculty, and staff
of color. Many offices and programs throughout the university have
staff members who counsel and provide information to prospective
students of color. The institution has scholarships designed "specif-
ically for designated American ethnic minority students." While finan-
cial need is the primary criterion for most of the general aid and
grant programs, scholarships are generally awarded on the basis of
academic excellence.

The Chancellor's Scholarship Program recognizes the outstanding
academic achievements of historically underrepresented stu-
dents. This campus-wide scholarship offers a variety of academic
and co-curricular activities to enhance the overall quality of the
collegiate experience. There is the Wisconsin Idea, "a century-
old concept of teaching, research, and outreach that extends
beyond the walls of the university's classrooms to the boundaries
of the state." The Chancellor notes, "It is clear to me that The
Wisconsin Idea must be more interactive. Today the boundaries of
our universes reach beyond the state to encircle the globe.
Remaining the best guarantees that UW-Madison students will con-
tinue to be among the best educated in the country, and their diplo-
mas will stay highly valued across the globe."
A School Grows in Brooklyn

Accolades for Experimental School

BY GARY STERN

An experimental Brooklyn school, part of New York City's New Visions program in which community leaders and educators create schools with innovative themes, is gaining recognition as a model institution.

Launched by Frances Lucerna, the school's principal, and her husband, Luis Garden-Acosta, who is executive director of the El Puente community development center, the El Puente Academy for Peace and Justice is dedicated to fostering human rights, social justice, and community activism.

Lucerna and Garden-Acosta were chosen for a Heinz Family Foundation award of $250,000 for their efforts in establishing the school.

The foundation chose them because "in the face of so much cynicism and hopelessness, we want to honor people who have a passion for excellence and an ability to persevere against all odds," Teresa Heinz, the foundation's chairwoman, told the New York Times. The El Puente Academy was viewed as one of the most significant accomplishments pertaining to the human condition.

Over the years, they've had a track record of success," said Russ Marz, director of communications at the Heinz Family Foundation, which is based in Pittsburgh. A school in Detroit is exploring using El Puente's structure as a model for its school, he said.

El Puente Academy for Peace and Justice opened in September.

The school operates as a partnership between El Puente, the community center, and the Board of Education.

The school's mission "is connected with ideas of democracy, participation, and being a good citizen, and revolves around one's rights as a human being," said the 47-year-old Lucerna, who earned a master's degree in Education from the Bank Street School of Education. Interestingly, before becoming principal, she had never been a teacher, having spent her career as a modern dancer and arts administrator at the Williamsburg Arts and Cultural Council for Youth. Its theme is an outgrowth of Hispanic culture.
since "we as Latinos are particularly connected to our families and community," Lucerna said.

Fittingly, the genesis of the school derives from suggestions by students themselves. In 1990, then-Mayor David Dinkins established the Decade of the Child and held community meetings in which students could express their major concerns. Students of all ethnic and racial backgrounds convened at an open forum, discussing violence, their fears, and their future. One student arose and exclaimed, "We have schools that teach us about the arts and technology, but why not have a school that teaches us to be peacemakers?" That student's suggestion reinforced what Lucerna and Garden-Acosta had been considering for some time and propelled them into action. After completing numerous forms and detailing the schools mission in an application to New Visions, El Puente Academy for Peace and Justice was born.

Nurturing leaders is one of the school's major imperatives. Students are encouraged not just to study and master academics but also to get involved in their community. For example, El Puente Academy students designed and continue to run a local Williamsburg community garden and organized a clinic at which more than 100 people were vaccinated to prevent the measles. Students have organized community vendors' markets and designed a food co-op for the community. In addition, students attend leadership workshops and conferences, serve internships with environmental groups, get involved in community health and environmental issues. "We are trying to connect academics into social action," said its principal.

How do students become leaders? "By becoming actively involved in those issues that deal with social justice and human rights," Lucerna replied. How do students become leaders? "By becoming actively involved in those issues that deal with social justice and human rights," Lucerna replied. For example, Williamsburg, one of the city's poorest neighborhoods, has had many incidences of lead poisoning. El Puente students in their science classes have conducted studies of lead and then, dedicated to improving the environment, rallied to prevent an incinerator from being built in the neighborhood, as it could have contributed to more pollution. Students participated in and observed City Council hearings, and wrote letters, demonstrating leadership.

Exemplifying the school's leadership training is Geisy Colon, a Brooklyn resident and native of the Dominican Republic who graduated from El Puente in 1998 and is completing her sophomore year at Sarah Lawrence College, an academically rigorous school in Bronxville, New York. Frustrated by the anonymity of her first large New York City high school, Colon had found a home at El Puente. The school "prepared me for academic excellence and interaction with the community," she said. She and her fellow students helped create the El Puente Community Gardens in Williamsburg, in which they worked closely with community leaders. Not only was she taught how to master academics, but she learned "about the passion of learning. The more I learned about politics and literature, the more hungry I was for learning." It is no coincidence that Colon serves as one of the leaders of Harambee, an activist group for minority students at Sarah Lawrence, or that she plans on becoming a United Nations interpreter or teacher.

Collaborating with facilitators, artists, community organizers, or environmentalists on a special project impacts students such as Colon. One recent project led to students doing research on the history of the garment industry in New York, presenting a fashion show, and discussing the exploitation of workers. Students studied the garment industry in a cross-disciplinary way, researched the history of sweatshops, and made connections to many of their parents who work in local clothing factories.

The school is linked to El Puente, the community center in which it is housed. At most city high schools, when the final bell rings, students stream out the door relieved that school is over. At El Puente, many students remain in the school well past 5 o'clock, tutoring elementary school students, involved in community projects, or working with the community center. "The school is viewed as an extension of the community-based organization," Lucerna

---

El Puente Academy Cultural Bazaar
observed. "After 5 p.m. and until 9 p.m. there are tutorials, arts-related classes, parents taking classes," she said, describing a true learning and neighborhood community center.

In fact, the school's name, El Puente, which means the bridge in Spanish, provides a clue to its overall mission: "We see ourselves as a bridge to our members and their families. We're a bridge to the community. People rejoined together to fight for their rights," asserted Lucerna.

Half of its students are selected by El Puente while the remainder are assigned to the school because they live in proximity to it or in Brooklyn. Of the fifty percent who are selected, El Puente looks for community involvement rather than academic achievement or test scores. Of its 11 teachers, half were selected by the principal and the remainder were assigned that school, abiding by union rules.

Its students are succeeding academically, Lucerna said. More than three quarters of those who take the Regents Exam pass the Regents Exam, and over 90 percent of its 28 graduates in 1998 and 33 graduates in 1999 move on to either two- or four-year colleges. New York City's schools, like others in Chicago, Los Angeles, and elsewhere, have been demanding that students pass the statewide Regents Exam and take more academic courses in order to be granted an academic diploma. The school strives to teach students how to take a test and how to write essays as well as how to get involved in activist projects. An interactive math program encourages problem-solving and active learning, for example. Academic standards at El Puente are no different from those at other New York City high schools and the science curriculum includes challenging courses such as biochemistry and physics. Classes, however, are smaller—most have 15 to 25 in a class whereas most city high schools have 35 and rarely go under 30.

Establishing high standards and encouraging community involvement are closely connected, Lucerna suggested. "If you have values about respect, integrity, and good citizenship, then you'll have high standards of education well. We set high standards to encourage students to become better citizens and apply knowledge learned to actual issues," she added. Bilingual classes in such a small school are not viable. Though most of its Latino students are bilingual, they learn in English classes. "We have an integrated program here," Lucerna said, and classes are small enough so that individual attention can be granted.

Because the school encourages students to show activism in community projects, critics charge that the school indoctrinates its students to believe in a certain social agenda. Education is supposed to present ideas and not take a one-sided, biased side of any issue, including social action. Asked whether the school imposes its values on its students, Lucerna replied, "I disagree with those people who say that education is not political. Young people at El Puente are not forced to do anything. We don't force them to speak up or demonstrate. We give them opportunities to investigate and explore issues that they deal with every single day such as wellness or civil rights. We're presenting issues," not indoctrinating, she said.

If a student were to support building an incinerator in the neighborhood, which counters the dominant community's sentiment, Lucerna noted that this view would be perfectly acceptable. But aren't students influenced by subtle, insinuated messages more than explicit ones? "We are offering student-centered education," she said, hinting that issues covered should be relevant to El Puente's students' lives but ideas are not imposed on them.

How has the quarter-of-a-million-dollar award and ensuing publicity affected Lucerna, who admits that she's essentially a shy person? Since the couple recently adopted a boy from China, the award is enabling them to provide a better life for their child. In addition, "it's been a tremendous validation of our work and incentive for young people to do community work. The award sends a message to our students this is important work."

"The more I learned about politics and literature, the more hungry I was for learning." El Puente graduate Geimi Colón, now at Sarah Lawrence

A&M International's García Assumes New Position

Texas A&M International University Vice President for Finance and Administration José García was elected president of the Southern Association of College and University Business Officers (SACUBO) for the 1999-2000 term.

García is also president of the Texas Association of State Senior College and University Business Officers for the 1998-2000 term.

Founded in 1929, SACUBO, formerly known as the Southern Educational Buyers and Business Officers Association, aims to foster sound principles, effective and efficient practices, and ethical conduct in business management. The group has more than 900 members from a 14-state region of the country.

Solís Speaks at Michigan-Flint

Luis Guillermo Solís, professor of political science at the University of Costa Rica and former ambassador to Central America, gave a lecture, "Costa Rica, the U.S., and Sustainable Development," at the University of Michigan-Flint.

Solís has held positions within the Costa Rican Ministry of Foreign Affairs and the National Liberation Party. He also has been a member of the Costa Rican delegation to the United Nations and the Organization of American States.

Solís has a bachelor's degree from the University of Costa Rica and a master's from Tulane University.

Sánchez Selected for Bush School Masters Program

Arturo Sánchez III became the first Texas A&M International University student to be selected for admission to Texas A&M University's George Bush School of Government and Public Service Masters Program. Sánchez will receive a $5,000 Bush fellowship to the two-year, full-time degree program beginning in August.

The Master's is a demanding, two-year program of study. Students are expected to pursue their studies on a full-time basis, carrying 12 graduate credit hours per semester, with a summer internship after the completion of the first year.

Lugo to Attend Executive Leadership Institute

Ruth E. Lugo LaGuardia Community College (N.Y.) dean of student affairs and enrollment management, is one of 38 community college leaders selected to attend the prestigious Executive Leadership Institute in Newport Beach, Calif., in August.

The purpose of the institute is to provide an opportunity for selected community college leaders to review their abilities and interests, to refine their skills, and to participate in discussions on leadership with outstanding community college educators in America.

Lugo graduated from the University of Puerto Rico, and earned a master's degree from Middlebury College and a doctorate from the State University of New York-Stony Brook.

Alegría and Moreno Receive Honorary Degrees

Ricardo Alegría and Rita Moreno each received honorary degrees from Trinity College/CT.

Alegria, an esteemed authority on Puerto Rican culture who is often referred to as the father of Puerto Rico, is the director of the Center of Advanced Studies of Puerto Rico and founder of the Institute of Puerto Rican Culture. He is a scholar of pre-Hispanic indigenous Caribbean history and the author of more than 25 books. He received a Doctor of Humane Letters.

Moreno is one of only four performers to have won an Oscar, Tony, Emmy, and Grammy award. She is one of 32 private citizens named by President Clinton to serve on the President's Committee on the Arts and the Humanities. She received a Doctor of Music.

Monteiro Publishes CD

Dr. José G., Monteiro, of Northern Virginia Community College, has published the CD Carmen, available at the Annandale Campus bookstore.

Carmen is a multimedia review Spanish course that covers the main topics presented by most elementary and intermediate college courses. All 49 topics in Carmen have a similar format that includes the forms of verbs, pronouns, etc., the rules of grammar, and a practice section that has 25 to 50 examples. Each example has a blank for the student to answer, a button to get the right answer, another button to get the English translation, and an icon to get an oral answer.

Knowledge of U.S.-Panama Relations Timely for Mellander

In the past year, Dr. Gustavo A. Mellander, a George Mason University (Va.) professor, and columnist for Hispanic Outlook, has lectured widely on U.S.-Panama relations in Virginia, California, Puerto Rico, and New Jersey. He has been quoted frequently by the news media.

1430
in the United States and in Latin America.

His topic is particularly timely since the U.S. will turn the Panama Canal over to Panama in December. Panama’s recently elected president will have begun her term by that time, which might result in more intense media coverage.

Mellander conducted research at archives, libraries, and governmental agencies in Washington, D.C., and in Panama, and has written two books, including a “best seller” on U.S. involvement in Panama, and has been conducting research for another.

Huerta Gives First Usiglì Lecture

Jorge Huerta, professor of theatre at the University of California-San Diego, presented Miami University’s (Ohio) first Rodolfo Usiglì Lecture in Mexican American Literature and the Arts. Huerta reflected on the contribution of Chicanos to the American stage while tracing their cultural and creative roots to the Mexican experience.

The founder and artistic director of the Teatro de la Esperanza in Santa Barbara, Calif., Huerta also offered a directing class and a text interpretation workshop for undergraduate and graduate students in Spanish and theater.

Richardson Addresses Boston College Graduates

United States Energy Secretary Bill Richardson, a former United Nations ambassador who as a diplomatic troubleshooter helped free prisoners in Bangladesh, Cuba, and Iraq, received an honorary Doctor of Law degree and addressed the graduates at Boston College’s 123rd Commencement.

Richardson, the highest-ranking Hispanic in the Clinton administration, became the first person in history to hold two Cabinet posts at the same time when he took over as energy secretary in August 1998 while still serving as U.S. ambassador to the United Nations.

He is a graduate of Tufts University and the Fletcher School of Law and Diplomacy.

Gonzales Wins University Service Award

Michale Grace Gonzales was awarded the University Award for Outstanding Service and Leadership in Co-Curricular Activities at Jacksonville University’s (Fla.) commencement ceremonies. The award recognizes the graduating senior whose service contributions to the university and participation in co-curricular activities have been of the highest order.

Gonzales belonged to many organizations, including the National Education Association, the homecoming committee, the student government association, the Order of Omega, the NCAA Self-Accreditation Steering Committee, Green Res., the IMPACT Leadership Program, and Alpha Delta Pi sorority.

She received a bachelor’s degree and plans a career as a teacher.

Picado Delivers Address at Elmhurst College

Sonia Picado Sotela, a member of the Legislative Assembly of Costa Rica and former ambassador to the United States, delivered the commencement address at Elmhurst College (III.). Picado was awarded an honorary Doctor of Laws degree.

Picado has served in Costa Rica’s Legislative Assembly and as president of the political party Liberacion Nacional since 1998, following a four-year term as ambassador to the United States.

Ambassador Picado has been a strong and respected advocate of human rights in the Americas, and is viewed as a likely presidential candidate in Costa Rica,” said Dr. Bryant L. Cureton, Elmhurst College president.

Del Olmo Gives First Salazar Lecture

Pulitzer Prize-winning Los Angeles Times columnist and editor Frank Del Olmo was the speaker at the inaugural Ruben Salazar Memorial Lecture at the University of California-Santa Barbara (UCSB). His talk was titled, “Beware Drive-by Journalism: Latinos, Politics and the Media.”

Those subjects were among the favorites of the pioneering Chicano journalist Salazar during his 15-year career with The El Paso Herald-Post, The Los Angeles Times, and Spanish-language KMEX television in Los Angeles, a career cut short when he was killed by Los Angeles County sheriff’s deputies in 1970 at age 22. After covering a Chicano anti-Vietnam war rally, Salazar was in a cafe with his crew when police fired tear gas into the building. Salazar was hit in the head by a canister and died.

Mario Garcia, a UCSB professor of Chicano studies and history, said, “Salazar opened the door and showed that Latinos could be good journalists.”

Cantú New Fresno City Dean of Instruction

Anthony Cantú recently became the new dean of instruction at Fresno City College (Calif.). Cantú has headed the college’s humanities division since 1994.

“I think Mr. Cantú will do an outstanding job, as he’s done in the past with our district,” said Fresno City College President Dr. Daniel Laraos.

Currently pursuing a doctorate in educational leadership, Cantú has two bachelor’s degrees from California State University-Long Beach and a master’s from California State University-Fresno.
Pinela Selected for Outstanding Technical Paper

California State University-Los Angeles technology student Gerardo Pinela was the only student selected nationally by the Research and Engineering Council of Graphics Industry, Inc., in its call for technical papers. It is the first time a Cal State-L.A. printing management student received the honor.

The award included a $1,000 scholarship plus expenses paid to attend the 40th Annual Critical Trends Conference, where Pinela presented his winning paper: "Digital Printing: The Innovation for Personalized Printing.”

Sánchez Helping Latinos Near U.S.-Mexico Border

Recent University of Texas (UT)-Austin graduate Patricia Sánchez is preparing a presentation workshop designed to help new immigrants near the U.S.-Mexico border take full advantage of the American public school system and move ahead successfully. Sánchez is also working on an “action research” project that will improve communities and schools.

A first-generation American, the daughter of Mexican immigrants, Sánchez, as a child, received valuable help from a friend who enabled her to “work” the school system. In May, she received a master’s degree from UT-Austin in Latin American Studies, and she will now try for a doctorate in education and social cultural studies at the University of California-Berkeley.

“I will hopefully be bringing to academia a newer perspective, a less heard voice,” said Sánchez.

Mollinedo Honored as Distinguished Alumni

Los Angeles Zoo Director Manuel Mollinedo was presented the Distinguished Alumni Award at California State University-Los Angeles’ 20th Alumni Awards Gala.

The Los Angeles Times has cited Mollinedo for “the turnaround and reaccreditation of the Los Angeles Zoo, and for having an insider’s knowledge of the city’s Byzantine political structure.”

Mollinedo has two bachelor’s degrees and a master’s from Cal State-L.A. and a master’s from the University of Southern California.

Pictured left to right are Cal State-L.A. President James M. Rosser, Mollinedo, and Cal State-L.A. Alumni Association President Linda Wah.

Zavaleta New External Affairs Vice President

Dr. Antonio N. Zavaleta, interim vice president for administration and planning at the University of Texas-Brownsville and Texas Southmost College (TIB/TSC), was named vice president for external affairs beginning in August.

Zavaleta will be responsible for developing new outreach projects designed to serve the workforce needs of the international service region, as well as enhancing existing projects. He also will be responsible for TIB/TSC’s continuing education, governmental relations, off-campus sites, and development of public-private partnerships.

Zavaleta has a bachelor’s degree, a master’s, and a doctorate from the University of Texas-Austin.

Hidalgo Receives Smithsonian Fellowship

Dennis Hidalgo, a native of Puerto Rico and a history doctoral student at Central Michigan University was awarded a fellowship appointment at the Smithsonian Institution’s National Museum of American History in Washington, D.C.

Hidalgo will work on his doctoral dissertation while under the auspices of the Smithsonian Institution. His research focuses on the history of Protestantism in the Spanish Caribbean and examines the relationship of Protestant missionaries to imperialism and how a foreign religion becomes indigenous.

Hidalgo has a bachelor’s degree from Universidad Adventista de las Antillas in Mayaguez, Puerto Rico, and master’s degrees from Andrews University and Western Illinois University.

Tito Puente Performs at Northeastern

Tito Puente, one of the most flamboyant performers in the history of Latin/jazz music, orchestrated and performed live with Boston City-Wide Honors Jazz Ensemble at Northeastern University (Mass.).

The Grammy Award-winning percussionist taught the jazz group four songs by various artists, including “Oye Como Va,” one of Puente’s greatest hits. Following the workshop and performance, Puente fielded questions from an audience of Boston-area middle and high school students.
Inspiring Graduates from Miami-Dade

Miami-Dade Community College (Fla.) had many inspiring graduates in May—including the following:

Dolores González, 43, who is hearing impaired, was active in student government and community service programs. She earned an associate's degree in science in respiratory therapy and an associate's in arts. During classes, her son Oscar, who is disabled and dependent on a ventilator machine, came in and encouraged and allowed his mom's classmates to practice routine respiratory procedures on him. He received an honorary degree.

Rosa Mori, 58, graduated with her children Rosa Liz, 24, and Jorge Gustavo, 22.

Because the family, originally from Peru, didn't qualify for financial aid, they moved into a small apartment, and each got part-time jobs. Rosa Liz's father Gustavo, a police officer, stayed in Peru and sent them money. "It was hard to stay focused on school and work when we miss him so much, but it has all been for our own good," said Rosa Liz.

Carlos A. De Mato, 26, a former pilot in the Uruguayan Air Force who initially spoke broken English, graduated with the highest honors in his class and received two special awards for achievements in math and engineering. Three years ago he came to Miami to get a job as a pilot. Now he has a scholarship to Georgia Tech University to study engineering.

Bloomfield Awards Honorary Degree to Colón-Valle

At its 126th Commencement, Bloomfield College (N.J.) awarded an honorary doctorate degree to Miriam Colón-Valle. Latino arts activist, actress, director, and founder of the Puerto Rican Traveling Theatre Company, Inc.

Colón-Valle is dedicated to performing the work of Hispanic writers in Spanish and English. In addition to founding the theatre company, which is a well known training ground for aspiring Hispanic actors and writers, Colón-Valle co-founded Nuevo Circulo Dramático, the first Spanish language arena theater in New York City. She has acted in films with Marlon Brando, Sally Field, and Al Pacino. As a community leader, she has served on a New York State council and on national panels.

Our Lady of the Lake Selects Provost

Our Lady of the Lake (Texas) named James Gearnity provost, beginning in August.

"Gearnity has a thorough understanding of resource issues," said University President Sally Mahoney. "He understands technology as an instrument and not as an end. He is skilled in issues of fund-raising and marketing. He is practiced both in delegation to line officers and in consultation with faculties and staff. And he is forthright in laying on the table what resources really are required to support long-term goals." Gearnity had been dean of the Graduate School of Arts and Sciences at Marywood University (Penn.).

Newsmakers at DePaul University

- A musical score for an oratorio dedicated to St. Vincent de Paul that had lain dormant in Vincentian archives for more than a century was brought to life in May, when Ars Musica Chicago performed "Vincent de Paul: An Oratorio in Three Parts," sponsored by DePaul University (Ill.) as part of its centennial celebration. "The oratorio was written by Vicomte Fernand de Beaufresne, an obscure but well-educated and talented French composer," said DePaul University Assistant Professor Enrique Alberto Arias.

- The Fellows Program, former Peace Corps volunteers who are earning advanced degrees, held a conference in Chicago that included visits to several schools and their neighborhoods. Two Peace Corps fellows have been training for teaching assignments in inner city classrooms through DePaul's Center for Urban Education. Pictured at far left is Barbara Radner, Center director, touring with her are Fellows, along with students at Cesar Chavez Elementary School.

New Mexico Instructor Publishes CD-ROM

Jan Plass, an instructor in the University of New Mexico College of Education's Organizational Learning and Instructional Technologies Program, along with colleague Dorothy M. Chun, has published, through St. Martin's Press, Obra de Derecho (A Letter to God), a CD-ROM focusing on Spanish vocabulary development.

Featuring a well-known Mexican short story by Gregorio López y Fuentes, the multimedia...
Eastman Kodak Supports Higher Education

The Eastman Kodak Company has shown support for higher education this year by giving out the following grants.

The Hispanic Association of Colleges and Universities (HACU) received a gift of $10,000 in 1999, for its many initiatives.

The Consortium for Graduate Study in Management, an alliance of American business schools and the business community, received a gift of $20,000–part of an annual gift that supports higher education in management for more than 200 students of African American, Hispanic American, and Native American descent.

North Carolina Agricultural and Technical State University received a gift of $5,000, part of a total pledge of $50,000 through 2001, for its diversity, technology education, and institutional excellence.

Cal State-L.A. Alumni Association Awards Scholarships

The Alumni Association at California State University-Los Angeles presented 15 students with scholarships recently.

The recipients are: Sonia (Hoa) T. Nguyen, Shanika L. Blanton, Jesús M. Gómez, and Haley K. Leung, psychology majors; Pankit J. Doshi, political science; Jenina Galiano and Veronica P. Hernández, child development; Christopher J. Gontong, electrical engineering; Mark J. Gordon, anthropology; Tyler N. Hursh and Susan Ngo, business administration; Marisela Salazar, English; Daniel Santos, sociology; Robert D. Velasquez, criminal justice, and Charlene M. Vu, nursing.

Latino USA Airs Hurricane Mitch Aftermath

Latino USA, the University of Texas-Austin radio journal of news and culture, has been broadcasting a series of special reports examining the human dynamics and complexities of the aftermath of Hurricane Mitch, which left more than 30,000 people dead in Central America.

The series examines the hurricane’s effects on the political, economic, and social realities of Central America and their implications for the United States. In the first report, producer María Martín examined internal migration in Central America as it affects children. The reports, airing on approximately 15 public radio stations and accessible through Latino USA’s Web site at <www.latinousa.org>, will continue periodically through October.

Cal State-Fullerton Co-Sponsors Town Hall

“Touch the Future...One Child at a Time” was the theme of a joint Town Hall co-sponsored by California State University-Fullerton (CSUF) and the Junior League of Orange County, Calif. The event was designed to engage Orange County residents in a child-focused discussion on healthcare, education, family, and community.

The roster included: Dr. Sylvia A. Alva, department head and associate professor of child and adolescent studies at CSUF; Sid Gardner, director of the Center for Collaboration for Children at CSUF; Gene Howard, executive director of the Orange County Children’s Foundation; Kathy McCarrell, executive director of the Orange County Child Abuse Prevention Center; and Susanne Valdés, executive director of the Child and Adolescent Studies Student Association at CSUF.
“Transboricua” Exhibit at Rhode Island School of Design

“Transboricua: An Installation by Pepin Osorio” was on display at the Rhode Island School of Design (RISD), marking the first of a series of events designed to bring arts programming into communities throughout Rhode Island.

The installation explores the transformation of identity of Puerto Ricans and those from other Latin American countries as they come to terms with new lives in the United States. “Boricua” has its word roots in “Borinquen,” a name given to Puerto Rico by its original inhabitants, the Taínos. Osorio, a native of Puerto Rico, created the installation in collaboration with students from RISD and the Mary E. Fogarty Elementary School.

“Los Bosques de San Nicolás” Lecture at American University

American University’s Washington College of Law and the Guatemala Human Rights Commission held a lecture, “Los Bosques de San Nicolás,” at the District of Columbia school. The lecture was presented by Dean Claudia Grossman, a member of the Inter-American Commission on Human Rights and the lawyer representing the families of five minors assassinated in Guatemala. “Los Bosques de San Nicolás” is the first international case concerning child rights in the Inter-American system.

Our Lady of the Lake Receives Psychology Grant

The American Psychological Association awarded Our Lady of the Lake University’s (Texas) psychology department a $5,500 grant to support a survey of bilingual psychologists. The principal investigator of the grant is Dr. Cynthia González (pictured here), assistant professor, co-investigators are Dr. Cynthia de Las Fuentes, assistant professor, and Dr. Joan Biever, chair of the department.

The survey is designed to help educators learn more about the experiences and training needs of approximately 200 psychologists currently providing services in the United States and Canada.

The psychology department already has a program that trains psychologists to provide services in English and Spanish.

Pace University Honors Santiago

At a commencement ceremony for more than 600 undergraduate students on Pace University’s (N.Y.) Pleasantville/Briarcliff campuses, Esmeralda Santiago was awarded an honorary Doctor of Humane Letters degree. Santiago is the author of the acclaimed memoir, When I Was Puerto Rican.

Pace University conferred more than 3,500 degrees and seven honorary degrees during four separate commencement ceremonies in White Plains and New York City.

Trinity to Erect Cultural Houses

Cultural houses for three Trinity College (Conn.) organizations, representing Latin American, Asian American, and Jewish students, are to be constructed.

The new cultural houses for La Voz Latina, the Asian American Student Association, and Hillel will accommodate a few student residents but will serve primarily as cultural centers. Through furnishings and activities, the houses will celebrate the particular cultures and traditions of each student group and serve as educational resources to the entire campus community. Each new house will seek to promote intercultural exchange and appreciation.

News from Portland Community College

- At Portland Community College (PCC) in Oregon, a new Latino mentorship program, the Homework Club, is pairing several Latino students from PCC’s Rock Creek Campus with Latino third through fifth grade students seeking help with their studies in subjects such as English and math. Volunteer tutors are needed. For more information on the Homework Club, call Candace Stevens at (503) 299-3875.
- At PCC’s Rock Creek Campus, 28 Latino high school students were recognized for completing the Oregon Leadership Program, an eight-month Latino youth leadership program that focuses on leadership skills, networking, exploring career options, and creating more opportunities for continued education.

Bilingual Computer Classes at Maricopa CCD Helping Spanish-Speaking Students

More than 100 Spanish-speaking students of the City Colleges Center (CCC) in downtown Phoenix, Ariz. are picking up computer skills in their native language in a one-of-a-kind bilingual academic outreach.

Setting the program apart, students learn computer programs with the help of manuals written in Spanish as the instructor teaches in Spanish. However, the computer programs are all in English.

“Students love it,” said Raquel Velasco, bilingual coordinator. The CCC is a partnership of Phoenix Gateway, Rio, and South Mountain community colleges—all of the Maricopa Community College District. Pictured here (seated, l to r) are students Ricardo Lopez, Martha Garcia, and Eric Lino; standing are instructor José Canseco and Velasco.
NJN Hispanic Youth Showcase

New Jersey Network (NJN) Public Television presented the 13th Annual NJN Hispanic Youth Showcase at the New Jersey Performing Arts Center in Newark. Thirty-seven finalists, including 11-year old Hilda Morfi (pictured), demonstrated their extraordinary talents as dancers, vocalists, and instrumentalists in what is considered to be the largest performing arts competition of its kind in the region.

Flamenco and Spanish classical dancer Jesus Cano, known in the dance world as the "Embrujado de España," or the "Spanish Magician," and regarded by international journalists as "a master among masters," performed as a special guest.

Fairfield University Honors Mello

Brian Mello, who graduated summa cum laude from Fairfield University (Conn.), was honored by the Fairfield University Alumni Association with the Student Achievement Award for his promotion of diversity during his four years at Fairfield. He has also been awarded a fellowship to the University of Washington in Seattle to pursue his doctorate and was selected an alternate for a Fulbright Scholarship to Turkey.

A former student association vice president of multicultural relations at Fairfield, Mello brought a day-long Student Summit on Diversity to the campus. The conference featured presentations and workshops and engaged faculty and students from other New England colleges in an open dialogue about diversity.

The Multicultural Campus: Strategies for Transforming Higher Education

Leonard A. Valerde and Louis A. Castenell, Jr. eds.

In this book, Hispanic, African American, and Asian American educational leaders examine the obstacles they have faced as minorities, climbing up the predominantly White career ladder in American universities.

Book Review

by Humberto López Cruz

Todas ibamos a ser reinas, by Rosa María Britton. 305 pages. Bogotá, Colombia: Plaza & Janés (In the U.S., contact Ediciones Universal at (305) 642-3234 or e-mail to <ediciones@kampung.net>). 1997. ISBN# 958-14-0281-0. HC $24.95.

Facing the last novel of Panamanian writer Rosa María Britton, Todas ibamos a ser reinas (We Were All Going to Be Queens) [1997] involves an unlimited procession towards a kingdom, a kingdom that is present during the narrative and offers as many discursive possibilities as the reader’s imagination allows. This novel, edited by Plaza & Janés in Colombia, is a not-so-relaxed get-together in Miami of several women, former classmates at a rigorous Cuban religious institute who after several decades reunite and talk about their lives, utilizing the past as the foundation of their new existence.

The genesis of Britton’s plot is an anonymous poem by Gabriela Mistral that suggests an imaginary kingdom for each of the protagonists. Britton’s characters are women who, in spite of the times when they begin as interns at the institute (Havana, during the early ’50s), conceive the firm goal—supported by the nun professors—to postpone marriage until having achieved economical and intellectual independence that will allow them to enjoy an autonomous ulterior life.

But more than a mixture of the voices from the past and the present of the classmates, their aspirations and fears, their triumphs and their defeats, this novel is also a historiographical recount of a Cuba that experienced abrupt and bloody changes during the entire decade in which the action elapses in Havana. Britton, from an autobiographical perspective, assumes the role of a Panamanian student—or a Cuban father—and offers a conscientious exposition of historical events that would mark forever the lives of the protagonists and of the entire Cuban people. Batista’s military coup, the clandestine activities at the University of Havana, and the fallacy of the Cuban Revolution are all captured by Britton’s memory and offered to the reader as an alternative, rewritten history.

Politics, however, is not Britton’s leitmotiv; it is only a decorative background to support the classmates’ experiences, reactions, and vicissitudes that in continuous textual regressions appear in front of the reader. The author resorts to history for support and, in this way, offers cohesion to the text. To appeal to history as an intertextual resource is not a novelty for Britton’s narrative. Her previous three novels—El atardecer de uso (1982), El Señor de las lluvias y el viento (1984), and No pertenezco a este siglo (1899)—each contains historiographical background enough to be considered as belonging to the subgenre of “historic novel.” Todas ibamos a ser reinas is another example.

The narrative does not take place only in Havana and Miami. When one of the protagonists abandons Cuba in order to continue her studies in Spain, Britton moves the plot to the Old Continent and offers us a Spain that has fallen into a lethargy under the tutelage of Franco. The Madrid that surfaces is the one with the verbenas, tascas, and cunning leftist tendencies, and with the majesty of an old city that seems to forget that at one point in time it was part of Europe. Britton offers vignettes that might fit in the Madrid of the ’60s.

One of the highlights of this text is the mobility through the spaces. We travel through Britton’s memory. That is why from Spain we return to a more contemporary Cuba, and from there to Miami in order to witness the long-sought new encounter of the protagonists.

The text offers an intelligent structure whose interest is sustained by the plot development. The narrative voices accomplish their purpose: a projection in first-person perspective of the world-view of the current narrator. It is extremely interesting to observe how Rosa María Britton has captured so accurately the essence of a country, Cuba, and the conflict that affects it as a nation.

As a result, the reader inherits the legacy of a politically turbulent period within Cuban history, the denouncing of the current dictatorship that still victimizes the island, and the possibility of a return to Cuba. This return is not to a vanished past, but to an uncertain but legitimate future where the surviving protagonists will carry out a definitive spiritual reconstruction that will be their personal renovation as well as the entire nations.

Humberto López Cruz, assistant professor of Spanish at the University of Central Florida, Orlando, specializes in Caribbean and Central American literatures, as well as Hispanic literature in the United States. He currently teaches both literature and culture and civilization courses at both graduate and undergraduate levels. He is also the director of the Foreign Language Media Center and last year was elected editor of SELA-SELA South Eastern Latin Americanist. He is also the editor of a book, currently in press, on the narrative of Reinaldo Arenas.

DEAN
COLLEGE OF SOCIAL SCIENCE

Michigan State University invites applications and nominations for the position of Dean, College of Social Science. An individual is sought who can provide leadership for the continuing development of programs in instruction, research, and outreach and who will serve as a representative of the College in its interaction with government, foundations and industry. The Dean of the College of Social Science is the chief executive officer of the College and is responsible to the Provost and the President for the general administration of the College.

Michigan State University is a land-grant institution with fourteen colleges enrolling over 50,000 students. The College of Social Science consists of five departments: Anthropology, Geography, Political Science, Psychology, and Sociology; two professional programs in Urban Planning and Landscape Architecture, three professional schools: Criminal Justice, Labor and Industrial Relations, and Social Work; two centers: Center of Advanced Studies of International Development and the Social Science Center for Integrative Studies; an undergraduate social science program; the Julian Samora Research Institute; the Institute for Public Policy and Social Research and the Women's Studies Program jointly administered with the College of Arts and Letters. The college has 272 faculty and 4,648 majors, 80 percent undergraduate and 20 percent graduate students. The College provides liberal education in the social sciences for undergraduates throughout the University and offers bachelors, masters, professional, and doctoral degrees. Further details are available at the college website http://www.ssc.msu.edu.

Applicants must have an earned doctorate or equivalent; an outstanding record of scholarship and evidence of dynamism and leadership. Candidates must meet standards for appointment at the rank of professor with tenure in an academic department or school in the College. Expected starting date is no later than July 1, 2000 and preferably earlier.

Applications and nominations are requested as soon as possible, preferably by October 15, 1999. Applications and nominations should be sent to:

Dr. Lynne G. Goldstein, Chairperson
Search and Nominating Committee
Dean of College of Social Science
Office of the President
450 Administration Building
Michigan State University
East Lansing, MI 48824

MSU is an Affirmative Action/Equal Opportunity Institution.

Anticipate an exciting future at Cuyahoga Community College, a 2-year institution with three modern campuses. Here, we re back to basics providing a high-quality, affordable education for our students and enhancing quality of life for our multicultural community. We offer excellent opportunities to move your career ahead and enjoy a satisfying future.

Executive Vice President,
Finance and Business Services

The Executive Vice President for Finance and Business Services has broad responsibility for leading the College's financial, business and facility planning operations by designing and managing comprehensive policies and programs for the College. Work involves the administration and management of the financial and business operations, facilities planning and the formulation of fiscal planning and reporting. In addition, work involves the establishment of a centralized accounting system, asset protection, optimum use of resources, long-range financial planning and budget development, and the planning, design, construction, and maintenance of all College facilities.

The EVP plans, develops, and directs implementation of innovative programs and policies, promotes effective communications, and oversees the productive delivery of college-wide services using continuous quality improvement techniques in the following functional areas: budget planning and management, auxiliary operations, purchasing, campus plant operations and business services, capital facilities planning and project management, risk management and financial services, bursar operations and controller operations. Responsible for guiding the finance and treasurer functions through the creation and maintenance of the College's Banner financial information and reporting systems. Oversees the operational aspects of the treasury functions including cash receiving, cash flow, investments, bank services, and College liability and property insurance programs. Provides support to Board of Trustees, its Management Committee and executive management in matters involving finance, facilities, purchasing, plant operations and the preservation and investment of College funds.

A Master's degree is required with a concentration in Accounting, Finance Business, Mechanical or Civil Engineering; a Ph.D. is preferred. A minimum of seven years of demonstrable successful fiscal and senior management experience and demonstrated record of initiative, independent judgment and outstanding performance in a large, complex service organization. A vigorous and entrepreneurial spirit appropriate for the considerable challenges of contemporary higher education. Strong communication skills, both oral and written. Demonstrated interpersonal skills to interact effectively with varied constituencies, and to communicate complex financial and business service issues. A sensitivity to appropriately respond to the needs of a socially and ethnically diverse community.

The College offers an excellent compensation and benefits package. The review process is ongoing and will remain open until the position is filled. Interested applicants should submit a current resume, photocopies of transcripts for earned degrees, a list of three employment references (names, titles, addresses and telephone numbers of current/former supervisors) and a completed application for employment. The application will be forwarded with a letter acknowledging receipt of application materials. Submit application materials to: Director - Staffing-HQ, Human Resources, Cuyahoga Community College, 700 Carnegie Avenue, Cleveland, OH 44115. Fax: (216) 987-4799

UNIVERSITY OF IOWA
UNIVERSITY LIBRARIAN

The University of Iowa invites applications and nominations for the position of University Librarian. The University Librarian is responsible for the leadership and administration of a library system consisting of twelve libraries: the Main Library; Art Libraries; Biological Sciences Library; Chemistry Library; Engineering Library; Geology Library; Hardin Library for the Health Sciences; Marvin A. Pomerantz Business Library; Mathematical Sciences Library; Physics Library; Psychology Library; and Rita Benson Renick Music Library.

THE UNIVERSITY LIBRARIES

The collections of the University Libraries total over 3.2 million volumes housed in the Main Library and the eleven branch libraries, the largest of which is Hardin Library for the Health Sciences. (The Law Library is administered separately by the College of Law.) The University Librarian is responsible for the development of collections and services for the system, leadership of a staff of 80 professional staff, 111 merit staff, and 71 FTE student staff, and management of a budget of over $17,600,000.

The University of Iowa Libraries is a member of OCLC, the Center for Research Libraries (CRL), the Association for Research Libraries (ARL), and the Committee on Institutional Cooperation (CIC).

RESPONSIBILITIES

Visionary, innovative, and energetic leadership, management of the twelve-library system; excellence in diverse library services; maintenance and enhancement of faculty, staff, and external constituent relations; accountability for a budget of over $17,600,000; long-range planning and evaluation; public relations and fund development including external fund-raising. The University Librarian reports to the Provost and represents the University Libraries in the consortial activities of the three Regent Universities in Iowa and of the Committee on Institutional Cooperation (CIC). The University Librarian is advised by faculty and students through the University Library Committee

QUALIFICATIONS

Significant experience and achievement in areas pertinent to the leadership and administration of a major research library; demonstrable commitment to excellence in scholarship and research; knowledge of collection development, public and technical services, and library technology; the ability to conceive and articulate, both within and outside The University, a vision for the future of library resources and services. The successful candidate will have a firm grasp of current challenges facing higher education, the ability to forge effective links with faculty and academic programs: the insight and skills to galvanize library staff and to lead The University Libraries in developing innovative, technologically advanced programs and services.

Minimum preparation will include an appropriate higher degree (such as an MLS or a Ph.D.) or equivalent experience: additional educational attainment and/or substantial research experience in librarianship or another discipline: demonstrated skills in planning and budgeting; an interest in overseeing The University Libraries development program; and the ability to work productively with library staff, faculty, administration, students, and alumnae.

The University of Iowa is committed to the support and encouragement of a multicultural environment and seeks candidates who can make positive contributions in a context of ethnic and cultural diversity.

Salary commensurate with qualifications and experience

CLOSING DATE

Candidates should apply in writing, including with the letter: a complete statement of qualifications and a full resume of education and relevant experience. Screening will begin immediately and continue until the position is filled. To ensure full consideration, applications should be received no later than September 30, 1999. We hope to make an appointment by December 1999.

Search Committee, University Librarian, Attn: Kimberly J. Carter, Office of the Provost, 111 Jessup Hall, University of Iowa, Iowa City, Iowa 52242

The University of Iowa is an Equal Opportunity/Affirmative Action Employer

COMMITTEE ON INSTITUTIONAL COOPERATION

The Committee on Institutional Cooperation (CIC) is the academic consortium of the Big Ten universities and the University of Chicago. It seeks nominations and applications for the full-time position of Director of the CIC Center for Library Initiatives. The CIC seeks an articulate and visionary leader who aspires to achieve the best in cooperative research library, project, and the academic environment, and understands how emerging technologies support and strengthen cooperative library services. The CIC is located on the campus of the University of Illinois at Urbana-Champaign.

The Center is charged with the responsibility of advancing a broad library, cooperation agenda. The Director of the CIC Center for Library Initiatives reports to the Director of the CIC. Working closely with the Director of the CIC and the library directors, the Center Director supports the development and implementation of action plans. He facilitates the efforts of the various groups, manages projects, provides leadership on issues facing university research libraries, and contributes to the profession.

Minimum qualifications include a post-baccalaureate degree, excellent written and oral communication skills, substantial experience and expertise at a senior management level in an academic research library or cooperative library organization, and a proven ability to work effectively with diverse groups in a dynamic environment.

In order to ensure full consideration of applications, applications must be received by August 15, 1999. The position is available immediately. Applications and nominations, including a resume and the names of at least three references, should be sent to:

Karen Singer
Committee on Institutional Cooperation
302 East John Street
Suite 1705
Champaign, IL 61820

For more information on the CIC, visit our web site at www.cic.uiuc.edu

The CIC and the Universities are affirmative action/ equal opportunity employers.

Notice of Vacancy
VICE PRESIDENT FOR UNIVERSITY ADVANCEMENT

POSITION: The Vice President for University Advancement sets the vision and strategic direction for programs that seek to involve alumni and friends in advancing and supporting the academic and service programs of the University. As such, the Vice President oversees the WSU Foundation, the WSU Alumni Association, and Advancement Services. The Foundation is the philanthropic arm of the University, a nonprofit organization that raises and manages gifts from individuals, corporations, and foundations for the benefit of WSU. The Alumni Association provides an avenue through which alumni of all ages and interests can interact and become involved in planned activities and programs. Advancement Services compiles and manages all alumni and donor university databases and serves as the gift processing unit of the University.

Reporting to the President and as part of the President’s Executive Committee, the Vice President:

- Helps set policy, budget and strategic program direction for WSU, a land-grant institution of 21,000 students
- Provides leadership for and management of the comprehensive university-wide advancement program consisting of centralized, decentralized development programs, alumni relations, advancement services, WSU West (Seattle) office, and advancement communications and marketing
- Works with volunteer and academic leadership to set fundraising and other advancement goals which are both marketable and representative of the University’s highest priorities and engages in the personal solicitation of significant benefactors; influences program objectives and motivations outcomes for institutional fundraising initiatives; alumni relations and advancement communications
- Serves as President of WSU Foundation and as such serves ex-officio on the WSU Foundation Board of Trustees and Executive Committee
- Reports results of fundraising and asset management to the University’s Regents and the WSU Foundation Board of Trustees
- Represents the institution to a broad array of internal and external audiences to encourage understanding, confidence, advocacy and investment

WASHINGTON STATE UNIVERSITY: Washington State University, with campuses located in Pullman, Imperial, Spokane, Tri-Cities, and Vancouver, Washington, is the state’s land-grant university. A comprehensive academic and research institution, WSU has an enrollment of 21,200 with ten colleges: a graduate school and learning centers, and extension offices. The state WSU faculty of 1,900 includes scholars with national and international reputations. MONEY magazine has twice named WSU a “public ivy” and rated its Honors College one of the best in the nation. Other hallmarks include the Edward R. Murrow School of Communication, the College of Veterinary Medicine, the largest business school in the state, and renowned expertise in plant sciences, engineering, computer science. The Pullman campus is one of the largest residential universities in the West and is a member of the Pac-10 Athletic Conference.

QUALIFICATIONS: Requires qualifications: BA/BS. Proven executive skills and managerial experience developed in organizations of comparable scope, size, and complexity. Knowledge of higher education and demonstrated skills in institutional advancement and philanthropy. Ability to work effectively within a complex collegiate team. Exceptional written and oral communication skills. Preferred qualifications: Appropriate advanced degree. Ability to establish relationships with business, professional, and community leaders. Experience in managing public and private organizations and media relations efforts. Experience in planning and directing an institution-wide fundraising and advancement programs. Proven record of soliciting individual major gifts. Capital campaign experience, including planning and implementing a successful, comprehensive, multi-year campaign.

Alternative preparation and experience will be considered in evaluating candidates for this position.

Application review begins on July 30, 1999, and continues until position is filled.

ADVERTISING INDEX

---
LATINA/CHICANA SUPERWOMAN: HAVE YOU SEEN HER?

As Latina/Chicana women, we are blessed in many ways. We are part of a culture rich in tradition, with stable values that honor emotion and love of family. Our language, as women is filled with passion and feelings. We are strong in body and soul. Our culture encourages work. We work with our hands and minds, and bring our hearts to whatever we do.

In the U.S., we are a high percentage of the low-wage workforce. Our mothers and sisters have invested countless years in agriculture, manufacturing, and service occupations. Many have moved through the "blue collar" jobs of our parents into the "white collar" world—the dominant economy of the nation.

We can see in our progress both joy and pain. Much to celebrate but a long way to go. To consolidate gains and make possible tomorrow's achievements, we must examine the burdens we carry from the past.

What expectations, assumptions, stereotypes, and obstacles do Latinas/Chicanas face as they consider their futures? Which aspects of our culture are successful and facilitate our achievements? What are those that burden us with guilt and conflict?

Our cultural belief is that there is a conflict between career and family. This bias remains at the heart of our most important institution despite the evidence and despite years of struggle against it. The idea persists that young Chicanas must choose between college, career, children, and family.

A burden thus settles on the shoulders of the Chicana. The higher her aspirations, the greater the conflict. Children and family are put forth as a primary obligation, higher education and career success are discounted.

I do not mean that family should be discounted or disdained. Commitment to family is a central strength of our culture. It serves us well in a world filled with material opportunities and moral perils. But many Latinas/Chicanas are restricted from attending college because it might create a distance from the family, geographically or culturally.

We should learn to give career achievements an appropriate value. A life rich with professional and community accomplishments is not in conflict but a supporting element, an expression of love for the larger "family" of our communities. As we recognize this truth, we must ask our family for support and recognition of the choices we make.

So many subtle reminders and guilt trips are quietly laid on our shoulders. "Mia, tu abuela will be so hurt. How can you put that before your family?" Just see if your school or job will help you out when you need someone." Loving family members convey these messages—thoughtless messages—often not intended to hurt, yet burdening our souls with unhealthy guilt.

We internalize these voices, reinforcing our guilt. "I should be home with my family, doing the wash. My boyfriend will not trust my going to college, leaving him behind. Some of our voices even question our best decisions.

Machine, a pervasive value orientation, impacts heavily on our daily lives. Problems arise when only the female can find work or earns more than her spouse; threatening the male self-image and role with economic reality. Often Chicanas who work or go to school must still fulfill traditional responsibilities.

Our culture encourages us to view ourselves as more than family, more than individuals. We are taught to respect authority, not question it. Many of us, even at a seasoned age, are told what to think, how to think, how to behave. Single out in a classroom or on the job and asked what we believe, many Chicanas are caught off guard. "Programmed" to take on our father's or husband's beliefs, we have not been encouraged to form our own.

We place pressure on ourselves to be everything everyone-supervized, super girlfriend, super wife, mom, daughter, sister, friend. We expect to be super students, super employees, super good-looking, super thin, super sexy. It is not possible. And the expectation of supernatural achievements belittles our actual achievements. It is a destructive myth. We should challenge it not only for ourselves but for those who follow.

We must break through this culturally reinforced wall of negativity about ourselves and our potential. We must resolve internally the conflict between expanding our boundaries and being trapped by cultural norms.

A message for young Chicanas. When those who are important to you address you as in the name of love, family, religion, culture or other values, are they willing to accept you for who you are and for all your potential, or are they trying, in force you back into a cultural stereotype?

All people, in fulfilling a need to be who they are, deserve love and support for their decisions. We can help young Chicanas earn a perspective on our culture so they can find their own creative path.

As Latina/Chicana leaders, we need to clearly articulate our expectations, our competencies, our passions as leaders, as members of families, and as women. In this way, we can bring the kaleidoscope of change into focus and direct it into positive outcomes for ourselves and our people.
LEADERSHIP AT ITS BEST

Dr. Oscar Altar Sánchez at Chapman University
SOCIOLGY OF GENDER
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position in Gender at the Assistant Professor level, anticipated to begin in the Fall 2000. Additional expertise in one or more of the following areas would be desirable: family, race, ethnicity, and research methods.

Counseling Hispanics: Advice for Helpers
Technology Solutions for Education Organizations

by Gustavo A. Mellander

Technology can be daunting for a faculty member and even for a college itself. Yet all of us are finding ourselves more and more involved with technology.

Some of us hopped on that furious train a long time ago. Others are being dragged-along-screaming and kicking.

To address the many issues involved and alleviate apprehensions, the National Center for Education Statistics (NCES) has produced Technology at Your Fingertips.

The 100-page publication explains how to:

- define your needs and technical requirements;
- develop a "needs assessment";
- determine what resources you have and what resources you will need;
- implement, support, and maintain your technology solution;
- provide effective training.

Purpose

Technology at Your Fingertips describes a process for developing the best possible technology solution for one's college. This book provides the necessary steps to identify one's technology needs, consider possible options, acquire the technology, and successfully implement a technology solution.

Although useful for anyone involved in technology, this book is particularly helpful for those in one of the following two roles:

- persons who have been given the responsibility for setting up computer and networking technology in an education organization;
- persons who will be supervising the process of technology implementation.

The persons who must fill these roles include professors, board members, university management staff, and librarians. Persons who use this book might be the ones with the final decision about what will be done, or they might be the ones who make recommendations to the ultimate decision-maker.

This book is not for technical staff already familiar with many of the concepts and data. The writing style is targeted to non-technical individuals, yet it includes the requisite terminology and issues basic to technology. Definitions are provided throughout the book and can also be found in the glossary.

The World of Technology

The uses of technology are broad and ever-changing. This publication does not attempt to cover all types of technology that can be used in education settings.

The focus is on computer and networking technology—primarily software used to meet administrative and many instructional needs. Special attention is also paid to the hardware, networking, and support systems required to make it function.

Not covered are categories such as video/television, telephone systems, and certain other tools that can be used for distance learning.

Since the world of technology is very fluid, technical standards and specific products change constantly. This book contains generic questions that will help professors and administrators create effective decision-making processes both now and for the future.

Common sense, experience-based ideas dominate rather than approaches tied to specific situations or products. These ideas are based on the authors' extensive experience implementing technology within state education agencies, universities, and libraries.

Pointers

Technology at Your Fingertips also contains information on budgetary and human resource concerns. A whole section relates to the use of computer and networking technology for:

- providing instruction to students (e.g., recording data from experiments, providing computer-based instructional activities, accessing the Internet);
- managing activities related to instruction (e.g., grade and attendance reporting, lesson design, accessing information about students);
- automating and streamlining day-to-day operations (e.g., student registration, maintaining health records, scheduling classes, determining bus routes, word processing).

Included at the end of each chapter and the book itself are pointers to reference documents and other sources of information.

The constant changes in technology make the lives of many of these sources fairly brief. There are many resources listed that are available on the Internet because they tend to be more current. They have the advantage of being able to link one to additional resources.

Many education resources and examples have not been published anywhere except on the Internet.

A Practical Process

There are many published methods for building technology solutions, and they contain similar elements. This document describes the different steps of the process in a way that can help meet the specific needs in higher educational settings.

Specifically, the booklet contains guidance on the following steps:

- define the task and the steps needed to undertake the task (Chapter 1);
- conduct a needs assessment and define your technology requirements (Chapter 2);
- describe your current computing and networking technology resources (Chapter 3);
- evaluate options and select your preferred technology solution (Chapter 4);
- implement the selected technology solution (Chapter 5);
- train the users (Chapter 6);
- make plans for supporting an ongoing technology solution and for an ongoing basis (Chapter 7).

Paper copies are available from the Department of Education publications center at 1-877-4ED-Pub (1-877-433-7828).

Dr. Mellander is a professor at George Mason University.
"How Much Poverty Can Democracy Endure?"

By Oscar Arias

It is a great honor for me to come to Chapman and participate in the Distinguished Lecture Series. I thank Professor Don Will, Mr. Christopher Chennault, Dean Joseph Kertes, and Professor Ken Tye for working to make this visit possible.

Tonight I want to discuss with you some of the recent changes in our political economy that have greatly affected the struggle for peace and human development. And I want to ask the question: How much poverty can democracy endure?

In the past fifty years, U.S. corporations have expanded and, with the assistance of the State Department, have opened markets around the world. Technological advances have made it possible to interact with foreign peoples on a daily basis, expanding the bounds of our knowledge. Southern countries have engaged a process of development, and seen widely varying outcomes.

But sadly, the actions of the United States often have not been guided by a humanistic concern for the well-being of others, nor for their right to self-determination. But too regularly have reflected a calculating self-interest. Martin Luther King, [Jr.,] who once came to Chapman as a distinguished lecturer, had the foresight to issue a profound warning.

He reminded us of the words of President John F. Kennedy, who said, “Those who make peaceful revolution impossible will make violent revolution inevitable.” And then Martin Luther King commented that I quote: “Increasingly, by choice or by accident...our nation has taken...the role of those who make peaceful revolution impossible...refusing to give up the privileges and the pleasures that come from the immense profits of overseas investment...I am convinced that if we are to get on the right side of the world revolution, we as a nation must undergo a radical revolution of values. We must rapidly begin the shift from a ‘thing-oriented’ society to a ‘person-oriented’ society. When machines and computers, profit motives and property rights are considered more important than people, the giant triplets of racism, materialism, and militarism are incapable of being conquered.”

As we enter the new world econ-
omy of globalization. I believe that we face the very same moral and economic challenge. Now, 15 trillion dollars race around the globe every day, and yet are largely unaccountable to any accepted form of public oversight. For some, the new economic system means being able to make investments with a worldly perspective, minimizing labor costs and maximizing profits. For many others, it means facing the end of job security and at the same time witnessing the reappearance of sweatshops.

The frantic quest for quick riches has created a hollow, speculative economy, unattached to human labor and accountable to human need. Investments are not made over the long term, designed to help small businesses get started and help people improve the infrastructure of their communities. Instead, bankers pit foreign currencies against one another, investing for days or even just a few hours. They create immense profits for the most privileged, but leave a devastating trail of destabilization and misery in their wake.

Recently, we have seen that the global economic order is subject to panic and rapid fluctuation. As wealthy financiers lost money in weakened East-Asian economies, in Indonesia, or in Brazil, pundits and bank officials began to speak of a crisis. But even now, only months after traumatic devaluations have begun, there seems to be a consensus that this downturn was only a small setback in a well-functioning system.

But I tell you tonight that there is a much deeper crisis underlying the financial panic, one that this consensus of experts overlooks. I say that it is an economic crisis when nearly a billion-and-a-half people have no access to clean water, and a billion live in miserable substandard housing. I say that it is a leadership crisis when we allow wealth to be concentrated in fewer and fewer hands, so that the world's three richest individuals have assets that exceed the combined gross domestic product of the poorest forty-eight countries. I say it is a spiritual crisis when—as Gandhi said—many people are so poor that they can only see God in the form of bread, and when other individuals seem only to have faith in a capricious God whose “invisible hand” guides the free market. I say it is a moral crisis when 120,000 children die each day from malnutrition and disease. And I say it is a democratic crisis when 1.5 billion people live on incomes of less than one dollar a day, and in their unrelenting poverty are totally excluded from public decision-making.

We know that in times of crisis many falter; they think only in terms of the individual and fail to accept their human obligations. But this cowardice is a choice. It is our choice, and we have another option. Instead of permitting the dominant values of selfishness, military build-up, and a love of money to prevail, we can choose to reclaim our most noble aspirations.

This means affirming some of the ethical maxims that guide virtuous communities, but that have been too quickly overlooked in recent times: that all people have a right to work for a living wage. That all have a responsibility to think sustainably, to live in harmony with the natural environment. And that all people should have equal opportunity to access educational, cultural, and financial resources.

At that same time that we look back to these established principles, we must broaden the scope of our moral concern more than ever before. In recent years, as the world has emerged from the painful experiences of colonialism, genocide, and superpower tensions, the nascent structures of an international humanism have appeared. The challenge of the current generation is to embrace this global citizenship—to think about security, democracy, and justice on a worldwide scale.

The first step toward global thinking requires that we adopt a definition of peace that goes beyond the short-sighted demands of national security. To this end, the United Nations Human Development Program stresses the need for us instead to think of peace in terms of human security. This distinction bears frequent repetition. Human security is not just a concern with weapons—it is a concern with human life and dignity. The martyred Salvadoran Archbishop Oscar Romero eloquently expressed this idea. He told his people that, “the only peace that God wants is a peace based in justice.”

Indeed, how can we say that there is peace when thousands are made to work in dehumanizing conditions? How can we say that there is peace when the United States builds more prisons and fewer schools? How can we say that there is peace when millions go hungry? In the age of globalization, those who make peaceful changes in our economy, politics, and morality impossible will make inevitable the future conflicts arising from the unacceptable inequalities that I described earlier.

The second step in global thinking is to expand our understanding of democracy. Too often, democracy is discussed only in its most formal mode. People are satisfied that democracy has a place in the constitution of the state, but make no room for democracy in the constitution of their own soul. They do not let it affect their daily interactions, their personal relationships, or their professional ambitions.

For this reason, some of our greatest leaders have called for profound change in our values. But a democratic revolution is not merely sentimental and individualistic. Yes, it demands changes in the way we live and the way we understand ourselves, but it also promises to change the structures that govern our society. For, at its core, democracy is a radical philosophy of civic participation. It is the faith that through public dialogue and inclusive deliberation, ordinary individuals can build better systems for living together. Democracy rests on the need for all citizens, not only the most powerful, to be able to influence meaningfully the political and economic institutions that affect their lives.

As you begin to renew your faith in democracy, each of you must reconsider the privileges you enjoy as citizens in a prosperous country and as beneficiaries of this fine university. And you must embrace the responsibility that comes with this privilege. In this democracy, there is no room for guilt, but only for compassion: the point is not to feel guilty about the gifts you have received, but to feel always committed to the struggle to guarantee that all people may live such dignified lives. There is no place for resignation, but only determination: though world problems may seem overwhelming, you must be determined to make your mark against poverty and inequality. And there is no stopping at simple charity, but instead you must expand your solidarity: your concern for the health and well-being of others must spread through all lands.

While we must reclaim the democratic values that inspired the Enlightenment revolutions in France and the United States, we must also go beyond the comfortable limits of traditional civics and grapple with the international challenges of today. We have already seen that the United States, while claiming to protect democracy in the developing world, has too often protected only a narrow, nationalistic self-interest. We can no longer afford to think in terms of a simple nationalism.

In the global era, true democracies must also be humanists. For when you believe that people controlling their own lives is a tru
sound basis for this nation, you begin to recognize the inherent dignity and worth of people in other lands as well--people struggling to exercise their right of self-determination and to forge their own models for development.

Indeed, this leads us to a third crucial component of global thinking, and that is reformulating our views of economic justice. We must remember that true democracy is not merely the distribution of political power, but also the distribution of economic power. Sadly, in this age of huge corporate mergers, this fact is too often overlooked. It is overlooked by many policy-makers and business people who quietly solidify a global economic order based on cynicism and individual profit. But for many poor and working people throughout the world, it is an obvious fact.

On his recent trip to Mexico, Pope John Paul II addressed this situation, and spoke out against a capitalist system so far removed from religious and democratic values. He argued that "the human race is facing forms of slavery which are new and more subtle than those of the past...and for far too many people, freedom remains a word without meaning."

Perhaps what makes the economic exploitation and hardship of our day more insidious is the fact that it exists alongside tremendous wealth and abundance. U.S. citizens spend eight billion dollars a year on cosmetics--two billion more than it would cost to provide basic education for everyone in the world if these funds were redirected. Europeans spend eleven billion dollars a year purchasing ice cream, yet we know that only nine billion dollars a year would be adequate to assure water and sanitation for all people.

How much poverty can democracy endure? The poor are a massive and growing group of powerless citizens whose needs go unheeded. They are neither a cohesive voting block nor an economic force. They do not participate out of their own despair, and they are left underrepresented out of others' disdain. In America, as in other countries, the poor are being condemned to permanent segregation by the very mechanisms that should be protecting them. As channels of participation and representation continue to shrink, the poor will be indefinitely marginalized from society.

At home and abroad, the faces of poverty are increasing and diversifying. We should not fall victim to the temptation to ignore poverty based on cultural differences or varying shades of skin color. We must look deeper to see the human essence that gives us all aspirations and hopes for a better life. We must listen to those voices that cry out for social justice. We must accept the responsibility that comes with the fundamental truth expressed in the United States Constitution: All men are created equal. Yet, as we all know, we are not all born with equal opportunities. It is democracy's responsibility to rectify these unequal opportunities. Poverty universal suffrage--however, it has yet to do the same economically. The great economic inequities that exist in the United States undermine its democratic system and, furthermore, threaten to overwhelm it.

To change these unacceptable trends, our societies must begin viewing global systems from the perspective of society's most downtrodden populations: the culturally subjugated and the economically dispossessed. In our democratic faith, we must reject condescending or trickle-down solutions to world problems, and instead highlight movements that allow ignored and deprecitated populations to become political actors.

Do not doubt that such movements have accomplished much. The United Nations Development Program reports that, in the past 50 years, poverty has fallen more than in the previous 500 years. Infant mortality in the developing world is one-third what it was in 1960. And during this same period of time, life expectancy in the poorest countries has been extended more than fifteen years, owing largely to a revolution in women's health.

Providing another important example of moral progress, two Latin American nations have recently taken historic steps toward ending traditions of entrenched militarism that impeded democracy and worsened poverty. Following the restoration of democracy to Panama in 1989, I worked on a campaign to abolish the country's national army, as Costa Rica itself did in 1949. The campaign was successful, and as a result, Costa Rica and Panama now enjoy the safest border in the world.

More recently, I have helped promote promising legislation in Haiti, the poorest country in the Western Hemisphere. This country, too, has fully de-funded its armed forces. And if Haiti approves the elimination of its military in a new constitution, it could continue to dedicate resources to crucial development needs. Progress in these two nations has shown the world that Costa Rica is not a unique case. The abolition of national armed forces is truly a viable option for many countries.

I share these facts with you not so that we may grow complacent and stop working, but to convey a sense of the momentous possibilities for progress. Did it not take a movement of scorned but persistent abolitionists to end the scourge of slavery? Let us similarly join together to end the scourge of poverty. Did not relentless advocates for
independence succeed in ending colonialism? Let us now join in solidarity with the oppressed people of the world so that all may know liberty and justice.

I have told you that a renewed focus on human security, thoroughgoing democracy, and economic justice will be the basis for a profound shift in our ethical thinking. To say that a fundamental change in values is necessary, however, is not to avoid concrete policy proposals. Rather, by putting our values up front, we are able to turn to the problems of the day with new vitality and insight. Truly, we must allow our public policy to grow out of our ethical convictions.

A major focus of my work has been challenging a world military-industrial complex removed from democratic controls and humanitarian standards. Without a doubt, military spending represents the single most significant perversion of worldwide priorities known today. The $780 billion dollars spent on weapons and soldiers in 1997 constitutes a global tragedy.

In India and Pakistan, in Indonesia and sub-Saharan Africa, in the former Yugoslavia and many other nations, bloated military budgets have led to profound deprivation and human suffering. Unfortunately, half of the world’s governments dedicate more resources to defense than to health programs. Such distortions in national budgets contribute to poverty and retard human development.

War, and the preparation for war, is one of the greatest obstacles to human progress, fostering a vicious cycle of arms build-ups, violence, and poverty.

The United States, which spends two hundred and eighty billion dollars on its military, stands as an extreme example of moral irresponsibility. Recently, I have been very critical of President Clinton’s plan to create the largest increase in defense spending since the Reagan era—a proposed addition of $110 billion over the next six years. By maintaining a massive military-industrial complex, the United States sends the wrong signal to other countries whose national budgets desperately need to be directed toward human development.

Although the Clinton Administration has insisted that domestic necessities will still be accommodated within the budget, these assurances mask serious flaws in the moral and political emphasis of U.S. policy. While military officials are given virtually anything they request, approximately one in every five children in this country grows up in poverty, and over 40 million U.S. citizens lack any health insurance.

The impact of military spending worldwide is even more dramatic, and the progress that could be realized if military spending were redirected is tremendous. If we channeled just $40 billion dollars each year away from armies and into anti-poverty programs, in ten years all of the world’s population would enjoy basic social services—education, health care and nutrition, potable water, and sanitation. Another $60 billion dollars each year over ten years would provide each person on this planet with an income level above the poverty line for their country. Shockingly, this life-giving $80 billion dollars in annual funds would represent only one percent of world defense expenditures. With the new money, that Clinton intends to invest in costly defense initiatives alone, the U.S. could champion an immediate international effort at redirection. Truly, increased military spending represents a missed opportunity for momentous human advancement.

World leaders must stop viewing militaristic investment as a measure of national well-being. And they must embrace multilateral efforts that recognize the complex and politicized nature of contemporary security questions.

Unfortunately, the U.S. government has failed to provide leadership for true international security. Many times, Congress has refused to participate in initiatives to establish a cooperative framework for global security. Even while preaching the necessity of controlling weapons of mass destruction, these lawmakers have refused to ratify major agreements on chemical and biological weapons, on the use of landmines, on nuclear testing, and on international courts which could hold war criminals responsible for their actions.

Perhaps most significantly, the United States, which is currently responsible for 43 percent of all weapons exports, has been unwilling to strengthen humanitarian restraints on these transfers. The sale of arms is big business. As a whole, military spending in industrialized nations is down from its peak of ten years ago. But weapon contractors in these countries have continued to produce billions of dollars worth of armaments, and in fact have increased their weapons sales abroad. Their new clients are the impoverished countries of the developing world, places where the majority of conflicts now take place. In 1997, the United States transferred a record 23.3 billion dollars of arms to other countries. 156 billion dollars worth, or seventy-three percent of these weapons, went to the impoverished countries of the developing world. And 8.3 billion dollars worth of this sum, or fifty-three percent of U.S. arms transfers to the developing world, went to undemocratic governments.

At the end of 1997, weapons manufactured in the United States were being used in thirty-nine of the world’s forty-two ethnic and territorial conflicts. It is unconscionable for a country that believes in democracy and justice to continue allowing arms merchants to reap profits stained in blood. But ironically, vast amounts of taxpayer money go to support this immoral trade. In 1995, the arms industry received seven point six billion dollars in federal subsidies—this amounts to a huge welfare payment to wealthy profiteers.

In pursuing true solutions to contemporary defense concerns, and in creating policies that will allow us to focus on human security, we urgently need to work together as an international community to limit the availability and spread of deadly weaponry. For this reason, I have advocated an International Code of Conduct on Arms Transfers. This agreement demands that any decision to export arms should take into account several characteristics pertaining to the country of final destination. The recipient country must endorse democracy, the rule of law, and civilian control over the military and security forces. And they must abide by accepted conventions on torture, civil rights, and international aggression. In addition, all nations would be required to report their arms purchases to the United Nations.

Many say that such a code is impractical—impractical because it puts concern for human life before a free-market drive for profits; impractical because it listens to the poor who are crying out for schools and doctors, rather than to the dictators who demand guns and fighters. Yes, in an age of cynicism and greed, all just ideas are considered impractical. You are discouraged if you say that we can live in peace. You are mocked for insisting that we can be more humane.

But I am not alone in denouncing this cowardly status quo and in supporting an International Code of Conduct on Arms Transfers. Nobe Peace Laureates Elie Wiesel, Bett Williams, and the Dalai Lama spoke with me in presenting the Code last year. So did José Ramos-Horta Amnesty International, the American Friends Service Committee, and th International Physicians for th
Prevention of Nuclear War. Since then, Archbishop Desmond Tutu and Rigoberta Menchú have joined this impractical group. As have Lech Walesa, Adolfo Pérez Esquivel, Mairead Maguire, Norman Borlaug, Joseph Rotblat, Jody Williams, and one of last year's laureates, John Hume. In all, seventeen winners of the Nobel Peace prize have endorsed the Code. But more importantly, thousands of individuals, groups, and community leaders have expressed their belief that a Code of Conduct is not only a morally sound idea, but also a politically necessary agreement. It is these people, and the force of their convictions, that turn possibility into progress, and turn impractical ideas into reality.

The International Code of Conduct on Arms Transfers builds on local efforts to regulate sales, such as the measures adopted by the European Union last year. Currently, the US Congress is fashioning a bipartisan plan for participation in a Code of Conduct effort. The deal will give President Clinton one hundred and twenty days to begin negotiating a multilateral agreement. We know that arms industry lobbyists will be working to see that the policies pursued during this period are weak and full of loopholes. Thus, those here tonight, and many others like you, must generate the kind of popular pressure that will force strong and resolute action.

My friends: When Voltaire wrote Candide over 200 years ago, he was acutely aware of the moral obligations created by an integrating world. In this book, Candide meets a slave from the Americas who is missing both a hand and a leg. The slave's hand was cut off by dangerous machinery in a sugarcane mill; his leg was cut off by cruel masters to prevent him from escaping. As Candide looks on, the miserable slave tells him: “This is the true price of the sugar you eat in Europe.”

If ethics required global thinking in Voltaire's time, think of how relevant this powerful anecdote is in the age of globalization. As Americans, you have only to look at the label on your clothes, and wonder if foreign garment workers labored for a just wage, to see that you already participate in the global system that brings great wealth to some and great misery to many others. The question is not whether you will be involved in the ethical challenges of globalization, but what your contribution will be. Will you, in your apathy, be complicit in the injustices I have described? Or will you, with your action and your example, bolster the ranks of those fighting for human security?

In the dense rain forests of Central America, Mother Nature frequently provides us with an enlightening lesson: when a storm topples a tree, its roots pull up the roots of the surrounding trees, causing them to fall as well. In much the same way, today's world is a compact for each of cultures, states, and nations, whose roots form an interlacing inextricable network. The survival of each tree depends on the well-being of all the others. A nation traumatized by war, by oppression, or by poverty is like a tree on the verge of falling. It is an omen of danger for the entire forest.

In our age, the Cold War has ended, its oversimplified dichotomies are now obsolete. Now, the likes of Stalin and Pol Pot, Suharto and Pinochet cannot be defended by any government. What is scene of human integrity — we have seen women rally for their rights in Beijing; we have seen a new era of peace come to Central America; and we have seen Nelson Mandela lead the South African people away from the horror of apartheid. Rather than allowing globalization to be defined by rampant speculation and persistent inequities, humanists demand that these victories, and the moral victories yet to come, must characterize our current era.

You will recall that at the beginning of the speech I quoted Martin Luther King, who warned us that the path we are on would only lead to racism, materialism, and militarism. I want to tell you, however, that King did not believe the situation was hopeless. He told us that with courage and determination, we could change course. "Human progress is neither automatic nor inevitable," he said. "We are now faced with the fact that tomorrow is today. We are confronted with the fierce urgency of now. In this unfolding conundrum of life and history, there is such a thing as being too late. This is no time for apathy or complacency. This is a time for vigorous and positive action."

My friends. I tell you tonight that human advances do not come when we wait to see if others will act. Human security will not be guaranteed if we always hope that someone else will step forward. Instead, progress begins when each of us starts to think globally, and when each of us contributes to ending poverty and inequality. The struggle can only begin with a personal commitment from each of us. But it will not end there. The whispered resolve of the individual becomes the roar of collective action. Its righteous sound reverberates in the structures and institutions of a new society. Its voice is steady and its message is clear. We can act with compassion. We can be more humane. We can live in peace.
Dean Kertes on Oscar Arias

Vice President and Dean of Students Joseph Kertes spoke with HO about Chapman University’s 1999 Distinguished Lecture Series Speaker Oscar Arias, whose positions on Central American policy issues, according to the New York Times, “have become the standard by which many people in Congress and elsewhere have come to judge United States policy.” Following are excerpts from Dean Kertes remarks.

“Previous to my time at Chapman, I was at USC for many years, and I had the privilege of putting together the Peace Studies program there in the middle to late ’80s—the time during which Oscar Arias was head of state in Costa Rica. We were very much aware of him and really looked up to him as an international role model representing a country that has no standing army and that is one of the most literate countries in the world, despite the fact that it is poor, so we emulated him. And the opportunity to ten, twelve years later actually meet him and spend considerable concentrated time with him was truly a highlight of my career.

“Dr. Arias was very generous with his time—came the night before and joined us for several dinners and some panel discussions and meetings with students. Many members of the university community had the opportunity to either meet him, hear him, and/or see him.

“It is very refreshing to think that countries can demilitarize. Dr. Arias was successful in helping Panama demilitarize, not successful in helping some others. But he continues to work at it.

“He is extremely popular among Costa Ricans to this day, both in Costa Rica and in this country. And he did something in Central America that the U.S. couldn’t pull off, and that was to bring peace to the region. An act of a tentative peace.

“We have a wonderful Peace Studies program at Chapman, established by a faculty member, Paul Delp, who was a Chapman alum from the class of ’39 who became a faculty member here and continued to live in our university-owned housing until he passed away. And there is a Peace Studies chair—the Delp-Wilkinson. Harmon Wilkinson, who is an octogenarian, is a current and very active member of our board of trustees and an alum from the class of ’35. His father was a chairman of the board here at Chapman, so the Wilkinson have several generations of interest, support, connection, and inspiration associated with this institution. And Harmon was a conscientious objector in World War II—a very difficult position for someone to take during a period of, shall we say, a more popular war than Vietnam, but obviously a man of very strong convictions, which he holds to this day.

“The chair is held by Professor Don Will, a wonderful political scientist and also a member of our distinguished lecture series planning group. It was through Don Will’s efforts that Oscar Arias came to campus. The first year of the program brought Myrtle Evers Williams, the second, Edward James Olmos, the third, Martin Luther King, Jr.’s son. Then this year Oscar Arias... a very erudite man... Many people were impressed.

“Our hope is to establish an endowment so that we can increase the funding that we have available for a program of this kind. It makes such an impact on the community when we bring people of this stature—not only the Chapman community but the surrounding community as well, because we open these events to anyone who wants to come, for free. That’s our vision, but these things are not inexpensive.

“There are a lot of interesting and wonderful angles to something like this. Thank goodness the president of the university, James Doti, who gave the funds to get it off the ground. And he’s played a major role in each of these events.

“And a student named Chris Chennault did a marvelous job of pulling off a very complex set of programs. He was the student coordinator of the event. Led the effort, under my supervision and with the advice of the planning committee.

“When I was an undergrad at UCLA, I had the honor of seeing Martin Luther King, Jr. speak. This was maybe 1965. I found his remarks and of course his presentation to be so inspiring that the inspiration has lasted to this moment. 34 years later.”

“If Oscar Arias inspires one person in a way that would last for 34 years or more—that’s quite an accomplishment.”
Diversity in Health Administration

Summer Enrichment Program Opening Doors

BY DENNIS S. PALKON
Author Dennis S. Palkon, Ph.D., M.P.H., M.S.W., is professor and former chairman of health administration at Florida Atlantic University.

Former intern Ana K. González co-founded and chaired the Chicana Latina Pipeline to Graduate school, which supports Latinas pursuing doctoral-level studies.

For five years, the Chicago-based Institute for Diversity in Health Management has placed African American, Latino/Latina, Asian American, Native American, and Pacific Islander students in the health administration industry through internships in health care facilities throughout the United States.

The Institute was founded in 1994 with funding from four organizations: the American Hospital Association (AHA), the American College of Healthcare Executives (ACHE), the National Association of Health Services Executives (NAHSE), and the Association of Hispanic Healthcare Executives (AHHE).

The mission of the Institute is to expand career activities for minorities within the field and to increase the number of qualified minorities entering health administration and reaching its top executive levels.

According to Neva Dillon Brown, director of education for the Institute, “Minorities represent more than 20 percent of all hospital employees but hold less than one percent of top-level management positions.”

One reason for the disparity, she said, is the fact that minority students are often unaware of health care management as a viable career field.

One initiative of the Institute is the establishment of the Summer Enrichment Program (SEP). Begun in 1994, it is primarily for undergraduate juniors and seniors and graduate students who are interested in health services management.

SEP has five primary components: internships, didactic sessions, field trips, academic preparation for standardized graduate admissions tests, and a structured project.

Internships

The internship is the core of the SEP. According to Brown, it is the internship that most often attracts students to the program. The Institute has discovered that internships occupy the majority of the students’ time and help students receive an experiential understand-
health facilities. The tours enable interns to interact with health care professionals, and they can learn from a variety of health care experts.

In their discussions and meetings with health care managers, interns learn about the mission, values, and philosophy of various health care organizations.

Test Preparation

The Institute finds that it is important to prepare the interns for standardized tests that are typically required by health administration graduate schools. Preparation courses for the Graduate Record Examination (GRE) or the Graduate Management Admissions Test (GMAT) are available to all student interns.

Without debating the merits of the tests, the Institute firmly believes that low scores will be a disadvantage.

Structured Project

Students complete a structured project during the SEP. Projects are typically derived from students' interests, with input from faculty and preceptors. Many students find this to be a most rewarding, tangible accomplishment.

Latin/ Latino Interns

For the period 1996 through 1998, 24 Latinos and 25 Latinos were interns with the Institute. They represented 13.2 percent of the total 234 SEP interns participating those years.

Scholarship

In addition to the SEP, the Institute for Diversity in Health Management established a perpetual scholarship fund for minority graduate students in health services administration.

According to Felicia Lopez-Walker, director of communications for the Institute, the scholarship is named in honor of Elliott C. Roberts, Sr., one of the nation's leading public hospital administrators. Seed money for the scholarship fund was provided by Service Master and by Catholic Health Initiatives.

The first Elliott C. Roberts, Sr., scholarship winner, reports Lopez-Walker, was Ann-Gel Palermo, then a second-year graduate student at the University of Michigan School of Public Health, Ann Arbor. Palermo received $5,000 for the 1998-1999 academic year.

Palermo, a 1997 cum laude graduate of the State University of New York (SUNY) College at Brockport in biology and sociology, was described on receiving the award as someone who "embodies Mr. Roberts' commitment to serving people, especially the poor and underserved," as reflected by her record of volunteerism and community service.

Since 1995, the Institute has awarded more than 90 scholarships and grants totaling nearly $110,000. The awards are competitive and offer assistance in covering tuition, books, and related academic expenses to qualified minority students in both undergraduate and graduate programs in health administration.

References

INTERN PROFILES

ANA K. GONZÁLEZ was part of a research team for the MacArthur Foundation Research Network that studied urban children in several California communities. A McNair scholar, González designed and developed research projects. She graduated in May 1997 with a B.A. in Sociology from the University of California at Berkeley and planned at that time to begin graduate studies in health administration in the fall of last year.

JOSÉ A. NÚÑEZ can trace his interest in health care to the 8th grade, when his class toured the local community hospital. In high school and his first two years of college, José was never really aware of the different health care fields. He was accepted to both the 1996 and 1997 SEP, interning first at the University of Michigan School of Public Health, then at

Samaritan Health System in Phoenix, Ariz.
Núñez is pursuing his undergraduate degree in health science with a concentration in health services administration at California State University in Fresno, Calif.

He is a member of the American College of Health Care Executives and is involved with several community initiatives, including PASS (Promoting the Advancement of Students), which raises awareness about career opportunities for high school students and first-year college students interested in science; Chicano Health Organization, where he recruits Hispanic health professionals to speak at meetings and organize health fairs at labor camps throughout the San Joaquin Valley; and ORALE (Outreaching Raza And Leading them toward Education), where he mentors disadvantaged middle school students in Fresno.

LAURA PADILLA, who had originally entered school to become a primary care physician, now feels most strongly about health education and health administration. Padilla worked at Cedars Sinai Medical Foundation in Los Angeles a a 1995 SEP. She was hired by Cedars immediately after her internship. Her desire to become involved in health education was reinforced as result of mentoring Santa Ana High School students, in what is a largely Latino community.

Padilla serves as a Big Sister to a single-parent child. She feels that administrators need to be knowledgeable about health care systems as well as being aware of the daily events occurring in their health care organizations. She says the SEP has given her that exposure, as well as the experience and knowledge to better direct herself toward her career goals.

She is pursuing a master's degree in public health at the University of Southern California: Los Angeles, Calif.
Strategic Mentoring via HOSTS

Dallas-based program now in 42 States

BY GARY M. STERN

HOSTS, a for-profit educational company headquartered in Dallas and overseen by the former superintendent of the Dallas school system, is improving the academic skills of students nationwide and Hispanic students in particular.

HOSTS, an acronym for Help One Student to Succeed, sells schools a highly structured program aimed at identifying students' weaknesses in English, language arts, or math and uses a prescriptive approach to guide mentors to help students. Because it is so highly structured, it aims to overcome the skeptics who believe mentoring programs are random attempts in the classroom that show little academic gain.

In 1999, HOSTS is involved in 1,400 schools in 42 states, predominantly elementary and middle schools, many in Texas, California, and Michigan, where there are large Latino populations.

"HOSTS uses a powerful database to align curriculum material placed in an electronic database so we can do four or five important things, including assess a child's reading ability, interest level, and learning style," explained Chad Woolery, HOSTS president. This database helps prescribe an individual chart for each student's academic needs in reading, writing, math, and language acquisition. HOSTS is effective.

Woolery suggested, because it offers "structured mentoring. We give the mentor a complete roadmap with everything they need already prepared, sitting in a folder for that child."

But HOSTS is careful to avoid trying to supplant the core curriculum that a school offers. Instead, it augments the learning in the classroom. In each school, a HOSTS instructor collaborates closely with teachers and also coordinates the mentors. Most schools use Title I and $9000 the second year. Owned by Joseph Ritchie, a Batavia, Illinois, entrepreneur and former options trader, HOSTS generated $16 million in revenue in 1998.

Most students selected to participate in HOSTS are two or three grades behind in reading and/or math. Though four mentors might work with each student per week, Woolery emphasizes that learning is organized to address a student's academic shortcomings. "The material is like a recipe," he said.

After the student takes a reading test, followed by a diagnostic test, the HOSTS instructor devises a learning map to strengthen the student's skills and address weaknesses. A child's learning style, analytic or kinesthetic, is also taken into consideration.

HOSTS is successful because it combines "individual prescription matched to instructional resources and strategies in the hands of a caring adult," said Tom Jandris, director of policy at the Education Commission of the States, an organization that serves as a policy advisor to 50 states. He had been the superintendent at the East Aurora, Illinois, school system and used HOSTS. "Individualized instruction is the one biggest factor that leads to improvement," he said.

As he how mentors who are not trained educators can teach effectively, Woolery replied, "If you're trying to
teach a child what a vowel is, and you can
take corrective action, you don't
have to be a teacher. It's like a parent
teaching a child." Mentors are provid-
ed with a variety of tools, including
kits, cards, games, videos, and soft-
ware, and use any tool that will work
with a particular student. A mentor
can focus attention on a child's indi-
gual needs in ways that a classroom
teacher responsible for 25-35
students cannot. "The typical
American teacher does not have the
resources, technology, or database," 
that a HOSTS mentor or instructor
employs. Woolery suggested.
HOSTS has proven particularly
effective with Hispanic students.
Woolery said. "Latino students,
because of the culture of the family
and close families, respond well
with one-on-one intervention. It's
like a grandmother talking to a
Grandson," he said. If children are
unsure of their academic skills and
reluctant to express themselves in
a larger class, they might feel more
comfortable asking a question of
one person whom they have gotten
to know. "Many Hispanic students
are new arrivals and can't ask par-
ents how things work in America. 
Here's a person who helps them
negotiate a cultural change," said
the former Dallas superintendent.
The program has also proved
helpful in California, where
Proposition 22" has limited bilingu-
el education to a year. "HOSTS
helps a child exit from bilingual
programs within the time frame," 
Woolery noted. When schools have
only a year to teach language skills,
HOSTS can expedite the learning
process and add to classroom
learning. Jandris noted that HOSTS'
bilingual program is effective
because it offers a "dual language
program. It honors the culture and
original language, builds literacy
skills in the initial language, and
then builds skills in the target lan-
guage."
HOSTS began in 1971, an outgrowth
of the vision of Bill Gibbons, a teacher
in the Vancouver school system, who
was working with high school students
who had problems reading. A high
school dropout him self, Gibbons
recalled how a mentor turned
his education around, and
decided to launch a non-
profit organization dedicated
to mentoring and tutoring
(HOSTS turned
profit-making in 1991). Gibbons
is still involved in
HOSTS but no
longer runs it.
HOSTS' edu-
cational philosophy incorpo-
rates psychologist Abraham
Maslow's theory
on higher learn-
ing skills. "We believe in developmen-
tal higher order thinking skills. We
start where the student is and stress
success," he said. If there's one word
that encapsulates HOSTS' underpin-
ing, it is "structure," Structure is
what gets results. Other mentoring
programs are random and not aligned
with what teachers are being held
accountable for." Woolery noted.
HOSTS works closely with classroom
teachers on specific tests or assess-
ments that states require and adopts
its prescriptive approach to address
the skills needed to pass the test.
Over 90,000 mentors participate
in HOSTS' program and are critical
to its success. Yet HOSTS has never
conducted a study to track how
long its volunteers stay with the
program or tracked its turnover.
HOSTS advertises for mentors and
works with civic leaders to attract
new mentors.
Nick Flores, a 50-year-old
retired manager at the Federal
Deposit Insurance Corporation
(FDIC) in Dallas, mentored at the
Forman Elementary School in
Plano, Texas, during the 1998-99
school year to "give back to the
community. He tutored three stu-
dents in reading for one-half hour
each once a week. one who recent-
ly emigrated from Mexico and
spoke minimal English and two
other Spanish students who were
bilingual. He received only one
hour's training from HOSTS. He
received a packet of information
each session that included reading
exercises and comprehension ques-
tions directing him on what to
tutor. Over the course of a year, a
recent immigrant made enormous
strides in reading comprehension
Flores noted. While the student
read passages aloud. Flores
stopped him to ensure that he
understood what he was reading. At
the beginning, the student compro-
hended few words, but through
repeated tutoring, his reading compre-
rehension rose.
"Were he left to a larger class-
room, he might not have learned so
quickly," Flores said. "The individ-
ualized attention that he and the
other students received helped
them to improve." However, Flores
was unaware of any formal pre-
and post tests to document each
student's improvement. Not only did
Flores tutorine help each studen-
but it affected him as well. "I've been very fortunate in my life, and I wanted to give back to the community," he said.

In addition to helping students with academic issues, most mentors are able to boost a child's self-esteem, which grows when students can read like their peers, answer a question in class, and work on a problem. We can get them to a level where they can compete with their peers," Woolery said. Flores developed rapport with each student by learning about their family or their after-school interests. Students could easily identify with him since he was Hispanic himself and a successful professional.

In September 1998, HOSTS began at the Jose de Escandon Elementary School in McAllen, Texas, near the Mexican border and Brownsville, Texas, where 98 percent of the students are Mexican Americans and most are poor, noted Terry Moreno, the school's English HOSTS instructor. Moreno oversees HOSTS instruction for 68 of the schools 600 students. Close to 90 percent of Escandon Elementary School's staff was trained to work with HOSTS and learned how to coordinate with mentors. Moreno's teaching time is paid by a Title One federal grant.

Each HOSTS student is initially tested using the IRI, the Informal Reading Inventory. That test yields the student's reading grade and leads to a student's taking the RDA (Reading Diagnostic Assessment), which identifies specific reading problems that a student has, such as finding the main idea or needing to strengthen vocabulary. "We then work on those skills and use material to raise a student's grade level," Moreno said.

"HOSTS is successful because of its structure," Moreno said. Mentors and teachers "identify a student's weaknesses and try to attack them." Classroom teachers, working with mentors, target areas that they think the student might have missed. "Can you work with the student on prefixes and suffixes?" one teacher asked a mentor. "Mentors can cover a large portion of what the child misses" in class, said his English HOSTS instructor.

Mentors include teachers on their lunch hour, executives, housewives, and fire fighters, who spend one-half hour to an hour a week tutoring students.

Since HOSTS has only been operating for one year at Escandon Elementary, the school has not yet tested its students to show their progress. "One to one you have a better chance to succeed with the child," Moreno said.

Many Mexican American students are shy, get lost in a large class, but might blossom under a watchful eye of a caring tutor. The program is structured so that students can succeed at tasks and also boost their self-esteem, he added.

A study conducted by Dr. John D. Schlofeldt of 3,700 HOSTS students who had received tutoring revealed that they raised their reading level by two to three grades. But a spokesperson for the Department of Education questioned the results of HOSTS testing. The spokesman said that HOSTS "does not track improvements among Title I and Special Ed populations in their evaluation data samples. They also don't use comparisons or control schools in their studies. Given these limitations, the HOSTS program reports program gains among participating children."

But Tom Jandris noted that HOSTS was one of only 40 programs selected by the Educational Commission for Title I funding because of its proven educational success. "Objective data over 28 years demonstrates dramatic educational gains—often two years acceleration in language arts," Jandris said, acknowledging that he had once invested in HOSTS but is no longer associated with it.

Disputing the Department of Education's claim, Jandris said that recent studies have included control groups.

At its 21st annual conference in February 1999. HOSTS awarded Ruben Hinojosa, a U.S. Congressman from Texas, its HOSTS Champion for Children Award. The award recognizes his achievement in helping "make a difference in the educational development of school-age children."

HOSTS has proved successful because it is "research-based, child-centered, and aligns with the way a child learns," said Woolery. Children learn best, he said, when they have a constant measurement to ensure that learning is occurring.

"We focus on the individual child's needs. We focus...by knowing what it is a child doesn't know. We are constantly seeing a child demonstrating his [or her] learning."
The University of Texas at Brownsville and Texas Southmost College

By Roger Deitz

The University of Texas at Brownsville and Texas Southmost College, also in Brownsville, possess a unique symbiotic relationship. They entered into an inventive partnership to provide expanding educational opportunities to the community in the Lower Rio Grande Valley. A great majority of residents in the region are Hispanic and—Texas being as big as well, Texas—they were isolated geographically from the other fine institutions of higher learning in the state, and from undergraduate options that were available only elsewhere.

This creative partnership was designed to “improve the continuity, quality, and efficiency of the educational programs and support services offered by the University and the College.” It also resulted in the establishment of a four-year undergraduate institution, where only upper-level and community college programs previously existed. The move combines the administrative, instructional, and support services of the upper-level university and the community college while eliminating any artificial barriers that existed between them.

Continued program development, new program implementation, systematic cooperation with local schools, and partnerships with other institutions of higher learning are major goals of the emerging University-College partnership.

Back in October of 1991, Texas Southmost College President Julio Garcia was named president also of The University of Texas at Brownsville, and therefore a new school was created by the partnership of Brownsville’s two educational institutions. Garcia had been TSC president since 1986 and assumed her new office in January 1992. At that time, she stressed that there was a “massive and overwhelming need for higher education” to serve the population of the Rio Grande Valley community. She praised the novel partnership arrangement: “Today for me marks the next step for what the community has long needed.” Garcia said that the necessary resources were not available under the former institutional arrangement. “We have a tremendous need,” Garcia remarked. “And scarce resources.”

The needed resources were indeed secured. Garcia says that the partnership allowed TSC to continue to be supported by local tax. Meanwhile, the UT System endorsement resulted in a greater share of state funding for higher education for the people of Brownsville. The merger officially took effect in the fall of 1992. Garcia, who started her teaching career as an instructor at TSC in 1972, pointed out, “We’re the first institution in Texas to try this kind of partnership. We have heard the UT System say, ‘The eyes of Texas are upon us.’” The eyes of the Hispanic Outlook are also upon the innovative and successful arrangement that these two institutions of high
education used to ensure a better and more responsive education for the population of the Lower Rio Grande Valley. And so we welcome The University of Texas at Brownsville and Texas Southmost College to become our partners as well—on the Honor Roll.

Texas Southmost College was created by the Brownsville Independent School District in 1926, the second community college in the state of Texas. Originally known as the Junior College of the Lower Rio Grande Valley, it became Brownsville Junior College in 1931. When Southmost Union Junior College District was established in 1949, it was renamed Texas Southmost College.

The bill that created The University of Texas at Brownsville in 1991 also authored the partnership arrangement with Texas Southmost College. UTB already had roots in the region as an upper-level institution. Pan American University opened a center on the campus of TSC in 1973 to teach upper-level and graduate courses. In 1977 the state legislature approved Pan American University of Brownsville as an upper-level center. In 1989, Pan American University at Brownsville became part of UT System as the result of a University of Texas-Pan American merger. This was a prelude to the establishment in 1991 of The University of Texas at Brownsville, a freestanding upper-division university.

After 20 years, all the hard work aimed at securing full university status for Brownsville, Texas, paid off. Lawmakers voted to approve the establishment of UTB as a four-year university, beginning in the fall of 1998. Instead of offering upper-division and graduate courses only, UTB enrolled 900 first-year students into programs of teacher preparation.

through their unique partnership arrangement. The University of Texas at Brownsville and Texas Southmost College have embarked on a quest to "provide the finest educational opportunities that their consolidated resources can create."

Today, students in the Rio Grande Valley have the opportunity to pursue programs and degrees offered at a four-year institution as well as the vocational/technical, developmental education, and continuing education courses that a community college traditionally offers.

The partnership institutions, with a total enrollment of approximately 10,000, are able to provide the community with certificates in occupational technical programs and associate, bachelor's, and master's degrees in arts and sciences, business, education, and health-related fields. Moreover, through cooperative programs with other universities, students can even earn additional masters and doctoral degrees.

Through the Continuing Education Division, the University offers a diverse array of courses, which range from one-day seminars to more complex extended courses for credit. The Division is the home of one of the largest Elderhostel programs in the state of Texas.

Since the partnership was established, the campus of UTB/TSC has become the largest college campus in South Texas, growing from 400 to more than 250 acres. UT-Brownsville and Texas Southmost College are located on the grounds of Fort Brown, established in 1846 by General Zachary Taylor. The fort was the site of the 12th Cavalry Regiment, the last active cavalry unit in the U.S. Army. It is listed as a Historic Landmark on the National Register of Historic Places.

In 1997, UT-Brownsville completed the Science and Engineering Technology Building, the first UT building to be constructed on the TSC campus. The $23.5 million, 124,000 square-foot complex houses laboratories, classrooms, and offices for use by science and engineering technology programs.

There's more. Enrollment has increased by 56 percent, and the instructional capacity and budget have tripled. Graduation rates have also grown in all degree categories, and degree program offerings have doubled at both the baccalaureate and master's levels.

Many of the institution's programs are innovative. For example, there is a nationally acclaimed $6 million-plus Endowment Scholarship Fund, one of the largest among community colleges in Texas, that provides scholarships to area junior high and high schools with an opportunity to realize a college education. Most of these students are the first in their families to achieve such a goal. Students can also earn scholarships by taking college courses and earning As and Bs in those courses. As a result, hundreds of students are now attending UTB/TSC with scholarships, and working harder at their studies.

President Garcia is very concerned with such questions as, "What do we want to look like in the year 2010 or 2020 in terms of jobs and education and the environment?" Last January, Juliet Garcia was one of six college presidents who joined with a few industry and labor leaders to meet with Vice President Al Gore in Washington, D.C. At the summit meeting, they discussed the topic of "21st-Century Skills for 20th-Century Jobs." Garcia was asked to speak at the summit because of her perspective on the kind of training that new jobs will require and on partnerships between businesses and schools. Of great interest to President Garcia was the part of the discussion that revolved around linking up different sectors. She views UTB/TSC as a crucial factor in the socioeconomic growth of Brownsville.

"Our mandate," she says, "is to raise the educational attainment rate of this community—not to raise the educational attainment rate of the 18- to 24-year-old."

And this community of learners continues to grow—even reaching to the other side of the Rio Grande. UTB/TSC has been exploring the potential of a virtual university without borders, capable of exporting its most valuable product, a first-rate education, via satellite to the rest of the world. The school completed a telecommunications link that enables students attending Matamoros’ Institute of Technology (ITM) to access video-conferencing courses in business and education conducted on the Brownsville campus. Enthusiastic Mexican officials have plans to extend the link to 40 of its largest technological institutes around their country. Eventually, UTB/TSC will serve as the lone conduit for such teleconferencing courses connecting Mexico—through Brownsville—with the entire University of Texas System.

"The potential is endless," says Dr. Wayne D. Lewis, UTB/TSC's director of academic computing. He adds, "The opportunities are broader than we know, because we've only explored a few possibilities and the interest in both countries is overwhelming."

There is more technological magic afoot, linking the community of learners. The telecampus or virtual campus is coming. It is made up of seven "buildings" that offer students many of the same services and support systems found at actual UT System component institutions. The telecampus is designed to support distance-learning students, regular UT System students, and members of the public with admissions information, library services, and more. Close to 10,000 UT System students are involved in distance learning at this time.

Dr. Dawn Rodriguez of the department of English and speech says that a dual-enrollment composition course that she has been teaching through teleconferencing brings together 20 UTB/TSC students, ten Brownsville Independent School District students, and 28 San Benito High School students. According to Dr. Rodriguez, students developed expanded communication skills in addition to writing skills, appreciated having a "partner" class through which to hear different views on a topic, and were proud to have their writing published on the class Web site. Notice how the words "partner" and "partnership" continue to pop up...
Sunday morning, May 6, began for the Cintron family of North Philadelphia much as any other. Anibal, Inez, and their three daughters—identical twins Alejandra (nicknamed "J") and Alexandra (nicknamed "X")—and younger sister Anna Maria, went to the Ascension Church at 9th and 9th Street and attended the 9:30 a.m. Spanish mass.

After mass, though, the difference—the huge importance—of this particular Sunday became evident. Inez began preparing lunch for the dozen or so people who were about to witness an extraordinary moment.

The girls, however, began preparing for the day for which they had waited so long—the day they sometimes feared would never come. Graduation Day at Community College of Philadelphia.

Graduation is a time of transition, and thus a rite of passage. The word pride and the word joy might have been coined to describe the perception that parents have of their children on graduation day. All of these factors were in play at the Cintron household.

Alejandra and Alexandra and Anna Maria were about to become the first members of the Cintron family to earn a college degree. That accomplishment made this Sunday a landmark day. It was as if a hinge had been placed in the family tree, and from here on, the descendants of Anibal and Inez would have the possibilities of different lives and more choices.

The road that the Cintrons took to this destination was arduous and long, and every now and then, life exacted huge tolls. No matter. Anibal and Inez understood that education was a long-term strategy, and that foregoing luxuries to give their girls a Catholic school and college education would pay dividends that last a lifetime.

"I'm proud of myself and my sisters, because college is really hard to do well, and even harder for all of us," says Alexandra. "But I am proudest of my parents because they sent us to good schools and supported us. Without them, we couldn't have done it."

"Graduation felt good because I had studied and been through a lot of finals," Alejandra added. "I felt good too because of my parents and their support."

College became the Cintron family's daily business. Mom and Dad provided financial and emotional support. Relatives cheered their every success. Boyfriends will...

Alejandra, Alexandra and Anna Maria are the first members of the Cintron family to earn a college degree.
College became the Cintron family's daily business. Mom and Dad provided financial and emotional support. Boyfriends willingly took second place to books.

Anna Maria will be pursuing a baccalaureate in business administration at Temple University—just up the street from Community College of Philadelphia.

But the ceremony marking one family's remarkable strength and commitment, and reflecting the achievement of three young women who saw college as a collective destiny, is etched in the memories of those attending Commencement 1990.

The three sisters who had gone to school with each other all of their lives—graduating from John S. Hallahan Catholic Girls High School in Philadelphia—were graduated one after another, in reverse order of birth. Anna Maria, then X.

The cluster of 15 family members and friends, sitting together, was like a cheering section for the girls. By the time Alexandra's name was called—the last of the three to graduate—someone sitting behind the Cintrons yelled, What is this, the whole family graduating?

'I couldn't see them, but I heard them screaming,' says Alexandra.

Community College of Philadelphia, committed to providing "Education for a Changing World," is the third largest degree-granting institution in the Pennsylvania city, enrolling more than 40,000 students annually, more than half of them in transfer or general studies courses. Classes are conducted at more than 60 locations throughout Philadelphia, thanks to a concerted effort to make college as accessible as possible. Toward that end, the College also offers English classes on the Internet and TV courses on cable.

Hispanics do not represent a large portion of the city's population, but the College has a commendable record of recruiting those who are eligible to attend at ages ranging from teens to senior citizens. As of several years ago, the high school dropout rate for Philadelphia's Latinos was at disheartening 55 percent.
In 1969, women held four percent of all state legislative seats in the country. Today, women hold nearly 25 percent of all seats. But Latinas have not made the same progress. They are just starting to make strides in the political realm.

"Latinas will get there," said Larry Gonzalez, director of the Washington office of the National Association of Latino Elected and Appointed Officials (NALEO). "We have a lot of up-and-comers. Latinas, in general, have made tremendous strides in the last five years, particularly in state Houses."

Indeed, the strides that Latinas have made in politics have been tremendous in recent years.

The first Latina to seek national office was Adelina Otero-Warren, a New Mexico Republican who ran for the U.S. House of Representatives in 1921 and lost, according to the National Women's History Project. It would be another 68 years before a Latina actually won a seat in Congress.

In 1989, Hecana Ros-Lehtinen, a Republican from Florida, became the first Hispanic woman elected to the U.S. House of Representatives. Ros-Lehtinen has since been joined by four other Latinas, including U.S. Rep. Lucille Roybal Allard, a Democrat from California, who recently became head of the Congressional Hispanic Caucus, a group of five Latino House members who study issues affecting the Latino community and develop legislation to address those issues. According to Gonzalez, that position makes Roybal Allard the highest ranking elected Latina in the country.

An estimated 1652 women serve in state legislatures—nearly one-fourth of all state lawmakers. But, Latina numbers in state legislatures are minuscule: 15 are state senators and 32 serve as House members in different legislatures nationwide, and most are Democrats, according to Gonzalez. Some states have set records for the number of women in their legislatures. For example, in Washington, 44% of the lawmakers are women, the highest percentage of women in any state legislature in the nation's history.

There are 89 women in top state positions nationwide, four of whom are Latina, and Arizona in November 1998 became the first state in the country to elect women to all five of its top spots—governor, secretary of state, treasurer, superintendent of public instruction, and attorney general. The state does not have a lieutenant governor.

Important progress has been made at the national level as well. More women serve in the U.S. Congress than ever before. There are 65 women serving in the U.S. House of Representatives and U.S. Senate. Of the 100 Senators, nine are women and none is a Latina, and of the 435 House members, 50 are women and five are Latinas.

But the number of women serving in Congress is still low. Women comprise 50 percent of the population but only about 12 percent of the U.S. Congress. Moreover, of the 486 people who have served in the president's cabinet throughout our country's history, only 22 of them have been women.

Seven women currently hold Cabinet-level positions in the Clinton Administration. None is a Latina. However, Ada Alvarez heads the U.S. Small Business Administration, and Ida Castro is at the helm of the U.S. Equal Employment Opportunity Commission, two important federal agencies.

"While we are seeing increases for all women of color in politics, you can see that the numbers are still small," said Debbie Walsh, associate director of the Center for the American Woman and Politics at the Eagleton Institute of Politics at Rutgers University in New Brunswick, New Jersey. "That's disturbing."

Christine Sierra, an associate professor of political science at the University of New Mexico in Albuquerque, has a somewhat different take on the numbers. Sierra said that even though Latinas still are underrepresented in politics, as a percentage of all Hispanic elected officials, Latinas are not doing so bad. Latinas represent 31 percent of all elected Hispanic officials. Women in general comprise just 21 percent of all elected officials.

"Sexism, gender discrimination, and male dominance are alive and well in various aspects of our lives, but given the stereotypes of cultural machismo [in the Latino community], this [finding] might be surprising," Sierra said. "It is important to point out that Hispanic women are doing pretty well."

Still, Sierra said that many Latino political officeholders are elected to local offices and have not moved beyond those seats, even though more Latinas in general are running for a variety of offices.

Sierra said that researchers are unsure why more Latinas have been seeking office in recent years, a phenomenon she said she and other researchers hope to study further in the near future. Perhaps, she said, the increase can be linked to electoral reforms in the 1980s and the 1965 Voting Rights Act, which was designed to give minorities more of a voice in the political arena.
We don't know much about women of color in elected politics," said Sierra. "Women of color are little studied and underrecognized. We should know more about them because they are increasingly becoming part of the profile of the new leadership [in politics]. We will see them move up the ladder."

Sierra said another area that also has to be studied is "how responsive and accountable the representative is."

"Does it make a difference in the Latino community?" she asked. "How does it make a difference in the Latino community?"

Gonzalez said that female candidates tend to take a very gradual approach to politics, which might explain why Latinas are just starting to blossom therein. Women candidates usually begin their political careers at the level of Parent-Teacher Association or school board, where they learn the political process and gradually move up through the different political positions available.

Male candidates tend to jump in and run for higher elected positions such as state House, U.S. House, or even higher without getting years of political experience, he said. Latinas also might have gotten off to a slower start than have their Anglo counterparts because they have had few role models in politics, but Gonzalez said that is changing and more Latinas are joining the bandwagon.

Gilda Morales, information services coordinator for the Center for the American Woman and Politics, said that women candidates often enter politics for a different reason than do male candidates. Women candidates will get hooked if they are trying to resolve an issue and can not get resolution. "If they don't get results, they run for office," said Morales. "Women will look at an issue to get results. Men will tend to run for an office to see how it will benefit them [personally]. It's not as altruistic for them."

While no national studies have been conducted profiling Latinas in elected office across the country, the Center for the American Woman and Politics has studied women of color in politics and had some interesting insights into these candidates in general. Women of color in politics tend to have more advanced degrees than do their male colleagues, have grown children, have experience working in other campaigns, have held one or more appointed government positions, and worked on the staff of an elected official.

Once Latinas decide to enter politics, one of the biggest barriers with a negative campaign. The public tends to disapprove of male candidates who launch negative attacks against women candidates, he said.

Moreover, women candidates tend to benefit from the growing electorate among females. Gonzalez said women voters relate better to women who express concerns for issues that are dear to them. Like education, day care, and health care, issues on which some male candidates do not focus. In fact, Latina candidates often cite education as their No. 1 priority in their candidacy," he said. Sierra said that Latinas and women candidates in general are very interested in community empowerment and delivering resources to the areas from which they come.

Morales said that many of the issues commonly seen as "women's issues"—like education, child care, and health care—are suddenly in vogue and all political candidates are becoming more in tune with them.

Morales said that more and more Latinas are seeking political office suddenly and they need the support of the Latino community. Morales said that in 1998, for example, five new Latinas were elected to the California Senate, which showed what Latino voters can do.

These are good signs because two years prior to that election, we weren't even getting candidates," said Morales, adding that many of the Latinas who decided to run felt that their time had come after working in party politics for several years.

The Southwest Voter Registration Education Project estimates that there are 650 million Hispanic voters. Even though voter participation has increased 6 percent over the past two years, Hispanics represented just five percent of the total votes cast in 1998, according to exit polls conducted by the League of United Latin American Citizens.

"There is still apathy," said Morales. "Latinos showed in California in the last election that they can make a difference. But the low percentage of Latinos voting is hurting the strength of Latino candidates."

Still, interest in the electoral process among Latino candidates is growing.

"Latinos [across the country] are hungry for the nuts and bolts of how to run a campaign," said Gonzalez, whose organization has provided training on running campaigns.

Another organization that wants to see more Latinas elected to office recently held its own "Elección Latina" conference on June 25-26 at DePaul University in Chicago. The conference was designed to encourage Latina women to come forward, learn about the political process, and get elected. Said Ellie Jurado, executive director of the Hispanic National Bar Association, which sponsored the conference. The conference was for any Latina thinking of running for office or for any Latina who wanted to work on a campaign. Topics that were addressed included how to run a political campaign, political fundraising, and media relations. Participants had an opportunity to develop a personal plan for a political campaign in their state.

"We need to know how to communicate not only with our population but other populations as well," said Jurado. "We hope to encourage more Latinas to run for political office."
Driving El Paso's Future

UTEP Expands Doctoral Programs

BY CHRISTIAN CLARKE AND WALLI HALEY
UTEP News and Publications Office

During the past six years, UTEP has aggressively expanded doctoral education—adding seven new programs to the single existing program in geological sciences.

In 1996, when Stella Quiñones crossed the stage to receive her doctoral degree in materials science and engineering from UTEP, she doubled the national total of Hispanic women who earned a Ph.D. in her field that year. In fact, of the more than 2,100 students nationally who earned bachelor's, master's and doctoral degrees in that specialty during the 1996-97 academic year, only 58 were Hispanic. More than half received their degrees from UTEP.

As the nation's shifting demographics make employers increasingly concerned about workforce diversity, UTEP has achieved national recognition as a leader in creating educational opportunities for members of minority groups and first-generation college students. Reflecting the realities and needs of the border region.

During the past six years, UTEP has aggressively expanded doctoral education—adding seven new programs to the single existing program in geological sciences. As of spring, 1998, these new programs have produced 18 doctoral graduates, of whom six are Hispanic and five are from Mexico.

The success of these graduates demonstrates the wealth of untapped intellectual talent that exists in this region. But the numbers also point to the contribution that UTEP is making to encourage diversity in doctoral programs nationally, at a time when, regrettably, already small minority enrollments are stagnating or declining.

As proof of its commitment to furthering educational opportunities for the people of the El Paso border region, UTEP has implemented the following doctoral degree programs in the last decade:

- Computer engineering (1990) builds on the strengths of the university's computer science and engineering programs to prepare students for teaching and research careers in this expanding field.
- Materials science and engineering (1994) prepares students to discover and recover natural resources and develop new
Nearly half of the first 22 students who enrolled in the material science and engineering were Hispanic—six were women.
PEOPLE

Schutte New University of South Florida Women's Studies Chair

Dr. Ofelia Schutte, a University of Florida philosophy professor, will chair the department of women's studies, as of August.

"USF's women's studies program is one of four or five of the oldest in the United States," said Schutte. "One of the things I want to do is keep the memories of founders Judy Ochshorn and Juanita Williams alive for the students.

Ochshorn and Williams, who died several years ago, began teaching courses in 1972. The undergraduate program was founded in 1980. Since then, it has blossomed into a full-fledged department complete with a graduate program and courses in feminist theory and cultural/gender issues.

Hernández Named Student Trustee

Manuela Hernández, senior at Saint Mary's College (Ind.), began a one-year term as a student trustee on the college's board of trustees. One senior is appointed each year to provide student representation.

A psychology major, Hernández is a member of the psychology club, vice president of the Saint Mary's College Psi Chi (National Honor Society in Psychology) chapter, and a member of the National Honor Society.

Desiring to increase diversity and enrollment at Saint Mary's, Hernández has worked closely with the office of multicultural affairs and has won the Outstanding Hispanic Student award.

Franco Speaks at California-San Diego Memorial Lecture at the University of California-San Diego (UCSD). Her topic was "Latin American Culture and the Cold War." An authority on literature, culture, and politics in Latin America, Franco has written extensively on nationalism, post-nationalism, and gender issues, and was a pioneer in the study of popular culture and mass media in the Americas.

Elliott, a UCSD professor, was a founding member of the UCSD department of literature.

Five Middle-School Teachers Awarded Fellowship

Five teachers from Alamogordo School in Texas, Gilbert Gomez, Linda Soto, Selma Barrera, Lynda Gomez, and Iris Mendoza, were awarded a $10,000 AACTE-Metlife Fellowship, sponsored by the American Association of Colleges for Teacher Education and the Metropolitan Life Foundation in collaboration with the University of Texas-P:A. America (UTPA).

"The goal of the program is to open the window so others might see how to best teach Hispanic children who are culturally and linguistically diverse, not deficient," said Dr. Hilda Medrano, dean of UTPA's School of Education. "It is our hope to generate a guide that will include the best practices, strategies, materials, information packets, transparencies, and information necessary for teachers of other cultures to learn how to bridge the gap for Hispanic children to be academically successful.

Valdés Joins ACT, West Region

ACT, Inc., of Iowa, appointed Ernest Valdés, assistant vice president, west region. Valdés will plan, direct, and control all operations, finances, and personnel for the educational services division, west region office.

ACT, Inc., is an independent, non-profit organization that provides educational and workforce development services to students and their parents, high schools and colleges, professional associations and government agencies, and business and industry.

Valdés, a U.S. Army veteran, has an associate's degree from Monterey Peninsula Junior College, bachelor's from California State University-Fresno, and master's from CSU.

Latina Leadership Grant to Cortéz

De Anza College (Calif.) counselor Alicia Cortéz (pictured) was awarded the 1999 Latina Leadership Network Employee Grant for "The Chicana/Latina History Project." The $500 award will enable Cortéz to hold a one-day conference in the fall of 1999 for students from several community colleges who are interested in learning more about the historical contributions of women, particularly in the U.S. The conference will highlight the work of Vicki L. Ruiz, renowned Chicana historian.

Counselor Cortéz also teaches courses in career life planning, college orientation, and an introduction to Chicano/Chicana studies.

Delacruz Promotes Kindness at Seattle University Commencement

If his fellow graduates have learned anything during their years of study, commencement speaker Chris Delacruz, a soft-spoken young man of Philippine descent, hopes it was kindness and the need to make sacrifices. Delacruz gave the speech at Seattle University in June.

"He listens to people, and he cares for them deeply," said Father Joseph Mckown, a counselor in the university's minority student affairs office. "He is an exciting speaker, a formidable competitor, and a gracious human being.

Delacruz, who earned a bachelor's degree, entered the university in 1998 as a Trustee's Scholar, held leadership positions in several student organizations, and won a multicultural awareness award.

Reynoso Realizes Dream at Siena

Francisco Reynoso, who recently received
a bachelor's degree in marketing management from Siena College, moved from Guadalajara, Mexico, to Upstate New York–near Albany, the state capital–when he was 18. Now 24 and still living in the area, Reynoso will be involved with marketing plans, trade shows, and eventually sales at his new job.

"It was my dream to go to Siena," said Reynoso, citing the proximity of the college and its Catholic tradition. "It's a great school, a great environment. I feel it has prepared me well for a career."

While persistent in his business coursework, Reynoso was involved and responsive in many activities, including visiting an elementary school Spanish class as a native Spanish speaker.

**Rodriguez to Lead UTSA Science Center**

Dr. Charles G. Rodriguez has become executive director of development and public affairs at the University of Texas Health Science Center at San Antonio.

Rodriguez initially joined the Health Science Center from the Hispanic Association of Colleges and Universities, where he served as vice president of development and interim president.

Presently a lieutenant colonel and commander of the 138th Signal Battalion with the Texas Army National Guard, he had served eight years as an active duty commissioned U.S. Army officer with the 101st Air Assault Division and the 1st Armored Division.

Rodriguez has a bachelor's degree from the U.S. Military Academy; two masters; one from Wheaton College and one from Keller Graduate School; and doctorate from the Union Institute.

**Martin Wins Phi Kappa Phi Fellowship**

California State University-Los Angeles biology senior Rosalinda Martin was one of 80 national winners of the prestigious $2,000 Phi Kappa Phi Graduate Fellowship.

Martin, who earned a 3.7 GPA, has been accepted by medical schools at Harvard, the University of California-Los Angeles, the University of Southern California (USC), the University of California-San Diego, Stanford University, and among others.

She has volunteered at the Los Angeles County-USC Hospital, and was an active volunteer at Saint Elizabeth's Convalescent Home.

"She could go into anything she wants and be successful," said Cal State-L.A. biochemistry professor and Phi Kappa Phi President Raymond Garcia.

**Rivoli among Cal State-L.A. Early Entrance Grads**

Nineteen-year-old Robert Rivoli III was among the largest-ever group of graduating California State University-Los Angeles Early Entrance Program students.

Joining Rivoli, a biology major, were Pankit Doshi (political science), Mark Gordon (anthropology), Edward Hsieh and Lin Jin (biochemistry), Haley Leung and Kyle Nakamoto (psychology), Sumanta Pal (biology), Reena Ved (computer information systems), Joanna Wang (business administration), and Sherry Wasel (English).

**Metke to Lead Lake Washington Technical College**

Dr. L. Michael Metke, the author of *Students Who Persist: Factors Associated with the Persistence of Mexican American Students at a Two-Year Technical College*, will begin as president of Lake Washington Technical College on Sept. 1.

Metke is nationally recognized for his sponsorship and mentoring program linking influential community members with high school students graduating in the top five percent who could not otherwise afford college.

Certified by Fox Valley Technical College as a police academy graduate, Metke has bachelor's and master's degrees from the University of Wisconsin-Oshkosh and a doctorate from the University of Houston in Texas.

**Estefan Awards Degree to Cruz at University of Miami Commencement**

In Florida, singer Gloria Estefan, a graduate and trustee of the University of Miami (UM), personally awarded renowned salsa performer Celia Cruz an honorary doctor of music degree during UM's commencement ceremony.

Other honorary degree recipients included Colombian artist Fernando Botero, political columnist David S. Broder, author Ernes t J. Gaines, Nobel laureate Alfred G. Gilman music impresario Quincy Jones, religious studies scholar Martin E. Marty, and social activist Eunice Kennedy Shriver.

Pictured left to right: Estefan, UM President Edward T. Foote II, and UM board of trustees chairman Carlos De La Cruz.

**Fulbrights for Marasco and Harmon**

Two Colorado Mountain College professors who have been working in Nicaragua Laura Marasco and Dave Harmon were chosen as Fulbright-Hayes Scholars to develop curricula that can be replicated by two- and four-year colleges anywhere.

Harmon is a professor of sociology, and Marasco, an assistant professor and director of international education.

Both are studying how years of civil war...
and adapting to peace are changing the culture, politics, economics, and religious lives of the people of Nicaragua.

Harmon said that the goal is to get information to community colleges around the country about the potential for service learning in Third World countries.

California-Los Angeles' Loza Releases Bio on Puente

Noted scholar and performer Steven Loza (pictured), a University of California-Los Angeles professor of ethnomusicology, released the first authorized biography of Tito Puente, known throughout the music world as the “King of Latin Music.” Tito Puente and the Making of Latin Music is the first in-depth, historical, musical and cultural study to trace the career and influence of this giant of Latin music.

Said Loza, who was approached by Puente to author the biography, “Puente’s popularity has crossed the English- and Spanish-speaking worlds to include Africa, Asia, and Europe. As a personal friend of Tito’s for more than 15 years, I’ve tried to provide the reader with a unique, multifaceted portrait of the artist never before revealed.”

Grant Helps Bilingual, Bicultural Nurses at Northern Essex

Northern Essex Community College (Mass.) received a $40,000 grant from the Helene Fuld Health Trust’s “Educational Mobility Initiative” to help bilingual, bicultural, licensed practical nurses earn their registered nursing (RN) degrees.

The grant provides eight students currently enrolled in the college’s day and evening RN programs with $5,000 living stipends and access to a nurse mentor.

Shown l. to r. are Dr. Sylvia Hallsworth, director of nursing, student Philip Evans-Lalanne, Francesca Fay of the college’s RN faculty, and student Leyda Tejeda.

Hispanic Scholarship Recipients to Attend Colorado Mountain College

Seven recent high school graduates from Colorado have received an Alpine Bank Hispanic Scholarship.

Eugenia Lopez, Alejandro Sanchez (pictured, bottom right, with Tony Thompson, Alpine Bank vice president), Marsha Menchaca, Marissa Aguirre, Amanda Diaz (top), Ricardo Hernandez (middle), and Ricardo Montes received the scholarship, which provides higher education access to ambitious Latino high school graduates who otherwise could not go to college because of their economic situations. They will receive the cost of tuition for a full-time schedule of classes at Colorado Mountain College, student fees, and books for two years.

J. Robert Young, chairman of the bank’s board, said that Alpine Bank is excited about the number of scholarship recipients who are the first in their families to go to college.

City-Inspired Art Exhibit at New York University

Five artists of color—professors at historically Black colleges and universities and scholars-in-residence at New York University (NYU)—held an exhibition at Soho’s Cinque Gallery to celebrate the 15th anniversary of the Faculty Resource Network, the NYU-based program that afforded them studio and study time in New York City. The exhibit, “Artists in the City: The Legacy of the Faculty Resource Network,” included some 20 works.

Arthur L. Bacon, of Talladega College; Louis Delsarte, of Morris Brown College; Vitoio Lindsay, of Spelman College; Marcelo Navo, formerly at Benedict College; and Charles Rogers, of Johnson C. Smith University, all had their work showcased.

New Mexico State Child-Care Course Taught in Spanish

Education faculty at New Mexico State University (NMSU) who identified a critical need for trained child-care and preschool professionals have developed a certificate course in Spanish to help fill the gap.

The New Mexico Early-Level Certificate Course for Early Care and Education Personnel, developed by Nance Baptiste and other NMSU colleagues, is an outgrowth of a needs assessment conducted in southern New Mexico and the El Paso, Texas, area.

Offered in English throughout the state for
two years, the Spanish version is being taught at
sites in southern New Mexico and West Texas by
Loui Reyes of NMSU and Cristina González of El
Paso Community College (pictured).

University of Houston-Downtown Installs Supercomputer

The University of Houston-Downtown
(UHD) in Texas received an IBM RS/6000 SP
supercomputer as part of an IBM
Shared University Research grant.

This system is
based on an updated
version of the technol-
ogy known as
Deep Blue, the super-
computer that beat
grand master chess champion Garry
Kasparov in 1997. Today, RS/6000 SP systems
are running many of the largest Web
sites, helping find new sources of oil, develop-
ing designs that lead to safer cars and air-
craft, and producing ever more detailed
atmosphere models for the National Weather
Service.

Dr. Max Castillo (pictured), UHD presi-
dent, said, “IBM's grant marks a significant
milestone for the university.”

Latino Awareness Conference at
Western Oregon

The Multicultural Student Union at
Western Oregon University held “Voces de la
Raiz,” its third annual Latino Awareness
Conference. Discussions included “Our
Culture, Our Backgrounds, Our History,”
“Who We Are Today’s World,” and
“Confronting Present Challenges.”

Keynote speaker Jesus “Chuy” Negrete
spoke on “500 Years of Chicano History.”

Rio Hondo Sponsors Latina
Leadership Conference

Rio Hondo College (RHC), which has a
Hispanic student population of 69 percent
and a large Hispanic employee base, spon-
sored this year’s conference of the Latina
Leadership Network (LLN) of Californias
Community Colleges, themed “Mas Caras: The
Many Faces of Latina Leadership.”

“RHC is blessed with many women leaders
who, through effective leadership styles, exer-
cise positive change at the college every day,” said
Superintendent/President Jesus “Jess”
Carreon.

Ten workshops were presented by RHC
faculty, staff, and managers. “We are on the
cutting edge of online classroom technology,
high school and community outreach, leader-
ship development, and vocational training,”
said RHC faculty member and LLN conference
co-chair Martha Carreon. Pictured here are
RHC staff members and other Latina leaders
at the College-sponsored reception.

College Board Conference in
Mexico

The University of Mayab in Mérida, Mexico,
hosted “Assessment and Educational
Excellence: Challenges for the New
Millennium,” a Latin American conference
sponsored by the College Board, Puerto
Rico and Latin American Activities
office. Approximately
200 admissions offi-
cers and education professionals from 53
universities and high schools in Mexico, Bolivia,
Costa Rica, Guatemala, Puerto Rico, and the
United States attended.

Pictured is Alejandro Montano,
Universidad Regiomontana, Mexico, who led
one of the more than 30 sessions at the
conference.

The College Board is an organization dedicated
to the principle of equal opportunity,
and its programs, services, and employment
policies are guided by that principle.

National Performing Arts Center
Schedules Upcoming Events

NJPAHC, the New Jersey Performing Arts
Center (NJPAC), has included the following in
its Bell Atlantic Passport to Culture Family Time
Series Performance Schedule for 1999-2000:

• Festival Caribeño - Musicians and
dancers of AsaBite, who specialize in the
African-derived traditions of the Dominican
Republic, join forces with Viento de Agua, who
combine traditional Puerto Rican bomba and
plena with modern jazz, and Conjunto
Folklorico de la Alianza Dominicana, a New
York-based group. (October 9)

• “Navidad Flamencos” - Musicians and
Flamenco dancers take audiences on a jour-
ny to southern Spain for a gypsy Christmas
celebration. (December 11)

• “Los Tres Reyes: The Three Kings” - This
Three Kings Day pageant, in English and
Spanish, features dance, theater, music, and
giantsized puppets. (January 8/9)

Northern Arizona Provides
Students Academic, Mentoring
Experience

Roughly 150 ethnically diverse high school
students from around the state came to
Northern Arizona University (NAU) in
June for activities aimed at preparing
them for college. The program specifically
targets students who are less likely to
attend college without the intensive aca-
 démic, mentoring, leadership, and life-skill
training they can get at NAU’s Center for
Excellence in Education (CEE).

The Summer Enrichment Program repre-
sents a long-term commitment and collabora-
tion between education, business, and com-
 munity members,” said Regina Serrano (pic-
tured), director, special projects in CEE.

Cleveland State Conference Targets
Latin American Trade

Cleveland State University (CSU) hosted
the Ohio trade conference “Market Vision
2020: Focus on Latin America,” which
attracted business professionals with an
interest in discovering the best market
opportunities. Trade experts, speakers,
and panelists with direct experience in
Latin America discussed banking and financ-
ing, strategic alliances and market entry, doc-
umentation and transportation, safety and security, credit, and the business, social, and cultural environments.

Jorge F. Quiroga Ramirez (pictured), vice-president of the Republic of Bolivia and president of the congress, was one of many conference speakers.

**Palo Alto Festival Benefits Tejeda Scholarship Fund**

Palo Alto College (Texas) and Sam's Club, a wholesale membership organization, recently held the third annual fund-raiser benefiting the Frank M. Tejeda/Palo Alto College Scholarship Fund. Musical guests included David Natividad, Juanito Castillo, and the Palo Alto College Mariachi Palomino.

The scholarship fund was established in honor of U.S. Congressman Frank M. Tejeda (pictured) in April 1990.

**Santa Monica Students in Nation's Capital**

Five outstanding Santa Monica College (SMC) students were selected for the Dale Ride Internship program and are serving in legislature and other offices in the nation's capital this summer.

Donny Aguilar, Rosa Ramirez, Lisa Rael, Shelia Henderson, and Nehasi Lee are in the program, which was established in 1991 in memory of Ride, a distinguished educator and administrator at the California school.

Aguilar, president of the SMC Associated Students, is a history and political science major interning with the Hispanic Association of Colleges & Universities in the government relations office. Journalism major Ramirez, editor-in-chief of the campus newspaper, is serving in the office of the National Foundation for Women Legislators.

Pictured here (left to right) are Kait Scott (granddaughter of Dale Ride), Bear Ride (daughter of Dale Ride), SMC Trustee Dorothy Ehrhart-Morrison, Henderson, Lee, Rael, SMC Trustee Nancy Cattell, Ramirez, SMC President Piedad Robertson, and Aguilar.

**Loyola-Chicago Holds Colloquium on Bible and Spanish Renaissance**

Loyola University-Chicago (III.) held a four-day international colloquium, "The Bible and the Spanish Renaissance: Cardinal Ximénez de Cisneros and the Complutensian Polyglot," probing three interrelated topics critical to understanding the cultural importance of the Spanish Renaissance.

Lectures and discussions on the Complutensian Polyglot, Cardinal Ximénez de Cisneros (1436-1517) (whose seal is pictured here) and the University of Alcalá took place in June at the Walter Tower Campus.

The Complutensian Polyglot is a 16th-century publication commissioned to revive "the dormant study of Scriptures." Cisneros was a moving force behind the Spanish Renaissance, and the University of Alcalá, founded in 1499 in Alcalá de Henares, served as a model for the first Latin American universities.

**Pima Honors Diversity Advocates**

For the past five years, the Chancellor's Equity and Diversity Awards have recognized a Pima Community College (AZ) student, instructor, staff member, and administrator who have helped promote diversity and equity issues.

This year's awards went to student Scott Mealer Phi Theta Kappa president, staff member Daniala Strickland (photographed at left), student activities coordinator, sociology instructor Rosalia Solis-Gonzalez (photographed at right), and

**Dr. Sylvia Lee, dean of student development.**

The winners helped "promote and prove that diversity is very much alive in this college," said Joe Toro, acting director of the college's equal opportunity employment/affirmative action office.

**Houston Community College Receives EPA Grant**

The U.S. Environmental Protection Agency (EPA) awarded Houston Community College (HCC) in Texas a $200,000 grant to establish environmental technician training for 100 students over a two-year period.

HCC Chancellor Ruth Burgos-Basseter believes the Brownfield Environmental Training Programs will provide jobs for many under-employed Houstonians.

According to Burgos, although Houston's economy is strong, the program will help develop skills that will take unemployed Houstonians from "poverty to self-sufficiency."

Burgos attributed HCC's successful efforts to HCC staff and to HCC Southeast College and its president, Dr. Sylvia Ramos (photographed here).

**City College Hosts "Excellencia en Educación" Conferences**

The City College of New York recently hosted "Excellencia en Educación," a series of national conferences, part of an effort by the White House Initiative on Educational Excellence for Hispanic Americans to connect local communities and organizations with state and federal resources that can develop partnerships with Latino parents to increase their children's level of educational attainment.

**Pictured 1 to r. are Gloria Rodriguez.**
New Mexico State Celebrates Hispanic Achievements

The Hispanic Faculty and Staff Caucus at New Mexico State University (NMSU) celebrated the achievements of several outstanding Hispanics.

Spring 1999 graduate Cyril Salazar was recognized for his year as president of the Associated Students of New Mexico State University (ASNMU), the student body government. He was the first Hispanic in the post since 1988.

Former Chicano programs associate director Narcisa Zarate (pictured) was acknowledged for her dedication to the educational achievement of Hispanic students at NMSU.

NJ Performing Arts Center News

NJ PAC The New Jersey Performing Arts Center (NJ PAC) just wrapped up "Sounds of the City", a 10-week series of free outdoor concerts designed to showcase talented New Jersey-based artists. The afterwork series, which included Latin jazz, Portuguese fado music, and Haitian troubadour, was the brainchild of NJ PAC's Community Partnership Committee, a group of young people, students, and artists interested in promoting the arts within and throughout New Jersey's urban communities.

NJ PAC's "World Festival II: A Festival of Pan American America" culminated with three separate weekend performances by Baba Olutami and Huth Masekelwa; Isaac Hayes and Sam Moore; and long-reigning queen of Latin music Celia Cruz, special guest Johnny Pacheco and legendary bassist and composer Israel Lopez 'Cachao'.

Coors Hispanic Employee Network Awards Scholarships

The Coors Hispanic Employee Network (CHEN) awarded eight college scholarships to Colorado high school seniors.

Hugo Patino (pictured top third from r.) Coors vice president of quality, research, and development, and sponsor for CHEN, presented the scholarships to (top, l. to r.) Melkon DomBourian, Kimberly Sánchez, and Rebecca Christian, and (bottom, l. to r.) Joshua Morse, Jaylin Ruiz, Raditonna Garza, and Kimberly García. Jennifer Brumage also received a scholarship.

CHEN's mission is to advance the success of Hispanic employees at Coors, act as a resource to the company and to each other, and to support and enhance the efforts of the company within the Hispanic community.

Miami-Dade Aviation Students Receive Scholarships

Eig-Watson aviation scholarships were awarded to 10 students in Miami-Dade Community College's (Fla.) Homestead Campus Professional Piloting program. The $4,500 scholarships were presented to (pictured l. to r.) Jennifer Clements, Joseph Gutiérrez, Cherie Sturgis, Ossie Brown, Inga Wuerges, Matthew Scott, Randall Garro, Xawaf Hafidh, Damian Rodriguez, and Gregory Tirado.

The scholarship program was established in 1998 by Harvey Watson and Lois Eig-Watson (picture far l.) in memory of her late husband, Saul Eig. The largest aviation scholarship in the country, the program has presented 100 awards to outstanding students to help defray costs of any additional flight training necessary to achieve their next certificate or rating. 1487
Crafton Hills Awards Scholarships

During the recent Honors Celebration at Crafton Hills College (CHC) in Yucaipa, Calif., student leaders who received Latino Faculty and Staff Association Scholarships were Mayra Gómez, transferring to the University of California, and Victor Soto, transferring to California State University-San Bernardino.

Mathematics Achievement Scholarships were awarded to (l. to r.) David Cardoza, Linda Cardoza, and Parkash K. Gurm. Other winners were Patrick Joe Balsa and Hamara Arzafar.

**XICOTEÑACLT: AN ANONYMOUS HISTORICAL NOVEL ABOUT THE EVENTS LEADING UP TO THE CONQUEST OF THE AZTEC EMPIRE**

translated by Guillermo I. Castillo-Feliz

As Spain's New World colonies fought for their independence in the early 19th Century, an anonymous author looked back on the earlier struggles of Native Americans against the Spanish conquistadores and penned this novel. This book stands out as a beautiful exposition of an idealized New World about to grapple with the domestic troubles within.

1993
Book Review

by Martha García

Tiempo Artesano is a compilation of poems in which the author, Mireya Robles, creates a fusion of time and space during her exile from Cuba. Manuel Durán, in the prologue, and Fernand Verhese, in the introduction, both praise Robles' style and lyricism and empathize with the feelings of loneliness expressed throughout the work.

In Tiempo Artesano, Mireya Robles condenses the feelings of a woman in exile and translates those emotions into poetry. The metaphysical and abstract concepts of time and space are approached in a symbolic way.

The book is divided into four sections: “Poemas de España,” “Poemas del tiempo,” “Ciclo cerrado,” and “Poemas de la muerte” — poems of Spain, of time, and of death. While these sections do not present a visible coherence, they are a constant reflection of the feelings of loneliness and alienation of this female author banished from her native land.

A common denominator of these poems is the pain, metaphorically expressed, experienced as a result of isolation in foreign territories. “Poemas de España” describe the poet’s deep sorrow as she travels through foreign lands, illustrate her silent screams in an unknown country, her experience of abandonment, then reflect some submission to the situation, while noting the unlivable burden of existing in an alien territory. The poet declares bitterly that in Spain she was only “una sombra invisible.” Robles states her desire to return to her homeland, explaining that even dying could not end this suffering.

Most of the poems were written in major cities of Spain, among them Madrid, Córdoba, Barcelona, and Zaragoza. Others originated in such places as Lisboa, Roma, and Albany.

“Soy el San Juan de Salomé” invokes mythologic details—“la doncella,” for example, who surrenders to the “unicornio.” Another is written in both Italian and Spanish, and asks “Quo vadis? Dove vai?” French scenarios are mentioned. In the last poem of this section, English and Spanish culminate in a mixture of elements allusive to different countries.

“Poemas del tiempo” use distance as a temporal factor between two spaces or territories. Their metaphysical topics include concepts of eternity and universe.

In “Verona in USA, 1971,” found in “Ciclo cerrado,” Robles uses allegory to describe her experiences in North America.

In “A Federico García Lorca,” which extols the writer’s sensibility, Robles calls herself the “Yerma,” the protagonist of one of his theatrical plays, trapped in a childless marriage. Yerma’s one ambition is to become a mother, and she spends a good deal of her time throughout three acts lamenting her barrenness. Divorce is not an available solution. Adoption will not suffice because what Yerma craves is self-realization in the form of maternity, not simply a child to care for. She indigently rejects the idea of adultery. This affirms her belief in the sacrament of marriage.

Robles also identifies with Lorca and his search for the “Escencia de la vida,” this “escencia” being the highest ideal that a person can aspire to.

“Trilogía en punto final” expresses the cycle of existence where cero is the beginning and end, presented lyrically in a mathematical language.

The last section, “Poemas de la Muerte,” won the award, Concurso Internacional de XILOTE Magazine in Mexico, 1971. Topics such as death, eternity, and the universe culminate in these “Tres Poemas.” The experience of the deceased is increasingly presented. The final strophe concludes with the word bora, implying the last hour of life and the fear of the unknown after death.

This book would be an excellent source of study in Hispanic and culture courses. It explains the consequences of the Cuban exile through the poetry of this female author banished from her native land. Also, it could be used in women’s studies courses as supportive material because these poems express the conflicts and experience of a woman out of her homeland as a result of emigration.

Martha García teaches Spanish courses at the University of Central Florida and is currently coordinator’s assistant with the Spanish Master Program. García has published book reviews in a variety of academic journals and participates in literature and language conference.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers’ Guidelines.
The University of Pittsburgh is searching for an outstanding scholar to assume the leadership of the Center for Minority Health at the Graduate School of Public Health (GSPH). The mission of the Center is to address health needs of minority populations through research, education and training, and community service.

The Center carries out its mission in close association with the academic programs of GSPH, the other Schools of the Health Sciences at the University, and other University units concerned with health and policy issues related to the mission of the Center. The Center’s mission includes research on the improvement of conditions affecting health status and health disparities of racial and ethnic minorities, culturally or otherwise diverse groups, and underserved populations; and addressing underrepresentation of such groups in the health professions.

The Center Director must qualify for a tenured or tenure stream professorship or associate professorship in one or more of the departments of GSPH according to area of expertise, i.e.: Biostatistics, Epidemiology, Environmental and Occupational Health, Health Services Administration, Human Genetics, and Infectious Diseases and Microbiology. These departments include a wide variety of concentrations, programs, and research interests. Very high quality, laboratory support, excellent statistical and computer resources, and population bases are available. More information about GSPH and its programs may be found at http://www.pitt.edu/~gsphome/.

The Director will be responsible for the overall operation and management of the Center and supervision of the Center's staff and will report directly to the Dean of GSPH. The Director will establish the processes by which the Center's mission and goals are realized. The development and implementation of the agenda of the Center are the prime responsibility of the Director in collaboration with an Advisory Board.

The individual selected must have a demonstrated record of research scholarship along with experience in course development, teaching and training and mentoring of graduate students with relevancy to minority health. He or she must be able to work cooperatively in broad-based and multi-disciplinary endeavors through linkages between GSPH, University and external professionals, and community representatives. A proven track record in developing and obtaining private and public resources is essential.

The position is available immediately. The initial review of candidates will begin as soon as applications are received. The goal is to fill the position by September 1, 1999 but applications may be submitted until the position is filled. Please send curriculum vitae, summary of research activities and interests, statement of interest in this position, and three references to:

The University is an Equal Opportunity Alternative Action Employer.
Chief Financial Officer and Treasurer

Hamline University, a high-quality, nationally-ranked university located in Saint Paul, Minnesota invites nominations and expressions of interest for the position of Chief Financial Officer and Treasurer of the University.

Founded in 1854, Hamline University is Minnesota’s oldest university. A comprehensive university, Hamline enrolls more than 3,000 degree-seeking students in the College of Liberal Arts, the School of Law, the Graduate School of Education and the Graduate School of Public Administration and Management. Hamline is a pioneer in preparing students to become ethical leaders and applying rigorous teamwork.

Reporting directly to the President, the Chief Financial Officer and Treasurer shares in University-wide leadership and in policy formulation and management. With an annual budget of $48 million and an endowment of almost $43 million, the challenge facing the successful candidate is to maximize the financial systems and investments in order to further the University’s academic priorities.

The University seeks a strong leader with excellent financial, budgetary, and analytical skills. Charged with overall fiscal stewardship of the University, this position supervises the offices of budget and controller, institutional planning and research, and will work closely with the Board of Trustees, especially the Audit, Investment, Budget and Finance Committees.

The successful candidate must possess the ability to participate in the vision for the University and identify financial strategies best suited to advancing the University as well as demonstrated ability in financial planning, budgeting, and financial management, including the endowment. Most importantly, he or she must possess a collaborative management style, strong interpersonal skills, and the ability to work with a team. The candidate should have at least seven years of successful management experience in a complex institutional environment, preferably in higher education or in a not-for-profit organization.

Credential review will begin immediately and continue until the position is filled. Applications and expressions of interest should be submitted in confidence to:

An Equal Opportunity Institution Committed to Diversity
ANNOUNCEMENT OF FACULTY POSITIONS
Peter F. Drucker Graduate School of Management

The Peter F. Drucker Graduate School of Management at Claremont Graduate University is dedicated to advancing the theory and practice of management. It offers MBA, Executive MBA and Ph.D. programs as well as non-degree Executive Education programs. Appointment at the rank of associate or full professor is likely, but senior assistant professors with the requisite experience may be considered. To accommodate future growth, nominations and applications are sought for four faculty positions from among the following areas:

- Accounting and Cost Management, with particular emphasis on financial accounting and/or cost management, and the strategic challenges faced by chief financial officers.
- Marketing, with special emphasis on consumer behavior, innovation, and research methodology as they relate to marketing strategy formulation.
- Finance, with a focus on financial management, the interface between strategy and finance, the use of derivatives in a managerial context, or real options.
- Strategy, with emphasis on strategy formation and/or global strategy issues.
- Organization Theory, with a focus on strategic organizational design and development applications.
- Operations Management, with special emphasis on systems simulation, process modeling, and/or strategic risk management, with applications in technology integration and/or service operations.

Candidates must have a doctorate degree, a strong record of scholarship, an interest in diverse approaches, students and populations, and a demonstrated ability to make their intellectual contributions accessible to experienced managers through teaching and published work. Candidates also should have an interest in supervising the research of diverse students with considerable management experience. Executive level management or consulting experience is desirable.

These positions will remain open until filled. Review of nominations and applications, however, will commence on October 1, 1999. Please direct nominations, applications and inquiries to:

Office of the Dean
Peter F. Drucker Graduate School of Management
Claremont Graduate University
1021 North Dartmouth Avenue
Claremont, CA 91711

Located 35 miles east of Los Angeles in the foothills of the San Gabriel Mountains, Claremont Graduate University is enriched by its proximity to a diverse, multicultural business environment. It benefits from the resources it shares with the five undergraduate institutions in the Claremont cluster: Claremont McKenna College, Harvey Mudd College, Pitzer College, Pomona College, and Scripps College, and the Keck Graduate Institute of Applied Life Sciences. Claremont Graduate University prepares a diverse group of outstanding individuals to assume leadership roles in the worldwide community through teaching, research, and practice in selected fields.

Claremont Graduate University is an Affirmative Action and Equal Opportunity Employer and actively seeks applications from women and members of minority groups.

1492
Columbia University Executive Director
25th Anniversary Celebration

Columbia University in the City of New York seeks an Executive Director to manage the execution of the University’s 250th Anniversary Celebration coming up in the year 2004. The 250th Anniversary Celebration will highlight the University’s past as well as its plans for the future in a wide variety of scholarly, commemorative, and celebratory activities and events. The 250th offers a special opportunity to promote both among Columbia’s friends and the public at large, a richer understanding of Columbia’s distinguished contributions to education, the creation of knowledge, and to the communities it serves. The Celebration will emphasize the special character and values of Columbia, including the centrality of undergraduate education in the life of the institution, a deep engagement with New York City and the University's neighboring communities, and a commitment to strengthen an already vital international dimension.

Anniversary activities will engage and acknowledge a diverse audience, including faculty, students, staff, alumni, neighbors, and friends. The 250th will illuminate significant contributions of the University to the world of knowledge and reinforce its place among leading national and international institutions of higher education. The effort will rely heavily on volunteer efforts from trustees, alumni, and other friends of the University as well as the support of faculty, staff, and students.

Reporting to the Secretary of the University and working closely with the volunteer steering committee and its co-chairs, the Executive Director will coordinate Celebration planning, execution, and promotion and will be accountable for adherence to budget.

The successful candidate will have an outstanding track record overseeing highly visible, multiyear, multimillion-dollar projects, with many diverse component parts and involving a wide range of participants and audiences. The Executive Director will have a powerful intellect and a deep appreciation of academia, and will ideally bring some prior familiarity, or association, with Columbia. S/he will have experience in orchestrating successful promotional and celebratory programs and events, and will be comfortable with, and have talent for, interacting with a wide variety of people, including the most senior and notable. The Executive Director will combine superb judgment and a creative spirit with a firm administrative grasp.

Inquiries and applications are invited. Consider applying if you are ready for a new challenge. The position is open until filled.

MCTC Manchester

UNIVERSITY OF NEW HAMPSHIRE
Computing and Information Services

The University of New Hampshire (UNH) invites applications for the following three positions. All include the responsibility for providing information technology (IT) services to the University System of New Hampshire (USNH). As the University of New Hampshire (UNH) Chief Information Officer, the AVP will provide leadership, coordination, and strategic planning for academic and administrative computing, telecommunications, networking, and the delivery of key strategic technology outcomes. Reporting to the UNH Vice President for Finance and Administration, the AVP will work closely with senior officers of both UNH and USNH. He or she will have direct responsibility for Systemwide administrative computing and telecommunications, and for academic computing, media, printing, mail services, and computer services on the UNH campus. Directing a CIS senior management team and an operational staff, the AVP will manage annual operating budgets of over $200 million.

Major initial projects will be to lead a transformation of CIS into a more integrated and responsive service organization, and to coordinate IT resources to meet the needs of the Systemwide finance and human resources groups. Projects include implementing the new academic information management (AIM) system and providing integrated systems and tools that support the UNH and Systemwide administrative computing and telecommunications needs.

The AVP will also manage the University network and infrastructure, providing and supporting user services and applications that support the University's mission and that enhance the user experience. Prior experience in leading a large and diverse organization and ten years in a senior management role in an IT service environment is essential. The successful candidate should demonstrate creative vision, technical competence, and sensitivity to the multi-faceted nature of IT's role in the complex organizational environment. Job Code # 00025

Assistant Vice President/CIO

The AVP is responsible for providing information technology (IT) services to the University System of New Hampshire (USNH). As the University of New Hampshire (UNH) Chief Information Officer, the AVP will provide leadership, coordination, and strategic planning for academic and administrative computing, telecommunications, networking, and the delivery of key strategic technology outcomes. Reporting to the UNH Vice President for Finance and Administration, the AVP will work closely with senior officers of both UNH and USNH. He or she will have direct responsibility for Systemwide administrative computing and telecommunications, and for academic computing, media, printing, mail services, and computer services on the UNH campus. Directing a CIS senior management team and an operational staff, the AVP will manage annual operating budgets of over $200 million.

Major initial projects will be to lead a transformation of CIS into a more integrated and responsive service organization, and to coordinate IT resources to meet the needs of the Systemwide finance and human resources groups. Projects include implementing the new academic information management (AIM) system and providing integrated systems and tools that support the UNH and Systemwide administrative computing and telecommunications needs.

The AVP will also manage the University network and infrastructure, providing and supporting user services and applications that support the University's mission and that enhance the user experience. Prior experience in leading a large and diverse organization and ten years in a senior management role in an IT service environment is essential. The successful candidate should demonstrate creative vision, technical competence, and sensitivity to the multi-faceted nature of IT's role in the complex organizational environment. Job Code # 00025

Director of Planning & Operations

The Director of Planning & Operations is responsible for providing planning, operations, and resource management support to CIS. Reporting to the Assistant Vice President (AVP) for CIS, the Director of Planning & Operations will oversee overall planning activities, including capital planning, and provide support to the AVP in the development of resource management plans. The Director will evaluate resource requirements for major projects, and work with the AVP to develop and implement resource management strategies and plans. The Director will also work closely with the Division of Administration to identify and prioritize resource needs for major projects, and ensure effective execution of resource management plans. The position reports to the AVP for CIS and is part of the CIS senior management team.

Requirements for the position include:
- A bachelor's degree in a related field with at least two years of experience in resource management and planning.
- Strong project management skills, including experience with budgeting, forecasting, and resource allocation.
- Excellent communication and interpersonal skills, with the ability to work effectively with a variety of stakeholders.
- Ability to prioritize and manage multiple projects simultaneously.

The Director of Planning & Operations will have a proven track record of success in resource management and planning, and will be a key member of the CIS senior management team. The position offers an opportunity to work in a dynamic and high-growth environment, and to make a significant contribution to the success of the University.

UNH is an Equal Opportunities Employer.

KANSAS STATE UNIVERSITY
Webmaster

Cleveland State University

Dean
James J. Nance College Of Business Administration

The University announces a national search for Dean of the James J. Nance College of Business Administration and invites nominations of individuals who have the interest, ability and qualifications to lead the College into the 21st Century, to possess vision, a record of direct linkage to the business world, and determination to provide academic and administrative growth for the College that will enhance its ongoing programs and resources, new program initiatives, and relationships with the industry and other units of the University. The Dean reports to the Provost and Senior Vice President for Academic and Student Life.

The candidate will have an advanced degree, a proven record of accomplishments relative to the business world and academia, and the ability to work with students. He should be able to provide leadership within the academic departments. He or she must also possess demonstrable excellence and administrative skills in a variety of settings, including teaching, research, and administration.

The University is seeking a person with a background in business administration and a commitment to excellence in education and research. The candidate should have a proven record of leadership and administration in higher education. The University is committed to diversity and encourages applications from qualified minorities, women, and individuals with disabilities.

Applications are invited from qualified individuals. The position will be available September 1, 1998, and will remain open until filled. The salary and starting date are negotiable. Applications should be submitted by August 24, 1998.

Elmhurst College

Dean of Admission

Elmhurst College seeks applications for the position of Dean of Admission. As the senior officer of the College for enrollment management, the Dean supervises the recruitment and selection of students in all programs as well as the financial and operations of the College. The Dean must have a vision of higher education that embraces diversity, learning, and a commitment to academic excellence. The position is located in the western suburbs of Chicago and requires a commitment to undergraduate education and professional preparation.

Applications are invited from qualified individuals. The position will be available September 1, 1998, and will remain open until filled. The salary and starting date are negotiable. Applications should be submitted by August 24, 1998.

Applications are invited from qualified individuals. The position will be available September 1, 1998, and will remain open until filled. The salary and starting date are negotiable. Applications should be submitted by August 24, 1998.
DEANS OF STUDENT SERVICES

PBCC, Florida's first public community college, is a four-campus institution that serves a large and diverse population in south Florida. We are the ninth largest of 28 community colleges in the Florida Community College System, serving approximately 45,000 students per year. We are a premier teaching and learning institution in a highly desirable location to live. We invite applications for the two positions of Dean of Student Services who have a strong commitment to the personal development of students for our Lake Worth Campus and Palm Beach Gardens Campus.

Positions report directly to the Vice President of Student Services. Responsibilities include coordinating and interpreting the following areas: student services, counseling, advising, testing, career services, registration/admissions and financial aid. Positions require working collaboratively with Campus Presidents, faculty, and student groups.

A Master's degree with a minimum of five years of relevant student services and supervisory management experience is required. Candidates must demonstrate and strong working knowledge of a diverse student population. Review of applications will begin August 3, 2008. Submit resumes, letters of interest and a cover letter to:

Dr. Ellen Grace, Director of Human Resources
Palm Beach Community College
3200 Congress Avenue
Lake Worth, FL 33461

WAYNE STATE UNIVERSITY

DEAN

COLLEGE OF URBAN LABOR AND METROPOLITAN AFFAIRS

Wayne State University invites applications and nominations for the position of Dean of the College of Urban Labor and Metropolitan Affairs (CULMA). Established in 1985 by the Board of Governors of the University, this college holds a campus-wide position at the University, responsible for encouraging the involvement and prominence of the institution regarding urban and labor issues.

The College consists of the academic department of Geography and Urban Planning, master degree programs in Dispute Resolution, Industrial Relations, and Urban Planning, and centers for Chicano-Hispanic Studies, Labor Studies, Peace and Conflict Studies and Urban Studies. Also in the college are the Skilling Center for Children, the Douglas A. Fraser Center for Workplace Issues, a State Policy Center and the Archives of Labor and Urban Affairs at the Walter P. Reuther Library, the largest and most comprehensive such archives in the U.S. In addition to the faculty and staff of the areas listed above there are ten senior research faculty with appointments in CULMA, and 18 faculty from other Schools and Colleges who are coordinate faculty with instructional and research responsibilities to CULMA.

Wayne State University is a Carnegie Research University I with a strong commitment to its urban mission. It has an enrollment of approximately 30,000 students, 40% of whom are members of minority groups. 40% are enrolled in graduate and professional programs located in the cultural center of Detroit, the University's neighbors include the Detroit Institute of Arts, the Museum of African American History, the Detroit Historical Museum, the Detroit Science Center, the Detroit Symphony Orchestra and the Detroit Medical Center. CULMA and the University are actively engaged in the current Detroit cultural and economic renaissance.

The University is seeking a strong leader with an appreciation of urban and labor issues, who can articulate a vision for the college's future and continue the development of the College and University as effective and highly visible contributors to urban policy. CULMA plays a prominent role in the three areas of emphasis designated by President Ron D. Reid: technology, urban agenda, and global programs.

Qualifications include:
- Nationally recognized scholarship in urban or labor fields. A doctorate in a related field is preferred.
- Administrative experience in complex societies.
- Experience in working collaboratively across schools and colleges within the University.
- Experience in collaborative engagement with the community.
- Record of involvement in professional organizations.

Proposed start date is on or before May 1, 2009. A review of applications and nominations will begin September 15th, and will continue until the position is filled. Early interest is welcome. Applications from women and minorities are actively sought. Applications should include a full curriculum vitae and names and titles of three references. Correspondence should be addressed to:

University at Buffalo

STATE UNIVERSITY OF NEW YORK

Director of Recruitment/Recruitment Specialist for
The University at Buffalo Law School

Duties: Under the supervision of the Associate Dean, Director of Admissions and Financial Aid, the Director of Recruitment/Recruitment Specialist is responsible for providing direct support for The University at Buffalo Law School recruitment program. Specific duties include: extensive travel in defined markets, representing UB Law at Grad/Prof School Recruiting Events and national Law School Forums, coordinating Open House and Career Day recruiting events on UB's campus and identifying and directing Student Ambassadors, coordinating prospective student campus visits, coordinating telecommunication and direct mail efforts, and supporting computer database maintenance. The development and maintenance of relationships with pre-law advisors, students, faculty, staff, alumni and others influential in the law school selection process are important responsibilities.

Qualifications: A Bachelor's degree is required, a JD or other advanced degree is preferred. Prior admissions recruiting experience is desirable, knowledge of the law school admissions market is preferred. Word processing and data base program experience in Microsoft Word, Excel and Access is also desirable. A valid driver's license is essential. The ability and willingness to travel extensively and work weekends is required. The position requires excellent written and oral communication skills. The ability to work independently and accountably, yet as part of the Admissions team, is essential.

This is a twelve-month, renewable term appointment. Salary and benefits are competitive and based upon experience. Send cover letter, resume, and contact information for three references to: Jack D. Cox, Jr., Associate Dean, Director of Admissions and Financial Aid, University at Buffalo Law School, 313 O'Brian Hall, Buffalo, NY 14260-1100.

The University at Buffalo Law School is an Equal Opportunity/Affirmative Action Employer and encourages minorities, women and persons with disabilities to apply.
VICE CHANCELLOR FOR RESEARCH

Nominations and applications are invited for the position of Vice Chancellor for Research at the University of Illinois at Urbana-Champaign. This official is one of four Vice Chancellors reporting to the Chancellor.

The University of Illinois at Urbana-Champaign, a comprehensive land-grant institution, has long been one of the nation's leading research universities. The campus has 16 colleges, schools and institutes. Faculty members secure more than $590 million in state and federal grants and contracts annually. Units performing research in engineering, agriculture and the physical and life sciences alone contain more than 80 laboratories and groups with sponsored research.

The Vice Chancellor for Research fosters activity and promotes excellence in research and scholarship across the full range of academic disciplines and interdisciplinary activities. The Vice Chancellor works closely with the Chancellor and Provost in the development and implementation of policies and practices relating to all aspects of the research mission of the campus; interacts with public and private sources of support for university research activities; formulates, implements, and administers policies regarding patents, copyrights, and intellectual property rights in research agreements with private sponsors; oversees policies and creates mechanisms that encourage the commercialization of research; and administers federal and state regulations relating to research activities.

The University seeks candidates with a record of involvement in the promotion and attainment of excellence in research and scholarship and an appreciation of the diversity of forms and circumstances of research and scholarship conducted at a comprehensive research university. Candidates should have demonstrated leadership and administrative ability, and the ability to work with agencies that support research, both within and outside the university. The capability to work with administrative units and faculty to maintain and strengthen the university as a major center of the highest quality of research is a major requirement of the position. Candidates must be eligible for a tenured faculty appointment in an academic unit and have a strong record in research.

Salary open. Starting date negotiable. To be assured of full consideration, nominations or applications (including resume) should be submitted by September 15, 1999. The search will continue until the position is filled. Nominations and/or letters of application should be submitted to:

VICE-PRESIDENT OF ACADEMIC SERVICES

Chemeketa Community College is a comprehensive two-year, fully accredited public educational institution located in the heart of Oregon's Willamette Valley. The Vice-President of Academic Services provides direction and leadership for all academic and student services programs and staff, including all credit and non-credit instruction, community education, and institutional support programs and services. The Vice-President plans and develops standards and systems for Academic Services, including personnel policies and procedures, and implements and administers the Academic Services budget. A list of annual activities can be found at http://www.chemeketa.edu.

MEDIUM QUALIFICATIONS: Masters degree or equivalent in an area of broad-based experience in academic or student services administration in an accredited community college or college district, including a record of accomplishments in innovative educational leadership, planning, budgeting, and managing educational programs including success in teaching and faculty leadership. Experience as a leader in statewide educational reform activities and a broad-based experience in building collaborative community partnerships. Experience in providing leadership in an environment of shared governance, effective planning, development, and evaluation of educational programs and effectively integrating resources. Extensive knowledge of community college laws, regulations, policies, and procedures, and demonstrates human and interpersonal communication skills.

APPLICANT PROFESSIONAL: Please submit the following materials for consideration:

1. A cover letter, not to exceed one page, discussing the candidate's qualifications and experiences.
2. A statement, not to exceed two pages, describing the candidate's leadership role and what best supports the mission, vision, and values of the college.
3. A current resume or CV.
4. A letter of recommendation from a former supervisor or current colleague.
5. Two writing samples, such as a research paper or a report.

Applications will be reviewed on a continuous basis, with an initial deadline of September 1, 2008. Applicants should submit all materials online at http://www.chemeketa.edu.

NPEAT EXECUTIVE DIRECTOR

NPEAT, the National Executive Association of Two-Year Colleges, is a professional organization of more than 1000 community college presidents and administrators who work to improve teaching and learning in America's public, and technical colleges. The NPEAT Board of Directors, the University of Montana, and the NPEAT Staff are responsible for ensuring that NPEAT remains an effective and vibrant voice for the profession, including serving as a significant resource and support for the membership.

QUALIFICATIONS: A strong professional commitment to excellence in teaching and learning is required. The candidate must have demonstrated leadership and management skills, and a record of success in developing, implementing, and evaluating educational programs. The candidate must also be able to communicate effectively with a wide range of constituencies, including students, faculty, staff, and the general public.

SALARY AND BENEFITS: The salary range for this position is $120,000 - $150,000, depending on experience and qualifications. Benefits include health and life insurance, retirement plans, and paid vacation.

APPLICATION PROCEDURE: Interested candidates should submit a letter of application, a current resume, and the names and contact information of three references to the search committee at NPEAT. The search committee will review applications and select candidates for interview. The position will remain open until a suitable candidate is selected.

Applications should be submitted to:

NPEAT Executive Director Search Committee, 1304 New York Ave., NW, Suite 200, Washington, DC 20005-4010.

DIRECTOR OF ATHLETICS

DEPT. OF INTERCOLLEGIATE ATHLETICS

The Academic Vice President is also responsible for the College's enrollment management and student affairs. The position requires a minimum of 5 years of experience in a leadership role in an academic institution. The successful candidate will have a strong commitment to student success and a proven track record of success in enrollment management.
EDUCATIONAL OPPORTUNITIES

GOVERNORS STATE UNIVERSITY

Associate Director of Budget Planning: The Office of Budget Planning is responsible for coordinating the University's $50 million budget, overseeing and managing strategic planning meetings, institutional research needs, serving as the primary liaison to the Board of Trustees and providing legislative analysis and support. This new position will serve to bridge the research, planning and budgeting functions. The key responsibilities of the Associate Director of Budget Planning include: managing the strategic planning process; collecting relevant data designing strategies and providing analytical support for the ongoing reporting; providing policy economic, program evaluation and other analyses. Minimum requirements: Master's degree in public policy, or related field; experience with public higher education and/or the public policy-making process; ability to work with various computer systems and software packages, such as Microsoft Office, Lotus, SPSS, SAS, SQL; an ability to conduct statistical analysis and present data in a user-friendly format to non-technical staff; excellent writing and presentation skills.

Review of applications will begin immediately and continue until position is filled. To apply, interested candidates should send a letter of interest, current resume and writing samples to: Ginger Ostro, Director of Budget Planning.

Director of Communications Services (CECS) We are seeking an innovative, flexible and creative individual with keen awareness of trends in higher education production and delivery, to serve as Director of Communications Services. Our ideal candidate will have 8-10 years media related production experience; a consensus-building management style; commitment to higher education and particularly, the multifaceted delivery of education to the "adult learner"; a commitment to diversity and multicultural education and a strong record of attracting, developing and retaining staff. As director, the successful candidate will supervise the day-to-day operations of a team of professionals, who are employed in the production of audio, video, photography, graphics, engineering and instructional design, computer-based and on-line instructional materials. The position requires a bachelor's degree plus experience in a related area with a minimum of 5 years management experience, preferably in academia. Master's degree preferred.

Send a letter of interest addressing qualifications, current resume and 3 references to: Suzanne Oliver, Communications Services, email: S-Oliver@govst.edu. The position is available immediately. Review of applications will begin August 14, 1999 and will continue until position is filled.

Counseling Hispanics: Advice for Helpers

In spite of the fact that the Hispanic population constitutes one of the largest subgroups in the United States, many professional therapy providers are at a loss as to how best to communicate with and assist young Hispanics in high school and college to become fully contributing members of American society. There is a pressing need to improve the quality of counseling and advice given to Hispanic youth. Cultural differences, language barriers, substantial diversity of national origin within the Hispanic population, and counselor anxiety are no excuse for insufficient or inappropriate counseling.

Hispanic youth in junior high and high school have not been advised to register for school curricula that would allow them to compete for admission to higher education. This has to change in order for Hispanic youth to compete in a global society. Parents and teachers need to be informed of the significant role they can play in the education of Hispanic youth.

Counselors prepared for the 21st Century understand well that this is one of their tasks. Changing demographics demand that counselors shed their traditional role, which restricted advancement primarily to the school setting. It might be important and necessary for the counselor to visit the home of the Hispanic youth. Working with and informing the Hispanic families at an early stage in the development of their children allows them to have an active role in the success or failure of their offspring. There is a higher probability of success for Hispanic youth if the counselors, teachers, and parents work together as a team.

High school counselors need to build on the good work of their junior high counterparts by alerting Hispanic youth to the advantages of studying in the academy. Counselors should advise their students—prior to their senior year in high school—of the requirements for admission to the academy. An early orientation in the sophomore or junior year of high school can also teach Hispanic students what they can do in academics and extracurricular activities to prepare for college. This would increase the number of Hispanic youth who enter higher education.

Those Hispanic youth who overcome the obstacles and barriers to success in high school find that they once again have to turn to their inner strength to meet the challenges of university study. Techniques of loneliness, isolation, and stress are common among Hispanics in higher education. These feelings are known to have a negative impact on academic performance. Culturally competent college counselors are needed to counsel youth.

Historically, counseling centers in colleges and universities across the country have not had staff who are experienced in counseling Hispanic students. In addition, Hispanic youth have tended to underutilize services offered by counseling centers. As a consequence, many institutions of higher education have established an office of multicultural affairs to address concerns specific to minority students of Hispanic, African, Asian, and Native American heritage. Such offices have created outreach programs to reach populations not benefiting from traditional counseling centers.

Often, however, there is no Spanish-speaking member of the staff to address the concerns of the Hispanic student. There is an advantage to having their concerns addressed in their mother language. This is especially important when there is a need to discuss emotionally laden problems. For example, how would you like to be bilingual in English and Arabic with your mother language being English but your counselor can only communicate to you in Arabic? As well-trained bilingual professional knows, most individuals have a larger feeling-level vocabulary with which to express themselves in their first language. The rate of success in the counseling relationship is likely to be increased if the client wants to speak in Spanish and has that as a viable option.

Administrators in higher education need to be culturally sensitive and hire staff in counseling centers and the offices of multicultural affairs who are competent to counsel Hispanic students.

Hispanic students in colleges and universities in the United States have to encounter on a daily basis the normal problems that every student in higher education experiences as well as issues of discrimination and prejudice. Counselors from the dominant group might not feel comfortable counseling clients with minority-related problems. On the other hand, counselors need to examine their own attitudes toward race discrimination and prejudice if they want to be therapeutic helping clients who endure such problems. If the counselors do not deal with their own race-related issues, their clients will perceive them as being conflicted and look elsewhere for counseling and guidance.

Hispanic community/university community partnerships can go a long way in providing guidance and role models for Spanish heritage students on American campuses. Hispanic leaders can also be significant consultants to university leaders who plan counseling and guidance programs for students.
UNIVERSITY OF CHICAGO
School of Professional Psychology
ITHACA
ASSOCIATE PROVOST/DEAN OF GRADUATE STUDIES

Ithaca College invites applications and nominations for the position of Associate Provost/Dean of Graduate Studies.

The Associate Provost/Dean of Graduate Studies reports to and assists the Provost in academic planning and gives direction to faculty development in various policy-making groups. The Associate Provost/Dean of Graduate Studies works with the college's central offices and the dean of libraries on new program development and oversees the college's program review process. The position also requires preparation of strategic plans for the college.

Qualifications: A Ph.D. in a relevant discipline, with demonstrated leadership experience. Experience in curriculum development, student services, and program management is required. Strong interpersonal skills and the ability to work collaboratively with faculty, staff, and students are essential.

Responsibilities: Oversee the development and implementation of new graduate programs. Coordinate faculty development activities. Serve as the college's liaison to other academic units and external partners. Manage budget and allocate resources effectively.

Salary: Competitive salary commensurate with experience.

TO APPLY: Submit a letter of application, curriculum vitae, description of teaching and scholarship, and the names and addresses of four references to:

Associate Provost/Dean of Graduate Studies Search Committee
Ithaca College
350 Job Hall
Ithaca, NY 14850-7012

NYC Cattle Health Assurance Program Coordinator

Cornell University solicits applicants with experience in cattle infectious disease, population medicine, and epidemiology and a strong interest in biosecurity.

Position Description: The New York State Cattle Health Assurance Program (NYSCAP) is the largest and most successful Cattle Health Assurance Program in the country. The coordinator will direct the program, including prioritization, budgeting, and program development. The coordinator will be responsible for the program's successful development and implementation, including coordination of program activities and support of materials and program promotion in close collaboration with the NYSCAP management team.

Duties: Manage the development and implementation of the NYSCAP. Coordinate and manage the program leadership that will link the producer, practicing veterinarian, and agribusiness into a cohesive team to effectively achieve program goals. The coordinator will direct aspects of program development including articulation of concepts, development of training materials, and program promotion.

Salary: Competitive salary commensurate with experience.

To apply, submit a letter of application, a resume, and the names and addresses of three references to:

I PUNTO FINAL!
Ending Student Segregation
First-Generation Students

by Gustavo A. Mellander

Persons go to college for many reasons. These include intellectual, economic, and social considerations. For those privileged in our society, i.e., those whose parents did so, going to college is a foregone conclusion. It is not a matter of if—it is merely a question of where to go.

It is different for most Hispanic college students. They are first-generation college students.

First-generation students' parents never attended college, and they often have family and background characteristics that are associated with risk for attrition. For example, they are more likely to be from low-income families and have lower academic achievements as well as lower overall degree aspirations.

The Study

The National Center for Educational Statistics has issued a hefty hundred-page volume, with clear and precise charts, that analyzes the college experiences, successes, and failures, and subsequent employment of first-generation college students.

Heavy in statistical analyses to the point of distraction, the report nevertheless is a goldmine of information. Taken as a whole, it can counsel, encourage, motivate, and guide students through the shoals of academic reality.

Highlights

The report, although recently published, is outdated. But its truths and insights are ageless. It uses data from the 1989-90 Beginning Postsecondary Students Longitudinal Study and the 1993 Baccalaureate and Beyond Longitudinal Study to examine the postsecondary experiences and outcomes of first-generation students relative to their peers.

It is a detailed overview of the demographic, aspirational, and enrollment characteristics of first-generation and non-first-generation students. The report also compares the persistence and attainment rates of each of these two groups. It then examines the labor market opportunities that these students face upon graduation. The further postsecondary or graduate school experiences of those who persisted beyond the baccalaureate are also chronicled.

Even when controlling for many of the characteristics that distinguished them from their peers, such as socioeconomic status, institution type, and attendance status, first-generation student status still had a negative effect on persistence and attainment.

Major Findings

- First-generation students were more likely to be older. Many postponed higher education. Some because they did not think they were college material. Others because they fled high school as quickly as they could to what seemed at the time well-paying jobs. But with the passage of time and the benefits of maturing, they grew to understand that they needed more formal education if they wanted to succeed and not just survive. Others came from financially strapped families and, while in high school, dared not hope to go to college.

- Once they finally arrived at a variety of colleges, they had lower incomes, were usually married, and had dependents. Many found it necessary to work part-time.

- First-generation students were more likely to enroll in postsecondary education on a part-time basis, tentatively exposing themselves to higher education at their local community college. They also attended private two-year institutions and a dizzying variety of for-profit institutions. Fewer went directly to four-year institutions than did their non-first-generation counterparts.

- First-generation students, surprisingly to some, were equally as likely to take remedial classes as non-first-generation students when they began their postsecondary education. However, there were differences by sector on this measure. At private, not-for-profit four-year institutions, first-generation students were more likely to take remedial courses than were their counterparts. At the same time, the proportions of the two groups at public four-year and public two-year institutions taking remedial coursework did not differ significantly.

- First-generation students were more likely than others to say that being very well-off financially and providing their children with better opportunities than they had were very important to them personally.

- First-generation students were also more likely to say that obtaining the amount of financial aid they needed, being able to complete coursework more quickly, and being able to live at home were very important to them. Indicative of their financial circumstances, the ability to work while attending college was also very important in their decision to attend their particular college.

Graduation Results

The best news in the report is the fact that finishing college is worth all the sacrifices. When first-generation students attain their bachelor's or associate's degrees, they earn comparable salaries and are employed in occupations similar to those of their non-first-generation peers.

In order for colleges and universities to better understand the unique needs of these first-generation students, more must be known about who they are and their particular enrollment experiences. The purpose of this report was to provide that useful information.

The full report (NCES 980820) can be purchased from the Government Printing Office for $50.

Dr. Mellander is a professor at George Mason University.
Cultural Diversity and Mental Health Training

Reality-Based Training at Chicago School

BY AMALIA DUARTE
Amalia is an editor in public relations at Lucent Technologies.

After the murder of a mother and her two children at a Chicago housing project, Dietra Hawkins, a doctoral candidate in psychology, visited a local playground to help youngsters talk about the tragedy. "I went up there with a crisis intervention team from a community outreach organization. We hung out with the children and helped them try to express their feelings about the murders through drawings," remembered Hawkins. "A lot of them hadn't had the opportunity to talk about it before, so they were grateful. It was a really good experience for them. But it was kind of strange for me because as we were doing this, there were police cars circling around."

It was a difficult situation, but for Hawkins, it offered an invaluable, front-line lesson in how to deliver mental health care to members of minority communities. And this is exactly why she chose to complete her Ph.D. at the Chicago School of Professional Psychology, which offers one of the few psychology training programs in the country with a focus on ethno-cultural variables.

Over the past decade, the Chicago School has become a magnet for students like Hawkins, who are eager to delve into the area of diversity in mental health care. "The school I attended for my master's was also located in a diverse, urban setting, but it did not have that type of program," said Hawkins. "And it was really frustrating for me. The attitude there was 'Well, you can do your own work in this area, but we're not going to spend too much time on it.'"

At the Chicago School, however, Hawkins and other students find they can't avoid learning about cultural diversity. Issues of diversity are infused throughout the curriculum, and training opportunities emphasize the need to understand cultural diversity and the importance of working with underserved populations. In addition, students who are especially interested in addressing the mental health issues of ethnic minorities are offered a proficiency in multicultural clinical/community psychology. Students obtain this knowledge through the school's Center for Intercultural Clinical Psychology, founded in 1988.

Another plus is the school's diverse student population, which helps keep these issues on the table. "Our student body is about 20 percent minority, but this means 80 percent of the people we train are students who might have had limited exposure to underserved and minority populations," said Dr. Rashad Saafir, the school's academic dean. "We are giving them the kind of training where they are sensitive to issues of culture, race, ethnicity, gender, and sexual orientation."

If that weren't enough exposure, every other year, the school hosts a two-day Cultural Impact Conference at which mental health care, social services, and human resources professionals gather for workshops, speakers, and networking. Last year's conference, entitled "Gender and Culture Contemporary Struggles in Mental Health," brought together academics and psychologists from all over the country and included a special talk by Judge Ruben Castillo, who in 1994 became the first Latino U.S.
District Court judge in Illinois northern district.

Other topics at the 1988 conference included Substance Abuse and AIDS, Cultural and Gender Issues in the Puerto Rican Community: Changing Regulation and Perception of Immigration: Clinical and Personal Implications; and the impact of Racism on Mental Health.

The news of racism in the workplace was highlighted by comments from Dr. Ray Winbush of Nashville's Fisk University, who made a case for why racism itself should be deemed a mental health problem. During his workshop called Close Encounters of the Worst Kind: Race, Racism, and Black Mental Health, Dr. Winbush spoke of the inequitable mental health treatment afforded African Americans, and how the group tends to be prescribed medication instead of given counseling.

The biennial conference and other initiatives recently earned the Chicago School an award from the National Council of School and Programs of Professional Psychology, which each year honors a school for its work in the area of cultural diversity. "Frankly, we were not surprised," said Dr. Saafir. "We have been on the forefront of this movement."

The movement toward addressing cultural issues in mental health has picked up speed as more people of color have entered the field of psychology and the country's demographics have undergone rapid change due to immigration from Latin America and Asia. Odds are that the newly graduated psychologist of today will work with at least some non-White clients. But if psychologists lack an awareness of cultural differences when dealing with clients from diverse backgrounds, the results can be devastating.

"When psychologists don't have the understanding of cultural differences, there is a tendency to operate out of stereotypes that, of course, are typically inaccurate," said Dr. Saafir. "I think there is also the tendency to over-pathologize the client. In other words, to really look for weaknesses to a fault and not understand the cultural context where there might be strength and resilience. From the perspective of a middle-class, White American, poor people are seen as deviant in regard to the norm. Instead of being helped, this perspective can serve to further undermine that persons sense of well-being."

The importance of examining cultural issues in psychology is not limited to actual therapy. The potential impact can run the gamut from the initial assessment of a client to figuring out what is the best approach for delivering therapy, said Professor Hector Machabanski, who has been with the Chicago School since 1988. In fact, you need to start with the question of what mental health means, he said. "What does healing mean to people in different cultures? How do we intervene? For example, how would people from Guatemala respond to therapy?" asked Machabanski.

Then there is the whole question of language, both in regard to assessment and psychological testing and therapy. There is a whole line of research that says early experiences, for example, are coded in the primary language and that the best way to tap into those experiences is through that first language. So you might have an English-speaking Latino who would be best treated in Spanish."

Right from the start at the Chicago School, students are sensitized to issues of cultural diversity. The very first semester: they go through an orientation experience in which they are required to go out and immerse themselves in minority communities and settings that are different from their own. They might eat meals at a local restaurant that caters to Latinos or spend time at an African American festival. The students keep journals and later share that information as part of their training. "Many of them come back from these experiences and talk about feeling like a "minority" for the first time in their lives," said Dr. Saafir. "It can be a real eye-opening experience. It forces students who are White to reflect on their Whiteness, perhaps for the first time ever."

Also during their first semester, students take a course called Diversity and Clinical Psychology, that introduces them to issues of general cultural diversity and racism. Saafir added, "It also challenges them in regards to where they are coming from. It can bring out their own perceptions and perhaps biases."

Later, when it comes to completing their clinical practicum, many students choose to work in Chicago communities where they get the opportunity to treat minority clients. To help students gain experience in working with minorities.

In 1993, the Chicago School received a grant from the U.S. Department of Education to develop a partnership with four community-based agencies. Students and faculty from the school provide services through these organization to members of underserved communities. Two of these agencies serve primarily African America clients, while the other two are focused on Latinos.

The grant allowed the school to hire faculty members to work part-time at the school and at the agencies. Dr. LaPearl Logan Winfrey, who served as project director for the grant, said, "The difficulty we were finding is that there were lots of agencies out there willing to work with us but they had no psychologists on staff to supervise our students."

At different milestones in the training, students are evaluated on issues of diversity. "If you are not getting it, you could get a poor professional performance evaluation," said Dr. Saafir. "It's not something that slips by."

Students like doctoral candidate Dietra Hawkins certainly get it. Wherever you go in this country practice psychology, your population is going to be diverse," she said. "It's not what the textbook has been based upon. So, this not just an issue for people of color. It's an issue for everyone."
Alma Students Help in Honduras

Expand Awareness of the Human Condition

BY SKIP TRAYNOR
Skip Traynor is a writer and photographer at Alma College.

When Alma College students Kathleen McCrudden and Danielle Guilbot saw that a middle-aged Honduran woman was digging a foundation for a home by herself, the students grabbed a pickax and a shovel and helped Ponchita start a new life after the devastation wreaked in Honduras by Hurricane Mitch.

While swinging a pick into the hard rock and red clay, Ponchita told her story of terror on the October 1998 night when Mitch ripped the roof off her house in Tegucigalpa and wrecked her husband and a son from her life. Ponchita and her remaining two sons narrowly escaped before a wall of water from the rain-swollen Choluteca River collapsed the adobe walls and tin roofs of an entire neighborhood.

The story turned the students' educational commitment to an Alma College Spring term class into a mission. The class, designed to help the people of Honduras rebuild their storm-ravaged land, sent 24 students, college employees, and parents for two weeks of humanitarian projects in May.

“I can’t believe how much this changed me,” said McCrudden. “We went there thinking that the work was important, but Honduras changed me more than I changed Honduras. I found myself challenged to learn and grow outside the comfort of a classroom or campus.”

As she toured temporary housing built for people left homeless by the hurricane, the sophomore from Troy, Mich., said, “I watched as classmates realized there is poverty, hunger, devastation, and it has a name and a face. Locals told me how Hurricane Mitch changed their lives. I felt a little four-year-old hand reach up and hold mine, and that’s how I met Daniel. Daniel quickly began to trust me and was in piggy-back mode in no time. As we continued past the temporary housing, he leaned forward and said, “This is where God puts people whose homes are broken.”

The educational experience and service-learning project was the brainchild of Alma Spanish professor Dr. Deborah Dougherty, who was trying to find an alternative to an annual four-week class in Madrid, Spain. She combined Alma resources and some national grants to fund the class and to buy tools and medical supplies for the Honduran people.

The right connections to ensure a successful trip existed in the small college town in the middle of Michigan’s lower peninsula.

The College’s physical plant director, Duane Knecht, founded Hands to Honduras, a private nonprofit outreach ministry, several years ago to effect social change in the Western Hemisphere’s second poorest nation. Hands to Honduras has been arranging transportation, meals, lodging, and specific projects in various parts of Honduras for church and school work crews for several years.

Before the hurricane, Knecht was working with Sociedad Amigos de los Niños, a Honduran social justice organization dedicated...
ed to improving the living conditions for orphans and single mothers and their children. Sociedad was started by Sister Maria Rosa Leggo, a member of the Order of Saint Francis for 50 years. One of the first nonprofit organizations in Honduras when founded 34 years ago, Sociedad has as its original mission to care for orphans, abandoned children, and children of imprisoned women.

Ten years ago, Sociedad built the 3000-acre Nuevo Paraíso, Sister Maria Rosa’s vision of a self-sustaining community that trains and educates single mothers and their children. Nuevo Paraíso provided the Alma students with meals and lodging and a tremendously challenging opportunity to help rebuild shattered lives.

“It’s very different life circumstances that you will encounter coming from the States. And it is a population that was devastated and lost everything,” Maria Guadalupe Vilada de Rodriguez, Sociedad’s coordinator of programs, told students during orientation. “It’s people who have endured terribly challenging circumstances, a lot of pain. Emotionally, they have gone through a lot that still has not given them a time to recuperate. They are plunging into the construction because their houses are the priority.”

Following the hurricane, Sociedad donated land to Our Little Brothers and Sisters, another nonprofit organization, to build temporary housing for some of the 1.4 million people left homeless by Mitch. Sociedad’s and Our Little Brothers’ goal is to build 250 permanent homes before the rainy season, and eventually 3000 homes in the project they call Nueva Esperanza.

Translated into English, the project provided the theme for the students’ mission: Spring Term ’99, Serving Project Nuevo Esperanza. The official course title was Understanding Relief Efforts in the Local and Global Communities.

Due to the country’s extreme poverty, no heavy construction equipment was available, so the students assigned to the construction crew dove into the back-breaking work like union laborers. The students dug 24-inch-deep foundations in clay and rock with picks and shovels. They hauled cement blocks, and they mixed cement with buckets of water and shovels.

“When we left Alma, I had envisioned that we would be pounding nails into wood and putting straw roofs on houses,” Scott Baker said. “Nowhere in the back of my mind did I ever imagine that I would be digging three-foot-deep footings into hard-packed rock and clay.” I discovered muscles on my body that I never knew I had before.

After the first day of work, all those visions of what I would be doing had been washed out of my head. The soil conditions would have been manageable if we had used backhoes or other mechanized tools, but we were limited to shovels and pickaxes.

No houses were totally finished in the students’ two weeks, but the Honduran families were grateful for the construction time saved. When every phase of building a 24-by-24-foot, three-room home has to be done by hand, any help the students provided put the completion date weeks ahead.

“I was not prepared for what was to come when I stepped onto the worksite that first day,” said Guilford, a first-year student from St. Bonaventure, N.Y. “From the start, I knew that this was going to try my strength, endurance, patience, and emotions. The most unrewarding work that we did was haul cement blocks. The blocks were heavy, and there seemed to be an endless supply of them. I had to remind myself that every block that we delivered was one less block someone else had to carry and one more block to finishing a house.”

Chuck Amman of Grayling, Mich., father of Alma junior Sarah, kept spirits high on the reforestation crew by proclaiming the group to be the elite squad of the project. After stringing recycled barbed wire fencing to build a temporary tree nursery, the students, and especially Amman, looked like losers of a sword fight. Brandishing machetes and axes against hardwood stakes in 100-degree weather, the crew amazed the Peace Corps worker in charge by finishing their tasks hours before expected.

“The hardest thing we had to do with these students was to get them to stop,” Knecht said. “At the end of our first day, they wanted to start an hour earlier in the morning. Even the last day as we were trying to wind things down, a group of them came to me and asked if they could haul one more large load of concrete block to the construction site.”

Since the students left the State during Michigan’s early spring weather, Dr. Dougherty had to caution them about working in the tropical heat. “You don’t need to feel compelled to keep up some break-neck pace. There is a reason that Latin Americans in general have the stereotype of being laid back and slow-moving. It’s because you cannot keep up the sort of pace in this climate that you can in our climate. It’s not that the people here don’t work as hard; it’s just that they are smarter about it. They have made concessions to the climate. We are here to help the people, but we are not going to be able to fix Honduras in two weeks,” she said.

A medical brigade organized by Sociedad gave the students a brief
from physical work. The students, two doctors, two nurses, and administrative aides accompanied a truck full of medical supplies, food, and clothing to a remote village south of the capital city over roads better suited for oxen and burros. When the brigade arrived, more than 100 people were waiting for the health care.

High in the mountains, immersed in clouds, members of the brigade administered treatment mostly for parasites, rashes, malnutrition, and high blood pressure. Dispensing medicine donated by Canadian companies, pre-medical students and Honduran doctors worked together to bring a small measure of relief to a populace that might not see a health care worker again for many months.

After the required health screen, Hondurans—some of whom had walked 10 kilometers—lined up for boxed milk, high-protein drinks, cereal, rice, beans, and textured soy protein. Students distributed a complete set of clothes donated by American agencies to every man, woman, and child.

Dougherty told of the woman who thanked them for coming to the village. “One of the ladies told me Jesus sent us and that it is so wonderful because the people here are so poor.”

Prior to the hurricane, the Honduran government had built a small clinic in the village, a luxury in most of the areas that Sociedad serves. But even though the cement-block building provided shelter from the elements, the medicine shelves were bare.

A visit to the best children’s hospital in Tegucigalpa to bring stuffed animals to patients was even more overwhelming to American sensibilities than was the medical brigade. The students saw more evidence of an impoverished health care system working on pure faith.

Junior Heather Hillier of Maple City, Mich., said, “Our group went to the wing where children with kidney problems resided. I think this is when the reality of the effects of a poor nation hit me the hardest. There were 30 children admitted for kidney problems, and there were only two dialysis machines. While we were there, one small child went into arrest, and the doctors weren’t able to help her because both machines were being used.

“I talked to a doctor about one baby who had had two surgeries, and he felt that this little girl was going to be a strong woman when she grows older. I was moved by the fact that this man sees so many children who might not make it out of the hospital and he still feels that they will live to see the world outside.”

The opportunities for interaction between cultures, besides working side-by-side, were numerous during the students’ stay. Working in the projects’ schools and socializing during the evening hours formed a special bond between students and residents, especially children.

Baker of Macomb, Justin Fritz of Gaylord, and Jacob Swiderski of Hemlock, Mich., brought soccer balls and organized games with the community children. Soap bubbles and bubble blowers were a hit with both Alma students and Honduran children. Don Carlos Ardon, Nuevo Paraiso driver, spent two evenings with Swiderski and Judith Moore of Neenah, Wis., broadening the students’ knowledge of Honduran language.

On the night before Mother’s Day, one of the country’s most important holidays, Nuevo Paraiso residents invited the students to a fiesta where children sang songs and acted out skits honoring the mothers. When the children were finished, the mothers and children danced Honduran and North American dances with the Alma students.

Gabriella Olmone of Chesaning, Mich., when she wasn’t swinging a pickax, always had a baby or a child in her arms. “Little Gabriella [a one-year-old resident] was always running around our living areas looking for somebody to play with. She always had the biggest smile on her face! Alejandro is only one of the many little friends I made down in Honduras, but he will never be forgotten. I took the time to reach out to him, share my life, and he shared his. Somehow I touched this boy’s life with my caring, and he has promised to pray for me daily, his big sis in the States. And I know he will! We took toothbrushes that were donated by our dentists and brought them down to the schools, teaching them to brush their teeth twice a day, and DON’T EAT THE TOOTHPASTE!”

Baker added, “Manual labor was only half of our accomplishments. The other half—and I feel more important—was the impact on the people there, especially the children. “I took a special liking to several of the kids, many of whom also took a liking to me. A little girl named Luz told me that I couldn’t dance and called me Cesar. A very small and cute boy named Alejandro loved for me to pick him up. More than that, I felt that I made an impact on those children’s lives, just being there and playing with them meant so much to them. I had a hard time saying goodbye to them when it was time to go.”

Honduran customs and mores were a discussion item at the nightly reflection sessions conducted by Dougherty after evening meal. Students talked about observations made during the day of cultural differences. Honduran drivers’ habits of ignoring double yellow lines and passing on curves, a constant and heavily armed police presence, street beggars, the prolific trash, and lack of potable water.

Despite the differences, many of the students are looking for ways to return to Honduras. Kathleen McCrudden found the opportunity to return and check on her friend Ponchita. Fluent in Spanish, she has become a volunteer for Hands to Honduras, leading work groups like the Alma College Spring Term.
American University Professors Look at Cuban Baseball

He might have been watching history play out before him, but truth be told, Louis Goodman just wanted to go home.

Goodman, dean of the School of International Service at American University in Washington, D.C., was one of the 9,400 people in attendance on May 3rd when the Cuban National baseball team paid a visit to the Baltimore Orioles for the second game of their unprecedented home-and-home series.

As one of five AU deans and professors observing the game, Goodman certainly appreciated the historical significance of what was going on around him at Baltimore's Camden Yards. But as a baseball fan, Goodman wasn't having the best of nights. Not only had rain delayed the highly anticipated game by almost two hours, but once play got underway under dreary and raw conditions, Goodman's beloved O's were playing like a bunch of bush leaguers against their invited guests.

"I was sort of wishing they would end all of the suffering after the fifth inning or so," admits Goodman, who, like most fans do when their team falls hopelessly behind, began to let his eyes wander around the stadium. They soon trained in on the Cuban players, both on the field and in the dugout. What Goodman began to notice more than made up for the game's outcome.

"The Cuban players were so happy with what was going on that it was rather remarkable," recalls Goodman. "Here I thought it was going to be just two skilled teams playing each other and it was really sort of fun to watch how thrilled the Cubans were. And then I realized—here they were in the B Leagues. Not only were they a B-League team, but they were playing well. And it's always fun to watch people who are joyful about something."

None was more joyous than Cuba's Andy Morales, who in the ninth inning put an exclamatory mark on his team's 12-5 victory with a three-run home run. "When he hit the home run in the ninth inning, says Goodman, "I mean...I've never seen a baseball player so thrilled..."

The Cuban players were so happy with what was going on that it was rather remarkable," recalls Goodman. "Here I thought it was going to be just two skilled teams playing each other and it was really sort of fun to watch how thrilled the Cubans were. And then I realized—here they were in the B Leagues. Not only were they a B-League team, but they were playing well. And it's always fun to watch people who are joyful about something."

None was more joyous than Cuba's Andy Morales, who in the ninth inning put an exclamatory mark on his team's 12-5 victory with a three-run home run. "When he hit the home run in the ninth inning, says Goodman, "I mean...I've never seen a baseball player so thrilled..."
with what's going on.

"I was very happy that I stayed for the whole game."

The games themselves were the brainchild of Scott Armstrong, a Washington author and critic of U.S. policy toward Cuba, who had worked behind the scenes since 1985 to organize the baseball exchange. The U.S. government, which maintains a 50-year-old economic embargo on Cuba, this year authorized the Orioles to visit the island and negotiate playing the games with Cuba in an exception to the sanctions, which were imposed in 1962 after the 1959 revolution that brought President Fidel Castro to power.

With negotiations successful, the two teams first met on Cuban soil back on March 18, when the Orioles scratched out a 3-2 win in 11 innings. The game, played before an invitation-only crowd for approximately 50,000 in Havana's Latin American stadium, marked the first time a Major League team for the U.S. had played in Cuba since 1959.

"There's a number of people who have been trying to organize some kind of baseball exchange between the U.S. and Cuba for a number of years, and it just so happens the timing for this was right," says William Leogrande, acting dean of the School of Public Affairs at AI and one of the five in attendance in Baltimore. "The Cubans were willing to do it, the Orioles were willing to do it. [Orioles owner] Peter Angelos was willing to take a chance on this, and then the U.S. government was willing to let it happen."

The fact that the game of baseball would be able to scale the invisible 50-year-old wall standing between the neighboring nations does not surprise Paula Pettavino, assistant professor of Public Affairs at AI who co-authored the book *Sports in Cuba: The Diamond in the Rough* in 1994. Pettavino analyzes in her book how and why sports are given such a priority in Cuba.

"I think baseball is the perfect vehicle because it's something that we all love." says Pettavino, who points out that the now 2-year-old Castro was a pitcher for a team of ex-religion known as "Los Barbudos" (The Bearded Ones) in the 1960s. "And we clearly, despite 40 years of isolation from each other in terms of the game itself, have kept the standards up. And because Cuba's the little guy, the David in all of this, there's also a whole lot of pride in there that we can beat those who are supposedly the masters of the sport."

"Sports are a venue that the U.S. has used in many contexts to try to open things up," adds Goodman, who is an authority on the economic, military, social, and political issues of Latin America. "We used ping-pong with China, volleyball with Iran, and I think that was a non-threatening, positive way of moving things along."

While many frowned upon Castro's invitation-only policy for the game in Cuba, Pettavino says that things were really not much different for the game in Baltimore. Shortly after she acquired a block of 200 seats through a contact (which led to the invitation to her fellow AI faculty members), ticket sales were limited to groups of two or three in an effort to limit large groups of protesters from sitting together.

"There were those who took the ticket restriction in Cuba as more manipulation by Castro, and I didn't quite see it like that," says Pettavino, who watched the first game on television with a group of Cuban Americans at the Cuban Interest Section in Washington. "It wasn't much different than the Orioles' manipulation of how many seats in a block could be distributed because they wanted to prevent certain political statements being made. A lot of people did legitimately want to sit together, and there were some cases where they indeed wanted to protest. So the claim was that it was a First Amendment issue. It really created some furries."

Indeed, many took issue with the Orioles decision to ban all flags, banners, and signs at the May 3 contest. Bob Menendez, a Cuban American congressman from New Jersey (D), said in a statement prior to the game at Camden Yards, "I cannot believe that this is happening here in America. The Orioles and Cuba attempted to fool the world once during the carefully orchestrated March 28 game in Havana. I'm afraid that this is a second attempt to do the same, but this time the game will be held in a place where democracy permits us to expose Castro's brutal regime."

The ban might have prevented visible signs of protest inside the stadium, but it could not stop groups from demonstrating outside. The New Jersey-based United Cuban Organization sent 20 busloads of protesters to the stadium—ncluding members of the Miami-based exile group Cuban American National Foundation—where they rallied around the nearby statue of Cuban...
Independence hero Fidel Castro. 

"When we were pulling into a parking garage, there were lots of New York and New Jersey states," Pettavino says. "And in fact, the car in front of us had the sun visor in the back, and they were clearly coming from New Jersey to protest." 

"But I actually expected, as far as outside the stadium, to see bigger crowds of protesters than I did," she adds. "Aside from people throwing and thrusting flyers in my face, which of course I took glad to see what they were doing. I did not see the hostility that I might have expected. So when I do teach other courses about Cuba, I am accustomed to hearing about academic forums that have been actually shut down because protesters would threaten those who escorted the Cubans, and the Cubans themselves. And it sometimes brings some of this to a screeching halt—and that was just academic exchange. But maybe there was less hostility because of the venue and because this situation was sports." 

Which is not to say that the night was completely devoid of altercation. The Associated Press photo that ran in most newspapers the following day was of the second base umpire, who happened to be Cuban, carrying away a protester who had run out onto the field. Along with Morales' jubilant home run trot in the ninth inning, this was perhaps the lasting image of the game. It's one that Leopoldo, the dean of the School of Public Affairs says could have been avoided had demonstrators been allowed to simply hold up signs at the game.

"It's a tough tradeoff, isn't it? Really, it's a question of letting people express themselves, but on the other hand the right of people who came to see the game without it being disrupted," he says. "I think it would have been almost better in some ways to let people bring in signs if they were going to hold them up peacefully—certainly better than having people running across the field and getting in fights with the umpire and disrupting the game."

Just as the two-game series proved to be an even split for the teams, with each side winning on foreign soil, the AU observers say that both countries won out politically. "I think the whole thing, in a way, was overshadowed. It was a very important thing because it was a revolutionary opening in relations," Pettavino says. "It is possible that the first step in a long-term process is to do it. But does it mean it's going to be immediate relaxation of hostility? No, I don't think so."

The way the Cubans played in that second game, it looked very good," she adds. "I'm not very happy with the authoritarian style of government that the regime in Cuba has, and the increasing power of the armed forces and the continuing power of the communist party and the lack of democratic politics," Goodman says. "But I think it's very important to maintain any contacts that are possible with democratic forces, and show people inside Cuba what we as a democratic country can do."

"And I don't know that there are any deep meanings to the games, but it's an indication that Cuba and the United States can't escape their geography," says Grande, whose latest book, Our Own Backyard: The United States in Central America, 1977-1992, was released in 1998. "We're 90 miles apart and we're always going to be 90 miles apart whether the governments get along or not. There is the destiny of geography that makes our two countries close neighbors, and we have to find a way to live with one another. I think baseball diplomacy is one small step in that direction, and as far as I'm concerned any small step in that direction is good one."

And, as Pettavino points out, "I think the intended outcome of our policy for the last 40 years was to bring down the Castro government, our policy has not worked. So maybe as well try something else."
Opportunities for Hispanics in Communications

BY CARL J. KRAUS

The recent explosive growth in the communications industry has led to remarkable opportunities for college and university graduates. New cable programming, internetcasting, and as well as regular radio and television broadcasting have created a broad spectrum of opportunity for those who are well prepared.

Within the industry, most major cities have witnessed the dramatic rise of Spanish-language radio and television outlets. These facilities have responded to the unique cultural, news, advertising, and entertainment needs of the Hispanic community. Hispanic students who are drawn to communications because of its glamour really have two opportunities in one and should consider preparing for work in either or both the Spanish- and English-language media.

Both Hispanic and Anglo students are drawn to communications programs because of employment opportunities and the perceived ease of the major. But in truth, communications programs of integrity and value demand a high level of performance from students in the classroom and in the studio or media lab.

There is, in fact, a performance profile that broadcasters in both languages seek. For program producers and on-air talent, it is absolutely necessary to reason clearly and write skillfully and quickly. The importance of these skills cannot be overemphasized.

In many cases, especially news copy must be written minutes before broadcast in a crisp journalistic style. In radio, the copy must be well written and delivered to conform to an inflexible schedule. Stories must be completed on deadline.

There are several opportunities for those who might not be attracted to the "public" face of broadcasting. Technical positions such as camera person, editor, director and technical director, lighting and sound person, and graphics designer are critical to routine operations. Other more sophisticated technical positions usually require specific training in electrical or computer engineering.

Usually, a quality communications program produces graduates who meet the essential performance profile and also possess several basic technical skills that are exceedingly helpful in entry-level positions. It is not uncommon for small cable systems—a place where many new graduates begin their careers—to require a person to find, produce, write, shoot, and edit a story without any assistance.

In seeking a quality communications program, students should consider curriculum, faculty, facilities, internship affiliations, and reputation.

Curriculum

The curriculum should be a course of study that emphasizes strong written and oral skills.
Hispanic students who wish to work in Spanish should seek further development of their language presentation skills through customized coursework.

Training in production techniques is integral to professional development. Essentially, there is no difference, except language, in recording or editing programming in an English or Spanish environment. Students who develop a number of technical production proficiencies are generally more attractive to the prospective employer.

Coursework

Coursework that develops a basic understanding of government, politics, science, business, and the arts is essential for the development of a basic cultural literacy. This is not necessarily a direct part of the communications program. Students must develop the habit of reading several newspapers a day. In the case of those who seek to work in the Spanish environment, it is essential that the local Spanish-language dailies be consumed with vigor.

Faculty

It is clearly impossible for those who have never been in the pressured, deadline-a-minute world of commercial broadcasting to instill in students the sense of urgency needed for success. The communications faculty should be balanced between those with strictly academic preparation and those with a combination of industry experience and academic background. In many cases, programs retain local broadcasters as adjunct faculty.

Facilities

Equipment should be viewed as an essential laboratory in which students can learn the art and craft of communications. Departmental facilities should reflect the current industry standards. In the broadcast area, students should be able to access equipment early on in their academic program and not be forced to wait until their senior year to learn critical skills such as editing.

On-campus Opportunities

Students need to actively seek out positions at the campus radio and TV facilities in order to refine skills taught in class. Participation in campus media can accurately replicate the performance pressure experienced in the commercial world. Further, a student will be able to present a prospective employer with a demonstration reel of air performance or production prowess. Many successful broadcasters today directly credit experience gained in campus media with success in the industry.

Internships

Internships are often the most direct pathway for learning and employment. Carefully monitored internships give students the personal experience in the industry as well as an opportunity to demonstrate their newly acquired skills to a prospective employer. In some cases it is possible for students to complete one or more internships during a course of study. For those who seek a career in the Spanish media and the non-native speaker, an internship can be particularly valuable for perfection writing and speaking skills.

Program Reputation

Finally, the reputation of a program must be evaluated. What have friends and acquaintances reported? Are graduates placed in industry positions? Are the students and staff friendly? Is there evidence of meaningful student production in the campus media? Is there opportunity to train in both languages?

Broadcasting is a business. It depends on time sales to generate revenue and bring a profit. Although not generally emphasized in communications programs, the sales and marketing component of the broadcast industry can provide the ambitious with lucrative and transportable careers.

The extraordinary growth of the Hispanic marketplace has provided the groundwork for successful Spanish-language media. And that media's success has created wonderful opportunities in this last year before the turn of the century for students who are willing to pursue higher education and work hard.
Indiana University at Bloomington

Pact with IBM Reinforces Hi-Tech Prominence

BY ROGER DEITZ

Indiana University at Bloomington again has been ranked as one of the nation's "most wired" universities. Before you equate the term "most wired" with rambunctious extracurricular student activities, think again. In today's world of computer-based education, "most wired" is actually a good thing. For the third year in a row, Indiana University at Bloomington is ranked second in Yahoo! Internet Life magazine's survey of the nation's "most wired" universities. This year IUB is ranked ninth overall.

The survey categories included computer availability and description, undergraduate personal computer use, e-mail use and access, Web space use and access, networking, degree and distance learning, and educational and administrative use.

IUB President Myles Brand puts the highest priority on all aspects of Indiana University at Bloomington's computer preparedness. "Since the inception of the Yahoo! survey," says Brand, "Indiana University has consistently been ranked among the very top of the nation's public universities."

"This recognition is a matter of great pride for the University," he says. "But more importantly, it sends a message to IUB students that their technology environment is among the best in the nation."

IUB Vice President for Information Technology and Chief Information Officer Michael McRobbie adds. "These consistently top rankings assure us that year after year IUB's technology landscape remains at the forefront." McRobbie agrees with President Brand that the continuing changes the school is making to IUB's information technology environment keeps IUB at the very top of the academic institutions in the nation. "When students graduate from IUB, they will be among the nation's most technologically savvy graduates, prepared to compete in an increasingly technological world," he says.

For giving university students every technological advantage in a computer-driven world that continues to become more and more complex. The Hispanic Outlook honors Indiana University, and its campus IU-Bloomington, for its "cutting-edge efforts."

That's only the beginning. In May, Indiana University at Bloomington and IBM announced a far-reaching agreement to upgrade IU's information technology infrastructure and collaborate on joint research projects. As part of the agreement, IUB will make significant acquisitions of IBM hardware and software. The agreement applies to three areas identified in IUB's Information Technology Strategic Plan as critical to the University’s future technology and research capabilities: massive data storage, supercomputing, and the platform for IUB's central information systems.
Honor Roll Facts in Brief

INSTITUTION
Indiana University at Bloomington

LOCATION
Undergraduate Admissions
300 North Jordan Avenue
Bloomington, IN 47408
(812) 855-0661

ESTABLISHED
1820

ENROLLMENT
35,600

HISPANIC ENROLLMENT
510 undergraduates

DEGREE OFFERINGS
Bachelor’s
Master’s
Doctorate
Professional

TUITION AND FEES
$2,106 per semester for residents
(fees include Activity, Health Center, and Technology)

FACULTY
1,614 (36 are Hispanic)

The agreement "will make a major contribution to our goal of leadership in information technology," observes President Brand. "We believe that the ability to manage and store information assets, whether for research or administration, as effectively and efficiently as possible will be vital to the leading universities of the future, and IUB's relationship with IBM will ensure that we lead in the crucial areas."

Mark Elliott, general manager, Marketing, Engagement and Business Development, IBM Global Services, says that from his perspective, "universities are moving from business as usual to e-business. IBM is looking forward to working with IUB, one of the country's great research universities, to help it manage its information assets effectively for competitive advantage."

Last year, Indiana University at Bloomington was chosen as the home for the Abilene network operations center. Unveiled by Vice President Gore, Abilene is an Internet2 backbone network for research and education, developed by the University Corporation for Advanced Internet Development (UCAID). The center will provide comprehensive network management services for all physical and operational aspects of the Abilene network. A state-of-the-art center will be critical to the deployment of the advanced networking initiatives and services that are the focus of the Internet2 project.

"UCAID is excited to have the expertise team at Indiana University providing the operational support crucial to the success of the Abilene network," said Terry Rogers, Abilene project director. He also noted that "IUB is superbly qualified to lead the day-to-day operations of a network supporting University researchers and educators as they develop and deploy advanced applications and services."

Indiana University at Bloomington is one of the oldest state univer-
More than 80 percent of Indiana's population lives within a 50-mile radius of a campus. With an enrollment of 86,352 students taking 938,186.5 credit hours last spring on its eight campuses, Indiana University ranks as one of the largest institutions of higher education in the United States. Bloomington is the oldest and is considered the flagship residential campus.

Known for its physical beauty, the 1,899-acre Bloomington campus is set in the rolling hills of southern Indiana. Cultural and social activities abound. There are hundreds of student-run clubs to choose from, and more than 900 musical events are held each year. An outstanding faculty recruited from all corners of the globe has developed a reputation for great research discoveries that have broadened knowledge in many areas. The University libraries, with 25 million holdings, support the work of distinguished faculty in areas such as the humanities, foreign languages, and the social sciences as well as all the sciences. In laboratories where the focus is biology, chemistry and physics as well as other science departments, researchers are engaged in working at the frontiers of knowledge. Guggenheim fellowships have been awarded to 155 Bloomington faculty members. Total full-time faculty at Bloomington for the academic year 1998-1999 numbered 1,604. Of this number, 478 are female. Of the total group of faculty, 56 are Hispanic, 57 are African American, 80 are Asian, and 3 Native American.

More than 5,000 course offerings provide a wealth of academic opportunity while an extraordinary variety of lectures and seminars complement classroom, laboratory, and studio activity. The University Theatre, the Art Museum, and the Musical Arts Center serve as major resources for the University's programs in performing and fine arts.

U.S. News and World Report has ranked Indiana University-Bloomington among the top 15 public universities in academic reputation. In 1996, Johns Hopkins University Press rated IUB eighth in the nation among public universities, based upon the research and scholarly achievements of its faculty. In other studies, 55 of the University's undergraduate and graduate programs have been ranked among the top 20 in their respective disciplines. The schools of Business, Journalism, Library and Information Science, Music, Optometry, and Public and Environmental Affairs at IU-Bloomington are ranked among the top five in the nation in their respective disciplines.

The total number of undergraduates at IU-Bloomington is 27,826 with graduate students adding 7,774 for a total of 35,600. Among degree-seeking undergraduates, there are 510 Hispanics, 1,052 African Americans, 77 Native American or Alaskan Native, 760 Asian or Pacific Islander, and 757 nonresident aliens.

A number of student associations represent Hispanic students on campus. Latinos Unidos of Indiana University (LUU) was established in 1979 by a group of IUB students with the purpose "to promote the identity and unity of Latino students through intellectual, cultural, and social growth and to increase Latino visibility and involvement in campus and community activities." The group is open to all students enrolled at IUB and includes up to 60 Latino and non-Latino members a year. The members attend biweekly meetings at the La Casa/Latino Cultural Center. Members vote on issues, promote and coordinate events, participate in annual conferences, and help with fund-raisers. Latinos Unidos' annual events include Parents' Weekend, Sportfest, and Taste of La Casa.

There is also a Puerto Rican Student Association founded to promote academic achievement and social and cultural enrichment and to educate the community about Puerto Rican culture. Phi Omega is a sorority founded in 1991 at IU-Bloomington. It is Indiana's first nation-
Leadership

Latino Studies Journal

Seeks to Tell Latino/a Success Stories

BY TED OVIATT

Not long ago I read a disturbing story about two Puerto Rican students who are going through their educational experience with very little support from the system. The author's point was that these two young women, because of their circumstances, have had to redefine what it is to "be successful." Endowed with considerable advantages both in intellect and courage, they nevertheless faced some intimidating obstacles in the academic world. They have achieved success in school, but they are especially proud of what they have accomplished in their lives outside of school—without much help from the rest of us.

For the past eighteen years, most of my students have been Latino, and I warn to success stories, especially those of Spanish-speaking youngsters who have triumphed over any combination of restrictions, including poverty, dysfunctional families, monolithic educational bureaucracies, and cultural conflict. What shocked me as a teacher was that the first young woman, a college student, can name a teacher from her high school whom she considered helpful; and the other—still in high school—has found only one, her tenth grade math teacher, considered "mean" because of high expectations. This "mean" teacher continues to tutor the student, who is no longer in her class.

Is it possible that a school system, knowing that minority students feel abandoned by the adults therein, turns a deaf ear to their pain?

It is much more likely that the faculty, the administration, and the electorate in such a situation are of the Latino Studies Journal, which comes from the C.W. Post Campus of the Long Island University. Dr. Félix M. Padilla, a post professor of sociology, founded the journal in the fall of 1988 as a part of what he calls "our struggle to be recognized."

The plight of the two Puerto Rican students is just one example of an issue that needs to be recognized by all of our schools and communities. Not the kind of story often found in mainstream journals, it is, however, typical of the humane and personalized style of the journal's founder.

This winter edition under the guidance of guest editor Dr. Carol Mullen of Auburn University, is devoted to the theme, "Remembering to Tell Success Stories of Latino/a Identity," at the same time exploring the possibility of different definitions of success for students with differing values: It is clear to see, in the spring issue also, the commonality of topics that are all elements of the Latino struggle to see special concerns recognized and then addressed. The reader will find there thoughtful articles about "future prospects of the Latino population in the United States," measuring the "cultural awareness" of a school, the role of "social activism" in the determination of ethnic identity, strategic Mexican mothers use in instruct...
their children, and an innovative approach to the teaching of Mexican history and culture.

Most mainstream journals, Dr. Padilla found during the '80s, simply did not emphasize the Latino experience, or when they did, the focus was placed on the academic rather than the human aspects. One revealing incident gave Dr. Padilla and his colleagues an extra push to launch the fledgling journal. A colleague whom Padilla considered an outstanding sociologist and a particularly caring individual, had an article rejected, presumably because its topic, which bore directly upon the "Latino experience," would not appeal to the mainstream readers. Feeling discouraged and humiliated, the writer declared that he "would never again submit for publication."

Padilla charged forward "so as not to lose the richness" such a man could bring to those who need to hear the message. He wanted to create an instrument that would serve both as a forum for important ideas and as an opportunity for voices to be heard that might otherwise be lost. It would be a greater effort, Padilla says, to give a legitimacy to our work."

Padilla himself knows something about not being heard. Coming to the States from Puerto Rico at age 13 with his working-class parents, he was not seen as a college prospect by his teachers. He lived what he calls a "life of silence" throughout much of high school because he didn't understand what was being said around him. There were neither bilingual nor ESL classes. His motivation came from a dream of playing high school baseball and then being discovered at age 18 by major league scouts. Since that did not happen, he turned his high school education into a college experience and ended up as a high school teacher.

Concerned that very little real learning was taking place there, he took on a task, the difficulty of which only those who have done it—and their spouses—can know: while teaching full-time, he went for his PhD so that he could teach in college, where hopefully learning would be valued more than what he had observed at the secondary level. His father died before Padilla became a professor but nevertheless took pride in introducing his son as his own.

Thus the journals founder is himself a success story, and it is important that such stories be passed on to Latino youth. In selecting "success stories" as the theme of her guest-editorial edition of the journal, Mullen tells us that stories of Latino success are "talk on the verge of being heard." Latino culture has been "neglected until recently." Typically, Mullen contends, both Latino studies and scholarly research emphasize struggle, challenge, and failure—not success. Although it is true that "drug and alcohol use is overrepresented within ill-educated, impoverished Latino/a urban communities," Mullen nevertheless reminds us of the need for hope to balance young Latinos/as' view of the world.

After eighteen years at an inner-city, predominantly Latino high school, on my first day each year, I set about the task of dispelling the myth of limitations that holds so many of our students back. I don't fudge the huge number of dropouts who quit without giving school or teachers a chance, but I hit my ninth graders especially and older students too, hard with "success stories" from our school that show that the opportunities really are there—for everyone—even when students "do it right." A little time spent bragging about our perennial successes in cross-country, soccer, Academic Decathlon, forensics, band, drill team, ROTC, competitions, college acceptances, and scholarship awards is well worth it if we can point the rookies toward success instead of the more stereotypical dropping out.

One of my first assignments each July (we're a twelve-month school) is to read an article I wrote (Hispanic Outlook, Jan '97, America the Beautiful) about seven of our graduates who triumphed over obstacles. After discussion, my students write about someone they know who similarly beat the odds.

Like Padilla, Mullen did not travel an easy road to the PhD. American Indian/Trish women are rare in our graduate schools! Immigrating to the U.S. from Canada, she went through her own "phase of alienation," drawing support from Latinas and other "politically disenfranchised females" with whom she was working. Characterizing herself as "a bicultural female from a low socioeconomic background who is the first in her family to have a formal education past grade twelve," she is keenly aware of the struggle to have one's voice and story heard, "particularly in higher education."

Mullen's articles show that adults as well as teenagers need to experience the hope that is rooted in a belief in themselves, their unique ability to contribute, the richness of their heritage, and even their ability to change. Her first article in the journal pursued paths of success with a much more difficult population than our high school students. She reports on her work with Latina inmates in a rural Florida correctional facility via an arts-based educational program. Having declared her interest in "the politically disenfranchised, who have a powerful story to tell of human struggle and growth," she writes, "Artistic development was aimed at an intensive process of self-expression, community participation, and identity transformation." The hoped-for change would produce "a new evolving self immersed in forces of creativity, community, and well-being." This incarcerated female population, she points out, is new territory for the researcher. Mullen believes in and draws from the "storytelling and therapeutic powers of Latinas/as and their potential to transform politically disenfranchised elements in society and organizations."

Because Mullen's subject group was general ly from "barrio" underclass families, her findings have implications for drug use and gang participation as well. For example, she found that gang lineage often produces a certain stability that can promote "its lifestyle into the second generation." This is, of course, not the kind of stability that will be useful to society, so we must entrust our young people with stories that show there is a better way.

Another contributor to this special issue, Patricia Gandara, is an associate professor at the University of California-Davis, and author of a book entitled Over the Ivy Walls. The
Educational Mobility of Low-Income Chicanos (SUNY Press, 1985); Of success stories, she writes that they "...provide not only models of people who have made it, but they also remind us of the sense of hopefulness which might otherwise be absent in our lives... The most critical intervention a parent can make to break a cycle of low achievement is the alteration of aspirations and the introduction of a sense of hopefulness based on tangible evidence of success others who have made it.”

Supporting Mullen's point that research on success among Latinos is in its infancy, Gandara writes, "Very little is known about strategies that families use to promote high achievement among Latino children because so much of the literature has focused on academic failure among this population."

More is known about the stumbling blocks to a family's dreams for its children. Gandara reports that teens from groups that "find themselves in the U.S. through slavery, conquest, or colonization" often regard high achievement in school as "acting White" and therefore undermine their own chances through negative behavior. "Latino students who choose to join gangs, drop out of school, and otherwise reject the social norms of White society are a classic example of oppositional behavior... In this way they cooperate in creating their own dismal situation as an act of defiance against a culture they perceive as oppressive."

Others whose backgrounds reflect the family's historic arrival by choice are more likely to take advantage of the opportunities to improve their lot through schooling in spite of discrimination and other barriers facing newcomers.

As evidenced by the struggles of the two Puerto Rican students mentioned at the start of this piece, some barriers facing darker-skinned minorities are erected, willingly or unwillingly, by school systems themselves. One such barrier can be the policy of tracking, the values of which have long been debated with or without discrimination. Gandara cites an article by Hugh Mehon in the Harvard Educational Review (1978) describing what happens when the practice of tracking is combined with discrimination. She explains, "Low income and minority students, because they come to school without the status characteristics of the middle and upper classes, are assigned to the lower tracks and groups in school where they can be 'remediated.' Higher status students are placed in the upper tracks and the faster reading groups where they can fulfill the prophecy of their more moneyed and educated heritage."

The idea throughout—from Padilla's initial concept to the highly relevant issues presented in the 1999 winter and spring publications—has been to remove or break down these barriers through the sharing of information: informing students, identifying needs, and occasionally making changes in "the system."

"We have asked the people of our urban ghettos [and our barrios] to the breakfast of hope, but the supper of fulfillment we eat without them."

ROBERT F. KENNEDY

Emilio Rendón, a doctoral candidate at Texas A&M University, contributed a study in "Creating Successful Opportunities for Latinos/as in Academia." He advocates cooperation as a sine qua non of Latino success, especially because "the Latina/o persona...often favors a cooperative rather than a competitive modus operandi." I contend that if Latinos/as' educational opportunities are to multiply, in both quantity and quality, simply marching and proclaiming "Viva la raza," or dancing the wonderful cumbias, polkas, and salsas so precious to our culture is not enough.

Substantial steps need to be undertaken to become one another's advocates for personal, professional, and academic development, rather than behaving as though academic achievement succeeded entirely on their own.

Rendón's research contains some revealing responses from Latinos regarding important factors in their doctoral completion: one, urgency to finish due to having opportunities denied other family members; two, a mentor who awakened an intellectual potential and curiosity within the respondent; three, a mentor who helped the respondent deal with academic insecurities; four, a mentor who acted as a guide into a new and often alien environment at predominantly White universities; five, respondents who took risks in choosing non-traditional areas of study; six, respondents who believed a doctorate was essential for an academic career to later assist other Latinos/as to earn their own doctorates; and seven, friends, family, and peers who encouraged and supported respondents toward the doctorate.

Note the absence of money as a goal, and the frequent recognition of the role of people who helped—friends, family, and mentors.

Rendón urges Latinos and Latinas to go where others have not ventured before, and he asks those who guard so jealously the gates to opportunity to cooperate in opening up the possibilities that will develop talent otherwise lost to our nation. He quotes the late Robert F. Kennedy, speaking at an NAACP meeting in 1966: "We have asked the people of our urban ghettos [and our barrios] to the breakfast of hope, but the supper of fulfillment we eat without them. Breakfast has long ago been eaten, and hunger walks the streets. It is time to make room at the table."

Hopefully the powers that be at the universities of Texas and California will read the right journals and make room at their table in spite of the absence of affirmative action as a facilitator. Hopefully, too, the work of Dr. Padilla and contributors to his Latino Studies Journal will influence all our schools to make room at their table—for everyone.
National Urban/Rural Fellowship Program

A Vast Network of Tomorrow's Leaders

BY JEFF SIMMONS

It's a display that brings much pride and twenty-nine framed photographs that adorn a hallway wall around the corner from his high-rise office in midtown Manhattan. In each one stand about two dozen or so men and women, many minority, most in their early 30s.

Alvarez points to one class picture, from 1972. His finger aims toward one young man, and he nonchalantly says, "That's me." Then his eyes quickly dart to another wallhanging. Like a proud father, he describes the accomplishments of many of the assembled graduates of a program over which he has presided for 25 years.

"You really should come to graduation," says the 65-year-old grandfather. "It's very, very moving. You see this real transformation of individuals. And that, for me, is the real payoff."

Alvarez continues, "What I find particularly rewarding is the vast network of individuals who are highly successful. You get a young person who comes in and has some basic leadership skills and has a commitment but is unsure about where they want to go, what they want to do. He pauses, then adds, "and you see them blossom, almost virtually before your eyes."

This transformation has been taking place for three decades through the National Urban/Rural Fellowship Program, which has awarded diplomas to close to 800 prospective leaders since its inception. It's a program that matches fellows with mentors who already have become leaders in their fields and have a wealth of experience to share.

"These mentors are leaders in their own right," he says. "They're running huge governmental agencies; they're running large foundations and community-based organizations."

Armed with funding from the Ford Foundation and Yale University, the National League of Cities and U.S. Conference of Mayors founded the nonprofit National Urban Fellows Inc. in 1969, aiming to become the "premier" national leadership development program in the nation. Its offspring now serve in top executive positions in the United States, Puerto Rico, Africa, and Europe.

Alvarez, who is not just a cheerleader by virtue of his position as president of National Urban Fellows Inc. and also a graduate of the program, "I was actually the first federal placement in 1971," he says, sitting behind his desk. He continues: "I thought I was a hot shot. Puerto Rican. I was going to go up to Washington and make it. It was a revelation because I never had experience, nor did I understand the enormous power of the legislative process."

Over the subsequent year, Alvarez toiled long hours with his mentor, Dan Davies. It was a hands-on education that he hasn't forgotten, one that hundreds of fellows have since undergone.

Like Alvarez, each fellow spends 14 months gaining academic and professional experience. Fellows Inc. distributes close to 3,000 applications annually, and usually receives a few hundred back from applicants seeking to enroll in the full-time program. From there, about 60 are brought in for interviews.

Candidates must possess strong leadership and academic prowess, fine interpersonal and problem-solving skills, and a strong work ethic. The pool is winnowed if applicants don't also possess at least three years of management and administrative experience in the private or public sector, are not U.S. citizens, or lack a bachelor's degree.

Eventually between 25 and 30 fellows are chosen and then must be matched with mentors, who are senior executives and accom-
plished administrators from local, state, and federal governmental agencies, and public and private institutions.

Mentors are not chosen just for their availability but also because they are willing to dip into their wallets. They are charged $40,000, which pays a fellow's $21,000 salary, and defrays academic, travel, and relocation expenses.

Mentors pore through resume books detailing each applicant’s background and qualifications and then note their top seven choices. After a round of interviews, mentors make their final recommendations.

“We do this through a very rigorous selection process,” Alvarez says. “Fellows are interviewed, they are screened, and we have structured mentorships in which an individual, a major, a city manager applies to us for a fellow and then we match the fellow up with the job description.”

Fernando Ferrer, the borough president of The Bronx in New York City for the last dozen years, became a mentor after receiving a phone call from a former mentor of his, Luis Alvarez.

“Luis called me up and said I have this program with some very, very smart young people,” Ferrer recalls. “I thought it was an exciting idea.”

That was in 1989. Ferrer, a mayoral candidate in New York City in 1997, has since mentored several fellows. “I think it is important to get a break,” he says, “to have someone who is established in the field that they are thinking about sit down with them and talk, give them hands-on experience and insight.”

“It’s very hard for people, especially young people. Very few people want to take a minute and explain what this is all about.”

The program commences each spring (this year’s started on June 6) with a summer academic session that is followed by a nine-month assignment in a mentor’s startup in early September. During that time, fellows are expected to complete academic coursework to receive a Master of Public Administration when the fellowship ends.

During their assignments, fellows are required to complete additional coursework off-campus and attend a mid-year conference. They follow a curriculum that focuses on teaching administrative management, public budget administration, policy research, and computer methodology, as well as the politics of public administration and public policy.

After the nine months, mentors return their assignees across the nation to New York City for a second summer session and eventually receive their degree from the Bernard M. Baruch College of the City University of New York system in Manhattan.

Ferrer has watched his charges move into jobs as budget experts and legislative aides. “This was an opportunity to pay back a little for opportunities that I’ve been given,” Ferrer says. “Were it not for encouraging people in my life, like Luis Alvarez, I might not be where I am today.”

The program pays particular attention to recruiting Latino and African American candidates, striving to address long-standing gaps in minority representation in leadership positions. Alvarez says that the number of minority applicants appear to rise each year.

Adds Ferrer. “We are training a cadre of young people to take their place in public service. We should encourage more minorities and women as municipalities, states, counties, towns and villages become increasingly more minorities. These are the faces of the future of government.”

According to the most recent fellows’ demographic study, African American males accounted for the largest group of students in the program. Between 1969 and 1997, they represented 34 percent (366 fellows) of all graduates. Latinos followed closely behind, with 33 percent (215 fellows). There was a significant drop: Whites accounted for five percent (36 fellows).

Statistics show that the median age of fellows is 34, and that men represent just over 50 percent of all graduates since 1969. Most hail from New York. Since 1969, 153 have resided in New York, 80 in California, and 38 from the District of Columbia. Six graduates have come from Puerto Rico.

Richard Rivera, who traces his heritage to Puerto Rico, Spain, and Venezuela, had wanted to serve his fellowship with someone of similar roots. His fellowship landed him in Los Angeles working with the Annenberg Project in 1995, but then his father’s illness drew him back prematurely to New York City.

“It was then that he landed with United Way of New York City, and with mentor Alex Betancourt its president now for the last 10 years.

“I really wanted to work with a male who understood the community and could be a role model on a personal and professional level,” Rivera says. “When I first met with Alex, I shared with him that my primary concern was my father and that needed the flexibility and understanding that my father and my family came first.”

“He clearly let me have that leeway. My job became a point of stability where I could come into work and it would be extremely supportive.”

Rivera previously had taught social studies at the New York City school system and worked with the national Teach for America teacher recruitment program.

“I wanted an MPA and a new experience. At that time, I thought what I wanted to do was to step out of education and that a program like this would offer me a different light.”

Under the program, mentors are required to guide fellows through all facets of their job and fellows—called “special assistants”—must have full access to policy and budget meetings.
fellowship program requires that mentors ensure that the assistant’s job have a “beginning, a middle, and an end.”

“The fellow not only must have access to the mentor but also must be invited into cabinet meetings and policy sessions so that the fellow then gets insight,” Alvarez says. “You must have empathy for what young people must be going through, and must believe in the concept of mentoring. It’s hard because you’ve got to invest time and energy.”

With his background in education, the now 31-year-old Rivera seemed to fit into his position snugly. He handled an assessment of all schools that dealt with the United Way’s Community Achievement Project in Schools, or CAPS.

The program helped to forge partnerships between community-based organizations and schools to assist “at-risk” students, mainly those who had poor attendance and were at high-risk of dropping out. The CAPS program worked at building links between the public and private sectors.

Rivera found that many of the schools in which they operated had served as liaisons to mayors’ offices and spearheaded special project initiatives.

Rivera spearheaded the United Way’s bus caravan to Albany for its annual “Public Information Day,” a movement that prompted legislation to support its efforts. After graduating, Rivera, like 80 percent of the other fellows, landed a job with his mentor’s agency.

Now he is designing an elementary school, one that could open its doors in New York City in the year 2000.

“The program exposed me to experiences that I might not have had in a traditional job. When you get hired, it’s usually to do a particular job, but this is also a learning experience,” he says.

Alex let me tackle challenges, he let me give input with my ideas. If I had an idea; I would talk to him, and he would give me feedback and understanding. He was a good mentor. If I made a mistake, I’d walk in and let him know. He would say, ‘let’s talk about what went wrong here and how we might correct it.’

Betancourt is equally laudatory about the program and its benefits. Being a mentor, he says, ‘is the mantle of leadership. That’s how I see it. It’s taking someone like Richard and opening doors for him and showing him what my experiences have been, trying to create a context for him where his professional development doesn’t have to be as painful as mine was, and learning from our mistakes.

‘I really didn’t have any mentors in the business of nonprofits in education. I had to negotiate all of these systems by myself. It would have helped if someone had taken hold of me 15 years ago. I know what it was like to negotiate those systems absent a mentor.

‘Richard presented a unique challenge because of the various skills he brought to the table, along with a sense of passion and commitment toward working with the community,” Betancourt says.

Betancourt agrees that minority mentors are a necessary component of the program. The number of women, African American, and Latino mentors is rising. They serve not only as experts in their fields but as role models as well.

‘These are populations that are traditionally underrepresented in positions of leadership and authority,” Betancourt says. “There are a lot of African Americans and Latinos who are young professionals who make it to mid-level management but never make it to higher positions and higher degrees of power. It’s almost like a glass ceiling.

He adds about Rivera. “Richard has proven himself to be equal to whatever the challenge might be and dogged in his determination to make a difference for his community.

Fellows Inc. also looks to elevate these minorities into corporate offices and environmental roles: The Environmental Science and Management Fellowship, which also uses mentors, recruits candidates with at least five years of environmental experience. Twelve percent of its graduates have been Hispanic.

The Corporate Executive Fellows program is fashioned to expand the roles of minority executives in upper-level management positions. The program, which began in 1985, lasts 24 to 30 months. Fifty-four percent of its graduates have been Hispanic.

Overall, the programs cost about $2 million annually to run. Fellows Inc. receives funding from the public and private sectors, such as the Ford Foundation. A grant from the federal Environmental Protection Agency is earmarked for the science and management program.

“Our objective here is to train leaders. Not just for ethnic minorities but for the whole society,” Alvarez says. “We really wish they would assume leadership roles in their respective communities, either through an elective or administrative process.”

Many graduates have since become mayors, council members, county administrators, and heads of governmental agencies, foundations, and community-based organizations. Others have returned as mentors and to serve on Fellows Inc.’s Board of Directors.

That might be where Alvarez lands next year. After watching the 30th class graduate, he is planning to retire but still wants to help the organization.

“It’s a tough job,” he says. “It’s constantly raising money, and I think it’s important that we begin an orderly transfer to a new leadership, a younger leadership.”

“I think we now have a foundation, an infrastructure,” he says. Perhaps, Alvarez believes, his successor will not only be an astute fund-raiser but also a graduate of the program, a person who will then sure follow in his footsteps.

Says Alvarez. “I think its time to move on and hand over the mantle of leadership to a new generation.”
UCLA Senior Praises Chicano Studies Research

The Chicano/Chicana Studies Program at the University of California-Los Angeles (UCLA) offered senior James Burkhardt an academic mirror that brought his Mexican American cultural identity into sharper focus. Coursework in history lent context to the confusing whirl of coexistence, conflict, and convergence that marks the interaction of the Mexican and American cultures today. And public policy studies gave him insight into how inequities and conflict between the cultures might be addressed and the best of each celebrated.

Research conducted under the direction of Raymond Rocco, a UCLA political science professor of Mexican descent, combined the three study areas.

"These research opportunities made me a stronger student and will make me a better policy-maker," said Burkhardt, who plans to pursue a graduate degree in public policy and then enter politics.

Blanco, Reyes, and Roldán Graduate from Cal State-Northridge

“I've been a teacher’s assistant in a special education classroom. Nineteen years is a long time to get his degree and become a special education teacher having already lost too much time,” he wanted to start teaching as soon as possible.

Computer science student Jaime Reyes at one point didn’t think he was going to make it. Being the sole support of his family, a father-figure to his three siblings, working four jobs, and going to school full time was just too much. But he persisted.

Fernando Roldán, aspiring journalist, was born with arthrogryposis, a rare disorder that causes his joints to bend and inhibits the growth of his muscles. But he doesn’t think his disability will get in the way of his career.

Blanco, Reyes, and Roldán each received a bachelor’s degree from California State University-Northridge in June.

Cardona Attends Graduate History Seminar

Debra Cardona, Texas A&M University-Kingsville history graduate student, has been attending the month-long Oaxaca Summer Seminar designed for graduate history students working on their master’s or doctoral degrees.

“The seminar was started because there are good graduate students all over the United States and Canada who don’t have an opportunity to interact with each other,” said seminar director Dr. William Beesley, professor at the University of Arizona. “It also provides a way for faculty to interact with each other.”

González Gives Address at De Anza

San Jose Mayor Ron González, who studied liberal arts at De Anza College (Calif.) from 1969 to 1971, gave the commencement keynote address at his alma mater in June.

González has several strong ties to De Anza. His oldest daughter, Miranda González, is part of De Anzas Class of 1999 and earned her associate’s degree; and his youngest daughter, Alejandra González, is currently studying liberal arts at the college. Two years ago, De Anza President Martha Kanter granted the mayor an honorary associate’s degree.

González earned a bachelor’s degree from the University of California-Santa Barbara. As San Jose’s mayor, he is especially proud to be founder of The Role Model Program, an effort that recruits adult role models to regularly visit local middle schools.

Calderón-Salin Chosen as Hispanic Fellow

Dr. Delmy Calderón-Salin, assistant professor of aerohusnism for the agronomy and resource science department at Texas A&M University-Kingsville, was named a Policy Fellow for a partnership between the Hispanic Association of Colleges and Universities and the Educational Testing Service.

Calderón-Salin was one of 15 chosen nationwide to participate in this prestigious, successful, and sought-after leadership development initiative for Hispanics in the field of higher education.

As policy fellow, Calderón-Salin will participate in forums, workshops, and conferences dealing with the challenges and opportunities for enhancing Hispanic higher education policy.

Alegria Saluted at Trinity College

Scholar Ricardo E. Alegria (pictured) was celebrated during a commencement luncheon at Trinity College (Conn.).

Alegria, an esteemed authority on Puerto Rican culture, was presented too with a Doctor of Human Letters, honoris causa, a Trinity’s F‘53rd Commencement. Alegria is the director of the Center of Advanced Studies o Puerto Rico and founder of the Institute o Puerto Rican Culture. He is a scholar of pre Hispanic indigenous Caribbean history and the author of more than 25 books.

Durán Named to Alamo Community College Board

In Texas, Tino Durán—owner and publisher of La Prentita, San Antonio’s only bilingual newspaper, and La Prentita, a weekly hon
edition of La Prensa—has been named to a three-year term on the Alamo Community College District’s (ACCD) Foundation Board, a charitable corporation that solicits, receives, and administers contributions to the district.

The president of Durán Durán Industries and former San Antonio College student, Durán was selected one of SACs “Outstanding Former Students” in 1997. He has bachelor’s degree and a master’s from St. Mary’s University.

Flores Receives Friedman Award

Marciano Flores III, a father of four who returned to school for his college degree, received this year’s Jeremy D. Friedman Memorial Award from the University of California-Santa Barbara (UCSB). The award is presented annually to one graduating senior who contributed significantly in an innovative and creative way to the quality of undergraduate life on campus.

Flores took part in many projects that provided support to UCSB students and adapted outreach programs and support services to better serve prospective students such as Chicano/Latino men and women, parents, those returning to school, or those transferring from community colleges.

Flores wants to be a Chicano studies professor. He is pictured here with his children (1 to r.) Mathew Paul, Michah, Marciano IV, and Bruna.

Núñez New Provost

Dr. Elsa Núñez was appointed provost and vice president for academic affairs at Lesley College (Mass.). Núñez brings to her new position a range of faculty and administrative experience spanning 30 years.

“My former teaching experience has enhanced my effectiveness as an administrator,” said Núñez. “By working directly with students and developing curriculum, I learned how important it is for faculty to continuously improve and create courses and programs both for the liberal arts and for professional studies. And I believe that these areas of study need to be integrated.”

The author of Pursuing Diversity: College Minority Student Recruitment (George Washington Press), Núñez’ work is progress is on the high school dropout phenomenon in the Hispanic student community.

Ortíz Heading St. Louis Campus

Dr. Gustavo Valadéz Ortiz has been named president of the Florissant Valley campus of St. Louis Community College (Mo.). He leaves a position as executive director for partnership programs for the City Colleges of Chicago system in Illinois. Ortiz also has been vice president for instruction and student development for Daley College, one of the City Colleges of Chicago.

Ortíz has a bachelor’s degree from St. Mary’s University in Winona, Minn.

Alarcón Addresses Cal State-Northridge

California State Sen. Richard Alarcón addressed the California State University Northridge College of Humanities during the college’s commencement ceremonies in June.

Alarcón is a lifelong resident of the San Fernando Valley, with roots dating back to the 1920s. As a champion of the Valley, Alarcón believes in involving the community and building consensus in finding solutions to problems.

A Senate Majority Whip, Alarcón chairs the Senate Housing and Community Development Committee, and the Subcommittee on Environmental Justice. He also serves on the Senate Energy, Utilities and Communications, Education, Environmental Quality, and Industrial Relations Committees.

Robles and Becerra Receive Scholarships

Maria Socorro Becerra, Maria Isabel Robles, and Valerie Thompson received $200 scholarships from Mt. San Antonio College (SAC) in California.

Becerra, a student in the New Horizons program (associated with the Single Parent Academy) and the HAGASE (Single Parent Academy for Spanish speakers) club, received the César Chávez Scholarship, sponsored by the Mt. SAC Latino Faculty and Staff Association.

Robles, a student in the CARE program (offered through Mt. SAC’s Extended Opportunity Programs and Services office), received a Kay Ragan Re-Entry Scholarship, as did Thompson, a New Horizons student.

Nieto Joins DePaul Board

Ernesto Nieto, founder and president of the National Hispanic Institute (NHI), is one of four new members of DePaul University’s (Ill.) board of trustees.

Nieto founded the NHI in 1979. The private, Texas-based nonprofit organization is dedicated to helping Latino youth develop leadership skills, prepare for higher education, and achieve NHI sponsors the Lorenzo de Zavala Youth Legislative Sessions, and a program coordinated by Nieto and his wife Gloria de Leon to expose Latino high school juniors and seniors to community leadership opportunities.

DePaul is a member institution of the College Registrar, a consortium of universities that work with NHI to reach out to Latino college-bound high school students.

Martinez Earns Student Affairs Fellowship

José Martinez, of United States International University (Calif.), has been selected for the Minority Undergraduate
Fellows Program of NASPA, National Association of Student Personnel Administrators. Student Affairs Administrators in Higher Education.

The honor is awarded to a select few throughout the U.S. who are interested in studying higher education and in pursuing student affairs as a profession.

The two-year program provides fellows with knowledge, insight, and understanding of opportunities in student affairs and higher education: opportunities to engage in mentoring and networking experiences; and hands-on experience in student affairs and higher education.

Martinez’ fellowship runs through June 2000.

**Castro New Cal State-Dominguez Hills VP**

Dr. Donald S. Castro recently became vice president for academic affairs at California State University (CSU)-Dominguez Hills.

Castro is the former dean of CSU-Fullerton’s School of Humanities and Social Sciences, where he was responsible for Fullerton’s Social Science Research Center, its Center for Demographic Research, its Center for Twins Research, and itsRuby Gerontology Center. Active in campus planning and development, he helped create its new mission and goals policy.

Castro earned his bachelor’s, master’s, and doctoral degrees at UCLA. He is a member of the Golden Key National Honor Society and is active in the Academy of Political Science, the American Historical Association, and the American Popular Culture Association.

**Vásquez a Winner at Bosch Future Tech Challenge**

José Vásquez, South Florida Community College (SFCC) building trades student, won $1,000 in cash and $2,000 in Bosch Tools at the 1998-99 Bosch Future Tech Challenge in Florida. SFCC received $1,000 in tools.

Students in the competition were given blueprints for an octagonal picnic table. The tables they built were then judged on safety use of tools, quality of workmanship, materials management, and cleanliness of work area. Vásquez, who finished fourth, called it “a great learning experience.”

Vásquez is pictured here (at r.) working with Randy Geiger.

**Limón Receives California-Santa Barbara’s Highest Academic Award**

Gladys Limón Pérez, who dedicated countless hours to steering fellow students through the financial aid process, won the Thomas Moree Storke award, the University of California-Santa Barbara’s top graduation honor.

“I’m very proud to be the first Chicana to receive this award,” said Limón. “Yet, I do not consider it just an award as this award is representative of our student communities of struggle.”

Limón and other students prompted the formation of the chancellor’s Financial Aid Task Force to protect financial aid for those most in need. She mastered an understanding of the complex financial aid system and then translated that knowledge into a student manual.

Encouraging others to pursue higher education, Limón is a role model to many.

**Desmangles Promotes Sensitivity to Religious Traditions**

Trinity College (Conn.) Professor Leslie G. Desmangles wants his students to be aware of the spiritual dimension of themselves as human beings. A professor of religion and international studies, Desmangles teaches courses in Caribbean, African, Hindu, and Buddhist religions from the anthropological perspective of how the religious traditions exist within a culture’s political, economic and social structure.

Students have praised him for his contagious enthusiasm and his dynamic and entertaining lectures. They say that his anecdotes make the material seem “real.”

Desmangles, who has a doctorate from Temple University, hopes that his teaching “helps them become more sensitive to religious traditions of other parts of the world.”

**Eastern Washington Chicano Program Awards**

Several students from the State of Washington received awards at the Eastern Washington University Chicano Education Program’s first annual Chicano/Latino Alumni and Scholarship Reception.

Ana Solorzano, Rosa Maria Diaz Margarita Moreno, Hector Cruz, and Nando Vargas received $2,000 scholarships; Brenda Rubio and Maribel Oriona Carpenter, $1,500; Sophie Pacheco, $1,000; Anabel Villa, $700; Melissa Piceno, Elizabeth Nunez, Rita Miranda, Lucia Ramos, and Bertha Villa, $500; Jessica Ragoza, $250; and Angelic Rodriguez, $200.

**Student Aid Alliance Launches Web Site**

The newly formed Student Aid Alliance, a coalition of 58 higher education associations, including the American Council on Education, has established a Web site urging students and campus administrators to get involved in this year’s federal budget process by contacting Congress to express support for increased funding for student aid programs.

The Web site is <www.studentaidalliance>
Bristol Community Honors Student Tutors

Sixteen Bristol Community College (Conn.) students were recognized at the Third Annual Certification Ceremony for their commitment and hard work as peer tutors in the college's Tutoring and Academic Support Center (TASC).

Fernanda Jiménez-Labora, Tutor Club president this year, said that the TASC work had not only made her a better person but a better student.

Jiménez-Labora, Jeffrey Costa, Stacey Barreira, Amur Belmedani, Michael Boudria, Kathryn Mui Pong, and Robin Worthington were named master tutors.

Lori López, Sandra Núñez, Tracy Penha, Chana Ferreira, Lori Lockwood, Steve Breciault, and Ken Burt received advanced certification. Denise Farias and Lee Ann Freitas received regular certification.

El Paso Community to Open Child Care Centers

Dr. William J. Campion, president of El Paso Community College (EPCC) in Texas, plans to open child-care facilities at each of the college's five campuses by the end of the current year.

"Surveys in California have shown that schools that have child-care facilities on campus increase student attention and retention," said Isela Castañón-Williams, EPCC child-care instructor and program coordinator who is working with Campion on the project. She also said the facilities would provide learning opportunities for students in the child-development, nursing, dental hygiene, and optometry programs.

San Antonio College Newsmakers

San Antonio College (Texas) student Robert Cortina is one of 20 students in the country picked for the All USA Community College Academic Team, selected from 1,390 applicants by a panel of educators convened by the Phi Theta Kappa International honors society.

Community relations specialist Martinella Garcia-Murillo was named a 1998-1999 Outstanding Former Student of San Antonio College. Community relations and involvement specialist with the U.S. Department of Housing and Urban Development, she helps public housing communities throughout South Texas to strengthen and support their residents by encouraging economic opportunities and personal growth.

Palo Alto Awarded Upward Bound Grant

The U.S. Department of Education awarded Palo Alto College (Texas) an Upward Bound Program grant totaling $800,000 over a four-year period.

"This program will improve opportunities for students in the outlying areas of San Antonio to achieve their educational goals," said Palo Alto President Dr. Enrique Solis.

Beginning in the fall of 1999, the program will help low-income, first-generation-in-college students complete high school and enter postsecondary education.

Dan Rodriguez (pictured), chairperson of Palo Alto’s Counseling Department, said the grant will certainly enhance our efforts to serve an even greater number of students.

Indigenous Venezuelans Visit California-Santa Barbara

UCSB Jaime Turon, mayor of the politically troubled Venezuelan State of Amazonas and a member of its indigenous Ye' kwana people, spoke about the struggles of his homeland at the University of California-Santa Barbara (UCSB).

Amazonas, recently created and bordering Brazil and Colombia, is mostly populated by native Ye'kwana and Yanomamo people and is facing multiple crises posed by disease, cocaine smuggling, renegade mining and logging, and political strife that could erupt into guerrilla war.

Turon and six associates made a weeklong visit to the campus as guests of Napoleon Chagnon, UCSB professor of anthropology, who has studied the people of the region for 35 years.

Reyes New Director of Academic Development

Saul Reyes recently became the director of academic development at Jacksonville University (Fla.).

Dr. Catherine Morgan, vice president for enrollment services, said: "Saul has a rich experience here and at his previous position in providing comprehensive career development services to students. The level of services provided to Jacksonville University has advanced in each of his three years here."

Reyes will continue to provide leadership in career services.

Texas-El Paso Provides Early Medical Acceptance Program

A partner program of the University of Texas-El Paso (UTEP) and the University of Texas Medical Branch (UTMB)-Galveston has enabled eight students to enter into a new Early Medical School Acceptance Program (EMSAP).

One of several UTEP programs aimed at addressing the shortage of minority medical professionals, EMSAP guarantees disadvantaged students slots at UTMB upon graduation from UTEP. Students are required to
maintain a 3.2 GPA and must score a minimum of 21 on the Medical College Admissions Test while at UTEP.

The eight EMSAP students are Adriana Martinez, Rubi Navarro, Belen Romero, Chris Butler, Kieron Dillingham, Karina Franco, Silvia Marruffo, and Krishna Reddy.

According to a Pew Health Professions Commission report issued in December, Hispanics make up nine percent of the U.S. population, but account for only 4.6 percent of physicians. UTEP is helping to improve those statistics.

**St. Thomas Announces Cuban Oral History Project**

St. Thomas University (Fla.) announced the official unveiling of the Cuban Oral History Project at an on-campus reception that included the premiere of a short documentary on the history of the Universidad de Santo Tomas de Villanueva, the precursor of St. Thomas in Havana, Cuba. This film was produced and directed by well-known Cuban filmmaker Alex Anton. Among those attending the reception were faculty members of the School of Arts and Sciences.

The George Fleming Award for Exemplary Faculty Service went to Sister Ann Petrus, chair of the department of mathematics. This award recognizes a faculty member for both teaching excellence and outstanding service to an academic department and to the university.

**Law School Admission Council Awards Research Grants**

The Grants Subcommittee of the Law School Admission Council (LSAC), located in Pennsylvania, awarded two new grants and continued funding of a third project.

Stephen Meinhold, University of North Carolina-Wilmington, and Dennis Gleiber, University of New Orleans, received funding to continue their pilot study, which aims to provide insight into the research question, “What explains undergraduate students’ intentions of going to law school?”

Jean Wallace, University of Calgary, received a grant for the project “Flogging it All: Examining Work, Home and Family Demands. Coping Strategies and Lawyers’ Career Satisfaction and Commitment.”

The third funded project, submitted by Dorothy Evensen, Pennsylvania State University, is “Group Learning Contexts and Processes Within Law Schools.”

**Cuban Museum Donates Collection to University of Miami**

The Cuban Museum of the Americas has donated its entire collection of more than 500 original artworks and historical memorabilia to the University of Miami (UM) in Florida. The collection will become part of the permanent collection at the university’s Lowe Art Museum.

UM board of trustees member Carlos Saladrinas helped spearhead the effort to bring the Cuban Museum collection to the university.

Highlight pieces from the collection include the only photograph of poet and patriot José Martí in military uniform, and the General Calixto García flag flown during Cuba’s War of Independence. Considered priceless, the flag has been kept in a vault to keep it away from humidity, light, and other destructive natural elements.

**National Council of La Raza Holds Annual Conference**

The National Council of La Raza (NCLR), the largest constituency-based Hispanic organization in the country, held its 1999 Annual Conference at the George R. Brown Convention Center in Houston, Texas.

The NCLR Annual Conference regularly attracts over 15,000 participants, bringing together some of the nation’s foremost business and community leaders, government officials, and entertainers. This year’s theme “Launching a New Millennium,” focused on the critical role Hispanics will play in America’s social, political, and economic future, and the especially important role of Texas, home to America’s second largest Hispanic community.

**Texas-Brownsville and Texas Southmost Honor Alumni**

Miguel Angel Méndez, Adelbert H. Swe professor of law at Stanford University, at Dr. Rolando Hinojosa-Smith, Ellen Gaywood Garwood Professor of English at the University of Texas-Austin, were honored with the Distinguished Alumni Award by the University of Texas-Brownsville and Texas Southmost College (UTB/TSC).

Méndez teaches criminal law, evidence, and trial advocacy. He is the author of numerous legal articles and has published seven books on evidence.

Hinojosa-Smith has published more than 14 novels. His works have been widely translated in Europe.

Pictured here (left to right): Texas Southmost College board of trustees chair Mary Rodriguez, Hinojosa-Smith, Méndez, and UTB/TSC President Dr. Juliet García
California-Riverside and Cal State-San Marcos Develop Pilot Program

In an effort to improve college instruction, a pilot program is bringing doctoral candidates from a research university to a teaching institution for a year of training in teaching, mentoring, and advising undergraduates.

Four doctoral students from the University of California-Riverside (UCR) will spend the 1999-2000 academic year as visiting teaching fellows at California State University-San Marcos, assuming regular duties similar to those assigned new assistant professors, which include teaching three courses per semester, advising students, and working with colleagues in a yearlong seminar to refine instructional skills.

"I see this as a fantastic program that will provide key training for outstanding doctors who seek university careers," said Carlos Velez-Ibañez (pictured), dean of the UCR College of Humanities, Arts and Social Sciences.

Texas-San Antonio Reading Program Recognized

The University of Texas-San Antonio (UTSA) reading program is serving as an outstanding model in a national study that aims to improve how America's reading teachers are trained. The International Reading Association chose UTSA to serve on its new National Commission on Excellence in Elementary Teacher Preparation for Reading Instruction. Professor of education Miriam Martinez is representing UTSA on the commission and serves on the commission subcommittee designing a survey of reading teacher education programs nationwide. The commission will use data from that survey and from the exemplary programs to develop practical goals and guidelines for teacher education programs.

Latino Engineering Enrollment Holding Steady

NACME According to new figures released by the National Action Council for Minorities in Engineering (NACME), Inc., Latino first-year student engineering enrollment remained essentially flat in 1998, despite increases in first-year student minority engineering enrollment for the second year in a row.

Latino first-year student enrollment increased minutely in 1998, from 5,858 to 5,888—a negligible 0.5 percent. Latino men increased by a slight 0.8 percent, from 4,596 to 4,635, while Latinas dropped by 0.7 percent, from 1,262 to 1,253. Although these numbers are disappointing, schools that historically have enrolled large numbers of Latino students continue to provide access. Latino enrollments at the University of Texas-Pan American and Texas A&M University—two of the nation's largest producers of Latino engineers—are up by 70 and 55 students, respectively.

Overall, first-year student minority enrollment increased by 51 percent.

Summer Cultural Camp at Texas Woman's University

Dr. Lisa Garza, assistant visiting professor in the Texas Woman's University (TWU) department of sociology, has designed a summer cultural camp that educates at-risk Mexican American seventh grade girls about their heritage and, she hopes, influences their academic lives.

The first camp was held in June.

"The camp is something I've always had in the back of my mind," said Garza, who teaches race relations at TWU. "The freedom schools of the '60s had such an impact on young black people, and they sparked my interest in setting up a similar program.

Garza immerses students in history, heritage, and culture by exposing them to an impressive group of speakers and performers in diverse areas, including Latinas in politics, Meshica dancing, Latino art, and activism.
Prioritizing Academic Programs and Services: Reallocation Resources to Achieve Strategic Balance
by Robert C. Dickson
Written in clear, straightforward language, this book outlines a step-by-step method for effectively reallocating resources. Academic leaders are guided through the process of ranking programs according to such critical factors as enrollment size and relevance to institutional mission.

CHANCELLOR

VANDERBILT UNIVERSITY

After processing Vanderbilt University's unique leadership over the past twenty years, Chancellor Joe B. Wyatt has announced his intention to retire July 1, 2000. The Vanderbilt University Board of Trust is initiating a national search to recruit the next Chancellor and invites nominations and applications.

Founded in 1875, Vanderbilt is recognized as one of the nation's finest independent, privately supported universities. Located on a beautiful 316 acre campus in vibrant Nashville, Tennessee, the University enrolls nearly 6,000 undergraduate and more than 4,000 graduate and professional students. An Association of American Universities (AAU) and Carnegie 1 Research institution, Vanderbilt comprises ten schools and colleges: College of Arts and Science, the Schools of Divinity, Engineering, Law, Medicine, and Nursing; Blair School of Music, Owen Graduate School of Management, Peabody College, and, the Graduate School. Vanderbilt employs 1,800 full-time and 1,200 part-time faculty and has an annual operating budget of $1.3 billion.

The Chancellor reports directly to the Board of Trust and is responsible for the effective management of the University. The Board seeks candidates who have unquestioned integrity, national international stature, exemplary leadership abilities, and strategic vision.

Please send applications and nominations of letter to the address below. Review of candidate materials will begin immediately and will continue until the next Chancellor is selected.

Book Review

by Isabel Schon, Ph.D.

Editor's Note: This is "Part One: Longtime Favorite Books: Recent Spanish Renditions for Adolescents" of a special, invited submission.

Spanish speakers around the world have always been avid readers of some of the world's best literature. The following recent Spanish renditions of popular and beloved works are sure to please lovers of fantasy, adventure, and science fiction. (Teachers and professors should note that even though I have indicated a tentative grade for each book, the individual student's Spanish reading ability, interest, taste, and purpose should be the main criteria for determining the true level of each book.)

Count Drácula is furious because Bram Stoker has just written a book accusing the Drácula family of being vampires. To clear his name, the Count writes his memoirs that abound in broken mirrors, unexplained nausea, an unsolved murder, and a fortunate escape. This fast-paced novel was written by the author so that his children would not be afraid of vampires or ghosts. The appropriately spooky, slightly cartoonish, earthen-like illustrations make this novel even more appealing to lovers of the fantastic.

Cooper's best-known work is now available in this dramatic Spanish rendition that perfectly captures the exciting and tragic adventures of Cora and Alicia Munro as they travel through the rugged terrain from Fort Edward to join their father, the British commander at Fort William Henry. Set in 1757, this fast-paced historical novel with lots of action and adventure amid love, loyalty, and courage among all peoples is just right to interest Spanish-speaking adolescents in the bloody French and Indian War and its struggle for control of North America.

Jack London's "other" dog story, first published in 1906, is now smoothly rendered in Spanish. It follows the adventures of Colmillo Blanco (White Fang), who, as the lone survivor of his litter, must learn to live on his own in the primal world of the frozen wilds of northwest Canada—and Spanish-speaking adolescents will empathize with Colmillo blanco, the wild half-wolf half-dog that must adapt to being a domesticated house dog in California after having survived as a wild creature on his own. Background information about the author and the novel is provided in a well-done appendix.

This fluid new Spanish rendition of the great pirate saga of John Silver "el Largo" and Jim Hawkins, the cabin boy who befriends him and then learns about the duplicitous and dark nature of some human hearts, will be especially appealing to Spanish-speaking adolescents. An appendix provides just the right amount of background information about the author and this now classic tale.

Written for his young son Michael upon the loss of his favorite dog toy, Rover, this little-known Tolkien story tells about Rover, a real dog, who is turned into a toy by a wizard. Numerous fantastic characters—dragons, a wise, old whale, the king of the sea, the man of the Moon amid fanciful settings and Tolkien's original illustrations will appeal to Tolkien devotees. This luxury edition, with an informative introduction, is beautifully rendered in Spanish.

According to the compiler, this anthology includes nine of the best science fiction short stories ever written. Considered classics by lovers of the genre, these well-translated stories are sure to please science fiction fans.

Be sure to visit the Center for the Study of Books in Spanish for Children and Adolescents' website at <http://www.csusm.edu/campus_centers/csb/>.

Dr. Isabel Schon directs the Center for the Study of Books in Spanish for Children and Adolescents and is among the founding faculty at California State University-San Marcos. Her honors include the 1992 U.S. Role Model in Education Award presented by the U.S.-Mexico Foundation, 1992 DeWitt Press Award from the American Library Association, and 1987 Women's National Book Award.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers' Guidelines.
**DIRECTOR**

**DIRECTOR OF THE FRIST CAMPUS CENTER**

Princeton University invites applications and nominations for the position of director of the Frist Campus Center. The Frist Center, currently under construction, will open in fall 2000. This $45 million facility (approximately 100,000 square feet) will include student activities and organization areas, a multipurpose room and performance space, two academic departments, academic and cultural centers, a library and reading room, classrooms and meeting spaces, lounges and spacious common areas, food services, a convenience store, student mail boxes, and other services. Reporting to the dean of student life, the director of the Frist Campus Center will direct the daily operations of the facility, in the areas of scheduling, event management, maintenance, custodial support, program activities, and marketing for the center; administer budgets, personnel evaluations, staff development and develop strategic planning for center; develop and monitor policies and procedures for areas of responsibilities. Work with student organizations, faculty, staff, and administrative colleagues in programming for the center and student life. Qualifications include a record of progressively responsible administrative experience (minimum 5 years) in a college or university setting with significant experience in student affairs, student life, student centers, auxiliary services, or comparable complex operations; strong organizational and management skills, including financial analysis, budgeting and facilities management, strategic planning, contract negotiation, staff supervision, writing and communication skills; demonstrated ability to work with students, faculty, staff, alumni, and campus visitors and commitment to the academic mission of institutions of higher education; a master’s degree in an appropriate academic or professional discipline is strongly preferred and a doctoral degree is desired.

Review of resumes and application materials will start immediately, and interviews will take place early in the fall. Applications and nominations will be accepted until position is filled. The successful applicant will start on January 1, 2000. Salary is competitive and commensurate with qualifications and experience. Applicants should submit a scannable (plain white paper with standard 12pt. font) letter of intent, resumes, and the names, addresses, and telephone numbers of four references to: Human Resources, Clio Hall/99-0425HHE Princeton University, Princeton, NJ 08544-5254. For more information on how to apply, please see our Web site at: http://webware.princeton.edu/hr/howtoapply.htm or call our Employment Opportunities Hotline at (609) 258-6130. An equal opportunity employer.

UNIVERSITY OF MARYLAND
College of Library and Information Services

Assistant, Associate or Full Professor in School Library Media

Search Extended

The College is seeking a full-time, tenure-track faculty who will have responsibilities primarily in the College’s School Library Media Program and also will have opportunities and responsibilities in other programmatic areas in the College. A doctorate in library/information science instructional and experience as a practicing school library media specialist will be considered advantageous.

The College is an ALA-accredited institution that offers a highly regarded program at the MLS and PhD levels. At the MLS level, the School Library Media Program is fully accredited by the National Council for Accreditation of Teacher Education through a joint arrangement with the College of Education and the Maryland State Department of Education. Graduates are qualified to assume a full range of positions in public and private schools.

Candidates should have an extensive understanding of the issues involved in designing, conducting, and managing school library media programs for the information age. They should have knowledge and expertise in the concepts and processes of teaching and learning, information access and delivery, and program administration (Information Power, Building Partnerships for Learning).

The appointee will be expected to develop and maintain an active research program to teach courses in a variety of topics related to the field, particularly the management of school library media programs, to advise Ph.D. and M.L.S. students, to have a commitment to professional service, and to work with students in their practicum experience.

The appointment covers 9-12 months each year with the opportunity for summer teaching. Rank and salary at appointment will be commensurate with qualifications and experience.

Applications will be accepted until appropriate candidates have been identified. Inquiries and applications should be sent to the Search Committee Chair.

Applications must be received by November 11, 2012, for a March 1, 2013, full consideration.

The University of San Francisco is an equal opportunity employer. Individuals with disabilities are welcome to contact the University’s office of Equal Opportunity and Affirmative Action as Employers to discuss potential accommodations in the application process to support individuals with disabilities. In particular, assistance needed is provided for the University’s transition plan.
PRESIDENT
Spokane Falls Community College
Spokane, Washington

The Board of Trustees of Washington State Community College District 10 invites applications and nominations for the position of President of Spokane Falls Community College (SFCC), one of three publicly funded education institutions comprising Community Colleges of Spokane.

At SFCC, the President is the chief executive officer and reports to the District Chancellor/chief executive officer. The Chancellor reports to a five-member Board of Trustees appointed by the governor for five-year terms. The Board, along with the Chancellor and SFCC administrators, selects an autonomous, visionary, and transformational leader who will guide the college in meeting the challenges of an era of changing expectations about community colleges and the nature of higher education.

SFCC enrolls approximately 5,100 students each quarter. The majority of students are working full- or part-time, are 25 years of age or older, and are nontraditional students. Most students are employed while in college, and many have families.

Application Information
Applicants must request a presidential search brochure which includes details about Spokane Falls Community College, opportunities and challenges at the college, a presidential profile, and application instructions, by contacting Ms. Mary Ann Slait, chair, SFCC President Search Committee, on the Spokane Falls Community College website (www.sfcc.edu) or by calling 509-922-4288.

Telephone: 509-922-3155 Fax: 509-922-3725
E-mail: karen@cc.spokane.cc.wa.us

The Internet address for Spokane Falls Community College is www.sfcc.cc.wa.us

**SUNY Alfred State College of Technology**  
**VICE PRESIDENT FOR ACADEMIC AFFAIRS**

The College: Alfred State College of Technology is one of five Colleges of Technology in the 64 unit State University of New York (SUNY). The College is located in the foothills of the Allegheny Mountains in Southwestern New York State. Alfred State is in transition from being primarily a two-year to both two-year and four-year. It offers a full range of technical programs spanning from the vocational technologies through engineering technologies, allied health, business, agriculture, and liberal studies. Approximately 2000 of the college's 3000 students reside in residence halls.

The Position: Reporting directly to the President, along with the Vice Presidents for Student Affairs, Academic Affairs, and Institutional Advancement, the Vice President for Academic Affairs is the chief academic officer responsible for creating and sustaining outstanding academic programs and a campus environment conducive to students' total development. In pursuit of these goals, this officer is responsible for three academic schools (Arts & Sciences, Management & Engineering Technology, and Vocational Technology) offering 70 different programs of study. Also reporting to the position are the offices of continuing education, learning assistance, and academic records, institutional research, information technology, and the libraries. The Vice President is responsible for a staff of about 250, of whom 125 are faculty, and a budget of over $10 million.

Requirements: Qualified candidates will hold an earned doctorate, have a record of increasing responsibility for academic leadership including experience as dean, the equivalent, or above, have college teaching experience and a record of professional activity. Candidates should demonstrate achievement in fostering diversity and sustaining a progressive campus environment. They should also demonstrate excellence in guiding significant numbers of people and managing extensive financial resources.

A collaborative environment exists at Alfred State. The successful candidate will have experience in cooperative team building, conflict resolution, and a history of implementing organizational improvement. The College seeks someone who can build consensus, successfully, guide change, and who is committed to promoting educational excellence. The Vice President will also have superior skills in written and spoken communication, knowledge and understanding of modern technology, and the abilities to develop good working relationships on and beyond the campus. Of particular importance is the ability to foster the development and implementation of new academic programs that meet the needs of students and employers of the 21st Century, particularly at the baccalaureate level, and to participate in a consortium or the five SUNY Colleges of Technology.

Application Process: To apply, submit a letter of interest, resume, and names, addresses, and telephone numbers of five references. This letter must be submitted to Ms. Carol John, Secretary to the Vice President for Academic Affairs Search Committee, Alfred State College of Technology, Alfred, NY 14802. Nomination letters are encouraged. Review of credentials will begin on September 1, 1999 and continue until the position is filled. Anticipated start date is January 1, 2000.

UNIVERSITY OF NEBRASKA-LINCOLN
DEAN, COLLEGE OF HUMAN RESOURCES AND FAMILY SCIENCES
The University of Nebraska-Lincoln invites applications and nominations for the position of Dean of the College of Human Resources and Family Sciences.

The University of Nebraska-Lincoln is an AAU Research I land grant institution with a distinguished tradition of teaching and research across the major disciplines. With a current enrollment of approximately 23,000 undergraduate and graduate students, it is designed as the principal research and graduate institution in the state.

The College of Human Resources and Family Sciences has three departments: Family and Consumer Sciences: Nutritional Science and Dietetics, and Textiles Clothing and Design. The College includes 50 faculty, 540 undergraduate and 100 graduate students, housed on two campuses.

The Dean is the chief academic and administrative officer of the College and should be a strong, visionary leader and spokesperson who is interested in building local and national linkages and a national reputation for excellence for the College. Applicants must hold the doctorate or the appropriate terminal degree. The successful candidate must have strong experience in teaching, research and outreach/extension, an administrative experience in budgeting, planning, and personnel issues. A comprehensive portfolio package is available on the Web site or from the address listed below.

The University of Nebraska is committed to a pluralistic campus community through affirmative action equal opportunity and is responsive to the needs of diverse student groups. We assure reasonable accommodation under the Americans with Disabilities Act. Contact Dean Richard Durst at 402-472-9339 for assistance.

The position begins as soon after January 1, 2000 as the appointee's schedule permits. The committee will begin screening applications on October 4, 1999, and will continue until an appointment is made. Nominations are solicited and applications, including letter of interest, resume, and contact information for at least three references who can speak to the candidate's current experience, should be sent to:

Rutgers Newark is an Affirmative Action/Equal Opportunity Institution.
AMHERST COLLEGE
DIRECTOR OF FOUNDATION RELATIONS

Founded in 1821 and located in the beautiful Pioneer Valley of Western Massachusetts, Amherst College is regarded by many as the premier liberal arts college in the nation. The Office of Development, Alumni & Parent Programs, and Public Affairs have a strong record of managing programs that enable alumni, parents, and friends of Amherst to understand and support the educational mission of the College. Amherst is in the final years of a successful $200 million comprehensive campaign and offers opportunities to join an Advancement team of experienced professionals.

Amherst College seeks a Director of Foundation Relations to work closely with faculty, the Dean of the Faculty, and colleagues throughout Advancement. Reporting to the Chief Advancement Officer and working closely with the Dean of the Faculty, the Director of Foundation Relations will be a senior member of the campus community who leads Amherst’s efforts to secure financial support from institutional funding sources, primarily foundations. The two principal objectives of the Director and his/her staff will be support for faculty research and scholarship and support for institution-wide initiatives from national foundations.

The successful candidate will possess a Bachelor’s degree (advanced degree preferred), three to five years of experience in higher education with experience in the development of major foundation proposals, strong interpersonal skills within a community of scholars, and extraordinary writing abilities. The candidate will also understand the principles and preoccupations of a dynamic Advancement team responsible for all the external affairs of an institution. An existing commitment to the power and value of a liberal arts education is highly desirable.

Inquiries, nominations, and applications (which should include a current resume and the names and addresses of three references) should be sent to: Office of Human Resources, Box 2204, Amherst College, Amherst, MA 01002-5000. Applications will be considered until the position is filled, with appointment as soon as possible. Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities, and disabled persons to apply.

COLUMBIA UNIVERSITY
DIRECTOR OF DINING SERVICES

Columbia University in the City of New York seeks a new Director of Dining Services. Reporting to the Executive Director of Business Services, the Director is responsible for the ongoing operations and continuous improvement of dining services at Columbia. Dining Services serves approximately fourteen thousand customers a day at six self-operated venues staffed with approximately 125 employees, and generates approximately $11 million in annual revenues.

As part of the University’s commitment to upgrade student quality of life, Columbia’s dining services operation has made great improvements in recent years. The central challenge for the new Director is to sustain the pace of improvement, optimizing both service and financial performance. Specifically, the Director will be responsible for the success of two brand new dining venues in Columbia’s recently opened 225,000-square-foot student center—Alfred Lerner Hall. She will be expected to take advantage of catering opportunities at Lerner Hall, and will work closely with the Executive Director of Business Services in an ongoing assessment of the structure of the board plan, including consideration of a continuous meal plan option.

Qualifications: The successful candidate will possess eight or more years of related experience. Significant management experience and service improvement with responsibility for a comparable budget and ambitious revenue targets is required. Strong customer service orientation and a proven track record of providing excellent service to demanding customers are required. A retail orientation and talent for marketing are desired. Experience working in an urban setting with a unionized workforce is also a plus. Bachelor’s degree required.

Send resume and letter with salary requirements to Lisa Savered or Rohin Sabichi, Isaacson, Miller, 334 Boylston Street, Suite 500, Boston, MA 02116-3805. Fax: 617-262-6509 Email: lsavered@imsearch.com or rsabichi@imsearch.com.

Minorities are especially encouraged to apply.

Columbia University is an equal opportunity / affirmative action employer.

GRAND VALLEY STATE UNIVERSITY
ADMISSIONS COUNSELOR

Grand Valley State University invites nominations and applications for the position of Admissions Counselor.

QUALIFICATIONS: Understanding of demographics, social, economic factors influencing student recruitment, enrollment and retention. Bachelor’s degree preferred. College/University admission experience preferred. Conversational Spanish language skills preferred.

RESPONSIBILITIES: Implement recruitment and outreach activities to Latino populations. Travel throughout the region to visit high schools and attend recruitment events, interview, corresponding, initiating contact with prospective students. Review admission applications. Evening and weekend hour required. Possible projects include management of student telescoping program and compilation of admissions research data. SALARY $25,000-$31,000

Send letter of application that specifically addresses how skills, education, and experience relate to the position description. Include a resume and a list of three references to: Andrea Marks, Grand Valley State University, Admissions-300 Student Service Building, Allendale, MI 49401. The review process begins immediately and the search will remain open until the position is filled, EEO/AA Institution.

MENTAL HEALTH
SR. PROJECT SPECIALIST

The University of Medicine and Dentistry of New Jersey is seeking a Senior Project Specialist within the direction of the Clinician Administrator for Training and Consultation Resources, to provide technical assistance, training, consultation, organizational and program planning activities, supervision, and direct clinical services to support operations and mission of the Behavioral Health Care Institute for Quality Research and Training, and Development. In consultation and support of program development, evaluation, and consultation, and/or program development activities, Applicants with a Master’s degree are required to have two or more years of related experience, and applicants with a Bachelor’s degree are required to have an additional four years of related experience.

Competitive salary and traditional noncontributory HMOs available. Send resume to: HR Dept. (999PS9354), UMENJ, Liberty Plaza, 3 Gevrey Street, P.O. Box 2888, New Brunswick, NJ 08903-2888. UMENJ is an Equal Opportunity Employer, M/F/D/V. Included in the University Health System of New Jersey. Regrettably, we respond only to those candidates chosen for interview. To learn more about us, visit our website: http://www.umenj.edu/hrweb/
DIRECTOR OF CHORAL ACTIVITIES

Colorado College again invites applications for a previously unfilled tenure-track appointment as Director of Choral Activities at the Assistant Professor level, beginning in August 2000. Primary professional responsibilities include directing and conducting the Colorado College Choir in major performances with orchestra, directing and conducting the Chamber Choir, whose repertoire includes various kinds of music such as classical, popular, jazz and gospel; and contemporary teaching a course in conducting and teaching one or two additional courses such as Introduction to Music, American Music, Interdisciplinary Topics, and African-American Music. Preference will be given to candidates with an interest in Chamber Music, or an area of the candidate's interest. Furthermore, candidates should possess a Doctor of Musical Arts degree from an accredited institution. Please submit a letter indicating your interest in Colorado College, along with a CV, three letters of reference, and a statement of teaching experience and philosophy by June 1, 1999. Colorado College, an equal opportunity/affirmative action employer, is committed to diversity and a multicultural environment. Women are particularly encouraged to apply.

Wheelock College Graduate School
Tenure-Track Faculty Positions

September 1, 2000
Summer Employment Possible

Wheelock College, a premier liberal arts institution preparing students for careers in education, law, social work, and health professions, enrolls approximately 500 students in its graduate degree programs. In its curriculum and as a community, Wheelock is committed to diversity and multiculturalism.

Elementary Education: Responsibilities include teaching courses in elementary education in one or both of its campuses, supervising student teaching experiences, advising graduate students and serving on the department's curriculum and personnel committees, and assuming other responsibilities in support of the department's goals. Teaching and mentoring responsibilities include a mix of traditional teaching and successful teaching experiences with diverse student populations and the ability to supervise and guide student teaching placements.

Teaching Students with Special Needs: Responsibilities include teaching courses in special education and special education and supervision of students and students with special needs. Successful candidates will be expected to design and implement educational programs for students with special needs, including students with severe disabilities, and to work with families and community agencies to support the education of students with special needs. In addition to teaching responsibilities, candidates will be expected to advise and mentor students, and to participate in departmental and institutional committees.

Required Qualifications: Earned doctorate or equivalent, demonstrated history of high quality teaching and research, and commitment to diversity and multiculturalism.

Please send a cover letter, curriculum vitae, and three letters of reference to:
Chair, Chair Search Committee,

The University system, strongly supported by the state for over 200 years, is entering a period of rapid growth, significant challenges, and great opportunity. For more general information about the University system, please consult the web site at www.gac.unc.edu

The Senior Vice President, Academic Affairs reports to the President and is the senior member of the President's administrative cabinet. The position is number two in the system and is charged with leading the development and implementation of the academic mission of the University. Among the challenging roles of the Senior Vice President are: (1) advising the President, providing leadership for the President's cabinet and advising the Board of Governors on academic affairs issues that have a system-wide impact; (2) leading strategic academic planning and the implementation of resulting policies affecting the system; (3) working closely with campus chancellors and chief academic officers on university-wide academic issues; (4) representing the University system on a broad array of related boards and councils, and (5) assisting the President in providing leadership to the University in building partnerships with business and other educational institutions.

In light of the complex and multi-campus responsibilities associated with this position, the successful candidate is expected to have:

... An earned doctorate in an academic field and credentials for appointment as a full professor with tenure in one of the 16 constituent institutions.

... A history of increasingly more responsible administrative leadership positions involving the management of complex campus environments or a multi-campus system.

... Experience with and commitment to strategic planning in a complex environment.

... Understanding of the research mission of a public university, and familiarity with the role of health affairs in such an university.

... Demonstrated support for academic excellence.

Experience in representing a university or multi-campus system effectively, with attention to its valued constituencies, governing boards, legislatures, and other external bodies.

Understanding of and experience with technologically mediated learning and distance education.

A thorough understanding of budgeting and funding processes.

A successful record of and commitment to promoting diversity.

The search committee will begin reviewing materials September 15 and will continue until the position is filled. It is possible that the position will be filled by November 1999, and the successful candidate will begin duties in January, 2000.

The search is being assisted by A.T. Kearney, Inc. Nominations and applications should be directed to Ms. Shelly Storbeck, Managing Director, Education Practice, A.T. Kearney, Inc., 333 John Carlyle Street, Alexandria, VA 22314. Phone: 703-739-4627. Fax: 703-518-1782. Email: shelly.storbeck@atkearney.com

The University of North Carolina is an Equal Opportunity/Affirmative Action Employer.

BENTLEY COLLEGE
THE BUSINESS SCHOOL FOR THE INFORMATION AGE

At BENTLEY COLLEGE, the focus is on business, people, and technology. Nearly 4,200 undergraduates, 1,600 graduates and 2,500 continuing education students learn in an environment that integrates information technology with a broad business and liberal arts curriculum, gaining knowledge, skills and experience for careers in a global economy. Bentley is located in Waltham, Massachusetts, 10 miles west of Boston.

ONE TENURE TRACK POSITION BEGINNING FALL 2000

Assistant Professor of Management

We currently have one tenure track position available in our Management Department, for teaching and scholarship in the general area of Strategic Management. Candidates for the position should have completed, or be near completion of, a Doctorate degree and demonstrate a strong commitment to teaching, scholarship, and citizenship in a learning community. Candidates must have an interest and facility in using technology to teach undergraduate and graduate students to conduct scholarly research.

Interested applicants should forward a letter of commendation, curriculum vitae, and complete contact information to the Search Committee, Management Department, 237 AXH, Bentley College, Waltham, MA 02255. Applications should be received by October 15, 2000.

The University of North Carolina is an Equal Opportunity/Affirmative Action Employer.

Vice President
for Information Services

West Chester University of Pennsylvania invites applications and nominations for the newly established position of Vice President for Information Services to serve as the Chief Information Technology Officer of the University.

West Chester University is a comprehensive University of nearly 12,000 students with 1,400 faculty and staff operating under collective bargaining agreements. WCU is located at the western edge of the Philadelphia metropolitan area. The campus is a mainframe with a campus-wide LAN with over 700 nodes and networked PC's NT, Mac, and UNIX workstations. The campus is moving to a client/server environment and all campuses are connected via a fiber optic backbone. The Vice President for Information Services reports directly to the President of the University as an integral part of the University's executive management team. A Master's degree is required; PhD or a suitable doctoral degree is preferred. To be considered as a finalist candidate must successfully complete the interview process.

The University is actively building a culturally diverse academic community, which fosters an inclusive environment and encourages a broad spectrum of candidates, including women, people of color and people with disabilities to apply. For more information about the University and to see a more detailed description of the position, visit our web site at www.wcupa.edu/vacycles.

The University of North Carolina is an Equal Opportunity/Affirmative Action Employer.

The entrance salary is in the range of $90,000, depending on qualifications and is negotiable. Excellent fringe benefits. Applicants must submit a letter of interest describing relevant professional accomplishments, a current resume and names and addresses and telephone numbers of at least three references to Ms. Valerie H. Dudley, Employment Manager, c/o Vice President for Information Services, Search Human Resource Services, 201 Carter Drive, West Chester University, West Chester, PA 19383. Phone: 610-436-2800. Fax: 610-436-3464. Applications will be handled confidentially. Review of applications will begin on September 15, 1999 and will continue until the position is filled.

The University of North Carolina is actively building a culturally diverse academic community, which fosters an inclusive environment and encourages a broad spectrum of candidates. Including women, people of color and people with disabilities to apply. CHAIRPERSON, DEPARTMENT OF ECONOMICS AND FINANCE
COLLEGE OF BUSINESS ADMINISTRATION
St. John’s University in New York, invites nominations and applications for Chair of the Department of Economics and Finance in the College of Business Administration. The position will be available Fall 2000. We are seeking a dynamic individual with excellent leadership skills who will:
1) Develop and effectively implement a departmental strategic focus,
2) Facilitate faculty development and curriculum innovation,
3) Encourage faculty involvement in grantsmanship and in distance learning, and
4) Enhance the department’s position with the College, University and business communities.
Candidates must have an earned doctorate in finance and/or an excellent research publication record in the field, administrative experience and an academic record of teaching and service sufficient to qualify for the rank of professor of finance in the College of Business Administration. Salary and tenure possibilities depend on the candidate’s credentials.

Review of applications will begin immediately and continue until the position is filled. Please send a letter, curriculum vitae and the names of three references to:
Chair, SJU Perez-Arton Consultants, Inc.
23 Spring Street, Suite 304
Garrison, NY 10524
St. John’s is an equal opportunity employer and encourages applications from women and minorities.

Full-Time Positions Available
At One Of The Nation’s Leading Community Colleges

FACULTY
• Master’s in Library Preparation
• Biology/Microbiology
• Library
• Air Conditioning

SABB Three-year leaves are available in the area of instruction in residence, with or without salary, to qualified librarians on full-time staff. To receive these grants, librarians must be on full-time staff and must work for a minimum of 10 years, and must have 5 years of full-time library experience. Applicants are required to submit a written statement of purpose and a letter of recommendation. Non-FACULTY

• Data Base System Analyst, Senior
• Senior Programmer

• Webmaster

• Director of Instructional Design

Recruiting for each of the chair positions will begin immediately and will continue until the positions are filled. Applications should be sent to:
Brevard Community College
Office of the President
2151 Clearlake Road
Box 11
Cocoa, FL 32922-4077.

ALICO CHAIRED PROFESSORSHIPS
IN BUSINESS

The College of Business at Florida Gulf Coast University, America’s newest public university, invites applications for three chaired professorships in: Operations Management, Finance, and Marketing. Founded with support from the Allico Corporation, these three faculty positions will be important additions to a rapidly growing business school which opened for classes in Southwest Florida in 1997 as part of Florida’s tenth state university. The College has 30 faculty members and offers a full range of undergraduate business degrees and an MBA, MS in Information Systems and MS in Accounting & Tax degrees at the graduate level. Allico, Inc. is one of Southwest Florida’s largest and most successful corporations, with interests in agribusiness and land development. The three professorships are open to associate and full professors, with renewable 12-month multi-year contracts. In the following areas:

The Allico, Inc. Chair in Operations Management & Strategy in honor of Ben Hill Griffin, Jr. REQUIRED: Earned Doctorate in Operations Management, or a related field, such as Decision Sciences or Information Systems. The ideal candidate will have interdisciplinary interests in agribusiness research area (for example, operations strategy, information systems, production planning and control, resource allocation, value chain analysis, application of OMT techniques, statistical analysis, quantitative methods, etc.) Position #30190

The Allico, Inc. Chair in Financial Management & Planning in honor of Ben Hill Griffin III. REQUIRED: Earned Doctorate in Finance, or a related field. The ideal candidate will have experience creating Finance courses, program initiatives, interdisciplinary scholarship initiatives; enhance the College’s reputation for research and programs linking the academic and business communities with an emphasis on resource management. Strength in the use of technology as a financial management tool and in instructional activities is valued. Interests in national and international agribusiness issues is an asset. Position #30189

The Allico, Inc. Chair in Market Development & Analysis in honor of Dr. W. Bernard Letter. REQUIRED: Earned Doctorate in Marketing, or a related field. The ideal candidate will focus on evaluating and pursuing market opportunities with interests in research and teaching areas such as marketing strategy, market research, demand estimation, market planning development, among others. Interest in agribusiness issues is considered an asset. The ideal candidate will have experience or a commitment to interdisciplinary business education and research and experience in the use of technology as a pedagogical and professional decision making tool. Position #30191

Recruiting for each of the chair positions will begin immediately and will continue until the positions are filled. Applications should be sent to:
Brevard Community College
Office of the President
2151 Clearlake Road
Box 11
Cocoa, FL 32922-4077.

APPLICATION PROCESS: To submit two official original and one copy are required for each position. Each package must include a letter of interest, curriculum vitae, and list of five references postmarked by December 1999 for the position. Additional information about the above positions can be obtained by visiting our website at http://admin.fgcu.edu/hr/index.html or calling our 24-hour hotline at 941-590-7111. Mail materials to FGCU, HR Dept. Position # (state the position # for which you are applying), 10501 FG Blvd. South, Ft. Myers, FL 33965-6565.

FGCU is an Equal Opportunity/Equal Access/Affirmative Action Institution which has a commitment to cultural, racial, and ethnic communities and encourages women and minorities to apply. It is expected that successful candidates share in this commitment.
Executive Director - GMAT
(Graduate Management Admissions Test)
Princeton, New Jersey Office

Educational Testing Service, the world's largest private nonprofit educational assessment and measurement institution, has an excellent opportunity for an Executive Director-GMAT to join our team at our corporate offices located in Princeton, NJ.

The Executive Director serves as the principal liaison to the Graduate Management Admission Council (GMAC), an independent nonprofit organization that provides graduate management education services worldwide. One of these services is the GMAT, which ETS administers under contract with the Council. The Executive Director manages all ETS staff and oversees all ongoing ETS services involved with the GMAT.

Leading candidates will be familiar with issues in graduate management education and have experience in managing client relationships, staff, and large, complex projects. This position reports to the ETS Vice President for Graduate and Professional Education and supervises 15-20 staff.

Korn/Ferry International, which is assisting ETS with this search, invites confidential inquiries. Nominations, applications, and requests for additional information should be directed in total confidence to John Kubale-Managing Director, Korn/Ferry International, 900 19th St., NW, Suite 800, Washington, DC 20006, Tel: (202) 955-0919; Fax: (202) 822-8127; E-mail: anne.reich@kornferry.com.

ETS, an AA/EEO Employer, actively encourages the candidacies of women, minorities, and underrepresented groups.

www.ets.org

Sr. Extension Associate - Poultry Extension Veterinarian

The New York State Diagnostic Laboratory at Cornell University seeks a veterinarian with experience in quantitative epidemiology, poultry health and poultry biosecurity.

Position Description: Serve as the liaison between the NYS poultry industry, the NYS Department of Agriculture and Markets and Cornell University on poultry health matters.

Duties: Manage the operation of the following established poultry health programs: 1. New York State Egg Quality Assurance Program (NYSEQAP): An integrated management-based program designed to detect, control and eliminate Salmonella enteritis in commercial layer flocks. The applicant will be required to evaluate the effectiveness of the program and adjust program interventions as new technology and information becomes available. 2. Avian Influenza Surveillance and Control Program: Designed to monitor the avian influenza status of poultry supply flocks and other fowl that contribute to the viable live-poultry market industry. The applicant will be required to assess the risk posed by circulating viral subtypes and to institute appropriate control measures to protect the health of the New York poultry industry. In addition, the applicant will be required to evaluate emerging health issues that threaten the poultry industry and develop and implement appropriate measures to mitigate those risks.

Qualifications: A master's degree and a DVM (VMD) or equivalent degree is preferred. Advanced training and experience in epidemiology or poultry infectious disease is desired. The applicant must possess strong communicative skills and be adept at formal and informal presentations. Participation in the development and evaluation of national poultry health programs will be required.

Salary will be based on qualifications and experience. All correspondence should be directed to and additional information can be obtained by contacting Dr. Donald Lein, Chairman of the Department of Population Medicine and Diagnostic Science, Cornell University, PO Box 5782, Ithaca, NY 14853-5782-phone (607) 253-3903 EOE/AA
The Florence Heller Graduate School for Advanced Studies in Social Welfare

BRANDEIS UNIVERSITY

Director of the Family and Child Policy Center

We are seeking an individual of exceptional promise with the following attributes:

- A creative mind and breadth of vision that values the intersection of academic, research, social policy, and service delivery on behalf of children and families.
- Leadership capacity to build a center of excellence.
- Strong research skills, interest in interdisciplinary investigation, and demonstrated capacity to design, conduct, and sustain grant-funded projects.
- Strong commitment to teaching and mentoring graduate students.

Candidates must hold a doctorate degree or the equivalent and demonstrate evidence or strong scholarly productivity in child and family policy. Level of faculty appointment, option for tenure track, and compensation will be determined by qualifications and experience.

Applicants will be considered from a broad range of disciplines, including but not limited to: pediatrics, sociology, political science, education, economics, and social policy. Submit a letter of intent and curriculum vitae to: Michelle Hernandez, Heller Graduate School, Brandeis University, PO Box 9110-MS 055, Waltham MA 02454-9110

UNIVERSITY OF FLORIDA

ASSISTANT PROFESSOR AGRONOMY

The University of Florida, Everglades Research and Education Center (ERECh) in Belle Glade seeks applicants for a tenure-track, 12-month faculty position that is 50% research and 50% extension. Tenure will accrue in the Agronomy Department. The primary emphasis of this position will be to assist in the design, development, and testing of sugarcane varieties. The successful candidate will be responsible for a specific stage of testing in the cooperative sugarcane breeding program at the USDA Sugarcane Field Station at Lake Wales, FL. Additional research and extension activities will include field evaluation and demonstration of sugarcane cultivars for various environment-influenced responses including maturity, chemical, and pest control. To apply, send a letter of application and curriculum vitae, official transcripts of all college work, and three letters of reference to: Assistant Professor A. Ball, Agronomy Department, University of Florida, 1006 Agronomy Building, PO Box 110340, Gainesville, FL 32611-0340. Applications will be accepted until the position is filled. Review of applications will begin October 1.

UNIVERSITY OF MARYLAND

ASSISTANT/ASSOCIATE DEAN FOR UNDERGRADUATE STUDIES

(Second Position)

The University of Maryland at College Park invites applications and nominations for the position of Assistant/Associate Dean for Undergraduate Studies. The Assistant/Associate Dean reports directly to the Associate Provost for Academic Affairs and Dean for Undergraduate Studies and works closely with the Dean and with other program directors, assistant deans, and with the faculty. The successful candidate must be able to function effectively as a member of a team that works to advance the mission of Undergraduate Studies.

Candidates should have demonstrated commitment to undergraduate education, leadership abilities, and proven management skills. Candidates must have: (1) An earned doctorate or other terminal degree, (2) an ability to communicate effectively with students, faculty, staff, and parents, (3) teaching experience at the undergraduate level, and (4) demonstrate an understanding of and a commitment to the philosophy and mission of Undergraduate Studies. Salary and rank will be commensurate with experience. The appointment is a full-time, five-year renewable appointment. The position will be available after September 1, 1999. Application package should include resume or vita, letter of application addressing qualifications and interest for the position, and list of names, addresses and phone numbers for at least three references.

For best consideration, all materials should reach the committee by August 19, 1999. Send application material to: Assistant/Associate Dean for Undergraduate Studies-Search Committee Office of Undergraduate Studies 2130 Mitchell Building College Park, MD 20742

*Rank will be determined by successful candidates' qualifications in accordance with University Regulations regarding Assistant/Associate Deans.
I PUNTO FINAL!

ENDING STUDENT SEGREGATION

I once interviewed at one of the most diverse universities in the U.S. for the post of assistant VP for minority programs.

The job reported to the student affairs VP, who told me that he was the architect of most of the structures intended to "integrate" the university. This assistant VP would supervise the directors of several exclusive programs, services, and events designed for each of the campus minority groups—and that they sought someone with experience in managing a racially and ethnically diverse collection of directors and someone who could articulate both in speech and in writing, the importance of these "multicultural programs" to the university community. I was convinced that his efforts to "integrate" the university were sincere.

I met, too, with the new provost/executive VP who expressed the university's interest in promoting "diversity and multiculturalism," expressed a deep desire for a day when intergroup competition for recognition and resources would end, and, finally, spoke of his personal desire for improved intergroup relations on campus. "The key," he said, "is for you to convince the search committee that you can be trusted with minority interests." The student affairs VP, he said, was under a lot of pressure from minority interest groups to hire the "right person" for the job.

My interview with the search committee, a mix of faculty, staff, and students representing the racial and ethnic associations on campus, was remarkable because it revealed to me the level of coercive power that minority advocacy groups have over senior administrators. The interview focused on my relevant experience and then on my ability to treat all the groups equally and fairly.

It would not be difficult for me to be open and fair, I said, because I had no allegiances to any racial, ethnic, or religious group. Pressed to explain, I told them I was a nonracial person with no particular ethnic, political, or religious identity. Several committee members were visibly angry. Others seemed puzzled. One declared that "there is no such person in America" and suggested I was in denial. This interview did not go well. Later I was told I had alienated almost everyone on the committee.

My interview with the president was the most remarkable of all because it revealed the most about diversity efforts in contemporary academia. We toured the campus. As we walked, he pointed out what he called the "self-segregation" of students to the extent that, he said, even Latinos were fragmenting into "black, brown, and white" subgroups. He asked what I thought was promoting this phenomenon. Our exchange went something like this:

"Why do you think," he asked, "there is so much self-segregation on campus, and what do you think can be done to reverse this trend?"

"Please explain to me how your faculty and staff behave on campus," I asked.

"Just like the students," he replied. "In fact, we have the student equivalent of all the racial and ethnic associations of the faculty and staff. And they jointly plan and develop all of the programs, services, and events for minorities on our campus."

Realizing what I was getting at, he asked, "Do you mean to suggest that our faculty and staff are responsible for the segregation of our campus?" He paused, and then said, "But of course—they create all of the structures in the form of programs, services, and events that you are suggesting fragment and segregate the campus."

As we walked, he pointed out faculty and staff segregation on campus, including many examples of the segregation of Whites.

"Who are the role models on campus?" I asked. "Faculty and staff," he replied. "So you are suggesting that changing faculty and staff behaviors to reflect the desired goal of integration will change the students' behavior?" he asked. "Yes, isn't that the way it's supposed to work?" I said. "That makes sense," he remarked.

Then he dropped a bombshell. "Say, do you think that faculty and staff themselves do not feel comfortable in diverse settings and that they design these programs for their own comfort?"

"Why else?" I replied. "Isn't that the reason why many departments in the university remain all-white?"

"Well, it's going to be very difficult to change the current situation on campus," he replied. "The interest groups are very entrenched and will fight any attempts to change them."

"It requires visionary and courageous leadership in order to begin the conversations that will eventually lead to change," I concluded.

His last words were, "I'd like to see you become president of a state university one day, just to see how you do it and how long you survive in the job."

I did not get the job. But the experience helped convince me that "self-segregation" among our students will end only when all faculty and staff model the appropriate behaviors for students to emulate. And that the persistence of this phenomenon can be linked to the lack of visionary and courageous leadership in our universities and colleges.

America’s Love Affair with Science

BY GUSTAVO A. MELLANDER

This remarkable twentieth century of the Christian era has been influenced by many factors. Progress has invariably been linked with the American Century. People differ when asked to identify the three most important characteristics of this century. But on just about everybody’s list will appear the importance of science.

America and Science

The National Science Foundation reports that while America’s interest in science continues to grow, our actual understanding of scientific terms and concepts still lags.

Americans say they are more interested in and more aware than ever of scientific discoveries, inventions and new technologies. However, they still score low on their actual understanding of basic scientific terms and concepts, such as the definition of molecules and DNA, and how frequently the earth revolves around the sun.

The public also seems divided intellectually and emotionally over the impact of some technological developments. Many still have a childlike faith in the majesty of science. Others are more circumspect and know that scientists are no better qualified to lead us in the twenty-first century than the rest of us.

The latest survey measuring public attitudes and understanding of science, engineering, and technology has been published in the National Science Board’s (NSB) biennial report to Congress.

The report, a large volume of vital statistics on the state of science, engineering, and technology in the United States, is written so that the lay person can understand. It provides hours on end of fascinating data.

Questions

American adults were asked nine basic questions. On a zero-to-100 scale, their mean score was 55. Survey-takers scored worst on a question about their understanding of what a molecule is. They scored best on their understanding of how the continents are moving slowly about on the face of the earth.

“The American public believes that science and technology improve the quality of life, but its concern over specific technologies, such as nuclear power for electricity and genetic engineering, indicates that the public has not given science a blank check. And the scientific community needs to communicate its work more clearly and effectively because only one in four Americans understands the process of scientific discovery,” said Neal Lane, outgoing NSF director.

Other Findings

Nearly 70 percent of Americans surveyed said they are interested in science and technology, the highest level ever. Clearly, science remains a growth area for those seeking a productive and fulfilling career. Sadly, Hispanics, as a group, lag in their rate of participation.

Meanwhile, the number of Americans who think they are well-informed about new scientific discoveries and the use of new inventions and technologies is one in five. Many academics feel that the “watering down” of our hard science courses in high schools and colleges is to blame. But these scores, low as they might be, are actually an improvement compared to those of earlier years.

American adults appear to understand basic scientific concepts as well or better than adults in other industrialized nations, in contrast to results produced by some American students in the Third International Mathematics and Science Study (TIMSS).

Computers and Progress

The marvel of computers and the World Wide Web has facilitated a wealth of information only dreamed of by previous generations. Many have joyfully proclaimed that by the easy sharing of knowledge, all people will benefit. But has that been the case?

This report notes that while there is a continuing rise in the use of computers in the workplace or at home across the general population, the biggest increase by far over the last two years has been among those with at least a bachelor’s degree.

We did not need this report to know that Hispanics are not as yet “plugged in.” As always, the poor and the yet-to-be educated in our society have not personally benefited from this scientific revolution. The failure has dashed the hopes of many who truly believed that computers would equalize learning opportunities. That might yet come to pass, but so far only the most privileged in our society are benefiting—not every one.

Still, the impact of information technologies on the economy and education and on private citizens is now so vast that a new chapter was written to assess the issue. The report finds that the use of these technologies in the workplace is pervasive but that there are significant inequities in access to computers and the Internet in schools. The suburbs are doing okay. It’s the low-income areas that languish.

“We should be concerned about these inequities in our schools,” said Shirley Malcolm, chair of NSF’s education and human resource committee. “It is crucial that our schools have consistently modern tools together with quality content and that teachers get the training needed to instruct students using these technologies.”

Dr. Mellander is a professor at George Mason University.
Support included a broad cross-section of Agency activities, including 32 Fulbright students and senior scholars in a wide range of subject fields going to or coming from HSIs.

A dventure, education, hosting professionals from overseas, and foreign travel! What more could anyone ask for? What person in higher education would not be interested?

The United States Information Agency, commonly recognized by its initials USIA, offers these opportunities and more.

The Agency
Thousands have benefited from the hundreds of programs it has sponsored. It has served as a conduit for academicians from throughout the world to reach goals and ambitions that many did not even know they had until they were introduced to the wide variety of available programs.

The best known are probably the various Fulbright programs. Not only do they provide a variety of useful educational experiences, but for the recipient, being awarded a Fulbright is perceived as a prestigious achievement.

With all the opportunities that seem to exist, many persons are surprised to discover that many of USIA's programs are specifically designed for and offered to populations outside the United States.

The Agency's raison d'etre tells it all. It is committed to two goals—to present America's culture, people, and policies to other countries and to increase America's understanding of foreign cultures and peoples.

Exchange Programs
The United States started its international cultural and exchange programs in 1938, a few years before America's entry into the Second World War and its initiation as a major player in world affairs.

But its real impact on practitioners and scholars exploded after the war.

One of the memorable early post-war programs still in existence is the Fulbright program.

The planning and logistics of such a program are a mammoth undertaking. The ability to accommodate such a number of exchanges to and from other countries of the world has been possible through the aid of numerous partners.

The higher education academic community, U.S. private organizations, foreign governments, and American volunteers have facilitated what the master of Oxford's Pembroke College called "the largest and most significant movement of scholars across the face of the earth" since the fifteenth century.

Support for Hispanic-Serving institutions
Several sections of USIA have been pro-actively seeking ways to reach out to Hispanics in this country. For FY 1998, USIA provided more than $1.7 million to Hispanic-serving institutions. Support included a broad cross-section of agency activities.

- 32 Fulbright students and senior scholars in a wide range of subject fields going to or coming from HSIs.
- mini-grants for 11 other visit-
ever before, there is a host of programs that U.S. Hispanics can seek out.

The Fulbright Program

Among the best known are the Fulbright programs. But others, such as the International Visitor program, Youth Exchange, and Citizen Exchanges provide academic and enrichment opportunities as well.

The Fulbright itself is the major component of USIA's exchange activities. Its fields of study include the arts and humanities, social sciences, and physical sciences. In addition to the exchange of students and scholars, the program includes professional exchanges in journalism, law, management, banking, and public administration. Participants undertake degree or non-degree programs, self-study courses, internships, and professional seminars. Approximately 5,000 grants are awarded annually to American and foreign students, teachers, and scholars to study, teach, lecture, and conduct research abroad and in the U.S. Individuals are selected based on academic or professional qualifications and potential. But the ability and willingness to share ideas and experiences with people of diverse cultures are also important criteria.

Two Categories

The U.S. Scholar Program sends more than 1,000 U.S. scholars and professionals each year to more than 100 countries, where they lecture or conduct research in a wide variety of academic and professional fields, ranging from journalism and urban planning to music, philosophy, and American studies.

Pre-doctoral Fellowships are offered both to U.S. and foreign graduate students. Each year, USIA funds approximately 1,400 new awards to foreign graduate students for support at U.S. universities, while renewing for an additional year another 1,800 existing awards.

The awards are competitive but not impossible to achieve. Hispanic Outlook was told that, invariably, the successful applicants have worked closely with their local university grants officer who is very knowledgeable about Fulbrights. Staff from USIA also frequently visit U.S. universities with ideas and suggestions.

Broadcasting

The well-known Voice of America (VOA), Radio y TV Martí, and the WORLDNET televi

sion actively tell America's story around the clock to virtually all corners of the world. VOA, for example, broadcasts 660 hours of programming weekly in 53 languages, including English, to an international audience. Radio y TV Martí, established in 1985, broadcasts 24 hours a day in 10 languages, including English, to the Caribbean. WORLDNET, USIA's satellite television network, transmits news, educational, and cultural programs 24 hours a day to millions of foreign viewers through American embassies. USIA posts and foreign television and cable networks.

Cyberworld

USIA has plunged headlong into the electronic revolution. New scholars throughout the world can access a wide variety of useful information from their individual campuses or home computers.

USIA has been aggressively establishing itself in the world of cyberspace. Its Web site at http://www.usia.gov contains information on virtually all aspects of the Agency's activities. Include are:
• academic, cultural, and exchange programs;
• the "Washington File" texts, transcripts, and analyses;
• agency publications and research findings;
• Voice of America correspondent and media reaction reports;
• background on international conferences;
• thematic and policy sections;
• information on USIA Foreign Press Centers;
• current events and hot topics;
• links to Internet resources and databases; and
• overseas-post home pages and background on USIA.

That Web site is an excellent place for all of us to begin. It provides useful data to understand all of the opportunities that exist at USIA.

Recently USIA developed its first CD-ROM, The U.S. Academic Explorer: A Guide to Higher Education in the United States. It offers foreign students and those who advise them practical information on visas, qualifications, costs, application procedures, and other useful information on American higher education.

Much of this material might be available in booklet form, but this CD-ROM portrays the American college experience in photographs, sound, and video. There are, for example, video interviews with foreign students talking about their experiences in this country. Included is a photo essay on a day in the life of a student. A map of a typical U.S. college campus where the viewer can click on such typical buildings as the library, student union, or classroom building provides easy links to those sites. Beyond those introductory segments, useful first-hand information about their role as a student in university life is explored.

Democracy in Action
American scholars, particularly those with an interest in Latin America, will be interested in one of the USIA's most recent initiatives, which deals with presenting civic education to emerging democracies.

In 1996, USIA co-sponsored "Ciutada Panamericana: Education for Democracy" in Buenos Aires, Argentina. It brought together, from throughout the Americas, leaders in civic education, nongovernmental and governmental organizations, and the private sector.

More than 300 participants came from 20 Western Hemisphere countries to the conference, which was designed to maximize interactions and open discussion among participants. Small-group sessions as well as plenary sessions of speakers and panelists provided a variety of experiences.

Central issues and themes included, among others, Promoting Democracy in the 1990s: The Challenges Facing Civic Educators: The Role of Media in Building a Civil Society; and Economic Development and Democracy.

A Civitas-planned spin-off was to develop civic education curricula that would focus on reform projects. Presently, it is in progress in several countries. In that way, USIA achieved the primary purpose of its conference—to encourage an international network among the participants to strengthen democratic life in Latin America.

Educational and Cultural Programs
Aside from the Fulbright programs, USIA is also well known for its educational and cultural programs, which range from artistic performances to book translations to lectures about America to the teaching of English, all offered outside the United States.

These programs inform people about America's political, economic, and legal systems. Often they go one step further and assist their own democracy-building efforts.

The Arts America program enables people abroad to experience the vitality of the American arts and the diversity of our society. It provides specific information suited to an individual's professional or academic needs, and also introduces American literature and thought.

Many U.S. scholars have participated in Arts America. It showcases the creative arts through visual arts exhibitions, performing artists, performing arts groups, and speakers.

It is well to note that Arts America does not accept applications from U.S. individuals or institutions seeking financial assistance for overseas touring. Its arts programming is developed in response to requests from USIA offices overseas, not from requests made by American artists. Some would see a Catch 22 issue here, especially for an emerging group or artist.

The Future
USIA's involvement with the White House Initiative on Educational Excellence for Hispanic Americans will, it hopes, increase activities with America's Hispanic-serving institutions. To achieve its goals, the Agency will seek increased HSI dollar support in each of the next two fiscal years.

Special mailings were sent to HSI presidents and program directors encouraging them to apply to host Fulbright scholars from abroad. A USIA Washington, D.C., workshop on college and university linkage opportunities took place in September 1996, with a number of HSI institutions in attendance.

Since September 1996, USIA staff have participated in ten statewide and regional community college conferences across the United States. They provided information and technical assistance regarding grant opportunities, including opportunities in the international education field.

Check out USIA's Webpage at <http://www.usia.gov>, or call or e-mail for more information. In collaboration with other colleges in your region, invite USIA to visit your campus and explain its programs. Volunteer to host international visitors. Talk to your campus' grants officers, and tell them of your interest in USIA programs.

Dr. Mellander is a professor at George Mason University.
St. Augustine College: Pioneer in Bilingualism

Student Population 92 Percent Hispanic

BY MARILYN GILROY

Nineteen years ago in the city of Chicago, Dr. Carlos Plazas had a radical idea: why not create a bilingual college that would graduate professionals who would be fluent in English and Spanish? In other words, how about offering higher education in dual languages that allow Spanish-speaking students to become proficient in English and English-speaking students to become proficient in Spanish as they study liberal arts, business, social work, and computer science? That radical idea was authorized by the Illinois Board of Higher Education on October 7, 1980. and St. Augustine College opened its doors to the first 240 part-time students. Today, the college has four sites serving 1,600 full-time students through its academic, occupational, and college preparatory programs.

Dr. Plazas, the college's founding and current president, was instrumental in lobbying for the support and initial legislation that would create it. A psychologist by training, at that time executive director of a mental health clinic in Chicago, Plazas began to document the numbers of Hispanic individuals who showed up at the clinic, not as he says, "because they were mentally ill" but because they needed help getting education and adjusting to life in the United States.

Plazas knew from demographic projections that this population would continue to grow and would have to be educated in order to lead better lives and become productive workers. He was deeply concerned that statistics showed Hispanic Americans to have the lowest rate of educational persistence on every step of the educational ladder. Plazas and other founders of the college recognized that Hispanics needed an opportunity to acquire the skills, knowledge, and values that would enable them to become active participants in the workforce. They began to approach state officials, who listened to the idea for a new college and asked Plazas for a written proposal. The result was St. Augustine's, the country's only college chartered as a bilingual institution of higher education.

Today, St. Augustine's still holds a unique position among the hundreds of institutions now offer English-as-a-second-language (ESL) programs or other bilingual studies. Unlike colleges where non-English-speaking students must pass several semesters of English before they enroll in credit courses, St. Augustine students are taking introductory college courses taught in Spanish while they are learning English. There are no language b
and families and also had transportation concerns, explains Plazas. "But they were highly motivated to learn. So we created satellite centers close to their homes where they could begin their studies."

And the strategy worked. When the opportunity was put in people's backyards, they were more willing to try it. However, as Melba Rodriguez, director of development and public relations at St. Augustine, says, the ultimate goal is to ensure that students transfer to the main campus for a more traditional college experience.

"We want them to get a sense of what higher education in the United States is like...a large college campus with additional services and programs," says Rodriguez.

After tackling the transportation issue, the college also examined the need for additional support services. With an enrollment that is 92 percent Hispanic and 75 percent female, many of whom are parents, it was obvious that childcare was a must. So while parents are attending classes, the college provides childcare to approximately 800 children. But this is childcare with a special emphasis in addition to providing an important service to parents. St. Augustine College is committed to enhancing the children's learning attitudes and to fostering new attitudes toward education. With this enrich educational intervention, the college expects to prevent school failure, to decrease dropout rates and to improve school persistence and completion among children of Hispanic descent.

All of this attention to special services was an attempt on the part of St. Augustine officials to carry out a recruitment philosophy that boldly challenges individuals with the slogan, "We give you no excuses not to get an education."

That doesn't mean that academic standards or requirements are lax. The faculty and administration also know that they must instill the discipline in students that they need to succeed; therefore, attendance in class is mandatory.

"We believe that students need discipline in order to learn, and we are very much a 'learning institution,'" says Plazas. "Students must understand that there is a relationship between how much they learn and their attendance at class."

There are consequences for those who do not heed the attendance policies, and students are forewarned that cutting class could result in a loss of scholarships or financial aid.

"Our students must learn that it takes discipline to succeed," says Plazas.

If the success of this approach can be measured in numbers, then 18 graduates have received Ph.D.s.

"What is so amazing and unique about St. Augustine," says Rodriguez, "is that we take a primarily adult, female population with children and help them become wage earners. We say to them, 'You can get an education, and we will show you how.'"

"These are not people on welfare. They are either improving their current job status or going into the workforce," she adds.

Some of their success stories read like a page from the American dream. For example, Hilda Salaksana, mother of three, who came to St. Augustine's to get a degree, even though she had minimal English language skills. Salaksana completed her studies and eventually went into the real estate business. Last year, she sold $8 million of real estate.

"Doors can open for anyone," says Salaksana, "but sometimes you have to knock to get them open.

"Look at me. I'm not on welfare, and I don't need any help from public assistance. As a matter of fact, I now love to pay 16% taxes to the IRS. But I am able to give my children a good education and make sure that they get a degree and accomplish something in life."

Salaksana's outlook is representative of the motivation and hope.

With an enrollment that is 92 percent Hispanic and 75 percent female..., the college provides childcare to approximately 800 children.
that students bring when they enroll in St. Augustine.

Our students look very seriously at their future. They want better opportunities for themselves and to have their families in a better situation," said Plazas.

St. Augustine now has served more than 20,000 students during its 18 years. Because it considers itself "independent and nonsectarian," St. Augustine’s welcomes all students. The college is a member of the Association of Episcopal Colleges and International Consortium of Colleges and Universities of the Anglican Communion and gets its funding from federal and state sources, private donors, the city of Chicago, the Episcopal diocese, and tuition. It is accredited by the North Central Association’s Commission on Institutions of Higher Education and has been visited by a team of evaluators who have recommended extending its accreditation for eight more years.

There are 15 members of the board of directors who handle the traditional policy-making and budget oversight duties traditional for higher education governing boards. But St. Augustine also is registered as a not-for-profit corporation and has a corporate board that meets once per year to ensure that the corporate guidelines are maintained.

Although St. Augustine was founded as a two-year institution, last year it instituted a bilingual bachelor’s degree program in social work. It will soon offer a bilingual baccalaureate program in early childhood education. Each program has a general education core curriculum requirement and a computer literacy requirement, essential for today’s workforce. Speaking of the curriculum, Plazas notes, "We are not traditional in some ways, but in others, especially academics, we are very traditional."

There are 30 full-time faculty and 125 part-time faculty who work to meet the instructional needs of students. The bilingual teaching approach is so unique that some-own materials, such as when he wrote a grammar book for classes. The educational approach

St. Augustine officials carry out a recruitment philosophy that boldly challenges individuals with the slogan, “We give you no excuses not to get an education.”

St. Augustine Management and a St. Augustine board member.

It seems that this attitude of determination and persistence has rubbed off on students, giving them the boost they need to reach their goals.

As Alex Orozco, another St. Augustine graduate who now does commercial planning for the city of Chicago, says, "I never thought I’d end up doing what I am doing today. St. Augustine’s gave me the confidence and the skills to do these things.”

Times professors, like Dr. Rafael Tapia, chair of the languages and literature department, create their works for the students and fills a need for business and industry in the Chicago area. It is a need that will continue in the next 20 years. The Census shows that a large number of traditional workers of the U.S. labor force are retiring and that many of them are expected to be replaced by Hispanic Americans.

These demographics make St. Augustine even more enthusiastic and aggressive in carrying out its mission, which calls for the college to build a bridge to fill cultural, educational, and socioeconomic gaps.

“We must make education accessible to minorities and help them become part of a well-trained workforce,” says Margarita Perez, CPA, president of Tortaleza Asset
The Dream: Deferred or Betrayed?

Latino Struggles at Monterey Bay

By Michelle Adam

On several occasions, this magazine has cited a saying attributed to Abraham Lincoln that no matter how narrow a plank might be, it still has two sides. Conflicts involving a university no doubt have even more. Michelle Adam's interviews with current and former faculty and staff of CSUMB offer some but not all perspectives on events at the budding university, which this spring proudly graduated its pioneer class.

When California State University Monterey Bay opened its doors on August 24, 1995, its curriculum, based on social service, social justice, and technology-rich, multidisciplinary, multilingual and outcome-based education, had barely been developed. Staff were still rolling in. The extremely diverse founding faculty and staff were excited but exhausted after a mere eight months in preparation time. President Clinton was there for the inauguration.

Clinton and Leon Panetta, then chief of staff, had wanted to create one of the largest, most effective, and most socially conscious-based conversions ever, replacing Fort Ord's soldiers with students at the new California State University at Monterey Bay.

California's legislators, in the midst of statewide economic hardships, agreed to open a 21st CST on the basis that it provide an alternative education for the underrepresented.

Across the country, all eyes were on CSUMB to see if it would succeed. Some of those eyes watched to see if the former Fort Ord could be converted rapidly into a different kind of educational institution, one capable of generating equivalent income for the surrounding communities. Other eyes watched to see if CSUMB would deliver the dream of diversity that had drawn so many minority faculty and staff to and through its doors.

But what began as a dream became for some a nightmare. After sustaining silence and fear for several years, they have begun to speak up in reaction to an administration that has been described as racist, dictatorial, arbitrary in decision-making, and divisive within a system that espouses diversity, social justice, and cooperation. Many of its original founders fear that the dream of a forward-thinking university is being destroyed by an administration that has no understanding of its constituents and vision statement.

A Critical Juncture

There are many who tell this story, and the basic elements remain the same. In January 1995, nearly a year after Peter Smith, former Republican congressman from Vermont, took the helm as CSUMB president, he cleared Steve Arvizu from his position as provost. "He was trying to neutralize any legacy that Steve had built in founding the campus," said faculty member Ruben Mendoza.

Arvizu, holder of a Ph.D. from Stanford, a post-doctorate from Harvard and University of Michigan, and 30 years in the field, had left his past as dean of graduate study and research at CST at Bakersfield in 1993 to form CSUMB.

"I helped create something that most people thought was impossible," said Arvizu, who is now president of Oxnard College. "But he [Smith] came into this environment purposefully deciding he was going to wipe away alternative voices. The first person he began wiping away was me—and the people around me."

"A lot of people paid accolades to Steve, and I think Peter Smith wanted to be known as the founder," said founding faculty member Maria Reyes, one of the top Launias nationwide in the field of elementary education, now gone from CSUMB, citing health reasons concerned by the president's actions.

Reyes organized faculty to support Arvizu, but according to her, Smith bought the support of many minority deans whom he had previously attempted to fire.

When Arvizu was demoted, Smith and Dell Felder, who was hired in the summer of '96, received veto power in the hiring and firing of faculty. That's when, said Arvizu, fewer diverse
Los Desaparecidos

"This is a CSUMB concern. Our numbers are diminishing. We jokingly call ourselves ‘los desaparecidos.’" said Donald Urioste, one of the few minority tenured faculty remaining at CSUMB, Director of World Languages and Culture, and a member of the Chicano/Latino Faculty Staff and Association. He has been pinpointed by the president as one of the few troublemakers. But Urioste is quick to say that there are many as concerned as he is by what is occurring at CSUMB.

"We have just said ‘enough’. Many of the people who left have been Latino and African American, and as people leave, they are not being replaced," he said.

"Many of us have been struggling for that goal since the 60s. Now we are having to fight the same battle we fought some 30 years ago. This is supposed to be our university, and we shouldn’t have to struggle," he continued.

Jim May, the first dean recruited at CSUMB, and a Native American, told HO he was demoted without review in 1996, then made assistant to the president, who then, May said, "never met with me." Smith broke the two-year assistant-ship agreement after one year, said May, and now May’s title is "general teaching," which means he gets no funding for his classes, he explained, adding that while senior White faculty have been given senior classes, he has been redirected to teaching beginning classes at full capacity. May is now president of the faculty union chapter.

Max believes he was demoted because he was associated with the demoted provost, Steve Arvizu. Transferred to a small room without win-

dows, which he described as a cell. May’s office has been moved 12 times in five years. During his inactive position as assistant to the president, his office was moved to an isolated area a mile from campus, in a building where other American Indians and Latinos were placed, he told HO.

"I was the first Indian to get a Harvard MBA. I was the third Indian to attend Stanford," he said. And first in his family of Cherokee roots to attend high school. Vice-chairman of the board of Native American Public Telecommunications, May has met with the chairman of the FCC and with Vice President Al Gore to talk about race, technology, and the future of the U.S. Yet when he received a grant from Pacific Bell to help hook up local high schools to the Internet, and a check was written out to him, reporters were steered to the president's office where a White representative accepted the money. Media relations policy or a deliberate snub?

President Claims Treatment Equal

While Smith agreed that there has been a lot of shifting of faculty and staff, he said there has been no difference between its effects on minorities and Whites, and that everyone who has been reassigned or demoted is still receiving pay.

While Smith could not officially comment on personnel matters, he did say that when it comes to complaints of unjust treatment of minorities, he "can’t find what the problem is. The deeper issue is that these folks want me gone."

"Too many Italians"

According to Arvizu, Academic Personnel Officer Sarah Brothers filed a $10 million lawsuit claiming racial discrimination and harassment, a case settled out of court. Arvizu gave a deposition on the case, citing incidents in which Smith putatively remarked that there were "too many Italians [a pseudonym for minorities] on campus," a statement others have also quoted.

The Vision Statement

George Baldwin, Native American, another of the original faculty members, is proud of CSUMB’s vision statement, which includes teaching students how to become aware of social injustices.

We were hanging away for a perfect model, the eyes of the nation were on us, and the demands and timelines were absolutely nuts," said Baldwin. "We turned it on ourselves and saw it in the presidents office," he said.
In February, 1990, Smith announced his intent to change parts of the vision statement, especially that which committed CSLMB to serve underrepresented communities, according to several faculty members. His choice, they said, was to replace this with the phrase: "More. Better. Faster," meaning to give students more and better learning in less time.

"He tried to change the vision statement as soon as he got here," recalled Arvizu.

Faculty were in an uproar and since they had no union or protection, they quickly formed an academic senate and successfully protected the vision statement. And the Social and Behavioral Center, which, HO was told, Smith also intended to dismantle.

A month later, affirmative action officer Ron Cisneros, acknowledged to be concerned over campus politics and, like most others, overworked, hanged himself in his office.

"I am the vision statement," wrote graduated senior and student president Sarah Lerma to the campus community. "I am a Chicana. I am from Gilroy, which is part of the tri-county area...I am part of a family that is considered low-income and I am part of the first generation in my family to attend college. And it hurts me deeply that I am under attack."

"I have witnessed the increasing gap between administration, faculty, staff, and students," Lerma continued. "I'm so sorry that you came here believing you would count. I'm sorry that this university's administration has let you down."

Smith disagrees with the accusation leveled against him by some that he is attempting to dismantle the foundation that has attracted attention to his school.

"I believe in the vision statement. Why else would I have come across the country?" said Smith. "What's ironic is that I'm an activist in education, politics, and in giving to those who don't have economic power."

**Arts vs. Administration**

One of the nation’s leading muralists, Judy Baca, then at UCLA, came to CSLMB as a founding faculty member to establish the Institute of Visual and Public Art. An opportunity to weave community and social issues and raw artistic production into the arts of academia and teach art in alternative ways.

"In the planning of the university, the arts were central," said Baca, but "when Peter Smith came, the arts were marginalized."

"What I felt," said Baca, "was a lack of acknowledgement of the intellectual community available on the campus." She said that everything she did was undone based on what Peter Smith’s wife, Sally, wanted: "I’m a leading expert in the country and all of a sudden Sally was negotiating everything it was as if Sally were decorating the president’s room."

At one point, she recalled, Smith—"who didn’t know the difference between a Puerto Rican and a Mexican"—called her into his office and asked her to do his portrait. Had he known anything about her work, she felt, he would never have asked.

Baca received neither budget nor building from which to effectively develop her program. Although Smith saw this as par for the course in establishing a new university, Baca experienced it more as an effort on his part to pit faculty against one another. After Steve Arvizu was marginalized, she took a leave of absence back to UCLA and eventually stayed there.

**Breaking the Silence**

Octavio Villalpando, who has a national reputation for assessment of underrepresented groups, arrived just after Arvizu was replaced, to work directly with Peter Smith as director of university planning and assessment. He considered Smith's presidency as helpful in improving the university's autonomy. From outside the campus, Villalpando recalled others calling CSLMB "Taco Tech." As there were more Latinos in positions of power than elsewhere.

It was Texan Dell Felder who concerned him most. "The first thing she said when I met her was, 'What are your credentials?' She told me I was engaged in an ambitious enterprise and doubted my abilities," said Villalpando. She didn't believe he would be able to secure the funds to develop an innovative self-assessment program for the university. "I saw the same relationship between her and other Latinos," he said.

When she came in, he said, the issues of serving underrepresented minorities fell off the radar. Student support programs were being moved to various departments, which allocated the funds for other purposes, he said.

As part of the top administration, Villalpando saw how publicly the senior team was good at saying the right thing, but privately had a different discourse going on. "He [Smith] didn't understand how important multiculturalism was to the faculty," said Villalpando. "And whenever a person of color made a recommendation, it was automatically dismissed when those of non
color were immediately adopted.

'I always thought this guy [Smith] could turn it around,' said Villalpando. But a year ago he changed his mind when he saw how Smith treated Bert Rivas, vice president for student affairs. Smith tried to demote him, reduce his budget, and reassigned him to a different department, he said. 'The motivation was unfounded. Smith was motivated by Felder's lack of confidence in a person of color.'

It was Villalpando who finally broke the silence that had been brewing resentment throughout CSUMB. In March, his co-worker Cecilia Bursiaga, the highest-ranking Latina, who served as executive assistant to the president, asked by Smith to be reassigned. She was told her performance was terrific, but not a fit for the organization. The following day, Smith told Villalpando that Bursiaga had asked to be reassigned, which he knew not to be the case, then broached the subject of a reassignment for Villalpando as well.

'It really angered me that in one swoop he was going to get rid of all people of color,' he said. Villalpando asked 15 faculty members to join him in a conference with Smith, at which he gave his many reasons for his resignation. He was soon locked out of his office and was asked to leave campus housing in order to quell controversy.

Faculty had formed the Chicano Latino Faculty and Staff Association (CLFSA) of CSUMB in the spring of 1998, announcing its concern over ethnic cleansing on campus. In March of this year, more than 100 students rallied for change and asked for Smith's resignation. Many students flooded Smith's e-mail, demanding answers. Res. Martinez, MECha Chair wrote, "I want you to know that 1 and others expect a reply explaining what is to be done about our community's systematic loss of great role models and mentors."

Students had held earlier rallies in protest of racism on campus. One of the incidents involved an e-mail telling all "niggers" to return to Africa. "It took days for President Smith to send out a pansy e-mail saying that it is bad," wrote Lerma. "I've also read other statements, and no stance has been taken by our administrators. How can a university ask me, as a student, to question reality, question how power dynamics work, question society, when our top administrators are not asked to do the same?" wrote Lerma, who thought it was necessary to speak up because of the fear she also felt from faculty. "People were being black-balled left and right," she said. "I cannot sit by and watch my faculty of color forced to leave because of racial tensions. I cannot sit by as my faculty are fearful of losing their jobs due to being too pro-student."

CLFSA asked for Smith's resignation as well, while 13 other groups sent resolutions to Smith demanding a recommitment to the vision of Members of CLFSA and other faculty, staff, and students sent issues of complaint to the chancellor's office and to members of the legislature.

Marla Santos of the chancellor's office came to CSUMB to conduct a report of these complaints, which faculty and staff were promised they would see, but have not. Santos said they are giving Smith an opportunity to take care of the issues of concern internally.

Dell Felder recently announced she was leaving in August to accept a post in Saudi Arabia.

Hoping for a Solution

Bodilith Lloyd, an African American who is one of a few original deans remaining, represents a group that hopes for a solution to the problems without resignation of the president.

'I've acknowledged that people are no here...that they [the jobs vacated] have not been filled with people like them," she said. "We've had a crisis here, but we'll work through it."

Since the resignation requests in May, Lloyd said there has been a kind of death on campus. "People have cried on so many occasions. It's the most uncomfortable thing I've experienced."

Here is a place [where] we can look at what higher education has not been. I believe in the institution. I believe this can happen. This is a chance of a lifetime to work with people from across the country to build and develop what could and should be higher education in the 21st century," Lloyd, who believe racism is part of the course and needs to be dealt with. "If we can't do it here, then it can't be done."

Former California Assemblyman Ray Gonzalez, now a teacher of Latin American history, described the university as having two doors on the front that represents Monterey, Pebble Beach, and Carmel, an one in the back, for the agricultural communities of Salinas, Soledad, and Pajaro Valley.

Most of the students come through the back gate," said Gonzalez, who was one of the writers of the vision statement. "Most of the students are migrant, first-generation students," he said, and added, "but the university is doing nothing to help them succeed. This is why we decided to fight."

1500
Gonzales is also concerned that the Latinos lost to the university will not be replaced because, as part of a small Latino academic community, he can’t think of any who would want to walk into the present climate.

But Ruben Mendoza, already hospitalized six times with asthma attacks since joining CSUMB, stays there against the odds because “we’ve set a measure for ourselves.”

“I’ve seen kids who have never gotten close to a computer...a number that had difficulty writing. I’ve seen them leave with advanced skills I really do believe that the vision statement will serve the underrepresented. It’s a vision whose time has come.”

Postscript

In a recent letter from President Peter Smith to campus colleagues about Dell’s departure and the search for a replacement, he praises her contributions as “heroic and of an exceptionally high quality,” but speaks as well of the tumultuous year.

“We’ve been through a lot this year. And that comes on top of the hard work it took simply to survive during the first three years of our existence.

“As I have attended professional meetings this summer, however, I have been powerfully reinforced on one main point. The programs we have in place to educate learners and the strategies we have developed to support those programs are unparalleled in American higher education. There is simply no other place like CSUMB. Our commitments in service learning, cross-disciplinary curriculum, multiculturalism, technology, outcomes-based education, and relationships with the communities around us are not to be found anywhere else. And the record that our students and graduates are compiling as a result of their education with us is remarkable.

“There is a reason for this success. And that is you, the people who have chosen to commit their professional lives to the development of this university. Throughout this past spring, in the state of strike and during the protests, one thing remained constant: students were served and served well. The university ran like a university, and its purpose was preserved even as we engaged in robust debate about difficult issues. That discussion must and will continue, because it is why the university is here.

“I have the deepest confidence that, together, we will continue the successful development of this extraordinary hope in higher education. We have controlled our own destiny and development to date, and we will continue to do so. We created the “bones” of this place using our own wits, experience, and commitment, and we will flesh them out the same way; trusting and working together.”

The year has shown something else as well—the fallacy of the following concept, which appeared in Social Education, the official journal of the National Council for the Social Studies, May 1970, Vol. 34, No. 5, author Dell Feller:

“Anglos believe they can control the future; they strive to manipulate the environment to suit their needs. The Mexican American is more likely to be fatalistic, disposed to believe that altering the present will have little effect on the future.”

California State University-San Marcos

Growth with Distinction and "Good Fortune"

by Roger Deitz

Founded in 1969, California State University at San Marcos began operations in the fall of 1990 offering courses for upper-division and graduate students. First-year students began in Fall 1995. Today more than 5,000 students attend the 304-acre campus in the foothills of San Diego County, a site some 20 miles north of the city of San Diego. The university is composed of the College of Arts and Sciences, the College of Business Administration, and the College of Education.

Last December, Marlo Rivera was among the first of the inaugural first-year students to graduate, she, along with classmates Tammy Ponsler and Nichole VanScoy, fulfilled degree requirements by taking additional courses each semester while maintaining honor grades with B-plus averages.

"My first two years are kind of a blur, but overall things were a blast!" said Rivera, a graduate of Rancho Buena Vista High School in Vista. Rivera earned a degree in business administration and has begun work as a systems analyst with Pacific Bell. While attending Cal State-San Marcos, Rivera worked part-time as a peer advisor and as a student advisor for the College of Business Administration. She was president of the InterVarsity Christian Fellowship and a member of the board of directors of the Sigma Iota Epsilon Honors Management Fraternity. Rivera returned to campus in May to walk side-by-side with her classmates during the annual commencement ceremony.

Rivera, we are told, does not regret any of her hard work and accelerated schedule, and was proud to be a trailblazer and among the first alumni/ae at Cal State-San Marcos.

"Kind of a blur..." "A blast!" That pretty much describes the rapid growth of CSUSM, the 20th campus of the 23-campus California State University system. University President Alexander Gonzalez says that what makes Cal State-San Marcos different from other public universities in California is obvious: "We're the one that isn't finished." He sees his campus as a work in progress.

"Look around," he says. "You'll see new buildings going up and faculty and staff on the move. Listen to the conversations, you'll hear creative, challenging teaching from a young, enthusiastic faculty eager to share their expertise." He adds that at CSUSM, students will experience a "hands on education."

Gonzalez points out that the newness means that the institution abounds in "state-of-the-art multimedia, cutting-edge science labs, and community-based experience" as part of coursework. "We're a campus that isn't complete," he observes, and reminds us that students too are works in progress.

For growing with distinction and for building with the
support of enthusiastic students, faculty, administration, staff and donors, Cal State-San Marcos can add another realized distinction, entry on the Hispanic Outlook Honor Roll.

Funding and friends are helping to continue the growth of this institution. A $1.2-million gift from longtime Oceanside resident Helene Clarke will enable Cal State University-San Marcos to begin building a much-needed field house to anchor its growing athletics program. The completed structure will be named the M. Gordon Clarke Field House in honor of Mrs. Clarke's late husband, an active sports enthusiast. Using the gift, the University has begun detailed design and construction planning. Another $1.5 million will be raised from private donors, with the remaining cost of the $5.5 million structure coming from the CSU system funds. The field house will be completed in spring 2001. With more than 23,000 gross square feet, the building will be the first of several planned for an athletic complex.

A $1-million track and soccer field is already nearing completion west of the planned field house. M. Gordon Clarke, a longtime Hughes Tool Co. executive, had an abiding love of athletics. "And that's why I decided to donate for the field house—because athletics was Gordon's life in so many ways," said Mrs. Clarke. "The field house is a fine way to honor him and to help so many young adults."

Then there is the scholarship fund that has been established at GSLSM in honor of William A. Craven, the former state senator who led the effort to establish the campus in 1980. Cravens family gave the University $250,000 last March to endow scholarships for athletes who require financial assistance.

"CSU-San Marcos was the pinnacle of the senator's career," said Dan Worley, a Craven family spokesman. "He's extremely proud to be associated with the campus and with the thousands of students that he has served and will serve in the future." The funds were donated from unused campaign money raised during Craven's long political career which included five terms as a state senator from the 38th district encompassing the San Marcos area. At a ceremony to honor that donation, President Gonzalez presented to Mimi Craven, the senator

Honor Roll Facts in Brief

Gonzalez points out that the newness means that the institution abounds in "state-of-the-art multimedia, cutting-edge science labs, and community-based experience" as part of coursework.

wife, a copy of the University's first yearbook, which the graduating class dedicated to the senator.

Quoting from yearbook notes written by Senator Craven, President Gonzalez read, "The senator said the words 'good fortune' came to mind when thinking about San Marcos. The students who will benefit from the family's generosity in setting up these scholarships will have reason to share those words for years to come."

Last year a $4.5 million University Hall opened on schedule for fall classes. The first new classroom building for CSUSM since 1992, it officially opened to the music of a marching band in August 1998, just in time for the first day of the semester. Named University Hall, the 71,000-square-foot building provides 23 instructional rooms, including classrooms, computer labs, and foreign language laboratories. The building also houses 69 faculty offices for the College of Education, and the departments of computer sciences, foreign languages, and psychology. Funding for the building was made possible through passage of the Proposition 205 bond issue in 1996. Three more buildings, including a science hall and arts and humanities complex, are slated to be built.

When asked about his university as a work in progress, President Gonzalez observes, "CSUSM is an unfinished campus, and how many people get a chance to build a university? That's exciting! I don't just mean for me as the president but for all of us: faculty, administrators, and students. For example, the initiative the students took last year in passing the proposal to build the track and field. Eighty-two percent of the students who took part in the election voted yes."

The president continues that a lot of decisions about the future are determined by financial resources. "We can have all the ideas in the world, but if we don't have resources, how are we going to execute the decisions?"

Thanks to generous donations, and the passage last November of Proposition 1A, which allocated millions in construction funds for three new buildings, the campus will be changing over the next several years. Science Hall II and the Arts Building will be completed for January 2002 occupancy at a construction cost of $26.8 million for both facilities and outfitted for an additional $3,190,000. Together they will provide for 424 classroom seats for 990 students; 129 teaching laboratory stations for 259 students; 127 graduate research laboratory stations; 32 faculty offices and related support space.

A Library/Information Center will be completed at a construction cost of $34,000,000 and equipment cost of $3,120,000 to be ready for the year 2003. It will provide 160,000 square feet for conventional book stacks, automated storage retrieval, special library materials, reading stations, 60 self-instructional computer lab stations, historic archival document restoration, media/radio and television studios, special instructional interactive classrooms, and storage.

The academic community for fall of 1998 totaled 5,035, of whom 3,345 were female and 97 percent state residents. There were 4,113 undergraduates and 922 graduate students. Hispanics numbered 875 or 17.4 percent. There were 81 Native Americans, 151 African Americans, and 440 Asians. Approximately 2,500 students, or half the student body, received financial aid for the 1998-1999 school year. This includes scholarships, grants, and student loans. Two years back, the average financial aid received per student was $5,566. Enrollment is projected to grow to 6,493 by the year 2000-01, to 12,283 by 2010-11, and to 18,056 by 2020-21. At this point, there are 4,100 alumni.

Of the 177 tenured and tenure-track faculty members, 163 have Ph.D. or Ed.D. degrees, and 14 have master's degrees, 13 of which are terminal degrees. The student to faculty ratio is 17:1. By ethnicity, there are 18 Mexican American full-time or tenure-track faculty, and 8 other Hispanics. Added to this, there are 10 African American, 21 Asian, 4 Native American, 2 Filipina, and 1 Pacific Islander faculty. The 177 include 88 males and 89 females.

The most recent commencement included approximately 1,300 students. Graduates received roughly 770 bachelor's degrees, 150 master's degrees, and 380 teaching credentials.

Of course, when a community helps build a university through its donations and bond issues, there are other benefits besides meeting the educational goals. Builders employ workers to complete the projects, and area businesses benefit from institutional purchases. Cal State-San Marcos' 1998-1999 budget of all funds was $70,334,331. The school employs 656 staff, faculty, and administrators who themselves spend money in the community. CSUSM's estimated economic impact on the community for 1996-97 was $92.7 million, including the direct effects of $40.1 million and indirect expenditures of $52.6 million. The direct figure breaks down to $15.1 million in student expenditures, $14.9 million in employee expenditures, $4.5 million for supplies and $5.8 million for capital expenditures.
Prop. 227
Decimates Bilingual Ed in California

But One District Shows Improved Test Scores

When California voters approved an anti-bilingual education referendum last year, Mercedes de la Riva, a Mexican immigrant with school-age children, was scared about the future. "My two young daughters, Alejandra and Mercedes, who are now in second and fourth grade, had always been in bilingual education programs," said de la Riva in Spanish. "I was very worried about what would happen to them."

The passage of Proposition 22 turned de la Riva into an activist. She joined a parents' committee and closely watched how her district in Carlsbad would implement the referendum. Confirming her worst fears, both children were placed in English-language immersion programs. But de la Riva stayed involved. At home, she worked with her daughters to help them learn English, even though she is still learning English herself. And she met with the girls' teachers to keep a close eye on their progress.

As the school year came to a close last June, de la Riva found her fears had subsided, and her feelings about bilingual education had changed. She is not pushing for a return to bilingual education for her daughters. "No matter what happens at school, I will teach my daughters Spanish at home," she said. "They don't need the school for that."

De la Riva's newfound opinions reflect a sea change that has occurred in California in the battle over bilingual education. A year after passage of Prop. 22, it is clear that bilingual education in California—and possibly the nation—will never be the same. The number of Limited English Proficiency (LEP) children enrolled in bilingual education programs in California has plummeted. And while supporters of bilingual education are fighting in court to overturn the referendum, they also concede there is simply no turning back the clock. "I've tried to look at this as an opportunity to improve our services," said Santa Ana Unified School District Superintendent Al Mijares. "I don't think bilingual education is going to disappear completely. But it's definitely never going back to the way it was."

For districts like Santa Ana, which has a 90 percent Hispanic enrollment, this past school year has been chaotic. In California's public schools, some 1.4 million children are classified as LEP students, most of them native Spanish speakers. Prior to Prop. 22, only about one-third of those students were in bilingual education programs. But Ron Lenz, the California millionaire who bankrolled Prop. 22, and his supporters argued that even 30 percent was too many children. Backers of the referendum claimed that young children have a tremendous capacity to learn a new language, and that bilingual education wasn't serving their best interests or producing good results. Voters agreed. Proposition 22 was overwhelmingly approved in June 1998 and had to be implemented just a few months later in time for the 1998-99 school year.

The complex—and in some ways vague—law called for LEP children to complete one year of 'sheltered English immersion,' and then go into mainstream classes.

### Percentage Gains by English Proficient Students

![Bar chart showing percentage gains by grade level across reading, mathematics, and language subjects from 1998 to 1999.]

**SAT-9 Scores Comparison: Spring 1998 to Spring 1999**

*Data provided by OUSD Curriculum and Instruction Office, June 1999*
tion's lack of any formal method to monitor the success of the new immersion programs.

"It is always a disaster any time that educational policies are made without putting children first," said Silvina Rubinstein, executive director of the California Association for Bilingual Education (CABE). "The way Prop. 22" is being implemented is different from district to district and from school to school within the same district. And, of course, there is no clear mechanism to determine academic progress or language development."

Those who supported the proposition aren't happy with the results either. The claims that many districts are "dragging their feet" in implementing the law and that other districts are continuing to offer bilingual education under the guise of an immersion program. And they argue that districts are steering children back into bilingual education programs by coercing parents into seeking waivers.

Both sides have a point in that the implementation of Prop. 22" has been scattered, with districts left to decide on their own how to enact the law's complicated provisions. In general, districts with strong bilingual education programs that enjoyed lots of parental support received requests for waivers, which were easily granted. The San Francisco Unified School District, for example, actually saw its bilingual education program grow after Prop. 22". About one-third of the district's 65,000 children are classified as LEP. The district, which has been under a federal court order to meet the needs of LEP students, asked parents to sign an authorization form saying they wanted their child to stay in bilingual education. In a nod to Prop. 22", the district renamed its programs "English Only and English Plus."

At the same time, the district with the highest LEP population, the Los Angeles Unified School District (LAUSD), found itself scrambling to implement a program in the two months after the referendum passed. The vote took place on June 2, and LAUSD's next semester started on Aug. 3. "We worked weekends and nights to get ready for this," said district spokeswoman Noreen Serrano. "We set out to train our staff in how it would work, and then reached out to the parents in every school to explain their rights and how we would implement the new law."

In holding to the referendum's parameters, for the first 50 days of the new school year, all LEP students in LAUSD were placed in an English-only immersion program. The district then offered two options. Students who had been in bilingual education before were placed in an English-immersion program led by teachers who spoke no Spanish. A teaching assistant was on hand to get students through rough spots. But the focus was on English. Bilingual education teachers, who could revert to Spanish as needed, taught the second immersion track. The program was for students who had little or no understanding of English.

Many assumed that Hispanic parents would fight to keep their children in bilingual education. But at LAUSD, a groundswell of waivers never materialized. Only 11 percent of parents with LEP children sought waivers to get their youngsters back in bilingual education. The vast majority—89 percent—went along with the new system.

In just one year, the district's massive bilingual education program, which included more than 100,000 children, shrank to about 11,000 children.

To the surprise of many bilingual education supporters, a similar scenario played out in the Santa Ana Unified School District, where 76 percent of children are LEP. The district officials, backed by the local board of education, undertook a huge educational campaign aimed at parents. "We wanted each and every parent to understand their rights and to understand they could opt out of this immersion program," said Superintendent Mijares.

Again, parents didn't respond as expected. Despite such diligent outreach efforts, the district also saw its bilingual program greatly reduced in size. In the 1997-98 school year, 38,381 Santa Ana students were in a bilingual education program. This past school year, only 5,800 children were enrolled in bilingual education through the waiver process.

Mijares was surprised by the small number of parents who sought to keep their children in bilingual education. But he understood as well. "The rhetoric about this proposition was so strong that many parents became convinced bilingual education was bad for their child," said Mijares. "Then, because we were scaling back and collapsing programs, parents were faced with having to send their child to an unfamiliar school or classroom for bilingual education. Many just didn't want to do that."

Other districts took a much stricter interpretation of the law. In San Diego County, the Oceanside Unified School District completely eliminated its bilingual education program. The prior year, the district had roughly 5,000 children in a bilingual education or transitional program in some 120 classrooms. District Superintendent Ken Noonan, who is of Hispanic descent and a former bilingual education teacher himself, decided that the safest and most appropriate course of action was to implement the law literally.

Of the thousands of eligible LEP children in Oceanside, only about 120 applied for waivers, and of those, just a handful were granted by the district. For Noonan, it was a "troubling situation" and really concerned about its effects, said Noonan. But once it passed, I saw no other choice.
Motivating the Disengaged Student: Part One: Challenging Passivity and Resistance to Learning

BY ANGELA PROVITERA McGlynn

Senior faculty members have personally observed what research findings confirm: students today are different from students of 30 years ago, of 20 years ago, or even of a decade ago. The student population is more diverse ethnically, culturally, and in terms of social class than ever before. The age range of college and university students is also wider than ever before. The diversity is seen too in academic preparedness, with many students underprepared or ill-prepared. Add to this heterogeneity the fact that so many of today’s students are attempting to combine family and work responsibilities with their studies. With all that students are juggling in their lives, is it any wonder that many of them come to class tired, listless, sleepy, or unmotivated?

This article will focus on the classroom learning environment and pedagogical strategies that help motivate our diverse student body to learn. The topic of motivating and retaining students should be of particular interest to faculty members who are trying to help Hispanic students reach their potential. Although we have seen some improvement in the U.S. Hispanic socioeconomic picture, and many Hispanics have climbed the educational and career ladders in the last decade and a half, the overall educational attainment of Hispanics has been quite poor. Hispanics are the fastest growing minority group in America, and yet they have the lowest educational attainment. Their high school and college completion rates are the lowest of any racial/ethnic group in America. In a previous article, I addressed the myriad factors contributing to this low achievement and the many ways in which the community college could contribute to improving the educational plight for Hispanic Americans.

I will focus specifically on the classroom dynamic and on teaching strategies that contribute to motivating students to learn, to stay in school, and to achieve their goals.

The challenge to today’s faculty in reaching students, particularly our tired and unmotivated students, is to add variety to their teaching strategies. The old-time lecture class might capture some of today’s students—but probably a small percentage of them. Many lecturers, facing the “glazed over” eyes of their students, try to create more engaging lectures or make attempts at a more dazzling lecture style. While this effort is admirable, it will probably prove ineffective. I once read an intriguing definition of the term “insanity.” Insanity doing the same thing over and over and expecting different results. If we, faculty, want different results with students who are not responding to the lecture format, the prescription is clear: We must change.

So many scholars in academia, following the work of John Dewey and Jean Piaget, have espoused the idea that students learn more when they are actively involved, when they are “doing” rather than when they are passively receiving information.

Faculty who protest by saying that they have too much material to cover to allow student participation, dialogue, or group work would be saddened to discover how few students are covering the material with them. And how much of what we faculty “cover” will students retain after our examinations? How much of this material will they actually use in their lives? Of course, this depends on the discipline of study. We desperately want the medical personnel assist
Strategies involving the classroom design can also enhance student involvement and participation. Students who are facing each other rather than the back of someone's head are more likely to participate in a class discussion.

...ing us in our times of need, and the pilots who are flying us to our destinations, to have retained what they learned and practiced in school. However, much of the academic information we have learned in school, particularly if it is not used in our lives, is forgotten within several years of graduation. So, as important as the body of information we would like students to learn is, equally important for our students to learn are the abilities to think critically, to write effectively, to speak clearly, to make ethical decisions in life, and to celebrate the richness of the diverse culture America has become.

Clearly, the body of information we impart, if students take it in, might accomplish some of these goals some of the time, but the lecture format falls short much of the time. As James Eison states, "...one way faculty can increase student involvement and learning is to lecture less and have students do more." The lecture format is part of most courses, though, and it is a necessary part. It is possible to make lectures more interactional and therefore more effective. One way to get students to do more, even within the lecture format, is to lecture for a period of 15 minutes and then pause. During a two-minute pause, students are asked to work in pairs to compare and re-work their notes. Usually this is done without student-teacher interaction. However, a variation could involve the instructor asking for a summary of the lecture up to that point. This would allow for clarification of the material. The lecture would then continue until the next pause. Bonwell and Eison (1991) showed that the "pause" procedure significantly improved student retention, both short-term and long-term. Additionally, the pause technique serves as a motivator for students to stay tuned in to the lecture and to take notes.

The "One-Minute Paper" is another technique that can be used within the lecture format to assess student learning and help keep students engaged. Again, following a lecture, ask students to respond in writing to two questions: What is the most important thing you have learned in today's class? What is it that you still have questions about? The instructor can collect these one-minute papers and respond to positive classroom atmosphere from day one. In that first class, try some "ice-breakers" to get students engaged with you and with their classmates. If students are going to take the risks necessary to learn in an active way, they need to connect with the professor and their classmates. The classroom dynamic must involve trust. The beginning class sessions should include techniques for learning students' names.

In informal focus groups that I have run with students over the years, I have discovered how important it is to students to have their teachers know their names. In fact, students claim that one of the most significant factors affecting their learning in a course is the rapport they feel with their teacher.

Once a dynamic of trust and familiarity has been established, there are many techniques that facilitate learning and active participation. Since one of the biggest stumbling blocks to students' active participation in class is that they have not read the assignment, there are ways to encourage this reading. One such method is to have students respond in writing at home to questions that accompany the reading. Their questions and responses could be used in the next class session as a kick-off for discussion. They could also be collected and read by the instructor without reference to the students' names, and responded to by the rest of the class. The instructor could then credit the students working in some way.

Elizabeth Paul, associate professor of psychology at The College of New Jersey, suggested a close variation of this technique. Dr. Paul asks her students to do "idea sheets" at home. When they read the assignment, they are to write their own comments or questions on a slip of paper and bring them to class. She asks them to sign them so she can give them credit for them. She then flips through them in class, commenting on what they have written without identifying them by name. When a student hears his/her question read, and Dr. Paul says, "Yes, that is a very interesting question," the student perks up. This introduction to the reading, based on their questions and comments, leads to...
lvelier and more participatory discussion. Getting students to read their assignments is a first step in promoting active engagement within the classroom.

Regarding strategies to combat student resistance to learning, Dr. Paul suggests some ideas that have to do with classroom dynamics. She involves students in the process of breaking down their own resistance to learning. We can empower our students by asking them, "What can we do to foster your learning?" Dr. Paul says that your students might look at you blankly at first. However, eventually, students start to look at themselves as learners. This technique opens the door for communication with them. Sometimes, Dr. Paul tries what she calls a "content to process shift." This involves stopping class and saying, "Let's notice what is happening here: some of you appear uninvolved, some of you appear to be talking to each other on another topic, etc. What do you think we should do to get things back on track?" By the use of this method, students get to identify resistance to learning in themselves and to take responsibility for their own learning.

Strategies involving the classroom design can also enhance student involvement and participation. The instructor can move away from the front of the class. In large classes of 35 or more students, where a circle would be cumbersome, instructors can divide the room down the center aisle and ask students on both sides to face the center (and each other). Students who are facing each other rather than the back of someone's head are more likely to participate in class discussion. This setup also allows the instructor greater freedom of movement. The teacher can now walk down the center aisle to get closer to the students who prefer to sit in the back. From this center position, it is easier for the instructor to establish eye contact with more students, as well as greater proximity. Another advantage of this classroom setup is that the instructor can use the overhead transparency and talk with the students about the course material from the back of the room.

Another technique involving classroom design is for the instructor to mentally divide the room into quadrants, and then try to involve the students in all four parts of the room. Walking to the different sections and addressing questions to particular sections of the room can engage more students. Too often, instructors end up talking to the few students who sit up front and who are often already engaged.

Running an effective classroom discussion is a powerful tool to engage students with the course material, how to engage students through discussion will be the topic of my next article.

Carrasco's "Existential Oomph" at Princeton

BY STEVEN SCHULTZ

Reprinted with permission from The Princeton University Weekly Bulletin. May 10 1999

Collaboration is the essence of Carrasco's approach, and "the result has been an engaging and phenomenally productive exchange, with concrete results," said William Fash, chair of anthropology at Harvard.

Step into David Carrasco's grand Victorian house, and one of the first things he'll show you is a photo of himself and 30 prominent archaeologists, historians, and other scholars—all wearing cardboard 3-D glasses.

It's not the academic stereotype, but neither is Carrasco's approach to studying Mesoamerica. the portion of Central America that developed one of the world's first clusters of great cities, the Aztec and Mayan civilizations. Carrasco, professor of religion, has developed an imaginative way of looking at these cultures that breathes life into pottery shards and ancient ruins.

According to other scholars in the field, this vision could change the way that U.S. and European societies view Mexican and Hispanic cultures today.

"David has done a tremendous job of making people aware of these cultures," says Charles Long, who was Carrasco's thesis adviser at the University of Chicago. According to Long, Carrasco has done more to improve understanding of Mesoamerican culture than many museums. Those institutions, Long says, tend to present artifacts as historical objects, without the active meaning that is part of Carrasco's work.

"They don't have that existential oomph," says Long.

Carrasco's appointment is in the Religion Department, but he has devoted his career to cutting across traditional barriers between academic disciplines and helping colleagues in many fields work together. He is the director of the Mesoamerican Archive and Research Project, an affiliation of archeologists, anthropologists, ethnographers, historians, religious scholars, and even astronomers. They are the subjects of the 3-D photo from a 1989 conference at the Great Aztec Temple of Tenochtitlan, where the scholars were comparing modern stereographic pictures of Mayan temples similar to pictures taken 100 years earlier. The 3-D glasses made for an amusing moment, but the real wonder was that all those people were in the same room. Collaboration is the essence of Carrasco's approach, and "the result has been an engaging and phenomenally productive exchange, with concrete results," said William Fash, chair of anthropology at Harvard.

The archives work also benefits from collaborations with researchers in Mexico. "American scholars are always going to someone else's land and digging up stuff and rarely talking to anyone there," says Long. "David has brought together a tremendous collaboration between U.S. and Mexican scholars. Among those collaborators is archeologist Eduardo Matos Moctezuma, whom Carrasco calls a "national treasure of Mexico."

Carrasco grew up in Washington, D.C., where his father David was the first Mexican American to coach basketball at a major university. American University. When his father became a sports goodwill ambassador to Mexico as part of the 1968 Olympic games, the family moved to Mexico City, where Carrasco spent his teenage years. It was a trip to a Mexico City museum that started him thinking about the way Mesoamerican culture was portrayed.

I remember coming out of the museum and having a strong emotional response, and a strong ambivalence, he says. "I had been indoctrinated by U.S. culture to feel ashamed of Mexican civilization compared to European civilization. I felt that was a lie; there was something to be understood, there were intellectual issues."

That personal feeling for the subject helps Carrasco show how Mesoamerican cities, monuments and objects were interwoven in real lives, says Long, who is now retired from Duke and the University of North...
Carolina-Chapel Hill, "it's a problem of knowledge, but it's also a question of existential meaning and identity."

**Understanding Sacred Places**

Later, at the University of Chicago, Carrasco became interested in the Spanish Conquest, which he describes as "one of the great dramas in history." He also began to think about the role that religion played in the formation of cities and the way a culture's religion can be revealed through an understanding of its sacred places.

Carrasco points out that there are only seven places in the world where village populations independently coalesced into cities, Mesopotamia, Egypt, Northern China, the Indus Valley, Southwest Nigeria, Peru, and Mesoamerica. What are the economic, intellectual, and social changes that had to take place for the cities to develop? "It was the religious ideas that really integrated all these things," Carrasco says, noting that the people at the top were always priest-kings. "That cosmological vision was needed to bring their calendars, their architects, their artists, their warriors into an integrated system.

The hearts of many of these cities were magnificent ceremonial monuments, such as the temples of the sun and moon at Teotihuacan and the Great Temple in Mexico City. Recently Carrasco has been developing a way of looking at these cities not just as fixed ceremonial centers but as fluid locales that export power and rituals to the surrounding countryside, which, in turn, helps shape the city itself.

**Order in Flux**

In a 1991 article, "The Sacrifice of Tezcaltipoca: To Change Place," Carrasco looked at one important Aztec ritual of human sacrifice and showed how it transcended conventional notions of place. In this ritual, the community leaders selected a prisoner warrior and anointed him as a god for a year. The man was chosen for his good looks, dressed in luxurious clothes, and treated like royalty. He was paraded through the city and around the surrounding country; and at the end of the year, he was sacrificed on a nearby mountaintop. Carrasco says that such rituals, with integrating a variety of intellectual questions in a single subject. Like much of the archive's work, it is relevant to understanding current issues. Sessions says, "The complex cultural situation we now face in the United States, in fact throughout the Americas, is rooted in the powerful and painful encounters between Africans, Europeans, and indigenous peoples. The colonial period had a profound influence on the way the world is today."

**Star of First Magnitude**

Some of the ideas generated within the archive are beginning to attract interest in other areas of research. For example, Philip Arnold, who studied under Carrasco at Colorado and is now an assistant professor of religion at Syracuse University, says he is working with the archive and scholars in Japan to gain a better understanding of "the meaning of urban space in the Pacific Rim.

Carrasco started the archive in 1984 when he was at the University of Colorado and brought it with him to Princeton in 1993. The archive provides funding for some archeological work in Mexico and maintains a collection of 12,000 slides of artifacts and ceremonial sites, as well as a library of 3,000 books, articles, and conference papers. In addition, the archive hosts regular conferences. The most recent, "Reimagining Mesoamerica: Archive, Community and Interpretation," was held at Princeton on April 9 and 10 and featured two presentations on new archeological finds at Teotihuacan and the Great Temple. The archive also produces numerous books and papers. "Judged by the standard of its publication record, it has shown like a star of the first magnitude," archaean astronomer Anthony Aveni told participants in the April conference.

Carrasco is involved in a number of projects, including a screenplay about the conquest of Mexico with actor Edward Olmos and director Robert Young. He was recently asked to be editor in chief of the forthcoming Oxford Encyclopedia of Mesoamerican Cultures, which will contain more than 500 articles from authors around the world.

In all of these publications, the real power of Carrasco's work seems to be in inspiring new ways of thinking. Says Fash, "This is precisely the kind of collaborative, crossfields perspective essential to real progress in our understanding of a time and place that are in many ways quite distant from our own but have much to teach us about humankind and the power of ideas, in a universal sense."
Rhode Island College Newsmakers

Flor de Maria Ribezzo was awarded the Katherine Murray Prize in educational studies at Rhode Island College (RIC) for demonstrating "excellence in preparatory teaching, a commitment to the profession, a strong academic record, and a commitment to fostering intercultural understanding and promoting greater equity" during her years of study at RIC. Ribezzo also has attended the University of San de Carlos in Guatemala, where she completed all her course requirements in a five-year program of study.

Hector J. Cardona, a native of Colombia, is a co-winner of the James Houston Award, given to the outstanding student(s) in geography for the year. Cardona, who served as a U.S. Marine in Operation Desert Storm and Operation Desert Shield, will be doing archeological research for the state after he graduates.

Bush Appoints Miami-Dade Trustees

Florida Governor Jeb Bush appointed seven prominent Miamians to the Miami-Dade Community College District Board of Trustees: Armando Bucolo, Jr. (1st photo); Carolina Calderin (2nd photo); T. Willard Fair; Helen Aguirre Ferré (3rd photo); Hank Klein; Roberto Martínez (4th photo); and Denise Mincey-Mills, who will help lead the college as it moves forward into the next century. Martinez and Klein were elected chair and vice-chair of the board, respectively.

Bucolo is an attorney in private practice. Calderin is chief executive officer of Pan American Hospital. Ferré is the editorial editor of Diario Las Americas, and Martinez is an attorney with the law firm Colson, Hicks & Eidson.

Benavides Receives Sprague Scholarship

Lee Sprague (pictured at 1.), who with her family established the $25,000 Lucy Sprague Scholarship in memory of her daughter, congratulates 1999 winner, Marcel Benavides (second from 1.), as he graduates from the John Marshall School of Law in Chicago, Ill. With him are his parents, Roselle and Luis Benavides of Detroit.

Benavides was selected as the second Sprague Scholarship recipient for his academic standing, his commitment to helping others, and his willingness to do public interest law. He has accepted a position with the Cook County State's Attorney's Office.

While at the University of Michigan, there were times that, as a Hispanic, Benavides felt out of place. But when he wanted to turn back, it was his neighborhood buddies who encouraged him to go on. "They'd say, 'You're the only one that's going to be somebody, so I continued,'" said Benavides.

Guerra Chairs Music Department

Dr. Dahlia Guerra, director and founder of the University of Texas-Pan American's (UTPA's) award-winning Mariachi, became chair of the UTPA department of music in June.

Guerra has spent time visiting area high schools and meeting with music directors. "There is a vast potential of untapped students that we need to reach out to," she said. "I also want to work closer with the cities."

She plans to propose a master's degree program in music at UTPA in response to requests from local public school band directors, many of whom hold a bachelor's degree in music and wish to continue their education.

International Journalists Cover Special Olympics

An unprecedented international journalist program brought reporters and broadcasters from around the world to cover the 1999 Special Olympics World Games and the Special Olympics Movement.

The 14 participating journalists, representatives of established media outlets, came from Chile, Croatia, Brazil, Estonia, Jamaica, Jordan, Kazakhstan, Latvia, Lebanon, 
Lithuania, the Palestinian Authority, Russia, South Africa, and Zimbabwe—countries where information about mental retardation is not widespread.

The program is part of a United States Information Agency $1.25 million grant to Special Olympics Inc.

**Martinez-Fayette Directing Human Resources**

Theresa L. Martinez-Fayette recently became the director of human resources for the Alamo Community College District (ACCD) in Texas.

"Not only is Ms. Martinez-Fayette highly qualified for the position," said ACCD executive vice chancellor Dr. Ernest A. Martinez. "The search committee was also quite impressed with her people skills and her understanding of the need for human resources departments to be customer friendly."

Martinez-Fayette has a bachelor's degree from Our Lady of the Lake University and is currently working on her master's.

**Sequin a Triple-Award Winner**

"I'm so glad I came here," said Amanda M. Sequin, who graduated from Rhode Island College (RIC) with degrees in early childhood education and Spanish, and plans to become a teacher.

Sequin won the Eleanor M. McMahon Award as the outstanding graduate of the RIC honors program, the Elementary Education Faculty Award, and the Nelson A. Guertin Memorial Award.

In addition, Sequin received a "first" at RIC. As a non-native Spanish speaker, she wrote her senior honors thesis in Spanish; the first in the history of the honors program to be written in a language other than English.

Among other jobs and activities, Sequin performed with the Spanish Theatre of RIC and served as its treasurer.

**Rodriguez and Vásquez Win Awards**

Writer Luis J. Rodriguez (pictured), author of the acclaimed *Always Running: La Vida Loca Gang Days in L.A.*, and artist Carlos Vásquez won three honors for their children's book *America Is Her Name—The Skipping Stones Honor Award, the Paterson Prize for Books for Young People, and inclusion in the Bank Street List of Best Children's Books for 1998.*

_America Is Her Name_, published in both Spanish and English editions by Curbside Press, emphasizes the power of individual creativity in overcoming a difficult environment and establishing self-worth and identity through the young girl America's desire and determination to be a writer.

**Garza-Roberts Heads Public Affairs at Health Science Center**

Cindy Garza-Roberts is the new associate vice president for public affairs at the University of Texas (UT)-Houston Health Science Center. "I am honored to have been selected," said Garza-Roberts. "I am very excited to serve not only UT-Houston but also the Hispanic community."

Garza-Roberts is fluent in Spanish and a founder and past president of the Houston Association of Hispanic Media Professionals. She was named to the YWCA Hispanic Women's Hall of Fame in 1991 and selected as the Hispanic Chamber of Commerce's Media Person of the Year in 1989.

She has a bachelor's degree from UT Austin and completed the executive management program at Simmons College in Boston.

**Vargas New DePaul University Dean**

Quinton Vargas recently became dean of the DePaul University School of Education.

A graduate advisor of doctoral studies for the University of Texas-San Antonio Educational Leadership program since 1991, Vargas was instrumental in recruiting the program's faculty, overseeing staffing and training initiatives, and managing a $1.4 million federal grant.

He has penned numerous scholarly works on bilingual education, cognitive development and verbal fluency, and teacher preparation and teacher training.

Vargas has a master's degree from the University of Texas and a doctorate from the University of Michigan. He also completed the post-doctoral training program at Harvard University's Institute for Educational Management.

**Cortes Participates in INROADS**

St. Joseph College (N.Y.) accounting major Hector Cortes participated in the INROADS/New York City, Inc. summer program for the second year in a row.

Founded 29 years ago, INROADS is a nationwide program that matches talented minority students with Fortune 500 companies. Students are provided with an ongoing working relationship with a corporation, including coaching, advice, and free tutorial support.

Cortes trained in the PricewaterhouseCoopers audit department in Toronto, Canada.

**Gonzales Wins National Award**

Dr. Beatriz Gonzales Robinson, a Barry University ( Fla.) graduate, won the 1999 National Career Development Association Graduate Student Research Award (NCDA/NSR) for her Ph.D. dissertation on career counseling.

The NCDA/NSR is a division of the American Counseling Association.

Gonzales, 35, examined Hispanic women's career development, focusing on work habits that have helped Hispanic women succeed, rather than concentrating on the obstacles. Ten in-depth interviews of Hispanic women employed in managerial positions or above at major U.S. corporations were conducted.

Her research revealed that successful
women were aggressive about their career paths, were constantly in preparation, and were heavily influenced by family ties.

Miguel Participates in America Reads Project

Nubia Miguel, who works with students at City Terrace Elementary School in California, was part of California State University-Los Angeles' federally funded America Reads project—a response to President Clinton’s challenge to every child in America to be reading at grade level by the year 2000. The collaborative reading program trains, monitors, and places Cal State-L.A. student “readers” with kindergarten to third grade children at seven inner-city schools.

Pictured here during the Los Angeles Times’ Reading by 9 Campaign Launch, Miguel (left) welcomes Governor Gray Davis to Cal State-L.A. as Jorge I. Ranga, America Reads project coordinator, and Chi Lin Kim, project field specialist, look on.

U.S. Migration Legislation Discussion at N.Y. City College

Bernardo Vega (pictured, center), Dominican ambassador to the United States, lectured at City University of New York's (CUNY) City College during an event sponsored by Alianza Dominicana, Dominicans 2000, and the CUNY Dominican Studies Institute.

New Citizens Sworn in at South Mountain

A ceremony celebrating the acquisition of citizenship by 350 immigrants was held during the 11th Annual Fiesta of Independence at South Mountain Community College in Arizona.

The Fiesta of Independence is the homegrown effort of community groups in the South Mountain Village, who developed the program to celebrate the positive aspects of the community. The program has become so popular that many immigrants request to be part of this particular ceremony because of the significance of the national holiday. This year's group of new citizens originated from 14 countries.

The Fiesta of Independence is sponsored by the South Mountain Interfaith Council, South Mountain Community College, and the South Mountain Chamber of Commerce.

In the News at Texas A&M-Kingsville

- Arturo Castillo, a senior Texas A&M University-Kingsville chemical engineering student, has been working on a climate control system for the university serpentari-

um that will simulate the natural environment of snakes. Using real-time climate conditions downloaded continuously from the internet, the system will provide the proper temperature, lighting, and humidity, reflective of each individual snake's habitat, to enable the snakes to reproduce in captivity. Biology professor Dr. John Perez and Dr. William Heenan, professor in chemical and natural gas engineering, have been working with Castillo.

- The South Texas Children's Art Colony, under the direction of Santa Barraza, assistant art professor and department chair at Kingsville, was held this summer to give at-risk children a chance to participate in positive, creative self-esteem enhancing activities. According to No Alvarez, executive director of the South Texas Youth Development Council, part of the program included the reading of culturally relevant children's books with illustrations by renowned artists of color.

Life University Graduate to Practice Chiropractic in Costa Rica

Dr. Yolanda Comacho Kortman, a recent graduate of Life University's (Ga.) Doctor of Chiropractic program, made history when she returned to her native Costa Rica. She is the first native Costa Rican in more than a generation to earn a Doctor of Chiropractic degree and return to her country to practice.

It is an honor to graduate from Lil University, and to return home to be involved in establishing chiropractic in my country,” Kortman said.

In addition to opening her own practice in the city of Alajuela, she plans to work as a liaison between Life University and Costa Rica's educational and governmental agencies. She will also teach chiropractic principles and spinal hygiene to students at the University of Costa Rica.
Mt. San Antonio Students Awarded Scholarships

Six Mt. San Antonio College (Calif.) students received Herbert Hafif scholarships. Claudia Lopez received a $1,000 scholarship, Dominick Sanchez and Irene Tamayo received $875 scholarships, Karen Battle and John Rojas received $500 scholarships, and Sandi Apodaca was awarded a $500 scholarship. The scholarships, first donated by attorney Herbert Hafif in 1994, are available to needy first-time community college students to help them with the cost of college. Hafif has donated $25,000 in scholarships to the college each year for the past four years.

Florida A&M Establishes Program in Dominican Republic

Florida A&M University has established a collaborative arrangement with the Pontificia Universidad Catolica Madre y Maestra, the largest private university in the Dominican Republic, to conduct classes and provide services.

As part of the Study Abroad Program, the university will establish an administrative office in the Caribbean capital to monitor 10-week student internships and organize language seminars and cultural excursions for small groups.

Under the direction of the university's Office of International Services and Summer Sessions, the program will serve university students and personnel, and community-based organizations.

General Motors Promotes Internet

General Motors (GM) and its partner MOUSE (Making Opportunities for Upgrading Schools & Education), a nonprofit organization providing volunteer workforce and technical support to New York City's public schools, recently wired actor Jimmy Smits' Brooklyn alma mater, Thomas Jefferson High School, for Internet access. GM helped MOUSE furnish the high school with Internet capabilities in honor of the March 10, 1999, launch of GM BuyPower, its benchmark online vehicle shopping and buying service.

Pictured here, Smits (third from left) helps Thomas Jefferson students Andy Gonzalez (left) and Richard Daley "plug in" to the Internet. Looking on are Ann Blakney, national director of GM BuyPower, Thomas Jefferson principal Lena Medley, and Andrew Rasiej, president of BuyPower.

Florida International Discusses Cuban Baseball

FIU Cuban Research Institute director Lisandro Perez believes the book is about much more than baseball: "Baseball is woven throughout different parts of Cubans' day-to-day lives," said Perez. "It intertwines with the economic, social, and cultural aspects of the lives of Cubans, and has for decades.

Echevarria is a Sterling professor of Hispanic and comparative literature at Yale University.

Calvin's Entrada Scholars Program Back for Ninth Year

For the ninth year, Calvin College (Mich.) held its Entrada Scholars Program, designed to prepare ethnic high school students for life after high school.

The three-week, summer school course that Entrada students take with Calvin students is a true college immersion program. The high school students not only take a regular class but also live in the residence hall, study in the library, shoot hoops in the gym, order late-night pizzas, do a service project, and get a heavy dose of computer skills, a typical college experience.

This year's 34 ethnic minority students represented many cultures, including Hispanic, African American, Asian, and Native American.

Colorado State Sponsors Youth Legislative Session

Latino high school students from around the country had a chance to experience the complex world of government as they participated in the 10th annual Lorenzo de Zavala Legislative Session, sponsored by Colorado State University and the National Hispanic Institute.

The Lorenzo de Zavala Youth Legislative Session is a weeklong conference where students engage in mock legislative and Supreme Court sessions exploring critical issues affecting the Latino community today. The event gives high school sophomores and juniors a better understanding of government and a chance to improve their skills in public speaking, organizational management, and constituency-building.

Colorado State assistant director of admissions Aaro Maldonado (pictured) was the conference coordinator.

La Raza Council Examines Retirement Survey

National Council of La Raza President Saul Yzaguirre, commenting on a new survey of Hispanic workers, said: "There is a wide gap between Hispanics who are doing well in terms of retirement planning and knowledge, and those who are not preparing sufficiently for their later years."

According to findings from the 1999 Retirement Confidence Survey released by the Employee Benefits Research Institute, while more than half of (55 percent) Hispanic workers polled said they are either very or
somewhat confident in personally having enough money to live comfortably in retirement, results indicate that Hispanic workers are less likely than others both to have calculated how much they will need for retirement and to have actually saved for retirement within their households.

All Americans should be concerned about this, given the projected growth of Latinos and their importance to the U.S. economy, said Yzaguirre.

Florida Legislators Promote Affordable Legal Education

Senators Betty Holzendorf and Mario Diaz-Balart (pictured) joined forces with other Florida legislators to fully support the efforts of Florida International University and Florida A&M University to establish law schools at their respective institutions. Members of the legislature believe that it is important for communities served by these universities to have access to a quality and affordable education.

Presently, Hispanics comprise about 14 percent of Florida’s population; African Americans comprise just over 15 percent. These groups represent only six percent and two percent of the Florida Bar’s membership, respectively.

Other supporters of the joint initiative include: Senators Jim Hargrett, Kendrick Meek, and Durvis Logan; Representatives Willie Logan, Rudy Garcia, Gaston Cantens, Carlos Lacasa, Frederica Wilson, Alex Villalobos, Al Lawson, and Al Reddick.

News from University of South Florida

USF—University of South Florida (USF) professor and director Kathleen del Peña McCook received a Distinguished Award of Merit from the Hispanic Libraries Education Foundation for organizing the Library Institute for Youth of Hispanic Heritage

- Professor Harry Vanden observed the Venezuelan presidential election with President Jimmy Carter and Chilean President Patricio Aylwin
- Professor Maria Eformes won a Fulbright Fellowship. She is writing a book on the Spanish Jews of Greece.
- Professor Alejandro de la Fuente moderated a seminar in Cuba, “Nationality, Race, and Citizenship in Cuba, 1860-1920.”
- Patsy Feliciano became assistant director of admissions.
- Nationally, USF ranks 28th among colleges and universities in the number of bachelor’s degrees awarded to Hispanics.
- This year, the Office of Latin American & Caribbean Studies hosted 53 Brazilians for three weeks of intensive studies, and awarded seven Passport Scholarships for formal study in Costa Rica, Panama, and Brazil.

United States International-Mexico Holds Summer Tours

The Mexico City campus of United States International University offered two academic tours this summer.

The Sacred Landscapes of Mexico tour included visits to the Cacaxtla Pyramid and murals, and the Huejotzingo Franciscan church and convent. In Pueblo, participants visited the Zocalo (town square), cathedral, and Amparo Museum. Trips also were taken to Oaxaca and Mita.

The Mayan Myths, Moons, and Minds tour provided an in-depth look at the Mayan culture, a foundation of present-day Mexico. Participants explored Merida, Tuxcuyil, Temozon, and Oxumal: visited sites of Kabah, Sayil, and the Cave of Loltun; and enjoyed a trip to Dzibilchaltun and Puerto Progreso.

Hispana Leadership Institute to Hold Fellowship Program

The National Hispana Leadership Institute will hold its Year 2000 Leadership Program, beginning in February and ending in September 2000. The intensive leadership program provides candidates with training in public policy, leadership skills, strategic management, and race, class, and gender issues. The sessions will be held for four weeks—one week at a time at Harvard University, San Juan Bautista, the Center for Creative Leadership, and in Washington, D.C.

The program is for Hispanic women—at least 26 years old—of integrity who have demonstrated the potential to move into greater leadership roles, and are interested in impacting local and national issues.

Mt. San Antonio Theater Students Honored

Mt. San Antonio College (Calif.) theater students were honored by the Kennedy Center/American College Theater Festival for the Mt. San Antonio College theater production of "Terra Nova."

Laurel Saxler and Marcel Tjoie receive merit achievement awards. Andrew Grumbacher, Eddie Rojas, and Jin Suh were nominated to participate in the Irene Ryan Acting Competition that will be held in February at the University of Las Vegas.

El Salvador Consulate Honors Rancho Santiago

The Consulate of El Salvador in Santa Ana, Calif., honored the Rancho Santiago Community College District’s partnership with Don Bosco University in El Salvador.

Spanning three years, the college district relationship with Don Bosco University ranged from providing technical assistance to cultural and sport team exchanges. Beginning in 1995, when a nine-member team from the college district visited the university in the city of Suapango, El Salvador, the project achieved its goal to establish formal ties between the institutions for mutual benefit.

"The assistance provided by the Ranch Santiago Community College District has been critically important to the university and to our country," said Ana Coralia de More Gaudry, consul for El Salvador.

Texas El-Paso Helps Change Face of Medical Workforce

With one of the highest Hispanic student acceptance rates in medical schools throughout Texas, the University of Texas El-Pa...
(UTEP) is helping to improve the medical workforce’s poor record of keeping up with growing racial and ethnic diversity in the United States, by taking students who might not have the means and giving them the boost they need.

For 1999 high school graduate Ruby Navarro, who decided to pursue a career as a medical researcher in either forensics or pathology, going to med school once seemed like an impossible dream. UTEP is making the dream a reality.

"Many people don’t realize that UTEP offers these kinds of educational opportunities," said Ray Jones, lab instructor for UTEP’s Hispanic Center of Excellence pre-med program and a member of the interviewing committee for the UTEP-UT Medical Branch at Galveston Early Medical School Acceptance Program.

**Brazilian Executives Study at American University**

The Kogod School of Business at American University in Washington, D.C., hosted 30 mid-level Brazilian executives and MBA students during a three-week intensive study program in July. The program gave students an opportunity to experience learning in an international setting.

Participants completed 72 hours of study in four areas: international marketing, electronic commerce, portfolio management, and international finance. Field trips included visits to the U.S. Senate, the Department of Commerce, the International Monetary Fund, the World Bank, and the Brazilian Embassy.

**PUBLICATIONS**

**Tropical Town and Other Poems**

by Salomón de la Selva

Lovers of poetry have considered long-lost poet Salomón de la Selva to be a master whose lyrical verse made him a poet for all the Americas. This, de la Selva’s little-known first collection, written entirely in English, employs traditional rhyme, meter, and forms.

Disidentifications: Queers of Color and the Performance of Politics

by José Esteban Muñoz

In this book, author José Esteban Muñoz looks at how those outside the racial and sexual mainstream negotiate majority culture—not by aligning themselves with or against exclusionary works but by transforming these works for their own cultural purposes. Muñoz calls this process “disidentification.”

Prison of Women: Testimonies of War and Resistance in Spain, 1939-1975

by Tomasa Cuevas

This book—translated and edited by Mary F. Giles—presents oral testimonies of women incarcerated following the Spanish Civil War.

The primary voice in the collection, Tomasa Cuevas, spent many years in prisons throughout Spain as a political prisoner. After the death of Franco in 1975, Cuevas began to collect oral testimonies from women she had known in prison as she traveled throughout Spain recording their stories.

The Cubans

This documentary takes a look at Cuba and the daily life of Cubans 30 years after the Revolution. Away from Havana, as removed as possible from the promoters of the official Party line on the one hand and the dissidents on the other, the program seeks to show how ordinary people live out ordinary lives so close to the United States and yet so far.

(Spanish with English subtitles 45 min. color) Item #FFH 2251

Bilingualism: A True Advantage

This program looks at a nationally recognized bilingual education program at a San Antonio elementary school; it follows a group of college students who are realizing the professional and personal benefits of being able to speak two languages; and it concludes with actor Cheech Marin sharing his views on the importance of cultural identity.

(28 min. color) Item #FFH 4023

Ernesto Cardenal: Cantoico Cosmico

This program uses computer imagery and on-screen Spanish text to explore Cardenal’s musical masterpiece of political cosmology. Rare interviews with the Nicaraguan poet are interwoven with excerpts from the legendary poem “Cantoico Cosmico.”

(Spanish, 90 min. color) Item #FFH 6807

The JFK Tapes: Inside the Cuban Missile Crisis

This program, using tapes made during the Cuban missile crisis, lets us listen in as top U.S. officials grapple with the dilemma of how to get the Russians to withdraw from Cuba or failing that, how the United States should proceed. The actual conversations are a chilling reminder of how close the world once came to nuclear war in 1962.

CONFERENCES

CUPA National Conference and Expo ‘99

October 3-6
CUPA (College and University Personnel Association) will hold its national conference and expo for vice presidents, directors, and managers of human relations departments in colleges and universities. Topics relate to employee benefits and compensation, financial retirement planning, health/life insurance, among many others. At the Westin Seattle Hotel in Seattle, Wash.

Contact: Rebecca Mangan, (202) 429-0310 ext. 387, e-mail: <mangan@cupapnet.cupa.org>, Web site: <www.cupa.org>

Education Connections ‘99

October 4-5
Study USA-Mexico ’99

October 7-9
The U.S. Trade Center, Department of Commercial Service, and Kwa Expositions, Inc., are hosting the 2nd annual Study USA-Mexico ‘99 education fair in Mexico City. In addition, Kwa is offering Education Connections ’99 in Guadalajara. This year’s recruitment fair not only focuses on student recruitment but also promotes dialog between Mexican and American universities to initiate articulation agreements.

Contact: Charlotte Adams, (512) 512-5100, e-mail: kwaexpo@springsprings.com

ACE: Educating a Nation (VII)

October 28-30
The American Council on Education’s Division of Access and Equity Programs Office of Minorities in Higher Education is sponsoring its “Educating a Nation” national conference on diversity and improving the participation of students of color in postsecondary education.

Contact: 1-800-382-0315, e-mail: lac homosexual@ace.nche.edu, Web site: <www.nche.edu>

University of South Carolina—“The Minority Student Today”

October 10-15
Conference on recruitment, retention, and success of minority students today. Sponsored by the University of South Carolina Division of Regional Campuses and Continuing Education; in cooperation with University of the Incarnate Word in San Antonio, Texas.

Contact: (803) 748-9441 or 2260, e-mail: <conf@gwu.sc.edu>, Web site: <www.sc.edu/conted/rmt.htm>

Online Learning ’99 International Conference and Performance Support ’99 Exposition

October 17-20
The most innovative ways to develop and deliver online learning will be presented and demonstrated at these companion expos sponsored by Lakewood Publications. At the Los Angeles Convention Center.

Book Review

by Isabel Schon, Ph.D.

Editor's Note: This is "Part Two: Hispanics and Books: Recent Books for Adolescents" of a special invited submission. See the August 13th issue for "Part One: Longtime Favorite Books: Recent Spanish Renditions for Adolescents."

Books in English about Hispanics/Latinos for adolescents vary tremendously in literary quality and reader appeal. The following is a wonderful selection of recent books that will appeal to adolescents searching for deeply moving personal reflections; honest coming-of-age novels or memoirs; touching poems about love, friendship, and death; or a well-designed ready-reference guide as well as an informative annotated chronology about wars, battles, and hostilities in the Americas.

Much more mature and intense than Cofer's previous An Island Like Us: Stories of the Barrio, this collection of fifteen stories and poems reflects on such personal topics as her parent's marriage, her father's "demisexual" night job and his unexpected death, her Catholic-school education, her first love, and the ever-present tensions with her mother. These are not light-hearted coming-of-age stories and poems; rather, they are interconnected deeply moving reflections focusing on the tensions between Puerto Rican immigrant parents and an American-influenced adolescent heavily affected by the trends of the late 1960s.

Set in Panama in the 1950s amid the prevailing machismo in which "women live their lives under the thumb of one man or another. The father, the lover, the husband, the son. The priest that won't marry you...", this evocative, coming-of-age novel tells about twelve-year-old Delia, who is constantly bullied and dominated by her older sister, María Elena. In her quiet, resourceful manner, Delia manages to piece together family secrets that explain her mother's sudden anger and her sister's close relationship with their mother. This is indeed a touching Latino family saga with the added flavor of Panamanian politics, "carnaval"-time exuberance, and sibling rivalry.

Set in Panama in the 1950s amid the prevailing machismo in which "women live their lives under the thumb of one man or another. The father, the lover, the husband, the son. The priest that won't marry you...", this evocative, coming-of-age novel tells about nine-year-old Delia, who is constantly bullied and dominated by her older sister, María Elena. In her quiet, resourceful manner, Delia manages to piece together family secrets that explain her mother's sudden anger and her sister's close relationship with their mother. This is indeed a touching Latino family saga with the added flavor of Panamanian politics, "carnaval"-time exuberance, and sibling rivalry.

More than 300 entries emphasizing the history, achievements, and creations of Puerto Rican people in the 20th and, particularly, the 20th centuries are included in this ready-reference guide. Beginning with an historical introduction and a chronology of important events, readers will find such high-interest topics as "Napoleon," "valsa," and "machismo" as well as the political leaders, poets, novelists, painters, and musicians who are, according to the authors, at the core of Puerto Rican culture.

From the discovery and conquest of Latin America, including the occupation of Puerto Rico in 1898, the conquest of Cuba in 1911, and the Chichina massacre in 1911, to the Panama campaign (1989) and Haitian operation (1992), to the Chilean general Pinochet's retirement in 1998, this annotated chronology provides a quick overview of past conflicts in the New World. Numerous black-and-white engravings, paintings, drawings, and maps provide additional information about the wars, battles, and hostilities in the Americas. Key historical events such as the Alhambra de Granaditas, Mexico (1810), the Alamo (1836), "Cinco de Mayo" (1862), and others are succinctly described, providing readers with basic information about the military conflicts since the arrival of Columbus. The only caveat in this well-designed chronology is the insufficient index that includes names of individual nations but lacks countries, battles, and others.

Revered by many as the national hero and cultural icon of Cuba, José Martí's bilingual collection includes excellent English renderings of facsimile pages of what is described as Martí's spiritual autobiography. A well-done introduction by the translator explains that each "poem captures an experience, a sensation, or a moment which shaped the poet and the man." From Martí's patriotic verses, to his famous love poems, to his poems about friendship and death, this collection is a wonderful testament to Martí's literary genius and political leadership.

Following her engaging life story, When I Was Puerto Rican (1993), Santiago's new coming-of-age memoir begins with her family's arrival in Brooklyn in 1961 and recounts her mother's objections to her children's "American" interests, the junior high school gang that made her life a terrible nightmare, her grandmother's drinking, her mother's constant pregnancies, the embarrassing visits to the welfare office, and her own successes at the Performing Arts High School as well as her first boyfriends and sexual experiences. Especially touching are Santiago's feelings toward her strict mother, who, despite adolescent quarrels, she loves and understands. This is indeed a wonderful memoir about an immigrant family's experiences in New York amid the perils of poverty and the love of family and Puerto Rican culture.

Dr. Isabel Schon directs the Center for the Study of Books in Spanish for Children and Adolescents and is among the founding faculty at California State University-San Marcos. Her honors include the 1992 U.S. Role Model Education Award presented by the U.S.-Mexico Foundation, 1992 Denali Press Award from the American Library Association, and 1987 Woman's National Book Award.

SOCIOLOGY OF GENDER
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position in Gender at the Assistant Professor level, anticipated to begin in the Fall 2000. Additional expertise in one or more of the following areas would be desirable: family, race and ethnic minority, or research methods.

Teaching responsibilities: include instruction in Gender, Sociology of the Family, Race and Ethnicity, and Research Methods. Normal teaching load is three courses per semester. The Department contributes to the Women's Studies, American Studies, Ethnic Studies, Peace and Justice, and Legal Studies Certificate programs as well as the social science core offerings in the General Education Curriculum.

Qualifications: Candidates must have a university teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate in sociology, and the ability to work in a culturally diverse environment and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Michael J. Webster, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

GLOBALIZATION
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position at the Assistant Professor level, anticipated to begin in the Fall 2000. We are interested in candidates who specialize in any aspect of globalization, including global environmental issues, international migration, development, or the international division of labor, women in development, cultural globalization, inequality, etc.

Teaching responsibilities: may include instruction in Globalization, Global Population and Consumption, Social and Environmental Inequality, Women in Development, International Racism, and issues in Sociology graduate courses. Normal teaching load is three courses per semester. The Department contributes to the Women's Studies, Latin American Studies, Ethnic Studies, Peace and Justice, and Legal Studies Certificate programs as well as the social science core offerings in the General Education Curriculum.

Qualifications: Candidates must have a university teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate in sociology, and the ability to work in a culturally diverse environment and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Michael J. Webster, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

COORDINATOR OF EXPOSITORY WRITING
Pending approval and funding, the Department of Communication Studies at the University of San Francisco invites applications for a full time, tenure-track position in Expository Writing at the Assistant or Associate Professor level, anticipated to begin in the Fall 2000. The Department of Communication Studies incorporates English as a Second Language, Expository Writing, and Speech Rhetoric.

Responsibilities include: coordinating the undergraduate Expository Writing program, teaching two to three expository writing courses per year, and collaborating with other Communication Studies faculty to advance curriculum development and to integrate speech and writing as communication skills.

Qualifications: Evidence of teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate, and the ability to work in a culturally diverse environment and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Stephanie Vandrieke, Chair, Expository Writing Search Committee, Department of Communication Studies, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

Established as San Francisco's first institution of higher learning in 1855, the University of San Francisco presently serves 8,500 students in the arts and sciences, business, education, nursing, law, and professional studies. The University is a private, Catholic and Jesuit Institution, and particularly welcomes candidates who will positively contribute to such an environment.

INTERNATIONAL MEDIA/VIDEO OR MULTIMEDIA PRODUCTION
Pending approval and funding, the Media Studies Program at the University of San Francisco invites applications for a tenure-track position in International Media with a specialization in Production, at the Assistant Professor level, anticipated to begin in the Fall 2000.

Teaching responsibilities: may include instruction in International Media Studies, globalization, Media and Technology, and/or Video and Multimedia Production.

Qualifications: Candidates must have a university teaching experience, evidence of scholarship, an earned doctorate, and the ability to work in a culturally diverse environment and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Bernadette Barker-Plummer, Chair, International Media Search Committee, Department of Media Studies, University of San Francisco, 2130 Fulton Street, Harney 243, San Francisco, CA 94117-1080.

Applicants should submit a letter of application, curriculum vitae, three graduate transcripts, and a description of research plans. Copies of recent research papers, statement of teaching philosophies, evidence of teaching abilities, including copies of course evaluations and letters of recommendation, are also required. The Department of Communication Studies reserves the right to interview applicants without further consideration.

For information on San Francisco's culture, history, and location, visit the City of San Francisco's official website.

NIH Undergraduate Scholarship Program (UGSP)

If you would like to be trained and mentored at the cutting edge of biomedical research while receiving scholarship support, the UGSP may be for you!

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government’s leading biomedical research and research training agency, offering scholarships to qualified individuals to pursue undergraduate life sciences degrees.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

During each year of the award, scholars train for 10 weeks as paid employees in NIH research laboratories. They are assigned to mentors and participate in research seminars and developmental programs. Housing and transportation are provided. After graduation, 1 year of full-time research employment at NIH is required for each year of scholarship support.

You Should Apply If You:

Can demonstrate a deep interest in pursuing a career in biomedical research.

Can demonstrate being from a disadvantaged background.

Have a GPA of 3.5 or better or are in the top 25 of your class.

Are a U.S. citizen, national, or permanent resident.

Are enrolled or accepted for admission at a qualified accredited institution.

This is a special opportunity for special students.

For more information, contact: UGSP

Phone: 866-528-7689
TTY: 1-888-352-3001

Vanderbilt University
Peabody College of Education
and Human Development

Chair, Department of Teaching and Learning

Peabody College Vanderbilt University invites applications for the position of Department Chair in the Department of Teaching and Learning. We are seeking a senior scholar with demonstrable accomplishments in teacher education and a strong record of research on teaching, learning, or teaching education who can be an effective department advocate. This individual will lead the department in building on our strengths in graduate and undergraduate programs in research on teaching and learning in literacy, mathematics, and science and collaborative partnerships with schools using technology to support teacher education and commitment to the goals of diversity and multicultural understanding.

The Department of Education has a significant record of external funding and offers graduate and undergraduate teacher certification programs in early childhood, elementary, and secondary education. Graduate programs include coursework in instructional leadership and literacy, mathematics, education, science education and early childhood education.

Qualifications: Earned doctorate in education or related field; a strong record of scholarship and leadership sufficient to warrant appointment as the rank of professor and administrative experience.

Candidates are asked to submit a letter of application, statement of educational philosophy, curriculum vitae, and three letters of recommendation to Pat Thompson, Chair, Department Search Committee, Box 350 Peabody College, Vanderbilt University, Nashville, TN 37203. Telephone: 615-322-0941, Email: pat.thompson@vanderbilt.edu. Review of applications will begin December 1, 1999 and continue until the position is filled. For additional information, visit us at www.peabody.vanderbilt.edu.

Vanderbilt University is an affirmative action equal opportunity employer committed to increasing diversity throughout the university. Members of minority groups, women, and people with disabilities are strongly encouraged to apply.

PORTLAND STATE UNIVERSITY
ASSISTANT/ASSOCIATE PROFESSOR IN STRATEGY
School of Business Administration

http://www.sba.pdx.edu

The School of Business Administration at Portland State University seeks candidates for a tenure-track position in Business Policy at the beginning Fall 2000. Desirable candidates will also be able to teach business and related courses.

QUALIFICATIONS: 1) An earned doctorate in Business Administration at the time of appointment from an AACSB-accredited college or university; 2) Demonstrated ability to teach courses in business policy/strategy; and 3) Demonstrated research productivity in business policy/strategy or related fields.

The School of Business has 2,000 students enrolled in eight undergraduate options and over 400 students enrolled in MBA and other programs at the graduate level. Natural beauty and a vibrant economy make Portland one of America’s most livable cities.

Portland State University promotes equal opportunities for all individuals without regard to race, color, religion, sex, national origin, age, disability, sexual orientation, or veteran status. Send a letter of application, accompanied by a resume and three references to Professor Steven Brenner, School of Business Administration, Portland State University PO Box 751, Portland, OR 97207-0075, SteveB@pdx.edu

Initial review of applications begins July 21, 1999. The search will continue until the position is filled.

People of Color in Predominantly White Institutions
Beyond Diversity 101: Accountability, Implementation, Responsibility and Action

A two-day conference featuring:
Carlos Muñoz, Jr. "Diversity and the New American Identity"
Lena Wright Myers "African American Women and the Academy"
Molly Tovar and Wayne Powell "Building Diversity in Graduate and Professional Schools in Predominantly White Institutions"

This interdisciplinary conference is the fourth in an award-winning series exploring issues surrounding people of color in predominantly white institutions. It features nationally known keynote speakers, over 50 presentations representing more than 20 states and a number of other exciting activities.

Nebraska
PRESIDENT
COUNCIL OF GRADUATE SCHOOLS
WASHINGTON, D.C.

Nominations and applications are being sought for the position of President of the Council of Graduate Schools (CGS). The President serves as full-time chief executive officer of the Council, whose 45 member institutions conjoin 90 percent of the doctoral degrees and nearly 80 percent of the master's degrees annually in the United States. The President reports to the Board of Directors, serves as an ex officio member of the board, and is responsible for the organization's fiscal and administrative affairs. The President represents CGS among the other higher education associations and at national and international meetings, is principal spokesperson for CGS with appropriate federal, state, and private organizations, and recommends to the Board of Directors the annual budget and the problems of CGS.

QUALIFICATIONS
The candidate should have demonstrated success as a graduate dean and as a visionary leader with knowledge of all aspects of graduate education, including the role of research. The board expects the successful candidate to lead the organization in enhancing its research, in fostering partnerships, and in expanding the public relations capacity of CGS.

DETAILS
The appointment is to be effective July 1, 2000, although in special circumstances this date may be flexible. Salary terms will be competitive. Applications will be accepted until the position is filled. However, full consideration will be given to applications received by October 1, 1999. Letters of interest with curriculum vitae or nominations should be submitted to:

CGS Presidential Search Committee
Leonard N. Peters, Chair
Vice Provost, Research and Dean, Graduate School
Research and Graduate Studies
301 Burruss Hall
Virginia Polytechnic Institute and State University
Blacksburg, VA 24061-0243

CGS is committed to an inclusive graduate community and to diversity in its staff. CGS is an affirmative action/equal opportunity employer.

SOUTHWESTERN UNIVERSITY
DIRECTOR OF BUSINESS SERVICES

Southwestern University invites applications and nominations for the position of Director of Business Services. SWU, a unit of the Southwestern University System, is the seventh largest public university in Texas, with enrollment of over 21,000 and an annual budget of $133 million. SWU is located in the scenic Texas hill country at the headwaters of the San Marcos River in the community of San Marcos between Austin and San Antonio. Visit SWU at http://www.swtu.edu.

The Director of Business Services reports to the Vice President for Finance and Support Services. The Director administers the university's transportation services program and provides administrative oversight which includes financial statement preparation, supervision and strategic planning, the areas of mail services, university press, duplicating, central supplies, and telephone services. It is contemplated that the areas of oversight could be expanded at a later date based on the success of the new director.

Requirements: B.A. in Accounting, Finance, or Business Administration required, MBA and/or CGA preferred. Minimum of five years of increasing responsible financial administrative experience, preferably in an institution of higher education. Excellent oral and written communication skills are required. Experience in the administration of service-oriented units preferred. Demonstrated commitment to quality, customer service, staff development, diversity and the ability to work in a collaborative manner with various constituencies as administrators, faculty, staff, students and the community are required. The candidate must possess strong and demonstrated skills in spreadsheets-based analysis and have a broad knowledge of computer literature. Salary for this position is $46,796-58,428 per monthly, commensurate with qualifications and experience.

For Consideration: Applicants should send a completed SWTU application, a comprehensive resume, and contact information for three references, and a cover letter discussing qualifications for the position to:

Southwestern University Personnel Office
J.C. Kellam Building, Suite 340
601 University Drive
San Marcos, Texas 78666

Review of applications will begin August 19, 1999, and continue until the position is filled. A non-discrimination policy is in place for applicants in Texas. Review of applications will begin August 19, 1999, and continue until the position is filled. At this time, the University is an Equal Opportunity/Affirmative Action Employer.
Arizona State University West School of Management (SOM) is currently seeking tenure-track faculty members to teach at the undergraduate and MBA levels. The SOM provides an excellent environment for high-quality research and teaching. We offer state-of-the-art facilities and standards of excellence in both research and teaching.

A Bachelor’s in Accounting, as well as a Postbaccalaureate Certificate in Accounting, are offered through the SOM. The Accounting program is separately accredited by the AACSB. The B.S. in Global Business degree provides students with opportunities to concentrate in information systems, marketing, financial management, human resource management, or international studies. Qualify MBA students are attracted to the on-campus evening MBA program, as well as our campus MBA programs at The Scottsdale MBA, those offered at local corporations, and the weekend, web-based MBA. MBA students have the opportunity to participate in a dual degree program with Thunderbird (The American Graduate School of International Management) that allows them to graduate with both an MBA and MIM. The baccalaureate and MBA programs are accredited by the AACSB.

As part of the multcampus vision of Arizona State University, ASU West serves nearly 3,000 junior, senior and graduate students in its modern, growing campus in northwest Phoenix. The full-service campus features a large resource library, state-of-the-art computer-linked classrooms and labs, and a full array of student services.

ASU West faculty are expected to be interested in integrating teaching and scholarship, interdisciplinarity, community collaborations, and demonstrating a commitment to the importance of diversity.

**ASSISTANT/ASSOCIATE PROFESSORS OF ACCOUNTANCY**

Applications and letters of recommendation are due by May 15, 2000 to: Chair, Science Department, Eugene Lang College 65, West 133rd Street, New York, NY 10027. Applications should be sent to: Chair, Science Department, Eugene Lang College 65, West 133rd Street, New York, NY 10027. Because we are committed to an educational environment at the forefront of the multicultural world in which we live, women and men of color are particularly encouraged to apply. WIOE

New School University

Division of Student Affairs

San Diego State University seeks nominations and applications for the position of Associate Vice President, Enrollment Management. The Associate Vice President position involves providing leadership at the highest level for all enrollment-related operations on campus, including recruitment, admissions, retention, including the Office of Admissions and Records, Student Outreach Services, the Educational Opportunity Program, the Student Resource Center, Testing, and International Student Affairs.

San Diego State University is the largest of the California State University system with a diverse student population of over 30,000. The university is currently designated a Doctoral University II by the Carnegie Foundation and anticipates meeting the criteria for Research University II status in the near future. Having just completed its centennial year, SDSU offers baccalaureate degrees in 70 areas, masters in 54, and the doctorate in 10. Additional information about SDSU is available at http://www.sdsu.edu.

The Associate Vice President ensures the management of the diverse and essential tasks necessary for managing the university's enrollment plan to recruit and retain high-quality student population. The Associate Vice President must possess a Master's degree in student services, experience in higher education administration, and a strong understanding of enrollment management principles and practices.

The successful candidate must demonstrate previous successful recruitment and enrollment management initiatives, possess excellent analytical abilities and significant operational and financial management experience, demonstrate strong written, oral, and interpersonal communication skills, and be able to work as part of a team.

APPLICABLE/NOMINATIONS: Nominations are welcome. Candidates must apply directly by sending a letter addressing qualifications and interests to the Office of the Vice President for Student Affairs, Search Committee, Associate Vice President, Enrollment Management, San Diego State University, 9500 Campanile Dr., San Diego, CA 92182. Fax: (619) 594-6009, TDD number (619) 594-8057.

SDSU is an Equal Opportunity/Affirmative Action Employer and does not discriminate against persons on the basis of race, religion, national origin, sexual orientation, gender, marital status, age or disabilities.

DEAN
COLLEGE OF ARTS AND SCIENCE

Responsibilities: The Dean is responsible for the academic leadership of the College including, but not limited to, academic programming, the enhancement of programs and curriculum, accreditation, recruitment of faculty, faculty development, and evaluation, student enrollment, advising and placements, improvements of physical facilities and equipment, and the allocation of resources. The Dean is responsible for fundraising, for increasing diversity, and support of university-wide goals.

Qualifications: Miami University will consider candidates who have demonstrated excellence in leadership in either an academic or professional setting. Candidates must be able to provide evidence of ability to relate well to students, faculty, staff, and alumni, and to the leadership of the larger community. Desirable qualifications include: earned doctorate in one of the disciplines represented in the College; excellence in teaching, research, scholarship or creative activities; demonstrated commitment to diversity; significant administrative experience and proven ability to attract external support. Successful candidate must qualify for appointment at rank of Professor in one of the departments in the College.

College of Arts and Science: The College has over 500 full-time faculty and more than 2,000 undergraduate students in 18 departments and several interdisciplinary programs on the Oxford campus. There are 60 additional FTE faculty assigned to regional campuses in Hamilton and Middletown, Ohio. The College awards approximately 700 undergraduate majors and 200 graduate students and is the largest of the University's 13 instructional divisions. Graduate degrees are awarded in most departments and eight departments offer Ph.D. All departments and programs are on a two-year program review cycle. The College supports numerous research projects and - in collaboration with the Universitywide Research Office - The Dean assists the College report to the Provost.

Application: Applications should include a letter of application and a resume addressing the qualifications listed above. Applications are invited to provide a preprint, manuscript, and for number of publications. Please also provide three references who will be contacted. All communications and applications should be sent to:

Prof. Karen K. Shaffer
Secretary of the University
101 Roodham Hall
Miami University
Oxford, Ohio 45056
Phone: (513) 529-3610; FAX (513) 529-1733

To ensure full consideration, application materials should be received by October 1, 2000. The position will remain open until a well-qualified candidate is identified.

The starting date is negotiable. Miami University offers equal opportunities in employment and education. For more information, visit our Home Page http://miamioh.edu

Environmental

CSU Cleveland State University

Visiting Research Director

The Center for Environmental Science, Technology and Policy (ESTP) at Cleveland State University is seeking applicants for the position of Visiting Research Director/Visiting Professor for a term of one year to eighteen months. The position is not guaranteed at this point and is contingent on identification of funding from existing budgets. This individual would be responsible for bringing together research teams and producing successful proposals for significant research funding in one or two focused areas. The areas under consideration include, but are not limited to, Brownfield remediation, urban revitalization and sustainability, urban ecology, environmental education (K-12), environmental health and toxicology, urban environmental planning and environmental risk assessment. A major portion of the responsibilities of this individual will be to bring researchers together and lead larger teams. As such, it is an excellent opportunity for an experienced academic or researcher who would like to explore the possibilities of moving more into administration.

MINIMUM REQUIREMENTS: Ph.D. in any environmental field; tenure granted at 4-year institution, a record of publication in peer-reviewed journals and a track record of attracting research funds in at least one focus area. The successful applicant must have excellent oral and written communication skills.

PREFERRED QUALIFICATIONS: Experience leading large, interdisciplinary research teams, and knowledge of and some experience in environmental policy at the national level.

Applicants should send a resume and letter of interest to: Mark A. Turnio, Director, ESTP, Cleveland State University, 169 E. 22nd St., MC-219, Cleveland, Ohio 44114. APPLICATION DEADLINE: Open until filled. Cleveland State University is an AA/EOC committed to nondiscrimination on the basis of race, gender, or disabilities.
**DIRECTOR OF INTERNAL AUDIT**

**POSITION SUMMARY**

Reporting to the University President, the Director of Internal Audit is responsible for planning, implementing, and administering a comprehensive internal audit program. Major responsibilities include:

1. Create, manage, and provide oversight to an internal audit program at CSUF in accordance with the Standards for Professional Practice of Internal Auditing as published by the Institute of Internal Auditors.
2. Act as liaison for audits conducted by external auditors, including auditors from the offices of the State Controller, State Auditor, OIG, Chancellor’s office, other governmental agencies, and external auditors.
3. Assist internal personnel in responding to external audit reports and coordinate follow-up resolutions.
4. In consultation with the University administration and the Audit Committee, perform periodic risk assessment of internal controls and operations. Develop appropriate annual and long-range work plans for the internal audit department.
5. Plan and execute audits which determine the effectiveness of accounting controls, integrity of financial records, and soundness of internal control operations.
6. Analyze and evaluate audit reports. Audit findings are to include recommendations to resolve internal financial system control weaknesses, improve operations, and maximize revenues and reduce costs.
7. Provide written and verbal communication, as appropriate, of audit findings and recommendations to various levels of management, including the President and other administrators.
8. Provide alternative communications to the Audit Committee and report audit findings to the President and other administrators.
9. Review audit conclusions with the President and other senior administrators as appropriate.
10. Appraise and evaluate audit work in cooperation with internal auditors.
11. Appraise and evaluate internal auditors.

**QUALIFICATIONS**

Bachelor’s degree from an accredited two-year college or university is required. Possession of an appropriate advanced degree is preferred. Possession of either a valid certificate as a Certified Public Accountant or a certificate as a Certified Internal Auditor issued by the Institute of Internal Auditors (obtained by written examination). Minimum of two years of relevant professional experience with significant responsibilities in auditing management systems which has included developing, coordinating, and managing internal audits and analyzing, reviewing, evaluating, and developing management and financial procedures.

Additional knowledge, skills, and abilities required for this position include:

- Experience in auditing government accountability and standards.
- Knowledge of governmental accounting standards (GAAS) and auditing standards for not-for-profit organizations (ASSB).
- Experience in internal control systems and improvements.
- Experience in using computer software packages and computer systems.
- Experience in reviewing and analyzing business systems and procedures and providing recommendations for improvements.
- Knowledge of data and information systems.
- Experience in managing projects.
- Experience in managing resources.
- Experience in investigations of financial fraud and asset misappropriations.
- Knowledge of investigative theories and methodologies.
- Experience in investigative-related work.

**APPLICATION PROCEDURE**

To ensure full consideration, applications must be postmarked by September 15, 1999.

Applications must include:
- A letter of interest summarizing qualifications and relevant experience.
- A current resume and contact information for references. Applications should be directed to: Director of Human Resources, Fullerton, CA 92831-5010.

New Jersey City University
2039 Kennedy Blvd., Jersey City, NJ 07305

In an affirmative action, equal opportunity employer, the University especially welcomes and encourages applications from women and minority candidates.

Director, Division of Neuroscience and Basic Behavioral Science
National Institute of Mental Health
National Institutes of Health

The National Institute of Mental Health (NIMH) is seeking applications for the position of DIRECTOR, DIVISION OF NEUROSCIENCE AND BASIC BEHAVIORAL SCIENCE, a major component of the Extramural Program.

The Director of the Division of Neuroscience and Basic Behavioral Science (DNBBS) will provide leadership in the overall scientific administration of a comprehensive extramural research program in mental health by stimulating the expansion of resources for mental health research both nationally and internationally; and actively participate in determining program priorities and funding levels. The Director, DNBBS, will oversee a budget of approximately $250 million per year and a staff of 55 employees.

As Director, DNBBS, the incumbent will be responsible for the development, direction, coordination, and evaluation of grant programs and activities of the Division. The Division supports a wide range of basic and clinical neuroscience research, genetics and therapeutics research, basic behavioral research, research training resource development, and research dissemination. To further understand the etiology, treatment, and prevention of brain disorders.

The ideal candidate should possess: leadership and management experience in a basic, clinical, or behavioral research program of national standing; a M.D. or Ph.D. degree in Psychiatry, Psychology, Neuroscience, Psychobiology, or related field (or equivalent training); extensive knowledge of and experience in the neurosciences behavioral sciences, or psychobiology and the relationship to mental illness and related brain disorders. Applicants should provide documentation of how they meet the following requirements: 1) Knowledge and ability to lead a scientific program of national and international scope involving neuroscience and basic behavioral sciences. 2) Ability to provide leadership management and vision to a large multi-disciplinary research program of national scope and complexity with extensive managerial and executive level responsibilities.

This position is located in the Headquarters of NIMH in Bethesda, Maryland, and is a tenured/permanent position in the Senior Executive Service (SES). Annual salary range is $110,351 to $125,900 per annum, depending on qualifications. Physicians may be eligible for a Physicians Comparability Allowance of up to $20,000 per year. A recruitment bonus of up to 25% may be available to a non-Federal candidate selected for this position OR a relocation bonus of up to 25% may be available to a permanent Federal employee who must relocate to accept this position, subject to individual approval. The full range of generous Federal benefits, retirement, and vacation are included.

HOW TO APPLY: Applicants must submit a curriculum vitae and resume. Application for Federal Employment, OF-612, or any other equivalent written format that addresses the requirements AND a bibliography. Application procedures and qualification requirements may be accessed on the NIH Web site at http://www1.od.nih.gov/oc/hr/fin/omb/vacancy.htm.

SEND APPLICATIONS TO: Ms. Margot Darby, NIH Personnel Management Branch, 6201 Executive Boulevard, Room 8151, MSC 9661, Bethesda, Maryland 20892-9661 (domestic), U.S. Mail; CRS Rockville, Maryland 20852 (FedEx, UPS, etc.). Applications will also be accepted via e-mail and may be sent to mdarby@mail.nih.gov. If you need further information about this position you may contact Ms. Darby at 301-435-1004.

Selection for this position will be based solely on merit with no discrimination for non-merit reasons such as race, color, religion, gender, national origin, political affiliation, marital status, age, sexual orientation or membership or non-membership in an employee organization.

APPLICATIONS WILL BE ACCEPTED THROUGH SEPTEMBER 30, 1999.

NIH is an Equal Opportunity Employer.

tive environment. We particularly encourage applications from individuals who would enhance and diversify our workforce.

AA/EO
Assistant/Associate Professor
Restorative Dentistry

Temple University has a Presidential and 2 Dean appointments for full-time faculty positions in the Department of Restorative Dentistry, available July 1, 1999. Responsibilities include didactic and clinical teaching of predoctoral and postgraduate (AEGD) students in the disciplines of restorative dentistry, dental materials, and general dentistry. Research/creative activity is encouraged. Applicants should have a strong background in teaching and clinical practice, with evidence of academic accomplishment. Preference will be given to candidates with postgraduate training in dental materials, general dentistry, prosthodontics, and operative dentistry, DMD or DDS degree and Pennsylvania dental license are required. Salary and academic rank commensurate with experience and qualifications. Interested applicants should send a cover letter and curriculum vitae to Temple University School of Dentistry, Room 415-CP, 3223 North Broad Street, Philadelphia, PA, 19140. Minority and female applicants are encouraged to apply. An equal opportunity/affirmative action employer.

OFFICE OF GRADUATE STUDIES

ASSISTANT DEAN

Dartmouth College invites applications for the position of Assistant Dean of Graduate Studies. This position requires a Master's degree and at least 1 year of relevant experience in higher education or the equivalent. The successful candidate will possess excellent verbal and written communication skills, have experience in advising students, preparing/maintaining budgets, be adept at articulating policies, have strong supervisory, and be a strong advocate for graduate education at the department and school levels. The Assistant Dean of Graduate Studies coordinates and manages all aspects of the graduate programs in Arts and Sciences, Engineering, and the Medical School, offering the Master's and Ph.D. degrees in these fields. This individual will manage the Graduate Studies Office, coordinate graduate program registration, administer graduate minors, develop program, and manage various student databases from which reports are prepared.

Interested individuals should submit a letter of application outlining experience and qualifications, a curriculum vitae, and the names, addresses, telephone numbers, and names of three individuals from whom the search committee can contact for letters of recommendation. Application review will begin on September 15, 1997, and continue until the position is filled.

Dartmouth is proud of the College's record in full support of Equal Opportunity/Affirmative Action recruitment at all levels of the university. Thus, applications from women and minority group members are strongly encouraged.

Georgia Department of Technical and Adult Education:

PRESIDENT OF SAVANNAH TECHNICAL INSTITUTE

Visit our Website at http://www.taege.org. Deadline for receipt of application: April 1, 1997. Full consideration, application will be terminated immediately.

Plattsburgh State University:

INSTRUCTIONAL TECHNOLOGY SPECIALIST

The Division of Library and Information Services of Plattsburgh State University of New York seeks a well-qualified, service-oriented professional for the position of Instructional Technology Specialist.

Responsibilities: Working with faculty and staff in the design and production of presentations and web materials to support instruction, serving as a consultant to faculty and staff in the Instructional Technology Resource Center, offering workshops on the creation and effective use of technology-assisted presentations and web sites, assisting the Instructional Technology Coordinator in the production of help sheets and online documentation, and coordinating technology projects, and working with divisional program groups in the planning and implementation of initiatives.

Qualifications: Master's degree at least one year of relevant experience in the creation or support of technology-enhanced learning resources and materials.

Salary: Beginning at $32,000 based on experience. Excellent benefits package.

Applications from women and minority candidates are especially encouraged. Plattsburgh State University is an affirmative action, equal opportunity employer.
STATE UNIVERSITY OF NEW YORK
CHANCELLOR

The Board of Trustees of the State University of New York, invites nominations and applications for the position of Chancellor, the chief executive officer of the nation's largest and most comprehensive university system.

The State University of New York is a unified statewide system of 64 campuses committed to serving New York with pride and academic excellence. It includes 30 community colleges, 5 residential colleges of technology, 5 specialized colleges, 5 statutory colleges (4 at Cornell University and 1 at Alfred University), 13 arts and sciences colleges, 4 research universities and 4 academic health centers. The University enrolls over 375,000 students, employs 75,000 faculty, administrators and staff and has 1.6 million alumni and an all funds budget in excess of $6 billion.

Reporting directly to the Board of Trustees, the Chancellor is responsible for the effective management of this complex organization and ensuring that State University students receive an education of the highest quality with the broadest access. This individual will provide the vision and the leadership to take the State University into the next millennium. The Trustees seek a collaborative executive to continue the process of change that is rapidly making the system one of the nation's finest public universities.

The Board of Trustees seeks an outstanding individual to be the Chancellor who has the highest qualities of intellect and character, an established reputation and the credentials appropriate to the leadership of a large public educational system.

The State University of New York System Administration is an E.O.E.A employer. Applications from women, minority persons, disabled workers and or Vietnam era veterans are welcome. Review of applications will begin immediately and continue until a new chancellor is named. Nominations and applications should be sent to:

E-mail: hr@pacificoaks.edu

Pacific Oaks College is an equal opportunity employer.
The University of Wisconsin-Madison, one of the top ranked research universities in the United States, invites nominations and applications for the position of Dean of the School of Nursing. The university seeks a talented and visionary leader who will lead the school in its mission to meet the research, instructional, and practice challenges of the 21st century.

The School of Nursing has a rich and honored history, dating back to 1883. It is located in Madison, WI, which has received national recognition for its quality of life. The school enjoys excellent collaborative relationships with the other members of the renowned academic health center, including University of Wisconsin Hospital and Clinics, UW Children’s Hospital, University Health Services, UW School of Pharmacy, UW Medical School, Wisconsin State Laboratory of Hygiene, and UW Comprehensive Cancer Center. In addition, a new Health Sciences Learning Center providing interdisciplinary, instructional facilities will be completed in 2003. The school has state-of-the-art research and instructional facilities, excellent resources for research and teaching, a federal grant supporting predoctoral and postdoctoral training, and a network of endowed faculty chairs. Academic offerings include predoctoral, doctoral, master’s, and baccalaureate programs for approximately 180 graduate and 400 undergraduate students, as well as technologically sophisticated outreach programs. More comprehensive information about the School of Nursing can be accessed at http://www.sosw.edu/sosn index.htm.

The dean provides leadership to the school in fulfilling its mission to generate and transmit knowledge basic to nursing practice, to provide quality education that prepares tomorrow’s leaders in basic and advanced professional practice, and to apply knowledge to current professional practice through continuing education, consultation, and research. This mission is congruent with the Wisconsin idea of service to the state as well as to national and international health priorities. As chief academic and executive officer of the school, the dean reports to the chancellor and the provost and leads a tenure track faculty of approximately 20, an instructional staff of approximately 36, and support staff of 46.

Major qualifications for this position include a proven record of administrative skills and successful leadership in higher education, nationally recognized academic accomplishments as a scholar and teacher that meet the standards for a tenured appointment as full professor at the University of Wisconsin-Madison, strong communication and fund raising skills, the capacity to relate effectively to the university administration, faculty, staff, students, and related university units to maintain and improve the quality of undergraduate and graduate instruction, research, outreach education, and public service, and a demonstrated commitment to diversity. The successful candidate will be expected to represent the school through interactions with external groups such as alumni, professional nursing groups, and other health professions.

The position will be available January 2000. Applications and nomination must be received by 8 October 1999 to receive consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations of individuals from underrepresented groups. Applicants should include a current curriculum vita and cover letter that describes how their strengths match the qualifications for the position, and what they see as challenges and opportunities in the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who request confidentiality will not be made public. However, the chancellor is required to release the names of the finalists who will be interviewed by the chancellor. Submit applications and nominations to:

Patricia Becker, PhD, MN, FAAN
Helen Dornette Schulte Professor
Dean Search and Screen Committee for the School of Nursing
University of Wisconsin-Madison
500 Lincoln Drive, 133 Bascom Hall
Madison, WI 53706
(608) 262-9337
Fax: (608) 263-5728

The University of Wisconsin-Madison is an equal opportunity/affirmative action employer.
OFFICE OF INSTITUTIONAL ADVANCEMENT

Plattsburgh State University of New York is seeking successful professionals for openings in the Office of Institutional Advancement. The openings are for full-time Publications and Graphic Designer and a full-time Staff Assistant.

**PUBLICATIONS AND GRAPHIC DESIGNER (PJ#2328-808)**

Responsibilities: The full-time Publications and Graphic Designer will manage and execute multiple projects with varying deadlines in an active news and publications office. The Designer will be responsible for the Design Office of Institutional Advancement publications and other printed materials, including invitations, flyers, campus newsletters, and the quarterly alumni magazine. The position involves producing web pages for Institutional Advancement and service to other areas of the College on a routine basis.

Qualifications: A bachelor’s degree in graphic design or comparable field of study and a minimum of two years professional experience. Knowledge of print, graphic design, and pre-press processes using desktop publishing and content management and proficiency with both PCs and Macintosh computers highly regarded.

Salary Range: $26,383-$35,000

**STAFF ASSISTANT (PJ#2327-808)**

Responsibilities: The full-time Staff Assistant will assist Director of Communications in coordinating the College’s media relations program to obtain recognition for the College on the local, state, national, and international levels. The Staff Assistant will write feature articles about students, faculty, staff, and university departments and programs for various campus publications; develop news releases and take photographs. The Assistant will also work with the Plattsburgh College Foundation and the Alumni Affairs Office in promoting events and development activities. The successful candidate will be expected to work some evenings and weekends throughout the year.

Qualifications: A bachelor’s degree in print journalism or English (writing) and a minimum of two years professional experience working with news media preferred. Demonstrated proficiency in written and verbal communication, interviewing, and time management skills essential. Proficiency in word processing on a PC or Macintosh and photography highly regarded.

Salary Range: $26,383-$35,000

Applications from women and minority candidates are especially welcomed. Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

The Chancellor Search Committee of the University of Minnesota, Morris (UMM) seeks nominations and expressions of interest for the position of Chancellor, the chief executive officer of the institution. The new Chancellor is expected to assume duties in the summer of 2000.

A public liberal arts college of 1400 students and 125 faculty, UMM was established in 1889. Its original guiding principles of selectivity, admission, cultural growth, and academic excellence have never changed. The college is recognized for its distinctive mission and its excellent faculty and student body. One of seven public institutions listed by Carnegie Foundation as a national public liberal arts college, UMM is a fully undergraduate institution. As an integral part of the University of Minnesota, it shares its aspirations and strengths. Situated on 130 tree-shaded acres in western Minnesota, the campus is located in the small 15,000 rural community of Morris, 160 miles west of Minneapolis.

The UMM student body is diverse and talented. Approximately half of incoming freshmen have graduated in the top 10 percent of their high school class; the average ACT is 25, and 12 percent of last year’s class were either valedictorians or salutatorians. Sixteen percent of the students are from underrepresented populations. The UMM faculty, an exceptional gathering of individuals from a broad spectrum of backgrounds, cultures, and geographic locations, is dedicated to achieving excellence in both teaching and research. Of the 125 faculty members, 55 percent are tenured and over 21 percent hold terminal degrees in their disciplines.

As the chief administrative officer of UMM, the Chancellor reports directly to the President of the University of Minnesota and is responsible for carrying out campus and University policies, procedures, and planning and for providing academic leadership. The Chancellor also represents UMM to the community, region, Minnesota Legislature, and other governmental groups.

Candidates for the position should possess the following:

- a substantial record of intellectual achievement and commitment to research, scholarship, and creative activity;
- the ability—along with the passion—to persuasively articulate the importance and value of a public liberal arts college;
- the ability to interact effectively and persuasively with a diverse external constituency that includes local farmers, educators, and business people, central administration officers, legislators, University Regents, and potential donors;
- a commitment to a diverse student body, faculty, and staff, and a record of practicing the principles of affirmative action and equal opportunity;
- a record as a successful fund-raiser with alumni, major donors, and foundations;
- a sensitivity to all aspects of institutional marketing that will enable the candidate to provide the vision to strengthen enrollment management, enhance community relations, and work effectively with the regional and national media;
- a proven record as an entrepreneurial academic leader and fiscal manager;
- the proclivity to be open and accessible to faculty, staff, and students, and the ability to work effectively within the framework of shared governance;
- an earned doctorate or equivalent terminal degree in the candidate’s area of study.

Nominations, expressions of interest, and applications should be sent to:

Dr. Eric Klinger, Chair
Chancellor Search Committee
University of Minnesota, Morris
600 East Fourth Street
Morris, Minnesota 56267

Applications should include a letter addressing the criteria noted above, a resume, and a list of references. The search committee will begin the review of candidates on October 1, 1989. Dr. Edward A. Lewis of the Academic Search Consulting Service in St. Paul will assist in searching the position. Inquiries may be directed to him at 651-328-5911.

Please visit our website at www.mnr.umn.edu for more information.

The University of Minnesota is committed to the principle of non-discrimination in access to its programs, facilities, and employment. An individual may file a complaint alleging discrimination with the University’s own procedures or with the U.S. Equal Employment Opportunity Commission.

To request disability accommodations, please contact the chancellor’s office at (612) 625-3914.

**Honduras—Crisis and Opportunity**

Chinese symbol for crisis also signifies opportunity. Hurricane Mitch has created a crisis in Honduras, one that presents an extremely powerful educational opportunity for mutually beneficial partnerships between Hispanic-serving institutions and diverse Honduran institutions and organizations. More than 6,600 persons have been killed, many others are missing, and 1,400,000 are homeless. Others live in temporary shelters. An estimated 200,000 houses must be constructed. This year’s banana crop is completely lost. It will take years to know how extensively the plantations and agriculture in general have been damaged. Factories that make clothes for export, mainly to the U.S., have been flooded. Two-thirds of the bridges and many highways are destroyed and must be rebuilt.

On the positive side, emergency aid from charitable gifts is pouring in. According to John Chater, coordinator of Partners for the Americas and founder of the Mexican and Honduran Conservation Corps, “Most people have access to good clothing and basic food. Most people are picking themselves up and starting to work rebuilding their lives.” But Charles Krause said on the Jim Lehrer News Hour, “...Honduras has been stabilized. But the internal injuries are so great and the twin opportunistic infections of incompetence and corruption are so prevalent in situations like this one—especially in Central America—that rebuilding the country might prove even more difficult than the initial relief effort.”

According to Peter Heffron, assistant country director for CARE-Honduras, “The displaced people I spoke with are very frustrated. However, action is being taken to identify land, plan low-cost communities, organize self-help housing, and establish mechanisms for payment by the displaced in order to become homeowners. The problem is that all this activity is not being communicated to the people in the shelters and they are not being sufficiently involved in all the planning. The next priority is income-generation and agricultural production so that people can survive on their own as soon as possible. Lastly—and these are all concurrent in real life—water sanitation, and basic health services need to be restored.”

Honduras faces an enormous crisis—immediate challenges and perhaps 15 to 20 years of rebuilding. Chater says that rebuilding is under way. “Contrary to popular belief, and the publicity campaigns of relief organizations, people are very good at taking care of themselves. Local leaders are emerging and local people are working together to solve their problems. ...a vivid example of what happens naturally in a community when ‘professionals’ stand back and are not present and people take charge.”

The challenges and the local leadership offer major opportunities for service and learning for Hispanics and others in U.S. colleges and universities. The wide-ranging social, economic, and political problems cut across many curricula and courses, departments, schools, and colleges. A few leap to mind: engineering schools can help redesign infrastructures; nursing and public health schools can address sanitation, nutrition, and basic health care; human, social, and psychological services programs can help address feelings of hopelessness, frustration, and anxiety. Education schools can help make the education system a key player in economic and social recovery. Architectural schools and departments can help design low-cost buildings, parks and public spaces. Political science and public policy programs can help strengthen citizen involvement in decision making. Computer science programs can help business, government, schools, nonprofits, and others make sound judgments about appropriate technologies and provide the assistance required for their effective use.

A good first step would be to have students themselves search for information about how they could help. They could start by using the internet and the Web. They could contact nonprofits currently involved in relief efforts—the American Friends Service Committee, CARE, Partners for the Americas, OXFAM.

The Universidad Autonoma de Honduras, in Tegucigalpa, can provide useful information and provide a focus for creating ongoing collaborative activities. Its students are now required to do community service—helping clean up debris, counsel hurricane victims, and so forth. A faculty member and a small group of students could travel there, with institutional support or their own money, to assess needs appropriate to their interests, expertise, and learning objectives, or to make connections and explore potential arrangements.

But it is critical that service learning students understand a basic perspective, says Chater. “An important role for foreign volunteers is to let people know that they care and that they are there to support and share ideas, but initiative, direction, and leadership must come from the community. Typically, past volunteers from the Peace Corps and other organizations often lacked this understanding. They tended to take charge and the community became followers. Such projects fail when the volunteers leave. Hispanic volunteers can play an important role in a variety of situations. They can make great contributions, if they learn, before coming, that people—even those suffering from a devastating hurricane—can solve problems and become leaders.”

Heffron makes a similar point: “The simple act of working side-by-side with people who are rebuilding their homes, water systems, and so forth, might in fact be more than enough for U.S. Hispanic faculty, staff, and students. The focus should be on empathizing, sharing, and physical work, not on technical expertise, organizing, or otherwise ‘saving’ poor Honduras. By joining the effort in this way, Hondurans will feel a sense of empowerment and camaraderie rather than paternalism, which is already becoming too prevalent in the aftermath Mitch.”

*The Hispanic Outlook in Higher Education*
A Capitol View

Inequality Even in the Computer Age

BY GUSTAVO A. MELLANDER

"Fourteen of North America's largest research universities plan to work together to market their distance-education efforts through a central directory of the World Wide Web listing all of their on-line programs."

As the Class of 1999 enters the real world, graduates are getting a lesson in economics that is putting smiles on many of their faces. The demand for college graduates with degrees in computer science, electrical engineering, and other technical fields is outpacing the supply.

Thus begain two feature articles recently in the respected Chronicle of Higher Education. The message in both was clear and identical: Technology is part and parcel of higher education, and those who master it can tap into superior education, and those who major in its arcane realities will be well rewarded by our society.

Not much of a surprise to any of us. We have known that those students of ours who have earned competence with computer technology have been sought after even those entering stand academic professions find it useful to be computer literate. And many have done just that. That's the good news.

The Bad?

There has been for quite some time a growing concern among Washington policy makers that minorities, Hispanics and others, were being left out of the computer revolution. And to be left out of that revolution condemns you to second- or even third-class citizenship.

Given the Digital Divide, several concerned government agencies have been studying that issue for years.

A new federal study conducted by the Commerce Department shows that while minority groups are gaining access to computers and the internet, a dramatic separation exists nonetheless. Blacks and Hispanics are at a definite disadvantage. Data show that they are less than half as likely as non-Hispanic whites to feel comfortable with computers or to have access to them. Thus very few log on to the net from home, work, or school either for work or for pleasure.

The study, the third and most comprehensive to be conducted by the Commerce Department over the past three years, reinforces a grim reality. It is a stark one, minority groups are increasingly at a disadvantage in competing for the best entry-level jobs in the country, those jobs are defined by the marketplace and reserved for those who have a knowledge of computers and a comfort level with and an eagerness to explore the mysteries of the internet.

New Findings

The study also contained some new findings that add considerable complexity to the ongoing debate about how race, income level and location affect access to the technology. It also provides a road map of what might be expected for the early decades of the next century.

Among the Findings

- **Ethnic realities.** Among families earning $5,000 to $15,000 per year more than 32 percent of Whites owned computers. But only 19 percent of Blacks and Hispanics at comparable income levels had computers at home.

  Adding injury to insult, that gap of 13 percentage points has actually widened from eight points five years ago. And this all transpired at a time when the price of entry-level personal computers plunged. So the "cost" of computers cannot be pegged as the predominant reason for the disparity.

- **Societal realities.** Children in single-parent households have far less access to computers and the internet than do those in two-parent households.

  The chasm becomes deeper for children from broken homes and its effects multiply in minority households.

  A child in a two-parent White household is nearly twice as likely to have internet access as a child in a one-parent White household. The disparity is even greater between single-parent and two-parent minority households.

- **Geographic realities.** Does it make any difference where one lives? Strangely enough, it does. And there are a few surprises. The highest distribution of computers in households in the United States is found in large rural, cold-weather states. A tip-off: many of these areas have pockets of high technology industries and jobs.

  The lowest distribution is in southern states where poverty and education troubles still reign. A breakdown of western and Southwestern states that would have given us insight into Hispanic areas was not available.

  Strangely enough, outside of the South and Appalachia, New York State was at the bottom of the list.

Bottom Line

For Hispanics to succeed, they must feel comfortable with and knowledgeable about computers and the internet, and all of the mysteries that lie within.

The study was directed by Larry Irving, the Assistant Secretary of Commerce for communication and information. He noted, "It is positive that we doubled the number of computers and internet access for African Americans and Hispanics over the past four years and it is great that we have seen a decrease of 50 percent in one year for use of the Net by minorities.

But he added that it is alarming that we still have a gap of three times among the races in internet access, and that we have a long way to go.

Well said. Now what can each of us do at our college to move toward equal access?

And on a personal level, what would be our Christmas present for us to buy our children?

Dr. Mellander is a professor of computer science at George Mason University.
A Guide to The Hispanic Outlook
Volume IX

Whether your area of interest is the arts or community colleges or health, or whether you are simply looking for a good book to read of special interest to Hispanics, or are in the mood for a provocative "opinion piece," or want to "catch up" on what's been happening at Hispanic-oriented conferences, or want to be inspired by Hispanic success stories, or are looking for resources for your students who are in need of financial aid, or are hoping to adopt new teaching strategies in your classroom,... whatever you might be looking for, we believe you will find something of value in the pages of The Hispanic Outlook in Higher Education.

We recommend that you begin by quickly perusing all of the subject headings to familiarize yourself with the index organization. Then zero in on a particular category, where you will then find articles listed in chronological order.

Community College Transfers: A California Perspective

TAE Agreement to Start Bearing Fruit with SDSU

By Omoro Suarez

With San Diego State University (SDSU) headed for overcrowding reminiscent of the late 1980s, SDSU President Stephen Weber and the region's community college leaders are taking action to ensure that SDSU's growth will be consistent with available resources and that community college transfer students will be accommodated.

California's 100 community colleges, which already serve more than 1.5 million students, are also planning for growth and sympathize with SDSU's situation. An additional 350,000 students are projected to enroll in California's community colleges by 2005, a date that is literally just around the corner. Within the Grossmont-Cuyamaca Community College District, we'll continue to prepare our 40,000 students for transfer, basic skills acquisition, and new and enhanced careers, but our facilities will be stretched very thin. SDSU, the largest of the California State University campuses, also has more than 30,000 students. It receives about 2,500 transfer students each year, with more than 60% percent coming from the local community colleges. Typically, a third of all baccalaureate degree recipients are transfer students from the eight San Diego County community colleges.

How will our growth affect SDSU? And what mechanisms will be in place for SDSU to accept local students who transfer from San Diego and Imperial County community colleges?

On June 10, community college chancellors and presidents and SDSU president Stephen Weber signed a TAE agreement (Transfer Admission Guarantee), effective Fall 2000, that will ensure access to SDSU for local community college students who meet the new requirements. The unprecedented agreement recognizes SDSU's special responsibility to potential students, including a declared major at the time of admission to SDSU, need for remediation, a minimum of 60 transferable units, and a grade point average of at least 2.60 in those units. Historically, students at Grossmont College and Cuyamaca College do as well or, even better, than students who begin their college careers at SDSU. By the time they are ready to transfer, they have conquered deficiencies, have study habits in place and a solid educational foundation, and have developed their educational goals.

The SDSU agreement is similar to the guarantee already in place between our colleges and the University of California at San Diego (UCSD). President Richard Atkinson says that one of the best ways to entice UCs through a community college is the same is true for SDSU.

The TAE agreement is the second agreement between SDSU and the Grossmont-Cuyamaca Community College District.

Tracking Progress of Transfer Students

Two years ago, we signed a data-sharing contract that established a framework for exchanging information about our transfer student while protecting their privacy right. The cooperative research was viewed as an opportunity to joint monitor student outcomes. It was also encouraged by state and federal pressures for increased accountability at all levels of educational accountability that would rely heavily on accurate data and informa...
tion. Ideally, this would include data across institutions, meaning that those sending students (community colleges) and those receiving students (four-year colleges and universities) would need to cooperate at a new level. In creating our data-sharing contract, we needed to overcome traditional impediments such as different computerized systems, mistrust, distinct institutional missions, and concerns about confidentiality. The anticipated benefits and the commitment of the Grossmont-Cuyamaca Community College District and SDSI successfully transcended these barriers.

The projected advantages of data-sharing included the ability to obtain accurate counts of transfers and to assess the level of preparation. Because there had been no systematic study, community college transfer students were subject to mistaken assumptions about their preparation and their performance after transfer. With data-sharing, we would be able to track the results of placement and assessment and to review articulation class by class.

We believed the data would assist both institutions in program review and would be helpful in complying with accountability and accreditation requirements. In short, the data-sharing would help us understand the potential consequences of various educational actions by providing insights not previously available.

The agreement enables SDSI and our college district to obtain information about our transfer students' performance in specific course work as they move through SDSI. We will know far more precisely than ever before how they perform, by specific courses, majors, and departments. We will know if they dropped out or changed majors.

With this information, we will be able to evaluate student progress and to assess ways in which the education we offer at both the community college level and the upper-division level at SDSI can be improved. Adjustments in our instructional programs are likely.

While we already know that our students generally maintain their approximate GPAs after they transfer to SDSI, more specific information has not been available. Now, after just one year under the data-sharing agreement, we are using the first round of information in our community college program review process in mathematics, these actions ensure that no data can be traced back to individual students.

Data-sharing is a clear indication of our commitment to constantly improve education and services.

**Partnership for Excellence**

Another example of such a commitment is the California community colleges compact known as The Partnership for Excellence. Governor Gray Davis has highlighted the Partnership as a model of educational accountability.

"After just one year under the data-sharing agreement, we are using the first round of information in our community college program review process in mathematics, English, philosophy, psychology, and economics." Omero Suarez, Chancellor, Grossmont-Cuyamaca CCD

In exchange for additional funds over a three-year period, the community college system agreed to specific student and performance outcomes in the areas of transfer, degrees and certificates, course completion, workforce development, and basic skills.

In the Grossmont-Cuyamaca District, 1998-99 Partnership for Excellence funds are being used to improve math and English labs that support transfer preparation, expand tutoring opportunities, increase classroom and lab technical support, and develop more flexible curriculum options so that courses can be offered in formats such as open entry, open exit, very short (1-2 weeks), and semester long. Measuring results making improvements and continuous improvement are challenges that will be addressed with additional Partnership funds.

According to California State University (CSU) Chancellor Charles Reed, admission of community college transfers is one of CSU's highest priorities. The SDSI TAG agreement takes positive action to recognize this. Data-sharing agreements will bring the two higher educational systems closer together. The Partnership for Excellence is our commitment to perform all three elements - the TAG, data-sharing, and the Partnership - reflect our commitment to high standards, continuous improvement, and specific outcomes.

Dr. Omero Suarez, chancellor of the Grossmont-Cuyamaca Community College District, El Cajon, California, has served as deputy chancellor of the City Colleges of Chicago; president of East Los Angeles College; and founding president of the Valencia Campus of the University of New Mexico. He has held faculty positions in Oklahoma and Nebraska.

Dr. Suarez earned his Ph.D from the University of Oklahoma in the administration of higher education.
The University of Houston-Downtown, El Paso Energy, and "Project GRAD"

BY JANE THIELEMANN
A faculty member of the Dept. of Urban Education at the University of Houston Downtown

For the second consecutive year, the U.S. News & World Report has named the University of Houston-Downtown (UHD) as the most diverse regional liberal arts college in the western United States. With a student enrollment profile of 32 percent Hispanic, 28 percent African American, 12 percent Asian, 26 percent White, and two percent International, UHD has recognized that a university setting must be a place where all students are accepted and encouraged as they strive toward achieving a college degree. Recruitment and retention of an increasingly diverse student population is a constant challenge for an urban campus such as UHD. The demographic shift in the populations of many urban high schools in Houston has resulted in a large percentage of minority students who either drop out of high school or graduate underprepared for the academic demands of university coursework. Many of these students are of Hispanic origin and live only a short distance from UHD.

The University has had plans to meet the challenge of preparing these neighboring high school students for future university enrollment through involvement in an innovative educational collaborative. This collaborative, Project GRAD (Graduation Really Achieves Dreams), has linked UH-Paso Energy, Houston Endowment, the University of Houston-Downtown, and the Houston Independent School District in an educational reform effort that has a growing record of success.

Created under the guidance of Houston's Jim Ketselsen, former chief executive of Tenneco, Project GRAD now stands as a promising model for the nation's urban schools. The program was designed to encourage students who attend Jefferson Davis High School, located in Houston's socioeconomically disadvantaged north side neighborhood, to graduate from high school and attend college Jefferson Davis High School, a predominantly Hispanic (89 percent) urban high school near downtown, was chosen for this project because it was one of the worst performing schools in the Houston Independent School District. The collaborative partners created a multifaceted program to change the educational achievement and expectations of the students, teachers, and community of Jeff Davis High by working with students from elementary school to college.

Project GRAD provides students with academic and social service support throughout their elementary, junior high, and high school years in order to enhance each student's academic growth. With the help of its collaborative partner, El Paso Energy, Project GRAD helps students move successfully through the educational pipeline to college by offering college scholarships of $4,000 for each graduate of Jefferson Davis High School. To date, the academic changes in the Project GRAD schools have been remarkable.

Positive Results

An evaluation of the collaborative efforts to date indicate success in achieving established long-term goals. Statistics indicate that Jefferson Davis High School has doubled the rate at which its graduating seniors pursue a college education. In addition, recent figures reveal a decline in the dropout rate at Davis High School from 10 percent in 1988 to 5 percent in 1993, and a further decline to 3 percent for the 1994-1995 school year. Last year, 23 students graduated from Jefferson Davis High School, a 5 percent increase over graduation rates from 1984-1985. Furthermore, the number of college-bound graduates from Davis High School receiving the scholarship has grown each year. From 1993, 10 of 104 (9 percent) Class of 1992 graduates to 14 of 23 graduate for the Class of 1998.

Results from the elementary and junior high schools, which feed into Jefferson Davis High School, are also positive. Test scores for student Marshall Middle School revealed that 7 percent of the students passed grade-level math tests compared with 21 percent in 1995. Recent results from Ryan Elementary School reveal that 91 percent of the students passed the Texas Exit Exam, compared with 5 percent in 1995.

Years of Dedicated Collaboration

Although results have not been achieved quickly, the collaborative partners have remained involved for over a decade in order to change the dismal educational achievement once found at Davis. Just 10 years ago, the students of Jefferson Davis High School dropped out at a rate of almost 30 percent a year, fewer than 10 percent of the graduates went to college, and few, if any, actual completed college. In efforts to combat these conditions in 1989, Ketselsen, acting CEO of Tenneco, began a scholarship program and mentoring program for Davis students. The core of the partnership included the provision for adult mentors and tutors for the Davis students. The school
proximity to Tenneco's corporate headquarters facilitated the volunteerism effort. The partnership established a set of primary goals to address student problems including:

- improving classroom attendance
- boosting academic achievement
- increasing graduation and college-bound rates
- providing training to facilitate workforce entry and
- encouraging parental involvement.

In an attempt to respond to this persistent concern about poor academic preparation, the partnership soon expanded in 1990 to include the University of Houston-Downtown. The university established a summer academic enrichment program for Davis students that would boost the academic skills of students preparing to enter college.

University Involvement

During the summer, the collaborative program offers students the opportunity to attend the Jesse H. Jones Academic Institute on the University of Houston-Downtown campus. The Institute offers students intensive academic training by faculty in a technologically enriched university setting. Attending the academic institution is an eligibility requirement for the $4,000 scholarship offered by El Paso Energy.

Students attending the academic institute at the University of Houston-Downtown take courses in reading, writing, math, science, chemistry, or biology, and receive training in the use of computer software and science lab equipment not found on their high school campus. Many students work with graphing calculators and interactive math software programs. Writing students are taught computer-aided word processing and editing. Physics students work with lasers and optical benches, air tracks, sliding-rod and spring range finders. Biology students conduct labs in cellular transport, DNA replication and protein synthesis. Chemistry students conduct labs that require the development and application of analytical reasoning skills. The program also offers science students a chance to take field trips to the botanical gardens and the science and space museums in the Houston area.

The university experience works to reduce apprehension about college by acclimating students to campus life. Students who successfully complete the institute receive a $1,500 stipend from El Paso Energy and may then choose to spend the rest of the summer employed in the summer job component of the program sponsored by Communities in Schools, Elmo Montes, a Jefferson Davis High School graduate and Tenneco Presidential Scholarship recipient, states that "The Jesse Jones [summer institute] program prepared me for college classes. The teachers expected a lot from you. They made you reach out and think. It gave me an opportunity to know what college is all about."

Program Expansion and Change

By 1992, further expansion and changes were needed. The scholarship program was not having an impact on the dropout rate of Jefferson Davis High School. Soon, Project GRAD began to add components to the program for elementary and middle school students in order to enhance the social and academic development of students before they reached high school. One of the most important components, "Communities In Schools," provided social services for students to help students seek affordable health care, substance abuse counseling, and/or job training. Other components, "Success for All Reading," a reading program that required an intense daily session of reading and "Move It Math," a manipulative (interactive) math program, were added to enhance academic achievement of the elementary students who would eventually attend Davis High school. Another change occurred when Tenneco moved its corporate headquarters to Greenwich, Connecticut, ending its sixteen-year involvement with the collaborative group. However, a new sponsor, El Paso Energy, was quickly achieved—one that has announced its financial commitment to the scholarship program.

The University of Houston-Downtown also expanded its commitment to students of Davis High School in 1994 by offering a $1,000 per year matching scholarship to each of the El Paso Energy Scholars who choose to attend UHD. A large majority of El Paso Energy Scholars attended the University of Houston-Downtown and receive the El Paso Energy Scholarship as well as the matching UHD scholarship. The academic success of Jefferson Davis students entering UHD as scholarship recipients is of central concern to the university. These students have been nurtured academically by the collaborative partners, and their graduation with a baccalaureate degree would be the capstone for the program. In a continuing effort to retain these students, UHD is now seeking funding for the development of a learners' community, an integrated campus support structure for entering students. Although the program will target Jefferson Davis scholars, opportunities will be extended to the larger UHD diverse first-year student population as an initiative to improve academic services institutionally.

Establishing Future Success

The increasing large number of minority students in urban high schools who drop out or arrive on college campuses underprepared will contribute to the growing disparity between the demands of a technologically driven workforce and the educational attainment of America's youth. In the 1998 President's Report to the Community, UHD President Dr. Max Castillo remarked, "Our ability to provide the educated workforce we will need to remain the world's top economic power will be determined by our access in expanding access to higher education."

UHD extends unique opportunities to the students of Jefferson Davis High School, whose future success will provide the foundation for the continued economic growth and cultural development of this expanding metropolitan Houston area. Dr. Arthur K. Smith, chancellor of the University of Houston System, remarked, "These types of partnerships are making a difference for our schools and our citizens, and I can think of no more important responsibility for our universities—particularly those of us in metropolitan areas." UHD is committed to providing students from the large and growing minority population with the opportunities to pursue the economic and intellectual advantages that only higher education can offer.
Enrolled in the University of Rhode Island's College of Nursing, master's degree candidate Cristina Delossants was awarded the $1,500 Robin Gaines Memorial Scholarship last April at the New England Regional Black Nurses 23rd Annual Spring Conference in Randolph, Massachusetts. "Cristina has good clinical experience, strong academic ability, and a commitment to serving disadvantaged people," says Norma Jean Schmieding, who nominated Delossants for the award. This is a very special recognition for Delossants, whose parents immigrated to the United States from the Dominican Republic never learning to speak English. "I want to work with disadvantaged people because I know how much support they need to better their situations," Delossants reports.

A one-time high school dropout, Delossants worked hard to turn her life around, first earning her general equivalency diploma. She went on to earn associate's and bachelor's degrees in nursing while accumulating impressive clinical experience. Of special merit is her work in addressing HIV infection and AIDS prevention. Delossants works full-time at Women and Infants Hospital, where she provides nursing outreach services on the Providence Family Van. An isolated success story? Not at all. The University of Rhode Island (URI) is "building a multicultural university"—one success story at a time.

President Robert L. Carothers puts Cristiana's personal achievement into perspective, noting, "I say to every new class of freshmen coming into the university that they will have to learn to lead, manage, and even inspire people who are in profound ways unlike themselves. Our long range goal here is to build the skills among our students, faculty, and staff that individuals will need to help our community, our multicultural state, and our multicultural nation succeed in our global economy. There is no issue more critical to our future." For building multiculturalism one individual at a time, The Hispanic Outlook honors the University of Rhode Island. Dr. Carothers, Cristiana Delossants, and every student, faculty, and staff member who are essential in this building process.

URI knows full well that throughout the Northeast and the nation, public institutions of higher education have been grappling with the issue of how to bring greater diversity into their communities. Through various efforts focused on the recruitment and retention of students, faculty, and staff, and through program and curriculum development, and outreach into the Rhode Island public elementary and secondary schools, the University of Rhode Island has been working to build a more diverse community. For example, as part of this effort, since 1992 the University has responded to student-driven requests that the administration has found to be consistent with its overall goals to develop a more diverse community of educators and learners. Two such organizations—the Black Student Leadership Group in 1990;

Building a multicultural university requires construction of in
forms. In April 1999, the University appointed former Civil Rights lea
Dr. Bernard LaFayette as a Distinguished Scholar-in-Residence at URI
He is an authority on nonviolent social change and non-violence ed-
cation. Currently president of the American Baptist College in Nashvil
Dr. LaFayette will work with URI's proposed new Center for Nonviol
tide and Peace Studies, and help the Center and the University move in
leadership role in nonviolence education nationally and internation
ly. He arrived in June 1999 and will serve a three-year term at the University. In the fall of 1998, URI opened its new $1.55 million Multicultural Center in the heart of the Kingston Campus.

The Multicultural Student Services staff works on a broad range of issues that empower members of the community and nurture values such as mutual respect, cooperation, and teamwork. The staff offers counseling on academic, career, and social matters. The Multicultural Student Services staff sponsors programs and seminars for multicultural students. The Multicultural Student Center is also a gathering place for leisure, meetings, and workshops. Staff for the Center has been increased by two professional positions—a new coordinator has been hired, and an assistant director position is in the process of being filled.

Students of all backgrounds arrive at the University of Rhode Island to find more than 100 undergraduate and 85 graduate degree programs, a wide variety of clubs, expert faculty, and a beautiful seaside location. URI is located in the historic village of Kingston, near the ocean and only six miles from Narragansett Bay, and a host of major beaches in the southern part of the state. URI was founded in 1892 as a land-grant college. Because of its unique location, the University has developed a strong marine program and was named a Sea Grant college in 1971, and it was also designated an Urban Grant Institution in 1995. The University of Rhode Island is one of only eight institutions nationwide to have all three of these designations. In addition to strong marine programs, URI is also well known for its programs in pharmacy, engineering, business, nursing, physical therapy, and natural resources. The University was chartered as the state's agricultural school in 1888. The Oliver Watson farm was purchased as a site for the school, and the original farmhouse, now restored, still stands on the campus. The school became the Rhode Island College of Agriculture and Mechanic Arts in 1892, with the first class of 17 members graduating two years later. In 1909, the name of the college was changed to Rhode Island State College, and the program of study was revised and expanded. In 1951, the college became the University of Rhode Island, by an act of the General Assembly.

URI's 1,200-acre rural Kingston campus is a handsome mix of ivy-covered buildings and contemporary architecture. Just 30 miles south of Providence, URI is within easy reach of Newport, Boston, and New York City by automobile or public transportation. The 10,708 undergraduate students and 3,611 graduate students come from all over the world, contributing to a wealth of cultural and ethnic experiences on campus. More than 300 international students represent 47 different countries. Eighteen percent of the 1998 first-year-student class graduated in the top 10 percent of their high school class. Forty-two percent of undergraduates live on campus (60 percent in residence halls and six percent in Greek houses). Other students commute from home or nearby communities. There are 19 residence halls.

In addition to the Kingston campus, the Alan Shaw Feinstein College of Continuing Education is housed at the University's new Providence Campus. It provides continuing and professional education for adults by offering flexible hours and a wide variety of degree and certificate programs. At the W. Alton Jones Campus in West Greenwich, more than 10,000 school children each year learn about the environment on 2,500 acres of woods, streams, and ponds. Throughout the year, while environmental researchers use the campus as a natural "laboratory," corporate executives, professional organizations, and others take advantage of the location for conferences and training programs. The Narragansett Bay Campus is home to URI's highly acclaimed Graduate School of Oceanography, one of the top five oceanographic institutions in the country. Here too is the Ocean Technology Center that joins researchers with government and industry to promote development of ocean-related technologies. The University also provides outreach and education activities for teachers and school children at the Coastal Institute, also on campus. This is where one will find a nationally sponsored hands-on exhibit, "Living on the Edge," that brings an understanding of coastal ocean science and its social implications to broad audiences.

The University's library collection of 1,090,000 bound volumes and 1,510,000 microforms is housed in the University Library in Kingston, at the Alan Shaw Feinstein College of Continuing Education in Providence, and in the Pell Marine Science Library on the Narragansett Bay campus. The latter was designated a National Sea Grant Depository in 1971. Over the last decade, URI has invested more than $163 million in new facilities and major rehabilitation efforts. An additional $170 million in projects will get under way in the next five years. The university is planning to build an 8,000-seat, $436 million Convocation Center, and a separate $73 million ice skating facility. Financing for the Center will include $15 million in private gifts, $18 million in state funding, and $106 million in revenue bonds. The ice facility will be funded through revenue bonds. A $29-million-dollar five-year technology initiative has led to the installation of fiber-optic cable and other systems at URI. The initiative has provided high-speed data connections to every room in the residence halls. With a $350,000 federal grant, the University will be connected to the "next generation" internet by 2002.

One of the reasons that the region's top high school students are choosing URI is the Centennial Scholarship program, an initiative that rewards superior academic performance with four-year renewable scholarships, from $8000 up to full tuition. Since the Centennial Scholarship program was started by URI President Garofoli during URI's Centennial year in 1992, hundreds of stellar students have been accepted to and have graduated as Centennial Scholars, building diversity as surely as the campus constructions build structures of bricks and mortar.
Initiative on Race Reaches Out

Promising Practice at San José State University

Gabe Reyes first stepped onto the grounds of San José State University 36 years ago as a budding first-year college student. In his first days as an undergraduate, he took notice of the environment, of the students who sat beside him in class each day. It was an observation that still resonates today.

"When I came here in 1963," Reyes says, "there was very little diversity. I left two years later to join the military; and when I came back in 1970, there was a lot more involvement with ethnic communities trying to gain access to San José State."

I've seen tremendous increase in the diversity of students, and not only of Latino students.

The scene continues to evolve, a portrait that shifts not only because of the increasing variety of faces of students but because of a new climate on the 15+-acre campus in the heart of California's Silicon Valley. Much of that change is due to work that Reyes now oversees under the guiding hand and direction of San José's relatively new college president.

San José State was recently recognized for its comprehensive plan to reform the campus and unfold a welcoming mat of sorts to students of all ethnicities. Called the Campus Climate Plan, the initiative focuses on creating a nurturing and effective climate for diverse student populations.

President Clinton's Initiative on Race has cited the program as a Promising Practice, and it is now included on the initiative's Web site. Such practices include community-based and national efforts across the country that are orchestrated to improve race relations. Judith Winstan, executive director of the Initiative on Race, said in her

That is a goal to which Robert Caret ascribes. The plan was brainchild, imagined when he visited the campus more than 1 years ago after applying to become its new president.

"I was reading newsletters, newspaper articles and meeting people on campus during interviews and trying to encapsulate what the campus needed, and it was creating a climate that gave people a real sense of opportunity. That's what people say," Caret says Caret. "Being part of something they want to be a part of and feel the build was critical."

The seeds of an idea planted. Shortly after winning his savings in the campus, Caret started arranging retreats with key players on campus and virtually who wanted to sign up for 10 or 15 minutes to talk about what they were doing and what they thought the new president should be doing.

Around this time, Sar experienced several trouble students involving racism, epithets, racial derogatory flyers being distributed, physical confrontations and name-calling. The school officials readily concede, had not adequately prepared to address these issues, and so it has sought a system to combat these issues more effectively.

Caret created the Climate Office and assembly
member committee, rather large as committees go but one that served simply to throw out ideas and compile a master list of ideas, what members felt could be done to improve the campus environment in all corners of college life.

From there, the committee was whittled down to a core group of 20, including students, staff, faculty, and administrators. "We wanted to make sure we represented different perspectives," says Reyes, who had switched hats from a role as the director of the school's Educational Opportunities Program to become the group's chair and assistant to the president for Campus Climate.

I had been doing a lot of work in the area of support services," he adds. "And providing access to students from disadvantaged communities. I saw a change in the climate and the growth in diversity on campus.

Over the next year and a half, the group developed strategies to make everyone feel a part of the institution, Reyes says. Members focused on everything from the curriculum, safety issues, staffing, and student life to job training, technology, and links to the community and to other schools.

The committee examined the schools atmosphere, its shifting enrollment demographics, and its needs. The type of student has changed dramatically since it was founded in 1987, the first institution of higher education on the West Coast. Then, it was designed to train teachers for percent are Filipino and 57 percent are Hispanic. 139 are listed as other.

"First of all, I want to be an excellent educational institution," Caret says, "but also a place where people enjoy coming, whether they are students here or employees. I want them to feel good about what's happening during the day, to feel good about their experiences here.

Much of the work designed to achieve that goal can be found in a brochure produced by the committee, one that details the groups recommendations, policies, and guidelines on how to combat racial and ethnic discrimination and steps to stop harassment intimidation and threats.

The institution began to implement the recommendations in 1997, but not all at once. "We prioritized individual recommendations," Reyes says. "There are 10 goals all together, and numerous recommendations within each one. It will take up to three years to phase in all of the reforms."

The 10 key goals, which are spelled out on the school's Campus Climate Webpage at <www.sjsu.edu>, touch upon all facets of college life.

Goal One, for instance, seeks to "create a campus climate that values diversity." Goal Three opts to "recruit, hire, and retain culturally diverse employees across all levels and areas of the University, regardless of funding source"

annually sponsors about 10 to 15 symposia, presentations, performances, and panels. There is a Diversity Week, coordinated with the International Food Fair, and there are new activities designed to break down the barriers between the administration and the student body.

Activities such as a President's Roundtable, Coffee with Caret, Study Breaks with Caret, and Ke Lunches.

"We usually get between 10 and 20 people," says Todd Brown, who becomes a senior this fall and has helped arrange the student get-togethers with Caret. He talks with the president, and asks any questions in a straightforward way.

Brown is one of the president's six student interns, positions created under the project to bring students closer to the administration.

"It's a positive that the students are able to talk to the president of the university about exactly what they feel." Brown says. "It opens up communication between the president and the student body, and it allows the students to actually meet him and shake hands, eat lunch, have some refreshments."

The encounters have been eye-opening for Caret as well. They give him a chance to learn what concerns his charges. "There is no way for me to get intimately involved with all of the students, but if we meet five times a semester, that could be 500 or 600 students that keeps me going.

Work hasn't solely focused on making the climate more palatable based on ethnic con
"The main focus here is to let communities know that we are sensitive to their issues and that we are responsive to their needs."

President
Robert L. Caret

cerns, but has also looked at other forms of diversity, for example, students who are disabled, students who are gay or lesbian. There are "Access Tours" to assess accessibility for students with disabilities. And the Campus Climate Office has opened a multicultural center which links different groups.

There has also been much greater attention paid to safety issues. University police, administration, staff, and students walk the campus and identify areas of concern: potential danger spots, areas that are poorly lighted, areas where students don't feel safe.

"Students stop and say, 'This is what we see. I was walking from a night class the other night, and I felt very intimidated to walk down this one walkway because there's a lot of these bushes here. We don't know what's going on on the other side,'" Brown says.

"The president has been very receptive, he has been happy to answer any questions on current issues on the campus, and he doesn't give us the run-around."

Because of the earlier racial episodes, the school made antibias initiatives a top priority, and the Campus Climate program immediately appointed an Emergency Response Team and unveiled procedures that spell out supervisors' personnel duties for responding to incidents.

No longer, according to university officials, would anyone on campus attempt to sweep things under the rug.

The university also has assembled several ethnic community advisory councils to improve communications with the major ethnic communities that San Jose serves. And it has provided more professional development so that faculty can promote a culturally sensitive education.

For example, the University now provides workshops on instructional strategies for second-language and nontraditional learners and training on cooperative learning. It also offers training in people skills so that faculty can address difficult topics and hone their communication skills.

Administrators and students say that although the Campus Climate program still has a long way to go, they have witnessed tangible effects even in its infancy. There haven't been any more troubling racial confrontations on campus. Students communicate more with the faculty and administration. And more people of color now hold management roles.

Says Brown: "Students are getting along, there isn't a lot of racial tension. I have noticed a lot of change for the positive. I have learned how to interact with different types of students of different backgrounds."

That sentiment warms the archi-
Motivating the Disengaged Student:

Part 1: Facilitating Effective Engaging Classroom Discussion

On many college campuses, faculty members are talking about how different students are today from decades ago. Usually, the conversation is a kind of complaint about unmotivated, under-prepared students who do not actively engage the course material or participate in class. This dialogue is relevant to an important part of a teacher's mission: getting students motivated to learn.

In a previous article (Hispanic Outlook, 8/27/99), I discussed the importance of motivating the disengaged student and how the classroom learning environment, including classroom dynamics and design, can be used to motivate these students and to keep our already motivated students with us. Statistics show that many of our students do not complete the degrees they started out to earn. I am particularly concerned about Hispanic American students, who have the lowest completion rates of any minority group in America. However, the pedagogical strategies mentioned in Part 1 and in this article are aimed at capturing all students.

Of course, we worry less about students who are enthusiastic, read their assignments, sit up front in the classroom, participate, and are motivated to do well. We need to reach the students who, maybe for myriad reasons, are unmotivated, disinterested, and uninvolved. We often observe their disengagement in their absences and in their latenesses, in where they choose to sit in the classroom, in their lack of participation in class, and in their lack of preparation in terms of the readings for the course.

This article will focus on running an effective classroom discussion as a strategy to engage more students with the course material.

Students must feel that their instructor respects them as people and as students. We must convey that respect not only by what we say in class, but also by our tone of voice, by our facial expressions, our eye contact, our body language, and our posture.

An effective classroom discussion can achieve so many of our goals. When students participate in classroom conversation, they become actively engaged with the course material. Through a process of listening, questioning, hypothesizing, and responding, students voice their struggles with the content. As Ellis Hertzog Gillespie stated, "Student confusion surfaces and is clarified. Problems are articulated and potential solutions generated. Students become engaged with the material, their interest and curiosity aroused. Opinions are challenged." 1

And all of this contributes to the development of critical thinking skills, which is one of our major goals as educators. In response to the question of why use classroom discussion, Donna Munde offered a list that included: to clarify concepts, to promote critical thinking, to promote active listening skills, to help students develop the skills of formulating and exploring ideas and opinions, and to learn from our students. 2 McKeachie says that if we faculty expect students to integrate, apply, and think, we should give them the opportunities to practice these skills in the classroom.
Of course, we must also recognize that some students simply will not participate in class. Some of these students are excessively shy or might even suffer from social phobia. Students have a right not to participate verbally if they choose: we shouldn’t assume that nonparticipation means that they are not engaged and are not learning.

Many instructors have discovered techniques that don’t work in promoting effective discussions. Attempting to begin a rich discussion with the questions “Are there any questions?” or “Do you understand?” is a strategy that will probably fail. The result is usually dead silence. I am reminded of the movie *Ferris Bueller’s Day Off*, in which the high school teacher stands in the front of the room after posing such a question, and keeps repeating, “Anyone? Anyone? In the movie, this is met with the kind of lack of responsiveness that is one of our worst nightmares.

As discussed in Part I, classroom design and dynamics are critical variables affecting the level of responsiveness in our classes. Without an atmosphere of trust, safety, and connection, our attempts at leading rich classroom discussions are bound to fail short. There are very many ways, both verbal and nonverbal, to promote the kind of atmosphere in which students will be willing to participate. First and foremost, students must feel that their instructor respects them as people and as students. As instructors, we must convey that respect not only by what we say in class, but also by our tone of voice, by our facial expressions, our eye contact, our body language, and our posture. Even when students sometimes make ignorant remarks, we must be stellar diplomats. We must find ways to correct the information by re-framing it while not diminishing our students. We must help students maintain their dignity in front of their classmates even when we do not dignify their comments.

In one of my own graduate courses in a large lecture format, a student asked the professor a question. The professor responded, “Who cares?” No one, apart from the professor ever spoke in that class again.

How can we foster a climate that promotes participation? When students speak in class, we can use numerous ways to reinforce their efforts. We can preface our response by saying, “Yes, that is the kind of question that has troubled the researchers.” Or another reinforcing response would be “Good point,” or “Interesting question!” You must vary your reinforcers, they must be used moderately, and they must be sincere, or they could be perceived as condescending.

Using students’ names in class is also very reinforcing. For example, you might bring up a point or a question made by a student earlier in the class. “As Maria suggested earlier…” The emphasis on classroom atmosphere is based on the realization that students are people first and learners second. Their ability to learn is dependent on their levels of self-esteem and on how comfortable they feel in our classes.

Although some instructors are very good on their feet, and are able to facilitate an excellent discussion on the spot, most of us would benefit from some careful planning. Colleagues make a distinction between a structured discussion with the instructor playing a strong leadership role and a less structured discussion with the instructor playing more of a facilitator role. The type of discussion depends on what the discussion is designed to do. Strong instructor leadership is needed if there are specific points that need to be addressed.

According to Gillespie, the language of our questions should stimulate higher levels of critical thinking such as comprehension, analysis, application, evaluation, and synthesis. Our questions would be quite different: What are the distinguishing characteristics of? What do you think would happen if? On the other hand, if the goal of the discussion is problem solving, brainstorming, or to get students to share their opinions, the instructor would play the role of facilitator.

Planning a discussion involves deciding what material you want to cover within the class session and what questions you could ask that would tap that material. Frederick offered some suggestions for starting a discussion. He proposed that we identify goals/values of the assignment and create relevant questions prior to or at the beginning of the class. He says we can sometimes break students into small groups for a discussion with clear instructions, a time limit, and some form of accountability.

I believe it is also necessary for us to clarify what our objectives are for the class session so we can assess the quality of the discussion. Of course, one of the exciting aspects of a class discussion is that we are never really sure what turns might take. Often, we need to be flexible enough to let go of our original agenda if what we see happening in class is worthwhile. Planning also involves deciding how to set up the room so that it is most conducive to conversation. It is also important to get your students prepared to discuss the material.

As mentioned earlier, one of our biggest dreads of running a discussion is that we will ask a question and no one will respond. Many of us are very uncomfortable with the silence. We need to accept the silence and not necessarily call on the first student with his or her hand up. Research has shown that
with each second we wait, there are more students who become prepared to speak. It is important to pull into the discussion the students who usually are not the first ones ready to respond. One way to ensure that more students will be ready to respond is to ask students to write their responses to your question. Not only does this draw more students into the discussion, but it gets everyone engaged with the material, and even improves the quality of the verbal responses in the discussion.

Once a discussion is under way, as the facilitator, we should try to get students responding to each other. The temptation is strong for us to respond to students' questions and comments but that is a surefire way to limit student participation. Students are often more persuaded by their classmates' perceptions and opinions than by ours, and sometimes students do remarkable good jobs at correcting and challenging the ideas of their peers. Part of letting this happen involves changing our perceptions of our role in the classroom as the imparter of information to the facilitator of learning. As facilitators, we need to pay attention to nonverbal cues we are getting from students and be responsive to them. For example, if one section of the class has been particularly quiet, we might say, "We haven’t heard from this part of the class. Would anyone from this section like to address that point?"

If we see a side conversation taking place, we might try walking into that part of the room and standing close to the talkers. Maybe we even need to ask one of the talkers a question. Gillespie says that as facilitators of an effective discussion, we will be required to think quickly on our feet and sometimes to redirect the flow of the discussion. When it is necessary, we will have to find ways to have misinformation corrected, and to help students to more fully and accurately elaborate their ideas. She offers us the essential ingredients for success in using discussion as a strategy—"an acceptance of the importance of discussion opportunities for effective learning, a belief in the potential of all students to learn, and a willingness to give students some responsibility for their own learning.

CHAIR
Department of Mass Communication
Southwest Texas State University

Southwest Texas State University invites applications and nominations for the position of Chair of the Department of Mass Communication to begin on or before August 1, 2000. The chair provides leadership for a department of 17 faculty members who instruct 400 majors and 1,500 minors in six sequences of study leading to the Bachelor of Arts degree in advertising, broadcasting, print journalism, public relations, and general mass communication and the Bachelor of Science degree in Communication. The department has established and the department is currently exploring an MFA degree. The chair is responsible for the administration of the department, which also includes the management of faculty and staff, including hiring, evaluation, and budgeting.

Candidates should have an earned doctorate relevant to the programs offered by the department. The candidate should have an outstanding record of teaching, scholarship, and professional service consistent with appointment to the rank of full professor. The candidate should have a history of working collaboratively with faculty and other members of the academic and professional communities, and have a record of sustained productive research and publication and previous administrative experience in higher education is desirable.

Review of applications will begin September 30, 1999, and will continue until the position is filled. Applicants should send a letter of application addressing their philosophy of mass communication education, vita, and names and phone numbers of three references to Dr. Barbara Lyman, Chair of Search Committee, Department of Communication, Southwest Texas State University, 601 University Drive, San Marcos, TX, 78666 (BLO101 swt.edu).

Southwest Texas State University, founded in 1949, is a publicly supported coeducational university. With an enrollment of 21,000 students, the university is the state's third-largest institution of higher education. Southwest Texas State University consists of seven schools and thirty-four instructional departments offering a wide range of degrees at the bachelor and master's level.

Southwest Texas State University is an Equal Opportunity/Affirmative Action Employer.
The Community College: Quality, Affordability and Receptivity

BY GERALD BAZER

In essence, what the community colleges across the country provide is a vast number of opportunities for local citizens to better themselves.

An Owens Community College Perspective

How to afford to send our children to college remains a critical concern of all parents. Coupled with this is the demand that they receive a quality education. When the family is Hispanic, an additional concern is the receptivity of higher education institutions to minority groups.

What many parents might not realize is that there is a higher education institution that can provide affordability, quality, and receptivity. In fact, there are 1,400 of them within easy access of students across the country. That institution is the community college. And it is the community college each year that enrolls a larger number of Hispanic students than does either the private or public four-year college and university sector.

Uniquely American, the 1,400 two-year community colleges constitute one-third of our higher education institutions. Located in all 50 states, the community college often has been cited by American higher education experts as our most important contribution to the history of higher education. And as opposed to our taking from other countries models for our four-year colleges and universities, the community college model has been adopted in countries from Canada to China.

As prolific as community colleges are and despite their presence since the early 1900s, many in the general public are unfamiliar with what a community college is and does. Some believe that the two-year college is in a holding pattern until it adds on the final two years to become "real good." (Regardless of my thirty years at several two-year colleges, even my own relatives ask me when my present college will acquire the junior and senior years.) It is the purpose of this essay to familiarize the general public (and my relatives) with this vital American institution.

The fascinating aspects of community colleges center on the students and the types of programs and services provided. But first, consideration of the functions and structure of community colleges is needed together with some additional data.

Attending the 1,400 community colleges are more than two and one-half million students, more than one-third of all college students. Hispanic students number over 300,000 of the total enrollment. From 1985 to 1990, there has been an increase of more than one million students. Projections into the 21st century depict continued growth while many four-year institutions remain flat or, in fact, lose enrollment.

That students are attracted to these numbers is testimony to the functions provided. For example, transfer programs equivalent to the first two years of a bachelor's degree are acceptable by four-year and paraprofessional careers in engineering, business and computers, public service, health, and industrial technologies: student services including counseling, advising, and athletics; training and retraining in partnerships with area business and industry for 21st-century jobs; a plethora of community services to enrich local communities; and developmental education for students requiring improvement in basic academic skills.

Community colleges enable students to enroll in small classes that are taught by faculty selected and rewarded for teaching excellence. The graduate teaching assistant is an unknown at community col-
leges. Students find at community colleges flexible instruction and scheduling with courses offered through a variety of approaches, including internet courses and telecourses, and scheduled around the clock, weekends as well as weekdays to accommodate busy adults. They also find that faculty and staff are concerned with carefully assessing student learning and specific outcomes and with ensuring that students seeking employment or transfer are successful. A growing number of community colleges even provide students a written guarantee that if not placed appropriately, or if they do not successfully transfer, they can take additional courses at no cost. Finally, while students benefit from open entry for any high school graduate, certified exit can only be achieved after a demonstration of academic excellence.

With reference to faculty, it should be noted that Hispanic faculty members constitute a larger percentage of the faculty at community colleges than at any other institution, although there still is room for improvement. Nevertheless, the structure of community colleges ensures each college meets the academic demands and needs of the surrounding communities. This is generally achieved through mutual support from the community college governance body and the locally elected or appointed board of trustees entrusted with the interests and needs of their local constituents.

With the above as background, who is the community college student, and what is a sampling of programs and services found around the country?

A composite might be the best way to depict the community college student, yet we err if we do not recognize that open entry brings with it a vast diversity of students.

The composite community college student is close to thirty years old; works full- or part-time; has family responsibilities that could include care of children, a spouse, or parents; commutes to and from college; receives financial aid; attends part-time; belongs to a racial or ethnic minority group (more likely at four-year colleges); and, despite many encumbrances affecting college study, is determined to be successful and reach a better position in life.

Student diversity can be depicted in several ways, but perhaps two will suffice. Attending class together are the eighteen-year-olds fresh from high school graduation and the sixty-year-olds wishing to learn anew. Attending college also is the student with the opportunity to have attended many more visible colleges taking advantage of honors programs and honor societies prevalent at most two-year colleges.

It is also valuable to consider a few of the many leaders who are alumni of community colleges. H. Ross Perot, CEO and one-time presidential candidate; James McDivitt, astronaut; Ray Marshall, former Secretary of Labor; Robert Gibson, astronaut; Solan Archbold, CEO at Black and Decker; Benjamin Cavetano, governor of Hawaii; Carole Tara, Pulitzer Prize-winning photographer; Charles Hemenue, U.N. ambassador; Davide Shine, director of East African Affairs for the U.S. State Department, Jim Lehrer, public television newsmen and editor; Gwendolyn Brooks, poet laureate of Illinois, and Shawntell Smith, 1996 Miss America.

Turning to specific programs and services, the expected need not be emphasized here. Naturally, community colleges offer programs in accounting, electronics, dietetics, business, liberal arts, etc., and services such as counseling and advising. Instead, emphasis here is on what might not be expected—nursing programs across the country that educate greater numbers of registered nurses than does any other sector of education; a program in map reading; emergency Spanish for an inner city’s taxi drivers; a collaborative to develop family histories with community college students; elementary school children, and senior citizens; automotive programs partnering with the big three auto makers where the degree awarded is in computers and electronics; the ability to earn an entire degree at home through internet courses and tele courses; training for firefighters transmitted interactively from a campus classroom directly to several fire stations, allowing firefighters to remain on duty; courses teaching American Sign Language for prospective interpreters for the deaf; Canadian Studies with an emphasis on international trade and business; and an architectural and building program with a final student project to plan and build a home for a rural housing.

Community colleges also offer dental hygiene programs that provide the local community minimum cost dental care; the opportunities for high school seniors to earn their high school diploma while simultaneously enrolled in college for college-credit courses; lecture series, open to the public, bringing world leaders, including U.S. presidents, to campus; tutoring of fourth graders by community college honor students for the national “Read America” initiative; adopting elementary school programs that oversees the academic progress of elementary youngsters straight through college; a variety of programs geared toward the preparation of women for professions formerly barred to them; a humanities program that produces a literary magazine on an interactive CD-ROM; and a “Small Satellite Project” that allows one community college to fly experiments on one of NASA’s space shuttles.

In essence, what the community college across the country provides is a vast number of opportunities for local citizens to better themselves. Hispanic parents, as they consider quality, affordability, and receptivity when assisting their children in choosing a college, should look seriously to the community colleges.

Gerard Bazer, dean of the Division of Arts and Sciences
Gorostiza to Lead Rutgers-Camden Rand Institute

Felipe J. Gorostiza was appointed director of the Walter Rand Institute for Public Affairs at Rutgers University's Camden campus.

The Rand Institute will use the intellectual resources of Rutgers-Camden to develop programs that support and improve the social, economic, and physical infrastructure of southern New Jersey.

Gorostiza intends to "build awareness of New Jersey as a place for growth."

He has a bachelor's degree from New York University, a master's from Brown University, and a doctorate from the University of Pennsylvania.

Ferrier at Our Lady of the Lake

Maria Hernandez Ferrier, executive director of City Year San Antonio, recently joined the Our Lady of the Lake University (Texas) Center for Leadership Studies faculty as a visiting distinguished professor. During her one-year appointment, Ferrier will teach, conduct research, write, and consult with graduate students in the leadership studies program.

"I am honored and humbled to serve my university," said Ferrier. "Our Lady of the Lake University represents academic excellence, personal support, and hope for the future."

Ferrier has a bachelor's degree and a master's from Our Lady of the Lake University, and a doctorate from Texas A&M University.

Diaz, Velez, and Bentch Named Fulbright Scholars

St. Mary's University (Texas) Professors Gwendaelyn Diaz (l.), Alejandro Velez (r.) and Sue Bentch were selected William Fulbright Scholars for international educational and cultural exchange during the 1999-2000 academic year.

Diaz will teach U.S./Latino literature at the Catholic University of Argentina and literary theory at the University of Buenos Aires. Velez will teach a course at the Universidad de la Sabana in Bogota, Colombia, focusing on economic aspects of interest to lawyers. Bentch will teach a legal ethics course at the Riga Graduate School of Law, a new school opening this fall in Riga, the capital of Latvia.

Goldsmith Receives National Award

Pima Community College (Ariz.) instructor Barclay C. Goldsmith received an Excellence Award from the National Institute for Staff and Organizational Development (NISOD).

Based at the University of Texas-Austin, NISOD emphasizes the importance of teaching excellence in community colleges. The Excellence Award recognizes professional educators across the country who teach to ensure maximum student learning.

Goldsmith is known for his passion, devotion, and endless creative energy in the theater arts. He has furthered the community's historic Hispanic roots through plays directed and produced in both Spanish and English.

Hinojosa Wins Salazar Award

Maria Hinojosa, host of Latino USA, a production partnership of the Center for Mexican American Studies and KRT-FM radio at the University of Texas-Austin, won the 1999 Ruben Salazar Award from the National Council of La Raza (NCLR). Hinojosa, a CNN correspondent, was presented the award at the NCLR Annual Conference in Houston.

Named in honor of a journalist killed by a policeman's tear gas projectile in 1970 while covering a Chicano march in East Los Angeles, Calif., the Ruben Salazar Award is given annually to an individual who has dedicated his or her life to promoting a positive portrayal of Latino historical, political, economic, and cultural contributions to U.S. society.

Hinojosa has hosted Latino USA since its debut in 1993.

Amador New President of California Community College CEOs

Dr. Sherrill Amador, president of Cuyamaca College, began a one-year term as president of the Chief Executive Officers of the California Community Colleges. Amador heads the 12-member board of directors elected by community college chancellors, superintendents, and presidents.

Amador brings more than 20 years of administrative experience to her leadership role on the board. She recently completed her term as president of the Southern California Community College Chief Executive Officers, and is also vice-president of the board of directors of the East
Garner Regional Chamber of Commerce.

Amador has a bacheo's degree from San Diego State University, a masters from Azusa Pacific College, and a doctorate from the University of San Diego.

**Navarro Organizes Idea Exchange**

A high-level delegation of Chicano/Latino academics, students, journalists, and civic leaders traveled to Cuba for a historic exchange of ideas organized by Armando Navarro, professor of ethnic studies at the University of California-Riverside.

Scholars from both countries met for an unprecedented three-day conference in July at the Centro de Estudios sobre Estados Unidos, located at the University of Havana. "The Chicano/Cubano Experiences: Yesterday, Today, and Tomorrow" examined the historical, cultural, sociological, and political differences and similarities between Cuban revolutionary experiences and those of Chicanos/Latinos in the United States.

"We have relations with Vietnam. We have relations with North Korea. We have relations with Communist China," Navarro said. "Where is the fairness in continuing to turn our backs on Cuba?"

**Minority Medical Students Receive Fellowships**

The Bristol-Myers Squibb Foundation and National Medical Fellowships, Inc. have selected 26 medical students as fellows in the Fellowship Program in Academic Medicine for Minority Students.

These fellows are among the nation's most gifted minority medical students, said Avian Manning Fox, president of National Medical Fellowships, a not-for-profit organization that administers the program. "By awarding these fellowships, we hope to provide these medical students with research experiences that encourage them to choose careers in academic medicine."

Among the fellows are Eduardo Mili (1), University of Iowa; Gilberto Hernandez, University of California; Jose Maza (2), University of California—San Francisco; Rene M. Ramirez-Lugo (3), Albany Medical College; Fidencio Saldana, Harvard University; Alejandro Sanchez (4), University of Southern California; and Sal S. Sandoval, University of Texas-Houston.

**Gómez Retiring after 23 years**

Dr. Luis Gómez, who began working for the San Bernardino Community College District (Calif.) in 1970 as a counselor and became president of Crafton Hills College (CHC) in 1990, is retiring July 31.

Gómez became assistant dean of student services at CHC in 1987 at San Bernardino Valley College, he held various counseling positions and initiated a Minority Advancement Program for middle school students at risk of dropping out. He previously taught at California State University-San Bernardino and was a teacher and counselor at San Bernardino High School. In the mid-1970s, he taught math in Cal State's Upward Bound program.

Gómez has a bachelor's and master's degree from Cal State-San Bernardino and a doctorate from the University of Southern California.

**Gutierrez and de los Santos Receive Awards**

Awards were handed out by the Hispanic Caucus of the American Association for Higher Education (AAHE) during AAHE's annual conference. Among them:

Dr. Kris Gutierrez, associate professor in the Division of Urban Planning, Curriculum and Teaching and Policy Studies at the University of California—Los Angeles, received the award for Outstanding Latino/a Faculty in Higher Education.

Gutierrez researches the literacy practices of urban schools.

A special tribute was awarded to Dr. Alfredo de los Santos, Jr., vice chancellor for student and educational development at Maricopa Community Colleges. He is responsible for articulation, curriculum, faculty, student, business and workforce development, international education, and external resource development.

**Castanhos Heading U.S. International University Teacher Education**

Janet Castanos has become director of teacher education at United State International University (USIU) in California. An educator for 24 years at the elementary, secondary, and university levels, Castanos taught at USIU for seven years, becoming an associate professor of education.

As director of teacher education, she oversees USIU's teacher credentialing program as well as the Cross-Cultural Language and Academic Development emphasis, which prepares teachers for the multicultural-multilingual student population; and the university-teacher intern program, which encourages underrepresented minorities to enter the teaching profession.

**Ramos Elected to National Community College Board**

Dr. Sylvia Ramos, president of Houston Community College (HCC) Southeast Texas, was elected to a three-year term on the board of directors of the 1,200-member American Association of Community Colleges (AACC). HCC-Southeast is one of five region colleges comprising the HCC System.

A national Kellogg Foundation Fellow.
Ramos is immediate past president of the National Community College Hispanic Council, an AACC affiliate organization. She has contributed to the Texas Association of Chicanos in Higher Education and the Mexican American Task Force on Higher Education, and is on the board of the Houston Hispanic Chamber of Commerce.

**University Women Association Elects Gómez**

The California American Association of University Women (AAUW) elected Sharon Gómez membership vice president at its state convention in San Diego.

Gómez, an educational administrator and counselor active in AAUW at local and state levels since 1991, in 1994 received a national AAUW award for her diversity program. For 20 years, Gómez has demonstrated her commitment to education issues through her work on university campuses and more recently with a U.S. Department of Education program (Upward Bound) emphasizing recruitment and preparation of East Los Angeles at-risk high school students and military veterans for college.

**Camacho-Gingerich Recognized**

Dr. Alina Camacho-Gingerich, chair, committee on Latin American and Caribbean studies, St. John’s University (N.Y.), was selected as one of “The Many Faces of Queens Women.” an exhibit sponsored by Newsday and also shown at the Jamaican Center for Arts and Learning. The exhibit celebrates women who have made outstanding contributions to the Borough of Queens.

Camacho-Gingerich is a leading scholar on Latin American literature and civilization and author of numerous scholarly articles and reviews.

**University of South Florida Newsmakers**

In response to increasing faculty interest in Latin America, University of South Florida (USF) interim library director Derrie Perez has launched an initiative to better reflect this area of study in the library’s collection, programs, and staff. Perez plans to start a librarian exchange program with the University of Puerto Rico, and to enhance the visibility of Hispanic culture and heritage through displays, publications, and programs.

Twelve USF medical students, accompanied by College of Medicine Professor Eduardo Gonzalez, spent their spring break in Cuba, delivering medical supplies, touring health care facilities, and seeing patients. Medical student Alex Palomar was amazed to witness the dedication and caring manner of doctors working under primitive circumstances.

**San Antonio College Launches Bilingual Engineering Program**

The National Hispanic Bilingual Engineering Program (NHBEP) was launched at San Antonio College (SAC) in Texas with engineering exhibits, a panel discussion featuring NHBEP Director Margaret Bennett, and a national videoconference. The purpose of the organization is “to increase the number of Hispanic bilingual engineers in the United States and strengthen existing programs in mathematics, science, and cultural engineering,” said Henry Rosales, program representative at SAC.

Six SAC students had received scholarships to study in the program in Puerto Rico at the time.

**Venta New Business Dean at Loyola**

Loyola University-Chicago (Ill.) appointed Dr. Enrique R. “Henry” Venta dean of the School of Business Administration.

“Loyola has a rich tradition in Chicago’s business community,” said Venta. “I look forward to using our school’s strength—faculty and research expertise—to offer specific academic programs that the market is currently demanding.”

Venta’s new responsibilities include fundraising and alumni relations; overseeing curriculum development, administrative services, and graduate programs; and developing corporate and community-based partnerships.

Venta has a bachelor’s degree from the University of Puerto Rico, and a master’s and doctorate from Northwestern University.

**Portland Community Offers Small Business Development Program**

Despite his eye for detail, talent for design, a master’s degree in architecture, and a resume bursting with a global list of accomplishments, interior design master Ernesto Garcia knew he needed help in packaging it all into a successful venture.

“When it came time to select a computer and the software that was best for my kind of business, I didn’t know anything,” said Garcia.

Last September, he turned to the Portland Community College (Ore.) Small Business Development Center, where he has been learning about the mechanics required to run a business.

Thanks to the program, Garcia, a native Argentinean, put himself in a position to open his first Ernesto Garcia Interiors store.
Minority Scholars Visit Penn State

Nine minority scholars visited Penn State University this summer as part of the university’s Scholars in Residence Program for Minority Faculty.

The visiting scholars were Catherine Castron, Dillard University; Antonia Reyes Galbraith, School of Visual Arts; Carlos V. Rodriguez, University of Albany; writer M. Young, Brian H. Roberts, Clarion University of Pennsylvania; Mercedes Garcia Perez, University of Puerto Rico; Jose A. Gonzales, Puerto Rico’s University of the Sacred Heart; Celente Morales-Melendez, Pontifical Catholic University of Puerto Rico; and L. Erskine Sandford, former prime minister of Barbados.

High School Researchers at Texas A&M-Kingsville

At Texas A&M University-Kingsville this summer, high school science teacher Thelma Quintanilla-Hernandez, who received her master’s degree from Texas A&M University-Kingsville, worked with three Upward Bound high school students—Amanda Morgan, Lorinda Gonzalez, and Karina Zepeda—on snake venom profiles in a project designed to provide an educational stepping-stone to make it easier for high school students to progress to a four-year university and on to post-baccalaureate programs in the health professions and health sciences.

The students were part of Project Interton, a satellite program from the University of Texas-Houston Health Science Center. Project Interton was supervised by Kingsville biology professor Dr. John T. Perez, who coordinated the activities with Dr. Gilbert A. Castro (picture), of the University of Texas-Houston.

Instructors Immersed in Bicultural Literature at Texas-San Antonio

The University of Texas-San Antonio Mexican-American Studies Department presented “Territorial Borderlands: Summer Institute for the Inclusion of Mexican American and Latino Literature and Culture in the Classroom in the U.S.”

Funded by a National Endowment for the Humanities grant, 25 school teachers from across the nation had received fellowships to gather at UTSA for a month of intensive study. The institute immersed participants in cultural literature and culture. They, in turn, will share their knowledge with their home classrooms.

Louis Mendoza and Ben Olguin were institute instructors. Mexican American authors Sandra Cisneros, Rudy Yana, Pat Mora, Carmen Efolloa, and Luis Rodriguez gave presentations, as did Sheila Contreras, Angela de Hoyos, Nicolas Kanellos, and Cristina Garcia.

Brazilian Women’s Soccer Team at Montclair

While preparing for the recent Women’s World Cup soccer tournament in the United States—won by the U.S.—the national teams from Australia, Brazil, and Denmark held several practices on the campus of Montclair State University (MSU) in New Jersey.

Pictured here, MSU President Dr. Susan A. Cole (third from left) met with members of the Brazilian World Cup team and their coach before practice at the university’s soccer stadium.

This year’s Women’s World Cup attracted the largest crowds ever to view a women’s sporting event in the United States.

In the News at Madonna University

Adina Golember, assistant professor of Spanish at Madonna University (Mich.), was among more than 4,200 faculty consultants from high schools and universities across North America who participated in the annual reading and scoring of the College Board’s Advanced Placement Examinations. Golember was selected to evaluate the Spanish discipline of the Advanced Placement reading.

Madonna University and Vasco de Quiroga University in Morelia, Mexico, have signed an agreement to facilitate a student and faculty exchange program between the two institutions. Pictured here are (l. to r.) Salvador Monroy, Mexican Consul, Detroit; Sr. M. Franciscene, president, Madonna University; Raul Herrera Vega, rector, Vasco de Quiroga University.

News via LaGuardia Community College’s The Bridge, by students

• LaGuardia Community College (NYC) business administration major Manuel Colon, former president of the social organization Latinos Unidos, was elected student governor. Colon, who hopes to start his own business one day, strives to get Latinos at LaGuardia to recognize one another.

• LaGuardia held Multi-Cultural Appreciation Week in recognition of the college community’s many diverse cultures. The festival featured an international art exhibition, arts and crafts, ethnic foods, music, poetry, and dance.

• The Student Center for Women is currently looking for male and female students for ideas and discussions. Around since 1992, the center provides counseling, offers workshops, and welcomes men interested in women’s issues.

University of North Texas Hosting Graduate/Professional School Day

The University of North Texas (UNT) will be hosting the annual Graduate/Professional School Day Oct. 5.

Located in Denton, Texas, 30 minutes north of the Dallas-Ft. Worth International
Airport. LNT enrolled more than 25,000 students last fall, about 20,000 as undergraduates. LNT offers bachelor's and master's degrees and doctorates in multiple fields divided among the Colleges of Arts and Sciences, Business Administration, Community Service, Education, Library and Information Science, Music, Merchandising and Hospitality Management, and Visual Arts.

To register for Graduate/Professional School Day, call (940) 565-3945.

1-TEACH Program at Chapman

The federal DOE's Office of Bilingual and Minority Language Affairs funds a grant supporting Project 1-TEACH at Chapman University in California. Chapman's 1-TEACH, directed by Dr. Chersi Valdez, moves paraprofessionals into the ranks of teachers, who make a difference in the lives of English Language Learners. As 1-TEACH participants become teachers, program officials look to an intergenerational cadre of bilingual parents, community members, and secondary bilingual students, to "try on" teaching, first as volunteers, with some moving on to become paraprofessionals and eventually moving into coursework toward a teaching credential.

Language and Culture Center at East Tennessee State

ETSU's Language and Culture Research Center at East Tennessee State University (ETSU) is making an effort to help the region's growing Hispanic population with cultural and translation opportunities.

Upper-level students of the ETSU department of foreign languages who are fluent in Spanish recently offered a translation service to assist Hispanic agricultural workers with such seemingly simple tasks as filling out driver's license applications, understanding the phrases used to purchase a car, and finding a physician.

"We've started a dialogue between native Spanish speakers and native English speakers where the long-term effort will be to integrate Hispanics into the established community," said Dr. Ardus Nelson, chair of the foreign language department.

Columbia University Awards Cabot Prizes

Three journalists have been selected by Columbia University's Graduate School of Journalism to receive the 1999 Maria Moors Cabot Prizes for courageous, comprehensive, and compassionate reporting on Latin America. Special citation will be presented to the founder of an independent Cuban news agency and an American newspaper publisher for their efforts to promote a free press.

Jorge Zepeda Patterson, editor-in-chief of the Mexican daily newspaper Público; Linda Robinson, Latin American bureau chief of U.S. News & World Report; and Juan Tamayo, Latin American correspondent for the Miami Herald, will be presented their prizes on Sept. 20.

James McClatchy, publisher of McClatchy newspapers; and Raul Rivero, founder and president of Cuba Press news agency, Havana, Cuba, will receive citations.

Texas-San Antonio Launching Young Scientists

The University of Texas-San Antonio Preparatory Engineering Program (PREP) offers achieving students an educational jump-start on math and science careers. About 1,300 area junior and senior high school students are enrolling in the opportunity this year.

"PREP aims to promote students' interest in math, science, engineering, and technology and to provide students with the basic skills needed to pursue those careers in college," said Kathy Lewis, PREP assistant coordinator. "It's really a pipeline into math and science." The program recruits talented students and emphasizes offering opportunities to minorities.

Ivan Villegas, 20, completed PREP and spent time as a PREP assistant. He is to attend San Antonio College.

New York University Hosts Hispanic Physicians

New York University's Robert F. Wagner Graduate School of Public Service provided 20 Hispanic physicians from across the country with a week-long intensive learning experience about federal and state health policy. The conference was part of the year-long Leadership Fellowship program of the National Hispanic Medical Association, a nonprofit organization of licensed Hispanic physicians in the United States.

Will Leads Whittier College

Katherine Hales Will, former provost and professor of English at Kenyon College (Ohio), in July became Whittier College's (Calif.) 13th president. She is the first woman to lead Whittier College in its 112-year history.

Will has a bachelor's degree from Rufts University and a master's and doctorate from the University of Illinois-Champaign-Urbana.

More than 20 percent of Whittier College's student body is Hispanic—one of the highest percentages among the 13 independent colleges in California.

Fernandez Presides over Hostos Community College

Dr. Dolores M. Fernandez, nationally recognized expert in bilingual education, teacher training, and curriculum development, became president of Hostos Community College (N.Y) in July.

Fernandez graduated cum laude from Nassau Community College, has a bachelor's degree from the State University of New York-Old Westbury, a master's from Long Island University-C.W. Post College, and a doctorate from Hofstra University.

Eugenio Maru de Hostos Community College is the only City University of New York college to offer a bilingual approach to higher education. By the year 2005, Hostos will have established a full articulated dual-language model in all of its degree programs.

Hispanic Scholarship Fund Receives $50 Million Grant

The Hispanic Scholarship Fund (HSF) has received a landmark $50 million grant from Lilly Endowment Inc., one of the nation's largest private foundations. The grant represents the single largest amount ever pledged to a Hispanic organization.
According to HSF President and CEO Sara Martinez Tucker, the grant will provide critical funding for both aspiring and existing Hispanic college students in all 50 states and Puerto Rico, dramatically increasing the number of Hispanics who earn college degrees. HSF, the oldest Hispanic scholarship organization in the United States, has a stated goal to double the percentage of Hispanics earning college degrees by early in the next century.

HSF has awarded more than 86,000 scholarships totaling $88 million since its founding in 1975 under the leadership of Martinez Tucker. HSF has become one of the largest Hispanic organizations in the United States and is poised to become one of the most important forces in educating the country's youth.

**Mestas to Become Michigan-Flint Chancellor**

Juan E. Mestas, deputy chairman of the National Endowment for the Humanities, will be the University of Michigan-Flint’s next chancellor, effective Sept. 20.

University of Michigan President Lee C. Bollinger said that Mestas “brings to the position of chancellor tremendous administrative skills, a strong sense of academic quality, and a deep commitment to higher education and its public purposes.”

Mestas has a bachelor’s degree from the Universidad de Puerto Rico and a master’s and doctorate from the State University of New York-Stony Brook.

**Publications**

**Las aventuras de Don Chipote, o, cuándo los pericos mamen**

by Daniel Venegas

Originally published in 1928, this book weaves an entertaining story embodying the phenomenon that made this nation great—immigration. This little-known classic of American literature tells the tale of a green-born who abandons his plot of land (and a shack full of children) in Mexico to come to the United States and sweep the gold up from the streets.

**The Post-Boom in Spanish American Fiction**

by Donald L. Shaw

What happened in Spanish American fiction after the Boom? Can we define the Post-Boom era?
Boom? What are its characteristics? How does it relate to the Boom itself? Is Post-Boom the same as Postmodernism or something quite different? Author Donald Shaw traces the emergence of a different kind of writing that began to displace the Boom in the mid-1970s.

Structures of Power: Essays on Twentieth-Century Spanish-American Fiction

Terry J. Peasley and Peter Standish, eds.

The many faces of power—political, personal, and social—of the late 19th and early 20th centuries are explored in these essays by specialists in modern Spanish American literature. Because the authors reveal just how complex and diverse issues of power can be, these essays significantly broaden an already lively debate.

Underground River and Other Stories

by Inés Arredondo

Set at the beginning of the 20th Century in the tropical western Mexican state of Sinaloa, the stories collected in this book focus on female subjectivity. Author Inés Arredondos stories are printed in English for the first time.

1996

The Defiant Muse: Hispanic Feminist Poems from the Middle Ages to the Present

Angel Flores and Kate Flores, eds.

This book offers 80 poems by Spanish and Latin American poets from 12 countries. The poems are presented in their original languages alongside a new English translation.

Ella Price's Journal

by Dorothy Bryant

This novel of women's consciousness unfolds as a series of entries in the journal of Ella Price, a suburban California mother and housewife who has decided to attend college for the first time at the age of 35. What she learns inside and outside of class will leave her irrevocably changed, and force her to make painful but empowering choices.

Hispanics in Congress: A Historical and Political Survey

by Maurilio E. Vigil

This book is a concise overview of the presence, activism, and overall contribution of Hispanics in the U.S. Congress, the most important policy-making institution in American government.

Alvar Nunez Cabeza de Vaca: His Account, His Life, and the Expedition of Pánfilo de Narváez

by Alvar Nunez Cabeza de Vaca

This three-volume boxed set—translated and edited by Rolena Adorno and Patrick Charles Pauzi—presents Cabeza de Vaca's account of the doomed Narváez expedition during the early 1500s. It offers an isolated glimpse of areas of today's coastal Texas and northeastern Mexico that would not be visited again by Europeans for over 150 years as well as the earliest eyewitness description of the North American bison.

The Art and Politics of Bolivian Cinema

by José Sanchez-H

In Bolivia, politics have always shaped art, particularly when it comes to film. This book presents Bolivia's most significant filmmakers largely in their own words.

CONFERENCES

Elon College: Challenge Response

September 23-25
This national multidisciplinary conference focuses on rethinking key issues in college learning: The Role of the Academic Major, The Impact of Technology on Teaching and Learning, The Challenge of Connected Learning, and The Changing Role of Students and Faculty.
At Elon College in Elon College, N.C.
Contact: Web site, <www.elon.edu/ckr99>

Popular Culture Association and American Culture Association—Latin American Congress

September 29-October 2
In Puebla, Mexico.
Contact: Paul Rich, Hoover Institution, Stanford, CA 94305-6010; e-mail, <rich@hoover.stanford.edu>; Web site, <http://ferns.puc.udlap.mx/congress>

CUPA National Conference and Expo '99

October 3-6
CUPA (College and University Personnel Association) will hold its national conference and expo for vice-presidents, directors, and managers of human relations departments in colleges and universities. Topics relate to employee benefits and compensation, financial/retirement planning, health/life insurance, among many others. At the Westin Seattle Hotel in Seattle, Wash.
Contact: Rebecca Mangan. (202) 29-0311 ext. 38; e-mail, <manean6@cupainet.cupa.org>; Web site, <www.cupa.org>.

Education Connections '99

October 4-5
Study USA-Mexico '99
October 7-9
The U.S. Trade Center, Department of Commercial Service, and Kiva Expositions, Inc., are hosting the 2nd annual Study USA-Mexico '99 education fair in Mexico City. In addition, Kiva is offering Education Connections '99 in Guadalajara. This year's recruitment fairs not only focus on student recruitment but also promote dialogues between Mexican and American universities to initiate articulation agreements.
Contact: Charlotte Adams. (503) 351-9600; e-mail, <kivaeexpo@mindspring.com>.

USHLC—National Conference

October 7-10
The 17th Annual United States Hispanic Leadership Conference (USHLC): "Taking Responsibility: Making Latinos Count in America's New Majority." Sponsored by the U.S. Hispanic Leadership Institute (USHLI), the USHLI program focuses on empowerment, unity, pride, diversity, and community. At the Hyatt Regency McCormick Place in Chicago, Ill.
Contact: USHLI. (800) 490-5151; e-mail, <ushli@adi.com>.

SACNAS—National Conference

October 7-10
Society for advancement of Chicanos and Native Americans in Science presents "Bridging the Gaps in Education." In Portland, Oregon.
Contact: SACNAS. (503) 490-0070; e-mail, <info@sacnas.org>; Web site, <www.sacnas.org>.

University of South Carolina—"The Minority Student Today"

October 10-13
Conference on recruitment, retention, and success of the minority student today.
Sponsored by the University of South Carolina Division of Regional Campuses and Continuing Education: in cooperation with University of the Incarnate Word. In San Antonio, Texas.

Contact: (803) 777-9444 or 2260; e-mail: <conf@uwsc.edu>; Web site: <www.sc.edu/conted/msi.htm>

**Austin Community College - Telelearn'99**

October 10-15
Telelearn'99: Education in Transition conference, hosted by Austin Community College; sponsored by The Telecourse People and Instructional Telecommunications Council; in cooperation with PBS Adult Learning Service. An annual conference to learn about the latest products and services in the growing field of distance education. In Austin, Texas.

Contact: Fran Pretty, (302) 435-1773; e-mail: <pretty_f@email.msn.com>; Web site: <www.sinclair.edu/community/ltc>

**Online Learning '99 International Conference and Performance Support '99 Exposition**

October 17-20
The most innovative ways to develop and deliver online learning will be presented and demonstrated at these companion events sponsored by Lakewood Publications. At the Los Angeles Convention Center.

Contact: Tom Reid or Walter Speer, (212) 966-0024; Web site: <www.lakewoodconferences.com>

**National MultiCultural Institute - Annual National Conference**

October 21-24
The 14th annual conference of the National MultiCultural Institute: "Embracing an Inclusive Society: The Challenge for the New Millennium." Given the increasing diversity in the U.S., new skills and knowledge are required in such fields as workforce diversity; human resource management; education; and conflict resolution. At the Hyatt Regency Washington on Capitol Hill. Washington, D.C.

Contact: Institute; (202) 483-0700; e-mail: <nmci@nmci.org>; Web site: <www.nmci.org>

**National Higher Education Conference on Students of Color**

October 2-3
"The Learning-Centered Environment: Students and Learning in the New Millennium." Featured guests include Dr. Alfredo G. de los Santos, Jr., The Maricopa Community Colleges (Ariz.). At the Minneapolis Hilton & Towers. Minneapolis, Minn.

Contact: phone, (850) 222-1087/385-1740; e-mail: <cniford@aol.com>; Web site: <www.collegesurvival.unity.com>

**ACE: Educating a Nation (VII)**

October 28-30
The American Council on Education's Division of Access and Equity Programs Office of Minority in Higher Education is sponsoring its 7th "Educating a Nation" national conference on diversity and improving the participation of students of color in postsecondary education.

Contact: phone, (202) 939-3995; e-mail: <clache@ace.nche.edu>; Web site: <www.acenet.edu>

**NSH MBA–National Conference and Career Expo**

October 28-30
The National Society of Hispanic MBAs' 10th annual event, this year on the theme of "Elevate beyond Excellence: Face the Challenges." Closing plenary speaker: Ray Suárez, host of *Talk of the Nation*. At the Adam's Mark Hotel and Colorado Convention Center. Denver.

Contact: phone, (214) 267-1622; e-mail: <info@nsmba.org>; Web site: <www.nshmba.org>

**HACU–13th Annual Conference**

October 30-November 2

Contact: phone, (210) 692-3805; Web site: <www.hacu.net>

**USC ROSSIER SCHOOL OF EDUCATION**

**DEAN OF THE SCHOOL**

The University of Southern California is inviting applications and nominations for the position of Dean of the Rossier School of Education. This School is one of the University's seventeen professional schools. The School's primary mission is to redefine excellence in urban education through its focus on the educational needs of students from kindergarten through graduate school. In September, 1998, the School received a $20 million endowment grant to support its urban educational mission, one of the largest gifts ever given to a school of education.

More than 940 students are presently enrolled in the Rossier School of Education. Programs offered include an undergraduate minor and graduate-level degrees of Master of Science, Doctor of Education, and Doctor of Philosophy in three academic divisions: Learning and Instruction; Counseling and Psychology; and Educational Policy, Planning, and Administration. The School has approximately 45 full-time faculty.

The University seeks a visionary leader with a strong background in and a demonstrated commitment to urban education. As the academic leader and chief administrative officer of the Rossier School of Education, the Dean reports directly to the Provost of the University. The responsibilities of this position include: fostering excellence in the School's education and research programs; fiscal planning and management; short-term and strategic planning; faculty recruitment; and leading the School's fundraising efforts.

Nominations and applications should include a letter describing the candidate's qualifications for this position, a curriculum vita and names, addresses and telephone numbers of three references. These materials should be addressed to Dr. Marilyn S. Flynn, Chair, USC Rossier School of Education Dean Search Committee, Office of the Provost, ADM 202, MC 4019, University of Southern California, Los Angeles, Ca 90089-4019. The materials can also be sent by fax to: 213-740-1782 or by e-mail to strppol@usc.edu. Review of applications and nominations will begin immediately and will continue until the position is filled. USC is an equal opportunity educator and employer.

The University of Southern California is an equal opportunity educator and employer.
Book Review

by Eduardo Mendieta

Democracy, remarked the great U.S. social philosopher G.H. Mead, is institutionalized revolution. One could add that what makes democracy revolutionary is its core institution, citizenship. Citizenship makes possible the empowerment, nurturing, and growth of social agents capable of communal self-legislation. Without citizenship, social actors remain mere subjects to a supreme legislator, never citizens—equals before others, enactors of the law of the land.

As subjects under an external legislator, persons live under heteronomy. As citizens under a self-legislated lawfulness, persons live autonomously. This autonomy can never be impaired, lest democracy be betrayed.

At the same time, citizenship is what prevents democracies from imploding or from tearing themselves apart. For it is citizenship that mediates democracy’s centrifugal drive towards homogenization, the drive to think that only those who are sufficiently alike can come to the same kinds of decisions. And it is e’citizenship that mediates democracy’s centripetal drive towards heterogeneity, the drive to think that it does not matter who you are as long as you participate in the process of forming a general will.

Democracies are threatened when people begin to think that only those who like themselves can possibly live under the same law, and their primary directive becomes how to keep pure. A democracy remains creative, promising social hope, when what becomes important is how to empower persons to participate in resolving its problems and actualizing its goals, so their directive becomes how to be ever more inclusive. For the former, the primary goal is to remain the same, unchanged; for the latter, the primary goal is to become different, to change.

These are some of the lessons I learned from this outstanding book on citizenship. Flores and Benmayor have put together in this handsome volume (books are also aesthetic experiences) the results of more than a decade of engaged research within Latino communities across the U.S., from New York to California, the cooperative work of members of the Latino Cultural Studies Working Group.

I say “engaged research” because in all cases here reported, the writers were activists, participants, co-subjects in some of the activities here construed as a Latino cultural citizenship. By this term, the editors and working group members mean: that citizenship that emerges from the cultural activity of Latinos engaged in projects of identity-claiming and remembering. Cultural citizenship is that unique type that emerges when culture is made to interpret and mediate citizenship, and when the living out, the enactment of citizenship, transforms self-images and imaging.

Claiming citizenship is a way of becoming both oneself and someone else whom one can then claim as one’s own product and project. For the Working Group, cultural citizenship means that culture suffuses citizenship, while citizenship allows one to claim culture.

Citizenship, in this wonderfully written and lived meditation on human dignity, turns out to be more than an institution of rights. It is a form of life that serves as the hermeneutical horizon that makes the quest for rights at all thinkable. It is in this way that we can understand how it is that citizenship, as a right to community, is also a right to culture. This right to culture is fundamental to the very maintenance of citizenship. Without this culture, citizenship is a remote and unfathomable activity.

But this book is about a Latino cultural citizenship, by which the editors and working group whose research comprises most of this book mean that there is a unique type of Latino cultural activity that has informed their claiming of citizenship. Latinos do have a unique culture determined and mediated by language, religion, food, certain types of civic arrangements and praxis. Latino cultural practices, icons, furthermore, have been impacted by specific historical experiences with the U.S.

Latinos have diverse, yet unified, historical experiences of colonialism, imperialism, neo-colonialism, etc. Some crossed the border; and others were crossed by the border, in Anzaldúa’s aphorism. Some were “Americanized” before they ever dreamed of fleeing North, to the U.S., to use Alejandro Portes’ expression. The bulk of the book, in fact, is devoted to chronicling, describing, recording, re-membering the many ways in which Chicanos, Mexicanos, Puerto Ricans, Central American refugees have claimed citizenship through claiming civic and social space for their identities. Some struggles were labor struggles. Others were struggles for rights to their language, and this literacy in their mother tongue.

The book is also a beautiful story about human struggle, solidarity, and social hope. This last point is particularly important. The book illustrates eloquently and without equivocation the ways in which subject peoples empower themselves, claim recognition, thus transforming citizenship. The Latino modalities of being have determined significantly the ways in which they have reactivated while transforming citizenship. It is in this sense that this is truly a book about Latino citizenship.

At the same time, Latino cultural citizenship is a token of something to which all citizens can and must make a claim: cultural citizenship. We can also talk about an Asian cultural citizenship, and so on, that is, many ways of living out cultural citizenship.

In light of this, the book makes it almost impossible to hold the complementary beliefs that citizenship is impaired by culture and that culturally marked social agents are hindered to exercise citizenship.

A right to culture is a fundamental right in the calendar of the rights that make up citizenship, but it is this culture that prepares us for citizenship. This is not a contradiction, but a dialectical tension.

Eduardo Mendieta is assistant professor of philosophy and associate director of the Center for the Study of Latinos in the Americas (CELSA) at the University of San Francisco.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers’ Guidelines.
Fellowships for Biological and Biomedical Sciences

The Howard Hughes Medical Institute announces the 2000 competitions for fellowship programs that support training in fundamental biological and biomedical research. Awards, based on international competitions, focus on research directed to understanding basic biological processes or disease mechanisms. Fellowships may be held at academic or nonprofit research institutions.

**Predoctoral Fellowships in Biological Sciences**

Up to five years of support for full-time graduate study toward a Ph.D. degree in cell or developmental biology; genetics or molecular biology; immunology or microbiology; mathematical biology or epidemiology; neuroscience or physiology; structural biology or biochemistry, or related fields. Applicants must not have completed the first year of postbaccalaureate graduate study in biology. Application deadline: mid-November

**Postdoctoral Research Fellowships for Physicians**

Three years of support for training in fundamental research subsequent to at least two years of postgraduate clinical training and no more than two years of postdoctoral research training. Application deadline: early December.

**Research Training Fellowships for Medical Students**

An opportunity for medical students in the United States to explore a burgeoning interest in fundamental research. Support is awarded for one year of full-time fundamental research in a laboratory at the student’s medical school or another institution (except NIH in Bethesda, Maryland). Application deadline: early December

**Research Scholars at the National Institutes of Health**

Under this joint HHMI–NIH program, medical students in the United States spend an intensive year in research in the intramural program at NIH in Bethesda, Maryland. Residence is provided at the Cloister on the NIH campus. Application deadline: early January.

**2000 Program Announcements and Applications**

For Predoctoral Fellowships:

Howard Hughes Medical Institute
Office of Grants and Special Programs
Department AJ100

NIH Undergraduate Scholarship Program (UGSP)

If you would like to be trained and mentored at the cutting edge of biomedical research while receiving scholarship support, the UGSP may be for you!

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government’s leading biomedical research and research training agency, offering scholarships to qualified individuals to pursue undergraduate life sciences degrees.

Scholarships of up to $2,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

During each year of the award, scholars train for 12 weeks as paid employees in NIH research laboratories. They are assigned mentors and participate in research seminars and developmental programs. Housing and transportation are provided. After graduation, 1 year of full-time research employment at NIH is required for each year of scholarship support.

You Should Apply If You:

Can demonstrate a deep interest in pursuing a career in biomedical research.

Can demonstrate being from a disadvantaged background.

Have a GPA of 3.5 or better and are in the top 5% of your class.

Are a U.S. citizen or permanent resident.

Are enrolled in a degree seeking line at an accredited institution.

This is a special opportunity for special students.

For more information, contact: UGSP
http://ugsp.info.nih.gov

EDUCATION AND ACCESS COORDINATOR (Staff Assistant)
New WORLD Theater
Fine Arts Center
The University of Massachusetts/Amherst's Fine Arts Center seeks an Education and Access Coordinator for New WORLD Theater.

The individual appointed to this position is the primary coordinator of community-based projects and educational activities such as symposiums, talk-backs, workshops, and community-artist dialogues that complement New WORLD Theater’s season performances. New WORLD Theater’s central focus is the presentation and production of works by playwrights of color.

Qualifications: A bachelor’s degree in Arts Administration, arts education, American or ethnic studies, or related field plus one to three years experience in arts administration, community organizing, and/or arts marketing. The position requires excellent communication and writing skills, and experience in organizing events and working with diverse populations.

Hiring Salary Range: $26,600 - $33,200. Normal hiring range: $26,600 - $29,900

Twenty-five percent of this position is grant-funded; continuation of 25% of the appointment beyond 6/30/2001 is contingent upon funding.

Please submit a cover letter, resume, and 3 letters of reference, no later than October 1, 1999 to: Search #05471, Employment Office, Room 167, Whitney Administration Building, University of Massachusetts, Amherst, MA 01003-8170.

Indiana University invites applications for the Minority Faculty Fellowship Program for the summer 2000 and the academic year 2000-2001

Indiana University invites individuals nearing the completion of the doctorate or who have completed the Ph.D. or comparable graduate degree within the last four years to apply to the Minority Faculty Fellowship Program. The purpose of the program is to introduce African American, Latino and Native American scholars to the Bloomington campus. The program provides these fellows experience, professional diversity, and the opportunity to teach and conduct research at one of the top universities in the country. Some fellows have subsequently been offered tenure track positions at various Indiana University campuses.

Applicants can be considered for summer 2000 and for the 2000-2001 academic year fellowships. Summer fellows teach one class during the first six weeks or the second eight weeks of the summer sessions and academic year fellows teach one or more classes during the fall and spring semesters. The fellowship package includes a $3500 stipend in addition to a salary equivalent to that of an Indiana University faculty member of the same rank.

Interested candidates should submit an application by phone at 812-855-0854 by electronic mail at mffp@indiana.edu or by writing to the Minority Faculty Fellowship Program, Memorial Hall West 108, 1021 E. Third Street, Indiana University, Bloomington, IN 47405-4701. Applications can be submitted electronically at http://www.indiana.edu/~mffp.

Interested candidates must complete an application and submit it along with a complete electronic file of supporting documents including: a letter of interest, a resume, a list of publications, a teaching statement, and three letters of reference. These deadlines are necessary in order to provide departments and schools ample opportunity to evaluate applications and to set a timetable for all candidates. Applications will be accepted until the positions are filled.
ITHACA

ASSOCIATE
PROVOST/DEAN OF
GRADUATE STUDIES

Ithaca College invites applications and nominations for the position of Associate Provost/Dean of Graduate Studies.

The Associate Provost/Dean of Graduate Studies reports to and assists the Provost in academic planning and gives direction to new faculty development programs, provides leadership to graduate chairs and those in graduate programs, shares the graduate committee, and represents graduate programs in various policy making groups. The Associate Provost/Dean of Graduate Studies works directly with the deans and faculty on new program development, supervises the College's program review process, and provides staff support to the Provost as needed. In carrying out these responsibilities, the Associate Provost serves as a member of the Deans' Council, Senior and cabinet officers, and a member of the Academic Policy and Curriculum Committee, the all-college academic policy and curriculum review body, and the all-college budget committee.

Qualifications for the Associate Provost/Dean of Graduate Studies position include the ability to provide strong academic leadership, demonstrated administrative skill at the level of associate dean or above or at either a comprehensive or more complex academic institution, experience with faculty development programs, knowledge of and experience related to graduate education, commitment to a "team" approach in administration, significant involvement in curriculum development, successful teaching and scholarship performance experience, an earned doctorate or appropriate terminal degree, and well-developed interpersonal skills. The salary for the position is competitive and commensurate with credentials and experience.

Ithaca College is a comprehensive, residential college in New York State, and serves approximately 5,600 undergraduate and 350 graduate students with a full-time faculty of 490. The institution is comprised of the schools of Business, Park School of Communications, Health Sciences and Human Performance, Humanities and Sciences (the largest unit), and Music (the oldest unit). Located in the culturally rich and scenically beautiful Finger Lakes region of central New York, the College offers an excellent selection of undergraduate and graduate degree programs in a distinctive blend of liberal and professional education.

Review of applications will begin immediately and continue until the position is filled. The successful candidate should be able to assume the position in January 2000 or as soon thereafter as possible. Please submit a letter of application, a complete and current vita and the names and addresses of three professional references to:

Associate Provost/Dean of Graduate Studies Screening Committee
601 William A. Scholler, Special Assistant to the Provost
Ithaca College
350 Job Hall
Ithaca, NY 14850-7012

Ithaca College is an Equal Opportunity/Affirmative Action Employer. Members of underrepresented groups, including persons with disabilities, minority veterans and women, are encouraged to apply.

RARITAN VALLEY
COMMUNITY COLLEGE

President

The Board of Trustees of Raritan Valley Community College (RVCC) invites nominations for the position of President. The President is the Chief Executive Officer of the College and reports directly to its fourteen-member governing board.

RVCC has garnered six national awards over the past five years for excellence in faculty instruction, innovative new courses, distinctive leadership, integrating technology into instruction and offering international resources to the business community. It has set national precedent by freezing tuition for five consecutive years including the '99 - '00 academic year. The College recently opened the Advanced Technology Communication Center, serving as a conduit between the college and the business community, and a new Science and Technology Laboratory Complex is set to open in early 2001.

The College's 1999 - 2002 strategic plan focuses on establishing RVCC as a Regional Higher Education Center, collaborating with other colleges and universities to offer baccalaureate and graduate degree programs on campus.

RVCC is a bi-county college in New Jersey, supporting both Somerset and Hunterdon counties. Somerset and Hunterdon counties continue to be identified in the top ten for the fastest growing and wealthiest areas in the country. Located in North Branch, New Jersey, the 240-acre suburban rural campus is sixty minutes from both New York City and Philadelphia. It offers 73 associate degrees and certificates to a student body of over 6,000 and customized training programs and non-credit courses are taken by over 5,000 corporate employees. RVCC can be located on the web at www.raritanval.edu.

The position will remain open to nominations until a select list of candidates is put forward for final consideration by the Board of Trustees; however, the search committee, comprised of students, faculty, staff, community members and trustees, intends to begin its screening of candidate files by the end of October. Nominations should be addressed to:

Dr. John McGuire
Chair, Presidential Search Committee
C/O College and Community Relations
Raritan Valley Community College
PO Box 3300
Somerville, NJ 08876

Robert Moran and Shelly Weiss Storbeck of the A T Kearney Education Practice are assisting the Board and Search Committee in this search, and interested parties are also invited to contact them: A T Kearney, Inc., Education Practice, 333 John Carlyle Street, Alexandria, VA 22314, Phone: 703.796.4637, Fax: 703.915.1782

Raritan Valley Community College is an affirmative action, equal opportunity employer. It actively seeks and encourages nominations from women and members of the underrepresented population.

Proudly serving a diverse South Texas
1-800-687-6000 • www.tamuk.edu
DIRECTOR OF STUDENT ACTIVITIES

Candidate will provide leadership for a comprehensive Student Activities program based on student personnel philosophy of student development. Reports to the campus Dean for Student Services and is responsible for developing and administering programs for new freshman and currently enrolled students.

Master's degree required: degree in Student Personnel Administration, Counseling, Student Development, Higher Education or a related field. Minimum of two years experience as a Director or Assistant Director of Student Activities in a college or university setting required. Experience with new student orientation program desired; additional experience in student services will be considered.

Strong managerial and supervisory skills with the capability to establish priorities and function as a leader; manage multiple budgets with excellent computer, communication and interpersonal skills; ability to relate to an ethnically diverse college community

Salary: commensurate with education and experience with excellent benefits. Starting Date: ASAP. Application Deadline: 10/08/99

Applicants should reference position number (60-69) and send the following as a single packet: (1) letter of interest, (2) resume, (3) unofficial copy of graduate transcripts, and (4) list of three professional references (names, addresses and telephone numbers) to:

Judy Chastony

Georgia Perimeter College

UNIVERSITY OF MARYLAND

Executive Director
Distributed Learning

The Office of Continuing and Extended Education (OCEE) is seeking a team-oriented visionary with the technological expertise to excel in this important, newly created position. Under the general direction of the Associate Provost and Dean, the Executive Director, Distributed Learning (DL) will develop strategies to support and expand faculty interest and participation in the use of DL programs which are consistent with the strategic mission of the university and its colleges. The Executive Director will be the primary contact in OCEE for developing the required technological links to provide continuing education (CE) programs at a distance and will interface with offices on campus that provide web-related technical services, and other academic and administrative student support service units.

The Executive Director will lead the start-up development, course conversion, and management of credit and non-credit programs offered through a variety of media. Responsibilities include identifying strategic opportunities in DL, establishing and maintaining partnerships that increase electronically-mediated CE, and coordinating web-based curriculum development and delivery across campus. The successful candidate must have demonstrated ability to build relationships with campus academic and administrative units, and with industry, government agencies, and non-profit representatives.

As a senior executive within OCEE, the Executive Director is also expected to demonstrate leadership and to fund a capacity for mentoring staff. This function is critical because the organization is creating a culture of excellence in program consultation, quality and access and establishing a concrete expression of the University of Maryland's expanded CE mandate.

Required: a thorough understanding of computer and DL technologies with experience in both web-based and satellite delivery start-ups, the ability to coordinate and negotiate with academic units, experience developing partnerships and working with DL vendors, knowledge of issues facing adult learners, experience with budgeting and financial management, supervisory organizational, interpersonal, analytical, planning, and written and oral communication skills. A master's degree, preferably in instructional design or a related field, and five years progressively responsible experience in higher education are required. A doctorate is preferred. Success in obtaining external funding through grant proposals is desirable.

Send resume and letter of interest with names of three professional references to:

Rosemary Blunck
2103 Rockord Armory
University of Maryland
College Park, MD 20742-5321

For best consideration submit application materials by September 15th, 1999.

The University of Maryland is an equal opportunity, affirmative action employer.
LOYOLA LAW SCHOOL

Loyola Law School, Los Angeles (ABA and AALS, 1957) receives applications and nominations for Dean of the Law School. The position commences July 1, 2000. Loyola is dedicated to excellence in teaching and legal scholarship. As a Jesuit institution, it seeks to produce lawyers who in their practice of law and commitment to public service demonstrate the highest standards of personal integrity and professional ethics. The Law School has approximately 1,335 day and evening students (40% minority) and 65 full-time faculty (60% women), of all backgrounds and faiths. Loyola has a strong commitment to public interest, including a mandatory pro bono service requirement. It houses four on-campus centers - the Cancer Legal Resource Center, the Center for Conflict Resolution, the Disability Mediation Center, and the Western Law Center for Disability Rights. Loyola operates summer programs in Beijing, Bologna, and Costa Rica. It plans to offer a Master's in Taxation starting in Fall 2000. The Law School, located near downtown Los Angeles, has one of the largest private law library collections in the western United States and is situated on a stunning campus designed by internationally acclaimed architect Frank Gehry. The Law School is part of Loyola Marymount University. The Dean reports directly to the University President. Candidates should have strong academic credentials, be members of the bar, possess scholarly, administrative and leadership abilities, and have at least five years' experience on a law faculty. The Law School welcomes applications from minorities and women. Send an application consisting of a letter and resume (or nominations) to:

Prof. Christopher May, Chair
Dean Search Committee
Loyola Law School
919 S. Albany St.
Los Angeles, CA 90015-0019

Screening of applications begins in September. Applications will be accepted through October 15, 1999. For more information, visit the School's web site at http://www.lls.edu.

SPEECH/LANGUAGE SPECIALIST

The A. Harry Moore School is a specialized academic and therapeutic school for the disabled which is affiliated with New Jersey City University. Sedimentology/Microbial Geology

The Department of Geology and Geography invites applications for a tenure-eligible position starting August, 2000, at the rank of assistant professor. The successful candidate will be expected to teach at both the undergraduate and graduate levels in geology and geoscience, supervise student theses, and to establish a productive research program in their field of expertise. The Department offers Bachelor of Arts and Bachelor of Science degrees in Geology, and Masters degrees in Geology and Environmental Science. Active participation in the University's interdisciplinary Masters program in environmental science is required. Candidate will be expected to foster interaction with ongoing research in paleoecology, carbonate sedimentology, geochemistry and structural geology. In addition to the general employment requirements defined above, the applicant will be expected to teach courses in their field of specialty and occasional courses in sedimentary geology, environmental geology, and computer applications.

An earned Ph.D. in the geosciences is required at the time of appointment. The successful applicant must have an emphasis in sedimentology with a focus on microbial processes and/or other biogenic interactions in the genesis of sediments or rocks, and must be strongly field oriented. Proficiency in the integration of these studies with the interpretation of the global sedimentology record and/or sedimentology processes is required. Qualified applicants must have demonstrated successful teaching experience, and excellent communication skills.

Applications should submit letter of application addressing qualifications and experience, curriculum vitae, description of teaching and research interests, selected copies of relevant publications, evidence of teaching excellence, transcripts of academic work, and the names of at least three professional references (include postal and E-mail addresses) to:

Dr. Collette Burke, Chair
Department of Geology
Wichita State University
1845 Fairmount
Wichita, Kansas 67260-0027

The department will begin evaluating applications as they arrive and continue until the position is filled. For full consideration, complete application packages must be received no later than November 1, 1999. The successful applicant will demonstrate a commitment to diversity and the diverse populations of Wichita State University.

Wichita State University is an AA/EOE. Women and minorities are encouraged to apply.

---

Director, Division of Neuroscience and Basic Behavioral Science
National Institute of Mental Health
National Institutes of Health

The National Institute of Mental Health (NIMH) is seeking applications for the position of DIRECTOR, DIVISION OF NEUROSCIENCE AND BASIC BEHAVIORAL SCIENCE, a major component of the Extramural Program.

The Division of Neuroscience and Basic Behavioral Science (DNBBS) will serve as the major program in the study of mental health; to stimulate the expansion of resources for mental health research that are both nationally and internationally; and actively participate in determining program priorities and funding levels. The Director, DNBBS, will oversee a budget of approximately $250 million per year and a staff of 50 employees.

As Director, DNBBS, the incumbent will be responsible for the development, direction, coordination and evaluation of grant programs and activities of the Division.

The Division supports a wide range of basic and clinical neuroscience research, genetics and therapeutics research, basic behavioral research, research training and resource development, and research dissemination, to further understand the etiology, treatment and prevention of brain disorders.

The ideal candidate should possess: leadership and management experience in a basic, clinical, or behavioral research program of national standing; a M.D. or Ph.D. degree in Psychology, Psychiatry, Neuroscience, Psychobiology; or related field (equivalent training); extensive knowledge of and experience in the neurosciences behavioral sciences, or psychobiology and their relationship to mental illness and related brain disorders. Applicants should provide written documentation of how they meet the following requirements: 1) Knowledge and ability to lead a scientific program of national and international scope involving neuroscience and basic behavioral science; 2) Ability to provide leadership and manage one to a large multi-disciplinary research program of national scope and complexity with extensive managerial and executive level responsibilities.

This position is located in the Headquarters of NIMH in Bethesda, Maryland, and is a tenure/permanent position in the Senior Executive Service (SES). Annual salary range is $110,351 to $125,900 per annum, depending on qualifications. Physicians may be eligible for a Physicians Comparability Allowance of up to $20,000 per year. A recruitment bonus of up to 25% may be available to a non-Federal candidate selected for this position. A relocation bonus of up to 25% may be available to permanent Federal employees who relocate to accept this position, subject to individual approval. The full range of generous Federal benefits, retirement, and vacation are included.

HOW TO APPLY: Applicants must submit a cover letter, resume, application for Federal Employment, OF-612, or any other equivalent written format that addresses the requirements AND a bibliography. Application procedures and qualification requirements may be accessed on the NIH Web site at http://www1.od.nih.gov/ohrm/hrinfo/ses/vacancy

SEND APPLICATIONS TO: Ms. Margot Darby, NIMH Personnel Management Branch, 6001 Executive Boulevard, Room 8154, MSC 9651, Bethesda, Maryland 20892-9651 (local phone: 301-443-1000; FAX: 301-443-1094; E-MAIL: mdarby@nih.gov).

Selection for this position will be based solely on merit, with no discrimination for non-merit reasons such as race, color, religion, gender, national origin, political affiliation, marital status, disability, age, sexual orientation or membership or non-membership in an employee organization.

APPLICATIONS WILL BE ACCEPTED THROUGH SEPTEMBER 30, 1999.

NIH is an Equal Opportunity Employer
Bentley College, the Business School for the Information Age, is developing ground-breaking curricula for the 21st century based on the full integration of information technology throughout our business curriculum, in support of the learning process and in course content. In Fall 1999, we will begin to matriculate students in our highly innovative Information Age MBA and other technology-focused degrees - in areas such as Accounting Information Systems, Information Age Marketing, Human Factors in Information Design, and Global Financial Analysis. Also, beginning in the Fall, our undergraduates will begin a sequential, cross-disciplinary, and information technology-intensive business core curriculum. Recently, the Trustees created special new tenured positions for faculty members able to provide leadership in continuing the development of pedagogically advanced information technology programs and centers.

We have information age facilities that complement our program offerings. At the Hughey Center for Financial Services, Bentley students hone their skills in one of the very few trading rooms in an academic setting in the nation. Hands-on, state-of-the-art opportunities will soon be available in our Marketing Technologies Showcase lab and in the College’s new Accounting Center for Electronic Learning and Business Measurement. An additional high technology academic building is under construction.

CONTINUING SEARCH
TRUSTEE PROFESSORSHIP

Bentley has recently hired new Trustee Professors and seeks another to be appointed for Fall 2000. Recent articles in Fortune and CIO Magazine highlight Bentley’s emergence as the technology-focused business school in the country. We seek an outstanding individual, poised to provide leadership in interdisciplinary information technology teaching and scholarship, who would thrive in our environment of continuing growth. Trustee Professors are asked to participate extensively in curriculum/program development. Their teaching load is one course per semester and they receive College resources such as summer grants and graduate assistant support.

We anticipate that candidates for this special position will currently be Assistant or Associate Professors who, if appointed, will enter Bentley with tenure. The initial term of appointment as Trustee Professor is for five years and is renewable. The Trustee Professor will be appointed in a traditional business department such as Accountancy, Computer Information Systems, Finance, Management, Operations Management, or Marketing. The ideal candidate will demonstrate scholarly interests in both information technology and one or more of these departments and disciplines.

For best consideration, apply by 11/15/99 to: Dr. H. Lee Schorff, Vice President for Academic Affairs, Bentley College, 175 Forest Street, Waltham, MA 02452-4705.

Candidates will be considered until the position is filled.

Visit our website at: www.bentley.edu

Bentley College is an equal opportunity employer building strength through diversity and welcome applications for under-represented groups.

For other employment opportunities, call our 24-hour Job Hotline at (781) 891-2889.

Manchester Community-Technical College is the largest of Connecticut’s Community Technical Colleges. MCTC is in the process of building a state-of-the-art $26 million dollar Learning Resource and Technology Center, scheduled for completion in the year 2000. MCTC is seeking candidates for the position of:

Instructor of Accounting/Finance

For a copy of the vacancy announcement, including minimum qualifications and salary, please visit our website at www.mctc.commnet.ct.us or call (860) 647-5153.
Send letter of intent, resume, transcripts, and the names of three references to:

Deborah A. Wilson, Director of Personnel and Contract Administration
Manchester Community-Technical College
P.O. Box 1046, Manchester, CT 06045-1046

Must be postmarked no later than October 11, 1999

ECE-AAMF
PRESIDENT
Central Washington University

Central Washington University is poised to make major advancements in providing distinctive educational experiences that bring value and opportunity to a diverse student population. The University seeks a leader of exceptional academic credentials and experience who can provide the vision and energy to effectively mobilize the strengths and talents of the University community to create a future that is consistent with its academic purpose.

ACADEMIC PURPOSE: The University is committed to teaching as the means to facilitate learning. All members of the university community support a relationship between teacher and student which makes them both partners in learning, scholarship, research, creative expression and the application of knowledge to solve human and societal problems.

ACADEMIC CREDENTIALS AND EXPERIENCE: The minimum qualification is an earned doctorate from an accredited institution of higher education.

IDEALLY, LEADING CANDIDATES SHOULD DEMONSTRATE A STRONG RECORD OF: Teaching, scholarship and service in academic rank that is commensurate with a faculty appointment at the associate or full professor level; effective leadership at a level comparable to an academic dean or above; leadership based on consensus building and shared governance, commitment to undergraduate and graduate education at a student-centered institution.

KNOWLEDGE AND COMPETENCIES THAT ENCOMPASS: Academic planning and program development; current issues in public higher education; enrollment management; institutional strategic planning and budgeting; instructional technology; support for the value of diversity; securing resources to advance academic purpose.

LEADERSHIP CHARACTERISTICS: Personal and professional integrity; commitment to the academic purpose of the University; ability to establish and maintain effective student, faculty and staff relations; capacity to facilitate relations within the community, state and region; ability to promote the University through political processes; effective interpersonal and communication skills.

UNIVERSITY PROFILE: Central Washington University is one of six state-assisted, four-year institution of higher education in Washington. A regional comprehensive university, CUW offers baccalaureate and graduate degrees in more than 90 academic programs. Throughout its history, the University has distinguished itself in many ways, most notably through its quality teaching and academic programs, its student-centered orientation, and its commitment to research, outreach and provision of lifelong learning opportunities to the citizens of Washington. The University is comprised of the College of Arts and Humanities, College of the Sciences, College of Education and Professional Studies, and School of Business and Economics. CUW's 383 faculty have compiled an impressive record of teaching, scholarship and service.

Current enrollment is approximately 8,100 students, about 92 percent of whom are undergraduates. Roughly 6,700 students attend classes on the Ellensburg campus with another 1,400 upper-division students enrolled at the University Centers located in Lynnwood, Moses Lake, SeaTac, Steilacoom, Wenatchee and Yakima. Through these centers, CUW has taken a leadership role in the state in providing educational opportunities for place-bound citizens.

CUW has been rated for three consecutive years in the top 100 "Best Buys" among colleges and universities in the United States. The University is governed by an eight-member board appointed by the Governor. The University budget is approximately $110M, and its current enrollment is approximately 5,477.

COMMUNITY PROFILE: The main campus is located in Ellensburg, a city of 15,000, situated east of the Cascade mountains in the Kittitas Valley, which is known as one of the finest living environments in the Pacific Northwest. Ellensburg's downtown, a thriving collection of restaurants, shops and galleries, is a national historic landmark recognized for its Victorian architecture. Ellensburg is accessible to a variety of outdoor recreational activities, cultural events and historical attractions from Yakima and the Columbia River basin to the south and to Wenatchee-Leavenworth and the northern Cascade mountains to the north. The city is a two-hour drive from Seattle, a major cultural center of the Pacific Northwest. For in-depth information about Ellensburg, see www.ellensburg.wa.com

NOMINATION/APPLICATION INFORMATION
Applications and nominations should be directed to:
Dr. Roger Fouts, Chair
Presidential Search Committee
Office of the President
Central Washington University
400 E. 8th Avenue
Ellensburg, WA 98926-7501

Applications should include a letter of interest, detailed vita and the names, addresses, and phone numbers of five references. Screening begins on October 1, 1999, and continues until the position is filled. See www.cwu.edu for more information.

CUW is an AA/EEO/Title IX Institution • 1111 500-560-3321

DEAN
College of Human Resources and Family Sciences

The University of Nebraska-Lincoln invites applications and nominations for the position of Dean of the College of Human Resources and Family Sciences.

The University of Nebraska is an AAU, Research 1, land-grant institution with a distinguished tradition of teaching and research in the major disciplines. With a current enrollment of approximately 23,000 undergraduate and graduate students, it is designed as the principal research and graduate institution in the state.

The College of Human Resources and Family Sciences has three departments: Family and Consumer Sciences; Nutritional Science and Dietetics, and Textiles, Clothing and Design. The College includes 50 faculty, 850 undergraduate and 108 graduate students, housed on two campuses.

The Dean is the chief academic and administrative officer of the College and should be a strong, visionary leader and spokesperson who is interested in building and maintaining institutional linkages and a national reputation for excellence for the College. Applicants must hold the doctorate or other appropriate terminal degree. The successful candidate must have strong experience in teaching, research and/or outreach/extension and administrative experience in budget, planning, and personnel matters. A comprehensive position announcement is available on the Web site or from the address listed below.

The University of Nebraska is committed to a pluralistic campus community through affirmative action and equal opportunity and is responsive to the needs of dual career couples. We assure reasonable accommodation under the Americans with Disabilities Act. Contact Dean Richard Durst at 402-472-9349 for assistance.

The position begins as soon as possible. The University will begin screening applications on October 4, 1999, and continue until an appointment is made. Nominations are welcomed and applications, including letter of interest, vita, and contact information for at least three references who can speak to the candidate's current expertise, should be sent to HRF Search Committee

DEAN
COLLEGE OF HUMANITIES AND SOCIAL SCIENCES

Montclair State University is a comprehensive public university offering a broad range of programs to approximately 13,000 undergraduate and post-baccalaureate students. Founded in 1908, the University is organized into three colleges and three schools: College of Education & Human Services, College of Humanities & Social Sciences, College of Science & Mathematics, School of the Arts, School of Business, and the Graduate School. Montclair State University offers degrees in more than 70 major areas of study and seven degrees at the Master’s and Doctoral level in 36 areas of study. The University is located 14 miles west of New York City on a beautiful 200-acre suburban New Jersey campus.

With a faculty of 150 distinguished scholars and more than 3400 students, The College of Humanities and Social Sciences provides a rich variety of programs leading to the Bachelor of Arts and Master of Arts degrees. The College is the largest of the six schools and colleges at Montclair, and is organized into 15 departments and programs. These programs include: Anthropology; Classics; General Humanities; Communication Sciences and Disorders; English, French, German and Russian; History; Legal Studies; Linguistics; Philosophy and Religion; Political Science; Psychology; Social Work; Spanish and Italian; and several interdisciplinary programs including African American Studies, Women’s Studies, and Latin American and Latino Studies. The College is home to a number of other programs including the Psychoeducational Center, the Institute for the Advancement of Philosophy for Children, the Center for Archeological Studies and the Humanities Institute.

The College has successfully combined a traditional focus on liberal education with programs at both the undergraduate and graduate level that fulfill specific career objectives. The Dean, who is appointed by the President and reports to the Provost/President for Academic Affairs, serves as the chief academic and administrative officer of the College. The Dean will be expected to make intellectual and administrative contributions to the College, but across the campus and within the community as well. She/he will have the vision to identify and pursue new opportunities for the College and the intellectual strength to direct its growth and development. The successful candidate will position the College in the framework of a shared academic governance. The Dean will be responsible for the administrative and fiscal management of the College, with special attention to the recruiting, and development of faculty. She/he will be responsible for effectively representing the College at the campus, alumni, and external communities, and to provide leadership in the pursuit of the external resources required to augment State appropriations. The Dean will be a key member of the University’s core leadership and will be imaginative in finding ways to advance the goals and objectives of both the College and the University to foster collaborations and partnerships across the campus.

QUALIFICATIONS: Each candidate should possess an earned doctorate and a record of distinguished academic achievement appropriate for appointment at the rank of full professor in a department of the College. In addition, the candidate should possess:

• a commitment to excellence in teaching, learning, scholarship, and the application of knowledge
• a record of successful administration in higher education and a broad understanding of the trends in higher education
• a demonstrated record in the acquisition of external resources
• a thorough understanding of current needs in the humanities and social sciences
• experience with a demonstrated commitment to the retention and development of faculty
• the ability to foster collegial, collaborative work environments
• the ability to foster academic diversity and faculty services
• familiarity with the collective bargaining process
• strong interpersonal communication and listening skills

SALARY: Dependent upon qualifications

SEND LETTER AND RESUME TO: Department Chair, Search Committee
MONTCLAIR STATE UNIVERSITY
Box C316-V036A/K
Upper Montclair, NJ 07043

APPLY BY: Review of applications for the Dean of Humanities and Social Sciences will begin on October 15, 1999 and will continue until a suitable candidate is found. The anticipated starting date will be July 1, 2000

An Equal Opportunity/Affirmative Action Institution

1657
UNIVERSITY VERMONT

ASSISTANT DIRECTOR
University Communications

We are seeking an experienced professional to assist the Director of University Communications with media relations and constituency communications. The Assistant Director will be responsible for coordinating with the University's broad audiences about the many ways the University is fulfilling its mission. The Assistant Director will manage a team of communications officers in achieving a high level of sophistication in providing communications support to their assigned areas. The Assistant Director will also serve as a University spokesperson.

Founded in 1791, the University of Vermont is a comprehensive university with over 30,000 students in eight colleges and schools, along with the College of Medicine. A division of Continuing Education and a Graduate College, UVM reflects a unique blend of public land-grant mission and private college atmosphere. The University is located in Burlington, the state's largest city, and one of the nation's most livable and beautiful urban environments.

Candidates must have a minimum of five years of comprehensive communications experience, preferably in a management position. Knowledge of and experience with public relations, editorial, and administrative writing; demonstrated ability to identify trends and place stories in national media; excellent interpersonal and communications skills; a high level of creativity. A bachelor’s degree is necessary, an advanced degree is desirable. APPLY: In confidence; letter, resume, list of references and salary history to: University of Vermont Employment Office, 232 Waterman Building, 85 South Prospect St., Burlington, VT 05405. E-mail: employment@uvm.edu (RTF or HTML attachments)

Affirmative Action/Equal Opportunity Employer.

Youngstown State University
President

The Board of Trustees of Youngstown State University invites applications and nominations for the position of President. The appointment will begin on or before July 1, 2000.

Located on a picturesque 220-acre campus in Youngstown, Ohio, Youngstown State University offers over 25,000 students a broad curriculum in the schools of graduate studies, arts and sciences, and business administration. The College of Business Administration offers a variety of undergraduate programs and a 2-year associate degree. The College of Arts and Sciences offers a liberal arts education through the College of Arts and Sciences, College of Liberal Arts and Sciences, and College of Business Administration. The College of Graduate Studies offers graduate and professional programs in a variety of disciplines.

The College of Education offers undergraduate and graduate programs in education and health sciences.

Candidates must have a broad and diverse educational background and experience in higher education administration. The ideal candidate will possess a Ph.D. in higher education or a related field and a significant record of achievement in teaching, research, and administration.

Desired Presidential Characteristics

The Board seeks a candidate who is innovative, energetic, and committed to the mission of the University. The candidate should possess strong leadership skills, a commitment to academic excellence, and a demonstrated ability to build consensus and manage change.

Candidates must demonstrate a commitment to:

• Experience in leading an institution with a diverse student body from a variety of backgrounds.
• A vision for the future of higher education and the ability to articulate that vision in a compelling manner.
• A commitment to academic excellence and a record of achievement in teaching, research, and administration.

Candidates should also demonstrate:

• A record of successful fundraising and the ability to secure additional resources for the University.
• A commitment to diversity and a record of promoting the welfare of all students.
• A commitment to the enhancement of the University’s academic programs and the advancement of the University’s mission.
• A commitment to the advancement of the University’s research and creative activities.
• A commitment to the advancement of the University’s athletic programs.

Candidates should be willing to relocate to Youngstown, Ohio, and should be available for an initial interview in the late fall of 1999. The University will provide a competitive salary and benefits package.

Inquiries, nominations, and applications should be directed to:

Dr. Steven A. Beebe, Chair
Search Committee
Department of Music
Southwest Texas State University
601 University Drive
San Marcos, TX 78666

THE UNIVERSITY OF MICHIGAN-DEARBORN

CHANCELLOR

Nominations and applications are invited for the position of chancellor of the University of Michigan-Dearborn, an interactive, student-centered institution committed to excellence in education, research, and service. The University of Michigan-Dearborn is one of three campuses of the University of Michigan, and is located on 190 acres of the former estate of automotive pioneer, Henry Ford. Grounded in the liberal arts and sciences, UM-Dearborn is a thriving educational community that offers high-quality, accessible undergraduate, graduate, professional, and continuing education programs to a diverse and talented student body primarily from southeastern Michigan. The campus comprises four academic units: the College of Arts, Sciences, and Letters; the College of Engineering and Computer Sciences; the School of Education; and the School of Management. One-third of the campus, more than 70 acres, is maintained as one of the largest natural areas in metropolitan Detroit, serving as a research and teaching facility. The campus serves more than 8,000 full-time and part-time commuting students, 5,000 undergraduate and 1,000 graduate.

The Chancellor of the University of Michigan-Dearborn, under the general direction of the President of the University of Michigan, serves as the chief administrator for this campus of 829 full-time and part-time faculty and staff. The Chancellor exercises broad delegated powers and is responsible for all aspects of campus administration.

We seek a chancellor who is committed to excellence in education and scholarship. Candidates should have outstanding leadership ability, substantial administrative experience in higher education, deep appreciation of academic values, the ability to effectively represent the UM-Dearborn to its constituencies and to the state legislature, experience in working with an urban, multi-cultural community, understanding of the appropriate public service roles of an urban, regional university, and demonstrated ability in fund raising.

Nominations and applications, including a letter describing qualifications for and interest in the position and a current curriculum vitae, should be sent to:

Professor Sidney Bolkosky, Chair
Search Advisory Committee for the Chancellor
University of Michigan-Dearborn
1070 Administration Building
4901 Evergreen Road
Dearborn, MI 48128-1491

Fax: 313-593-5204
Phone: 313-593-5500
E-Mail: umd_chancellor_search@umich.edu

Candidates are also encouraged to check for more information and for updates at the search website: www.umich.edu/pres/chancellor_search.

The University of Michigan treats inquiries, nominations, and applications for this position and others in a confidential manner. Applicants should confirm in their letters that they wish their applications to be kept confidential.

The University of Michigan is an equal opportunity, affirmative action employer and actively seeks the applications and nominations of qualified women and minorities.

AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION AMERICAN DISABILITY ACT EMPLOYER
IRCA VERIFICATION REQUIRED - NO PHONE CALLS PLEASE

UNIVERSITY OF SOUTHERN CALIFORNIA

The University of Southern California is inviting applications and nominations for the position of Dean of the Law School. The University is located in Los Angeles and is one of the nation's premier private research universities. USC Law School was the first law school established in the southwestern United States, and is now a national law school serving a student body drawn from over 100 undergraduate institutions distributed throughout the nation. It is one of the preeminent law schools in California, and is typically ranked among the top 15 in the country.

USC Law School is relatively small, with an average class size of approximately 200 students and a total enrollment of 600. It has approximately 35 full-time faculty, many of whom have advanced degrees or training in other disciplines in addition to law and are recognized nationally as experts in their respective fields. The Law School's endowment is among the ten largest for private American law schools. The Law School's primary mission is to produce quality scholarship by its faculty, and training students for the bar, bench and other pursuits to which knowledge about law and the legal system is relevant.

The Dean of the USC Law School is its academic leader and chief administrative officer, and reports directly to the Provost of the University. The responsibilities of the job include: leading the recruitment, development and retention of talented faculty, promoting excellence in the School's educational and scholarly functions, planning and managing financial matters, leading the School's fundraising efforts, and maintaining supportive relationships with alumni and with other members of the local bar and bench.

Nominations and applications should be sent to: Randolph Westfield, Search Committee Chair, Office of the Provost, University of Southern California, Box 4019, Los Angeles, CA 90089-0019. Applications should include a letter describing the candidate's qualifications, curriculum vitae, and names, addresses and telephone numbers of three references. Questions may be directed to Bill Strippoli, Director of Information Resources, Office of the Provost (213-740-0917, 213-740-1782 (fax), strippoli@usc.edu). Review of applications and nominations will begin immediately and continue until the position is filled.

The Law School is proud to be pluralistic and firmly committed to providing equal opportunity for outstanding men and women. USC actively seeks nominations of and applications from qualified individuals from the broadest possible communities.

PRESIDENT

The Evergreen State College seeks nominations and applications for the position of president to succeed Dr. Jane L. Jarvis, who is retiring after eight years of distinguished leadership. The successful candidate could assume the presidency as early as June 2000.

College Profile - Evergreen is a progressive public college of liberal arts with a national reputation for leadership in developing innovative, interdisciplinary, collaborative, and team-taught academic programs. Evergreen places teaching and learning first and is committed to creating an environment in which theory and practice are linked through internships, community-based projects, and other activities. It strives to be a community in which diverse students, faculty, and staff develop policy and make decisions collaboratively.

The 25-year-old college is state-funded with an annual operating budget of $58 million. The main campus is in Olympia, the state capital, between Seattle and Portland at the southern tip of Puget Sound. Enrollment is approximately 3,700 FTE, including more than 200 in three graduate programs. The college has a plan to grow to just under 5,000 FTE by 2110. Evergreen offers an expanding part-time studies program, upper-division programs at the Evergreen-Tacoma campus, and tribal community-based programs throughout the Olympic Peninsula. It also houses six public service centers.

Committed to equal opportunity, Evergreen is working to build a diverse staff, faculty and student body.

Who Should Apply - We encourage applicants from qualified people who have demonstrated the following: Ability to lead with consistency, honesty, and accountability; commitment to innovation in higher education; a distinguished record of scholarly, artistic, or professional achievement; commitment to equal opportunity and access in higher education; ability to work within and promote a multicultural and multi-ethnic community and curriculum; and a successful record in managing programs, budgets and finances. A doctorate is strongly preferred.

Application Procedure - Address requests for application packets and nominations to:

Presidential Search Committee
The Evergreen State College
Library 317
Olympia, WA 98505
Telephone: 360-666-6000, Ext. 6113
E-mail: husseyman@evergreen.edu

Review of applicants will begin in mid-October, final interviews scheduled for late January.

STATE UNIVERSITY OF NEW YORK
COLLEGE AT ONEONTA

VICE PRESIDENT
FOR STUDENT DEVELOPMENT

The College at Oneonta invites applications and nominations for the position of Vice President for Student Development SUNY Oneonta, a four-year arts and sciences college with a pre-professional focus, offers liberal arts and professional programs at undergraduate and master's levels. Increasing emphasis is placed upon technology and community service across all disciplines and the campus has announced a Universal Computer Access Program (UCAP for its students. The College, with 5,500 students and 250 full-time faculty, is located in the scenic Catskills, three and one half hours from New York City. See the Oneonta home page for additional information (http://www.oneonta.edu/).

The Vice President reports to the President of the College and is a member of the President's Cabinet. The Vice President will provide executive leadership in the administration of all student and college programs and services, including, but not limited to, academic advisement, admissions, career development, college union, counseling, health and wellness, financial aid, Greek life, international student services, and residence life. The Vice President maintains extensive involvement with students and is committed to a holistic approach to promoting a quality of student living and learning environment.

While a Master's degree is required, preference will be given to candidates who possess an earned doctorate degree, a proven record of increasing leadership responsibilities in student development activities, preferably on a residential campus. Demonstrated commitment to the collaboration between academics and co-curricular programs. Excellent interpersonal skills and significant experience in student personnel administrative, evidence of vision and planning will be important qualities to lead the Division of Student Development into the next century.

Send application letter resume, names, addresses and telephone numbers of three professional references and transcripts to Employment Opportunities, Box H, Office of Human Resources, 208 Nestor Administration Building, SUNY Oneonta, Oneonta, NY 13820-4015.

SUNY Oneonta is an EOE/A employer. Women and minorities are encouraged to apply.
AMHERST COLLEGE
ASSISTANT DIRECTOR OF PHYSICAL PLANT FOR DESIGN AND CONSTRUCTION

Amherst College, an independent, undergraduate, residential, liberal arts institution, has an opening for the position of Assistant Director of Physical Plant for Design and Construction. The Physical Plant includes 70 College buildings, 120 faculty residences and approximately 1,000 acres of land in the center of the Town of Amherst, MA. Reporting to the Director of Facilities Planning and Management, this position participates in the management, supervision, and execution of architectural and engineering design services in support of the College’s construction and renovation programs. Additional duties include major construction project administration and oversight, responsible for design and technical consultants. Position will also provide technical support to other divisions within the Physical Plant.

Reporting to the Assistant Director will be the Campus Utilities Engineer, a project manager and additional support staff as dictated by the scope and magnitude of ongoing projects. The Assistant Director will work in close collaboration with the Assistant Director for Operations to ensure that the design and construction programs are consistent with the overall departmental objectives.

Candidate shall have a minimum of six years experience in the field of architectural/engineering design, construction management, or physical plant management preferably in a college setting. An Engineering or Architectural Degree is required and professional certification in either discipline is preferred. Candidate should have a proven ability to administer multiple projects, an in-depth knowledge of federal and state regulations related to design and construction, and the ability to interpret contract documents. Strong interpersonal and analytical skills, ability to meet deadlines, and computer proficiency required. Interested candidates should forward a letter of application, resume and the names of three references to Office of Human Resources, Box 2204, Amherst College, Amherst, MA 01002-5000. Applications will be accepted until the position is filled.

Amherst College is an Equal Opportunity/Affirmative Action Employer and encourages women, minorities and disabled persons to apply.

WILLIAM PATTERSON UNIVERSITY
The William Paterson University of New Jersey is a comprehensive public institution of higher learning that is committed to preparing future students for success. The University is dedicated to excellence in teaching, learning, scholarship, and community collaboration with opportunities for lifelong learning. Being a highly distinguished and diverse faculty, nationally renowned academic programs, and state-of-the-art information and communications technology, the University maintains a low student-faculty ratio (12:1) and small class size (21:1 for its 29 undergraduate and 17 graduate degree programs. The University is situated on a beautiful suburban campus in Wayne, New Jersey, fourteen miles west of New York City.

DIRECTOR OF INSTRUCTION AND RESEARCH TECHNOLOGY
(Search Extended)

The Director of Instruction and Research Technology provides vision, leadership and management in support of the use of information technology in teaching and research for more than 300 full-time faculty in the five colleges at the University (Arts and Communication, Business, Education, Humanities and Social Sciences, and Science and Health). Reporting to the Associate Vice President for Library Services and Information Technology, the Director works with the academic community to enhance curricular and research activities through the use of information technology.

Responsibilities include management of public access computing facilities; training programs for faculty; oversight and administration of the unit budget, and preparation of related grant proposals and other documents. The functions defined in the unit include: Student Technology, Instructional Design, Media Services, and Video Communication (satellite up/downlinking, and broadcast, cable, and interactive facilties to support video and teleconferencing). The Director advises administrative leaders of developments and trends in the application of information technology teaching and learning.

Requirements include at least five years related professional experience in higher education and experience working directly with faculty in this context. Evidence of a strong user-service orientation; evidence of scholarship and excellent written, oral, and interpersonal skills is required. Experience with use of the Internet (Web, e-mail, and other delivery methods); experience as a teaching faculty member helpful; knowledge of the use of statistical software for research (SAS, SPSS) and a doctorate in an academic discipline with experience in the use of technology to support teaching and learning is required.

ASSISTANT DEAN GRADUATE STUDIES
(Search Extended)

Reporting to the Associate Vice President and Dean for Graduate Studies and Research, the Assistant Dean is responsible for graduate student marketing, recruitment, and admission, provides information and guidance for enrollment management at the graduate level, assists in improving the quality of graduate student services; works with Department Chairs and Graduate Program Directors to recommend and implement educational policies and procedures; ensures degree and audit requirements are met; audits and monitors student academic progress toward degree completion; supervises the staff in the Office of Graduate Studies, and manages the graduate assistant selection and placement processes.

Minimum qualifications include an earned doctorate, experience in administrative, curriculum, and/or research-related processes, and managing graduate student recruitment and admission, and excellent interpersonal and written communication skills. The ability to work effectively with faculty, staff, and students is required.

Salary is negotiable and commensurate with experience and the national graduate education market. Please submit cover letter, curriculum vitae and contact three references to: Dr. Robert Sheal, Executive Assistant to the Provost and Executive Vice President, Rauhinger Hall, Drexel Park, New Jersey 07490. Additional information about the University can be found at http://www.wpu.edu. The review of applications will begin immediately and continue until each position is filled.

UNIVERSITY OF NEW HAMPSHIRE
The University of New Hampshire (UNH) is a comprehensive public university located in Durham, New Hampshire, with branch campuses at Manchester, Gulf Stream, and St. Paul. UNH is committed to enhancing the diversity of its faculty and staff, and encourages applications from women, persons of color, persons with disabilities and veterans.

ASSOCIATE DIRECTOR OF ADMISSIONS
(Coordinator for Diversity and Inclusion)

Responsibilities: Provide leadership in the coordination and development of admissions programs and activities specific to the enrollment of traditional and non-traditional students of color. Represent the University to prospective students, guidance personnel, and community service personnel through recruitment travel, counselor and pre-registration decisions. Perform Undergraduate Admissions applications review and admissions office management and perform liaison duties with UNH faculty, staff, students, and alumni, as appropriate. Perform other duties as assigned.

Minimum Qualifications: Bachelor's degree and at least five years related experience or Master's degree and three years experience with documented successful experience in student service or an education related environment. Preference will be given to candidates with documented record of facilitating achievement among diverse populations. Must demonstrate excellent skills in the areas of spoken communication, project management, and writing. A valid driver's license is required. Familiarity with personal computers and fluency in Spanish are helpful.

Salary: $34,770 to $40,040. Starting salary normally not to exceed $39,440.

Application deadline is September 27, 1999. Send resume and list of at least three references to:

James Washington, Jr.
Director of Admissions
Grant House
4 Garrison Avenue
University of New Hampshire
Durham, NH 03824

UNH is committed to enhancing the diversity of its faculty and staff and encourages applications from women, persons of color, persons with disabilities and veterans.
Assistant Professor/Instructor

The Department of Government invites applications for a full-time, tenure-track position in American Politics at the rank of Assistant Professor or Instructor, beginning in September 2000. Candidates should be capable of teaching courses in the following fields: state and local government and politics, public administration, and interest group politics. The successful candidate will also be expected to teach sections of an introductory course in American government and politics. The Department particularly welcomes applicants with a commitment to teach, conduct research, and organize internships and other student activities focused on state and local politics, administration, and policies. Completed Ph.D. or ABD status in Political Science is required.

Screening of applications will begin in December 1999 and continue until the position is filled. A letter of application, curriculum vitae, teaching evaluations (if available), and three letters of recommendation should be sent to: Professor Aldo C. Vacs, Chair, Department of Government, Skidmore College, 815 North Broadway, Saratoga Springs, NY 12866.

Skidmore encourages applications from women and men of diverse racial, ethnic and cultural backgrounds.

President

The Board of Trustees of Washington State Community College District 13 invites applications and nominations for the position of President of Spokane Falls Community College (SFCC), one of three publicly funded education institutions comprising Community Colleges of Spokane.

At SFCC, the President is the chief executive officer and reports to the Division Chancellor/chief executive officer. The Chancellor reports to the five-member board of trustees appointed by the governor for five-year terms.

The board, along with the Chancellor and SFCC administration, seeks an academic, visionary, and resourceful leader who will guide the college in meeting the challenges of an era of changing expectations about community colleges and the future of higher education.

SFCC serves approximately 5,100 students each quarter, the majority enrolled at the college’s well-regarded A.A. liberal arts transfer programs. About 25 percent of SFCC students are enrolled in professional technical programs.

Application Information

Applicants may request a presidential search brochure which includes details about Spokane Falls Community College, opportunities and challenges at the college, a presidential profile, and application instructions. Inquiries should be directed to: Ms. Mary Ann Sanger, Chair, SFCC Presidential Search Committee, c/o Mr. Karen Brown, Search Consultant, Anonymous Community College Trustees (ACCT), 4100-10 Redmond Rd. #215, Oakladian, CA 94619.

Telephone: (509) 535-3356 Fax: (509) 535-3355 Email: karend@navigator.com or washington@wou.edu

The Internet address for Spokane Falls Community College is www.spokanecollege.wa.us.

For additional information, contact Dr. N. Anderson, search consultant, Anonymous Community College Trustees (ACCT), 4100-10 Redmond Rd. #215, Oakladian, CA 94619.

Telephone: (509) 535-3356 Fax: (509) 535-3355 Email: dambrook@wou.edu

All inquiries, nominations and applications will be held in strictest confidence. Community Colleges of Spokane provides equal opportunity in education and employment. Applications and nominations of individuals who would increase the richness of the diversity of its services are welcome.

Nominations and applications will be accepted until the position is filled. However, the SFCC Presidential Search Committee will begin reviewing applications Sept. 20, 1999. The SFCC President will be appointed by the Chancellor/CEO in consultation with the CSS Board of Trustees.
PRESIDENT
PACE UNIVERSITY

The Trustees of Pace University are conducting a nationwide search for a new President. The University, founded in 1906, is a large comprehensive University with campuses in New York City and Westchester, an endowment approaching $100 million and a reputation for excellent teaching. Its 30,000 alumni include prominent leaders of the civic and business communities. The University consists of six colleges and schools that offer a wide range of academic and professional programs for a large diverse population of nearly 14,000 students in for-credit programs and affiliated offerings.

Candidates must believe in the importance of higher education; possess recognized academic or comparable professional credentials; and have a record of administrative accomplishments, ideally in a multi-campus setting; a talent for expressing institutional goals and values to all relevant constituencies; and a commitment to increase the University’s financial support from various sources.

The Search Committee invites applications and nominations for the position, which should be sent prior to October 8, 1999:

Malcolm MacKay
Managing Director
Russell Reynolds Associates
200 Park Avenue
New York, New York 10166
Fax: (212) 351-2102
e-mail: mmackay@russellreynolds.com

Pace is an Equal Opportunity/Affirmative Action employer and is committed to maintaining a diverse learning and working environment. Women and minorities are encouraged to apply.

UIC
ADMINISTRATION

ASSOCIATE DIRECTOR
OF CAMPUS UNIONS

The University of Illinois at Chicago is seeking an Associate Director for one of its ten Student Unions, the Chicago Circle Center.

The Chicago Circle Center is the home of a wide array of Dining Facilities, Lounges, Recreational Spaces, Meeting Facilities and Student Program Activities, as well as Retail Services and Student Computer Labs.

Reporting to the Director of Campus Unions, the Associate Director is responsible for administration and direct supervision of the day-to-day operation of the Chicago Circle Center. Characteristic duties include supervision of maintenance, housekeeping and building operations staff; development and interpretation of policies; coordination of building security; and management of remodeling/renovation projects. The Associate Director serves as liaison between student organizations, building tenants, University departments, and guests.

The candidate’s past experience must have demonstrated a high level of customer service expertise, independent decision making, exemplary communication skills, and understanding support of the philosophy of Campus Unions.

This is a highly visible and challenging position, requiring a Master’s Degree in a related field. A minimum of ten years experience in a college union as a department head for a unit which serves students, faculty and staff is required. Salary is competitive and commensurate with experience.

Send letter of application, resume and the names of three references to:

Shaune Sisac
Auxiliaries Employment Director
Associate Director, Campus Unions
Room 2560 Student Services Building
1200 West Harrison Street
Chicago, Illinois 60607

For fullest consideration, applications/resumes must be received by September 26, 1999. Start date: ASAP.

The University of Illinois is an Affirmative Action/Equal Employment Employer.

HOW TO PLACE ADVERTISEMENTS

**By Mail**—All materials should be sent to:
Hispanic Outlook in Higher Education, P.O. Box 1598
210 Route 4 East, Paramus, NJ 07652

**By E-Mail**—outlook@springmail.com

**By Fax**—Transmit to 2 1/2" × 10" × 10" size frame.

**To Confirm**—Call 212-777-8646 × 12 or 415-224-0332

Monday: 8:30 am to 6:30 pm
Tuesday: 8:30 am to 6:30 pm
Wednesday: 8:30 am to 6:30 pm
Thursday: 8:30 am to 6:30 pm
Friday: 8:30 am to 6:30 pm

TWIN CITIES-DEPARTMENT OF BIOCHEMISTRY,
MOLECULAR BIOLOGY & BIOPHYSICS
TENURE-TRACK ASSISTANT PROFESSOR POSITIONS

The University of Minnesota has a new $123 million initiative that will result in the construction of a new Molecular and Cell Biology Building and the hiring of new faculty in basic biological science departments over the next three years. As part of this new initiative, the Department of Biochemistry, Molecular Biology and Biophysics invites applications for several full-time, tenure-track Assistant Professor positions to start on or after July 1, 2000. The Microbial Biochemistry & Biotechnology Division seeks candidates who conduct research in either or both computational and experimental aspects of microbial genomics. The Molecular Biology Division seeks candidates who study basic mechanisms of transcription or genome replication and maintenance. The Reproductive Biochemistry Division seeks candidates using molecular biological and biophysical techniques to study glucose homeostasis in diabetes mellitus. The Structural Biology & Biophysics Division seeks candidates who investigate the structure and dynamics of proteins and/or nucleic acids, with primary emphasis on the techniques of high-field NMR, X-ray crystallography, and/or spectroscopy. For more details about these positions please contact http://mbbb.umn.edu/MBBB.

Successful candidates will be expected to develop strong externally funded research programs and will contribute to the undergraduate, graduate and postdoctoral training programs of the department. The ability to interact collaboratively among a variety of disciplines will be strongly encouraged. All candidates must have a PhD and/or MD degree. Desired experience includes at least two years of postdoctoral equivalent experience and a strong publication record. Successful candidates will be expected to maintain a high level of research productivity and will be expected to establish their own research program leading to the acquisition of extramural research support. Applications will be considered until the position is filled. Applicants should submit a curriculum vitae, statement of research interests, and letters of recommendation that consider both their research and teaching potential. By October 15, 1999, to MBBB Search Committee, c/o Mr. Jeff Schaub, University of Minnesota, Department of Biochemistry, Molecular Biology and Biophysics, 6-155 Jackson Hall, 321 Church Street, S.E., Minneapolis, MN 55455 or schaub@biosci.umn.edu.
I PUNTO FINA 1

TEACHING HISTORY:
CUBA 101

It all started 15 months ago at the Hotel Jagua in Cienfuegos, a beautiful port city on Cuba's southern coast. I was indulging in yet another cup of Cuban coffee, chatting with colleagues and friends from the island and the U.S. who were attending a conference on the social history of the Cuban War of Independence — what we here usually misname as the Spanish-American War. The conference, organized by the University of Michigan Regional Archives Project, directed by Rebecca Scott, and the Cienfuegos branch of the Union of Writers and Artists of Cuba (UNEAC), directed by historian Orlando Garcia Martinez, had been a huge success.

It had brought together 12 scholars living in Cuba, the U.S. and Europe who shared their papers in advance to exchange ideas and promote collaboration. A packed audience took over the modest installations of the provincial archive every morning to listen to the presentations and to participate in the discussions.

For someone like me, who left the island only in 1992, the conference had additional meaning. It was the first time a Cuban organization invited me officially to participate in an academic event. Six long years had passed, but it was finally back.

The conference’s success was based not only on the quality of the presentations, or even the careful work of its organizers. We were discussing topics that are as relevant for Cuba’s past as they are for Cuba’s future: the ambiguous meanings of race; the process of defining citizenship rights; the contested notions of what the nation should be. These topics are passionately debated on the island, where interpretations of the past are frequently used to assess the uncertainties of the future. In Cuba, history is not buried in libraries or confined by thick university walls; it is alive and public, exposed to the contributions and readings of everybody.

Thus it made sense that the idea of teaching a formal summer course about questions of race, citizenship, and nationhood in Cuba would come up. Yet doing it seemed nearly impossible. We had to obtain authorization from Cuban authorities, secure funds to cover all expenses, find a way to publicize the seminar with the island, devise a system which, despite the lack of reliable communications between Cuba and the U.S., allowed all project faculty the chance to select the students from a pool of applicants. And all in roughly one year.

It was agreed that Orlando Garcia would be our coordinator in Cuba and I in the United States. Rebecca Scott, from the Biblioteca Nacional José Martí in Havana, completed our working group. Two tasks were obvious priorities: Garcia had to obtain approval for the seminar in Cuba. We had to get funds in the U.S., a task for which I took responsibility. We succeeded on both fronts: UNEAC decided to sponsor our event, yet another example of that organization’s commitment to serious academic and intellectual exchanges. And in the U.S., Dr. Andrea Panzeri, executive director of the Christopher Reynolds Foundation, encouraged us to submit a full proposal, later funded. The John D. and Catherine T. MacArthur Foundation gave us a grant. With the competent assistance of folks at the USF Research Foundation, we managed the whole operation from here.

Several months later, in June, six graduate students from universities in the U.S. (Michigan, NYU, Columbia, UCLA, and Pittsburgh) met in a room with eleven Cuban junior scholars selected from a pool of thirty applicants. We had invited historians Paul Kramer, from Johns Hopkins University, and Michael Zeuskie, from Universitat zu Köln, in Germany, as guest faculty.

The seminar held three-hour daily sessions for two weeks. U.S. students were at some disadvantage; all sessions were conducted in Spanish. But the Cuban students had to read what was described as an "enormous" amount of material in English. We tried to be fair.

The seminar accomplished its main purposes. It gave younger Cuban historians easy access to a recent body of literature published abroad. Thanks to the foundations, we provided free books and course packages to all participants. Transporting bulky material to Cuba was a challenge, so we divided it among the U.S.-based students and faculty.

The seminar also sought to create “horizontal” links and networks among young historians in both countries, for these groups rarely encounter each other. Cuban junior historians know of U.S. professors and their work; U.S. graduate students know the writings of Cuba’s most established scholars. We wanted to help break the isolation in which junior scholars work in each country. Members of several informal groups created since the seminar continue to exchange information and points of view.

More important, perhaps, this was a rare occasion on which U.S.-based and Cuban-based students and faculty joined in a common educational effort. We hope not the last. In a sense, we made history while studying history.

You never know what a determined group of scholars can accomplish when they share a dream over a good cup of steaming Cuban coffee.
