Columbia Basin College
An affirmative action, equal opportunity institution

ASSISTANT PROFESSOR AND LANDSCAPE ECOLOGIST
IN THE AGRICULTURAL EXPERIMENT STATION

UNIVERSITY OF CALIFORNIA, DAVIS, CA

POSITION RESPONSIBILITIES: The focus of the position is the ecology and management of California rangelands (grassland, shrubland, woodland, mesic riparian areas, and desert) using science to address important issues in California landscape with emphasis on spatial characteristics as appropriate. Additionally, there are international opportunities for landscape level research on production dynamics and environmental aspects of grazing systems, especially in Africa and Eurasia. Research on landscape should be capable of advancing the understanding of landscape level process solving problems of land use, and advancing the science of spatial analysis for understanding of landscapes. It is anticipated that a successful candidate will collaborate with other scientists at UC Davis, Cooperative Extension specialists, farm advisors, researchers from other universities and agencies. The successful candidate will be expected to develop and direct undergraduate and graduate courses, including comparative ecology of range ecosystems, monitoring of rangeland ecosystems and rangeland planning. The candidate will assist in teaching other undergraduate and graduate courses. The successful candidate will be expected to participate in departmental, College, and Division committees and student, regional and national organizations that address landscape issues. Send a statement of teaching interests, curriculum vitae, publication list, reviews, and key publications (up to five), copies of undergraduate (within five years of degree) and graduate transcripts, a detailed CV, letters of reference, and telephone numbers of at least three references to: Dr. Montague W. Demment, Chair, Search Committee, Department of AARES, University of California, One Shields Ave., Davis, CA 95616-85. Telephone: (530) 752-7757; FAX: (530) 752-4361. E-mail: satter@ucdavis.edu. Review of applications will begin on May 1, 2000. Positions to remain open until filled.
FOOTHILL-DE ANZA COMMUNITY COLLEGE DISTRICT

Foothill-De Anza Community College District, located in Northern California, is inviting applications from applicants who would like to join a leadership team committed to excellence and innovation in academic programs and student services. The district's colleges, De Anza College in Cupertino and Foothill College in Los Altos Hills, are both located in the world-famous scientific and technological hub known as the Silicon Valley.

Director, California Virtual Campus
This management position will plan, direct and coordinate online instructional projects related to the state-funded California Virtual Campus (CVC) grant. It will facilitate instructional design and development projects in support of the 24 colleges in the Greater Bay Area Consortium. First review date: April 7, 2000.

Dean, Distance and Extended Learning (De Anza College)
Under the direction of the VP of Workforce, Technology and Economic Development, this management position will provide strong leadership and vision in coordinating and directing all of De Anza College's distance and extended learning functions, including planning, budgeting, curriculum delivery, and student services delivery via television, Internet, emerging technologies and off-campus modes. First review date: April 7, 2000.

Dean, Distance and Mediated Learning (Foothill College)
This management position will provide strong leadership and vision in the coordination and direction of all of Foothill College's distance and mediated learning functions, including strategic development, budgeting, curriculum development and delivery, and student services support for distant learners. First review date: April 7, 2000.

Dean, Middlefield and Evening Campus (Foothill College)
Reporting to the Dean of Faculty & Staff, this position coordinates instruction, student services, and administrative support of the Middlefield and Evening Programs. Areas include: registration, counseling, EOPS, financial aid, career center, cooperative education, transfer center, tutorial support, learning resources, health, food, multi-media, faculty and student support services. First review date: March 31, 2000.

Dean, Student Outreach and Retention (Foothill College)
Reporting directly to the VP of Instruction and Student Development, this management position is responsible for assessment and placement, MESA program, PUENTE program, Pass the Torch program; outreach and recruitment; development, maintenance and evaluation of student success systems; college retention efforts and student outcomes. First review date: April 21, 2000.

I PUNTO FINAL!

Mutual Discovery

Recently I had the opportunity to listen to one of the best contemporary Latin American writers, Carlos Fuentes. I felt I had reached an oasis in the middle of the city of Chicago. The words that flowed out of the writer were abundant in their beauty and use of language and contained profound and provoking thoughts. The power of the Spanish language reverberated in the conference room. The power of the ideas is still reverberating inside me as I write this piece.

Carlos Fuentes reminded the audience that Spanish is the fourth most common language spoken in the world. In the United States today, there are approximately 30 million Spanish speakers. He anticipated that in the 21st century, this country will change significantly to become more multicultural and hopefully more inclusive and accepting of differences.

To move forward, we also need to be reminded of the lessons from the past. Fuentes did exactly that by emphasizing that mutual discovery was the greatest significance of [Europe's] discovery of the New World. Different cultures met and began a long journey of influencing each other. We tend to forget that America also discovered Europe. The worst part of that encounter was that the need to conquer led to destruction and elimination. Destruction of any civilization causes intellectual and cultural poverty. Encounters of different races, languages, and cultures should become enriching experiences. It is through their mixture that civilizations are energized.

Given our numbers and rising economic power, Hispanics in the United States should have the opportunity to shape the new millennium. Spanglish should thus become the language of our “mixed heritage.” To my annoyance, these thoughts were uttered by one of the best craftsmen of the Spanish language, Carlos Fuentes himself. Needless to say, they have generated several opinion pieces in the local newspaper.

As I write this, I am reminded of the powerful message I heard. To be Latino in this country in the 21st century, you need not limit yourself to the Spanish language. You can dance between the cultures; you can mix vocabulary into a new mestizo language. Because the mixing of languages represents the intermingling of both worlds, you can bring together different heritages. And that is the reason why I feel that we can make a difference. I believe new millennium belongs to those of us who can bring different backgrounds together, who can create coalitions who can create new ways of doing an living without forgetting our past, our heritage. The future belongs to those of us who are contributing to make this country multicultural. Those of us can provide new examples of how to help shape higher education.

Here in Illinois, when we speak to one another, we might use different intonations of Spanish; we might switch to English, and sometimes say things in Spanglish; but we share the understanding that the only way to make a difference is through collaboration.

The Mexican writer Jose Vasconcelos predicted that the future lies in a race, mix breeds: la Raza Cosmica. This new race will be the one that accomplishes what ethnic prejudice has prevented us from doing: create a better world. Carlos Fuentes agrees with Vasconcelos. The 21st century will see the beginning of the mestizo Spanglish will become the default language of this new race. Hopefully to use Spanglish will not mean the disappearance of this country of Spanish. Instead, we could be the ones to finally make United States a country where being bilingual is culturally desirable, a country where monolingualism is frowned upon as cultural deprivation.

Although I miss speaking and hearing the Spanish with which Carlos Fuentes recently addressed the audience in Chicago, I know that the future demands mutual discovery, mutual influencing, the creation of new words, and believe that we are in the right place and at the right moment: that the cultural encounters, we can energize others to create a better society. I believe that to the many Latino students at our university, we are role models, at least, that when they hear my accent they are reminded that, indeed, we all came from somewhere else. These same students must also realize that without abandoning who we are, we have the power to influence and to come together to shape a better future.

Private Colleges and their Enveloping Myths

by Gustavo A. Mellander

America's very first institutions of higher education were private endeavors. Founded by a White male elite, they were created for those like them—only younger. In part, they wanted to break away from European traditions and establish very pragmatic institutions for their sons and nephews.

Harvard was established in 1636, a mere 16 years after those intrepid pioneers waded onto Plymouth Rock. Others followed. William and Mary in 1693, Yale in 1701, and Princeton in 1746.

Much has changed since those early days. But most of America’s perceptions remain mired in their early history, in what some have characterized as the myth of private higher education.

Diversity

But change they have, and the changes have been dramatic. So much so that many now feel it is more accurate that they be called independent institutions. Most are coeducational, open to students and faculty from the diverse religious and ethnic background that is America, and many are full partners with the federal government’s educational and research initiatives.

They have a reputation for innovative outreach efforts, generous institutional aid programs, and a creative “welcome mat” that has allowed them to serve student populations as diversified as those of their public counterparts.

They are very similar to public colleges and universities. For instance, their outreach efforts and success rates with Hispanics are comparable to if not better than those of flagship public universities. Yet the myth that few Hispanics can or do attend those institutions continues to flourish.

Too often, the media and public blindly accept the antiquated notion that private institutions are the domain of students from wealthy, White families. Because of that perception, many Hispanic students and families do not fully consider the complete range of institutions and opportunities that is available to them.

The reality is that private institutions are as diverse as their public counterparts. About one in four students enrolled at four-year private institutions is from a minority background, compared to a similar proportion at four-year public institutions.

The proportion of students from specific racial/ethnic groups is surprisingly similar. The distribution of students at four-year private institutions is Hispanic, eight percent; African American, 10 percent; Asian, six percent; and Native American, one percent. At four-year public institutions, those percentages are the same for all but Hispanics, who are seven percent.

Only for the Rich?

Diversity is not only ethnic but also financial. Many will be surprised to note that 27 percent of students enrolled at independent four-year institutions have family incomes under $30,000—compared to 28 percent of students enrolled at public four-year institutions. Similarly, 48 percent of dependent students enrolled at independent four-year institutions have family incomes under $50,000—compared to 49 percent at public four-year institutions.

Eight of 10 students attending private colleges and universities receive some form of aid. They receive an average institutional grant of $5,400 and an average total award package of $11,000. In fact, students attending private institutions receive four times more grant aid from their institutions than from the federal government.

Another “myth-busting” fact is that the median family income for undergraduates at four-year private institutions is actually lower than the median family income for undergraduates attending public flagship universities—and the gap in income is growing. In 1992-93, the national median family income for all undergraduates attending public flagship universities was $49,658; in 1995-96, it had increased to $51,231.

By comparison, the 1992-93 national median family income for undergraduate students attending four-year independents was $47,735. In 1995-96, it had decreased to $46,863. In 1995-96, the national median family income for Hispanic students attending public flagship universities was $32,571. In the same year, the national median family income for Hispanic students attending four-year private institutions was $16,760.

Since most Hispanic students are the first generation in their family to attend college, their rate of admittance and success is of interest. How do first-generation students fare at private colleges? To begin with, 33 percent of all students at independents are the first in their family to attend college—and 34 percent at public institutions.

The similarities are so close that even higher education scholars are surprised when they study them. That in itself is a clear indication of the power and endurance of the myths about private higher education.

Amazing Success Rates

Studies show that independent institutions have greater success graduating students—include minority students and first-generation—than do public institutions.

• 65 percent of full-time students who received a bachelor degree from an independent were able to complete it in four years or less; 34 percent at state institutions

• 42 percent of Hispanic students receiving a bachelor’s degree completed it in four years or less; 24 percent at public institutions.

• 61 percent of Hispanic students at four-year independents receive their degree in five years or less; 76 percent at public institutions.

• 65 percent of first-generation students who attend private college and universities receive their degree within five years as compared to 44 percent of the total first generation.

A National Unified Voice

There are approximately 1,600 private colleges and universities in the United States. More than 90 are members of the National Association of Independent Colleges and Universities. Some have headquarters in Washington, D.C., and the association serves as a unified voice for private higher education at the halls of government and around the nation.

Membership is as diverse as students includes traditional liberal arts colleges, research universities, and faith-related institutions, historic black colleges and universities, women’s colleges, and two institutions. For more information, contact Tony Pals at tony@naicu.edu.

Dr. Mellander is a professor of economics at George Mason University.

End of Document
Supporting a Common Agenda

BY MARILYN GILROY

At first glance, Mount Holyoke College (Mass.), Alaska Pacific University, and Texas Lutheran University seem to have little in common. But in fact, these institutions find a common framework as members of the Council of Independent Colleges (CIC), an organization that serves its members by providing resources, ideas, and practical advice to advance institutional excellence.

Established in 1956, CIC now has 475 college and university members. In addition to being nonprofit, independent, baccalaureate degree-granting institutions, CIC members are also characterized by:

- small to moderate size,
- a focus on learning and individual attention to students,
- commitment to liberal arts and sciences in general education (approximately 30 percent of course requirements for graduation), and
- offerings in at least five areas of concentration in the liberal arts and science disciplines.

Dues for joining CIC are based on FTE enrollment and range from approximately $1,700 to $5,400 per year. There are 16 staff members who work out of the organization's headquarters in Washington, D.C., and a governing board made up of college and university presidents and corporate and foundation executives.

CIC colleges are located in every region of the country, but they are united in the common ideal that "Independents" play a key role in offering higher education to the nation's diverse students and that their work "can be strengthened by collective action," according to CIC President Allen Splete.
years, whereas only 34 percent of students at tax-supported institutions graduate after four years. Moreover, the independents graduate minority students at a rate 25 percent higher than that of public institutions.

These success rates are probably due to the attention on "educating the individual," which is the focus of smaller colleges. According to CIC reports, most independent institutions offer a strong sense of community where each student is a person, not a number. Students have the opportunity to develop close relationships with faculty, and the result is a more intense, individualized learning experience not found in large state universities.

For Hispanic students, this can be the difference between persevering and dropping out. At Barry University and the University of the Incarnate Word, both CIC members serving high numbers of minority students, the student-faculty ratio is approximately 15:1, allowing for small classes and mentoring relationships that often develop outside of class.

Yet some minority students might feel intimidated by the costs of higher education at a private school, which often carries a price tag of $25,000 per year and upward. But supporters of independent institutions point out that they generally offer more and better financial aid packages to their students than do public colleges. For example, independent colleges in Massachusetts boast that last year they provided $1.2 billion in financial aid to students and that they accounted for two-thirds of all minority students attending college in that state and awarded three-fourths of all degrees to minorities.

Despite this rosy picture of achievement and substantial outcomes, the nation's private colleges and universities are buffeted by the same changes that are affecting other institutions. These include the rapid development of technology as a powerful force in higher education, the changing demographics and nature of teaching/learning in today's classrooms, and continued pressures to control the rising costs of a college education while balancing budgets.

But rather than view these as obstacles, CIC urges its members to see prevailing factors as opportunities that will allow them to become more "vital, and in some cases transformed by this fast-moving and increasingly competitive environment."

CIC helps its member institutions rise to today's challenges by implementing national projects, programs, and special initiatives that engage colleges and universities in reforms. Several foundations and trusts provide support for CIC. In some cases, funds are issued directly to participating members. Last year, CIC made grants of more than $750,000 to 72 colleges and universities.

"We are a direct service organization to colleges and universities. We run projects to help colleges enhance their educational programs and manage their resources more effectively," said Stephen Pelletier, vice president for communications. "We are not a public policy organization."

In this way, CIC distinguishes itself from National Association of Independent Colleges Universities (NAICU), which seeks to influence policies through lobbying efforts on Capitol Hill and monitoring legislation that affects higher education.

Yet the two organizations do work in tandem and are allies in strengthening the position of independent colleges and universities.

"We complement each other," said Pelletier. "But we each have our turf."

The independents graduate minority students at a rate 25 percent higher than that of public institutions.

Impressive Range of Programs and Projects

In fact, CIC program reflects its clarity of purpose: review of the council's projects publications shows a wide range of support to help colleges improve their educational and administrative performance and increase their institutional visibility. CIC pays particular attention to cultivating effective leadership at the top through the annual Presidents Institute, the largest meeting of private college presidents in the country. The Chief Academic Officers Institute (formerly the Deans Institute) brings together academic officers from around the nation. There are additional periodic retr
for presidents and their spouses in recognition of the unique role that partners play in supporting the careers and goals of college leaders.

Other CIC projects delve into the heart and soul of higher education. For example, the Council recently issued its findings from a project funded by a $1 million grant from the Pew Charitable Trust that engaged 22 colleges in a two-year examination of how institutions could shift from a teaching focus to a learning focus. The report, entitled **Faculty Roles, Faculty Rewards, and Institutional Priorities**, includes frank discussions by faculty members on how their roles are changing and how institutional incentives affect their work.

Another project reflected the basic goal of many independents, which strive to integrate education with real life experience and give students a sense of their roles as part of a larger community. Ten CIC members participated in the Serving to Learn, Learning to Serve program, which established service-learning opportunities for college students that focused on improving the school success of elementary, middle, and secondary students. Undergraduate teacher education students from CIC institutions tutored at-risk students in after-school programs, worked with students and parents to improve reading skills, and developed culturally appropriate curricular materials for recently immigrated Haitian, Nicaraguan, and Mexican elementary students.

Many of these projects are conducted under the auspices of the Consortium for the Advancement of Private Higher Education (CAPHE), an organization started by private foundations to help direct their philanthropic support of private higher education. CAPHE was acquired by CIC in 1993 and continues to merge foundation interests with support for college and university reform.

For those who thought that private colleges are primarily elitist in nature, it might come as a surprise that one of the major initiatives mounted by independent colleges is aimed at improving the aspirations and attainments of low-income students and minority pre-college students. The most ambitious of these efforts has been the College/Community Partnership. This six-year project was funded by two separate $1 million grants from the DeWitt Wallace-Reader's Digest Fund and enabled CAPHE to encourage partnerships between private colleges and community agencies to help improve the educational attainment of low-income students. A recently released report entitled **The Intentional Community** evaluates the projects and shows how collaboration can provide incentives and hope for youth in poor neighborhoods. The report serves as a blueprint for what works and of pitfalls to be avoided.

One institution, Mount Holyoke College in Holyoke, Mass., targeted Latinos, who make up a significant proportion of the city's population but are not an integral part of the local power structure. The goal of the project was to help students gear up for college by building study and test-taking skills. The Mount Holyoke program also joined with the Latino Scholarship Fund, which, in turn, formed a Latino Scholars Club where students get together not only to receive tutoring assistance and meet with mentors but to enjoy seminars about Latino poets, produce a newspaper, and plan and organize informational trips and scholarship fund activities.

What makes the projects described in **The Intentional Community** unique is that rather than remain isolated campus entities, these "town and gown" partnerships seek to develop networks and linkages in the community that share the costs of facilities, resources, and transportation necessary to operate the programs.

This is especially true of The Connecticut College/Centro de la Comunidad partnership in New London, Conn., which increased cooperation so that local students and families became involved in activities on the campus, and area churches and community groups contribute additional supplies and financial resources. The partnership conducted a four-week summer Camp Rotary Program in which 50 middle school students worked on reading and writing skills and participated in educational field trips. The students used the college's recreational facilities for various activities such as dance and swimming.

On the other side of the country, CIC member Heritage College joined in a community partnership with the Yakima Valley Farm Workers Clinic to provide activities on college awareness
admissions, and financial aid. Key to the program was the participation of students’ parents and guardians, who were also made more aware of the opportunities that higher education holds for their children. The partnership awarded 17 scholarships and began a scholarship endowment fund.

By promoting this type of grassroots leadership and offering models for change, CIC often helps its members change the public perception of the role of independent colleges. Instead of being viewed as elitist and isolated institutions, these colleges become a “backyard resource” for their communities and explore new ways of fulfilling their educational missions.

Future of Independent Higher Education

Like many sectors of higher education, CIC has spent a great deal of time and energy dealing with the tough questions that affect the future of the independents. How can private colleges maintain enrollment? How can colleges control administrative costs as well as those related to salaries and benefits? How will institutions keep up with information technology? These were some of the issues of greatest concern that were reported in the latest annual survey of CIC presidents.

There are no easy answers, but CIC continues to provide resources that can help its members. Through its Web site, it offers financial planning tools that are designed to help institutions estimate costs of network hardware. In conjunction with this, the council will hold its 11th annual conference on technology later this year.

Knowing that resources are of prime concern, CIC arranges for college presidents to meet with foundation officers to seek support through philanthropic endeavors and competitive grants.

Another CIC project, Preparing Future Faculty, was a pilot program to prepare graduate students to teach by establishing half-time teaching residencies and mentors in liberal arts colleges for graduate students.

Many of these initiatives were developed under the guidance of President Allen Splete, who recently announced his retirement (see sidebar). Under his leadership, CIC has clearly strengthened its role as a service organization while enhancing the position of independent colleges and universities.

As the search for a new leader begins, it is Splete who probably best described where CIC stands today. “While there are always more mountains to climb and opportunities to serve,” Splete said, “I believe that the time is right for the next generation of leadership for CIC and for me to start the next chapter in my life. CIC is stronger than ever before. There are in place many strong pillars on which CIC can build an even stronger future.”

About President Allen Splete

Dr. Allen Splete, president of the Cou of Independent Colleges, will retire, eflec June 30, 2000. He has served 14 years president and is credited as being the clyst for CIC’s growth over the past decades. Under Splete’s leadership, the organization membership has doubled and its budget quadrupled—to $36 million. In addition, has raised $17 million to support CIC’s wc

“I have cherished the nation’s independent liberal arts colleges and universities throughout my career,” said Splete. “They truly in my heart and soul... It has been deeply rewarding honor to serve and be advocate for these institutions.”

Splete joined CIC in 1985 as executive vice president. He was appointed president in 1986 following the resignation of Gary Quinl. Splete was previously president of Westminster College (Pa.) and held administrative posts at St. Lawrence University and Syracuse University.

Since he announced his retirement, Splete has received tributes from colleagues throughout the country. James B. Applebee, president emeritus of the American Association of State Colleges and Universities, said, “His tireless energy, the cooperative relationships he forged with his colleagues, and the success of his approach. He will be sorely missed.”

A panel of CIC presidents has been appointed to begin the process of finding a successor to Dr. Splete.
HOLY FAMILY COLLEGE

Develops Neighborhood Center

CIC Kellogg Grant at Eight Institutions

By AMALIA DUARTE

How many nursing programs incorporate door-to-door health education campaigns in poor, urban neighborhoods? Well, at Holy Family College, nursing students have been taking preventive health care out of the classroom and hospital and into the homes of Philadelphia residents. They have put together information campaigns on lead poisoning and then gone out into the community, ringing doorbells and handing out the literature. In a similar pound-the-pavement campaign, they have helped residents install smoke detectors. And in an ongoing program, they have helped bring food to elderly shut-ins and acted as their companions.

These programs benefit the neighborhood, but they also offer the students firsthand, practical knowledge about community nursing and have other results that are hard to measure but just as important.

"We are preparing students to provide global health care, and so we try to expose them to a variety of situations," said Dr. Jane Carlea, the division head of nursing at Holy Family. "And it helps the students develop their own sense of worth and self-esteem."

These unusual neighborhood outreach efforts were made possible by a grant given by the Council of Independent Colleges (CIC). Two years ago, in January 1998, CIC selected eight private colleges and universities that were member institutions and located in major urban areas to participate in the Implementing Urban Missions Program. The program offers institutional grants of up to $150,000 each for two- or three-year projects to expand and/or improve their missions and activities in serving their urban communities.

The $15 million grant, which is CIC's largest ever, comes from the W.K. Kellogg Foundation. CIC offers support and ongoing monitoring of the projects. In addition, CIC has sponsored conferences that bring together project directors and community members to share success stories and lessons learned. They met for the first time in June of 1998 in Chicago and again this past October in Philadelphia.

Colleges and universities involved in this initiative span the country, and each offers a distinct spin on how it seeks to fulfill its urban mission. Other participating institutions are Bloomfield College in New Jersey, Columbia College in Chicago, Johnson C. Smith College in North Carolina, Lesley College in Massachusetts, Marygrove College in Michigan, Mount Saint Mary's College in California, and Ohio Dominican College in Ohio.

Marygrove College, for example, is trying to boost the number of African Americans in the teaching profession, while Columbia College, an arts, media, and communications institution, develops alliances with community groups to advance the arts.

"This program is a real win-win. It taps into institutional strength that is then used to enable the community to solve some of its problems," said Michele Gilliard, executive director of the Consortium for the Advancement of Private Higher Education (CAPHE) and director of the Implementing Urban Missions program. (CAPHE is a separate operating unit of CIC and designs and administers directed-grant competitions.)

CIC has a long history of working in the area of community-college partnerships. The organization has given out 84 separate grants to colleges and universities totaling almost $35 million in six different
projects since 1984. All of these projects were aimed at helping institutions partner with their local communities. In addition to the Implementing Urban Missions project, two other programs have focused on service learning: two involved working with local scholarship organizations to improve access to higher education; and a sixth project synthesized many of these activities. “We’re responding to and supporting the interests of our member institutions,” said Gilliard. “For small, private colleges that are regionally focused, it is critically important to have a strong, supportive relationship with the surrounding community.”

For Holy Family, the grant seemed serendipitous. Dr. Cardea had proposed the idea of starting a nurse-managed community center but hadn’t gotten the idea off the ground yet. “We had talked about it, and the faculty liked the idea. And we had met with the pastor at a local church, Mater Dolorosa Parish,” said Dr. Cardea. “Then right about this time, the CIC call for urban Mission grants came through. It was one of those wonderful times when an idea is percolating and moving and then the funding comes along to make it happen. I was thrilled when we were chosen.”

Although the neighborhood center is about 10 miles from Holy Family’s Northeast Philadelphia campus, it seems a world away. Sponsored by the Sisters of the Holy Family of Nazareth, Holy Family College is a small, private, liberal arts school that draws its students primarily from middle- and upper-middle-income families, most living in the surrounding area. It is a commuter school with two campuses, one located in Northeast Philadelphia and the other in Newtown, Pa. The small student population of 2,600 full-time and part-time undergraduate and graduate students affords a low student-faculty ratio of 11:1 and makes for small classes and an intimate atmosphere. As the school’s literature states, “Students are our name, not a number.” About 90 percent of Holy Family students receive some form of financial aid, including scholarships, grants, work opportunities, and loans.

Holy Family offers 43 undergraduate programs of study in the areas of business, education, the humanities, nursing, natural sciences/mathematics, and social sciences. New and updated degree programs include communications, computer management information systems, international business with a language concentration in Spanish or French, and sport management.

Holy Family’s nursing and education programs have strong reputations. Within the elementary education division, students can pursue dual certification in elementary/special education and elementary/early childhood education. Study in secondary education is also offered. In addition, students can explore the classroom of tomorrow in a state-of-the-art model classroom.

At the graduate level, Holy Family College offers programs in education, nursing, and counseling psychology. In psychology, the college gives working adults the option of a part-time program held at the Newtown Campus in Bucks County.

The nursing program focuses on aggregate base-care. Skills in leadership, program planning, and research are key concepts in this advanced practice program in community health nursing. A core curriculum of 18 credits provides a strong foundation in nursing theory, research, ethics, epidemiology, and healthcare systems analysis. Concentration courses in community health combine the public health and nurse sciences to provide a basis for promoting wellness and change in the design of care to selected populations. An elective concentration of six credits in health care education or health care administration completes the program.

Students from the nursing program spend time at the neighborhood center for their clinical studies to gain practical skills and to conduct research. But the center clearly does much more than fulfill credit requirements. It would seem to complement one of the college’s stated goals: “To foster a collegiate community that affirms the dignity of the human person and witnesses to a living Christian faith.” “We’re somewhat unique in that many community health centers offer straight medical care such as well-baby visits, immunizations, and exams,” said Dr. Cardea. “But we are much more focused on wellness and health promotion.”

The center supports a range of projects, from CPR classes to a tutoring program for elementary school children that taps the energy of eager high school students who act as teachers, tutors, and role models. The neighborhood center is entirely collaborative, with an advisory board comprised of members of Holy Family College, Mater Dolorosa Parish, Fransford Community, a neighborhood organization. “It truly is a joint effort,” said Dr. Cardea. “If the community doesn’t like it, we don’t do it.”

Early on, the advisory board identified a need in the neighborhood for a safe place for child play and for the elderly to congregate during the day. As good fortune would have it, there was a vacant lot across the street from neighborhood center. “It was filled with old cars and trash,” said Cardea. “It was a perfect spot to take over and clean up a blighted spot in the neighborhood.”

The site might have been perfect, but it took two years of wandering through Philadelphia’s labyrinthine bureaucracy before they got possession of the lot. N. plans are under way for a neighborhood playground with wood chips and grass to replace the asphalt and broken glass. Who knew what might have happened if Dr. Cardea about to struggle to build the playground could’ve very well be that the neighborhood center hadn’t been created, that lot would have stayed vacant eyesore.”
Discovering the Riches Within

Nourishing Potential Artists

BY JEFF SIMMONS

It's Saturday morning, and dozens of students, many nursing steaming cups of coffee, shuffle in from a cold fall day and into an inviting, warm art studio in Manhattan's East Village. While most of their classmates likely are enjoying a typical weekend reprieve from classwork, they have no such luck.

They settle onto wooden and metal stools, withdraw charcoal pencils and felt-tipped pens from backpacks, and resume what has become a weekend ritual: drawing and sketching and learning about art in a novel program at The Cooper Union.

"You need to plan your composition," says Christine Rosales, co-instructor in one classroom, as she maneuvers between the long tables blanketed in sketch pads.

The room is virtually silent, except for the sounds of her voice and the strokes of pencils on paper. The students, a majority Latino, African American, and other minorities, are intently studying the young nude model as he methodically strikes a variety of poses.

"You want to look at the model," says the bespectacled 19-year-old, a blue bandanna wrapped around her hair. "You have to trust what you see."

What they see is art come to life. Something most of the students could only have dreamed about in their home schools across New York City. Amid swift budgetary cuts, art programs in public schools have been decimated for years, allowing many potential artists to slip through the cracks.

In recent years, New York City educators have forged private-public partnerships to beef up art and music programs, and recently departed public schools Chancellor Rudy Crew has stressed the value of the arts in creating well-rounded students. But students say that many high schools still allow the arts to languish.

That is where The Cooper Union steps in, as it has for more than three decades. "Parents as well as schools don't always encourage students. I would say they don't get encouragement in many areas," says Dino Blanche, coordinator of the Saturday Outreach program, who has watched hundreds of students blossom in the last decade.

"They evolve on a few levels. They get a different perception about themselves, and that perception is that they start to see themselves as part of a bigger world rather than just in their small high school. Their self-esteem also starts to rise, because there are a lot of high expectations of them."

The Saturday Outreach program was fashioned to attract and assist students who might not have had access to the arts because of economic or geographic hardship. The program enrolls 400 students, drawn by the free instruction and...
materials. The only out-of-pocket costs: bus and subway fares, and lunch.

The Saturday Outreach program is ethnically diverse, though organizers could not provide a specific breakdown. The Outreach project is diverse but with more numbers of White students because it draws more youths from suburban areas.

Cooper's president, John Jay Iselin, said that the grant allows the existing program to "broaden cultural and educational possibilities for our students and for all New Yorkers. It gives us a chance to extend our cultural commitment to underserved communities."

Though joined in title and in intent, the Saturday and Outreach projects are somewhat different. The Saturday project enrolls only New York City public high school students in 10th through 12th grades. Under the watchful eyes of program staff, classes are taught by Cooper Union undergraduate students and run for 22 Saturdays between October and April.

The Outreach project serves students in the New York City area’s public and private schools in 10th through 12th grades. Cooper faculty teach in this project, and all students must attend a portfolio review. The year-round project is divided into seasonal four- and eight-week sessions.

On any given weekend, Saturday students can be seen learning hands-on about architecture, drawing, graphics, painting, and sculpture, and preparing their portfolios during seven hours of classes. Meanwhile, Outreach students in the same two Cooper buildings are engaged in writing, drawing, photography, printmaking, design, and contemporary art issues. On a recent weekend, students were intensely developing pinhole pictures in a darkroom, while doors away, students were designing cardboard constructions. In another room, students engaged in a creative writing exercise.

Saturday Outreach, which enrolls one of every two students who apply, is destined to branch out this year, fueled by a $600,000 grant from the Lila Wallace-Readers Digest Fund. Last August, the fund gave out grants totaling $1.1 million to six professional arts colleges and universities around the country to increase youth access to high-quality arts experiences.

The money will allow the program to forge links with the Jamaica Center for Arts and Learning in Queens and with ABC No Rio in Manhattan’s Lower East Side.

Both community-based centers are located in neighborhoods with high minority populations, and organizers believe that the expansion will bring more inner-city high schools into the fold. Currently, students travel from the New York City area to Cooper Union.

At the same time, the expansion gives Cooper’s undergraduate students the opportunity to develop teaching skills and to work with a more diverse population. Undergraduate students have been working with the high school students on Saturdays since the program’s infancy.

"It's an exciting way of enhancing our relationship with the neighborhoods around us," said Robert Ritschl, the Cooper Union dean who initiated the proposal.

Jamaica Center’s program will offer four free courses in performing and visual arts. In some cases, organizers say, this will be the only art instruction available to many of the schools in northern and southeastern Queens.

ABC No Rio, a community center for art and activism, will offer printmaking and photography courses in the 10-week sessions annually. Organizers say that the class will be team-taught, offering a setting with a much higher teacher-student ratio than in most public high schools.

Students often arrive with low expectations, many receiving poor feedback from counselors, classmates, and teachers. Often parents have spin tales about struggling artists and have attempted to deflect their artistic visions with talk about more lucrative professions like medicine and the law. “They want to know how much money they can make,” admits Marina Gutierrez, a mixed media artist and co-director of Saturday Outreach. “They fear they are not going to be able to make a living.

As she’s gazing at the program’s first-year students, she’s come to expect the initial inhibitions and misperceptions. “The students have come from an atmosphere of absence and neglect,” she says. “They’ve not been challenged, and they’re limited in their experiences.”

“Someone will come into this program with low expectations of himself and not have a clear direction. He’ll demonstrate some ability but has not been pushed very far so he’ll enter the program at a sort of unsophisticated level.”

But with each semester—students are not limited to one—she and colleague Tony Gonzalez have watched the students’ attitudes change. They become more self-confident and speak up more in class.

“I was doing a critique yesterday,” she says, “and it takes a long time go through and address each piece of work, and I would give a more thorough review to the pieces early in the critique. When time was running o
the students called attention to it and said [that they wanted] to get more thorough on everything. 'We think you should time each critique,' they said."

"They proceeded to keep me on each piece and say 'Move on,'" she adds. "It was very funny but also wonderful. They were directing me on what they thought was appropriate."

Gutierrez, Gonzalez, and Blanche have also served as role models, particularly to minority students.

"As someone of Latino descent who is succeeding, I guess I serve as a role model for students who aspire to succeed and if that is happening, that is great," says Gonzalez, adjunct professor and faculty advisor to the Saturday Outreach program.

He pauses, then adds: "I am very sensitive to Latino issues. Personally, I would like to see more representation of students of color in general, but only because of my background. It is closer to my heart."

Students are often guided to various studios to meet with Latino, African American, and White artists and quiz them on their specialties.

"Our challenge is to fully represent the diversity just in the way our school system is very diverse, and our mission is to include that and make visible the incredibly diverse range of professionals we are dealing with in the world," says Rosales.

As Gutierrez watches, she quietly praises one student in the portfolio class. The students are feeling some pressure this fall day because of a college fair portfolio day at the nearby Fashion Institute of Technology. They're all anxious about displaying their work for art school admission.

Headphones supplying him with a private stream of techno-pop music, Claudio Nolasco is drawing out what little noise there is in the classroom as he sketches with a black marker. A recent graduate of the city's High School of Art & Design, the 18-year-old has been enrolled in the Cooper program for two years now.

He says later that his family wasn't initially receptive to his dreams of an art career. Some friends told him it was a dumb decision.

"At the moment, I am just trying to get into college and see where it goes from there," he says. "Ever since I was a little kid, I liked drawing and coming up with characters and cartoons. Over the years, it became more of a personal expression."

The climate in the room, he admits, can be competitive. This, because the student sitting next to you could be vying for the same seat in art school. But, he notes, "it is very easy-going here... We're always trying to do one better than the rest, draw a little better, but other than that, it's relaxing."

In a rear corner, 17-year-old Aaron Chanamckenn is pensively sketching the male model. Her head bowed, she softly graces her pencil across the pad.

She later recalled what the experience was like the first time she stepped into the Cooper classroom.

"We walked in, and they said get a pad and a piece of charcoal and start drawing. We just sketched all day from 9:30 till 5. We just sketched. It was so intense. I had never done anything like this before. I realized the next couple of weeks were going to be hard work."

Unlike many of her classmates, she said that she's always had encouragement. Her mother is an artist and pushed her to draw. "My mother said, 'I was born an artist, and [you will] be an artist,'" Chanamckenn says. Asked what being an artist means, she responds, "To have the mentality to analyze things in an artist's way. Not to look through the eyes of a politician or a scientist, but to look at the world and your surroundings and appreciate the colors and lights in the world."

Soon after, students in many of the classes begin to pack up their bags. Toting their portfolios, they are headed across town to the college fair. Some, though, eventually won't have to travel far in the future because they'll be accepted into Cooper.

Each new school year, 60 first-year students begin in Cooper's art school, and about 15 to 20 of them have been in the Saturday Outreach program. An additional two to five graduates of the Outreach program are accepted into Cooper's architectural program.

Most of all, the organizers hope that the Saturday Outreach students leave not just with an educational experience but with a new outlook on life.

Says Blanche: "I tell them that inside of them there are fabulous riches that are yet to be discovered, sort of like an ancient sacred book that has yet to be opened or an oracle that has yet to be discovered—lying inside of themselves.

"And that a career in art will not fail to develop their growth in perceiving and understanding themselves and giving them a chance to be happier, more fulfilled and alive in the world."

Norma Cantú Talks with Outlook about Civil Rights and Education

If you believe the press clips on Norma Cantú, director of the U.S. Education Department's Office for Civil Rights since 1993, she is either on a mission for radical change or is dedicated to seeing justice served. One conservative critic accused her of conducting an "in-your-face civil rights agenda." Her supporters say that she fights for the rights of minority students who often cannot afford representation, and she combats educational discrimination. One education newspaper said that "many college officials and civil-rights watchers consider her the most aggressive and fearless advocate of minority, disabled, and female students in the last 20 years." Because the Office of Civil Rights (OCR) has a $66 million budget and staff of 700 investigating colleges and schools, no one questions her influence.

Cantú arrived at the Office of Civil Rights with impeccable credentials. Bilingual and the daughter of working class parents, she graduated from Harvard Law School at age 22. Prior to joining OCR, she spent 14 years as a lawyer for MALDEF, the Mexican American Legal Defense and Educational Fund. She is the longest serving director of OCR in the 20th century.

Interviewed by The Hispanic Outlook, Cantú revealed the status of affirmative action cases, discussed issues facing Hispanic students, and explained OCR's direction.

HO: What are the major accomplishments of the Office of Civil Rights in your six years on the job?

CANTÚ: Our major achievement is changing the culture of our staff from one that focuses internally to one that looks outside for partners and for finding new ways to resolve long-standing problems. We've changed our complaint resolution approach, which now emphasizes problem-solving and mediation. I contrast it with the old style in handling civil rights where we emphasized issuing findings and documentation. In the past, we put time and energy into writing reports, and now we emphasize solving problems.

HO: Concerning minorities, which issues have been addressed?

CANTÚ: We focus on early educational years and ensuring that minorities are given access to quality education. The kind of problems we and where we are showing success, involve minorities referred to low "dumb down" classes. We have also tackled language-minority children receiving English classes and of racial harassment. We also in-school segregation issues minorities and court chance to achieve high stand referred to as "second generation Board of Education.

HO: What are the key OCR addresses?

CANTÚ: Our office is here civil rights areas—disability, race, and at the. When I started coming about two-thirds of our resources went to disability. Race, and age were squeezed remaining one-third. What we try to identify issues that were addressed. Age isn't an age, people have as many problems as in the sixties. Disability no longer half of the complaints are gender and race, the other half have a more balanced case to because disability complaints decreased, since we still have a number of them. Our portfolio expanded because we received complaints regarding gender.

HO: What are the dominant issues that OCR tackles?

CANTÚ: There's no one single that is the largest. Racial harassment, within-school placement issues access to services for language-minority students are the three key. Racial harassment is defined as words or conduct that interfere with a student's access to education. It can vary from physical violence directed at students because of race to pervasive verbal conduct at school. To such level of harassment, it must be pervasive, not an individual case. Placement issues involve students being assigned to classes because of their national origin or race, or denied access to full educational opportunities. For example, one school district identified
American students as being emotionally disturbed and isolated from regular coursework without having done an appropriate evaluation. One teacher assigned African American students to special education courses, but she invited in the parents of White students for a consultation. Pertaining to English-language learners, we have identified places where there are no services for students. This is happening predominantly in the South because of the influx of recent immigrants.

**HO:** Affirmative action has come under severe attack. In California, an amendment was passed outlawing it, yet OCR fights for affirmative action in admissions. Why?

**CANTÚ:** There are two types of affirmative action: remedial affirmative action where a court or our office has determined that affirmative action is necessary. When we find discrimination, we tell the university that what they've done isn't effective. That's rare, and in fact, I can't remember a recent case over the last 10 years. Voluntary affirmative action is most common. A school or college doesn't want to sue but wants to increase participation of some underrepresented group. It can be voluntarily started and stopped. When California, which was operating voluntary affirmative action, stopped it, our office made no move. We saw it as voluntary affirmative action; we played no role in it. What effect has that had in our office? A complaint was filed because a new system was put in place. Our office is working with the state to respond to that suit.

**HO:** California is only one state. What is the status of affirmative action cases in the other 49 states?

**CANTÚ:** Affirmative action is alive and well in colleges in America because colleges still believe in the value of educating all students. Our office has helped colleges understand that affirmative action should be "mended not ended," as President Clinton said. Affirmative action should be followed as in the Bakke case (the 1978 Supreme Court ruling). In the Bakke case, the U.S. Supreme Court approved of affirmative action with conditions. One important condition was affirmative action should allow students to compete against each other fairly. If we see one committee evaluating minority candidates and the other committee evaluating non-minority, that doesn't fit. Back in 1978, universities thought they could put together the best class, and the Supreme Court upheld rights of universities to build their own classes but put conditions in place. Affirmative action should be done in a "narrowly tailored way," said the Court. You can consider race but only as much race as it takes to meet the college's objectives. If a university's objective is to create a diverse student body and it has many Latino students but wants to attract more Latinos, that's not meeting objectives. If they have wide diversity on campus, they might need to move away from race and move to socioeconomic factors.

**HO:** Describe affirmative actions in most colleges across the U.S.?

**CANTÚ:** Most college administrators are working hard to achieve diversity and use affirmative action as a legal tool. These campuses are committed to the goals of having a diverse student body. They might not reach out to one tool, race-conscious decision-making, but there are other tools to employ. Secretary Riley in a May 7, 1999, speech on Brown vs. Board of Education listed 10 other ways that colleges could continue to pursue diversity goals. Colleges are trying to catch up to where they were before. In my home state of Texas, undergraduate enrollment is reaching the levels it was at before, and in California, people are still working creatively to respect state law but not lose the goal of diversity.

**HO:** What special issues do Hispanic students face?

**CANTÚ:** Concerning Hispanics, we're addressing barriers in the K-12 pipeline so students have the best chance to be admitted to the college of their choice. The K-12 issues that affect Hispanic students include racial harassment and being kept out of gifted classes.

**HO:** What is OCR doing about segregated suburban school districts?

**CANTÚ:** We used to handle school-to-school issues of racial isolation, but Congress passed legislation preventing our office from dealing with it. When I talk of issues of racial isolation, we discuss it within the school—thus not school-to-school. The department provides financial incentives to deal with school-to-school segregation, which is the federal magnet school program. It's competitive, and the best ideas are rewarded with federal money.

**HO:** What is the situation regarding gender equality?

**CANTÚ:** Title IX prohibits gender discrimination in federally funded activities. The largest areas involve sexual harassment, athletics, and a smaller category of girls and women excluded from certain classes like math and science. Boys can be excluded from classes such as nursing. Athletics are unique because Congress expected that contact sports would be separate between boys and girls. Sexual harassment is another issue. The Court has taken on cases involving middle schools. The Court decided that a school could be sued if a student harassed another student and the school knew about it but was indifferent. If you want more information on this area, visit our Web site at www.ed.gov/offices/OCR.

**HO:** What progress have we made in gender equality?

**CANTÚ:** Before Title IX, women numbered eight percent in medical school and six percent in law school. Now in law schools, women make up 40 percent of the class, and in medical school, it's closer to 50 percent. The other visible change is in access to careers. Men couldn't be elementary school teachers, and women couldn't be doctors. In the area of computer science, it's still disproportionately male. Is it lack of financial assistance? Counseling? We are trying to identify the causes.

**HO:** Once you identify the causes, what do you do?

**CANTÚ:** We can offer technical assistance, do an investigation, and demonstrate what the facts are. We can take a variety of approaches.

**HO:** Other key issues?

**CANTÚ:** We also address accountability systems that states are adopting to raise standards. Some states are putting in place assessments that include high school graduation tests and promotion tests. We think that's what states should do. We want more accountability, and high school diploma should mean something. We are preparing technical assistance to ensure that tests are accurate and used in ways they are designed for. For example, in Georgia, elementary school teachers were using IQ scores to decide who should be in gifted classes. State designers never intended IQ tests for that IQ tests are used with a bundle of measures to determine potential. OCR provided technical assistance to Georgia educators. Georgia decided to fund teacher training and to train teachers to identify students who would do well in gifted classes, including grades and past performance.

**HO:** Last question. You've been called "an advocate" and "fearsome". How do you view yourself?

**CANTÚ:** That quote was anonymous. I will say that I view our office as having a proud record of reaching educational and legally sound solutions to long-standing civil rights problems.
Emory University
Training Cultural Bridge-Builders

by Roger Deitz

Emory President William M. Chace reminds us that it is more than 36 years since Emory successfully sued to overturn state legislation preventing private colleges in Georgia from admitting Black students without losing tax exemption. "Today, just three decades later," he reflects, "no other first-rank research university has a higher percentage of African American students or faculty. We are proud of the more diverse campus we have been able to create. But there is still more to do."

The president also notes that Emory draws strength from the "advantages of a cosmopolitan city" (Atlanta), the "blessings of strong sister institutions," and the "philanthropic generosity of alumni and friends." He says that he believes that diversity is a richness that must be explored, and adds, "We live in a culturally rich nation whose multifarious strands of ethnic heritage make America unique in many ways. We have an unparalleled opportunity to explore the potential for creating a civil society that not only tolerates but relishes the differences that comprise our strength."

President Chace then cites a remark by T.S. Eliot that a proper education should present students with subjects for which they have no particular aptitude. "Education should stretch students beyond what they're especially comfortable doing and being," says Chace. "I would amplify Eliot's observation by saying that all of us, while we have some aptitude for human relationships, constantly need new experiences to train that aptitude. College is preeminently such an experience. It is a kind of experiment in learning that is also an experiment in living."

The president says that this is "unfamiliar territory" that the students face, including "not merely racial or ethnic differences among their fellow students, but differences in style, of method, of thinking, of habit and custom in every imaginable combination." President Chace concludes, "We make students face a world they have not experienced before, believing they will thus learn more of the world as it really is. We create for students a place where, we hope, they can take on the broad humanity, the acute perception, and the mental dexterity of citizens of the world. The world that will await them 20 years or four years down the road—indeed tomorrow—will be difficult for them to imagine now. Confronting them with diversity today will lessen the shock of the future." It is hard to imagine a worthier Honor Roll inductee, or more apt and inspiring words from a university president. We therefore welcome Emory University to the Honor Roll.

Emory was founded by the Methodist Church in 1836 in Oxford.
Honor Roll Facts in Brief

INSTITUTION
Emory University

LOCATION
Office of Admissions
200 Boisfeuillet Jones Center
Atlanta, Georgia 30322-1950
(800) 727-6036

ESTABLISHED
1836

ENROLLMENT
11,294 total enrollment (1999 first-year class of Emory College is 26.5 percent minority.)

DEGREE OFFERINGS
Bachelor's
Master's
Doctorate

TUITION AND FEES
$22,870 tuition for undergraduates (*5 percent of all students receive some financial aid.)

FACULTY
2,500 of which 2,085 are full-time and 16.6 percent are minority.

Georgia, and named for Methodist Bishop John Emory. During the Civil War, Emory College was closed, and the unused college buildings were first commandeered as a Confederate hospital and then occupied by Northern troops. In the early 1900s, two brothers, Asa and Warren Candler, were instrumental in Emory’s move to Atlanta and its elevation to university status.

Asa, an Emory trustee who had purchased the formula for Coca-Cola in 1888, gave $1 million and seventy-five acres of land to the school. His brother Warren, a Methodist bishop and former president of Emory College, was named chancellor. Sixty-five years later, in 1979, another pair of brothers, George and Robert Woodruff, transformed Emory with their gift of $105 million. Both men were Emory trustees. In addition, Robert was chair of the board of The Coca-Cola Company, and George was a business leader and philanthropist.

Emory College, which is the undergraduate liberal arts college of the university, became coeducational in 1953. In 1962, Emory trustees took the lead in ending the racial segregation of private higher education in Georgia, successfully suing to overturn restrictive provisions of the state’s constitution. Former President Jimmy Carter joined the faculty in 1981 as a University Distinguished Professor. The Carter Center was established that same year. American architect Henry Hornbostel designed the Atlanta campus in 1915. With its rolling hills and pines, the Druid Hills landscape reminded him of Northern Italy. For this reason, he created a campus of buildings with red-tile roofs designed in the Italian Renaissance style.

Many of these buildings remain today on the quadrangle. The bucolic Druid Hills section is a residential neighborhood located four miles east of downtown Atlanta. Some eight major buildings an approximate cost of $215 million, will be constructed by 2001. Emory’s Atlanta campus. They will support programs in the arts, sciences, and research and patient care in the health sciences.
including a new nursing school building. With 15,500 employees, Emory is one of the five largest private employers in Atlanta, contributing an estimated $2.4 billion annually to the state's economy.

There are 11,294 students enrolled in Emory's nine schools, and this number is split fairly evenly between undergraduate, graduate, and professional students. Undergraduates number 6,215; graduate and professional students number 5,079. For its 1999 first-year student class, Emory College (the undergraduate school) admitted 42.6 percent (1,200) of the nearly 10,000 applicants. The class average SAT is 1329; its unweighted average GPA is 3.6. The class is 26.5 minority and 54.8 percent female. Sixteen percent hail from Georgia.

The most recent statistics for undergraduates (Emory College) show enrollment to be 44.2 percent Asian American, 20 percent African American, 13 percent International, and 29 percent Hispanic. The graduating class of 1999 for last May included 309 (10.1 percent) Asian/Pacific Islanders, 304 (9.6 percent) African Americans, 128 (4.0 percent) Internationals, and 103 (33 percent) Hispanics. As of last year, the faculty total of 2,500 consisted of 2,085 regular, full-time faculty members. Minority faculty comprised 16.6 percent of the faculty workforce, and female faculty accounted for 31 percent of the total. The highest concentrations of minorities were found within the instructor (26.4 percent) and the assistant professor (21.7 percent) ranks. Minorities represent 89 percent of the tenured full professors at Emory, which reveals a steady increase from 1993. A total of 755 faculty members hold tenured positions at all ranks, accounting for 36.2 percent of the total faculty. Tenured minority faculty (17) comprise 10 percent of the total number of tenured faculty; an increase from last year. It should be noted that 65 minority faculty members are on tenure track and progressing toward tenure.

Excellence in teaching continues to be one of Emory’s highest priorities. In fact, the university is distinguished by its equal regard for teaching and research. The University Teaching Fund provides $250,000 annually to support teaching improvement and innovation for the development of new and nontraditional courses and curricula. It also encourages interdisciplinary and extracurricular courses and programs. Emory College established the Center for Teaching and Curriculum to reward excellent teaching throughout Emory College and to provide support for the development of new courses, curricula, and methods of instruction.

The Candler School of Theology’s new curriculum takes a different direction in training seminarians by emphasizing the practices of Christianity every bit as much as the preaching of it. As a university related to the United Methodist Church, Emory provides ample and creative opportunities for enhancing religious life on campus through worship, service, education, and undergraduate and graduate student organizations. Some 1400 first- and second-year students take advantage of a unique college experience at Oxford College, which provides a liberal arts setting with an intense teaching environment—one in which a class size of 20 students. Recent changes in the medical school curriculum emphasize earlier introduction of patient care, more small-group teaching, and a focus on ethics and patient communication skills.

Research on teaching practices is paying off at Emory. Jacqueline Irvine, Candler Professor of Urban Education at Emory, has made training teachers to deal with children from many cultures—and their parents—a centerpiece of her research. Irvine is project director of CLUTES (Center for Urban Learning/Teaching and Urban Research in Education and Schools), which has trained more than 150 teachers in five Atlanta area school districts to link classroom experiences with current research and knowledge about culture and ethnicity. The program has been recognized by the U.S. Department of Education to be an example of best practice in professional development.

Irvine says that one reason the program is needed is that too often teachers think of parental involvement in a very narrow way. “We require parents to come to the school, sit in the little chairs, and hear how their children are doing and what they should be doing as parents.” But many immigrant parents don’t respond to that, possibly because they feel uncomfortable, says Irvine. “If they don’t visit the school or respond the way the teacher would like them to, teachers often interpret that as ‘the parents don’t care.’” Irvine asserts that this is probably not the case. “I’ve never met a parent who didn’t want their child to do well in school,” she says.

To prove her point, Irvine takes teachers in the CLUTES program out of the classroom and into African American and other culturally diverse neighborhoods—Hispanic, Vietnamese, and Laotian populations are growing rapidly in the Atlanta area—to visit parents’ homes and their communities. “Teachers inevitably say, ‘Oh, yeah, these parents really do care about their kids.’” reports Irvine. “These cultural immersion trips allow teachers to use what they’ve learned about kids in the home environment as links to the curriculum and the classroom.” Teachers’ new insights might be as subtle as learning that pointing at people, a favorite method for calling on students in class, is an insult in some cultures or that touching one’s head or failing to look someone in the eye has special significance. “If teachers know nothing about the way the Vietnamese community, for example, understands the world, they can’t use their viewpoints in the classroom,” says Irvine. “I see teachers as cultural bridgebuilders between students’ homes and mainstream America.”
George Castro Wins High Honor for Mentoring

IBM Retiree a Standout at SJSU

BY NANCY L. STAKE

According to George Castro, associate dean for science outreach at San José State University (SJSU), "Mentoring is not only critical to the future of our youth, but for the entire future of science." He feels that a poster in a colleague's office says it best: "No shirt, No shoes, No service; No math, No science, No jobs." Castro likes to add a corollary: "No literacy, No math, No science."

Recently, Castro received national recognition when he was honored at the White House with the Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring. Established in 1996, and administered and funded through the National Science Foundation (NSF), this award annually recognizes individuals and institutions that have been exemplary in encouraging minorities, women, and persons with disabilities to pursue careers in scientific, engineering, and technical fields.

Castro was one of 10 individuals recognized in this manner from universities across the country. He was cited for outstanding achievement in mentoring and guiding minority students. According to President Clinton, the awardees "serve as examples to their colleagues and will be leaders in the national effort to train the next century of scientists, mathematicians, and engineers."

This recent honor wasn't just a singular event for Castro. When you enter his modest office in SJSU's science building, you cannot help but notice the large number of plaques on the wall.

Among them are the Albert V. Baez Award for Outstanding Technical Contribution to Humanity, IBM Outstanding Employee, and the Martin Luther King Good Neighbor Award. In 1996, Castro was one of five laureates selected by Junior Achievement of Santa Clara County to be inducted into the Santa Clara County Business Hall of Fame. In 1997, he received the "Giant in Science" Award from the Quality Education for Minorities organization in Washington, D.C.

Mentoring at San José State University

Castro, who has a doctorate in physical chemistry, took an early retirement from IBM Research, San Jose, Calif., in 1995. ending a 27-year career with the company. He then began what he calls his "second career" at San José State University, where he's now doing what he loves most—mentoring minority students who are typically underrepresented in science, math, and engineering. Castro has been uniquely successful at giving them the tools and the motivation to finish school, attend college, and subsequently go on to build their own successful careers.

He has developed relationships with elementary, middle, and other high schools adjoining the SJSU campus to improve the math and science learning under SJSU's Community Outreach Partnership.
and 21st Century Community Learning Center programs. In addition, he directs the Mathematics, Engineering and Science Achievement K-12 Schools Program for Santa Clara County, which operates out of the university.

Castro has also developed partnerships and programs with K-12 schools and community colleges. The goal is to improve student achievement in math and science courses and to increase the pool of science students who can enter the university. He directs a major partnership between SJU and the East Side Union High School District. Funded by NSF, this project has significantly increased the number of students who complete the math and science college prep courses. This partnership also provides employment opportunities for underrepresented undergraduate students wherein they mentor and tutor K-12 students.

Giving Back to the Community

Maria Saavedra is one of the SJU students who mentors students at a San José neighborhood school. Now in her senior year, Saavedra is working on a major in nutrition, and she also carries minors in chemistry and biology. According to Saavedra, there are many barriers for Hispanic young people who want to attend college, such as family pressures and the need to learn new study skills.

“Often we are the first in our families to go to college, so we have no prior experience to draw upon, and it’s difficult for us to know what to expect,” she said. “Our families also have difficulty understanding the pressures we face. In order to get an A in hard courses, it’s critical not to get behind in assignments, and that pressure can pull us away from family needs.”

“The struggle can be overwhelming at times,” Saavedra continued. “but I feel fortunate to have Dr. Castro for a mentor because he understands what I am going through. He’s a strong role model who always strives to be the best he can be, and, in turn, he challenges me to be the best I can be.”

Adds Saavedra, “Working with kids who are growing up in a neighborhood similar to the one in which I grew up allows me to give something back to the community. I really enjoy making science fun and relevant for them, and it keeps me going to see their growing interest in science.”

It All Began at IBM

As manager of IBM’s Physical Sciences group, Castro helped build the organization into one that is world-famous for its many scientific discoveries. Among them were the first superconducting polymer, novel organic metals and superconductors, high resolution laser techniques, and new methods of investigating magnetic materials.

During his tenure at IBM, Castro began an on-the-job training program for minority students at a local college to assist them in becoming IBM technicians. Over two decades, he personally mentored and hired more than 20 minority and female students who studied science and engineering. He was an active role model, frequently volunteering his time to visit elementary schools, high schools, and universities. He also personally sponsored many scholarships for high school and community college students.

His involvement in the Society for Advancement of Chicanos and Natives Americans in Science (SACNAS), both as an officer and board member, also began at IBM. He helped build SACNAS from a small group into one of national prominence that now serves more than a thousand students a year. Says Castro, “So many of our students are the first in their families to go to college, and few have mentors who can help them with career choices. It is for students like these that organizations such as SACNAS perform such a crucial service.”

The group returned the compliment when 21 students from SJU’s Chapter of SACNAS were among those who nominated Castro for the Presidential Mentoring Award.

One Student at a Time

Castro’s passion for mentoring began when he and his wife were raising their four children. They are now Stanford graduates, the fourth graduated from UC Davis. He believes that young people need two things to succeed: mentoring and knowledge. Early in his career, he determined to dedicate his life to the mentoring career.

Asked how he feels about recent Presidential award, Castro acknowledged the personal satisfaction in such an honor but said he is even more gratified by the letters he receives from former students:

“Letters from my students who now working in scientific fields has real impact on me,” he comments.

“Often the students themselves do not realize what mentoring has done for them until they are working in successful careers. It always encourages me to hear from them,” he said.

Thinking about his own interaction with young people, he adds:

“My greatest successes with mentoring came one student at a time,” he adds. “Helping young people this way is not revolutionary; but if sustained, it can add up over the years to a meaningful change for the better...
Former Students Speak

Mike Ramirez, currently the manager of component integration at IBM Research, in San José, was one of Castro’s students. “When I first met Dr. Castro 15 years ago, I was a third-year electrical engineering student at SJSU,” said Ramirez. “He hired me to work on his project to improve the signal-to-noise ratio of magnetic media. He encouraged me to work with other scientists who also became my mentors, and to continue my studies and graduate… I became the second of nine children in my family to receive a college degree, and I feel fortunate to have had Dr. Castro’s positive influence to guide me through my academic and career success,” Ramirez said.

Luis Franco, now a program director of mechanical integration at IBM Research, said, “Both of my parents came from Mexico and had always supported my education. When I was a senior at SJSU majoring in chemical engineering, I didn’t think that I needed a mentor. However, Dr. Castro gave me an understanding of my culture in the U.S. and he inspired me to become a mentor for those less fortunate. Now I help aspiring college students in the Puente and ENLACE (Engaging Latino Communities for Education) English and math programs,” said Franco. “Dr. Castro helped me learn that just having someone as a role model can truly help a struggling minority student to see a path to success. His gift was to transfer to me some of his passion for mentoring.”

The Need Is Great

Castro feels fortunate that he has always worked in a culture and environment that encourages opportunities to mentor young people. However, the need is great, and according to Castro, there are not enough effective champions to help. “In my work with K-12 schools, I am overwhelmed by the number of middle and high school students who have few mentors to help them with college and career awareness,” Castro said. “Counseling in public schools seems to be in a never-ending decline with no hope of bringing it back. This leaves many youth who, outside of the classroom, learn mainly from each other, from television, and, more recently, from visual and aural media and the Internet.

“As a result, we see a great number of lost and confused high school students,” Castro observed. “This situation begs for a creative solution in order to revitalize and greatly expand the proper mentoring of youth if we are to have a better informed citizenry.”

Castro will use the $10,000 grant from the Presidential Mentorship Award to expand his mentorship activities. Preliminary plans include providing tutoring materials and stipends to assist university students who wish to mentor public school students. He will also arrange for funding for student organization such as the SAGANAS, and continue to generate external grants for variety of science outreach projects.

Nancy L. Stake, public affairs specialist at SJSU, is editor of OnCampus, the faculty/staff newsletter, writes for the alumni publication, and conducts outreach activities that increase SJSU’s visibility. Prior to SJSU, Stake had a 15-year career in the high-tech public relations field. She has an M.S. in mass communications from SJSU.

The Ohio State University
AGRICULTURAL TECHNICAL INSTITUTE
Wooster, Ohio
January 2000

POSITION: Assistant/Associate Professor
Ornamental Horticulture (12 Mo. Tenure-Track Position)

START DATE: July 1, 2000

SALARY: Salary will be commensurate with experience and training. The Ohio State University benefits include group life insurance, major medical and hospitalization insurance, retirement plan and annual vacation, sick leave and maternity leave.

DESCRIPTION: Responsibilities include teaching technical courses in several areas of ornamental horticulture such as landscape plant materials, nursery management, plant propagation, turfgrass practices, and arboriculture. The individual must develop a practical hands-on program of teaching that supports the mission of the Institute. He/she will publish and present research results to scientific and industry audiences and give leadership to state, regional and national professional organizations. The person will advise students, engage in professional development, and provide service to the University. The individual will develop a strong, positive relationship with the green industry.

QUALIFICATIONS: Ph.D. in Horticulture preferred. Masters in Horticulture or related discipline with appropriate experience considered. A strong record of past teaching is desired. Applicants should have excellent communication skills.

MATERIALS REQUIRED: Send letter of application, vita, transcripts, a list of references and three letters of reference to:

Dr. Robert McMahon
Horticultural Technologies Division
Ohio State ATI
1328 Dover Road Wooster, OH 44691
Phone: (330) 264-3911, extension 1320
E-mail: mcmanahon.2@osu.edu

Consideration of applications will begin March 31, 2000. Applications will be accepted until the position is filled.

The Ohio State University is an Equal Opportunity, Affirmative Action Employer. Women, minorities, veterans, and individuals with disabilities are encouraged to apply.

CALIFORNIA STATE UNIVERSITY, SACRAMENTO
Provost and Vice President for Academic Affairs

California State University, Sacramento invites applications for the position of Provost and Vice President for Academic Affairs. The Provost is responsible for providing leadership to the educational programs of the University and, with other senior officers, to the University as a whole. The Provost is responsible directly to the President and assumes leadership of the campus in the President’s absence.

The ideal candidate will work collaboratively and productively with others in fostering change and adapting to new circumstances which face higher education. The ideal candidate will be an individual of serious intellectual purpose, with a deep understanding of contemporary, intellectual issues as well as an awareness of social realities and current social changes.

Review of applications will begin March 10, 2000. A complete description of qualifications and application instructions may be found at http://www.csus.edu/fas/Provost. VA.htm. Send to:

Office of Faculty and Staff Affairs
California State University, Sacramento
6000 J Street, Box PVP
Sacramento, CA 95819-6032

EO/AA
La Raza and MALDEF Fear House Resolution Unhappy with Bilingual Ed Provisions

BY ALAN FINN

House Resolution 2, more commonly referred to as the “Students Results Act of 1999,” passed late last year despite strong opposition from several major Latino organizations.

The estimated $8 billion bill, aimed at raising academic standards and improving services in the nation’s poorest K-12 schools, was passed by the House of Representatives on October 21, 1999, by a vote of 358 to 67. It has since been referred to the Senate Committee on Health, Education and Labor, and Pensions, where it is still being hotly debated.

Critics of the bill, although pleased with its ambitious size and scope, take offense at its parental consent provision. Unlike other groups cited in the bill for funding, the provision requires that parents and guardians of Limited English Proficient (LEP) students complete a consent process before their children may receive language instruction. If the process is not completed, the school may take action to enroll the student in an English as a Second Language (ESL) program without parental consent. It is a process that has some leaders in the Hispanic community, such as Raul Gonzalez, educational policy analyst for the National Council of La Raza, condemning as “vague,” “elaborate,” and “full of bureaucratic red tape.” NCLR along with other Latino organizations is proclaiming the provision a violation of the civil rights of LEP students and, more specifically, Latinos (who comprise 75 percent, or more than 26 million students, of that segment).

“At issue for the Hispanic community is that the parents of LEP students are required under this bill to go through a consent process is unprecedented,” said Gonzalez, who supports parental notification over consent. “It’s vaguely defined, and it singles out one particular group for different treatment.”

There is no disputing the fact that a consent process does exist, but interpretations of the effects of the bill vary greatly, particularly on the issue of what effect the implementation of the provision will have on the nation’s millions of LEP students. Objectors to the provision contend that the already poorly equipped schools to which Title I (the nation’s greatest scale education effort to fund and assist 95 percent of the nation’s poorest schools) pertains would be ill-suited to handle the provision’s paperwork requirements. Consequently, some community leaders have taken notice and expressed concern that many students would be left waiting weeks in cafeterias and libraries before they would be able to attend classes.

Republicans, especially members of the House Committee on Education and the Workforce, might support the provision, but NCLR is not alone in reaction. The Mexican American Legal Defense and Education (MALDEF), the National Association for Bilingual Education (NAELE), the Leadership Council on Civil Rights have all announced their intent to fight for changes when the bill reaches the Senate. These organizations will have the support of longtime civil rights attorney Bill Tanner, who said working on civil rights issues in 1954 with Thurgood Marshall, and today serves as vice chair of the Leadership Council on Civil Rights.

“The process I’ve convicted, as it is set will take weeks,” said Tanner. “The question is why educators who in their judgment the child needs certain services should need parental consent. Could you imagine the school system would operate if it had to get consent from parents before it began to implement each part of the curriculum?”

“The school district would have to through a process of seeking parental consent before it can offer the services,” said Tanner. “If after a period of time, it is unable to achieve parental consent, didn’t have an answer one way or another, it could offer the services—but it would have to jump through a variety of hoops.”

Victor Clark, education policy coordinator for the Republican members of Education and Workforce Committee, believes otherwise. According to Clark, legislation ensures that students would time to receive services from the first day of school and that the issue comes down to whether or not people have faith in their individual school systems.

“The fundamental reason for us putting this provision in the law is to make sure that parents and school officials are working in the interests of the children,” said Clark. “We do require schools to make good faith effort to obtain consent, and if that turns into a proctor process, we do allow for instruction of a child to commence. It is an accommodation of the lack of faith in the school system.

“We believe that schools will figure out a way to implement this law that the children receive,” added Clark. “Yes, we realize it will require change the way they do business a little bit, but we think it’s worth it.”
Another problem critics cite is that the provision fails to specify time frames. Gonzalez believes that deadlines, not faith, will move schools to achieve results.

"It has two effects. The first is that it'll prohibit schools from serving these kids for an unspecified period of time," said Gonzalez. "It doesn't specify in the bill when this consent process has to begin. And because of that, schools that in the past have not relished the idea of serving students with LEP will be allowed to delay the process indefinitely."

According to the bill, if a school does not receive the consent form from parents, it must send a notification letter to the parents stating that an assessment of the child was made showing that Title I services are in order and that the school intends to provide those services. However, schools cannot begin to provide those services until 10 days after they provide that notification. In the best-case scenario, contends Gonzalez, kids will miss at least 10 days of classes.

"We don't know how long this process would take," said Gonzalez, because it's not in place currently. "These are parents that traditionally have not been welcomed in the schools, and also these are parents who are less likely to be involved with the school's parental involvement efforts."

"This provision does nothing to encourage parents to become more involved in the schools," added Gonzalez. "Having one single group of parents go through this red tape would most likely discourage them from becoming involved. Even if the forms of consent are language-appropriate, the fact that they have to complete paperwork that no one else has to do just to get their kids in class is burdensome to these parents. It sends a signal to them that we don't want you or your kids in our school."

Clatt defends the provision, arguing that its purpose is to ensure that parents have an opportunity for input into the type of education their children receive.

"Bilingual education is very controversial in a number of places around the country, and a lot of parents have felt that their children have been put into certain types of bilingual education classes that aren't serving their children well," said Clatt.

As an example of an instance where the consent provision would have made a difference, Clatt described testimony during the hearings that told of a child being placed in a language immersion program for Chinese because the child had a last name that sounded Chinese.

"The child didn't speak Chinese, wasn't Chinese, but nonetheless the school assigned him to a Chinese class," said Clatt. "In Arizona, there have been issues where parents were not happy with the type of bilingual class that their child was placed in. They [those opposed to the provision] either have some problems with parents having input into the process, or they don't think schools could do it, which is an indictment of the school systems."

Gonzalez criticizes opponents of bilingual education who believe that students are being inappropriately placed in bilingual education and have, he contends, created a bureaucratic process to insure that such mistakes cannot happen.

"A better way to achieve that, however, is to assess their language skill and include teachers and parents in the placement process," said Gonzalez.

To Clatt, it's a question of parents taking a short amount of time to review their options and making a choice. "All we have done here is ensure that they have some input into the process," he said. "It ensures that their civil rights and educational needs are taken into account."

Although Tanner and most leaders in the Hispanic community praise the work of Republicans on most other parts of the legislation, he suspects there are other reasons why the GOP leadership is supporting the provision. "I think that there are people who fly under the banner of English-only who believe that some school systems are implementing bilingual policies to delay the acquisition of English," said Tanner. "They think that by requiring that parents give their okay, they will begin to get rid of some of these bilingual systems. I think that it is the school system's responsibility to determine the mechanism and the educational program that will be most useful for advancing the education of kids with limited English proficiency."

Even critics agree, however, that the greater purpose of closing the achievement gap between students in economically depressed areas and students in more affluent districts is admirable.

Under this bill, state schools and school districts would be held accountable for improving the academic achievements of Hispanics and other students by setting specific performance benchmarks. Students from backgrounds would have to make adequate yearly progress as measured by standardized tests. The bill plans to succeed in improving academic performance where others have failed by breaking students down into categories of race, economic status, language minority status, gender, disability, and migrant status so as to leave no group neglected.

"States, school districts, and schools would then be held accountable for insuring that all children have made substantial academic progress. Their data would be reported to the U.S. Department of Education so that the federal government can have a better idea of how various sub-populations are performing in individual states," added Clatt.

In addition, the bill allows states and school districts to take collective action in school districts and schools that are not helping kids make adequate academic progress. States will look at school districts critically, and school districts will look at schools to make sure that no children are left behind.

"What they're trying to achieve with this legislation is to redefine what successful school is and to insure that in that definition all kids receive the attention they need to make these academic gains," said Clatt.

"They haven't begun to debate yet," added Tanners. "It's not over by a means. I'm hopeful there will be significant changes in the bill in the Senate. The Senate is expected to begin consideration of its own bill in early 2000. It will start from current law and look critically at some of the provisions in HR 2, particularly the provisions that would hold schools accountable for student achievement."
Is Higher Education for Latinos Just a

American and George Washington University Programs Improve the Odd

BY
KATHY THOMPSON

Left unchecked and untreated, the gap between the educated and undereducated will continue to spread, leaving millions of Latinos dangerously behind their peers, and relegated to menial jobs as unskilled labor.

From the antiquated archives of a university library, found in the book *Mexican Americans in School: A History of Educational Neglect* (1970), under the subheading “Intellectual Capacity” appear the following words:

Lower innate intelligence is generally no longer ascribed to Mexican-American children. Although IQ scores may be low, most schoolmen explain this phenomenon in terms of environmental factors, or the inadequacy of available psychometric instruments, or both. Nevertheless, the long history of belief in genetically determined lower intelligence still finds adherents. As one California principal stated, “Given time and library resources, it would be possible to make a strong case that racially these people are inferior.”

 Blow the dust off this misconception of Hispanic Americans, and one can see clearly the academic acracy that the Latino community has had to endure—and overcome—in the last decades. The question we must ask now is whether this archaic mentality has really changed that much over the years, and whether advancement of Latinos in our society is still held hostage to this type of mindset.

Oh sure, this Neanderthal school principal would probably lose his job (at the least) for making the same statement today (his words of wisdom were published in 1970—nearly 30 years ago). But, speaking frankly, is this mindset still alive today—just unspoken? Whether conscious or subconscious, one must face the harsh reality that in many areas it is still alive, and it is going to take some deliberate action on the part of the Latino community, as well as school administrators, educators, counselors, and parents, to change it.

If it wasn’t important to overcome this mentality before, it is imperative to do so now. According to a recent U.S. census, less than ten percent of Latinos hold a college degree. And, although most sources would say that access to higher education is increasing for the Hispanic population, the gap between those with a degree and those without seems to be widening at an alarming rate.

With the Hispanic population growing almost four times faster than that of any other group, by 2005, Hispanics are expected to surpass African Americans as the largest minority group in the United States. It is crucial at this point that educators take stock of any hidden biases and reconcile them to reality immediately. There is a tremendous negative economic implication of this situation. There is a tremendous loss of potential workers, and with thousands of undereducated workers with abilities to move up.

Already, in the Washington, D.C. vicinity alone, the Hispanic population has passed even the White “majority” in some areas, according to a *Washington Post* article published on Nov. 2, 1999.

In the city of Alexandria, Virginia, a close suburb Washington, D.C., 24.7 percent of the student body is Hispanic, a 22.6 percent is non-Hispanic White. African Americans still hold a majority in that school district, 46.5 percent. Hispanics also outnumber Whites in D.C. schools.

Despite the staggering increase in their population, Hispanics still tend to be woefully underrepresented on school boards, in school administration, and in classrooms. According to the *Post* article, only one Alexandria nine school board members is Hispanic. None is African American. All nine seats on the boa
(From Educating a New Majority, Rendon, Hope and Associates, 1991)

Percent Master's Degrees, 1976 and 1986-87
(From Educating a New Majority, Rendon, Hope and Associates, 1991)

Percent Doctoral Degrees, 1977 and 1990
(From Educating a New Majority, Rendon, Hope and Associates, 1991)

School board representation is a crucial issue for the Hispanic cause. It is the school board that makes operational and curricular decisions for a school system. It is here that board members must provide funding for educational resources geared toward helping Latino students meet reasonable academic standards. It is here that the decision regarding the availability of bilingual education and extracurricular tutorial resources is made.

Boards must be sensitive to the demographic trends facing their vicinity and be prepared to act accordingly with regard to curricular changes or enhancements to aid students falling behind because of language barriers or cultural nuances.

A recent U.S. census reported that fewer than ten percent of Latinos over 20 have college degrees. And, by all reports, this education gap seems to be widening faster than the population is growing.

"Almost 60 percent of jobs today require college-level skills," says Anthony Carnevale, co-author of the Hispanic Association of Colleges and Universities/Educational Testing Service (HACU/ETS) study, Education = Success: Empowering Hispanic Youth and Adults. "The tremendous growth of the Latino population has not been accompanied by a corresponding growth in academic achievement. To rely on a steady-as-she-goes policy would be to perpetuate the status of too many Hispanics—who already face language and cultural obstacles—as second-class citizens."

The Education = Success study released the startling statistic that only 55 percent of Hispanic eighth graders expect to obtain college degrees. According to Carnevale, "We have encouraged the least advantaged Hispanics to expect less of themselves and for themselves."

If we don't implement drastic remedies, "too many of the nation's fastest growing population will be left jammed shoulder-to-shoulder in the day-labor hiring halls and minimum-wage jobs at the lower rungs of the economic ladder," said Carnevale.

Experts say that, in addition to the system's inability to keep pace with the population growth, many Latino students lack the resources and parental encouragement needed to succeed in school. They are left to the status quo, which, for many, is barely meeting basic educational standards.

Left unchecked and untreated, the gap between the educated and undereducated will continue to spread, leaving millions of Latinos dangerously behind their peers and relegated to menial jobs as unskilled labor.

THE ISSUES

Low Self-Esteem

Many Latino students feel insecure with their language skills. Like any child or adolescent, they are afraid of being different. When the teacher calls on them, they are hesitant to speak up for fear of being laughed at by their classmates.

"A Hispanic student may not want to speak out in class because they don't see anyone else like them," says Morris Jackson, community programs officer at American University. "They have feelings of inferiority and are self-conscious about their language skills and are embarrassed about their accent."

Poor Language Skills

In addition, children—who especially those in the lower elementary grades—really might be unable to understand the teacher. If children hear nothing but Spanish in the home, they might have picked up only limited English from playmates and might have no reading comprehension or writing skills whatsoever. Placed in a classroom with children who have spoken English since toddlerhood and whose parents have read bedtime stories and taught the alphabet for several years prior to their entrance into kindergarten, Latino children have a hard time competing and might start their educational career behind the game.

Lack of Resources

I was raised in an upper-middle-class home in an American suburb. My brother and I, the younger two of four children, were the classic underachievers. We skat-
ed through our school day looking out the classroom window and dreaming of skateboarding and building forts in the woods.

Because we didn't listen in class, we were both tagged as needing "extra help," he in reading and I in math. When informed of our academic weaknesses, our parents sprang to action—Kenny got "Hooked on Phonics" records, and I got multiplication tables set to music. Kenny overcame his reading problem and is a successful pastor who reads voraciously and writes with flair. I made it through all the required mathematics courses to meet high school and college graduation requirements. No, I don't love math, but I was provided with the resources that I needed to succeed.

Unfortunately, this scenario does not play out so easily amongst the Latino population in America. Many children are the first generation in their family to speak English. Many have parents who completed no higher than an eighth grade education.

Because parents are frequently working in blue-collar professions and providing for large families on limited incomes, it is not so easy to just run out to "Zany Brainy" and buy the latest computer games, tutorial, and other helps to give their children the extra boost they need to succeed.

If the parents' English language skills are mediocre or poor, teachers might be unable to communicate the message that the child is in trouble to begin with.

Unfair Comparisons Based on Test Results

According to Tensie Cadenas, director of the Early Identification Program at George Mason University, the testing system is unfair on its face.

"Many Latino students come with limited education. They are put in a classroom with students from middle-class, American backgrounds and then are tested and compared with them. Some teachers have not been trained to cope with the discrepancy in educational background, so they compensate by lightening the load for Latinos, who then respond by slacking off. In some cases, they do the minimum of what is expected of them," Cadenas says. "They are, therefore, unprepared for the realities of college life."

"Students need to feel like they belong in the schools," Cadenas says. "They need to feel that teachers have the same expectations for them as they do for other students. They need to feel that teachers care."

Families Might Be Unconvinced of the Benefit of a College Education

In addition, there are deeply ingrained cultural barriers to Latino students' pursuit of higher education that must be overcome.

"There's a very close-knit family structure," says Marquita Lightfoot, associate director of undergraduate admissions at American University. "Young women are not necessarily expected to go out and become educated and intellectual. They are expected to stay close to the family."

"Several years ago, there was a young woman at AU who was clearly capable, clearly bright. She finally ended up dropping out of college because her family expected her to contribute to the family income," Lightfoot says.

Tensie Cadenas believes that Hispanic parents do want the best for their children in the long term, however.

"They come from a culture where often education is not as much of a priority. To overcome this mentality, you just explain to the parents the need for higher education, and they will usually support you. Explain the economic implications, and they will understand the need to prepare girls for school."

"You clean houses," Cadenas will tell them, "and that's good. Somebody needs to do that. But do you want your child equipped only to clean houses, or do you want her to have other options? They always say, 'I want my child to have options.' You just explain that they have a marketable skill they will be in the same situation for the rest of their life."

Percent of High School Graduates (Age 18-24) Enrolled in College

Distributions of Entering Freshmen in 4-year Institutions by Race
The Time to Fix the Problem Is Now!

So what's the next step? How can we overcome the obstacles in order to adequately prepare the next generation of Latino young people to face the challenges of the 21st century?

According to Antonio Flores, president of the Hispanic Association of Colleges and Universities, it is possible to close the educational gap for Latino students. If we are able to increase Hispanic college attendance rates by 10 percent by 2015, the gap will disappear.

The question is, however, how to add Latino students to the rolls of American colleges and universities.

It's critical to have clear and regular conversations, such as the one Tensie Cadenas outlines above, with parents of students from early childhood education through middle school and high school. This can help to convince Latino parents of the pressing need to open the way for their children to receive the best education possible for as many years as possible.

Programs geared toward informing the Latino community of the educational opportunities that exist for them are also important.

The HOSTS Program

Creating mentoring programs, such as the HOSTS program being tested in the Dallas area, is one means of identifying problem areas for students in the early grades. Here, educators use a thorough testing system to determine a child's reading and interest level and learning style. The information is put into a database that provides a visual picture of a given child's areas of weakness, and a tutoring/mentoring relationship is established based on that specific child's educational needs.

Early Identification Program

Programs such as George Mason University's Early Identification Program (EIP) target primarily Latino high school students who are capable but, for whatever reason, are not living up to their academic potential. High school counselors or teachers recommend specific students for the program, and students apply for admission. EIP is a multi-year college preparatory program in which students participate in cultural events, attend tutoring sessions with university students, faculty and staff, and participate in a camp to acquire leadership skills. Upon successful completion of the program, participants are guaranteed admission to George Mason University.

¡Alcance!: Opportunities through Higher Education

For several years, American University has hosted a one-day college fair for several thousand Latino high school students who don't have the resources to make the usual rounds of college visits. ¿Alcance!, they have the chance to meet recruiters from 55 colleges, such as American University, College of William and Mary, University of Maryland, Virginia Military Institute, Stanford University, and Yale University, and to talk with financial aid experts to help plan their educational futures. At least six of the universities represented have established scholarships, between $1,000 and $10,000, to be awarded to particular students who attend ¿Alcance! and have applied.

English Language Institute

Students who wish to attend American University but whose language skills are not at an adequate level are given the opportunity to participate in the English Language Institute. Here, students attend language classes and may take other non-credit courses, and then, when their language skills have risen to an acceptable level, they may enroll in a degree program.

Regardless of what we do to include the Latino community in the mix of those who receive higher educational opportunities, we must do something.

As Antonio Flores said in "Closing the Opportunity Gap" (The Voice, November 1999), "We already know from our history how costly the alternatives can prove when we choose discrimination and ignorance over inclusion and enlightenment."

We must extend the opportunity for educational betterment to all of America's citizens. Not only will it improve the outlook of one of America's fastest growing demographic groups, but also it will improve the entire makeup of the American economy and society.

Kathy Thompson, a graduate of American University's School of Communication, is a member of the Media Relations staff at AU.

Correction

The innovative transitional English program created by John Lihani, Emeritus University of Kentucky, as described in Hispanic Outlook 12/5/99 issue is accessible at:

Making Paradise a Little Better for Hispanic

La leyenda de las tres Latinas

BY DANNY MORENO

Once upon a time, in a galaxy far, far away (better known as the University of Hawai‘i at Manoa), there lived tres Latinas (two of them Chicanas) who wondered why the land of paradise was shutting its doors to the disenfranchised. They asked themselves why there was “very little interaction between the Hispanic community and the community at large,” and why the needs of the Hispanic community were not being met. Las tres Latinas sought guidance from the all-powerful, all-knowing, and ever-wise guru of paradise land, Larry Foster, dean of the William S. Richardson School of Law. He cautioned that many had tried to make a difference in the lives of Hispanics but few ever returned from their journey to the outer edges. No, he did not suspect foul play; for the wise one knew that these earlier pseudo-rangers, equipped with cell phones and heavily padded resumes, were forever lost in the corporate Black Hole, never to be seen or heard from again.

Rosa M. Hernández, Liz A. Robinson, and Anne E. López, co-founders of the Honolulu Hispanic Law Students Association, have no intention of becoming another Black Hole statistic. These three activists do not believe in the furry little Taco Bell fairy with the whiskers and wet nose, but they do believe in promoting diversity and striving for academic excellence. They are “committed not only to establishing an Hispanic presence at the law school” but also to “educating all law students concerning the Hispanic culture and its influence on the legal profession.” All three are members of the Law Review program at the University of Hawai‘i. Interestingly, Rosa is an editor on the Pacific Asian Legal Studies Journal.

Do not attempt to tell Rosa, Liz, or Anne that their goal of achieving true diversity and equal representation on the islands cannot be achieved, because they will look you straight in the eye and tell you with burning conviction que “Si se puede.” And if you dare to stop them from completing their quest, you will end up in traction at the nearby Queen’s Medical Center, for they are as formidable as a Mack truck and as tenacious as bulldogs (but with a smile, of course).

It all started when the immediate-past HNBA/LSD Region-Y president, Danny Moreno, telephoned Rosa at her home in Hawai‘i during the Summer of 1998. He was shocked (well, not really) that there were only two Latina law students, and he encouraged Rosa to start an HNBA/LSD affiliate chapter in Hawai‘i. Rosa admits that soon thereafter, he “dismissed the idea as too far-fetched.” Where in the land of paradise was she going to find more Hispanic law students? She would have better luck finding a T. Rex sipping on a pineapple daiquiri on the veranda of the Ala Moana Hotel. But, as I would have it (is there really such a thing as luck?) Rosa came in contact with Liz, the other Latina law student. After a bit of investigation, the pair soon realized there was a trio of unknown Hispanic law students. I searched the campus until they came face to face with Anne López, and asked her, “Are the other Latina we have been sent to look for?” She smiled. Thus began la leyenda de las Latinas (The legend of the three Latinas).

Rosa M. Hernández, president, HLSA, attended California State University-Fresno, where she earned a B.A. in Journalism-Public Relations. She went on to obtain her M.A. in Rehabilitation Counseling, completing the initial part of her studies at CSU-Fresno, and completing the rest at the University of Hawai‘i at Manoa. Her education and training in assessing rehabilitative needs...
plans for an insurance company primed her for her role as president of HLSA. The experience that she gained from participating in settlement negotiations and dispute resolutions has given her the skills and patience to meet the challenges of running a successful and dynamic organization in today's highly competitive world.

At first, Rosa was undecided about what to call the group. She wanted the group to stand out and considered such catchy acronyms as MAPS (Minority Association of Progressive Students), PALS (Progressive Alliance of Law Students), and SALSA (Society of American Law Students). However, in the end, she opted for HLSA. The group found an advisor in the early part of 1999. They were recognized by their school's SBA, and held their first open meeting on February 25, 1999.

With some guidance from Michele M. Castillo—immediate-past SBA president (1998-99), Thomas Jefferson School of Law, vated the ABA/LSD's "SBA President of the Year," ABA/LSD lieutenant governor, Women in Law (and the list goes on...)

—Rosa was able to generate interest in her new organization and the HNB/A/LSD. As part of Michele's L. governor and SBA duties, she flew down to Hawaii during March '99 for the ABA/LSD spring conference. While there, she met with Rosa and the HLSA's advisors. Michele spoke on the virtues of joining the HNB/A/LSD, the annual HNB conference, and the HNB/LSD Moot Court Competition. Rosa went on to corral some more support from her classmates and faculty. Rosa says that "there was not much interest at first because the campus was already inundated with other minority student organizations." Then, quietly, little by little, she began to notice a change in attitudes towards the fledgling organization. Students and faculty began to take notice. Of course, Rosa had lots of help from the other two co-founders.

Liz A. Robinson, treasurer. HLSA, is no stranger to hard work. She has committed herself to academic excellence. Liz, originally from Whittier, Calif, earned her B.A. in international relations with a minor in business administration and geography, from California State University-Chico. Last year, she clerked for the Honorable Gail C. Nakatani. As a result of her academic achievements, Liz was offered a highly coveted legal research T.A. [teaching assistantship] position last semester. Currently, Liz is on the school's moot court team. And if that isn't impressive enough, Liz was elected the executive and research editor for Law Review in 2000-01. Liz says that her duties will entail "keeping track of deadlines and making sure everyone is on schedule."

For now, Liz looks forward to participating in the 5th Annual HNB/LSG-sponsored Moot Court Competition at Georgetown University, scheduled for March 18-19, 2000. She hopes to utilize her "Best Oralist" skills from appellate advocacy to give the U of H team the winning edge in Washington, D.C. No doubt her diverse educational background has influenced her life goals. Liz has two daughters, six-year-old Madeleine and two-year-old Stephanie. She's interested in diversity education in the elementary schools. "I would like to be involved in the local school board someday," says Liz. What does Liz think about living in Hawaii? She says, "I miss my grandmother's frijoles."

Anne E. López studied at San José State University, San José, Calif. Her B.S. degree in occupational therapy has put her in touch with the unfortunate victims of work-related injuries. She has evaluated and analyzed workplace safety issues and designed and implemented individualized return-to-work programs for injured workers. Anne is proud of the fact that she is ranked 11th in her class. She, like Liz, was also "Best Oralist" in her section of appellate advocacy. Anne is a staff member of Law Review and was elected editor-in-chief of Law Review for the year 2000-01. Although Anne is not competing in this year's HNB/LSG Moot Court Competition, she is lending her expertise by serving as the "team coordinator," scheduling practices and generally cracking the whip.

According to Rosa, "Anne was the catalyst that solidified our organization. Anne made wonderful suggestions at a time when we were just starting out, and she helped us gain the support of the faculty." It was Anne who formulated the HLSA constitution. A key element of their constitution clearly states that the group's objectives are "to instill upon law students the importance of giving back to the Hispanic community by establishing relationships with Hispanic communities and leaders." Another important feature is the group's realization of the importance of "establishing organizational continuity" to insure that the fight continues even after they graduate.

Anne also put together a proposal for funding in order that the group would be able to participate in the HNB/LSG Moot Court Competition in March '00. So persuasive was the proposal that the SEED Foundation (Student Equity, Excellence, and Diversity) awarded HLSA $3,000 to assist with the travel-related expenses of attending the event. As for now, Anne says that "this is an opportunity to serve, educate, and touch the lives of the Hispanic community within the University of Hawaii."

The stage has been set for an action-packed Moot Court Competition in D.C. With money in hand, and jet fuel in their blood, Rosa Hernández, Liz Robinson, and Colette L. Honda (the third member of the moot court team) intend to bring next year's HNB/LSG Moot Court Competition to Honolulu. No doubt, this turbo-charged trio is destined for success. Incidentally...
one of the other schools competing in Washington, D.C., is Thomas Jefferson School of Law. The team from TJSL consists of José Arnoldo García, Alicia Z. Aguirre, and Danny Moreno.

Colette Honda speaks Spanish and plans to one day travel to Barcelona, Spain. Colette says, “The Hispanic team appealed to me because of my interest in travel and other countries, and also from my interest in the Hispanic culture and language.” Her list of accomplishments is impressive. Colette is a dual-degree candidate at the U of H. She is working towards her M.A. in history, with an anticipated completion date of December 2000. Politics is in her blood—Colette is the SBA Secretary and ABA/LSD vice chair at her school. All good politicians must know their history. And if that isn’t enough to keep her occupied, Colette is the quarterback for her law school women’s flag football team. People often compare her quarterback skills with those of Dan Marino of the Miami Dolphins (well, that might be stretching it a little). Let’s just say that she’s good—she’s been quarterbacking for her team at the Pie Bowl (students vs. alumni) since 1998. Colette is also an environmentalist and a member of the Hawai‘i Business Jaycees. “I’ve been an active member of HILSA since last year and have been involved in all the activities,” including, says Colette, the Surf Taco fundraiser.

Rosa is proud of the fact that HILSA has been in existence now for one year. According to Rosa, “the HILSA is the only Hispanic student organization in the University of Hawai‘i-Manoa system.” Issues such as labor, immigration, biculturalism, and bilingual education are just a few of the many projects on their “TO DO” list this semester. Planning and organizing events is challenging enough even for the most experienced leaders, but fundraising is a different animal altogether. Unlike many law schools, the U of H provides little or no funding for its moot court participants, especially if they are not part of the school’s designated moot court teams. What to do?

Rosa, Liz, and Anne hit upon an idea that resulted in a $700 windfall. They invited the owner of Sufi Taco (a local restaurant) to “come out to the campus to sell their burritos and tacos.” The proceeds were to go to HILSA. In a short 3-hour period, Sufi Taco sold over $600 worth of tacos and burritos, with $700 going to HILSA. Word of their success spread like wildfire through the lush campus after a local television station featured the three in a promo ad for the Rainbow Wahine Basketball team (U of H women’s basketball). Liz says, “The camera crew went around the campus and got different groups of students to yell ‘We’re #1!’ We had no idea what we were getting into when they filmed us on ‘Surf Tri-Days.’” The commercials have been running since November ’99, and the three have become instant local celebrities. The rest is HERstory.

Para las tres Latinas, and Colette, congratulations y buena suerte. Your commitment and dedication offer reassurance that the impossible dream is not just a dream, and that it’s okay to reach for the stars. The most important step is the first. Remember, you’ll never get sucked into a black hole if you keep your feet firmly planted in the community; your anchor to reality.

Author Danny Moreno is SBA president Thomas Jefferson School of Law in San Diego, Calif, and will complete his legal studies December 2000.
Castro and Zencic Work on U.N. Forum

St. Francis College (N.Y.) students Gilbert Castro (pictured) and Ines Zencic are helping to organize the Fall 2000 Millennium Forum at the United Nations, working with Yassia El-Ayouty, St. Francis College professor in the department of international cultural studies.

The forum's theme is "The UN for the 21st Century." Topics include peace, security and disarmament, human rights, poverty eradication, environment and sustainable development, globalization, equality, justice and diversity, and strengthening the UN.

As interns, Castor and Zencic will help with government liaisons, conference planning, and coordination of millennium events.

Garden City Community Honors Gonzales

Garden City Community College (GCCC) in Kansas sponsored an event honoring the life and career of longtime Garden City resident Lydia Gonzales.

Gonzales has organized voter registration efforts, sponsored GCCC's chapter of the Hispanic American Leadership Organization, worked to obtain scholarships and support for young Hispanic men and women, and created GCCC's annual Hispanic Student Day.

Among many honors, she was named Garden City Business and Professional Woman of the Year, earned the Outstanding Service Award of the Kansas Advisory Council for Vocational Education, was named GI Forum Woman of the Year, and was named a role model for all generations by earning a 1997 Buena Gente Hispanic Leadership Summit Award.

Nationally, Gonzales has met President Clinton, earned a Lifetime Achievement Award from the U.S. Hispanic Leadership Conference, and was inducted into the National Women's Hall of Fame by the League for United Latin American Citizens.

Contreras Lectures at Western Washington

Using natural herbs to meet the medical needs of Mexico's indigenous peoples, Doña Enriqueta Contreras has served as a Zapoteca curandera (traditional healer) and midwife for more than 40 years and is said to possess a unique and powerful gift of healing.

She traveled from the Sierra Juarez mountains of Oaxaca in Mexico to Bellingham, Wash., where she lectured in January at Western Washington University. Together with Larry Estrada, professor and director of American cultural studies at Western, Contreras discussed social, ethical, and political conditions presently impacting curanderas in the Sierra Juarez. They talked about the recent organizational efforts by these women to seek support and status from the modern medical community and the Mexican government. Contreras also conducted a seminar on the use of herbal, medicinal plants and her work as a midwife.

Sánchez Translates at Australian Snake Venom Laboratories

When Juan Velez, a businessman from the Foundation of Investigation and Intellectual Development in Colombia, wanted to conduct research on venom of South American snakes and involve people worldwide, he asked Elida E. Sánchez, Texas A&M University-Kingsville's Natural Toxins Research Initiative laboratory director, to translate for him in Australia.

Sánchez met Velez in Los Angeles, flew to Thailand for a week to attend the fifth Asia-Pacific Congress on Animal, Plant and Microbial Toxins, then to Australia for another week with Velez and Peter Mirtschin, a venom supplier from South Australia. Velez selected Sánchez because of her knowledge of venom research and fluency in Spanish. She has a master's degree from Texas A&M-Kingsville.

Rutgers Exhibits Sánchez Photos

The Mason Gross galleries at Rutgers University (N.J.) exhibited "Printed Convictions," drawings and related works by Juan Sánchez, nationally known Latino artist and alumnus of Rutgers' Mason Gross School of the Arts. Sánchez talked about his works during a discussion led by Alejandro Anreus, chief curator of the Jersey City Museum.

"Once We Were Warriors" (picted), a new Sánchez print published by the Rutgers Center for Innovative Print and Paper (RCIPP) and Rutgers' Center for Latino Arts and Culture, with support from the National Endowment for the Arts, was one of the featured works. "This print looks at how Puerto Ricans must constantly work to preserve their own culture in the face of the overwhelming influences of the United States," said Judith Brodsky, founder and director of RCIPP.

Sánchez, an associate professor at Hunter College, earned his master's degree at Rutgers.

Sánchez Chairs Foundation Board

Phillip V. Sánchez, vice president of News World Communications, Inc., which publishes Noticias del Mundo, a New York-area Spanish-language daily, and Tiempo del...
Mundo, a Spanish-language weekly published in Latin America, is the new chair of the board of the Educational Foundation of the Americas. He succeeds the late Dr. Burton Grossman, Mexican banker, industrialist, and philanthropist.

The foundation has helped to develop universities in Mexico and is now assisting a group of schools in Mexico City, specializing in bilingual computer, mathematics, and science education for children.

Sánchez is chair of the boards of the National Hispanic University (Calif.) and the Good Life Television Network in Washington, D.C., and a trustee of the University of Bridgeport (Conn.).

Castillo Chairs Texas Council

Dr. Max Castillo, president of the University of Houston-Downtown, is new chair of the Council of Public University Presidents and Chancellors (CPUPC).

Castillo has been a Council member for seven years and is a former vice chair.

The CPUPC provides a forum for discussing needs and concerns of the public universities of Texas and encourages inter-institutional cooperation. The Council is composed of presidents and chancellors of Texas' 49 publicly supported general academic universities, system offices, and health-related institutions.

Montero Strengthens Student Affairs at Brown

Janina Montero, known for her work at improving communications among diverse groups, is now an advocate for students and their range of out-of-the-classroom needs at Brown University (R.I.).

In January, Montero, the former dean of student life at Princeton University, became vice president for campus life and student services at Brown.

She reports directly to the president and is responsible for the department of athletics and physical education, office of student life, office of residential life, food services, chaplains office, Third World Center, and Sarah Doyle Women's Center. In July, she will oversee the admissions office and the office of financial aid.

Montero has a bachelor's degree, master's, and doctorate from the University of Pennsylvania.

Sklar Dean of Academic Affairs at L.A. City College

Dr. Martha Sklar is now dean of academic affairs at Los Angeles City College (LACC). Interim dean since 1998, in that position she supervised the media and performing arts, departments, library, and community service program. She also oversaw a number of job-training programs and major federal grants.

Sklar is a member of the Association of California Community College Administrators, the National Council of Teachers of Mathematics, and the California Community Colleges Association of Occupational Educators.

The Cuban-born Sklar, a mathematics professor at LACC from 1976 to 1995, has a bachelor's degree from Roosevelt University and a master's and doctorate from Northwestern University.

Esteban in Fresno City Program

Carina Esteban is serving until May as a trainee with Fresno City College's (Calif.) psychological services program, which is recognized by the APA with the highest level of accreditation available to agencies with pre- and postdoctoral internship programs in psychology.

A part-time social worker, Esteban, 23, is pursuing a doctorate at the California School of Professional Psychology (CSPP)-Fresno. She holds a bachelor's degree from Florida Internat University and will receive her master's CSPP-Fresno this summer.

Espinosa Awarded Fellowship

Eugenio Espinosa, assistant professor at State University of New York (St Rockland Community College, received a fellowship for a four-week artist's residency at the Vermont Studio Center. Cuban-born, Espinosa recently visited his native country and returned to Rockland to deliver a lecture and slide show, "Going Home Artist's Return to Cuba."

Irizarry Wins University of the Arts Award

Johnny Irizarry, University of the (Penn.) class of '83, received a 1999 Alumni Award.

Irizarry is program specialist for I studies of the school district of Philade helping shape programs and curric development on Puerto Rican, American, and Latino studies. In 1986, h named executive director of 1 PuertoRriqueño, a community-base organization that gained new acclaim his leadership. He received the Paul Ro Social Justice Award from the Brea Roses Community Fund, the Citizen Year Award from the annual Puerto Rico Week Festival, and a special Achievement der Zee Award from Brandywine Works among other honors.
Three Dog Night Star a Hancock Alum

Rock music star and former Allan Hancock College (Calif.) student Chuck Negron returned to his alma mater to sing before a standing-room-only audience. Negron, lead singer of the popular '70s group Three Dog Night, attended Hancock from 1960 to 1964.

Negron sang many Three Dog Night hits—"One," "An Old-fashioned Love Song," and "Joy to the World"—and performed selections from his new CD The Long Road Back. Between songs, he spoke about his time at Hancock. His recent book Three Dog Nightmare, a best-seller, includes a chapter about the college, titled "The Best Years of My Life."

Arizona State Honors Trujillo

Gary L. Trujillo, CEO, president, and chair of the board of Quepasa.com, received the Arizona State University College of Business Distinguished Achievement Award at the college's convocation Dec. 16. The award recognizes business alumni who have made significant contributions to their field, their community, and the college.

Quepasa.com, an Internet company, provides the rapidly growing U.S. Hispanic market with information and interactive content, in both Spanish and English. Earlier, Trujillo was president and founder of the Southwest Harvard Group, an asset management company, and a partner in the Corella Cable and Wire Company—the first company in the U.S. to receive an exclusive minority contract from AT&T to produce cable wire.

Costa Rican Official Speaks at Life University

Dr. Rogelio Pardo (pictured at 1 with Dr. Sid E. Williams), health minister of Costa Rica, addressed graduates of Life University (Ga.) in December. Life, known for its School of Chiropractic, awarded 445 degrees and certificates during its ceremonies for its Fall 1999 and Winter 2000 classes.

Pardo discussed the recent inclusion of the chiropractic profession in the Central American country as a "totally separate and distinct practice." He said he hoped it would serve as a model for other Central American countries.

Undergraduate honors for the Fall 1999 class went to Guenia Bravo, class valedictorian.

Navarro on National Board

Richard Navarro, dean of California State Polytechnic University-Pomona's School of Education and Integrative Studies since 1997, recently joined the board of directors of the National Board of Professional Teaching Standards.

Navarro is a member of the Intersate New Teacher Assessment and Support Consortium's higher education advisory board. He spent 14 years in the department of teacher education at Michigan State University before coming to Cal Poly-Pomona. At Michigan State, he founded and directed the Julian Samora Research Institute, the first Latino policy research center in the Midwest.

Richard Santillian, Cal Poly-Pomona's interim vice president of academic affairs, said of Navarro, "His election to this board allows him the opportunity to support teachers and student education at a national level."

Mujica Keeps Thunderbirds in Air

An F-16 jetfighter flown by the U.S. Air Force Thunderbirds goes twice the speed of sound, pumps out 25,000 pounds of thrust, and maneuvers at 500 mph just 18 inches from the wingtip of the next plane.

Former Garden City Community College (Kan.) student Alonzo Mujica makes that possible. A skilled mechanic, his job is to assure that the unit's 10 single-engine Fighting Falcons perform properly every time they're flown. "It's a very serious business we do, and my schooling helped me become what I am right now," said Mujica.

Mujica believes young people need positive role models, and he hopes to be one at the classroom level. He often answers questions, explains propulsion concepts, and shows the aircraft to a wide variety of people, including children, at small town air shows. "My advice to anyone who wants to join the Air Force is to go to college first."

Flor Ada Wins Award for Latest Book

The University of San Francisco's (Calif.) Alma Flor Ada, professor of education and noted author of children's books in Spanish and English, won the Pura Belpre Author Award for Under the Royal Palms: A Childhood in Cuba (Athenaeum Books). The award honors Latino and Latina writers and illustrators whose works best portray, affirm, and celebrate the Latino cultural experience in children's books.

In a heartwarming and loving portrayal of her childhood days in Cuba, Ada describes her deep friendship with a beloved dance teacher. Readers meet relatives and share the tragedy of the loss of Ada's uncle. Photographs enhance the diary-like depiction of Ada's early years.

New Mexico Starts Internet Pilot

The University of New Mexico (UNM) has added a new lane to the information superhighway. Dr. Jeronimo Dominguez, vice provost of UNM's Extended University, said its new Internet Pilot Project began offering courses this semester.

Nine courses are offered—four in nursing, two in English, and one each in public administration, anthropology, and psychology. Some are for undergraduate credit, some for graduate credit, and some for both.

These courses "respond to the needs of New Mexico's rural communities and help on-campus students as well." "These courses allow students throughout New Mexico to complete the degree requirements without having to be on campus. This is a significant step in assisting students to complete degrees in order to obtain better jobs."
In the News at Rio Hondo

To celebrate students' completion of Rio Hondo College's (RHC's) short-term child care training program, the college joined forces with East Los Angeles College (ELAC) and Los Angeles County supervisor Gloria Molina for a day filled with job opportunities, testimonials, entertainment, and congratulations. RHC Superintendent/President Dr. Jesus "Jess" Carreon congratulated students alongside ELAC President Ernest Moreno and Molina. Students received pins to acknowledge their membership in the Southern California Association for the Education of Young Children.

David Segrist, an RHC trustee since 1993, said, "As board president, I want to increase the college's outreach to include preschool children through senior citizens. I want to look into establishing off-campus sites to serve these and all members of our community."

Miami-Dade Trains Refugees

More than 2,000 refugees are able to receive educational assistance and vocational training at Miami-Dade Community College (M-DCC) through a $45.5 million grant from the state of Florida Department of Children and Families Refugee Programs Administration. The program, Refugee/Entrant Vocational Education Services Training (REVEST), assists refugees of all nations, Cuban-Haitian entrants, and Amerasians. Eligible are those who have been in the U.S. for 60 months or less and lawfully permanent residents who were refugees prior to adjusting to permanent residency. Program participants may enroll in vocational English training, GED preparation, vocational skills training, employability seminars, and other programs. Applicants must apply in person at the REVEST office on M-DCC's Wolfson Campus in downtown Miami, 300 N.E. Second Ave., Building One, First Floor.

In the News at Trinity

"Ritmo de Pueblo: A Festival of Puerto Rican Music and Art," was held recently at Trinity College and other locations in Hartford, Connecticut. Valeriano Ramos Jr., Trinity's director of community service and civic engagement, said that the festival project celebrated Puerto Rican musical traditions and culture in ways that informed, educated, entertained, and engaged. It also promoted a greater appreciation of the community's culture and the many contributions Puerto Rican artists have made to it.

Trinity hosted Julio Pantoja's photographic exhibit, "Tucumán: The Children Twenty Years Later," in January. In the wake of a military repression in Argentina, anyone who spoke out against the military government was targeted for retaliation. Pantoja's exhibit featured portraits of the children of men and women from the province of Tucumán who "disappeared" during the military dictatorship. Photos of the children, who would now be in their late teens and early twenties, are frequently shown with photographs of their parents, who were the same age when they vanished.

A Pantoja photograph from the exhibit is shown here.

Austin Community Hosts Latino Literary and Arts Festival

Austin Community College (ACC) in Texas hosted its seventh annual Latino Literary and Arts Festival. Artists Arthur Sze, Ruben Martinez, and Hector Galán were the featured attractions.

Sze, known for his startling juxtaposition of images and ideas, shared some of his musical and visionary poetry. He recently released The Redshifting Web: Poems 1970-1998. Martinez, an Emmy Award-winning journalist, poet, and performer, is the author of The Other Side: Notes from the New L.A. Mexico City and Beyond.

New Mexico Tech Protects Endangered Species

Dr. Daniel H. López, president of the New Mexico Institute of Mining and Technology, said that a consortium of associated scientists successfully tested New Mexico Tech's patented non-toxic, all-natural chile-pepper-based repellent to help control the destructive impact of the rosy wolfshad (Euglandia rosea).

Rosy, a carnivorous snail native to the Southeastern United States, has caused the total extinction of several snail species and threatens the extinction of additional snail species in Hawaii and other islands in Pacific and Indian oceans.

Lorenzo Torres, an affiliate of New Mexico Tech, was instrumental in discovering and patenting the chile-based repellent.

GateWay Holds Financial Aid Week

To help students find ways to finance education, GateWay Community Co (Ariz.) offered workshops during its annual Financial Aid Awareness Week. Activities and advice were offered in the areas of financial aid, scholarships, federal work study, and money management.

GateWay student Lorey Ann Attanasio, an asthmatic training for a career in respiratory care, says she wanted for scholarships, she probably would not have stopped going to school. After taking the burden of student loans, she knew she had to be a better way. She started looking for work, searching around GateWay's campus for more than $30,000 in scholarships. On receiving a $1,000 Chela Scholarship, said, "It's all here, and I didn't have to go or do any research."

Chicagoland Students Receive North Park Scholarships

Two North Park University first-year students from the Chicagoland area in Illinois received Mustard Seed Scholarships as part of the university's commitment to supporting Chicagoland for outstanding African American and Native American students.

Ricardo Leiva (L) and Maritza Verduzco (R) qualified because they were in the top 15 percent of their high school class and had ACT composite scores of at least 24.0 and SAT scores of at least 1240.

Also receiving funds were returning students Monica L. Cotrell, Sherina N. Grah and Shari L. Hayden. Shanna C. Lee. Ric
Medina, Olivia Nodal, Ysenia Ramirez, and Chris L. Turner.

Texas Wesleyan Baseball Gala Features Palmeiro

Texas Wesleyan University's Baseball Extravaganza 2000 featured Major League Baseball All-Star Rafael Palmeiro. The event benefited the university's athletic programs.

Palmeiro, first baseman for the Texas Rangers, made his major leagues debut with the Chicago Cubs in 1986. The Sporting News Player of the Year, Texas Rangers Player of the Year, and American League Designated Hitter of the Year ranks among active leaders in hits, RBIs, and home runs, and is a four-time American League All-Star and two-time Rawlings Golden Glove award-winner as first baseman.

Palmeiro has been a spokesman for the Juvenile Diabetes Foundation's "Walk to Cure" program, where he pledged $100 for each home run he hit. He is also a spokesman and fundraiser for the Lena Pope Home, where he has helped raise $60,000 through his home run sponsorship, as well as working on foster home recruitment. Pictured (1 to r.): Palmeiro and Dave Yoskula, Texas Wesleyan University vice president for enrollment and student life.

NACME Alumni Excel

NACME Three recent National Action Council for Minorities in Engineering (NACME) Alumni Award winners spoke of how critical NACME's support was to them as undergraduates.

Justin Blount worked summers and arrived at Syracuse University for his sophomore year unable to pay his tuition; Tina M. Herrera's father, her financial and emotional anchor, was felled by illness while she was at Berkeley College, and Eric Adolphe recalled living in the basement at the City College of New York, on the verge of dropping out of the engineering program, until he learned about NACME.

Today Blount is a leading business consultant at DuPont. Herrera's research at NASA was part of the MIR Space Station project; and Adolphe is president and CEO of a $12 million telecommunications company, the OPTIMUS Corporation.

Texas A&M-Kingsville Touts Migrant Program

Representatives of Texas A&M University-Kingsville presented the College Assistance Migrant Program (CAMP) and the High School Equivalency Program (HEP) as examples of success at the 1999-2000 Texas Migrant Education Conference.

The event provided a forum for educators to share and enrich their knowledge of effective practices to help develop a collective vision of excellence in migrant education.

Texas A&M-Kingsville first-year student Wilfredo Puente (pictured), was honored as an Exemplary High School Graduate Migrant Student. Class valedictorian, he had the highest high school GPA of the seven students honored.

Consuelo Martinez, Texas A&M-Kingsville special programs director; Edgar Nandin, HEP assistant director; Yolanda Garcia, HEP counselor; Marcos Benavides, CAMP coordinator; and Martie De La Paz, CAMP recruiter/advisor, were in attendance.

Mt. Hood Community Creates Hispanic Post

Gayle Parker was named Hispanic Services Coordinator at Mt. Hood Community College (MHCC). The new position entails heading the El Futuro Abierto program and the Oregon Leadership Institute.

"This is exciting for me as a Hispanic woman..." Parker said. "The Latino population is the fastest growing minority group in this area, so we're serving the community through these efforts."

The college's Oregon Leadership Institute program, a cooperative effort with the Oregon Council for Hispanic Advancement, trains Latino college students, who then mentor local Latino high school students. The El Futuro Abierto program caters to Spanish-speaking women who want to take ESL classes at MHCC, providing child care and transportation in order to make the classes accessible.

"Dos Fronterisas" at Texas Woman's University

Sharon Warwick and Maria Teresa Garcia-Pedroche explored the borders of artistry with their show of mixed media creations, "Dos Fronterisas," at Texas Woman's University (TWU).

Garcia-Pedroche (pictured), associate curator at the Southern Methodist University Meadows Museum, showed artist-designed books, mixed media works, retablos (painted altar panels), paintings, and installations. An award-winning artist with a master's degree from TWU, she creates paintings and retablos from photographs, printed text, and found objects.

Warwick, a TWU visiting assistant professor in art education, who also has a master's from TWU, was in 1997 named National Middle School Art Educator of the Year.

35th Anniversary for Manhattan Community College

Borough of Manhattan Community College (BMCC) in New York is celebrating its 35th anniversary throughout the 1999-2000 academic year.

"While we have always honored our initial mission to provide education and training that can transform the lives of our students, the college has earned a reputation as an institution that, through innovation and creativity, keeps pace with the rapidly changing world around us," said BMCC president Antonio Pérez. Pictured (1 to r.): Pérez and Professor Lawrence Sner cut the anniversary cake as Professor Frank Navas looks on.
Houston-Clear Lake Signs Arts Agreement

The Universidad Veracruzana, Mexico, is part of a three-way collaboration in the arts with the University of Houston-Clear Lake (UHCL) in Texas and the Academy of Fine Arts and Design in Bratislava, Slovakia. The agreement between the universities includes faculty exchanges and art exhibits. Plans to extend the exchanges to include students are in the process.

NYU Hosts Debate on U.S. Blockade of Cuba

The Cuba Legal Studies Group (CLSG) at the New York University School of Law brought together legal scholars and public policy experts for an ongoing international debate about the legitimacy of the continuing United States embargo of Cuba. Panel participants addressed the latest developments in the 37-year-old embargo, specifically the Helms-Burton Act, which many international public law experts have criticized as a violation of the customary rules of international law.

CLSG is an educational, non-partisan student organization dedicated to the study of Cuban law and society. The group strives to create a forum for critical discussion and analysis of Cuba and U.S.-Cuba relations.

Female and Hispanic Enrollment up at Texas Health Science Center

More women are enrolled in the medical and dental schools of the University of Texas Health Science Center at San Antonio than ever before. The percentage of Hispanic students enrolled is up as well, from 18.93 percent last year to 19.57 percent, according to university statistics.

Of 824 students enrolled in the Medical School, nearly half, or 401, are women. Female enrollment is also up in the Dental School, where 150 of 399 students, and 11 of 57 postdoctoral students, are women.

NAICU Commends Clinton

According to the National Association of Independent Colleges and Universities (NAICU), President Clinton’s FY 2001 higher education budget proposal is very good news for America’s neediest and middle-class families struggling to make college a financial reality. David L. Warren, NAICU president, said that Clinton’s proposal represents a comprehensive and substantial investment in the nation’s students and the federal programs that millions of students rely on to attend college.

The proposal significantly boosts grant aid, increasing funding for the Pell Grant and Supplemental Education Opportunity Grant (SEOG) programs. Total funding for the Pell Grant program would increase by $716 million. By NAICU’s estimate, the number of SEOG recipients would expand by 100,000 students.

Laredo Community College Expanding Science Building

Members of the Leo G. Cigarroa family joined members of the Laredo Community College (LCC) family in announcing a $21 million federal grant that is expected to transform the lives of area students pursuing careers in math, science, engineering, and health-related fields.

“This is a historic moment for the city of Laredo and the college,” said college president Dr. Ramón H. Doválina (pictured), in announcing the U.S. DOE grant, which will support construction of a new 18,000-square-foot laboratory wing for the Leo G. Cigarroa Science Building, initially constructed in 1968 to honor Cigarroa, who served many years on the college board of trustees and was instrumental in the development of the campus.

After the Disciplines: The Emergence of Cultural Studies

Michael Peters, ed.

What are the underlying historical, epistemological, and political reasons for the emergence of cultural studies? To what extent does the emergence of cultural studies displace or dislocate traditional disciplines? What forms of resistance have cultural studies encountered and why? To what extent does the emergence of cultural studies reflect a changing mission of the university and changing relations between the university and the wider society? This book addresses these issues, and more.

Concerto Conversations

by Joseph Kerman

Leading critic and musicologist Joseph Kerman examines how a wide range of composers have handled the balance and contrast between soloist and orchestra by looking at the soloist's entry in the music and the role of virtuoso passages. Comes with a companion CD, which contains works discussed in the book.

Diary of a Guerilla

by Ramón "Tianguis" Pérez

In its most literal sense, this book is a simple self-portrait of a naïve, idealistic Mexican teenager drawn into armed rebellion against the national government out of love for his homeland. This is not the urban world of Mexico City but the campo of Mexico, where Spanish is a second language, native Indian languages predominated, and hired gunmen settled land disputes.

Translated by Dick J. Reavis

Realismo mágico y primitivismo: Rerelecturas de Carpentier, Asturias, Rulfo y García Márquez.

(Spanish)
by Erik Canayd-Freixas

This study brings together, for the first time, the concepts of magic realism and primitivism in the readings of the key works of the Hispanic narrative: Alejo Carpentier, Miguel Ángel Asturias, Juan Rulfo, and Gabriel García Márquez, among others.

Technology and Competitiveness in Mexico: An Industrial Perspective

by Thomas J. Botzman

Mexico is looking for ways to successfully make the transformation from Third World to First World economic status. This book is geared primarily towards industry practitioners looking for a greater understanding of Mexican industrial technology, with a goal of implementing strategies that will succeed as the economic system changes.

CrashBoomLove: A Novel in Verse

by Juan Felipe Herrera

In this novel in verse—said to be unprecedented in Chicano literature—poet Juan Felipe Herrera illuminates the soul of a generation. Drawn from his own life as well as a lifetime of dedication to young people, this book helps readers understand what it is to be a teen, a migrant worker, and a boy wanting to be a boy.

America's Top Jobs® for College Graduates. 3rd ed.

by J. Michael Farr

An essential reference for college graduates, career changers, students, job seekers, employment counselors, and those seeking upward career mobility. Includes detailed information on more than 100 jobs and trends for college grads and those considering a college education. Reflects employment prospects and pay by type of degree and major, plus labor market trends.

Chon A. Noriega, ed.

Issued twice a year, this interdisciplinary, refereed journal is dedicated to scholarly research relevant to or informed by the Chicano experience. Aztlan welcomes submissions in the humanities, social sciences, and arts. For a $25 yearly subscription, contact: e-mail aztlan@csru-ucla.edu.

Fall 1999. 194 pgs. ISSN 0095-2664. $12.50 paper. UCLA Chicano Studies Research Center. (310) 825-2642.

El retorno de las yolas: Ensayos sobre diáspora, democracia y dominicanidad

(Spanish)
by Silvio Torres-Saillant

This book highlights the cultural, political, and economic interdependence of Dominicans in the home country and in the United States, while debunking the negative stereotypes the media in the Dominican Republic propagate about U.S. Dominicans. It urges the Dominican intelligentsia in the sending country to recognize the invaluable contributions of the diaspora not only in terms of economic support to Dominican society through sizable remittances but also in terms of cultural production in democratic practices, and in modifying the very notion of "Dominicaness" to make it more inclusive in terms of class, gender, ethnicity, and race.

by Sarah Aponte

Dominicans can begin to organize the existing knowledge about Dominican migration and the life of the community in the United States. Sarah Aponte, library scholar and administrative coordinator of the City University of New York Dominican Studies Institute at City College, has created a foundational reference source.

1999. 178 pgs. $15.00 paper. CUNY Dominican Studies Institute. (212) 650-7496.

by Donald W. Bleznick

This book encompasses a broad spectrum of references to general bibliographical guides, bibliographies of Hispanic literature, literary dictionaries and encyclopedias, histories of Hispanic literatures, linguistics, and a guide to scholarly journals.
High-Flavor, Low-Fat Mexican Cooking
by Steven Raichlen

Mexican food doesn’t have to be unhealthy. Given the splendid raw materials—gorgeous vegetables, explosively flavored chilies and herbs, freshly made tortillas, the incredibly diverse selection of grains and beans—it should be one of the healthiest cuisines on the planet. Steven Raichlen presents his approach to remaking Mexican food in a delicious and healthful image. Photography by Greg Schneider. Food styling by Paty Forrestel.

Méjico or Mexico: The Struggle for Identity

After Mexico gained independence from Spain, the young nation continued to struggle for identity as it sought to define itself geographically, politically, and culturally. This program examines the influences of such writers as José Santos Chocano, Enrique Gonzales Martinez, and Los Contemporáneos, among others.

(Spanish, 25 min., color) Item #FFH 9117

Spanish Today

Although Spanish is the dominant language throughout Central and South America, it is a Spanish that has been deeply influenced by the region’s indigenous cultures. This program examines the linguistic synthesis of Spanish, English, and the languages of Yucatan, Chiapas, and Oaxaca.

(Spanish, 25 min., color) Item #FFH 9118

Spanish in America

Spanish is the second language of the United States, and for many living in America, it is their first language. This program examines the influence of Mexican culture in the U.S. and the debate in Mexico about the anglicization of Spanish.

Mexico’s multicultural heritage is explored along with the pervasiveness of Spanish (Spanish, 25 min., color) Item #FFH 9117

CONFERENCES

TESOL Convention and Exposition
March 14-18

Teachers of English to Speakers of Other Languages holds its 34th annual convention and exposition in Toronto, Canada.

Contact: (703) 836-0774.

Heritage College Diversity Conference
March 16-19

Contact: Irma de Prieto, (509) 865-3678, e-mail, deprieto_i@heritage.edu; Web www.hertiage.edu.

ACE 82nd Annual Meeting
March 18-21

The American Council on Education’s Annual Meeting, “A New Agenda for a New Higher Education in Transformation”—focusing on the transformational changes taking place throughout society and how higher education is reshaping its priorities on issues as technology, diversity, teacher education, college costs and financial aid, and globalization—convenes in Chicago at the Sheraton Chicago Hotel and Towers.

Contact: ACE. (202) 939-9410; Web www.acenet.edu.

2000 5-State Multicultural Conference
March 30-31

The 9th annual conference sponsors Garden City Community College (Kan.), Keiser University (Fla.), Pitzer College (Calif.), and the University of South Carolina (Columbia). Key speakers include Jeannine Chavez-Martinez, Pittsburg State University (Kan.), and R. Hernandez, nationally syndicated columnist.
Contact: Carole Huxman at GCCC Trio Programs, (316) 276-9538; Web site, gcccc.cc.ks.us.

NAHP Convention 2000
March 29-April 1

The National Association of Hispanic Publications presents “the Hispanic print event of the new millennium.” At the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tobar, Executive Director/CEO, (202) 662-7250.

AAHE 2000 National Conference
March 29-April 2

The American Association for Higher Education’s 2000 national conference has as its theme “To Form a More Perfect Union: Diversity and Learning.” In Anaheim, Calif.

Contact: Kerry Newberry, conferences and meetings assistant, (202) 293-6440; Web site, www.aahe.org.

NCA-CHE 105th Annual Meeting
April 1-4

The North Central Association of Colleges and Schools’ Commission on Institutions of Higher Education presents “The Quest for Quality: Mission, the Commission, and a New Century” In Chicago, at the Hyatt Regency Chicago.

PRBA Scholarship Fundraiser
April 6

The Puerto Rican Bar Association will host its 43rd annual scholarship fundraising banquet, themed “Empowerment in the 21st Century.” Keynote speaker is Puerto Rico Governor Pedro Rosselló. The banquet raises funds for law students and honors Latino leaders. In New York City.

Contact: (212) 447-4444.

New Jersey Project Spring 2000 Conference
April 7

The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching’s spring conference focuses on “Global Translations: Thinking, Writing, and Teaching across Borders” and features, among others.

Ruth Behar, Cuban-born anthropologist at the University of Michigan. At New Jersey City University, Jersey City, N.J.

Contact: (973) 720-2296; e-mail, njp@wpunj.edu.

AACC 80th Annual Convention
April 8-11

The American Association of Community Colleges presents its annual convention, this year on the theme “A World of Possibilities,” and an academic marketplace at the Hilton Washington in Washington, D.C.

Teaching, Learning, and Technology Conference
April 12-15

Florida Community College-Jacksonville, among others, is sponsoring “Teaching, Learning, and Technology: Challenges for Creating Sustainable Change in the New Millennium.” At the Radisson Riverwalk Hotel, Jacksonville, Fla.

Contact: Jack Chambers, (904) 632-3231, or Jeana Davis, (904) 632-3088.

The Latino Book Summit
April 15-16

This book summit celebrates books, careers, culture, education, health, and more. In San Diego, Calif.

Contact: (323) 255-9206.

UCSA 85th Annual Conference
April 16-18

Contact: UCEA, (202) 659-3430; e-mail, postmaster@ucea.edu; Web site, www.nucca.edu.

3rd Annual Conference on Diversity in Teaching and Learning in American Higher Education
April 19-22

“Text and Context: The Structures of Learning” includes among the keynote speakers José Cuellar, chair, La Raza Studies, California State University-San Francisco. At The Westin St. Francis Hotel in San Francisco.

American Educational Research Association Annual Meeting
April 24-28

7th Annual IDRA Early Childhood Educators Institute™
April 25-27

This year’s Intercultural Development Research Association La Semana del Niño institute is on the theme, “Educating the Next Generation.” Speakers include Regina Benjamin; Gloria Rodriguez, founder of AVANCE; Bertha Perez, UTSA-Downtown; and Diane Gonzales Bertrand, internationally known author of children’s literature. On two mornings, participants will visit schools that showcase innovative programs for diverse learners.

IllinoisTESOL-IL 2000 Annual Convention
April 28-29

Illinois Teachers of English to Speakers of Other Languages/Bilingual Education presents its 26th annual convention, “Options and Opportunities.” At Navy Pier in Chicago, Ill.

Contact: e-mail, eminice@harper.il.cc.us or Gsporter@irc-desplaines.org.
NCORE 2000
June 1-5

13th Annual National Conference on Race & Ethnicity in American Higher Education. Sponsored by The Southwest Center for Human Relations Studies, Public and Community Services Division, College of Continuing Education, The University of Oklahoma. Among the keynote speakers is Edward James Olmos. In Santa Fe, N.M.

Contact: Web site, www.occe.ou.edu/NCORE.

AAHE Assessment Conference
June 14-18

The American Association for Higher Education's 15th annual conference on assessment asks, "Rising Expectations: Can Assessment Deliver?" in Charlotte, N.C.

Latin American Educational Foundation Golf Tournament
June 21

The Latin American Educational Foundation hosts its annual golf tournament. In Sedalia, Colo.

Contact: (303) 446-0541.

Books in Spanish for Young Readers: Summer Workshops 2000
June 26-28, July 10-12, and July 31-August 2

Dr. Isabel Schon, director of the Center for the Study of Books in Spanish for Children and Adolescents at CSU-San Marcos, announces this year's three-day summer workshops: "Books and Reading Strategies for English Language Learners in Grades K-8," "Current Issues: Books in Spanish for Young Readers," and "Literature in Spanish for Children and Adolescents/La Literature en Español Dirigida a los Lectores Infantes y Juveniles" (the latter conducted in Spanish).

Contact: e-mail, ischon@mailbox.csusm.edu.

Kiva's Mexico 2000 Education Tour
September 19-20, Guadalajara
September 22-23, Mexico City
September 25-26, Monterrey

Kiva Expeditions, Inc., is committed to building partnerships through key introductions among international exhibitors, Mexican schools representatives, and local business leaders. This year's tour, "Building Partnerships in Mexico," will focus on student recruitment through public fair and school visits.

Contact: Annette Wright, (303) 770-3C e-mail, kivaexpo@mindspring.com.

HACU 16th Annual Conference
November 4-7

This year's theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

---

EDUCATIONAL STUDIES

UREA FOR THE ENGLISH GENERALIST

Carleton College invites application for one full-time, tenure-track appointment beginning September 1, 2000, at the rank of assistant professor. We are seeking Ph.D.s with a commitment to teach in a liberal arts setting. Candidates should have a solid disciplinary and interdisciplinary background in the psychological, sociological, historical, or philosophical foundations of education. Strong research interests in urban education and/or multicultural education are desirable. Responsibilities include teaching courses in multicultural education, special methods courses, and supervision of student teaching. The successful candidate would also be expected to create his or her own courses to strengthen the teacher licensure program that focuses on urban education. Secondary school teaching experience and prior supervision of student teachers desirable.

Candidates should speak to their experience and desire to work in an educational studies program within the context of a highly selective liberal arts college. Carleton College is located 35 miles south of Minneapolis/St. Paul and is on a three-term per year, two-course per term schedule. Women and minorities especially encouraged to apply. Send resume, letters and transcript by April 14, 2000, to:

Deborah Appleman, Chair
Educational Studies
Carleton College
Northfield, MN 55057

Affirmative Action Equal Opportunity Employer

POLK COMMUNITY COLLEGE

INSTRUCTIONAL FACULTY

The following anticipated full-time, tenure track positions exist beginning the fall of the 2000/2001 academic year:

- English
- History
- Humanities
- Mathematics
- ESL
- Physical Science
- Economics
- Biology
- Nursing
- Computer Science
- Coordinator of Engineering Technology

Minimum requirements include a Master's degree and eighteen graduate hours teaching the discipline. Teaching experience is factored into the screening process but knowledge of the discipline, awareness of current trends in instruction, and comfort with instructional technology are also important factors.

*Note: Coordinator of Engineering Technology not a tenure track position

For an expanded job posting and application materials, visit our website at www.polk.cc.mn.us. Applications are also available from the Human Resources Office, 999 Avenue H, NE, Winter Haven, FL 33881-4299, (863) 299-1070. Application review will begin March 27, 2000, although applications will be accepted until finalists are identified. EEO/AA/Drug-Free Workplace.
Book Review

By Javier A. Martínez, Ph.D.

Drawing on the findings of Chicano and Mexican American historians, González's book is primarily "a synthesis of studies in the field." By amassing a diverse amount of historical material, the author provides the reader with a rich and thoroughly detailed history of Mexicans in the United States.

González's book is divided into an introduction and nine chapters, the first of which examines the origins of Spanish civilization from its beginning in the Upper Paleolithic period to its Golden Age in the fifteenth century. González recounts the first meeting between Europeans and the indigenous people of the Americas. He explains in a clear and systematic way the various accepted historical reasons for the fall of the Aztec Empire and the lasting impressions left on the Americas by the Spanish, most notably the language.

Chapter Two traces Spanish movement into the north until 1821, specifically the settling of New Mexico. González's prose is clear, his information factual and direct, and his storytelling abilities begin to flower in this chapter. His enthusiasm for his topic is evident, and the recounting of, for example, Cabeza de Vaca's exploits, is enthralling even to those of us already familiar with this territory.

Chapter Three examines the Mexican period of Southwest history, from 1821-1848. Mexican independence, the Texas Revolt, and the Mexican War are succinctly but competently examined. González also describes the complexity of Anglo-Mexican relations and their substantial differences in California, New Mexico, Arizona, and Texas.

This state-by-state approach is again used in Chapter Four, perhaps the most powerful. González communicates a genuine sense of agony suffered by Mexicans and U.S.-born Mexicans in the last fifty years of the 19th century. González's style will never be confused with Acuña's impassioned (and embittered) prose, but this chapter communicates forcefully the many atrocities perpetrated against U.S. Mexicans throughout the American Southwest.

Chapter Five recounts the great migration from Mexico into the United States by thousands of Mexicans. González does an admirable job of examining the social forces that precipitated this exodus, including the Mexican Revolution. The author draws a neat and discernible line between the economic development of the Southwest and its impact on the lives of rural immigrants.

González's overview of the Depression is perhaps one of the book's most important moments. He calls much important research done in this area, summarizing effectively in Chapter Six why, in his words, the Depression was "an unmitigated disaster for Mexicans." Too often, images of the Depression construct an inaccurate portrayal of a homogenous U.S. suffering from economic strife. González effectively demonstrates that the misery of this time was more far reaching than many realize, impacting the lives of those who were already marginalized. U.S. Mexicans, after all, were forced to endure nativist smear campaigns and forced repatriation. An effect cap to this chapter is González's brief look at Mexican women and their role in the labor movement, reminding us that Mexicans were more than passive witnesses to history: they were active and influential players.

González's treatment of U.S. Mexicans during the Second World War is well written, but perhaps a bit sparse, in part, Chapter Seven suffices because González takes upon himself the onerous task of examining the role of Mexicanos not only in the war but in the two decades following. Certainly there is plenty of material here for two chapters, especially when one considers, as González points out, that the decades follow WWII were pivotal in the formation of the U.S. Mexican middle class.

Chapter Eight examines the Chicano movement of the sixties and seventies. González openly admits that he has been "sometimes critical..." of what have become mainstream interpretations in Chicano Stud departments. "Many of my Chicano colleagues," he writes, "will find my work excessively conservative." González's conservatism, one might be tempted to think that he would be unjustly harsh on the proponent of "Brown Power." Quite the opposite, González's approach is not only balanced but insightful in that he presents a vis of a singular Chicano Movement but Movements, all of which were aimed at gaining political representation: cultural pluralism. González reviews effectively the e: days of Chicano activism, its bolstering by a generation of Chicano students, and how the Movement impacted various U.S. Mexican communities. The author also devotes a chapter of the book to the Chicanas movement, arguing that Chicanas have weathered the shifting political landscape far better than have their male counterparts.

The final chapter examines U.S. Mexicans from 1975-1998. The most useful cap to the narrative, this chapter is a scattershot overview of everything from immigration to NAFTA, from Mexi Catholicism to the work of Guillermo Gómez Pera and the career of Selena. While anything but a critical analysis of the contemporary Mexican condition, the closing chapter does remind readers about diversity of our cultural production in the late 20th century and how we are increasingly moving into the foreground of U.S. culture.

There are moments in Mexicanos: A History of Mexicans in the United States when a reader might wish for a more rigorous critique of the subjects discussed, but that type of analysis is not the goal of the book. In all, González's narrative is clear, and his information comprehensive. The book serves as a fine introduction to the history of a people that instructors of Mexican American/Chicano history will find especially useful and accessible.

Dr. Martínez completed his B.A. at the University of Texas at Austin, his M.A. at the University of Texas-Pan American, and his Ph.D. at The Ohio State University. He is currently the assistant to the president at the University of Texas at Brownsville and Texas Southmost College.

26TH ANNUAL CONFERENCE

APRIL 5 - 8, 2000

Featured speakers and workshop presenters will engage participants in thought-provoking dialogues and activities focused on the ways in which an inclusive American society produces phenomenal results in business, education, and government as well as in society at large. The Conference will also provide us with a forum for meaningful dialogue on improving interpersonal and intergroup relationships and combating prejudice, intolerance, and hostility. Additionally, the conference schedule will allow us an opportunity to visit Capitol Hill to speak in support of affirmative action.

KENT STATE UNIVERSITY

DIRECTOR
FACULTY AND STAFF ASSISTANCE PROGRAM

Kent State University invites applications for the position of Director, Faculty and Staff Assistance Program. Reporting to the Associate Vice President for Human Resources, the Director is primarily responsible for providing professional mental health assessment interviews, crisis intervention, referral services, and short-term counseling to the University's full- and part-time faculty and staff members. Additional duties include: a) development and implementation of educational programs for faculty and staff to promote awareness of alcohol and drug abuse and other personal problems; b) development and implementation of programs to educate supervisors in managing and identifying employees in need of assistance; c) advising supervisors in matters involving employees with personal problems affecting work performance; and d) recommendation of policies and procedures to promote early detection and prevention of problems which impair job performance.

Kent State University is a Carnegie Research II institution offering nearly 170 baccalaureate majors, 37 master's programs and 20 areas of doctoral study. The total operating budget for fiscal year 2000 is in excess of $290 million. Approximately 974 faculty and 2,067 non-instructional staff comprise the University’s full-time workforce and approximately 2,021 comprise the part-time faculty and staff workforce. With an extensive reach throughout northeastern Ohio, Kent State University is strategically located 45 minutes from Cleveland and two hours from Columbus and Pittsburgh. Kent State University reflects the cultural and commercial vitality of the region and is poised to meet the challenges of the 21st century.

In order to be considered for this position, candidates must possess an independent license as a counselor, psychologist, or social worker (master's degree required, doctoral degree preferred), and possess five years clinical experience in assessment, diagnosis, and treatment settings including work in alcohol and chemical dependency treatment. It is also required that the candidate have excellent oral and written communication skills. In addition, it is preferred that the applicant have the following: a) prior experience in an EAP setting; b) eligibility for certification by the Employee Assistance Professionals Association; c) certification as a chemical dependency counselor; and d) demonstrated administrative, supervisory, organizational, and budgeting skills.

Compensation includes an excellent benefits program and salary commensurate with experience and credentials.

Letters of application, including resume, nomination and a list of at least five knowledgeable references (name, address, e-mail, phone number) should be sent to:

Dr. Sally A. Kandel
Associate Vice President for Human Resources
Kent State University
P.O. Box 5190
Kent, OH 44242-0001

Review of applications will begin on March 25, 2000 and will continue until the position is filled.

ILLINOIS INSTITUTE OF TECHNOLOGY
Chicago, Illinois
Vice President for Institutional Advancement

As it approaches the climax of a record-setting campaign effort, the Illinois Institute of Technology ("IIT") seeks a Vice President for Institutional Advancement to lead the institution to the next level of achievement with its external constituents. IIT is a private, Ph.D-granting university serving 6,000 students enrolled in programs in engineering, science, psychology, architecture, business, design, and law. IIT has a history of exceptional intellectual achievement that includes 3 Nobel Prize winners and a winner of the National Medal of Technology. Its landmark campus is internationally famous because it was designed by Ludwig Mies van der Rohe who served as Dean of the University's College of Architecture. One of the 16 institutions that comprise the Association of Independent Technological Universities (AITU), IIT offers exceptional preparation for professions that require technological sophistication and is a leader in interdisciplinary education. Through a committed faculty and close personal attention, it provides its students a challenging academic program focused by the rigor of the real world.

Reporting directly to the President of IIT, the Vice President for Institutional Advancement is responsible for the leadership of the alumni relations and development operations. Immediate responsibilities will include the successful conclusion and celebration of the IIT Challenge Campaign, an effort that will have raised in excess of $250 million. The VP will oversee the University's proactive management of alumni, friends, and, particularly, donor relationships and will implement internal planning, budgeting, systems, personnel training, and other programs designed to motivate and to develop the Institutional Advancement staff. Of particular importance is the ability to undertake a leadership role in the University's public relations and marketing efforts, thereby creating a seamless and compelling case for presentation to the institution's many constituencies.

The Vice President for Institutional Advancement will have at least ten years of extensive, general experience in external relations and in the administration of an advancement department of a complex organization, preferably in academic or a similarly sophisticated not-for-profit institution. In some cases, general management experience in a not-for-profit setting may be satisfactory. S/he will have participated in a significant capital campaign. Experience with scientific or technical education or organizations is desirable. The Vice President will have demonstrated success in developing and implementing strategic institutional advancement plans and will possess an understanding of and a vision for the promotion of IIT's mission.

In addition, the successful candidate will demonstrate excellent leadership and communications skills; the capacity to build, lead, and to manage a team, an entrepreneurial spirit, self-confidence, and enthusiasm for working with an eclectic group of strong-minded, highly intelligent people; and a sense of humor. The search process is currently underway and will continue until the position is filled. Nominations and applications should be submitted, as soon as possible, to the search consultants conducting IIT in this search:

VICE PRESIDENT FOR STUDENT AFFAIRS

San Diego State University invites applications and nominations for an experienced and visionary campus life educator to fill the position of Vice President for Student Affairs. The Vice President, who reports directly to the President and is a member of the University Cabinet, is the chief student support services officer for the University and is responsible for the leadership of a division of approximately 300 persons and an annual operating budget of $2.5 million.

The Division of Student Services operates the Student Health Center, Financial Aid Counseling and Psychological Services, Career Services/Compliance and Disability Services, Housing and Residential Life, Student Resource Center, Office of Educational Opportunity/Ethnic Affairs, International Student Center, Judicial Procedures, Ombudsman, Scholarship Office and Test Office. It is also the liaison with the Associated Students, and over 300 student organizations. The Vice President collaborates with the College Deans in joint program support of college-based Assistant Deans for Student Services. The Vice President also has responsibilities associated with off-campus constituencies including parents and community organizations supporting student success and opportunities.

The successful candidate will have at least five years experience in high-level, progressively responsible student affairs administration, demonstrated leadership in promoting a multi-cultural living/learning environment and in establishing successful partnerships with faculty and academic administrators, effective oral and written communication skills, and outstanding decision making abilities. Proven ability to raise funds for scholarships and student affairs initiatives is preferred. San Diego State University is committed to the principle of shared governance among faculty, students, staff and administrators. It is expected that finalists for this position will demonstrate a personal and professional commitment to inclusive leadership and collegial cooperation in achieving University goals. An earned doctorate is preferred; a master's degree is required. Extraordinary experience may be given consideration in lieu of an earned doctorate.

San Diego State University, founded in 1897, is one of 23 campuses of the California State University system. SDSU enroll over 31,000 students and offers 75 bachelor's degrees, 57 master's, 17 doctoral degrees. The campus employs 2,509 full-time and part-time faculty members and 1,681 staff. Over 3,000 students live on the campus in University housing.

SDSU is located in San Diego, a vibrant and widely diverse city of over 1.2 million which offers exciting opportunities because of its emerging biotechnology and telecommunications community, its location on the border with Mexico and the Pacific Rim, and its culturally diverse community. Extensive opportunities for recreation, tourism, education and business have drawn a highly educated population. For additional information please visit SDSU Web site at http://www.sdsu.edu.

The search committee will begin reviewing applications on Monday, March 20, 2000 and will continue until the position is filled. Appointment of the Vice President for Student Affairs is expected to become effective July 1, 2000. The compensation is competitive and commensurate with experience and qualifications. Please send nominations and applications to: Office of the President, San Diego State University, 5500 Campanile Drive, San Diego CA 92182-8000.

SDSU is an Equal Opportunity Employer and Does Not Discriminate Against Persons on the Basis of Race, Religion, National Origin, Sexual Orientation, Gender, Marital Status, Age, Disability or Veterans Status.

ASSISTANT TO THE PRESIDENT AND DIRECTOR OF INSTITUTIONAL DIVERSITY

Smith College seeks nominations and applications for the position of Assistant to the President and Director of Institutional Diversity. This position is primarily responsible for the oversight and coordination of all efforts of the College to achieve its goals in the attainment of campus diversity, including assuring fairness and equal opportunity in employment and retention, and overseeing the implementation of its affirmative action policies and diversity services.

Reporting to the President and serving as the College's Affirmative Action Officer, the Director of Institutional Diversity leads and coordinates campus-wide efforts on issues of diversity and inclusion, and both advises on and interprets policy related to affirmative action.

The duties of the Assistant to the President and Director of Institutional Diversity include:

- providing leadership in campus efforts to achieve understanding, tolerance, and acceptance of diversity;
- collaborating with the College's senior leadership in finding ways to advance Smith's diversity agenda;
- initiating and implementing programs in the areas of institutional diversity and affirmative action;
- reporting periodically to the President on the progress and effectiveness of affirmative action and diversity efforts;
- administering College civil rights grievance procedures;
- supervising the Coordinator of Disability Services; and
- serving on the President's Cabinet, the College Council on Community Policy, and undertaking other specific projects as assigned by the President.

Candidates should have the following attributes and experiences:

- a vision of how to achieve diversity while maintaining a sense of common purpose and shared values;
- broad administrative and leadership experience, including experience and success in leading organizational efforts to achieve greater diversity;
- knowledge and experience of institutions of higher education and familiarity with academic governance;
- a working knowledge of laws and regulations relating to civil rights, equal opportunity, and affirmative action;
- mediation and problem-solving skills;
- advanced degree and college teaching experience preferred.

Submit nominations or letter of application, resume, and names and telephone numbers of three references to: Human Resources, Smith College, 50 Pomeroy Street, Northampton, MA 01063. Fax (413) 585-2294. Screening of applications will begin immediately. Application review will continue until the position is filled. Please submit cover letter with salary requirement, resume, and names of three references to: Director of Human Resources, Smith College, 50 Pomeroy Street, Northampton, MA 01063. Fax (413) 585-2294. Screening of applications will begin immediately with preference given to applications received by March 31, 2000. Smith College is an equal opportunity employer encouraging excellence through diversity.

### Rowan University

**POSITION:** Provost of the University

**DESCRIPTION:** Rowan University is inviting applications and nominations for the position of Provost of the University. The Provost provides over 300 administrative, management, and support staffs, and budget, and plans development for the colleges of Business, Communication, Education, Engineering, Fine and Performing Arts, Liberal Arts and Science, School of Graduate Studies, Information Resources, and the Library.

The Provost serves as University liaison to the Board of Trustees and the Board of Trustees Sub-Committee and serves as chief liaison to the University Senate. The Provost provides over 300 administrative, management, and support staffs, and budget, and plans development for the colleges of Business, Communication, Education, Engineering, Fine and Performing Arts, Liberal Arts and Science, School of Graduate Studies, Information Resources, and the Library.

The Provost serves as University liaison to the Board of Trustees and the Board of Trustees Sub-Committee and serves as chief liaison to the University Senate.

**QUALIFICATIONS:** The successful candidate must have an earned terminal degree in an appropriate field, an established record of teaching, research, and writing and the ability to work effectively with diverse populations from all segments of the university and outside communities. The individual should be able to help formulate and articulate the vision and goals of the university, both internally and externally.

**ROWAN UNIVERSITY:** Rowan University (formerly known as Glassboro State College) is a selective, medium-sized, state university located in southern New Jersey close to Atlantic City and Philadelphia. In 1992, Rowan University received $100 million gift from Henry and Betty Rowan, one of the largest gifts ever bestowed on a public university. The gift has been a catalyst for Rowan's transformation into a university of regional prominence. Founded in 1923 as a normal school for teachers, the university enrolls over 9,500 students in degree programs ranging from bachelor's through doctoral. The university is divided into six colleges (Business, Communication, Education, Engineering, Fine and Performing Arts, and Liberal Arts and Sciences) and a Graduate School. The 200-acre campus contains 31 buildings, including six residence halls and three apartment complexes. The university was also the site of the historic Summit Conference between President Johnson and Soviet Premier Kosygin in 1968. Additional information about Rowan University can be found on the [Rowan University website](http://www.rowan.edu).

**APPLICATION PROCESS:** Applications should include: a narrative letter indicating how the individual's experience and background relate to the position qualifications; a complete curriculum vitae; and the name, current title, address and telephone number of five (5) professional references. Applications will be reviewed beginning March 10, 2000, and will continue until the position is filled. Applications and nominations should be sent to:

**Cheryl Pirovano Search Office of the President Rowan University 361 Mullica Hill Road Glassboro, N.J. 08028**

Rowan University is an affirmative action/equal opportunity employer.
Brookdale Community College is a growing institution recognized for its vision, excellence in educational practices, effectiveness in meeting diverse and eclectic student needs, utilization of state-of-the-art technology and resources, and its ability to anticipate current and future needs of the students, citizens, and community it serves. The District is seeking an experienced individual who demonstrates integrity, fairness and a strong sense of ethics, along with an enthusiasm for the mission of community colleges.

Located approximately 40 miles southeast of Los Angeles, California, the North Orange County Community College District is the 12th largest in the nation, serving approximately 60,000 students each semester. The District includes Fullerton College, Cypress College and the School of Continuing Education. Geographic boundary of the district encompass 155 square miles in north Orange County and a small portion of Los Angeles County, and a population of more than 1 million people. The District is governed by a diverse seven-member Board of Trustees, elected at large by registered voters.

The District is fiscally stable, with reserves that substantially exceed the required state minimum. Last spring, the colleges completed successful accreditation processes and the Board adopted a comprehensive facilities and educational master plan, all of which will chart a course for the future.

The position offers a competitive salary and benefits package, including participation in the California State Retirement System.

QUALIFICATIONS
- Bachelor’s degree in finance, accounting or related field required; CPA or MBA preferred
- Knowledge of basic business principles and practices; financial accounting and risk management
- Demonstrated experience with budget development processes and internal control procedures
- Substantial leadership and fiscal management experience in administering public education funding and budgeting
- Knowledge of facilities construction practices and public financing

Plattsburgh State University of New York

ASSISTANT PROFESSOR OF RHETORIC AND COMPOSITION

Plattsburgh State University of New York is a comprehensive coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center of the Lake Champlain/Adirondack region of New York State. The small city, with its rich cultural life and easy access to the Adirondack High Peaks and Lake Placid, is located in the Adirondack Mountains, a region of lakes, woods, and mountains.

The English Department at Plattsburgh State University of New York invites applications for a full-time tenure-track assistant professor position in Rhetoric and Composition. Start date is Fall 2000.

Qualifications: M.A. in Composition and Rhetoric or related field required, Ph.D. preferred; ESL certification desirable.

Responsibilities: Teaching developmental writing, composition, and upper-level writing courses; university service; scholarship; and working with students with disabilities.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

Salary: $38,000 minimum; excellent benefits. Review of applications begins March 1, 2000 and continues until position is filled. Please send or fax a letter that includes your curriculum vitae, write a sample, and three letters of reference to: Chair, Search Committee (FSU 2297-608), c/o Human Resources, Plattsburgh State University, of New York, 101 Broad Street, Plattsburgh, New York 12901-2681. Fax (518) 564-5060.

The Union Institute

Director, Center for Women

The Union Institute is a national university dedicated principally to adult degree programs. Founded by members of the Union's outstanding scholars/activist faculty, the Union's Center for Women is dedicated primarily to building coalitions and other collaborations between feminist scholars and grassroots activists. Over the past ten years, UMW has created several groundbreaking coalitions that address a broad range of issues from girls' empowerment to documenting feminist activism, from women's health to publishing. In a time of great change and possibility, at this university we seek a new director to build on and expand this tradition.

We need a director who has a history of feminist coalition-building, grassroots organizing, policy advocacy, or similar experience; a strong history of scholarship and critical thinking; a background in education, or similar experience; and a commitment to the historical tensions inherent to scholars/activists collaborating in the United States. We need a director who is philosophically, intellectually, and practically committed to building the necessary bridges and creating the cultural boundaries of race, class, sex, and sexuality. The candidate will possess a mix of skills and abilities; the ideal candidate will be a strategic feminist thinker, a scholar/activist with a strong commitment to the feminist movement; a writer, speaking, and organizing skills, as well as a record of fund-raising accomplishments. A doctorate or equivalent set of community-based experience, critical learning, knowledge, and skills is required.

Candidates should send a letter of interest and background, resume, references and salary history no later than April 10, 2000 to: Director Search, The Union Institute, 1710 Rhode Island Ave., NW #1100, Washington, DC 20036-3007. AAEOL
**SEARCH CONTINUED**

**ASSOCIATE VICE PRESIDENT**
**FOR ACADEMIC AFFAIRS**

The University of Texas at Brownsville and Texas Southmost College is seeking an academic leader who can develop and guide the professional development of faculty, teaching and learning processes across the curriculum, faculty evaluation, program assessment, the infusion of technology into the curriculum, high school courses for university credit and the implementation of diversity across Academic Affairs. The Associate Vice President reports to the Provost and works side-by-side with the academic deans and administrators in other divisions.

UTB/TSC is both an open access community college and a university with graduate programs. More than 85 percent of our students are either Mexican-American or Mexican, most of whom begin in developmental courses. Located five minutes from Brownsville, the University is committed to a bicultural, bilingual mission.

**Required Qualifications:**
- Ph.D. and an academic record that warrants tenure in an academic department;
- evidence of achievement in all the above areas of responsibility; and
- at least three years experience as a department chair

**Preferred Qualifications:**
- ability to improve processes throughout Academic Affairs;
- ability to communicate well to a variety of audiences; and
- bilingual - English/Spanish

**Salary:**
- Commensurate with experience and qualifications

Applications should include a curriculum vitae, three letters of reference and a two-page position paper on how to improve one or more of the areas for which the candidate will be responsible. Send applications or nominations to:

Human Resources
The University of Texas at Brownsville and Texas Southmost College
80 Fort Brown / Brownsville, Texas 78520
1-800-544-8208 / (956) 544-8205 / Fax (956) 982-0175

For more information, visit our web site at: [http://www.utb.edu/employment/index.html](http://www.utb.edu/employment/index.html)

UTB/TSC does not discriminate on the basis of sex, race, color, religion, national origin, handicap, age or veteran status. Women and minorities are encouraged to apply.

**UNIVERSITY OF WEST FLORIDA**
**DEPARTMENT OF COMPUTER SCIENCE**

**ASSISTANT PROFESSOR POSITION**

Applications are invited for the tenure track position of assistant professor beginning August 2000. Applicants must hold a Ph.D. in computer science (or a related discipline and should be able to teach a variety of graduate and undergraduate courses in computer science. Preference will be given to individuals whose specialty is in operating systems, computer hardware and architecture, the analysis of algorithms, and theory of computation. Salary is commensurate on qualifications and experience.

The Department has 500 undergraduate and 150 graduate students enrolled in programs in CS, CIS, and Software Engineering. We offer BS degree in CS and CIS, MS degree in CS and Software Engineering, and support a BS in computer engineering offered by our ECE department. Our faculty has interests in the following areas: pattern recognition, artificial intelligence, computer networks, computer security, neural networks, image processing, software engineering, computer vision, and modeling and simulation.

The University of West Florida is an urban university with approximately 8,200 students, situated in a 1,000 acre wooded campus on the edge of Pensacola and is part of the State University System of Florida. Pensacola is home to about 250,000 people and is about 50 miles east of Mobile, 200 miles east of New Orleans, and 335 mile southwest of Atlanta. In Pensacola, living is attractive, the climate is good, the beaches are beautiful and the fish still taste great.

We anticipate hiring one or more assistant professors to begin in the fall of 2000, depending on availability of funds. Applicants must provide documentation of the right to work in the United States. Applicants should have three references sent directly to the search committee, and send (not by e-mail) a resume, along with a statement of interests and goals to Jim Beside, Search Committee Chair, Department of Computer Science, The University of West Florida, Pensacola, Florida 32514. Application deadline is April 21, 2000, and applications will be screened until the position(s) is (are) filled. UW F is an equal opportunity/affirmative action employer. Women and minorities are encouraged to apply.

LONG ISLAND UNIVERSITY
BROOKLYN CAMPUS

ASSISTANT PROFESSOR OF JOURNALISM

(Re-Opened)
The Department of Journalism of the Brooklyn Campus of Long Island University seeks a tenure-track Assistant Professor to start September 2000. Ph.D. preferred; media experience desirable. Candidates should demonstrate commitment to excellence in teaching and scholarship; be prepared to counsel students and share administrative responsibilities in the department's areas of teaching including news-editorial sequence, computer-assisted reporting, desktop publishing, press ethics, mass media and minorities, advertising, and speech communication. The position may include serving as faculty advisor to the weekly campus newspaper.

The journalism program at the Brooklyn Campus of Long Island University, founded in 1946, is located in the nation's media capital and top media market. It is committed to preparing a diverse group of predominately minority students for careers as communication professionals. The department offers small classes, supports an extensive internship program, and sponsors campus chapters of the Society of Professional Journalists and Kappa Tau Alpha. LIU annually confers the George Polk Awards. Applications will be accepted until the position is filled. Send cover letter, curriculum vita and names of three references to: Dr. Donald Allport Bird, Chair, Department of Journalism, Long Island University, Brooklyn, NY, 11201-5372. LIU is an Equal Opportunity/Affirmative Action Institution.

DIRECTOR OF RESIDENCE LIFE
Manhattanville College is an independent, co-educational liberal arts college of approximately 1200 students located 28 miles north of New York City in suburban Westchester County. We are currently seeking a creative, energetic, student-centered individual for the position of Director of Residence Life.

This position is responsible for providing visionary leadership in short and long-term planning and programming of four residence halls which house, at capacity, 940 students; supervision, training, professional development, and evaluation of Assistant Director, four Residence Directors, 20 Resident Advisors, and one Administrative Assistant; campus judicial system; student room placement through the academic year as well as summer programs; departmental budget; membership on several campus committees; and developing and maintaining professional relationships with faculty and administration.

Required for this position are strong managerial and organizational skills, ability to write and implement policy and procedures, ability to handle conflict, ability to communicate effectively with students, faculty, and staff, and ability to deal with diversity in the student body.

We offer a competitive salary and benefits and an excellent working environment. Consideration will be given to those with a Bachelor's degree and background in student affairs. A Master's degree in Higher Education is preferred, but not required.

The University at Albany, State University of New York, invites applications for the position of Executive Dean of the Nelson A. Rockefeller College of Public Affairs and Policy. Rockefeller College is a premier center for public affairs and policy and houses four internationally recognized schools: The School of Criminal Justice, the Graduate School of Public Affairs (includes the Department of Public Administration and Policy and the Department of Political Science), the School of Information Science and Policy, and the School of Social Welfare. There are a large number of research and outreach programs active within the Rockefeller College, including the Public Management Development Programs, Center for Legislative Development,umped Criminal Justice Research Center, Center for Policy Research, Center for Women in Government, Ringel Institute of Gerontology, Center for Human Services Research & Evaluation, the Professional Development Program, and the Institute for Traffic Safety Management and Research. The individual schools report to the Executive Dean of the Rockefeller College. The Executive Dean reports directly to the Provost and Vice President for Academic Affairs.

Rockefeller College is located on the University's downtown campus, just a few blocks away from the Capitol and the principal offices of New York State government. A special strength of the Rockefeller College is the opportunity it provides for interdisciplinary study in criminal justice, government, public affairs, and social services. The College encourages students to participate both in multidisciplinary research projects and in internships that build bridges between scholarship and practice in public affairs.

The Executive Dean will be expected to provide exceptional leadership and vision as the College seeks to promote its academic programs and research initiatives in the context of the University's Strategic Plan. The successful candidate will possess the ability to plan strategically, prepare and manage complex budgets, lead and motivate faculty and staff, interact effectively with all levels of the organization, and coordinate the efforts of a diverse group of individuals and support units to meet specific goals and objectives. The candidate will also possess exceptional skills in resource development and have strong, demonstrated experience dealing effectively with decision makers and appointed officials at all levels.

The successful candidate will have had significant administrative experience, hold a doctoral degree or its equivalent, and have distinguished scholarly credits. Applicants preferably in a public policy related field. Candidates should have a record of scholarly and professional achievement that would ordinarily qualify for appointment as the rank of Professor in one of the University's academic units. The evaluation of credentials will begin on March 20, 2000 and continue until the position is filled.

Salary is competitive and commensurate with credentials and experience.

The University at Albany, SUNY, is an equal opportunity/affirmative action employer.

Applications and nominations should be sent to Dr. Richard A. Highfield, Chair, Search Committee for the Executive Dean of the Rockefeller College, AD-246, The University at Albany, Albany, NY 12222.

Assistant Professor of Spanish
University of Wisconsin-La Crosse: Assistant Professor of Spanish. To teach all levels of undergraduate Spanish. Documented potential for excellence in teaching. Interest in teaching all levels of Spanish language, literature and culture, with strong background in Latin American. Ability to teach in film and phonetics also desirable. Native or near-native fluency in Spanish. Ph.D. completed by August 15, 2000. Applicants must submit a letter of application, curriculum vitae and three letters of recommendation. Files will be reviewed beginning March 17. All applications must be postmarked by March 27, 2000. Address applications to:

Dr. Donald Socha
Chair of Search & Screen Committee
Foreign Languages Department
University of Wisconsin-La Crosse
315 Graff Main Hall
1725 State Street
La Crosse, WI 54601

UW-La Crosse is an affirmative action/equal opportunity employer. Women, persons of color and individuals with a disability are encouraged to apply.

If you have a special need/accommodation to aid your participation in our hiring process, please contact the committee above to make appropriate arrangements.

MIT Dean for Student Life

The Massachusetts Institute of Technology seeks applications and nominations for the position of Dean for Student Life. The successful candidate will play a lead role in shaping and ensuring excellence in all aspects of the MIT student experience.

The MIT Dean for Student Life is the senior officer of the Institute responsible for the leadership and management of both undergraduate and graduate residential and student life programs, dining, the Campus Activities Complex, the Department of Athletics, and Counseling and Support Services. The Dean reports to the Chancellor and has managerial responsibility for the approximately $30 million annual operating budget of these programs, as well as line responsibility for the performance of the more than 325 persons who work in these programs. The Dean is one of the senior members of the MIT leadership team and, as a member of Academic Council, is responsible for working collaboratively with the President, Provost, Chancellor, Executive Vice-President, the Dean for Undergraduate Education and faculty to ensure the high quality of MIT student life. In this capacity, the Dean will also participate in strategic planning and capital budgeting across a broad range of activities.

Candidates for this position must demonstrate a passion for excellence in education and a flair for dealing with all groups necessary to support it. The Dean must be both a seasoned manager with experience in leading and implementing initiatives in an organization of MIT's size, scope and complexity and a person of sufficient stature and experience in academic or comparable settings to allow for a collegial and cooperative partnership with students, faculty and senior administrators in all parts of the Institute.

An advanced degree is preferred.

Inquiries, applications and nominations should be directed to Rohini Sabhikhi, Isacson, Miller, 334 Boylston Street, Suite 509, Boston, MA 02116-3805. Fax 617-262-6509. Email: rsabhikhi@isasicon.com.

MIT is an affirmative action, equal opportunity employer. Women and minorities are encouraged to apply.
Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following:

**Acting Associate Director Of Off-Campus Study**

(Acting will begin July 1, 2000)

Off-Campus Study has responsibility for all Colby programs abroad, as well as for advising students about non-Colby programs. The successful candidate must hold an MA degree or higher in an appropriate discipline and have experience with programs abroad or in international education. Knowledge of how to provide comprehensive services and how to interpret foreign credentials as US educational equivalents and the College’s curricular requirements is necessary. Should have a good working knowledge of a foreign language, preferably Spanish. Must be willing and able to travel during the academic year. Must have the flexibility to assume additional responsibilities as determined by the director. This position is for one year with possibility of renewal.

**Career Counselor**

Employee will be responsible for carrying out the normal range of career services work, with an emphasis on counseling and programming. This is a temporary position, lasting 10 months, beginning on or about August 14, 2000 and ending on or about June 15, 2001. Qualifications include: a Bachelor’s degree is required, a Master’s degree in a related field is preferred; strong commitment to an education in a liberal arts college is necessary; knowledge of job search process and familiarity with career development theory; excellent interpersonal and communication skills required; computer proficiency is necessary.

**Assistant Coach, Football and Minority Recruiting**

This position begins April 1, 2000 through May 2001. Responsibilities within the football staff include: film breakdown and analysis, on-field coaching, identifying and recruiting prospective student athletes, with an emphasis on minority student recruitment, and other duties as assigned by the head coach. Receivers of defensive line play preferred. A Bachelor’s Degree is required and previous college football coaching experience is preferable. Other significant coaching experience within the department will be assigned based on the successful candidate’s background. Informational interviews at ACPSA.

Interested candidates should supply the position title they are applying for and for each submit two copies of a cover letter and two copies of a resume, including the names and telephone numbers of three references to: Douglas C. Terp, Director of Personnel Services, Colby College, 500 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and continue until the positions are filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

---

**Director, Boston College Career Center**

Reporting to the Vice President of Student Affairs, the Director of the Career Center leads a staff of fifteen professional and support staff members in providing career development services to the University’s undergraduate and graduate student population and alumni. Responsibilities include direct outreach and marketing on campus and to employers; overseeing the personnel, budgetary and operational functions of the department; developing a vision for the future of the Career Center and working with staff to define necessary goals and objectives; and developing a job development strategy for companies that do not typically recruit on campus for both internships and full-time employment. Will manage a complex department and a department budget of approximately $600,000, and direct the implementation of a comprehensive technology strategy for Career Center. Additionally, will work with alumni leadership, Parents Council, and Walsh Street Council leadership to expand networking, internship, and full-time employment opportunities.

The successful candidate will have a Master’s degree in counseling, higher education, or business, 8-10 years experience in business, human resources, or a related field, and 6-8 years progressively responsible experience in a college or university career center preferred. Demonstrated ability to provide vision, leadership and technical expertise to create, implement and direct the programmatic efforts of a seasoned staff is necessary. Additional requirements include an understanding of role and value of liberal arts education, significant leadership, supervisory, and managerial experience, and working knowledge of the application of state-of-the-art technology to career planning and placement.

To apply, please forward two copies of both a cover letter and resume referencing Position Number: 8294-A-80, to: Boston College, Department of Human Resources, More Hall 315, Chestnut Hill, MA 02467-3818. For more information about this position, please visit our web site at: www.bc.edu/career. Boston College is an Affirmative Action/Equal Opportunity Employer.

AQUINAS COLLEGE

Provost Position Announcement

Aquinas College is seeking nominations and applications for the position of Provost and Dean of the Faculty. The Provost is the chief academic officer of the College and leader of the faculty, overseeing the management of the entire academic and student development enterprises, evaluating and coordinating budgets and business plans for all academic and student development programs and support services, and supervising first-line managers and their functions. The Provost recommends and carries out procedures for recruiting, hiring, and evaluating faculty and all academic and student development staff, and leads the evaluation of all academic and student development programs. The Provost works closely with the Academic Assembly, the College's faculty governance structure, and serves as Executive Secretary of the Academic and Faculty Affairs Committee of the Board of Trustees.

The Provost is supported by the Deans of the College's three schools, Arts and Sciences, Education, and Management; as well as the Dean for Student Development, the Director of the Library, and the Director of Information Technology Services. The Provost reports directly to the President of the College, serves as a member of his Cabinet, maintains faculty status, and becomes tenurable as a faculty member.

We seek candidates with a record of excellence in teaching and scholarship who embrace the values of a Catholic college and who have demonstrated commitment to education in the liberal arts and sciences; to the primary mission of teaching and learning in the College community; and to meaningful connections with the broader community. Candidates should have an earned doctorate in an academic discipline; relevant experience in working with faculty, students, administrators, trustees, and the community; sufficient college teaching experience to reach the rank of Professor; senior level responsibility in the administration of academic programs, program evaluation, and supervision of faculty; major budgetary responsibilities and control. Candidates should possess the disposition of servant leadership, and the ability to articulate faculty concerns and College priorities to major College constituencies.

With its roots extending to 1886, Aquinas College in 1931 became the country's first coeducational Catholic college. Its principal mission is to offer a liberal arts education with a career orientation and follows the Dominican tradition of engaging with the broader community. It enjoys a strong reputation for academic rigor and program innovation and is currently engaged in developing new programs that build on its heritage, including a K-5 charter-laboratory school based on the Reggio Emilia system and corresponding professional preparation programs; a conductive education program offering direct services to children with motor disabilities and the first undergraduate and graduate conductor training program in the Western Hemisphere; new international and cultural immersion programs; a theatre arts program and building project in collaboration with a major regional community theatre; a new community-based nursing program offered in collaboration with the University of Detroit-Mercy and St. Mary's Mercy Medical Center; and the region's first facility with two-way, interactive video-based communication capabilities.

Aquinas currently has 106 full-time faculty members, two-thirds of whom have terminal degrees in their fields, and 110 part-time faculty. It enrolls nearly 2,000 traditional-aged and adult undergraduate students in 14 major degree programs, and 500 students in graduate programs in education and management. It is situated on a beautiful 107-acre wooded campus in Grand Rapids, Michigan, the second-largest city in the state and one of the most dynamic in the Midwest. More information is available about the college and Grand Rapids via the college's Web site at www.aquinas.edu.

Prospective candidates should submit a cover letter with a statement of their approach to the liberal arts, leadership, and collegial decision-making; a curriculum vitae; and a list of three references with their addresses and telephone numbers. The beginning date for the position is January 1, 2000. Nominations and applications will be received until the position is filled, and should be sent to Provost Search Committee Office of the President Aquinas College 1647 Robinson Road, S.E. Grand Rapids, MI 49506 Applications and nominations of women and minorities are particularly encouraged. Aquinas College is an equal opportunity employer which affirms the values and goals of diversity.

ASSOCIATE DIRECTOR OF CAPHE

Consortium for the Advancement of Private Higher Education (CAPHE) seeks an energetic, self-motivated, team-oriented individual to fill Associate Director position. Ideal candidate will have minimum of four years of assistant-dean/director-level administrative experience in a college, university or higher education association. The individual will be an excellent communicator (written and verbal), problem solver and strategist, will have the ability to organize and prioritize multiple tasks, and will demonstrate exceptional administrative skills. Position is ideal for higher education generalists who possess a solid understanding of college/university administration including governance, planning, academic affairs, and student affairs issues. Primary areas of work: help to design, manage, evaluate and provide administrative oversight to national grant programs. Examples of current program areas include: partnerships between higher education and community organizations; institutional collaborations between colleges and universities; and diversity/multiculturalism. Background/experience in private higher education is a plus. Experience managing grant programs is a plus. Master's degree required, doctorate preferred. Review of applications begins March 27, 2000. Applications accepted until position filled. Salary is commensurate with experience. Send letter of application, resume, 3 references and writing sample (5 pages max.) to Associate Director Search Committee, CAPHE/CIC, One Dupont Circle, NW, Suite 320, Washington, DC, 20036. EO/E.

DEPAUL UNIVERSITY

POSITION ANNOUNCEMENT

ASSISTANT / ASSOCIATE PROFESSOR

DePaul University's School for New Learning anticipates one tenure track position at assistant or associate level in the business disciplines.

The School for New Learning is one of the eight colleges of DePaul University. It offers individualized, competence-based Bachelors and Masters degrees to adults in the Chicago metropolitan area. Faculty teach content and core skills courses, and advise mentor individual students who are developing individual curricula. Because the School has an outcomes focus and an interdisciplinary approach, faculty engages considerable program development and assessment.

The School seeks to add to its diverse faculty an individual who has strong experience with adult students and enjoys working in a non-traditional setting.

QUALIFICATIONS

This position requires an earned doctorate or terminal degree, with an emphasis in management, marketing or economics. The ideal candidate will demonstrate understanding of the connections between the liberal arts and the contemporary business environment, and be committed to working with adult learners.

APPLICATION

Candidates should send curriculum vitae, three references, and a cover letter containing a brief statement of their educational philosophy and interest in working adult learner

Faculty Search Committee
DePaul University School for New Learning
Office of the Dean, ATTN: Ms. Jacquelyn Thomas
25 East Jackson Boulevard - Lewis Center, 2nd Floor
Chicago, IL 60604

lthomas1@wp.post.depaul.edu

Salary will be competitive. Applications are expected to begin July 1, 2000 or as soon thereafter as possible. Review of candidates will begin March 31, 2000.
THE LOS ANGELES COMMUNITY COLLEGE DISTRICT invites qualified individuals to apply for full-time faculty positions at the nine colleges of the District. Recruitment and selection are made from continuous pools in 57 academic and 87 vocational fields. Approved applications are valid for three years; candidates may renew at the end of that period by filing a renewal application. Visit our Internet home page http://www.lacccd.edu for information.

WOMEN, MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY.

• FACULTY POSITIONS

REQUIREMENTS: Applicants must meet State requirements either by a credential or degree.

SALARY: The current salary range is $33,920 to $59,830 for new employees, with a potential maximum of $63,050, for a 40-week academic year. New employees to the District will be allocated within the salary range according to previous training and experience. Employee benefits include 25 paid holidays/vacation days annually, district-paid medical/hospital, dental and vision care plans, and a 740,000 group life insurance policy. Regular faculty, who retire after a vesting period, have lifetime medical coverage if Medicare enrollment is maintained after age 65.

FILING AN APPLICATION: For each subject field, a separate application must be filed. Applications may be obtained (specific field(s)) by calling (213) 901-9211, or FAX (213) 901-9241, or reply by e-mail on the Internet to jobs@lacccd.cc.ca.us including name, address, phone, and subject.

Legible photocopies of transcripts are acceptable for the application; official transcripts will be required. Applications may be filed in person or mailed to the Academic Selection Unit, Los Angeles Community College District, 770 Wilshire Blvd., Los Angeles, CA 90017.

In accordance with its strong commitment to diversity, the District encourages all qualified candidates, including members of underrepresented groups, to apply in all subject areas for which they qualify.

THE LACCD IS AN EQUAL OPPORTUNITY EMPLOYER.

---

Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position in Development:

Major Gifts Officer

Reporting to the Director of Major Gifts, the Major Gifts Officer's primary responsibility is to cultivate and solicit major gifts ($25,000 minimum) for the College. Other duties include working with the development staff, volunteers and other Colby administrators and faculty to identify major gift prospects in specific regions of the country; designing cultivation and solicitation strategies and securing follow-up activities and stewardship incentives as the primary or secondary staff person in specific regional efforts. A Bachelor's degree, preferably from a small liberal arts college, a minimum of one to three years' experience in development, including personal solicitation of major gifts; and an understanding of and commitment to the values of a liberal arts education are required. The successful candidate must be willing and able to travel extensively, have a commitment to team participation, be deadline and detail-oriented, and possess excellent writing and speaking skills. Candidates with relevant experience and transferable skills will be considered.

Interested candidates should submit two copies of a cover letter and two copies of a resume, including the name and telephone number of three references to: Douglas C. Terp, Director of Personnel Services, Colby College, 500 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action Employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby website www.colby.edu
ASSISTANT DEAN OF ADMISSIONS

Reporting to the Dean of Admissions, provides professional expertise in the recruitment and selection of freshman students with primary responsibility for Latino student recruitment. Interviews candidates for admission, participates in group information sessions, folder reading, and other projects.

Successful candidate will possess an undergraduate degree and 2-5 years related experience. Knowledge of and enthusiasm for the College's mission and niche in higher education, sensitivity to multicultural issues, and appreciation of differences in secondary school background is essential. Strong communication skills, an ability to work both independently and in teams necessary; significant travel required.

Swarthmore College offers challenging professional opportunities and an excellent compensation package. The College is located in suburban Philadelphia, a region with exceptional higher education and cultural environments.

Please send letter of interest, resume, and the names, addresses, and phone numbers of three professional references to: Associate Director, Human Resources, Swarthmore College, 500 College Avenue, Swarthmore, PA 19081. Review of applications will begin immediately and applications will be accepted until the position is filled.

Swarthmore College is an equal opportunity employer committed to excellence through diversity.

OFFICE OF MULTICULTURAL AND INTERNATIONAL STUDENT SERVICES

The University of Houston-Clear Lake, located in the Clear Lake recreational area halfway between downtown Houston and the Gulf of Mexico at Galveston, is an upper-level and master's granting university enrolling 7100 students. UHCL seeks two dynamic, dedicated individuals to initiate, plan, and coordinate various multicultural and international programs, services and activities which lead to the continued development and enrichment of a culturally diverse campus environment.

DIRECTOR

Responsibilities: The director provides leadership and supervision for the office by performing administrative duties such as planning, assessment, program implementation, budgeting, and coordination of professional, support, and student staff; serves as an advocate for students; collaborates with faculty and staff; conducts and reports on pertinent research; maintains a professional network; and serves on various university committees.

Qualifications: A master's degree in student personnel, higher education administration, multicultural studies, counseling or related field with at least two years experience working with minority and international students in a higher education setting. The successful candidate will have excellent administrative and management skills; knowledge and experience of issues pertinent to a diverse student body; knowledge of student development and skills in transferring theory to practice for diverse students, particularly adult students; understanding of organizational development in higher education; the demonstrated ability to lead change; strong communication, interpersonal, time management, and conflict resolution skills. Experience working in a college multicultural student services office, desktop publishing and HTML coding experience, and bilingual skills (Spanish/English) are desirable.

Salary: Salary range is $2961 to $3553 per month.

COORDINATOR

Responsibilities: The coordinator advises students, develops programs, and consults with faculty, staff, and the community to coordinate services for minority and international students. Develops, implements, and assesses international student orientation, mentoring, language enhancement, and friendship family programs. Assists the director in creating study abroad and ESL opportunities for students and in managing the overall operations of the office. Serves as an advocate for students.

Qualifications: A bachelor's degree with a master's in progress in student personnel, higher education administration, multicultural communication, or related field and experience working in a higher education setting with multicultural and international students. Knowledge of student development; skill in developmental programming; understanding of minority and international issues and cultures; excellent management and organizational skills; individual and group advocacy skills; and excellent verbal and written communication skills, especially with those for whom English is a second language. Experience in designing and implementing transition programs for international students, study abroad and ESL programs, and living abroad are desirable. Desktop publishing, HTML coding, and bilingual skills are also desired. A completed master's degree is preferred.

Salary: Salary range is $2240 to $2688 per month.

Both positions are full-time with a comprehensive benefits package. Start dates are flexible. To apply submit a letter of application, a complete resume, and the names and contact information of three current professional references to:

University of Houston-Clear Lake
Office of Human Resources
2700 Bay Area Boulevard
Houston, Texas 77058-1098

An Affirmative Action, Equal Opportunity Employer
COMMUNITY COLLEGES OF SPOKANE

VICE PRESIDENT OF INSTRUCTION
SPOKANE COMMUNITY COLLEGE

Community Colleges of Spokane, Spokane Community College invites applicants for the position of Vice President of Instruction. This position is the chief academic officer for the college and reports to the president. SCC is a member of a three-unit district comprising the Community Colleges of Spokane and is widely known for its professional/technical programs as well as its broad liberal arts transfer program. The vice president is responsible for providing the leadership and vision for all instructional programs at Spokane Community College. The Vice President of Instruction will oversee the development and improvement of the college as a world-class provider of quality education, workforce development, information technology use and distance learning; will provide leadership to strengthen partnerships with business, government, and other academic institutions. The successful candidate will be an insightful, forward-oriented strategist who can lead others in search of new solutions to current and future challenges.

Minimum qualifications include an earned Master’s degree form an accredited college or university. Three years increasingly responsible professional experience which includes supervision of staff, college instruction, higher education administration, finance, organizational development, and curriculum design, or any equivalent combination of education and experience. VIOLENCE INSTITUTE OF NEW JERSEY
AND UMDNJ-SCHOOL OF PUBLIC HEALTH

RESEARCH DIRECTOR
FACULTY POSITION AVAILABLE

The Violence Institute of New Jersey (VINJ) at the University of Medicine and Dentistry of New Jersey (UMDNJ), and the UMDNJ-School of Public Health invite nominations and applications for the position of Research Director at the Violence Institute of New Jersey. The Violence Institute of New Jersey at UMDNJ, based in Newark, was established in 1997 to serve as a multi-pronged organizational resource to assist New Jersey in addressing impossibly high rates of violence perpetration and victimization throughout the state. The Institute undertakes applied research and evaluation and participates in the development of public policy on violence-related issues.

The UMDNJ School of Public Health is sponsored by UMDNJ in cooperation with Rutgers, The State University of New Jersey, and the New Jersey Institute of Technology and in collaboration with the Public Health Research Institute. The state-wide UMDNJ-School of Public Health confers the MPH, DrPH, and PhD degrees.

Candidates must possess a distinguished scholarly record of publishing in refereed journals, an established record of extramural research, strong research design & quantitative/qualitative statistical analysis skills, and excellent writing skills. Background in violence studies desirable. Qualified candidates should have a doctoral degree in the social sciences. Rank and salary will be commensurate with scholarly accomplishments.

Please send letter of application, CV, one research paper and names of three references to:

Chair, Search Committee
Violence Institute of New Jersey
20 Bergen Street
Newark, NJ 07107-3000

The selection process began February 15, 2000 and will continue until the position is filled. The UMDNJ is an Equal Opportunity Employer. Women and people of color are strongly encouraged to apply.

AMHERST COLLEGE

ASSISTANT/ASSOCIATE DIRECTOR OF ALUMNI AND PARENT PROGRAMS

Amherst College seeks an enthusiastic, organized individual to work in the area of Alumni Relations and fundraising. The College is currently in a campaign projected to end June 30, 2001.

The successful candidate will support the fundraising and non-fundraising activities of alumni classes and organizations on and off campus alumni/parent programs. Primary responsibilities include recruiting, training, motivating and supporting volunteers and organizing the resources of the College in an efficient and imaginative way. Responsibilities include selection and motivation of class agents, management of the Annual Fund and Reunion Special Gift activities, solicitation of prospects, and support for class activities including Reunion and Class Notes. Extensive logistical and organizational ability and a working knowledge of facilities, resources, and the interest of people on campus are important components of the job.

Qualifications: Bachelor’s Degree, fundraising and/or alumni/volunteer coordination experience preferred, and exceptional organizational and interpersonal skills. The successful candidate must have a strong commitment to liberal arts education and to the importance of Amherst’s relationship with its constituencies. Evening and weekend work is required.

Interested candidates should submit a letter of interest, resume and three references to:
Office of Human Resources, 201 Converse Hall, Box 5000, Amherst College, Amherst, MA 01002-5000. A review of applications will begin on April 1, 2000 and continue until the position is filled.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities and disabled persons to apply.

UNIVERSITY OF WISCONSIN
MADISON

ASSISTANT DEAN

The University of Wisconsin’s College of Ag & Life Sciences, Office of Academic Student Affairs seeks an Assistant Dean to lead and administer programs for minority and disadvantaged students; to contribute to the general advising and student programs in the office, and to provide leadership to the career advising and services activities in the College of Ag & Life Sciences. Duties include developing and implementing plans for minority student recruitment, working with faculty and departments to plan and implement retention programs for minority and disadvantaged students; advising minority student groups, participating in outreach and student contact programs and events for the Office, advising students at orientations during the academic year; assisting in development of policies and procedures for the academic affairs of the College and serving on College and University committees.

Candidates must have a Master’s degree, with a Ph.D. preferred, and three to five years experience in minority/disadvantaged student programs. Experience or a degree in one of the disciplines of agricultural and life sciences and experience in business is useful but not required. Excellent leadership, organizational, administrative and communication skills are required. Minimum salary is $48,600, commensurate with background and experience.

To apply, send a letter of application, resume, and three letters of reference to: Jane Mencel, Room 116 Agricultural Hall, University of Wisconsin-Madison, 1450 Linden Drive, Madison, WI 53706. U. S. A. Confidentiality is requested in writing. Information regarding applicants and nominees must be released on request. Failure cannot be guaranteed. The University of Wisconsin-Madison is an Equal Opportunity Affirmative Action Employer.

Monroe Community College
Rochester, New York

Announces a vacancy for the positions of
Vice President of Student Services
and
Vice President of Administrative Services

Monroe Community College (MCC), a multi-campus comprehensive community college located in urban and suburban Rochester, New York, invites applications and nominations for the positions of Vice President of Student Services and Vice President of Administrative Services. These positions present an exceptional opportunity for an experienced administrator with vision to lead and manage a high profile institution in better meeting its student success goals.

MCC is an important educational institution in a city with an international reputation for excellence in products and services. Located in Rochester, New York, MCC serves a metropolitan area of over one million people and is the home of several institutions of higher education and Fortune 500 companies. Monroe Community College, a member of the League of Innovation in Community Colleges, has an enrollment of nearly 22,000 credit and non-credit students offering more than 70 degree and certificate programs. Fully focused on the success of its students, MCC ranked among the top ten community colleges in the number of degrees awarded. Graduates transfer successfully to dozens of excellent senior colleges including twenty with which we have developed dual admissions programs. Career program graduates readily find relevant jobs in the Rochester economy.

Vice President of Student Services

College Officer directly responsible to the President for the supervision of all Student Services functions which include: Athletics, Counseling and Testing, Educational Opportunity Program, Financial Aid, Graduation Certification, Health Services, Public Safety, Student Center, Transfer and Placement, Work and Learn Center and the Student Services Center of the Damon City Campus.

Minimum Qualifications:
- An earned Doctorate in Higher Education, Educational Administration, Student Personnel or another appropriate field preferred; Master’s degree required. A minimum of three years of senior level administrative experience in higher education (preferably in a community college setting). Individual should be skilled in student development/services administration; possess excellent organizational, communication and interpersonal skills; be adept in application of technology to student services functions.

Vice President of Administrative Services

College Officer reports to the President and serves as the Chief Financial Officer of the College. Responsible for managing the Administrative Services Division which includes the fiscal, facilities, and risk management operations of the College. The divisional departments include: Purchasing, Payroll, Building Services, Physical Plant, Accounting, Bursar, and Budget.

Minimum Qualifications:
- A Master’s degree in Business Administration or a related discipline is required. CPA is preferred. A minimum of three (3) years of senior level administrative experience in higher education (preferably in a community college); The individual should be knowledgeable about all aspects of administrative services; possess proven organizational, communication and interpersonal skills and be adept in applying technology to administrative services functions.

Application Process:
- Screening to commence on April 19, 2000. For full consideration, all materials must be postmarked by this date. Initial materials should be submitted to: resume, name, address and phone number of three references; letter of interest identifying proven achievements that address the challenges and preferred qualifications identified for this position (limit to 4 pages). Additional materials will be requested as needed. Send information to: Dr. Sherry D. Ralston, Director of Human Resources, Monroe Community College, 1000 E. Henrietta Rd., Rochester, NY 14623-3780.

Expected Date of Employment:
- September 1, 2000.

Compensation:
- Salary and benefits competitive and commensurate with experience and qualifications.

Confidentiality:
- The College will make every effort to maintain the confidentiality of the applicant pool until the finalists have been selected at which time the names and background materials will be public. Finalists will be notified in advance.

Student Affairs: The University of Michigan, Office of Multi-Ethnic Student Affairs, is seeking a Progra Coordinator to advise Hispanic/Latino/a students. The Coordinator will provide leadership and guidance to students related to social adjustment and academic performance. To apply, please send letter of interest, resume, and three letters of recommendation to: Ms. Adina V. Zanotti, Office of Multi-Ethnic Student Affairs, The University of Michigan, 1246 Straus Hall, 304 E. Ann Street, Ann Arbor, MI 48109-3121. The University of Michigan is an equal opportunity employer.

Applications from women and minority candidates are strongly encouraged. Screening of applications will begin on March 13, 2000. No resumes will be considered after April 7, 2000. Send letter of interest and resume to:

E. Frederic Dennis
3200 Michigan Union
530 S. State Street
Ann Arbor, MI 48109-1347

The University of Michigan

TITLE V COORDINATOR
(12 MONTH POSITION)/ASSISTANT OR ASSOCIATE PROFESSOR

Commensurate with credentials (Asst. Professor $45,152-$46,776; Associate Professor $51,660-$56,000). REQUIRED: Terminal degree in a related area Doctorate in Education; eligibility appointment to rank as Assistant Professor or Associate Professor in Department of Education; at least 3 years experience in higher education; two or more years of experience in direct management of state and federal grant programs. PREFERRED: Specialization in Elementary Education or Reading, possessing a degree in Title I or Title II program management.

Submit the following to: Dr. Ann A. Sutton, Director of Business Operations, Title V Grant, 205 Wildcat Dr., Del Rio, TX 78840. Application form, resume, transcripts, and three letters of recommendation to be submitted. Review of applications will begin immediately and continue until the position is filled.

EEO/AAE
This University is an equal opportunity employer.

Monroe Community College is a unit of the State University of New York. It is the policy of the University and of this College not to discriminate on the basis of sex, race, color, religion, national origin, disability, age, or marital status in admissions, employment, and treatment of students and employees in any educational program or activity.
TEMPLE UNIVERSITY
SCHOOL OF TOURISM AND HOSPITALITY MANAGEMENT
Philadelphia, PA

Temple University is a large urban university located approximately 2 miles north of Center City Philadelphia, the heart of the local tourism industry. Philadelphia's extensive tourism, hospitality, sport, and recreation venues make the city ideal for teaching and learning experiences for Temple University faculty and students. The School of Tourism and Hospitality Management was established July 1, 1998. The School offers four degree programs, the existing bachelor's and master's degrees in Sport and Recreation Management, as well as the new bachelor's and master's degrees in Tourism and Hospitality Management. The School is a self-standing school, affiliated with Temple University's Fox School of Business and Management.

The appointments are tenure track positions beginning July 1, 2000.

THREE POSITIONS AVAILABLE:

- ONE ASSOCIATE/ FULL PROFESSOR OF TOURISM AND HOSPITALITY MANAGEMENT

- TWO ASSISTANT PROFESSORS OF TOURISM AND HOSPITALITY MANAGEMENT

The selected applicants will be responsible for teaching undergraduate and graduate courses in the tourism and hospitality management curriculum. Active participation in professional national and local associations, community and university service, and research will be expected. Developing and maintaining a productive line of research, along with external funding, is expected. The positions require the supervision and mentoring of undergraduate and graduate interns.

Applicants should have teaching and research experience in tourism or hospitality appropriate to the appointment level desired. A proven track record of publications, grants, and funding will be reviewed for appointment as an associate/full professor or as assistant professors. Industry experience is desirable. An earned doctorate is required.

Applicants for these positions should submit a letter of application, curriculum vitae, the names of three references, sample publications, and other supporting materials to:

Dr. Elizabeth H. Barber
Academic Director, School of Tourism and Hospitality Management
Temple University
103 Pearson Hall (048-00)
Philadelphia, PA 19122
215-204-6294
betsyb@astro.temple.edu

Application review will begin March 15, 2000, and continue until the positions are filled.

Capella University's School of Psychology is hiring adjunct faculty in the following areas of specialization: Addiction Psychology, Clinical Psychology, Educational Psychology, Family Psychology, Health Psychology, Organizational Psychology, and Sport Psychology.

Context: Capella University is a regionally accredited institution of higher education which offers undergraduate and graduate degree programs, certificates, and continuing education to adult learners who seek to integrate advanced study with their professional lives.

Responsibilities: Adjunct faculty are part-time faculty who serve as independent contractors. Adjunct faculty teach graduate courses in the core and specialty curriculum, mentor graduate students in their specialty area, and serve as residency faculty at academic sessions. They serve on School and program committees and share full voting privileges in academic matters. With members of the full-time core faculty, adjunct faculty are responsible for assuring the student's educational experiences are consistent with the prevailing national standards for the education of professional psychologists.

Qualifications: 1) Earned doctorate. 2) Interest in and commitment to teaching in an online environment. 3) Proficient in the use of Internet tools. 4) Have prior graduate teaching experience.

Salary: Commensurate with experience and qualifications.

Starting Date: April 1, 2000

Deadline: Review of applications will continue until positions are filled.

Application Procedures: Send letter of application, vita, three letters of recommendation and transcripts to:

Janet Korpi

CONFERENCES
American Association for Affirmative Action DC 43
Over the past two years, I have been involved in an effort to revive the Cuban Club of Tampa. This mutual aid society has served the Cuban and Cuban American communities for 100 years, providing medical service, education, entertainment and recreation at its neoclassical clubhouse in Ybor City. When I joined the board of directors in September 1997, there were only 25 members left. Most of them were over 70 years old. When I became president in May 1998, the club was on the verge of extinction.

To attract new members, the club revived some of its traditional activities, like the annual Mother’s Day Picnic, and created new ones, like the Mambo Walking Tour and a tour of the Ybor City Museum. The club also invited Cuban and non-Cuban members, recognizing that the revival of the club could not depend exclusively on the goodwill and generosity of Cuban Americans.

Third- and fourth-generation descendants of Cuban immigrants, myself included, have only the vaguest notion of what it means to be Cuban. When I joined the Cuban Club, I knew only that I was proud to be a fourth-generation descendent of a Cuban cigar worker who settled in Ybor City in 1889, but I had done little to preserve my cultural heritage other than learn Spanish in school. Nonetheless, I accepted the presidency of the Cuban Club out of a sense of duty, unaware of the cultural ambiguity that I would experience as the representative of a Cuban institution. In the process, I also discovered some things about the meaning and relevance of cultural and ethnic identity in our “post-modern” lives.

Those who already cherish their cultural background and explore their ethnicity immediately recognize the value of the Cuban Club as the guardian of what is left of Cubanidad in this community. Those who had already rejected their Cuban identity also rejected the Club out of hand. One of my cousins explicitly rejected any notion that he is Cuban. “I am not a Cuban. I am American,” he says. The rejection of the former validated the latter. Other people might not explicitly reject their cultural heritage, but they certainly do not embrace it either. Being Cuban or Cuban American is no longer important or valuable to many third- and fourth-generation Hispanics.

The members of the famous “Generation N” are more likely, in fact, to embrace the Cuban and American halves of their cultural heritage. As second-generation Cuban Americans, they don’t face the same forces of assimilation that have led older generations to deny the facts of their ethnic composition. In these younger, more culturally assertive and aggressive people, I see hope for the survival and redefinition of our ethnic identity. In time, they might even reverse the debilitating trends produced by the negative stereotypes associated with the Cuban and Cuban American communities. Children and grandchildren of Cuban immigrants choose not to define themselves as Cubans because of some allegedly negative characteristics of that ethnic identity. I know of one second-generation Cuban American, for example, who rejected membership in the Cuban Club but joined his Italian-American club in the Italian Club—a symbolic rejection of his cultural background and a deliberate attempt to assume another “Latin” identity that is less “Cuban.”

Many third- and fourth-generation descendants of Cuban immigrants not want to admit to being Cuban. To define oneself as Cuban is to define oneself by the negative characteristics of that ethnic group. The Cuban Club and the Cuban Cuban-American community of which it is the most visible part, can be associated with unthinking, violent, or even criminal behavior. In 1991, one general assembly meeting ended in a full-scale brawl that only ended with the fatal shooting of one member. This kind of behavior, reinforced and over again by images of even more intense and passionate behavior at political protests, has generated negative stereotypes and diminished pride that might otherwise come with embracing our Cuban heritage.

Cuban immigrants and their families and their descendants need to be proud of their heritage. American cultural and educational institutions will not create positive images for Cubans, Mexicans, Puerto Ricans, Haitians, Nicaraguans, or Brazilians. Cubans, like Hispanics in general, need to assert their Cubanidad with pride, resisting the forces of assimilation by defining and promoting their ethnic identity in their terms. Social organizations like the Cuban Club, by focusing on the positive aspects of Cuban culture and history—like the courage of mambises—can make people proud of their heritage. Our efforts have produced results at the Cuban Club, which now serves more than 100 members. Ironically, Cuban cigars, rum, music, and culture seem to be more popular among non-Cubans than Cubans today. The descendants of Cuban immigrants simply need to embrace what they already possess and which so many others seem to crave.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@ol.com for guidelines.
"None of us is as smart as all of us"
American Association of Community Colleges

The Board of Directors of the American Association of Community Colleges (AACC) invites applications and nominations for the position of President/CEO. After nine distinguished and productive years as President and CEO of AACC, Dr. David Pierce has indicated his desire to retire.

The Association provides information and leadership to 1,200 community colleges in the United States and abroad, serves as an advocate for over 14 million credit and non-credit students, and is a major voice with Congress, the Department of Education, and other decision-making bodies. As a result of these efforts, community colleges have never been stronger.

It is the intention of the 32-member Board of Directors to continue and expand AACC leadership at the local, state, national, and international levels.

Selected Qualifications

Education Scope

- Earned doctorate preferred
- Demonstrated understanding, commitment, vision, and enthusiasm for the community college movement, and the ability to foster progress for its members.

Candidate Profile

The President/CEO of the American Association of Community Colleges will possess these demonstrated skills:

- Understand and be committed to the philosophy and values of the community, technical, and junior college movement.
- Comprehend and have direct experiences with local, state, national, and international community college issues.
- Exhibit strong networking and advocacy skills with organizations involved with community college actions, including Congress, the Federal executive branch, and other decision-making bodies.
- In connection with other national higher education organizations, develop collaborative positions on issues of mutual benefit.
- Provide assistance to member colleges related to emerging technologies in the teaching/learning process.
- Strong, managerial skills with a commitment to professional development of AACC headquarters staff.
- Acknowledged ability to raise funds and lead entrepreneurial efforts which support the mission of the association.
- Work successfully with a high profile board and affiliate organizations representing colleges with diverse demographics, geography, and programs.
- Implement support mechanisms for the diverse students that attend community colleges, including the under-served and the under-served.
- Strong leadership skills which result in a well-defined vision of the future of community colleges, and the verbal and written skills to articulate the message to a wide range of internal/external constituencies.
- Continue joint AACC/ACCT efforts.
- Participate in AACC related state, regional, and local activities.

Application Process

The successful candidate will describe in writing how he or she meets each of the above profile items include specific examples.

In addition, each applicant should submit a current resume, and the name, business, and home telephone numbers of six references.

Dr. David H. Poniat, President Emeritus, Sinclair Community College, serves as search consultant to the AACC Board. He may be contacted at:

Sinclair Community College
444 West Third Street
Dayton, Ohio 45402-1460
PHE: (937)512-2865
FX: (937)512-5130
dponiat@sinclair.edu

Address nominations and completed application to:
Ms. Earlene Daff, CPS
Suite 12380
Sinclair Community College
444 West Third Street
Dayton, Ohio 45402-1460

Compensation

Application commences on March 15 and continues through April 30, 2000.

Salary, benefits, length of contract, and other terms and conditions of employment are negotiable and will be competitive.

The reporting date for the President/CEO is subject to agreement between the Board of Directors and the successful candidate.

American Association of Community Colleges

Headquarters for the American Association of Community Colleges is

One Dupont Circle, NW
Suite 410
Washington, DC 20036-1176
PHE: (202)385-2070

The association is an equal opportunity employer and does not discriminate on the basis of race, color, national origin, gender, sexual orientation, disability, or age. For more information, visit the AACC website at www.aacc.nche.edu

Hallmarks of the successful candidate will be enthusiasm for the community college movement, positive collaboration with multiple constituencies related to community college advancement, and high level operational skills.

The candidate will be a person who demonstrates the relationships are a primary organizing principle and will be a person whose authenticity attracts commitment to a future for a higher education that fulfills the possibility.

I PUNTO FINAL I
The Big Race 2 back cove
A Doctoral Program for All Community College Disciplines

By Gustavo A. Mellander

Scholars have identified America's 20th-century invention of the community college as one of the nation's most important educational achievements. It revolutionized postsecondary education by opening it up to millions not previously served.

Community colleges are the embodiment of America's ideals and their lofty goal of opportunity for all. They personify America's belief in social equality, individual accomplishment, and the nation's "can do" optimism.

It has been the Open Sesame for hundreds of thousands of Hispanics. More than 60 percent of all Hispanics who have attended college began their careers at a community college.

History

The concept of the first two years of university as a specialized institution that could also offer vocational education was a long time in coming. Harvard was established in 1636. The first public two-year college took another 265 years. Joliet Junior College was founded in 1901. By 1990, there were 20 community/junior colleges, 490 in 1930, just fewer than 500 in 1945, and by 1970, more than 1,000.

Today they number about 1,200. They enroll more than five million academic-credit students--and about as many non-credit students. A success story if there ever was one.

Similar to four-year institutions, they are also an amalgam of the nation's high schools from which so many sprouted. Their success is widely accepted and acknowledged throughout the world. Many attempts have been made to transplant the concept overseas, but the efforts have failed to blossom as fully as many have hoped. They are truly an American invention and perhaps suited to flourish only here.

Although begun 100 years ago, the movement received its biggest impetus from a man who never went to college and barely got through high school--Harry S Truman. In 1947, President Truman appointed a national commission to democratize higher education by opening its doors to millions of returning GIs.

Many attended community colleges. And many were the first in their family to go to college. Within a decade, the "boom years" of community colleges were clearly under way, with a new school being launched every week somewhere in the nation.

During those years of enormous expansion, many of the colleges' instructors were experienced high school teachers, whisked away with an abandon that is still resented by some school districts. Those teachers are now retiring as quickly as they appeared. The exodus will be monumental and will continue for the next ten years.

NCCCE

The National Center for Community College Education (NCCCE) at George Mason University in Fairfax, Virginia, was created in large part to address that need. It is celebrating its 11th year of offering a doctor of arts degree specifically designed for community college teachers. It is the only program in the nation dedicated to community college teaching.

The center was launched in 1988, when it was clear that Virginia and the nation would be facing a massive community college faculty retirement problem. Some estimates indicated that a full 50 percent of the teachers would retire by the year 2008.

It was also clear that many of Virginia's and Maryland's community college teachers were tired and disillusioned--burned out, if you will. After teaching elementary-level courses for over twenty years, many were exhausted. They needed a rejuvenating academic experience.

The Doctor of Arts

It was decided to create a program that could re-introduce those teachers to the academic love of their youth. So a very unique doctoral program was designed with an emphasis on teaching rather than the research emphasis that is the focus of traditional Ph.D. programs. The D.A. in community college education is designed to increase the knowledge and skills of current faculty and to train the next generation interested in teaching at the community college level.

Only 15 of the 55 doctoral credits are in community college history, practices, or education. The bulk of the program is pursued in the student's teaching area, i.e., biology, chemistry, communications, English, geography, history, mathematics, music, physics, public administration, etc. So instead of establishing a single doctoral program, more than twenty-five were established--all discipline-based.

The National Center has purposely hired adjunct faculty who are practicing community college professionals, either teachers or administrators. The state chancellor or the president of AACC are frequent lecturers in the program as well.

In many ways, the program reflects the community colleges strive to serve. Many of its students are in their mid-40s, with families at full-time careers. Most are current community college faculty, others are government or military personnel who plan to retire soon or other professionals seeking a second career. The program has grown to more than 200 students. To meet their needs, classes are offered on weekdays, some distance-learned classes are also available.

Since Mason is a member of the Consortium of Universities of the Washington Metropolitan Area, students can also take doctoral classes at any of the 13 member universities and pay George Mason's low tuition rates. Students therefore have a unique opportunity to pursue pertinent doctoral-level courses at universities within driving distance.

For more information, see http://gse.gmu.edu/department/nccce/handbook.htm or e-mail nccce@gmu.edu.

Dr. Mellander is a professor at George Mason University.
Raúl Cárdenas: Hands-on Visionary

Now Leading Maricopa Community Colleges

BY LOUISE GACIOCH

"None of us is as smart as all of us," Raúl Cárdenas, the 1999-2000 chancellor of the Maricopa Community College District, frequently comments. Indeed, "collaboration" and "communication" are the watchwords of this lifelong educator.

Dr. Cárdenas' chief reason for stressing cooperation? Students. "Whatever helps the students is what we must do. We are here for them," he says.

"All times, his focus is 'How can we help the students?' There is no personal ego involved. He wants to ensure the best education and opportunities for those we serve and, for that reason, teaches everyone to work together," says Stella Torres, who began the successful high school/community college liaison program, Achieving a College Education, at South Mountain Community College.

Dr. Cárdenas became founding president of South Mountain in 1978. In 1992, he was named president of Paradise Valley Community College. Last July, the Governing Board of the 10-college district selected this experienced and highly regarded leader to serve as chancellor for the 1999-2000 academic year.

"He is an excellent, steady leader with a great deal of integrity," says Linda B. Rosenthal, president of the five-person governing board. "He knows the issues of the community colleges, cares about students, employees, and the community; and has a special ability to bring together individuals of diverse backgrounds, opinions, and ideas."

"I believe the number of students dropping out of high school is much higher than many data show."

Dr. Raúl Cárdenas

Paul A. Elsner retired last June following 22 years as chancellor. Governing Board members asked Dr. Cárdenas to take over for one year while they conducted a national search for a long-term leader.

This interim chancellor believes that Hispanic students will have increased success in school and in life when all segments of education work together to meet their diverse needs.

During the four decades that he has worked in education—including 30 years in higher education—Raúl Cárdenas has had a deep concern for the future of Hispanic students of all ages. He pays particular attention to the large dropout rate among Hispanic high school students, which he terms "very distressing." He strongly advocates for college programs that help them successfully return to education.

"It's time for all segments of education to work cooperatively. When educational units work separately, there is the potential for a fallout of some kind. There is so much to gain by collaborating and always keeping in mind the best interests of students as they move from kindergarten through university," says Cárdenas, who believes that educators at all levels need to become aware of overall demographics and to develop plans that address the needs of the growing Hispanic population.

Among his recommendations:

• High schools must work closely with business and industry to si
abreast of current needs in the workforce—and then offer appropriate education, training, internships, and the like for youth. Career educational opportunities and business partnerships in colleges and universities must be a priority.

- Language training should be incorporated at all levels— including English as a Second Language and as much emphasis on reading and writing as there is on speaking a first or second language.
- High-quality mentoring, tutoring, language classes, and remediation programs are vital.
- Increased work opportunities on campuses or jobs associated with students’ areas of study, as well as grants and scholarships, must become available for Hispanic college students.
- International and intercultural opportunities for secondary and college Hispanic students allow them to see the world in a large framework and prepare them for a global economy. Students in all classes learn from international experiences of classmates and teachers.

Hispanic Role Models Paramount

Hispanic role models among teachers and administrators are paramount. “When you consider the large number of colleges and universities in this country, then look at the number of Hispanic presidents, it gives you a feeling that our community is not well represented,” says Cárdenas. “The same can be said of other administrative positions, and certainly of faculty.”

To gain confidence, all students need to see positive and successful reflections of themselves among individuals who appreciate the background and history of their own culture. “This also shows sensitivity and communicates that the role models and their institutions care and are willing to help.”

Sensitivity is important in other arenas and is often subtle but profound. When he became president of South Mountain Community College, opening the doors 14 years ago, Dr. Cárdenas helped employees to identify the needs and interests of various populations in the highly diverse community college—which is strongly populated with Hispanic students. In Phoenix in 1978, there was little or no billboard advertising in Spanish, Spanish-language television was in its infancy; and there were no Spanish-language TV stations. “We knew there was a need to reach Spanish speakers on a personal level, to let them know we care, that we understand, and that we welcome them to our college.” So, the college posted billboards written completely in Spanish. “It was symbolic, inviting—even for Hispanic persons who didn’t speak Spanish.”

This leader sees clearly what works well for Hispanic students. He is particularly proud of Maricopa programs such as Achieving a College Education (ACE), through which at-risk high school students take college courses, receive mentoring, and spend some time on a college campus. ACE Entrepreneurs works with at-risk secondary students interested in one day becoming business owners. Community business leaders mentor the budding entrepreneurs and offer internships.

Dr. Cárdenas helped start the Paradise Valley Learning Connection partnership of PVCC, Paradise Valley High School District, and Arizona State University-West. For starters, this “cooperative” works to streamline the educational system, to share resources, to keep students in school. “These kinds of partnerships bring together high schools, community colleges, universities, business, and government—the whole community—to figure out what works best for students at all levels. There’s a better feel for the needs of students when you look at education as a whole,” he says.

The Dropout Disparity

“The numbers of students who start school compared with the numbers who finish school are very disappointing. From year to year, the completion rate may increase by a percent or two, but the numbers do not show significant growth. Statistics compiled in different ways—and I believe the number of students dropping out of high school is much higher than many data show. Dr. Cárdenas says. Despite varied compilation methods, statistics show that Hispanics are less likely than other minority groups to finish high school.

Countrywide statistics from the Census Bureau, reported by the National Center for Education Statistics, show completion rates for Hispanic high school students held at about 60 percent from 1972. During the same period, completion rates for Anglo students slowly increased to about 90 percent, and African American students showed a steady climbing rate of about 80 percent.

It is a continuing challenge to help these students stay in school, earn their GEDs, and begin college. Why Latino students drop out is as complex as it is puzzling. “If there was a clear answer I that, we could resolve the problem,” notes Cárdenas, recalling that he had made related presentations since as far back as 20 years ago. “Here it’s 1999, and we’re still talking about this.”

A Census Bureau report for 1993-94 (most recent statistics) for all Arizona shows that 17.2 percent of Hispanic tenth grade students drop out, compared with 13.8 percent of African Americans and 95 percent of Anglos (all reflecting only one year).

Responding to this news, the Phoenix-based Children’s Action Alliance wrote in a January 1999 publication, One in Three: Trends, Challenges
and Opportunities Facing Hispanic Families in Arizona, "There is substantial evidence that the traditional education systems for Hispanics do not serve them well."

"In 1990," wrote the Alliance, "only 32 percent of Hispanics in Arizona had attained at least a high school education compared with 85 percent of Whites and 79 percent of the total state population. The disparity is even more dramatic in higher education, where only seven percent of Hispanics had attained a four-year college degree or higher, compared with 23 percent of Whites and 20 percent of the total population."

"Everyone must put their heads together to work on this issue. It can be done. We have to do what it takes to ensure that Hispanic students stay in school—and have futures," Dr. Cárdenas concludes.

The Maricopa Challenge

About 240,000 students in both credit and special interest (non-credit) classes attend the colleges, two skills centers, and numerous smaller sites spread throughout the metropolitan Phoenix area. Maricopa ranks among the largest and most comprehensive community college systems in the nation.

Students are taught by more than 1,100 full-time faculty and numerous adjuncts. Business, education, and government partnerships abound in this institution, known for large and diverse occupational programs as well as for general education classes that readily transfer to universities. (Sixty-two percent of juniors and seniors at nearby Arizona State University have attended a Maricopa Community College.)

Clearly, leading the district is a large challenge—one that the chancellor meets well.

"Dr. Cárdenas was a visionary at Paradise Valley Community College and, today, as chancellor," notes Jim Rassi, director of the PVCC Center for International Studies. The chancellor is envisioning possibilities but is also tuned in to the many current issues that affect students and the colleges. "He has a great sense for what is needed and what can be improved in the classroom, on campus, and in the community."

Going Global

Among his strong suits is international education, says Rassi. In 1994, Cárdenas guided the opening of the PVCC Center for International Studies, which focuses on the Pacific Rim, Mexico, Central America, and South America. "Without his expertise and leadership in international programs, we could not be where we are today in embracing globalization." PVCC has become a regional locale for the East-West Regional Studies Center in Hawaii, allowing faculty to train at the center. The chancellor continues to emphasize international study opportunities throughout the district.

Also, the chancellor was a charter member of the International Consortium for Economic and International Development and remains very active. About 40 institutions along the U.S. borders of Mexico and Canada are members of the Consortium, which was formed to build ties and to assist in trade efforts among the three countries following NAFTA in 1992.

In a separate endeavor that same year, Raúl Cárdenas in 1992 consulted with educators in Argentina to help develop a plan for a new level of higher education, similar to the community college.

Pressing for Representation

While serving on many boards over the years, Cárdenas noticed a striking lack of Hispanic representation and set out to change that. When he was a board member of American Association of Community Colleges, for example, he noticed that several groups had their own councils in order to bring perspective to pertinent topics. In 1985, he and a few others formed the National Hispanic Community College Council, and he was the founding president. The council "became very helpful... At the time, there were only about fifteen Hispanic community college presidents, and now there are approximately sixty," he says.

"To many of us, Railú is the pioneer who opened the doors for us to be considered for community college presidencies," according to Bill Vega, who became chancellor of Coast Community College, in California, in 1985. "He always seemed to have time to assist us new presidents when we called for advice and counsel. We owe him so much." Little wonder that so many have turned to this veteran educator and administrator: "Railú has established a national reputation for honesty, integrity, competence, and effective leadership."

The Hispanic Association of Colleges and Universities (HACU), an independent group, began soon after, and Cárdenas was invited to become a charter member. He became HACU's second board chair. "The intent was to truly serve as advocates for Hispanic educational interests, to provide body that would enable all institutions that serve large Hispanic populations to have a group at a national level with whom they could share need and concerns," says the chancellor.

Among many endeavors, HACU impacts public policy, ensures the Hispanic programs receive their fair share of federal funding, and make foundations aware that Hispanic students and programs "do have needs and do need assistance."

"Things have improved.

Early Emphasis on Education

Born in the border town of Del Rio, Texas, Railú's first language was Spanish. His mother and father moved to the U.S. from Mexico when the young and raised seven children.

"Mom always supported the need for education. I give her a lot of credit."

"I remember, even before we could speak much English, she wanted me to know Spanish very well. In the summers, she sent us to a lady from Mexico who had a little school in the neighborhood. This lady taught us nothing but Spanish. I remember hating the summers because all of it was grammar. We learned to write and read it well for our ages, too."

As a result, young Railú's first grade teacher promoted him to this grade. "You see, once you have a basic language, it's easy to transfer that to English. The structure is there, and it's easy to translate that."

Furthermore, Dr. Cárdenas believes that the more languages one knows, the better. "I find it very narrow-minded that some groups believe that all persons should know or use just one language. It's certainly not based on any educational philosophy."

Activities and Organizations

In 1960, he began his teaching in his native Del Rio, Texas, as a junior high mathematics instructor. He also taught junior high and high school social studies in El Paso and soon moved up to assistant principal. In 1971, he became assistant vice chancellor for student affairs at the University of California at Berkeley.

Dr. Cárdenas serves on the Commission on International Education the American Council on Education and is a member of the North Cent Accreditation-Institutions Action Council. A member, too, of The Colle Board, he received the Western Regional College Board's Exemplar Award. He is past president of the International Consortium of Education Economic Development, and a member of the coordinating council for W.K. Kellogg Foundation's Hispanic Border Leadership Institute in Arizona.

The chancellor earned a bachelor's degree in political science and history from St. Mary's University, San Antonio, a master's in educational administration from the University of Texas at El Paso, and a doctorate in education administration and student personnel from the University of Arizona.

He and his wife, Alicia, have four adult children and three grandchildren.
Dear Colleagues:

Minority access to higher education in this country can be summed up rather easily: minorities were first forbidden, then discouraged, then allowed, then encouraged, and then actively recruited. That's been its history.

Community colleges were created to democratize higher education. Their track record is phenomenal. But there are always new developments and new rallying points. One new development, well demonstrated by this issue's "Top 50" lists, is that Hispanic women have heeded the call. They are enrolling and graduating in far greater numbers than are male Hispanics.

A new rallying point is equal preparation for college—especially in math and science. A corollary is equal awareness of college as an imperative, not a remote option. And so is awareness of the scholarships, low-interest loans, and other supports that make college possible.

Community colleges were catalytic change agents from the start. We continue to look to them to quickly and creatively address the needs of our growing Hispanic population, and to help put our young people—and their parents, aunts, and uncles—on a positive path.

Community colleges, as the chief educators of the have-nots, including Hispanics, are ideally poised to help make the American dream attainable. Those in the vanguard are already hard at work on partnerships, agreements, and training that seal some of the cracks that our youth have slipped or been shoved through.

We salute the community colleges and those who strive within them, for all that they have done, are doing, and will do to make a solid education not the impossible dream but the here-and-now reality.

Adelante!

Hispanics at Two Year Colleges—By the Numbers

Degrees, Enrollment, and Faculty

By Adalyn Hixson

The big news in the Top 50 community colleges granting two-year degrees to Hispanics isn’t so new, but it has its heft.

The Latinas outnumbered the Latinos once again—heavily. Top 50’s total Latinas 10,110, up 4.9 percent over the prior year. Top 50’s total Latinos 6,119, up 25 percent. Total combined of 16,229 degrees represents a four percent increase ’97-’98 over the 15,605 granted in ’96-’97.

At CUNY-La Guardia, Latinas out-graduated Latinos by more than three to one, with 396 females graduating and 123 males.

Indeed, the males prevailed (also by hearty margins) at only three of the 50 institutions on the list: Technical Career Institutes, in New York, Texas State Technical College-Harlingen, and Central Texas College.

Was it the “technical” aspect that kept the women’s numbers down? Perhaps. But Los Angeles Trade Technical reported the most gender equality of all 50 schools, with 119 Hispanic men and 129 Hispanic women earning associate degrees.

One New Name

All but one school made the list last year too. New this year, in 41st place, is City Colleges of Chicago’s Wilbur Wright College, with 78 Hispanic degree earners.

Ten schools were down from last year by 10 or more graduates. Fourteen stayed pretty much the same—within five up or down. Twenty-six institutions were up, some of them considerably up. Florida’s Broward up 102 Hispanic graduates. California’s Ventura up 73. Florida’s Hillsborough up 70. California’s Los Angeles Valley up 54. Florida’s Valencia and New York’s CUNY-Manhattan up 52.

Fourteen schools on the Top 50 list for degrees granted are NOT among the Top 50 for enrollment.

The two additions are Community College of Southern Nevada, with 3,501, and San Diego City College, in 50th place with 3,339.

Among the top ten, enrollment is down at two institutions, up at eight, including Pasadena City College, with a whopping 862 additional over the prior year.

Faculty

This list reflects Hispanic faculty at the 50 schools with the top Hispanic enrollment.

Hispanic faculty data for some of the schools is not complete. However, Hispanic males outnumbered Hispanic females at 35 schools. Miami-Dade, El Paso Community College, and City College of San Francisco employed the highest number of Hispanic faculty.

Again, Miami-Dade leads in numbers with 865, representing 31.4 percent of its total faculty.

Laredo Community College is the leader in the percentage race, with its 242 Hispanics comprising 67.4 percent of total faculty. South Texas Community college shows an Hispanic percentage of 49.3 and El Paso—45.1.

Performance by State

Unsurprisingly, 24 schools on the list are in California. Nine in Texas. Eight in New York. Five in Florida, including Miami-Dade in the No. 1 spot. Two in Illinois. One each in Arizona and New Mexico. Compared to last year’s list, Texas lost one and Illinois found it.

Enrollment

Miami-Dade leads the numbers here too, with 30,577 Hispanic students. Forty-eight institutions on this list were there last year as well.
Reaching Out and Reaching Up

Austin Community College Going Global

BY BRIDGET MOORE

There were naysayers in the beginning. Why would Austin, Texas, of all places, need a two-year institution of higher education? The city already had one of two of the largest universities in the state—the University of Texas at Austin—and three private institutions: St. Edward’s University, Concordia University, and a Historically Black Institution, Huston-Tillotson College. All had already built a strong client base within the community. Was there really a need for another institution of higher education?

Austin voters answered “yes” in 1972 to the establishment of Austin Community College. At that time, many people in the area were underserved. A significant number wanted or needed educational services that the other schools were not rendering. They were people trying to re-enter the workforce. They were employees trying to improve their economic status by learning new skills. They were individuals who wanted to continue their education—but not pursue a degree. Maybe they just wanted to learn another language or improve their business management skills. And then there were those who wanted to pursue a baccalaureate degree but, at the time, couldn’t afford one of the other institutions. For whatever reason, they wanted to attend school. They wanted an affordable alternative.

Dr. Thomas Hatfield, the first president of Austin Community College (ACC), set out to make the college “seamless” with the community. He did this by forging links with agencies and businesses in the community. ACC, for example, arranged with Brackenridge Hospital to gradually take over its nursing education and health sciences programs. And by 1974, with the Texas Education Agency’s approval, ACC became the primary sponsor of the Adult Basic Education program.

President Hatfield had succeeded in forming co-dependent, mutually beneficial relationships. In ACC’s first semester, nearly 2000 community people enrolled. Now, some 27 years later, ACC continues to reach out with its “open door” admissions policy to help more than 25,000 students reach up.

Since Dr. Richard Fonté took over the helm in 1997, he has instituted programs that keep ACC seamless with the community.

“One of two major elements of Austin Community College’s mission is to provide essential workforce training to area residents,” Fonté said. “It is essential that the education they get at ACC prepares them for the local workforce and the global market.”

Locally, ACC is doing more than just talking about the child care crisis; it is offering a solution. Working with individual child care centers and the City of Austin, ACC has developed the Teacher TRAC (Training, Retention, and Compensation) program, which increases compensation for underpaid child care providers as coursework is completed. It also encourages retention at individual child care centers. And the bar measuring professionalism is raised. The city, the child care centers, and ACC are financially committed to the success of the program.

“It is my belief that the Teacher TRAC pro-
Program will make a significant difference in the lives of child care professionals and ultimately in the lives of the children they care for," said Fonté.

To help prepare ACC students for the global market, ACC has a Center for International Education Programs. Through this center, relationships with Mexico, Germany, the United Kingdom, and Canada have been nurtured. An academic visitation program with schools in Koblenz, Germany, and Saltillo, Mexico, is in place. COMPRO (Computerized Processes in Enterprises Involving Emerging High Technology), a program developed by ACC, is being funded by the European Union, the U.S. Department of Education, and FIPSE, the Fund for the Improvement of Post Secondary Education.

Austin Community College was one of seven grantees of the FIPSE funding in 1999 and is the second community college in its history to receive funding for this type of international program.

With so many microprocessing companies planning roots, Austin is quickly earning the nickname "Silicon Hills." A natural partnership has grown between ACC and local semiconductor manufacturing technology industry leaders such as AMD, Applied Materials, Motorola, and SEMATECH.

COMPRO, a three-year project, allows ACC to take a step even further and explore global possibilities. A joint enterprise between schools and industries in America and Europe, its premise is adding work-based learning components to American training with special emphasis on high technology. COMPRO will also involve transatlantic student and faculty exchanges involving more than 60 students overall.

Austin Community College and the Koblenz Chamber of Handwerk are the two project co-leaders, but three other institutions from each country will participate. Maine Technical College (Maine), Tarrant County College District (Texas), and Maricopa Advanced Technology Education Center (Ariz.) are the American partner institutions. Koning Willem I College (Netherlands), the Chamber of Industry and Commerce (Germany), and the Federation of Handicraft Corporations of Thessaloniki (Greece) will complete the European side of the consortium.

"The semiconductor industry is now America's largest manufacturing industry in terms of economic value-added. We contribute 20 percent more to the U.S. GDP than the next leading industry," said Daryl Hatano, vice president of international trade and government affairs with the Semiconductor Industry Association. According to Hatano, the industry employs 276,000 people in the U.S. and the average wage is twice that of private industry overall.

"Even excluding the higher-paid engineers, the semiconductor industry pays its production workers 30 percent more than the average earned by all other production workers. Clearly communities know these are jobs worth training their youth for, and students know that these are clearly jobs worth preparing for," he said.

While ACC is proud of its workforce development, equally important is providing students with a strong foundation for continuing at four-year institutions. To facilitate transfers, ACC has signed formal articulation agreements with Abilene Christian University, Angelo State University, Baylor University, Concordia University at Austin, Huston-Tillotson College, Midwestern State University, Prairie View A&M University, St. Edwards University, Southwest Texas State University, Tarleton State University, Texas A&M University, University of Texas at Austin, University of Texas at Arlington, and University of Texas at San Antonio.

The education that a student gets at ACC directly reflects local labor market needs. "Industry leaders explain what skills their employees need, and we tailor our curriculum accordingly," said Dr. Elva Allie, executive vice president of instructional affairs.

The WorkKeys program at ACC brings together the components essential to preparing productive careers. Developed by ACT, Inc., WorkKeys is a system for teaching and assessing workplace skills that connects knowing, doing and learning with earning. It is built around eight critical skills: reading for information, applied mathematics, listening, writing, teamwork, applied technology, locating information, and observation.

Employers establish job profiles by determining what level of each critical skill an applicant needs to do a particular job successfully. WorkKeys is used to assess applicants' skills and analyze whether they are high enough to do the job. If not, ACC offers instructional support. This might mean a trainer making an on-site visit to conduct workshops, or, if it takes new skill that everyone in the job would need to have, they could require that ACC revise a curriculum.

"As a community college, ACC is evolving," said Fonté. "We will continue to adapt and change as it is occurring in our college and in our community. Because ACC serves a nontraditional student population, special accommodations are made for pre-school children to attend school. The Eastview Campus has an early childhood development center open to the public, with child care provided on a sliding scale."

ACC is not just for first-time students. It has developed many continuing education programs. Its Webmaster continuing education certificate offering two specializations—one in systems applications and the other in design and media—offers a series of alternative-credit seminars covering HTML, DHTML, XML, Java, JavaScript, CGI.
Web servers, graphics and page design, and more. Enrollment is open to the public. There is no program registration fee, but fees are assessed for each seminar. Those who register online receive electronic notices about upcoming Webmaster courses. Graduates of the program can post their resume and projects, and are privy to job announcements on ACC's Webmaster server.

ACC also houses a Small Business Development Center, a satellite office of the regional SBA office at the University of Texas at San Antonio. “The center offers three primary services,” said Larry Lucero, its director. “Most people will have their initial contact with the center through one-on-one confidential counseling services.” In these sessions, counselors will guide entrepreneurs through the process of beginning their own businesses. Secondly, the center will host seminars, workshops, and conferences. “The topics,” said Lucero, “range from how to begin a home-based business to how to write a business plan to how, as an employer, to get worker’s comp.” He estimated that nearly 1,500 people attended 77 SBDC workshops and conferences last year. Conferences provide a network of mentors—“an unofficial consulting firm,” he said. Lastly, within the SBDC is a specialty center, a component capable of researching economic and market viability for a certain product in international trade.

ACC is in a growth spurt, quickly reaching and exceeding its capacity. Many factors contribute to the student influx. Primarily, the school is an affordable alternative and is accessible to the community. There are six campuses. Evening courses covering academic subjects as well as trade professions are offered. Some courses are offered via distance-learning sites.

“We bridge the gap,” Fonse said. “We take people from where they are and move them to a level where they can be successful.”

FACTS ABOUT ACC

- More than 265,000 Hispanic people lived in ACC’s service area in 1990, and projections estimate an increase to 306,661 by 2005 and to more than 405,000 by 2015, a 65 percent increase from the present.
- Hispanics are the largest minority group in the present student population.
- Hispanic enrollment has steadily increased from 179 percent to 196 percent, while other ethnic groups have declined.
- In 1998, 550 student representing 82 foreign countries attended ACC. 45 were from one of nine South American countries, and 66 students represented Mexico.
- Over the past four years, Hispanic students enrolled in Adult Education more than doubled, from 2,657 to 5,961, new 59 percent of the populace.
- ACC employs nearly 1,000 faculty and staff, 16 percent are Hispanic.
- Four administrators, 34 full-time faculty, 78 adjunct faculty, and 100 classified personnel are Hispanic.

"ACC is a wonderful place to get a head start in life. The school has a diverse atmosphere in education and population. I chose ACC because I heard many good things about the AutoCAD program. and since my major is architecture, I figured I would try it out. Also, politics is in my blood, and Austin is a wonderful mecca of political activity."

HECTOR TRISTAN is ACC’s Student Government Association President. He graduated from Mexican Carroll High School in Corpus Christi, Texas.
It is said that residents of El Paso share a fascination and passion for history that is unmatched by folks in other places. To begin with, the heritage of the Old West is everywhere in this unique community. An indelible part of El Paso's character is drawn from the fact that the city underwent much frontier excitement and to this day retains the spirit of westward expansion of pioneer America.

There was the coming of the railroads, the drama of outlaws and gunslingers, the many Indian wars and the final Indian peace, the advent of the U.S. Cavalry and the Texas Rangers. Today, these elements are still felt and revisited along with El Paso's historic mission trail, beautiful mountain vistas, and grand desert sunsets. Then there are the many Mexican restaurants—only one indication of a sizable Hispanic population. How appropriate that when called upon to lead the institution during a search for a new president, Dr. Ramon Dominguez was again ready on the scene to guide EPCC on an interim basis. His dedication to his college and community and to higher education is second to none. Ramon Dominguez has devoted the greater part of his professional career to higher education—27 years of it at EPCC. His titles at El Paso Community College have included instructor, counselor, lead counselor, Title III coordinator, associate vice president of student services, executive vice president, and, once before and presently, interim president.

Throughout his association with EPCC, he has been appointed to many committees on campus, including those on tenure, instructional affairs, developmental education, and retention. He's been busy off-campus, too, serving on advisory committees and boards. Ramon Dominguez is very optimistic about the future of higher education at EPCC as he guides the district until a permanent replacement for former president William "Bill" Campion can be installed. It is his own desire that his current role be a temporary one.

El Paso County Community College District was established in June 1969 when citizens of El Paso County voted to form a junior college district and...
elected a board of seven trustees to administer the College. The 62nd Texas Legislature answered the request for funding and appropriated the needed money.

In 1971, El Paso Community College became a reality, with 901 students attending classes held at several locations around the city. The first "campus" came to pass when the college leased a complex of buildings at Fort Bliss from the Department of the Army.

Enrollment climbed to 5,041 by Fall 1973. The next year, under the leadership of President Alfredo de los Santos, enrollment reached 7,443.

In 1974, through a grant written in conjunction with Project Hope, the College purchased a building complex in downtown El Paso that became the Rio Grande Center. Between 1974 and 1977, also with the help of Project Hope, the College developed twelve programs in the fields of medicine and dentistry. The Rio Grande Campus has housed the allied health programs and arts and sciences support program since that time.

A second campus, the Valle Verde Campus in southeastern El Paso, opened in the fall of 1978 at a cost of $153 million. A third campus, the Transmountain Campus in northeastern El Paso, opened a year later, designed to complement the visual angles of the Franklin Mountains and blend its landscaping with the surrounding desert. Mission del Paso opened in 1998 as a major high-quality facility in the East El Paso/Lower Valley area. Plans for the Mission include a Law Enforcement Training Academy.

There is also a Northwest educational facility, opened in 1994. The Rio Grande Campus underwent an initial expansion and renovation that was completed in 1980, with the addition of a five-story wing, improved utilities, and handicapped accessibility all made possible with a $7.5 million grant from the Economic Development Administration and College matching funds. The College became increasingly involved in major community initiatives by establishing the Literacy Center to serve the region's functionally illiterate and the ALPHA Center to provide basic adult education and training for employment. In 1995, a three-phase expansion project added classrooms, expanded others, and increased the number of student parking lots. The expansion included construction of a new Learning Resources Center, which uses state-of-the-art technology to assist students and faculty. New landscaping and brick walkways have created a fresh, new environment for the College's oldest teaching facility. Other notable facilities are the Center for Educational Services to the Handicapped, the Women's Center, and the Center for Business Services.

Realizing the importance of the NAFTA agreement and its impact on the El Paso region, EPCC created the Institute for Economic and Workforce Development in 1995, organizing and intensifying its training of the emerging workforce and providing education and expertise to area business and industry. The Institute brought together existing departments to increase efficiency and coordination of service. As a result, the College was awarded one of the largest training grants in the state from the Texas Workforce Commission Skills Development Fund.

The College consistently receives national recognition for excellence, as demonstrated by multimillion-dollar federal grants for curriculum development and distance-learning systems. Its Institutional

Effectiveness program has become a national model.

Last fall, the total student census was 18,850, with an average beginning-of-class age of 27.5. There are 7,932 full-time students. 10,918 part-time students. 11,450 are female, and 7,356, male. Of total, 11% are Asian American, 49% are African American, 49% International, 110 are Native American, 1,976 are White, 15,680--approximately 83 percent--are Hispanic.

The average class size is 23. There are 365 full-time faculty
Among recent distinctions, the EPCC forensics and debate team earned World Debate Institute recognition, competing against teams from such renowned institutions as Cambridge, Oxford, Harvard, Cornell, and Penn State. At the recent World Debate Institute in Burlington, Vt., four EPCC students placed second (J.T. Holden and Kenneth Dore III) and third (Mike Mata and Iris Lubas) in Novice Parliamentary Debate. Mata was also selected as one of three fellowship awardees. “The World Debate Institute is the largest summer training program of its kind in the world,” says Raymond Puchot, coordinator of forensics and debate at EPCC. “More than 300 from the U.S. and other countries participated.”

In the realm of science, EPCC was awarded a research grant to study potential contamination of the Rio Grande River. The United States-Mexico border has unique water problems. The potential for surface and groundwater contamination with infectious microorganisms and toxic chemicals as a result of agricultural, domestic, and maquiladora activities is great. The grant of $50,000 was awarded by the Paso del Norte Health Foundation Center for Border Health Research to study chemical and microbial contamination of the Rio Grande basin using a novel chemical test. “The overall goal of our research is to develop more effective methods of conducting microbial and chemical water quality studies,” says Maria Alvarez, EPCC biology instructor and project director. “The development of techniques that are reliable and inexpensive and require minimal training will facilitate the involvement of community members in volunteer monitoring efforts.”

grant provides for the hiring of 15 El Paso Community College and five New Mexico State University students to participate in the project.

Occupational training is very important at EPCC, so much so that the college offers customized, quality employee training to any business. A crew of well-trained employees, says a college spokesperson, is key to high productivity. That is why EPCC offers training in English and Spanish in just about any occupation in the El Paso-Las Cruces-Juarez area through the school's Office of Customized Training. “We offer high-quality training to business and industry in many different areas,” says Uwe Agness, EPCC customized training coordinator of the manufacturing sector. “With our 130 occupational training programs, we can train in almost anything.” Agness says that EPCC trains “off the shelf” because all training is customized to fit the needs of the business on the company schedule at their location or at the college. The customized training office can provide seminars, workshops, short-term training programs, or ongoing programs for employee replacement. In addition, the EPCC Office of Customized Training can access state funds to pay for employee training through programs such as Texas Smart Jobs and the Skills Development Fund. Currently, thirty-five local companies are taking advantage of Smart Jobs and/or Skill Development training monies, with the majority of the training done with instructors contracted by EPCC.

HO is pleased to add EPCC to its Honor Roll.
Classroom Dynamics and Retention

Motivating Students to Persevere

BY
Angela Provitera McGlynn

Ask any student or professor what the most important factors are for student success in college, and you are likely to hear: attendance, student preparedness, student ability and motivation, and teacher effectiveness.

I have put this question to both students and colleagues, and these were the most frequent answers I encountered. I was, therefore, surprised to read in the retention literature that one of the most important factors, if not the most important factor, in whether students persist to earn a degree is whether or not they experience a sense of belonging at their institution. Do they experience a sense of community? Do they have friends at the same college? The bottom line for retention seems to have more to do with students' friendships than it has to do with their studies.

By now, everyone is aware that retention rates for minority students, particularly for Hispanic American students, lag far behind those of more traditional college students. Those of us who teach at commuter colleges, who are committed to increasing those retention rates, recognize that if student friendships are to occur at all, they will probably happen within the classroom. This makes classroom atmosphere and dynamics critical variables for retention: the challenge to faculty goes beyond learning to teach effectively; beyond using multifaceted approaches and strategies.

Equally important for motivating student persistence is to create an inclusive atmosphere where students from diverse backgrounds feel safe within the classroom environment. Students need to feel that their voices are heard and valued by their teachers and by their peers. Within such a climate, the chances for friendship formation are greatly enhanced.

If we want to motivate students to learn our course content and to persist in earning a degree, we need to pay attention not only to how best we can present course material but also to how best we can manage the class dynamics in such a way as to foster bonding among students. Effective teachers seem to create an atmosphere of trust and warmth between themselves and their students, and to foster that same atmosphere among students within their classes.

Certainly, students' relationships with faculty play an important role in their sense of belonging. Professor Baron Perlman and Lee McCarr (1998) published the results of a study in which they asked 700 undergraduates to write complaints about teaching behaviors that they had observed across all the courses they had taken. Among the top ten...
complaints about teacher behaviors were: "being unhelpful and unapproachable" and "intellectual arrogance—talking down to or showing a lack of respect for students."

What interested me in the Perlman and McCann results was the parallels that I found in research I conducted this past fall semester with the majority of my 200 students in Introduction to Psychology. Although I posed two very different questions from the Perlman and McCann approach, students still identified similar factors as important to them.

In my research, I asked two open-ended questions: 1) in all the college and high school courses you have taken, are there teaching methods, strategies, or techniques that are particularly helpful to the way(s) you learn? and 2) Are there teacher behaviors—in other words, are there things that teachers say or do—that motivate you to learn and to do well?

My students not only wrote their responses privately on index cards, but I also had them work in focus groups of four students per group. Within the groups, students were asked to share their responses and to reach consensus as a group on the five most important factors they had identified. I then reconvened the focus groups into the larger class and asked each group’s recorder/reporter to state its top five. This large-group sharing allowed for some clarification and for a rich discussion.

If we really listen to our students, the retention literature on the importance of bonding makes perfect sense. Although they might use different language, students overwhelmingly report that classroom atmosphere is a critical variable in what motivates them to come to class and to do well. In response to my second research question regarding motivational qualities of instructors, students said over and over again how important it is to them to have an instructor who is approachable and who speaks to them at a level they understand. (Note the similarity with the Perlman and McCann results, despite the different angle their research took!)

In follow-up discussion with students, when I asked for specifics on what it means to be approachable, students said:
• It is important to me that the instructor knows my name and a little bit about who I am.
• I want to feel as if the instructor cares whether I come to class, and that he or she is invested in me learning the material and doing well.
• I want the instructor to be “human.” (When I asked for further elaboration, students said they want their instructors to be personal, not always to be in teacher role. They want their instructors to share a little of who they are outside the teacher role.)
• I want the instructor to use humor in class.
• I want to feel as if the instructor respects me as a person—and respects my opinions.
• I want my instructor to show enthusiasm about the discipline and about teaching.

This last statement about teacher enthusiasm was the most frequently expressed comment of all. Given this finding, colleges and universities might need to re-think professional development and renewal opportunities for faculty members, particularly for those of us who have been teaching for decades. Clearly, our students are instructing us about how to create a safe environment and are giving us tips on how to build rapport with them.

Within this context, faculty members have the added challenge of finding ways to get students to get to know one another so that friendship formation is possible. In the very first days of a course, you can try exercises that involve the learning of names. There are name games you can play involving repetition and rehearsal. There is a strategy, known as the Family name exercise, in which everyone tells some story about how he or she was named. Instructors can kick this off by sharing their own story about how their name was selected, or whether they like their name, or whether they have a nickname, or whether various people in their lives call them by different names.

Not only is this a fun way to break the ice for the first day of class, but it also is a terrific way to learn and remember people’s names since you have the added memory advantage of association. One of my colleagues, who teaches international sections of an English course, asks students to write and to share about their names. This gives students an opportunity to speak about who they are, what culture they come from, family traditions, cultural/ethnic backgrounds, etc. Again, the instructor can begin the exercise as a way of modeling and breaking the ice. This activity not only gives students a chance to talk about themselves as members of cultural groups or social classes, but it also gives everyone a sense of who is in the class.

Another first-day or early-in-the-semester icebreaker that facilitates bonding is to ask students to form random groups of five or six students. Their task within the group is to find three to five things that everyone in the group shares in common. After about five minutes, the instructor reconvenes the whole class and asks each group to identify themselves by name and then to share what they found they had in common. This is a task that most students find enjoyable, and it takes a very brief amount of time. Students immediately have a connection with at least a handful of other students, and it sets a fun tone for the semester.

After doing some “getting to know” one another exercises like the ones described here, in the third class of the semester, I usually give students an opportunity to exchange phone numbers with a classmate. I say that exchanging phone numbers is entirely optional, but I tell them that I highly recommend having a connection in the classroom in case they need a contact for class notes, assignments missed, etc. I often make a joke, such as, “Be sure to choose someone you think you can trust not to call you at 3 o’clock in the morning to ask about assignments.” I give students a minute to find a partner and exchange phone numbers. I find that the great majority of students engage in this activity and they seem to enjoy the opportunity to connect.

In two previous issues of HO (12/3/99 and 12/4/99), I discussed collaborative learning techniques in the classroom that not only promote

Menter County Community Colle
Four-Year Degrees at Community Colleges

A Response to Rising Demand, Limited Access, and High Costs

BY
Inès Alicea

A movement that allows some community colleges to offer four-year degrees to fill unmet needs in the region served by the school could benefit Latino college students since nearly 50 percent of them attend community colleges, said a spokesman for the Hispanic Association of Colleges and Universities (HACU).

"HACU does not have a policy or board position on this issue," said Dr. Gumercindo Salas, HACU's vice president of governmental relations.

"Personally, I think that the idea is a sound idea that will require some additional research and study. There is no question that many Latinos would have an option to continue their education in a community college. A four-year degree would become possible for many Latinos who cannot afford to go away to school or pay the additional tuition required in a four-year college."

A few states—Florida, Arkansas, and Utah—have recently passed legislation allowing some community colleges to offer four-year degrees in some heavily demanded subjects to reduce costs and increase access to higher education. But to be allowed to offer such programs, the community colleges face stringent requirements.

"There must be a further democratization of education at the baccalaureate level to sustain our economic growth," said Kenneth P. Walker, president of Edison Community College in Fort Myers, Fla. Edison is offering four-year degrees in partnership with some four-year colleges. "Community colleges are capable of developing innovative ways of solving the crisis of rising demand, limited access, and increasing costs—and the community college baccalaureate degree is a logical solution."

Walker also heads a new organization called the Community College Baccalaureate Association, which promotes "the acceptance of [the] community college baccalaureate degree as a means of addressing the national problems of student access, demand, and cost." Progress in getting this cause accepted nationwide has been slow.

In Arkansas, Westark Commun College is being allowed to offer four-year degrees through partnerships with four-year institutions. Florida's legislature agreed 1999 to allow community colleg to offer four-year programs if the community and the surrounding areas are underserved by four-year institutions. If they can estab that there are "economic devel
ment needs" for such programs in their community, and if they can establish a partnership with a four-year institution to deliver the degree on the four-year campus if need is established and a willing partner cannot be found, the legislature may allow the community college to deliver the bachelor's degree itself.

The legislature also recognizes that economic development needs and the educational needs of place-bound, contraditional students have increased the demand for local access to baccalaureate degree programs, said the Florida legislature in the legislation allowing community colleges to offer baccalaureate degrees.

Walker wrote in the American Council on Education's magazine The Presidency, in an article called "The Workforce Bachelor's Degree," that Florida was prompted to adopt the idea of letting community colleges offer four-year degrees when the state projected that 200,000 additional students would be enrolled in Florida's colleges in the coming years and that "postsecondary sectors and institutions are not prepared for the projected increase in enrollments."

The Florida Legislature, however, did not appropriate funds for the program in 1999, and it is unclear whether it will do so in 2000. Once money is appropriated to the program allowing community colleges to offer four-year degrees, however, the funds, said the Legislature, cannot be used for construction, renovation, or remodeling of facilities.

There has been strong opposition in some parts of the country over the proposal, even where a partnership with a four-year institution would be part of the arrangement, since the idea raises issues of usurping the power of four-year degrees, diminishing the prestige of four-year degrees, and weakening requirements to get the needed teaching faculty to get the job done. Supporters of the move say that none of the gloom and doom predictions from naysayers will occur. Instead, they argue that community colleges can do the job and can do it well and that such a move will help thousands of students who are bound to a certain school and want to extend their studies but otherwise could not.

Few states have taken action on the matter so far. The state of Arizona considered legislation in 1998 that was very similar to Florida's legislation, but the bill did not pass. Other states have toyed with the idea but have not moved forward on the issue.

In those states where community colleges have been allowed to proceed, opposition has been swift. The Utah board of regents vehemently opposed allowing Dixie College to offer four-year degree programs because, they said, it undermined their efforts to develop long-term plans for the university system. Florida community colleges faced similar opposition.

Dennis Ross, chair of the Florida board of regents, referred to the legislation as a "classic case of mission creep." Ross expressed concern about whether a newly opened four-year state university in the region would succeed with Edison Community College offering four-year degrees as well. Edison offers a new program at its Edison University Center that allows its students to earn bachelor's degrees through Thomas Edison State College of New Jersey International College in Naples, Fla., and the Florida State University.

"For the state to put resources it has into FGCU [Florida Gulf Coast University] and support community colleges' offering four-year degrees is inappropriate public policy," he said.

The chancellor of the Flo board of regents, Adam Herl also opposed the legislation, saying that the program at Edison was an example of harmful competition between Florida's university system and community colleges.

Walker said that he would try with Florida Gulf Coast University officials to make them part of the effort so there wouldn't be competition.

"The issue should not be viewed as either/or," Walker said. "The signs of community colleges in different sectors remain strong. There is a place for both. HACU's Salas agrees. The number of students completing a four-year degree at a community college could benefit Latino students, Salas, because many have not the economic resources to travel elsewhere nor the time to travel. Since they work full-time, community colleges are permitted the work and go to school in their community," Salas said.

Meanwhile, Walker told the Virginia to try to persuade the Virginia community college to offer four-year degrees.

"Expanding the community college mission to include baccalaureate degrees—while retaining our core philosophy and responsive to local needs—is a logical step addressing increasing demand access and affordability," Walker said. "This is not to suggest that community colleges should convert to four-year state colleges. On the contrary, it is essential that the location and governance of community colleges be maintained."

Walker says that in Florida,
secondary education costs less to students and taxpayers at community colleges than at state universities. The state funding for each full-time student is $4,544 for community colleges and $6,392 for students at the lower-division level at state universities. Also, the average tuition per credit hour in the community college system in Florida is $46.23 compared to the state university system, which charges $66.36 for the 1999-2000 academic year.

Walker said he believes that many students enrolled in community colleges would like to complete their degrees at the schools where they started. He cites a survey done of Edison Community College students in which 80 percent of the respondents said they would like to finish their degree at Edison.

"Regional universities do not always provide ready geographic, financial, or academic access," Walker wrote in The Presidency. "The lower tuition costs and convenient geographical locations of community colleges would mean great opportunities for significantly more students. For the adult learner who owns a home, is raising a family, and has a full-time job, taking classes at a local college is often the only viable option."

Walker also argues that the community colleges would simply build upon two-year programs already offered. For example, Edison Community College offers an associate's degree in golf course operations that is considered an appropriate degree to expand to a four-year program because of the increasing sophistication of turfgrass science, environmental considerations, and the prevalence of the golfing industry in Southwest Florida, according to Walker.

"If a state university were to offer a new bachelor's degree in an applied field such as fire science, it would be faced with hiring new faculty, acquiring new library resources, and possibly establishing new laboratory facilities," Walker said. "It would be far more efficient for a community college to expand its curriculum to include courses at an upper-division level. The expertise and facilities already exist."

Still, the reception to his message was lukewarm in Virginia.

Northern Virginia Community College President Belle S. Wheelan said that she agreed with the Florida educator that community colleges provide a low-cost learning environment with none of the usual four-year entrance requirements. But, she said, offering four-year degrees would force increases in community college costs and reduce the pressure on existing four-year colleges to provide the new programs that are needed.

Salas said that some community colleges would not be equipped to provide upper-division courses since faculty members do not always have doctoral degrees in community colleges, but Salas went on to say that if the faculty has the needed education to teach such classes, where the degree is achieved should not be an issue.

"We have different levels of postsecondary education institutions in the United States," Salas said. "Harvard, Berkeley, Michigan offer degrees, but so do less prestigious institutions, which are smaller and do not have the same prestigious faculty. They are all different."

Championship Season for Coach Medero

LADY SHARKS

33-0 for Miami-Dade's Women's Volleyball Team

by Ed Breni

I lida Medero didn't know much about the game of volleyball, but that didn't stop her from saying "yes" when she was asked if she'd be interested in coaching the Miami-Dade Community College-Wolfson women's volleyball team back in 1988.

Medero, who had coached a little volleyball during her seven years of teaching at Palm Springs Junior High in the Dade County Public Schools system, certainly wasn't familiar with the sport at the collegiate level. But Medero, who had recently begun teaching health at Miami-Dade-Wolfson, was confident that she knew enough about the art of coaching—about getting inside young people's heads and showing them what it takes to be successful—to produce results with the Lady Sharks program.

The results would not be immediate, however. Hired for the coaching job in August of 1988, just before the season began, Medero had to quickly learn her players before leading them into the Florida Community College Activities Association schedule. Not surprisingly, the Lady Sharks finished the season with just a 1-18 overall record that year. But Medero was not deterred.

"I did have an athletic background, and I knew what I needed to do in order to get good players and to get them to work," said Medero, who was a member of the fencing team at the University of Miami, where she earned her master's in education and graduated cum laude. "There was no year-round type of conditioning program for volleyball—it was just for the season—and I felt there was no way you were going to get anywhere if you just do three or four months of volleyball and forget about the rest of the year. So I implemented that."

In addition to the conditioning program, Medero seized the chance to begin actively recruiting players, not only from the state of Florida, but from across the U.S. and around the world.

Medero's work began to pay dividends in her second season. Play beefed-up schedule, the Lady S ended the 1989 campaign at 17-18 all, quite an improvement over 1-18.

But that was nothing compared with Medero and Miami-Dade-Wolfson's success in 1990, when they shocked the nation by going 44-0 and winning the National Junior College Athletic Association championship.

The NJCAA named Medero its Coach of the Year that season, and for the remainder of the decade, the Lady S were one of the preeminent women's volleyball teams in the country, winning two national titles in 1992 (going 15-0) and finishing no lower than fifth at any of the NJCAA tournaments.

While the Lady Sharks had established themselves as a force to be reckoned with, winning the NJCAA Southern Conference and state tournament championships from 1990-98, it was beginning to look if they were the Buffalo Bills of college volleyball. From 1995-96, the Lady Sharks lost four straight national championship matches to finish NJCAA runner-up.

But in 1999, the Lady Sharks swept the decade, the century, and the millennium in style, finishing a perfect 33-0 season before beating Salt Lake City College on Nov. 24 in Overland Park, Kansas, for their third national title in Medero's 11-year tenure.

"It was very gratifying," said Medero. "We
won it in 1992, but then it was like, it's almost the year 2000 and we thought we'd never get there.

And for a while, it looked as though the Lady Sharks might be playing bridesmaids once again in the 1999 championship match. They found themselves trailing Salt Lake two games to one in the best-of-five match. Needing a win in the fourth game to stay alive, things didn't look good when the Lady Sharks quickly fell behind 5-0.

With her team's back to the wall, Medero called a time-out to calm the nerves and stop the Bruins' momentum.

"I don't remember exactly what I said to the team, but I tell them all the time that we just had to play our game and we could not allow ourselves to be intimidated," Medero said. "It's not over until we get 15 points, and we had the opportunities, and we could pull it off and win the game. We had been winning all year long, and we had a strong competition throughout the year."

"I always tell them to take it point by point," Medero added. "I always stress you have to go one point at a time in order to get to 15. You don't worry about the score until it's 15. If we won one game, then we could win two more. That was basically my philosophy—we can do it."

And the Lady Sharks did indeed, getting consecutive kills from first-year student Marcela Gammara, sophomore Patricia Cesar Bernardo, first-year student Yesmina Moreno, and first-year student Olga Correa to take a 10-9 lead. They then pulled away for a 15-9 victory that set up a one-game showdown for the national title.

In the fifth game, Miami-Dade began playing like its old self, racing out to an 8-3 lead thanks to strong play from Moreno and Correa. But Salt Lake mustered a rally of its own and tied the game up at 10-10. Gammara and Moreno came up with kills to put Miami-Dade back in front, 13-11, but the Bruins scored three straight points to edge ahead, 14-13. With Salt Lake serving for the championship, the Lady Sharks fought off three straight points to tie the match at 16-16.

Needling to win the game by two points, the Lady Sharks took a 17-16 lead on a block by Gammara and Bernardo. The national championship now just one point away. Correa came through for the Lady Sharks by serving an ace that gave her team the hard-fought title.

Medero, whose career coaching record at Miami-Dade now stands at 395-93, said that each of the three national championship seasons has taken on its own identity.

"In 1990, it was like a Cinderella story. We really weren't expecting anything. In 1992, we had a very strong team, so it was like yeah, we're going to win it. And then this year, we had no idea... it was a completely different team. It was the most together of all the teams I've ever been in terms of the bench and the starters. I think that was a major factor in them helping each other out. We have a lot of distractions, that can really affect your game. These girls were really pulling for each other, and I think that made a difference."

What makes the Miami-Dade (the school merged its Wolfson and Kendall campus athletic programs in 1997) dynasty all the more remarkable is that it has taken place at the community college level. Unlike a Division I, II, or III program where coaches get their players for ten...

**TOTAL**: 395 59

years, Medero only gets hers for two.

"That's the worst part, because you get a high school player and it might take the full two years to make them into a good volleyball player, and by that time, you have to let them go," Medero said. "So that makes it quite difficult. If we had players for four years, it would be much easier, because every year we have to let go five or six players, and there's the constant recruiting, recruiting, and recruiting.

"It is a challenge," she added, "but the good thing is every year we've one of the top teams in the nation, we get a lot of phone calls. We get a lot of people that say, 'Hey, I want to play for you,' so that makes it easier. But it's always a challenge to stay on top. You can get there, but how are you going to stay there?"

According to Miami-Dade Athletic Director James W. Cox, Medero herself is the biggest reason the Lady Sharks have managed to stay on top.

"She's gone through tough times when she first came to the program, when she really didn't know the college game," said Cox. "But she's worked very hard by going to clinics and camps. She's still very interested in learning new things, and she'll go to a clinic or camp any chance she gets."

Indeed, in early January Medero was off to California to attend a national volleyball coaches clinic. "I'm always trying to upgrade my skills in the teaching area, in the psychological area," said Medero, who still doesn't concern herself as much with the X's and O's of the sport. "I have several assistant coaches [Origines Benoit and Yolanda Perez] who do all of the hitting and all the rest of the technical stuff."

With such a winning formula established at Miami-Dade, it's no surprise that several NCAA Division I programs have approached Medero about coaching opportunities. But so far Medero has declined.

"I'm quite happy here," she said. "There have been opportunities to go up to Division I, but I enjoy very much my teaching. I'm pursuing my Ph.D. degree in higher education instruction right now, and I wouldn't consider full-time coaching at least until I finish with my Ph.D."

And Medero, who was 15 years old when her family left Cuba for Florida in 1972, said she also receives a sense of satisfaction when she recruits players from countries like Colombia, Honduras, and Brazil, and then sees them move on to four-year schools.

"I have a lot of players go on to Division II because when they get here, they hardly know any English," Medero said. "Lots of players from Latin America don't speak English, so they have to spend a lot of time taking English courses...but all of them transfer and go on, and that's exactly what I want for them--for them to finish their education and either go back home and use that as a career, or for them to stay here and build their lives here."

Medero, who keeps in touch with former players scattered all over the country, said that she admires the transition her players are often forced to make. "I went through the same problems that many of these girls are going through," Medero said. "I know quite well what it is to be in a place where everyone speaks English and you don't understand anything and you don't know what they're saying and your accent is so horrible. So all of that I can understand."

But for the past decade, when Medero's Lady Sharks volleyball teams have taken the court, they have all spoken one common language--winning.

---

### Sir Thomas More Chair in Engineering Ethics

Loyola Marymount University, a Catholic comprehensive university, in the Jesuit and Marymount traditions located in coastal Southern California, invites nominations and applications for the newly-endowed Sir Thomas More Chair in Engineering Ethics. With the creation of the Sir Thomas More Chair in the College of Science and Engineering, the University has achieved its goal of establishing endowed chairs of ethics in each of its four colleges. The Sir Thomas More Professor will provide the vision and leadership to develop a strong program in applied ethics, based on a sound foundation in theoretical ethics, for the undergraduate and graduate students in the engineering-related programs in the College of Science and Engineering.

Applicants must have a strong background in engineering and in theoretical and applied ethics; an earned doctorate and a national reputation in a relevant field; a record of significant scholarship in the area of applied engineering ethics; and a commitment to both undergraduate and graduate instruction. Duties of the Thomas More Professor will include:

1. a teaching load of two courses per semester;
2. ongoing research and publication in the area of engineering ethics; and
3. conception, development, and advancement of a program of learning and discourse on ethical issues pertaining to technological developments and their use, especially for undergraduate and graduate students in the engineering disciplines, but also extending to students in all disciplines.

In addition to a competitive salary, the Thomas More Professor will receive generous support for scholarly and chair-related activities.

The University's goal is to fill the position for the 2000-01 academic year. The review of applications will begin June 15, 2000, and continue until the position is filled. Applicants should send:

1. a letter of application which includes a description of the applicant's vision of the role and activities of the Thomas More Professor;
2. a curriculum vitae; and
3. names, addresses, and telephone numbers of five references to:

Universities Expand Collaborations with Cuba

Librarians and Researchers Open Doors for Exchanges

By Marilyn Gilroy

The softening of political barriers between the United States and Cuba is yielding a chance to build new bonds between the citizens of these two nations. College researchers, professors, and librarians are taking full advantage of the opportunities.

Humanitarian and academic exchange projects involve hundreds of educators and students, especially from institutions in California, Florida, and Texas.

A delegation of 12 academicians, including University of Houston (UH) librarians Tom Wilson and Carolyn Meaney, flew to Havana last fall to engage in a historic professional exchange—the first between U.S. and Cuban librarians.

During the nine-day trip, Wilson, Meaney, and others in the delegation met with Eliades Acosta, director of the Biblioteca Nacional José Martí (José Martí Cuban National Library) and his staff. During Acosta's earlier visit—for last year's conference on Hispanic literature—he and Wilson agreed that future exchanges would be beneficial to the development of both U.S. and Cuban libraries.

The exchange is part of an ambitious campaign called "Support for the Cuban People," which was initiated three years ago by the U.S. State Department. Food sales, remittances, direct flights, interpersonal connections, and public diplomacy are stipulations of support listed under a fact sheet issued by the Department of State outlining the project's provisions.

The project is part of the U.S. political policy toward Cuba that has been in place ever since Pope John Paul's visit to that nation in 1996. President Clinton and Secretary of State Albright have both expressed the hope that measures to reach out to the Cuban people will "ease their plight and help them prepare for a democratic future."

The library exchanges fall under specifications in the "People to People Contacts" section of the policy that allows for two-way exchanges among academics, athletes, scientists, and others, including streamlining the approval process for such visits.

Specifically, this group of U.S. and Cuban librarians and educators met to begin to understand each other's operations, services, and achievements.

The visit produced some surprises but also reinforced some of the perceptions about scarce resources in Cuba.

"There is a great lack of materials for research or for education," said Meaney. "Funding for these things seems to be non-existent."
But that did not stop visitors from being impressed by the organization and structure of the library system. As one of the delegates, Professor Keena Noone, anthropologist and coordinator of the Mexican Studies program at Seminole Community College in Florida, observed, “the organization is as sophisticated as any library in the U.S.”

“The library has branches throughout the country,” she said. “Of course, sometimes the materials have to be delivered to rural areas via horse or donkey.”

The trip to Cuba was part of Noone’s ongoing interest in building libraries in Latin America. She has been active in establishing Mexican libraries in places that are also significant anthropological sites, such as Tulum. She and student volunteers collected materials and managed to donate 400 books for the start-up library at the site. Afterwards Noone wrote a small grant to start a library in Koba, which she says is known as a “pure ancient Maya” site.

But despite the scarce resources and challenging physical circumstances found throughout Latin America, there is still progress being made in these library ventures.

“Tn Havana, the National Library has finally brought in the Internet,” said Meanley. “We have even had some e-mail exchanges with them.”

The Cuban librarians are also looking for innovative ways to collect and preserve the nation’s cultural treasures; this exchange provided the opportunity to explore cooperative possibilities. Several exchange mem returned to evaluate potential U.S. sites for storing and perhaps digitize duplicate copies of Cuban poster art.

Part of that effort is already underway at the University of California, Berkeley, where The Cuban Poster Art project has been locating and serving poster art for the last few years.

Assistance in less grand fashion is also needed. The National Library seeks partners from around the world in identifying and collecting Cuban literature—writings by or about Cubans. In return, Cuban publications the island can be provided.

“Much of the value of these exchanges relates to getting word out that more individuals can explore avenues that lead to mutual benefit,” says UN’s Tom Wilson.

While observing the needs and privations in Cuba, the delegates were conversely amazed by the country’s high literacy rate.

With 98 percent of the population having completed at least an e grade education, the Cuban literacy rate is one of the highest in the world, Has Meanley pointed out, promoting literacy in Cuba is an integral part of the job of librarians and indicative of an island that “has a strong sense of national identity.”

“Since there is such a fundamental push for literacy and education in Cuba, librarians are well-respected in the country as ‘preservers of the people,” adds Wilson.

The system of library education in Cuba is also extremely effective. Wilson added. There is a college-based program similar to ones in the United States, library assistants are fortunate if they get any training beyond on-the-job skills,” he says.

Despite the strengths of the Cuban system, visitors from the U.S. could find that many library buildings were crumbling and dilapidated. Because of the U.S. embargo, which has been in place since 1961, arcession of Soviet funding due to the collapse of Communism, Cuba itself in an ever-widening circle of economic turmoil. Although a crisis in tourism is providing marginal support for the Cuban economy, Wilson said that Cuba is not nationwide and creates awkward vocational discrepancies. “Bellhops make more money than a radiologist,” says Meanley.

However, even in the face of these disparities and challenges, the way of life and its successes are maintained, and Cuban citizens, librarians, simply find alternative methods to continue their daily operations.

“This is a workforce that is highly literate, creative, and motivated,” said Wilson. “There are many small businesses, such as bicycle repair shops; and even though supplies are scarce, they manage to keep things running by making their own parts.”

Another traveler with the group was Derric Perez, interim library director at the University of South Florida, an institution that has participated in a variety of Cuban initiatives. Perez has been responding to the incursion of USF faculty interest in Latin America, and not only participated in a Cuban library visit but started a librarian exchange program with the University of Puerto Rico. Perez also attends the annual Feria Interna del Libro de Guadalajara in Mexico for the purpose of acquiring Spanish language books for the USF collection.

Other USF faculty and staff have been involved in cooperative endeavors thanks to an agreement between the university and the Instituto Oceanología of Cuba.

Under the terms of the agreement, marine scientists from the
Canada, Mexico, and Cuba spent two weeks at sea aboard the Cuban research vessel *Ulises* studying currents, water color, and productivity of the Gulf of Mexico and Caribbean. Eighteen oceanographers aboard conducted experiments to determine the pattern of dispersal of large patches of microscopic marine plants observed in satellite images, hoping to learn if waters coming into the gulf from the Caribbean have red tide cells. This is important since the source of the red tide algae, which kills thousands of fish each year along Florida's coasts, is unknown.

Frank Muller-Karger, USF professor of Marine science, says that the U.S. State Department approved the visit to foster research exchanges and ensure that U.S. vessels also continue to have access to Cuban waters. When the *Ulises* arrived at the USF-St. Petersburg dock to pick up scientists and their equipment, it marked the first time in 40 years that a Cuban ship visited a U.S. port. Cuba assumed the cost of the cruise. Muller-Karger stated that the cruise yielded unique and important information and also served to forge academic and research ties among U.S., Mexican, and Cuban counterparts. “These links are critical since we share waters with Cuba and Mexico. Anything occurring in those waters has implications for all of us,” he concluded.

But it isn’t just faculty who are a part of the Cuban-U.S. exchanges. Last year, 12 USF medical students and College of Medicine Professor Eduardo Gonzalez spent their spring break in Cuba. Students delivered medical supplies, toured health facilities, and saw patients. This year, 15 students and two faculty members will travel to Cuba for a seven-day trip to study the geology of western Cuba. The excursion will also be led by a prominent Cuban geologist.

These U.S. travelers, like those who have gone before them, will probably find Cuba to be a country rich in cultural heritage, safe for travelers, and resounding with music and art in cities and small towns alike.

As SCC’s Kenna Noone said, “Cuba cannot compare to the U.S. in economic ways because we are so materially driven and well off. But the spirit of the Cuban people...the desire to get better and improve is incredible.”

Almost Everyone Calls Him Manny

Dr. Gonzalez Rewarded by “the lives we’ve changed”

BY
JAMES HARPER

This story is reprinted with permission from Northampton Community College Magazine, Fall 99.

Northampton Community College

Currently, Northampton’s Adult Literacy Program, under Manny’s leadership, serves more than 3,500 adults annually.

He is Manuel Gonzalez, Ed.D. In July of 1999, he became the associate dean for the Center of Adult Literacy and Basic Workforce Development at Northampton. In his seven years at NGC, Dr. Gonzalez has served a great number of community residents as director of the department of Adult Literacy, a program that has brought him and the College unprecedented recognition.

When you know his roots, you get to know the man. Manny was born at St. Luke’s hospital in Bethlehem. This is important information, since his local roots provide a strong motivation for his community commitments and to those he terms as “under-served.” He is the son of immigrant parents who lacked English skills, with little opportunity to learn. And he saw early in life that education could become his route to eventual success.

From Bethlehem’s Liberty High School, Manny went a few blocks away to Moravian College, where he earned a bachelor’s degree in Spanish and French Literature. From Moravian, he took a short trip over the river to the south side of Bethlehem and Lehigh University.

At Lehigh, he completed a master of arts degree in Spanish Literature and moved right to Lehigh’s College of Education to reach his goal of doctor of education, specializing in curriculum and foundations of education. He then decided to experience a year abroad and further explored his interests at the University of Madrid.

He arrived on the Northampton campus in 1992. Before that, he taught Spanish at Delaware Regional High School and instructed prisoners in a special literacy program. Manny reflects that it is a special experience to be locked in a prison cell with 30 men trying to improve their lives and lift their sights through education.

What motivates him?

“It is changing people’s lives. I believe [that I have] a responsibility to open doors and pull other people through.”

He gets a special sense of satisfaction by attending commencement, which he terms “a ceremony of achievement.”

Currently, Northampton adult literacy program under Manny’s leadership serves more than 3,500 adults annually. More than 1,200 adults are enrolled full-time. Revenue to support the program reaches nearly $3 million during the last fiscal year—an astonishing effort.

Program support comes through grants from a variety of “outside” agencies, including Pennsylvania’s departments of education, welfare, labor, and economic development. One can only imagine the changing guidelines that must be followed to make this support possible. A successful focus for the attainment of grants, Manny notes, is to emphasize “what works for adult education.” He continues, “love education for folks who truly deserve it.”

To combat fatigue, to clear the brain, to relieve the stress, he walks daily. And he plays clarinet for the Easton Municipal Band. Dr. Gonzalez also finds time to volunteer.

He is the chairman of the board of directors of the Council for Spanish Speaking Organizations. He is also on the board of the
Pennsylvania Coalition for Adult Literacy. Whenever possible, he also lends his skills to a variety of county-based organizations that deal in workplace training and welfare-to-work programs. But he is proud to say that his rewards in doing what he does is “seeing the tons of people who were trained at Northampton prosper and to have personal remembrance of lives that we changed.”

Northampton Successes

- 100 percent of computer science majors were either employed or successfully continued their education.
- 96 percent of Early Childhood Education graduates were employed in jobs in their field of study or in an unrelated field by their choice.
- 93 percent of the 1998 graduating class transferred successfully or were successfully employed.
- 88 percent of career placement students were employed in a field of their choice, either related or unrelated to their major
- 15 of the 25 career programs had placement rates of 100 percent.
- 87 percent of General Studies degree students either transferred or were employed after graduation.
- And a newly signed agreement with Temple University smooths the transition to a four-year institution.

Northampton and Beyond

Northampton Community College is a public two-year college located in Bethlehem, Pennsylvania, about 50 miles north of Philadelphia and 90 miles west of New York City. Sponsored by eight school districts—Bangor, Bethlehem, Easton, Nazareth, Northampton, Pen Argyl, Saucon Valley, and Wilson—the college offers innovative community and continuing education courses and programs as well as associate’s degrees in arts, science, and applied science. About 6,000 students are taking NCC courses for credit. Of these, approximately six percent are Hispanic.

More than 60 college-transfer and career programs are in place at NCC, and more than half of the students are enrolled in transfer programs. NCC will recommend for transfer those students whose personal qualities and academic achievement indicate probable success at other institutions. Preference for admission to Pennsylvania state colleges is generally given to applicants who have the associate’s degree.

Typically, 60 to 70 credit hours of applicable coursework, with a grade of C or better, can be transferred, with final decisions in the hands of the receiving institution. A course-by-course reference guide is available in Northampton’s counseling office for student use. The guide indicates how individual NCC courses transfer to many of the four-year institutions in eastern Pennsylvania. First-year student and sophomore requirements vary considerably among senior colleges, and students need to discuss their transfer plans with both a faculty advisor and a professional counselor.

In the fall and spring semesters, NCC conducts group seminars to help students with transfer plans and expectations. Representatives from many four-year institutions meet with students at those times. Several colleges and universities are in close proximity to Northampton, a mix of public and private, some of them linked to religion, others not. Lehigh, Muhlenberg, Moravian, Cedar Crest, Kutztown, Lafayette, and more are all in the neighborhood. Several offer cross-registration.

Students may apply for dual admission or advanced admission, through which they apply jointly to NCC and to a four-year institution. NCC’s dual admissions partners include Allentown, Cedar Crest, Centenary, Moravian, and Muhlenberg. Students may apply for advanced admission to NCC partners Cheyney or Lincoln, provided they are seeking an associate degree in the arts followed by a baccalaureate degree in arts or sciences.

Dual admissions programs may be individually tailored so that a student knows in advance precisely which courses will be taken at NCC and which will be taken at a specific four-year partner college or university. The student/instructor ratio at Northampton is 20:1.

The 165-acre main campus is in Bethlehem Township. The Monroe Campus is in Tannersville. Classes are conducted as well at the Downtown Bethlehem Center and the Lehigh Valley Industrial Park B.

Classes are offered days, nights, and weekends via the Internet and via television. NCC offers both on-campus child care and on-campus housing.
**PEOPLE & PLACES**

**Kellogg Awards First Grants in $28 Million Latino Initiative**

W.K. KELLOGG FOUNDATION Five major U.S. universities and one community college each announced that they were awarded $100,000 planning grants by the W.K. Kellogg Foundation to enhance higher education opportunities for Hispanic youth. The grants represent the first phase of the foundation's six-year, $28.7 million Engaging Latino Communities for Education Initiative.

Arizona State University, Northeastern Illinois University, St. Edward's University, Santa Ana College, the University of California-Santa Barbara, the University of Southern Colorado, and 12 other colleges and universities nationwide will form partnerships with their communities, businesses, and K-12 public and private school districts to give more Latino students the support they need to achieve academic success.

**Colorado-Boulder Minority Program Expands to Humanities**

The Minority Arts and Sciences Program (MASP) at the University of Colorado-Boulder has expanded to include studies in the humanities and social sciences. Eleven students were selected as the first scholars in the programs' humanities component.

Prior program scholars had enrolled in the sciences and mathematics.

"The philosophy of the humanities and social science component is in keeping with the overall MASP mission, which is to develop scholars who are also leaders," said Alphonse Keasley, MASP director.

Students in the inaugural humanities class are: Marian Cheng, Daniel Escobedo, Lyla Jellings, Debbie Ma, Jared Maher, Joelle Martinez, Torre Mendoza, Brianna Mestas, Roberto Padilla, Susan Sanchez, and Everett Tabb.

**Cobian Honored at Sacramento City College**

Sacramento City College (SCC) in California honored Ramona Cobian with a Celebration of Excellence award recognizing her outstanding dedication and professional competence in service to the campus and community. A supervisor with Extended Opportunities Programs and Services, she also worked in financial aid and matriculation in her 20 years at SCC.

Cobian developed a mentor program and helped develop an orientation program for Latino students and the Cultural Awareness Center. She organizes cultural activities and is a main supporter for All City and University Day, Welcome Day, and the Cinco de Mayo celebration.

Other honorees included Linda Klein, Jan Haag, Mary Terese Dolan, John Ruden, and Julia Brodkowski.

**Medina Now a Counselor at Colorado-Boulder**

Steven Medina has been appointed a counselor in Colorado-Boulder's Counseling and Psychological Services: A Multicultural Center. Eldridge Greer, director of the center, said of Medina, "In addition to being Latino and proficient in Spanish, he is a strong advocate for the rights of gay, lesbian, bisexual, and transgender individuals. His appointment to our staff cements a Center goal of having counselors and psychologists from each of the major ethnic groups."

Medina worked in several departments during the past 10 years, including ethnic studies, the Alliance for Technology, Learning, and Society, and the psychology department. He has a bachelor's degree from Colorado-Boulder.

**New President Leads Valencia**

Sanford "Sandy" Shugart is now president of Valencia Community College (VCC). Shugart leads a student body of 37,000, not counting continuing education classes. He came aboard amidst a 6.6 percent increase in enrollment for Valencia's spring session.

Prior to his appointment, Shugart was president of North Harris College in Houston for eight years. He has a bachelor's degree in biology and a doctorate from the University of North Carolina.

**Colorado Mountain College Sponsors Trip to Ecuador**

Colorado Mountain College is offering a learning excursion to Ecuador from June 29 through July 14. Participants will have an opportunity to earn three semester credits for field ecology/field biology.

Short excursions will be taken to Co National Park, the Papallacta Hot Springs Indian market in Otavalo, and a cloud forest on the Cotopaxi and Colorado Rivers.

The highlight will be a five-day trek to the Galápagos Islands. Animals such as the Galápagos tortoises, penguins, fur seals, and birds can be readily observable at close range.

Retired CMC professor Pete Moller and his wife Sharon will lead the trip.

**Ramirez Oropeza Speaks at NM State**

Martha Ramirez Oropeza, director of New Mexico State University and co-director of Mascarones en Mexico, spoke at the Centro de la Raza at the University of New Mexico.

Ramirez Oropeza explained the Tonapouri, the ritual calendar of 260 different energies that influence births and deaths. She read the codices and...
ancient manuscripts, gave participants their own signs, and discussed the mission of Nahua University in Cuernavaca, Mexico.

A veteran of the Chicano movement, Ramirez Oropesa went to Mexico in 1971 to study muralism with the maestro David Alfaro Siqueiros. In 1990, she co-founded the Nahua University. Five years ago, she instituted intensive Nahua culture courses twice a year especially designed for young Chicano artists, who, like herself, asked, "Where do I come from? Why, if we are descendants of great inventors, scientists, artists, are we discriminated against?"

Alguero Retires as SUNY Hispanic American Affairs Director

Dr. Manuel Salvador Alguero, who helped create an effective working relationship between the State University of New York (SUNY) and several Latino communities, retired as the university's director of Hispanic American affairs.

Alguero organized many Latino community outreach and recruitment activities for SUNY and played a leading role in negotiating a Memorandum of Understanding that has increased cooperation between SUNY and the University of Puerto Rico. He coordinated SUNY participation in the Somos el Futuro Conferences, sponsored each year by the Assembly/Senate Puerto Rican/Hispanic Task Force; managed SUNY's role in an annual award program for outstanding upstate Hispanic high school students; and helped create the Northeast Latino Collegiate Conference, which brings close to 1,000 students from colleges in the Northeast to Albany.

Alguero will remain active in his field as adjunct professor in the SUNY-Albany department of education.

González Explores "The Return of the Maya" at Stetson

STETSON. Amerindian writer-artist Gaspar Pedro González spoke about the renaissance of Mayan culture within Guatemala's pluralistic post civil war society during a Stetson University (Fla.) visit. An activist in Guatemala's Mayan cultural revitalization movement, he lectured on "The Return of the Maya."

González is a professor of Mayan literature and the oral tradition at his alma mater, Universidad Mariano Gálvez in Guatemala City. He is a member of the Academy of Mayan Languages of Guatemala and an official of the Ministry of Culture of Guatemala, where he serves as a consultant in Mayan culture.

His lecture included poetry readings in his native language, Q'anjob'al.

Six Regions of Argentina Explored at DuPage

Dr. Flore Briedenbach gave a lecture, "Argentina: The Country of Six Continents (With a Side Trip to Chile)," at the College of DuPage (Ill.).

During a slide presentation, the College of DuPage professor and former Fulbright Exchange Teacher took the audience from the Train to the Clouds in the North to the Beagle Channel in the South, and from the tropics of the East to the glaciers and mountains of the West. The adventure continued on with a side trip to Southern Chile and a visit to Santiago, the capital of "the Long Land."

North Texas Health Science Center Home of Public Health Organization

The University of North Texas Health Science Center's School of Public Health was named the home of the North American Regional Office of the International Union for Health Promotion and Education (IUHPE).

The IUHPE promotes global health by influencing and facilitating the development of health promotion and health education among world countries. The North American Regional Office includes the U.S., Canada, and the Caribbean.

Dr. Fernando Treviño, dean of the School of Public Health and currently an IUHPE trustee, says that the Center's involvement will allow for the exchange of ideas to influence health promotion thinking internationally, through education, community action, and the development of healthy public policies.

Ibarra Holds Endowed Chair at Texas-Austin

Dr. Alejandro Ibarra of the Instituto Tecnologico y de Estudios Superiores de Monterrey is the first holder of an endowed chair of the Center for the Study of Western Hemisphere Trade at the University of Texas (UT)-Austin.

Ibarra is teaching economic problems and policies in Latin America at the undergraduate level, and an economics seminar on the new regulatory systems that are emerging in Latin America. The seminar deals with a crucial but often overlooked aspect of restructuring wherein failures of policy can produce such devastating results as the financial crises that gripped Mexico, Brazil, Venezuela, Ecuador, and, in a lesser measure, Argentina, in recent times.

The endowment enables UT-Austin to invite to campus each year one or more specialists in the field of trade, investment, and economic development in the Western Hemisphere.

Martinez del Rio Directs INROADS/Fairfield Westchester Counties Office

Wilson Martinez del Rio became managing director for the INROADS INROADS/Fairfield Westchester Counties office in Connecticut.

INROADS is an international career development organization training high potential youth from diverse backgrounds as future corporate business leaders. It works with the YMCA, National Hispanic Scholarship Fund, American Indian Community House, ASPIRA, Junior Achievement, and others to find student leaders interested in the world of business.

From 1977-1999, Martinez del Rio established the INROADS internship process in 30 states and Canada at the Xerox Corporation. As a 10-year manager in a tri-state region, his passion has been to increase opportunities at big companies for motivated Hispanic, Native American, and African American youth.
John Jay and Rutgers Professors Speak on Dominican Race and Identity

Dr. Jacqueline J. Polanco, Dominican political scientist and City University of New York (CUNY)-John Jay College of Criminal Justice professor, and Dr. Ernesto Sagás, author and Rutgers University (N.J.) professor, discussed the African ancestry of the Dominican Republic at the American Museum of Natural History (N.Y.) in February.

The Dominican people have conflicting ideas regarding their race and cultural heritage. Polanco noted that many stress a Native American or European ancestry, while the Haitians of Hispaniola are proud of their African ancestry. Having an open discussion, Polanco posed the question, "Can education help change Dominicans' (and Americans') attitudes on race?" Audience response was as diverse as the subject itself.

African Dominican music and dance groups La 21 División educated about and demonstrated some of the African artistic traditions of the Dominican Republic.

Spring Events at NYU's King Juan Carlos I of Spain Center

"Travels in Latin America: Writing, Criticism, Theories"—A faculty colloquium series and conference exploring the importance of travel to organizing an economy of knowledge—of self, other, home, and "foreign" places—and for fashioning the notion of what constitutes Latin America's uniqueness. Every other Wednesday, through April 39; conference, April 28-29.

Expulsion and Memory: Descendants of the Hidden Jews—A one-hour documentary exploring crypto-Judaism, the hidden Judaism of Spaniards forced to convert to Catholicism during the Inquisition, and of their descendants in the New World. April 13.

"América Castro y la memoria histórica"—A conference with Juan Goytisolo, novelist; Eduardo Subirats, NYU; Frank Peeters, NYU; Christopher Brit, George Washington University; María Rosa Menocal, Columbia University; and James D. Fernández, NYU. April 14-15.

Federal Ruling in Texas Lawsuit Troubles IDRA

Dr. María "Cacta" Robledo Montecel, executive director of IDRA, the Intercultural Development Research Association, spoke out against a federal court ruling in the Mexican American Legal Defense and Educational Fund (MALDEF) lawsuit regarding the Texas Assessment of Academic Skills (TAAS).

MALDEF challenged the state of Texas' policy of relying on the TAAS examination to determine whether high school students could graduate, arguing that the test unfairly penalized minority students.

A judge ruled that the use of TAAS does not have "impermissible adverse impact" on Texas' minority students.

"We are extremely disappointed by the judge's ruling," said Montecel. "The TAAS is not a valid measure since there is no way that the test can be adjusted to measure student competence in content that was not taught."

ICEED to Fund Rancho Santiago Projects

The International Consor of Education and Economic Development (ICEED) will provide funding and space at South Orange Community College (Calif.) and its Center for International Development.

The Center, based in Santa Ana, will develop a pair of international business propo and an exchange program between students at Orange County College and Mexico Universidad Tecnológica de León.

The ICEED mission is to bring together higher education entities from Mexico and the United States to enhance community and economic development.

Rutgers Presents Child Welfare Colloquium

Rutgers University's School of Social Work (N.J.) is presenting its second Colloquium Series in Child Welfare addressing issues, policies, and practices.

April 26, Jose A. Carrasco, chair of the department of Mexican American studies at New York University, will give a lecture. "Beyond the Good Samaritan" addresses future challenges.

The series, the latest program level in the School of Social Work, is in partnership with DFYS (Department of Youth and Family Services), New Jersey Department of Social Services, to provide relevant training and guidance to social workers, welfare workers, court staff, and the public.

Planning for Community-Based College Information Centers

TERI (The Education Resources Information Center) in Massachusetts launching a three-part campaign to reduce the growing gap in college opportunities for income youth.

With a $900,000 grant from the DeWitt Wallace-Reader's Digest School-to-Col Transition Initiative, TERI will help cities develop community-based college information centers.

DeWitt Wallace-Reader's Digest supports making it possible for TERI to provide technical assistance to help schools build centers through a tool-kit including a "how-to" manual and demonstration prototypes and a training institute.

TERI is initiating a comprehensive study to secure public and private funds at nati-
state, and local levels to help create many more college information centers nationwide.

Guzmán Lands Presidential Appointment in DC

Dr. “Cha” Guzmán, executive vice president for administration, institutional advancement, and community relations at Austin Community College (ACC) in Texas, has taken a year’s leave of absence to serve a one-year presidential appointment as a senior advisor to U.S. Education Secretary Richard Riley.

Guzmán, an passionate advocate for the improvement of Hispanics in education, wants to determine how to provide Hispanic communities with full access to opportunities offered in federal programs, and wants to develop a standardized data collection system.

Guzmán, a member of the Texas Association for Chicano Higher Education, joins her husband, Gilberto Ocasás, who currently resides in Washington, D.C.

In the News at Cal State-Northridge

Concerned about the impact that alcohol, tobacco, and other drugs are having on the Latino community, California State University (CSUN)-Northridge educators joined with local leaders at a two-day symposium, “Building a Movement for Health: Taking Back Our Communities from the Alcohol and Tobacco Industries,” to examine what can be done to create a healthier environment. Participants shared information and developed strategies on how to deal with the alcohol- and tobacco-related problems in the Latino community.

CSUN recently hosted the art exhibit “A Matter of Life and Death: A Transatlantic Millennium Exchange,” featuring 60 original prints of imagery reflecting diverse interpretations of the life-death cycle by 30 artists on both sides of the Atlantic. The central theme was intercultural interpretations of renewal, including its relationship to the millennium and the celebration of the Day of the Dead.

Fullerton Hosts Library Leadership Institute

Fullerton College (Calif.) recently held the First Annual Library Leadership Institute, sponsored by the Orange County chapter of REFORMA (the National Association to Promote Library and Information Services to Latinos and the Spanish Speaking) and the San Jose State University School of Library and Information Science Program. The event, targeted toward library and information science students and librarians who are beginning their professional career, included forums and panel presentations addressing library leadership and diversity in the new millennium.

Dr. Camila Alire, director of the Colorado State University libraries, and Ruben Martinez, Latino community activist and owner/operator of the Martinez Bookstore and Art Gallery in Santa Ana, were keynote speakers.

University of New Mexico Hosts PeaceJam Conference

Betty Williams, co-recipient of the 1976 Nobel Peace Prize, led the second PeaceJam New Mexico Youth Conference at the University of New Mexico in February. The conference, based on the theme “Community-Based Solutions to the Problem of Violence,” gave New Mexico youth a unique opportunity to meet and learn from a Nobel Peace Laureate.

“You’ll find that the most peaceful neighborhoods have neighbors who get together, neighbors who share street parties, people who go out and care, people who get into their own area and take control of it—economically, socially, and culturally,” said Williams.

The goal of PeaceJam is to inspire a new generation of peacekeepers who will transform their local communities, themselves, and the world.

Ruiz Delivers Chase Lecture at Angelo State

Dr. Ramón Eduardo Ruiz, a scholar recognized by the presidents of two nations as one of the world’s preeminent authorities on Mexican history and economics, presented Angelo State University’s (Texas) 13th Annual Ralph R. Chase Lectureship in the Humanities.

President Clinton honored Ruiz, author of four critically acclaimed books on Mexico and Latin America, in 1998 with the prestigious National Humanities Medal. In recognition of his contributions to Mexican history, he was a guest of honor of the Mexican Government at the inauguration of President Miguel de la Madrid in Mexico City in 1982.

Ruiz has a bachelor’s degree from San Diego State College, a master’s from the Claremont Graduate School, and a doctorate from the University of California-Berkeley.

Haston-Tillotson President to Retire

The president of Huston-Tillotson College (Texas) for the past 12 years, Dr. Joseph McMillan, Jr., will retire effective June 30.

“I have decided that as we prepare for the new millennium, it is an appropriate time for new leadership to take the college into the 21st century,” McMillan stated.

Accomplishments during his tenure include: development of new majors to address the workforce of the Austin community; strengthening of standards for admission, retention, and financial aid eligibility; implementation of technology throughout the campus; and restoration of the college’s financial integrity, defined recently by a clean, unqualified external audit report.

White House Recognizes HOSTS

Help One Student To Succeed (HOSTS) was recognized at The White House Initiative Educational Excellence for Hispanic Americans in a report, What Works for Latinas Youth. The report heralds HOSTS and includes a directory of programs improving the lives of young Hispanics across the country.

The report states, “HOSTS helps students create tutoring programs for at-risk students using a mentoring approach. HOSTS match students with trained business and community volunteer mentors as well as cross-mentors. Students in the HOSTS structure mentoring program have consistently demonstrated gains of 20 grade levels for every nine months in the program.”

Linda S. Ramirez, Hispanic director for HOSTS, said that HOSTS is always focused on serving Hispanic students through its programs, especially through Spanish Language Arts.
Regalado Named Bautzer Faculty at Cal State-Los Angeles

Professor of political science Dr. Jaime Regalado, executive director of the Edmund G. “Pat” Brown Institute of Public Affairs at California State University (CSU)-Los Angeles, was named the university’s fourth Bautzer Faculty at a recent Council for Advancement and Support of Education (CASE) conference. The Bautzer Faculty University Advancement Award enables faculty to learn more about professional university development at national conferences and CSU workshops throughout the year. Regalado has directed the Pat Brown Institute—a widely recognized non-partisan center for applied public policy focusing on community development and youth and family empowerment—since 1991.

Latasa Heads Campus Police at New Mexico Tech

New Mexico native Louis “Louie” Latasa has become the director of the New Mexico Tech campus police department.

As campus police chief, Latasa supervises nine certified police officers, two security officers, four dispatchers, and four student employees. His department is responsible for security throughout the campus, the Tech Research Park, and the university’s Energetic Materials Research and Testing Center field sites and testing ranges—an immense area.

“I wouldn’t trade my job here for anything else,” said Latasa. “And that’s mostly because of the caliber of people I serve, protect, and work with.”

Kansas House Proclaims “Lydia Gonzales Day”

Lydia Gonzales, a Garden City Community College (GCCC) educator who recently ended her 22-year career, was honored Feb. 25 in Topeka, Kan. with resolutions by the Kansas House of Representatives and the Kansas Senate.

A designation of “Lydia Gonzales Day” was proclaimed during the annual Hispanic Legislative Day at the Kansas Statehouse, which was sponsored by the Topeka-based Buena Gente organization and the Kansas Democratic Caucus. Gov. Bill Graves and Kansas Insurance Commissioner Kathleen Sebelius spoke about Gonzales. Rep. Ward Loyd presented a House resolution, and Sen. Steve Morris presented a Senate resolution.

Gonzales, recently honored by GCCC, has earned national and state attention for her dedication and service to the Latino community.

Soto Headlines Texas-San Antonio Literacy Symposium

Gary Soto, winner of the 1999 Hispanic Heritage Award, shared his poems and prose at the University of Texas-San Antonio (UTSA) symposium, “Multiple Literacies in Latin America from Dick and Jane to the Internet in Español and Beyond.” The author of books for adults and children, Soto was a finalist for both The Los Angeles Times Book Award and the National Book Award with his 1995 book, New and Selected Poems.

The symposium, sponsored by the UTSA College of Social and Behavioral Sciences, examined literacy through a multicultural lens in a series of presentations on such diverse topics as “Aquí no tienen cultura: Challenging the Legacies of Ignored Literacies” and “Children’s Literature and Reading Instruction: Past, Present, and Future.” Participating UTSA faculty included Miriam Martinez and Mary Frances Agnello, Division of Education; Maria-Luisa Urdaneta, Division of Behavioral and Cultural Sciences; and Bertha Perez, College of Social and Behavioral Sciences.

Texas A&M to Establish System Center at Palo Alto

The Texas Higher Education Coordinating Board unanimously approved a request by the Texas A&M University System to establish a University System Center at Palo Alto College on the side of San Antonio, with Texas A&M University Kingsville as the lead institution.

Marc Cisneros, president of Texas A&M Kingsville, will develop and implement the center’s academic programs. Texas A&M-Commerce Dr. Rosario Torres-Raines is working to ensure courses in place for the fall 2000 semester.

With the addition of the A&M center at Palo Alto, students will be able to earn bachelor’s degrees while remaining on campus. Area residents will benefit from upper course offerings.

Valdez Receives Texas A&M-Corpus Christi Alumni Award

The Texas A&M University-Corpus Christi Alumni Foundation honored Carlos V. Valdez with the Outstanding Alumni Award.

Valdez was the lead counsel in the conviction of Rolando Saldivar, accused of killing Tejano music superstar Selena. A district attorney for Nueces County, he teaches at the county sheriff’s academy, and is a frequent lecturer at the university. He graduated in 1980 with a bachelor’s degree.

Dinah Bowman and Mary Ellen S also received alumni awards. Dr. B. Blount won the Distinguished Achievement Award.

St. Bonaventure Students Take Mission Trip to Mexico

On an uplifting mission trip, tiny poverty-stricken village Quelites, Mexico, St. Bonaventure University (N.Y.) students found an amazingly hospitable and generous rural munificence that gracefully offered what little.

The second annual Mexico mission headed by Tina Detena, associate c minister at the university, began with the purpose of helping the northwest Mexican community build a hospital and donating necessities. An underlying pose and ultimate goal of the trip was to provide an experience to learn from and appreciate what they have.

Students and adult leaders laid a ceremony on a side of a chapel, started the foundation for an effort to distribute cl-
rosaries, prayer cards, coloring books, and toys, and played games with the community children.

**Carver Scholarships to Support CUNY Minority Students**

A new scholarship program for outstanding City University of New York (CUNY) math, science, and engineering students is being established with a gift of $45,000 from the Carver Scholarship Fund. The gift will help broaden minority opportunities in the sciences and mathematics.

CUNY students eligible for support through the National Science Foundation's Louis Stokes Alliance for Minority Participation in Science, Engineering, and Mathematics will qualify for the new scholarships.

"The contribution could not have come at a better time," said CUNY Chancellor Matthew Goldstein. "Our nation's well-being depends more than ever on promoting interest in the sciences among our students. Yet minority populations are dramatically underrepresented in scientific fields."

**Griego-Rutten in New Post at New Mexico-Los Alamos**

Carole Griego-Rutten is the new student services manager at the University of New Mexico (UNM)-Los Alamos. Interim manager since August, she has been a senior academic advisor at UNM-Los Alamos since 1997.

A native New Mexican, Griego-Rutten began her college education at UNM-Valencia and earned her bachelor's degree from the College of Santa Fe.

**In the Land of Mirrors: Cuban Exile Politics in the United States**

by María de los Angeles Torres

A journey through the politics of Cuban exiles since the 1959 Cuban Revolution, this book explores the development of Cuban exile politics and identity within a context of U.S. and Cuban realities, as well as within the broader inquiry of the changing nature of nation-states and its impact on the politics and identity of diaspora communities.

**Fleeing Castro: Operation Pedro Pan and the Cuban Children's Program**

by Victor Andres Triay

From late 1960 until the October 1962 missile crisis, 14,948 unaccompanied Cuban children left their homeland, the small island suddenly at the center of the Cold War struggle. This book brings to light the humanitarian program designed to care for them once they arrived and the hardship and suffering endured by the families who took part in Operation Pedro Pan.

**The Tropic of Cracker**

by Al Burt

This book is about one man's vision of a state (Florida) struggling to remain true to itself. It mixes new essays with a span of earlier ones written during nearly a quarter century of raving the state as a columnist for The Miami Herald.

**Dictionary of Latin American Racial and Ethnic Terminology. 2nd ed.**

by Thomas M Stephens

This thoroughly revised and updated version features terms of the French American and American French Creole Caribbean. It introduces new symbols and abbreviations, and cross-references more terms between and among Spanish, Portuguese, and French than in the first edition.

**Affirmative Action on Trial: Sex Discrimination in Johnson v. Santa Clara**

by Melvin I. Urofsky

Like the landmark 1978 Bakke decision, most affirmative action cases have focused on preferential treatment given racial minorities. In Johnson v. Santa Clara, however, the central issue was gender, not race discrimination, and the Supreme Court's decision in that case marked a resounding victory for women in the workforce.

**Rethinking College Education**

by George Allan

Students are being filled with knowledge but are not learning how to use it wisely or even understanding that it is important to do so. George Allan challenges American colleges and universities to reconsider their priorities before they lose completely the spirit and style that have been the sources of their moral, cognitive, and affective inspiration to the nation.

Controlling Public Education: Localism Versus Equity
by Kathryn A. McDermott

Kathryn McDermott believes that norms of deference to expertise and school boards' disinclination to disagree in public greatly constrain the role that ordinary citizens can play in governance. She thinks that a new institutional ordering, combining centralization of resource allocation with decentralization of school governance, might enhance both educational equity and citizen participation.

Funding Public Schools: Politics and Policies
by Kenneth K. Wong

This book examines the role of politics in funding our public schools. For too long, the field of school finance has been dominated by two analytical traditions: one focuses on cost efficiency; the other highlights the spending disparity between wealthy and poor districts. In Kenneth Wong's view, both of these perspectives are narrowly conceived.

A Singer's Guide to the Songs of Joaquin Rodrigo
by Suzanne Rhodes Dreayer

An authoritative and indispensable guide to Joaquin Rodrigo's little-known catalog of vocal works, this book provides word-for-word translations, idiomatic translations, and IPA transcriptions of all 87 songs in Castillian, Catalan, German, French, Ladino, and Galician. Foreword by Nico Castel.

Puerto Rico: The Trials of the Oldest Colony in the World
by José Trías Monge

José Trías Monge, a Puerto Rican legal scholar and former government official, discusses the island's century-old relationship with the United States. Trías Monge describes the Spanish rule over Puerto Rico and traces the impact of American colonial policies there. After considering the various options for Puerto Rico—indépendence, statehood, and an enhanced commonwealth status—he concludes that the process of decolonization should begin immediately.

Blindness
by José Saramago

A parable of loss and disorientation and a vivid evocation of the horrors of the 20th century, this book is a portrayal of man's worst appetites and weaknesses—and man's ultimately exhilarating spirit. In 1998, author José Saramago was awarded the Nobel Peace Prize for Literature.

The Flower in the Skull
by Kathleen Alcalá

An exploration of the complexities of heritage, identity, and assimilation, this book exposes the mysterious nature of place, spiritualism, and faith in the lives of extraordinary ordinary people. Kathleen Alcalá is a winner of the Pacific Northwest Booksellers Association Book Award.

The Puerto Ricans: A Documentary History
Kal Wagenheim and Olga Jiménez de Wagenheim. eds.

This book of readings spans nearly 500 years in the history of the Puerto Rican people, from their ethnic origins to their present dilemma as members of a nation without nationality—a people whose past and present are obscured by propaganda and whose collective future is shrouded by uncertainty.

Encyclopedia of Minorities in American Politics: Volume 1, African Americans and Asian Americans; Volume 2, Hispanic Americans and Native Americans
Jeffrey D. Schultz, Kerry L. Haynie, Anne M McCulloch, and Andrew L. Aoki. eds.

This two-volume set addresses the historical and contemporary impact of four of the largest minority groups in the United States. The work draws attention to those events, people, and ideas that have shaped and will continue to shape the political dialogue of a diverse America. Every entry has bibliography that can serve as the next step for further research.

Many publications featured in this section are available through amazon.com.
CONFERENCES

2000 5-State Multicultural Conference
March 30-31

The 9th annual conference sponsored by Garden City Community College (Kan.). Keynote speakers include Jeannie Chavez-Martinez, Pittsburg State University (Kan.), and Roger Hernandez, nationally syndicated columnist.

Contact: Carole Huxman at GCCC Trio Programs, (316) 276-9538; Web site, gccc.cc.ks.us.

NAHE Convention 2000
March 29-April 1

The National Association of Hispanic Publications presents “the Hispanic print event of the new millennium.” At the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tobar, Executive Director/CEO, (202) 662-7250.

AAHE 2000 National Conference
March 29-April 2

The American Association for Higher Education’s 2000 national conference has as its theme “To Form a More Perfect Union: Diversity and Learning.” In Anaheim, Calif.

Contact: Kerry Newberry, conferences and meetings assistant, (202) 293-6440; Web site, www.aahe.org.

Teachers College, Columbia University National Conference
March 31

“High Stakes Testing: What Are the Effects?” General sessions, plus concurrent sessions on effects on retention, graduation, teaching, and learning, accountability, assessment, and reform strategies; and means of opposition. At Teachers College, New York City.

Contact: Diane Brown, e-mail, brown1 @exchange.tc.columbia.edu.

NCA-CIHE 105th Annual Meeting
April 1-4

The North Central Association of Colleges and Schools’ Commission on Institutions of Higher Education presents “The Quest for Quality: Mission, the Commission, and a New Century.” In Chicago, at the Hyatt Regency Chicago.

The Latino Education Conference
April 3-4

“Where Are the Latino Voices in School Reform? II”—a conference to help practitioners, teachers, parents, students, and the community identify the critical issues of school reform and their impact on the Latino community. At Resorts Casino and Hotel, Atlantic City, New Jersey.

PRBA Scholarship Fundraiser
April 6

The Puerto Rican Bar Association will host its 43rd annual scholarship fundraising banquet, themed “Empowerment in the 21st Century.” Keynote speaker is Puerto Rico Governor Pedro Rosselló. The banquet raises funds for law students and honors Latino leaders. In New York City.

Contact: (212) 447-8444.

New Jersey Project Spring 2000 Conference
April 7

The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching’s spring conference focuses on “Global Transitions: Thinking, Writing, and Teaching across Borders” and features, among others, Ruth Behar, Cuban-born anthropologist at the University of Michigan. At New Jersey City University, Jersey City, N.J.

Contact: (973) 720-2296; e-mail, njp@wpu.edu.

WASHINGTON STATE COMMUNITY AND TECHNICAL COLLEGE

JOB OPPORTUNITIES

Washington state’s 34 community and technical colleges invite you to visit our Job Opportunities Website at http://www.sbctc.ctc.edu. From the menu, just click “Jobs” and you’re on your way.

Designed to introduce you to the diversity of opportunities in Washington’s two-year colleges, this user-friendly site provides information on our colleges, faculty and administrative openings and application processes. Through the site’s search engine, you can view all the openings in your area(s) of interest or narrow your search by region or college. Direct links allow you to “virtually” visit each college before applying. At your option, you can ask the colleges to contact you by entering information about your qualifications and the positions you’re seeking.

Book Review

By Mark Saad Saka, Ph.D.

The Valley region of South Texas represents not only the cradle of Tejano society and culture but also the most resilient of all Mexican American demographic and cultural strongholds in Texas and possibly the United States. Founded as a ranching frontier during the Spanish colonial era and later violently incorporated into the United States, Mexican Americans fought against overwhelming odds and continue to represent 90 percent of the Valley's population. The Valley also forms the "core borderlands" zone of the U.S.-Mexico border, which today holds an estimated population of 30 million people and stretches from the San Diego-Tijuana twin sister complex to the port cities of Matamoros-Brownsville. Chad Richardson, a professor of sociology at the University of Texas-Pan American, is the director of the Borderlands Research Project. Based upon thousands of oral interviews with members of fifteen distinct sociocultural groups on both sides of the border, Batos, Bolillos, Pochos and Pelados represents the culmination of almost two decades of field research. This fascinating book is by far the most current research available on the Mexican American peoples of the Tejano heartland and brings to light their struggles and triumphs.

A major theme of the book is the cultural fusion that South Texas has undergone in the past half century. Rather than simply viewing South Texas as ethnically polarized, where Anglos and Tejanos each remain isolated and unicultural, Richardson interprets the Valley as a dynamic and innovative region that has produced a bicultural synthesis. In fact, in the broader march of history, South Texas might represent the forerunner of a truly multicultural American consensus. In a nation where salsa has replaced catsup as our number one condiment and Selena and Ricki Martin are among our national celebrities, historians might one day view the Valley as our Anglo-Hispanic heartland.

Richardson conducted a series of interviews with migrant farm workers of South Texas, those who perform the most difficult and yet least appreciated work in America. Revelations on the difficulties that the children of the migrant workers have in securing an education bring to light the challenges that anyone involved in educating Hispanic youth. Nearly 50 percent of the migrant children never finish high school, yet alone attend an institution of higher education. Contrary to traditional myths held by Anglo educators, which hold that migrant parents fail to stress education for their children, Richardson found that nearly all of the Mexican American parents encouraged their children to finish school. Instead, what Richardson found was overwhelming evidence that the socioeconomic structures of South Texas prevented migrant children from completing high school and that this better explains young Hispanic high dropout rates rather than some perceived flaw in the Mexican national character.

Richardson also traces the history of segregated education in South Texas for both primary and secondary schooling. More important, however, and a major asset of the book, is his treatment of the gains made by Mexican Americans since the 1960s. Richardson interviewed a number of Tejano parents on the issue of bilingual education, a hallmark of the Chicano movement of the 1960s. What emerged is the overall dissatisfaction that Tejano parents felt for bilingual education. Many of the parents regarded bilingual education as another example of Anglo liberal paternalism. Most of the Mexican American parents wished that their children could retain Spanish as their primary language and also obtain a mastery of the English language with which to advance both socially and economically. In fact, most of the parents and their children alike, chastised those Mexican American youth who could not speak Spanish—hence the term pocho, a derogatory term used to describe Mexican peoples who had forgotten their mother culture.

Richardson's interviews reveal the tremendous changes that have occurred in South Texas education, noting that a greater percentage of Mexican American youth today are graduating from high school, that Tejano youth represent a greater overall percentage of the high school population, and that a greater number of Mexican American principals, administrators, and teachers are serving as role models for young Chicanos of the Valley. In addition, Richardson's interviews reveal a relaxation in ethnic rivalries and a greater assimilation and acceptance between Hispanic and Anglo youth, greater participation in extra-curricular activities among Tejano youth, and a reduction in hostility and arrogance propagated by Anglo teachers and administrators. Richardson also notes that there is much work to be done, especially given that Hispanic youth in America have higher dropout rates than do other ethnic groups and lower scores on standardized state tests. In other words, it remains to be seen whether or not the building blocks really are in place for an increase in Mexican American enrollment in institutions of higher education for the 21st century.

Richardson's book includes a number of other important studies on often neglected socioeconomic groups along the Texas-Mexican border, including the residents of the colonias or border barrios. There are extensive interviews with undocumented domestic servants, maquila workers, and street children in Mexican border towns. Ethnic relations among Mexican and Mexican Americans, Anglo "winter" Texans, and the truly neglected presence of African Americans in South Texas are explored, as are the African Americans' relationships with both the Anglo and Tejano populations. Richardson's book is a welcome addition to the literature of South Texas. His firsthand research demonstrates the social complexities of how race, class, and culture intersect to form a truly unique border region that is neither Anglo nor Mexican but what we local Texans/Tejanos simply call "Tex-Mex."

Dr. Saka, a Fulbright scholar completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, Saka teaches in the Department of History at Sul Ross State University, Alpine, Texas.

MONTCLAIR STATE UNIVERSITY

Clarence J. Wallen
S.J. Endowed Chair in Mathematics

The Mathematics Department of Loyola Marymount University invites applications for the Clarence J. Wallen, S.J. Endowed Chair in Mathematics. The individual holding the Chair shall teach two classes per semester, carry out his/her own research agenda, develop programs that involve the undergraduate mathematics majors in research or professional activities, and engage in departmental and University service. Individuals working in any mathematical area, including mathematics education (especially K-12 teacher preparation), are invited to apply.

The appropriate candidate will have an established scholarly and academic record and should be able to demonstrate success in involving undergraduates in research or professional activities. The appointment to the endowed Chair will provide a competitive salary at the rank of associate or full professor and budgetary support for program development and research activities. Applications must include a letter of interest that briefly outlines a plan for the development of a program that will involve undergraduates in research or professional activities, a curriculum vita, and the names of three references. References may be contacted during the initial screening of applications; finalists for the position will be asked to provide three letters of reference.

The position will remain open until filled. The appointment could begin as early as the Fall of 2000.

Loyola Marymount University is a comprehensive Catholic university whose focus is excellence in undergraduate education. The Mathematics Department, housed within the University’s College of Science and Engineering, is a community of fifteen full time faculty members and 30-40 mathematics majors who work in an atmosphere of mutual respect and collegiality. Additional information about the LMU Mathematics Department and this position can be found on the web at:
http://lee.org.lmu.edu/~mthb_web/mumath.html

Please send applications and inquiries to:

USF University of South Florida

The University of South Florida is currently recruiting for various faculty and/or staff positions. For more information about the University's vacant positions, please visit our Web site at http://www.usf.edu/afspo/vacancy.html or call our Job Line for staff positions at (813) 974-3879.

USF is an equal opportunity/equal access/affirmative action institution committed to excellence through diversity in education and employment.
NATIONAL INSTITUTES OF HEALTH
UNDERGRADUATE SCHOLARSHIP PROGRAM

Qualified undergraduates can train and be mentored at the cutting edge of biomedical research while receiving scholarship support.

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified individuals who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks (with salary/benefits) as NIH employees in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

INTERESTED STUDENTS SHOULD APPLY IF THEY:

1) Are committed to a career in biomedical research;
2) Are from disadvantaged background;
3) Have a GPA of at least 3.6 or are in the top 5% of their class;
4) Are a U.S. citizen, national, or permanent resident;
5) Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

FOR MORE INFORMATION, CONTACT THE UGSP AT:

http://ugsp.info.nih.gov
E-mail: ugsp@nih.gov
Phone: 1-800-528-7689
TTY: 1-888-352-3001

This is a special opportunity for special students.

NIH is dedicated to building a diverse community in its training and employment programs.

CHANCELLOR SEARCH
University of Missouri-Rolla

The University of Missouri-Rolla (UMR), one of four campuses of the University of Missouri system, invites nominations and applications for the position of Chancellor. UMR, established in 1870 as the Missouri School of Mines and Metallurgy, has a long tradition of excellence in education and research in engineering and related sciences. Primary academic divisions at UMR are the College of Arts and Sciences, the School of Engineering, and the School of Mines and Metallurgy.

The campus offers baccalaureate through doctoral programs in engineering, the physical sciences, mathematics, and computer science, and baccalaureate degrees in the humanities, natural sciences and social sciences disciplines. In addition, masters degree programs are offered at various off-campus sites throughout the state and nation. The campus annual budget is $114 million and a significant influx of state money and a successful $50 million campaign are supporting strategic mission enhancement and capital improvement activities.

The Chancellor, as chief executive officer of the campus, reports directly to the President of the University of Missouri System and enjoys broad, delegated authority for the administration of the campus. Candidates for the position should possess a record of significant academic or other professional achievement sufficient to lead the distinguished faculty, outstanding student body and dedicated staff, and to command the respect of alumni and other supporters of UMR.

Screening of candidates by the search committee will begin upon receipt of nominations and applications and will continue until April 14, 2000, or until the position is filled. Nominations and applications should be sent to:

Dr. Jeffrey Cawfield, Chair
Chancellor Search Committee
206 Parker Hall
University of Missouri - Rolla
1870 Miner Circle
Rolla, MO 65409-0910

UMR is an Equal Opportunity/Affirmative Action Employer. Women, minorities, and persons with disabilities are encouraged to apply.

The University of Michigan

Student Affairs: The University of Michigan, Office of Multi-Ethnic Student Affairs, is seeking a Program Coordinator to advise Hispanic/Latino/a students on personal concerns related to social adjustment and academic performance, to provide supportive services to Hispanic/Latino/a student organizations, especially those related to organizational development, leadership training, and program planning; initiate or assist students with programs of an ethnic specific or multi-ethnic nature; facilitate the development and maintenance of a student advisory committee; maintain liaison with other student affairs personnel and university colleagues; prepare special or periodic unit reports regarding work activities and budget plans; assist with unit administrative duties as assigned. Desired qualifications: Master's degree in Student Personnel, Higher Education, or a related field. Two years experience working with students and student organizations, demonstrated knowledge of student development in a multi-ethnic environment. Must be flexible, mature, and have the ability to work with a diverse staff and student population.

Applications from women and minority candidates are strongly encouraged. Screening of applications will begin on March 13, 2000. No resumes will be considered after April 7, 2000. Send letter of interest and resume to:

E. Frederic Dennis
3200 Michigan Union
530 S. State Street
Ann Arbor, MI 48109-1349

Connecticut's Community Colleges are seeking Graduate Students interested in Administrative or Teaching Fellowships.

MINORITY FELLOWSHIP

• Experience the excitement and challenges of the two-year college sector where 50% of the nation's undergraduates begin their higher education.
• Gain valuable professional experience.
• Enhance the ethnic, racial, and intellectual diversity which the colleges seek to promote.
• Serve as a role model for students.
• Develop professional relationships in your field.
• Earn financial support for your educational expenses: $3,000 per semester.

The selected candidates should have successfully completed at least six credits of graduate study. All candidates should be in good standing, willing to spend 6 hours per week in classroom-related activities or in a structured administrative setting under the supervision of a mentor. These individuals will be involved in faculty and staff meetings, Minority Fellowship Orientation, and will assume increased responsibilities as the Fellowship year progresses.

For further information contact: Kenneth G. Armstrong, Affirmative Action Officer, Connecticut Community Colleges, 61 Woodland Street, Hartford, CT 06110; (860) 725-6646. We are an Affirmative Action/Equal Opportunity Employer M/F.

DIRECTOR OF MARKETING

SANTA CLARA UNIVERSITY

Located in the heart of California's Silicon Valley, Santa Clara University seeks a highly skilled marketing professional to position the University strategically, both internally and externally with its many and various constituencies. This is a new position reporting directly to the President of the University. The successful candidate will be responsible for creating and implementing initiatives to enhance SCU's identity and image by increasing awareness and understanding of the University and its programs. Primary focus will be on student recruitment, visibility and reputation building, donor and alumni relationships, internal marketing and athletics.

Management responsibilities include leadership and oversight of the Marketing and Communications Department, with a staff of 14.

Founded in 1851, Santa Clara is a Jesuit institution. The University offers a rigorous undergraduate curriculum in the arts and sciences, business and engineering and has nationally recognized graduate and professional schools in business, law, engineering, pastoral ministries and counseling psychology, and education. With 7,700 students and a values-oriented curriculum, it is dedicated to educating students for competence, conscience and compassion. The University counts over 50,000 alumni living in all 50 states and 91 countries and has an endowment in excess of $400 million.

Candidates must demonstrate a strong record of accomplishment in strategic marketing. The ideal candidate will be a creative, energetic leader and consensus builder with significant management experience. In addition, the Director must reflect the values of the University, have excellent interpersonal, organizational and communications skills, along with a proven record of success in developing, implementing and managing a comprehensive marketing program. A Bachelor's degree is required, and an advanced degree is preferred.

Compensation includes a competitive salary and benefits package and is designed to attract a dedicated, talented professional. Submit a cover letter, resume and three references by April 14, 2000 to:

Belvedere Partners
P.O. Box 1275
Belvedere, CA 94920

Santa Clara University is an equal opportunity employer.

MILLS COLLEGE
Oakland, CA
New York University

SCHOOL OF EDUCATION

DIRECTOR OF STUDENT SERVICES

The School of Education is seeking a Director of Student Services to provide leadership for the delivery of student centered services. The School of Education enrolls approximately 8,500 students each year, 2,400 undergraduates and 4,500 graduate students. Additional information about the School of Education may be found at the Web site: http://www.nyu.edu

The Director reports to the Associate Dean of Student Services, and is responsible for establishing goals; developing initiatives; and supervising a staff of student service professionals to create and deliver new services that address the needs of a diverse student body. The Director will also serve as a liaison with faculty and the University Office of Student Life as appropriate.

The successful candidate will have had at least five years of experience providing student-centered services at an institution of higher education; exceptional communication skills; and, the ability to work collaboratively with diverse functions. The ideal candidate will possess a master's degree (doctoral degree preferred) or its equivalent in higher education administration, counseling, or related fields.

Send resume and letter of interest to: Patricia M. Carey, Associate Dean for Student Services and Public Affairs, New York University, School of Education, 82 Washington Sq. East, 3rd Floor, NY, NY 10003.

NYU encourages applications from women and members of minority groups.

THE COLLEGE OF NEW JERSEY
DIRECTOR OF CAMPUS LIFE

The College of New Jersey is a highly selective, public four-year institution with an undergraduate enrollment of approximately 5,800. The College has achieved national distinction for its commitment to excellence in education.

We are pleased to announce the following professional staff opening:

DIRECTOR OF CAMPUS LIFE - Responsible for the coordination of the Campus Life program, the Director supervises professional and graduate staff in the oversight of all student organizations and activities. Specific responsibilities include advising student government, coordinating campus programs, oversight of a professional performing arts series, and budget management. The ideal candidate will have a Master's degree in Student Personnel or a related area; at least six years professional experience in student activities with experience in leadership training, programming, supervision, budgeting and organizational development; and a commitment of multiculturalism. This twelve-month position includes a minimum starting salary of $45,214 and a full state benefits package. The anticipated start date is July 1, 2000. A review of applications will begin March 27, 2000. To apply, please send a resume, cover letter and three letters of reference which you authorize The College to contact, to: Ms. Jennifer Cross, Student Leadership Director, Office of Campus Life, The College of New Jersey, PO Box 7718, Ewing, NJ 08628-0718. To enrich education through diversity, The College of New Jersey is an Equal Opportunity Employer.

LONG ISLAND UNIVERSITY

BROOKLYN CAMPUS

ASSISTANT PROFESSOR

Department of Managerial Sciences

The Department of Managerial Sciences at Long Island University's Brooklyn Campus invites applicants for a tenure track assistant professor beginning September 2000. Ability to teach general survey courses in management and MIS integration in operations management. Ph.D. or D.B.A. is preferred in the area of management. A.B.D.'s with imminent completion may be considered.

The candidate must have evidence of effective student centered teaching, a desire to contribute to curriculum development, and evidence of published scholarship. Desired qualifications: distance learning and business related experience. To ensure consideration, submit letter of application, vita, official transcripts, and three recent letters of recommendation to School of Business, Public Administration and Information Science, Long Island University, Attn: Dr. Jordan Kaplan, Chair - Management Search Committee, 1 University Plaza - 11-700, Brooklyn, NY 11201. Review of applications will continue until the position is filled. LIU is an EEO/AA/AADA employer. Women and minorities are encouraged to apply.

DIRECTOR OF ADMISSIONS

Under the direction of the vice president for Student Development and Campus Life, the director of Admissions organizes, plans and directs the undergraduate admission and recruitment programs. The director is responsible for developing and implementing a strategic plan for enrollment management, participating in the development of university policies, and designing and implementing procedures to effectuate management policies in areas of assigned responsibility. The director of admissions also develops, administers and controls all unit programs, budget, work operations and personnel actions for the Admissions Office.

Qualifications: Master's degree required from an accredited college or university in a field related to the area of assignment or equivalence as determined by the appointing authority. Doctorate preferred. A minimum of eight years of undergraduate admissions experience of progressively increased responsibility especially in the area of marketing and recruitment. A background in marketing research and statistical analysis desirable. Should have knowledge of enrollment management theory, computer skills, and excellent written and oral communications skills.

Salary Range: $56,013 - $84,018
Starting Date: July 1, 2000
Apply by: March 24, 2000

Appointment to this Federal Senior Executive Service position may be on a career, or 2 to 3 year limited term basis, with a $115,811-$180,200 salary range. Alternatively, selectee may be assigned under Cooperative Personnel Service provisions. Applicant must have a Ph.D. or equivalent experience in science, mathematics or engineering or science and mathematical education; knowledge of organizations and education system involved in rural, urban and statewide initiatives; demonstrated leadership skills.

Announcement (SF 00-9), with position requirements and application procedures, may be accessed at http://www.nsf.gov/hrd/divs/ser/work.htm. Call by calling NSF's Human Resources at 703-306-7460 for more information. Applications must be received by 5/1/00.

NSF is an Equal Opportunity Employer.

MILLS COLLEGE
Oakland, CA

ASSISTANT DEAN/DIRECTOR OF STUDENT DIVERSITY PROGRAMS

Mills College, located in the San Francisco Bay Area, is a private liberal arts college for women who graduate programs for both women and men. The position develops programs and initiatives that increase the retention of women of color, enhance the diversity of the student body and faculty, and promote a campus climate that encourages diversity. The position works collaboratively with student organizations, student affairs professionals and faculty colleagues to integrate multicultural understanding into development programs for students and serves as a faculty advisor.

Qualifications: Five years experience in higher education advising students; knowledge of issues on campus and in society; M.A. in higher education, counseling, student personnel administration or related field; demonstrated ability to work in a problemiting, conflict resolution and multicultural program development. Knowledge of affirmative action programs is helpful.

Applications via email or mail to: Director of Human Resources, Mills College, Oakland, CA 94605.

MILLS COLLEGE
Oakland, CA

The College of Applied Life Studies at the University of Illinois at Urbana-Champaign (UIUC) invites nominations and applications for the position of Associate Dean, Academic Affairs. The College offers the bachelors, masters, and doctor of philosophy degree to prepare its graduates for careers in fields associated with the promotion of human health and well-being.

SPECIFIC RESPONSIBILITIES INCLUDE:
(a) administration of the college's undergraduate advising system (including an assistant director and five academic advisors), (b) management of undergraduate affairs by oversight of student records systems; student recruitment, admission and retention; student scholarships and awards, and (c) participation with the Dean, unit heads, and the faculty in advancing the College research agenda. The Associate Dean reports directly to the Dean and acts on behalf of the Dean upon request and/or in the Dean's absence.

Candidates should hold an earned doctorate, with demonstrated excellence in scholarship and teaching. The ideal candidate will have credentials to justify tenure in a department of the College. Additional qualifications include administrative or leadership experience ideally in both educational programs and research administration, an understanding of the mission of a land-grant university, and a demonstrated record of success in dealing with students and faculty from a wide variety of disciplines. Knowledge of the University of Illinois organization and the Urbana-Champaign campus in particular is desirable. The position is a 12-month, full-time (100%) academic professional appointment. Salary is competitive and commensurate with experience. The anticipated starting date is August 1, 2000 or as soon as possible thereafter.

To apply, please send a letter of application, curriculum vitae, and the names, addresses and telephone numbers of three references to:

Chair, Associate Dean Search
Attention: Joyce Wolfson
Office of Academic Life Studies
1206 South Fourth Street
Champaign, IL 61820
Phone 217/333-2131 FAX 217/333-0404

To assure full consideration applications or nominations must be received by May 1, 2000.

A review of applications will begin as they are received, but no decisions will be made prior to the closing date.

The University of Illinois is an Affirmative Action/Equal Opportunity Employer.
THE LOS ANGELES COMMUNITY COLLEGE DISTRICT invites applications and nominations for the following position.

• PRESIDENT, LOS ANGELES HARBOR COLLEGE

FILING DEADLINE: April 14, 2000
The Los Angeles Community College District is seeking a President to serve at Los Angeles Harbor College. Interested individuals who possess the required training and experience are invited to submit applications.

REQUIREMENTS
Criteria for the position require a Master's degree from an accredited institution and an earned doctorate is preferred. Previous professional experience should include teaching or non-classroom faculty experience with administrative experience in the community colleges and other accredited, post secondary educational institutions and/or comparable business and industry experience.

SALARY
A revision of salary and benefits for President that is now underway will make the compensation package highly competitive.

FILING AN APPLICATION
A detailed brochure is available. To apply, send (1) A letter of application, preferably five pages or less, which provides examples from background and experience to demonstrate how your knowledge and expertise apply to this position; (2) A current resume of professional experience, educational background and other pertinent information; (3) A list of eight references with business and home telephone numbers, including two supervisors, two subordinates (including one support staff member), two faculty and two community members. Matrices should be received not later than 4:30 p.m. on Friday, April 14, 2000, but applications may continue to be accepted until the position is filled. Completed applications will be sent additional application materials. If selected, additional documentation, such as official transcripts, will be required. Send to: Human Resources Division, Los Angeles Community College District, 770 Wilshire Blvd., Los Angeles, CA 90017. Letters of nomination may be sent to the same address. For additional information, contact Human Resources at (213) 891-2552. Fax (213) 891-0411. Our website is www.laccd.edu.

For confidential inquiries, contact Dr. Al Fernandez of Community College Search Services at (805) 650-2546, fax (805) 650-8469; email: alfern@ccsearch.com

THE LACCD IS AN EQUAL OPPORTUNITY EMPLOYER.
WOMEN, MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY.

CONNECTICUT COLLEGE
REGISTRAR OF THE COLLEGE

CONNECTICUT COLLEGE, a highly selective, nationally-ranked liberal arts college of 1,600 undergraduates, invites applications for a senior-level appointment as Registrar of the College. Reporting to the Vice President for Enrollment, the Registrar acts as department head for the Office of Student Records & Registration and directs a staff of six.

Responsibilities incorporate the full range of student record management and registration, including academic policy interpretation and enforcement, certification services and official publications, and academic support services. The Registrar supervises the course schedule and classroom assignments, curricular and catalogue issues, completion of all federal and state regulatory reports, continuing education and special day students, and provides staff support to several Faculty and Trustee committees. He or she also chairs the Enrollment Planning & Analysis Team and serves on a Senior Director Team within the Enrollment Division. The Registrar will lead a major conversion project of student records to PeopleSoft software during 2000-01 and coordinate faculty involvement as it relates to records and registration.

Candidates should have 5-7 years of experience in an undergraduate Registrar's Office and must be familiar with the nature of a residential, selective liberal arts college. A Bachelor's degree is required; an advanced degree is preferred. Candidates must possess outstanding organizational and communication skills, knowledge of current regulations and academic record systems, and outstanding technology skills.

Please send a resume, cover letter and the names of three references to: Connecticut College, Office of Human Resources, 270 Mohegan Avenue, New London, CT 06320. Applications will be reviewed as received. The expected starting date is July 1.

Dean of Academic Development

The Dean will be responsible for providing primary administrative leadership and supervision for the academic area at the college level of the Houston Community College System (this includes providing leadership in the area of grant writing). This leadership includes a major liaison function with public schools, colleges, universities, and appropriate business and community groups in forging partnerships to enhance academic opportunities for students. The Dean will work closely with the college President, other deans, and the Vice Chancellor of Educational Development.

Performs all other relevant duties as assigned. Position reports to the college President and is located at our Southeast College.

Cover letter must outline how potential candidate meets each of the essential job requirements. Current VOTE must accompany application package. Masters degree from an accredited institution in a relevant field is required. Doctorate degree preferred. (Photocopy of college transcript showing degree conferred must accompany application.) Official transcript is required at time of employment.

Requirements: Minimum of three (3) years management experience in programs related to higher education with increasing levels of responsibility. Three (3) years of full-time or 2 semesters of adjunct/part-time teaching = 1 semester of full-time teaching experience in higher education required. Community College experience preferred. Demonstrated excellence in verbal, written, and interpersonal skills. Experience and knowledge of the Learning College. Current knowledge of trends, issues, and concepts in higher education (includes the evaluation of academic programs). Knowledgeable in the application of instructional technology. Two (2) years experience in budget management. Experience with accepted strategies for the performance appraisal of faculty and staff. Experience in working with a diverse student body and staff.

Please refer to JVN #0061 when making an inquiry or applying for this position. An HCCS employment application is required for consideration. To request an application, call (713) 718-8565 or visit our website at www.hccs.cc.texas.edu. Application deadline is 4/30/00. Start date is negotiable. Video conferencing will be used to interview out-of-town applicants.

Houston Community College System, HR Dept., 320 Jackson Hill, Suite 220, Houston, TX 77007

HCCS is an Equal Opportunity Employer
Columbia University, recognized throughout the world for excellence in academic programs, healthcare, and research, has an Assistant Director of LDEO and Director of Administration. The position, which for 50 years has been a premier research institution studying geological and earth systems with research funding, principally from federal grants and contracts, which exceed $50 million annually. The Assistant Director of LDEO and Director of Administration will report to and work closely with the Director of LDEO and will also work with the renowned scientists of LDEO, and with external partners to ensure financial success and support for increased opportunities for new and existing research programs.

The Assistant Director of LDEO and Director of Administration will be responsible for a broad suite of administrative management designed to support the research activities of the Observatory's 150 scientists. The position includes responsibility for all fiscal, operational, and administrative business policies for the Observatory. Additionally, the position has responsibility for all activities related to physical plant development, maintenance and improvement of buildings and grounds; all campus services such as housing, canteens, security, communications, etc.; central administrative functional areas including Accounting, Purchasing, Contracts and Grants Management, Administrative Computing and Human Resources; oversight of Research Administration; representing LDEO and advocating for LDEO at the University and with governmental agencies. The Assistant Director of LDEO and Director of Administration will also be expected to participate in special projects and to assist with the administrative operations of fundraising and external affairs groups at LDEO.

This is an outstanding opportunity for a smart, energetic, creative, self-directed and highly motivated academic/research leader with outstanding interpersonal, communication and political skills to play an integral role in the growth of one of the most exciting research organizations of the 21st century. The successful candidate will have an MBA with a minimum of five years in academic administration, research administration or a closely related field or a PhD with eight to ten years of equivalent experience, including experience with contract and grant administration or fund accounting, and demonstrated success in administrative management of a complex and highly political organization. Experience with the development and implementation of technology plans and with non-profit organizational improvement efforts are desirable.

All applications, nominations, and inquiries should be directed to Lyn Brennan, Vice President and Director, SSAACON MILL, 334 Boylston St, Boston, Massachusetts, 02116; phone: 617-362-6000; fax: 617-362-6000; Email: lbreann@ssaconsearch.com.

Women and minorities are strongly encouraged to apply.
Columbia University is an affirmative action/equal opportunity employer.

Northeastern University is a national research university that is student-centered, practice-oriented, and urban. Northeastern’s vision is to be the undisputed leader in creating the nation’s most comprehensive and dynamic model of practice-oriented education. Currently, it is comprised of 12,456 full-time undergraduate students and 4,580 graduate students and 6,937 part-time students. Northeastern University is seeking dynamic, innovative individuals to fill two key leadership positions.

**Director of University Planning and Research**

The Director of University Planning and Research will provide leadership for a sophisticated analytical planning effort that supports university-wide academic and financial operations and budgeting and includes all major constituents. The Director serves as a member of the University leadership group and provides leadership in shaping a policy process, based on research, that guides the University to develop policy and propose solutions to address issues facing the University. Responsibilities include leading or participating as a key member of a number of campus planning committees; crafting strategic assessment instruments that inform the University’s future planning; overseeing institutional research and supervising the budget of the professional staff.

Qualifications: Significant administrative experience with or in a research university or its equivalent; exceptional understanding of strategic planning, complex financial and budgeting planning matters; ability to conceptualize broad institutional goals; ability to systematically analyze complex issues and data; deep understanding of organizational dynamics; PH.D. preferred, advanced degree required.

Applicants should submit a letter of interest, resume and names and telephone numbers of three references to Patricia Mareser, Special Assistant to the President, Northeastern University, 350 Huntington Avenue CH 110, Boston, MA 02115; Email: p.mareser@nunl.nju.edu; Fax: (617) 373-5015. Applicants may also contact Margot Landel, Landel & Associates, LLC, Telephone (781) 237-1754; Email: landel@medicine.net.

**Director of University Relations**

The Director serves as member of the President’s leadership group, and is responsible for developing and executing a Brand Strategy that will advance Northeastern’s mission and ultimately serve to strengthen and unify the Northeastern brand. We are seeking an entrepreneurial leader to establish a marketing strategy, incorporating all the disciplines of marketing and communications (public relations, publications, advertising, direct marketing, website development with specific emphasis on the internet and other new media). Will lead and motivate a diverse team of over 30 communications professionals.

Qualifications: Must possess strong marketing and communications expertise, minimum of 12 years progressively responsible experience and provide evidence of substantial contributions to the development and implementation of a variety of marketing and communication strategies for complex organizations. Bachelor's degree required, graduate degree preferred. Strong management skills, exceptional ability to establish effective relationships, adept at managing change, and the ability to direct multiple projects are essential.

Applicants should submit a letter of interest, resume and names and telephone numbers of three references to Jim Ward, The Ward Group, 202 Cedar Street, Woburn, MA 01801. E-mail: info@wardgrp.com; Fax: (781) 938-4100. Salary and benefits are competitive and commensurate with qualifications. Women and minorities are strongly encouraged to apply.

AMERICAN ASSOCIATION OF UNIVERSITY PROFESSORS

ASSOCIATE COUNSEL

Three years or more experience preferred. The position, in department of two lawyers, involves advising faculty, students, staff and others on a wide array of legal issues and problems, both on and off campus. Experience in legal and other support work for the Association. Excellent writing and research skills, familiarity with higher education law, non-profit organizations, academic property, affirmative action, or civil liberties preferred. Salary from $60K, depending on experience. Excellent benefits. Apply to: AAUP Legal Search, 1012 16th Street NW, Suite 500, Washington, DC 20005. No phone calls.

NORTH PARK UNIVERSITY

AC Montgomery College

A Two-Year Public Community College
Campuses at Takoma Park, Rockville and Germantown, Maryland

Announcement of Position Vacancy

Montgomery College
Rockville Campus

INSTRUCTIONAL DEAN
HUMANITIES AND SOCIAL SCIENCES

Montgomery College, a multi-campus community college committed to excellence in teaching and to student success, is seeking applications and nominations for the position of Instructional Dean, Humanities and Social Sciences for the Rockville Campus. Position funding is available through the College, which is located in Maryland, north of Washington, D.C., and is located in the most populous, racially diverse and fastest growing country in the state of Maryland. The College is engaged in meeting the challenges of providing instructional programs that are diverse and changing educational, social, economic and cultural needs of our community. The Rockville Campus is the largest of the three campuses and draws approximately 15,000 students of varied ethnic backgrounds who are native speakers of many different language groups. The campus high school, businesses and the international community.

The Instructional Dean reports to the Campus President and is part of the campus leadership team of deans and directors. This team is responsible to create, maintain, protect and be accountable for the best possible learning environment at the Rockville Campus by:

- Ensuring a student-centered focus in all activities
- Balancing college, campus and area perspectives
- Developing and managing resources
- Ensuring and advocating for quality of instruction and services
- Developing, supervising and evaluating faculty and staff in assigned areas
- Inspiring and encouraging innovation

This position provides leadership for faculty and staff in the areas of English Composition, Professional Writing, Literature, Reading and English as a Second Language, Foreign Languages, Political Science, History Sociology, Anthropology, Criminal Justice and Philosophy.

QUALIFICATIONS: Candidates must have a Masters Degree, preferably in one of the disciplines supervised. A doctorate in one of the areas supervised is preferred. Progressive experience and management experience is required: experience in teaching and management in a community college environment is desirable. Candidates should be able to demonstrate abilities in these areas:

- Effective written, oral and interpersonal communication skills
- Leadership in curriculum development, program review, academic planning and budgeting
- Teaching and the supervision of faculty
- Administering the appropriate use of technology in the classroom and laboratory facilities
- Developing opportunities for faculty professional growth and staff development
- Working with a culturally diverse student body
- Working collaboratively with other administrators, faculty and staff to advance the goals of the academic program
- Participating in community, business/industry, 6-12 and other outreach activities

The salary range is $64,293-$70,000 per year, with a starting salary falling within the first half of the range. Montgomery College offers excellent fringe benefits. Applications for career and other opportunities are available at (www.montgomerycc.edu) or by calling the Office of Human Resources, Montgomery College, 900 Flinthill Drive, Suite 130, Rockville, Maryland 20850. Application materials must be received by 5:00 p.m., April 7, 2007.

Montgomery College is an equal opportunity employer committed to fostering a diverse academic community among its students, faculty and staff.

EDUCATION

DIRECTOR OF STUDENT ACTIVITIES
SEARCH REOPENED

Candidate will provide leadership for a comprehensive Student Activities program based on student personnel philosophy of student development. Reports to the campus Dean for Student Services and is responsible for developing and administering programs for new freshman and currently enrolled students.

Master's degree required; degree in Student Personnel Administration, Counseling, Student Development, Higher Education or a related field. Minimum of two years experience as a Director or Assistant Director of Student Activities in a college or university setting required. Experience with new student orientation program desired; additional experience in student services will be considered.

Strong managerial and supervisory skills with the capability to establish priorities and function as a leader; manage multiple budgets with excellent computer, communication and interpersonal skills; ability to relate to ethnically diverse college community.

Salary: commensurate with education and experience with excellent benefits. Starting Date: ASAP. Application Deadline: 4/1/00.

Applicants should reference position number (03-175) and send the following as a single packet: (1) letter of interest, (2) resume, (3) unofficial copy of graduate transcript(s), and (4) list of three professional references (names, addresses, and telephone numbers) to:

GA IS AN OPEN RECORDS STATE An Associates Degree Granting College of the University System of Georgia

UNIVERSITY OF CINCINNATI
College of Arts and Sciences

Director of Women's Studies

The University of Cincinnati College of Arts and Sciences invites applications for the position of Director of Women's Studies. The Director of this well-established and nationally recognized program will be responsible for providing feminist intellectual leadership to ensure further development of the Center's curriculum, research, and outreach programs.

The successful candidate for the directorship of Women's Studies must have a terminal degree in her/his field, substantial experience in teaching gender-related issues, and distinguished scholarly achievement in her/his discipline. Ideal candidate will demonstrate strengths in feminist research and publication, and in administrative skills, including interpersonal communication with sensitivity to diversity, curriculum development, and community outreach.

This twelve-month appointment is effective 2000-2001. The duties of the Director of Women's Studies will include teaching one graduate course per quarter, advocacy in representing the program to internal and external constituencies serving on Women's Studies committees, program development, grant-writing and fundraising. The Director will hold a tenure position in the Center for Women's Studies and will report to the Dean of Arts and Sciences. The position will include an administrative stipend and summer salary supplement.

The University of Cincinnati's Women's Studies Program offers an interdisciplinary certificate (minor), an MA in Women's Studies, and a JD/MJ. In addition to the Director, the administrative staff includes two Associate Directors and one administrative assistant. Approximately 80 faculty members throughout the University are affiliated with the Women's Studies Program. A unique strength of the Center is the support it receives from the Friends of Women's Studies, a 350-member community organization. The Friends Endowment Fund of $500,000 provides for visiting professorships and brings other distinguished scholars to campus.

Applicants should submit a letter of interest, curriculum vitae and the name of three references to Professor Marcia Bellas, Chair of Search Committee, Center for Women's Studies, University of Cincinnati, Cincinnati, Ohio 45221-0164. Files will be reviewed beginning April 1 and until the position is filled. For more information, visit our web site at http://careerwwcm.uc.edu/womens_studies/.

The University of Cincinnati is an affirmative action/equal opportunity employer. Women, minorities, disabled persons, and Vietnam Era and disabled veterans are encouraged to apply.
Director, College of Education

Texas A&M University-Corpus Christi invites applications and nominations for the position of Dean of the College of Education. The University is one of the fastest growing in the State of Texas with a fall 1999 enrollment of 6,600 students.

The College of Education, one of four colleges in the University, serves approximately 1,500 undergraduate and graduate students. There are 46 tenured faculty presently serving the College of Education. Its primary purpose is to prepare students for a career in a selected area of professional education. The Dean of the College of Education reports directly to the Provost.

The College of Education is committed to a field-based professional development program. Partner Schools in the Coastal Bend region serve as sites for direct instructional delivery by University faculty as well as sites for application of theory and practice. An integral part of the College of Education is the Early Childhood Development Center, a dual language school for children from three years of age through third grade, located on campus and connected with the Corpus Christi Independent School District. The University has designated the Center and its related activities as major area of emphasis.

Undergraduate programs include the Bachelor of Science in Interdisciplinary Studies degree and the Bachelor of Science Degree with majors in Kinesiology and Occupational Training and Development. In addition to these major fields of study, a teaching endorsement in Early Childhood Education is available. Students may also receive a military commission through the Military Science program.

The College also has ten fields of study leading to the Master of Science degree, fifteen certification areas; and seven professional certificates. A doctoral program in Educational Leadership is offered jointly by Texas A&M University-Corpus Christi and Texas A&M University-Kingsville.

The College seeks an educational leader who can strengthen programs at the undergraduate and graduate level, expand the research mission of the College, and serve the diverse populations of South Texas. The successful candidate must have an earned doctorate in education or a closely related field; public school experience; collegiate teaching experience; administrative experience as dean, associate/assistant dean, program director or department chair; a record of teaching, scholarship, and service; and an attitude of full professor in the College; and responsiveness to the trends and issues challenging the field of education at the national, state, and local levels.

The preferred candidate will have a strong publication record, experience in doctoral education; a commitment to shared governance with faculty, staff, and students; strong interpersonal communication skills; a commitment to excellence in education and innovative learning approaches; a record of collaboration with public schools and community organizations; significant leadership experience with accreditation; a record of supporting a variety of scholarship and research activities; success in securing external resources; and a commitment to professional development of faculty.

Review of applications will begin April 17 and will continue until the position is filled. A completed file consists of a letter of application, curriculum vitae, and names, addresses, titles, and telephone numbers of five professional references. Materials should be sent to:

T A M UNIVERSITY-CORPUS CHRISTI IS AN EQUAL OPPORTUNITY EMPLOYER STRONGLY COMMITTED TO DIVERSITY.
ASSISTANT PROSTOV AND DIRECTOR OF YOUNG SCHOLARS PROGRAM

Founded in 1970, the Office of Minority Affairs (OMA) is a long established unit of the Ohio State University with a specific mandate to recruit, retain, and ultimately graduate minority students. OMA also provides leadership opportunities for minority students and takes initiatives to include faculty, staff and community. OMA is currently accepting applications for the position of Assistant Vice Provost and Director of the Young Scholars Program (YSP).

ASSISTANT VICE PROVOST (YSP)

DUTIES: Perform broad range of complex duties to provide administrative support and assistance to the Provost and Office of Minority Affairs. Serve the Director of Undergraduate Recruitment & Scholarship Services and the Director of Retention & Academic Support Services. Serve as liaison and contact person for Office of Minority Affairs programs and initiatives. Oversee a broad range of student support activities and events. Provide administrative oversight in assigned OMA areas to ensure maintenance of a comprehensive minority student experience through campus collaborations.

QUALIFICATIONS: Master’s degree or an equivalent combination of education and experience; considerable experience in minority student recruitment and academic support services; excellent verbal and written communication skills; experience with diverse cultural groups; higher education commitment to bilingual/bicultural student groups desired. Working knowledge of university policies and procedures; experience in computer literacy and Windows work experience desired. Salary: $75,000 to $80,000.

DIRECTOR - YOUNG SCHOLARS PROGRAM (YSP)

DUTIES: Provide direction, guidance, and establish goals and performance objectives for YSP and oversee Board of Advisors. Serve as a liaison to the Board of Advisors to develop strategic plans. Direct and manage program activities. Oversee a broad range of student support activities and events. Provide administrative oversight in assigned OMA areas to ensure maintenance of a comprehensive minority student experience through campus collaborations.

QUALIFICATIONS: Master’s degree or an equivalent combination of education and experience; required qualifications: considerable experience in program planning, direction and administration; the pre-collegiate form experience in curriculum development experience with budget planning and related fiscal activities; previous supervisory experience preferred; professional and/or career experience working with low-income, and minority disadvantaged student population. Salary: $45,000 to $55,000.

The university offers a comprehensive benefits package. For more information about the university, visit our website at www.ohio-state.edu.

Review of candidates will begin April 10, 2000 and continue until position is filled. Send cover letter indicating appropriate position, reference number and two (2) references to: Employment Services, 310 Northwood High Rise Bldg., 2211 North High Street, Columbus, OH 43210. Office of Minority Affairs is an Equal Opportunity Affirmative Action Employer Women, Minorities, Vietnam-era Veterans, and Individuals with Disabilities are encouraged to apply.

Brown University

DIRECTOR OF THE CENTER FOR THE STUDY OF RACE AND ETHNICITY IN AMERICA

Brown University invites nominations and applications for the position of Director of the Center for the Study of Race and Ethnicity in America (CSREA).

Candidates must (1) be scholars qualified for a tenured faculty appointment in one of Brown’s academic departments in the humanities, the social sciences, or appropriate areas of the life sciences; (2) have broad academic interests and a demonstrated ability to work productively in an interdisciplinary, multi-racial, and multi-ethnic setting; and (3) have demonstrated teaching ability and a successful record of developing research projects and grant proposals.

The Director will be responsible for the academic leadership of the Center, for overseeing the Ethnic Studies Concentration, for coordinating and encouraging research and teaching in the area and for generating intellectual and financial resources for the Center. The Director’s duties will also include teaching half time.

Brown University is an EEO/AA employer. Minorities and women are encouraged to apply. The Search Committee will begin reviewing applications as of receipt. Candidates should send a letter of application, a curriculum vitae and a list of five referees to the address below. Applications will continue to be considered until the position is filled or closed. For further information or to apply write to:

East Stroudsburg University of Pennsylvania

ASSISTANT PROFESSOR
PSYCHOLOGY DEPARTMENT

East Stroudsburg University invites applications for a full-time, tenure-track position at the Assistant Professor level beginning Fall 2000. Teaching responsibilities may include General Psychology, Psychology of Adjustment, Theories of Personality, Abnormal Psychology, Developmental Psychology, Measurement and Evaluation, Introduction to Counseling, and Psychological Testing. There may be a possibility of teaching graduate-level courses. The successful candidate will initiate and maintain an active research program with undergraduates.

REQUIREMENTS: A doctorate in the area of Clinical/Counseling Psychology, with a commitment to the scientist-practitioner model and undergraduate teaching experience is required. Final determination will be based upon successful interview, which may include teaching demonstration performance.

Materials must be received by May 15, 2000. Send a letter of application describing teaching and research interests, curriculum vitae, graduate transcripts, evidence of teaching effectiveness, evidence of scholarship, and three letters of recommendation to: Sussie Estus, Ph.D., Chair, Psychology Department Search Committee, East Stroudsburg University, East Stroudsburg, PA 18301.

ESU is an equal opportunity employer. Minorities and women are strongly encouraged to apply. Visit our homepage at www.esu.edu.

Suffolk County Community College, New York State’s largest multi-campus institution, invites applications for the Dean of Faculty at its Western Campus. The Western Campus, located in Brentwood, has over 6,000 students and over 100 full-time faculty members.

The Dean of Faculty reports directly to the Executive Dean and is responsible for academic policy, implementation, procedure recommendations and proactive leadership. As the chief academic officer of the campus, the dean’s primary responsibility is the management of classroom faculty and support staff and providing oversight for the integrity and direction of campus academic programs.

Candidates should possess a substantial record of incremental administrative experience in higher education; significant teaching experience; expertise in program development; familiarity with emerging technologies and academic applications; a record of encouraging faculty development and be well versed in program review and the accreditation process. In short, the successful candidate must be a strong academician and leader who possesses outstanding interpersonal skills.

Please refer to the college website for position description and qualifications.

Be an Influential Force in
The Power of Learning
HOUSTON COMMUNITY COLLEGE SYSTEM

Houston Community College System (HCOC), a public, comprehensive community college, is the largest institution of higher education on the Gulf Coast of Southeast Texas. With an enrollment of 55,000 credit and non-credit students and 2,200 instructional programs, HCOC is organized into five regional colleges that serve a culturally, ethnically, and economically diverse student body. HCOC is a leader in workforce development and academic transfer programs, offering associate degrees, technical training, technical certificates, and continuing education opportunities.

HCOC, the fourth largest city in the United States with a population of 1.8 million, is well known as a center for energy, medicine, international business, and technology. Houston is also a thriving cultural center, home to a world-class symphony, opera, theater, ballet company, and sports teams.

We invite applicants for anticipated full-time faculty openings in the following disciplines:

Academic Instructors
Art
Biology
Chemistry
Computer Science
Dev. Math*
Dev. English*
Economics
English
English as a Second Language (ESL)

Technical Instructors
Audio/Video Technology
Business Technology
Computer Science
Technology
Criminal Justice
Law Enforcement
Emergency Medical
Technician (EMT)

Technical Writing

Bilingual (English/Spanish) also needed in these fields.

All applicants for academic areas must have a Master’s degree with 18 graduate hours in the teaching field, as well as related teaching experience at the post-secondary level.

Candidates in the technical areas must have appropriate academic credentials (minimum of Associate’s degree), as well as 36 months of related work experience.

Experience working with a diverse student population is desired. A commitment to the mission of community colleges and their students is required. HCOC offers competitive market salaries and excellent benefits.

An employment application and a copy of college transcript from an accredited institution are required for consideration. To request an application, call (713) 718-8655 or fax request to (713) 718-8641 or download a application from the HCOC website (www.hcocs.cc.tx.us). Application deadline: April 20, 2000.

Houston Community College System
320 Jackson Hill, HR Dept. Ste. 220, Houston, Texas 77007

The Resident Director is responsible for the training, supervision and evaluation of resident assistants.

Minimum Requirements:
Bachelor’s degree in Education or a related field; previous residence hall experience; and the ability to work with students and staff in a variety of roles.

If desired, the position is available for full-time employment.

Submit letter of application, resume, and names and telephone numbers of three professional references to:

Maribeth Griffin, Assistant Director of Housing, Newbury Hall,
Western Connecticut State University, 181 Whitelawn Rd., Danbury, CT 06810 by April 14, 2000. EEO/Affirmative Action EMPLOYER. Minorities and women are encouraged to apply.
R. M. W.

RANDOLPH-MACON WOMAN'S COLLEGE

Associate Vice President for Development and Director of the Campaign

RANDOLPH-MACON WOMAN'S COLLEGE
Lynchburg, Virginia

The College seeks candidates who have a minimum of 10 years successful experience in fund raising and who can demonstrate thorough understanding of the systems and organizational structures needed to support a comprehensive program. Previous capital campaign experience at a major institution is preferred. A persuasive proponent of the liberal arts college environment, the ideal candidate will possess the vision to see the connections among the various campaign components, strong leadership skills, and proven managerial abilities. A Bachelor's degree is required; advanced degrees are preferred.

The College invites applications and nominations for the position of Associate Vice President for Development and Director of the Campaign.

The College seeks candidates who have a minimum of 10 years successful experience in fund raising and who can demonstrate thorough understanding of the systems and organizational structures needed to support a comprehensive program. Previous capital campaign experience at a major institution is preferred. A persuasive proponent of the liberal arts college environment, the ideal candidate will possess the vision to see the connections among the various campaign components, strong leadership skills, and proven managerial abilities. A Bachelor's degree is required; advanced degrees are preferred.

Randolph-Macon Woman's College is selective private liberal arts institution, founded in 1891, and situated on a 100-acre campus in the foothills of Virginia's Blue Ridge Mountains. The College has a diverse student population of 720 undergraduates who come from 47 states and 34 foreign countries, and it boasts a 9:1 student-to-faculty ratio. The market value of the College's endowment fund currently exceeds $140 million. Randolph-Macon Woman's College consistently ranks in the top 1% of all colleges and universities for alumni participation in annual giving, and it is ranked in the top 10% of baccalaureate-granting institutions nationwide in the percentage of students who go on to earn a Ph.D. The College is historically related to the United Methodist Church.

Active screening of candidates will begin immediately and will continue until the position is filled. Nominations, applications, and letters of interest should be submitted to:

Associate Vice President for Development and Director of the Campaign
Randolph-Macon Woman's College
o/o Educational Management Network/Kiefer
98 Old South Road
Santonuck, Massachusetts 02554

Requests for a copy of the Position Specification and questions concerning this search may be directed to Nancy C. Whitecomb at 508-228-6700 or via e-mail at RMVC@emnem.com

Randolph-Macon Woman's College is an equal opportunity employer.

BARNARD COLLEGE

Associate Director Admissions

Barnard College, a women's liberal arts college affiliated with Columbia University, seeks an Associate Director of Admissions to join the senior staff. Reporting to the Dean of Admissions, the Associate Director will assume responsibility for admissions programs, with specific responsibility for the multicultural program. Organize and execute candidate evaluation and selection processes. Develop and oversee special admissions projects.

Requires a bachelor's degree from a liberal arts institution, 4-5 years' experience in college or university admissions; understanding of values of a liberal arts education for women and the ability to articulate these effectively. Experience recruiting a diverse application pool is essential. Strong communication, time management, and organizational skills. Computer literacy and a driver's license are also necessary. Must be willing and able to travel for up to 3 weeks at a time.

Send letter with resume and salary requirements to Employment Manager, Barnard College, 3009 Broadway, New York, NY 10027-6598. Fax: (212) 854-2454.

Barnard is an equal opportunity employer and encourages applications from individuals of diverse racial, ethnic, and cultural backgrounds.

CERRITOS COMMUNITY COLLEGE DISTRICT

Cerritos College, a single campus community college district located in South Los Angeles County adjacent to north Orange County with an enrollment of approximately 21,000 students is accepting applications for the following full-time faculty positions:

THE BIG RACE

Some 100 years ago, H. G. Wells wrote that history is a race between education and catastrophe. I live and work in Silicon Valley, a region we somewhat egotistically reference as representing the future of our rapidly emerging knowledge economy.

If indeed the computer and its most prominent offspring, the Internet, represent our destiny, then we as Hispanics are most definitely in a race between education and catastrophe. Two recent events in Silicon Valley have recently made that point distressingly relevant.

One was an article, "Great Wealth—and Poverty" (1/18/99) in our local paper, The San Jose Mercury News, reporting on a number of studies that outlined "where the global economy is taking us."

The author, Douglas Matiner, pointed to a United Nations report, The 1998 Human Development Report, which reveals that the 225 richest people (yes, 225) on the globe have a combined wealth equal to the poorest 47 percent (yes, 47) of all humankind!

Worse, the world's wealthiest people have assets greater than the combined gross domestic product of the 35 least developed countries on the planet (with a combined population of 1 billion people).

The article points out that in the United States, home to 300 billionaires, nearly twenty percent of our children are growing up in poverty. This is the most democratic of societies, or so we claim, has the worst income disparity among industrial nations.

One percent of Americans own 40 percent of our nation's wealth. Despite this well-known disparity, a 1997 tax bill gave the richest one percent of Americans tax breaks averaging $11,000 per annum, a sum approaching the yearly salaries of janitors, salespeople, and food servers.

Closer to home, Joint Venture Silicon Valley Network, a nationally recognized collaborative of government, education, and private-sector leaders, released its 1999 Index of Silicon Valley. The index, published for the past five years, gives us a good social and economic picture of Silicon Valley's health. (For more information, visit www.jointventure.org). There are disturbing data regarding the participation of Silicon Valley Hispanics in this newly emerging economy.

Reflecting global trends, from 1991 to 1997 the lowest 20 percent of household incomes in the valley saw their real income decrease by 8 percent while the top 20 percent saw their income increase by 19 percent. The average income in the valley reached an astounding $40,000. The average salary in the fast-growing software industry reached $90,000. Clearly, we should not be concerned about the creation of such prosperity. The issue for us is the diminishing opportunities for some. Hispanics in particular, to participate in the new economy.

The cases are seen in the facts that less than one-third of all Silicon Valley high school students were enrolled in mathematics beyond Algebra 1. The graduation rate for Latino students is a miserable 56 percent, and only 19 percent of our Latino students are completing the basic requirements to be eligible for admission to the state's universities.

Clearly, then, we are headed toward possible catastrophe, a catastrophe in which we continue to develop a technologically sophisticated society producing great wealth for those able to participate while some, particularly Latinos, continue to fall further and further behind in the race to enjoy the fruits of the new economy.

Our ultimate catastrophe would be a society in which Latinos are excluded from the benefits being produced. We would face the cruel irony of having a century-long struggle to overcome our legacy of supplying cheap, unskilled labor for an industrialized society collapse completely under the weight of these distressing statistics. Then we will be condemned to supplying cheap, unskilled labor for the new information economy.

We are on the brink of a great opportunity. Public demand for educational reform has never been higher. Corporations are clamoring for sufficient numbers of high tech workers to fuel their impressive growth. And an important presidential election is on the horizon.

We need to exercise our collective influence on both major parties and their presidential candidates to commit to a major national initiative to address the deficiencies noted earlier.

In the early sixties, President John Kennedy established an ambitious goal of safely sending a man to the moon and back by the end of the decade. We should demand that our next president establish a similar goal with an equivalent commitment of resources to safely send Hispanic (and other underrepresented groups) into the equally alien environment of technical and scientific careers.

Specific national goals and timetables must be established, as they were in the race to the moon, and the resources needed to achieve those goals must be applied. Let us win this race against catastrophe as we won the space race.

A Capitol View

By Gustavo A. Mellander

During the 1930s, President Franklin Roosevelt expanded the influence and presence of the federal government. He created a veritable avalanche of what were derisively called “alphabet soup” agencies. WPA, SEC and WRA come to mind.

The government still is involved, still creating new programs. Many nowadays have snappy titles such as TRIO, FIPSE, and now GEARUP— for Gaining Early Awareness & Readiness for Undergraduate Programs.

Why Early College Awareness?

Today more than ever before, education is the fault line between those who will prosper in the new economy and those who will not. To prepare ourselves for the world of personal and professional choices in the 21st century, we must open the doors of college to all Americans and make two years of college as universal as high school is today.

Yet many students, especially minorities such as Hispanics, never receive a college education. Some don’t because they lack the preparation for college, and others, because they lack the financial resources.

For decades, the college-going rate of lower-income students has lagged far behind the rates for students from higher income families. Much of the problem stems from the fact that many lower-income families do not know how to plan for a college education, often because they simply have never done it before.

Even supportive parents and families who want the best for their kids often don’t know how to advise them. If we raised awareness among lower-income Hispanic students who are now in grade school, we would improve the odds that high school graduation for those students will be a step toward further education.

What to Do?

The message for students is clear: Planning for your future means setting high expectations in all the work that you do: working hard and earning the best grades you can; finding and connecting with mentors who will support your positive goals; planning to take the right courses—including algebra and geometry starting in the eighth and ninth grades—to keep your education options open; and learning about the many financial aid opportunities available to you.

But students cannot do it alone. Nor should the responsibility rest with parents alone, or with schools alone. Parents and families, schools, and many groups in the community can each play a role in providing our middle-grade students with support and help that will ultimately strengthen our workforce and our society.

The Dismal Reality

Of the 19 million adolescents ages 10 through 14 in the United States, approximately 20 percent live below the poverty line, and close to 30 percent are members of minority groups.

Moreover, of the $4.3 million enrolled in higher education institutions in 1995, 83 percent of high school graduates aged 18-24 from high-income families were enrolled in college the October following H.S. graduation; 56 percent from middle-income families; and only 34 percent from low-income families.

How Can We Improve These Statistics?

We can help Hispanics understand early on, while their children are in the middle grades, what will be required of them in order to go to college. Parents need to have accurate and clear information about college prep courses and programs for their children. Hispanics must know that many financial aid opportunities exist so that no one decides against going to college because of lack of finances.

Middle-grade educators at all levels can use their skills and expertise to reach students whose poverty and resulting lack of information and expectation, rather than their brain power or capability, too often prevent them from pursuing and reaching higher education goals.

All educators, because they have experienced college themselves, understand what it takes to be successful in college. Creating a program to explain what college is about can be as exciting in the planning as in the implementation.

Middle school students are surrounded by members of the larger community who can make a difference in their aspirations, education, and awareness. When young adolescents visit the campuses and programs of local colleges and universities, they see—early—what education beyond high school is really like.

Religious and other community organizations can help with tutoring programs and other services. Businesses can join with families, schools, community organizations, state and local governments, and higher education institutions to help students become aware of the increasing choices that a college education can provide.

Education Is Everybody’s Business

We have an opportunity to raise postsecondary expectations among younger Hispanics, regardless of their background, their outlook is bright and their future is still wide open.

For students, it is hard and it requires a plan. For families, it requires support and involvement. For school colleges, it demands high aspirations for all students and the collaboration.

For businesses, it takes commitment, through mentoring and communication with schools at all levels about what businesses in the workplace. For religious community, and arts organizations that take being a place your can turn to for informatic encouragement.

We can all plan and participate in our nation’s young Hispanic understanding the world of college that awaits them.

Dr. Mellander is a professor of Political Science at George Mason University.
Action, Not Rhetoric, At CSU Cleveland State University

Strives to Be Top Choice for Hispanics

BY ADALYN NIXON

Back in the '40s and '50s, the Ford Motor Company recruited workers from Puerto Rico to its plant in Lorain, just west of Cleveland. The plant has since closed down, but the workers and their families have remained. Today, Puerto Ricans are the largest segment of Cleveland's Hispanic population, which embraces about 20 Latin American countries of origin.

Cleveland's population is around a half million, and the Cleveland metro area about five times that, per the 1990 census. But Cleveland's county, Cuyahoga, has an estimated 1995 Hispanic population of just 38,000.

Yet by most accounts, Latino power is on the rise in Cleveland, the largest city in the state. The first Hispanic was elected to the Cleveland City Council in 1997, Nelson Cintron Jr. And last year, lawyer Jose Feliciano was elected president of the Cleveland Bar Association, another first.

A few years back, The Bridge, the minority affairs newsletter of Cleveland State University, reported proudly that in fall 1995, Hispanic enrollment at Cleveland State University had finally reached the percentage that Hispanics were of the Cuyahoga population—2.15 percent. But its efforts to attract Hispanics didn't stop there.

Cleveland State University is known for its enrollment of minorities, often ranking first in the state in several categories, competing well nationally against cities with far more diverse populations to draw on.

Cleveland State is a commuter school. Four out of five students are from Cuyahoga County. Ninety-eight percent are from Ohio. A third of CSU's students are in graduate school or law school.

One in four of its students is a minority. Nineteen percent of the student population is African American. But Native Americans and Asians are significant there in achievements, if not in numbers.

CSU often leads the state in graduating them, particularly in science and engineering.

A list of Hispanic initiatives, distributed by OMACR, the Office of Minority Affairs and Community Relations, starts by saying that CSU "strives to become the university of choice for Hispanic students." A look at those initiatives confirms that this is not empty rhetoric. CSU strives to become the university of choice for Hispanic students. "We're serious about our urban mission, and we take our students seriously," said Dr. Njeri Nuru-Holm, vice president for the Office of Minority Affairs and Community Relations.

Admissions

Danny Vasquez, assistant director of admissions, and the person in charge of Hispanic recruitment, readily ticks off specific efforts. "New scholarships have been developed that target Hispanic students. "A number of direct-mail campaigns are done throughout the year that are focused on Hispanic students.

"For more than 12 years, CSU has had a bilingual admissions counselor. This helps CSU to recruit those students who are more comfortable with speaking in Spanish than English, and it helps when visiting the different community agencies and events.

"CSU works with a Hispanic agency in the community called Esperanza, Inc. Esperanza aids students by providing a number of educational services to them while they're in high school, and by offering scholarships upon graduation.

"The challenge is getting them to understand the opportunities open to them here."

DANNY VASQUEZ,
ASSISTANT DIRECTOR OF ADMISSIONS, CSU
from high school. CSU matches the scholarship given to the student if the student chooses to attend CSU.

"CSU is a member of ECHHO (Educators in College Helping Hispanics Onward), a statewide organization committed to helping Hispanic high school students gaining post-high school education, whether it be a community college, four-year university, trade school, etc. The organization's main activity is a series of statewide college fairs, intended for Hispanic students." Vasquez says there are eight or nine of these fairs throughout Ohio every year, and Admissions always sends a representative.

The Admissions Office sponsors two annual on-campus recruitment events. One event is for Hispanic high schoolers, and the other is for Hispanic students at Cuyahoga Community College (Tri-C).

The event for the high schoolers is designed to introduce CSU to sophomores and juniors, and to answer any questions that seniors might have about possibly choosing CSU as their college.

Listening to speakers, having opportunities to ask questions, and tours of the campus are some of the activities. But Vasquez doesn't count these alone to attract potential students. Part of his job is staying in "very close contact" with Cleveland high schools that have a lot of Hispanic students. And that job is ongoing—not episodic.

Vasquez also speaks of recruiting transfer students. "The event for Hispanic students at Tri-C is co-sponsored with Tri-C's Hispanic Steering Council. Those students who have expressed any interest in the past in transferring to CSU are invited to campus to ask questions about programs, the transferring of credits, and financial aid, and to meet with CSU faculty and staff who can make their transition from the community college setting to CSU much easier."

Transfer to four-year institutions is a topic of great importance to Hispanic education advocates, who fear that too many Hispanic youth don't aim nearly as high as talents would warrant. At least one large advocacy group urges young Hispanics to

Who's Getting Hired?

Nineteen, or 31 percent, were minorities: seven Blacks (11 percent), five of them

Internal movements include the counts above were: visito tenue-track—one Asian female; tutor to tenue-track—one white female; lecturer to visitor—white females; lecturer term—one Hispanic male and white male; professional staff—tenue-track—one white male.

"A lot of effort is placed on operation of search committees, outreach to attract a diverse pool of qualified applicants, and monitoring the selection process," said Maria Codinachi, affirmative action director, who is a native of Cuba and CSU's highest-ranked Hispanic administrator.

Engaging la Comunidad

Late last month, CSU hosted its first Hispanic Comm Forum. Held Saturday, early morning, mid-afternoon, the theme was "Senorita, Are You a Child of God? Is It a Dream or Reality?"

Mariza Perez, received multicultural programming coordinator for C., Office of Minority Affairs Community Relations, called the meeting "an excellent opportunity for participating educators to partner in promotion of postsecondary education for Hispanic youth." Perez is involved in the Hispanic community outreach initiatives.

Leaders in the Hispanic community and organizations on hand to welcome and to work. Some were part of the "College Resource Exhibit—available to talk with par about college life and academic..."

And along with presentation CSU faculty, including Dr. Quinones-Del Valle, the C. Scholarship Program, Espe's Inc., and others, there were "Whi I Go to College?" area students sharing their personal experience college life for the Hispanic stud
Earlier last month, CSU's Urban Child Research Center (UCRC), part of its Levin College of Urban Affairs, hosted a Spring 2000 Brown Bag Forum, "Hispanic Needs and Service Delivery: What We Can Tell Before Census 2000 (Social Trends as Seen from the Field.)" Forum moderator was UCRC's assistant director, Dr. Martha de Acosta. The three panelists, all Hispanic, represented a Hispanic senior center, Hispanic family center, and Hispanic services at a center for families and children.

Research on the growth, development, and education of urban children and youth is the primary activity of UCRC and a lifelong interest of de Acosta's. A native Argentinean who has lived in the U.S. for some 25 years, she holds an M.Ed. from Penn State and a Ph.D in educational policy issues from the University of Wisconsin-Madison.

De Acosta calls Cleveland "a great city to do the kind of work I do because people work together."

Her research has looked at the development of resilience among the children of mothers in a local drug rehab program, kinship care in Cuyahoga County, and the emergent literacy of bilingual kindergartners. Local organizations seeking assessment and evaluation research at UCRC include Cleveland's public library, its housing authorities, the Hispanic Urban Minority Alcohol and Drug Abuse Outreach Program, and more.

Viva Latin America

Last September, during CSU's ninth annual Hispanic Awareness Week, keynote Felix Matos-Rodriguez, Ph.D., a history professor at the Northeastern University in Boston, said, "I urge you to grab an agenda of equality and excellence, of inclusion, of participation and compassion, as we shape the world we live in today. It is one of the few ways to earn self respect."

Speaker Richard Millet, a history professor at the University of Southern Illinois, told the audience he believes there is "absolute incomprehension between the U.S. and Latin America. We perceive totally different realities." Millet, an expert on Latin America, said that

languages, political science, and history. Its director is Dr. Rodger Govea, associate professor in the political science department and holder of a Ph.D from Syracuse University.

Promotional literature for the program underscores the relevance of in eleven countries, including Spain and Mexico.

Professor Jose Labrador of the Modern Languages department and expert in 17th-century Spanish poetry, takes a group of minority students to Cifuentes, Spain.

Annually a team of students works with faculty member Dr. Peter Dunham in Belize on his pioneering Maya Mountain Archeological Project, which is funded in part by National Geographic. As a result of Dunham's work in Belize, four Mayans are now pursuing undergraduate degrees at CSU.

Chair of the department of history at CSU's First College—which offers open admissions and a highly interactive, multidisciplinary liberal arts curriculum, and especially welcomes minorities, women, and older students—is Dr. Donald Ramos, Fulbright scholar and son of immigrant parents, who came to CSU in 1971. "Fresh out of grad school, still working on my dissertation," Ramos' study of race and slavery in Brazil has been a life-long pursuit. A frequent traveler to Brazil and Portugal to analyze primary documents, including Inquisition texts, he also publishes his findings in those countries. "This is my way of giving back," he says. "Lots of American scholars use the material in foreign countries but don't publish there." His recent publications include a book on Brazilian social history, Afro-Brazilian religions, and the Catholic Church.

CSU offers a Spanish major, including a special track—Peninsular and Latin American literature and culture. Offerings last spring included, along with the more typical grammar and history, a course called Hispanic Resources of Cleveland, taught by Professor C. Angel Zorita, whose Ph.D. is from the Universidad de Sevilla.

Business Spanish, first taught by Dr. Della Galvan in 1996, draws students who are diverse in age, interest, majors, minors, and expecta-
tions. All, however, are required to engage in research and face-to-face communication with Cleveland’s Hispanic business community, an interaction that both opens job opportunities to students and attracts employees and family members from the business sector to study at CSU. Galvan, who earned her doctorate at the University of Cincinnati, said, “It was a diverse class, and everybody profited from that diversity.”

Last spring, CSU graduated the first class of its Diversity Management Program. Twelve students received a Master of Arts in Psychology, Diversity Professional Specialization; and six others, three of them Ph.Ds, were awarded continuing education certificates.

CSU’s sixth annual Diversity Conference, held last September, drew more than 100 from colleges and universities across Ohio to examine “The Significance of Race in Higher Education.” A focal point was a video, Defining Race, produced, directed, and written by Michael Rand, associate professor of communication at the college.

CSU’s Students

Hispanic students numbered 347 in CSU’s fall 1999 headcount—209 women and 138 men. And undoubtedly there are Latin Americans in its 642 non-resident aliens. Of the 347, 125 are in arts and sciences, 52 in business, 25 in education—all but two are female. 21 in engineering, 7 in First College, 15 in law, 6 in urban affairs, 78 in non-degree graduate and undergraduate programs, and 54 in University Studies—the entry point for all newly admitted undergraduates, who are given the transitional services and support needed “to form the foundation for success and build momentum for graduation.”

CSU publishes a handsome 24-page booklet, Students of Color and CSU, which acquaints potential students with its multicultural philosophy and resources. An openi statement by Dr. Njeri Nuru, vice president, Minority Affairs at Human Relations, notes that more than 22 percent of CSU’s students are of minority status and cites current accomplishments of a dozen or so students, among them Mano Mendoza, Melanie Guzman, and John Rivera-Resto.

A few pages later, student Lyc Santiago, now an alum, offers soradvice. “The best way you can get anything out of college is to actually become involved in campus and student organizations. The more you get involved, the more you’ll want to be here, and the better you’ll do in school.” A member of Los Latinos Unidos while at CSU, she notes that all are welcome to join, and adds, “We stick together, explore new things together, just try to help each other.”

The booklet names a few of the other 100 or so student organizations on campus—the Hispanic Network, Friends of India, NAACP, Arab Women’s Association, Turkish Student Association, Nation Association of Black Accountants.

And it briefly describes some CSU’s programs targeting minorities: ACE, CLASS, TLC-Ohio Scholars, IPC, EPIC, PEP, HCO, LINK, PTA, STARS, and more. Dr. Nuru writes that CSU’s multicultural support programs, “some of which have gained national distinction,” are designed to help high achieving students maintain excel, but also, for students with good potential—designed to give them where they are and help the develop and achieve.”

Many institutions make diverse goals. Cleveland State University seems to make it happen.
The Ivy League Review: Part One

The University of Chicago and Stanford University

by Mari Carmen Sarracent

Acceptance to, graduation from, or an academic career at an Ivy League college embodies an almost tangible seal of prestige recognized within and outside academic circles. While the achievements of the schools therein by no means overshadow those of other reputable, established postsecondary institutions, the Ivies have a long-standing history in higher education.

In the next several months, The Hispanic Outlook in Higher Education will feature these prestigious schools and discuss how Hispanics are faring on their campuses.

What Is the Ivy League?

Eleven colleges and universities comprise the Ivy League—Harvard, Yale, Cornell, Princeton, Columbia, Brown, University of Pennsylvania, Dartmouth, Stanford, MIT, and University of Chicago. Interestingly, while these institutions uphold the highest of academic standards in the country and perhaps the world, the origins of the Ivy League are rooted in athletics. The idea of an Ivy League was derived to form closer bonds with four large old universities in the East. In 1901, Harvard, Yale, Princeton, and Cornell competed against each other and were called the Intercollegiate Teams. In 1905, a sportsman unofficially called them the Ivies (from Roman numeral IV), and in 1892, they were officially named the Ivy Group.

Latino Representation

As you will see, Latinos, both students and faculty, are not strangers at the Ivies. Evidence of Latino accomplishments and contributions at these institutions and of their professional successes is clear. However, it has been a long, arduous road. While Hispanic surnames and faces are peppered throughout the schools, there is still room for improvement in admissions, retention, and tenure.

University of Chicago

For more than a century, the University of Chicago has challenged existing traditions. According to the University, it has played a leading role in providing equal opportunity for women and minorities in higher education. Total undergraduate enrollment for the 1998-99 was 3,777, of which Hispanics make up 6 percent. White students are the majority of the student body, at 61 percent, followed by 25 percent Asian American and four percent African American. The Class of 2003 now has slightly more women (52 percent) than men (48 percent).

The academic units of the University include the undergraduate college, four graduate divisions, and six graduate professional schools.

Like many other institutions of higher learning, the University of Chicago faces faculty attrition due to retirement, death, denial of tenure, or departure to another institution. At present, total faculty equals 2,861. While these positions are filled in due time, it is important that Latinos are represented in that process.

Lingua Franca, an academic publication, annually reviews new full-time junior-level faculty appointments in four-year colleges and universities. Its report for 1998-99 shows that in 14 of 21 fields studied, the University of Chicago placed more of its Ph.D. graduates in such positions than did Columbia, Harvard, Princeton, Stanford, or Yale. News like this is promising for aspiring students and professors climbing the ranks. But there is still work to be done.

According to University of Chicago’s public affairs office, faculty identified as Hispanic numbered 47 or 1.6 percent. The percentage of Hispanics in tenure-track positions is more dismal at 1.1 percent.

Among U of C’s distinguished faculty is Pas torna San Juan Cafferty, professor in the School of Social Service Administration, who recently co-edited a book with Dr. Engstrom entitled “Hispanics in the United States: An Agenda for the 21st Century.” The book examines the connection between integration of Hispanics in American society and public policy.

Marta Tienda, chair of sociology, started her career at the University of Chicago as a faculty professor in 1987. In 1994, she was awarded the first Ralph Lewis Professorship in Sociology. Tienda has expertise in a variety of issues such as migration, employment, and poverty among Latinos, and has authored books on these topics. She has also studied the problems of minority groups forming small businesses in Chicago.

Tienda is a fellow of the American Academy of Arts and Sciences and received a Guggenheim Fellowship in 1993.

Stanford University

The class of 2002 at Stanford University encompasses students from many different backgrounds. According to the school’s diversity data, “the undergraduate student body is among the most diverse at any institution nationally in terms of ethnicity, economic background, and geographic origin.” The breakdown for the class of 2002 is eight percent African American; nine percent Mexican American; one percent Native American; 23 percent Asian American; and four percent international students.

Total student enrollment (Oct. 1998) was 14,084, of which Hispanic undergraduate enrollment totaled 727, followed by 532 African Americans, 82 Native Americans, and 1,535 Graduate students numbered 7,553. Hispanic student enrollment accounted for 4.0 for the same year; Asian Americans totaled 974, followed by 262 African Americans and 63 Native Americans.

According to University admissions data, 87 percent of students offered admission were in the top 10 percent of their high school class. Almost half were straight-A students, and 99.8 percent of the students earned a GPA of 3.0 and above. The highest representation in the admitted classes originates from California, followed by Texas, New York, Illinois, Oregon, Washington, and New Jersey.

Approximately half of Stanford’s students are pursuing graduate degrees in its seven schools—Business, Earth Sciences, Education, Engineering, Humanities, Sciences, Law, and Medicine.

The most popular undergraduate majors are engineering, biology, economics, history,
political science, English, and psychology. Ninety-three percent of those enrolling as beginning students graduate within five years.

The University claims that it does not use any racial, religious, ethnic, geographic, or sex-related quotas in admissions.

**Athletics Overview**

Sports competition has not lost its fervor at Stanford University. In 1996-97, Stanford won an unprecedented six NCAA team championships—the most ever by one school in an academic year. NCAA team titles now total 84. For the past five years, Stanford has won the Sears Director's Cup, emblematic of the nation's top broad-based athletic program. There are 33 varsity sports (15 for men, 17 for women, and one coed), 19 club sports, and more than 9000 students, faculty, and staff participating each year in intramural sports.

**Faculty**

The Stanford faculty numbers 1,595, including 12 Nobel Prize winners and 22 MacArthur Foundation recipients. Unfortunately, there is still a dearth of women and Hispanic faculty members.

According to a Stanford report, women make up 13 percent of tenured faculty; Latinos and Latinas are 2.4 percent; African Americans, 2.7 percent; and Asian Americans, 8.4 percent.

A tenured female professor who requested anonymity noted that there are so few Latinas on faculty. On the other hand, she added, "We have a very strong pipeline of graduate students. For example, in the history department, there are eight or nine Chicanas working in Chicana history. Five years from now, they will be highly trained historians."

But there is no guarantee that Stanford will hire these professionals: "It's hard to get a faculty position at Stanford. Our own hiring is very slow and few," the professor added.

Last February, Stanford's Law School dean met with the school's Faculty Appointments Committee to discuss this issue of diversity. Paul Brest, who was the dean until August 1999, says, "Increasing diversity at the law school has an ongoing process for the 30 years that I have been at Stanford."

Currently, the Law School has one Latino tenured professor, and two tenured and two non-tenured African American professors.

Nevertheless, there are Latinos who are making a difference on campus.

Al Camarillo, who teaches graduate and undergraduate courses in modern U.S. history, is the first faculty member to receive three of Stanford's most distinguished awards: the Lloyd W. Dinkelspiel Outstanding Service to Undergraduate Education Award and two Excellence in Teaching Honors—the Walter J. Gores Award and Bing Fellowship. He is a past director of the Chicano Fellows program and the Stanford Center for Chicano Research. Currently, he is the director of an interdisciplinary Comparative Studies in Race and Ethnicity program. He was associate dean and director of undergraduate studies in the School of Humanities and Sciences in the early 1990s.

Camarillo joined Stanford's faculty in 1975, after earning his Ph.D. from the University of California-Los Angeles. He also has held faculty posts at Yale University and the University of California-Santa Barbara. Camarillo knows what it's like to be among the few and that it doesn't deter him from his goal of attaining a higher education: "There was no room for me or for the people from which I arose... There was no history for me. I was excluded." When Camarillo enrolled at UCLA in the 1960s, he and his brother were two of only 44 Mexican Americans.

In his research, Camarillo examines the origins of the Chicano civil rights movement as well as family, labor, and immigration patterns in urbanized populations.

Other Hispanics, too, shine on the Stanford campus. Chris Gonzalez Clarke, assistant director of El Centro Chicano, a division of the dean of students office, is one of them. El Centro Chicano is among a legion of campus multicultural organizations. Founded in 1978, it is a vibrant student center that provides valuable resources to students, community members, and more than 20 student organizations. El Centro literature notes that its programs provide Stanford students with the opportunity to explore Chicano and Latino culture, history, and traditions. Last year marked El Centro's 20th anniversary.

Clarke oversees a staff of 20 undergraduate and graduate student part-time staff members who carry out the programs. Frances Morales is assistant dean and director of El Centro.

Clarke is a 1985 Stanford graduate. He says of the University, "Stanford is unique; it gives you room and encourages you to develop your talents."

One of Clarke's contributions to Stanford, via El Centro Chicano, is the establishment of a performing ensemble of mariachi music, Mariachi Cardenal de Stanford. He also helped write a proposal for a one-unit music class in which students could learn a mariachi band instrument. Some Stanford students came from high schools with established mariachi programs in 1999, the group released its fifth-anniversary compact disc.

El Centro Chicano's activities cover a broad range. For example, it recently collaborated with Stanford's Lesbian, Gay and Bisexual Community Center, the Program in Feminist Studies, the Chicano/a Studies Program, and the Latino/a student organization Familia de Stanford in the realization of a for-credit mini-course—Conocimiento en Dialogue, offered through the Feminist Studies Program.

Gloria Anzaldúa, a Chicana Tejana lesbian feminist poet and fiction writer, read from her repertoire and worked with students enrolled in this course, taught by Paula Moya, assistant professor of English.

While some Stanford Latino alumni find opportunity at the University, others leave The Farm (as the school is nicknamed) to make a name for themselves. Jaime Oaxaca, a Sloan Executive fellow, graduate of Stanford University's Graduate School of Business, was recently named chair of the United States Space Foundation. Oaxaca, who has more than 40 years of experience in the fields of engineering and business management, held Senate-confirmed appointments on the General Advisory Committee on Arms Control during the Reagan and Bush administrations.

Gerhard Casper, Stanford University president, noted the institution's commitment to diversity in his Equal Employment Opportunity statement. Reaffirmation of Policy: "We have made much progress, but there are still areas that require our attention. The distribution of women and minorities among the ranks of the professors, in senior administrative positions, and in the number of other professions is far from ideal."

"Continued dedication and attention by members of our community is called for, even though some of the phenomenon is attributable to low representation in availability pools. Stanford University will remain constant in its commitment to diversity and affirmative action. We see the need not only to retain the principle but also to continue our support for specific goals and objectives. Our educational purposes will be served best if we reflect the full range and the full capacity of this society."
Florida against Affirmative Action

BY ALLAN FINN

AS WE GO TO PRESS
The Florida Board of Regents voted 12 to 0 on February 17 to approve Governor Jeb Bush's anti-affirmative action plan. February 22, the state Cabinet approved "the education component" following "hours of sometimes impassioned debate," according to Reuters. The NAACP filed a challenge to the policy with the state Division of Administrative Hearings, and an administrative rule cannot go into effect while it is being challenged, reported the Associated Press, February 26.

On March 7, opposition to Governor Bush's One Florida Initiative gathered to protest march of thousands on the state's capital. Among those participating in the mile-long march were the Rev. Jesse Jackson; NAACP (National Association for the Advancement of Colored People) President Kwesi Mfume; the Rev. Martin Luther King III, chair of the Southern Christian Leadership Conference; Hugh Price, president of the National Urban League; Patricia Ireland, president of NOW (the National Organization of Women); and members of the Congress and state legislators. It even attracted a large contingent of White women and union members who expressed the belief that the affirmative action issue touched their lives as well.

Bush defended his initiative by saying that it is the will of the majority of Floridians.

The NAACP said that 50,000 marchers gathered, while Tallahassee police place that number at somewhere closer to 11,000. By either estimate, it ranks as one of the largest organized civil rights protests that Florida has ever seen.

Governor Bush has since met foes of his One Florida Initiative. After the recent mile-march, the governor had a brief meeting with Senator Kendrick Meek, D-Miami. Representative Tony Hill, D-Jacksonville, Barbara DeVane-Gäberg of Florida NOW, Karen Woodall of the predominantly female National Association of Social Workers, and Lt. Raye Davis of Miami-Dade Fire Rescue. Subsequent to their exchange, Bush said he would continue to seek suggestions for improving his plan, but noted that he would not back down on taking race and gender criteria off the table on state contracting and university admissions.

Both sides in the affirmative action battle over Florida Governor Jeb Bush's One Florida plan reached an open dialogue as opponents of the proposal made their voices heard in three announced public hearings. The governor's plan calls for the abolishment of affirmative action as a factor in undergraduate admissions for the state's 10 public universities beginning next fall.

Bush issued his executive order for the plan in November and had hoped that the Florida Board of Regents would swiftly approve it. But in light of recent controversy, outspoken criticism from minority leaders, and a 25-hour sit-in (staged by Senator Kendrick Meek, D-Miami, and Congressman Tony Hill, D-Jacksonville) in the offices of Lt. Gov. Frank Bregan, Bush rescheduled the Board's January 21st meeting for Feb. 17. Before that meeting took place, 15 of the state's legislators held their own public hearings with the governor in Tampa, Miami, and Tallahassee.
With sit-ins, rallies, and large numbers of minority members in attendance at the hearings, the One Florida plan, while accepted as an inevitable by most, had been slowed down significantly, according to experts.

Kevin Mayeux, executive director of the Florida Student Association, expressed the organization's displeasure with the governor's introduction of the proposal without advance conversations with the FSA, the students of the university system, or other affected constituencies.

"My experience has shown me that you communicate with others and try to involve them in your decision-making processes and you try to come to a consensus. People wind up buying into your product," said Mayeux. "Instead, some of the governor's press relations people did not think that was necessary at the time. Of course I think he learned a valuable lesson from that."

Barbara Arwin, executive director of the Lawyers Committee for Civil Right Under Law, called the plan "backward," contending that it intends to eliminate affirmative action first and "then try to get the legislature to give us 26 million dollars to add college prep courses at these schools and to give teachers incentives to teach those courses."

"What's so bizarre is that you would normally do that first, making sure that people would have the opportunity to qualify because the courses would be available, and then you would set your new standards that people had to meet," said Arwin. "Here they're doing it totally backwards."

Mayeux claims that the governor has given the FSA his assurances, but hopes that Bush will enter it into some form of a policy statement.

"The other thing they're not talking about is that the governor has required more money from this legislature before and they haven't even passed that legislation," added Arwin.

Larry Abele, provost and vice president of academic affairs for Florida State University, believes that while the university is in a good position because it has been building and preparing for such a law, he still carries reservations.

"As a human being, I'm not in support of it," said Abele. "As a provost of a university, I will implement the governor's directive and the law of the land."

Some of the debate centers on the Talented 20 part of the policy that ensures all Florida students who finish in the top 20 percent of their class a slot in one of the 10-school state universities. The students must also complete the state college-prep curriculum (which the state's poorest, low-achieving schools do not have) and take the SAT and ACT college placement tests.

The Talented 20 plan would add 600 more students to the state's four-year universities this year and 1,600 in the years following.

"The difficulty is that in Florida, there are 26 school districts in poor minority neighborhoods that don't offer any of these courses," said Arwin. "So you can't get the 19 credits no matter what you do."

would be insignificant because of the Tal" 20," said Goldschmidt.

Officials from Florida State and the University of Florida have already come out and said they expect few Talented 20 admissions because standards have been set too high and they have the remedial programs that would be required by many of the new students.

Other schools in South Florida (the area with the state's largest minority population), such as Florida International University in Miami-Dade County and Florida Atlantic University in Palm Beach County, have come forward stating that they will accommodate the added students. The schools claim to have the remedial program; others are missing, as well as the room and willingness to heed the governor's initiative.

There is also the issue of disparities among schools where a student at a performing school could have a grade-point average but not in the top 20 percent, while a student at another school could have a 1.0 GPA and be in its top 20 percent. Under the plan, the student with the lower GPA would be guaranteed space in a four-year university, the student with the 3.4 wouldn't.

"Our analysis indicated nothing goes down to a 2.4," said Goldschmidt. "What that's saying, though, is right now our admissions policy is that anyone with or higher is eligible for admission. That person with a 3.4 would get into the state university under the new admissions process just as they do today."

Another issue is the effect Talented 20 plan on community colleges since many Talented 20 students attend those schools because their grades were not high enough to get into the universities. Now would be able to attend four institutions.

"Those people who are in the top 20th percentiles—the likelihood of them getting into the University of Florida is little, but that doesn't mean they can't get in or won't get in," Goldschmidt. "They may bring certain types of talents."

"The way it is structured, it will have a positive effect on the enrollment of Af
American and Latino students in Florida,” said Arwin. “It also sets up a second-class educational system in Florida that is dependent upon partial resegregation.”

Currently, the enrollment of minorities, according to the State University System’s (SUS) figures, is 32 to 33 percent, with Hispanics comprising approximately 14 percent of that figure, representing nearly 94,000 students.

“By the University of Florida’s own projections, these statistics will go down—especially at these flagship institutions,” said Arwin.

“In the first couple of years of implementation, the numbers of African Americans and Latinos enrolling in higher education plummeted.”

Arwin cites what has transpired in the first years of implementation of similar programs in California. She claims that for first-year students, Chicano numbers went from 14.3 percent in ’96 to 11.4 to ’97. In ’98 the number went down to 7.6 percent and now stands at nine percent.

In Texas, the number of Latinos went from 95 percent in ’95 to three percent in ’99, according to Arwin.

“The Board of Regents has already predicted a cascading effect [in which enrollment drops significantly and recovers only partially],” said Arwin. “In those years of the drops, there are thousands of students who are not getting into these major prominent institutions.”

“Instead, what happens is that these students end up at public institutions that are considered the schools of last resort,” added Arwin. “So you end up with a partial segregation. You find them at the least prestigious institutions. What you set up is clearly a lifelong segregation problem.”

Arwin also contends that Texas’ rebound is due to the legislature’s setting aside of 100 million dollars to implement its own plan and that compared to that figure, “Florida’s proposed 20 million is clearly inadequate.”

Currently, about one-third of Florida’s student body is comprised of minority students. If the Talented 20 portion were implemented, according to Goldschmidt, the state might have an additional 250 to 400 students on top of the students who are ordinarily admitted (which is about 28,000 per year), 60 to 70 percent of which will be minority students.

“One of the things that any university can do within the system is develop strategies on building their students’ classes,” said Goldschmidt.

“They can also identify inner-city schools or by geographic area or by economic condition or a variety of other things that identify students, and have those people enter their university system.”

Some controversy has even arisen over Bush’s suggestion of having received approval from the Clinton administration. While there are arguments about the U.S. Office of Civil Rights in the Department of Education did state that the plan was in line with goals of the state’s partnership to open up minority access to the university system, the Florida Board of Regents moved to reconsider the program.

Despite the large outcry, Goldschmidt believes, however, that there is a general consensus supporting the plan.

“The chancellor is in favor of it, the chairwoman of the board is in favor of it, [and] several of the regents have gone public in their support of it,” said Goldschmidt. “We’ve had a couple of preliminary votes on things such as the wording of the proposed rule, but they [the board of regents] have not taken an official position on it yet.”

“Nobody comes to this issue without passion,” added Goldschmidt. “This strikes at the very heart of how one human being relates to another in America. There are those people who are passionate about it and want to make sure Florida does the right thing.”

Within the rule itself is a statement that Goldschmidt believes clearly represents what the board of regents intends to do with the policy: “The Board affirms its commitment to increasing student diversity in each of the state’s universities.”

“I don’t think there’s anything ambiguous about the intentions of the board, and I don’t see any mention of a good-old-boy network or returning back to the days when race was used to exclude minorities from the state university system,” stressed Goldschmidt. “This has been an important tenet in the Florida State University system for several decades now. There is nobody within the system that intends to abandon the basic principle.”

“All we’re doing is changing how it’s implemented by considering what’s happened in the legal system, what’s happened in the court of public opinion,” added Goldschmidt.

As a human being, I’m not in support of it. As a provost of a university, I will implement the governor’s directive and the law of the land.”

LARRY ABELE, PROVOST AND VICE PRESIDENT OF ACADEMIC AFFAIRS FOR FLORIDA STATE UNIVERSITY
Montclair State University
Planning for Growth, Embracing Diversity
BY ROGER DEITZ

This past September, Montclair State University (MSU) inaugurated the first female president in its 91-year history, Dr. Susan A. Cole. The new president, a native of Brooklyn, observes that MSU is rich and vibrant because, "...society has changed and evolved around us, our students have changed, and they have changed and shaped this university at least as much as it has shaped them."

On the same day that Dr. Cole was inaugurated, the University dedicated its $18.7 million Science Hall, a 60,000 square-foot instructional complex for biology, molecular biology, and biochemistry. While many people made that building possible, none was more devoted to the University than Margaret McCormack Sokol, a member of Montclair’s class of 1938.

Margaret McCormack Sokol donated $1.25 million to MSU to endow its first named professorship (the Margaret and Herman Sokol Chair in Chemistry) and, in addition, funded the Sokol Science Seminar Room in the new Science Hall. Margaret and Herman Sokol met at Montclair when both were students. It is the first endowed chair established by a graduate at a New Jersey public comprehensive university and is certainly a significant juncture for an institution that is evolving with stunning success.

"We are at a moment in time when we can take a great university and really make it shine in the 21st century," predicts Dr. Cole, who was president of Metropolitan State University in Minnesota from 1992 to 1998.

"The potential is here and the opportunities are here. I think the future of Montclair State University can be spectacular." There is a great deal of evidence to support Dr. Cole’s position. This is a unique school with a remarkable record of growth and community service. Then there are other factors, such as location and aesthetics. The campus affords a magnificent view of Northern New Jersey and New York City from its location on the wooded and granite crest of New Jersey’s Garret Mountain, a part of the Appalachian range. Yet for all its rustic beauty, the institution is situated but fifteen minutes from Manhattan. Of course, scholarship is the focus when Dr. Cole says this university is a special place. "It is clear to me that there is a common interest at our university in the quality of our academic programs, she stresses. "There is a strong impetus to make sure that what we offer our students..."
is absolutely first-rate. We can—we will—build on that, both in our undergraduate and graduate programs.

President Cole also sees diversity as a dynamic force for growth at Montclair State. "MSU has enormous potential for growth based on a strong ethos of access and diversity in our student body. We are ideally situated, geographically and academically, to attract a broad range of high-quality students from all backgrounds to further increase the diversity and accessibility of this University—to make it a truly welcoming institution for all of our students.” Now, Montclair State University is situated on The Hispanic Outlook Honor Roll as well.

MSU is ranked fifth among the Top Regional Universities in the North by U.S. News and World Report. With more than 13,000 students, the University is New Jersey’s largest comprehensive university and the second largest institution of higher learning in the Garden State, located on 220 suburban acres in northern New Jersey.

MSU offers 41 undergraduate majors, 31 graduate majors, and many interdisciplinary programs, minors, and concentrations. The New Jersey Commission of Higher Education recently approved Montclair State University’s proposal to offer the Doctor of Education degree in pedagogy, the first doctoral program in the University’s history. Montclair State is the only university in the country to offer a doctorate in pedagogy, aimed specifically at teachers who wish to stay in the classroom rather than move to administrative positions. The doctorate has two specialties: mathematics education and philosophy for children.

Constituted of five colleges and schools, the educational mission of

Honor Roll Facts in Brief

INSTITUTION
Montclair State University

LOCATION
1 Normal Avenue
Upper Montclair, NJ 07043
(973) 655-4000

ESTABLISHED
1908

ENROLLMENT
13,285 (1,585 undergraduate students and 161 graduate students Hispanic)

DEGREE OFFERINGS
Bachelor’s
Master’s
Doctorate

TUITION AND FEES
$2,980.00, approximate, per year, New Jersey residents

FACULTY
438 full-time (28 Hispanics)

SEVERAL DEGREE PROGRAMS
Biochemistry
Fine Arts
Human Ecology
Music Education
Technology Education

NOTABLE HISPANIC-SERVING ORGANIZATIONS
La Campaña (Service of Student Government Association)
Latin American Student Organization
Spanish Club

Montclair State is served by the College of Education and Hu
Services, the College of Humanities and Social Science, the College
Science and Mathematics, the School of Business, and the Scho
the Arts. The University’s Global Education Center sponsors les
and symposia featuring renowned international speakers as we
sponsoring international study by faculty and students. Nearly 40
percent of the faculty have received grants from the Center. Internal
students are encouraged to travel to area schools and organizations
present talks and programs about their home countries.
International Trade Counseling Center (ITCC) provides "one-stop shopping" for counseling and resources for companies that wish to conduct business internationally. Sponsored by the School of Business, the ITCC works in collaboration with federal and state commerce agencies as it maintains an important and useful database.

The New Jersey Network for Educational Renewal at Montclair State University is one of the nation's oldest and most respected school/university partnerships. The Network joined the University with 20 school districts, including Newark and Paterson, "in a common effort to improve student learning and enhance the qualities of democratic citizenship." The Network offers an extensive program of professional development and provides "exemplary settings" for the induction of new teachers into the profession. In addition, thousands of elementary and high school students come to the campus each year to participate in Gifted and Talented programs, the Preparatory Center for the Arts, and summer camps for athletes and cheerleaders.

The University offers 23 varsity sports for men and women, all competing at the NCAA Division III level. The baseball and softball teams have consistently played in post-season tournaments, including the Division III World Series. The wrestling, track, and swimming programs have produced numerous national titles.

Founded in 1908, Montclair State University was originally established as a Normal School in response to the growing demand for professionally trained teachers. The institution became Montclair State Teachers College in 1927, dedicated to the education of secondary school teachers through a four-year Bachelor of Arts degree program. Part-time, extension, and summer courses were added to meet the professional needs of teachers, and in 1932, Montclair was authorized to offer the master's degree. With a strong emphasis on the liberal arts and sciences, Montclair in 1937 became one of the first teachers colleges accredited by the Middle States Association of Colleges and Schools. Responding to rapid enrollment growth in the late forties and fifties with an expanded curriculum and faculty, the campus became Montclair State College in 1958 and a comprehensive, multi-purpose institution in 1966. Recognizing the strengths of its academic programs and faculty, as well as the commitment to excellence in instruction and research, the Board of Higher Education designated Montclair State a teaching university on April 27, 1974.

Last year, the University entered into various joint enterprises. In February of 1999, MSU and the University of Medicine and Dentistry of New Jersey agreed to start offering two joint-degree programs leading to doctoral degrees in biomedical sciences. MSU students can earn their Bachelor of Science or Master of Science degree at UMND and, if they meet the requirements, pursue a doctorate at UMDNJ-Graduate School of Biomedical Sciences. Very active internationally, MSU and the Universidad de Belgrano, one of Argentina's leading universities, signed a Memorandum of Understanding to develop several collaborative projects, including faculty and student exchange programs. New Jersey Governor Christine Whitman praised the agreement: "I cannot overemphasize the critical importance of imbuing New Jersey's education institutions with a global perspective."

There are 10,159 undergraduate and 3,126 graduate and professional students enrolled at Montclair State University. The first-year-student class is made up of approximately 40 percent minority students. Among the undergraduates, 1,585 are Hispanic, and within the graduate rank-161. The University graduated 1,703 undergraduates last year, with a sizable population of 182 Hispanics, for a percentage of 11.0 percent. Three Hispanic students graduated with degrees from the School Education, the largest number; were human ecology majors. An additional 70 Hispanics graduated with degrees in humanities and social sciences, and 23 received psychology degrees. Another 20 Hispanics graduated with degrees in science, mathematics (10 in biology), 19 graduated in the arts (10 in speech and theatre), and 35, in business (34 those in business administration. MSU alumni number about 52,888.

There are 17,277 female and 26,520 male full-time faculty members for a total of 438. Among the full-time faculty are 13 Hispanic females and 15 Hispanic males. The student/faculty ratio is noted as 15:1 with an average class size of 20. MSU distributed $1 million in financial aid this year, and the institution's financial aid office was cited as one of the most efficient in the country. Students have the option of a minor in Hispanic Studies.

This past September, the 14th Annual Student Leadership Symposium, "Latinos in the 21st Century: A Proactive Approach to Our History, Our Challenges, and Our Responsibilities," was held at Montclair State University. Organized by the Hispanic Association Higher Education in New Jersey coordinating Council, in conjunction with MSU students and administrators, the symposium addressed issues and concerns of Hispanics in higher education. The aim was "honor and review" the historic contributions and role of Hispanic in higher education. Session themes included: "Politics: Power and Democracy," "Finance: Stability and Growth," "Education: Growth and Participation," "Health: Awareness and Prevention," "Cultural Identity: Are We Schizophrenic?" and "Communication." Also new this past December is the establishment of the Institute for Community Studies to "achieve better understanding of the forces that bring people together with a shared set of interests and responsibilities. It will serve as a resource for students to strengthen community and will also place students in various positions in community groups—and they can benefit from "guided, non-classroom learning."
Pursuing Language, Culture, and History in Salamanca

Students and Faculty Enriched by Foreign Study

BY JEFF SIMMONS

We are not where we can be.
These words appeared in Emory University's annual report for the last academic year. And they speak volumes, not just about a dilemma faced by many of its collegiate peers across the nation, but of an awareness of Emory's own shortcomings and its mission.

"One of the more important challenges confronting us is the question of how to deal with growing diversity, not only in our society in general but also on our campus," the report continued.

Over much of the last decade, this 11-thousand-student campus 15 minutes outside of Atlanta has made a considerable effort to meet the demands of an increasingly diverse student population.

It has boosted the ranks of minority faculty to earn national recognition. It has attracted students from 90 foreign nations. This academic year, 125 undergraduate students have declared Spanish as their major. And Emory's Graduate School of Arts and Sciences has undertaken a strategic plan to recruit and retain minority students.

Another adjustment has been a shift to address the needs of students on campus and in society in general. Campus officials noted the nation's booming Hispanic population, and likewise the need to understand not just the Spanish language but its culture and history.

Currently, for instance, an estimated 55 percent of enrollments in higher education foreign language courses are for Spanish courses.

"It was very clear that Spanish was up and coming in the nation as a very visible presence," says Carlos J. Alonso, chair of Emory's Spanish department. "I think that the administration here has to be given credit because it really put a lot of resources into an area that normally would not be getting a great deal of interest."

In the last few years, Emory administration essentially put its money where its mouth was—it shifted some resources and worked closely with faculty to beef up its Spanish department and studies for both undergraduates and graduate students.

A look at the faculty ranks in the Spanish department points to the evidence of change: there were five professors in the early 1990s. That has more than doubled to 11. All have specialties, such as 20th-century Spanish literature, medieval Spanish literature, socio-linguistics, Baroque Spanish..."
literature and women's studies, and Latin American poetry.

"This used to be a very, very small graduate program, and then the administration decided it wanted to expand it, and in four years they hired four more tenure professors," Alonso reflects. "We had the opportunity to create an almost new graduate program that would address some of the concerns and issues and deficiencies we had seen in our own graduate education." Weaknesses such as a lack of professional training, a curriculum that didn't reflect the needs of students, and a dearth of mentorship possibilities.

"It's been very decidedly a collective effort. We have all chipped in and contributed our time to it, because we've tried to better our graduate program while keeping our own research agenda going," he adds.

The invigorated graduate program has evolved dramatically. Twenty students—all with a command of Spanish language—are now enrolled, and in order to graduate, they must achieve a strong foundation in the literature of Spain and Spanish America, spending 10 weeks abroad, studying in Salamanca in Spain. The ancient city is home to one of Europe's most prestigious and oldest higher education sites, the University of Salamanca.

Roughly a half dozen students take part in the graduate program's excursion to Salamanca each summer. Emory picks up the tab for tuition, transportation, room, and board. The summer abroad program was launched in 1997.

"I was delighted," says Patrick Garlinger, who is in his fifth year in the graduate program. "I had spent some time in Salamanca as a junior and knew what the city had to offer. Graduate students often are left on their own to get a job or go on vacation. But this was perfect and allowed me to continue doing graduate work."

He adds that living in the historic city made education come alive.

"There really aren't that many archives here for Spanish work," he says. "Being in Salamanca, he said, allowed him to do a research project on 20th-century poet that would otherwise have been impossible.

During the summer, students take three courses, including one on pal ography, which is the study of manuscripts and difficult to undertake areas that lack extensive resources. They also attend an intensive workshop to enhance their proficiency in formal Spanish.

Additionally, students visit sites such as the Archivo Nacional, t l Simancas-based national repository of Renaissance historical documen and Seville's Archivo de Indias, which contains materials involving the co quest and settlement of the New World.

During the last part of the 10 weeks, they work with an Emory faculty member, turning a paper they have written for a course into a manuscrito that could be submitted to a journal for consideration, says Alonso, semi editor of the Latin American Literacy Review.

Often this coursework becomes preliminary work for a dissertate The classes are small—a recent Emory class was comprised of thr Spaniards, a Puerto Rican woman, and two Americans—and students a ble to get individual attention.

Emory's ties to Salamanca aren't limited to its graduate program. Ea semester, about 20 students take Spanish language and culture courses there. They initially live in private residenc with Spanish speakers, but after one month can move into a univers dorm or an apartment with another student.

Students take classes not only in the Spanish department but also comparative literature, women's studies, and French, among others. Adjacent to the university, in the heart of the Barrio Antiguo, is the Em Center, which offers space for lectures and orientation meetings, tutori and social events.

Meanwhile, Emory's program director in Salamanca arranges cult excursions; field trips to Barcelona, Madrid, and Granada; and outings concerts, plays, and movies.

Karen Stolley, Emory's director of graduate studies, says that the st dents undergo a transformation.

"They find an intellectual and a professional voice, and those processes are key in what distinguishes this program," she says.

And it's not just the students, though, who are the students. Teach
take part in a new program that transports them to Salamanca so they can improve their teaching methods.

"One of the most productive long-term ways of internationalizing the university in terms of curriculum and pedagogy is to put together a program to enable faculty to use Spanish for their teaching," says Stolley. "So we take a small group of faculty from other departments for an intensive immersion learning experience."

In 1998, seven members spent a month immersing themselves in Spanish language and culture in Salamanca. They underwent intensive language courses, attended cultural seminars, and shared research interests with University of Salamanca faculty.

"It's a very powerful experience for them to rethink their role as teachers. They think more about the students in ways they have not in years. The secondary benefit is that Emory is a big place and must research universities can be fragmented," Stolley says. "Faculty in different departments get a chance to interact."

Back on home shores, Emory's graduate program has expanded as well, to ensure that all students who leave the campus are ready to step easily into their professional shoes.

All students in Emory's Graduate School of Arts and Sciences, as part of the Teaching Assistant Training and Teaching Opportunity (TATO) program, are required—after their first year, when they have adapted to the program and its time demands—to teach one course per semester. Usually, students handle one course section while under the supervision of a faculty member. They are not limited to teaching basic Spanish language courses but instead are prodded to branch out into other areas.

"We make sure they are exposed to a whole range of courses. They can teach anything from beginning language to advanced seminars for undergraduates," Stolley says. "We try to expose them to fairly broad kinds of courses so they develop expertise in language and culture and teaching as well."

Garlinger, who is expected to graduate this May, has been teaching a seminar on gender and sexuality in 20th-century Spanish narrative and film, coursework that he designed. Seven undergraduates enrolled in the course.

"I try to be a tough teacher," the 27-year-old native Californian says, "and really emphasize that my students read the text carefully. I always want them to understand that no matter what the emphasis is, they are reading a literary text that has its own properties.

"Not only do I want to educate them on homosexuality and gender but at the same time on how to read literature."

Alonso says that the classroom component trains the graduates for the workforce. "We give people the knowledge they need to participate effectively in the profession after they leave graduate school," he says.

Each year, the Spanish department sponsors an annual lecture series including principal figures in Hispanic criticism. It further recruits a series of visiting writers each spring, such as Basque writer Bernardo Atxaga and Cuban Puerto Rican writer Mayra Montero.

Most recently, faculty have attracted Mexican novelist Jorge Volpi to the campus. The writers teach literature and creative writing to undergraduate students.

"The courses they teach are very different than the usual undergraduate curriculum," Alonso says. "The creative writing courses give the students a chance to indulge in their own writing and have somebody who does that for a living look at the stuff they produce."

Though the program is a relatively small component at Emory, he says that it is drawing notice on campus. Graduate students have gone on to successful jobs, for the most part landing in prominent positions.

"The fact that they have all gotten jobs in excellent tenure-track positions in excellent universities is a validation of the program and of its requirements and opportunities," he says.

Still, members of the Spanish department are not resting on their laurels. Instead, they hope to expand even more. The Spanish department is slated to hire a faculty member to cover Portuguese and Brazilian studies.

Additionally, faculty members are considering whether to forge a similar institutional tie with Cuba to allow students and faculty to study there as well as in Salamanca.

"One of the possibilities we might contemplate in the future is to alternate between Salamanca and Havana for the graduate program," Alonso says, as he puts the finishing touches on an exploratory trip there for four faculty members and four students.

"We are going to have workshops with a number of cultural institutions there and establish links that may translate into a more permanent presence of our department there."
Publish, Perish, and Points in Between

A Primer for the Uninitiated

BY PAT HANSON, PH.D.

Students and professors alike know the drill: teaching, research, and service. Today, research translates as publication at private universities, state colleges, and even some community colleges. While neither the American Association for University Professors, nor faculty associations, nor unions have specific policies regarding the number and type of articles in print necessary to survive, "publish or perish" is a reality that every professional in academia must face.

Issues

The dubious relationship between writing and teaching, in traditional academic thinking, holds that professors who do cutting-edge research, which by being selected for publication has been judged as "good," advance an academic discipline and therefore make better teachers.

Whether you've observed the teaching of "researcher types" firsthand or attempted to glean the essence of pedantic scientific literature, the relationship between publication quantity to teaching quality remains elusive at best.

In fact, publish or perish can apply even to the larger picture of institutions competing with one another for status, students, and, therefore, money. Barron's Profiles of American Colleges and U.S. News and World Report's College Admissions Selector both have rating scales that rank institutions against one another by using a ratio of publications per faculty members. A private company, ISI, maintains a comprehensive multidisciplinary bibliographic database on journals worldwide. It indexes more than 16,000 periodicals and covers both basic and applied research.

One 1995 study examined 1,318 schools around criteria related to the selectivity of its incoming student body and the scholarly productivity of its faculty, and found a strong correlation. Conspicuously missing from most discussions of this issue, however, have been data needed to ground any alternative views of quality. A new study, National Survey of Student Engagement (NSSE), is being piloted, with support from The Pew Charitable Trusts, to illuminate this dynamic (Baughman & Goldman, '99).

Higher Standards for Faculty Today

Up-and-coming faculty in today's competitive market must meet criteria far more rigorous than those of a decade ago. It is very likely that new professors will find themselves evaluated by senior faculty members whose own publication records could not keep them employed at the institution.

Leonard Cassuto, professor of English at Fordham University, in a recent Chronicle of Higher Education article, bemoaned what he calls "the murderous job market of the 1990s that prompts a common refrain among members of hiring committees: 'How could I ever have survived in this market?'" He finds that in order to be considered by some universities, there is pressure on doctoral students to publish their research even before graduate. This contributes to thegraying of graduate student life and the keeping of potentially talented professors in underpaid postdoc teaching assistantships while they work at publication (Cassuto, '95).

Indeed, scholarly studies of this issue have proved, with major individual exceptions, the importance of publication over years, the tenure professor gets, and the higher academic ladder many professors climb. The fewer publication produce. Much research has shown that discipline is a key factor in the relationship between public quality, quality of teaching, and security (Green, '95; Bloom & '95; Zinney & Bertin, '95; Br. & Mularski, '96).

New Methods of Disseminating Scholarly Information

The electronic informatic is beginning to affect the academic life of some. Many schools are now struggling to develop criteria for rating members' dissemination of scholarly information through methods such as the World Wide Web, for example, or "unpublished" monographs in electronic data bases.

In 1991, Paul Ginsparg, researcher at Los Alamos Laboratory, created a database of physics papers on his home computer. Its popularity has been change the way scholarly id is used by physics papers is shared. Twice thousand articles annual
posted in an electronic archive where professors can revise their articles after receiving comments from colleagues who have read them online. Some of the papers are eventually peer reviewed and published in journals.

Peer review and publication of scholarly articles would be radically altered under a new plan being promoted by a small but influential group of academics. The American Association of Universities and The Association of Research Libraries co-sponsored a meeting of scholars, librarians, and provosts in 1997, with Pew Charitable Trust funding, to formulate a new way to meet the goals of identifying the best ideas and getting them out into the field.

In the current system, most scholars present their papers to a specific journal, which solicits reviews of that work from two or three experts in the area. These reviewers, usually anonymous to the authors and vice versa, decide whether an article is to be published in that journal. The new proposal would separate peer review from publishing.

Instead of sending an article to one journal for review, professors would send their work to a "certification panel" in their field, established by scholarly groups that similarly use experts to give each article a grade or stamp of approval. A professor could then have the choice of submitting the article for print publication or posting the article on a World Wide Web site and skipping print publication altogether. Universities would accept a certification panel's stamp of approval and not require that professors actually publish their work.

Some see this as a minor change, merely shifting from "publish or perish" to "certify or perish." Budget-conscious libraries are behind this plan as an alternative to high-priced journal subscriptions, which can cost as much as $15,000 apiece in science and technology (Wilson, 98).

It wasn't until the mid-80s that the flagship journal of the Modern Language Association, "MLA," the most reputable journal for the English profession in the country, went from named to blind submissions in which reviewers and editors would run less risk of undue influence by big names in the field. This has allowed lesser-known and younger faculty a fairer chance of publication.

**Reasons Why Academics Write...and How They Should**

There are many reasons why teachers in "the academy" write and why they expect the same of their graduate and undergraduate students. It is an opportunity to clarify and organize thinking, sharpen use of the English language, and demonstrate expertise to one's peers. A primary motivation is to give back to the profession, to make a contribution to the field.

Perhaps the most pressing reason professors write is to secure their careers with tenure and, once that is done, receive promotion.

Publication can translate to annual merit pay increases. However, new faculty should find someone they trust at their institution to warn them about what is acceptable and what is not before they make a writing plan for themselves.

Publications that count in academia are most often interpreted with a capital "P." Generally your name (often as first author) must appear on articles in leading "refereed" journals that indicate you are making a "name for yourself" (and for the university for which you work). Carry that a step further, and it might mean "quantitative research in refereed journals," rather than the sometimes more difficult and time-consuming writing of qualitative research or content analysis studies, or essays that are the mantras of different professions. Some prestigious journals will not publish studies unless their results have proven statistical significance, disallowing the public access to serendipitous findings and new important questions that a particular study might have prompted.

Depending on the institution, the guidelines might differ. In some academic disciplines, "research" does not constitute presentations at professional meetings, nor do articles about innovative original teaching methodologies count for retention, promotion, or tenure. Book reviews or "op ed" pieces in newsletters, self-published material, and even edited anthologies might not be acceptable to some of the committees holding careers in their hands.

Some institutions might not even give credit to a professor for an article synthesizing information much needed by the general public, written in a language that the public can understand. Works in popular magazines with a circulation of millions might be frowned upon. In comparison to acceptance by small, erudite journals reaching the thousands more typical of academic journals, circulation.

"It is ironic," says Andrew Jenkins, Health Education Programs at Central Washington University, "that in a field like health education, where the popular press promotes considerable misinformation, that when a reputable health educator gets printed in mass market media, they don't get the same credit as if they had just preached to the choir."

To get closer to the truth of the matter, publications are often used for gatekeeping. When a department wants a particular individual in or out, depending on the desired outcome, a person's scholarly work can be valued or devalued in the most critically crucial ways. Fortunately, most colleges and universities operate by committee and have a series of checks and balances so that tenure decisions do not fall solely on the personal opinion of one individual. However, even with full departmental support and sufficient or even excellent publications and citations, because of internal politicking that might have to do more with budgetary projections than either the individual or the publications, some unlucky academics might feel the sting of "perish" attributed to their writing.

Professor Maureen McDonough-Kolb, a writing instructor in New York University's HEO program, which concentrates heavily on improving the skills of minority students to help them move up the academic ladder, says that "in general, the system works, but it is sad and dishonest when it does not."

Every three years, Phi Delta Kappa, an honorary society in education, publishes the results of publications research conducted by Kenneth Henson, long-time dean of the College of Education at Eastern Kentucky University.

Author of more than 200 articles and 20 books, Henson's suggestions on getting started, targeting an audience, style and substance, and the writer-editor relationship are invaluable. Good too is Anne Sigismund Huff's *Writing for Scholarly Publication*.

Dr. Larry Olsen, of Towson University in Maryland, author of 80 articles, 200 presentations, and an author or co-author of some 35 textbooks, is a prolific writer in the health education field. Winner of the highest awards by three prestigious professional organizations in public health, he puts it like this: "One doesn't do what one does to see what awards will accrue. One simply always remains committed to excellence in whatever one does. In terms of impact, the first article I published in the *Journal of School Health* probably was questionable now. I wasn't nearly as good a writer then."

"My basic piece of advice is, if a person wants to become a good free throw shooter, he or she prac-
uces shooting free-throws a little; if a person wants to become a great free-throw shooter, he or she practices shooting free-throws a lot and elicits the help of other great free-throw shooters. Most people, when they graduate from their master's or doctoral programs, are neophyte writers. The more they write and submit to refereed journals, the better they will become. I would suggest that they align with others who have published in the journals in which they wish to become published, and take the criticism that is offered as a learning experience, not a threat to their creation.

Writing for publication is important, whether for job security or for the loftier goals of making a difference in a specific discipline. All entry-level college professors hoping to continue need to get over the self-imposed and institutional obstacles to putting their words "out there."

If success in academia is your goal, carefully pick an area to specialize in, hopefully one that makes your heart sing. Meticulously review all of the publication possibilities for your work, find a mentor, take his/her advice...and then, as the Nike ad says, JUST DO IT!

Dr. Pat Hanson is presently an adjunct professor at California State University-Monterey Bay and Monterey Peninsula College.

References

Wilson, Robin. "Provosts push a radical plan to change the way faculty research is evaluated: publishing in journals would no longer be the key to getting tenure or disseminating ideas." The Chronicle of Higher Education. 26 June 1998.

Resources

For beginners and those with initial success, this will help them select appropriate journals and shape manuscripts to those journals' needs. Includes circulation figures, refereed status, percent research articles, acceptance rates, average numbers of weeks required for a decision, length of time from acceptance to publication, etc.

Provide scholars with help, philosophy and practical advice. Guidelines for choosing the topic, making an outline, title selection, and writing the study of introduction and conclusion are presented.

PUBLICATION BASICS

First and Foremost: Find a Mentor

Listening carefully to the wisdom of the more experienced pays off in saved time and energy and stress. And can make a big difference in your lifelong career.

Themed Issues
Nearly a third of journal issues have designated themes and solicit manuscripts in advance. Writing on a specific topic for a themed issue can reduce the competition by about two-thirds and double or triple a manuscript's potential for acceptance.

Acceptance Rates
These vary as widely as from percent to 90 percent. Most fields have some database about their journals, similar to Henson's in education. Discover the rate for the journals you are considering, and choose carefully, depending on your timeframe.

Research Format
Since the "research status" of a journal seems to count heavily in the reward system of many universities, find out which journals are rated most highly by people in your discipline at your institution. Adhere rigorously to the style recommended by each.

Multiple Submission from One Idea or Study
While many journals have strict guidelines as to submitting the same article to competing publications, freelance writers and academics get a lot of mileage from the same idea all the time. Twisting and reshaping ideas into a series of pieces of research to meet the different needs of several journals increases your chance of getting numbers needed for advancement.

Joint Authorship and First-Authorship
Tenured faculty with a publishing history and reputation offer to publish with less well-known faculty or graduate students as co-authors. While some committee or faculty will recognize that the first author is the writer behind the article, some of these publications often do not credit the lead author. When writing career along steadily, M don't recognize that the first author on articles written by a team can be a real problem. A look in medical journal can be a real source of frustration. Many articles dealing with similar topics are published by the same "team" with "lead" author rotated.

Revisions/Resubmissions
Authors should always, or very few exceptions, accept invitations to revise and resubmit an article.

Professionalization
Choose a narrow sub-specialty. Writers from your already established peers and a good mentor can also narrow the focus of what you choose to write. Become a "maven," an expert in some delimited area.

Along with the steps from submission to revision, includes exercises along the way.
Anatomy of an Award-winning Grant

$2.1 Million to Allan Hancock for At-Risk Students

BY BOB ISAACSON

Allen Hancock College has been awarded a multimillion-dollar competitive grant aimed at improving the educational success and increasing the transfer rates of its students. The funding comes from the Department of Education's (DOE) Title V funding set aside for Hispanic Serving Institutions (HSIs). A California community college in northern Santa Barbara County, Allan Hancock was one of 39 recipients nationwide.

The $2.1 million award will bring approximately $475,500 to the college in the first year to improve the participation, retention, and success rates of its underprepared developmental students, especially Hispanics and those considered disadvantaged due to low income or other barriers. An equally important part of the huge grant is to create enhanced transfer opportunities for the same groups.

Historically, Hispanic students nationwide transfer to four-year universities at a lower rate than do other ethnic populations. Twenty-nine percent of Allan Hancock College students are now Hispanic, and that percentage is projected to grow in the coming years. The college's largest local feeder high school, for example, is now 70 percent Hispanic.

"This grant will enable us to enhance existing programs to serve more students," said Ann Foxworthy, Ph.D., Hancock superintendent/president. Foxworthy emphasized that although Hispanic and disadvantaged students are a focus of the grant, all students will eventually benefit from improvements to the college's facilities and its developmental and transfer programs. "This grant paves the way for additional equipment in our labs; it will fund an outreach counselor in the high schools, upgrade and expand our current University Transfer Center, help create new curriculum, and increase the effectiveness of our basic skills education courses."

With the strong emphasis on increasing the number of students who consider transfer as an option, one of the fundamental components of the plan is to implement strategies for students who need to build their basic skills in reading, writing, and math. According to one of the grant's primary authors, establishing a reading lab will be an important part of that effort. "The reading lab is really the jewel in the crown of a series of steps we will take to improve student success," said Language Arts Instructor Bob Isaacson.

With the help of a previous grant, the college expanded its reading courses from one to three levels, ranging from developmental to transfer classes. Still, faculty across the campus have consistently identified reading issues, especially difficulties understanding textbooks in complex subject areas like chemistry and biology, as a major obstacle to the success of underprepared students. Faculty across the campus say that they spend their office hours teaching students how to read the textbook. The Title V grant will enable reading instructor Thomas Sadowski to create a coherent reading program centered around a computerized reading lab. Students in the reading program will be better able to address individual reading needs and discipline-specific reading issues with the aid of computer-assisted learning.

Technology will be a large focus of the grant. Over five years, four computerized classrooms will be established, including the new reading lab in year one. During the course of the grant, a computerized writing classroom will be developed to utilize Daedalus, an integrated writing environment, for use in developmental English classes. Students working with Daedalus can use computers to create drafts, edit each other's papers, and get rapid feedback from their instructor on their writing. Two more computerized classrooms will be developed to enable faculty teaching general education classes to use the Internet, new instructional software programs, and CDs to
enhance students' educational experiences. In the last year of the grant, the College's existing open-access lab computers in the learning resources center will be greatly expanded to ensure student access to new technologies when they are not in the computerized classrooms.

Strategies to help students in basic skills classes include hiring a developmental education specialist. This individual will work to improve the coordination of the College's various developmental programs in math, English, and ESL; to offer training opportunities to faculty teaching basic skills; and to lead a developmental task force that will oversee the process. Better understanding of developmental educational theory and practice will help basic skills faculty increase the success and retention of the growing numbers of underprepared students entering the College each year.

This specialist will lead a task force of faculty and lab staff to ensure that all basic skills areas are coordinated, that mentor-faculty will be trained in innovative multicultural and remedial strategies, and that bilingual tutorial support will be available for students who require it.

Selected basic skills faculty will be given the opportunity to attend indepth training programs in developmental educational practice and theory at places such as the Kellogg Institute.

Already, faculty in math, English, and ESL have identified an impressive array of innovative projects, such as developing and piloting an ESL 'sheltered' developmental composition course, providing an online tutorial service, creating a summer bridge program at the College's writing center for newly graduated high school students, and reorganizing traditional 16-week math classes into multi-semester and modularized course offerings. To facilitate the development of all of these activities, the grant will hire two developmental faculty members, one in math and one in English, and also offer current faculty release time and stipend opportunities for the creation of innovative instructional strategies.

The grant is also going to have a profound impact on the transfer mission of the College. One half of the Title V resources will be directed toward improving the transfer rate of Hispanic and other at-risk students.

During the five years of the grant, three cohorts of at least 60 percent Hispanic students will be formed and offered enhanced transfer opportunities. The grant's high school outreach counselor will also monitor the progress of Hispanic students as they enter transfer-level courses.

Learning communities will be formed, linking required English and general education courses into a sequence of classes that will lead students through an enhanced transfer program. The idea is to create a clear and efficient pathway for those students whose stated goal is to transfer, and to supporthem as much as possible through supplemental instruction, tutoring, and innovative instructional strategies, including the use of technology. Also, during the grant, a writing-across-the-curriculum program will be put into place for the College's students in general education classes. Currently, the College's writing center is only able to assist students in developmental English classes. The overall goal of this effort is to get students "University of California transfer ready" in two to three years.

Specialized personal development classes will be taught in the entire transfer program. These classes are being developed and piloted by a specialist Christine Reed. One class will focus on success in college, introduce new students to college life and the many services provided by the college, and also cover topics such as the tutorial center and financial aid. The other will focus on how to transfer successfully to a four-year institution. In the first year of the grant, Title V funds will enable the University Transfer Center to be completely redesigned and expanded into a much more effective and collaborative facility. At the University Transfer Center, students will be able to get on-going counseling, schedule group tours to nearby four-year institutions, access to computer stations for Internet college searches, and obtain assistance with the paperwork involved in the college admissions process.

"With this funding, the College can be the source of change to improve the earning potential, career, and life enrichment opportunities of all students, particularly our Hispanic and disadvantaged population," said Inclan, Ph.D., the college's vice president, academic affairs.

Faculty member Steve Lewis, co-author of the 272-page grant proposal, agreed. "It's going to provide us the opportunity to greatly expand our capacity for meeting the needs of all students. Some can focus directly on completing the first two years of a bachelor's degree before transfer, others will from the beginning, with our basic skills curriculum. Either way, we can make them successful in education and, ultimately, in their careers.

The grant plan was developed by a core of faculty and staff with input from dozens of additional faculty members. Said Inclan, "Our faculty are very enthusiastic about the new teaching and learning strategies this grant will offer. We are very excited, and with the grant, we'll be even better, and our students will benefit."

Goodbye Peaches—Hello Possibilities
Georgia Junior College Earns Migrant Education Grant

BY GARY M. STERN

If you're a child of a seasonal migrant worker who moves from farm to farm and often state to state to earn a living, your education is constantly in flux. Fortunately, the federal government inaugurated the College Assistance Migrant Program (CAMP) in 1972 to offer support to the children of migrant workers.

Hispanics number 94 percent of all students who earn CAMP grants, said David De Soto, senior analyst at the Office of Migrant Education. CAMP grants provide children of migrant workers access to higher education that they might not otherwise have.

A CAMP grant gives a child of a migrant worker one year's college education—tuition, room and board, and books—and includes a $75 monthly stipend for one year. The grant also pays for a director and two counselors to oversee CAMP students. This year, CAMP programs are in place at 12 colleges nationwide.

"Previously, there were no efforts by the federal government to recruit migrant students," said Francisco Garcia, director of the Office of Migrant Education at the U.S. Department of Education in Washington, D.C. "The migrant population is mobile. Their education has been interrupted. It's a hard job to find them in that you have to go to labor camps. They can be in Texas one day and Washington State the next. There was a need to fill, and this grant filled that void," he said.

Until 1999, eleven CAMP programs were operating: four are in Texas at the University of Texas-Pan American, Texas A&M University, West Texas A&M University, and St. Edward's University in Austin; two are in California at California State University in Fresno and California State in Sacramento; two are in Idaho at Boise State University and the University of Idaho; and there's one each at Metropolitan State College in Denver, Pennsylvania State University, and Inter American University of Puerto Rico.

Abraham Baldwin Agricultural College, a junior college with 2,500 students, located in Tifton, Georgia, three hours south of Atlanta, was proud to be the latest and twelfth program to earn a five-year CAMP grant, awarded last year. Farms filled with Vidalia onions, peaches, peaches, peanuts, cotton, and tobacco surround Tifton, and rely on migrant workers to harvest their produce on a seasonal basis. Because the federal grant was authorized in June 1999 and the program was beginning in Fall 1999, it attracted only 14 students in its initial year. Recruiting efforts are being stepped up, and the College hopes to attract at least 40 students, if not the full complement of 50, next year.

"We're a small college and can offer students the personal attention that they might not receive at a larger school," said Yolanda Emery, director of CAMP at Baldwin.

CAMP fits perfectly into the overall goals at Baldwin, suggested Dr. Harold Lloyd, its president. "We have a mission of reaching out to underserved students. Hispanics in Georgia are underserved. They are also a growing population in Georgia," said Dr. Lloyd. The school views these students as budding entrepreneurs who will live the American dream and improve themselves through education.

Educating children of migrant workers is part of the "natural economic progression," said Dr. Lloyd, who holds a doctorate in economics and has been with Baldwin for 29 years, the last 10 as president. Most CAMP students receive a general academic education, rather than a vocational education in agriculture. Dr. Lloyd expected that 70 percent of them would earn four-year degrees while the other 30 percent would become small business owners and move on to other endeavors. He acknowledged that many students lacked essential academic skills and were taking advantage of the free tutoring offered at Baldwin.

Though Hispanics are only a small percentage of the students at Baldwin Agricultural College, most CAMP students are Hispanic. "Of the 14 students, 12 are of Mexican heritage, and two are Haitian," says Emery.
To earn a CAMP grant, students must document that they are citizens or have green cards, show federal tax forms to prove that one of their parents worked 75 days last year as a migrant worker, and graduate from high school with a 20 index. "Contrary to most scholarships, which look for the best students by their grades, we're looking for the ones who need the help," Emery said.

Many CAMP students major in something other than agriculture. Many students see how their parents have worked in the backbreaking fields, with minimal remuneration, and seek alternative careers. According to Emery, Baldwin's CAMP students are majoring in business, education, computers, and childcare. "They want to get out of the fields," she says succinctly. Garcia noted that migrant workers worked long hours for little pay—"that has not risen during the recent age of prosperity."

To help students prepare for its academic rigor, Baldwin provides special pre-college classes for all students. Students learn essential academic skills to succeed in college, such as note taking, study skills, and library research. In addition, CAMP students also take a VIP seminar through the Vision, Initiative and Persistence program. Counselors give students progress reports weekly. If students are not performing well academically, they receive special tutoring. Students are assigned a student buddy and work in pairs to motivate one another to do well. "While all students have high school diplomas, many have problems with their written English. Others need tutoring in math," Emery says. Special counseling is also offered to help students work out whatever problems arise. While most students live in the dorms, one student who was commuting one hour each way was having a problem making commitments. CAMP arranged counseling for him and also condensed all of his classes into two days, making the commute more manageable.

Since many of the Hispanic students hail from close-knit families, and this might be the first time they are living apart from the family, they often require counseling. "They need family support," Emery said. Each of the three CAMP counselors at Baldwin is bilingual, helping to relate to and understand the students' needs and culture. "They want love and attention," perhaps help the student secure loans for the second or remaining educational years. "It's the responsibility of the institution," he said. Migrant students are expected to apply for and gain grants from financial aid packages utilized by the College. "They become part of the system of aid," Garcia noted.

Recruiting at Baldwin

With such a brief window for recruitment, and given that high schools were already closed, how did Baldwin manage to find the 14 students who eventually were accepted?

Rocio Cardenas, hired as CAMP's special recruiter and counselor, worked with four migrant education agencies—Southern Pine, Live Oak, Two Rivers, and Piedmont—that provided her with the home phone numbers of children of migrant workers who had recently graduated from high school.

Cardenas visited students personally to determine if they apply for the grant. She helped them fill out all appropriate financial aid forms and tax form and had them submit an autobiography. Often she had to convince the students' parents that attending college was a worthwhile endeavor.

"Many of the boys didn't want to attend because they were expected to help in the fami income. And the parents were unsure about letting the girls attend school," said Cardenas. Cardenas had to play the role of psychological financial aid officer, and college advocates convince them.

By early 2000, Cardenas has identified the high schools that have the largest Hispanic populations in Georgia. She is visiting each on talking one-on-one to college advisors and guidance counselors and often speaks at college nights and assemblies. She is dedicated to attracting 50 children of migrant workers, the fi complement that the grant offers.

CAMP students have special needs, suggested Garcia of the Office of Migrant Education. They have lacked the "continuity of education" that most students have who stay in one school for high school. Moreover, Garcia said, one the problems educators have been facing is that high school credits earned outside the state were valued lower when they moved from Georgia to Texas.

Why is CAMP so important to the future these children, the offspring of often malign and underpaid migrant workers? "When students talk among themselves, I hear them discuss picking peaches. None of them wants to pick peaches in the future," Cardenas said. CAMP is been so successful that many children migrant workers have become doctors, attorneys, and teachers. Garcia noted, "The grs take them out of the cycle of poverty and allow them economic and educational opportunities he said. CAMP grants fill a need "because the students have not had opportunity in the past." Haring moved around so much in high school their grades suffer. Without CAMP, these students would not have had a chance to go to college Emery noted. CAMP grants might as well called HOPE.
It Takes Nurturing, Continuous Dialogue, and Programmatic Intervention

UMichigan-Ann Arbor Team Evaluates 11 Diversity Projects

BY INÉS ALICEA

Eleven colleges awarded grants to address racial and ethnic tolerance issues on campus found that fostering diversity is complex and requires a great deal of work, said one of the University of Michigan at Ann Arbor researchers asked to evaluate the schools' efforts.

"Colleges and universities recognize that diversity is a desirable goal and an integral component of offering a higher quality education, but they are finding that diversity comes with a price," said Cynthia Hudgins, a senior research associate in the University's School of Social Work and director of the Global Program on Youth. "It needs to be nurtured in order to be successful."

Hudgins and education Professor Michael T. Nettles produced a report of their evaluation entitled "Models of Diversity: Pursuing Tolerance in Colleges and Universities." Their report examines race, ethnicity, and gender issues on the 11 college campuses and the projects those institutions adopted to encourage knowledge about and understanding and acceptance of other cultures.

"Most institutions learned the hard way that the academic environment itself was insufficient to mitigate the problems of intolerance and prejudice that plague the rest of society," the researchers wrote in their report.

Colleges that participated in the study were chosen from among 260 applicants by Philip Morris Companies, which offered the colleges up to $100,000 each to introduce programs designed to foster racial harmony on campus.

"Multinational companies like Philip Morris have long recognized that diversity serves an economic interest," the researchers wrote. "Multinational corporations have a vested interest in an adaptable, mutually respectful workforce. Student participants who have been successful in altering their perspectives to effectively understand and accommodate another culture in these campus activities conceivably possess a higher potential to manage subsequent cultural transitions."

The colleges were Bethune Cookman College in Daytona Beach, Fla.; Colby College in Waterville, Maine; Columbia College of Columbia University in New York City; Davidson College in Davidson, N.C.; Duke University in Durham, N.C.; Haverford College in Haverford, Pa.; Long Island University in Brooklyn, N.Y.; Northern Illinois University in DeKalb, Ill.; Northern Michigan University in Marquette, Mich.; Occidental College in Los Angeles; and University of Wisconsin-Oshkosh.

Dane Eidman, manager of corporate contributions for Philip Morris in New York, said that the $1.2 million grant was "considered a very large initiative and a significant investment on our part."

"We were looking at the emerging issues in higher education, and we wanted to address the pressing needs," she said. "We were very happy with the results." The project, she said, "opened up a bigger debate."

Each of the institutions cited past racial, ethnic, or gender tolerance issues on campus ranging from racial slurs to conflicts and misunderstandings between students and campus police.

The range of on-campus issues faced by participants included:
- tensions among racial groups;
- anti-Semitic acts such as swastikas on walls;
- racist slurs in campus publications and at campus events;
- tense relationships between the campus community and the local community;
- minorities feeling that they are on exhibition and, further, are burdened by a responsibility to teach rather than learn;
- minority students' reports of references to affirmative action and of quota-related comments; and
- the presence of racially stratified organizations such as fraternities and sororities that appeared to perpetuate segregation and intolerance.

The report documents how each institution dealt with these issues. Each school used the grant differently to create programs and projects that addressed the issue of tolerance. And each of the Philip Morris projects tended to focus on race, particularly Black/white relations. Nettles and Hudgins found that some of the colleges failed to devote attention to class issues, women's issues, and gay, lesbian, and bisexual issues.

Even with the focus being primarily on race, the researchers said that the campuses sometimes struggled with how to define tolerance and how best to address the issue.

"One important aspect of it is to be sure that people within the academy and the supporters understand what tolerance means."
Nettles said, “Another difficulty was overcoming obstacles necessary to bring people together and in getting their attention. One of the obstacles that every campus faces is trying to broaden the level of interest to extend to those who actually need to be involved.”

But the researchers said that the campuses each developed many worthwhile projects that drew involvement campus-wide and in some cases community-wide.

“In every case, these were excellent initiatives, but this is just the tip of the iceberg,” Nettles said. “Much more work needs to be done to ensure that tolerance is made a part of the fabric of the institutions. Unless colleges and universities establish special interventions, communication barriers will persist.”

Hudgins said that the researchers felt that it was important to have a thorough understanding of each college’s history with tolerance issues to try to measure progress. Because racial/ethnic issues are so sensitive, the campuses sometimes discovered that progress could be painful.

The researchers said that sometimes when they went on site visits, there appeared to be a great deal of tension on a campus but that subsequent visits to the campus proved that the tension was necessary to launch important dialogues and overcome conflict.

“It is important to take note where one institution is beginning to evaluate progress,” said Hudgins. “Sometimes progress is not neat and clean. Sometimes when you put everything out there, it is not comfortable.”

An example of some of the discomfort felt was best summed up by a Latina student at Columbia College. “I feel pushed into a corner, always defining, defending, and proving myself to classmates, professors, or employers,” said Ana Lisa Raya. “Trying to understand who and why I am, while understanding Plato or Homer is a lot to ask of myself.”

Hudgins said, however, that was heartened to see that the seed colleges were so eager to participate. “I could sense on the campus that the people knew that something that needed to be attended to,” said Hudgins. “I am happy to see how strongly the campus felt about this project.”

“They wanted to make sure minority students were getting a good education and being heard,” said Netl.

The campus projects to address issues of tolerance varied as much as the issues they faced. Colby Colb, where minority students account for 69 of the 1,752 student body, dubbed a film called Corn Ground, a story about how a fictional college, one like Colby, dealt issues of race, class, and gender. Film-making process helped the campus and community toges whereas before there had been contact between the two.

At Northern Illinois, where percent of the student body is white, the College of Business is a course called “S Development for Success in Multicultural Environment.”

Occidental College, one of the most ethnically diverse campus in the study, with a population is 45 percent persons of color, i
its grant to expand its year-long Peer Mentor program, which paired first-year students with academically outstanding older students.

Davidson College used part of its grant to add a part-time minority counselor to the staff of its counseling center, which significantly increased the numbers of minority students using the counseling services. The college also used some of the funds to support its Academic and Cultural Enrichment Series for minority students. These programs ranged from a get-acquainted dinner with minority faculty to a leadership retreat, forum for female minorities, and participation in the International Fair.

Nettes said the study sends the message that it takes a great deal of work to achieve and maintain diversity on a campus.

"It takes a lot more than admitting students to ensure diversity exists on a campus," said Nettes. "It takes nurturing, continuous dialogues, and programmatic interventions."

The researchers said that several factors helped make the projects a success at each of the college campuses. Strong marketing of the project at the campus and at times in the neighboring community helped generate a lot of interest and participation. Institutionalization of the projects through promises of continued funding after the grant ended also marked the more successful projects. Also, faculty participation was "a vital component of project success."

"In some senses, the projects were 'preaching to the choir' rather than attracting faculty oblivious to campus problems, or those who are reticent about adapting diversity materials to their classroom efforts," said the researchers.

The projects successfully raised the level of interest and dialogue over multicultural issues, but the challenge now is to sustain the programs after the Philip Morris grants expire, Hudgins said. While some of the campuses were able to secure funding to continue some or all of their projects, others were not so successful.

"Once the money wasn't there, these campuses were struggling," Hudgins said. "Finding the resources to maintain their projects continues to be a challenge."

And it seems that the campuses are really on their own in securing funding for tolerance initiatives. Some of the companies, including Philip Morris, are funding other types of projects.

Eidman said that Philip Morris has since changed the focus of its corporate giving, now funding projects that have to do with preventing domestic violence, providing hunger relief, and supporting the arts.

"The big emphasis now is in helping people in crisis," said Eidman. "We redefine our priorities over time. The funding shifts with our interests internally and the needs externally. Our decision was purely internal and reflected our interest in other areas rather than a disinterest in education."

Hudgins said that Philip Morris was not the only corporate donor to shift away from funding diversity programs, but she could not explain the change, and neither could Eidman.

"Foundations are constantly making programmatic changes," said Hudgins.

But the researchers said that it was vital that the colleges find ways to sustain their tolerance projects to continue the success they generated with them.

"It appears likely that unless colleges and universities establish special interventions such as tolerance projects, communication barriers will persist," they wrote in their report. "Each of the 11 projects has emphasized the importance of strong communication and demonstrated that good communication cannot be assumed, even at small colleges. The challenge to sustain the dialogue beyond the grant period will test this resolve."
University of New Mexico Lobo Pitches Perfect Game

Program strikes balance of academics and athletics

BY CAROLYN GONZALEZ

The Division I UNM Lobos baseball team takes to the diamond this year in the newly formed Mountain West Conference. Head Coach Rich Alday believes that UNM's program is "just as good as any program in the country" and that the Mountain West will eventually be as good as the Western Athletic Conference, where UNM previously competed.

Alday, UNM's head coach for 11 seasons, is a Tucson, Ariz., native who attended Emporia State University in Kansas on a baseball scholarship as the Hornets' catcher. He still possesses the catcher's build, as well as the coach's demeanor. He is as proud of the players' classroom performance as their on-field prowess.

"Good players get it done in the classroom and on the field," says Alday, who works with the pitchers and catchers.

Mark Martinez, assistant Lobo coach for 12 years, is from Denver, Colo., and was also a scholarship player. He attended Mesa State in Grand Junction, Colo., and played shortstop. The hitting and infield coach, Martinez echoes Alday's remarks on the significance of academics to student athletes: "Everybody's dream is to be a professional ballplayer, but that's hard to achieve. They must have something to fall back on. We have a policy that the kids don't practice if their grades are down. Our goal is to have a team GPA of over 3.0."

Adds Alday, "We graduate between 90 and 85 percent of our players in the program."

Travis Young was a Lobo second baseman from 1994-97 and is now with the San Francisco Giants AA Shreveport and AAA Fresno farm teams. He was recruited out of the UNM program one semester short of graduating with a Bachelor of Science in biology. "I still plan to graduate eventually. My previous goal was to go on to med school. We'll see when I graduate," says Young.

Young credits Alday and Martinez with his major league opportunity. "They helped me get noticed. The work ethic they instill in players paid off. I'm getting used to playing every day and developing a level of consistency. What I learned adds that he will probably take the extra math courses necessary to complete a minor in math and that he tutors another player in statistics.

"This is the only chance I'll get to play college ball. I left home and a girlfriend to be here, so I'm not going to waste time. I'm on a baseball scholarship and I don't want to disappoint my coaches, but I especially don't want to disappoint my parents. Sure, I'd like to play major league ball, but I have to graduate because everyone has to have the season, making it important for student athletes to stay on top of their coursework.

Perez is a good ambassador for new recruit "They gave me three guys to show around. I don't have a bad thing to say about the program—weight lifting, fall running, study hall. They make the transition easy," he says.

Perez frequently sees his family in the stands since the UNM team travels to Arizona regularly to play against Grand Canyon (whom they swept in a three-game season opener), University of Arizona in Tucson, and Arizona State in Phoenix.

Perez attended bilingual schools through high school in Tucson and says, "Spanish is important as English."

"As a business major, I know that if you don't know Spanish, it narrows what you can do, especially in the Southwest."

"Baseball players need to speak Spanish. Miguel [Montiel] and I joke around in Spanish and no one else understands. With Cuba, Central and South American players on most major league teams, it's important to know the language. It opens the doors to conversation at meeting new people," he says.

Perez offers advice for young players: "Finish what you start. Don't be a quitter. Someone will always be faster, stronger, more experience. Keep your eyes open, and take on what's best for you. Learn as much as possible. Be a sponge and soak it all up. The more you can learn, the more you can teach."

Miguel Montiel, from Nogales, Ariz., is senior majoring in speech and hearing science. He plans to graduate in December and go on for a master's in speech and language pathology either in Arizona, New Mexico, or California depending upon acceptance.

"My degree program requires knowledge a second language. Knowing Spanish made easier for me from the beginning," he says.

Montiel plays the field—left, center, right—and at the age of 22, he's already achieved a childhood dream. "I always wanted to play on the diamond"
always comes first," he says. Candelaria also credits the coaches with teaching him what he knows: "Power- and knowledge about the game."

Candelaria plans to graduate in May 2001, depending upon the class schedules that he's able to arrange with ASM. "If I don't play pro ball, after I graduate, I'll probably do an internship as an accountant."

Unlike some of his teammates, Candelaria lives at home. And likes it. "I live with my parents and my sister. I have home cooking, warm meals, a warm bed, and people who understand the baseball schedule."

An off-field team member credited by coaches and players alike for the success rate of Lobo baseball's student athletes is Danny Trujillo, athletic administrator. Alday says that Trujillo is "second to none" in keeping tabs on players, organizing study halls, tutoring, and making an overall positive impact on the program.

"We have an excellent group of new baseball recruits this year. They will do well academically," says Trujillo.

His job is to meet with new recruits, help them through admissions, assist with eligibility paperwork, and help them get registered for classes. He tracks the players academically and arranges for tutoring or other assistance, as necessary.

"I also do one-on-one advisement, and what I like about baseball is that it isn't high-maintenance. I used to handle athletes on other teams, but I have additional administrative duties that made it necessary that I drop the other sports. Since the baseball students are good and responsible, I can assist them while handling other administrative tasks," says Trujillo.

"I work with the baseball players because I didn't want to lose contact with the students. In all my administrative work, it's important to have a student's perspective, and the baseball players are a quality group," he says.

Players know that they need to adjust field position when facing certain batters. They begin to recognize the hitter who consistently hits to left or the long ball hitter who aims for the center field wall. Players and coaches also know to adjust to accommodate the language and cultural differences that they face in potential teammates and opponents. Last year, they got a little education in Japanese language, culture, and baseball. The Lobos hosted a team from Rikushi Keizai University, and each player hosted a Japanese player. "They discipline, and their culture," says Martinez, who adds that they split the two game series.

Alday and company have a reason to rival major league baseball, if taking homework into consideration. They play 58 games, the NCAA Division I maximum. The coaches are always planning ahead, not just to the next game or series but also to the next season.

"We have signed two players from Albuquerque's Rio Grande High School. They are Joe Salas, a senior, and Anthony Lovato, currently attending Lamar Junior College. Our priority is to recruit the best players from New Mexico, and go from there," says Alday.

Alday, Martinez, and the rest of the Lobo baseball team also offer camps to children in New Mexico. During winter break, they host hitting camps, and every summer and fall, they hold camps and clinics to help youngsters develop their skills with the assistance of the Lobos.

Alday has experience with baseball at another level. He has Olympic credentials as assistant coach for the USA baseball team, gold medal winners in Seoul, South Korea, in 1988, and as auxiliary assistant coach for the team that won the bronze in Atlanta in 1996.

The Lobo baseball program teaches the players to scout ahead on the field and in life. With that, they already have a gold medal.

Carolyn Gonzales is a senior public affairs representative at the University of New Mexico. She served for two years as president of Albuquerque's Lobo Little League and remains on the board of directors. She is co-chair of the Manzana High School baseball booster club.
Creating Coalitions—Not Competition—Among Minorities

Black and Hispanics Join at National Conference

BY MARILYN GILROY

The dream of uniting the two largest minority groups—Blacks and Hispanics—as a means of achieving educational, economic, and political progress, has been discussed for the last decade. But at least once each year, that dream becomes a reality when the National Association of African American Studies (NAAAS) and the National Association of Hispanic and Latino Studies (NAHLS) join forces at their national conference.

This year’s conference in Houston, Texas, attracted 800 presenters, up from last year’s 500, with attendance soaring to more than 3,000, creating an overflow situation for conference organizers, who worked to find space at nearby hotels. But that’s the kind of problem that Dr. Lemuel Berry, Jr., founder and executive director of both organizations, is glad to handle.

“Our major success is that we see now that everyone thinks this is a great idea,” said Berry, dean of the Claudill College of Humanities at Morehead State University in Kentucky.

In 1992, Berry and his colleagues were not exactly sure what would happen when they formed NAHLS as a parallel organization to the already existing African American studies group. The idea was conceived when Berry was contacted by Department of Education officials in Washington and realized the need to have a similar organization serving Hispanics and Latinos, and so, the NAHLS was born.

The NAAAS/NAHLS joint conference, now in its fifth year, draws representatives from large and small colleges in the U.S. and throughout the world. They have come to hear presentations on the latest scholarly research in the entire gamut of academic disciplines and to discuss sociological and political issues.

This year’s conference has been extended to include the National Association of Native American Studies and the National although each group maintains separate identity and governance, they have agreed that coming together for a national conference is in everyone’s best interest.

“There must be a place where people of color can come together present research and discuss educational and social issues,” said Berry.

One of the advantages of having all the groups together, said Berry, is that participants go to one workshop where they might hear the African American point of view on an issue and then in the next hour or next day, go to another workshop where they hear a Hispanic perspective on the same issue. They often come away with a new understanding of common struggles.

For example, last year’s conference featured separate presentations on health care for Hispanics and African Americans. Research shows that more than one-half of African Americans and Hispanics under the age of 65 are uninsured, and yet both segments of the population must continue to press for reform. There were also concurrent sessions analyzing media content and ownership issues affecting minorities and a wide range of discussions on minority literature, culture, and disparities in educational achievement.

“These groups face many of the same problems, and they have the same goals and aspirations,” said Berry. “Everyone benefits when we work together.”
"I was astonished to walk into a national meeting where 90 percent of the presenters and attendees were Black or Hispanic," said Lopez-Bernstein.

which are of great importance to the minority community and society at large."

The logic of Berry's statement is irrefutable. After all, both groups share a deep concern about the high rate of dropouts in high school, lower scores on SATs, and lower persistence rates in college. If progress is to be made on these fronts, then it is this generation of teachers, scholars, and administrators that can build the bridge to create new understanding and alliances among the Latinos and Blacks.

That kind of thinking is exactly what attracted Dr. Esther Lopez-Bernstein to become a board member of NAHLS. Lopez-Bernstein, an assistant professor of counseling and psychological services at the State University of New York at Oswego, attended her first NAHLS conference four years ago.

"I was astonished to walk into a national meeting where 90 percent of the presenters and attendees were Black or Hispanic," said Lopez-Bernstein. "It was a racial reversal of the composition we usually see at conferences. All of these academic and scholarly people were minorities, and it was very exciting to be there."

Impressed and gratified by the conference, Lopez-Bernstein sought out Dr. Lemuel Berry to thank him for his efforts in organizing such a worthwhile and significant event. In turn, Berry asked her to observe a few board meetings and to consider becoming a member. It was an offer she could not refuse. It was also one that was tailor-made to her background.

"At SUNY-Oswego, my specialty is counseling on multicultural issues," said Bernstein. "I am aware of the need to build coalitions of people who have not been at the center of our culture. They must be included and become part of that central framework."

Lopez-Bernstein says that her idea of inclusiveness is not limited to issues of race and ethnicity; rather, she also considers gender and religion to be parts of the equation.

"Of course, all of these groups have differences that we must honor and respect," she said, "but our strength lies in working together."

It is for this reason that Lopez-Bernstein characterizes Lemuel Berry as being "very astute" in recognizing the need to bring the various minority groups together.

Now that the joint conference enjoys solid support, it has expanded its activities to include active mentoring of young people. Members are encouraged to bring college students from their institutions with them.

Last year, Lopez-Bernstein brought two students—one a minority, the other a white female.

"For the white student," said Lopez-Bernstein, "it was the first time she experienced the feeling of being in the minority at a public gathering. It had a significant impact on her."

This year, Lopez-Bernstein brought two students from Syracuse University, where she is a visiting professor—one a Japanese student, the other from the Dominican Republic.

Conference organizers also made an effort to reach out to high schools in the Houston area and offered to underwrite expenses involved in transporting local students to the conference.

"These students get a terrific boost just from being in a room filled with scholars and academicians who share their ethnic and racial identity," she said.

Lopez-Bernstein's role on the national board of NAHLS includes serving on the publications subcommittee. Knowing the importance of communications, the group is trying to expand and improve publications in both print and electronic formats. Currently, NAHLS publishes an English/Spanish newsletter twice a year.

"I got involved with the newsletter because I wanted to do the Spanish translation," said Lopez-Bernstein. "But as you can guess, I ended up as an editor."

She says that the group hopes to download the newsletter onto its Web site. The subcommittee is also on the verge of publishing the first edition of the Journal of Intercultural Discipline, a project that has been in the planning stages for several years.

"It took a while to get an issue together because we had to find someone who could edit the six articles on various academic subjects such as geography, literature, and psychology," explained Lopez-Bernstein.

The group also struggled to find financial support for the journal, but all of these hurdles have been overcome, and the inaugural issue is due out shortly. In addition, the publications committee is trying to find a new logo for NAHLS, which is complicated because of the diversity within the association.

"We don't want to misrepresent any culture," said Lopez-Bernstein. "This makes the process of coming up with an acceptable design a lit-
This year’s conference in Houston attracted 800 presenters, up from last year’s 500, with attendance soaring to more than 3,000.

The more difficult than usual.

While the NAHLS is expanding its outreach and communication efforts, the organization’s main focal point is still the annual national conference. The conference reach is increasingly global, with representatives coming from Spain, Mexico, Peru, Guatemala, Ecuador, Chile, China, Japan, Canada, and Africa.

The boards of NAAS and NAHLS have agreed to hold an additional meeting in a Spanish-speaking country every other year, with the first one scheduled for Cancun, Mexico, in 2001.

Berry, Lopez-Bernstein, and others contend that this conference is unique because there is no other place where scholars can hear sessions like the one on ethnic poverty and social vulnerability among minorities with both African American and Hispanic presenters. Or a multicultural panel examining equity and access in engineering, mathematics, and technology.

And although participants walk away with a wealth of knowledge and appreciation for various points of view on myriad issues, there is another dimension that is equally fulfilling to Berry and conference organizers.

“The networking and sharing are tremendous,” said Berry.

Adds Lopez-Bernstein, “Sometimes it is difficult to connect all of these people who seem so different, but coming together like this helps all of us find our voice. The only way to build an equitable society is to include everyone.”

THE NATIONAL ASSOCIATION OF HISPANIC AND LATINO STUDIES

Purposes:
1. To promote acquaintanceship and group effort among those interested in Hispanics and Latinos; 2. To further the cause of research in Hispanic and Latino Studies; 3. To stimulate greater public interest in and better informed public opinion regarding Hispanics and Latinos; 4. To serve as a forum for the expression of research and artistic endeavors in the celebration of the lives and works of Hispanics and Latinos; 5. To serve as a resource for scholars in the field who desire information and support for research related to the Hispanic and Latino experience; 6. To maintain archives, which will be made available to all members of the community who are desirous of using available resources; 7. To support and host an annual convention each year which provides students and scholars an opportunity to present in an open forum.

Individuals or institutions interested in joining NAHLS should contact:

Dr. Lenard Berry, Jr.
Morehead State University
Rader Hall - Room 211
Morehead, KY 40351

SCHOOL OF PSYCHOLOGY

Adjunct Faculty

Capella University’s School of Psychology is hiring adjunct faculty in the following areas of specialization: Addictions Psychology, Clinical Psychology, Educational Psychology, Family Psychology, Health Psychology, Organizational Psychology, and Sport Psychology.

Context: Capella University is a regionally accredited institution of higher education, which offers undergraduate and graduate degree programs, certificates, and continuing education to adult learners who seek to integrate advanced study in psychology and related fields with their professional lives.

Responsibilities: Adjunct faculty are part-time faculty who serve as independent contractors. Adjunct faculty teach in the core and specialty courses. Adjunct faculty are responsible for all chargeable activities within the discipline area, and serve on the School and program committees and share full voting privileges with the full-time faculty. Adjunct faculty are responsible for ensuring that educational standards are consistent with the prevailing national standards for the education of professional psychologists.

Qualifications: 1) Earned doctorate; 2) Interest in and commitment to teaching in an online environment; 3) Proficiency in the use of Internet tools; 4) Have prior graduate teaching experience.

Salary: Commensurate with experience and qualifications

Starting Date: April 1, 2008

Deadline: September 1, 2008

Application Procedures: Send letter of application, vita, three letters of recommendation, and transcripts to:

Janet Korpi
Human Resources
Capella University
330 2nd Avenue South, Suite 550
Minneapolis, MN 55401
Phone: (612) 252-4290 Fax: (612) 337-5370
E-mail: jkorpi@capella.edu

DeVos Graduate School of Management Northwood University

Dean and COO

Attributes sought: earned doctorate from a distinguished Business School; top management experience in a corporate environment; research interest subordinate to discussion-based teaching interest; appreciation for the Mission and Philosophy of the University; dedication to vigorous leadership and growth; dedication to quality control and customer service.

The DeVos Graduate School of Management was established in 1992, as a part of Northwood University.

Send cover letter and vita to:
Northwood University
Attn: Human Resources

E-mail: hr@northwood.edu
Northwood University is an

The event focused on nonviolence and Arias' efforts to attain peace in Costa Rica and internationally. Arias, who was essential to the peace process in Central America throughout the past two decades, has been able to influence world policy on the weapons trade.

Peace Jammer—young people—have succeeded in creating teen centers, diversity programs, AIDS prevention projects, conflict resolution workshops, aid for the homeless, violence prevention programs, and meals for senior citizens.

**MOTTEP Honors Media**

The National Minority Organ Tissue Transplant Education Program (MOTTEP) presented Key of Life awards at its Gift of Life winter gala, held in Maryland. Vice President Al Gore was the honorary chair for the inaugural gala, which featured a "Salute to the Media." MOTTEP honored 15 broadcast and print media organizations for providing positive coverage of organ and tissue donation.

Clive Callender, chair of the Howard University Hospital Department of Surgery (District of Columbia), founded MOTTEP through partnerships with the DOW Chemical Company, the National Institutes of Health, and the National Kidney Foundation of the National Capital Area in 1992.

**Alonso Editor of PMLA**

Carlos J. Alonso, professor of Spanish at Emory University, will become the new editor of *Publication of The Modern Language Association* (PMLA), a journal published six times a year.

Born in San Juan, Puerto Rico, Alonso received a bachelor's degree from Cornell and a doctorate from Yale. He has published many articles on Latin American literature and culture. He is the author of *Modernity and Autochihony: The Spanish American Regional Novels*, *The Burden of Modernity: The Rhetoric of Cultural Discourse in Spanish America*, and is the editor of *Julio Cortazar New Readings*.

He has served on the editorial boards of several journals, among them *PMLA, Latin American Literary Review, Hispania*, and *Comparative Literature*.

Alonso begins his three-year term in July.

**Multi-Ethnic Theatre for Youth People at Cal State-Northridge**

The Mark Taper Foundation's Performing for Los Angeles Youth Program (P.L.A.Y.)—high energy, multi-ethnic theatre for young people—gave a free presentation of its production, *The Highest Heaven*, at California State University-Northridge.

Written by José Cruz González and directed by Diane Rodriguez, *The Highest Heaven* is the story of a young boy, one of thousands forced to return to Mexico during America's Depression. Separated from his mother and alone, he follows the path of a monarch butterfly in a haunting search for his past and future.

P.L.A.Y. annually tours schools and community venues throughout the greater Los Angeles area.

**Perez Seeks to Engender Student Success at Fullerton**

Dr. Ricardo E. Perez is the new dean of counseling and student development at Fullerton College (Calif.). Perez oversees counseling, career life and planning, articulation, matriculation, and transfer, seeking to "engender student success."

"Mr. Perez's broad experience in several areas of education, including Extended Opportunity Programs and Services, outreach, information services, grants, and school relations will certainly benefit the college and our students," stated Dr. Michael J. Viera, college president.

Perez has a bachelor's degree from the University of California-Los Angeles (UCLA), a master's from California State University-Dominguez Hills, and a doctorate from UC-LA.
Proficiency in English Takes Time, Study Finds

UCSB Acquisition of English skills by English learners is no quick and easy process. It takes from three to seven years, according to a study prepared for the University of California Linguistic Minority Research Institute at the University of California-Santa Barbara.

And policies such as California's Proposition 227 that assume acquisition is possible in as little time as one year are "wildly unrealistic," the study says.

"How Long Does It Take English Learners to Attain Proficiency," by Stanford University researchers Kenji Hakuta, Yuko Goto Butler, and Daria Witt, studied students in two San Francisco-area school districts and interpreted data gathered in Canada by other investigators.

Levy to Be New Rice Provost

Eugene H. Levy, a University of Arizona physicist who finds excitement in research, teaching, and "the ability to make things happen," will be Rice University's (Texas) next provost, beginning July 1.

Levy's excellence in teaching and service has won recognition. He is most proud of being the inaugural recipient, in 1999, of the Hispanic Arizona Alumni Association Award "for contributions to Hispanic student education." In 1996, he received a Martin Luther King Jr. Distinguished Leadership Award from the University of Arizona King Center "for support of civil rights and social change."

Levy has an A.B. from Rutgers University (N.J.) and a doctorate from the University of Chicago.

Hispanic Summer Program Celebrates 10th Year

The Hispanic Summer Program celebrated its 10th anniversary by honoring the person and the work of Dr. Justo L. González at Princeton Theological Seminary (N.J.).

González is a recognized minister of the gospel, educator, author, administrator, friend, husband, and father. His pioneer work as an advocate and leader in ecumenical efforts, especially in promoting and facilitating joint efforts among Hispanic Christians from various traditions, has resulted in the Asociación para la Educación Teológica Hispana. The Hispanic Theological Initiative, and the Hispanic Summer Program.

The event was an opportunity for reflection and celebration of the strides and accomplishments made by Hispanics in theological education.

Accreditation Reaffirmed for Saddleback and Irvine Valley College

IRVINE VALLEY COLLEGE
SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT
& Saddleback College

Dr. Cedric Sampson, chancellor of the South Orange County Community College District (Calif.), announced that accreditation was fully reaffirmed for Saddleback College in Mission Viejo and Irvine Valley College in Irvine by the Accrediting Commission for Community and Junior Colleges.

Both colleges were completely removed from warning status, he said. Colleges are accredited every six years on stringent academic standards to ensure high academic quality. Saddleback and Irvine College are among the top 10 percent of California's 107 community colleges in transfer rates to four-year colleges and universities.

Teson Presents Papers at University Conferences

Fernando Teson, professor of law at Arizona State University (ASU), was the inaugural speaker at the "Colloquium on Humanitarian Intervention" at the University of California-Irvine, presenting his paper, "Humanitarian Intervention: When Not to Intervene." Teson also appeared at "A Conference on Humanitarian Intervention," University of Denver School of Law; the ASU Community Development Program; and at the Annual Meeting of the American Society of International Law, Washington, D.C.

A career diplomat for the Argentine Foreign Ministry and second secretary at the Argentine Embassy in Brussels, and teacher of international law, international human rights, jurisprudence, and comparative law, he is a frequent contributor to major international law journals and author of Humanitarian Intervention: An Inquiry into Law and Morality.

Teson earned his master's degree from the Université Libre de Bruxelles, Belgium, and his Doctor of Juridical Science from the Northwestern University School of Law.

Black and Latino Musicians Compete at Michigan

The University of Michigan hosted the 3rd annual Sphinx Competition Finals Concert, showcasing the top young Black and Latino string players in the country. Competitors vied for prize money totaling $80,000, full scholarships to prestigious music camps and academies across the country, and opportunities to appear as soloists with the National Symphony Orchestra, the Detroit Symphony, and the Ann Arbor Symphony.

The Sphinx Competition is produced by the nonprofit Concert Competitions and Musical Development Inc. to promote development of young African American and Latino string players.

Rodriguez Speaks at Delaware

Judge Joseph H. Rodriguez, Jr., spoke recently at the University of Delaware about "Life's Federal Bench...A Personal Perspective." Rodriguez is senior judge of the U.S. District Court in Camden, N.J.

Rodriguez, a native of New Jersey, was president of the N.J. State Bar Association and is a member of the American Bar Association (ABA), where he has served in the house of delegates and as chair of its National Conference of Federals.

Hispanic Radio Program at East Tennessee State

ETSU East Tennessee State University (ETSU)'s National Public Radio station, WETS-FM (89.5), is airing a five-minute Hispanic/Latino interview show Sundays at 6:55 p.m.

Ente, which means "what's happening" or "to inform yourself," addresses its listeners' interests and concerns of Spanish-speaking people in East Tennessee. Broadcast entirely in Spanish, Ente is hosted by...
Doris Ortiz, a member of the Tri-Cities Latin American Club.

The program is the result of efforts by the departments of foreign languages and communication through the Expanding Community Partnerships Program, which is funded by the third grant awarded to ETSU by the W.K. Kellogg Foundation of Battle Creek, Michigan.

**Palo Alto Offers Free Hispanic Genealogy Course**

Palo Alto College (Texas) has been conducting a free course in Hispanic Genealogy this semester.

Classes present varied topics, a demonstration of Internet genealogy sources, and individual consultations with the instructor to develop personal research plans. The course uses a hands-on approach and emphasizes basic records and sources.

Class instructor Larry Kirkpatrick is an adjunct faculty librarian at Palo Alto College and a genealogist for more than 20 years. His expertise is in Hispanic and Native American genealogy.

**Santos Wins Art of Peace Award**

The St. Mary’s University (Texas) President’s Peace Commission presented the second annual Art of Peace Award to John Phillip Santos, Latino writer, prize-winning poet, and writer-producer of more than 40 television documentaries for CBS-TV and PBS. The award recognizes artists whose work promotes peace and social progress.

Santos, a native of San Antonio, is the first Mexican American Rhodes Scholar and he is the winner, among other awards, of the Academy of Poets’ Prize at Notre Dame and the Oxford Prize for fiction. His articles on Latino culture have appeared in the *New York Times*, *Los Angeles Times*, and *San Antonio Express-News*. *Placento Left Unfinished at the Time of Creation*, a memoir by Santos, was nominated for a 1999 National Book Award.

**Camacho New CEO of HTVN**

Hispanic Television Network (HTVN) Inc. named Marco Camacho its chief executive officer.

Camacho had been vice president and general manager of Telemundo Station Group of Houston, which, under his leadership, dramatically increased revenue and pioneered the use of English closed-captioning in Spanish-language television.

He recently was named one of the top ten general managers in the country by *TV Business Confidential*.

HTVN has more than 40 affiliates and 16 owned television stations broadcasting to more than 20 million homes.

**Santiago Canyon College Becomes Fully Accredited**

The Western Association of Schools and Colleges’ Accrediting Commission for Community and Junior Colleges granted a maximum six-year accreditation for Santiago Canyon College in California. The state’s newest community college, it is one of two institutions within the Rancho Santiago Community College District and serves the communities of Orange, Villa Park, and Anaheim Hills.

For students, college accreditation provides access to financial aid and allows them to transfer general education units to four-year colleges and universities. Previously, all courses and programs were recognized through the accreditation of Santa Ana College.

**Gonzalez President of National Catholic Social Justice Lobby**

Maria Gonzalez, director of the Center for Academic Achievement at Our Lady of the Lake University (OLLU) in Texas, was appointed president of NETWORK, a national Catholic Social Justice Lobby, for a two-year term.

Founded in 1971 by Catholic sisters, NETWORK is a 10,000-member organization of men and women religious and lay persons interested in furthering social justice. Its mission is to educate, lobby, and organize to influence the formation of federal legislation that promotes economic and social justice.

As director of the OLLU center, Gonzalez oversees programs that provide academic enrichment opportunities for college students, including tutorials, workshops, and student disability services.

**Mendoza Reports on Life in Havana**

In the early 1960s, more than 200,000 Cubans chose to flee their homeland when Fidel Castro began the process of nationalizing privately owned land. Among them was 18-year-old Tony Mendoza. The Mendoza family left behind its property and considerable holdings, bringing with them only $50 in cash and the jewelry that Tony’s mother was wearing.

After 36 years, Mendoza felt a need to return to the home he had left behind and document firsthand the situation of the people of the island. His new book, *Cuba—Going Back*, does not glamorize but provides direct and honest reportage of life in Cuba.

Mendoza is one of America’s most award-winning Cuban photographers. A professor in Ohio State University’s art department, he has degrees from both Yale and Harvard.

**California-Santa Barbara Professor Studies Isla Vista**

A study of the quality of life of Latino immigrants in the Isla Vista community neighboring the University of California-Santa Barbara (UCSB) reports that sub-par housing, education, and improving English language skills are among the most pressing concerns of such residents.

The report by UCSB sociology professor Denise Segura also identified job development, employment of bilingual police officers, and youth recreational opportunities as areas in need of improvement.

Parents and teachers should set high expectations for achievement for Latino kids, said Segura. She suggested better communication between the schools and the parents. The nearby community needs to “become familiar with educational programs and employment opportunities at UCSB,” she said.
Scholars Share Insights on Rodó at Texas-Austin

Distinguished scholars from Uruguay, Mexico, Spain, and the United States shared insights on *Ariel*, an essay by Uruguayan writer José Enrique Rodó, and the phenomenon of arielismo, during a conference at the University of Texas-Austin.

Framed as the farewell speech of a distinguished older professor counseling the future leaders of Latin America, the essay, written in 1900, achieved instant success and was widely read throughout Latin America and, to some degree, in Spain.

Rodó denounced the excessive admiration of previous generations of Latin Americans for the U.S., claiming that as heirs of the Greco-Roman past, Latin Americans already possessed qualities visible in their art and literature that made them spiritually superior to the commercial and materialist Anglo-Saxons.

Long Island-Brooklyn Hosts Caribbean Authors

The Long Island University-Brooklyn (N.Y.) English Department’s “Voices of the Rainbow” poetry and fiction reading series featured three authors of Caribbean heritage.

Dominican-born author Junot Díaz is the author of *Drown*, a well-received collection of short stories drawn from his experiences growing up in a poor Latino community, and the 1997 novel *Negocios*.

Puerto Rican writer Evangeline Blanco has published short stories and poetry in literary journals. Her acclaimed first novel *Caribe* won the 21st annual literature prize at the University of California-Irvine.

Jamaican-born writer Colin Channer explores the tragedies and triumphs of an African American man in his debut novel *Waiting in Vain*.

Conference for TRIO Families Held at Mercer

Students and parents from TRIO programs received help in planning for college at a conference at Mercer County Community College (MCCC) in New Jersey. Celebrating and honoring 30 years of student services and opportunity, the event was sponsored by MCCC, Rider University, and the College of New Jersey.

TRIO programs offered at MCCC, such as Talent Search, Upward Bound, and Educational Opportunity Centers, help students prepare for and choose a college. They provide tutoring, personal counseling, career counseling, workplace and college visits, special instruction in reading, writing, math, and study skills, and finding financial aid.

More than 1,200 colleges, universities, and community agencies host approximately 2,000 TRIO programs serving 780,000 young people and adults. Sixteen percent of TRIO students are Hispanic.

NEH Initiative to Provide More Cultural Programs

The National Endowment for the Humanities (NEH) has launched a new initiative, Extending the Reach, designed to increase the quantity and quality of cultural programs in underserved regions of the United States and at underserved institutions of higher education.

The targeted regions are 14 states and Puerto Rico. The targeted institutions of higher education are historically Black, Hispanic-serving, and tribal colleges and universities.

Program descriptions, application guidelines, and contact information are now posted on NEH’s Web site, http://www.neh.gov/grants/extension.html. NEH contacts for the new initiative are Karen Mittelman, (202) 606-8631, for state-territory inquiries; and Fred Winter, (202) 606-8287, for inquiries regarding historically Black, Hispanic-serving, and tribal colleges.

CSU-LA Hall of Fame Inducts Gonzalez

California State University-Los Angeles inducted men’s soccer player Jesus Gonzalez, pictured here with Athletic Director Carol Dunn, into its Athletics Hall of Fame.

Gonzalez was a four-year letter winner in men’s soccer with the Golden Eagles from 1991 to 1994. In 1992, he was named CCAA Player of the Year. Gonzalez earned two Golden Eagle Most Valuable Player awards during his tenure, is still listed in many career goals and points, and is second best in season goals and points. Gonzalez is the university’s all-time leader with five hat tricks (scoring three goals in one game).

Communications Scholarships & San Antonio Women

The San Antonio, Texas, Chapter of the Association of Women in Communications offered four college scholarships to women planning careers in communications.

Two Ayjex Castro Scholarships for Rising Women were available to female undergraduates accepted at or enrolled in Bexar County university, college, or community college. Two Southwestern Foundation Michelle Lima Professorship Awards for female U.S. citizens who are Bexar County residents, have graduated from a San Antonio area high school, and are working toward a degree in journalism or communications college or university.

Winners are to receive their awards a annual Women in Communications Headliners Proliner Awards Program.

Lojola-New Orleans Holds Fr. Carter Lecture Series

In Louisiana, Loyola University-New Orleans 5th annual Fr. Carter Lecture Series feature Edward James Olmos, award-winning producer, director, and community activist.

Olmos’ lecture, “Celebrating Culture: focused on issues of multiculturalism and diversity. He spoke of his own experience as an artist and activist in the Latino community.

The lecture series honors Loyola’s long-tenured president, the Rev. James C. Ca who served 20 years. The series seeks to attract native their own promomen of national prominence w humanity and character have enabled the promote social justice in their lives and work.

UT-San Antonio Students Awarded MAES Scholarships

Three students from the University of Texas-San Antonio (UTSA) College of Engineering were awarded scholarships by the National Society of Mexican American Engineers (MAES).

Junior mechanical engineering major Ricardo Ramirez, junior mathematics major Yesenia Rodriguez, and Jacqueline Roche, graduate student in biotechnology, recei
the scholarships during MAES’ 25th Annual International Symposium, held in California.

Founded 25 years ago, MAES works through its 50 student and 30 professional chapters to increase the numbers of Mexican Americans and other Hispanics working in the sciences and other technical professions.

HO ranks at least three of UTSA’s undergraduate programs in the sciences among the nation’s top 20 in numbers of degrees earned by Hispanic students.

Villazon and Salgado Design Florida International University Icon

Florida International University president Modesto A. Maidique sent out a challenge to architecture students: Design an icon, a welcoming structure to sit on the edge of University Park. What came back pleased Maidique and the panel of renowned architects he assembled to review the projects.

Students had only one week to conceptualize and create their designs. Among the 500 entries submitted, nearly 200 of which were judged, one stood out as simple, elegant, durable, and, most importantly, kinetic. The design by seniors Roberto Villazon (l.), 23, and Jorge Salgado (r.), 22, consisted of three fragmented ellipses that contain full-grown palm trees. These panels sit in reflecting pools and can be illuminated with different colors.

CSU-LA’s Gutierrez Wins “Giants in Science” Award

California State University-Los Angeles chemistry professor Carlos G. Gutierrez won The Quality Education for Minorities in Mathematics, Science, and Engineering (QEM/MSE) Network’s “Year 2000 MSE Giants in Science Award.”

Gutierrez is director of the university’s National Institutes of Health (NIH) Minority Access to Research Careers and Minority Biomedical Research Support programs. In his 20-plus years at Cal State-L.A., he has had a significant impact on minority education, mentoring more than 180 students through NIH-funded programs or as a faculty participant in other projects such as the National Science Foundation-sponsored Research Improvement in Minority Institutions and Research Experiences for Undergraduate programs.

Texas-Austin Honored for Minority Doctoral Graduates

The Quality Education for Minorities (QEM) Network honored the University of Texas-Austin for the institution’s important contribution to the number of doctoral degrees in the fields of mathematics, the physical sciences, and engineering earned by African Americans, Alaska Natives, American Indians, and Hispanics.

Pedro Reyes, associate dean of graduate studies and professor of educational administration, accepted for the university during a ceremony attended by representatives of 25 award-winning institutions.

The QEM Network issued its findings in a report, “Top Producers of Minority Doctoral Degree Recipients in Mathematics, Computer Science, the Physical Sciences, and Engineering.”

Perez Promoted at Texas-San Antonio

Eyra Perez was promoted to associate director of the University of Texas-San Antonio (UTSA) Alliance for Education, which provides leadership in reform of the city’s public schools.

Perez had been projects manager for the Alliance since 1997. Earlier she was associate director of the UTSA PreFreshman Engineering Program.

She was recognized as one of the “40 Under 40 Rising Stars” for 1998 by the San Antonio Business Journal and was selected for Who’s Who in American Teachers in 1996, 1997, and 1998.

Perez has a bachelor’s degree from Our Lady of the Lake University and a master’s from UTSA.

Colón Serves as Postal Service Hispanic Program Specialist

Guillermina C. Colón, a native of Santiago, Dominican Republic, is helping Hispanic Americans and Dominicans enhance their visibility and organizational status in the United States Postal Service.

As the Hispanic Program Specialist for the United States Postal Service, N.Y. Metro Area. Colón helps Hispanic Postal Service employees who want to enter management. She develops and maintains contacts with Hispanic educational, civic, community, and service organizations to promote awareness of Postal Service employment opportunities and informs Hispanic businesses and vendors of contractor opportunities and procedures.

Colón is pursuing a degree in industrial psychology.

Houston Community College Newsmakers

In Texas, Houston Community College (HCC) Chancellor Ruth Burgos-Sasscer was named one of the outstanding college leaders of the 20th century by Black Issues in Higher Education. The magazine cited Burgos-Sasscer as a “change agent” who has provided lasting, innovative leadership in the last century. According to the publication, “Institutions that have made the most progress in terms of access, matriculation, and diversity in the 20th century owe much of their success to the leadership of bold chief executives who were unafraid to take risks and unyielding in their commitment to educational equity.”

Stephen J. Gonzalez, 52, longtime Houston-area advertising and communications execu-
tive, is the new executive director of marketing and public information for the HCC System. He graduated from Louisiana State University in 1969.

Miami-Dade Hosts Latino Arts and Culture Conference

Miami-Dade Community College (Fla.) will host the National Association of Latino Arts and Culture’s (NALAC’s) Year 2000 International Conference in September.

The conference will “offer learning opportunities for students and networking opportunities for emerging grass-roots organizations.” More than 600 attendees are expected. The theme of the event is “One People, Many Cultures/Un Pueblo, Muchas Culturas.”

NALAC is a nonprofit organization dedicated to helping and advocating on behalf of community-based Latino arts and cultural organizations. Founded 10 years ago, today NALAC serves more than 300 arts groups from predominantly Cuban, Mexican American, Puerto Rican, Dominican, Central, and South American communities throughout the U.S.

Cross-Border Growth Discussed at Jefferson Law School Conference

The conference “Cross-Border Urban Integration in the 21st Century: The San Diego-Tijuana Model” brought together experts from the U.S. and Mexico to examine the impact of cross-border growth and development. The event, organized by the Center for Global Legal Studies at Thomas Jefferson School of Law (Calif.), combined faculty research, coursework, and speaker programs to examine the legal implications of the globalization of the world economy and the gradual erosion of national sovereignty in areas as diverse as business, the environment, criminal justice, and human rights.

Law school Dean Kenneth J. Vandevelde said it is difficult to overstate the significance of San Diego’s border relationship with Mexico: “The many jobs created by San Diego’s booming export industry is a major reason that unemployment in San Diego is currently the lowest that it has been in 40 years.”

National Council of La Raza Hosts Capital Awards

The National Council of La Raza (NCLR), the nation’s largest constituency-based Hispanic organization, honored two members of Congress and a civil servant for their support of the Hispanic community at its 11th annual Capital Awards: Sen. Charles Schumer (D-N.Y.), Rep. Lincoln Diaz-Balart (R-Fla.), and the Hon. John Sampier were recognized for their work on issues affecting the Latino community.

“While Lincoln Diaz-Balart is well known for his advocacy on behalf of the Cuban community, fewer know that he has been a staunch advocate for Central American and other refugees. Diaz-Balart is not afraid to stand up against some in his party for the good of the community,” said Raul Yzaguirre, NCLR president.

The choir group Coral Cantigas and Latin jazz band Tolú performed at the event.

National University Rates High on Report

The California Commission on Teacher Credentialing released a report that says National University prepares and recommends more individuals for single subject, multiple subject, and special education teaching credentials than does any other single California institution of higher education.

National University believes that unprecedented growth in student numbers coupled with decreasing requirements for class size translates to a very desirable job market for the education professional. Educators need to pursue ongoing professional development in order to keep pace with changing technology and the social and cultural environments in which they teach.

Gaviria Receives University of New Mexico Medal

César Gaviria, secretary general of the Organization of American States (OAS) and former president of Colombia, received the University of New Mexico Medal in February.

Gaviria opened democratic channels for reform, including the draft and passage of a new constitution, strengthening human rights and judicial reform, and a peace agreement with four major rebel groups. His administration challenged narcotics trafficking and successfully disman-
Multiculturalism—is it the face of 21st-century America or merely a passing fad? Contributors to this volume address its pros and cons and explore its relationship with liberal democracy. Offering viewpoints from the perspectives of political theory, history, philosophy, and fiction, they help to explain what the multicultural controversy is about and clarify the concerns it should raise for thoughtful citizens.

**How Did You Get to Be Mexican?: A White/Brown Man's Search for Identity**

by Kevin R. Johnson

This account of racial identity takes a close look at the question "Who is a Latino?" and determines where persons of mixed Latino-Anglo heritage fit into the racial dynamics of the United States. Kevin Johnson uses his experiences as a mixed Latino-Anglo to examine issues of diversity, assimilation, race relations, and affirmative action in contemporary America. (Note: See the June 18, 1999, issue of HO for a review of this book by Sylvia R. Lazos Vargas.)

**Texturas**

(Spanish)

by Gastón Alvaro Santana

Myth and legend get together towards rarelty metrics and philhatic versification in this daring collection of poems of vibrant voice. Dr. Gastón Alvaro Santana is a professor, writer, and counselor in education in Florida.

**The Secret of Borges: A Psychoanalytic Inquiry into His Work**

by Julio Woscoboinik

This book captures both Argentinean author Jorge Luis Borges's original creative talent and the psychological processes involved in all literary creation. Julio Woscoboinik shows Borges utilizing childhood memories, erudition, nocturnal dreams; he shows us how he transwaves his quasi-hallucinatory fantasies and phobias into literary matter that receives a definitive aesthetic form from another labor, labor of style. Translated by Dora Carlisky Pezzi.

**Subtractive Schooling: U.S.-Mexican Youth and the Politics of Caring**

by Angela Valenzuela

The author argues that schools subtract resources from youth in two major ways: by dismissing their definition of education, and through assimilationist policies and practices that minimize their culture and language.

**The Pond (La Charca)**

by Manuel Zenó-Gandía

Before the turn of the century, while the rich in Madrid, Paris, and Rome copped their sumptuous dinners with sips of Puerto Rico's exquisite black café, the anemic men, women, and children who harvested the precious crop lived in squalid huts and rarely saw a scrap of meat. Brutalized by grinding poverty, theirs was the harsh world of La Charca, published in 1894, and widely acknowledged as the first major novel to emerge from Puerto Rico. Translated by Al Wagenheim.

**Mentor: Guiding the Journey of Adult Learners**

by Laurent A. Taloz

Revised and updated from the award-winning classic, Effective Teaching and Mentoring, this second edition is a practical, engaging exploration of mentoring and its power to transform learning. Filled with vignettes, it shows how anyone who teaches can become a successful mentor to students.

**Managing Technological Change: Strategies for College and University Leaders**

by A.W. (Tony) Bates

Implementing new technology at a college or university requires more than simply buying new computer and establishing a Web site. The successful use of technology for teaching and learning also demands major changes in teaching and organizational culture. This book provides practical, systematic strategies for creating the new, technologically competitive academic organization.

**Spaniards, Planters, and Slaves: The Spanish Regulation of Slavery in Louisiana, 1763-1803**

by Gilbert C. Din

Gilbert Din takes a provocative look at the institution of slavery and its function as a part
of Louisiana culture during the years of Spanish rule. He challenges the idea that conditions under the Spaniards differed little from the years of French rule and examines how local culture merged with colonial government and residual laws to create a slave system unlike any other in the Deep South.

José, Can You See?: Latinos On and Off Broadway
by Alberto Sandoval-Sánchez

This book offers a fresh perspective on how Latinos/as represent themselves in their own, relatively unknown, theatrical productions. Suggesting that Latino plays pose a response to popular culture's stereotypes, the author discusses the ways in which Latino theater both confronts the dangers of assimilation and validates Latino relations, cultures, and identities.

Educating a New Majority: Transforming America’s Educational System for Diversity
by Laura I. Rendon, Richard O. Hope, and Associates

Providing a comprehensive assessment of how well our educational system—from kindergarten through college—serves disadvantaged minority students, this book offers a wealth of ideas for strengthening the entire educational pipeline.

Learning and Development: Making Connections to Enhance Teaching
by Sharon L. Silverman and Martha E. Casazza

This publication is designed to help faculty, student affairs professionals, and other educators understand how students learn, and what they can do to foster student achievement.

Creating Learning Communities: A Practical Guide to Winning Support, Organizing for Change, and Implementing Programs
by Nancy S. Shapiro and Jodi H. Levine

Learning communities—a curricular instructional innovation that integrates different facets of the undergraduate experience to enhance and enrich learning—have become the most promising new strategy for promoting student success and satisfaction in college. This guide shows how to staff, manage, and integrate this rewarding new program area into different campuses.

September 22-23, Mexico City  
September 25-26, Monterey  
Kiva Expeditions, Inc., is committed to building partnerships through key introductions among international exhibitors, Mexican schools representatives, and local business leaders. This year’s tour, "Building Partnerships in Mexico," will focus on student recruitment through public fairs and school visits.  
Contact: Annette Wright, (303) 330-3063, e-mail, kviaexpo@mindspring.com.
Book Review

By Eduardo Mendieta

Every group, as every individual, is unique. Each one emerged differently. Each went on to suffer a different fate. Such intrinsic differences are compounded when we factor in history. Thus, Puerto Ricans and Cubans, although Caribbeans, represent if not at least very divergent experiences in the making of the 21st-century United States.

While both have been in contact and in conflict with the U.S. over the last 100 years, they have undergone processes of incorporation and marginalization at opposite sides of the spectrum. One was racialized cheap labor, the other, an alibi and warrant for U.S. anti-Communism and ideological war on all forms of socialism in the Americas. One group lags, while the other thrives. When looking at Hispanics, we cannot overlook this differential and the differentiated modes of incorporation and assimilation, as well as dispossession and exclusion.

These differences are augmented further when we try to compare the Hispanic experience with the Asian American experience, the latter group perhaps the most like Hispanics within the horizon of U.S. immigrant history. As immigrants, we possess a sort of "double vision," to use DuBois's felicitous phrase. We know how to see differences internally—but also across immigrant groups and ethnic groups in general. We know how to look inward and see differences, and how to look outward and across and see difference. Our gaze sees through differences to particularity and differential markings, but also through demagoguery and posturing to specific moments in history.

While Lisa Lowe's book is not the point of entry for a cross-immigrant group and inter-ethnic minority comparative incursion, it is certainly one of the most sophisticated reflections I have read on the immigrant condition and "minority" status in the United States.

Scholars and academics teaching and researching issues pertaining to immigrants' relationship to the cultural imaginary of the U.S., as well as their relation to its political development, will find Lowe's text challenging and provocative. It is challenging because it deploys a theoretical apparatus that, although difficult at first, reaps its rewards in acute and insightful afterwords. It is provocative because it articulates criticism of certain verities of "identity politics" in an extremely convincing fashion.

The most interesting aspect of the work, however, is less what it dreams up than what it tears down. Thus, one of the most poignant parts of the book is the first chapter, which deals with immigration, racialization, and citizenship. This chapter challenges Asian Americans—and, by implication, Hispanics—to disabuse themselves of the notion that their narrative of assimilation and incorporation can and should only be told as a narrative of the attainment of citizenship, i.e., political incorporation. Lowe's point is very perceptive. Asian Americans were racialized in such fundamental ways and ways inimical to any possible project of political incorporation that their belated possibility of becoming citizens of the U.S. policy can be neither as a narrative of triumph nor of assimilation. Lowe's point is that such a narrative has yet to be told. To this extent, like Hispanics, Asian Americans have yet to develop a credible and readable narrative that tells their stories without being blithely and speciously assimilated. Political assimilation, metonymically represented in the act of naturalization, signals a betrayal of the very identity of the Asian American.

As Lowe writes: "...a political system constituted by the historical exclusion and labor of racialized groups, the promise of inclusion through citizenship and rights cannot resolve the material inequalities of racialized exploitation. Only a cultural politics of contestation and sedition, of talking back and disavowing imputed identities, can possibly measure up to the incredible task of "resolving" or cauterizing the wounds of history. And this is why in this putatively post-structuralist Marxist text, we find five chapters sandwiched between two that expressly deal with "Marxist" themes, i.e., labor, rights, immigration, gendering of labor.

The five chapters that constitute the core of this work concern the politics of culture. They broach issues concerning multiculturalism and its manipulation by a culture that would like to neutralize all dissent by way of carnivalization and trivialization. They also concern the relationship between history and literature, and the importance of nonrealist, nonrepresentational writing in the project of the dismantling of narratives that alledge to grant us "history" as it was, and narratives of a "subject" as it became mature. These chapters are exemplary displays of critical, cultural analysis, to be emulated and to be mined for their dexterity with multilayered texts.

Benjamin Barber captured eloquently what Lowe has actually accomplished when he wrote, "A canon is no use if it is not ours, and it becomes ours only when we reinvent it—an act impossible without active examination, criticism, and subversion. That is why teachers cannot teach the canon properly without provisionally subverting it." This is true of Lowe's work because in it she relentlessly refuses to let simplistic and shallow identities be hoisted upon Asian American cultural agency. Yet, she also refuses to let the main-stream canon off the hook. Canon construction mediates culture, and it is mediated by culture. But culture is the site where the present articulates the past in order to fashion a tomorrow. This is why Lowe privileges culture over politics. And this is where caution is warranted—politics itself is a site of culture. There is a politics of culture, but also a culture of politics: citizenship is precisely the locus of their encounter.

We cannot surrender citizenship and citizenry to a racist and racializing imaginary (a society's image of what it is and can become), for whatever citizenship is granted is already the attainment not just of white women but also of generations of "suspect" agents who have struggled to transform the terms under which one is thought to be a credible political subject. Immigrant acts must be complemented by citizenship acts.

Eduardo Mendieta is professor of philosophy at the University of San Francisco, and associate director of the Center for Latino Studies in the Americas (CELAS).
UNIVERSITY OF HOUSTON

The University: The University of Houston, located on 567 acres near downtown Houston, is a comprehensive public urban teaching and research university with 14 colleges and a student population of more than 32,000. The University of Houston has a culturally diverse student body of which more than 4% are minority students (African-American, Asian, Hispanic, and Native American) and 7% are international students representing 100 countries.

ACTIVITIES ADVISOR (000580)

Responsibilities: Provides advising and guidance to one or two of the following units advised by the Department of Campus Activities: Activities Funding Board, Council of Ethnic Organizations, Frontier Fiesta Association, Houston Campus Panhellenic Association, Interfraternity Council, Metropolitan Volunteer Program, National Pan-Hellenic Council, Organizations' Board, Student Program Board, and Students' Association. Advisement includes working with these groups regarding the development, planning, implementation and evaluation of programs, including: budget development, recruitment, goal setting and marketing. Facilitates leadership development retreats for these groups. Negotiates the preparation of contracts for campus-wide programs. Assists with the coordination of departmental leadership development activities for student organizations. Provides support for registered student organizations.

Requirements: Bachelor's degree required or equivalent experience with a strong preference for applicants with a Master's degree in student development, counseling, or related discipline. Prefer student-centered philosophy, ability to work with a diverse student population, and at least six months of directly job-related experience. Applicants with experience advising program boards, student television stations and planning large events are encouraged to apply.

Preliminary interviews to be held at ACPA conference. To ensure full consideration for the position, a UH application, resume, and names, addresses, and telephone numbers of three professional references should be received by April 14, 2000. Submit application materials to:

Human Resources Department
University of Houston
Houston, Texas 77204-5883

UH application for employment are available at www.uh.edu/admin/hr.

The University of Houston is an equal opportunity, affirmative action employer. Women, minorities, veterans, and persons with disabilities are encouraged to apply. This is a security-sensitive position. A criminal history record investigation will be conducted.

Location: Located 110 miles north of Los Angeles in the southern San Joaquin Valley, Bakersfield offers all the amenities of modern city life without the disadvantages. New housing is the best in the state for value and availability. Excellent lifestyle for families. Close to freeway driving convenient airport. The School of Education at CSUB is a Hispanic Serving Institution, WASC, NCATE and CCAE accredited. We seek to create an inclusive, progressive, and democratic teaching and learning environment. Faculty with a sincere commitment to public education and improving educational opportunities for diverse learners are invited to apply for tenure-track positions. Summer employment available.

QUALIFICATIONS: All positions require a doctoral or ABD status appropriate to the position; substantial K-12 teaching experience with diverse learners; well-articulated research and publications agenda; evidence of service to and collaboration with public schools colleagues. Preferred: A strong knowledge base in multicultural education and/or second language acquisition and experience with technology-mediated instruction.

POSITIONS

ELEMENTARY GENERALIST (ASSISTANT/ASSOCIATE)

Two positions. Teach credential courses in elementary program and supervise student teachers. Elementary teaching experience required; university teaching experience preferred.

SECONDARY GENERALIST (ASSISTANT/ASSOCIATE)

Teach credential courses in secondary program and supervise student teachers. Have expertise in a secondary discipline, i.e., Science, English, and Secondary teaching experience. Desirable to have grant writing, assessment, distance learning experience.

SECONDARY COORDINATOR OF FIELD EXPERIENCES (RANK OPEN)

Teach credential courses in field-based secondary program. Technology skills essential. Need a single subject specialty. Desirable: distance learning, willingness to travel.

SPECIAL EDUCATION MILD/MODERATE/SEVERE (ASSISTANT/ASSOCIATE)

Teach courses in mild/moderate/severe disabilities, with special focus on clinic; training of students in special education assessment, and academic and as well as behavioral interventions. Knowledge and clinical experience implementing effective and innovative transition curriculum innovations. Supervise field-based practice mentors MA level candidate's research. Teach occasionally at regional campus. University level teaching and supervision experience; minimum of two years of public school or community agency teaching and/or clinical experience serving students with mild to moderate disabilities, preferably in cross-cultural settings.

SALARY: Commensurate with education and experience. Excellent benefits.

APPLICATION: Positions open until filled. Send letter of application, vita, placement file, transcripts of undergraduate/graduate courses, and three letters of recommendation to:

Dr. Sheryl L. Santos, Dean,
School of Education
California State University, Bakersfield,
9001 Stockdale Highway
Bakersfield, CA 93311-1099

CSUB offers a faculty and student diversity and a multicultural environment. Applications from women, minority men, women, and individuals with disabilities are welcome.
Position Openings

A comprehensive two-year college dedicated to students, community and staff success is presently seeking individuals for the positions listed below. The College is located in the city of Ann Arbor, MI, a community of over 100,000.

Student Development and Activities Director:
Master's degree preferably in student affairs, higher education administration, counseling, recreation or related fields, two years experience in human development programs/activities with increasing levels of responsibility. Initial salary range is $44,000-$48,400.

Director of Admissions: Master's degree in relevant area, three years experience including a minimum of one year supervisory experience; some student services experience required. Initial salary range is $22,000-$27,200.

Manager of Media Services: Bachelor's degree that includes coursework in a related discipline, three to five years supervisory experience, three years experience working with media production or learning technologies services and systems. Competitive salary. Application deadline is May 12, 2000.

CIS/CPS Instructor/Computer Programming Specialty:
Bachelor's degree in Computer Information Systems, Management Information Systems, Computer Science or related field, teaching experience is required, two years preferred, three years industry experience with emphasis on programming. Initial annual range for 1999-2000 is $40,160-$55,670 (faculty salaries for 2000-2001 TBD).

Internet Professional Instructor (Technical):
Bachelor's degree in technology-related field, or equivalent work experience and/or education and training, two years internet work experience including at least one year developing websites on both PC and Macintosh platforms. Applicants with strong skills in blending advanced design and technical concepts are encouraged to apply. Initial annual range for 1999-2000 is $40,160 - $45,980 (faculty salaries for 2000-2001 TBD).

Networking and Electricity/Electronics Instructor:

PCC's: Affirmative Action/EQUAL OPPORTUNITY EMPLOYER AND HIRING. SERVING INNOVATORS.
INSTRUCTIONAL TECHNOLOGY

THE RICHARD STOCKTON COLLEGE OF NEW JERSEY

is an innovative, residential, liberal arts and sciences college with a student body of 6,000 and a recognized record of academic excellence. Stockton is one of nine senior public colleges which provide a vast array of baccalaureate and master level degrees. The College is located on a 1,000-acre campus in southern New Jersey, 15 miles from the Atlantic Ocean, 1 hour from Philadelphia, and 2 1/2 hours from New York City. The College has a mission to meet the needs of master's-level graduate education in southern New Jersey and currently provides programs in physical therapy, nursing, business studies, and instructional technology. Stockton is home to the Atlantic County Educational Technology Training Center. Plans call for the establishment of additional programs in the near future.

The Master of Arts in Instructional Technology (MAIT) program is designed for those interested in integrating technology to improve learning in both educational and corporate settings using electronic classrooms, computer labs and multimedia production facilities. The program has basic core courses in learning theories and instructional technologies followed by two tracks—one for optimizing technologies in primary and secondary schools, and the other for corporate environments with employee training needs. The Academic Computing facilities contain 26 computer laboratories and electronic classrooms with an ongoing technology improvement plan and a 10:1 student/computer ratio.

INSTRUCTIONAL TECHNOLOGY: tenure track, Assistant Professor, September 2000. Stockton seeks a full-time faculty member for the graduate program in Instructional Technology, in its third year. Candidates must have a doctorate in instructional technology or related field with significant experience in design and training in corporate or non-profit environment emphasizing instructional design and the use of technology as well as experience in on-line training. Demonstrated ability to seek support from and work with local businesses, and an understanding of corporate training are highly desired. Possible courses are Instructional Design, Project Management, Adult Learning, and Performance Technologies. Teaching load is six courses per year. Responsibilities will involve providing program development including the demonstrated ability to integrate corporate technology into the graduate instructional curricula, to communicate effectively and to achieve strong interpersonal working relationships with students, administrators, faculty, and computer services.

Salary will depend on qualifications, experience and increases in the appropriately established compensation plan.

Screening will continue until the position is filled. Send letter of application, resume, and three letters of recommendation to Dr. Mary Beth Kropp, Dean of Academic Affairs. Applications will be considered until the position is filled. The Richard Stockton College of New Jersey, Office of Academic Affairs, AAS11, The Richard Stockton College of New Jersey, PO Box 195, Pomona, Nj 08240-0195. For information on the program, see http://www.stockton.edu/mait/. Stockton is an AA/EOE. Women and minorities are encouraged to apply.

Provost/Executive Vice President for Academic Affairs and Vice President for Economic Development

Stony Brook—now recognized as a major research university—consists of a College of Arts and Sciences; a College of Engineering and Applied Sciences; a Marine Sciences Research Center; the W. Averell Harriman School of Management and Policy; the School of Professional Development; Graduate School; a comprehensive Health Sciences Center, which includes the Schools of Medicine, Dental Medicine, Health Technology and Management, Nursing, and Social Welfare; and a 350-bed University Hospital and a 350-bed Long Island State Veterans Home. With 70 academic departments, Stony Brook enrolled 19,128 full- and part-time students in the Fall 1999 semester (12,692 undergraduates and 6,436 graduate and professional students). There are approximately 1,750 full- and part-time faculty and about 11,700 University employees.

Provost/Executive Vice President for Academic Affairs

The Provost and Executive Vice President for Academic Affairs, reporting directly to the President, is the chief academic officer of the University. The Provost is responsible for academic planning, budgeting and administration, educational policy, program development, and instructional quality, as well as professional development opportunities for faculty and academic administrators. The Provost serves as a non-voting member of the Stony Brook Foundation Board of Trustees and a member of the President's Cabinet.

Vice President for Economic Development

The Vice President, reporting directly to the President, will provide linkages that further Stony Brook’s mission to enhance its participation in the economic development of Long Island and New York State. This position will increase opportunities for faculty interaction with businesses on research and product development, which is central to the development of new technologies and the revitalization of the local economy. This effort will result in the creation of jobs, increased profits for industry, and increased tax revenues for State and local governments. Enhancing the University’s link with the business community will promote both the economic development goals of the region and the academic goals of the University, and will assist the University in its commitment to educate and train the professional workforce of the 21st century. The Vice President for Economic Development will be the officer in charge of activities connected to economic development in the State of New York.

The University of Stony Brook is an equal opportunity/affirmative action employer and welcomes nominations of and applications from women and members of underrepresented groups.

STONY BROOK

STATE UNIVERSITY OF NEW YORK

Sarah Lawrence College seeks an established filmmaker/teacher to lead our filmmaking program. Opportunity to design both the filmmaking curriculum and facilities in the planned visual arts building. Tenure track position. Contract terms negotiable, depending upon the interests and needs of the coordinator. The Sarah Lawrence College approach to education is described in our Web site, www.slc.edu. Review of applications will begin on April 1, 2000 and will continue until the position is filled. Candidates should send a current CV and 3 letters of recommendation to Barbara Hickey, Coordinator of Faculty Support, Sarah Lawrence College, Bronxville, NY 10708. Sarah Lawrence College has a strong commitment to the principle of diversity. In that spirit, we especially welcome

Sarah Lawrence College

The University of South Florida is an equal opportunity/affirmative action employer. For more information about the University’s positions, please visit our Web site at http://usfweb.usf.edu/ufpers/reqs contradictory/ or call our Job Line for staff positions at 974-2872.

USF is an equal opportunity/affirmative action institution, committed to excellence through diversity and employment.
Johns Hopkins University

Assistant Dean of Academic Advising

Johns Hopkins University seeks a professional for the position of Assistant Dean of Academic Advising. Johns Hopkins University is a selective research university located in Baltimore, Maryland. The Krieger School of Arts and Sciences and the Whiting School of Engineering serve approximately 3,700 undergraduates on the Homewood campus. The University also offers graduate programs at the Master’s and Doctoral level, as well as medical degrees through the renowned Johns Hopkins Medical School.

The Position: Reporting to the Associate Dean for Academic Affairs, the Assistant Dean will direct, supervise, and find the Department of Academic Advising in counseling and advising students on the academic program and academic requirements, helping them to meet degree requirements and assisting them with applications for graduate admissions. The Department of Academic Advising is responsible for advising undergraduate students regarding pre-professional programs of law and medicine, coordinating the study abroad program, and providing support to students with learning disabilities. Services also include fellowship advising. The Assistant Dean will be responsible for identifying and implementing innovative models and programs based on national needs for the department, defining policies, supporting faculty advisors, and developing and maintaining collaborative working relationships with faculty advisors and the academic departments. The person in this position will utilize technology to effectively provide advising services and information to students, track and analyze academic trends, and partner with other student services offices in meeting the comprehensive needs of Johns Hopkins undergraduates.

Qualifications: The successful candidate will possess a Master’s degree (a Ph.D. is preferred) with proven ability to lead and manage a complex academic advising program. A clear vision for academic advising as an integral part of the academic mission of a competitive, selective institution, a sense of rational needs and models in academic advising, and a high level of comfort with information technology and its application to the advising process are important factors in the selection of the new Assistant Dean. The person in this position will also demonstrate an understanding of a service-oriented environment, possess strong supervisory and leadership skills, and have experience in successfully evaluating and developing academic advising programs.

Application and Nomination: Review of applications will begin on April 7, 2000 and will continue until the position is filled. Nominations of individuals for this position may be made to The Spelman & Johnson Group as indicated below. Applications for this position should include a resume and cover letter and should be sent to:

The Spelman & Johnson Group
Johns Hopkins University-Assistant Dean of Academic Advising (M)
Ellen Heffernan, Managing Vice President
38 Mulberry Street, Box 304, Leeds, MA 01053

Equal Opportunity/Affirmative Action Employer

DUKE UNIVERSITY

DUKE UNIVERSITY COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

Invites applicants for a Clinical Social Worker position. This is a full-time, 12-month position available August 1, 2000. CAPS has an integrated multidisciplinary staff of clinical social workers, psychologists, and psychiatrists who work together to provide 12,000 students a comprehensive range of clinical and developmental services. Duke University is located in Durham, North Carolina. Duties: Provision of individual, couples, and group counseling and psychotherapy services for students who seek assistance at CAPS; special interest and expertise in providing mental health services to Asian or Latin(a) student populations. Qualifications: Demonstrated excellence in clinical skills; MSW from accredited school of social work; eligibility for licensure at the North Carolina Licensed Clinical Social Worker level. Salary is competitive and benefits are excellent. Visit our website at www.CAPS.duke.edu

Application Process: Submit letter outlining relevant experience and interest, curriculum vitae, and three references who may be contacted. Submit to: Dr. Libby Webb, MSW, LCSW, Chair, Search Committee, Counseling and Psychological Services, Box 99595, Duke University, Durham, NC 27708-0955. Deadline is May 1, 2000. Application review will begin immediately.

Women and people of color are encouraged to apply.

Duke University is an equal opportunity employer.

UCSD

DIRECTOR

Academic Enrichment Programs (AEP)

UCSD's Academic Enrichment Programs (AEP) were established to motivate and prepare undergraduate (UG) students for Ph.D./M.D. study through comprehensive enrichment experiences, particularly research mentorships with faculty. AEP serves all undergraduates, but maintains priority focus on underrepresented students, promoting their full participation in scholarship and research. UCSD projects program growth through additional funding acquisition and development of new components. Current Academic Enrichment Programs include: Faculty Mentor Program, Summer Research Program, California Alliance for Minority Participation in the Sciences, Health Professions Program, and McNair Program. AEP also coordinates three major undergraduate research conferences annually.

The Director is responsible for ongoing program development, increasing growth and effectiveness, overall supervision, coordination, planning, monitoring, and outcome(s) reporting. Major responsibilities include research and new/internship grant preparation and acquisition. Requires an earned doctorate in a standard academic field. Additional requirements include demonstrated experience in:

1. Teaching at the college level;
2. Conducting research;
3. Providing effective academic support to UG students, particularly for first generation or ethnically underrepresented students;
4. Identifying and acquiring external funding, including primary authorship of funded proposals;
5. Managing budgets and conducting fiscal planning;
6. Evaluating program design, effectiveness, and outcome(s);
7. Providing collaborative, team-oriented program leadership.

Full job description available upon request at: mfran@ucsd.edu. Salary commensurate with experience and qualifications. To apply, refer to: (1) UCSD Position Announcement, (2) Reference, (3) Name/Contact information of six professional references to: UCSD, Human Resources, 10266 TPC/S Ste 266-A, 9500 Gilman Dr., La Jolla, CA 92030. E-mail: resume@ucsd.edu

Princeton University

DIRECTOR OF STUDIES

Princeton University invites applications and nominations for the position of Director of Studies in one of the five residential colleges, which serve as the center of residential life for all Princeton freshmen and sophomores. The Director of Studies is responsible, under the Office of the Dean of the College, for the organization and oversight of academic advising and the implementation of academic regulations for the approximately 450 freshmen and sophomores who live in each college. The Director of Studies advises individual students on their academic programs and works closely with faculty advisers in monitoring students' course selections and academic progress. He or she is also responsible, under the Office of the Dean of Undergraduate Students, for minor infractions of the rules of conduct and for some personal counseling of the undergraduates who live at the college. The Director of Studies collaborates closely in every regard with the residential college Master, who has overall responsibility for the college.

Applicants should have had experience in teaching and advising, in a college or university and should be familiar with a liberal arts curriculum. They must be sensitive to the needs and concerns of a diverse student population. Excellent written and verbal communication skills and strong managerial skills are essential. Although this is a full-time position, there may be opportunities for some limited teaching in the appropriate academic department. A Director of Studies is expected to hold the Ph.D. degree in a discipline taught at Princeton.

Send curriculum vitae and names of at least three references to: Princeton University, Office of Human Resources, 1160 H-99 Duke Hall, Princeton, NJ 08544-5349.

For full consideration, applications must be received by April 21, 2000. The position will be available on or about July 1, 2000.

University of Massachusetts
Dartmouth

DEAN
COLLEGE OF ARTS & SCIENCES

Nominations and applications are invited for the position of Dean of the College of Arts and Sciences. The University of Massachusetts Dartmouth is located in the Town of Dartmouth, approximately 60 miles south of Boston and 30 miles east of Providence, Rhode Island. It is a comprehensive university, located on a modern campus of 700 acres and serves 5,500 full-time commuter and resident students and 2,000 part-time students. The 300+ full-time, tenured faculty offer baccalaureate and master degrees in five colleges: Arts and Sciences, Business and Industry, Engineering, Nursing and the Visual and Performing Arts. The University of Massachusetts includes campuses in Amherst, Boston, Dartmouth, Lowell and Worcester. Further information is available at the UMass Dartmouth web site at www.umass.edu.

The Dean is the chief academic and administrative officer of the College and reports to the Vice Chancellor for Academic Affairs. The college is composed of thirteen departments: Biology, Chemistry & Biochemistry, Economics, Education, English, Foreign Language and Literature, History, Mathematics, Medical Laboratory Science, Philosophy, Political Science, Psychology and Sociology/Anthropology. In addition, there are specialized centers. Masters degrees are offered in the departments of Biology, Chemistry, English and Psychology and the Master of Arts in Teaching. Additional graduate programs at the masters and doctoral level are being planned. The Dean is expected to promote quality and diversity in the faculty, staff and students of the college. The Dean, in consultation with the department chairpersons, provides leadership and direction in the selection and retention of faculty and staff; the development and implementation of curriculum, research, and scholarly activities of the faculty, and intellectual leadership; and plans, directs and coordinates the administrative, budgetary, and academic activities of the College. The Dean is a member of the Council of Academic Deans and responsibilities include the development of cooperative interactions with other units on campus and surrounding communities.

Candidates must have a Ph.D. or equivalent degree in a discipline of the College from an accredited institution and a distinguished record of scholarly research and teaching appropriate for a faculty appointment within one of the departments of the College; successful experience in progressively responsible levels of university administration; a record of shared governance; and demonstrated commitment and success in furthering the principles of equal opportunity, affirmative action and cultural diversity. The preferred candidate will also have experience with graduate level education, knowledge of external funding opportunities for scholarly and/or creative activities, an understanding of higher education issues, fiscal management procedures, service as a department chairperson and exceptional interpersonal and communication skills.

Applicants should submit a letter of interest, not to exceed two pages summarizing their accomplishments and philosophy relative to the above stated objectives and suitability for the position; a current vita; and three references in support of that letter. Applications should be sent to: Dean, College of Arts & Sciences Search Committee, Office of Human Resources, University of Massachusetts Dartmouth, 285 Old Westport Road, North Dartmouth, MA 02747-2300. The review of applications will begin April 10, 2000 and will continue until the position is filled.

The University of Massachusetts Dartmouth is an Affirmative Action, Equal Opportunity Employer. Applications are encouraged from women, minorities and disabled individuals.

Bentley College invites applications for a tenure-track faculty position in the Information Design Programs at the undergraduate, post-baccalaureate certificate, and graduate levels. Faculty rank: Assistant or Associate Professor: beginning September 2000.

Information Design and Technical Communication Programs
Tenure-track Faculty Search, 2000

The successful applicant will become part of a unique curriculum platform that combines human factors, communication, technology, design, and information architecture. Building on a solid foundation in communication and human factors principles, our technical programs prepare graduates to increase the usability of their user-support, user interfaces, online and web-based information products.

Our technical courses explore the integration of information and technology while promoting the long-term goal of engineering knowledge-based technology products.

We seek an individual with expertise in information architecture, technology, and design for various applications on the web (Internet, intranet, and extranet). The successful applicant should have knowledge of and experience with HTML, DHTML, CSS, and site management software. A proven track record in applying human factors in analysis, production, and management of effective user interfaces, navigation systems, or site architecture is highly desired.

An appropriate terminal degree (Ph.D. preferred) in hand by starting date, publications or evidence of scholarly potential, consulting or industry experience, and a record of excellent college teaching are essential. Salary is commensurate with experience.

Before submitting your application, feel free to explore our programs on the web for more information:

Please send your letter of application and updated resume to Dr. Terry Skelton, Chair of the Personnel Committee, Information Design Programs, Bentley College, Waltham, MA 02452-4705.

For best consideration, apply by 4/30/00. Applications will be considered until the position is filled. Bentley College is an equal opportunity employer building strength through diversity. We welcome applications from underrepresented groups.

Bentley College is an equal opportunity employer building strength through diversity.
Director of Communications

The Director of Communications is responsible for developing and carrying out an overall communications plan for the University that includes internal communications with members of the faculty, staff, students, and external communications through print, broadcast and electronic media. Responsibilities include presenting the University to its many publics; responding to public inquiries; overseeing an office that serves as the University’s principal point of contact with the press; publishing the Princeton Weekly Bulletin (PWB), Princeton’s Parents News and other University publications; providing editorial direction for the University’s home page and other postings on the Web; offering a variety of design and editorial services to other University offices; coordinating with communications staff in the Athletics, Development, Princeton Plasma Physics Laboratory and several academic departments; and overseeing the Orange Key guide service. With other members of the Communications staff, the director identifies and develops story ideas on behalf of the University; initiates contact with and responds to questions from the national, regional and local media; communicates with members of the campus community through the PWB, the home page, and other media; advises and assists other members of the campus community in media relations; and seeks to develop broad public understanding and support of the University and its mission. The Director of Communications reports to the Vice President for Public Affairs.

Candidates should possess strong communications and editorial skills and 10-years of successful experience working with the news media. Position requires creative and effective use of technology, and evidence of effective management and leadership skills, initiative, creativity, resourcefulness and sound judgment, especially under challenging circumstances and deadline pressures. Knowledge of Princeton and/or higher education environment is highly desirable. The position is available beginning May 1. For full consideration, nominations and applications should be sent by April 20, 2000 to Robert K. Durkee, Vice President for Public Affairs, Princeton University, 241 Nassau Hall, Princeton, NJ 08544.

Managing Editor, Office of Communications

The Managing Editor will serve primarily as editor of the University’s newspaper, the Princeton Weekly Bulletin (PWB), by developing and editing news and feature stories intended for distribution via news release, PWB the Web. Individual is responsible for developing news and feature stories describing the work of faculty, students and staff; overseeing production weekly events calendar, job postings and other information of interest to on-campus and surrounding communities; assigning stories and photos to staff and freelancers; writing and editing stories; designing and producing layout; overseeing printing and distribution of 30 issues per year, breed print and online; selecting and preparing timely stories and illustrations for main Princeton Web page and reviewing and recommending revisions to Web pages produced by other University departments; helping with cover events; coordinating communications activities with news and public relations officers of other Princeton offices and institutions; keeping current with campus trends and events by maintaining contacts faculty, administrator and students; supervising a staff writer and the calendar editor; and engaging others in and outside the office in developing and preparing stories.

The position requires 7 years of successful journalistic experience. Candidates must possess strong writing skills and demonstrated editorial and interpersonal effectiveness. High levels of creativity, organizational ability and tact are essential. A bachelor’s degree is necessary, advanced degree is desirable. Candidates must have broad interest in academic and educational issues, and be familiar with word-processing, photo-cashing and page-layout software, as well as with the World Wide Web. For full consideration, please submit resume and writing samples by April 2000 to: Princeton University, Office of Human Resources, 607-914, Princeton, NJ 08544.
NATIONAL SCIENCE FOUNDATION
DIVISION OF EARTH SCIENCES
PROGRAM DIRECTOR FOR GEOPHYSICS
PROGRAM DIRECTOR FOR GEOLOGY AND PALEONTOLOGY

The National Science Foundation's Division of Earth Sciences is seeking qualified candidates for the following positions:

- **Geophysicist (Program Director for the Geophysics Program), AD-1313-4:** to be filled on a 1-year Intergovernmental Personnel Act (IPA) assignment basis. Vacancy announcement number EX00-44 IPA.

- **Geologist (Program Director for the Geology and Paleontology Program), AD-1350-4:** to be filled on a permanent basis. Vacancy announcement number EX00-42A, closing 5/12/00.

Applicants interested in the IPA assignment (Geophysicist position) must be permanent employees of eligible organizations for at least 90 days prior to entering into a mobility assignment agreement with NSF and the individual institution. Salary and appropriate fringe benefits continue through the home institution.

Applicants for the Geophysicist position must have a Ph.D. or equivalent experience in geophysics or a closely related earth sciences field. Applicants for the Geologist position must have a Ph.D. or equivalent experience in geology or a closely related earth sciences field. In addition, both vacancies require at least six years of successful research, research administration, and/or managerial experience beyond the Ph.D. pertinent to the position. A broad general knowledge of earth sciences research, familiarity with the U.S. scientific community and experience in an academic setting are also desirable for both positions.

The Geophysics Program supports laboratory, field, theoretical, and computational studies related to composition, structure, and processes of the earth's interior. Topics include studies in seismology and seismic wave propagation, the nature and occurrence of earthquakes, the earth's magnetic, gravity, and electrical fields, and its internal temperature distribution. Supported research also includes geophysical studies of active deformation, including GPS-based geodesy, and fundamental laboratory studies of properties and behavior of earth materials in support of geophysical observation and theory. The selected candidate will manage the seismology component of the Geophysics Program.

The Geology and Paleontology Program supports studies of surficial and environmental earth system processes. Topics represented in the program include paleontology, paleocology, stratigraphy, geochronology, glacial geology, sedimentology, soil genesis, sedimentary petrology, diagenesis, organic and inorganic geochemistry.

Applicants interested in the permanent Geologist position (vacancy announcement EX00-42A) or Geophysicist position (vacancy announcement EX00-44 IPA) should request a copy of the particular announcement from Ms. Myra Boyd, on (703) 306-1185, extension 3032. Interested applicants should submit a letter of recommendation and curriculum vitae to the National Science Foundation, Division of Human Resources Management, Attn: Ms. Myra Boyd, Room 315, 4201 Wilson Blvd., Arlington, VA 22230.

For technical information on the Geologist position, call Dr. Herman Zimmerman, Division Director, Earth Sciences (703) 306-1550. For technical information on the Geophysicist position, call Dr. Jim Whitcomb, Acting Deputy Division Director, Earth Sciences (703) 306-1550, or Ms. Robin Rechlin, Program Director, Geophysics, (703) 306-1556. Hearing-impaired individuals should call TDD (703) 306-0189.

NSF IS AN EQUAL OPPORTUNITY EMPLOYER COMMITTED TO EMPLOYING A HIGHLY QUALIFIED STAFF THAT REFLECTS THE DIVERSITY OF OUR NATION.

ASSISTANT DIRECTOR, HUMAN RESOURCES

Reporting to the Director of Human Resources, the Assistant Director provides first level supervision to HR staff; promotes efforts to enhance and support workforce diversity; handles grievances and complaints; and oversees recruitment, recognition programs and reclassification processes.

QUALIFICATIONS: Requires a Bachelor's degree, experience in the management of human resources, and experience in handling grievances and complaints. Desirable qualifications include a Master's degree, a generalist background in HR, supervisory experience in HR, experience in labor relations and/or compensation/benefits.

APPLICANTS must submit completed application form, resume, letter of interest, (3) letters of reference, and official degree transcripts by May 1, 2000 for full consideration.

CONTACT Human Resources at 847-543-2065; TDD # 847-223-5615. FAX # 847-223-0824.

Chairperson
FOR THE DEPARTMENT OF HOTEL, RESTAURANT, AND TOURISM MANAGEMENT

Reporting to the Dean of the School of Business and Economics, the successful candidate will be responsible for a growing Hospitality Department with 170 majors. Future plans for the department include a new hospitality center with a restaurant, classrooms, labs, and office facilities. The chair is expected to teach and advise students.

QUALIFICATIONS:
- Earned Doctorate in hospitality management or related discipline with meaningful and significant industry experience
- Excellent communication skills-written and verbal
- Academic excellence in teaching and scholarly activity
- Demonstrated record of leadership in an academic setting and/or industry
- Demonstrated commitment to equal opportunity, cultural diversity, and global education

RESPONSIBILITIES:
- Provide leadership in curriculum design and development and student advising
- Provide leadership and support for faculty development
- Provide leadership for student recruitment and retention within the program, school, and institution
- Work cooperatively with Sodexo-Marriott, College Auxiliary Services, and area businesses on program development and services
- Teaching and advising

Applications from women and minority candidates are especially welcomed. Plattsburgh State University is an affirmative action, equal opportunity employer.

SALARY: Commensurate with credentials and experience. The position will begin no later than September 1, 2000. Review of applications will begin immediately and continue until the position is filled.

APPLICATIONS: Send via the letter of application, including a personal statement of educational philosophy and three (3) reference letters to Office of Human Resources, Search Committee for the Chair of Hotel, Restaurant, and Tourism Management (Ref. P.J. #2407-888), Plattsburgh State University, 101 Broad Street, Plattsburgh, NY 12901-2661, Fax (518) 564-5060.

NOMINATIONS: Please forward by mail your nominations for this position with the nominee's name, address and phone number to: Office of Human Resources, Search Committee for the Chair of Hotel, Restaurant, and Tourism Management (Ref. P.J. #2407-888), Plattsburgh State University, 101 Broad Street, Plattsburgh, NY 12901.
The Institute for Religious and Spiritual Life at Connecticut College Senior Fellow

CONNECTICUT COLLEGE is a private, highly selective, residential College with a strong commitment to the liberal arts tradition. As such, it invites applications and nominations for a new position sharing leadership and helping to develop the Institute for Religious and Spiritual Life. The College seeks a Senior Fellow to work with the College's religious leaders, faculty, students and staff to continue the recent transformation in the College's chaplaincy. The Institute for Religious and Spiritual Life seeks to meet the religious needs of an increasingly diverse College community and to integrate the religious and spiritual life of the community more fully into the educational mission and programs of the College. Several years of experience in an academic environment or the equivalent are a plus. Candidates should demonstrate an ongoing commitment to engaging moral, ethical, spiritual, and religious issues. Leadership skills in the development and planning, community service, and fund-raising are preferred. The interpersonal skills of the Senior Fellow will be critical. A graduate degree in a related field is highly desirable but not required. Anyone with a deep intellectual and personal engagement in religion, spirituality and public life is eligible.

Although many of the specific activities of the position will be shaped by the Senior Fellow, he or she will be responsible for efforts to reach out to students, faculty, staff, and the local community. In addition, the Senior Fellow will be responsible for assisting the work of interfaith groups, counseling and advising students, staff, and faculty, and contributing to the intellectual and spiritual life of the campus in ways that will enhance our efforts to integrate the life of the mind, body, and spirit.

Review of applications is ongoing. Nominations for this position are encouraged. Candidates should submit the following to the Chair of the Search Committee, Human Resources, Connecticut College, 270 Mohegan Avenue, New London, CT 06320; a letter of interest in the position, a resume, three letters of recommendation and a concise vision of what the interactions of the intellectual, religious, and spiritual life should be on a liberal arts campus.

Connecticut College

The College is an Affirmative Action/Equal Opportunity Employer and is engaged in further diversifying its faculty and staff.

Bouvé College of Health Sciences
Department of Cardiopulmonary Sciences

Announcement of Faculty Position
ASSISTANT/ASSOCIATE PROFESSOR OF CARDIOPULMONARY SCIENCES

This position is a nine-month, tenure-track appointment either as an Assistant or Associate Professor of Cardiopulmonary Sciences depending upon qualifications and experience.

The Department of Cardiopulmonary Sciences, one of ten academic departments and units in Bouvé College of Health Sciences, offers undergraduate programs in exercise physiology, and respiratory therapy; and graduate programs in clinical exercise physiology and perfusion technology. The Bouvé College is one of six colleges at Northeastern University, a large urban university located in close proximity to the Longwood Medical area's teaching hospitals and medical schools.

Responsibilities of this position include teaching courses in undergraduate and graduate exercise physiology, cardiopulmonary physiology, and exercise testing. Additional responsibilities include academic advising for undergraduate and graduate students in clinical exercise physiology; supervision of graduate students completing Master's Theses in Clinical Exercise Physiology; and coordination of the undergraduate curriculum in exercise physiology. It is expected the person in this position will engage in research and scholarly activities as well as university and professional service to be considered for tenure.

Qualifications for this position require an earned doctorate in exercise physiology or related area. Experience in cardiopulmonary rehabilitation and college teaching experience, previous track record of acquiring grants and scholarly publications is desirable for the Associate Professor rank. Experience in non-invasive cardiology is desirable. Certifications as an ACSM Exercise Program Director or Exercise Specialist, and ACLS instructor are preferable. Salary: Salary is commensurate with experience and qualifications. Review Process: The review process will begin on April 3, 2000. Starting Date: September 1, 2000.

Application Procedure: Submit letter of application, curriculum vitae, and three references (names, addresses, and phone numbers) to: William J. Gillespie, Ed.D. Chair, Department of Cardiopulmonary Sciences, 100 Dockser Hall, Northeastern University, Boston, MA 02115, E-mail: gillespie@neu.edu. Northeastern University is an equal opportunity-affirmative action employer.

Northern Cal State University, Sacramento

OPEN RECRUITMENT
Beginning Fall 2000 through Spring 2000

To assist California State University, Sacramento (CSUS) in achieving its hiring goals, the University has adopted a philosophy of open recruitment for full-time faculty. Qualified individuals are encouraged to apply for any campus department or program, as areas of appointment have been determined.

California State University, Sacramento, the Capital University in the heart of Northern California, one of the most beautiful and rapidly growing areas in the count. Serving 24,000 students in small classes, the 330-acre campus is located just three miles from the State Capitol. The campus is sheltered by more than 3,000 trees and is situated along the American River Parkway that offers miles of trails and recreational access to the city's two major parks, Folsom Lake and the historic Sacramento River. Growth in the region brings significant opportunities for faculty research, an involvement with civic and business organizations, and University houses more than 30 research and support centers and professional associations at the BA and MA level in over 100 fields of study.

The normal minimum qualifications for full-time appointment include:
1. An appropriate terminal degree from an accredited university.
2. Evidence of success or of strong potential for success at university level teaching.
3. Evidence of success or of strong potential for success at scholar or performing or creative arts.
4. Clear potential for success as a contributor to the university's overall mission as a multicultural and comprehensive university.

For the 2000-01 academic year, appointments will begin August 21, 2000 for the Fall 2000 semester, and January 21, 2001 for the Spring 2001 semester. Appointment dates are August 20, 2001 for the Fall 2001 semester, and January 21, 2002 for the Spring 2002 semester. There is no deadline for applications, but candidates are encouraged to submit resumes as soon as possible in order to receive full consideration. Resumes, inquiries, or nominations should be addressed to:

David L. Wagner, Dean
Faculty and Staff Affairs, Box R
California State University, SACRAMENTO
9100 J Street
Sacramento, California 95819-6032

For additional information about the campus, visit our website at http://www.csus.edu/

California State University, Sacramento is an Affirmative Action/Equal Opportunity employer, and has a strong institutional commitment to the principles of diversity in a broad context. In that spirit, we are particularly interested in receiving applications from a broad spectrum of qualified people who will assist the University in meeting its Strategic Plan goals for pluralism. To develop a campus community whose diverse enrichment of the lives of all and whose members develop a shared sense of personal and community identity as well as mutual respect, CSUS hires only those individuals who are authorized to accept employment in the United States.

In compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, California State University, Sacramento has made certain statistics available on-line at www.csus.edu/police/SKTKPT.html. Print copies available in the Library, and by request from the Office of Public Safety and the Office of the Vice President for Student Affairs.

FOUNDOING DIRECTOR, CENTER FOR ACADEMIC EXCELLENCE

Central Michigan University in a comprehensive state university with over 800 faculty serving an on-campus enrollment of approximately 18,000 students. The university's eight colleges offer more than 150 major areas of study at the undergraduate and graduate levels. The main campus is situated on an 854-acre site in Mount Pleasant, a city of 25,000 residents located in the heart of the lower peninsula of Michigan. The institution is nationally recognized for offering one of the most extended extended learning programs in North America. The off-campus programs serve an additional 12,000 students at 70 sites and utilize an additional 1,200 adjunct faculty.

GENERAL DESCRIPTION: The recently conceived innovative Center for Academic Excellence is to be housed in a new $10.0 million high technology library. It will serve an integral role in helping the university to realize its vision as a preeminent comprehensive institution recognized for its high standards and commitment to the teacher-scholar model model with a primary focus on learning outcomes. This modern Center will serve as a catalyst for enhancing academic excellence by providing expertise and support to faculty in scholarship and teaching.

DUTIES/RESPONSIBILITIES: The Director of CMU's Center for Academic Excellence will report to the Vice Provost for Academic Affairs and chair a standing committee of the Academic Senate. Initial responsibilities will focus on guiding the Center's inaugural establishment; communicating its presence and purpose widely throughout the university; establishing the initial template for Center policies/procedures governing the design and delivery of services and programs; and designing and implementing initiatives to address goals for the Center established by the university. These include enhancing faculty awareness of effective pedagogies; stimulating discussions on student learning goals and actual outcomes; developing strategies for determining the extent to which learning goals are met; assisting faculty in pursuing scholarly and creative endeavors; providing confidential consultation to faculty requesting assistance; providing new faculty with information about teaching and networking; and providing similar support to graduate assistants and part-time/temporary faculty.

QUALIFICATIONS: It is expected that the director will hold an earned doctorate; have a record of excellence in college/university teaching/learning/scholarship; be conversant with the literature on teaching/learning, effective pedagogies and instructional technologies; be able to communicate effectively with students and others; have successful experience in pedagogical and curricular innovation; exhibit outstanding interpersonal and organizational skills, as well as ability to work with diverse faculty, disciplines and cultures; and either hold or have held academic tenure and rank at the associate professor or above.

REVIEW OF APPLICATIONS: applications will begin on April 14 and will continue until the position is filled. The anticipated starting date will be July 1, 2000. Candidates should send a letter of application; resume statement of their educational and administrative philosophy regarding faculty development; and the names, addresses, and phone numbers of three to five references. Inquiries, nominations and applications should be forwarded to: Office of the Provost, Director of Search, Warriner Hall 112, Central Michigan University, Mt. Pleasant, MI 48859, Tel (517) 774-3932, Fax (517) 774-2042.

Central Michigan University, an AA/EO institution, is strongly and actively committed to increasing diversity in its community. URL's include: http://www.cmich.edu, http://www.provost.cmich.edu, http://www.cmich.edu/AAEO.HTML

OSWEGO

COUNSELOR

BOSTON COLLEGE
A Jesuit, Catholic University

MINORITY APPOINTMENT/CULTURAL DIVERSITY COORDINATOR
COLLEGE OF AGRICULTURAL AND ENVIRONMENTAL SCIENCES

UNIVERSITY OF GEORGIA

Applications are being accepted for the newly created position of Minority Affairs/Cultural Diversity Coordinator. The Coordinator will plan, organize and direct programs and initiatives that enable the College to fulfill its goal to become an institution that values diversity, pluralism and multi-culturism at all levels. The Coordinator will report to the CAS Dean/Senior Associate Dean. Doctorate or Masters degree with five years of experience in a related field, related to student services administration, counseling and/or higher education is required. Applications received by May 1, 2000 are assured consideration. Expected starting date is July 1, 2000. Details, application requirements and contact information can be found at: http://www.caes.uga.edu/ceas/hr/notice.html

EDBA/AA Instructed. Women and minorities are encouraged to apply.

Peter S. and Carolyn A. Lynch
School of Education

The Boston College Peter S. and Carolyn A. Lynch School of Education prepares undergraduate and graduate students to serve diverse populations in education, administration, psychology and human services. The faculty is committed to research and professional preparation that bridges theory and practice. Applications are especially encouraged from persons who would enhance the ethnic, linguistic and cultural diversity of the Lynch School of Education. Applicants should possess an earned doctorate and scholarly experience in public schools. Experience teaching at the college level is desirable.

School Administration

The Educational Administration Program announces a non-tenure track opening for an experienced School Administrator to coordinate a doctoral program for school administrators. The person will assume teaching, field supervision, dissertation supervision, and advising responsibilities as a member of the Educational Administration Program. Applicants should have experience as a local school administrator, a successful record of addressing the needs of diverse learners, and extensive knowledge of current scholarship in the field. Preferably, applicants will have experience in superintendency. This position has a three-year renewable contract. Send applications to the attention of Dr. Irwin Blumer, Search Committee Chair.

Educational Research and Assessment

We are seeking applicants for a tenure track or tenured professorship in Educational Research and Assessment with emphasis on their relation to educational policy. The successful candidate will teach in the Educational Research, Measurement, and Evaluation (ERM/E) Department and be associated with the internationally acclaimed Center for the Study of Testing, Evaluation, and Educational Policy (CSTEPP).

Candidates for this professorship in educational research and assessment should be nationally recognized scholars with distinguished publication records, developed interests in educational policy analysis, and proven track records of raising external financial support for research. Candidates should have broad knowledge of statistical methodology and psychometrics as they apply to problems in educational research and assessment. Teaching ability as well as research expertise will be highly valued. Send applications to the attention of Dr. Albert Beaton, Search Committee Chair.

Please send a letter of interest, curriculum vitae, 3 letters of recommendation, and 2 samples of their written work to Lynch School of Education, Boston College, Campion Hall, Chestnut Hill, MA 02467.

Boston College is an Affirmative Action/Equal Opportunity Employer.

ASSOCIATE DEAN, USER SERVICES
Northeastern University Libraries

Northeastern University Libraries invites applications from and nominations of individuals with vision, energy, initiative, and leadership ability to articulate, plan, administer, and promote programs for user services and constituency relations, and to assess service outcomes. The successful candidate will demonstrate an understanding of information fluency, scholarly communication issues, and curricular processes in higher education, and their ongoing transformation by emerging technologies, resource sharing, and web delivery. S/he will be experienced in effectively shaping, implementing, and assessing innovative, comprehensive library programs and services.

Responsibilities: Vision, leadership, administration, planning, and evaluation of User Services, including reference, information literacy/instruction, accessibility/security services, ILL, media services, and distance services. Oversees liaison programs to academic and other departments and to student groups. Develops external community relations programs and services. Library administrative team member. Analyze issues, formulate, articulate, and assess policies, goals, and actions. Participate in strategic and budgetary programmatic planning, funds development, and grant proposals development. Participates in University committees and represents the Library regionally and nationally. User Services has 46 FTE career staff plus part-time and student staff.

Setting: Northeastern is an urban, student-focused, Carnegie Research II Institution, dedicated to a cooperative education learning model. Visit the Library's website at http://www.neu.edu/library/

Qualifications: ALA-accredited MLS degree. At least 5 years of substantial, progressively responsible, service-oriented, managerial experience, preferably in user services. Excellent leadership, communication, interpersonal, analytical, quantitative, planning, and organizational skills. Able to set priorities and effectively collaborate and work with individuals and groups at all levels. Familiarity with matrix-oriented services, coordinate roles, and project management. Understanding of teaching, research, and assessment methodologies. Knowledge of trends in higher education, learning and service assessment, and information technology that affect print, media, and electronic information service delivery. Demonstrable creativity and energy. Commitment to staff development and to achieving and working with a diverse staff and user community. Commitment to strong programs for information literacy/instruction, academic liaison, outreach activities, and web-based service initiatives.

Salary: Competitive, commensurate with qualifications and experience; excellent benefits package.

Review of applications will begin April 20 and continue until the position is filled. Please send letter of application, resume, and the names of three references to: Alan Benenfeld, Dean, Northeastern University Libraries, 320 Snell Library, 360 Huntington Avenue, Boston, MA 02115.

THE LOS ANGELES COMMUNITY COLLEGE DISTRICT
invites applications and nominations
for the following position:

• **DIRECTOR, AFFIRMATIVE ACTION PROGRAMS & SERVICES**

**FILING DEADLINE: APRIL 28, 2000.**

The Los Angeles Community College District is seeking a Director of Affirmative Action Programs and Services to serve at the District Office. Interested individuals who possess the required training and experience are invited to submit applications.

**REQUIREMENTS:** Candidates for the position must, at a minimum, possess: a Master's or other advanced degree from an accredited college or university (occupation of a degree in Public Administration, Personnel Administration, Law, or a closely related field is highly desirable), at least one year of professional experience reasonably related to the position, and demonstrated ability to communicate and work effectively with people of diverse background, cultural and ethnic backgrounds, including those who have disabilities.

**SALARY:** The salary range in effect for the position is $47,450 to $63,811 annually. Initial salary placement will be commensurate with the candidate's previous salary within the available salary range. Benefits include 15.5 paid holidays, 30 days paid vacation annually, paid illness leave, a choice of medical plans, dental and vision care coverage and a $40,000 group life insurance policy.

**FILING AN APPLICATION:** A detailed brochure is available. To apply, send (1) A letter of application, preferably five pages or less, which provides examples from background and experience showing how your knowledge and expertise apply to this position; (2) A current resume of professional experience, educational background and other pertinent information; (3) A list of four references with business and home telephone numbers. Materials should be received not later than 4:30 p.m. on Friday, April 28, 2000, but applications may continue to be accepted until the position is filled. Cleared candidates will be sent additional application materials. If selected, additional documentation such as official transcripts will be required. Send to: Human Resources Division, Los Angeles Community College District, 770 Millikan Blvd., Los Angeles, CA 90017. For additional information, contact Human Resources at (818) 991-8829; Fax (818) 891-9411. Our website is www.laccd.edu.

HOBART AND WILLIAM SMITH COLLEGES

ASSOCIATE/ASSISTANT DEAN OF STUDENTS AND DIRECTOR OF THE OFFICE OF INTERCULTURAL AFFAIRS

Hobart and William Smith Colleges invite applications for the position of Associate or Assistant Dean of Students and Director of the Office of Intercultural Affairs. At the Colleges we understand the terms multiculturalism, diversity, and pluralism to embrace individuals of diverse social and economic backgrounds, sexual orientation, religion, and national origin. The Office of Intercultural Affairs has the dual responsibility of providing academic, social and counseling support to students and promoting leadership in honoring the Colleges commitment to fostering, supporting, and respecting diversity. The position reports to the Deans of the Colleges and is part of a strong academic/student affairs division.

SPECIFIC RESPONSIBILITIES WILL INCLUDE:

- Developing and implementing programs that support multicultural and majority students
- Supporting the Colleges' recruitment and retention efforts
- Assisting in the continuing development of a diversity-sensitive curriculum
- Providing counseling and guidance to students
- Advancing cultural awareness and developing student leadership
- Administering the Office of Intercultural Affairs
- Supervising the Director of the Colleges' Opportunity Programs
- Representing the Colleges' efforts and programs regionally and nationally

QUALIFICATIONS: A strong record of leadership in issues related to diversity and a demonstrated ability to work with others to formulate and implement programs. Three to five years of full-time experience in higher education working with diverse populations in a student-affairs related area is preferred, and an advanced disciplinary or professional degree is required.

OTHER INFORMATION: This is a full-time, 12-month administrative position with full benefits.

APPLICATION: Candidates should submit a letter of application describing their qualifications and match to the position, a resume, current on vita, and the names, addresses, and telephone numbers of three to five references. Nominations are also welcomed. Review of completed applications will begin April 14 and continue until an appointment is made. This advertisement will be posted in ICAE. Please send materials to: Search/Intercultural Affairs, Clarence E. Butler, Dean of Hobart College, Hobart and William Smith Colleges, Geneva, NY 14456. Please contact 585/29-2020.

A CALL FOR PAPERS FOR THE SIXTH CONFERENCE OF RECOVERING THE U.S. HISPANIC LITERARY HERITAGE

DECEMBER 1-2, 2000
University of Houston (Main Campus)
University Center Underground
Houston, Texas

Recovering the Past, Charting the Future: Archives, Canons, and Questions of Identity

Making the tenth anniversary of the Recovering the U.S. Hispanic Literary Heritage Project, this year’s conference will focus specifically on the future of the Recovery Project. A sense of the future is not complete without an earnest reflection on the gains and obstacles of the last decade. While the conference will continue to foreground the results of recent Recovery related research, it will also provide ample space for measuring the effect of the Recovery Project on history and criticism in graduate education. Of particular interest in this year’s conference are questions of pedagogy, classroom methodology, and how to treat the past two terms and concepts that students can understand today. Please join us in embarking upon the next ten years of the Recovery Project.

PAPERS OR PANELS ARE INVITED on any of the following themes:

- Analytical Studies of Recovered Authors and/or Texts
- Critical and Theoretical Approaches to Recovered Texts
- Preparation of Critical Editions
- Curriculum Development
- Folklore/Oral Histories
- Humor and Humoroiography
- Language and Linguistics
- Preservation and Access
- Library and Information Science

Participants are asked to provide a publication-ready paper in hard copy and word processor diskette prior to the conference. Selected papers will be published in the fifth volume of conference proceedings.

Submit a 150-word abstract and curriculum vitae by AUGUST 15, 2000 to:

Recovering the U.S. Hispanic Literary Heritage
University of Houston, 4480 College E. Center for Undergraduate Education
Houston, TX 77204-3127

LOST IN AMERICA: HISTORY AND
THE NEW LATINO MOVEMENT

Does being Latino's and American create a conflict of values? I am certain that it does.

Apart from the language barrier or the Anglo-Latin, Protestant-Catholic, material-spiritual dichotomies, core values seem to be at odds. Is our "moral universe" (to borrow a term from Dr. Louis A. Perez, Jr.) really different? How do we, as Latinos/as, make our moral journey?

I responded to this conflict of values in different ways at different stages of my life. Mostly, I submitted to those powerful authorities who required forgetting and changing for acceptance as an equal/human. But my grandparents lived nearby and often reminded me: "We are the children of Marx! He is the father of our country! And he spoke to us, here in Tampa, about social justice and racial harmony and anti-imperialism." What a conflict.

But Marx and Zapata and Bolívar were not present in our textbooks or on television. As our grandparents aged, it became easier to forget.

As we grew, our world expanded beyond the protective barrio. To be "American" required individual strength, independence, mobility, and a focus on success. We exchanged la familia's unconditional love for those lonely pursuits. We dove head first into Americanidad. We ironed our hair or fried it to a "reddish-blonde." We forgot our first language, even acquired a southern drawl as needed. We learned to hate our skin, our color, our hair or lips or hips that did not fit the prevalent image of beauty a la Americana.

Lost in America, a few of us went to the university to study history, to find ourselves, to recover from our individual and collective amnesia. We reclaimed the history of the ancestors in a complicated process, not unlike archaeologists seeking lost civilizations. Sometimes, we discovered that our passion for social justice or equality continued—perhaps la lucha was genetically imprinted on our minds and souls. Born-again Latinos, you might say.

We organized Latino forums to discuss our journeys, these conflicts in our daily lives. We found common ground across nationalities and generations and gender. For some, the experience of finding voice, asserting identity, becoming visible, taking action, speaking out for change could be uncomfortable. We debated, we argued—and still do.

Beyond the struggle for acceptance, for visibility, for voice, we wanted to be able to contribute our knowledge, our complex realities, our values, our creative spirit, our "moral universe" to our community, our university, our nation. We politely waited for the invitation, but it never came.

Should we be concerned that our students not suffer that same amnesia? Will they, too, learn to forget? Will the knowing unbalance their negotiated identities, their comfort zones? Will we lose the lucha-spirit to the pursuit of happiness, as defined in the '90s by accumulation of wealth? Have our students learned to hate history, and why? Certainly we could encourage a relevant curriculum that would include their/hour history, the voices from the ancient past and the dynamic present.

As the promoter-recruiter-advisor for the Latin American and Caribbean Studies Office at my university, I am happy to report that the students who do find their way to this program are positively transformed by a learning experience that includes them in the history. They are a marvel to witness.

But I also lament that most Latino children won't have this opportunity to find themselves worthy, as they continue to drop out of school, their knowledge limited to the high school curriculum and the media.

More importantly, they and we need to learn of the complexities of the Latino experience, not the stereotypes. We've been pressured to unite for political purposes, understandably. But we should not camouflage our differences. The history of Mexicans in the Southwest before and after 1848 is quite different from that of the Cuban political exile who arrived in the '60s, and from that of the Central Americans who crossed borders fleeing the death squads in their home countries, and from that of the Puerto Rican-Americans with their U.S. citizenship who migrated to the Northeast in the 1940s.

We need to learn about all of those histories to understand ourselves more completely. In Florida, we face Governor Bush's "One Florida" initiative to replace affirmative action. Reporters speak to politicians from Miami and conclude that all Hispanics in Florida support the governor's plan. We ask (and the reporters don't). Do Miami politicians and recent immigrants understand historical discrimination? Do they reflect the majority opinion of Latinos in our state? Even more complicated: Can immigrants who came after the civil rights movement legitimately claim the right to equal opportunity via affirmative action? Or has affirmative action been viewed as a prize legitimatized by African Americans?

These are complicated issues, complicated by differences of race and class. Taboo subjects. And if we raise these questions, we might be accused of promoting disunity among "Hispanics"?

We have varying histories, don't we?

Teaching the Teachers

By Gustavo A. Mellander

Hispanics have long chosen education as one of their major fields of study. More and more enter teaching every year. And given the avalanche of jobs, which will cascade throughout the country over the next decade, more will be entering the nation’s teaching ranks. Will they be prepared?

For their part, many Hispanics will pursue graduate studies to prepare for teaching careers. Sounds good. Graduation from college, some graduate school education, and the opportunity for a variety of jobs that many dared not dream of for over twenty years.

Colleges of Education

But not all is well in Paradise. Many have criticized teachers and teacher education as well. Historically, colleges of education have been disregarded and marginalized at many universities. In short, they were not considered as academic as the other university units.

Some universities would love to get rid of them. But they don’t know how to do so politically and thus just ignore their colleges of education, underfund them, etc. Some who do seem interested are so only because colleges of education generate a significant amount of income. They are cash cows.

The American Council on Education, based here in Washington, D.C., decided to take on the teacher education issue. Its Presidents’ Task Force Report on Teacher Education is pointed, well-written, and full of useful data. It urges college and university presidents “to move the education of teachers to the center of their professional and institutional agendas.” That would be a revolutionary step forward.

But the ACE report makes some questionable assumptions as well. For instance, it states that the single most important element in a child’s success in learning is the quality of the teacher. It has overlooked children’s first “teachers”—their parents. Can even the best teacher in the world overcome that which shaped them before they came to school, that which still influences them hour after hour?

The report states that “Only if the quality of teachers entering the profession improves will we effectively adapt to a new economy that depends far more than ever on knowledge, its acquisition, analysis, synthesis, communication, and application.” Much of that is true, but the emphasis on the word “only” concerns me. What of society’s role in how children learn? What of the working conditions of teachers once they graduate?

Nevertheless, the report is a good one, albeit too long and repetitious. It can be read in its entirety by accessing ACE’s Web site at www.acenet.edu.

A Few Facts

Over the past twenty years, education has been studied ad nauseum. What are some of the conclusions?

Teachers are important. They must be properly trained, properly paid, and properly supported as professionals.

As to their education, clearly they must have a firm command of the subject matter, receive sound professional preparation, and demonstrate high overall achievement.

Twenty years ago, critics charged that too little attention was paid to subject matter acquisition in teacher preparation programs. There was reason for that criticism. Some schools of education had set up phantom universities. They offered special, some say watered down, courses for education majors, such as “English for Teachers,” “Mathematics for Teachers,” etc. There was also a practice of offering too many theory and methodology courses, to the detriment of content courses.

But most of that has already been addressed. Teacher education has reformed itself nationwide. Many colleges now require students to complete a baccalaureate in their discipline, say mathematics, before they can learn the craft of teaching via a Master’s program.

There is a craft to be learned, one that can become an art, with the passage of time. Therefore, appropriate pedagogical methods, curriculum design, adolescent development, student cognition and learning, and classroom management, to name few, are all useful and indeed necessary skills that teachers need to possess.

These reforms were long overdue, but they have now been completed in most states.

Overview

The nation’s schools will need 2.5 million new teachers over the next 10 years. After decades of not enough jobs for graduating teachers, the tidal wave ahead will be monumental. New teachers will be needed to replace retiring teachers, to meet projected enrollment increases in certain areas, to reduce class sizes, and to replace the tens of thousands of teachers who leave their jobs each year in search of more attractive and more rewarding career opportunities.

A decade isn’t that long to plan and to absorb such an enormous change. The public mood is such that it will insist that these new teachers learn and perform at much higher levels than current ones.

A Proposal...

How can America really reform K-12 education? One university scholar has suggested a simple enough solution. Expensive and a bit radical, his idea is, but nonetheless, food for thought.

First, pay teachers as well as we pay college professors; provide them the same work load and respect them as well as we respect college teachers.

What he has hit upon is what most of us will agree to: K-12 teachers are horribly underpaid, overworked, and underrespected. Is it any wonder that thousands leave teaching every year? And that many who remain are burned out while still in their thirties?

He contends the problem is not so much in the education that teachers receive during their college years but with the gruesome reality they face when they go to work.

Expensive suggestion? Yes, but what’s the alternative? Another generation of frustrated teachers, disillusioned former teachers, and kids who never meet their fullest potential?

Dr. Mellander is a professor at George Mason University.
Nation's Oldest MBA Program
Looking for Hispanics

Michael Aragon said he was a little apprehensive initially about moving to the tiny hamlet of Hanover, New Hampshire, to pursue a master's degree in business administration at the Amos Tuck School of Business at Dartmouth. He knew that the Latino population was small. He knew that going to an Ivy League school meant the population would be fairly homogeneous compared to his native Albuquerque.

"It's a great school," said Aragon, 26 and a graduate of the University of New Mexico. "What sold me were the people here. I saw no barrier to Latino students at all. There aren't a lot of Latino students at Tuck, but Tuck is making an effort."

Aragon said that Tuck's efforts to make him feel welcome are numerous. He noticed that there was no Latino students organization, and he went to the administration for permission to start one. Not only did he get permission; he also got funding for his project. The University helped his wife find a job and provided both him and his wife with mentors on campus. Students are also assigned alumni as mentors.

"I want to be a role model for others," said Aragon, who expects to pursue a career in investment banking once he graduates from Tuck. "I want to show people that you can come from Albuquerque and still make it on Wall Street."

Aragon is one of 13 Latino students at the business school—which has the oldest MBA program in the country. There are 370 students enrolled in the program. While Latinos comprised only 3.7 percent of the 188 students who enrolled for their first year of the MBA program, minorities overall comprised 16 percent, with Asian Americans having the largest representation. The number of Latinos enrolled has grown from four in 1996 to seven in 2000.

But more work needs to be done in the faculty ranks. From 1995-98, the Hispanic faculty was three percent. Currently, there is no Latino faculty.

Marcus Motroni, a 26-year-old in his second year of the MBA program at Tuck, who earned his bachelor's degree in engineering at Dartmouth, said Tuck emphasizes the need to be culturally aware. When students first arrive at the MBA program, they undergo a seminar. "Most everyone is from somewhere else. We provide a deep immersion in a business environment. Everyone knows everyone. Everyone lives here. That's appealing to some people, but not to everyone. Tuck students live so close to each other, so they are good at human interaction. Businesses want people who are sensitive and work well with teams."

Tuck recently joined the Consortium for Graduate Study in Management, based in St. Louis. The Consortium is a group of universities that work together to boost minority enrollments in business schools. Motroni said he hopes that the consortia membership will lead to increasing numbers of minorities applying and enrolling at the business school. Tuck also sponsors a summer program for minority high school students to get them interested in pursuing business degrees.

Speaking of different culture, Danos said, "You can't be sensitive to people you lead unless you have been exposed. We try to give our students that exposure."

Danos said that he hopes to expand the number of minorities at the school, particularly since Tuck will graduate students. The school prefers to attract students with a variety of undergraduate degrees rather than business undergraduate degrees, said Schoen representative Colleen Stockard. The average student at Tuck has five years of work experience. Students average 27 years of age. Married students represent about one quarter of the student population. The student faculty ratio is 10:1.

The tuition is nearly $25,000 yearly at the school. The median total compensation to Tuck's graduates, however, which includes salary plus other hard dollar received in the form of relocation allowance, signing and performance bonuses, commissions et al has been $120,000.

The school emphasizes a global perspective. More than one-third of all course content is international. About 19 percent of the student population is international. Addition, in May 1997, Tuck formed a global alliance with Oxford University, Tuck's oldest sister school.
University's Templeton College (UK) and the HEC School of Management (France) to pursue innovative high technology collaboration. The alliance is an opportunity for students, faculty members, and alumni of each school to come together to share ideas, knowledge, and expertise. The school also offers exchanges with those partner schools and other schools and is extending its exchanges to ones in Africa as well, said Danos.

During the first year of study, all students take a set of fourteen required courses. Students in their first term also participate in a consulting project. In these projects, student teams work with local businesses on predefined problems, presenting solutions to the clients at term's end. Another project students participate in is the TYCOON business simulation game. Devised and implemented by a Tuck graduate, TYCOON is a computerized simulation in which teams of students compete with other teams to successfully launch a project. In their second year, students select courses according to their interests and career aspirations. They choose from more than 50 elective courses.

Tuck features three centers that focus on business from different perspectives. The Center for Asia and the Emerging Economies conducts research and education on the economic, social, and political factors that affect business in these increasingly important markets. The Center for Corporate Governance conducts research and offers teaching programs aimed at understanding how international differences in contract laws, capital markets, and ownership structures affect the design of an efficient governance system for the modern corporation. And the John H. Foster Center for Private Equity examines the private equity capital markets and the entrepreneurial ventures they fund and support.

To apply for admission to the school, prospective students must submit a personal application form, essay questions, official transcripts from every college or university attended, at least two letters of recommendation, scores from the GMAT taken within five years, and a nonrefundable application fee of $100. Admissions are conducted in a rolling decision process, so applicants are urged to complete applications as early as possible.

The MBA program is not the only program at Tuck that embraces minorities. The school offers a variety of executive programs that are in the vanguard in offerings to strengthen minority business leaders.

The Tuck school also sponsors the Minority Business Executive Program (MBEP). In its 20th year, the program provides minority companies with the same top quality business training available to Fortune 500 corporations. To date, more than 1,500 minority executives have graduated from the program and its counterpart, the Advanced Minority Business Executive Program. A new program for minority suppliers—Strategies for Minority Business Growth—will debut soon. Business owners start with the basic program and are encouraged to return to the two subsequent programs after a couple of years of incarnating what they learned previously.

Gloria Castillo, president of the Monarch Marketing Group Inc. in Chicago, has attended all of the minority business executive programs at Tuck, is vice president of the schools alumni association for the business executive programs, and is ready to take her business to the next stage. When she took over the business from her mother, it had three employees. Today, she has 21.

"It's an opportunity to step away from your business and think about business in general for a week," said Castillo. "When you make a mistake in your business, it hits your pocketbook. Could I have done my business without Tuck programs? I probably could have built a house without blueprint, but why would you?"

she expects the percentage to grow because Latino business owners are the fastest growing segment of the business community.

Graves said that when the MBE program started two decades ago, she did not know if it would survive. There weren't many minority business owners. "Today people recognize that minority businesses are a viable segment of the business community," Graves said.

"I'm very proud to have been involved with this project because we have made a difference," said Graves. "We have helped the business owners to grow their businesses, and that has had a trickle-down effect on their communities."

For more information, contact: Ms. Sally O. Jaeger, director of Admissions, The Amos Tuck School, 160 Tuck Hall, Dartmouth College, Hanover, New Hampshire 03755. Telephone number is (603) 646-316.
Diversity is a goal and a challenge that colleges and universities nationwide have been endeavoring to champion since the days of Brown vs. Board of Education and the inception of affirmative action. At the Ivy League, the world-renowned group of 11 higher education institutions in the United States, achieving diversity—of gender or race, or both—has been and still is a work in progress. Yes, more people of color are represented on their campuses—in the classroom and in the faculty ranks. Ethnic studies, women's studies, Latin American studies, African American studies, and Chicano studies, for example, have been elevated to departments in many schools. More Latinos are applying, being accepted, and graduating. But how many more? It’s all good news. However, progress unfortunately is outweighed by undeniable, irrefutable inequalities and disparities that have moved many universities to acknowledge and take action in an attempt to level the playing field.

Where faculty is concerned, according to a survey by the Association of University Professors’ Committee on the Status of Women in the Academic Profession, in 1998, women accounted for only 13.8 percent of full professors at doctorate-granting institutions. And while salaries of female professors have increased since 1975 by 33 percent points, the salary gap between male and female professors is still wide. Female professors make an average of 12.5 percent less than do men.

In Part II of the Ivy League Review, HO looks at the Massachusetts Institute of Technology, Yale, and Brown Universities.

MIT, Massachusetts Institute of Technology, which covers 154 acres, has been on the Cambridge side of the Charles River since 1916. It was founded in 1861 to aid “the development and practical application of science in connection with arts, agriculture, manufactures, and commerce.” MIT has accomplished this and much more through its five schools: Architecture and Planning; Science; Engineering; Humanities and Social Science; and Sloan School of Management. According to school data, MIT routinely leads all U.S. universities in patents granted, with more than 100 a year, and signs about 70 license agreements with private companies each year. Achievements of the faculty and graduates have included the first chemical synthesis of penicillin and vitamin A, modern technologies for artificial limbs, and biotechnology, such as genetically modified products.

Student enrollment (undergraduate and graduate) totals close to 10,000, of which students of color number 2,600 undergraduate and 591 graduate. Women are 41 percent of the undergraduate population and 26 percent of graduate students.

Faculty data are as follows: professors of all ranks equal 923 (total teaching staff is 1,300)—141 women and 122 people of color. The ethnic breakdown is 78 Asian Americans, 25 African Americans, 18 Hispanic Americans, and one Native American.

In a landmark admission in early 1999, MIT released a report validating female professors’ beliefs that discrimination has caused women faculty at its School of Science to receive less in the way of salary, office space, awards, resources, etc.

As of 1999, there has never been a woman department head, associate head, or center director in the School of Science.

Taking a pro-active approach, a committee was developed to examine this issue. While it might take years before women are better represented, change is under way. The School of Science is slated to increase the number of tenured female faculty by 40 percent. Lotte Bailyn, MIT’s faculty chair, stated, “By making it explicit, by making people aware, people can’t still deny it exists.”

President Charles M. Vest noted in a special edition of The MIT Faculty Newsletter (March 1999), “Our remarkably diverse student body must be matched by an equally diverse faculty. Through our institutional commitment and policies, we must redouble our efforts to make this a reality.”

The report stated, “It also seems imperative, now that we better understand the unexpected forms that discrimination can take and better understand how to address them by a collaboratively thinking of faculty and administrators, that we should take steps to make greater progress in addressing the serious underrepresentation of minority faculty at MIT. Few issues are as important for the university as the inclusion of women and minorities at the faculty level. To remain at the top academically we must seek out and nurture the best talent available, and half of that is female, much of it is underrepresented minorities.”

Yale University

New Haven, Connecticut, is home to Yale University, a private, independent institution founded in 1701. Yale has 11 professional schools (Architecture, Art, Divinity, Drama, Forestry, and Environmental Studies, Law, Management, Medicine, Music, and Nursing), an undergraduate program and its Graduate School of Arts and Sciences. According to a statistics summary of Yale’s student body, 81 percent of its students are from outside the state; nine percent are international students. Fifty-three percent of its 1999 first-year-student class came from public high schools; 14 percent from inde
pendent, parochial, and other schools.

As of Fall 1999, total university enrollment was 11,017. Interestingly, male and female enrollment is nearly fifty-fifty. However, in enrollment by ethnicity, white students tip the scale—79 percent of all students were grouped as white & other. Asians came in second at 15 percent; Blacks followed with seven percent, and Latinos trailed behind at six percent: Native American students, one percent.

One effort to reverse these numbers is the Parlier Ivy League Leadership Project, which recruits top Chicano high school students in the central California/Fresno area and "encourages and exposes [them] to Ivy League schools and curriculum," stated Martin Mares, PILLP director.

Over the years, more than 90 percent of PILLP high school seniors have enrolled at Ivy League schools. PILLP started in 1991 and evolved from a field trip to an organization that offers a mentor program, internship opportunities, and Saturday leadership seminars.

Carlos Paz is a PILLP benefactor who eventually matriculated at Yale. In an article published in Yale Daily News, Paz is quoted as saying, "I really had no idea about what Ivy League schools are like, but the program instilled a sense of possibility."

Hispanic representation among its faculty also is minimal. In light of this dearth, Yale, like many other institutions, has conducted studies to quantify the problem. According to Yale's NEASC Self-Study, "Yale's faculties have changed very little over the last decade. The Faculty of Arts and Sciences (FAS) has grown slightly (about six percent, all in non-ladder and research faculty),...but the most striking growth (more than 50 percent) has taken place in the School of Medicine (the largest increase in the research faculty)."

Yale employs more than 2,800 full-time-equivalent (FTE) members, who are either ladder faculty (instructors, assistant, associate, and full professors), non-ladder, or research faculty.

Self-Study Reveals

Upon evaluation of the study, Yale concluded that while it "has devoted considerable energy over two decades to increase the diversity of its faculties," it has done so with "inconsistent success."

"University-wide, the percentage of women in the tenured faculty is 15.3 percent; the percentage of members of minority groups is 7.7 percent." Although these percentages cover a small portion of the total, these numbers "represent increases over the last decade from 8.5 percent and 6.2 percent, respectively."

Where term faculty is concerned, the increase is even a little more pronounced for minority groups—15.4 percent, compared to 8.5 percent 10 years ago. According to the survey, "the number of Asian faculty has increased most significantly."

In 1982/83 at the Faculty of Arts and Sciences, there were four tenured Hispanic men, no tenured women; four term Hispanic men, and one term Latina. Ten years later, single-digit totals still exist at some schools. Discouraging, yes, but the numbers are rising, and more women are entering the picture. In FAS, "tenured minorities rose from 71 percent to nine percent. Nontenured women dropped slightly from 32 percent to 30.5 percent, but minority faculty increased from 9.8 percent to 15 percent."

The explanation: "Given the relatively large pools of women available for term and tenured positions in most disciplines, these small increases are a matter of concern. Although the pools are generally much smaller for members of minority groups, students, faculty, and administrators share a commitment to diversity that will require an even more concerted effort to recruit and retain both women and members of minority groups."

Multiculturalism Honored

Yale recognizes the growing Latino communities on campus as well as the contributions of Latinos nationally. On April 6, five-time Grammy-winner Tito Puente was honored by the Chubb Fellowship of Yale University with a symposium and concert to celebrate his contribution to Latin music.

The Chubb Fellowship, established in 1936 by Hendon Chubb (Yale 1895), was developed to encourage and assist Yale students interested in the operations of government and public service. Tito Puente now joins the likes of Supreme Court Justice Harry Blackmun, New Jersey Governor Christine Todd Whitman, and author Toni Morrison.

Brown University

Brown University recently decided to revisit its original 1986 study on issues of pluralism and diversity. A committee led by Augustus A. White III, a Brown fellow emeritus, visited the university early this year.

White stated in an interview with George Street Journal prior to conducting the current study, "It was clear that Brown should go beyond the diverse population it had achieved and explore ways to maximize the education experience for everyone....President Gee felt that this visiting committee approach, which has the advantage of not occurring in the face of any crisis or threat or negotiation or incident, could be developed exactly as the University develops other parts of its mission...."

The committee spoke with faculty, administration, and students. The committee included academicians and others.

"We wanted to have a committee reflect the various concerns and interests in terms of race, ethnicity, and gender, and we didn't want everyone to be a social scientist or to come from one university."

Will this be just another report? Or will it effect change? According to White, "one of the goals and beliefs of that original committee was that diversity used to be something that institutions supported where it could. The recommendation said that Brown is institutionalizing this concept. Diversity is not an offshoot. So Brown University is poised to listen and learn and act on furthering diversity at its instution.

Total enrollment as of October 1998 was 7,782 (includes some non-degree seeking students). Hispanic undergraduate students numbered 331 and 53 graduates. Women accounted for more than half of the undergraduate student body, while men in graduate programs surpassed women by a small margin (575/564).

Brown ushered in the new year with the appointment of Janina Montero as its vice president for campus life and student services. She was formerly dean of student life at Princeton. In this position, she will be responsible for the Department of Athletics and Physical Education. Office of Student Life, Office of Residential Life, Food Services, Chaplains Office, Third World Center, and Sarah Doyle Women's Center.
High Growth Potential for MBA Taught en Español

Draws Students to Texas A&M International

BY MIKA SUSANA AKIKUNI

This is an era in which professionals who can juggle more than one language can enjoy increased success in the international business arena. And in helping students arrive at that level, Texas A&M International University, with its MBA program taught in Spanish, is in the lead.

The MBA in Spanish option was first offered there in the late 1970s to give Spanish-speaking students lacking English proficiency a chance to receive lectures in a familiar language, said Dr. Antonio Rodríguez, associate professor of finance, chair of the Department of Economics and Finance, and MBA in Spanish coordinator.

Students who attended the early classes were mostly professionals from the neighboring Mexican city of Nuevo Laredo, he said. Over the years, however, the classes have grown to include a diverse mix of students from other Latin American countries and from Europe, as well as native English speakers who want to experience a business class taught in Spanish, Rodríguez said.

Dr. John Kohl, dean of the College of Business Administration, said that the MBA in Spanish is one of the College's programs with the highest potential for growth.

"More than 30 percent of the 120 students currently pursuing a general MBA are in the MBA in Spanish. Our strategic location as well as the top-notch faculty members and comprehensive program attract the most ambitious and promising students to the College and A&M International," Dr. Kohl said, adding that a total of nine bilingual faculty members with doctoral degrees currently teach in the program.

Interest in these classes has also been expressed by students who live in relatively distant cities on both sides of the U.S.-Mexico border, Kohl said, adding that currently the program includes students who commute from Monterrey, Nuevo León, Mexico, and Eagle Pass, Texas.

Because of the geographic diversity of locations from which students can commute and because most students attend the program on a part-time basis, the College must take extra care when scheduling the once-a-week classes so that professionals will have ample time to get off work and drive to their classes, Kohl added.

The MBA in Spanish is a unique choice that offers opportunities to a greater audience, Rodríguez noted.

"This is a visionary program in that its purpose is to offer students who are still familiarizing themselves with the English language an opportunity to start receiving an MBA instruction in a language that is already familiar to them," said Rodríguez. "For many of these students, this is perhaps the only way they could enter an MBA program in the United States."
The MBA in Spanish follows the same curriculum as the standard MBA, with tests administered in English and readings assigned in English. Admission requirements are the same for all MBA students, except that students in the MBA in Spanish do not have to submit a Test of English as a Foreign Language (TOEFL) score, Rodriguez said.

Since textbooks and materials used in class are in English, the MBA in Spanish classes also provide students with a smooth transition into the standard MBA classes, he said, adding that students must pass the TOEFL test before continuing with the standard MBA.

He emphasized that the MBA in Spanish choice is one of seven graduate programs in the College of Business Administration aimed at international communities. Other programs include the standard MBA, MBA with a major in international banking, MBA in international trade, master of public accounting, master of science in information systems, and a master of science in international logistics.

MBA in Spanish students also have the opportunity to enrich their knowledge of the world in an environment where international students from a diversity of backgrounds pursue similar goals, Kohl said.

The college's graduate programs include students representing Mexico, Peru, Venezuela, Colombia, Argentina, Albania, Bangladesh, China, Cyprus, Ethiopia, France, Ghana, India, Indonesia, Japan, Korea, Morocco, Russia, Rwanda, Cambodia, Nepal, Taiwan, and United Arab Emirates, he said.

"Interestingly, many of these students have held high-level government or corporate positions in their home countries, and this provides for a rich educational experience for all students pursuing a future in the multitude of business fields," Kohl said.

Not surprisingly, MBA in Spanish faculty members at the University also mirror the diversity of the student population, and they include Dr. Oscar Flores, assistant professor of information systems from Mexico; Dr. Eduardo Rivera, visiting professor of information systems, Mexico; Dr. Yolanda Llamas, visiting assistant professor of finance, Puerto Rico; Dr. Rolando Sánchez, visiting assistant professor of sciences, Mexico; Dr. Antonio Rodríguez, associate professor of finance, Mexico; Dr. Michael Patrick, professor of economics, United States; Dr. Pedro Hurtado, associate professor of management, Peru; Roberto Balli, adjunct instructor of marketing, U.S.; and Dr. David Roberts, assistant professor of accounting, U.S.

Israel Merla, a student from Monterrey, Nuevo León, Mexico, said that the MBA in Spanish choice allowed him the opportunity to earn a graduate education in the United States while paying in-state tuition equal to the resident rate.

"I was very happy to know that A&M International offered this choice," Merla said. "I've researched other universities before coming to this one, but it would have been virtually impossible for me to enter those other programs because I was not prepared to take classes in the standard MBA right away."

Merla, who plans to return to Mexico upon graduation, said he is grateful to A&M International for opening the doors to his graduate education.

"An MBA degree from a United States institution will give me a competitive edge over others in my country and will position me well for an attractive position," Merla said.

The increasing trade between the United States and Latin American countries is another reason why more institutions should consider offering choices like the one at A&M International, Merla said.

"I have noticed that American companies often look for employees who are familiar with Latin American countries including Mexico. This is another reason for having a choice like the MBA in Spanish," Merla said.

Mónica Brussolo, a student from Ciudad Victoria, Tamaulipas, Mexico, said that the MBA in Spanish makes the change in language and instruction style less drastic for students who come from Spanish-speaking countries.

"Pursuing an MBA in the United States for me would have been impossible without this MBA in Spanish choice offered at A&M International," she explained.

Brussolo, who recently transferred to the MBA in English, said that she does not see a difference in subject content between the MBA in Spanish and English.

"The level of difficulty of the topics discussed in class is the same. However, what the MBA in Spanish does is give a newcomer like me a period of adaptation so that I can
familiarize myself with the types of classroom activities that are required in the United States, such as presentations, homework, and research papers," she said.

Brussolo said that the MBA in Spanish program has the potential to help students realize greater working relationships and opportunities between North American Free Trade Agreement (NAFTA) countries.

"With economic integration plans like NAFTA, programs like the MBA in Spanish have to be strengthened everywhere. NAFTA means exchange not only of money and resources between countries, but also of personnel. Choices like these can open new opportunities for Spanish-speaking people who are interested in working on international trade in the United States."

Brussolo said that A&M International has provided her with the opportunity to study not only in the United States but throughout the world through participation in its Study Abroad Program. This summer, she will visit universities in the Netherlands and Germany that have agreements with A&M International.

"This is my first trip to Europe, and it will give me the chance to get to know the technology that exists there, commerce opportunities, and culture," she said. "This is an important opportunity for students."

Like most students, graduates who have successfully completed the MBA in Spanish program say that they often must triumph over personal challenges to secure their much-cherished dreams of a graduate degree.

María Guadalupe Treviño earned her MBA degree in 1999 and now works in Nuevo Laredo as both a university instructor and manager of a factory producing electronic equipment for the oil industry. She pursued her MBA degree even when her responsibilities as a mother of four children kept her extremely busy.

"The most difficult challenge I faced was studying while taking care of my fourth child, who was born seven weeks before I started my MBA in Spanish program," Treviño said.

Treviño said that her decision to choose the MBA in Spanish program was fueled in part by the realization that she and her instructors would share Spanish as a common language.

"Many of these students have held high-level government or corporate positions in their home countries, and this provides for a rich educational experience for all students...."

DR. JOHN KOHL, DEAN, COLLEGE OF BUSINESS

Like Treviño, he had to keep a close balance between his studies and responsibilities as a father of two.

"The MBA in Spanish program allowed me to concentrate on learning the assigned material without having to worry about the language barrier," Valadés said.

"The program gave me a different perspective about administration. In the past, I have performed administrative tasks at work without really understanding why things were done a certain way. Now I know why, thanks to the knowledge I acquired through the program."

Students said that study under the MBA in Spanish program has opened both doors of opportunities and minds and that they plan to continue pursuing career interests that build on their solid educational foundation.

"I would like to grow within my current company and keep on expanding my knowledge," Valadés said.

Brussolo, on the other hand, said she is now considering working in the U.S. before returning to her native country.

"At first, I had planned to return to my country right away, but this is changing. While I would still like to go back home, I am now thinking of taking advantage of my practical training period after graduation to work in the United States," Brussolo said. "After a while of being in this program and living in this country, you start seeing new opportunities. I don’t know how to explain this, but you start seeing new horizons."

For further information, please contact the Office of Public Affairs and Information Services at 326-2180 or Rodríguez at 326-2517.
The Honor Roll

New York University

Outstanding Energy, Vitality, and Resources

BY ROGER DEITZ

When NYU President I. Jay Oliva speaks of his university and the students who attend, he does so with a passion and perspective gained over a long association with NYU and its namesake city. To Oliva, and to so many fortunate NYU students who have access to the finest libraries, museums, galleries, performance venues, and the like, New York City and the University are so complementary that they sometimes seem like one and the same. Dr. Oliva reflects, “I grew up in New York, and I have been at this university for nearly 40 years. It is simply wonderful to know how many talented young people want to come to this city and to this university to study. The three-way match offered by NYU, this city, and the potential of these fine young men and women holds incalculable promise.”

“For more than 150 years since its founding,” he says, “NYU has been home to talented scholars, artists, writers, and others who have been drawn from all over the world to study, teach, perform, and create. We have achieved an international distinction in a wide range of areas.” He mentions areas as diverse as health, law, and the performing arts. President Oliva notes the University is currently undergoing a period of growth—the most active physical development since the institutions’ founding in 1831, with “new international centers of study, classrooms, research institutes, laboratories, computer centers, sports centers, student housing, and dining facilities.”

The fact is, New York University is one of the largest private universities in the U.S., and it has the largest population of international students of any U.S. college or university. Situated in New York City’s historic Greenwich Village, NYU has some 13 colleges and schools that conduct cutting-edge research and provide education in the arts and sciences, law, medicine, dentistry, business, nursing, education, the cinematic and performing arts, social work, public service, and administration, and more.

Greenwich Village has always been a vibrant, trend-setting New York neighborhood, with its musicians, poets, and social activists. The location seems to influence the personalities of the institution, and vice versa. The Village is in the heart, some say the soul, of New York City. It has also been greatly enriched by the dynamic waves of immigration and the international flavor of the residents, coffee-

Dr. L. Jay Oliva, New York University president

Because of NYU students' interest in studying abroad, the University has invested in a strong network of foreign programs (of NYU's own model) designed to assure that students get credit for their work and that their semester abroad actually advances their academic endeavors. The University has its own buildings and strong connections to the local universities in Florence, Madrid, Paris, Prague, and this coming year, London and Dublin. In the next couple of years, the school will be looking to establish centers in Asia and South America. NYU at present also has more "international houses" (buildings dedicated to a particular region and culture) than does any other U.S. college or university. They include the King Juan Carlos I of Spain Center. The Center serves as an anchor for events and study of the Spanish-speaking world. The University's emphasis on global scholarship and international education is not a trendy move but an original NYU idea assimilated into its very fiber from its earliest days. From the beginning, NYU's leaders chose to model itself after the great urban institutions of Europe, such as Charles University and the University of Paris.

When NYU looked for a peer group of sister institutions with which to associate, it sought partnerships with urban universities around the globe. This led to the establishment of the League of World Universities, which NYU chairs Dr. Oliva is one of the principal architects of NYU's international strategy and is chair of the League of World Universities.

"to a remarkable degree," he observes, "the same issues confront

universities throughout the world, whether they be in the U.S., Latin America, Africa, or elsewhere. That has been one of the most compelling lessons of our previous summit meetings." Last year, the president joined rectors and presidents from 39 countries for a League Conference. They gathered to hear from foundation heads, corporate leaders, and higher education administrators on the issues of fundraising, tuition, and continuing education programs. Olivi
nyu has its own buildings and strong connections to the local universities in florence, madrid, paris, prague, and, this coming year, london and dublin.
The McNair Legacy

"Before you can make a dream come true, you must first have one.

BY MARILYN GILROY

Each year, thousands of undergraduate college students are inspired by these words from Dr. Ronald E. McNair, whose legacy has been preserved through the McNair Postbaccalaureate Achievement Program, also known as the McNair Scholars Program. McNair, the second African American to fly in space, was one of seven astronauts killed on January 28, 1986, when the Challenger space shuttle exploded in mid-air and crashed into the ocean. (See sidebar)

The program was started in 1989 by the U.S. Department of Education and named after McNair as a means of acknowledging his scholarship and achievements. It is part of the federal TRIO Program, which includes Upward Bound, Talent Search, Student Support Services, and Educational Opportunity Centers. The McNair Scholars Program offers students exposure to the techniques used in major research programs by allowing them to conduct research under the guidance of graduate mentors from the disciplines in which they hope to pursue graduate study. The student scholars present their findings at a local colloquium or national conference.

The underlying assumption of the program is that there are exceptional individuals from low-income backgrounds who might make excellent university professors but have never pursued this option because they lack the funds, confidence, or academic preparation. The McNair Scholars Program supports institutions in their efforts to identify these students and offer a pathway to graduate school.

In order to qualify for the program, students must be engaged in full-time study and fit the following criteria:

* a first-generation college student (neither parent has received a bachelor's degree) with a low-income level, as established by the U.S. Department of Education
* U.S. citizen or permanent resident
* a member of a group that is underrepresented in graduate education, which includes African Americans, Hispanics, Native Americans, and Alaska Natives
* a 2.8 GPA
* Indication of a serious desire to pursue graduate study leading to a Ph.D.

Once accepted, adhere to standards for administering the grant monies.

Mary Gonzalez, who directs the McNair Program at Texas A&M-Kingsville (TAMUK), believes the groundwork in 1995 to get her institution involved in the program. In addition to completing the application, Gonzalez lobbied to secure administrative support and to find faculty mentors. But her work paid off, and she now directs the Texas A&M-Kingsville Program, which has been considered a model for others. During last year's funding cycle, TAMUK was the only institution to be granted funding over five years (1999-2004) based on its high standards of program management.

Even though she has primary responsibility for administering the program, Gonzalez enjoys working closely with the McNair scholars. Her relations with them starts in the recruiting phase.

"I work with them usually at the junior level," says Gonzalez. "I recruit across campus to find individuals with a sincere interest in performing undergraduate research and interview each one of them personally.

Once students are enrolled, Gonzalez views their progress and when they are ready to present their research at conferences, she is on the role of "coach."

"They're nervous about presenting their work," said Gonzalez. "But I make them practice over and over again as if it's their graduation." She said. "By the time they get to the conference, they are polished and confident."

Gonzalez says that the conference presentations are a critical part of the McNair Program because students often have to measure up to the protocols and scholarly standards required to present at national research meetings or other academic gatherings.

</table>
ferences that are discipline specific. Some of them might even have their work published in abstract or full-text format.

Watching the McNair scholars advance through the program and reach their goals is the ultimate satisfaction for Gonzalez. She fondly recalls one of the participants, Michael Hernandez, who started his education at Del Mar Community College and has just entered the Ph.D. program at the University of Texas at Galveston.

“Michael is one of the jewels of the program,” said Gonzalez. “He had a difficult time because his mother died of cancer when he was very young. He floated around a lot, but he finally landed in the McNair Program under the guidance of faculty member Dr. John Perez.”

Perez, a biology professor, has taken the lead in introducing Hispanic students to the techniques of science and has received a mentoring award from the Society for Advancement of Chicanos and Native Americans in Science. Recently, Perez was nominated and chosen as “Mentor of the Year” by the national McNair Scholars Program.

This year he has been working with Arturo Castilleja, a chemical engineering major who worked on a climate control system for the University’s serpentine that simulated the natural environment of snakes. Using real-time climate conditions downloaded continuously from the Internet enabled Castilleja to simulate each individual snake’s habitat so that they could reproduce in captivity. Castilleja presented his research last fall at the national annual Mid-America Association of Educational Opportunity Program Personnel conference in Wisconsin.

Other McNair scholars include Daniel Gonzalez, a junior biology major whose research was titled “Molecular Characterization of an Open Rectifier Potassium-Channel Gene in Drosophila melanogaster,” and Yvonne Puente, a senior chemical engineering major who is developing a computer-operated data station and using it to study gaseous pyrolysis reactions.

“I’m very gratified that there are female McNair scholars,” said Mary Gonzalez. “They are not defined as ‘underrepresented’ by the U.S. government, but I don’t necessarily agree with that.” However, Gonzalez remains a staunch proponent and avid spokesperson for the program. She has been recruited by officials in Washington, D.C., to train those who direct McNair Programs at campuses across the country. It is obvious that she is proud to be a part of continuing the legacy of Ronald McNair.

“I make sure that our students get an early orientation to Dr. McNair and understand fully who he was and what he achieved,” said Gonzalez.

“I once invited Cheryl McNair [his widow] to meet 75 program scholars who were presenting at a local conference in Texas. It was a very moving experience—for them and for her.”

Dr. Ronald E. McNair: A Profile

Ronald Ervin McNair, the second American to fly in space, was born in 19 Lake City, South Carolina. The son of a mechanic, he overcame poverty and prejudice and graduated as the valedictorian of his school class in 1957. McNair persevered in education and completed his bachelor’s degree cum laude, from North Carolina University. Five years later, he earned a Ph.D. in physics from the Massachusetts Institute of Technology.

McNair was nationally recognized for his work in the field of laser physics, receiving many honorary degrees and a score of fellowships and commendations. His achievements were not limited to academia. He was a degree black belt in karate and was an accomplished saxophonist. McNair and his wife, Cheryl Moore, had two children.

In 1978, McNair was one of 35 individuals selected for the NASA space program from a pool of 10,000 applicants. His life ended tragically on January 28, 1986, when the Challenger space shuttle exploded and crashed into the Atlantic Ocean, taking the life of six crew members.

Inclusive Classrooms:
Part One of a Two Part Series

Choosing Course Content/Increasing Awareness of Problematic Content

For faculty who wish to make their classrooms more inclusive, there are many superb resources available—in journals (both print and online and books and conference Web sites. When we came across “Creating Inclusive College Classrooms” on the Web, we knew that we had to arrange to reprint it so as to make it available to readers of The Hispanic Outlook. It is among the most thoughtful, constructive, concrete, and practical material of its kind that we have seen.

Below is the first half (Choosing Course Content, Increasing Awareness of Problematic Assumptions). Our next issue, May 5, 2000, will include the second half (Planning Considerations: Getting to Know the Students; Decisions, Comments, and Behaviors During the Teaching Process).

Wishing to acknowledge fully the scholarship that has gone into “Creating Inclusive College Classrooms,” HO spoke with co-author Shari Saunders, currently coordinator of the Transforming Communities Project at the University of Michigan.

The Center for Research on Learning and Teaching was established “by the faculty of the University of Michigan in 1962 to support and advance learning and teaching at the University.” Its purpose is to provide “a broad range of instruction-related services, including consultations, roundtables, workshops, and retreats; classroom assessment strategies and support; orientations for new faculty and graduate student instructors (GSIs); publications; and grants competitions.” The CRIT has a staff of 16 and serves all 19 schools and colleges at the university.

Saunders joined CRIT as its first coordinator of multicultural teaching and learning services in 1995. A primary activity during that first year was a series of focus groups with students from various racial/ethnic backgrounds. “This project, designed to document multicultural teaching and learning issues from an undergraduate student perspective,” Saunders told HO, “provided the foundation for this piece….” I wrote the original version as a chapter for CRIT’s new Handbook on Departmental/Center Development based on a decision by the staff that this Handbook needed to provide direct attention to diversity in the classroom. “The intent of the work was ‘to represent current student experiences in the classroom, to address multiple kinds of diversity (including race/ethnicity, gender, and sexual orientation), and to provide concrete guidance to the multiple dimensions of effective multicultural teaching, including classroom climate, pedagogical strategies, and curricular reform.”

Diana Kardia, currently director of CRIT, joined the Center’s staff in 1996 and worked with Shari to update the “chapter” for a 1997 revision of the Handbook. This revision involved a reorganization of the content and the addition of new information and examples. (The revised document is available online.)

Inclusive classrooms are classrooms in which instructors and students work together to create and sustain an environment in which everyone feels safe, supported, and encouraged to express her or his views and concerns. In these classrooms, the content is explicitly viewed from the multiple perspectives and varied experiences of a range of groups. Content is presented in a manner that reduces all students’ experiences of marginalization and, wherever possible, helps students understand that individuals’ experiences, values, and perspectives influence how they construct knowledge in any field or discipline. Instructors in inclusive classrooms use a variety of teaching methods in order to facilitate the academic achievement of all students. Inclusive classrooms are places in which thoughtfulness, mutual respect, and academic excellence are valued and promoted. When graduate student instructors (GSIs) are successful in creating inclusive classrooms, this makes great strides towards realizing the University of Michigan’s commitment to teaching and to diversity and excellence in practice.

In an inclusive classroom, instructors attempt to be responsive to students on both an individual and a cultural level. Broadly speaking, the inclusiveness of a classroom will depend upon the kinds of interactions that occur between and among you and the students in the classroom.

These interactions are influenced by:

- the course content;
- your prior assumptions and awareness of potential multicultural issues in classroom situations;
- your planning of class sessions, including the ways students are grouped for learning;
- your knowledge about the diverse backgrounds of your students; an
- your decisions, comments, and behaviors during the process of teaching.

Each of these five aspects of teaching is addressed in this section. The information will assist you to teach in more inclusive ways. Much of the information in this section was drawn from focus group interviews conducted by CRIT in 1995-96 with female and male students from a variety of racial, ethnic, and religious backgrounds and departments or units. These interviews, students identified multicultural issues related to classroom climate, course content and materials, and teaching methods. The also made recommendations about how classrooms could be made more inclusive. The examples used to illustrate particular issues in the section that follow were taken from comments made by students during the focus group interviews and from the experiences of CRIT staff.
CHOOSING COURSE CONTENT

Some GSIs have a great deal of control over the content of a course, especially the content of their section, while others do not. It is helpful for students to know the extent to which you, as a GSI, have control. If students criticize or make suggestions about course content, texts, material, etc., over which you do not have control, you should convey their comments to the faculty member in charge of the course and encourage them to do the same.

When you have some control over the content (including books, course packs, and other materials), the following two questions and their related suggestions should be considered:

Whose voices, perspectives, and scholarship are being represented?

- Include multiple perspectives on each topic of the course rather than focusing solely on a single perspective. For example, if the topic is "The Great Depression in the USA," the content should not focus solely on the experiences of European Americans. Americans of African and Asian descent, American Indians, Mexicans, etc. had experiences and views that should be acknowledged. It would also be important to include the experiences and views of people with different socioeconomic statuses in this example.

- Include, as much as possible, materials written or created by people of different backgrounds and/or perspectives. If all the authors or creators of materials in a course are male (or female), white (or another group), liberal (or conservative), etc., instructors will be sending a message about the voices that are valued and will be devaluing the scholarship of others who have written or created materials on the topic. (This guideline should be altered appropriately in courses where the focus of the course is to better understand a particular perspective or worldview. Even these courses, however, should be attentive to the range of possible voices on a given topic.) On a related note, it is important to include works authored by members of the group that the class is discussing. For example, if the course deals with topics related to Muslims or Islam and the syllabus does not include materials written by Muslim authors, the message sent to students may be that you devalue the contributions of and scholarship produced by Muslims.

How are the perspectives and experiences of various groups being represented?

- Include materials (readings, videotapes, etc.) that address underrepresented groups' experiences in ways that do not trivialize or marginalize these groups' experiences. Books that include a section on some aspect of diversity at the end of the text or books that highlight women, people of color, people with disabilities, gay men, lesbians, etc., in boxes and not in the body of the text can be seen as examples of the marginalization of these topics, groups, and group members' contributions. When it is important to use such books for other reasons, instructors have a responsibility to make students aware of the texts' limitations at the beginning of the course and to facilitate students' ability to read critically with these issues in mind.

- Be aware of and responsive to the portrayal of certain groups in content. For example, if an Asian country's policies are being used to criticize American policies, the policy of the Asian country should not always be presented as a negative example (e.g., social policies in China) or always used as a positive example (e.g., business in Japan). You need to address the role of foreign policies and not present policies as either wholly good or bad. Treatment ignores the complexity of other cultures' policies or practices.

- Avoid dichotomizing issues of race into black and white. It is essential to recognize and acknowledge that there are other groups for whom the issue is relevant (Arab Americans, Asians Americans, Latin American Americans, etc.). Whenever possible, perspectives on race and gender should be included in course materials. If you have difficulty finding such materials, you should bring other perspectives to course lectures and discussions.

INCREASING AWARENESS OF PROBLEMATIC ASSUMPTIONS

An important early step in developing competencies to address cultural issues in the classroom is to raise your awareness of issues and how they manifest themselves in your teaching. In this process, it is useful to give consideration to the assumptions you may hold about the behaviors and capacities of students. You may also hold assumptions that are tied to students' identity characteristics (race, ethnicity, disability, etc.). These assumptions may manifest themselves in your interactions with students. You may need assistance to become aware of these assumptions. You should consider how getting to know your students to be an ongoing process related to creating a positive classroom climate that promotes excellence.

Below are examples of assumptions, how they might be dealt with, and how you might learn more about your students through the process of addressing these types of assumptions.

Assumptions About Students' Learning Behaviors and Capacities

Assumptions: Students will seek help when they are struggling with

For a number of reasons, students do not always feel comfortable asking for help. In order to address this issue, you can request students as problems arise or make office hours meetings a course requirement (e.g., each student will meet with you after the first assignment). The latter is an ideal approach because it allows you the opportunity to meet one-on-one with each student. It also removes the stigma attached to asking for office hours.

Assumption: Students from certain groups are not intellectually responsible, are satisfied with below-average grades, lack ability in particular subject areas, etc.
It is essential that instructors have high expectations for all students. For example, if a student earns a grade of C or lower, you should inform the student of the need for a meeting to discuss his or her performance. If students are absent, you should show concern about their absence when they return by asking if things are all right with them. If there are repeated absences, you should request a meeting with the student to discuss the situation. It is important for you to make initial contact with students; however, at some point, students need to take the initiative.

**Assumption:** Students from certain backgrounds (e.g., students from urban or rural areas, students who speak with an accent, students from specific racial or ethnic groups) are poor writers.

While the degree of writing preparation varies across the public school system in the U.S., students' regional background or group memberships do not serve as accurate predictors of the degree of preparation they received. Furthermore, you need to be sensitive to cultural differences in writing styles, recognizing that many standards apply to the evaluation of good writing. If a specific type of writing is expected for a given class, it may be useful to assign a short, ungraded assignment early in the term to identify students who may need additional assistance in meeting that particular writing standard.

**Assumption:** Poor writing suggests limited intellectual ability.

It is misleading to equate students' writing skills with their intellectual ability. Students have varying degrees of experience with "academic" writing. You have a responsibility to be explicit about what is expected and share with students examples of good writing done by other students. You should also alert students early on of their need to improve their writing and should suggest resources to them (e.g., English Composition Board's Writing Workshops).

**Assumption:** Older students or students with physical disabilities are slower learners and require more attention from the instructor.

While there are many cultural assumptions about links between age or physical ability and one's intellectual capacity, these characteristics are not typically linked. Most classes do include some students who require extra attention from the instructor, but such students cannot be readily identifiable by physical characteristics.

**Assumptions About Students' Social Identity Characteristics**

**Assumption:** Students whose cultural affiliation is tied to non-English-speaking groups are not native English speakers or are bilingual.

If you feel that it is important to know whether students speak or understand other languages, you should ask this question of all students, not just those to whom you think the question applies. If there are concerns about students' academic writing skills, it would be best to meet with the students during office hours to discuss their work. One of the questions you could ask as part of your data-gathering protocol is "What were the languages spoken in the environment in which you were raised?" Following this question with appropriate probes would give you an opportunity to find out whether students are native speakers of English and, if not, how recently they became fluent. It is important to identify the source of students' difficulty with writing (or speaking), because identification of the factors that contribute to the problem will influence the actions taken to address the problem.

**Assumption:** Students who are affiliated with a particular group (gender, race, ethnic, etc.) are experts on issues related to that group and feel comfortable being seen as information sources to the rest of the class and the instructor who are not members of that group. AND/OR European...
American students do not have opinions about issues of race or ethnicity and members of other groups do have opinions about these issues.

One way to effectively deal with this set of assumptions is to pose questions about particular groups to the entire class rather than presuming that members of a certain group are the only ones who can reply. For example, questions could be phrased so that students would be able to share experiences of their friends or comments that they've heard as well as their own experiences. It would be best to let the class know that if any individual has experiences or information that she or he thinks would be beneficial to the class, she or he should inform you about such experiences or information. If you would like to hear from a particular student on a specific issue that relates to group membership, you should speak with the student privately instead of calling on the student when the issue arises in class. In this way, you can find out the student's ability to comment on the issue and willingness to do so publicly. This would avoid putting the student in an awkward position, particularly if the student lacks knowledge about questions related to his or her group.

Assumption: All students from a particular group share the same view on an issue, and their perspective will necessarily be different from the majority of the class who are not from that group.

You can regularly encourage all students to express different perspectives on issues, and you should not express surprise when people from the same "group" share opposing views or have a view consistent with the majority of the class. It is important to understand, however, that some students who are part of a "group" will feel hesitant to share views publicly that differ from the "anticipated group position" for fear of being admonished by members of their "group" or isolated from the "group" (e.g., an African American student expressing an anti-affirmative action view).

Assumption: In their reading, students will relate only to characters that resemble them. This would most frequently occur in courses in which students read literature. Instructors should be careful not to treat with suspicion comments that suggest affiliation with a character that does not resemble the student in terms of race, ethnicity, gender, etc. For example, if a Caucasian student claims to feel her or his experiences resonate with an African American character, you should not dismiss her or his response, but probe for further explanation about why she or he feels the connection.

Assumption: Students from certain groups are more likely to be argumentative or confrontational during class discussions or not participate in class discussions or bring a more radical agenda to class discussions.

Participation levels vary across all students, with some students more comfortable in listening roles and others more comfortable taking the lead in class discussions. While these discussion styles may be influenced by students' past experiences, families of origin, and cultural reference points, a priori assumptions about student participation may hinder class discussion. It is important that you encourage participation among all students while also respecting the differences among students that will emerge. More equitable discussions can often be created by pre-facing the discussion with a writing exercise that provides all students with the opportunity to clarify their thoughts on the discussion topic. It is also useful to remember that students' participation levels evolve over the course of a term as they become more comfortable with the course, their classmates, and the instructor.
YEARS 2000 U.S. CENSUS
Will It Be Right?

Accurate Count the No.1 Civil Rights Issue, Says MALDEF

BY GARY M. STERN

The 1990 U.S. Census failed to count about one million Hispanics, according to most experts. Though 20 million Hispanics were counted, Hispanics were eight times more likely to be undercounted than were whites, noted Marisa J. Demeo, regional counsel for the Mexican American Legal Defense and Education Fund. Since about $180 billion in federal programs from Head Start, Title I, and day care to building highways are influenced by census data, the ramifications are severe. In fact, Hispanic undercounting was felt most heavily in large urban states such as California, Texas, New York, Illinois, and New Jersey that have the largest Hispanic populations. One question that looms over the year 2000 U.S. Census, which begins this month, is: Can the U.S. Census ensure that the undercounting of one million Hispanics doesn’t recur?

Experts declare that the undercount in 1990 was larger than it was in 1980. In fact, “there’s more resistance to the census” than ever before, noted Jonathan Entin, a professor of law and political science at the Case Western Reserve University School of Law and member of the Population Association of America. “Because it is harder to get people to cooperate, the cost of conducting the census rises,” he said. “At both ends of the sociological scale, you have people who don’t want to be counted.” added Dr. David Murray, director of research at the Statistical Assessment Service, a nonprofit organization, and member of the U.S. Census Monitoring Board appointed by Congress. Certain upper-class people are fearful that completing forms will trigger an I.R.S. audit while poorer people might be “evading the law, engaging in illegal activities, or violating zoning rules,” said Dr. Murray. The U.S. Census will cost $6.2 billion to tabulate the approximately 275 million Americans in 2000, almost double the $3.2 billion cost of the 1990 census. Conducting the census requires hiring 860,000 temporary workers, part-time jobs without insurance benefits that can be hard to fill in an economy with the lowest unemployment rate in history.

The Census Bureau determined that there was an undercount by referring to its “registration system of the record of birth, deaths, immigration, and emigration,” said Dr. Margo Anderson, professor of history at the University of Wisconsin-Milwaukee and author of two books on the census, including Who Counts? the Politics of Census in Contemporary America. co-authored with Stephen Feinberg. “You have to compare the census data to something else,” she noted, in order to determine that an undercount occurred. In the 1990 Census, she noted, non-Black undercounting was at 1.7 percent. Asian at 3.1 percent, African American at 4.8 percent, American Indian at 5.0 percent, and Hispanic at 5.2 percent. The undercounting of Hispanics is considered 35 per-
cent, which subtracts the white undercounting from the Hispanic percentage. Hispanics are undercounted in greater numbers, said Dr. Anderson, because of "language difficulties, large immigrant population, and because Hispanics are often part of big families in urban areas with high-rise buildings, and live in subdivided buildings." She also noted that nearly half of the undercounting revolves around children, who are either ignored, not living in permanent household, or left off data by parents.

"Language barriers and complex living conditions made more difficult a fear of participating because of the way the data might be used," serve as the primary reasons for the difficulty in counting Hispanics, explained Demeo. In addition, the only interaction many Latino immigrants have with the federal government is with the Immigration and Naturalization Service (INS), which is often hostile or conflictual. But the U.S. Census Bureau is entrusted with counting anyone living in the United States, whether documented or undocumented. Demeo noted that there isn't even a place on the census form that asks if someone is here legally or illegally, though one form does ask if the person is a citizen.

What most Hispanics and other minorities fail to realize is that by law, the information gathered by the U.S. Census must remain confidential. Any U.S. Census employee who was found to divulge census information could be found guilty of committing a federal crime. Entin noted that "census information can not be given to anyone in federal, state, or local government."

The U.S. Census Bureau works closely with the U.S. Postal Service and with local municipalities to include the addresses of every living American. It then sends questionnaires to people to be filled out and returned. The Census Bureau predicts that 61 percent of all households will return the initial questionnaire sent to them. If the questionnaire is not returned within six months, a second questionnaire is sent. If the second questionnaire is not returned, the Census Bureau then sends out an "enumerator" to the housing unit to interview people face-to-face. "In cities like San Antonio, Los Angeles, or Miami, they will be sending Spanish-speaking staff who live in the local neighborhoods," Entin said.

In addition to hiring more Spanish-speaking staff, the Census Bureau hired a global ad agency Young & Rubicam to conduct a $102 million advertising campaign urging people to participate in the census. The marketing campaign will be in the vernacular of the people who speak the language, in Spanish, in the vernacular of the vernacular of the people who speak the language, in Spanish, in the vernacular of the vernacular of the people who speak the language, in Spanish, in the vernacular of the vernacular of the people who speak the language. Young & Rubicam's ads will be to be shown on Spanish-language broadcast and on Spanish radio stations, telling people how important it is to complete questionnaires and how the information is kept confidential. In addition, a series of public service announcements is addressed to newer immigrants that include ads on Spanish TV, radio, and in Spanish periodicals.

The Census Bureau will do everything it did in 1990, set forms to every single house, en masse to every single place that has an address for from the U.S. Post Office and state and local governments. Once all that is said is done, they will still have no more people," noted Demeo. The Mexican American Legal Defense and Educational Fund and other Hispanic organizations lobbied for sampling as the only way to accurately count Hispanics.

Sampling enables the Census Bureau to take a statistical extrapolation in certain designated communities of 300,000 households. According to Demeo, the Bureau determined the 1990 count fell short by roughly 47 million people (less than two percent of the total population).
returns enumerators to households to interview people again, and if they discover that six people were living in a household rather than the four that were reported, they extrapolate the correct number and multiply that by a statistical percentage of the 300,000 households. The National Academy of Scientists in 1990 recommended using sampling to ensure accuracy. The U.S. Census Monitoring Board pointed out by a Republican majority Congress in its executive summary stated unequivocally that “statistical adjustment, heralded as a kind of statistical remedy, will fail in its main charge: to prevent traditionally undervalued communities from receiving less than their fair share of representation and funding.”

Dr. Murray, a member of Congress’ U.S. Census Monitoring Board, contends that sampling “provides one kind of accuracy but at a certain expense. It fails to tell us exactly where people live and how they live. All it does is provide an estimate of how many people were missed. Can we adjust the population? Absolutely. Can you adjust the local count to satisfy the second criteria of where people live? You can’t.” He asserted that sampling enables the Bureau, by analogy, to count the number of jellybeans but not to tell you where the jellybeans are located. What would Dr. Murray suggest that the U.S. Census do to count minorities accurately if sampling has its drawbacks? “I’d prefer to see it gear up and do the rough work of having enumerators do a better job of doing the census all along. The jeopardy is greater when you use sampling rather than missing by enumeration. You don’t have the same accountability when you yield to a centralized computer to correct an imbalance.” He’d prefer local officials play a greater role in helping instill trust in minority populations to fill out forms and be counted.

The Congressional Monitoring Board based its views on sampling on the 1990 U.S. Census, noted Dr. Anderson. “The sampling for the 2000 census will be twice as large a sampling and therefore will be more accurate. Moreover, sampling has become an accepted strategy to forms. Currently, forms are written in English with one or two lines that direct Spanish-speaking people to check a box to have forms mailed to them in Spanish. “Most people whose primary language is Spanish won’t read this letter,” said Demeo and won’t get to the one or the U.S. is also raising questions about peoples ability to fill out census forms. Some people will be confused when asked their ethnic group because they are of such mixed heritage. Even golfing star Tiger Woods, who hailed from mixed heritage, might be befuddled about which box to complete, said Dr. Murray.

Most experts agree that the 2000 U.S. Census will document that Hispanics have risen from 22 million in 1990 to about 32 million in 2000. Hispanics will likely surpass African Americans as the second largest group in the United States, after whites.

Will undercounting in the 2000 Census be reduced? That depends on who is voted president, predicts Dr. Anderson. If a Democrat is elected, the odds are strong that Clinton’s policies will continue and sampling will be permitted. If a Republican is elected, sampling will be disallowed. Further, if more than 6% percent of people return their questionnaires, as is expected, the cost of conducting the census will be reduced.

The census is one of the most important issues for Hispanics in the coming decade. “We consider the census the No.1 civil rights issue because so many issues in terms of civil rights are determined by having accurate information of who we are and where we are,” Demeo said.

Voting rights and discrimination cases are influenced by data. “I you have inaccurate data, you have a harder time,” she said.
New Perspectives, New Opportunities through ACE Fellowships

Dr. Estela R. Lopez had given some thought to being an administrator in higher education, but she really enjoyed teaching at the Inter American University of Puerto Rico, and she figured that she would teach for a long time. Her university, however, had other plans for her, and before she knew it, she was thrust into a program that changed her life.

Lopez, who has been provost and vice president for academic affairs at Northeastern Illinois University in Chicago since 1997, was encouraged to apply for and was accepted to the American Council on Education (ACE) Fellowship Program, a prestigious program that for the past 35 years has strengthened colleges and universities by providing comprehensive leadership development for senior faculty and administrators.

ACE Fellows participate in a year-long experience designed to provide them with skills in the leadership and management of change. More than 1,000 institutions have sponsored and hosted these leaders. For Lopez, and perhaps for others, the program can require some sacrifice. Lopez left her husband behind in Puerto Rico for part of the fellowship year and headed to New York with her young daughter.

"We were borrowing clothes from everyone because we didn't have any winter clothing," she laughed. "We were so cold."

Established in 1965, the program has since granted more than 1,280 fellowships—senior faculty members and administrators—the knowledge, skills, and perspectives they need to assume significant leadership roles in higher education.

Overall participation of people of color is 21 percent. Since 1993, each year more than 30 percent have been people of color. Participation has been split evenly between women and men. Thus far, seventy-seven fellows have been Hispanic. Due to special recruit
ment efforts in the past six years. Latinos in each class have ranged from six to 15 percent.

Lopez, an ACE Fellow in 1985-86, spent her first semester in the administration offices of the Inter American University of Puerto Rico, where she had taught Spanish literature, and her second semester in the provost’s office at Hofstra University in Long Island, New York.

"It was wonderful," she said. "I really enjoyed the program and benefited from it. I had been interested in administration, and the program showed me that it was something that I could do. I am a strong supporter of the program."

Lopez returned to Inter American after her fellowship year and quickly moved up, eventually to associate vice president for academic affairs and ultimately to vice president for academic affairs and planning.

Her relationship with ACE did not end with the fellowship year. She has advised others on how to prepare their applications for the program, served on the selection committee for the program, and been a mentor to current Fellows. She won a Senior Fellowship from the organization prior to taking on her current post at Northeastern Illinois University. And Lopez developed a similar fellowship program for her campus in Puerto Rico to give others at her university similar opportunities to move into administration.

"The program exposes you to the issues and gives you a perspective on the complexities of the issues you would face as an administrator," Lopez said.

Participants undertake projects during their fellowship year. These projects are designed to benefit the host institution but also serve to broaden the participants’ perspective.

The program brochure from ACE says that the schools and the fellows both get the following:

- Leadership development experience designed around an issue of strategic importance to the nominating institution;
- A mentor relationship. Fellows are mentored by a team of experienced administrators—usually the president and vice president—and participate in projects and decision-making meetings;
- Renewed commitment to the advancement of teaching and learning;
- Observing how other colleges and universities address challenges and solve problems; and
- Participation in national networks of leaders and institutions.

Dr. Viola E. Florez, dean of the College of Education at the University of New Mexico in Albuquerque, N.M., said that the contacts she made as a fellow in 1993-1994 were invaluable. Participants have access to a national higher education leadership network called the Council of Fellows, the program’s alumni organization. Council members serve as alumni mentors to the newly designated Fellows, helping them throughout the course of their fellowship.

Of the 1,200+ alumni, more than 200 have become college and university presidents; more than 400 have become provosts, vice presidents, and vice chancellors; and more than 600 have become deans.

"To this day, I can still pick up a phone, e-mail or write a letter and be in touch with one of my colleagues," Florez said.

Florez was a department chair at Texas A & M when she was accepted into the ACE program. She spent one semester of her fellowship year in the chancellor’s office at her university and a second semester at Arizona State University in Tempe, Ariz.

"This program helped me focus my direction," Florez said. "It’s an excellent program for both professional and personal goals. It’s a good time to reflect, study, and look at leadership. It helps you do some self-assessment."

Florez said that another important part of the program was the perspective it offers to participants. She said that as a department chair, her focus was narrow.

"This program lets you look at higher education as a whole by looking at higher education issues across the country," Florez said.

Dr. Juan E. Mestas, chancellor and professor of foreign languages at the University of Michigan-Flint and an ACE Fellow in 1989-90 at the University of Pennsylvania, agreed.

"If I had to pick just one among the many important things I learned as an ACE Fellow, I’d say it was to understand the whole panorama of higher education in its many manifestations and from multiple perspectives," Mestas said.

"That expansion of my view would not have been possible without the ACE Fellows Program."

Mestas, who was deputy chair for the National Endowment for the Humanities in Washington, D.C., prior to becoming chancellor, said that the experience with the ACE
Fellowship Program "turned my career around." One year after returning to the institution he had come from to participate in the ACE Fellowship Program, California State University-Long Beach, he was hired as vice provost, dean of students, and associate professor of foreign languages at Portland State University. And later, he moved to NEH to join his mentor while in the ACE program. Sheldon Hackney, former president of the University of Pennsylvania, who had been appointed chair of the endowment.

"The ACE Fellowship had opened a world of possibilities for me," said Mestas, who, as part of his ACE fellowship year, served as part of the research and editorial staff of Policy Perspectives, an influential periodical produced by the University of Pennsylvania's Institute for Research on Higher Education. As part of his project for the ACE fellowship, he was asked by the president to study the relationship between the university and the surrounding community, focusing on volunteerism.

"One of my recommendations to President Hackney was to establish a Center for Community Partnerships," Mestas said. "To my surprise, he loved the idea and suggested that the university buy a building for that purpose. I believe the center is still in place, doing good work."

The Fellows learn about higher education issues affecting the country through dialogues with national leaders, case studies, simulations, problem-solving work-
Career Outlooks for Hispanics

Based on Statistical Projections

BY
Casey Young

Hispanics are poised to make a significant difference in the makeup of the U.S. workforce in the next few decades. According to Census Bureau projections, the Hispanic population should reach close to 17 percent of the total U.S. population by the year 2020. Because they are younger as a group than their white counterparts, their impact will be felt first in the entry-level positions of the new service economy, provided that they understand the importance of education in this economic shift.

Employment data over the last five years are available from the Bureau of Labor Statistics by several breakdowns, including a breakdown of Hispanic occupations in the labor force. Bear in mind that these broad categories include many occupations and many levels. Service occupations, for example, include ushers, lobby attendants, and ticket-takers (minimum-wage occupations projected to grow faster than average), and also computer systems analysts (highly paid computer specialists who have the fastest-growing job projections). The bureau's degree along with a good command of the English language (both written and verbal) will enjoy a higher standard of living over the next few decades.

The Past

The following information is based on Bureau of Labor Statistics data available via the Internet (figures are based on statistical reports obtained from the Bureau. The article looks at broad categories of occupations held by Hispanics over the last five years and breaks down the most frequently held categories by sex. These data are contrasted with the occupations and pay structures held by the white and African American communities.

In 1994, three broad categories of industries for Hispanics 2 years and older in the United States were services (2 percent), manufacturing (20 percent), and wholesale and retail trade (22 percent). Within wholesale and retail trade, 8 percent of the occupations were in retail, with occupations in eating and drinking establishments making up over one-third of that total.
third of that category. (See Sidebar One for a further breakdown of professional and related services.)

The Bureau of Labor Statistics shows that men predominate in manufacturing (67 percent) and trade (63 percent) and women predominate in services (57 percent). (See Figure 1.) Within services, men were predominant in business, auto, and repair services (about 36 percent of all men in services), personal services outside of private households (about 35 percent), and educational occupations (about 34 percent), while women overwhelmingly were in professional services, with about 21 percent of all women in services in education, about 17.5 percent in health services outside of hospitals, and 10 percent in social services. Women also work in business, auto, and repair services (about 11 percent), and personal services outside of private households (about 12 percent of all women in services).

The Present

For Hispanics, these breakdowns remained fairly constant from 1994 to 1999. In 1999, the percentage of Hispanics working in service occupations was at 31 percent, in manufacturing at 16 percent, and in trade at 21 percent. (See Figure 2.) Construction had taken a swing up, and manufacturing had gone down as a percentage of the work force. Breakdowns between male and female representation remained about the same.

Looking at the data from another point of view, the nation as a whole in 1998 was continuing towards an economy more heavily invested in services. (See Figure 3.) This chart displays a combined total of 37 percent for the professional and services categories. Agriculture is barely represented, while sales are a respectable 12 percent of the total. Production, which includes manufacturing, is represented at 26 percent.

A note about Hispanics in agriculture—many of the agricultural jobs are given to people from other countries, notably Mexico. There is a high turnover rate in these jobs. People who have demonstrated management skills in another arena, not those picking strawberries working their way up the ladder, usually hold the management jobs in agriculture. As the need for agricultural jobs goes down, it is possible that fewer people will come in from other countries to do these jobs.

1999 data as a whole show that Hispanics average the least amount of weekly wages when compared to whites and African Americans. (See Figure 4.) Some of that can be traced to the occupations of Hispanics as a whole. For example, a report in the July 12, 1999, Newsweek edition noted that "15 percent of Hispanics work as managers; 31 percent of non-Hispanics do." Especially in the academic job market, a study done for Sociological Perspectives suggests that "while women and African Americans are slightly underrepresented among hires, Latinos and Asians are more seriously underrepresented."

The Future

It is clear from the projections that there are certain categories of occupations that will enjoy good employment rates in the next 10 to 20 years. It is important to remember that not all occupations within these categories will enjoy the best employment and wages. Most of these employment opportunities are in the services sector of the top 25 projected occupations with fast growth, high pay, and low unemployment that have the largest numerical growth. 18 require advanced degrees. (See Sidebar Two.)

• More Employment Opportunities

The labor force will grow more slowly (about 1 percent) than it did 1976-86, but employment will increase by 14 percent. 94 percent of this increase will be wage and salary workers, but self-employed workers will increase to 11.6 million in 2006. Employment growth of Hispanics, Asians, and other races will be faster than for African Americans and white non-Hispanics. Since the growth of Hispanics in the labor force will be gradual, based mainly on immigration, white non-Hispanics will still outnumber the other races in the workforce in 2006. This will probably change as time goes on and the new generation of U.S.-born Hispanics enters the workforce.

The number of women in the workforce will increase from 46 to 47 percent, which is the same gradual growth we've been seeing over the past decade. Traditional "men's jobs," such as manufacturing, construction, and agriculture, will decline because of the shift to service-producing economy.

• Older Work Force

The work force will become older. According to Newsweek, the median age of Hispanics is between 25 and 30, with African American median age a little over 30, and whites median age in the mid-30s. Based on the Bureau of Labor Statistics' projections and the population projections, it is apparent why the white non-Hispanic will still dominate the workforce, least until some point after 2010.
Many management jobs, as well as jobs that count experience as an important factor, will still be dominated by white non-Hispanics.

- **Services Will Dominate**
  
  Employment in service-producing industries will increase faster than average, with growth near 30 percent. Occupation categories that stand out are service and retail trade businesses, health services, educational services, and computer and data processing services. As the population ages, the health care industry will see significant growth. Computer services will continually be required as new technology emerges. Given the predominance of Hispanic youth in the U.S. population as a whole, and the dominance of youth in the computer industry, Hispanics should be poised to enter this industry in great numbers. However, white youths have an advantage. According to *Newsweek*, “22 percent of Hispanics have Internet access at work or at home; 43 percent of whites have Internet access.”

  Projected employment growth in the construction and agriculture industries will be offset by a decline in manufacturing and mining jobs. Manufacturing will account for 13 percent of total wage and salary worker employment in 2006, compared to 15 percent in 1996. Based on the statistical analysis of the five years noted above, the Hispanic community is already feeling the decline in the manufacturing sector.

- **Higher Education a Must for Good Pay**
  
  Education is essential in getting a high-paying job. Many occupations—for example, registered nurses, blue-collar worker supervisors, electrical and electronic technicians/technologists, automotive mechanics, and carpenters—do not require a bachelor’s degree yet offer higher than average earnings. Some of these jobs require an associate’s degree, but many require long-term on-the-job training.

  Most of the education and training categories projected to have the fastest growth require at least a bachelor’s degree (secondary school teachers, special education teachers, college and university faculty). All occupations within the education and training category that do not require a college degree are projected to grow slower than average.

  Labor force groups with lower than average educational attainment in 1996, including Hispanics and African Americans, will continue to have difficulty obtaining a share of the high-paying jobs unless they raise their educational attainment. Although high-paying jobs will be available without college training, most jobs that pay above-average wages will require a college degree.

### 1999 Hispanic Occupation Breakdown

- **Manufacturing**: 16%
- **Services**: 31%
- **Construction**: 12%
- **Trade and utility**: 21%
- **Agriculture and mining**: 5%
- **Health**: 18%
- **Finance, insurance, and real estate**: 8%

### Figure 3: 1998 Occupation Breakdown of All Ethnic Groups

- **Managerial**: 7%
- **Professional**: 21%
- **Sales**: 12%
- **Clerical**: 17%
- **Production**: 26%
- **Agricultural**: 1%
- **Services**: 18%
- **Transportation/Communication**: 7%
Figure 4: 1999 Median Weekly Earnings

According to the Occupational Outlook manual for 1999-2000, the following occupations have growth, high pay, and low unemployment, and will show the largest numerical growth, projected to 2006. They will account for 27 percent of all job growth. They are listed in descending order of opportunity:

- Systems analysts
- General managers and top executives
- Registered nurses
- Teachers, secondary school
- Clerical supervisors and managers
- Database administrators and computer support specialists
- Maintenance repairers, general utility
- Teachers, special education
- Computer engineers
- Social workers
- Food service and lodging managers
- College and university faculty
- Engineering, mathematical, and ar
graphic design
- Licensed practical nurses
- Financial managers
- Marketing, financial, and public relations managers
- Computer programmers
- Instructors and coaches
- Lawyers
- Physicians
- Electrical and electronics engineers
- Corrections officers
- Securities and financial services sales workers
- Physical therapists
- Artists and commercial artists

population ages 25 and over with some college training increased from 51 percent in 1987 to 55 percent in 1997. Those with a bachelor's degree increased about two points (from 8 percent to 10 percent). There will need to be a dramatic increase in the number of Hispanics in college in order to take advantage of the 60 percent of the occupations that will require advanced degrees.

Who's Producing the Most Minority Ph.D.'s?

UC-Berkeley in the Lead

BY AMALIA DUARTE

During the 1990s, just a handful of graduate degree programs in mathematics, the physical sciences, and engineering accounted for nearly half the doctorates awarded to minorities in these disciplines, according to a recently released report from the Quality Education for Minorities (QEM) Network.

From 1990-97, there were 27 institutions in the United States and Puerto Rico that stood head and shoulders above the others in terms of producing minority Ph.D.'s in these areas of study. Each of these schools awarded more than 20 doctorates to minorities in mathematics, the physical sciences, and engineering during this time period.

And these schools aren't succeeding just at the graduate level. QEM researchers found quite a bit of overlap when they compared these 27 institutions to schools in a 1997 study that were ranked as leaders in granting undergraduate degrees in the same areas of study. Cornell University, Texas A&M University, the University of Maryland-College Park, the University of Michigan at Ann Arbor, and the University of Puerto Rico-Rio Piedras campus all are among institutions that achieved success at both the undergraduate and graduate levels.

It's a particularly interesting finding because the two studies looked at different sets of schools. The doctorate study surveyed all 320 Ph.D. programs in these fields, while the 1997 study focused on institutions in 17 states, where minorities constitute at least 25 percent of high school graduates, plus Puerto Rico. "We found there was significant overlap on the two lists," said QEM President Dr. Shirley McBay. "And we aren't sure about the reason for this. It may be field, followed by the physical sciences and mathematics.

Again, QEM officials are not quite sure what conclusion(s) to draw. Just who is included in the Hispanic group? Does it include a high number of Latin Americans who came to the United States to earn a Ph.D.?

QEM is sure about one thing: these schools serve as role models to other institutions. QEM honored these 27 universities in February during the Ninth Annual National Conference of QEM's Mathematics, Science and Engineering (MSE) Network. The theme of the gathering was "Preparing Ph.D.'s for Success in the 21st Century." The conference emphasized programs and strategies for preparing and supporting minority students through the successful completion of doctoral study in mathematics, the physical sciences, and engineering.

At the conference, representatives from 25 of the 27 institutions named in the study as top Ph.D. producers came to be honored. "We like to highlight the positive and give recognition and support to those institutions that are making a difference," said Dr. McBay.

QEM is a nonprofit organization dedicated to improving education for minorities. Established in 1991, the MSE Network is comprised of minority and non-minority institutions and organizations that advise...
and help guide QEM's efforts in this critical area. QEM specifically focuses on addressing the needs of African Americans, Alaska Natives, American Indians, Mexican Americans, and Puerto Ricans throughout all levels of the educational pipeline.

The recent report highlighted some of the factors that made these 27 institutions consistently able to graduate minority Ph.D.s in areas where they are sorely underrepresented. The schools are a diverse group, drawing from areas where there are large minority populations to parts of the country where few minorities live. But overall, four key factors seemed to provide the foundation for success at these schools: recruitment, financial aid, retention, and faculty advising. "When you look at these four areas together," said Dr. J. Arthur Jones, senior associate at QEM, "it produces a climate that tells the student, 'You are welcome here.'"

Many of the schools on the list employed faculty with reputations for advising minority students. "These faculty are major contributors to the institutions' output of minority MPSE doctoral degree recipients," states the report.

A number of these institutions also make a concerted effort to recruit at schools with large minority populations, including Historically Black Colleges and Universities (HBCUs), Hispanic-Serving Institutions (HSIs), and tribal colleges. "They made a special effort to visit these schools and talk with students," said Dr. Jones. "And they did special things through financial aid and fellowships, such as graduate teaching assistantships and graduate research assistantships, including positions that were reserved for minorities."

These leading Ph.D. producers go the extra mile for minorities, creating special offices that target minorities for recruitment and make sure they stay on track after enrollment. For example, the University of Florida, which ranked #8 in the QEM study, established the Office of Graduate Minority Programs (OGMP) in 1984. The office was created to increase the number of minority graduate students and to provide those students with academic programs and services to assist and support the successful pursuit of graduate education. The office handles everything from recruiting and campus visitations for prospective students to tutoring and open houses. Additionally, the office pushes for accountability by monitoring the numbers of minority students enrolled in graduate programs. A number of the University's colleges also support special recruitment programs. And the University collaborates informally with four HBCUs and two HSIs through the Florida/Georgia Louis Stokes Alliance for Minority Participation in Mathematics, Science and Engineering. Acting as role models and mentors are numerous minority faculty, including 38 in the MPSE departments.

On the West Coast, despite passage of a referendum eliminating affirmative action in California's public universities, a total of four UC schools—UC-Berkeley, UC-Davis, UCLA and UC-San Diego—made the list. In fact, topping the list was the University of California-Berkeley, at which 89 minority students earned their Ph.D.s. The school was the site of the most Ph.D.s earned in mathematics—34—and highest number for engineering with 50 (tying with the Georgia Institute of Technology). And perhaps most impressive, in the physical sciences, 25 doctorates were awarded at UC-Berkeley to non-Asian minorities. Only three other schools, Howard University, Texas A&M, and the University of Puerto Rico-Rio Piedras, did better at producing minority doctorates in the physical sciences.

Stanford was another standout. Stanford has an "aggressive diversity program for graduate student recruitment," states the QEM report. A special diversity orientation sponsored by the School of Engineering, seminars that focus on diversity issues, four ethnic centers on campus, minority study organizations, and summer programs for minorities are just a few of the noteworthy elements at Stanford that are cited in the QEM report. There are undergraduate bridge programs with HBCUs and HSIs, and the university has 1 minority faculty members in it.

MPSE departments. At the same time, informal dinners and lunches with faculty, staff, alumni and even industry representatives enhance the experience for minorities. "Stanford is a great example of how universities can create an infrastructure of support for minority students from the special financial aid opportunities to the student centers," said Dr. Jones.

Taken as a whole, these institutions of higher education offer a lesson to other colleges and universities on how to succeed in areas where minorities are scarcest in the academy, but even the success of these schools barely makes a dent compared to the overwhelming numbers of Ph.D.s conferred on whites. "It's definitely a case of 'Is the glass half empty or half full?'" agreed Dr. McBey. "But we chose to focus on the positive and give these institutions recognition and encouragement to do even better."

Analia Duarte is a public relations manager at Lucent Technologies.
Franco Discusses Nature of Memory and Communication at Texas-Austin

Jean Franco, author of more than five books and dozens of articles on Spanish and Latin American culture and literature, discussed "Memory and Memoirs in the Post-Dictatorship Literature of the Southern Cone" at the University of Texas (UT)-Austin. Franco was a keynote speaker at the 10th Hispanic and Luso-Brazilian Literatures and Romance Linguistics Conference, sponsored by the UT-Austin department of Spanish and Portuguese. Noted sociolinguist Roger W. Anderson delivered a keynote address on "Thematic Streams in Conversation" as applied to the Creole language of Papiamentu, which is spoken on islands off the coast of Venezuela and incorporates elements of Portuguese, Spanish, and Dutch.

Franco, professor emeritus at Columbia University, was the first professor of Latin American literature in England and taught at the University of Essex and the University of London.

HACU Names Executive Director of Member Services

Mariana Peralta Sharp, a former executive at the national Avance Inc. Family Support and Education Program, was named executive director of member services for the Hispanic Association of Colleges and Universities (HACU).

Sharp now oversees services to member institutions, including collaborative programs and national and international conferences for HACU, the nation’s leading Hispanic higher education association, which represents more than 290 colleges and universities with high Hispanic student enrollment rates in the U.S., Puerto Rico, and abroad.

Sharp, who has a bachelor’s degree from the University of Miami and a certificate of graduate studies from UC-Davis, is pursuing both a law degree and master’s at St. Mary’s University in San Antonio.

Alligator Press Links up with Spanish Literary Agency

Alligator Press (Texas) has announced a relationship with A.C.E.R. Literary Agency, Madrid, Spain. A.C.E.R. is the second largest agency for Spanish language rights and has been in business for 40 years.

Alligator Press is committed to publishing quality titles in world literature, expanding its vision beyond the boundaries of language, geography, and culture. An independent publisher of quality trade books, the company is dedicated to the production, distribution, and promotion of mainstream literature. Its primary goal is to encourage exchange between the English and Spanish literary worlds.

New Mexico Researchers Work on Endeavor's Antenna Mast

Two researchers from the University of New Mexico (UNM) are helping the Space Shuttle Endeavor to generate the most accurate and extensive topographical map of the earth.

UNM civil engineering professor Arup Maji and graduate student Lorena Sanchez helped create composite rods, which were manufactured at the Air Force Research Laboratory (AFRL) by a team of UNM and AFRL personnel. The five-eighths-inch diameter rods, made with carbon fiber and epoxy matrix, constitute a 10-foot antenna mast, the longest rigid structure ever to be deployed in space.

"I am pleased that I was able to contribute to the Endeavor’s mission of generating intensive maps of the earth," said Sanchez.

"The rods created for the mast are an alternate to other materials used in the past."

Yale Hosts Rebellious Lawyer Conference

Yale Law School (Conn.) held an event exploring "Innovative Advocacy for a New Millennium," the 6th annual Rebellious Lawyer Conference. Practitioners, law students, community activists, and advocates from around the country discussed innovative and progressive approaches to law and social change. Panels explored asylum, environmental justice, the death penalty, welfare reform, and nontraditional methods of legal and quasi-legal representation, including grassroots organizing and alternative approaches to impact litigation, direct services, and criminal defense.

Gerald P. Lopez, professor of law at the UC School of Law, and author of Rebellio...
Huerta and Martinez Visit Western Oregon

University’s multicultural student union recently sponsored the annual Women of Color Conference, in celebration of Women’s History Month. The theme was “Women’s Voices in the 21st Century.”

Renowned civil rights activist Dolores Huerta, co-founder of the United Farm Workers of America, was a keynote speaker. Together with César Chávez, Huerta founded the Robert F. Kennedy Medical Plan, the Juan De La Cruz Farm Worker Pension Fund, and the Farm Workers Credit Union, the first organizations of their kind for farm workers. Huerta is vice president of the Coalition for Labor Union Women and of the California AFL-CIO, and on the board of the Fund for the Feminist Majority, which advocates political rights and equal rights for women.

Demetria Martinez, a novelist, poet, columnist, activist, and teacher known as a champion of free speech and religion, was another keynote speaker.

Texas-San Antonio Honors “Women Who Inspire”

The University of Texas-San Antonio looked back at women who have struggled, prevailed, and inspired others during Women’s History Week in March. Organizers chose the theme “Women Who Inspire Us: Imagina El Futuro.”

Adriana Ayala and Gabriela Gonzalez discussed their research on the history of women in South Texas; Ricardo Romo discussed “Mentoring Women”; during “La Lucha: The Struggle,” Minnie Bruce Pratt intertwined poetry and feminist theory to expose racism, sexism, and homophobia; Alicia Guzman translated text by Sor Juana Ines de la Cruz; Shirley Mock discussed “Black Seminole Women in Texas and Mexico”; Juanita Diaz-Cotto discussed “Women’s Prison Writings in the U.S.; and the film The Status of Latina Women looked at the differences between the U.S. Latina and her Latin American and American counterparts.

Washington State Hosts Semana de la Raza

Award-winning author Carlos Muñoz Jr. delivered the keynote address during Washington State University’s (WSU’s) annual Semana de la Raza. An ethnic studies faculty member at the UC-Berkeley, Muñoz spoke about this year’s Semana theme, “Celebrating Our Past, Embracing the Future.”

After more than 30 years of teaching in higher education, Muñoz has gained international prominence as a political scientist, historian, essayist, and public intellectual. Since the 1960s, he has been a central figure in the struggle for human rights in the U.S. and abroad.

Other activities included the presentation of Zapatista, a film portraying the struggles of indigenous people across the world over the last millennium, with a discussion by WSU faculty member José Alamillio; “Pachanga Dos Mil,” a taco bar and potluck, the production of a mural, assisted by artist Alfredo Arreguin; a performance by CHUMSA, a theatrical group from California; and “Down Under,” the 21st annual Gabriel Cárdenas banquet.

William Paterson Symposium on Black and Latino Athletes

The impact of African American and Latino athletes on 20th-century American sport was the theme of a national symposium, “The Coloring of American Sport: Black and Latino Athletes Change the Nature and Meaning of Competition During the Twentieth Century,” held at William Paterson University (WJ).

The event, which drew together distinguished scholars of American sport with pioneering former athletes who pierced the color barrier, was broadcast to a national audience of colleges, universities, and high schools via uplink satellite.

Among the athletes and scholars were Joe Chegwi Torres, world light heavyweight champion from 1965 to 1967; Clemson Smith-Muniz, Spanish language broadcaster; Adrian Burgos, Jr., an authority on Latino baseball players in the Negro leagues; and Samuel Regalado, author of Viva Baseball: Latin Major Leaguers and Their Special Hunger.

Nellie Mae Grants to Benefit Latino Education Programs

The Nellie Mae Foundation, Braintree, Mass., granted $1,444,500 to 12 New England-based nonprofit grassroots programs that promote educational access and quality for Latinos and other minorities.

“These programs are essential for under-served students since they offer an opportunity for students to enrich their educational opportunities and prepare for college,” said Nellie Mae Foundation President and CEO Dr. Blenda Wilson.

Many of the New England students supported by the foundation face economic and social adversity, which interferes with their ability to pursue higher education and benefit from the resulting economic gains.

In the News at Long Island-Brooklyn

Dominican American author Loida Maritza Pérez anf Puerto Rican poet Willie Perdomo read from their works at Long Island University (LIU)- Brooklyn in New York. Pérez’s novel Geographies of Home is the story of a family that moves to Brooklyn from the Dominican Republic. Perdomo author of Where a Nickel Costs a Dime, has been featured on PBS poetry specials.

In connection with LIU’s annual Honors Conference, three artists of Dominican heritage showcased their art at the Brooklyn Campus’ Salena Gallery. The exhibit “Boundaries and Frontiers” featured the work of Scherezade Garcia-Vazquez, Iliana Emilia and Delsa Canacho, all graduates of the Parsons School of Design.

Vargas Joins San Diego State’s Advancement Team

Nora E. Vargas was named legislative relations specialist for San Diego State University’s (SDSU) division of university advancement, in California.

Vargas now directs legislative activities for the vice president of university advancement in coordination with California State University and SDSU key administrators. Sh
helps identify the University's local, state, and federal education agenda, and is its liaison with local, state, and federal officials. She also is the point of contact for the SDSU Ambassadors of Higher Education.

Vargas has a bachelor's degree from the University of San Francisco and is pursuing her master's at SDSU.

**Coro Cantico Nuevo Performs at Calvin**

The 116-voice New York City choir Coro Cantico Nuevo joined forces with the Calvin College Campus Choir on Calvin's West Michigan campus grounds. The concert brought the music of Nicaragua, Jamaica, Puerto Rico, Mexico, Dominican Republic, Paraguay, Argentina, Venezuela, France, Spain, Austria, and Switzerland to the Calvin College Chapel. The Calvin Institute for Christian Worship, under the leadership of its director, John Witvliet, arranged the visit.

**Bethune-Cookman Chorale Performs in Washington**

The Bethune-Cookman College (Fia.) Concert Chorale sang as guests at a National Prayer Breakfast in Washington, D.C. The 75-student concert chorale, directed by music professor Dr. Rebecca W. Steele, was invited to perform at the 48th annual National Prayer Breakfast by U.S. Sen. Connie Mack.

President Bill Clinton, Vice President Al Gore, many members of Congress, several U.S. Supreme Court justices, and hundreds of international representatives were among the 4,000 attending the breakfast at the Washington Hilton.

Bethune-Cookman, with a diverse student population of more than 2,500, was on the *HO* "Hot Picks" list of best colleges for Hispanic students.

**Paredes Papers to UT-Austin's Benson Collection**

The papers of internationally known scholar and humanist América Paredes (1915-1999) are now part of the Nettie Lee Benson Latin American Collection, the General Libraries at the University of Texas (UT)-Austin.

"Don Américo," as he was affectionately known, received his doctorate in English in 1956 from UT-Austin, where he spent his scholarly life. He taught and inspired students, and he developed special programs and centers on folklore of the U.S. Southwest and Mexico and for the study of Mexican American culture.

Paredes' most enduring works stem from his folklore studies. His collections of tales and corridos—the folk songs and ballads of the Texas-Mexican border—allowed him to challenge anthropological literature that had examined Mexican culture in Texas from an outsider's view only.

**PhD Project Gains Sponsors**

The PhD Project, joining several of America's leading companies and foundations, Bristol Myers-Squibb, Chase Manhattan Bank, and Pfizer, Inc. each became sponsors of The PhD Project—a unique initiative to diversify corporate and academic America.

The PhD Project was created to address the severe underrepresentation of people of color in America's business schools, and ultimately in the larger corporate community. It is going about this task by increasing African Americans', Hispanic Americans', and Native Americans' presence on business school faculties by diversifying the faculty. The PhD Project encourages more people of color to pursue business degrees, and better prepares all business students for today's multicultural work environment.

**Landeros Joins Allan Hancock**

Martin Landeros, a new full-time mathematics instructor at Allan Hancock College in California, hopes to see an increase in its Hispanic students and their continuance at four-year universities.

Landeros grew up in Mexico City and moved to California when he was 25. He learned English at Modesto Junior College before earning his bachelor's degree in mathematics at California State University Stanislaus and his master's at the University of California Santa Cruz.

Before joining the Allan Hancock College faculty, Landeros taught at Santa Rosa Junior College and at Ohlone. Merced, Hartnell, and Cabrillo colleges.

**NYC Deputy Mayor Segarra Joins CUNY Foundation**

Former New York City deputy mayor and education and human services Ninfa Segarr became vice president for inter-campus collaboration of the City University of New York (CUNY) Research Foundation.

Chair of the Board Herman Badillo said, "Deputy Mayor Segarra brings to CUNY more than twenty years of government, community, and education experience in senior level positions. Her talents and abilities will be very helpful to moving the CUNY reform agenda forward.

Segarra, an attorney, was a NYC deputy mayor for more than six years, providing policy development, oversight, and program implementation for mayoral agencies at related titles. She has a bachelor's degree from New York University and a juris doctor from New York Law School.

**In the News at Texas A&M-Kingsville**

Texas A&M University-Kingsville's bilingual education department sponsored the 26 Annual Spring Bilingual Conference in March. Dr. Joel Gomez, associate professor of educational leadership and director of the Institute for Education Policy Studies at George Washington University, gave a keynote speech, "Two Languages, Two Cultures, One Society: I Past and the Future." He is on the board of the National Association for Bilingual Education.

Texas A&M University-Kingsville Ronald McNair Scholars presented on their undergraduate research projects at the Second Annual Texas McNair Research Conference at the University of Texas-Arlington. McNair academic coordinator Joe II Valenzuela and students Laurie Tomas, Debra Carpenier, Debra Perez, Daniel Gonzalez, Juan Vasquez, and Yvonne Pueno attended the event. (See related story on Page 18.)
New Mexico State Students Win National Recognition

The New Mexico State University (NMSU) student chapter of the Hispanic Business Student Association (HBSA) was named Chapter of the Year at the 10th Annual Hispanic Business Leadership Conference in Austin, Texas. The NMSU chapter, with approximately 90 members, ranked above chapters from 80 other schools at the conference, which was sponsored by the National Hispanic Business Association (NHBA).

The purpose of the HBSA is to enhance the personal and professional skills of its members. The organization helps students develop an appreciation for a multicultural heritage and prepares them for the future through networking, job opportunities, social events, and community service.

NMSU finance and marketing major Imelda Villalobos was named NHBA Representative of the Year.

In the News at Miami-Dade

Eduardo J. Padrón, president of Miami-Dade Community College (M-DCC) in Florida, was named one of the “20th-Century Presidents Who Have Influenced the Higher Education Landscape” by Black Issues in Higher Education magazine. In the “One Hundred Years of Change” issue, Padrón was recognized because “he has paved a pathway for the realities of achieving diversity in all of its complexities.” Padrón said he felt honored and humbled by the recognition. “M-DCC was founded on the principle of access to education for all. I have merely been an instrument of the strong forces for equality in our schools and opportunity in our country.”

M-DCC won four awards for institutional advancement at the Florida Association of Community Colleges’ annual convention. The school’s public affairs division was recognized for “outstanding publications, media presentations, and public relations programs.” Staff members Pasta Andino, Lee Lillie, Irene Munoz, and Barri Semet worked on the winning entries.

St. Thomas Signs Agreement with Colombian University

St. Thomas University (Fla.) President Rev. Monsignor Franklyn M. Casale (pictured r.) signed an agreement with Dr. Jesus Ferro Bayona (l.), president of Universidad del Norte, located in Barranquilla, Colombia, calling for collaboration on research projects and participation in teaching exchange programs.

Under the agreement, students from Universidad del Norte will attend classes in intensive English at St. Thomas, and will serve an internship with a local Hispanic-owned business.

The multicultural makeup of the student body at St. Thomas University—more than 2,100 students—offers learners/scholars a community rich in diversity.

Chicano Activist Speaks at University of New Mexico

José Angel Gutiérrez, Chicano activist and founder of La Raza Unida Party, the Mexican American Youth Organization, and other Mexican American community organizations, recently spoke at the University of New Mexico. His talk, “From Assimilation to Trredentism: Chicano Politics in the 21st Century,” was sponsored by the Center for Regional Studies, Chicana/o Studies, and the Southwest Hispanic Institute.

An associate professor in political science at the University of Texas (UT)-Arlington, Gutiérrez is a practicing attorney with the Legal Center of José Angel Gutiérrez. He has a doctorate from UT-Austin and a juris doctor from the University of Houston.

Cal Poly Engineers Win National Title

Four members of the California Polytechnic State University chapter of the Society of Hispanic Professional Engineers won a national Academic Olympiad at the society’s National Technical Career Conference in Washington, D.C.

Team members Manuel Alvarez, Patrick Cabral, José Castro, and Jesus Rodriguez went head-to-head with five other regional championship teams, fielding questions ranging from society trivia to computer science, math, physics, chemistry, electrical engineering, and other engineering disciplines. The win marks the first time Cal Poly’s group has hosted the nation in the Jeopardy-style contest.

Jimez to Attend Democratic National Convention

Western Illinois University (WLU) senior law enforcement and justice administration major and budding politician Margarita Jimenez was named to the Illinois Delegation slated to attend the Democratic National Convention in Los Angeles, Calif., this summer.

A lifelong Democrat and an Al Gore supporter, Jimenez is vice president of the WLU Student Government Association—the first woman and the first person of Latin American descent to hold the position. “I became interested in politics at the age of eight as I watched the debates between Presidents George Bush and Massachusetts Governor Michael Dukakis,” said Jimenez.

Now 21 years old, Jimenez plans to graduate from Western Illinois, go to law school work for a district attorney’s office, and then run for political office.

North Carolina-Chapel Hill Holds “Cuba and African Americans” Conference

The University of North Carolina at Chapel Hills (UNC-Ch) Institute of African-American Research sponsored a conference, “Cuba and African Americans: A Comparative Perspective.”

Three visiting scholars, including Dr. Olga E. Fernandez, a Cuban scholar in African American studies at the University of Havana, analyzed Black
American issues and history, and compared both with the challenges that Cubans have faced. The title of her talk was “Black Americans: An Ethnic Dilemma in U.S. Mainstream Journalism.”

Ruth Reitan, doctoral candidate at the University of Miami’s School of International Studies, and Lisa Brock, associate professor of African history and diaspora studies at the School of the Art Institute of Chicago, also spoke.

**New Mexico State Poet Makes Cuban Connection**

Kathleen West, a New Mexico State University (NMSU) English professor, has been collecting poems by contemporary Cuban writers and plans to publish a selection of them in NMSU’s national literary magazine, *Puerto del Sol.* West is the magazine’s poetry editor.

In July and December 1999, West traveled to Cuba under the auspices of the Cuban Scholars Program to meet Cuban poets—some of them well known, some “up-and-coming”—and collect their poetry.

“Virtually everyone in Cuba is a poet,” says West. “But, not all poets are equally approved by the government.”

West is the author of several books of poetry. A new book, *The Summer of Subcomandante,* is about to be released in the United States. Another, *Las Turistas de la Revolucion,* is to be released in Cuba.

**Scranton to Participate in National Diversity Project**

The University of Scranton (Penn.) is one of 40 colleges and universities selected to participate in a national project to address diversity issues in higher education.

The initiative, “Boundaries and Borderlands III: The Search for Recognition and Community in America,” is sponsored by the Association of American Colleges and Universities. It is designed to help colleges and universities develop new programs to increase students’ capacities for democratic citizenship and tolerance.

The project includes a 10-day summer institute that will enable participants to study the impact of diversity on student learning.

examine curricular models being developed at other institutions nationwide, and develop skills in fostering intergroup dialogue.

The University of Scranton’s Strategic Plan for 2000-2005, “A Community of Scholars. A Culture of Excellence,” emphasizes diversity and globalization as one of its 10 themes.

**Art Institute of Boston Hosts Ortiz Monasterio**

The Art Institute of Boston’s Mexican photographer Pablo Ortiz Monasterio recently participated in the Art Institute of Boston at Lesley College’s (Mass.) duPont Visiting Artist Lecture Series.

Ortiz Monasterio has spent much time documenting the lives of indigenous peoples, producing an acclaimed series on the Huaves, the Huichols, and the Tarahumaras. For 15 years, he worked on an extensive photographic study of life in Mexico City, “The Last City.” This highly prized work illustrates the coexistence of the symbolic and the real in everyday Mexican life.

Ortiz Monasterio often interacts with those he photographs. In his project with the Huichols, not only did he enter their world through pictures, but he also initiated the construction of an intricate swinging bridge, a vital link in this mountainous area, that enabled Huichol children to attend school.

**De La Rosa Wins Scholarship at Oakland Fund Raiser**

Bonifacio De La Rosa (pictured at r.) received a $5,000 scholarship at Oakland University’s (Mich.) eighth annual Keeper of the Dream fundraising banquet. Eight students were awarded scholarships for their efforts in making a positive impact to improve interracial understanding within the university community. OU’s president, Dr. Gary Russi, is pictured with De La Rosa.

A junior political science major De La Rosa believes communication is the key to eliminating bigotry. He has served as a student liaison to the board of trustees, a diversi-

**Texas Woman’s Team Signs Agreements with Laredo Community College**

Several representatives from Texas Woman’s University (TWU) met with Laredo Community College (LCC) officials and students to sign articulation agreements in education, nursing, Dr. Ramón, Dovalina, LCC president, and Dr. Juan Maladona, vice president for instructional services, met with TWU representatives Dr. Willes Berry, interim president for academic affairs; Dr. Carole Gunning, dean of the College of Nursing, David Peat, associate dean of the College Education and Human Ecology, Dr. June Aza, department of reading and bilingual education faculty member, and Dr. Rudy Rodriguez, special assistant to the president for community relations and diversity.

Azua also talked with LCC students about scholarship opportunities in bilingual and ESL education.

**In the News at University of South Florida**

The University of South Florida (USF) is a co-recipient of a $W. Kellogg Foundation EngagingLatinos for Education Grant, to help Latinos enter and complete college.

USF and the Ministry of Education at Culture of Spain collaborated to create Spanish language center at USF.

A USF spring semester course in geology and marine science. The Geology of Cuba, featured a seven-day field excursion to west Cuba.

USF continues to connect with Mexico. The Universidad Veracruzana and USF plan offer a joint master’s degree in instructional technology. The Universidad de Mayab Mérida visited three USF professors. USF’s Downtown Center will house the offices of the Secretariat of the Gulf States Accord.

Professors Paul Rosai and Susan Greenbaum helped facilitate the eventual c-
ermination of two historic Cuban clubs of Tampa, La Unión Martí-Maceo and El Circulo Cubano.

The Tampa Bay Latin American Medical Society and the Krewe of Saint Yago Education Foundation each pledged $100,000 endowments to the USF Latino Scholarship program.

Latinas Pursue Nontraditional Careers, Finds Saint Mary’s Study

Manuela Hernandez, a senior psychology major at Saint Mary's College (Ind.), conducted a study of college majors pursued by Latinas.

Initially, Hernandez assumed most Latina college students would be preparing to enter the workforce as teachers and nurses—traditional women's fields. "That hypothesis was based on the Hispanic 'machismo' culture," said Hernandez, "which puts men at the top of the hierarchical chain, and reports that Latinas are more likely than Caucasian females to endorse traditional roles." However, she said, "My study exposed a completely different reality."

After sampling 72 Latinas from both Saint Mary's College and the University of Notre Dame, Hernandez found that 57 percent of those Latinas were pursuing nontraditional majors such as business, finance, and science; thirty-five percent "neutral" majors such as psychology and communications; and only eight percent careers such as nursing or education.

Bersia and Gutiérrez Win Journalism Awards

John C. Bersia and Sonia Gutiérrez recently were honored by the Scripps Howard Foundation with National Journalism Awards, presented at the National Press Club in Washington, D.C.

Bersia, of The Orlando Sentinel in Florida, received $2,500 and the Walker Stone Award trophy for "Fleeced in Florida," a series of editorials advocating regulatory reform of cash-advance businesses. Linda Valdez of The Arizona Republic was a finalist for the award.

Gutiérrez, of the Carlos Rosario International Career Center in Washington, D.C., received $2,500, the Charles E. Scripps Award, and a $5,000 donation from the Scripps Howard Foundation to the literacy group of her choice. Gutiérrez won for her work with adult immigrant students. The Naples Daily News of Florida won the same award.

University of Houston Professor Receives Fellowship in Literature

University of Houston (Texas) professor of Spanish Julián Oliva was a recipient of a senior fellowship from the National Endowment for the Humanities. He was the only scholar in Hispanic literature to receive that honor in 1990.

Oliva was awarded a $30,000 fellowship for his research into secular and sacred poetry written by women of the Spanish Renaissance and Baroque periods (the 16th and 17th centuries). His research will be developed into a book, which will be the third of a series on women's literary production.

"The study of women's literature has had tremendous influence on the manner in which one reads all literature," said Oliva.

Publications

Puerto Rico: The Four-Storeyed Country

by José Luis González

Afro-Antilleans and Mestizos constitute the first "storey," or tier, of the "Puerto Rican house" of the title story, landowners the second, urban professionals the third, and the managerial class the fourth. The author argues that a national culture must be seen and defined as something rising "from below" rather than imposed by a white minority "from above," and that Puerto Ricans must acknowledge that their culture is primarily Caribbean rather than North American or Hispanic. Translated by Gerald Guinness.
toward interdependence, and others—critical to the needs of every college student.

**The American Community College**

by Arthur M. Cohen and Florence B. Brawer

This book provides a comprehensive analysis of the most recent findings and up-to-date information on the American community college. The authors describe in detail how community colleges fit into the American educational system; the services they provide, and the effects they have on their students and the community.

**Exploring Leadership: For College Students Who Want to Make a Difference**

by Susan R. Komi, Yance Lucas, and Timothy R. McMahon

This book provides a unique view of leadership as a participatory process and helps students and young adults to develop their own potential for leadership in organizations, groups, and communities of an increasingly diverse and complex world.

**The Mexican American Orquesta: Music, Culture, and the Dialectic of Conflict**

by Manuel Peña

Relying on both the Mexican orquesta and the American dance band for repertorial and stylistic cues, the Mexican American orquesta forges a synthesis of the two.

Manuel Peña traces the evolution of the orquesta in the Southwest from its beginnings in the 19th century through its pinnacle in the 1970s and its decline since the 1980s.

**Features and Fillers: Texas Journalists on Texas Folklore**

Jim Harris, ed.

Full-time and part-time journalists have worked many years for large and small newspapers, ranging from far West Texas to deep East Texas, from the Panhandle to the Valley. Their subjects are the traditions, customs, and practices of the people in communities as diverse as the state is wide. Jim Harris has discovered that many people want to read about their folklore, passed down through the years by word of mouth and other means.

**Brandy, Our Man in Acapulco: The Life and Times of Colonel Frank M. Brandtender**

by Rodney P. Carlisle and Dominic J. Moretti

A man of action and a parrot, Frank Brandtender foiled a mass breakout plot by German POWs in England during World War II, led a small party on a dangerous mission behind German lines to deliver a surrender demand, parachuted into battle on D-Day, and confronted an angry Cuban mob intent on destroying the Havana Hilton. In the business world, he turned a few undeveloped casitas in Acapulco into Las Brisas, the top resort in the world in 1972.

**Cuba's Island of Dreams: Van from the Isle of Pines and Y**

by Jane McMahan

As a resident of Cuba, Jane McMahan enjoyed extraordinary access to Cuban archives and to both published and unpublished historical materials. She had access to government officials as well as family narratives and diaries. Drawing upon resources and to most scholars outside Cuba, McMahan written an evocative history that captures the dreams of this island's history and the dreams of its people.

**The Making of Social Movements in Latin America: Identity, Strategy, and Democracy**

Anurto Escobar and Sonia E. Alvar

Latin American social movements have brought about a profound transformation in the nature and practice of protest and collective action. This book surveys the full spectrum of movements in Latin America today—from peasant and women's movements to the growing Environmental and civic movements—examining how this diverse mosaic of social movements has promted social and political change.

by Reed Brody

Reed Brody, former assistant attorney general of the state of New York, presents
TheObsidianRanfla
by Anthony R. Vigil

This collection of poems by Mexican American author Anthony R. Vigil comes complete with a “hitting the code-switches” glossary. “Hitting the switch- es” in ranfla means activating its hydraulic system, and bouncing with the ride. “Hitting the code-switches” permits you, if inexperienced with the language and culture, to “dimensionalize” your ride down the boulevard of Chicano time.

September 19-20, Guadalajara

September 22-23, Mexico City

September 25-26, Monterrey

Kiva Expeditions, Inc., is committed to building partnerships through key introductions among international exhibitors, Mexican schools representatives, and local business leaders. This year’s tour, “Building Partnerships in Mexico,” will focus on student recruitment through public fairs and school visits.

Contact: Annette Wright, (303) 770-3063; e-mail, kivaeexpo@mindspring.com.

HACU 14th Annual Conference
November 4-7

This year’s theme: “Championing Hispanic Success in Higher Education.” At the Albuquerque Convention Center. Albuquerque, N.M.

Book Review

By Mark Sada Saka, Ph.D.

Vicki L. Ruiz has produced the first full study of the Mexican woman's experience in twentieth-century America, one that synthesizes and integrates that experience within the broader context of Mexican history, immigration, conflict, assimilation, and resistance. Ruiz successfully demonstrates the complex and innovative role that Mexicanas have played in the shaping of their lives and their communities. Enhanced by personal stories and interviews, and woven into a highly readable narrative, From out of the Shadows lives up to its title, bringing Mexican woman's experience to light. During this past summer I used this book for my Mexican American history seminar and found that students enjoyed its accessibility and comprehensive approach to the Mexican American experience. Needless to say, the women in the class found the centering of gender analysis to the overall Mexican American experience a breath of fresh air.

Three major themes run throughout Ruiz's book: first, that through mutual assistance and collective action, Mexican women in the United States exerted tremendous control over their lives, homes, work, and neighborhoods; second, that there is no one experience, as Mexican women have experienced generational differences, class and regional variations, conflict and accommodation between immigrants and native born, etc.; and third, that Mexican women in the United States have assimilated to American norms and yet have retained distinctive cultural values and patterns through a "picking and choosing" process that has enabled Mexicanas to truly live as both Mexican and Americans.

The one chapter of the book that raised the most discussion and debate in my class is entitled "The Flapper and the Chaperone" and involves the conflicts that many young Mexican women had with their parents over the role of la dueña, the traditional chaperone who accompanied single Mexican women whenever they left their homes. Chaperones represented a traditional instrument of social control by a conservative family oligarchs. During the 1920s, the emergence of American mass consumer culture, the opportunities for greater freedom and autonomy over their own lives had to grapple with such openly defiant actions as to "bob or not to bob" their hair, or to wear "revealing" swimsuits, short skirts, makeup, or bloomers. Sprinkled throughout this section are numerous personal interviews and narratives by women who recall such actions as wearing "modern" clothes underneath their parentally approved attire and then switching clothing once they had escaped the watchful eye of Mom and Dad. Ruiz offers three alternatives that young women faced: open rebellion (even to the point of living with the boyfriend), sneaking out of the house whenever their parents were asleep, or early marriage. Interwoven in all of this is the ever present figure of the chaperone, that instrument of family social control that openly countered young Mexicanas attempts to expand their own space. Although chaperonage largely died out in the aftermath of the Second World War many of the young women in my class still found that it hit close to home.

Ruiz also focuses on the class differences that shaped Mexican women's experiences. The sections in the book that deal with the Mexico working-class experience testify to the collective struggle and mutual assistance that working peoples throughout history have employed to propel and empower their lives. The book demonstrates how mutual aid societies labor militancy, strike line activism, community agitation, and political radicalism allowed working-class Mexicanas to exert tremendous control over their lives and destinies. Firey orators and organizers such as Estela Ramirez, Emma Tenayuca, and Josefina Ferro Bright, as well as other examples, create historical mod for young Mexican American women to incorporate into otherwise male-dominated pantheon of Mexican heroes.

Ruiz provides an excellent summary of the role that Chicanas played in the social upheavals of the 1960s, often referred to by its patriarchal nomenclature as the Chicano movement. Chicanas articulated and challenged not only their position in American society as an oppressed ethnic group but also the male-dominated nature of that movement. Rejecting both Hispanic machismo and the middle class, white-dominated women's movement, Chicanas rely on the soderia imagery of Mexico's revolutionary past to play prominent roles in the Raza Unida's political mobilization, protest the Vietnam War, led student demonstrations, successfully opposed forced sterilization of poor women who more often than not represent women of color, and created a tremendous amount of public space for daily, academic, political, and cultural expression. Ruiz's incorporation gender into the history of the Chicano movement adds a more comprehensive perspective of that movement and creates the possibility of describing the civil rights struggle as the Chicana movement.

From out of the Shadows is a much-needed addition to Mexican American and Hispanic historical studies. It is both a highly readable narrative easily accessible to undergraduate students. It provides the first major synthesis of the Mexican American woman's experience in the United States and attests to the strength and resiliency that Mexicanas have displayed over the course of the twentieth century, a century of challenge and change and a century whose struggles and achievements will continue to shape women's lives.

Dr. Saka is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, he has taught at Sal Rose State University, Alpine, Texas, since 1975.

George Mason University (www.gmu.edu) seeks an education visionary and a change facilitator who is challenged by the critical issues in education. A public institution of more than 24,000 students, George Mason has been one of the nation’s fastest growing universities over the past 15 years. The university is located in Northern Virginia in the suburbs of Washington, D.C., with campuses in Arlington and Prince William Counties.

The university offers over 100 bachelor's, master's, professional, and doctoral programs in the Graduate School of Education, College of Arts and Sciences, College of Nursing and Health Sciences, School of Management, School of Information Technology and Engineering, School of Computational Sciences, School of Public Policy, Institute for Conflict Analysis and Resolution, and the Institute of the Arts.

The Graduate School of Education is a dynamic professional school dedicated to leadership in the preparation of education professionals, educational research, and instructional applications of technology. The school offers an entrepreneurial mix of on-campus and outreach programs serving 2,000 Master's students, 300 doctoral students, and several hundred undergraduates in its affiliate programs in Health, Fitness and Recreation Resources. Our focus is on ensuring our students' success through strong relationships with the university and with external community partners.

The dean oversees curriculum, budget, and personnel matters, and allocates and invests resources to further the school's growth and prominence in the education profession, the educational research community, and the region. The dean also has responsibility for fund raising and for building and sustaining strong relationships within the university and with external partners in schools, the business community, and national associations.

Leading candidates will have a strong record of scholarly achievement and be committed to support scholarly research, creative teaching, and diversity among faculty, staff, and students. These candidates also will have strong planning and decision-making experiences as well as excellent communication and interpersonal skills. A doctorate in Education or an allied field is required. Salary and benefits are highly competitive.

Credentials will be accepted until the position is filled. The position can be available July 1, 2000, although a later start date is possible. Nominations and applications, including a curriculum vitae and letter explaining relevant experience, and names and contact information for five professional references, should be directed to the attention of:

Chair, GSE Dean Search Committee
Office of the Provost (SA2)
George Mason University
Fairfax, VA 22030-4444

Vice President for Administration and Finance

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York metropolitan area, and is one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to approximately 10,500 students. The University has an extensive cooperative education program, as well as an expanding continuing education program.

The University invites applications for the position of Vice President for Administration and Finance. Reporting directly to the President as Chief Financial Officer, the Vice President is accountable for the administrative and financial operations of the institution. Areas of responsibility include financial services, business and auxiliary services, human resources, physical plant and administrative computing. Other responsibilities include risk management and construction planning and oversight.

The successful candidate will have significant experience in financial systems and operations in a higher education setting, and should have a minimum of five years successful leadership. Effective interpersonal and communication skills are essential. The successful candidate must demonstrate the ability to analyze and present complex issues to a diverse group of professionals.

A Master’s Degree is required, and an appropriate terminal degree is preferred. The University intends to fill the position on July 1, 2000. Compensation will be competitive and commensurate with experience and qualifications. Interested individuals should send a letter of interest, a current resume, and the names and telephone numbers of references to:

Office of the President
New Jersey City University
2809 Kennedy Boulevard
Jersey City, NJ 07305

All materials must be received by the close of business on May 9, 2000.

Affirmative Action, Equal Opportunity Employer

EMORY UNIVERSITY

VICE PRESIDENT FOR CAMPUS LIFE

Atlanta, Georgia

Emory University seeks a dynamic and energetic leader to serve as Vice President for Campus Life. The Vice President will lead the University’s Campus Life Division, which encompasses a wide spectrum of departments and student affairs in a university with a full residential program for undergraduate and graduate students. With 200 full-time, 100 part-time, and 600 student employees, the division has an operating budget of approximately $40 million. Reporting directly to the President, the Vice President is a strategic leader whose primary responsibility is to provide institutional leadership in the development of programs and services that support the academic mission of the University.

Founded in 1836, Emory is a major research university with a leading undergraduate college, a distinguished graduate school, and several professional schools. Its 6,200 undergraduate and 3,500 graduate and professional students are served by a committed faculty of 2,500 in ten major academic divisions: Emory College, Oxford College, Graduate School of Arts and Sciences, School of Medicine, School of Law, School of Law, School of Medicine, School of Dentistry, School of Public Health, School of Nursing, College of Architecture, School of Theology, School of Business, and Graduate School of Business.

The ideal candidate will be a visionary and accomplished leader with a demonstrated ability to lead a large, complex academic unit that includes student life and academic life. The Vice President will possess a vision that balances the interests of the University with the needs of the student body, as well as a broad understanding of the role of student affairs in the overall mission of the University. The ideal candidate will have demonstrated success in developing and implementing strategic plans that are consistent with the University’s mission.

Emory University values diversity in its faculty, staff, and student population. Applications from women, minorities, and individuals with disabilities are encouraged.

Applications should include a letter of interest, a current curriculum vitae, and the names, telephone numbers, and email addresses of five references who will be contacted only with candidates’ approval. Screening will begin immediately and will continue until an appointment is made. All communications will be treated confidentially.

William Paterson University
Wayne, New Jersey
An Equal Opportunity Institution Committed to Diversity
**PRESIDENT**

SAVANNAH TECHNICAL INSTITUTE*

The Presidential Search Committee is seeking a dynamic Chief Executive with a substantial record of achievement as a leader in education and economic development. Savannah Technical Institute is a progressive institution located in Savannah, and one of the fastest growing MSAs in Georgia. The President of Directors is committed to and vigorously pursuing the goal of building a world-class institution, as well as being an active partner in strategic workforce and economic development.

**QUALIFICATIONS**

The ideal candidate will possess a strong drive to move the institution ahead in an innovative manner. Applicants must have a minimum of a master's degree from an accredited institution in business, management, educational leadership or a closely related field. An earned doctorate is desirable. The candidate must have five years of senior administrative experience, and must have demonstrated experience in re-building an organization. Must possess excellent written and verbal communication skills. Non-traditional candiates will be considered.

**RESPONSIBILITIES**

The President of Savannah Technical Institute is the Chief Executive Officer of the Institute and is responsible to the Commissioner of the Georgia Department of Technical and Adult Education and the local Board of Directors. He/she must demonstrate strong leadership abilities, and possess excellent oral and written communication skills. The President will be expected to build and maintain a strong relationship with all stakeholders and to be an active and visible leader in the community.

**SALARY**

Salary and benefits are highly competitive, commensurate with experience.

**APPLICATION REQUIREMENTS**

For more information regarding the position and a complete application packet, contact Dorothy Trombecky, President, Savannah Technical Institute, 1 Oglethorpe Square, Savannah, GA 31401-0128; 912-447-2450/Fax 912-447-2451; e-mail dtrombecky@stae.org, or visit web site at www.stae.org.

Deadline for applications is May 31, 2000.

*Name may change to Savannah Technical College from Institute in July 2000.

Northeastern University is an affirmative action, equal opportunity employer, and especially welcomes applications from minorities, women, and persons with disabilities.

VICE CHANCELLOR FOR RESEARCH
The University of Massachusetts Amherst seeks a dynamic, visionary leader with a record of professional experience and accomplishment to lead the University's research faculty and programs into the 21st century. Amherst, the flagship campus of the five-campus University of Massachusetts system and home to 1,200 faculty and 26,000 graduate and undergraduate students, is poised to enhance its status as a public research university. UMass Amherst is a Carnegie Research I, land-grant institution with external support in excess of $75 million annually for research and scholarship.

As the chief research officer of the campus, the Vice Chancellor for Research advances the research mission of the University. It represents the University's research interests to federal and state governments, to industries, and to other national and international constituencies. The Vice Chancellor oversees all policies and procedures relating to research, technology transfer, and economic development, and works closely with the faculty to encourage and support research and scholarly activities. The Vice Chancellor for Research reports to the Senior Vice Chancellor for Academic Affairs and Provost, and works with the Provost and others to develop strategic directions and financial strategies that promote the full academic mission of the University.

The Vice Chancellor for Research has administrative responsibility for the offices of Research Affairs; Grant and Contract Administration; Technology Transfer; Science Policy Office; Academic Career Development; and Animal Care; and for the University Press. Please see http://www.umass.edu/research for further information.

Qualifications for the position include:
- A distinguished record of research and scholarship appropriate for appointment as a tenured full professor in an academic department of the University,
- A strong and well-articulated research vision and a thorough understanding of the mission of the University, including its land-grant research and teaching mission,
- A strong and enthusiastic commitment to the campus's strategic priorities, which include teaching and learning, advancing research and graduate education, promoting economic development, and embracing diversity and pluralism,
- The demonstrated ability to work effectively with faculty members, students, staff, administrators, and public and private funding agencies,
- Full understanding of the contributions and requirements of scholars from all fields,
- Familiarity with university patents and licensing.

The appointment will be effective on or about January 1, 2001. To ensure full consideration, nominations and applications, including vitae, research vision statement, and the names and addresses of three references, should be received by Jun 1, 2000. Acceptance of nominations and applications begins immediately and continue until the position is filled. Please send nominations and applications to: Vice Chancellor for Research Search Committee, Office of the Senior Vice Chancellor and Provost, 562 Whittier Administration Building, University of Massachusetts, Amherst, MA 01003.

The University of Massachusetts is an Affirmative Action/Equal Opportunity Employer. Women and members of minority groups are encouraged to apply.
Principal Publications Coordinator

Ideal candidate will supervise/coordinate production of university publications; promote graphic identity program/system for print and web projects; direct, evaluate and create policy for the Publications Office’s electronic publishing/website program; analyze/evaluate programs goals/objectives; write/edit selected university publications; and oversee administrative staff.

Req a BA/BS in a related field; exp in a publication environment; knowledge of publication production and current developments in the graphic art and electronic publishing fields; and exp in website development. Excellent communication, writing/editing, organizational, and supervisory skills essential. Strong computer skills also necessary. Marketing exp preferred.

Salary: $42,700-$53,400/yr. To apply: reference Job #: 020975-HE to UCSD Human Resources, 0967, La Jolla, CA 92093-0967; or E-mail to: resume@ucsd.edu or visit: http://joblink.ucsd.edu/bulletin EOE/AA.

University of California
San Diego
A comprehensive public university, William Paterson University comprises an intellectually engaged and diverse faculty, state-of-the-art information and communications technology, and cultural resources of national renown. Committed to student success, academic excellence, diversity, and community outreach, the University offers 29 undergraduate and 17 graduate degree programs in five colleges. William Paterson University maintains a low student faculty ratio (12:1) and small class size (21). The University is situated on a suburban campus in Wayne, New Jersey, twenty miles west of New York City.

Department of Residence Life
Resident Director (3 positions)

The Resident Director is a full-time, twelve-month, live-in professional position in the Department of Residence Life. Based on a commitment to student development theory, the Resident Director supervises a staff of 6-12 undergraduate Resident Assistants along with student office assistants, and administers the physical and personal aspects of a residence hall area housing approximately 200-500 students. The Resident Director serves as an advisor to various student life committees, and coordinates a comprehensive educational programming effort in his/her hall area. Reports directly to the Area Coordinator, and works with that person in the execution of his/her job responsibilities. The Resident Director is expected to be available three to four evenings per week.

Bachelor’s degree and one (1) year’s experience above the undergraduate level in residence hall administration in a college or university setting required. Master’s degree in Student Personnel/Counseling or related area strongly preferred and experience in residence hall administration in a college or university setting one year above the undergraduate level.

The successful candidate should possess supervisory skills, knowledge of facilities management; experience as a hearing officer, strong interpersonal, organizational, and oral/written communication skills.

Starting Salary: $27,415.00

Area Coordinator (1 position)

The Area Coordinator is a full-time, twelve-month, live-in professional position in the Department of Residence Life. Based on a commitment to student development theory, the Area Coordinator supervises a staff of 2-3 Resident Directors, and 21-24 undergraduate Resident Assistants, along with at least one full-time secretary and student assistant, and administers the physical and personal aspects of a residence hall area housing approximately 825-1100 students. The Area Coordinator serves as an advisor to various student life committees, acts as appeals hearing officer, and coordinates a comprehensive educational programming effort in his/her hall area. Master’s degree in Student Personnel/Counseling or related area required or equivalent life experience and two (2) years professional experience in residence hall administration in a college or university setting.

The successful candidate should possess supervisory skills, knowledge of facilities management, experience as a hearing officer, strong interpersonal, organizational, and oral/written communication skills.

Starting Salary: $28,587.65

Positions include a comprehensive benefits package. Please forward letter of application, resume, and list of three references to: Massimina Rizzarelli-Burrows, Associate Director, Department of Residence Life, Dwyer 100, William Paterson University, 300 Pompton Road, Wayne, NJ 07470. Additional information about the University can be found at http://www.wpaterson.edu. The review of applications will begin immediately upon receipt and continue until each position is filled.

William Paterson University
Wayne, New Jersey
An Equal Opportunity Institution Committed to Diversity

Massachusetts Maritime Academy
Anticipated Faculty Openings, 20

The Academy is a small undergraduate institution located in Buzzards Bay, Massachusetts, and is a member of the Massachusetts State System. The Academy educates, trains, and develops young men and women for maritime careers and transportation-related fields. The Academy offers undergraduate and graduate degree programs in various fields, including maritime engineering, marine sciences, transportation management, and more. The Academy seeks to attract and retain qualified faculty members who can contribute to the Academy’s mission and support its objectives.

DEPARTMENT OF BASIC SCIENCES

One tenure-track position, to teach Mathematics and Computer Science.

DEPARTMENT OF HUMANITIES

One tenure-track position, to teach English and Spanish.

DEPARTMENT OF MARINE TRANSPORTATION

Three (3) Assistant Professors (two tenure-track, one non-tenure-track), appointments renewable for no more than one year.

Must have at least four years of teaching experience in a maritime academy, university, technical college, or similar institution. A background in any of the following areas is preferred: maritime economics, transportation management, maritime law, and international maritime law.

DEPARTMENT OF SOCIAL SCIENCE

One tenure-track position, to teach primarily in a new program in International Relations.

The Academy has established a new program in International Relations, which provides students with a multidisciplinary approach to understanding the global economy and politics. The program offers courses in international relations, global economics, and international law. The Academy seeks to attract qualified faculty members who can contribute to the program’s mission and support its objectives.

Distinguished Professor of Interna

Maritime Business

(Positions redefined and search re-opened)

The Academy is seeking an International Business scholar to join the faculty and to provide academic leadership for the new program. The position may be filled at the assistant, associate, or full professor level, and may be open to candidates with a Ph.D. in international business, economics, finance, and other related fields. The successful candidate will be expected to contribute to the program’s mission by developing courses in international business, economics, finance, and other related fields.

REPLY TO: Director of Human Resources, Massachusetts Maritime Academy, 101 Academy Drive, Buzzards Bay, MA 02531. Include detailed resume and the names, telephone numbers, and addresses of three references. Dates of interest required for appointment. No phone calls, please.

For the Distinguished Professor of International Business, if you wish to respond, send your letter to: Wampler, MA Maritime, 101 Academy Drive, Buzzards Bay, MA 02531.

BUNKER HILL COMMUNITY COLLEGE

Dean of Developmental Learning and Academic Support

General Statement of Duties:

BHCC seeks an experienced educator who can take a new approach to development education and academic support services with a focus on strengthening the relationship between the two. It is expected that the selected candidate will develop models of educational delivery that will help students of diverse cultures and educational backgrounds be successful. An individual must be willing to work long hours but with the thrill of creating a new way of helping students learn.

RESPONSIBILITIES:
The Dean’s responsibilities include providing innovative leadership to the division and the college in the area of Developmental education and Academic Support, supervising the Library, Center for Self-Directed Learning, Multi-Assistance Center, and Success Program, and 23 staff implementing academic policies and strategic plans: developing and managing division budget; encouraging professional and curricular development.

QUALIFICATIONS:

• Master’s degree in Developmental Education or closely related field required. Doctorate preferred.
• Teaching and administrative experience in a secondary or higher education setting, preferably a community college, demonstrating outstanding accomplishments.
• Experience with Information Technology particularly as it relates to development education.
• Competent leadership, administrative, computer and policy implementation skills.

PROVEN ABILITY TO:

• Develop innovative solutions to chronic barriers affecting student ability to do college-level work.
• Work with and lead faculty and staff in new ways of providing developmental education and academic support.
• Integrate technology; issues of diversity, global awareness and experiential learning into curricular models.
• Encourage and foster a student-centered and learning-focused approach to teaching.
• Encourage team approaches in the management of programs, and provost leadership in a strategic planning environment.
• Work in an environment in which change is a highly valued cultural characteristic.
• Work in a diverse environment utilizing differences of students, faculty and staff to enhance individual learning and that of the community college.
• Work as a partner with the Vice-President in providing leadership, developmental education and academic support.

SALARY RANGE: $65,000.00 - $70,000.00

Job Code: B151/FY00

Review of applications will begin May 4, 2000 and continue until position is filled.

To apply in confidence, interested candidates should send a resume, cover letter addressing each of the qualifications and proven abilities to Bunker Hill Community College, Molly D. Ambrose, Director of Human Resources and Labor Relations, Job Code: B151/FY00, 250 New Rutherford Avenue, Boston, MA 02129. Bunker Hill Community College is an Affirmative Action/Equal Opportunity Employer. Women, people of color, individuals with disabilities and others are strongly encouraged to apply.
COLUMBIA UNIVERSITY
SCHOOL OF GENERAL STUDIES
Dean of Students

Reporting to the Dean of the School, the incumbent oversees student affairs for approximately 1,300 undergraduate students. He or she manages two support staff and four student affairs professionals who advise students on academic and personal issues; supervises registration, review of student records, and graduation; collaborates closely with faculty in the Arts Sciences on programmatic and disciplinary matters; and interprets and enforces rules and requirements of the School - they pertain to undergraduate degree candidates. He or she is responsible for long-term planning for student life including but not limited to housing, health services, enrollment management, and other service enhancements; works with the School's senior team to formulate and implement School-wide planning; and serves as an ex-officio member of the Dean's Committee on Instruction.

Qualifications: Ph.D. required. A minimum of eight years' college teaching and/or academic administration required. Strong counseling experience essential. Knowledge of liberal arts required. Excellent organizational, administrative, management, and interpersonal skills necessary. Sense of humor essential. Ability to design, organize, and administer programs and services for nontraditional students required. Must be familiar with Microsoft Office and large student information systems.

The School of General Studies (GS) of Columbia University is the premier college for nontraditional students who have interrupted their education for at least one year and now wish to complete the B.A. or B.S. degree. What distinguishes us from other similar colleges is that GS students are fully integrated into the University's undergraduate curriculum, take the same courses, and major in the same academic departments as other Columbia undergraduates.

Send a cover letter indicating interest and qualifications, current vitae, and names, addresses, and phone numbers of five persons who can be contacted for reference to:

Andrew Hrycak, Associate Dean of Administration
Columbia University School of General Studies
2370 Broadway, MC 4103, Box D03
New York, NY 10027

Review of all applications will begin immediately and continue until position is filled. For additional information call 212-854-5550 or visit http://www.gs.columbia.edu.

We take affirmative action toward equal employment opportunity. Minorities are especially encouraged to apply.

Associate Dean of Admission-
Coordinator of Multicultural Admission

Responsibilities: Develops, implements, and monitors a comprehensive recruitment plan designed to attract and retain an academically talented and diverse student body. Advises the Dean, serves as liaison to the Office of Multicultural Affairs and student multicultural groups, and works closely with admission colleagues as well as student, faculty, and alumni volunteers.

Specific responsibilities include: Traveling to high schools and college fairs, corresponding with and interviewing prospective students, reviewing applications for admission, and other projects as assigned. Travel also includes outreach to community-based organizations and agencies.

Qualifications: Requires a bachelor's degree and three or more years of experience in extending educational opportunities to U.S. students of color. Experience in admission, graduate work in higher education, and proficiency in Spanish are preferred. Should possess well-developed communication and organizational skills, and the ability to articulate the value of a liberal arts education. The office seeks candidates with enthusiasm, energy, creativity, and the commitment to working cooperatively. A valid driver's license is required.

Founded in 1846, Grinnell College enrolls about 1,300 undergraduate students from nearly every state, including 1 District of Columbia, and 40 foreign countries. The College's primary mission is to provide students with a broad, deep and life-enhancing education that fosters professional success, personal growth, and social responsibility. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunity-rich educational experience which has, at heart, one-on-one interaction between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the top national, selective liberal arts colleges in the United States. Grinnell's endowment resources and alumni gifts; student rank among the top ten and top twenty, respectively, of all colleges and universities in the nation. Additional information can be found at the college's website: www.grinnell.edu.

Application Process: To be assured of consideration, submit a letter, a resume, and a list of three employment references to: Ms. Jan A. Veatch, Office of Human Resources, Grinnell College, P.O. Box 805, Grinnell, IA 50112, or e-mail to HR@grinnell.edu or fax to 515-269-4885 by May 8, 2000. The position will remain open until filled.

Grinnell College
Grinnell College is an equal opportunity/affirmative action employer committed to employing a highly qualified staff which reflects the diversity of the nation. No application shall be discriminated against on the basis of race, national origin, age, gender, sexual orientation, marital status, religion, creed or disability.
PRESIDENT
CONNORS STATE COLLEGE
Warner, Oklahoma

The Board of Regents for the Oklahoma A&M Colleges is accepting applications or nominations for the Presidency of Connors State College.

Connors State College is a state-supported, residential, two-year college established in 1908 with its main campus located in the rural setting of Warner, Oklahoma, and a branch campus located in Muskogee, Oklahoma. Enrollment is 2,300 for Fall, 1999. The College is comprehensive in nature, supporting general education, technical, agricultural and pre-professional programs leading to the associate degree in Arts, Science, or Applied Science. The annual budget of the institution is approximately $9.8 million. The institution has just received a ten-year accreditation by the North Central Association of Colleges and Secondary Schools.

Information pertaining to the institution and position may be obtained by writing to the address shown below. Resumes or applications received may be considered up to the time the position is filled; however, to be assured of consideration materials should be received by May 15, 2000. All communications should be made in writing to:

Mr. Doug Burns, Chair
Presidential Search Committee
OSU/A&M Board of Regents
2800 N. Lincoln Boulevard
Oklahoma City, OK 73105

AN EQUAL OPPORTUNITY, AFFIRMATIVE ACTION EMPLOYER

A CALL FOR PAPERS FOR THE SIXTH CONFERENCE OF RECOVERING THE U.S. HISPANIC LITERARY HERITAGE

DECember 1-2, 20
University of Houston (Main C University Center Undergrads
Houston, Texas

Recovering the Past, Charting the Future: Archives, Can and Questions of Identity

Making the tenth anniversary of the Recovering the U.S. Hispanic Literary Heritage Project, this year's conference will focus specifically on the future of the Recovery Project, its impact and influence on the present and beyond. While the conference will continue to foreground the results of recent Recovery-related research, it will also provide ample space for assessing the effects of Recovering the Past, Charting the Future: Archives, Can and Questions of Identity. The conference will offer a framework to reflect on the past, present, and future of the Recovering the U.S. Hispanic Literary Heritage Project.

PAPERS OR PANELS ARE INVITED on any of the following themes:

- Analytical Studies of Recovered Literature: Authors and/or Texts
- Critical and Theoretical Approaches to Recovered Texts
- Preparation of Critical Editions and supplements
- Curriculum Development

Participants will be asked to provide a publication-ready paper in hard copy and word processing format prior to the conference. Selected papers will be published in the fifth volume of conference proceedings.

Submit a 150-word abstract and curriculum vitae by AUGUST 15, 2000 to

Once, there were Avalon, Aztlán, Atlantis, and Shangri-La, realms born in the depths of the sea, whose watery substance distinguished them from the physical nature of land. The light in these domains was moist and misty, amorphous as a gray fog that suddenly pervades the land, depriving it of physical possession, making their geography impossible to ascertain.

The seductive rays that poured down upon Avalon, Aztlán, Atlantis, and Shangri-La cascaded iridescent, translucent with an unsurpassed clarity. When evening came to these regions, the light mutated, became heavy and ponderous, making it most difficult to see. One could feel this change upon the skin, eerie and sensuous. One could not hold it—it was liquid light, mist and fog.

Only at such times could one pass by ferry across a large body of water to these regions harboring their own secrets of nature, where magic ruled. Not the cackles of the magician, making things disappear, but the skilled art of the alchemist, the sorcerer and sorceress, witch and warlock, who change substances, take on animal forms, craft objects of the soul, with a proclivity toward the spirit's wild side.

In Avalon, Aztlán, Atlantis, and Shangri-La, nature was defined by the absence of a defined order. Idyllic, but not Eden, where the ignorance of sin determined its freedom. And not ersatz paradise—something that religion, politics, and science would claim at a much later date. Just different. In these magical spaces, freedom was not so much a state as a pursuit of liberation from the controls of matter and the material world.

Driven by this impulse, the strangers welcomed the experience of this realm that ignored inductive and deductive reasoning, mocked the metaphysical constructs of the philosopher, the moral codes of the world's principal religions, the laws and order of the state, and the statistical results of scientific experimentation. Here one could be anything. Various rites, some nocturnal, were held... and to religion, to the state, and to science, such a realm posed a horrifying threat.

Religion denounced these rites as pagan, as something not necessarily evil, but definitely sinister. In the West, the Christian Church could not tolerate such a potentially disordered world. It had to be saved. Thus rituals with characteristics of the supernatural were devised to supersede these superstitions.

Conversion under the banner of the cross and the sword became the way to conquer lands spiritually inclined toward nature and the natural state.

Moslems did the same in the East, under the crescent moon and the sword, eclipse the influence of Avalon, Aztlán, Atlantis, and Shangri-La, the state had separate itself, as in England and Ireland, from its ties to the occult. It had help the Church reduce these memories as mythical and legendary, never rea.

Science, too, had a hand in this conspiracy. Concerned with the physic properties of nature, its hypotheses open to new discoveries, science could not allow elusive magic to explain change. Magic was seen as a menace to their craft and to their potential power over the minds of men and women. So, church, state, and science acted to reduce the realm of magic to as also Sorcerers and sorceresses, dabbles in divinations, spells, and love potions were expelled, incarcerated, burned at the stake.

The Old World conflict did not end painlessly but carried over into the New World. The Massachusetts Puritan colony and Bishop Zumarraga Mexico shared one and the same religious and political interest—to rid the New World of magic and superstition.

In the New World, too, the Indigenous Peoples—seen as pagans given hybrid deities, superstitions, erotic and sensual relationships to satisfy pleasurable, and reminding their conquers: another time, when magic consort with human nature—were massacred in the name of order and God. Religious state, and science did not grasp that magic is a hydra with many heads, cannot be totally destroyed, returns when least expected, mutates over time. Magic looks to reenter the earth by stealth.

Seemingly scientific, cyberspace is magic's latest mutation. It plays with minds infinite possibilities of communication and relationship. That the Zapatista in January 1994, humbled the Mexican state to the negotiating table, because cyberspace magic, is no surprise. Through cyberspace, millions are breadth through language, belief, and cultural barriers—discovering a common nature, immune from the authority of the contemporary pillars of society. The magic Avalon, Aztlán, Atlantis, and Shangri-La has returned. Ironically, the magic of cyberspace has infiltrated our known structures and our systems of physical evidence. The chat room has replaced the confessional, the caucus room, the laboratory. Intimacy has taken a new twist. Men and women are free again follow their hearts across unlimited horizons and to express those feelings with shame. Cyberspace has become the realm where grace reigns.

The changing face of America's Business

It's bright. It's intelligent. It's full of hope. And, it's definitely different from what it used to be. Because, as the face of America changes, so does the face of America's business. Corporate America thoroughly understands that behind those faces are valuable minds that reflect unique knowledge and viewpoints. And, it nurtures these minds through something equally as valuable—the Consortium for Graduate Study in Management. Through us, America's most respected corporations provide funding and support for the brightest and best African, Hispanic and Native Americans, enabling them to achieve their MBAs.

Equally as integral a part of the Consortium are the member universities that our students will be attending—top schools whose generous contributions are vital to the success of our program.

Yes, the face of American business is changing. And, as a result, so are its perspectives, opinions and valued cultural backgrounds. A broader, wiser, more diverse corporate America is our commitment... and America's future. Ready to face the future? Call the Consortium at (888) 658-6814. Or, visit our website at www.cgsm.org/bo.html.

PUNTO FINAL
The Unspoken Divide among Hispanics
The Yearning to Learn English

by Gustavo A. Mellander

The myth never ends. There are hundreds of thousands of millions of people in the country who still believe that Hispanic immigrants don’t want to learn English. That is patent false.

How to Learn English

Clearly, anyone who made the heart-wrenching decision to leave their native country have made a sincere commitment to be part of the fabric of their new country. They know full well that one of their important goals is to become proficient in English. They want to for themselves and most assuredly for their children.

Even among intelligent people of good will, the battle rages on. How can students with a native language other than English learn English and master course content?

It has spawned a relentless, divisive battle. A battle that is not bringing us any closer to a solution.

Many experienced educators believe that students who use English as a second language should be educated in their native language. There is much irrefutable research data to support their position. After all, the answer to “dos mas dos” can be taught in Spanish as well as in English. The trick is to get the content across in the language that the student is most familiar with. Then, at the same time, to build a bridge to English so that the student also learns “two plus two.” Seems simple and logical enough.

But the critics oppose bilingual education. In part—and one must be honest—because many of the programs have failed. After years of bilingual education, some students haven’t learned English at all.

Reasons for Failures

Why the lack of success? There are many reasons, and they are all complex. Let me address just two of them.

First is it really realistic to expect students to learn a foreign language? How well would most of us do if we were suddenly deposited in a rural area of China?

Last century, two immigrants came over. Let’s say from Germany. They were young adults and immediately went to work. They met and married. Although very anxious to fit in, to become Americans, they never fully learned English. Thus they spent their lives within the borders of their linguistic ghetto. Their friends, their church, their social activities were, by and large, circumscribed by those who spoke German.

Before their children went to school, they spoke some German and understood it very well. But they were quickly indoctrinated against using German, even in the playground. They went to “sink or swim” schools: learn English or else. Many an intelligent and otherwise qualified person was cast aside. Forced not to reach their potential because they did not learn English.

They became ashamed of their language and embarrassed that their parents did not speak English well. With a few notable exceptions, their English was faulty as well. It would only be their children, the grandchildren of the immigrants, who mastered English.

Of course, by that time, they no longer spoke or understood German very well. They loved their grandparents and thought their broken English was quaint. With the passage of time, they would bemoan the fact that they did not understand the language of their ancestors, much less their culture.

That’s an example—repli cat a million times. Many lessons can be drawn from these experiences. One of them is that it is unrealistic to expect immigrants to be proficient in English in their lifetime. If they are very lucky and privileged, their children will be proficient, but the odds are that it will be their grandchildren who navigate English comfortably.

Strangely enough, many of those whose family took three generations to learn English well are the ones who rail against bilingual education. I have yet to meet an outspoken critic of bilingual education who did not lament the fact they cannot speak the language of their grandparents or great-grandparents.

So let’s not shoot the whole concept of bilingual education just because it doesn’t work in a few brief years.

Second Point

Secondly, it is not surprising that so many bilingual programs have failed. Many were poorly designed, and the vast majority of these programs were never properly funded. There was a dearth of qualified teachers and even less support for them. The surprise is not that so many programs failed; the surprise is that so many teachers and kids did so well.

Reaction

The concept of bilingual education is as popular in some quarters as a skunk at a lawn party in California, which is such a bummer for the entire nation, the first to act. It did so with vengeance. On June 5, 1998 California overwhelmingly approved Proposition 227, an initiative that largely eliminated bilingual education in the state’s public schools. It has encouraged other states. Pressure is building Arizona for a similar citizen initiative that might be placed before the public in 2000. So the attacks will not end soon.

The whole issue is further complicated by what some have called the xenophobic “English-only” movement. The idea that English should be the only language taught and spoken in the United States has become an election-year reality. Proponents argue that the government could make an import statement—and save valuable resources—by mandating an English language. All that energy, a money, would have been better focused on securing funding for effective bilingual programs.

The Bottom Line

Bilingual professionals are the first to acknowledge that there are plenty of ways bilingual programs could be improved—by hiring qualified teachers and by funding the programs proportionately. So students don’t languish in these programs forever. Among others, finally let’s not overpromise. It takes time to learn a foreign language.

Dr. Mellander is a professor at George Mason University.
May 5, 2000

Dear Colleagues:

What a pleasure it is to see so many students and so many states represented on the TOP 100 lists. And to report that degrees earned by Hispanics are up in every category over the previous year—bachelor’s up 3.1 percent, master’s up 5.4 percent, doctorate up 5.9 percent. In actual numbers—1,188, 517, and 50 additional graduates.

Every one of the 48,668 Hispanic TOP 100 graduates is living proof that we can and do succeed in academe. Moreover, each is a potential mentor to dozens or even hundreds of potential scholars over a lifetime.

But this is no time for resting on our laurels. Coming years will bring large numbers of new immigrants, many lacking a family history of higher education or even high school, and not yet proficient in English. We can help these new arrivals as well as others at risk of becoming a permanent underclass, to join in the success now being earned by many Hispanics throughout the U.S.

Education is the answer. Please continue to lend your minds, your hearts, and your hard work to making the U.S.A. the land of oportunidad. Here at the magazine, we will continue to bring you word of ideas and actions, public and private, that merit your attention and perhaps your collaboration.

To the Top 100 colleges and universities, to the graduates, and to all who helped them get there, our warm congratulations.

¡Enhorabuena!

The TOP 100 List of universities granting doctorates to Hispanics is the most diversified of the three, including 28 states and the District of Columbia. Of 28,077 doctoral degrees represented here, 986 went to Hispanics—3.5 percent, roughly one-half the percentage shown for master's. Hispanic men are ahead of women, earning 51 percent. California has a very clear lead with 20 of its schools among the TOP 100.

A look at the Top 100: Students and Faculty

By Mari Carmen Sarracino

By and large, in 90 out of 100 schools, females outnumber males. Florida International University leads the Top 100 in awarding bachelor's degrees to Hispanics in the 1997-98 school year. Out of 3,937-2004 went to Hispanics, and women earned more than half of them.

A quick perusal reveals that the universities that made the list also reside in states where there are large concentrations of Hispanics—California, Texas, New York, and Illinois.

While the trend has been that female students are either keeping up with, catching up with, or surpassing males in some universities is remarkable. Women baccalaureates exceed men, in many cases, more than double, at New Jersey City University and George Mason University. Texas A&M International University, The University of Texas at San Antonio, and La Salle University also have impressive statistics.

Florida International University also topped the list of colleges awarding the most master's degrees to Hispanics. And again, women exceeded the men. A total of 1,307 master's degrees were awarded in 1997-98. Hispanic recipients represented 33.5 percent of 438, of which 60 percent were women. Nova Southeastern University in Florida, San Diego State University, and New York University reported notable figures. Percentage-wise, Hispanic master's degree recipients still are relatively minute in number compared to the total; however, the number of Hispanic women earning these degrees is worth remarking on. For example, at New York University, which ranked

Hispanics represented only four percent of the almost 5,000 master's recipients. However, of the 2,211 Hispanics who earned their master's, 149 women or 67 percent received a graduate degree compared to 72 men.

Interestingly, five Ivy League schools also are among the Top 10 for master's degrees awarded to Hispanics—Harvard University, Stanford University, Columbia University, University of Pennsylvania, and Massachusetts Institute of Technology. Again the numbers are tiny in comparison to the overall picture, but Latinos are in there and accounted for. At No. 21, Harvard University granted 120 master's (four percent) to Hispanics out of a total 2,770. Stanford, at No. 29, awarded 104 (five percent) to Hispanics out of 1,964. Columbia University stood at No. 36, awarding 3,376 master's, 94 (two percent) to Hispanics. The University of Pennsylvania awarded an estimated two percent of its master's to Hispanics. MIT awarded three percent of its graduate degrees to Hispanic students.

The Ivy League did better in the doctoral category—in the following order: Harvard, Stanford, Columbia, University of Chicago, Yale, MIT, Cornell, Princeton, the University of Pennsylvania, and Brown. The University of Texas at Austin ranked No. 1, graduating 836 doctors, 48 of them Hispanic. UCLA was followed by two University of California campuses, which awarded 35 and 31 Hispanic doctorates respectively. Arizona State University, the University of Miami, the University of Southern California, and Harvard are close, graduating 26, 24, and 23.

By Discipline

The top disciplines in which Hispanics earned a baccalaureate degree are the following: business and marketing, social sciences, education, psychology, protective services, communications, health sciences, and engineering/engineering.

More than 500 Hispanics earned a B.A. in business and marketing at Florida International University, where more than half of the recipients were women. UCLA was the No. 1 school for 33 of its social science Hispanic graduates. Psychology was the runner-up as the leading academic discipline at six California universities as well as institutions in Florida, New York, and Texas. Protective services followed with 133 Hispanic grad-

uates at CUNY John Jay Criminal Justice (more women than men, 72:61).

Other areas of study in which Hispanics are reported to be concentrating are computer science, visual and performing arts, biological science, foreign language, English literature, mathematics, and public administration.

Faculty

In reviewing the colleges that graduate the most Hispanics, we must remark to examine faculty diversity at these institutions. Needless say, gender and racial diversity is equally significant where faculty is concerned.

According to data from the National Center for Education Statistics, based on the number of Hispanic administrators and faculty in Top 100 four-year colleges enrolling the most Hispanics, the University of Miami reports the most Hispanic managers, 331, of whom 246 are women. The University of Texas at El Paso comes in second with 99 Hispanic managers, then Florida International University with 70. Similar the student data, location has a great impact on the extent of campus diversity.

The institutions with the greatest Hispanic faculty percentages are The University of Texas at Brownsville (41.4 percent), the University of Texas Pan American (31.6 percent) and UTEP (22 percent), Texas A&M International University (24.5 percent), and New Mexico Highlands University (23.6 percent). Those with the greatest numbers are U of Miami with 287, UCLA with 214, U of New Mexico, main campus with 197, and UT-Erl with 169.

Overall, Hispanic male faculty outpace their female counterparts, although at a little more than 10 percent of the 100 schools reviewed, the gender gap between Hispanic men and women is narrowing. Given that the Top 100 schools graduate such a significant number of Hispanics, one would be surprised if the faculty ranks of these institutions also would be representative of its students. At most of these institutions, the faculty totals are in the hundreds, and Hispanic faculty percentages, except in the colleges highlighted, do not exceed 20 percent. Needless to say, there is room for improvement.

This situation is mirrored nationwide. The National Center for Education Statistics October 1998 report—New Entrants to the Full-Time Faculty of Higher Education Institutions—offers insight into the condition of faculty in higher education. The statistical reports looked at full-time faculty who in the fall of 1992 were in the first seven years of their academic careers and compared this new cohort with full-time faculty who in the fall of 1992 had eight or more years of full-time college experience, a senior cohort.

The report excludes part-time faculty members. "Senior faculty" depicts faculty employed full-time, having teaching, research, or administrative (at the level of program director, department chair, or dean) responsibilities. The findings show quantitative improvement in terms of diversifying the traditionally white, male academe, it also presents possible insight into why minorities are not attaining tenured positions despite having proper credentials. Why the path to the professorate is so lengthy, and why faculty appointments seem few when in fact there is a "dynamic academic marketplace" looking for hires?

The report concluded that while new hires in higher education have been viewed as static, there is "a very sizable infusion of new blood" that seems to be more diverse than in the past—for some groups more than others. The new entrants constituted 33.5 percent of the 514,976 full-time faculty reviewed.

New entrants accounted for 41.4 percent of the faculties at the private research universities; at comprehensive universities, they accounted for 23.2 percent; at liberal arts colleges, 9.7 percent; and at public two-year colleges, 19.3 percent. The larger contingent of new faculty is in the health sciences. Viewed by program area, new faculty are less likely to have "their academic homes in the traditional arts and sciences." Business, education, and engineering are other areas in which new faculty are focusing faculty appointment opportunities in the liberal arts are shrinking. According to the study, the number of new-entry women was so sizable relative to the existing senior female faculty that they now represented 4 percent of all women faculty in engineering; 45 percent in social sciences; 45 percent in the natural sciences; 42 percent of all women faculty in the fine arts; 40 percent in education; 38 percent in the humanities; and 36 percent of all women faculty in business.

In terms of race, while non-Hispanics still comprised the largest share of new faculty hires, although their proportion was less than in among the senior cohort. Minorities now represented 169 percent of the new entrants compared to 117 percent of senior faculty. Asian and Island men achieved the largest gain. Hispanic new faculty represented 31 percent, an increase from 23 percent of the senior faculty.

Overall, female minority faculty, who accounted for 31.2 percent of all minority faculty in the senior cohort, have recently fared better than minority women comprised 38.4 percent of all new-entry-minority faculty.

Other Findings

Females constituted 41 percent of the new faculty, 28 percent of the senior cohort, and 33 percent of the full-time faculty overall.

Racial/ethnic minorities represented 17 percent of the new cohort, 12 percent of the senior cohort, and 13 percent of the full-time faculty overall.

New faculty, like senior faculty, earned their highest degree in their early thirties but did not assume their current position on average until years later, compared to two to three years later for senior faculty.

Unlike in the 1950s when many faculty members were often hired without doctoral degrees, in subsequent years that trend ended.

New faculty were more likely than senior faculty to have had prior work experience (including outside of the academy) prior to assuming position they held in the fall of 1992.

33 percent of the new cohort was in non-tenure-eligible positions compared to 16 percent of the senior faculty, and females among the cohort faculty were more likely than males to hold such non-tenure-earning appointments.

The proportion of faculty who are tenurable (either tenured or tenure-track) is shrinking due to the large number of faculty who are non-tenure-track. A second trend is the contraction in the proportion of tenure-track positions as increasing numbers of faculty appointments are made in other categories, some short-term, others longer term, but all less closely coupled with the host institution and its future.

Inchoate faculty members aspire to become tenured full-time professors. But as it has been the nature of academia, attaining the rank of full professor requires endurance as it is a long and lengthy process. According to the faculty survey, approximately 42.5 percent of the new entrants were at the assistant professor level, and 20.1 percent held the rank of instructor. Fifteen percent were already associate professor, or 11.9 percent were professor. However, the senior cohort held positions in the higher range of the traditional ladder ranks (assistant, associate, and full professor) — 69.5 percent of the new cohort held such appointments compared to 84.1 percent of the senior cohort.

The highest percentages in the ladder ranks went to the social sciences (79.1 percent) and natural science (76.2). Humanities faculty reflected more non-tenure track positions.

The new cohort was less likely to be tenured than the senior cohort. More significantly, stated the report, new entrants also were less likely to be in the tenure stream: 33.2 percent were not in tenure-eligible positions compared to 16.5 of the senior group. It does get better when gender is factored in. Female faculty from both cohorts were more likely to be employed in non-tenure-track appointments than males. And even more startling, is the fact that the new generation of male faculty was more likely than the new female faculty to have been awarded tenure already; (29.1 percent versus 16.5 percent respectively). Interestingly, new-generation faculty at two-year colleges coupled with those at research universities were much more likely to have obtained tenure than at other categories of institutions.

Unlike the senior cohort, new faculty tend to spend more time conducting research than teaching. Assistant professors, instructors, and lecturers spent a higher proportion of their time in the classroom than did full or associate professors.

</table>
In terms of job satisfaction, overall, new entrants were less satisfied. Women were more so than men. In both cohorts, women were more dissatisfied with their salaries than their male colleagues. According to the study's section on teaching workload of full-time postsecondary faculty, income earned for full-time instructional faculty and staff kept pace with inflation between the fall of 1988 and 1992, during which time men earned about $60,000 in 1992 dollars. When institutional type is considered, new-generation faculty reported lower satisfaction across the board—job security, advancement opportunities, keeping current in the field, and freedom for outside consulting.

In a study regarding new faculty in higher education, new entrants accounted for 41.4 percent of the faculties at the private research universities; at comprehensive universities, they accounted for 23.2 percent; at liberal arts colleges, 7.4 percent; and at public two-year colleges, 19.3 percent. The large contingent of the new faculty is in the health sciences.

The Ivy League Review: Part Three

Princeton University, Columbia University and University of Pennsylvania

by Mari Carmen Sarracent

A survey conducted by the Business Higher Education Forum (BHEF), a collaboration of the American Council on Education and the National Alliance of Business, cites diversity in higher education, which feeds the professional workforce, as vital to America's successful competition in the global economy. Most institutions of higher learning adopt this school of thought. Columbia, Princeton, and the University of Pennsylvania, which are featured in this article, are members of the Leadership Alliance, which is a consortium of leading teaching and research colleges and universities dedicated to encouraging more underrepresented students to pursue graduate studies in science, mathematics, engineering, and the technology professions.

Princeton University

Princeton University has one of the highest percentages of tenured faculty. Unfortunately, there are not as many women and people of color represented in the tenured rank. Seventy-six percent of the professorial faculty is tenured. Excluding visitors, 270 members of the faculty are women, and 140 are identified as members of minority groups. In the 1998-99 school year, there were 75 tenured women on the faculty.

Princeton's efforts to integrate diversity into its faculty, student body, curriculum, and mission are ongoing. In 1997, the university published "Race, Ethnicity, and Cross-Cultural Encounter: A Guide to Undergraduate Courses," which was developed as a result of the 1995-96 Task Force on Diversity, a group of faculty and students led by professor of religion Albert J. Raboteau. This taskforce led to a number of initiatives, one of which was the search for a senior scholar in Latino Studies, the result being Alejandro Portes, professor in the Department of Sociology, renowned specialist in immigration and ethnicity, social change in Latin America, and economic sociology.

The taskforce also spearheaded the development of a new course led by Miguel Centeno, professor of sociology, entitled The Sociology of Latinos in the U.S.

Last year, the Princeton Plasma Physics Laboratory (PPPL) received two Equal Employment Opportunity (EEO)/Diversity awards from the U.S. Department of Energy. (PPPL is funded by DOE and managed by Princeton, and it is a collaborative national center for science and innovation leading to a fusion energy source.)

Pamela Lucas, PPPL diversity officer, accepted the Turquoise Award for Commitment in EEO/Diversity and the EEO/Diversity Best Practices Award on behalf of the laboratory. These diversity awards were established in 1998 by the Department of Energy to recognize organizations that have advanced the cause of diversity in the workplace and have been exemplary for other facilities and programs within the department.

Undergraduate enrollment in 1998-99 totaled 4,624, American minorities, as they are identified by Princeton, numbered 1,247, or 27 percent. The minority classification includes Latino, African American, Asian American, and Native American students. Approximate enrollment for the 1999-2000 academic year was comparable. Out of 1,694 applicants admitted in 1999, minority students represented 557, or 32 percent.

According to the "Report of the Undergraduate Admission Study Group," which examined the 1997-98 academic year to review the school's undergraduate admissions process, "taken as a whole minority enrollment has improved slow over the last two decades." The report indicated that minority students comprised 16.9 percent of the Class of 1998, 25.6 of the Class of 2001, and 26.6 percent of the Class of 2002.

Latinos, however, amount to seven percent of the student body, so it's unusual to hear Latino students' criticisms about life on campus. In the Da Princetonian, Vincente Cabeza de Baca of the Class of 2002 explained that transition to Princeton was not a smooth one. "The biggest shock to me was the intellectual transition. The toughest thing is the social transition."

Jessica Marquez, '99, started Organizacion Latinos Americana, for students of all Latin American background. She noted that she tries not to be pessimistic.

A student at Princeton, published letter in the Progressive Review, which acknowledges the universities emphasis but at the same time underscores problems that still exist: "Students color on this campus have long demanded improvement in this aspect of life Princeton. This does not simply mean more colored bodies... We increased acceptance of our presence without people thinking we are incapable... Increasing diversification efforts at Princeton does not necessarily mean hiring lower quality faculty color. Qualified scholars DO exist, and the University has the capacity to hire them, or at least do a better job of retaining those who are currently here."

One of the benefits of attending Princeton University is the one-on-
attention its students receive. According to U.S. News Online, Princeton University has a low student/faculty ratio—five-to-one. It ranked third after California Institute of Technology and the University of Chicago, a sister Ivy League.

Princeton University is located in Princeton, New Jersey, in a town of approximately 30,000 residents.

**Columbia University**

Columbia University located in New York's upper west side boasts a seven to one student/faculty ratio. Founded in 1754 as King's College, it is the first in New York and the fifth oldest college in the nation. It is also listed as one of the most exclusive colleges as its acceptance rate is 14 percent, according to U.S. News Online.

In the 1996-97 academic year, Columbia University awarded 114 degrees to Hispanic females and 144 to Hispanic males. Breakdowns are as follows: 88 bachelor's, 106 master's, 38 first-professional, 5 advanced certificates, 9 M. Phil., and 9 doctorates. Where other groups experienced increases in the number of degrees awarded by race and gender, Hispanics showed a slight decline from the previous academic year.

Hispanic full-time faculty has made gains since 1985–39 in 1985 to 91 in 1997. When compared to the University total (women), the Hispanic percentage increased slightly from almost two percent to three percent. A small ascent but an increase all the same.

Regarding the numbers, Columbia is recognized as an educational melting pot, and it is known for its cultural sensitivity. In March, the University sponsored a conference to examine the health of urban children. The event was sponsored by The Columbia Center for Children's Environmental Health. Among the roundtable representatives was Manuela Ortjuela, M.D., assistant professor clinical public health (environmental health sciences) and clinical pediatrics (pediatric oncology) at Columbia.

Dr. Ortjuela received her medical degree at Yale. Subsequently, she completed her training in Pediatrics at Columbia's Babies and Children's Hospital and her training in Pediatric Oncology at the Memorial Sloan Kettering Cancer Center. She also hold a degree in epidemiology from the Harvard School of Public Health and was a member of the Department of Medicine at the Boston Children's Hospital.

While the faculty appointment process is painstakingly slow (as are faculty searches at most universities), many talented candidates are hired. Columbia recently appointed Alan Medina, M.D., clinical psychiatrist, was appointed clinical instructor in psychiatry at the Columbia University College of Physicians and Surgeons. Dr. Medina is bilingual and bicultural (English/Spanish). His areas of interest include individual psychoanalytic psychotherapy, group therapy, and psychopharmacology.

**University of Pennsylvania**

Universities located in the various hubs of diversity along the East Coast still face the issue of affirmative action. Recently, at the University of Pennsylvania, a forum took place entitled “Rethinking the Remedy: The Future of Affirmative Action in Higher Education and the Workplace.” Richard Kahlenberg, senior fellow at the Century Foundation and author of The Remedy: Class, Race, and Affirmative Action, in his keynote address argued that class, not race, should be the basis for preferences in college admissions, employment, and contracting.

In a recent article in the Pennsylvania Current, a University of Pennsylvania publication, about the forum, Kahlenberg is quoted as saying, “Class-based affirmative action produces more [racial] diversity than no affirmative action at all.” His statement is based on the belief that the Supreme Court is expected to overturn the Bakke decision, which permits the use of race in admissions.

Thomas Sugrue, Class of 1940, professor of history and sociology, noted that there are benefits to class-based affirmative action, such as exposure to people of color or not of various economic means. Most of my students do not know that the median family income in the United States is only slightly higher than Penn's tuition and fees for one year.”

Once at the University, students and faculty strive to feed at home on campus. Lilvia Soto, assistant dean for advising and La Casa Latina’s director, helped form the Latino Faculty and Staff Association five years ago. La Casa Latina, which opened its doors in 1998, is a central meeting place for both students and faculty of Hispanic origin. The Center received a diversity grant from the provost that helped launch a Latino website, La Telerana Latina, whose aim is to strengthen ties between the campus Latino community and the more than 3,000 Hispanic Penn alumni.

The University of Pennsylvania maintains close ties with its alumni. Through Penn's Association of Latino Alumni, Latino students have the opportunity to meet and interact with many distinguished Hispanic Penn grads from a variety of disciplines. For example, in February Bob Rivera, GFA ’72 was featured with 24 other artists at The Painted Bride 30th Anniversary Exhibit opening. And in May Penn students will meet Gilbert F. Casellas, Esq., Law ’77, a university trustee and member of AIA's Board of directors.

Enrollment data (Dec. 98) for undergraduate and graduate/professional totaled 21,729. According to university facts and figures about 36 percent of those students accepted for admission to the Class of 2003 are black, Hispanic, Asian or Native American. Women comprise 49.6 percent of all students currently enrolled. International students of Hispanic origin from Central/South America and the Caribbean represent 12.2 percent.

While the University of Pennsylvania is aware of the need for diversity among its student body and faculty and administration, it's going to take some time. In administration, women fill 25 percent of the top-ranking posts. This statistic is similar to that at other Ivy League schools.
Southwest Texas State University

LBJ’s Alma Mater Boasts Nationally Recognized Programs

By Roger Deitz

Southwest Texas students and alumni (SWTexans—pronounced Southwest Texans) are a proud group. Among the 100,000 who have received degrees in the years spanning the University’s centennial of operation can be found the names President Lyndon Johnson, country singers George Strait and Tracy Byrd, national syndicated columnist Heloise, Emmy Award-winning actor Powe Boothe, and Emmy Award-winning director Thomas Carter. The list includes noted educator Tomas Rivera and Tejano music entertainer Emilio Navaira as well as Olympic high-jump champion Charle Austin and 1996 Olympic gold medal winner Deion Sanders. The Southwest roster also contains Dallas TV news anchor Gloria Campos, Di Flores, publisher of the El Paso Times, and Marcellus Alexander, general manager of WFJA-TV in Baltimore. According to University President Jerome H. Supple, there are many, many more “making a difference in the world of business, education, communication, performing arts, law and law enforcement, health care, the military, science, religion—any field you can name.”

SWT holds the distinction of being the only Texas university that has graduated a U.S. president. LBJ, the 36th president, graduated from SWT in 1930 with a teacher’s degree. Johnson taught public school in Cotulla and Houston, Texas, before embarking on a distinguished career as a public servant and statesman. He is known “the education president,” and many believe his concern for education and equal opportunity is closely related to the formative influence of his college days at SWT. Today, the school continues to lobby goals in higher education and diversity.

President Supple continues, “One of our four university goals for the next five years is the promotion of ethnic, gender, and cultural diversity. Our university community is richer and more effective educating its students when the environment in which we teach reflects the world around us. We're not promoting diversity because someone says we have to. We're not promoting it because the politically correct thing to do. We're promoting it because it's good for Southwest Texas and Texas, and because it's the right thing to do. And now the right thing to do is add Southwest Texas State University to the Honor Roll.”

Located in San Marcos, at the gateway to the Texas Hill Country, Southwest Texas State University enjoys a uniquely beautiful and advantageous setting among Texas universities. Within commuting distance of both Austin and San Antonio, the 42-acre main campus includes Spring Lake and the headwaters of the San Marcos River. The San Marcos Springs bubble up from the ground on campus to fill Spring Lake, then form the San Marcos River, which flows through the campus on its way to the Gulf of Mexico. The school is situated on the Balcones Fault, which separates the Texas Hill Country from the coastal plains. "Deep in the heart of Texas," the University is also easily accessed from Dallas/Ft. Worth, Houston, and other areas of the state.

One of the most academically selective public universities in Texas, SWT is a member of the Texas State University System. The University offers undergraduate degrees in 108 fields, master's degrees in 78 fields, and doctorates in two. A 52-hour General Studies core curriculum at SWT is considered essential in a balanced liberal arts education. It gives undergraduates a common experience and a solid foundation in the arts and sciences. The Honors Program provides challenging and "participation intensive" studies wherein students take an active role in designing their courses and choosing their faculty. The institution enrolls 21,798 students, who are taught by 950 faculty members. The student to faculty ratio is 21:1, and the average class size is 37. Some 26 percent of the student body are ethnic minorities, and 55 percent are female. 72 percent of the overall enrollment is full-time students, and 14 percent is graduate students.

Student demographics include 97 percent Texas residents, 2 percent out-of-state, 1 percent international, 18 percent Hispanic, and 5 percent African American. According to the TOP 100 institutions Hispanics based on degrees awarded, SWT is ranked number 20.

Of the 25 undergraduates nationwide to win $18,000 Rocke
Brothers Fund Fellowships to apply toward graduate studies in education, three were from SWT, the only school to have all three of applicants selected—and all three are Hispanic.

True to its Normal School roots, Southwest is the top teacher
The center for Multicultural & Gender Studies offers an interdisciplinary minor in U.S. Ethnic Studies and an 18-hour interdisciplinary minor in Women's St.

The center co-sponsors several organized events that address race, gender, and/or ethnicity, such as "Images of Women Conference" weekly brown-bag lecture series and "Herstory." In addition to the eight central areas of the Internat., Studies Program, the University study-abroad programs, including study abroad programs, including "Latin America, and Asia. Multicultural Student Affairs offers services to current and prospective students. The staff provides culturally sensitive consultation to students, faculty, and prospective students. The staff also assists with academic, personal, social, financial, and career issues. MSA, in collaboration with other student affairs services, provides programs throughout the year that heighten cultural awareness and develop leadership skills to promote diversity initiatives on campus.

MSA also assists in the recruitment and retention of first-generation students through coordination with the Office of Admission, academic departments, and state civic organizations. It is appropriate that the MSA is located in the LBJ Student Center. After all, it was LBJ who championed civil rights legislation in the 1960s. The University notes that there are at least 16 Hispanic organizations on campus. The list includes the Association of Mexican American Students, Bilingual Education Students Organization, Friends of Zaredo, Grupo Folklórico, the Hispanic Business Student Association, and the Latin American Studies Association. In addition, we have Lambda Delta Epsilon, I Omega Alpha, League of United Latin American Citizens, Mexican American Engineers and Scientists, Minority Youth Justice Association, Movimiento Estudiantil Chicano de Aztlán, Lambda Beta, Sigma Lambda Gamma, and the Society of Writers Spanish Language.
Upt and Coming Scholars Program Offers Chance for College

Angelo State University Reaches out

BY PRESTON LEWIS

Ever since he could remember, José Trejo wanted to go to college and become a doctor. When he was in the eighth grade in San Angelo, Texas, he got the chance.

All José had to do was keep up his grades and he was guaranteed an academic scholarship to Angelo State University.

Now a senior at San Angelo's Central High School, José is looking forward to next fall when the Up and Coming Scholars Program will help him fulfill his lifelong dream.

The program is a joint effort by Angelo State University and the San Angelo Independent School District (SAISD) to identify promising junior high students from low-income families and to offer them a chance to go to college. José was one of 60 Class of 2000 members selected in junior high for the Up and Coming Scholars Program.

To help them stay on track toward college, ASU and SAISD officials provide a range of services that can include mentoring, counseling, academic assistance, and, in some cases, the emotional support to help ensure that the program's participants acquire a high school diploma. In addition, program participants are issued Angelo State University ID cards, which allows them to use the University's Porter Henderson Library, the computer labs, and other academic facilities as well as to attend ASU sporting events for free.

“The idea,” says Joe Muñoz, assistant to the ASU president well as a member of the SAISD School Board, “is to acclimate them to the university campus before they leave high school so they feel more comfortable with college when they enroll as freshmen.”

In all, it is a well-conceived program that selects academically promising students from economically disadvantaged families in the San Angelo school system. After eliminating the financial impediment that most of those students and their families would face paying for college, the program provides special attention to the students' plans, prepare for a college degree. Further, the program reinforces the long-term value of a college education families that might not be able to see beyond the next paycheck.

The program was initiated in 1994 and funded through ASU, Robert G. and Nona K. Ca Scholarship Foundation, which covers tuition and all fees for the Up and Coming Scholars who enroll ASU. San Angelo philanthropists M-Eva Camacho Tucker provided $150,000 endowment to help cov
the costs of the special summer programs for the program participants. Additionally, the program receives support from Wells-Fargo Bank, Hirschi Steel, Shannon Hospital, and Golden Corral Restaurant, all of San Angelo.

Twenty-six of the 60 students who began the program that inaugural year, while still in the eighth grade, enrolled at ASU. Of those nine continued the program into their second year. Twenty-eight of the 60 in the second class enrolled as ASU freshmen in the fall of 1990.

A handful of the students in the first two classes received scholarships to other universities.

"It is a solution," says ASU President E. James Hindman of the program, "but it is not a perfect solution. By living at home and maintaining their scholarships, the Up and Coming Scholars can get a college education practically free, but sometimes even that isn't enough to keep them in the program."

A study of the program by E. Lisa Smetana, records coordinator for the Carr Foundation, showed that after the first five years of the program, 90 of the 300 students had dropped. Of the program dropouts, 1 percent were academic casualties.

Although they are listed as academic casualties, the reasons may well be more complicated and include economic as well as family factors.

Muñoz said, "We have kids whose parents don't encourage them to go to college because they need the money to support the family more than they need their sons and daughters to go to college."

Some students, Muñoz said, have had to give up the chance to take a college education to shear sheep around the San Angelo area, which is the center of the Texas wool and mohair industry.

In addition to the economic challenges, Jamie Highsmith, head counselor and coordinator of the program at Central High School, said the problems associated with one-parent families can be major hurdles for the students to overcome.

"Many of the students are from single-parent homes," said Highsmith. "That presents some challenges by itself, and then most of their parents have not had any college experience, so as far as how to direct or guide their children, this is new ground for the parents."

That is where Highsmith and her fellow SAISD counselors come in, monitoring the students' performance, making sure that they are keeping up with their courses, checking that they are maintaining their grades, and making sure that they can afford even some of the basic costs just to apply to college. "I don't normally ask a student, 'Can you find a way to pay for the SAT or the college application fee?"' Highsmith said, "but with these kids, you can't take anything for granted. The fees are $22 for the ACT and $25.50 for SAT-I, and some students may need help paying. You can't really take anything for granted in dealing with them."

Consequently, the counseling is broader for the Up and Coming Scholars than for the typical student. Highsmith said the counselors might work with students on interpersonal skills or on building the confidence necessary to go to college. The hardest year is probably their sophomore year when they move up to the high school and encounter geometry. If they can survive geometry as sophomores and then algebra II and chemistry as juniors, she said, they generally secure their scholarships for certain.

"They are a very conscientious group," she said, "but being Up and Coming Scholars has made worries of them. They are concerned, very concerned, about their academics and the requirements of the program. It is a great honor but also a great responsibility to be picked, and they have a lot of pressure from us at school and from their parents at home not to lose that scholarship."

Though the program does create some pressures to maintain grades, it removes the worry of parents having to pay for their children's tuition. Young Trejo's father and namesake, José Trejo, immigrated to the U.S. 25 years ago from Mexico and has worked in construction for the last 16 years in San Angelo.

"Happiness is all I can feel," the father said about the program. "He has had a dream to be a doctor, and happiness is how we feel at home, knowing he has a scholarship. You can imagine how parents would feel like this."

The program is coordinated through SAISD by Anita Aguilar, who was a counselor at Edison Junior High School when the program began.
“Parents are completely, totally elated when their children are selected for the program,” Aguilar said, “because they are so much more aware than their children of the importance of education. Many of the parents were lucky to have a high school diploma, much less any college, so they understand the value.”

Sixty participants are selected each year from San Angelo’s four junior high schools. Twelve are picked from each junior high as well as 12 at-large participants. Additionally, 12 alternates are selected to take the places of those who might drop out. The only criteria for consideration is that the students come from SAISD families in the bottom economic quartile as defined by federal guidelines. In other words, the students are eligible for free or reduced-cost meals.

The program accepts students of all races, but since it was started, an average of 45 percent of the participants have been Hispanics, with the percentages varying by year from 39 to 54 percent.

“Selection is based on an assessment model that all counselors fill out, so there is no discrimination,” Aguilar said. “After the forms are completed, they are forwarded to the program advisor, who ranks them and makes the selection.”

The students are rated in five areas worth 10 points each: 1) performance on the 7th-grade Texas Assessment of Academic Skills test; 2) total attendance in 7th grade and first semester of 8th grade; 3) class rank; 4) grade average; and 5) personal factors, including leadership qualities and school department. The students are ranked by their cumulative score, and the top scorers are named Up and Coming Scholars. Once they are selected, Aguilar monitors the students’ progress.

“I actually follow through with youngsters from the ninth grade on,” Aguilar said. “I call teachers, counselors, principals to do whatever follow-up is necessary to try to help them succeed and stay in the program. Their responses are great because everyone from superintendent Dr. Joe E. Gonzales on down wants the program to succeed. Dr. Gonzales has made it clear that this is a priority and that he is behind it 100 percent.”

Even with the full support of SAISD administration and faculty, it still comes down to the students and the work they produce.

“At times,” Aguilar said, “it is a little frustrating to see a student in the ninth grade not be in the program by the 12th grade, but as far as I am concerned, it is the best program I have ever been involved in.”

Once in the program, students must maintain a grade of 70 or better in each course of the college preparatory curriculum.

“I don’t want the program to label the youngsters as economically disadvantaged because these students have to work for their scholarships,” Aguilar said. “Going to a local university helps the parents not only financially but also emotionally.”

The proximity to home for Elisa Contreras and Roxanae Candela, both freshmen at ASU, made the transition to college easier. Both were in the second class of junior high students selected for the Up and Coming Scholars Program, and now both have completed their first semester of college. When they were admitted to the program in the eighth grade, they didn’t fully understand the implications, nor did their parents, who had emigrated from Mexico.

“It really surprised my parents, like ‘What is this?’” said Contreras, a Spanish major who wants to teach English as a Second Language. “We moved to the United States when I was nine years old, so it was a big deal for me to be accepted in the program because I didn’t even know English just a few years before. If it hadn’t been for the scholarship, I wouldn’t be going to ASU.”

Like Contreras, Candela had parents who had come to the United States from Mexico.

“My parents were very excited that I could go to college. They couldn’t believe that all I had to do to keep my scholarship was to keep my grades up,” said Candela, a freshman nursing major.

Proud though her parents were and despite the emotional support they provided, they couldn’t always offer the academic support Candela needed.

“My parents couldn’t help much, so I was basically on my own,” she said. “I would always go...”
to tutorials at seven in the morning."

In addition to the special tutoring help, Candela found that the special Up and Coming Scholars Program activities held on the ASU campus eased some of her fears as a college freshman.

"When I came in the fall, I knew where all the buildings were and where my classes were," she said. "I felt more comfortable starting college."

To help foster the transition to college, SAISD and ASU each May conduct a special commencement program for the Up and Coming Scholars prior to their high school graduation. During the ceremony, all graduating Up and Coming Scholars are recognized, and then SAISD Superintendent Gonzalez symbolically passes the torch for their education to ASU President Hindman.

Besides the commencement ceremony, ASC sponsors a banquet each spring recognizing the new class of Up and Coming Scholars. The University also hosts summer activities ranging from pool parties to hamburger cookouts to develop confidence and camaraderie among the students.

Whenever possible, parents are encouraged to participate.

"Over the course of the program," said Hindman, "we have learned that just providing the scholarships is not enough to prevent attrition. By fine-tuning the program each year and identifying more ways for the school district to assist both students and parents, we hope we can overcome some of the factors that are preventing many from going on to college."

As for young José Trejo, who desires to be a doctor, his participation in the Up and Coming Scholars Program has already made him a role model for at least one younger student, his sister Veronica. She, too, is an Up and Coming Scholar. A sophomore at Central High School, she plans to major in psychology when she graduates.

"These are fine students," Hindman said. "Sometimes all they need is a chance at a college education. We are glad to be able to provide that chance. Even when they don't enroll at ASU but accept scholarships to other universities, as some have, we still are proud of the part we played in nurturing their potential."
Has a week gone by that you haven't read an article about the increasing clout of the Internet, the rising value of dot.com companies, and the booming sales by Amazon and eBay?

The Internet is here to stay, but increasingly educators are concerned that Latino/o and African-American students are falling behind in the computer revolution. In fact, technocrats created the term “digital divide” to describe the growing gap between increased computer use by middle-class and affluent people compared to the lack of computer ownership by minorities. A 1998 study revealed that 73 percent of white families own computers compared to 32 percent of minority families. The message is clear: computers are increasing the gap between the haves and have-nots.

But two New York City nonprofit organizations started by idealistic professionals are trying to bridge this gap and increase computer use by Hispanic and African American public school students. Both organizations have idiosyncratic names that are not easily forgotten—Mouse and Heaven. Mouse is the acronym for Making Opportunities for Upgrading School and Education. Heaven stands for Helping Educate, Activate, Volunteer & Empower via the Net. Financed by New York’s new media businesses and other corporations, both rely heavily on volunteers to work closely with public schools and establish techno-community centers to attract students after school. These innovative organizations are developing a blueprint for encouraging Hispanic and African American computer and Internet use before that digital gap widens.

Launched in 1997 as a nonprofit dedicated to providing volunteer staffpower and technical support for New York City schools, Mouse aims to bridge that digital divide, noted Sarah Holloway, its acting director. She attributes this digital gap to computer companies ignoring the needs of minority youth and instead focusing on affluent whites as their target market. “There hasn’t been that much content that is appealing to minorities. They’ll get excited if it’s connected to their life,” she said.

Heaven was started in 1997 by leaders from America Online (AOL) and New Line Cinema, who recognized the “gap between the haves and have-nots as one of the defining issues of our era,” noted Wendy Dubit, director of Heaven, who had been founding editor of Wine Enthusiast and started nonprofit Farm Hands/City Hands. “We started an educational program with the most cutting-edge Web and search tools, including multimedia publishing, and using those tools to empower academics and workforce development,” she said. Heaven provides inner-city students with technology training and tools needed to succeed in schools, communities, and careers.

Holloway was a computer consultant who volunteered to solve computer snafus at East Side Community High School, a reorganized school that was part of the Manhattan su-

Edward said that the technology companies had not paid close attention to minority youth. “We wanted to rally the community to use the expertise of Web designers and architects to schools,” Holloway said. A functions like a corporate help desk beyond that to schools by maintaining co-

ers and training teachers.

More than 1,200 Mouse volunteers help schools, build networks, and design str-

cifics for schools. Mouse has been working New York’s Board of Education to obtain money to train teachers to become administrators and to use computers as a tool. One of Mouse’s major achievements was obtaining a $1.1 million grant from the Department of Education to inaugurate the Heights Community and Technology Center. Washington Heights, which opened in Jan-

2000. Alta Vista, the website, donated 30 computers, which Holloway described as “state of the art with Pentium chips and 8 gig hard drive.”

Washington Heights in upper Manhattan, an 8 percent Hispanic population and the poorest congressional district in New York, with such minimal technical facilities that it lacks a Kinko’s. The Tech Center will be loca...
the Armory Building, which will continue as a major track and field center. Since students already frequent the Armory for athletic purposes, it should become a natural hub.

"Technologically, Holloway asserted, "it will give local people access that they haven't had otherwise. They won't have to travel anywhere." The center will be open six days a week from 10 a.m. to 9 p.m. and is slated to serve 5,000 people, including many students who will come to do their homework or gain Internet access. Bilingual staff will be hired to address its Hispanic audience. The center works in conjunction with teachers in District 5, serving as an after-school center, but will also address the computer needs of the elderly.

The three-year grant pays for the computer staff to work with clients.

Mouse is also involved in a special school-based technology program working with 24 New York City high schools, including mostly minority George Washington High School, also located in Washington Heights; Martin Luther King High School, and Taft High School, in the Bronx. "We build infrastructure, help the schools buy computers, provide technical support, set up their server, and help them set up e-mail accounts," Holloway stated. That's also critical is establishing a technical squad that can trouble shoot and fix any machines that break down or have problems, and training teachers to work with computers in the classroom or as an after-class tool.

Heaven focuses its attention on some of the Board of Education's 70 alternative high schools, which appeal to students who have had problems in traditional high schools. "The heart and soul of our program is the Angels education program," said the effervescent Dubit. The Angels program trains students from alternative high schools in a 54-hour accredited after-school or summer program. Students are selected based on their interest and enthusiasm for technology, not their academic grades. Students use multimedia tools, develop their own websites, and learn Internet marketing and publishing. They also publish their own web pages, which often focus on the subjects they are most passionate about, such as police brutality, gang violence, and racism. As cyberjournalists, Heaven students have interviewed Steven Case, the CEO of AOL, and Commerce Secretary William Daley.

Since one of Heaven's main goals is preparing a student for a technical career, it arranges paid internships for students after school or summer. Last year, 15 students interned at companies like Star Media (the largest Internet site in Latin America), Jupiter Communication, New York Times Online, and Flatiron Partners. Students are paid $7 to $12 an hour and, according to Dubit, "learn marketable skills from leaders in the industry." At another alternative high school, Brooklyn International, Heaven has sponsored a co-teaching model. Students from 46 different international countries are trained to use the computer with their teachers. "Teachers are trained how to infuse technology more efficiently into their curriculum," Dubit said.

One of the biggest obstacles to reaching minority students in high schools is the teachers. Trained in traditional classroom teaching, many teachers are reluctant to relinquish control or do not know how to weave computers into teaching. Mouse established the "Aligning Classrooms and Technology" conference, which attracts 300 high school teachers, to teach them necessary skills. "Once teachers are introduced to ways to use technology, i.e. the Internet and software programs, they get it," noted Holloway.
Holloway asserted. Internet developers need to create sites that appeal to minority youth, who have been an afterthought. The students who gain computer access have been excited and enthused. “Internet use opens up their world,” beyond their parochial neighborhoods, said Holloway. Students at Martin Luther King High School are sending e-mails to students in Europe and learning about archaeological digs in Israel. They’ve developed a website for their own school. “It enables students to broaden their world,” said Mouse’s acting director.

Working with technology can transform an inner-city youth’s life. Kevin Brown was a shy, withdrawn New York City high school student when he became involved with Heaven. Assigned to interview Malik Yoba, one of the stars of New York Undercover, at a press conference, Brown asked Yoba how he was trying to keep minority students from being killed by the police and whether even he, a star, could make a difference. Yoba replied, “When you ask me a question, please look me in the eye” and then explained how Yoba has made a difference by meeting with the police commissioner. Startled and transformed, Brown has become more outgoing and expressive since that encounter. Influenced by his Heaven experience, he is aiming to become a multimedia entrepreneur.

Star Media interests “gain hands-on experience of the Internet world, in technology, sales, corporate communications, and client services,” said Sonia Ramos, a human resources specialist at Star Media in New York. Star Media has also presented Mouse with stock worth more than $1 million in equity while another company, Digital Media, donated 1,000 shares to Heaven.

Dubit sees Heaven’s Angel training and internship as a model that could work in any public school system, not just New York’s. Plans are to build the right tool kit that includes how to run a program, what the curriculum and how we weave local community and it try. We believe it’s important to reach students, not just in schools but also in community centers.” Holloway envisioned that Mouse would continue to expand its program, with New York’s high schools, and seek out corporate partners.

These educational efforts and this community awareness are paying off. A study by Forrester Research revealed that Hispanic computer use increased from 36 to 41 percent in 1999. African American use rose from 23 to 40 percent. AT&T announced in December that it was launching a $1 million grant to “help bridge the digital divide” in cities such as New York, Angeles, Boston, and Chicago, earmarked teacher training, community use, and 1 school students.

Why are these programs reaching minority youth? Dubit replied that learning how to use Internet “empowers a student’s life. They no longer feel helpless. They get to see results 1 day sooner, express their greatest concerns to community figure out how to be part of situations, and gain technological skills.”

Mouse can be reached at www.mouse.com and Heaven at www.heaven.org.
Affirmative Action

Minority Pool Drying up in UC System

Acceptance Rates Down, Down, Down

BY AMALIA DUARTE

Schools in the University of California system are usually among the most successful in the nation at graduating Hispanics. In fact, last year, all eight UC schools made The Hispanic Outlook's Top 100 list for granting bachelor's degrees to Hispanics. And two of the system's most competitive campuses, the University of California at Los Angeles (UCLA) and the University of California at Berkeley, ranked #6 and #12 respectively. This is undoubtedly an impressive achievement.

But today, some question whether the UC schools can sustain this record of success in the years to come. The problem is that Latino acceptance rates in the UC system have been plummeting following a UC Board of Regents vote in 1995 to eliminate racial and ethnic preferences in admissions. California voters followed the Regents' lead and passed Proposition 209, which eliminated racial, gender, and ethnic preferences throughout the state's public institutions. Advocates of Prop. 209 and the Regents' anti-affirmative action measure argued that neither would have a deleterious impact on minority enrollments. But the opposite has proven true. A recent study by the Tomás Rivera Policy Institute has found that Latino representation on UC campuses is slipping and that African American enrollments are declining even more rapidly.

The chilling effect is heightened at UCLA, Berkeley, and the University of California at San Diego, which are the most selective UC schools. The study found that thousands of African American and Latino students have been rejected from UC3 top schools during the past two academic school years who would have gained admission in the past. The class of 1998 was the first admitted under the new policies, and it saw minority enrollment nose-dive. According to Tomás Rivera researchers, "had the 1997 acceptance rates for Latinos and African Americans held constant in 1998 and 1999, 5,383 additional Latinos and African Americans would have been admitted to UC-Berkeley, UC-San Diego, and UCLA."

In its study, the Institute focused on representation versus raw enrollment figures. They did so, in part, to counter recent publicity from UC that trumped modest gains in Latino acceptances, looking beneath enrollment figures, a different story emerges.

The representation of both Latinos and African Americans in the UC system is fast declining. From 1997 to 1999, UC's total first-year-student enrollment grew about 30 percent, from 23,665 to 30,995. Yet, the number of Latino first-year students during that time grew by just 3 percent—from 3,131 to 3,231. And even more troubling, the number of African American first-year students dropped 17 percent, from 917 to 757.

The result is that the percentage of Latino and African Americans on UC's campuses decreased. Latinos made up 13.2 percent of first-year UC students in 1997. By 1999, Latinos were 12.5 percent of first-year students. And, again, African Americans have fare even worse. African Americans comprise only 2.9 percent of first-year UC students in 1999, compared to 3.9 percent in 1997. "The University of California has been putting out so much positive publicity about the high number of applicants. It's a shame," said Harry Pachon, President of the Tomás Rivera Policy Institute in Claremont, Calif. "In fact, it's been quite the opposite. It is misleading to look at raw numbers of African American and Latino students without looking at acceptance rates. I've heard that at one campus, they didn't have enough students to create a Black student union."

The most highly competitive UC campuses are becoming increasingly white and Asian, the study concluded. And this will accelerate, as students graduate who were admitted under affirmative action policies in 1997 and before.

Even now, the changing demographics are striking. In 1997, Latinos made up about 15 percent of first-year students enrolled at Berkeley. They comprised only 10 percent of the first-year class in the fall of 1999. For African American students, the situation is once again even bleaker. At Berkeley, they fell from eight percent of first-year students in the fall of 1997 to just four percent of first-year students in the fall of 1999. Combining UCLA, Berkeley, and UC-San Diego, Latino admissions dropped by 30 percent, from 4,166 students to 2,875. The number of African Americans admitted to these three schools plunged by 44 percent, from 1,406 to 784 students.

Meanwhile, more and more Latinos and African Americans are graduating from high school in California and vying for slots in the UC system. Officials at both Berkeley and UCLA were deluged by huge numbers of applications from underrepresented minorities. (In the UC system, Asians are not considered an underrepresented minority.) "We had the biggest number of applications ever from Latino students, with 3,382 applicants," said Richard Black, Berkeley’s acting assistant vice chancellor for admissions and enrollment. "And the number of African Americans was just five students short of our 1998 level. Taken together, this was the largest number of applications ever from underrepresented minority students."

But it’s not likely that these huge numbers translated into record numbers of acceptance letters for Latinos or African Americans. The odds of a Latino or an African American getting into the most selective UC schools are getting slimmer and slimmer. For example, in 1997, the acceptance rate for African Americans applying to Berkeley stood at 49.6 percent, and for Latinos, it was 45.4 percent. In 1999, at Berkeley, the acceptance rate had fallen to 28.3 percent for African Americans and to 27.9 percent for Latinos. At UCLA, the Latino acceptance rate was down to 25.2 percent in 1999, down from 40.8 percent in 1997. For African Americans, the acceptance rate at UCLA had declined from 38.4 percent in 1997 to 24 percent in 1999. University officials acknowledge the accuracy of the Tomás Rivera Study. "This study is accurate," said Black. "There’s no question that admission of underrepresented students at Berkeley has declined."

But efforts are under way to maintain diversity in the UC system. A new state law gives the four percent of California high school graduates a spot in the UC system. And UC officials have undertaken serious outreach efforts and a variety of other programs. Berkeley, for example, runs an SAT preparation program to give disadvantaged students a boost. And they’ve accelerated changes in their admissions processes to look more than just grade point averages and SAT scores. "We are looking at students within the context of the opportunities that were available to them," said Black. "If a student was a breadwinner in their family, for example, that would be taken into account. Or if a student took the only AP course available at their high school, that gets more weight than a student at another school who took only one AP class where lots were offered. It’s a more unbiased process."

But some contend that the efforts don’t go far enough. Admission figures for the fall of 2000 were not available at press time, but UCLA’s Director of Admissions Rae Lee Siporin acknowledged that there were no significant improvements for Latino...

compared to the year before. "There will be a small increase. But we are not as well balanced as I think it would be good for us to be," said Siporín. "It's really frustrating. We've had the rug pulled out from under us. I've spent the past 21 years trying to get minority students to apply here. Now, they are applying, and we can't admit them. And the shame of it is—there's really nothing we can do."

And there's been an ironic twist. Latino and African American students who are best prepared academically are now losing out to Latinos and African Americans who are less academically qualified, said Siporín. These students are gaining acceptance because they come from lower-income families or are first-generation college students. "With affirmative action, you could go after the best Latino and African American candidates. Period. Now, schools have to look at other factors in trying to create diversity on campus," said Siporín. "So minority students who are second-generation college, for example, get penalized. We are, in fact, losing the very best prepared Latino and African American candidates."

The net effect is that some Latinos are being forced to attend less selective schools, such as UC-Riverside, UC-Santa Cruz, and UC-Irvine, which have experienced increasing Latino enrollments. Others who might have made the cut to a four-year college previously are now being pushed down to attending a community college. The ripple effect down the road could be devastating. "In 20 years, there will be more Latinos in the labor force in California than whites. What does this mean for the state's future when you forego higher education for an entire segment of the population?" said Pachón. "We are seeing a tremendous loss of potential in the Latino community."

The Superbly Encompassing "Arte Público"

Publications AND Mission Earn Great Press

BY ADALYN HIXSON

The Afro-Cuban, the Black Raisin,
and the Wall Crawlers are just three of the scores of campus organizations to be found at the University of Houston. Hispanic students might wish to join some of the dozen or more Latino groups, among them La Raza, MEChA, NASO, La Comunidad, Latina Coalition, Circulo de Arquitectura, or the Society of Hispanic Physicists. They might like to work with Professor Ed De la Garza on the campus paper, the Daily Cougar. And, for a quiet evening, perhaps sit down with a good book. A book published on campus by the renowned Arte Público Press.

A couple of years ago, Jeaune Kever of the Houston Chronicle wrote a story about Arte Público. "Small press, grande influence." The Arte Público that had insisted for nearly 10 years that attention be paid to the writings of Hispanic Americans was about to get some well-deserved attention of its own. Some additional attention, having already been lauded hither and yon.

"Discovering and nurturing Hispanic writers—knowing how to market their works from advertising on Spanish-language radio to selling in Hispanic neighborhood supermarkets—is a cornerstone of the way Arte Público has grown since its founding," wrote Kever. And the chief discoverer, the chief nurturer, and the driving force of Arte Público is its founder and director, Dr. Nicolas Kanellos, a tenured full professor at the University of Houston who earned his Ph.D. at the University of Texas.

Born to a Greek father and Hispanic mother, Kanellos grew up "Puerto Rican in New York, dismissively lumped together with all other Hispanics as 'Spanish,' finding nothing in his school books that resembled his life at home," wrote Kever.

Kanellos became active in the Chicano movement in the '60s. Then a teacher of Chicano literature at Indiana University-Northwest, he was acquainted with the leading Chicano writers, and acquainted too with the obstacles they faced in trying to get published. In the early '70s, Kanellos founded the Revista Chicana-Riqueña, which became The Americas Review, a quarterly magazine of Latino literature, art, and thought that won praise and recognition from the New York Times, Small Press Review, and other respected publications.

Fueled by the magazine's success, in 1979, Kanellos launched Arte Público Press. The following year the University of Houston offered him a tenure-track position and invited him to bring Arte Público along. The timing was fortuitous. Responding to the tumultuous social activism period, colleges and universities had launched programs, majors, and even institutes offering Chicano studies. African American studies, however, was not yet enough in print for them to draw on. Arte Público was well-positioned to publish quality fiction and nonfiction that satisfy the emerging market for literature and criticism.

Arte Público launched its first magazine in 1994, now seeing a rising market for bilingual books for children and adults that accurately reflect Chicano themes, characters, and customs.

The Hispanic Outlook recently contacted Dr. Karel Kanellos and asked him about Arte Público Press, past, present, and future. He was engaging, candid, and justifiably proud of APP and its relationship to U.S. Hispanic culture.

The Recovery Project

Started in 1992, the Recovery Project represents the first national coordinated attempt to recover, index, and publish lost Latino writing. Dr. Kanellos, "the sentiment of what became the U.S. South and Southwest from the late 16th century to the early 19th century—which pre-dates Jamestown and Plymouth at least 80 years."

"With help from the Rockefeller Foundation, I brought together leading scholars in Chicano literary history, historians and librarians, and archivists to plan out the Project," he said. "We had a two-day confer
at the National Humanities Center in Triangle Park, North Carolina, and agreed upon goals and certain methodologies. Then I wrote a proposal that the Rockefeller Foundation committed to funding for ten years."

He explained that the ten years, of which there is one left, have been the first phase of the Project. "Now we go on to make the Project into a program and research center/archives that will exist in perpetuity."

What remains to be done is "preserving all the hundreds of thousands of works and documents, works we have found, and making them accessible to students, scholars, professors, textbook writers, and curriculum planners—as well as the general public—through a variety of media." These media could include electronic, print, video, and audio, and perhaps others as yet unknown.

"We asked what are some of the areas most in need of more work," Kanellos replied. "Year-long fellowships for scholars to do research in the area. Creation of an archival and research center in this field. Digitizing hundreds of thousands of pages for delivery over the Internet. Continued archival research to find the material we know is missing. For instance, we estimate that some 2,500 Hispanic newspapers were published from 1898 to 1960. We can bibliographically document some 1,700 of them. But we only have found and preserved some 900 of those 1,700. Where are the rest?"

And how will the next phase of Recovery be funded? "To help with that phase," advised Kanellos, "the Rockefeller once again has dedicated some $400,000 to help us stabilize, perhaps through building a $2 million endowment through fundraising from other sources. In part, we hope the daily operations will be funded by the endowment we hope to start. But we shall continue to ask foundations, corporations, and agencies to help out. To date, foundations that have helped are Rockefeller, Mellon, Meadows, Ford, AT&T, and Belo, as well as the National Endowment for the Humanities."

Dr. Kanellos is a fellow of the National Endowment, and of the Ford, Lilly, and Gulbenkian Foundations. In 1994, President Clinton appointed him to the U.S. Senate confirmed him to a six-year term on the National Council for the Humanities. In 1996, he was appointed to the Brown Foundation Inc. Chair in Spanish.

His 1994 four-volume Handbook of Hispanic Culture of the United States, co-edited with Claudia Estefanía, was cited by Librarian, Journal as "the most important general reference publication on Hispanic population of the United States to date." The Journal also called it "essential for academic and public libraries."

Recovery Scholars

Recovery's Year 2000 grant-winner was John Michael Rivera, UT Austin; Jose Torres-Padilla, University of Puerto Rico-Cayey; Ben Oguin, UT-San Antonio; Jose Nieto Phillips, New Mexico State University; Isabe Holgado, Barcelona, Spain; Ana Suarez, Centro de Investigación y Desarrollo de la Cultura Cubana; and Manuel Ulechea, N.Y.

Aimed at scholars "at different stages of their careers and advancing graduate students," the grants offer stipends of up to $3,000 for investigative work that identifies, locates, and recovers any of a wide variety of literary genres, from the conventional prose and poetry to letters, diaries, testimonials, periodicals, written expressions of oral tradition, folklore, and popular culture. Bibliographical compilations are also welcome, as is study of recovered primary sources for potential publication, and work with relevant archival materials in private or public collections. The proposal deadline for 2001 is October 1st of this year, with information available by phone at (733) 743-9128, by fax (733) 743-3541, by email artec@jeson.uh.edu, or at the website www.ar.te.uh.edu.

Three volumes, each about 500 pages, and published in 1993, 1996, and 1998, are presently in print under the project title, Recovering the U.S. Hispanic Literary Heritage.

Eight forthcoming Recovery books include one of poetry, short stories, a memoir, women's tales from the New Mexico WPA, and letters.
Published via Recovery last year was Ireneo Paz's biography of Joaquin Murrieta, first published in 1904. This edition, in Spanish, includes an introduction by renowned literary critic Luis Leal that offers "the first definitive history of the Murrieta legend in its various incarnations."

APP Authors and Competitors

Mainstream authors published by Arte Público Press include Rolando Hinojosa, "dean" of Mexican American literature; Luis Valdez, award-winning playwright and filmmaker; playwright Miguel Pinero; best-selling authors Victor Villasenor, Nicholas Mohr, Sandra Cisneros, and Ana Suarez, poet Pat Mora, and educator Tomás Rivera.

HO asked Kanellos if APP is a financial asset for the University. "All of the revenues and grants obtained by APP and Recovery," he said, "go back into their operation, not into the University coffers. However, the Ph.D. program in Spanish has been built around Recovery and APP, and some 10 to 12 research assistants per year are employed by Recovery, which in this way underwrits their graduate studies in Hispanic literature in the Spanish department—and English, history, and education departments at times, depending on the Ras."

Asked who are the APP competitors, Kanellos said, "We do not really have competitors. Not in the total breadth and scope of what we are doing. However, there is a somewhat smaller sister press, Bilingual Press, at Arizona State University. And we often cooperate to share resources, etc."

"Where much competition has grown," he continued, "and it is of our own making, is in commercial publishing, since APP launched all or most of the major writers who now are publishing with commercial houses in New York. What these commercial houses have done is, mainly, contract works and authors for the specific market that APP opened up—the college Latino literature and culture market—rather than their front list for elite or mass audiences."

Of the commercial competition, Kanellos said, "We're more than holding our own, and we have pioneered new areas that the commercial press—Hispanic, African American, Asian/Asian American, and Anglo-American students."

"At present," he continued, "while there is a welcoming policy for students at the University, the institution has not yet assimilated into its mission the geographic and demographic imperatives of becoming a national and international educational institution for bilingual/biculturalism. It has not integrated urban/minority mission with its potential. The leadership of the institution is almost completely white, and one wonders how when the perspectives of Latino other minorities will help the University realize its great potential."

Last year, noted HO, Arte P. Press celebrated its 20th year, and asked, "What do you see happening in the next 20 years?"

"Arte Público Press hopes to become the major provider of all information on all aspects of Hispanic life," said its founder, "to a currently re-envisioning itself world of electronic media, for the delivery of texts and information."

Given the Kanellos track record, who can doubt it will happen? when he's not writing, promoting, reading, he probably fills mean cougar.
The year 1970 marked a time of change in America. The idealism that had characterized the decade before had long since evaporated. The era of flower power was over; the summer of love had given way to a winter of discontent. An unpopular war raged in Vietnam, the assassinations of Martin Luther King, Jr., and Robert F. Kennedy were fresh in the minds of many, and urban areas throughout the nation simmered with the racial tensions that had erupted in places like Detroit and a Los Angeles suburb called Watts.

The importance of cultural awareness, an outgrowth of the civil rights movement, was a rising tide on college campuses throughout the United States. In 1970, a group of dedicated activists at what was then San Diego State College struggled against long odds—and at times even against each other—to create the first academic department in California dedicated to the study of the culture of Mexicans in America.

From the very beginning, what to actually call the department was a controversial subject. Some preferred “Mexican-American Studies,” while others sought to incorporate the word “Chicano,” a term dating back to the end of the 19th century.

“There was a great influx of Mexican labor in the southwestern United States at that time,” said Jose “Pepe” Villarino, one of the department’s founding fathers. “They were illiterate, uneducated, and very poor. The affluent Mexicans who had established themselves in the big cities did not want to be associated with these people and referred to them (disparagingly) as ‘Chicanos.’ It used to be a very negative word among middle-class Mexicans, but many people now glorify it as part of a proud heritage distinct from the white majority. Even today, ‘Mexican-American’ is a very charged term.”

Developed and approved by university administration as Mexican-American Studies, this department in 1998 formally changed its name to Chicana/Chicano Studies. “It might be insignificant to some, but it is an important distinction,” Villarino said. “It is symbolic of the Mexican experience in America.”

Getting Started

Although the Mexican-American Youth Association—the organization that would become Movimiento Estudiantil Chicano de Aztlan (MEChA)—had been organized on the San Diego State campus in 1967, the
seeds for the department were sown in the spring of 1968, when Villarino brought eight busloads of students to a conference at Montezuma Hall. Brawley, an agricultural community some 180 miles east of San Diego, was home to many Mexican immigrants.

"The faculty at Brawley was working hard to get our students to consider life after high school—actually just getting them through high school," Villarino recalled. "One of our biggest challenges was convincing those kids that there was a higher education experience that could be meaningful to them. It's hard for young people now to understand how pervasive the racism was then. You just didn't see many Mexican students on college campuses and, of course, fewer Mexican faculty."

Soon after the conference, SDSU Spanish and Portuguese Professor Gustavo Segade called Villarino about the possibility of teaching at the university, and together the two men recruited faculty for the fledgling department. Buttressed by El Plan de Santa Barbara, written in 1969 by Chicano activists, that served as both blueprint and bible for organizers on campuses throughout California, the pair also received the steadfast support of many in the university's administration, including President Malcolm A. Love.

"President Love was a very sensitive man," Villarino remembers. "There was a lot of opposition from some administrators and some faculty to creating the department, but he never wavered. We were very encouraged that he thought having a Mexican studies department was so important to the campus and to the community.

The effort needed all the support it could get. The early days were fraught with contentious battles on campus and even within the fledgling department itself. In his book *San Diego State University: A History Word and Image*, SDSU histc Professor Ray Starr wrote that the department's origins were far from tumultuous that those of other ethnic studies programs that surfaced around the same time.

The Chicano students believed the student newspaper, *The Aztex*, was unfail in its reporting them and, in what Starr characterized as "the most destructive event in the era," laid siege to the Administration building.

*The Aztex*, on the day after the May 3, 1972, event, reported MEChA students became incensed at the treatment they received at an Associated Students Council meeting. Fights broke out, windows and the glass doors of the building were smashed, bookcase was set on fire, and there were droplets of blood in the foyer entrance. Copies of *The Aztex* were burned in trashcans at several locations throughout campus.

"The situation got so bad that the state Superior Court enjoined or MEChA students from being disruptive on campus," Starr wrote. "Perhaps Associated Students Vice President [B.J.] Nystrom explained the conflict: 'There weren't a lot of minorities; State and then all of the sudden there were. They wanted to be heard, and no one was listening.'"

In the days following the event, Alurista, the renowned poet an Mexican-American Studies faculty member, authored an editorial published in *The Aztex*. The riot, he wrote, was "a direct result of SDSU's negligence to consider the needs and aspirations of the Chicano people." Alurista's editorial included a list of demands on the university that included "a definite policy-making relationship between the student body and SDSU and its administration."

**The Bitter Divide**

That demand cut to the heart of a contentious battle being waged within the department itself. A faction of faculty and students with a Marxist
philosophy—those who wanted that “definite policy-making relationship” that they perceived as part of the self-determination precept put forth in El Plan—struggled against members of the Mexican-American community to control the direction of the young department. The Marxist faction dismissed the Chicanos as reactionary; the Chicanos felt the Marxist approach smacked of a betrayal of the culture that the department was created to perpetuate.

Richard Griswold del Castillo, who joined the department in 1974 and today serves as its chair, said the bitter divisions weakened both sides.

“MECHA students actually had a leadership role in the department administration,” he remembered. “They helped make policy, develop curriculum, even helped to hire and fire faculty. All that really accomplished was to invite more scrutiny and criticism from the administration. A lot of faculty quit or were fired.”

A new department chair, Robert Cerros, was recruited to help bring the two sides together. Cerros was not exactly welcomed with open arms.

“He was perceived as an interloper by the students at first,” Griswold del Castillo said. “He wanted high-level academics on the faculty, and he thought the political infighting was a colossal waste of time. He was very unpopular for awhile. He had his office door kicked in, his tires slashed. He had to live in a motel during his stay here.”

“He was a little unorthodox—he’d call me at midnight and want me to meet him at a pool hall to discuss department business,” Griswold del Castillo added. “But he was an effective leader. When he left SDSU, he left behind a department that was first-rate academically.”

Where 30 years ago, as Villarino pointed out, Chicano students were seldom seen on college campuses, their presence at San Diego State has become clearly evident. MECHA remains an active voice in campus politics, and, in fact, Chicano representation on the Associated Students government has risen to unprecedented heights. In 1998, Celinda Vasquez became the first Chicana elected student body president of the second-largest university on the west coast.

If the pride, dedication, and resilience that has characterized the department for more than 30 years could be distilled into a single episode, it might be one involving the murals painted by Chicano students years ago on the walls of the university’s student center. Recently, as the question of whether to paint over the murals worked its way through student government committees, MECHA students hatched a plan to save them.

“MECHA brought in Aztec dancers and a Catholic priest to bless the murals,” Griswold del Castillo said. “Then they went to the student government and said, ‘You can’t paint over these now. They are sacred.’ It was really a very ingenious way to preserve a piece of the department’s history.”

Like those murals, the Department of Chicana and Chicano Studies is a valuable part of the soul of San Diego State University.
Inclusive Classrooms:
Part Two of a Two-Part Series

Planning Considerations, Getting to Know the Students, and Decisions, Comments, & Behaviors During the Teaching Process

PLANNING CONSIDERATIONS

There are a number of multicultural issues that should be taken into account during the planning process for any class. You need to become comfortable with your lack of knowledge about certain groups and seek ways to inform yourself (e.g., through experiences, readings, and/or conversations with faculty, peers, and students who are knowledgeable about the particular groups). Below you will find examples of the sorts of issues that might be considered in order to increase your awareness of multicultural issues during the planning process.

Accommodations

Students may have religious holidays and practices that require accommodations at certain times during the academic calendar year. Students with disabilities may also require special accommodations. To be sensitive to the religious needs of students, it is important to read the “Religious Holidays and the Academic Calendar” handout provided each year by the Provost’s Office so that you are aware of the holidays that occur during the semester you are teaching. Contact Services for Students with Disabilities...for information on ways that you can accommodate the needs of those students. At the beginning of the semester, ask your students to let you know if their attendance, their participation in class, or their ability to complete an assignment on time will be affected by their observance of religious holidays or practices, or because of a disability. Give advance consideration to requests for reasonable and fair accommodations. Some instructors ask for this information on data sheets that students complete on the first day of class.

Attendance

Students who are different in a highly visible way (women who wear Islamic clothing, African Americans or Asian Americans in a predominantly white class, students who use wheelchairs, etc.) can be penalized because of their visibility. In particular, absences of such students may be noticed more easily. For this reason, it is important to record all students’ attendance at every class session (whether or not you use the information) rather than collecting a mental record of absences of highly visible students that may inadvertently and unfairly affect how you evaluate them.

Grading

When you use different criteria to evaluate the performance of students from certain groups, this can create tensions in the class because students tend to share their grades. Furthermore, if these criteria are applied based on assumptions you have made rather than on accurate information regarding the students, some students may be unfairly penalized. For example, having higher expectations for Asian American students in Asian language classes than for other students may unfairly penalize Asian American students who have never had any experience with the Asian language they are learning. With this in mind, you should ask all students about their prior experiences with the course content and should inform students of the criteria by which their performance will be assessed along with the rationale for differential evaluations if such a practice will be used.

Cultural Reference Points

Instructors who use examples drawn only from their own experience may fail to reach all students in the class. Given that examples are designed to clarify key points, you should collect examples from a variety of cultural reference points. For example, in 1995/1996, Friends was a sitcom that received high ratings. However, this show was less popular among many African American people than shows like Living Single and Martin. Similarly, when using sports examples, it is important for instructors to include sports in which women participate (e.g., track & field, figure skating, gymnastics, tennis, softball) as well as those in which male participants predominate (e.g., hockey, football, baseball). Asking about students’ familiarity with an example before discussing it or asking students to produce examples of their own can also offset this concern. You can also explain examples fully in order to reach a diverse classroom.

Instructi"nal Strategies

Students bring an array of learning styles to a class. If you rely on a small repertoire of instructional strategies, you may provide effective instruction for only a small subset of your class. You should become aware of your preferred instructional strategies. For example, are sessions with small groups of students doing problem sets always conducted by asking questions? Are whole-group discussions preferred and the only method used? Once you have a sense of your strategy preferences, you should consider alternative techniques that will help your students learn more effectively. If you typically give mini-lectures to students, you might consider using visual materials (e.g., charts, diagrams, video), demonstration hands-on activities, cooperative group work, etc.

Controversial Topics

Class sessions that address controversial topics may result in any of the following unintended outcomes: (a) alterations between individual students or groups of students, (b) silence from students who feel intimidated or fear conflict, (c) the assertion and perpetuation of false stereotypes...
problematic assumptions, or (d) the expression of offensive speech. There are no easy answers for dealing with these situations when they occur. It is best to work toward the prevention of these occurrences by investing time in the planning process. When working with a particular controversial topic, anticipate possible responses and how you might deal with differing yet passionate views on that topic. You should plan strategies that provide structure for these discussions and that foster students' ability to express their own ideas well while also increasing their ability to listen to and learn from others. In the interest of free speech, students should be encouraged to honestly share their views during discussions. Be prepared, however, to correct stereotypes and challenge students' assumptions when comments are shared. It can be a difficult task to reconcile the tension between challenging offensive speech and not suppressing free speech. You should also consider your own response to emotion in the classroom and use this awareness to inform the planning process.

Establishing agreed-upon ground rules early in the class can be an important aspect of productive class discussions. If ground rules are established early, students will need to be reminded periodically of the rules throughout the semester, especially if their behavior suggests that they are ignoring them. If such rules were not established at the beginning of the semester, it is necessary to establish them when a problem becomes apparent.

It is also helpful, at the beginning of the semester, to focus on group processes. Activities and assignments during the first weeks of the course should include opportunities for instructors to get to know each student and for students to get to know one another. Establishing rules for classroom dialogues, building a trusting and open environment, modeling appropriate behavior during dialogues, and giving students the opportunity to practice these behaviors with topics that are not explosive or fearful are important for positive dialogue experiences. If you and your students engage in these behaviors early on, when problems arise, you will be able to address the problem by discussing the rules and appropriate behaviors.

**Grouping Students for Learning**

There are a variety of reasons for using cooperative groups (to facilitate student learning, to improve interpersonal relationships among students, to foster responsibility for students' own learning and the learning of others, etc.). You might create in-class and/or out-of-class groups (lab groups, homework groups, problem-solving groups, study groups, etc.). Because group composition can have a significant impact on group functioning, you should use a variety of methods to create groups. Such methods include: assigning students to groups (e.g., make heterogeneous groups across certain characteristics such as gender, race, and/or level of achievement in a particular discipline, or by where students live), randomly assigning students (e.g., ask students to draw a piece of paper with a group number from a bag), or allowing students to form their own groups. This latter method should be used sparingly; if possible, it can consciously or unconsciously be used to create or reinforce social group differences within the class.

In addition to group formation issues, pay attention to the length of time students remain in the same group, particularly if the group is not working together well. It is essential that you address process issues when students work in groups. For example, some group members might not address issues in a group, and everyone should have an opportunity to participate in every role during the semester. You should also ensure that students determine a way to provide feedback to one another about group process and dynamics and a way to keep you aware of potential issues.

Feedback is particularly important for identifying social identity characteristics that might arise in problematic situations and for figuring out how to address problems satisfactorily. The following guidelines may be useful in addressing group process.

- When groups are used, make sure that the same individuals do not always put themselves in the position of leadership. Assigning students to roles (e.g., recorder/note taker, reporter, moderator) or asking students to rotate roles should reduce the occurrence of this problem.
- Be ready to challenge assumptions that groups will either be aided or hindered by having certain kinds of students in their group (e.g., men in math or science classes feeling they have to help the women along; white students working on a project on "rap music who are eager to have an African American student as part of their group. One way to reduce the likelihood of such assumptions manifesting themselves in group work would be to spend some time informing the class that each individual brings a different combination of strengths and weaknesses into the group work context and that students should not make assumptions about what these might be prior to any interaction with an individual. Group exercises that identify the specific resources that each group member brings can be useful in the early stages of group formation. It is also important to inform students of your availability to discuss group process problems that the groups themselves have been unable to successfully address.
- You may need to make an extra effort to reduce the chances that a student who is different from the majority of the class will feel isolated (an African American student in a predominantly white class; a male in a predominantly female class; an openly gay, lesbian, or bisexual student in a class composed predominantly of heterosexuals, etc.). For example, if students are shunning a classmate during small group activities because they perceive that the classmate is gay or they are homophobic, you (irrespective of your personal perspective on homosexuality) have a responsibility to intervene or behalf of the excluded student. Even when guidelines have been established for participation, and responsibilities within groups, problems may still arise. It is essential to act quickly when they do.
ing the guidelines for group work. An initial change (if students are forming their own groups) would be to assign individuals to groups and make sure each individual within the group has a role. Another option would be to put students in pairs. It is more difficult to exclude an individual when there are only two participants. If all else fails, it would be important to set up a meeting with the excluded student, and together you could generate a variety of actions that could be taken to improve the classroom climate. This would be a show of support to the student. While it is important to solicit student input, you cannot expect the student to have the time or experience to solve the problem. If efforts are made to improve the situation and little change occurs, you might speak with a consultant from CRIT.

GETTING TO KNOW THE STUDENTS

Part of good teaching involves spending some time focusing on building relationships with your students. It is important to some students that you demonstrate caring and genuine concern about them. You may have more positive experiences with students if you invest some time and energy into becoming informed and more aware of issues affecting students of various backgrounds.

One way to get to know your students better early in the semester is to have students write a brief autobiography. It can be as short as two pages. The autobiography can be framed in ways that are relevant to the course content. For example, if you are responsible for math or science courses, you can ask students to share their early experiences (formal and informal) with math and science. They could also be asked to reflect on what their previous experiences with math or science suggest about how they learn best. From this brief paper, you would receive some valuable information about students’ attitudes about the content and some of their instructional needs. This kind of assignment could help you to explore, early on, some of the assumptions you might hold about your students and their experiences. It may also help students feel that real interest is being taken in them.

Throughout the term, you can make use of office hours, written assignments, and class discussion to further develop your knowledge about and connections to students. Specific suggestions have already been made in previous sections of this chapter.

DECISIONS, COMMENTS, & BEHAVIORS DURING THE TEACHING PROCESS

If you are responsible for teaching sections of a course, it is essential to understand that even when you have limited input into course content, you have much control over how that content gets taught. Teaching is a complex activity: there are multiple levels of interaction among students; between GSIs and students. Students bring very different background knowledge, and learning styles to particular courses. There are multiple interpretations of content constructed by individual students during the learning process. Also, some students construct different images of their instructors, which are counter to how you might see yourself. Because of the complexity and unpredictability of teaching, you should carefully plan your course sessions and always be prepared for the unexpected to occur. The following points address many of the issues that arise during the teaching process.

Working with Course Content

Examine course content for inaccurate information and the absence of relevant perspectives. Prepare for each class session by reading upcoming assignments in order to identify omissions, misleading interpretations, or intentional or inadvertent expressions of personal opinion by the author. You may then alert students to problems with the text and encourage them to read critically themselves. For example, a section on employment discrimination in an economics text states that blatant racial or gender discrimination is vanishing today. Since this is a statement about which there is current disagreement, students might be prompted to consider the issue on their own degree of agreement with this statement.

Be careful about the comments made during class lectures, discussion sessions, etc. Be aware of the fact that comments that are not explained may inadvertently invoke stereotypes or promote inaccurate conclusions. Similarly, skewed examples of religious, historical, or other events have the potential to lead students to believe that inaccuracies are truths.

Student Critiques of Course Content

Create a classroom climate that encourages and expects questions about critiques of course content. Such a climate will help to create a norm of critical thinking that will facilitate the learning process for all students. Students share their critiques with the class; other students will benefit from different interpretations, perspectives, and concern regarding course material. This climate can also provide an opportunity to add to the course content by correcting inaccuracies or misrepresentations related to the history or experience of their own groups.

Make decisions about when to devote unanticipated time to class discussions to deal with issues raised by students that pertain to the content process. These issues, which may deal with the history or culture of a gro
with which you are unfamiliar, are an equally important part of the course content. It is best to be honest about your lack of knowledge, acknowledge the students’ point, and make efforts to secure information about the students’ point to share with the class in a future session. It is also important to emphasize that everyone can be a teacher and that instructors and students can learn from one another. You can also ask students to send you e-mail messages, chat with you during office hours, or drop notes in your mailbox as concerns about course content arise. You should make every effort to address these issues or explain to students why they will not be addressed.

Be open to students’ reactions to course material, even when you feel uncomfortable with the manner in which they are expressed. Be prepared for students to publicly challenge inaccurate information about particular groups that appears in class readings, films, etc. Students may react strongly upon hearing what they perceive to be inaccurate and negative information about their group. You may find yourself teaching courses that have the reputation (from the students’ perspective) of being full of inaccuracies or misleading content. Students can often feel unduly burdened when they are in a position as teacher rather than learner. Students may resent having to “pick up the slack” in classes where instructors and their peers lack knowledge about the group with which the particular students are affiliated. When students are of the opinion that the information being given in the course is biased against their group, they may feel that they are also missing valuable learning opportunities. Creating a positive learning experience for these students can be challenging. In this situation, it is most important to be open to the perspectives these students share. Giving serious consideration to students’ views that are in the “minority” will encourage students to respond honestly about issues while also encouraging students to think more broadly about issues. This does not, however, mean that you have to agree with the students’ views or feel that the students’ views are above critique.

Give serious consideration to students’ requests for alternative materials when materials currently used inaccurately represent aspects of students’ social identity groups or cultures. Changes should be made when justified. If you receive criticisms about materials, you should make clear to students that the criticism can be accompanied by specific recommendations of alternative materials.

Responding to Student Identities

Invite all students to contribute to class discussion, even if you assume that the discussion is more relevant to some students than others. Students (irrespective of background) do not like being forced to serve as the spokesperson for their group. Students also do not appreciate being expected to know everything about issues relating to their group or the assumption that all students from their group feel the same way about an issue.

Be sensitive to the experiences of visibly underrepresented students in your class. Students with identities that are underrepresented and visible or known may face certain challenges that unfairly compromise their learning environment. For example, students may not be allowed to do assignments on certain topics because of the instructor’s assumption about the students’ biases. In one course, women wearing Islamic head scarves were readily identified as Muslim and not allowed to write a paper on Islam; it was more difficult to readily identify students as Christian from their appearance, so they were not prevented from writing papers on Christianity. Students from underrepresented groups may also feel a self-imposed pressure always to portray themselves in a good light so that they do not reinforce stereotypes about their group. Where “majority students” can slack off on time to time when working within groups, occasionally show up late to class, or be absent without peers attributing their behavior to membership in a particular group, students from underrepresented groups often sense that their behavior is interpreted as a reflection on their group. Although there may be little you can do to relieve this self-imposed pressure on the part of some students, you can be thoughtful about your interactions with these students and make an effort not to publicly discuss students’ performance or behavior.

Inequities in the Classroom

Be aware of gender dynamics in classroom discussions. Even though women are in the majority, men may sometimes consciously or unconsciously dominate class discussions or interrupt women. Monitor the occurrence of this behavior, and encourage women to speak up at the same time they discourage men from dominating the discussion.

Be careful not to respond to comments in ways that students might interpret as dismissals. You should give sufficient attention to (a) students’ comments that differ from the majority of students’ views or your own views, (b) students’ views that are based on experiential knowledge, and (c) women in predominately male classes or traditionally male fields. Be aware of differences in feedback given to students who differ on some aspect of their social identity (gender, ethnicity, disability, sexual orientation, etc.) For example, you should attend to whether you speak down to women or “brush off” their questions, yet give men responses that are informative and detailed.

Conflict in the Classroom

Respond to classroom conflict in a manner that helps students become aware of the “learning moment” this conflict provides. Heated discussions need to be facilitated in a manner that does not result in hostility among class members and a sustained sense of bad feeling in the room. You can achieve these outcomes by encouraging students to tie their feelings and conflicts to the course material and by looking for underlying meanings and principles that might get buried in the process of class conflict. Students appreciate discussions between groups in the class being recognized and effectively addressed.

Recognize student fears and concerns about conflict. Students enter class with different levels of experience and comfort with conflict. It is important to normalize the experience of conflict in the classroom, particularly in classes that focus on controversial topics. This can be accomplished through explicit discussion of student experiences with conflict and the use of structured discussion exercises.

Maintain the role of facilitator. One of the challenges of teaching conflict resolution is maintaining the role of instructor under a variety of conditions. For example, you can get caught up in expressing your own perspective in heated discussions or can become overly silent in discussions that go beyond your own knowledge base or experience. While these responses are understandable, such role abdication can create chaos in the classroom and force students to fill in the abdicated facilitator role. In order to avoid this outcome you should examine your typical responses to conflict. It can also be useful to find ways that you may admit your limits with respect to certain areas while maintaining responsibility for the group process.

Shari Saunders is currently coordinator of the Transformative Communities Project, and Diana Kardia currently directs the Center for Research on Learning and Teaching at the University of Michigan Ann Arbor. School Voucher Debate Heating Up

Raw Emotions and Complex Issues

BY

JEFF SIMMONS

Four years ago, the Archdiocese of New York offered up a challenge to public school educators in New York City. He suggested that the 1,000 least successful students in the public school system be allowed to transfer to Catholic schools.

His words—offered as an olive branch to help remedy the system's overcrowding ills—provoked fiery debate.

Education advocates abruptly criticized the Archdiocese for triggering talk about school vouchers. Supporters, including New York City Mayor Rudolph Giuliani, seized the occasion to lobby for a program that would grant parents the option of removing children from public schools to send them to private ones with the support—and possible funding of the private sector.

Schools Chancellor Rudy Crew, who has since left office, in part because of his outspoken resistance to vouchers, defended the city's one-million-student public system and refused to cooperate. As he described it, such a program could send the message that the public schools had failed.

Whether he liked it or not, such a program came into existence, albeit in a different form to avoid any taxing litigation. The mayor backpedaled from his publicly funded plan, and private donors coughed up $12 million to fund the New School Choice Scholarships program.

The program granted $1,400 vouchers annually for four years to children in low-income households.

The school system refused to provide records—but watched as thousands of parents applied to remove their kids from classrooms in failing schools. Two thousand of them have since enrolled in private and Catholic schools in the greater New York City area, and nearly all have been minority.

"The first year, the group was 47 percent Latino and 44 percent African American," says Kristin Kearns Jordan, the former executive director who is now starting a charter school in The Bronx. "Currently, low-income Latino and African American students are not being well-served in the city's low-performing schools."

The program has continued to disperse vouchers in similar ehr proportions, granting them to students who were eligible for frerech and live in New York City. Its second year, the program targeted the city's 14 worst-performing community school districts and granted vouchers to students kindergartens through fifth grade.

Said Jordan, "I think people are really looking for options for the kids, and the schools that the pr
ents are using their scholarships towards are demonstrated to work.” The program, she said, is thriving “It is alive, and its well.”

So are efforts to push vouchers—chiefly targeted at minority communities—across the nation. Candidate Bob Dole lobbied for them in the last presidential race. The issue remains a top campaign issue this season. Governor George W. Bush suggested withdrawing money from struggling schools to use on vouchers.

In New York State, First Lady Hillary Rodham Clinton has sparred with her competitor for a New York Senate seat, Republican Mayor Giuliani, over their potential effects. Said Clinton, “Vouchers to me are a flag of surrender.”

The search for an interim city schools chancellor thrust the name of a pro-voucher academic to the fore. And although previous state efforts to enact a voucher program have failed, some legislators privately say that they might submit a bill again in the coming session and are monitoring court bodies to determine whether the time is ripe for New York.

“I think it’s a question of fairness and equity,” says New York City Board of Education Member Nina Segarra, a former deputy mayor, “and fairness and equity mean that you give children every opportunity to have a free and appropriate education.

“I think a voucher program is going to eventually win the day in New York City and throughout the country because I don’t see enough of an effort being made to provide other avenues, such as school choice within public schools and changes in the teachers’ contract to make them more accountable.”

But there is considerable movement on the horizon. Ohio’s contentious voucher fight has escalated to a Federal District Court. In December, Federal Judge Solomon Oliver Jr. concluded that Cleveland’s four-year-old taxpayer-financed voucher program violated the Constitution’s separation of church and state. In that three-year-old program, most of the students left public schools for parochial ones.

The governor hastily vowed to appeal, and the program, which distributes $2,500 in state money toward tuition, continues until the Sixth Circuit Court of Appeals issues a ruling. Experts suspect that this case could eventually—and soon—wind up before the United States Supreme Court.

Meanwhile, the Wisconsin Supreme Court upheld a similar program in Milwaukee and the U.S. Supreme Court declined to take on the case. In Maine and Vermont, courts have found the programs might exclude parochial schools. And in Florida, where a Pensacola program had been expanding statewide, in March a judge found the program unconstitutional, saying that taxpayer-financed vouchers for private school programs violated the law. It struck a blow to pro-voucher advocates.

As the legal battles progress, the debate is also being waged on the front lines: in the classrooms and in the impoverished neighborhoods where parents say vouchers have become increasingly palatable.

“People in the suburbs are not very receptive to the idea. They feel it’s taking money away from the public schools to put in private schools.

“But there is strong support for this among Black and Hispanic parents, and the reasons are straightforward: these are parents whose children get stuck in the failing schools, and they are not attending suburban schools. These kids are attending inner-city schools and very often low-performing schools. What these parents are looking for are options.”

The voucher movement has its critics... and its defenders. Supporters say that vouchers will force public schools to shape up to remain competitive. They hold that low-income students would have wider educational opportunity for greater achievement. Religious conservatives maintain that they could send kids to schools reflecting their values.

Critics, though, stress that there are questions about the use of public funds for religious education, that the private schools might not be appropriately regulated, and that there might not be adequate transportation. They also say that voucher programs can siphon off the best and brightest students to private schools, and that access is skewed toward involved parents.

Unions have furiously opposed vouchers. The National Education Association President Bob Chase, commenting on Bush’s plan, said, “The public doesn’t want vouchers.”

The NEA reports that evaluations of voucher students’ achievement show no or only small improvements when compared with public school students. It cites “official studies” that conclude that vouchers did not improve overall student achievement.

The 36th Annual Phi Delta Kappa/Gallup Poll of the Public’s Attitudes Toward the Public Schools
found that 88 percent of parents would prefer to spend their tax dollars on smaller classes. NEA's recommendations: investing in public schools to lower class size, improving teacher training, and instituting programs targeted at improving reading skills.

"Children and taxpayers would be much better served by proven education reforms that serve all children," said Chase, whose organization joined the Ohio Education Association to fight Cleveland's program in court.

Still, the first study of Cleveland's program—by Harvard's John F. Kennedy School of Government—found that two-thirds of the parents who use the vouchers were "very satisfied" and that testing showed that students had made significant strides.

"I think the evidence is very mixed at this point. If you are looking for performance data in terms of student achievement, [those] data are very controversial right now, depending on whose reports you look at," Viteritti said. "The more encouraging ones say the kids who participate in these programs are doing better academically. The more discouraging ones say that they're not doing any better but they're not doing any worse."

Carol Gresser, an adjunct professor at St. John's University and the director of Columbia University Teachers' College's Institute for School Board Leadership, said that publicly funded vouchers are illegal in New York State. Instead of vouchers, she says that a public school choice program will benefit students.

"I think what vouchers simply do is provide exit visas for some kids to leave the public school system, but they leave hundreds of thousands of kids behind. You are not really solving the problems of public education."

"I am sure you will find some in the minority community who think vouchers will be the magic bullet—but not all people in the minority community. What they realize is that what access that wealthier parents have to better schools while low-income parents don't have similar options.

"Some say that school choice, especially vouchers, will weaken public education," said Schmoke, whose watch has seen the creation of a Baltimore school choice program, the New Schools Initiative. "My response is that choice can only strengthen public education by introducing competition and accountability into the mix."

He went on: "A properly structured voucher program is no more a violation of the principle of separation of church and state than is the GI Bill. This program allowed military veterans to use government dollars to attend any university of their choice, public or private, religious or secular."

Education advocates say that parents in minority communities are more apt to favor vouchers. New York's Toussaint Institute Fund surveyed 747 parents and found that of the 633 who answered a question about vouchers, 533 said that they would like to see a voucher program adopted in the United States. 545 said they believe vouchers would empower the economically deprived.

The programs often accept students who reflect the demographics of the region, which is why New York City's School Choice Scholarships have been granted to higher percentages of Latinos and African American students. and Cleveland's have largely gone to African American students.

Segarra, who is Latina, said that she is often confronted by parents who want more opportunities for their children. "When you explain a parent that they can have a certain amount of dollars to walk down a school nearby, normally a set with a religious orientation, Catholic School, or one run by Protestant Church, they want it.

She added, "I think that part are the first ones on line to accept vouchers. The people who don't want vouchers are people who have a vested interest in the school system and the current bureaucracy."

Added Viteritti, "When you parents what they like about schools, the information that comes back is very consistent. They are about high academic standards, high expectations for their kids, safety of the school, a sense of community. They talk about, if it religious schools, that they like religious values in the school."

Experts say that the Supreme Court, if it takes on Cleveland case will chart course: leading either to a flow of new voucher programs or choice programs that are privately financed. Currently, Cleveland distrusted some 4,000 vouchers.

The minority community did sit back when last year's judicial back was delivered. In fact, it was a public outcry that spoke volume Viteritti. Parents took to the streets and held candlelight vigils—a massive show of support that even swayed a judge to keep the program afloat until the legal battle is over.

"It became a symbol and re dramatized how choice become a 'poor issue,' because saw all of these minority part marching, which was a throwback to the old civil rights days. It was the Christian Coalition. It wasn't conservative free-market proponents. It was poor people."

"This case, if it reaches the U.S. Supreme Court, will be a landmark case."
Smithsonian Celebrates African, Caribbean, and Latin Drums

“Ritmos de Identidad: Fernando Ortiz’s Legacy and the Howard Family Collection of Percussion Instruments,” an exhibition organized by the Smithsonian Center for Latino Initiatives in Washington, D.C., focuses on percussion instruments in Afro-Caribbean music. The display opened in February in the Smithsonian’s Arts and Industries Building and continues through Aug. 1.

Percussion—a key element in the tropical sounds of mambo, merengue, samba, Latin jazz, and salsa—has played an important role in defining Latin sound. Showcasing approximately 150 percussion instruments made in Africa, Cuba, New York, Puerto Rico, and other locations, the exhibit explores the historical development of percussion in Afro-Caribbean music. Several rare items from the 700-piece Howard Family Collection are included.

Poet Agosín Speaks at Rutgers

Award-winning Latina poet Marjorie Agosín spoke of growing up Jewish in predominantly Catholic Chile in a lecture presented by the Allen and Joan Bildner Center for the Study of Jewish Life at Rutgers University (N.J.).

Her lecture explored her childhood in an extended Jewish family in a mostly Catholic nation. It addressed such issues as anti-Semitism and being an outsider, which, along with politics and violations of human rights, have informed her work as a poet.

These experiences are among the themes of her most recent book, *The Alphabet in My Hands*, published last year by Rutgers University Press.

A professor of Spanish at Wellesley College, Agosín recently was honored with a United Nations Leadership Award for Human Rights.

Multicultural Conference and Seminar Calendar for Marketers

Multicultural Marketing Resources, Inc. (N.Y.), has compiled and published a comprehensive calendar of more than 85 seminars and conferences taking place in the year 2000 of interest to marketing professionals who target Hispanics, African Americans, Asian Americans, women, the gay and lesbian market, and other cultural groups. The calendar, which will be updated throughout the year as events are scheduled, includes banquets, galas, fundraisers, and expositions sponsored by multicultural organizations.

The calendar is free to professionals in the marketing and public relations industry. Call (212) 242-3351; e-mail, MMRNews@aol.com; or fax your business card to (212) 691-5969.

Saginaw Graduate Receives Fellowship

Scott Rodriguez, Saginaw Valley State University (Calif.) graduate student, was chosen out of 70 applicants to receive a fully paid fellowship with the Michigan Political Leadership Program (MPLP) at Michigan State University. Rodriguez and 20 other MPLP Fellows will meet for 10 weeks during a 10-month period to discuss state policy issues with prominent political business, media, university, and community leaders.

Rodriguez is a constituent liaison in the district office of U.S. Congressman James Barcia. At Saginaw Valley State, he is pursuing a master’s degree in organizational leadership and administration.

Texas-Austin Symposium on Fragile Democracies

Scholars, government officials, and human rights activists examined the forces affecting democracy in Latin America at a University of Texas-Austin symposium.

The conference, “Challenges to Fragile Democracies in the Americas: Legitimacy, Accountability,” looked closely at how instruments of government survived periods of authoritarianism and are handling current challenges to determine what it takes to regain true democratic legitimacy. Recurring issues, the judiciary, the legislature, and the executive branches, each a different part, in this process. How each branch responds plays a critical role in reestablishment of the public trust that is the heart of any democratic system.

Carolina-Chapel Hill Holds Seminar on Media and Latinos

The School of Journalism and Media Communication at the University of North Carolina-Chapel Hill held a seminar, “Covering the Latino Community.”

The program included sessions about Latino population growth, the Census: political influence and concerns; Latinos as consumers; and how to consider Latinos in writing stories rather than relegateing them to a beat.

Félix Gutiérrez, senior vice president and executive director of the Freedom Forum, spoke. The Freedom Forum, gave a keynote address at the conference.

Félix Gutiérrez has worked for more than 30 years in improving coverage and employment of Latinos in the news media.

Other speakers included Gilbert Bail, vice president and editor of *The Daily News*; Don Flores, executive vice president and editor of *El Paso Times*; and Maggie Rivera-Rodriguez, assistant professor of journalism at the University of Texas-Austin.
Queens College Exhibits Photos of Spanish Catholic Ceremonies

Photographic images of Spanish Catholic ceremonies by photojournalist Tino Martínez were on display at the Queens College Art Center (N.Y.). The exhibition, “Tino Martínez Éx-votos: Photographs from Galicia,” was curated by Jerald R. Green.

Martínez specializes in documenting the numerous romerías (processions) that occur annually under the regional government of his native Galicia in the northwestern corner of Spain. His images of these processions, some solemn, some celebratory, have been exhibited throughout Spain and in Europe.

“Martyrs of El Salvador” Lectures at Saint Mary’s

Recent lectures at Saint Mary’s College (Ind.) related stories of extraordinary people who have sacrificed their lives for their faith.

“The Martyrs of El Salvador,” a three-day series of pre-Lenten lectures delivered by Marie Dennis, director of the Maryknoll Office for Global Concerns in Washington, D.C., aimed to inspire greater awareness and appreciation of Catholic Social Teaching and the steadfast devotion of so many to its principles.

Dennis coordinates Maryknoll’s participation in United Nations activities and travels often to Latin America.

Latino Health Forum at Charles R. Drew University

Dr. Elena V. Rios, president of the National Hispanic Association and director of Hispanic-Serving Health Professions Schools (HSHPS), Inc., was a guest speaker at a Latino health forum held at the Charles R. Drew University of Medicine and Science (Calif.).

Rios discussed an agenda to strengthen the education and increase the numbers of high-quality Hispanic health care providers, thus to serve and improve the health status of Hispanics.

The University is a charter member of HSHPS, a nonprofit organization established in 1996 in response to the President’s Executive Order 12900, “Educational Excellence for Hispanic Americans.”

Latinas Unite at Southwest Texas State

Aiming to bridge both a gender and cultural gap by fostering communication among students, professionals, and the community, Southwest Texas State University (STI) Latina students designed and hosted the 5th Annual Images of Women Conference. Speakers discussed the political, economic, and cultural needs of Latinas across the United States.

Musician Tish Hinojosa and feminist author and educator Dr. María Herrera-Sobek (pictured) were keynote speakers. Other presenters included Dr. Kate Pierce, Dr. Ana Justre, Stella Silva, and Dr. Leicita Garza-Falcon.

Continental and Houston School District Encourage Bicultural Reading

Continental Airlines awarded “pilot wings” to thousands of Houston Independent School District (HISD) second graders, encouraging them to reach their individual lofty goals. The children received the wings as an incentive to participate in the airline’s Vuela con Libros/Fly with Books bicultural reading program in 1999-2000.

“With Continental Airlines’ help, HISD’s bilingual reading initiative has been greatly enhanced at each of our participating schools,” said Jaime de la Isla, assistant superintendent, HISD. “Vuela con Libros/Fly with Books gives children a chance to learn another language through an appreciation of Hispanic culture, regardless of what their native tongue may be.”

During a visit to Holden Elementary School, Continental pilot Diego Camilo spoke to the children about the importance of reading.

Rivera Director of Northern Essex Business Center

Mayte Rivera was named director of Northern Essex Community College’s Lawrence Business Assistance Center in Massachusetts.

The center, which officially opened its doors in February, was funded by a $40,000 grant from the U.S. Department of Housing and Urban Development’s Hispanic-Serving Institutions Assisting Communities Program.

“I believe passionately that education and financial assistance programs are key to removing the challenges and barriers that Hispanic business owners face,” said Rivera.

A native of Puerto Rico who came to the U.S. in 1984, Rivera has a paralegal certificate from Middlesex Community College and a bachelor’s degree from New Hampshire College.

Former Argentinean President at Texas-Austin

Carlos Menem, the president of Argentina from 1989-1999, lectured at the University of Texas (UT)-Austin in March. His talk, “La Argentina en la década del 90 y los desafíos del nuevo milenio” (“Argentina in the Decade of the 1990s and the Challenges of the New Millennium”), given in Spanish, was sponsored by the Argenti Studies Center at the UT-Austin Institute Latin American Studies (ILAS).

“Even Menem’s detractors confess that is presidency transformed Argentina in a positive way,” said Dr. Nicolas Sluman, director of ILAS. “Previously a country of star-run industries and a protected economy, Argentina under Menem enthusiastically embraced liberal economic policies. A result, foreign investment grew, partly at result of privatizing state enterprises, but largely because Menem’s policies made the country a much more attractive to foreign capital.”

Large NIH Grant to New Mexico State

The National Institutes of Health (NIH) has awarded a four-year, $577 million grant to New Mexico State University (NMSU) to support research in the molecular life sciences. It is the largest NIH grant ever awarded to NMSU.

The grant, awarded through the NHSC program, supports for Continuous Research Excellence, will support eight research projec...
and two pilot projects by faculty members from several NMU departments.

SCORE grants are for "biomedical and behavioral research at institutions with significant underserved minority student enrollment." About 48 percent of NMU's undergraduate students are Hispanic, Native American, or African American.

Central Connecticut Students Go Abroad

Central Connecticut State University will be conducting a two-week educational program exploring European cultures and ancient sites. May 20 to June 4. The first week will be spent in and around Lisbon, Portugal, and in Madrid, Seville, and Granada. Tourists will visit Alhambra, an African Moorish palace above the narrow streets of medieval Christian Granada.

The second week will be spent in Pisa, Milan, Venice, Florence, and Rome. Michelangelo said that the doors of the Baptistry in Florence "were worthy to form the gates of paradise". Napoleon called St. Mark's square in Venice "the finest drawing room in Europe".

Caregiving Roundtable at Cal State L.A.

Assistant Secretary of Aging Jeannette C. Takamura (pictured r.), U.S. Department of Health and Human Services, led a roundtable at California State University-Los Angeles' Rojal Institute for Applied Gerontology. The meeting, "America's Families Care: Voices from the Communities," addressed family caregiving and long-term care issues, with a focus on ethnic communities and diversity.

Jorge Lammbrinos (r.), director of the Royal Institute, attended along with Cal State L.A. administrators, family care-givers, and representatives of agencies providing services for older adults, faith-based organizations, health care businesses (nursing homes and companies that provide home care equipment), and labor unions.

Texas A&M-Kingsville Engineering Students at National Conference

Ingrid Ascencio, a senior mechanical engineering student from Texas A&M University-Kingsville, came home from a meeting in Washington, D.C., with a $2,000 cash prize for her award-winning paper while classmate Cecilia Cortez, also a senior mechanical engineering major, accepted the Chapter Development Award.

Ascencio (picted r.) and Cortez (l.) attended the national meeting of the Society of Hispanic Professional Engineers. Cortez is president and Ascencio is vice president of the Texas A&M-Kingsville chapter.

Ascencio's paper, "The Changes in Mechanical Properties of the Rat Femur with Alcohol Effects," is based on her interest in biomedical engineering.

Cortez said that the group sponsors visits to campus by industrial leaders and conducts programs for high school and middle school students emphasizing the importance of science and engineering.

Matos Rodriguez in New Post at Hunter College

Dr. Felix V. Matos Rodriguez, an educator and historian with interests in public policy, has become the director of The Center for Puerto Rican Studies at Hunter College (N.Y.).

In planning to have "Centro" focus more on policy issues, including K-12 school reform, welfare legislation, and migration, Matos Rodriguez envisions its staff of researchers regularly providing data and analysis to New York City officials on issues affecting the Puerto Rican and greater Latino communities.

"I would also like to expand our policy work outside the city, help more Latinos for social-research car train leaders of community organize gather their own data to support thacy," he said.

Matos Rodriguez graduated from Yale and earned two master's and a doctorate at Columbia University.

Western Oregon Holding Prt in Mexico City

Western Oregon University (WOU) and the National Museum of Anthropology and History in Mexico City are conducting an intensive Spanish Program June 8-Aug. 3 in Mexico City. The program, designed to help students live in the largest city in the world, provides a unique experience for students to learn the language and culture.

WOU students must be willing to engage in intensive language courses during the program, which will be held at the university’s main campus.

Southern Methodist Hosts (Rodero Exhibition)

One of Spain's most prominent photographers, García Rodero (pictured r.), has been documenting its religious festivals and rituals: the Corpus Christi in Segovia and the Passion of Christ in the Meseta. The images in the exhibition were taken during his recent trip to Spain and are from his series "España Oculta." The exhibition also includes a series of photographs taken in the Soviet Union and a recent document from post-war Spain.

Dr. Félix V. Matos Rodriguez, an educator and historian with interests in public policy, has become the director of the Center for Puerto Rican Studies at Hunter College (N.Y.).

In planning to have "Centro" focus more on policy issues, including K-12 school reform, welfare legislation, and migration, Matos Rodriguez envisions its staff of researchers regularly providing data and analysis to New York City officials on issues affecting the Puerto Rican and greater Latino communities.

"I would also like to expand our policy work outside the city, help more Latinos for social-research car train leaders of community organize gather their own data to support thacy," he said.

Matos Rodriguez graduated from Yale and earned two master's and a doctorate at Columbia University.

Western Oregon Holding Prt in Mexico City

Western Oregon University (WOU) and the National Museum of Anthropology and History in Mexico City are conducting an intensive Spanish Program June 8-Aug. 3 in Mexico City. The program, designed to help students live in the largest city in the world, provides a unique experience for students to learn the language and culture.

WOU students must be willing to engage in intensive language courses during the program, which will be held at the university’s main campus.

Southern Methodist Hosts (Rodero Exhibition)

One of Spain's most prominent photographers, García Rodero (pictured r.), has been documenting its religious festivals and rituals: the Corpus Christi in Segovia and the Passion of Christ in the Meseta. The images in the exhibition were taken during his recent trip to Spain and are from his series "España Oculta." The exhibition also includes a series of photographs taken in the Soviet Union and a recent document from post-war Spain.
Latina Organization Holds Anniversary Banquet

LPC/LATX Latina Promoviendo Comunidad/Lambda Pi Chi Sorority, Inc., a community service-based organization dedicated to the socioeconomic, political, and educational development of women and all people of color, recently held its 12th Anniversary Banquet. The event was held in conjunction with the sorority’s annual conference.

Sorority founders created the organization in 1988 at Cornell University (N.Y.) to consolidate their strength as responsible women devoted to the community. Based on three ideals, La Comunidad, La Cultura Latina, and La Hermandad, the group eventually expanded to include top universities and colleges throughout the Eastern U.S. and now has more than 200 members.

Martinez Named VP at Texas-Brownsville/Texas Southmost

Rosemary R. Martinez is the new vice president for business affairs at the University of Texas-Brownsville/Texas Southmost College (UTB/TSC).

"Rosemary brings valuable private and public sector experience to this work, coupled with an energetic commitment to refining processes and improving efficiency," said Dr. Juliet V. Garcia, University president.

Martinez joined the University in 1997 as budget director and controller. Since 1999, she has been interim assistant vice president for business affairs. An active member of the community, she is a member of the Brownsville Citizens Advisory Committee.

Martinez earned a bachelor’s degree from Pan American University, graduating summa cum laude. She is a CPA and is currently pursuing a master’s at UTB/TSC.

In the News at Texas A&M- Corpus Christi

Texas A&M University-Corpus Christi introduced a special display of the papers, photographs, and works of three local Mexican American women professionals and community leaders. The Bell Library display honored the history of Dr. Clotilde P. Garcia, Jovita Gonzalez, and Dora Cervera Mirabal. Rosie Mirabal Garza, daughter of Dora Cervera Mirabal and friend of the other two honorees, spoke about the lives of the three honorees at the reception.

The Texas A&M University-Corpus Christi Weil Gallery recently held the exhibit “Alberto Mijangos: Paintings.” Prior to the opening, Alberto Mijangos worked on a large, multi-paneled wall mural for the exhibition. Several large mixed-media paintings on canvas and a series of smaller paintings on wood panels also were on display. Mijangos, who was born in Mexico City and has lived in San Antonio since the 1960s, has exhibited throughout Latin America and the United States.

Texas-San Antonio Associate Dean Chosen for Fellowship Program

Bertha Pérez, University of Texas-San Antonio associate dean for the Downtown campus, was selected for the National Hispana Leadership Institute Year 2000 Fellowship Program.

One of only 20 women chosen nationwide, she will participate in a four-week program that includes a week each at Harvard University, Washington, D.C., and San Francisco. The program prepares women who have demonstrated leadership at the local level for positions of national influence and public policy impact.

The National Hispana Leadership Institute was founded in 1988 with a mission to create positive global change through personal integrity and ethical leadership.

Sandoval Wins Hayward Award for Excellence in Education

Anacapoli Valley College Professor Patricia Sandoval was given California’s Hayward Award for Excellence in Education at a meeting of the board of governors of the California Community Colleges in Sacramento.

Nominees were judged on five criteria: commitment to serving students; commitment to the college, including helping students succeed; participation in professional and/or student activities; commitment to education, including currency in the faculty member’s discipline; and serving in state or national activities.

Sandoval is a member of the California Association of Bilingual Educators, Associates of Mexican American Educators, and California Association of Hispanic Psychologists.

Miami-Dade and HACER Create Scholarship Fund

Miami-Dade Community College (M-DCC) in Florida received $20,000 to create an endowed scholarship fund for Hispanic students. The McDonald’s restaurant franchisees—through their Ronald McDonald House Charities/Hispanic American Commitment to Education Resources (RMHC/HACER) Scholarships Program—donated $10,000 to the college which the M-DCC Foundation, Inc., matched.

Two scholarships per academic term, approximately $1,000 each, will be made from this fund.

The HACER Scholarship Program is an initiative of the McDonald’s Hispanic Operators Association, a national organization of McDonald’s franchise owners of Hispanic descent. Local members Roseli Rodriguez and Alex Rodriguez presented the award to the college in a recent ceremony.

California Schools Strive for Diversity in Graduate Education

The University of California, California State University, and many of California’s independent college and universities lashed together, the 10th consecutive year, to host the California Forum for Diversity in Graduate Education.

More than 1,000 students of color as well as other who bring diversity to higher education gathered at Stanford University to attend workshops given by faculty and administrators on key aspects of how to select, apply to, receive and maintain financial aid, and succeed in graduate school.

Undergraduates and master’s-level students from dozens of California colleges and universities were selected to attend because of their potential for success in doctoral programs. In addition to attending workshops, students had the opportunity to visit more than 100 graduate school recruiters from throughout the country.
California State-Fullerton Holds Sociology Day

Sociological Perspectives on Mexican Americans in Southern California was the theme of Sociology Day at California State University-Fullerton—from “Chicanos in the Media” to “Building Healthy Cities.”

Guest speakers included the following: Eli Reyna, senior human relations specialist with the Orange County Human Relations Commission; Dr. Vilma Ortiz, professor of sociology at the University of California-Los Angeles; Mectesauma Esparza, filmmaker, producer, and entertainment industry executive; Dr. America Bracho, executive director of Latino Health Access, Santa Ana, Calif.; and Augustín Gurza, Los Angeles Times columnist.

New Jersey City Council on Hispanic Affairs Holds Fundraiser

The Council on Hispanic Affairs (CHA) of New Jersey City University (NJCU) held its annual scholarship fund benefit dinner. Event organizer Hugo Merales is NJCU assistant director of publications and CHA chair.

Professor Ben Jones (pictured), a faculty member in the NJCU art department since 197, was honored for his contributions as an educator, mentor, and artist to the university community and to Latino communities around the globe.

Jones is an internationally acclaimed painter, sculptor, printmaker, and mixed-media artist. Fluent in Spanish, he has traveled extensively, conducting research in West Africa, Brazil, Cuba, the Caribbean, France, Spain, the Soviet Union, Canada, and the United States. He is a graduate of William Paterson University (then William Paterson College) and has master’s degrees from New York University and the Pratt Institute.

Texas A&M-Kingsville Biology Students Attend Symposium

Texas A&M University-Kingsville biology students presented their research at the first National Institutes of Health/Research Infrastructure in Minority Institutions Symposium in Atlanta, Ga. Student participants included Maria Estela Martinez, Maria Susana Ramirez, Elda E. Sanchez, Gloria R. Chapa, Celia Garcia-Prieto, Rolel Valadez, Jr., Rosemary Ramirez, Gennie Schuller-Chavez, Wendy McCoy, Ahmad Galal-EIDeen, Ronika Williams, and Morgan R. McKeller.

The mentors accompanying the students were Dr. Maribel Gonzalez-Garcia, assistant chemistry professor; Dr. Rafael Perez-Ballesteros, chemical technical coordinator; and Dr. John C. Perez, biology professor.

Minority Medical Students Attend National Meeting

B-MS
NMFF

Twenty-nine of the nation’s most gifted minority medical students presented findings of their biomedical research projects during the annual symposium of The Fellowship Program in Academic Medicine for Minority Students. The meeting is the largest gathering of minority medical students in the United States.

The fellowship program seeks to increase the number of African Americans, Mexican Americans, mainland Puerto Ricans, and American Indians in biomedical research and academic medicine. It is funded by the Bristol-Myers Squibb Foundation and administered by National Medical Fellowships, a not-for-profit organization.

Each fellow-third- and fourth-year minority medical students from across the U.S.—worked on a project from eight to 12 weeks, in collaboration with a leading biomedical researcher who served as a mentor.

New Mexico Library Hosts Transborder Conference

The University of New Mexico general library hosted the X. Transborder Library Forum, or “X FORO,” the 10th annual conference at which librarians from the United States, Mexico, and Canada convene to exchange information about the provision of library services in those regions.

“Beyond Our Borders: Interconnections” explored how librarians can transcend personal, cultural, economic, and geopolitical borders with a shared sense of purpose.

John Wirth, Gildred professor of Latin American studies at Stanford University and president of the North American Institute in Santa Fe, was a keynote. Noted Acoma Pueblo poet and essayist Simon Ortiz was a speaker.

April Celebrated as Diversity Month at Western Oregon

Western Oregon University celebrated its first organized Diversity Month in April. In all 200 pictures (and, a member of the Associated Students of Western Oregon University, was the diversity program coordinator.

“Voices,” an assembly of students, faculty, staff, and community, provided an opportunity for open dialogue on diversity. A Day of Silence and Two Days of Action, sponsored by the Gay and Proud Club, were special days geared toward raising awareness of the homosexual community. The Multicultural Student Union sponsored salsa dancing and lessons, and Bernardette Balagastas presented a one-woman show, “Faces of America.” International Night featured demonstrations and representation from most of the university’s international student cultures.

Miami-Dade Holds Fundraiser for García Fusté Fund

The Miami-Dade Community College (M-DCC) Foundation, Inc., presented this year’s annual fundraising luncheon for the Tomás García Fusté Hispanic Scholarship Fund in Florida.

Tomás García Fusté, a popular Spanish-language television and radio commentator and Cuban exile leader, has worked for more than 11 years with the M-DCC Foundation, Inc., helping raise thousands of dollars for scholarships that, to date, have helped about 73 Hispanic students.

“My parents did not have the means to send me to college,” said García Fusté. “That’s what makes these fund-raising efforts so meaningful. It is important for me to give other Hispanics the opportunities I never had.”

U.S. International Holds Annual Friendship Festival

United States International University (USIU) in California recently held its 11th annual International Friendship Festival
The celebration, "Color Your World," was organized and presented largely by USIU’s multicultural, multinational student body. Students from more than 90 countries attend USIU. Many international student clubs sponsored booths highlighting food and crafts from their home countries. Live entertainment included music and dance performances and a multicultural student style show.

Bloomfield College Holds Benefit for New Library

A recent benefit for the new library at Bloomfield College in New Jersey, Books and Bytes, featured live and silent auctions, dinner and dessert buffets and live entertainment.

Bloomfield College, founded in 1868, is an independent college historically related to the Presbyterian Church of the U.S.A. The student body is from suburban and inner-city neighborhoods, and from more than 70 countries. Many students are the first in their families to attend college, and many are single parents. One-third of those receiving financial aid come from families whose annual income is less than $12,000.

Computer Class Taught in Spanish at Pierce

Pierce College’s (Wash.) continuing education department is offering a four-session course on basic computer usage taught in Spanish. The course covers computer terminology, mouse use, basic word processing, and spreadsheet programs in the Windows 95/98 family. Gus Gomez, a computer instructor for Pierce College at Puyallup, heads the class.

Knight without Armor: Carlos Eduardo Cataiñeda, 1896-1958

by Félix D. Almaráz, Jr.

Rising from humble origins in South Texas, Carlos Eduardo Cataiñeda overcame financial barriers and ethnic discrimination in his quest to become a professor and achieved successes unmatched by any American historian of Hispanic descent. This is a definitive biography of this substantial yet virtually unknown historian of the 20th century.

The San Sabá Mission: Spanish Pivot in Texas

by Robert S. Weddle

In 18th-century Texas, under Spanish occupation, Franciscan missionaries sought to convert natives to Christianity and make them productive Spanish citizens. A change occurred with the San Sabá Mission disaster and the ensuing military campaign to punish the Indians responsible. This book examines the tragedy as well as its effects on the area’s development as a whole.

Texas Almanac 2000-2001

Mary G. Ramos and Robert Plocheck, eds.

The special millennium edition of the Texas Almanac is the definitive resource for Texas information—its history, its culture, and its future. It includes stories on the Texas Rangers, and on the influence of oil on Texas culture, people, and economy. This one-stop, comprehensive reference book for all things Texan was published by The Dallas Morning News.

Mutual Impressions: Writers from the Americas Reading One Another

Ilan Stavans, ed.

It is commonly assumed that the United States and Latin America, culturally so different, move artistically to very different rhythms. Also common is the assumption that the literary figures on each side of the globe North/South divide have had very little interest in the work of their counterparts. Professor of Spanish Ilan Stavans—whose emergence as a leading spokesperson for Latinos has sparked debate among Latino scholars—shows how solid bridges between writers and across borders have been, and how crucial they are likely to become.

An Account of the Antiquities of the Indians: A New Edition, with Introductory Study, Notes, and Appendixes by José Juan Arrom

by Fray Ramón Pané

With Columbus on his second voyage to the New World in 1494 was a young friar named Ramón Pané, whose assignment was to live among the “Indians” whom Columbus had “discovered” on the island of Hispaniola and to learn their language and write a record of their lives.
Women in Mexico: A Past Unveiled
by Julia Tuñón Pablos

This work examines the role of Mexican women, addressing the interplay between myth and history and the gap between theory and practice. The author discusses the identity transformation by which indigenous women see themselves as Mexicanas, and analyzes such issues as women's economic dislocation in the labor force, education, and self-image. Translated by Alan Hynds.

Star Gods of the Maya: Astronomy in Art, Folklore, and Calendars
by Susan Milbraith

Observations of the sun, moon, planets, and stars played a central role in ancient Maya life ways, as they do today among Maya who maintain the traditional ways. This book reconstructs ancient Maya astronomy and cosmology through the astronomical information encoded in Pre-Columbian Maya art and confirmed by the current practices of living Maya peoples.

A Dream Compels Us: Voices of Salvadoran Women

New Americas Press, eds.

Salvadoran women, in their own words, explain the process of profound social transformation that occurred in El Salvador from 1980 to 1988. The pieces depict the development of a broad revolutionary movement and women's participation in it throughout the decade.
The 15th annual national conference theme is “Making Choices as a Diverse Society: Taking Responsibility for a Promising Future.” At the Hyatt Regency Washington on Capitol Hill in Washington, D.C.

HACU 14th Annual Conference
November 4-7

This year’s theme: “Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

Position Announcements
The Unit for Teacher Education
CONCORD COLLEGE

Position:
(1) An assistant professor of education (joint appointment) position is full-time, tenure-track position to begin with the fall 2000 semester.

Location:
The Unit for Teacher Education (Education Department) is located at Concord College, Athens, in eastern West Virginia. Concord College is a baccalaureate liberal arts institution with a strong commitment to programs of excellence in teacher education, preprofessional programs in the arts and sciences, and public service. The Education Department has nine full-time faculty members who serve approximately 500 candidates pursuing degrees in early childhood, special education, elementary education, secondary education, and various content specialties in secondary education. The Unit is accredited by NCATE and holds membership in AAATE.

Position Descriptions:
We are seeking a faculty member with an enthusiasm for teaching. We desire someone with creative ideas, in-depth personal knowledge, effective human relations, good communication skills, and a demonstrated record of teaching effectively and efficiently. In the P-12 schools. We should also value collaboration and be willing to work across traditional program boundaries. The person is expected to advise the presence of teacher candidates, maintain scholarly productivity, and participate in the governance of the Unit, Division, and College. We should also be able to incorporate technology into their teaching methods. Stipends to this position:
(1) The generalists should be qualified to teach some P-6 method courses.
(2) And have expertise in professional education core courses, and supervision.

Responsibilities:
- Advise preservice teacher candidates
- Collaborate with P-12 schools
- Participate in the governance of the Unit, Division, and College
- Teach core professional education courses, mentor courses, and/or supervise student teachers

Required Qualifications:
- Earned doctorate preferred. However, a master’s is acceptable if the applicant is enrolled in a doctoral program, and a candidate is required for tenure
- At least 3 years of successful classroom teaching experience in a P-12 setting

Preferred Qualifications:
- Experience in educational technology
- Experience in special education

Salary:
Between $30,000 and $40,000 depending upon experience and qualifications.

Application Process:
The Unit for Teacher Education is anxious to increase the diversity of our faculty. Therefore, we welcome and solicit applications from members of minority, groups, and women with disabilities. Review of application materials will begin immediately and continue until the position is filled. Application materials should include a cover letter which explains professional education experience and qualifications for the position and a full curriculum vitae, the names, addresses, including titles and institutions and telephone numbers of three references who may be contacted and three letters of recommendation. Include a sample of written work in the applicant’s area of specialty. The applicant is expected to present a public seminar on a graduate topic or a book publication.

Application materials should be sent to:
Ms. Deborah Stutler, Director of Human Resources, Concord College, PO Box 1000, Athens, WV 24712-1000.
Book Review

By Humberto López Cruz, Ph.D.

One hundred seventy-three years after its first publication in Philadelphia, the anonymous novel Xicoténcatl entered the English-speaking world with the translation offered by Guillermo Castillo-Feliú. The aura of mystery surrounding the novel’s authorship has divided scholars throughout the years. For a few, including Pedro Henríquez Ureña, the author is Mexican. For the great majority, among them the Mexican Luis Leal, the author is Cuban priest Félix Varela. This critic, along with Rodolfo Cortina, published a Spanish edition of Xicoténcatl (Houston: Arte Público, 1995) clearly stating that the author was Varela. However, a couple of years before Castillo-Feliú’s translation came to light, another scholar, Cuban Alejandro González Acosta, published in the Aztec capital El enigma de Xicoténcatl (México: Seminario de Cultura Novohispana, 1997) granting the authorship to José María Heredia, also Cuban. However, the controversies about the author’s real identity should not detract the reader from the real value of Xicoténcatl.

The plot is set in the historical period of the Conquest of México, more specifically, the Aztec Empire, by the Spaniards. Young Xicoténcatl’s fate has already been decided by history; nonetheless, the reader has the opportunity to listen to the voice of the defeated, epitomized by Miguel León Portilla in Vision de las rencidas (México: Universidad Nacional Autónoma de México, 1989), his recollection of texts translated from the nahua, and published in 1591, which offers history a discursive possibility other than the conquerors’. In Xicoténcatl, the Spaniards are shown as despicable and cruel individuals while the Indians, here called Americans, are the symbol of nobility and freedom.

The time period in which the novel was first published in Philadelphia is very significant. Spain’s Constitution of 1812 Cortes of Cádiz, has been overruled by an absolutist monarchy; thus the interests of the American colonies in having a presence within the Spanish empire vanish without a trace of hope. Armed movements against the colonizers seem to be the only way to gain independence, and México, among other nations in Central and South America, is already engaged in a venture that eventually will lead to its independence. Xicoténcatl, as a novel, shows that through armed struggle, the Americans—our name of the American continent—can reject the presence of the conquerors as a result, time is not a problem since the events that took place in the early 1500s are now repeating themselves during the first quarter of the 19th century. Colonialist societies are not an issue from the past; the end of the 20th century has witnessed the return of Macao to China from Portugal marking the end of a colonizer’s enclave in the Asian continent. The legacy of Xicoténcatl may very well be applied to a much more contemporary world.

Castillo-Feliú understands the importance of this historical novel within a crucial period of Spanish-American history. The author’s intentions are clearly respected in the translation, and the figure of Xicoténcatl sharply contrasts the portrait of Hernán Cortés. The classic encounter of civilization vs. barbarie denotes the majesty of the noble savage who risks everything, including his life, to prevent the cruelty of the foreigners from ruling his land. The death of the protagonist appears as the maximum sacrifice compared to the amorality shown by Cortés, who is projected as a vicious individual pursuing only his selfish interests.

The role of the women in this novel is also significant; two female characters clearly emerge within the text. Inevitably the reader will compare Teutilia, wife of Xicoténcatl, and La Malinche—also known as Doña Marina—Cortés’ concubine. Although Teutila is always portrayed as a symbol of honesty and fidelity, La Malinche’s reaction after the birth of her first illegitimate son shows a mixed reaction in her, developing a feeling for her own people hardly seen before. La Malinche is a character who evolves from the opportunist slave trying to manipulate Cortés to her own benefit to the woman who realizes that the mestizo son she has just borne to the conqueror encapsulates the fusion of two races. The clash between the two cultures is best seen through the various faces projected by La Malinche.

The brief introduction preceding the novel and offered by Castillo-Feliú alerts the reader to important aspects of Xicoténcatl, the enigma surrounding its publication and authorship, and his role as a translator, a role which presented several complications. The translator is very conscientious about the reality of the job and realizes that anyone in the same position faces the "impossible dilemma" of a perfect translation. In Castillo-Feliú’s case, the dilemma may be more acute since the possibility of consulting with Xicoténcatl’s author is nonexistent, due not only to the anonymity but to the date of publication. The chronological disparity between author and translator leaves the resolution of any doubts arising during the translation process to the discretion of the latter. Fortunately, Castillo-Feliú does a remarkable job with a novel that describes a crucial chapter of America’s history. It is extraordinary that Xicoténcatl, as a novel, can so awaken a reader’s curiosity about a great civilization. It is, in addition, a tribute to the nobility of the native Americans in their quest for freedom.

PENN STATE

WHY PENN STATE IS ONE OF THE BEST UNIVERSITIES FOR HISPANIC STUDENTS?

- Diverse University System
- Opportunities for Leadership
- Opportunities for Networking
- Opportunities for Cultural Expression
- Seven Hispanic Student Organizations
- Celebration of Hispanic Heritage Month
- Strong Precollege Programs
- Strong Academic Programs
- Strong Support System

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.

A University That Welcomes You

The University of North Texas in Denton is one of the nation's top 100 colleges for Latinos. UNT offers more bachelor's degree and graduate programs than any university in the Dallas-Fort Worth area.

DOS
- UNO offers the quality of a private university at an affordable cost due to state assistance. Grants, scholarships, campus jobs and paid internships are available.

TRES
- More than 3,000 Hispanics attend UNT, which offers Latino student organizations plus more than 200 other student groups. The Student Ethnic Enrichment Center provides support and schedules activities.

NOVA is a leading producer of minority associate's degrees.

10% Hispanic enrollment in over 150 programs of study.

We're proud of our diversity!

California State University
Monterey Bay

Coordinator of Introduction to Service Learning Instruction, Service Learning Institute
One-year Temporary Lecturer, 2000-2001 academic year (Job #8MB00-CSL05)

California State University Monterey Bay (CSUMB) is a comprehensive public university committed to serving the diverse people of California, especially the working class, historically underserved, and low-income populations. The university values an educational environment of cultural and linguistic diversity and gender equity; ethical reflection and practice; effective and experimental use of technologies as resources to people and catalysts for learning; and the integration of cross-disciplinary models enabling students, faculty and staff to engage in innovative instruction and coordinated service learning. The curriculum is organized around student learning outcomes. It is global in perspective and of sufficient breadth and depth to meet local, regional, and statewide needs specifically those of both isolated rural communities and inner-city populations. The campus is located on Monterey Bay, 100 miles south of San Francisco.

Under the general supervision of the Director of Service Learning, the Coordinator of Introduction to Service Learning Instruction is responsible for teaching the entry-level required course each semester, leading weekly faculty development sessions, and monitoring assessment of student learning outcomes and evaluation of course objectives. Applicants should have experience with the integration of service learning and multicultural education.

Minimum Qualifications: an earned M.A. or equivalent in a related discipline.

Priority Filing Date: May 15, 2000 for priority review. Position open until filled.

For a complete job description and application information see PERLINK http://www.csumb.edu/general/lec-recruit or contact Recruitment/Academic Personnel, CSU Monterey Bay, 100 Campus Center, Seaside, CA 93955-8001, Tel: 831/388-3569, Fax: 831/388-8811. E-mail: faculty_recruitment@csumb.edu.

California State University, Monterey Bay is an Equal Opportunity Employer.

President

The University of Texas Health Science Center at San Antonio

Nominations and applications are invited for the position of President of The University of Texas Health Science Center at San Antonio.

The President of The University of Texas Health Science Center at San Antonio is responsible for the operation of the School of Medicine, the Graduate School of Biomedical Sciences, the School of Allied Health Sciences, the Dental School, and the School of Nursing. In addition, the university offers cooperative programs in public health with U. T. Health Science Center-Houston and in pharmacy with U. T. Austin. The U. T. Health Science Center-San Antonio is in the process of establishing a Regional Academic Health Center in South Texas, a Campus Extension in Laredo, and the Children's Cancer Research Center-San Antonio. The U. T. Health Science Center-San Antonio was established to serve South Texas.

The following fiscal year 1999 statistics indicate the scope of Health Science Center programs:

- Student Enrollment --- 2,717
- Full-Time Faculty --- 1,032
- Total Employees --- 4,570
- Total Expenditures --- $330,000,000
- Total Research Budget --- $79,375,020
- Total Outpatient Clinic Visits --- 823,044
- Total Dental Patient Visits --- 98,077

Qualifications for the position include, but are not limited to:

- Impressive achievement in the administration of academic health resources
- A demonstrated ability to articulate the role and needs of a publicly supported, comprehensive health science center in South Texas to all of its public and private constituents
- A proven commitment to excellence in health education, patient care, hospital management and research in a managed care environment, and a recognized ability to exercise the sensitivity and leadership skills necessary to work with the various constituents essential to the achievement of excellence.

Nominations and applications should be received no later than July 21, 2000. After that date, the Advisory Committee may request and consider credentials from candidates nominated by other responsible sources. Nominations and applications should be forwarded to:

Charles B. Mallinck M.D.
Executive Vice Chancellor for Health Affairs
and
Chairman, Advisory Committee for the Selection of a President
The University of Texas System
601 Colorado Street
Austin, Texas 78701-4371

An Employer Affirmative Action Employer
The National College of Education at National-Louis University is pleased to announce its search for the Dean and salary is negotiable. The University is committed to a search in Educational Management Network/Witt/Kieffer.

Founded in 1886 in the Chicago area to prepare teachers to teach young children and to introduce kindergarten nationally, National College of Education has grown into one of the largest teacher education programs in the nation. National-Louis has campuses in Evanston, Wheaton, Wheeling, Elgin and Chicago, and sites in Florida, Georgia, Missouri, Virginia, Wisconsin, the District of Columbia and Heidelberg, Germany. At the National College of Education, in which 80 percent of the University's 13,000 students are enrolled, the Dean will set the strategic direction for the College, guide program development at the undergraduate, master's and doctoral levels, manage the College and its resources, including 614 faculty members, coordinating its programs with others in the University; and ensure that the programs meet the accreditation standards of relevant bodies, especially NSCATE. The Dean will have an important role in the development and expansion of collaborations with local schools, demonstration programs (an on-campus Demonstration School, pre-K-4 and a Best Practice High School in downtown Chicago), research activities, and innovative degree programs to educate teachers and administrators. In particular, strengthened use of technology to improve teaching and learning will be important as will exploration of distance learning opportunities. The Dean has an exciting opportunity to work with an energetic faculty to develop the talents of educational professionals and expand the educational opportunities of all students, particularly those from urban areas.

The new dean will be responsible for working with the faculty to enhance and implement the vision of the National College of Education. As a senior member of the University administration, the Dean will report to the Provost and Senior Vice President for Academic Affairs and will participate in University-wide governance. The Dean will represent the College to internal constituencies, including the Board of Trustees, and to external audiences.

The successful candidate for Dean will be a strong, self-assured, entrepreneurial and creative leader prepared to develop imaginative approaches to educating teachers and administrators to enhance the quality of learning. Appreciation for teaching, research and scholarship is essential. Demonstration of strong management skills, commitment to faculty development and respect for diversity will be essential. To succeed, the candidate must possess an earned doctorate and a record of scholarly achievement, as well as experience in resource development.

A comprehensive position specification describing the University and National College of Education is available from Educational Management Network/Witt/Kieffer, which is supporting National-Louis University in this search. Inquiries regarding this position can be forwarded via email to national-louis@wkmtnet.com or by phone to Mary Elizabeth Taylor at (212) 686-2676. Please submit nominations and applications to: National-Louis University, c/o Educational Management Network/Witt/Kieffer, 3 Park Avenue, New York, NY 10016. The University is an Equal Opportunity/Affirmative Action Employer.

INTERNET PROFESSIONAL INSTRUCTOR (TECHNICAL)

The successful candidate must possess a Bachelor's degree in technology-related field or equivalent work experience and/or education and training, two years Internet work experience including at least one year developing web sites on both PC and Macintosh platforms. Applicants with strong skills in blending advanced design and technical concepts are also encouraged to apply.

An unoccupied position as of the Fall 2000 semester. Initial annual salary range for 1999-2000 is $40,168 - $53,670 (salary range for 2000-2001 TBD) dependent upon education and work experience with numerous fringe benefits. Applications will be accepted until the position is filled.

Interested persons should send official completed WCC application form with credentials (all college transcripts, student copies acceptable and candidates statement of the number of clock hours taught in full-time students for current and/or past teaching appointments) to Washtenaw Community College, Office of Human Resource Management, First Floor Business Education Building, Room 126, 4000 E. Huron River Dr., PO Box D-1, Ann Arbor, MI 48106-9347. Job Hotline (734) 973-3519. For job postings and application materials see our web site at http://www.wccnet.org/jobs/AA/EEO/ADA employer.

MINORITY FELLOWSHIP PROGRAM  

Borough of Manhattan Community College is seeking doctoral candidates who would like to pursue a teaching career. 

Through this initiative, the college seeks to enhance racial and ethnic diversity among faculty ranks as well as encourage qualified minority scholars to pursue careers in teaching at the community college level. Some of the benefits include:  

• Opportunity to obtain experience in the community college setting.  
• Opportunity to be mentored by senior faculty.  
• Opportunity to establish professional relationships.  
• Opportunity to be considered for a permanent faculty position.  
• Opportunity to earn $25,000 stipend for fellowship activities.  

Follows will be expected to:  

• Spend 12 hours a week in teaching and related activities under the guidance of a mentor.  
• Attend related faculty/staff meetings.  
• Participate in professional development activities.  

Selected candidates must have a master's degree and must have completed all course work in doctoral programs at accredited institutions. Candidates who possess doctorate degrees but have limited college-level teaching experience are also encouraged to apply. 

For further information, contact:  
Dr. Sadie Bragg, Vice President of Academic Affairs  
Borough of Manhattan Community College  
165 West 139th Street  
New York, NY 10037  
Tel: 212-651-6000  

The University of Utah seeks Board-Certified Anesthesiologists at all levels in both the tenure and clinical track. Candidates should have expertise in cardiovascular, obstetric, orthopedic, ambulatory pediatric, or neurosurgical anesthesiology or pain management. Fellowship training and a commitment to academic practice are desirable. Salary is competitive. Send curriculum vitae to Michael A. Ackerman, M.D., M.P.H., Professor, Department of Anesthesiology, University of Utah Health Sciences Center, 50 North Medical Drive, Salt Lake City, Utah 84132.
THE DEPARTMENT OF RURAL SOCIOLOGY

University of Missouri-Columbia seeks qualified applicants for the position of Resident Instruction Assistant Professor. The term of this appointment will be nine months, renewable on an annual basis. The successful applicant will teach introductory rural sociology and undergraduate courses, 6 courses (4 prep) per year, in the department. Applicants should be knowledgeable and experienced in the use of electronic technology in teaching. Applicants will submit a teaching portfolio demonstrating their level of experience in teaching and showing evidence of quality of teaching, along with a letter of application indicating their interest in this position and reasons for applying. Applicants should possess a PhD in rural sociology or sociology, and undergraduate teaching experience is desirable. Applications (including transcripts and names and contact information of at least three references) should be sent to: Search Committee Chair, Department of Rural Sociology, 101 Sociology Building, University of Missouri, Columbia, MO 65211-1100. Questions may be directed to Dr. Jere Gillies at 573/882-3791 or gillesj@missouri.edu. Review of applications will begin on May 10, 2000 and continue until the position is filled. Minorities and women are encouraged to apply.

Dean

College of Science and Mathematics

Montclair State University is a comprehensive public university offering a rich array of programs to approximately 13,500 undergraduate students and post-baccalaureate students. Founded in 1906, the University is organized into three colleges and three schools: College of Education & Human Services, College of Humanities & Social Sciences, College of Science & Mathematics, School of the Arts, School of Business, and the Graduate School. Characterized by a faculty of 450 teacher-scholars, Montclair State offers 10 undergraduate degrees in more than 70 major areas of study and seven degrees at the master’s and doctoral level in 35 areas of study. The University is located 14 miles west of New York City on a beautiful 200-acre suburban New Jersey campus.

With a faculty of 78 scholar-teachers and more than 1,500 students, the College of Science and Mathematics provides a rich variety of programs leading to the bachelor of science, master of science and doctor of education degrees. The College is organized into five departments: Biology, Chemistry and Biochemistry, Computer Science, Earth and Environmental Studies, and Mathematical Sciences. The College is home to a number of other programs including the New Jersey School of Conservation, the Health Careers Program, the Center for Equity and Teaching Enhancement in the Reform of Mathematics and Science, and the Math/Science Consultation Service. Programs within the College provide a sound foundation for careers in industry, government, the health professions and teaching, as well as for post-baccalaureate studies in graduate or professional schools, including several unique articulation programs with the University of Medicine and Dentistry of New Jersey.

The dean, who is appointed by the president and reports to the provost/vice president for Academic Affairs, serves as the chief academic and administrative officer of the College. The dean will be regarded as an intellectual leader not only within the College, but across the campus and within the community as well. She/he will have the vision to identify and pursue new opportunities for the College and the intellectual strength to direct its growth and development within the framework of shared academic governance. The dean will be responsible for the administrative and fiscal management of the College, with special attention to the recruiting and development of faculty. She/he will be responsible for effectively representing the College to the campus, alumni and external communities, and provide leadership in the pursuit of the external resources required to augment State appropriations. The dean will be a key member of the University’s senior leadership and will be imaginative in finding ways to advance the goals and objectives of both the College and the University, and fostering collaborations across the campus.

Qualifications: Each candidate should possess an earned doctorate and a record of distinguished academic achievement appropriate for appointment at the rank of full professor in a department of the College. In addition, she/he should possess:

- a thorough understanding of current issues and future directions in the sciences and mathematics
- a commitment to excellence in teaching/learning, scholarship and research, and the application of knowledge
- a record of successful administration in higher education and a broad understanding of higher education
- a demonstrated record in the acquisition of external resources from government agencies, foundations, the corporate sector and/or private donors
- experience with instruction utilizing information technology and electronic access to information
- the ability to foster a collegial, collaborative work environment
- a commitment to maintaining and extending student and faculty diversity
- familiarity with a collective bargaining environment
- strong interpersonal communication and listening skills

Salary Range: Salary dependent upon qualifications

Starting Date: Open

Apply By: Review of applications for the dean of Science and Mathematics will begin immediately and continue until the position is filled.

Send Letter and Resume to: Dr. Dorothy Deremer, Chair, Search Committee, Montclair State University, Box C316—V-805/40, Upper Montclair, NJ 07043. An Equal Opportunity/Affirmative Action Institution www.montclair.edu
BRETHREN COLLEGES ABROAD
605 E. College Avenue
North Manchester, IN 46962

BRETHREN COLLEGES ABROAD (BCA) is a consortium of seven U.S. institu-
tions of higher education that operate study abroad programs at eleven university locations overseas. Students from participating U.S. institutions of higher education and international partner universities are exchanged among the BCA campuses, offering students a variety of programs and opportunities to explore different cultures and educational systems.

BCA is seeking candidates for four positions: two are based abroad (Spain and Mexico) and two are based at the BCA headquarters in North Manchester, Indiana. Application information is available below.

DIRECTOR; BCA SPAIN

RESPONSIBILITIES
The Director of BCA Spain will have primary responsibility for the oversight of the academic, residential, and logistical aspects of the BCA study center in Barcelona and new initiatives in Spain. BCA is looking for someone who can strategically plan and manage growth in Barcelona while maintaining and improving the existing high-quality programs. We are also seeking a dynamic leader who can initiate new program activities such as academic and cultural events, and marketing strategies to attract new students.

QUALIFICATIONS
Applicants should possess substantial academic administrative experience, including strong supervisory skills, a passion for student development, and a strong commitment to quality and excellence. The ideal candidate will have a strong understanding of the U.S. and Spanish cultures and be fluent in Spanish and English.

DIRECTOR; BCA STUDY CENTER, XALAPA, MEXICO

RESPONSIBILITIES:
Administration of all on-site aspects of the BCA Study Center in Xalapa, Mexico. Duties will include: coordinate and facilitate all communication between BCA headquarters, the partner university, affiliated staff, and students; manage staff and student recruitment; develop and maintain a high-quality program; and foster a warm and welcoming environment for students.

QUALIFICATIONS:
ESL proficient, PhD preferred. Must have a strong understanding of the U.S. and Mexican cultures and be fluent in Spanish and English.

PROGRAM OFFICER; BCA HEADQUARTERS, UNITED STATES

RESPONSIBILITIES AND QUALIFICATIONS:
The position of Program Officer at BCA headquarters is responsible for daily activities of program planning and administration and for coordination with program staff and students. The successful candidate will have a strong understanding of the program's mission and goals, be able to work effectively within a team environment, and have excellent interpersonal and communication skills.

QUALIFICATIONS:
ESL proficiency required. Must have a strong understanding of the U.S. and Mexican cultures and be fluent in Spanish and English.

CONTROLLER; BCA HEADQUARTERS, UNITED STATES

RESPONSIBILITIES AND QUALIFICATIONS:
The Controller is responsible for the financial management and control of BCA's budgetary and financial operations. The successful candidate will have a strong understanding of financial management and reporting, including experience in financial planning and analysis.

QUALIFICATIONS:
A degree in accounting or a related field is required. Strong interpersonal and communication skills are essential.

Northeastern University, nationally recognized for its cooperative education program, is a private, non-sectarian university located in the heart of historic Boston. It is a vital part of the city's thriving educational and cultural life, dedicated to excellence in research and scholarship, and highly committed to individual and community needs. Northeastern is dedicated to ensuring gender equity, cultural and ethnic diversity among its faculty, staff, and is proud of its diverse student/resident population.

Residence Director

DIRECTOR, Affirmative Action, Equal Opportunity Employer

Assistant Residence Director

ASSISTANT RESIDENCE DIRECTOR

Assistant in the development and maintenance of a community environment conducive to the personal growth and academic success of resident students. Assist with the operational and administrative functions by managing facilities issues, programming and events, student services, student behavior, and student life. Must have a Bachelor's degree in a related field of study, strong interpersonal and communication skills, and excellent decision-making skills.

Northeastern is an equal opportunity/affirmative action employer. Title IX employer.

UNIVERSITY OF RHODE ISLAND

Director of Affirmative Action, Equal Opportunity and Diversity

The University of Rhode Island invites applications for the position of Director of Affirmative Action, Equal Opportunity and Diversity. The University is a public land grant, sea grant, and urban grant institution serving over 15,000 students on four campuses with a faculty and staff compliment of 2,000. Reporting to the President, the Director will serve as an educator, researcher, and spokesperson on campus and in the community regarding issues of affirmative action, equal opportunity and diversity, and will develop, implement, coordinate, and direct programs and activities that promote equal opportunity and diversity.

Qualifications:
A Master's degree or equivalent advanced degree is required. At least three years of experience managing AA/EO programs is preferred. An understanding of higher education, experience working with culturally diverse populations, and a demonstrated commitment to equity is essential.

ASSISTANT RESIDENCE DIRECTOR

Candidates must have a strong understanding of the U.S. and Mexican cultures and be fluent in Spanish and English.

UNIVERSITY OF RHODE ISLAND

President: Dr. David P. Livneh, Office of the President, Kingston, RI 02881

The University of Rhode Island is an AA/EEO employer and is strongly committed to achieving excellence through the increased diversity of its faculty, staff, and student populations. Persons from underrepresented groups are encouraged to apply.
Vice President for College Advancement
College of Staten Island/CUNY
The College of Staten Island of The City University of New York seeks candidates for the position of Vice President for College Advancement, to start by July 1, 2000. The Vice President, who reports directly to the President, has responsibility for the Office of College Advancement which includes the following areas: development and marketing, alumni relations, governmental and press relations, and public information. He/she is responsible for implementing advancement strategies in these areas. Overall responsibilities include: planning and managing a comprehensive institutional advancement program that includes major giving, proposal writing, annual fund drives, and donor recognition programs; planning and coordinating the College’s marketing and imaging campaign; developing, implementing, and administering a comprehensive internal and external communications program, including governmental and press relations. The Vice President for College Advancement is ex officio the Executive Director of the College of Staten Island Foundation.
Qualifications: Bachelor’s degree, advanced degree(s) strongly preferred and a minimum of eight years related experience (higher education experience desirable); evidence of a successful record in external relations and fund raising, including the attraction of major gifts; excellent communications and interpersonal skills; and the ability to interact effectively with all College constituencies and the larger community.
Salary: Competitive.
Review of applications will begin immediately and continue until the position is filled. Send a letter of application, resume, and the names, addresses, and telephone numbers of three references to:
VP John Hadac, Chair
Search Committee for College Advancement, room 1A-309
College of Staten Island/CUNY
2800 Victory Blvd.
Staten Island, NY 10314.
EEO/AA/ADA employer

NIAGARA UNIVERSITY

COLLEGE OF BUSINESS

ANNOUNCES TENURE-TRACK OPENINGS FOR FALL 2000

Niagara University is located on the northern limits of the city of Niagara Falls, NY. The campus overlooks the Niagara River gorge just 3 miles north of the famous falls. Niagara University is one of three Vincentian Catholic universitiess in the United States. Niagara University has a total student enrollment of 2000.

The Department of Commerce in the College of Business at Niagara University has TENURE-TRACK OPENINGS for senior assistant/associate professors in the strategic management, operations management and human resource management/labor relations areas. The College of Business Administration offers undergraduate majors in accounting and commerce with concentrations in management, human resource management, transportation/logistics, marketing, economics, and international business in addition to an MBA.

The candidates should have substantial research records, particularly publications in refereed journals. Responsibilities include teaching undergraduate courses in one or more of the following areas: strategic management, operations management, quality management, human resource management, labor relations and/or management principles.

REQUIREMENTS: The candidates must have an earned Ph D and a commitment to excellence in teaching, research and service. We offer a competitive salary and benefits and a collegial, supportive atmosphere.

Niagara University is committed to providing its students with a strong foundation in ethical business decision making. In addition, the business curriculum incorporates an international dimension in most courses.

Interested persons should forward a curriculum vitae and letter of intent to Dr. Roland Kidwell, Chair, Search Committee, College of Business Administration, Niagara University, New York 14109. Inquiries may be made via E-mail to rke@niagara.edu. Applications will be accepted until the positions are filled. For more information visit our home Page at http://www.niagara.edu.

Niagara University is an equal opportunity-affirmative action employer. Women and minorities are encouraged to apply.

The successful candidate need not be Catholic, but must be prepared to support Niagara's Catholic and Vincentian mission.

Dean—University Extension

University of California, Davis

The University of California, Davis, invites applications and nominations for the position of Dean—University Extension. This position reports to the Vice Provost—University Outreach and International Programs and is responsible for the administrative, fiscal, and strategic functions of UC Davis’ Extension programs. The Dean—University Extension participates in the development of campuswide policy through membership on the Council of Deans and Vice Chancellors and the Council of Deans.

UC Davis Extension is a self-supporting, continuing and professional education enterprise that offers more than 3,500 courses ranging from professional seminars to online education. It averages more than 80,000 enrollments annually and has gross revenues in excess of $22 million. University Extension’s programs include significant offerings in agriculture, environmental sciences, business management, information technology, K-12 education, human sciences, law for international attorneys, and English as a Second Language. Within California, the service area focuses on the Sacramento region but also includes the central valley and mountain counties from Stockton in the south to the Oregon border in the north; agriculture and human sciences programs are offered throughout the state.

UC Davis seeks candidates who will be able to provide vision, dynamic entrepreneurial leadership, and professional management for University Extension. Candidates should possess demonstrated managerial experience and the ability to work collaboratively and effectively with the entire University community, the general public, and private sector, private sector, and nonprofit entities. A terminal degree and administrative experience in a university setting are highly desirable. We welcome candidates from a variety of backgrounds, including individuals with credentials appropriate for a tenured faculty position within the University of California. UC Davis has a strong institutional commitment to the achievement of diversity among its faculty, staff, and students; we seek an individual who shares that commitment.

Salary will be commensurate with experience and qualifications. The starting date will be January 3, 2000, or as negotiated.

Applications and nominations should be received by June 1, 2000, to ensure full consideration. The position will remain open until filled. Nominations and applications should be addressed to:

Vice Provost William Lacy
Office of the Provost
University of California, Davis
One Shields Avenue
Davis, CA 95616

UCDAVIS

The University of California, Davis, to an equal opportunity employer committed to excellence through diversity.

DIRECTOR & ASSOCIATE DIRECTOR
TEACHER PREPARATION PROGRAM

The Faculty of Arts and Sciences at the Camden Campus of Rutgers University seeks two individuals to develop, administer and implement the new Teacher Preparation Program. The Teacher Preparation Program will be firmly grounded in the liberal arts and sciences and will offer significant practical experiences for its students. Responsibilities include curriculum development, teaching, ensuring compliance with state regulations pertaining to teacher training and certification, hiring and supervising staff, and developing working relationships with local and regional school districts.

Both positions require a Master's Degree in the social sciences, humanities, or the natural or physical sciences and at least 3 years of teaching experience. Must have strong interpersonal, organizational and communications skills as well as knowledge of state educational bureaucracy, curriculum design and the ability to use technology in educational settings and build strong relationships with area school districts. Experience in training teachers in one or more fields is also desirable. Adminstrative experience required for the Associate Director. Ph.D. preferred for the Director. This experience in administration and student supervision are desirable for the Associate Director.

We offer a competitive salary and a comprehensive benefit package. Please send resumes, by May 30, 2000, to Nancy G. Rosoff, Assistant Dean, Faculty of Arts and Sciences, Rutgers, the State University of New Jersey, 311 North Fifth Street, Camden, NJ 08102-1405. Rutgers University is an Equal Opportunity/Affirmative Action Employer, and strongly encourages applications from women and members of minority groups.
The University of Wisconsin System (UWS) invites applications and nominations for the position of Chancellor of the University of Wisconsin-Oshkosh. UW-Oshkosh is one of 11 comprehensive universities in a public higher education system that also includes two doctoral institutions, a system of four-year institutions, transfer colleges, and a statewide Extension. The Chancellor of each UWS institution reports to the President of the UWS System and provides institutional leadership within Wisconsin's tradition of shared governance with faculty, academic staff, and students.

The University of Wisconsin-Oshkosh was founded in 1871 and provides educational services to the Fox Valley region of northeast Wisconsin. UW-Oshkosh is located in the middle of a thriving economic and cultural corridor that stretches from Green Bay to Milwaukee. The Fox Valley consists of several growing communities with a combined population in excess of 250,000. Located on a 135-acre riverfront campus, the University has 37 major buildings with a series of major capital projects and renewals presently scheduled to take place during the period 2000-2003.

The enrollment of 10,700 students includes 1,600 graduate students, the largest graduate program among the eleven comprehensive universities in the University of Wisconsin System. The University offers 51 academic undergraduate programs in four colleges and 15 master's degree programs. It is a member of NCAA Division III and offers 22 programs in women's and men's sports. The university was re-accredited by North Central Association of Schools and Colleges in 1997.

The University has a series of well-established programs to provide educational opportunities for both younger and older adults pursuing either full- or part-time study. The University's academic community includes approximately 1,100 employees, with 355 in the faculty ranks, 455 in the Academic Staff, and 120 among the non-classified personnel. With an operational budget of $100 million, and an exceptionally strong and innovative Faculty Development Board, the University is also supported by a Foundation with $7 million in reserves and endowed funds.

UW-Oshkosh seeks a chancellor with the capacity to lead an energetic institution within a large and dynamic public higher education system.

Applicants or nominees should have the following professional and personal characteristics: a record of academic accomplishment and relevant background at the university level, comparable accomplishments in other fields; personal integrity, intellectual curiosity, compassion, resilience and energy; a commitment to advance the university's educational mission, and provide leadership to the faculty in its role, and to link the curriculum to the needs of the people of Wisconsin.

Candidates should also display the talent to build broad support for the institution at all levels and to advance the university through effective fundraising; the ability to lead the institution and all its constituencies in strategic planning; a commitment to maintain and enhance the quality of student life and student services; a commitment to advancing diversity and to equal opportunity, affirmative action, and non-discrimination; a collaborative and open leadership style; and the ability to represent the institution effectively with its many constituencies, both internally and externally.

The position is available September 1, 2000. Application materials should include a letter of application addressing the attributes noted above, a curriculum vita, and the names, addresses, and phone numbers of at least five references which include faculty, student, and community leaders. Submission of materials as an MS Word attachment is strongly encouraged.

Evaluation of applications will begin on May 26 and will continue until the final candidate pool is established in early July. In accordance with Wisconsin's open records law, requests for confidentiality by nominees and applicants will be honored, except that names and titles of the finalists must be disclosed, if so requested.

Requests for information and written nominations and applications should be directed to:

Dr. Dale Feiswurm, Chair, Search and Screen Committee,
Falk 40, University of Wisconsin-Oshkosh,
800 Algoma Boulevard, Oshkosh, WI 54901
email: searchuw@uwosh.edu.

New School University

The School is committed to an educational environment which the curriculum and every other aspect of university life reflect multicultural city and the international world in which we live.

PRESIDENT
HUNTER COLLEGE
The City University of New York

The Board of Trustees of The City University of New York and the Hunter College Presidential Search Committee, chaired by Berenice C. Schmidt, Jr., invites nominations and applications for the position of President of Hunter College.

Founded in 1870, Hunter is one of the oldest and most diverse public colleges in the country. It is a comprehensive teaching, research and service institution recognized for national leadership in the liberal arts and sciences, teacher education, health sciences, nursing and social work. The College, occupying five sites in Manhattan, offers 70 undergraduate, 50 graduate, and 10 joint B.A.MA programs.

Among the 20 colleges that make up the City University System, Hunter has the largest enrollment, with more than 20,000 students, 22 percent of whom are graduate students. The student body reflects the cultural and ethnic pluralism of New York City and includes representatives from more than 140 countries. Many students are the first in their families to attend college.

Hunter’s faculty includes 565 full-time and 665 part-time professors. In addition to teaching and scholarly research, Hunter has six research centers - the faculty is actively engaged in community service. Hunter’s allocated budget in 1999-2000 was $46 million, and external funding for sponsored programs was $32 million, Hunter’s endowment exceeds $40 million.

The President serves as the chief academic and administrative officer of the College, under the direction of the Chancellor, according to policy set by the Board of Trustees. Preferred qualifications for the position include:

- A demonstrated commitment to urban public higher education in undergraduate and graduate programs in a multi-cultural, multi-ethnic city.
- Experience in the senior-level management of an institution of higher education, or equal, at an institution of comparable scope and purpose.
- An earned doctorate or professional equivalent, university-level teaching experience, and a substantive record of scholarly achievement or professional distinction.
- A leadership style that emphasizes openness, consultation, and respect for the processes of shared governance.
- A commitment to enhance the quality of student life and to ensure the delivery of services to all student bodies.
- The ability to communicate with, and represent the institution to, various local and state constituencies, including alumni, the business community, and legislative and other governmental bodies.
- Experience in attracting external funding and in solving the complexities of city, state, federal and private support.
- A record of service for technological innovation.

The position is available on or before February 1, 2001. Salary and benefits are competitive. Submission of applications and nominations prior to July 1, 2000 is strongly encouraged. Applications should include a letter explaining relevant experience and a curriculum vitae.

We are being assisted in our search by Knott & Fery International. Inquiries, requests for additional information, nominations and applications may be directed in total confidence to:

The City University of New York, an Equal Opportunity/Affirmative Action Employer with a strong commitment to racial, cultural and ethnic diversity, actively seeks and encourages nominations and applications from men and women of all races and ethnic backgrounds.

UIC
UNIVERSITY OF ILLINOIS AT CHICAGO
Urban Health Program

TITLE: Director of Public Relations and Marketing

The University of Illinois at Chicago (UIC) is the large institution of higher education in the Chicago area, one of the top 70 research universities in the United States, and is included in the scientific and academic research community of a major academic center.

UIC is an urban, land grant, research institution whose population reflects the diversity of the city. It serves a resident, as well as a large community population of students. Over a quarter of its undergraduates are over the age of 22. Many students are among the first generation in their family to attend college. To realize its mission, UIC seeks to involve itself in the educational, cultural, community, or economic life of Metropolitan Chicago.

In 1978, UIC created the Urban Health Program (UHP) to recruit, retain, and graduate students from minority groups underrepresented in the health professions. The program aims to provide assurance in improving health services delivery to ambulatory care facilities in underserved areas.

The ultimate goal is to train a cadre of minority health professionals and clerical and masters degree students dedicated to improving the quality of health care when improved health services are most needed. For more information about UHP, please visit our website at http://www.uic.edu/depts/urbanhealth.

The Director of Public Relations and Marketing reports to the Associate Provost and Executive Director, Urban Health Program, Office of the Provost and Vice Chancellor for Academic Affairs. The Director initiates and develops collaborative relationships to enhance the Urban Health Program efforts toward the recruitment and retention of students from historically underrepresented groups in the health professions. The successful candidate works closely with the Associate Provost and Executive Director, Designate Urban Health Program college directors, UIC campus partners and staff to develop and maintain effective collaborative relationships with UHP and other campus offices.

QUALIFICATIONS

Applications from minority candidates are encouraged. The Director of Public Relations and Marketing must possess:

- A Master's degree and a minimum of five years of broad experience in public relations or marketing, promotion, or related field in higher education.
- Excellent written, editing, organizational, interpersonal, and administrative skills.
- A minimum of five years of broad experience in public relations or marketing, promotion, or related field in higher education.

APPLICATION INFORMATION

Interested candidates should send a letter of interest, current vitae and three letters of reference to Telephone numbers and email addresses to:

Cheryl, UHP Committee
Director of Public Relations and Marketing
University of Illinois at Chicago
840 South Wabash Street (MC 967)
Chicago, Illinois 60612-7131

A review of applications will begin immediately and continue until the position is filled.

Responsibilities include teaching courses in reading and math intervention strategies, developing and maintaining positive working relationships with parents and students, and participating in professional development activities. Salary: $32,703 - $57,049.00

ASSOCIATE OR ASSOCIATE PROFESSOR OF SPECIAL EDUCATION  
Deaf/Blindness

The Department of Special Education is seeking an associate or assistant professor of deaf studies. This is a tenure track position in a graduate program. Candidates must have a Ph.D. in special education with a focus on deaf education and be able to demonstrate a commitment to scholarship in their discipline. Responsibilities include teaching courses in deaf education, counseling students, and participating in professional development activities. Salary: $32,703.00 - $57,049.00

For both of the above positions, submit a letter of interest, curriculum vitae, and a list of three references to: Professor H., College of Education, University of Kentucky, Lexington, KY 40506.
**UIC**

**UNIVERSITY OF ILLINOIS AT CHICAGO**

Urban Health Program

**TITLE:** Director of Student Programs and Assessment

The University of Illinois at Chicago (UIC) is the largest institution of higher education in the Chicago area, one of the top 70 research universities in the United States, and an increasingly significant center for education, research, and public service. UIC is an urban, land grant, research institution whose population reflects the diversity of its setting. It serves a resident, as well as a large commuter population of students. Over a quarter of its undergraduates are over the age of 22. Many students are among the first generation in their family to attend college. To realize its mission, UIC seeks to involve itself in the educational, cultural, community, and economic life of Metropolitan Chicago. This goal has made the University particularly aware of the need to ensure that many voices that comprise this larger community are heard and needed within the University's own population.

In 1978, UIC created the Urban Health Program (UHP), to recruit, retain, and graduate students from minority groups underrepresented in the health professions. The program also aims to provide assistance in improving health services delivered to underserved communities. This is accomplished through several strategies: it increases the supply of minority health professionals by providing graduate and professional education; it establishes loan repayment and scholarship programs for minority students; it conducts community outreach programs; and it conducts research on health disparities. The University is committed to diversity and inclusion, and the Urban Health Program is a key component of this commitment.

The Director of Student Programs and Assessment reports to the Associate Provost and Executive Director of the Urban Health Program, Office of the Provost and Vice Chancellor for Academic Affairs. The incumbent provides assistance and advice on all phases of administrative management, program operations, and the formulation and implementation of policies and procedures for UHP. The Director oversees and directs all aspects of student recruitment and retention initiatives for the Urban Health Program, including the management of all student resources, faculty recruitment, and student services. The Director is responsible for the oversight of all aspects of the Urban Health Program, including the development and implementation of policies and procedures for student recruitment, retention, and assessment. The Director of Student Programs and Assessment must have excellent written and verbal communication skills, as well as the ability to work effectively with a diverse group of individuals.

**QUALIFICATIONS**

Applicants must possess a Master's degree (or equivalent) in a related field. Candidates with a minimum of five years' experience in the management of a major administrative program with diverse populations at the university level will be considered. Ideal candidates will have strong interpersonal skills, excellent verbal and written communication skills, and the ability to work effectively with a diverse group of individuals.

**APPLICATION INFORMATION**

Interested candidates should send a letter of interest, curriculum vitae, and three letters of reference with telephone numbers and email addresses to:

Cherie N. Hays
Director of Student Programs and Assessment
740 South Wood Street (MC 967)
Chicago, Illinois 60612-7313

Review of applications will begin immediately and continue until the position is filled.
Executive Director, Business-Higher Education Forum

The Business-Higher Education Forum, a partnership of the American Council on Education and the National Alliance of Business, invites expressions of interest in, and nominations for, the position of Executive Director.

The Forum is located at the offices of the American Council on Education at 1 Dupont Circle in Washington, DC.

The Executive Director will be expected to:
- identify, plan, and manage the development of major programs that comprise the Forum’s agenda and services, the chief staff spokesperson;
- establish Forum meeting agendas and priorities;
- recommend strategies for implementing the general program directions and priorities and following through on their execution;
- plan fundraising strategies and solicit grants and contributions;
- act as the Forum’s primary representative to a wide range of national and international organizations;
- play a central role in identifying and recruiting potential Forum members and sustaining the active involvement and engagement of each Forum member;
- assume overall responsibility for the operations, staffing, and budgeting of the Forum;
- ensure that the business and higher education sectors are actively engaged in the development of issues and agenda.

The ideal candidate will have meaningful experience in, and tangible understanding of, the academic and the corporate communities and the issues that are of similar interest. The Executive Director should have superior oral and written communication and collaborative skills that will facilitate meaningful dialogue among corporate CEOs and university presidents and chancellors. This person should be creative and strategic in considering the future products and activities of the Forum.

The Executive Director must be a person with strong self-confidence and professional accomplishments that will be respected by the member representatives. Ideally, one will have had previous experience in a leadership position in either the corporate or academic environment.

The American Council on Education is an EOE/AA/V/disabled employer.

All correspondence should be directed in confidence to the American Council on Education’s executive recruitment consultant:

INSTITUTE FOR URBAN AND MINORITY EDUCATION

DIRECTOR

Teachers College, Columbia University is the largest and most comprehensive graduate and professional school of education in the U.S., offering graduate degree programs in more than 60 areas of study across education, psychology, and health. Its mission has historically been and remains rooted in extending access to underrepresented populations. For the past 25 years, the Institute for Urban and Minority Education (IUME) has served urban schools and been the cornerstone of the College's efforts in research, dissemination, and staff development focusing on urban and minority education.

Responsibilities: Develop and carry out a program of research, consultation, and technical assistance; organize a program to enable masters, doctoral, and post-doctoral students to conduct research and demonstrate strategies for improving urban education; and, design professional development and other public outreach programs. Focus on research to narrow the achievement gap between poor, immigrant, children of color, and other students in urban schools.

Qualifications: Earned doctorate, with extensive experience in urban education. Consideration given to candidates with either a research and/or practice background. Evidence of research and professional productivity in the area of urban education, especially as it relates to children of color.

Rank: Director. Professorial appointment at the rank of associate or full professor, if appropriate.

Review of applications will begin May 1, and continue until the search is completed.

Send: CV, letter of intent, including a statement of research and teaching interests and three letters of reference, to: Dr. Erwin Flaxman, Teachers College, 525 West 126th Street, Box 75, New York, NY 10027.

**The George Washington University**

**Executive Director of Planned Giving Programs**

The George Washington University seeks an experienced development professional to lead its Planned Giving activities. Reporting to the Associate Vice-President for Professional Development, the successful candidate will have strong communication skills, seven years experience in planned giving, proven management and strategic planning skills, an understanding of market segmentation and marketing, and an enthusiasm for front-line major gift fund raising. You will work independently, managing portfolio of prospects and donors while directing the planned giving marketing program and supporting the major gift activity of the University-wide development staff.

To be considered an applicant, it is necessary to have a Bachelor's degree in Business Administration, related field, or an equivalent combination of training and experience is required. An advanced degree is preferred. Knowledge of estate and tax laws as they pertain to planned giving is necessary. Salary commensurate with experience.

Requisition Number: R7998.

The George Washington University offers an outstanding compensation and benefits package that includes generous tuition benefits for employees, spouses, and their dependent children. For consideration please forward your resume with cover letter that states your salary requirements and lists the position requisition number to: Charles J. Curtin, GWU Human Resource Services, 2033 K Street, NW, Suite 220, Washington, D.C. 20052, E-mail: curtin@gwu.edu. Fax 202-994-9609, TDD 202-994-9609.

Please see The George Washington University Human Resource Services web page at www.gwu.edu/employ.html for all job openings and application online forms.
THE UNspoken Divide AMONG HISPANICS

In many cultures, it is impolite to talk about race. The topic begs uncomfortable questions. But ignoring racial issues does not make them disappear. Silence gets in the way of resolution.

“Hispanic” is often used as a racial category, a census shorthand broadly designed to identify Latin American immigrants and their descendants.

But such immigrants might also be white, Black, American Indian, or even Asian; many have more than one ancestry. And “race” is itself a meaningless concept, a biological fallacy. DNA evidence reveals no race-specific genes and few genetic differences. Skin colors merely reflect adaptations to variable sunlight. Variation is continuous, not abrupt: one cannot draw clear lines between groups.

Race consciousness, however, is real, arising out of social contexts in which color defines access. Its long history is not confined to the U.S. Throughout Spain and Latin America, the color of conquerors and the conquered coded power and created hierarchies based on degrees of European, African, and Amerindian ancestry. In the U.S., these racial messages often have been accentuated and further distorted in a system that puts white English-speakers at the top.

A precarious Hispanic unity challenges this assignment, but often fractures internally along similar lines. Tales of prosperous Cubans in Florida invite contrasts with depictions of poverty among Puerto Ricans in New York or Mexicans in Texas. Media stereotypes and differential treatment by the INS underscore differences. Within nationalities, those who are darker confront added barriers to acceptance, not only by the host society, but among their own compatriots.

The popular image of Cuban Americans is that they are white. The demographic history of Cuba is somewhat evenly divided between Africa and Spain, with a large degree of admixture and broad range of appearance. The exile population in the U.S. is disproportionately white, but racial diversity exists nonetheless in Miami, New York, Tampa. Relations between black and white Cubans—or the lack thereof—illustrate the painful contradictions of race in Hispanic ethnicity.

Cubans arrived in Tampa in the 1880s. They formed an immigrant enclave whose descendants are still a large part of the population. Cigar workers black and white, sought exile in Florida while they mobilized the revolt against Spanish rule in Cuba. The war for independence forged the solidarity between black and white Cubans, reinforced by the egalitarian vision of José Martí and the legendary courage of black soldiers such as General Antonio Maceo. The war’s end in 1898 coincided with the rise of Jim Crow in Florida, a juncture that adversely affected Cuban solidarity in Tampa. In 1900 black and white Cubans split into two organizations—El Círculo Cubano (white) and La Unión Martí-Maceo (black). That division remains.

This divide illustrates the dynamics of racism, both within Hispanic communities and in relations with the host society. Separation of Cubans by color was justified by the severe pressures of racism in the U.S., though some argued that it harmed Martí’s legacy. There are few written testimonial records about the split; it was torn from memory and rarely discussed.

For the next 100 years, the two organizations defined socially separate communities, helping mainly themselves and not each other. Many white Cubans prospered over time; most Afro-Cubans did not. In the ’60s, Afro-Cubans joined African Americans in civil rights marches and sit-ins. Urban Renewal demolished the Afro-Cuban social hall, but left the white Cuban hall intact.

Over decades, disparities in treatment and access widened the divide. The death of the elderly revolutionists, the demise of the cigar industry, Urban Renewal’s destruction—all eroded the shared historical ties. Yet both organizations have survived, now nearly five generations later.

This centennial year of the split in 1900 has brought an unusual joint celebration (funded by the Florida Humanities Council)—with programs held at both clubs and opportunities to examine common and separate histories. Departing somewhat radically from conventions of silence Tampa’s black and white Cubans are exploring the roots and consequences of their racial separation. These small steps might disclose valuable lessons for other “Hispanic” communities, where unspoken divisions make common purposes more difficult to mobilize.

For more information, see www.cas.usf.edu/anthropology/Marti-Maceo.
Latino Issues Transcend Borders
The University of Wisconsin-Madison invites nominations and applications for the position of dean of the School of Human Ecology.

The dean of the School of Human Ecology is the chief academic and executive officer of the school, with responsibility for strategic planning, personnel, curriculum, academic affairs, research-budget, fund-raising, community and alumni relations, and physical facilities. The free-standing School of Human Ecology has a strong interdisciplinary tradition both among the academic units in the school and through collaborative programs with other campus units. Its interdisciplinary resident and extension programs and its strong outreach are consistent with its land-grant history and the campus-wide vision of future scholarship directions. The dean serves on the intercollege council for the arts and humanities and the graduate program in continuing and professional education, the cooperative extension dean's council, the agriculture and natural resources consortium, and as an assistant academic program director in the Wisconsin Agriculture Experiment Station.

The School of Human Ecology currently offers undergraduate and graduate programs in a range of fields offered by its five academic units: consumer science, human development and family studies; environment, textiles, and design; interdisciplinary studies; and family and consumer communication. The School has established a series of new programs and center for research. The School has approximately 300 undergraduate and graduate students, 120 faculty and staff, and a budget of $5.4 million. Information about the School can be accessed at https://humanecology.wisc.edu.

Major qualifications for the position include: a proven record of administrative skills and successful leadership in higher education; academic accomplishments as a scholar and teacher that meet the standards for a tenure track position as full professor at the University of Wisconsin-Madison; strong communication and fund-raising skills; the capacity to relate effectively to the university administration, faculty, staff, students, and other university units; a commitment to excellence and the quality of undergraduate and graduate instruction, research, outreach, extension, and public service; and a demonstrated commitment to diversity. The successful candidate will be expected to represent the college through interactions with external groups such as alumni, industry, and other communities.

Applications and nominations must be received by 30 June 2000 to ensure consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations of women and persons of underrepresented groups. Applicants should include a current curriculum vitae and cover letter that addresses how their strengths match the qualifications for the position, and what they see as challenges and opportunities of the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of the finalists who will be interviewed by the chancellor. Submit applications and nominations to:

American Council on Education

SEVENTEENTH ANNUAL
STATUS REPORT

From the American Council on Education's Office of
Minorities in Higher Education
Produced with a generous grant from The G.E. Fund

The Seventeenth Annual Status Report on Minorities in Higher Education, authored by Deborah J. Wilds, former Inter Director of the Office of Minorities in Higher Education, presents the latest available data on the progress of American Indian, African Americans, Hispanics, and Asian Americans in postsecondary education. This annual study is widely recognized as the major national source of information on trends and issues related to minorities in higher education.

This year's special focus entitled "Research on the Benefits of Racial and Ethnic Diversity" examines the impact of racial and ethnic diversity within higher education, on business, and on the economy. Empirical evidence is mounting that suggests strongly held belief that diversity advances the mission of colleges and universities. This year's special focus discusses a growing body of research that demonstrates that racial and ethnic diversity is of benefit to individuals, colleges and universities, the economy, and society. This section also emphasizes the importance of institutional context and climate in optimizing the benefits of racial and ethnic diversity in higher education. The co-authors of the special focus section are Kenji Hakuta, Professor, School of Education, Stanford University and Jeffrey Mire, Assistant Professor College of Education, University of Maryland.

The report includes the most recent data on:

- High School Completion: Rates; College Participation; Educational Attainment Rates; Enrollment and Degree Completions; and Minority-Serving Colleges and Universities
- Historically Black Colleges and Universities: College and Enrollment by Race/Ethnicity; Degrees Conferred by Race/Ethnicity; Degrees Conferred by Field of Study; College Graduation Rates; Employment in Higher Education

Order your copy of the Seventeenth Annual Status Report by calling (303) 640-9000. The cost of the report is $24.95 per copy, plus $3.50 shipping and handling. Minorities in Higher Education

Working Our Way through College

BY GUSTAVO A. MELLANDER

Yesterday's Legends

American higher education folklore is laden with stories of youngsters, usually country farm boys, arriving at college without money but eager to acquire an education.

Luckily they were able to find employment right on the campus and indeed work their way through college à la Horatio Alger. It is not all fiction. Many a youngster worked in the cafeteria or on the college grounds. Some university buildings were actually built with student labor, as were the early buildings of Inter American University.

One powerful United States senator is quick to point out that he arrived at his college without any resources at all. He went to see the president and said that he wanted to study but did not have any money. He was hired as a janitor and retained that position during his baccalaureate years. Senator Robert Byrd doesn't believe it hurt him at all.

Many others were able to work their way through college, whether it be in the nation's large cities or in its rural college towns. There was a certain élan to working oneself through college.

More important, it was possible. Many of those fellows, and most were males, went on to enormous worldly successes. But those intrepid students were always in the minority. Until the 1950s, colleges were for the well-to-do or the very bright who received scholarships.

The New Reality

There has been a change in the past ten years. Faculty members were the first to notice it. More and more students were working full-time while attending college full-time. Grades suffered. Pressures built not only on the students but on the faculty as well. It soon became apparent that some students were taking an inordinate amount of time to graduate. Many never did.

People wondered what it all meant. A few student affairs types began to collect anecdotal data. Recently the American Council on Education conducted an in-depth study on working and going to college.

Many will be surprised to discover that their major finding was that white or minority, rich or poor, male or female—most students attend college part-time and work long hours while they are enrolled. That jeopardizes their chances of completing a degree. The key and operative word is "most." Most students attend college part-time and work long hours.

Money Matters

Colleges have indeed changed. The ACE study is entitled Money Matters: the Impact of Race/ Ethnicity and Gender on how Students Pay for College. It is revealing and posits the need for us to re-think what it means to go to college in this historic year.

Further, the report identifies background characteristics that influence how students finance their education and the impact of students' choices—such as whether to borrow or work full- or part-time—on their academic success. These are critical decisions, and one's lifetime professional trajectory is fashioned by how one can answer those questions.

"Students' choices influence both the price of students' education and how they pay the price," according to report author Jacqueline King, ACE's director of federal policy analysis. For example, "students reduce the immediate price of attending college by choosing lower-priced community colleges, attending part-time, and working." However, data show that regardless of income profile, most students are not exhibiting the behaviors that contribute to student persistence and academic success—enrolling full-time and devoting most of their time to studying. Instead, most students of all races and ethnic groups attend college part-time and work full- or part-time.

Among the Findings

Whites: More than half of white college students are female; more than half are 25 or younger (28 percent are age 30 or older); 44 percent attend community colleges, and 50 percent attend four-year institutions; 33 percent work full-time to meet their college expenses (47 percent work part-time); and 26 percent take out student loans each year.

Hispanics: 45 percent of Hispanic students are women; 59 percent are 23 or younger; 60 percent attend community colleges; almost 40 percent work full-time (43 percent work part-time); and 21 percent take out loans.

African Americans: Two-thirds of African-American students are women; half are age 24 or older; 50 percent attend community colleges, and 40 percent attend private or public four-year colleges or universities; 40 percent work full-time (41 percent work part-time); a one-third borrow in a given year.

Asian Americans: The Asian American student population split evenly between men and women; almost two-thirds are years old or younger; 58 percent attend four-year institutions; only 48 percent work full-time (48 percent work part-time); and one-quarter take out student loans.

Native Americans: Three out of five students are female; 41 percent are age 30 or older; three out of five attend community colleges; percent work full-time; and 24 percent borrow in a given year.

Gender: Female students are more likely than male students to be older, have dependents, and have low income. They are less likely to work full-time and take student loans.

Male undergraduates are more likely to be independent and come from mid- and upper-income families.

Times have changed. Going to college is very different for people than it was even 25 years ago. These developing trends probably continue.

Copies of the report are available for $15 from ACE at (301) 69073, fax (301) 604-0158.

“NAFTA DBA” Takes Shape along Southwest Border

Developed by Academics in Mexico, Canada, and the U.S.

by Anita J. Gomes

What do you get when you bring together faculty and administrators from universities in Canada, Mexico, and the United States and ask them to develop a doctoral program to meet the needs of Mexican business faculty in northern Baja California?

Some might call it a NAFTA DBA.

Others might call it simply an innovative solution to a series of challenges. As a result of some creative problem-solving, a Mexican national initiative has had very positive impacts on faculty at several institutions in three countries.

Among the initiatives set forth by Mexican President Ernesto Zedillo early in his presidency was the goal of increasing the number of doctoral-qualified faculty at Mexican colleges and universities. The Mexican Ministry of Education, Consejo Nacional de Ciencia y Tecnología (CONACYT), and the Asociación Nacional de Universidades e Instituciones de Educación Superior (ANUIES) took leadership roles in assuring that mechanisms were in place to provide support to institutions wishing to undertake this challenge.

In the same vein, under the leadership of Rector Enrique Carrillo and Vice President Fernando Leon Garcia, Baja California’s CETYS University established an institutional goal of raising the percentage of its full-time faculty with the doctoral degree.

Carrillo and Leon made a commitment to respond to both the national initiative and their own institutional goal in a proactive manner and focused their initial efforts on the doctorate of business administration (DBA) and doctorate of engineering (D.Eng.). Because of a previously existing cooperative relationship with San Diego-based United States International University, Leon and Carrillo contacted USIU early on in their planning to discuss opportunities for collaboration. USIU is a private, independent university that is well known locally for its high quality doctoral programs in business, psychology, and education, among other degree offerings.

USIU President Garry Hays and Mink Stavenega, dean of USIU’s College of Business Administration, were receptive to the opportunity right from the start. “Collaboration between CETYS and USIU has been occurring for a number of years, since the signing of an agreement to cooperate in 1997,” said Hays. “The doctoral program is one very successful aspect of a broader cooperative relationship between the two institutions. We were certain that USIU’s expertise in doctoral education, coupled with the commitment demonstrated by CETYS to making this project work, would assure the success of this program,” Stavenega added.

A series of early conversations led to the development of a consortium of North American institutions, headed by CETYS, with the aim of offering a
tri-national doctoral program in business for faculty along the western-most part of the U.S.-Mexico border. In addition to USIU, other participating institutions include Arizona State University, San Diego State University, and Concordia University of Montreal. A similar consortial relationship was formed between ASU, the University of Toronto, University of Victoria, and University of Arizona to offer the D.Eng. to CETYS engineering faculty.

"While the DBA will be awarded by CETYS, one of the major benefits of this program is that our faculty have access to and input from professors at a number of different institutions as they progress through their coursework," stated Fernando Leon, CETYS vice president and a driving force behind the effort to develop the collaborative DBA program.

He notes, also, that "Efforts such as these essentially constitute part of the wave of the future in terms of international collaboration, doctoral programs, and responsiveness to context, all within a reasonable framework of academic quality."

An initial start-up grant of $12,500 from the American Council on Education (ACE) and ANUIES, which is ACE's Mexican counterpart, provided the seed money to facilitate initial planning and implementation of the program. Stavenga and Leon serve as the institutional representatives for the ACE-ANUIES grant and as lead administrators of the joint doctoral program.

"We definitely view this collaboration as a steppingstone in the development of alternative models for doctoral education as well as a test bed for future multinational educational partnerships," offered Stavenga.

"USIU has, to some extent, served a cross-border constituency with its business programs for some time," stated Stavenga. "Working with CETYS on this NAFTA DBA has been one very successful aspect or our general efforts to enhance USIU's bi-national presence."

Not coincidentally, in addition to its main campus in San Diego, USIU also has campuses in Mexico City and Nairobi, Kenya, and has long been committed to multicultural-multinational education.

The ACE-ANUIES grant, which was one of only five approved for 1998-1999, provided funds to establish and implement the appropriate curriculum, policies, and standards of quality typical of programs of this nature. A unique aspect of the project is that the degree program is being offered through a combination of face-to-face, online, and other distance learning technologies, such as video conferencing.

As part of the grant, USIU and CETYS held initial meetings to bring together representatives of participating consortium members. One such meet was held in San Diego, and another took place at ASU in Tempe, Arizona.

To date, 16 students, most of them current business faculty at CETYS campuses in Mexicali, Tijuana, or Ensenada, are enrolled in the collaborative DBA program. They are moving through the required coursework in a cohort group, and are approximately halfway through the program.

CETYS is supporting its faculty participants in a variety of ways. The University is paying 100 percent of their tuition and fees and has made course release time to assure that faculty members have sufficient time devote to their doctoral work.

Since the DBA program was designed for CETYS professors, the curriculum includes a course on pedagogy and another on information technology in higher education. "These courses are aimed at refreshing, polishing their knowledge and practice of teaching methods, as well as different state-of-the art tools that can be used to enhance learning," no CETYS vice president Leon.

Scott Venezia, professor of business at CETYS' Ensenada campus, notes a number of benefits of participation in the program. "One of the most important aspects of the program is that we are immediately able to apply what we are learning to our work. We gain control over our class refine our teaching methods, and enhance our curriculum."

Students choose to pursue concentrations in strate management or international business. USIU is the lead consortium institution for the strategic management emphasis. With its global reputation in this discipline, it was a natural fit. Igor Ansoff, who is known worldwide as the father of strategic management, is the founder of USIU program, and graduate students from throughout the world have been attracted to the university to study under Ansoff and his colleagues.

"USIU's involvement has been crucial to this effort in particul because of its expertise and established tradition in strategic management," stated Leon. Concordia University of Montreal has the leadership role in the international business concentration. Leon noted that "Five to the success of the international business emphasis has been the support provided by my counterpart at Concordia, Jack Lightstone, vice rector academic affairs, as well Jerry Toberlin, associate dean of commerce, and Terri Lituchy, professor of international business."

Many of the courses are offered on-site in Mexicali and Tijuana; m
A number of program participants have ties—direct or indirect—to border area *maquiladoras*. In addition to their teaching responsibilities at CETYS, several serve as consultants or administrators with the manufacturing plants. With this in mind, the DBA program was designed to provide an opportunity to produce practical, usable research.

As the 16-student cohort group approaches its final classes in the summer of 2000, the dissertation process will soon be under way. While there is a significant level of emphasis on honing academic research skills, the dissertation process will focus on applied research.

"It has been a great pleasure to observe the professional development of the faculty participants," stated USIU's Stavenga. "Their research and teaching skills have improved markedly during the course of their doctoral work, and many of them have experienced the added benefit of a truly multicultural learning environment."

Student Scott Venezia agrees. "The strong focus on research has broadened our horizons and has made us tap into issues that are relevant for our university's environment. Bilingual collaborations have evolved since the program started, and we are now joining hands with professors in both the U.S. and Canada to research areas of mutual interest and benefit."

USIU and CETYS administrators agree that the program has been an overwhelmingly positive experience. CETYS coordinator of business programs Carlos Rodriguez notes two benefits of particular note: "First, there is the direct benefit of keeping our outstanding professors on faculty while they pursue the doctoral degree. Our students have better educational experiences because the faculty is gaining knowledge and skills as they progress through the DBA program. Also, we benefit from the post-DBA commitment of at least two years to which each participant has agreed."

The third intensive summer course is planned for summer 2000 in Amsterdam in the Netherlands, with the aim of assuring that the cohort also gains a European Union perspective.

CETYS faculty members were selected to participate in the DBA program through a competitive selection process. The 30 faculty applicants were evaluated based upon their level of academic preparation, English proficiency, and a personal interview. All program coursework is in English, mandating a substantial level of fluency for success in the program. Additionally, participants were required to commit to remaining on the CETYS faculty for at least two years following the completion of the DBA.

Of the 16 current students in the collaborative DBA program, 13 are CETYS faculty. The other three are business people in the Calexico-Mexicali community who are pursuing the doctoral degree for personal reasons or professional advancement outside of higher education. One such student is Ernesto Duarte, whose employer—a Mexicali *maquiladora*—is paying his tuition and fees.
Rodriguez, who also holds a DBA from USIU, earned prior to the commencement of this collaborative degree program, continued. "The cross-cultural nature of this particular doctoral program is, perhaps, unsurpassed. Our professors will be at least one step ahead of most others in their ability to teach and learn in a multicultural environment."

USIU Professor M. Krishnamoorthy, who taught global information management to CETYS faculty last year, noted, "I thoroughly enjoyed teaching this elite group and in the process learned a great deal. That is the beauty of education: The more you give, the more you learn."

Launching and sustaining this tri-national DBA program has not been without its challenges, however, notes USIU's Stavenga. "Professors teaching in the program have pointed out that there is a considerable range of academic preparation and of English proficiency among the students." This, despite the requirement that participants hold the master's degree and have a TOEFL score of at least 550.

"Additionally," Stavenga commented, "the distance between the campuses has provided some challenges to recruiting faculty to teach the courses." Technology has helped in some instances, but most of the courses have consisted of faculty from USIU and other consortium institutions going to Mexicali, which is approximately two hours, by car, from San Diego, to teach. Many of the classes have been scheduled for weekends to accommodate the professors' needs and the students teaching schedules at CETYS. Additionally, CETYS has borne meal and lodging expenses incurred by faculty.

Stavenga concurs, however, that the benefits have far outweighed any difficulties that might have been experienced. "Our faculty members who have taught in the program are unanimous in their praise of the experience. They've commented that they are proud to be contributing to the development of fellow academics and are, themselves, benefiting from the cross-cultural nature of the teaching-learning environment."

The first group of graduates is expected to complete the program in 2001, at which time prow will present a doctoral work in business faculty. CETYS is also involved in the development of a similar consorntial program. This program will launch in the future, with a number of students in the University of A Concordia Unives de Murcia from the University of A Concordia Unives de Murcia from the University of A Concordia Unives de Murcia from the University of A Concordia University, and Universitas de Murcia.

A start-up grant of $12,500 from the American Council on Education (ACE) and ANUIES, which is ACE's Mexican counterpart, provided the seed money for initial planning and implementation.

Anita J. Gomes, executive assistant to the president and director of public relations at United States International University, was appointed to the faculty of the Institute for Inter-Institutional Relationships with UNIVISI in Mexico.
The Ivy League Review: Part Four

Harvard, Cornell Universities and Dartmouth College

by Mari Carmen Sarracent

Many of the Ivy League schools, long recognized for their standard-setting intellectual contributions to society—developing the very fabric that makes up the United States—date back to the founding of this country. Hispanics are finally finding a place there.

It is an honor to discuss Hispanic admissions, affirmative action, unprecedented events and Latino accomplishments at these traditionally white-dominant universities. It reveals that people of color are gradually making inroads, and not just as token representatives. That they are considered equally qualified by their accomplishments and future potential as leaders in this country, not just as individuals of Hispanic heritage but as Americans.

This article appraises three academic giants in the Northeast—Cornell University, Dartmouth College, and Harvard University. All three ranked high in U.S. News’ Best College Rankings. Harvard was number two after California Institute of Technology. While they were not in the top tier for graduating Hispanics, the Ivy League schools were among the distinguished institutions included in the Top 100 list for the number of degrees awarded to Latino students.

Harvard University

Assessed as one of the most selective schools in the United States, Harvard, as are Cornell and Dartmouth, also is one of the oldest. It was founded in 1636. Total undergraduate enrollment (full-time) is 6,692, of which Hispanics represent eight percent. Asian-American students are the largest minority group enrolled, standing at 47 percent; whites, 59 percent. The four-year graduation rate is 86 percent, and the average six-year graduation rate is 97 percent.

Data on degrees conferred by student ethnicity for the 1998-99 academic year reveal that Hispanics totaled 375 or six percent. Whites numbered 2,816 or 42 percent. These data include degrees awarded in all Harvard schools, including Graduate School of Arts and Sciences (GSAS), Business, Dental, Education, Law, and Medical.

GSAS is recognized for its commitment to having a diverse student body. The W.E.B. Du Bois Graduate Society (named for the first Black student to receive a doctorate from Harvard) was founded “to minimize the frustration and isolation commonly associated with graduate school.” The society sponsors activities such as orientation meetings, student-faculty panels as well as social events.

Harvard also publishes Smooth Transitions and the Minority Student Newsletter that help keep students of color in touch with university resources.

This fall, Harvard’s fairly new Interfaculty Committee will host a major conference dedicated to promoting the scholarly study of the Latino population in the United States—Latinos in the 21st Century: Setting the Research Agenda. The committee, composed of members of the faculty of Arts and Sciences and five of the professional schools, forms part of the David Rockefeller Center for Latin American Studies. Professor of Education Marcelo Suarez-Orozco is the committee’s chair.

One of the issues atop this group’s list is the recruitment of senior faculty in Latino studies and the subsequent development of a Latino Studies academic department. One student quoted in the Harvard University Gazette commented on this issue, “I can’t write a dissertation in a year. Junior faculty are great for classes, but if you can’t be sure someone is staying, the whole next generation of Latino scholarship is likely to suffer.”

Faculty data for the fall of 1996 indicated that in the Faculty of Arts & Sciences senior faculty surpassed those in junior positions: 419 professors, 79 associate professors and 113 assistant professors. To foster diversity among the teaching ranks, in 1995 the Faculty Development and Diversity program was conceived and was followed by other support programs such as the Minority Faculty Development Program and Women in Academic Medicine.

Four years later, the issue of diversity representation still is on the table. Late in 1999, the Office of the Assistant to the President and the Workforce Initiatives Unit within the Office of Human Resources sponsored a conference to explore diversity of university staff.

Winthrop Professor of History Stephanie Thernstrom, who is a strong proponent of meritocracy, commented that there is a tension between diversity and recruitment based solely on merit. Others argued that those making a decision based on merit alone tend to choose people like themselves, which can often inhibit, rather than foster, diversity. President Neil L. Rudenstine opened the conference asking “Why does diversity matter?” At the conclusion of the conference, he stated, “It’s an effort that’s well thought-out, extremely professional, and that has resources behind it to make it work. We’re at the beginning.”

Cornell University

An ongoing wave pushing efforts to increase diversity on campus and in lecture halls also is undulating at Cornell University, Ithaca, New York. Hispanic undergraduates represent six percent of the 13,442 full-time undergraduate population. And unfortunately, students in the ’98s
and in the new millennium have not been able to escape like-experiences, such as race-related discrimination and violence, faced by students of color in the ’60s.

Consequently, last year the faculty senate was charged with addressing the campus climate at Cornell and voted in February to approve a resolution on campus climate and to reformulate the Committee on Minority Education. Cornell President Hunter Rawlings issued a public statement in which he said, "...There is no place for racist attitudes in a university that espouses the enlightened use of reason to pursue humanist understandings and scientific truth... It is important to remember the principles [of Martin Luther King] held and he set. His dream of racial justice is one that we should all help this university and this country to realize by our words and our actions... Cornell stands for reasoned thought, sustained and informed discussion, constructive engagement, and freedom of responsibility. Let's leave that legacy for the next generation."

Many initiatives and programs with diversity in mind have been forthcoming. The Latino Studies Program is one. Pedro Caban, a visiting professor of government and the program's director, notes that to evolve, the program will need support from the administration, faculty, and students. Caban stated, "At Cornell, we have the resources, the location and the context to start building an integrated and intellectually challenging Latino studies curriculum that will expand educational opportunities—not just for Latino students but for all students.”

Philip Lewis, dean of the College of Arts and Sciences, and Biddy Martin, senior associate dean of the college, issued a statement regarding Caban's appointment: "...under Caban's leadership... it will be possible to overcome the conflicts among participants in the program... And to establish plans for the program's future."

Most recently the Latino Studies Program announced the winners of its first undergraduate Latino Studies Research Grant Program. Each winner received $500. Caban, the Program director, stated, "The grant program will strengthen the LSP's academic mission by expanding the opportunities for students to undertake Latino-related research.”

The award recipients are: Nadia Huancahuari, Spanish literature and biology major, "Depictions of Female Interpreters of the U.S. Experience;" Michelle C. Perales, city and regional planning major, "Communities Organized for Public Service and Mexican-American Community Empowerment;" Cassandra Ramirez, urban and regional studies major, "Colonias in South Texas;" and Alvin Antonio Velázquez, government major, "Puerto Rican Migration to Chicago and Gentrification."

The National Science Foundation also lauded Hispanic students recently. NSF's Graduate Research Fellowships were awarded to 14 Cornell students. Martha L. Delcampo, one of the undergraduate winners, is majoring in civil engineering. Each winner received a $16,200 stipend per year for full-time graduate study.

**Dartmouth College**

Its comparatively small undergraduate population of 4,023 (four percent Hispanics) has no bearing on Dartmouth's efforts to increase diversity at this elitist, educational enclave in Hanover, New Hampshire.

In October 1999, Dartmouth's Psi Chapter of La Unidad Latina, Lambda Upsilon Lambda Fraternity Incorporated, hosted the 1st Annual Noche Derada, a cultural event for the entire campus. Sociologist and professor Felix Padilla, who has conducted scholarly work on Latino culture and authored numerous books, was invited to speak. A mariachi band, and The Welfare Poets, a poetry collective that began at Cornell in 1993, were also invited to perform. The gala was held in observance of National Hispanic Heritage Month and was free of charge to students, faculty, administrators, and the Upper Valley community. Donations were accepted for a scholarship created by the fraternity to serve members of the Upper Valley community as part of its community outreach program.

In a survey of 1999-2000 examining instructional faculty and class size, the number of minority faculty was 61. Fifty were designated as full-time; 11, part-time. Total number of instructional faculty was 658. These data excluded instructional faculty in pre-clinical and clinical medicine, administrative officers, undergraduate, or graduate students who assist in the instruction of courses, faculty on leave without pay, and replacement faculty for faculty on sabbatical leave.

As of October 1999 the number of degree-seeking undergraduates is 3,998–Hi, Janis accounts for 203, Blacks 214, Native American 85, Asian, 392.

Dartmouth's renowned Tuck Business School prides itself as being a global school, as it is the educational home to students from diverse backgrounds. As part of its MBA program, students are required to work in teams, which will undoubtedly pair them with students who are different from themselves. Dean Paul Danos notes, "There is a tremendous opportunity for Tuck to be the business school in the United States that is a model for how you deal with diversity and inclusion. You can have a community of 500 people and if 500 people can't get together and deal productively with issues of diversity and inclusion, there is no hope for this nation. The nation has 250 million people, and they all have ways to escape. Tuck has 500 people with nowhere to go. There is really no separation between class and life out of class.”

The following quote encapsulates the challenge faced by all the institutions covered in this four-part series and their response:

"Given the histories of exclusion, we have to do everything we can to counterbalance that history."

In forthcoming issues, The Hispanic Outlook will continue to look at how Hispanics, students and faculty are faring at these elite institutions, as well as the challenges, misconceptions, issues and politics involved.
Prospects Poor for Immigrant Children

“Prepare...or let it destroy us.”

BY
GARY M. STERN

A recent demographic study, “Projected Social Context for Education of Children: 1990-2015,” written by George Vernez and Richard Krop of the Rand Corporation, suggests that the number of poor students in American schools will rise by five percent in 2015 over the 1990 census, and the number of Latino students whose parents are without high school diplomas will rise by nearly two million. Both projections present myriad ramifications for educators in the next decade. Thus far, the report has drawn little attention.

L. Scott Miller, director of the Task Force on Minority High Achievement at The College Board, a New York-based nonprofit education association, commissioned the Rand Corporation, a Santa Monica, California-based think tank on domestic policy, to write a study on the demographics of the student population by 2015. Knowing the composition of the class of students, its ethnic background, and the educational background of parents in the next decade and a half could help shape education policy. The results of this study, released in January, illuminate what kind of teachers should be hired and lead to a fuller understanding of what schools should be addressing to improve academic achievement. But unlike the Hudson Institute's influential “Workforce 2000” study, which projected Hispanics as the fastest growing minority group in the U.S. and generated publicity galore, this Rand study has gone virtually unnoticed.

Major findings of this study include the following:

The number of low-income youngsters in American education will rise from 17.7 million in 1990 to 18.6 million in 2015, an increase of five percent.

The number of Latino and African-American parents with little formal education will rise from 60 to 78 percent of the 7.8 million parents. Indeed, Latino parents without formal education will rise from 2.8 to 4.7 million by 2015. Nearly half of the children in this particular segment will hail from Latino immigrant families.

At the same time, 22 million American parents will have college degrees by 2015, up from 16 million in 2000. More than 2 million Hispanic parents in 2015 will have college degrees, nearly triple the 700,000 parents with college degrees in 2000, and African-American parents with degrees will rise to 17 million in 2015 from one million.

How was this study conducted? George Vernez, director of the Center for Research on Immigration Policy at the Rand Corporation, said that he and Krop started their research by reviewing 1990 census information. “We developed a model that traced students through the education process and projected that into the future,” he said. Using the 1990 Census, they extrapolated birth, death, and immigration rates to determine ethnic and class populations. “My main interest was to know and understand whether the gap between ethnic groups would increase or decrease in the future, given current trends to determine the education achievement gap, and whether the shift in the composition of population might alter the educational attainment of the labor force,” Vernez said.

Based on their demographic projections, Vernez asserts that the education gap between whites and Asians versus Latinos and African Americans is increasing. A higher percentage of whites and Asians will graduate from college and a lower percentage of Latinos and African Americans. The implication,
he said, is "if you want to educate African-Americans and Latinos, you will have to do more."

One of the key determinants influencing the educational achievement of students is the education level attained by their parents. Since more Latinos will be entering schools from parents without a high school or college diploma, more money will have to be spent on Latino students' education to compensate for the parent's lack of educational achievement.

Miller is concerned. "Even if students show up in kindergarten speaking English, their parents won't have strong proficiencies in English. One of the first implications is that we need more early childhood programs for disadvantaged students," Miller said. Indeed, he can envision a host of educational improvements that could be employed to address this educational gap. He'd like to see English immersion in kindergarten classes, hiring larger numbers of bilingual teachers, and special training for teachers to make them more culturally attuned to Latino students. Most of these Latino students will be concentrated in urban areas in New York, California, Texas, Illinois, Florida, New Jersey, and Pennsylvania, and efforts must be focused in these states.

"The major finding of the report is the large increase in the population of Latinos who immigrated here and whose parents have little education," said Professor Eugene Cota-Robles, co-chair of the Task Force on Minority High Achievement and a professor emeritus of biology at the University of California at Santa Cruz. "These students are falling behind at a very early stage. Many of them were born in the U.S., but their parents are poorly educated and can't help them," notes Cota-Robles. He'd like to see an intensified Head Start program that offers these students the education resources that their parents can't provide.

The Rand Corporation study shows that Mexican Americans will require more education assistance than any other Latino groups since fewer Mexican Americans are college graduates compared to other Hispanic groups, says Miller. If Mexican Americans are removed from census statistics, nearly 80 percent of Latinos graduated from high school in 1990 he noted. Yet Vernez noted American education is doing a speculative job with almost all groups but immigrants.

Based on the 1990 census, excluding immigrants, 90 percent of whites, 87 percent of African Americans and 80 percent of Hispanics graduated from high school. The implication is clear: we need to do much more to strengthen the education of immigrant students entering our schools.

Despite the five percent increase in poorer students, there is also considerable good news about minority students entering American schools in the next 15 years. "We have an emerging middle class of Latino and African American students," Miller noted. Nearly half of the Black students entering education have parents who have attained college degrees, and 40 percent of Latinos hail from parents with college degrees. "The implications are that a higher percentage than before of these students will not be coming to school from extremely disadvantaged circumstances," he said. Since we'll have two million Latino and two million Black parents who have been college educated, "if we choose to invest more in their needs, the chances are greater that they will succeed."

The Rand study shows that white and Asian students are increasingly stemming from higher socioeconomic groups and are therefore more likely to succeed in education.

Yet the increase in Latino students demands that more Latino teachers should be hired, says Cota-Robles. He'd like to see the equivalent of a G.I. bill through which college students receive stipends to teach in public schools for five years or have part of their tuition costs paid. Only three percent of the faculty of the University of California at Santa Cruz were Hispanic, and it will require "high achievement" to augment that number in the future. "We need to have Hispanic students who are as competitive as other students," he said.

"We either have to prepare our nation for the rising tide of Hispanic students about to enter our school or let it destroy us," says Gloria Rodriguez, president and CEO of AVANCE Family Support and Education, a San Antonio-based nonprofit organization that helps Hispanic parents educate their children. Based on the report, Rodriguez would like to see a new program launched to encourage bilingual teachers in communities with large numbers of Hispanic children. At a recent conference that she attended, a speaker noted that if educators could reduce the Hispanic dropout rate in high schools, more than $18 billion would be added to the American economy.

Bottom-line, Miller says the Rand study demonstrates that "there is much to be gained from doing much more for each segment
As an ever-increasing number of Hispanics attain their Ph.D.s, those going on to postdoctoral research are coming up alarmingly scarce, believes Dr. James H. Wyche, Ph.D., executive director of the Leadership Alliance.

In 1995, according to National Center for Education Statistics figures, Hispanics accounted for 34 percent of the country’s Ph.D.s (whites, 85 percent). And a United Negro College Fund poll indicated that only 1,200 of 40,000 postdoctoral appointments—roughly three percent—were occupied by members of traditionally underrepresented groups, including Hispanics as well as African Americans. Wyche believes that the number should be closer to 2,000 to 2,500.

“What it shows is that with all of the government support to the National Institutes of Health (NIH) and awards to postdocs, few of the Ph.D.s are going on to the postdocs,” said Wyche, who is also an associate provost and professor of medical science at Brown University. “It’s a problem of national concern that we need to do something about.”

In 1971, through government authorization from Congress, the NIH was mandated to begin programs that would address underrepresentation of minorities in science. Programs were created—such as MARC (Minority Access to Research Careers) and MBRS (Minority Biomedical Research Support)—that would serve as forerunners of others to come, not only in federal agencies but in various other foundations and private agencies.

“What I’m really calling for is the same kind of concern and targeted program to address the next generation,” said Wyche. “Okay, so fine, we get them up into and through the Ph.D. ranks—that’s only part of our job. The other part of our job is to provide them additional professional experiences to make them more marketable, not only in academia but also in the public and private sectors as they go after employment opportunities.”

Wyche concedes that applying for postdoctoral opportunities is, of course, open to all minorities, but he finds that fact to be irrelevant. For Wyche, action must be taken. As long as academic institutions fail to put the issue on the table in a manner that inspires change, he sees the federal government having no choice but to intercede.

Experts cite various reasons for the postdoc figures, with economics topping the list. Cases abound in which minorities coming from economically depressed backgrounds feel a financial pressure to assume an immediate loan payback mode in order to accelerate their access into the economic mainstream. “We have problems recruiting young people at the postbaccalaureate into Ph.D. programs because they also have loans and might not know of scholarships and fellowships that can allow them to go to graduate schools without having anything coming out of their pocket (particularly in biomedical sciences),” said Wyche. “So I think part of the problem is lack of knowledge of what opportunities exist.”

Another factor lies in the fact that there is currently neither a national program nor a network aimed at reaching out to minority members to help them understand their greater marketability after an additional two to three years spent beyond their Ph.D.s as postdocs.

“I have an African American female at my own institution who should be very highly marketable, but we’re having some problems getting her a postdoc because of the lack of network, and I’m working hard myself to help her,” said Wyche. “And this is at an Ivy League school. You could imagine that if a student is somewhere else—maybe not of the same so-called elite status of an Ivy—the difficulty of simply getting a Ph.D. and then not having an extended network.”

In published articles, Wyche has asserted that a lack of mentoring for Ph.D.s results in fewer promotions into academia’s professorial ranks. In response, a special committee within the Leadership Alliance has been appointed to address the issue of dwindling minority postdocs.

The Leadership Alliance, says Wyche, is looking to increase postdoctoral appointments not only for students within the sciences, but for all of the disciplines—including humanities and social sciences, where pursuing postdocs has been generally viewed as not part of the “overall training experience.”

Dr. Eloy Rodriguez, an environmental science professor at Cornell University, believes that the NIH as well as the National Science Foundation (NSF) should share some of the responsibility for the low numbers. Rodriguez contends that majority investigators with NIH and NSF support are reluctant to provide opportunities for minorities. “They have never had to think about or have never thought about having minorities in their labs. It certainly never crosses their minds, although they certainly have no problem offering opportunities for international students. They used to go to Japan, but that fishing well has dried up.”

He claims that the situation has worsened in recent years because there has been no leadership in the NIH (the No. 1 institute providing postdoc money) pushing for the hiring of U.S.
underrepresented minorities as postdocs.

Twelve leadership positions became available during the reign of former President Harold Varmus. "In the last five years, they have hired no minority institute directors," said Rodriguez. "For NIH, if you do not have that leadership coming out of there, it has an impact. We're trying to recover, and it will probably take another five years.

"The Ph.D. students are obviously seeing what's happening, and they are either reluctant to pursue a postdoc, or are going into the private sector, or they're just discouraged," added Rodriguez. "You have to have some kind of carrot-and-stick approach. I think it's been mostly just a stick approach."

He addressed the decrease in research funding, including to minority investigators, at a time when the NIH has enjoyed a 30 percent increase in its funding for basic research. Both institutions reaped large financial awards from the federal government for research in the past year, with the NIH receiving 20 billion dollars and the NSF getting about 7 billion, respectively.

"There has been no real advocacy from the leadership that can make things happen," said Rodriguez.

Of the 15 Ph.D. students who graduated under Rodriguez, about half were minorities, and half of those still went on to postdocs with the professor's help and mentoring. "Having minority faculty performing basic research who are not getting ROI grants means you have minority faculty who as researchers can't even hire minority postdocs because they're not being funded," the Cornell professor said.

He believes that the lack of mentoring has played a role in producing the current low figures.

"[The NIH] is one place where I could point the finger, but I could just as well point it at NSF," added Rodriguez. "When you don't have advocacy, a true understanding of the problem, this is what you're seeing."

Don Robuski, public affairs director of the NIH, issued a statement on behalf of his institute, but declined to comment on many of the criticisms levied against it.

"First of all, we are constantly working to improve the participation of minorities in the postdoctoral programs," said Robuski. "Number two—we don't have any way, because of federal regulations, to track the ethnic origin of participants in the postdoc program. Providing that information is optional, and most Ph.D.s do not." Carter Kimsey, program manager for postdoctoral fellowships in biology for the NSF, runs the minority postdoctoral fellowship program sponsored jointly with the special sciences director since 1990.

"We're not getting as many applications today as we used to, but we are funding on the order of forty to fifty percent of the applications that we get," said Kimsey. "We feel like we're one of the people that are trying to do something about it."

These programs for minority postdocs, however, are not NSF-wide, but include only the directorate for biological sciences and the directorate for behavioral and social sciences.

Others, such as the directorate for geo sciences, math, and physical sciences, engineering, education, and human resources do not have programs for minority postdocs.

"I think that because of the general atmosphere for affirmative action, people don't know that we still exist," said Kimsey. "They assume that we've been gotten rid of because so many affirmative action programs have been disestablished. Even though it's on our web page and we make no secret of it, it's interesting that applications have fallen by fifty percent or so."

Wyche believes there is a potential to do better, starting at his own Brown University. About five years ago, Brown began a program that Wyche helped create out of the president's office in which a special fund was set up to competitively attract minority Ph.D.s to the campus through a presidential revolving fund. Four to six slots are available each year to be awarded competitively. Currently, there is a program to bring in recently mentored Ph.D.s. That program is being as many as 10 a year now into an institute for a one- to two-year period as a rising scientist.

In over 3,400 colleges and universities, about 125 to 150 are regarded as Research institutions. These institutions train a significant portion of the Ph.D.s and have a significant portion of the postdocs," said Wyche. "It's a focal point for concern here, over a hundred Research One institutions. Those are the ones where I'm sort of focusing my concern and attention, and I'm asking all of us, including institutions, to step up the effort to not only cognize and identify but create conditions programs that will address the concern to n individuals more competitive and marketable."

Margaret Miller, president of the Amer Association for Higher Education (a 30-year-old independent organization that promotes kinds of changes that colleges and universities have to make) believes that in the final analysis it's up to colleges and universities to ensure success of minorities in these disciplines. He feels these efforts should begin at the university and graduate levels.

"We need to work with junior high school and high schools to make sure students in college with the skills and knowledge they need to succeed in the hard sciences," said Miller. "We need to make sure that while they're in college that the pedagogical approaches we take designed to promote the success of all students, not just students who have a particular way of approaching learning."

Miller views the promotion of the agents minorities to being a chicken-and-egg issue, going hand-in-hand with this approach.

"We need leadership of color in order to push this issue, but the leadership of color come to the degree that we prepare them to do," said Miller.

"This is a responsibility we all share. All need to be working on the development of an ethik and academic excellence among students of color." added Miller. "It's a matter of education and a larger social need."
Purdue University has some exciting news to share. For the first time in its history, Purdue has enrolled more international students than any other public research institution in the country, and it is now ranked fifth among all colleges and universities in the U.S. for that distinction, according to figures for last September. The international group is comprised of 4,130 students from 127 countries enrolled at the West Lafayette campus in Indiana last fall, reports Michael Brzezinski, director of International Students and Scholars. Purdue's international enrollment passed those of the University of Texas at Austin and Ohio State University, two public schools in the lead last year.

Purdue University President Steven C. Beering a decade ago made "internationalization of the University" one of his administration's goals. Commenting on the good news, he suggested that as more international students look to Purdue for undergraduate and graduate education, the University and its U.S. students benefit. President Beering reasons, "A quality education in our global society must include an international component. Because of the presence of many cultures on campus, Purdue students will graduate with an appreciation for as well as an understanding of the world in which they will live and work. Nothing less should be expected from a truly great university."

Brzezinski adds that undergraduate international enrollment has grown more than 200 percent during the decade. He says that most of this growth has occurred during the last five years as Purdue initiated changes that streamlined the admissions and transfer processes. These steps include the use of electronic mail, online admission applications, and a prospective student database. The University notes that the changes have decreased the time between application and admission from several weeks to a couple of days.

Purdue has also been active in recruiting international students. Staff from International Student and Scholars and the Office of Admissions have met with student and high school guidance counselors in Asia, Canada, Europe, Latin America, and the Mideast. The recruitment is part of a "campus-wide internationalization plan." Michael Sioeh, dean of international programs, continues, "We have a responsibility to help our students gain a wide variety of experiences. When students from other countries come to Purdue, they bring their experiences and culture here where st
students from the United States can learn about life in other parts of the world," Stohl says. "The experiences gained from interacting with peoples from different cultures is invaluable. The in-class and out-of-class contact enables students and staff alike to think globally and understand the variety of approaches to knowledge that may exist."

There are 1,817 international students enrolled in undergraduate programs, while 2,316 are enrolled in graduate and professional programs. Brazinski stresses that both numbers are Purdue records. The admission standards have remained high, and students are well prepared to learn in an English-speaking classroom, notes Brazinski, who points out that international students tend to stay in college and complete their degrees. Of the undergraduate international students who started at Purdue in 1997, 95 percent were still on campus 2 years later. Among the international students who started undergraduate programs in 1993, 74.5 percent had completed their degrees within five years, a higher percentage than that of domestic students.

During its 128-year history, Purdue has grown from 39 students and six instructors to an enrollment of 62,372 on five campuses and 11 Schools of Technology locations, with faculty of more than 3,600. More than 3,770 students are enrolled on the West Lafayette Campus. System-wide, there are 2,544 Hispanic students, 3,088 African-American, 1,732 Asian American and 311 Native American students. This includes those enrolled at West Lafayette, School of Technology; Statewide System, West Lafayette Extension Calumet, Indiana-Purdue Fort Wayne, and North Central campuses.

West Lafayette is the central campus located across the Wabash River from Lafayette. That campus alone serves 8,818 Hispanic students. 1,285
African American, 1.275 Asian Americans, and 18 Native American students.

Purdue University has been educational since its second year of operation. Today, 43 percent of students on the West Lafayette Campus are women. Most undergraduates at the institution are from Indiana.

The mission of the University is not limited to undergraduate and graduate education. Last year, more than 130,000 people of all ages and backgrounds enrolled in 1,000 continuing education programs. Through the Cooperative Extension Service and the Office of Agricultural Research Programs, Purdue affects the lives of thousands of citizens of the state. The University's sponsored research program exceeds $15 million a year.

Purdue's reputation rests on the achievements of the more than 400,000 awarded degrees between 1874 and the present. Alumni include astronauts, Nobel Prize winners, U.S. and state senators, and representatives; U.S. secretaries of agriculture, literary figures, journalists, and college and corporate presidents. Twenty-one of its alumni have been selected for space flight. That includes the first man to set foot on the moon, Neil A. Armstrong, and the last to leave it, Eugene A. Cernan. Purdue is equally proud of other graduates who are "the people who hold society together," such as teachers, business leaders, engineers, managers, agriculturalists, scientists, technologists, pharmacists, and veterinarians.

Purdue owes its origin to President Lincoln's signing of the Morrill Act on July 2, 1862. By way of Morrill, the federal government offered to turn over public lands to any state that would use the proceeds from their sale to maintain a college to teach agriculture and the "mechanic arts." In 1865, the Indiana General Assembly voted to participate in this plan and took steps to establish such an institution. On May 6, 1869, the General Assembly decided to locate the institution near Lafayette and accepted $150,000 from John Purdue, $50,000 from Tippecanoe County, and 100 acres of land from local residents. The legislators established the institute and named it Purdue University. Classes began on September 16, 1874. On October 20, 1891, the Purdue football team was for the first time called "Boiler Makers," by a Crawfordsville reporter who wrote about Purdue's 14-0 trouncing of the Wabash team. Soon, Lafayette newspapers picked up the name. In the early days of Purdue football, the team had been known as "haymakers," "rail-splitters," "sluggers," and "cornfield sailors."

Over the University's distinguished history, less than one-half the cost of campus buildings has been furnished by the state of Indiana. Other funds come from bond issues, gifts, earnings, and federal government grants. For example, all residence halls are financed by loans, eventually repaid by applying a portion of the residents' room-and-board costs to the debt. The West Lafayette Campus has 145 principal buildings situated on some 1,570 acres, including a 245,000 square-foot mall. University-owned 528 acres are taken up by campuses, research facilities, and agricultural use. The Black Cultural Center was completed in the summer of providing a place for students, faculty, staff, and community members to study and learn about African American culture and heritage. The Center programs are open to all. The BCC includes a library of more than 6,000 volumes relating to the African-American experience as well as computer lab. A G. sterling sponsored Cultural Arts Series features prominent scholars, performing artists, and Purdue alumni who have extensive contributions to human rights, business, education, and the arts.

Also new at Purdue University is the Book of Great Teachers, a memoriam wall display in the west foyer of the Purdue Memorial Union dedicated in April 1991. The book bears the names of an inag group of 225 faculty members, past and present, who have done their lives to excellence in teaching and scholarship. Those it houses were chosen by their students, alumni, and faculty and have been designated Purdue's distinguished educators. The nomination process for inclusion in the Book was repeated every five years and is slated to reheat on January 2, 1996. President Beering became the ninth president of Purdue Univ in 1985, says that his years as its president few experiences moved him as much as the April dedication.

President Beering recalls, "Many current and retired faculty members whose names are included attended the dedication ceremony. The images of that gathering of great minds will be with me for the rest of my life. I saw a little girl trace the name of her grandfather. Then too, there is the Beering Scholarship that recognizes excellence in students, just as the Book of Great Teachers celebrates excellence in their mentors. The Beering Scholarship is designed to recruit some of America's very best students to Purdue by offering full financial aid to students from the first year through the doctoral degree long as the student maintains the standard of excellence. More than 3,000 outstanding students, including eight first-year students this year attended Purdue under this program since it began in 1986. Dr. Beering earned B.S. and M.D. degrees at the University of Pittsburgh and as dean and medical center director at Indiana University School of Medicine from 1969 to 1983 before moving to his post at Purdue. "Two groups of people—outstanding students and top faculty—Purdue's greatest assets," says the president. "They set the high standard that keeps our University at the top echelon of higher education."
Lamar Professors Offer ESL and Math CD-ROMs For Deaf and Hearing Students

by Jean F. Andrews and Donald L. Jordan

Through two U.S. Department of Education grants, we developed multimedia CD-ROMs for Mexican American deaf children to help them learn reading skills as well as learn about Mexican American culture with folktales and animal stories (Andrews & Jordan, 1998). We also developed multimedia CD-ROMs that focused on solving math word problems over six math grades of difficulty using multicultural names, stories, and themes. While our project aimed specifically at users of ASL (American Sign Language), we translated our materials into Spanish for children and adults learning English as a second language.

Multimedia Advantages

Multimedia offers a promising tool for teaching languages. Stories can be written in two or more languages, and each can be accessed by the click of a button on a page. Multimedia is especially useful for children who rely on sign language. Dictionaries of sign-language video movies can be built right into the stories. Multimedia pages offer “hot buttons” that access three languages.

Multimedia also lets you explore information at your own pace while combining printed text, narration, words, sounds, music, graphics, photos, movies, and animation on one computer page. Pages can be linked together sequentially or can branch off into new pages called hypermedia.

Deaf Mexican American Children

We targeted Mexican American deaf children because Hispanics are the fastest growing minority group in the deaf school-age population in the U.S., particularly in Texas, where we work. There are more than 7000 deaf children from Spanish-speaking homes in the U.S. (Schildthroth & Hutto, 1996). Because of cultural and linguistic differences, these children often find it difficult to learn language and other school subjects (Gerner de Garcia, 1993). Many score two to three years below their white deaf peers on standardized measures of reading, language, and mathematics (Allen, 1995). Cultural influences can be Spanish, Mexican, Puerto Rican, Dominican Republican, Cuban, Latin or South American in origin. Children might know different languages: some spoken and written English, American Sign Language (ASL), gestures, and home signs. They might also use Spanish simultaneous communication (spoken Spanish and sign), and some English simultaneous communication (spoken English and sign), or a mixture of these. If families recently emigrated from Mexico or South America, children might use an indigenous sign language. Such a trilingual environment (Spanish, English, sign language) can be confusing—and further complicated by the fact that no one language has been fully acquired.

Hispanic deaf youths also must navigate through three cultures—Hispanic, American deaf. While they eat ethnic foods, celebrate religious and historical holidays, this cultural information has little meaning to them if family members cannot explain these elements of sign language. Many grow up not fully understanding their home culture in deep and significant ways.

Most profoundly and severely deaf Hispanic youths pick up ASL rapidly when enrolled in school. ASL, used by more than 2 million Americans, is a visual-gestural language that is a grammatical form that differs from English (Vernon & Andrews, 1990). ASL becomes the language for many of these Hispanic youth because it is the first that is fully accessible. The grammar and lexicon of ASL is very accessible and available through peer deaf adult interactions. Thus, we translate stories into ASL for Hispanic deaf youths.

Since we wanted our stories to be accessible to children with a wide range of hearing levels, we included written and spoken texts in Spanish and English. Hispanic hard-of-hearing children might benefit from hearing and reading the Spanish words and sentences.
Learning ESL

One result of immigration is the population increase from Spanish-speaking countries, with averages quoted of up to 250,000 a year. Many of these children enter school speaking Spanish (Nicolaou & Valdivieso, 1992). It has been recommended that children be allowed to further develop their first language of Spanish and learn English as a second language through dual-language or bilingual maintenance programs (Baker, 1996). Our stories could be used in these kinds of educational programs.

Learning ASL

With global markets opening in South and Central America, Mexico, and the Caribbean, more adults are seeking Spanish instruction. It is also widely taken in high school and college because of the close proximity of countries such as Mexico and South and Central America to which students can go to practice ASL as a second language. ASL is used by two million deaf adults in Canada, and in the U.S. ASL has been designated as a foreign language by many states, and there are more than 2,000 ASL programs nationwide (Kemp, 1996). Students in Texas can learn ASL for foreign language credits in high school and college. People learn ASL for different reasons, as in working with the deaf children as teacher, aide, counselor, or interpreter. Parents might want to learn ASL too.

Product Descriptions

Our Mexican American series is made up of five CD-ROMS, each featuring a Mexican American story. Each page has buttons that the reader uses to access English and Spanish (voice and print) and ASL translations, and "hot words" that give ASL translations of key vocabulary.

Our "Meet the Math Wiz" series is made up of five CD-ROMS that offer more than 130 math word problems across six grade levels of difficulty. Chris Kurz, a math teacher who is deaf, is the math wizard and welcomes readers to his castle. He describes a four-point plan for solving math word problems using ASL. He has a glossary of math terms with definitions for teachers. The math wizard leads the reader into eight demonstration problems per CD where he gives them an ASL translation of the problem, an animation hint, and an explanation of how to solve the problem, in ASL. Math words are also "hot linked" to an ASL sign and explanation. For example, math terms such as "how many left," "all together," and "in all," often pose problems for readers. With the click of a button, deaf children can access an ASL sign definition of these terms in the context of the story problem. Readers can also access English and Spanish voice and print. Each CD-ROM has an additional twenty to twenty-five practice word problems in English and Spanish print; only All word problems feature multicultural themes and names.

Evaluation

We have started to collect data using our multimedia CD-ROM stories with young deaf readers. Story-retelling data were collected on twenty-five deaf elementary age children. Statistical analyses showed that the print-only form was the least conducive to story comprehension, while a multimedia form with print, pictures, and sign language was more conducive to story comprehension than print only and print with sign language. Stories presented by print with pictures were also more conducive to story comprehension than print alone or print alone with sign language. These results show support in the use of multimedia technology in classrooms for students who are deaf (Gentry, 1999). We have further plans to experiment with our math word problem CD-ROMS in Texas, Louisiana, and Kansas with deaf children and ESL hearing children.

Technology

Technology is not a quick fix to nagging problems of literacy with multicultural, deaf, and deaf-multipurcultural populations. Nothing replaces the long, one-to-one talks with an interested and caring teacher, sincere mentoring, and other unique, meaningful ways that teachers forge special relationships with their students. What technology does offer, though, is a tool to make innovative and imaginative materials to reinforce skills and provide for a measure of independence for the learner. The tools go with the teachers; they don't replace them in the classroom.

Creating new materials for non-English students is a wise and worthwhile investment. All children deserve an education for their own self-fulfillment. Children from Hispanic backgrounds will be an invaluable resource for our country's economy. But we must educate them to the maximum potential so that when they enter the workforce, they can participate fully in all the benefits our society can offer them. By providing teaching tools such as CD-ROM stories, which highlight their home culture and language in a positive way, we can provide them with important early literacy tools.

References

MEXICAN-AMERICAN STORIES

"The Parrot That Could Speak Two Languages: (El loro que sabia hablar dos idiomas)," 3rd grade level

"The Ram in the Chili Patch (El chivo que semetio al campo de chiles)," 3rd grade level

About a little boy who asked for help to get a stubborn ram out of his chili patch. Reading skills: vocabulary, finger spelling, ASL and English synonyms, antonyms, contractions, third person progressive tense form, and story questions in a game format. Cultural enrichment: Mexican foods (chili peppers and other Mexican dishes) and Mexican traditions (the baptism, Quinceanera, the wedding).

"The Burro and the Wise Men (Los sabios y el burro)," 3rd grade level

A short, amusing story about a wise burro that could tell the weather by instinct. He was smarter than wise weather analysers with their modern instruments. Reading skills: vocabulary, finger spelling, ASL/English present and past progressive tense forms, past tense (regular and irregular), personal pronouns in a game format. Enrichment page: all about climates in Mexico and hurricanes.

"The Bilingual Cat (El gato bilingüe)," 3rd grade level

A "bilingual" cat who knows dog language (barking) and cat language (meowing) tricks a mouse into leaving its mouse hole. Reading skills: comprehension (story questions) and grammar games (ASL/English plurals—regular and irregular, past tense—regular and irregular, and third person singular tense). Cultural enrichment: all about wild animal cats found in Mexico (the puma, the ocelot, the mountain lion, and the cougar).

Jean F. Andrews, Ph.D., is a professor in the Department of Communication Disorders and Deaf Education in the College of Fine Arts and Communication at Lamar University, where she teaches courses in deaf education and conducts applied research.

Donald L. Jordan is the chair and a professor in the Department of Management Information Systems in the College of Business at Lamar University. He teaches courses and conducts applied research.

Drs. Andrews and Jordan co-directed the Hispanic Literacy Grant (G00H09G50916 and Math Literacy Technology Grant (G00H8070051).

MEET THE MATH WIZ

Chris Kurz, a math teacher at the Kansas School for the Deaf, is our ASL story signer. "Meet the Math Wiz" is made up of five levels of math word problems with eight demonstration problems featuring colorful graphics, text (English and Spanish), voice (English and Spanish), animation hints, and ASL explanations. With 20 more practice problems in English and Spanish text. All word problems are written below the third grade reading level.

Math categories: charts, measurement shapes, counting, place values, number sentences, fractions, time, money, addition, subtraction, probability, percentages, and distributive property.

Preserving the Past, Embracing the Future

Programs and Projects at St. Thomas University

BY SUSAN SMITH

Last November, more than 50 members of the Cuban Association of University Women attended a luncheon on the campus of St. Thomas University (STU) in Miami, Fla. They had come to hear well-known Cuban-born filmmaker Alex Anton speak about a subject close to their hearts. Anton is producing and directing a documentary about the history of the Cuban presence in the United States, which he has traced back to the founding of this nation. Entitled Cubans in America—Past, Present and Future, it will be South Florida's answer to The Irish in America. The documentary is part of a Cuban Oral History Project being sponsored by the University. Based entirely on oral histories of Cuban immigrants, videotaped in the University's media center, this first segment of the documentary will premiere in the fall during Hispanic Heritage month. Ramiro Ortiz, president of SunTrust Bank Miami and a major sponsor of Anton's previous documentaries, arranged for the partnership between Anton and STU.

STU traces its roots to the Universidad de Santo Tomas de Villanueva, founded in 1946 in Havana, Cuba, by American Augustinian Friars. When the Castro government expelled the Augustinians from Cuba in 1961, several of the American Augustinians came to Miami, where they founded Biscayne College. Biscayne College became STU in 1964 with the formation of a graduate school and the St. Thomas University School of Law. Aware of this strong connection to Cuba, Ortiz considered STU a natural home for the Cuban Oral History Project.

Anton has received widespread acclaim for a previous documentary, Adios Patria: The Cuban Exodus, about the recent Cuban exodus and shown on PBS throughout the United States and overseas. Willy Chirino narrated the Spanish version, and Andy Garcia, the English.

The Cuban Oral History Project will capture the larger story of a community that has had a significant impact on all levels-cultural, economic, political, and artistic—not...
only in Florida but on a national level. The permanent collection of videotapes will be housed at STU and made available to academics, students, and writers for research on campus and online.

Members of the Cuban Association of University Women were excited at the prospect of being included in the Project. Most of the members attending the luncheon had carried out their studies in Cuba and eventually became leaders in business and academia after adjusting to their new lives in the United States.

Dr. Hilda Garcia, president of the Association, congratulated both Anton and the University for the combined endeavor, calling it "a unique method of preserving the events of the past 40 years for coming generations."

The University maintains close ties with South Florida's Hispanic American community. Not only does the University trace its roots to the Havana University, but more than half of its undergraduate population today is Hispanic.

Given their experience in Cuba, the University's founders, and specifically its first president, who was vice rector of Villanueva, were intimately familiar with teaching students from different backgrounds.

That commitment to student diversity continues strongly today. St. Thomas looks not only to Miami-Dade County but also to Latin America, the Caribbean, and beyond. Part of its mission is to provide each student with the opportunity to be part of a true international community, not just to earn a degree but to interact with others and to grow academically, socially, experientially, and morally.

The University is located on a 100-acre pineland, an oasis of tranquility in the middle of urban north Miami-Dade County, not far from Broward County and the city of Ft. Lauderdale. It has a southwest Miami campus and has recently started offering degree courses at a new Broward County location.

Courses for MBA and MSM degree programs are offered at on-site locations, at local police departments, hospitals, and airports throughout the two counties. STU offers 25 undergraduate- and nine graduate-degree programs, in addition to the degree of Juris Doctor from the School of Law.

Miami’s Hispanic American community is represented in all areas of the University. More than 30 percent of STU’s board of trustees and more than 40 percent of its staff are Hispanic American. Of 72 full-time faculty members, 20 are Hispanic.

The University has dramatically increased its visibility, both in South Florida and nationally, within the past year. It received the first annual award for outstanding member-institution of HACU, the Hispanic Association of Colleges and Universities. For the past two years, Hispanic Business Magazine has named the law school one of the top 10 law schools in the country for Hispanics. The STU School of Law has one of the most culturally diverse student bodies in the country. Hispanic students represented 24 percent of the graduating class last year, and the retention rate for first-year Hispanics was 82 percent.

STU is also a designated HSI, Hispanic-Serving Institution. It is the only university in Florida to receive a Title V grant in 1993 and was the only private university in the state to do so. Over the past five years, the more than $2 million grant will train faculty to add interactive teaching and learning strategies to current teaching practices and to reach an increasing number of nontraditional students off campus by distance learning. By 2004, five fully networked classroom/ labs and 17 media-equipped classrooms will be operating on the main campus in Miami-Dade County.

For a long time we put in place a state infrastructure for technology. STU’s president Rev. Msgr. M. Casale, “This grant will help us put a stage of development in the teaching and delivery.”

Monsignor Casale is a native of his STU presidency much at home in Miami. Newark and a graduate of St. Thomas University, he was once a priest, vicar general, and chancellor of the Archdiocese of New York. An immediate hit with the Florida community, Monsignor Casale revels in Miami’s vibrant and diverse community.

Student Diversity

The Cuban accent is the only Spanish accent on the university campuses today. STU has connections with students from Colombia, Guatemala, Peru, El Salvador, Atlanco, Nicaragua, Venezuela, Paraguay, and from the-speaking islands of the Caribbean. Some left their country years before and have grown up in Miami. Others came here from overseas.

In addition, STU offers the distinctive Spanish-speaking students the chance to study in Spain.

Since the early 1980s, STU has offered a Study Abroad program in Spain. Maria Cristina in San Lorenzo del Escorial, a town memorials to the writings of Ernest Hemingway are held in the beautiful 16th-century monastery and palace of the Duke.

Since 1990, STU has Spanish students the 2+2 program. They obtain a Bachelor of Arts in Spanish at STU and a Bachelor of Arts in Spanish at the University of Miami.
intensive English classes, and then two years of business classes in Miami. Now STU also offers this 2+2 program to graduates of high schools. Today there is a tremendous need for truly bilingual professionals in the employment market. They must be able to write and conduct business in flawless Spanish. Applicants to the program must be native Spanish speakers or have the equivalent of four years of high school Spanish. During their first two years in El Escorial, students complete the first two years of their undergraduate degree. Classes, including the required courses in literature, history, philosophy, and mathematics, are taught in Spanish and English by both American and Spanish professors. Students whose native language is not Spanish take intensive Spanish classes. Hispanic American students take advanced Spanish grammar and writing classes.

After two years in Spain, students return to STU in Miami to finish their degree with a choice of major. If they wish to finish their degree elsewhere in the US, credits earned at STU in Spain are transferable.

Degree programs and individual classes at STU are geared to the Hispanic American student and the University's Miami location. STU offers graduate and undergraduate degrees in international business, aimed at preparing employees for the local international business community with close ties to both Latin America and Spain. Courses in multicultural counseling and minority relations are specifically written for all students who work in the Miami area in jobs that require their learning to interact with clients from Hispanic and other cultures.

Since it began three years ago, STU has sponsored the Hispanic Film Festival. Dr. Susan Angulo, assistant vice president of academic affairs at St. Thomas, is a board member of the Festival, which brings a growing number of Latin American and Spanish film producers to Miami each year.

The University's Art Atrium Gallery frequently exhibits the work of Hispanic artists and is currently showing the work of Miami artist Xavier Cortada, whose colorful oil paintings depict social and political issues such as racism, poverty, human rights, AIDS, and Cuba. Hispanic Heritage Month celebrations last year included an evening of Spanish Zarzuela by the Hispanic American Lyric Theatre, a lecture series on Hispanic themes, and a panel discussion on "Three Generations of Hispanic Women: Multiple Fictions." There was also an exhibit of students' creative writing in Spanish. These activities are organized by the Association for Joseph and Carmen Unanue of New Jersey, José A. Ortega, Sr., of Saxón Goya of Miami, and Francisco Unanue of Goya de Puerto Rico have donated funds for the Institute for Workforce Enhancement. The Institute trains the mid-level employees of local businesses, such as Saxón Goya of Miami, to move into management positions. This upward momentum in job mobility is intended to create openings for entry-level applicants and provide employment to applicants who were previously welfare recipients.

Carlos Saladrignas, CEO of ADP Total Source, formerly known as the Vincam Group, Inc., a leading company in the temporary staffing industry, is the principal funder of the Cuban Oral History Project. Saladrignas was the University Women have donated scholarships specifically for minority students.

The face of STU's main campus will change dramatically within the next few years. Fundraising is well under way for three new building projects. Construction is about to start on an impressive new entrance to the University, featuring a tower, visible from a nearby expressway and flanked by stately palms and flowering tropical blossoms, a divided boulevard to lead visitors and students through the pineland to the center of campus.

The second project is a replica of the chapel on the campus of STU's precursor in Havana. The chapel will be built in the center of campus and include an annex to house the Cuban Oral History Project. The third project is the International Sports Management Resource Institute, including a state-of-the-art gymnasium, to provide support for the University's nationally acclaimed sports administration degree programs.

While the refurbishing of campus will enhance the University's profile in the South Florida area, the Cuban Oral History Project and the national distribution of Cubanis in America: Past, Present and Future are expected to lead to greater national recognition for STU.

"I am thrilled by the possibilities..." said Monsignor Casale. "Not only in the year 2000 but also far into the new century. St. Thomas will fine-tune its degree programs in the light of an ever-changing marketplace and the needs of our students."

Susan Smith is associate director of the Office of University Advancement at St. Thomas University, where her responsibilities include public relations, coordination of grants and grant writing, and alumni publications. Her cum laude B.S. in journalism and English is from the University of Miami, Coral Gables.

The University is seeking an additional $1.5 million to produce the documentary, fund the videotaping, and establish the archives.
Yupi.com Helps Hispanics Play Internet Catch-Up

BY MARILYN GILROY

The "yupinauta family." That's how those who manage and market the company refer to users of Yupi.com, one of the world's largest Spanish-language networks of Internet sites.

This "family" shows no signs of slowing its growth as Yupi moves to secure its technological foothold among the eight million Hispanics households in the United States and expands to the 350 million Spanish-speakers in the global market. But while the rising numbers of potential customers is good news, the bad news is the current statistics that show minorities to be far less active on the Internet than whites. Only one out of seven Hispanics in the U.S. has Internet access as opposed to one out of four in the general population.

It seems only natural that someone would tap into this huge underserved market as well as help close what has been termed "the digital divide" among ethnic groups.

That someone is Carlos Cardona, who in 1996 at the age of 22 founded Yupi.com because he recognized the need to provide a Spanish-language search engine and directory that linked content from around the world on the Internet. Cardona came to realize that creating a fast and easy product to encourage Internet use among Hispanics was needed after he noticed that his family was not accessing the World Wide Web and all its advantages.

After developing Yupi, Cardona spent the first few months forming relationships with various Spanish-language sites. He rapidly positioned Yupi to be linked with a variety of Web content providers. Today those links are found on more than 80,000 sites, 5,000 of those sites feature Yupi.com as their search engine of choice. Yupi also became the first search engine that enabled users to conduct a search country-by-country basis.

In 1997, Yupi.com reached turning point and became a fledgling portal site, offering a wide range of content, products and services. By 1998, Oscar Coen was appointed president and CEO of Yupi.com (See sidebar) and continued to aggressively expand and capitalize the Yupi phenomenon. Last May, Yupi acquired Ciudad Futura, which made it the largest Spanish-language Internet network in the world. It now has more than 250 content collaborators and, according to Nielsen ratings, attracts 74 million visits per month.

Visitors to the site find 12 different "channels" that focus on entertainment, news, education, tourism, and health. Th

ACERCA DE YUPI.COM

Yupi.com fue fundada en 1996 respondiendo a la necesidad de proporcionar un sitio de alta calidad en el mundo del Internet en español. Yupi.com fue diseñada con el usuario en mente, por ejemplo, en los países donde se encuentra su audiencia existen importantes limitaciones del ancho de banda. Por eso, Yupi.com le ofrece a los usuarios una manera extremadamente rápida y fácil de navegar la red.

Yupi.com creó su propio buscador y estableció relaciones con sitios en español a través de toda Latinoamérica. Al poco tiempo, Yupi.com realizó la transición de buscador a directorio en español. En marzo de 1998, Yupi.com se transformó en un sitio portal, y comenzó a ofrecer una gran variedad de contenido y servicios, todos completamente gratis y 100% en español.

Yupi.com continúa en su búsqueda de proveerle a los usuarios de habla hispana la manera más fácil de aprovechar la información que la red ofrece. El Internet es un medio fascinante y cambiante, donde los usuarios que hablan español se sienten seguros de que Yupi.com les traerá la mejor que el Internet puede ofrecer, de manera rápida, fácil y totalmente en español.

Sin ningún apoyo de publicidad, Yupi.com se ha convertido en uno de los sitios líderes en el mercado de Internet en español. Sus usuarios continúan recomendando Yupi.com a sus amigos, tal vez el mayor orgullo y satisfacción que Yupi.com puede recibir de su audiencia.

BEST COPY AVAILABLE
are also Yupi chat rooms and the popular MiCasa Yupi, which offers free and easy guides to creating homepages. Some users create multiple homepages: one for resume and career purposes and one for personal needs and hobbies. They also customize their information needs by tailoring a page to display the content that interests them. All of these services are accessible through Yupi's homepage, which is updated constantly throughout the day.

Just who are the users of Yupi.com? According to Christopher Daniels, vice president of entertainment for Yupi.com, the site attracts visitors who range from "kids to those in their '60s.

Daniels says that, like other individuals on the Internet, Hispanics are using technology to meet a variety of needs. The U.S. Commerce Department recently issued a study showing that among Internet users, 60 percent search for information and entertainment, 46 percent check news, 36 percent take courses, 29 percent do job-related tasks, and 25 percent shop or pay bills online.

Yupi users fall into those general categories, but according to Daniels, there are some differences based on age. "Our demographics show that our older users are primarily accessing the site for information while our younger users typically log-on for entertainment purposes," he said.

For this reason, Yupi.com offers unique access to entertainment vehicles, especially in the area of popular music. Because of its partnership with SONY, one of the largest entertainment conglomerates in the world, Yupi.com is able to offer exclusive interviews with artists and often accompanies them with streaming video.

The two companies made news last August when Sony Corporation of America bought a minority stake in Yupi.com, which gave Yupi the opportunity to distribute SONY music and videos. When the sale was announced, Oscar Coen noted, "More than 70 percent of the top artists from Latin America record on the SONY label. We believe this will solidify our position as the entertainment hub of Latin America."

That strategy seems to be working. Last November, Yupi offered users a chance to download a remixed version of "Soy como un Niño" by Chayanne right before it was released to radio stations. Users could also view a personalized streaming video greeting from Chayanne and register to win an autographed hat from the singer. At Christmas time, Yupi offered a download of Alejandro Fernandez's recording of "Blanca Navidad" which included a 30 second video clip of the artists performing the song.

"Our partnerships with media conglomerates such as Sony and NBC Corporation enable us to offer extraordinary access to entertainment information for our users," said Daniels.

Yupi's entertainment offerings are a reflection of the international b of its users. Through its Claquetta.com link, Yupi recently presented a use to Jose Luis Ruiz, founder of the Huelva Ibero-American Film Fest. The site offered users extensive daily coverage of the film festival as well as exclusive reports and images.

Despite links to Spanish language sites, Yupi must contend with the fact that 90 percent of the Internet's content is in English. For this reason, Y offers a translation service, Traductor Yupi, which can translate the information contained in an entire website (or any part of it) instantly into Spani
Translators in French, German, Italian, and Portuguese are also available.

"We are dedicating to finding ways to make the Internet easier to use for yupinautes," said Daniels. "Our service to the Spanish-speaking population is unparalleled."

As Yupi develops an international consumer base, its content must also meet the needs of global users. Yupi has taken important strategic steps to gain the alliances needed to serve its diverse and geographically scattered community. It entered into an agreement with Network Solutions to allow Spanish-speaking users to register Web addresses in their native language. Through its partnership with Patagon.com, the leading financial site for Latin America, Yupi offers stock market and investment information. The market information is presented on a real-time basis and even allows for online trading in some Latin American countries.

In late 1999, Yupi and ALESTRA, the Mexican telecommunications company, announced that Yupi would be the content provider for ALESTRA's portal site, giving it key access to the Internet market in Mexico. All of these moves are part of Yupi's plans to capture the huge market of Spanish.net users, which is predicted to climb to more than 40 million by the close of the year 2000, according to a report by International Data Corporation.

Like many Internet companies, Yupi's rapid growth has required a significant infusion of capital. Its list of investors is impressive, including not only the previously mentioned Sony Corporation and News Corporation but also Seligman, Comcast Interactive Equity, and Banc of America Equity. As of this writing, Yupi.com has raised more than $110 million in private equity.

The growth in Yupi's market penetration of the Spanish-speaking community has created opportunities for advertisers who want to use additional tools in their promotional campaigns. Last year, Proctor & Gamble and Yupi teamed up in a joint mailing of 45 million editions of Avanzando, a magazine that raised awareness of Yupi and featured coupons for P&G products.

Yupi also joined with Hispanic Magazine to publish and distribute a 96-page bilingual guide introducing individuals and families to the World Wide Web. More than 50,000 copies of the guide were circulated in print, and it has been made available to schools and libraries. It can also be downloaded through Yupi's website.

As an employer, Yupi.com is expanding along with its services. At last count, says Daniels, there were 250 employees, but, he added, "that number probably grew during the course of this interview."

Yupi is headquartered in Miami but maintains offices in Los Angeles, Spain, Mexico, Colombia, and Argentina. And although Yupi has its share of young, technologically gifted workers, it also has employees in their 60s and 70s.

Officials at Yupi said that the company continues to grow "every single day." Its opening in Argentina last November was just part of an expansion plan that includes the country's urban centers as well as a growing audience in the interior provinces. Yupi uses local development teams that work to create innovative products for each country's market and manage
e-commerce activities. For example, Yupi acquired LaCosa.com, the leading Spanish-language humor site on the net, just weeks after launching operations in Argentina. The three-year-old site was dubbed "The Argentinean newspaper of general information" because it conveys news from around the world using all kinds of humor, from jokes to parodies.

Although Yupi has been extremely effective in overcoming language and cultural barriers to the Internet, there is still one remaining obstacle to increasing the base of Spanish-language users—the cost for new subscribers remains very high. A study of Internet usage by the Booz Allen & Hamilton consultants reported that the average fee for 40 hours per month using the predominant Internet service provider in Spain exceeds $85, far more than is paid in the United States. However, as competition between phone, cable, and satellite companies spreads to Europe and other continents, experts hope those costs will decline quickly.

Here in the U.S., Prodigy, one of the pioneer online services, has launched an Internet access promotion aimed specifically at Hispanics. The terms included: access to services in English and Spanish, one free month of unlimited usage, and a charge of $19.95 per month for 12 months.

This battle to be the leading Internet provider for Hispanics can only be good news. With more and more jobs requiring computer literacy and with the new economy based on technology, it is crucial that minorities "catch up" and not be bystanders in the digital age. Companies like Yupi are providing the keys to access that will make the difference.

As Yupi's Christopher Daniels said, "Hispanics will find their Internet journey becomes easier and faster. We are constantly asking, 'What are our users searching for?' and doing our best to enhance their experience on the

**Meet the CEO of Yupi.com**

As CEO of Yupi.com, Oscar Coen is considered one of the Internet industry's brightest visionaries and hardest working Web executives. Joining Yupi.com in May of 1998, Coen immediately began an aggressive partnering and site-acquisition program that has helped this Internet address become what trade publications have called "the largest most visited Spanish-language site in the world today."

Prior to joining Yupi.com, Coen worked as an investment banker with Preferred Capital Markets, an institutional investment banking and sales firm specializing in technology and biotechnology companies. He was an investor and an advisor to several Internet and e-commerce start-up companies. He was part of First Meridian Corporation, an Internet-banking boutique focusing on business development and financing of medium-sized companies in Latin America. Prior to that, Coen was with a California consulting firm providing macroeconomic perspective and analysis for financial markets to institutional portfolio managers in the United States.

Coen earned his undergraduate degree in economics at InTEC Dominican Republic as well as an MBA in international finance from the Miami Business School in public accounting at St. John's University in New York.

He is married and resides in Miami Beach with his wife and year-old son.

**VICE PROVOST FOR RESEARCH**

**THE UNIVERSITY OF NEW MEXICO**

The University of New Mexico invites nominations and expressions of interest for the position of Vice Provost for Research. Under the Provost, the Vice Provost directs the operation of research services and provides leadership in developing and fostering research and scholarship in the University.

UNM, a Carnegie Research I university, is the largest and most comprehensive of the state's institutions of higher education. Founded in 1889, the University serves a diverse student population of nearly 31,000 on five campuses (approximately 24,250 at its Albuquerque main campus). UNM is well poised to participate in the further development of the Rio Grande Research Corridor, in collaboration with the nearby national and federal laboratories and other research organizations in the region. The University operates a budget of nearly $1 billion of which $215 million is attributed to research and sponsored projects. UNM is the largest single recipient of federal research funding, based on 1998-99 research and development expenditures, as reported by the National Science Foundation.

Minimum qualifications for this position include a record of accomplishment that would merit appointment at the rank of tenured full professor in an academic department at the University of New Mexico and five or more years of experience directly related to the duties and responsibilities specified for the position. For a complete listing of the position description including qualifications, duties, responsibilities, and application procedure you may access the posting on the home page at [http://www.unm.edu/~crumun/fac招p.html](http://www.unm.edu/~crumun/fac招p.html). You may also request a copy of the announcement from Dr. Nancy Middlebrook, Search Coordinator, Scholl Hall Room 235, University of New Mexico, Albuquerque, NM 87131. (505) 277-5064, adm@unm.edu.

The University of New Mexico is an Equal Opportunity/Affirmative Action Employer/Educator.

**EXECUTIVE DIRECTOR OF THE FOUNDATION**

Manatee Community College (MCC), located on the coast of Florida, is accredited by the Commission of Colleges of the Southern Association of Colleges and Schools, and is the liaison for the Florida State Board of Trustees. MCC is governed by the Florida Legislature and by the MCC District Board of Trustees.

MCC seeks an Executive Director of the Foundation who reports directly to the President of the College. He/she serves as the chief executive officer of the Foundation, Inc., a not-for-profit corporation established under Florida Statute 121 as a direct support organization for Manatee Community College. A self-directed board of directors governs the Foundation.

**Duties include:**
- Working with administration to identify unmet institutional needs and maintain active participation in community organizations identifying, cultivating, and soliciting contributions from the public, private, corporate and foundation sectors; participating in a planned giving program; developing advocacy relationships at the local and state levels as well as organizing and managing fundraising activities.
- The successful candidate will have strong management and organizational experience negotiating contracts and ensuring regulatory compliance. ADD: Qualification include: Master's degree in related area of a Bachelor's degree equivalent experience a minimum of 3 years of progressive responsibility in a comprehensive development office (experience in planned or major giving preferred); excellent communication skills; effective leadership; presents interpersonal and time management skills; CFRE is desired.
- To apply, please submit letter of application, resume and copy of unofficial transcripts to the Office of Human Resources, Manatee Community College, P.O. Box 1849, Bradenton, FL 34206.

(EOE/AA/ADA)
When the Path Chosen Is Physics

A NEBHE Scholar at Brown University

BY

INÉS ALICEA

He

comes from a long line of
Ph.D.s, and yet he is almost an
anomaly in his chosen field.

Carlos Vicente is one of only a
handful of Latinos pursuing a
doctorate in physics. To put his pursuit
in some kind of perspective, it is
important to talk a little about
numbers. But the number of U.S.
Latinos earning doctorates in
physics is difficult to get. Some
organizations keep statistics that
group all Latinos, both foreign
students and U.S. students, and others
try to narrow it down to U.S.-born
Hispanics pursuing a degree, but
then the question arises as to
whether students at universities in
Puerto Rico should be included in
their counts.

The numbers are confusing, but
for this article, numbers from the
American Institute of Physics in
College Park, Md., should provide
the perspective needed. The
organization tracks U.S.-born Hispanics
getting degrees from 184 physics
Ph.D.-granting institutions. In the
1996-1997 school year, of the 1,365
Ph.D.s granted, only 16 went to U.S.
Latinos, according to Patrick
Mulvey, technical research associ-
ate at the institute.

"I'm sure I bring something dif-
erent," said Vicente, speaking of
both Brown University, where is he
pursuing his degree, and the field
of physics.

While Vicente is not the only
Latino pursuing a doctorate in
physics, the 28-year-old native of
Puerto Rico represents a small
cadre of Latinos pursuing Ph.D.s.

Only 950 of the 27,741 doctoral
degrees granted to U.S. citizens in
1996 went to Latinos, according to
the American Council on Educa-
tion in Washington, D.C. And Vicente
represents an even smaller group
pursuing a doctorate in the sci-
ences. Only 24 percent of the 3,446
doctorates granted to U.S. citizens
in the physical sciences went to
Latinos. MIT and the University of
Texas at Austin have produced the
most Latino physicists—12 each
between 1973 and 1996.

"I liked that in physics, a simple idea
can explain a lot of phenomena and
make some sense of the world."

CARLOS VICENTE, STUDENT OF PHYSICS

Vicente said that the driving
force in his decision to pursue his
degree in physics was simply his
love for the science.

"I like figuring things out," he
said. "Physics can be used to model
a wide variety of phenomena. That's
why I found it attractive."

Vicente's mentor and Ph.D. ad-
sor, Humphrey Maris, a professor of
physics for the past 34 years wor-
ries that an article on his protege
could do a disservice to the
Latino community because Vicente's accomplishments might seem like an impossible task and might discourage others from pursuing a similar path. Maris worries about the impact of portraying Vicente's efforts as a "strange or challenging thing to do."

"Carlos has done well here," Maris said. "He's a very practical guy. He likes to do experiments. He's enthusiastic and interested in what he is doing. One of the things that I would like to do for him is to give him the confidence, give him the feeling that he can do things."

Vicente, who admits that studying science can be extremely challenging, does not see what he is doing as "strange" but puts a positive spin on his chosen path and is humble about his accomplishments. He said he knew that other Latinos had taken a similar path and that the task could be accomplished. It's a message he shares, encouraging potential scholars to pursue the sciences and not be daunted.

"He will be a distinguished researcher and educator," said JoAnn Moody, vice president of the New England Board of Higher Education (NEBHE) and director of the NEBHE Doctoral and Dissertation Scholars Program. "He's got so much intellect, energy, charm, and is dedicated to science and hard work, that the sky's the limit. All of my students are special. They have had enormous barriers. He was initially recruited to the program through the New England Board of Higher Education's Dissertation Scholars Program, which funds a Ph.D. candidate's first year. He worked as a teaching assistant in 1994, his first year at Brown, but has been concentrating on his research since and hopes to complete his degree within the next two years.

Vicente was born in Santurce, Puerto Rico, and earned his bachelor's degree in physics from the University of Puerto Rico in 1993. He then transferred to Brown University, in Providence, Rhode Island, to pursue his Ph.D.

It bespeaks of the tremendous willpower, resilience, and intelligence they possess." Vicente noted that he had great math teacher in high school who helped direct him toward career in physics.

I like math a lot too, but knew it wasn't science, and I knew it was a tool for science," he said. also liked philosophy. Physics c- maybe answer some of the o questions that philosophers pond.
like is the universe infinite and is it expanding. Physics has hope of answering that. When I went to college, I knew I wanted to study physics.'

Vicente said that Ph.D. are just a family tradition. His father has a Ph.D. in biology, so does his uncle. His mother is pursuing a Ph.D. His grandfather has an honorary Ph.D. in botany.

He chose Brown, he said, because he liked Providence, he liked the work the physics department was doing, and he wanted to be relatively close to his native Puerto Rico, where he hopes to return someday to teach.

Vicente said that he initially had difficulty adjusting to the "pace and focus" at Brown and that he also encountered some faculty members and fellow students who were less than enthusiastic about his arrival on campus.

"They didn't take me seriously," he said. "They didn't think I was going to stick around. There was definitely an anti-affirmative action backlash. It wasn't absolutely terrible, but it was there. It was annoying."

Maria said that a common challenge that minorities confront on campuses is learning the difference between improper treatment and general difficulties of life in academia. Vicente said that he feels he has been able to make the progress that he has because he has the goal to teach and conduct research at a university and because he is more balanced in his approach to study. He likes to work hard but also have fun. He is often found Latin dancing on weekends. And he relaxes by playing the guitar.

"Physics is difficult for everybody," he said. "I'm a lot more together than some students here. Some people have had meltdowns. I started kind of slow, but I'm still here. I'm not goofing off, but I see myself as more of a human being than a physics-producing machine."

Vicente said that some of the barriers he encountered as he launched his doctoral pursuit were self-imposed.

Because of the anti-affirmative action backlash he was sensing, he said, he proceeded with caution, refusing to ask questions of anyone.

"In the beginning, there was a little pressure," he said. "Sometimes you think you have to prove things that, in reality, you don't have to prove. I felt like I have to conquer this field and bring it back to Puerto Rico. I would say I can stick it out on my own. I don't need anybody." He didn't want anyone to think that because he was from Puerto Rico, he was not well grounded in science.

Brown's qualifying exam changed his attitude. He took it three times before he passed, he said, and the failed attempts made him realize that he needed to overcome his concerns and inferiority complex to succeed. "I think I've matured a bit," said Vicente. "You have to make yourself a little vul-

For more information on the New England Board of Higher Education's Doctoral Scholars Program Science, Engineering, and Math, e-mail www.nehbe.org or write to the Board at 45 Temple Place, Boston, Massachusetts 02111-1305.
Localed in the town of Selinsgrove in central Pennsylvania, Susquehanna University is about a three-hour drive from New York, Philadelphia, and Washington, D.C. The approximately 1,600 full-time undergraduates hail from 27 states and 15 countries. A key university goal is to increase minority student enrollment to at least 30 percent by the year 2004. It's now about eight percent.

In 1995, Dr. Leona Martin, associate professor of Spanish, noted an emerging Latino population in the Central Susquehanna Valley and began an outreach effort to bring the new residents together with the local Anglo population. One result was the first Latino Symposium, “Identity, Diversity, and Integration: Pennsylvania’s Caribbean Connections,” held that year. It has since become one of the most popular cultural celebrations, for both the campus and the surrounding communities, and is held every spring.

The Latino Symposium continues, attracting ever greater numbers of high school students and local residents. The theme of this year’s event, held in March, was “Changing Times: Nuevos Horizontes.” Martin and Dr. Wanda Cordero Ponce, assistant professor of Spanish, coordinated efforts to organize the event, which drew close to 300 participants. About fifty members of the student group HOLA, Hispanic Organization for Latino Awareness, and of the Spanish classes helped with the symposium.

Students from area high schools attended morning and afternoon workshops and panel presentations and enjoyed an afternoon of music and dance performances by Raíces, a folkloric dance group from Reading, Pa., and Fuego Latino, the Susquehanna University student Latino dance troupe.

In the evening of the Symposium, a dance is held with a live orchestra. Open to the public, the dance draws a large turnout from the local Hispanic population.

“Wanda and I would like to think that the increase in minority enrollment is in part due to special events such as the Symposium,” says Martin. “We take a collaborative approach, which means we work with regional teachers.”

Susquehanna offers other cultural initiatives as well, and in some, students take on leadership roles. One such student is Alma DeRojas, of Dallas, Pa. DeRojas holds a University Assistantship, one of Susquehanna’s most prestigious academic scholarships. The $10,590 awards include a professional work experience with a member of the University faculty or administrative staff. DeRojas spends about ten hours a week on the Latino Community Initiatives project under the guidance of her mentor, Dr. Martin.

DeRojas, a Spanish and English major, works on the Oral History Project, a collection of interviews that tries to determine the origins of the Latino community in central Pennsylvania.

“Not only has the project increased my knowledge of the vibrant Latino culture in general,” says DeRojas, “but it has also increased my awareness of my own Cuban roots.” To job entails working with the modern language department, which, to DeRojas, “is a wonderful experience for my future career.

The project has three phases: oral histories of local Latinos, conducted by high school students; oral histories of local Susquehanna students of Hispanic heritage and oral histories of local Latinos, conducted by Susquehanna students. The Oral History Project, funded in part by a grant from the Aid Association for Lutherans, was the fortieth of last year’s Latino Symposium.

“When I arrived as a freshman entering student the high school students had already conducted their interviews. My main responsibility with this phase was the indexing of the interviews, which inspired me to conduct the histories of my own family,” said DeRojas. Along with two Susquehanna students—Puerto Rican and Honduran background—DeRojas worked with Dr. Martin on the Hispanic Heritage program. In addition, three other Susquehanna University students of Hispanic heritage—Jonathan Burgos, Sarah Battistini, and Christina Guadalupe—have enrolled with DeRojas in a special oral history course and, with her technical help, have recreated their family histories.

“Each of us interviewed our families, and results of our discoveries are available on the Oral History website,” says DeRojas. The web is operated by the modern languages department. “I decided to include an essay that I wrote after my first trip to Cuba that is based on interviews I conducted of my grandparents.”
Last September, DeRojas began the third phase of the project, collecting an oral history of a Mexican woman in the nearby city of Sunbury. The information gathered will help to determine the origins of the Latino population in the area, and to broaden the community’s awareness of this population, which is small but growing rapidly.

“As for now, the project is on hold, but we hope to continue our oral histories in the future,” says DeRojas. Martin and Cordero Ponce are the main coordinators.

Cuban Initiative

DeRojas, an honors program student, is also part of Susquehanna University’s new Cuban initiative. The daughter of Cuban immigrants, she has tracked the history of her family’s life in Cuba and, encouraged by professors in the Department of Modern Languages, continues exploring her own roots there.

“My father was born in Cuba in 1954 and left at the age of six after the Bay of Pigs Invasion in 1961,” says DeRojas. “My first trip to Cuba was a three-week class at the University of Havana on the history and culture of Cuba. During that time, I found several houses that belonged to my family and met some cousins of my grandfather. I am the first at my family who has been to Cuba since 1961, so this trip was very emotional.”

Based on the trip and other family documents, DeRojas wrote “Varadero,” a travel essay, which she submitted to the directors of the first-ever U.S.-Cuba Writers Conference held in Havana in January. DeRojas was selected as one of 35 participants and one of only three undergraduate students from a large pool of applicants. Another 10 were graduate students; the rest were professors and published authors.

Alma’s selection for this unprecedented cultural and intellectual exchange with Cuban counterparts is a tribute to her talent as a writer, her love of Cuba, and the benefits she has gained from her studies at Susquehanna,” says Dr. Robert Novy, associate professor of Spanish and assistant director of the honors program at Susquehanna University.

“I went ten days before the conference began to spend time with cousins in Havana and Varadero, the beach where my grandparents used to spend their summers,” says DeRojas.

“The conference itself lasted ten days and was a wonderful experience. I met many Cuban writers and learned a great deal about Cuban literature. I also had the opportunity to develop my own writing style in the travel writing workshop led by Tom Miller.”

“One of the other professors was Cristina Garcia, a famous Cuban-American fiction writer. We stayed at a hotel in Vedado, a section of Havana. Once again I found more places of importance to my family and also met a cousin of my great-grandfather. Overall, it was a wonderful experience, and I look forward to my return.”

At Susquehanna, DeRojas is also an active member of the University Choir, Opera Workshop, and HOla. She recently traveled with the choir on its annual spring tour. And that’s not all.

“I take voice lessons and tutor Spanish,” says DeRojas. “I am a member of Alpha Lambda Delta and Sigma Tau Delta, the English honor society. I am also a Presidential Fellow and University Scholar.

“After graduation, I would like to attend graduate school, possibly pursue a master’s in Latin American literature,” says DeRojas. “My next goal is to publish a book that combines my experiences in Cuba with the stories that my grandparents have told me about their life in Cuba.”

Next Steps

DeRojas is also helping Dr. Cordero-Ponce prepare for a "Topic" course that she will be teaching this fall. Cordero-Ponce will travel to Cuba this summer to gather information for the course, which is taught in Spanish and centers on the culture, language, literature, and history of a specific country.

In conjunction with the course, the University will offer a study experience in Cuba in January, 2001. Ten to 12 students are expected to participate in what Martin calls a "brief study abroad program." Led by Cordero-Ponce, students will travel to Cuba and participate in courses at the University of Havana. They will live in student residences near the University and take part in cultural activities in Havana as well as excursions to other areas around the island. The trip will be for course credit. It is hoped that students take the Cuba course taught by Cordero-Ponce before they go, but the trip will not be limited to those who do.

An emphasis on cultural diversity gives students at Susquehanna University the opportunity to learn about people, languages, and cultures that might be quite foreign to them. With committed students and involved faculty members, the campus community celebrates a variety of heritages, enriching the college experience for all.
Mt. San Antonio Soccer Coach Receives Award

Mt. San Antonio College (Calif.) men's head soccer Coach Rolando Uribe received the Latin American Soccer Coaches Association award during a soccer convention held in Baltimore, Md.

Uribe, after two seasons of coaching at Mt. SAC, was honored for his outreach program of youth soccer camps for the Latino community in Southern California. He is active with youth soccer and is a regional coach with the Olympic Development Program.

As a player, Uribe scored 60 goals in four seasons at CSU-San Bernardino and was named a first-team NCAA All-American in 1994. He also played with the Anaheim Splash, a professional indoor soccer team.

Schenectady's Minority Faculty Program

Schenectady County Community College (SCCC) in New York has launched an innovative program aimed at increasing diversity among faculty members.

The college designed its Minority Internship Program to recruit doctoral candidates from a local State University of New York (SUNY) institution to fulfill two-year internships at SCCC. The interns gain valuable teaching experience and participate in the daily college activities required of all faculty members.

José Melendez, a doctoral candidate in curriculum and instruction at SUNY-Albany, is one participant. A native of Puerto Rico, Melendez (pictured here with SCCC student Gladys Lopez) has been a lecturer at SUNY-Albany and a middle school and college instructor in Puerto Rico.

Texas-Pan American Receives Microsoft Grant

The University of Texas-Pan American (UTPA) is one of 11 African American and Hispanic universities across the United States to be awarded a grant by Microsoft Corp., the latest in Microsoft's long-standing efforts to increase technology access for students of color.

The grants of $440,000 in cash and more than $1 million in software will provide more than 150,000 students with benefits such as enhanced information technology curricula, distance learning opportunities, and improved Internet access.

UTPA will receive a $40,000 stipend and software that will support and enhance the university's computer science program. In addition to benefiting students, the grant will increase opportunities for the surrounding community, said Dr. Miguel A. Novárez, president of UTPA.

University of Miami Honors Leaders for Commitment to Cuban Culture

The University of Miami (Fla.) honored three prominent community leaders for their contributions to the development of Cuban culture in South Florida. The ceremony took place during a reception showcasing selected artworks from the Cuban Museum of the Americas Collection, which was donated to the university last year.

Luis J. Botifol (pictured), Ofelia Tabares, and Mignon Medrano, who helped secure the donation to the university's Lowe Art Museum, received a plaque commemorating the action and support of Cuban art and culture.

The donation complements the university's role as a major academic center for studies about Cuba and its people.

Leaders Discuss Underrepresentation of Hispanics in Higher Education

Hispanic Americans, the growing segment of the U.S. population, have more than quadrupled their enrollment in higher education over the last two decades, but remain greatly underrepresented. The chronic disparity requires a range of interventions, from school curricula to financial aid, according to a new analysis of data prepared for President's Advisory Commission on Educational Excellence for Hispanic Americans.

Guillermo Linares, Juliet Garcia Sarita Brown, key leaders of the Pre-Advisory Commission, discussed the issues during a special media briefing at National Press Club in Washington, D.C. Commission officials also discuss the impact of rolling back affirmative action, the economic implications of the Hispanic talent in the educational pipeline, and the nation's workforce.

Archuleta Director of Santa Ana College Program

Irma Archuleta was named director of Santa Ana College's (Calif.) Extended Opp Program and Services (EOPS) office.

EOPS is a state-funded effort to provide special services to qualifying full-time community college students. Based on financial and educational criteria, students receive specialized career and academic counseling, tutoring, financial aid and grantees, and special workshops and activities.

Archuleta comes to Santa Ana a years at CSU-Long Beach. She has been a member of the League of United Latins of America Citizens (LULAC), Raza Advocat
California Higher Education, California State
Launa Network, South Coast Consortium of
Colleges and Universities, and the Hispanic
United Way of Orange County.

Claremont Graduate University
Fonors Cepeda

Y'vonne Cepeda, illustrator of children's books
such as Gracias, the Thanksgiving Turkey,
What Is Truly Cool World, and Nappy
Hair, was given a
Recognition of Merit Award from Claremont
Graduate University's (Calif.) George G.
Stone Center for
Children's Books. The
award honors an author or illustrator for a
single title or a body of work. Any genre
of children's or young adult literature from any
period or country is eligible for consideration.

One of Cepeda's outstanding characteristics
as an illustrator is his ability to jump from
subject to subject, culture to culture,
with ease. "I enjoy people so much that to
see their smiles, their choices about what to
wear and do, come before the color of their skin,"
Cepeda says. "I don't stereotype the character.
I go back to my experience as a person."

Fulbright Scholars Meet at
Manchester Community College

Manchester Community College (Conn.)
recently hosted its 11th annual Fulbright Scholars
panel discussion.

The scholars talked about the economic,
cultural, and sociopolitical influences of the
U.S. and Mexico. Guest speakers included
Ignacio Medina Nuñez (pictured) and Juan
Rene Segura Riceo.

Medina Nuñez is a visiting Fulbright
Scholar at Georgia State University and a
professor of Spanish and Latin American studies
at the University of Guadalajara, Mexico.
Segura Riceo is a visiting Fulbright Scholar
at the University of Pittsburgh and an assistant
professor in the School of Law at the
University of Guadalajara, Mexico.

Argentinean Peace Activist Speaks
at University of New Mexico

Adolfo Pérez Esquivel, who received the
Nobel Peace Prize in 1980 for his non-violent
efforts to bring peace and justice to all
people in Latin America, was the third of three
Nobel Peace laureates to speak in the
University of New
Mexico's 21st-Century
Speakers Series. His
talk was titled "Human
Rights and Justice for All: Jubilee 2000."

Pérez Esquivel is a long-time proponent of
human rights abuses. In 1972, escalating
violence in Argentina moved him to begin
publishing a periodical, Paz y Justicia. In 1974, he
became secretary-general of the group
Servicio de Paz y Justicia en America Latina.
As civil strife increased in Argentina, he
founded two human rights organizations.
In 1977, the Argentine government imprisoned
him for 14 months for denouncing the
government's vicious campaign of repression.

Pérez Esquivel has a master's degree from
the National School of Fine Arts in Buenos Aires.

Drew Study Finds Variance in
Practice Habits of Physicians

A study conducted by Charles R.
Drew University (Calif.) medical
students and faculty shows that
minority school-trained physicians are more
likely to serve low-income populations than
are their counterparts from majority schools.
A study abstract appeared in the January
2000 issue of American Journal of
Investigative Medicine.

Compelling data had previously suggested
that minority physicians would be more likely
do so than their non-minority colleagues.
But no research to date had established the
practice habits of minority physicians trained at
minority versus majority medical institutions.

The University, an Historically Black
University, is now also a charter member of
Hispanic-Serving Health Professions Schools
(HSHPS). The mission-driven Drew student
body and faculty are committed to changing
the face and health status of disadvantaged
and medically underserved communities.

Long Beach Hosts FOOMEX 2000
Conference

The Long Beach City College (Calif.) Center for International
Trade Development (CITD) held its inaugural FOOMEX 2000 Conference.
The Center was created in 1997 to provide free import/export technical assistance, in-depth training in international trade, valuable trade resources/research, and foreign trade promotion to Orange and Los Angeles County companies interested in expanding into international markets or streamlining import processes.

The Long Beach City College CITD was designated a California-Mexico Trade Assistance Center by Governor Gray Davis. As such, the CITD has received additional funding to support companies that wish to expand trade and commerce with Mexico.

Advanced Placement Program
Benefiting Texas-Pan American

Carmen Rincón and her brother, Hugo, two of 1,500 students at the University of Texas-
Pan American (UTPA), represent a growing
trend of students nationwide who are
getting a head-start on college before graduating
from high school.

Both are University
Scholars and both took
Advanced Placement
(AP) classes in high school, enabling them to
earn college credits.

Thanks to AP tests, concurrent enrollment,
and the UTPA University Scholars program,
Carmen and Hugo will receive their college
degrees earlier than the customary four or five
years. The Scholars Program, started in 1998,
allows qualifying entering students the opportu-
nity to receive a four-year tuition and fees
Distinguished Achievement Scholarship, and
designation as a University Scholar.

Pew Charitable Trusts Support Comprehensive Study

The Pew Charitable Trusts, the Hispanic National Alliance of
Evangelical Ministries, and the Mexican American Cultural Center announced a three-year national project that will include the largest and most comprehensive study ever conducted on the impact of religion on politics and civic engagement in the Latino community.
Hispanic Churches in American Public Life is one part of The Pew Trust's larger national project to study the growing and changing role that religion plays in American public life.

The Hispanic Churches project, initiated by a $3.5 million grant from Pew, will examine the impact of Latino Catholic, mainline Protestant, Pentecostal, and new religious communities on civic engagement, politics, education, business, social programs, and community activism.

Ruiz Presents América Paredes Lecture at Texas-Austin

Vicki Ruiz, professor of history and chair of the department of Chicana and Chicano studies at Arizona State University, presented the 18th Annual América Paredes Distinguished Lecture, "Comadres, Cowgirls, Curanderas: Spanish/Mexican Women and Their Border Journeys, 1540-1900," at The University of Texas at Austin.

New Spanish Major at Salem State Approved

The Massachusetts Board of Higher Education approved a major in Spanish leading to a Bachelor of Arts degree at Salem State College, beginning in Fall 2000.

Qualified students may enroll in one of three concentrations within the major: teacher preparation, professional concentration (for those planning careers in business, law, health services, and technical professions), and a liberal arts-based literature and culture concentration. Unlike the three Spanish majors currently offered within the Massachusetts public college system, the new major will offer courses in the art of translation and interpretation. It will be the only major to prepare students for the Spanish government's internationally recognized diploma in Spanish proficiency (Diploma de Español como Lengua Extranjera).

Cal State-L.A. Students Participate in Aguila Real

The California State University-Los Angeles Teatro Universitario en Español presented Aguila Real by contemporary Mexican playwright Hugo Argüelles, at the Japan America Theatre. The play is the story of Isabel de Mocetumua (Tecuipox), a major figure of the Mexican conquest.

Mexican actress Angelica Aragon played Isabel de Mocetumua. Aragon has had international success in the Mexican soap operas Mirada de Mujer and Canaveral de Pasiones. Roberto D'Amico, actor and director of international fame, co-directed the production and played the part of Hernan Cortes. Alexandra Flores, actress and director, co-directed the play with D'Amico. Gema Sandoval, artistic director of Danza Floricanto/USA and award-winning choreographer, created the dances in the play. Cal L.A. Teatro Universitario en Español part ed in both the dance and the choral num

Cal Poly Library Photos Chrono Latino Laborers

CALPOLY Hundreds of black and white photographs depicting the struggles and triumphs of the Latino farm laborers in California's Maria Valley in the late 1960s were donated to California Polytechnic State University Luis Obispo Kennedy Library. Approximately 60 are included in San Luis Obispo County's first Latino history archive.

The collection and narrative is titled Decade of Farm Labor Organizing: Santa Maria Valley.

United Farm Workers (UFW) organizer Manuel Escarrera, who, over the course of the decade, captured the working conditions and the struggle of many Santa Maria Valley farm workers, says the photographs vividly portray the ongoing struggle for human dignity and justice.

Rutgers Conference on Hispanic Portuguese Language Studies

RUTGERS A lecture series on "Portuguese and Luso-Brazilian Studies at Millennium: Future and Its Past" at Rutgers University, N.J., sponsored the department of Spanish and Portuguese and the Latin American studies program.

The conference featured an undergraduate workshop, "Race, Culture, and Survival of the Local Caribbean: A Lesson for Us All!," a four-day conference that brought scholars in Spanish and Portuguese to address the linguistic, aesthetic, and literary boundaries in Spanish and Portuguese language studies in the new millennium.

Santa Monica Administrator Named ACE Fellow

John Gonzalez, Santa Monica College dean of matriculation and special programs, was a 2000-2001 American Council on Education (ACE) Fellow.

The prestigious honor was given to only three college and university faculty and administrators nationwide.
As an ACE Fellow, González will work on a special project at Santa Monica College and at another community college or university and will attend ACE seminars on higher education and study issues confronting higher education.

González started working at Santa Monica as a counselor in 1988. He has been coordinator of the Latino Center and has held several administrative posts. He has a bachelor’s degree and doctorate from UCLA and a master’s from Mount St. Mary’s College.

Rolón Granted Tenure at Gettysburg College

Alicia Rolón was granted tenure by the Genysburg College (Penn.) board of trustees based on her teaching, research, and governance. Her tenure and promotion to associate professor will become effective Sept. 1.

A member of the Spanish faculty, Rolón earned a bachelor’s degree at the Instituto Superior del Profesorado in Argentina, a master’s at Temple University, and a doctorate at the University of Colorado. Rolón has taught courses on Spanish language and literature and on contemporary Latin American culture. She is currently a member of the College’s Latin American Studies Committee and serves as advisor to the Honor Commission.

Northern Essex Receives $25,000 Grant from UPS

The UPS Foundation, charitable arm of United Parcel Service, has granted $25,000 to Northern Essex Community College in Massachusetts to greatly expand its new Fast Track program for Latinos who wish to earn certificates or degrees.

Fast Track was created last year to help Latino students who need remedial work before enrolling in classes at the college. It is an eight-week intensive skills development program for those who are communicating effectively in verbal English but need additional skills in reading and writing. Training is provided in vocabulary, reading comprehension, and writing/grammar.

Ruiz-Hurte Succeeds at Western Nevada Community College-Carson City

Dr. Aurora Ruiz-Hurte, hired as director of the ABET program at Western Nevada Community College (WNCC)-Carson City in December, has brought new energy and spirit to its adult programs.

Ruiz-Hurte wrote a grant for child care that was promptly approved by the State Department of Education. She also wrote two more grants to coordinate the Comprehensive Adult Student Assessment System and the English Language Learning and Instruction system.

“We want to refer students to higher education and give them the skills to get a better job or a GED—whatever the next level is,” said Ruiz-Hurte.

Ruiz-Hurte has a bachelor’s degree from Kean College, a master’s from Florida International University, and a doctorate from the University of the Dominican Republic, in cooperation with the state of Florida and the University of Puerto Rico.

Rios Speaks at Phoenix College

An “Arizona son” and acclaimed writer and teacher, Alberto Rios discussed “The Old Language of the New Century” at Phoenix College as part of the Maricopa Community College District Honors Forum Lecture Series.

Rios is a Regents’ professor at Arizona State University, where he has taught for 18 years. His work has appeared in more than 150 major national and international literary anthologies and in hundreds of individual publications spanning five genres: poetry, fiction, non-fiction, drama, and musical libretto. He serves on editorial boards of several literary magazines.

Rios has a bachelor’s degree and a master’s from the University of Arizona.

Cal State-L.A. Acquires Castaño Painting

The Luckman Fine Arts Complex, on the campus of California State University-Los Angeles, recently acquired a new painting by renowned Mexican artist Remedios Castaño. "Por una Lenguaje Universal," a mural-scale, three-panel painting, was created specifically for the foyer of the Luckman Theatre.

Clifford D. Harper, executive director of the Complex, said, “The Luckman is indebted to Ms. Castaño for her significant gift. It is of particular value to us not just for its aesthetic grandeur, but also as a symbol of cultural diversity, for which the Luckman stands.”

Castaño has participated in more than 30 group exhibitions since 1989, including shows in Washington, D.C., Italy, Israel, Spain, England, Russia, Kenya, Croatia, Cuba, Canada, Mexico, and many other locations.

Shippensburg Students Participate in Netscape Project

A Shippensburg University (Penn.) computer science class, taught by Dr. Carol Wellman, has been gaining experience with cutting-edge technology by contributing to the latest software from Netscape Communications Corp. Richard H. Pizarro, principal software development engineer at Netscape and a 1968 Shippensburg University graduate, arranged the project. “Without being thrust into it, they can see what a large-scale engineering project is like,” said Pizarro, who is the son of a Puerto Rican immigrant.

The opportunity arose through the emergence of the Open Source method of software engineering. In March 1998, Netscape publicly released the source code for its Communicator software through Mozilla.org, allowing independent developers to contribute additions and modifications to the original source code. By allowing a diverse group to contribute to development, Netscape is ensuring that the software will have wide appeal.
New Jersey City Hosts Statewide Diversity Forum

New Jersey City University hosted "Holding Higher Education Accountable: Diversity in Real Life," a statewide conference and forum for New Jersey’s higher education community. The program was presented by NJCU, the New Jersey Region of the National Conference for Community and Justice, and the New Jersey Commission on Higher Education. It was co-sponsored by Bloomfield, Burlington County, and Saint Peter’s Colleges, Fairleigh Dickinson and Rutgers Universities, the Association of American Colleges and Universities, and the New Jersey Department of Education.

Pictured here (l. to r.) are Alfred J. Cade, chair of the New Jersey Commission on Higher Education, and Dr. Carlos Hernandez, president of New Jersey City University.

"Deconstructing the Oreo" at Purdue-Calumet

"Deconstructing the Oreo: Latina Identity in White America," a performance dealing with Latina identity and assimilation into white culture, was presented in March at Purdue-Calumet University in Indiana. Adrienne Viramontes, a graduate student in Purdue-Calumet’s Department of Communication and Creative Arts, performed.

Smithsonian Board for Latino Initiatives Holds First Meeting

Smithsonian Institution secretary Lawrence M. Small, speaking at the first meeting of the 24-member Smithsonian National Board for Latino Initiatives, committed to taking the Smithsonian to regions of the country with large concentrations of Latinos and to increasing the representation of Latinos at the institution.

Composed of prominent Latinos in business, entertainment, media, and academia, the board is the first to address Latino issues across the entire spectrum of the Smithsonian. With 16 museums and galleries, several major centers for scientific research, and extensive historical archives, the Smithsonian is the largest such organization in the world.

Alamo Community College District News

Alamo Community College District (ACCD) Executive Vice Chancellor D. Ernest A. Martinez signed an agreement with Dr. Richard Jarvis, chancellor of the U.S. Open University, which will lead to the offering of postsecondary and graduate-level programs on the Internet in San Antonio and throughout South Texas. The University is affiliated with the U.S. Open University, which has offered higher education on the Internet for a number of years. ACCD schools will provide the first two years of Internet courses and the U.S. Open University will provide the complementary upper-division programs leading to bachelor’s and master’s degrees in several areas.

The Central/South Texas ENLACE Partnership, consisting of the ACCD and four other members, was awarded a $100,000 planning grant from the W.K. Kellogg Foundation to improve higher education opportunities for Hispanic youth. The grants represent phase one of the foundation’s $28.7 million ENLACE (Engaging Latino Communities for Education) initiative.

Trejo and Family Cook for Orange Coast College

In California, there is an amazing woman cooking and baking for Orange Coast College (OCC) students and faculty.

Dolores Trejo (pictured center), 60, the mother of eight children, 27 grandchildren, and eight great-grandchildren, began as a food service worker at Golden West College in 1982, joined OCC’s staff in 1984, and now is the head cook. Trejo, daughter Doreen Garcia (r.), and daughter-in-law Theresa Trejo (l.) combine their talents to bring a family atmosphere to OCC’s student center cafeteria, which serves students, college employees, and youngsters from OCC’s Children’s Center.

She undergoes dialysis treatments three times a week and works with a shunt implanted in her right arm. But that doesn’t stop her from arriving at the college at 6 a.m. each morning. "This is what God wants me to do," said Dolores. "I try my best because that’s the way I am."

Concordia University South Cent Offers Bilingual Education

Concordia University Wisconsin has opened an adult education center on Milwaukee’s south side to provide opportunities to Hispanic students. Although all classes are taught in English, the staff is bilingual.

Concordia University South Center is the first school of its kind in Wisconsin to offer a bachelor’s degree. At present, mostly busy courses are offered. As enrollment and room demand increase, the center will offer accelerated degree programs in management and communication, criminal justice administration, liberal arts, and health care administration, as well as medical assistant certificate programs.

Concordia also offers English as a Second Language courses at the university level, available to both students and non-students. Many organizations provide literacy-based ESL classes, but Concordia offers proficiency-based certification in reading, writing, and conversation, allowing residents to achieve greater language fluency.

Cisneros Receives Media Award

The International Advertising Association Florida Chapter presented its first-ever America Media Achievement Award to Gustavo A. Cisneros.

Citing Cisneros’ leadership, well-recognized business expertise, dedication, and philanthropy, the association spokesperson said that Latin America as a region has gained recognition and respect as an important aspect of the world market. The Cisneros Group of Companies, an organization with substantial operation in Latin America, Europe, and the United States, has annual revenues exceeding $35 billion.

Cisneros is on the board of directors of many of the world’s most prestigious educational institutions. Among them: Rockefeller Foundation, Harvard, and Johns Hopkins University, and the Wharton School.
Sanchez Featured in San Francisco Millennium Series

Author Thomas Sanchez recently concluded the University of San Francisco (Calif.) Gleeson Library Associates (GLA) millennium series at its spring meeting with a discussion of his new novel, *Day of the Bees* (published by Alfred A. Knopf). Joining Sanchez in conversation was GLA Fellow Fr. Alberto Huerta, University of San Francisco associate professor of modern and classical languages. The event was titled “Eros, Destiny, and Danger in the New Millennium.”

Sanchez’s first novel, *Rabbit Moss* (1973), a generational work of the Washo Tribe of Northern California, was cited as one of last century’s pivotal fiction works by the San Francisco Chronicle.

**PUBLICATIONS**

**The White Scourge: Mexicans, Blacks, and Poor Whites in Texas Cotton Culture**

By Neil Foley

The rigid boundaries of black-white relations fail to account for groups, like Mexicans, located somewhere in the “ethnoracial” borderlands between Whiteness and Blackness. Neil Foley examines race relations in central Texas, exploring how Mexicans, Blacks, and poor whites negotiated and manipulated the racial space in this borderlands province between the South, the West, and Mexico.

**Pirate Novels: Fictions of Nation Building in Spanish America**

By Nina Cerati-Nava

The author examines an overlooked genre to reveal how history and fiction blend to address important issues of nation building in 19th-century Spanish America. In the figure of the pirate, bold and heroic, the author shows the power of armed bands to challenge the Spanish Empire.

**The Farming of Bones**

By Edwidge Danticat

In the Dominican Republic in 1937, Amabelle, a young Haitian woman orphaned at the age of eight, is a faithful servant to the young wife of an army colonel. She goes on to become the wife of Sebastian, an itinerant sugarcane cutter, and to return with him to Haiti. Instead, nationalist madness erupts, and terror engulfs them.

**To Defend Our Water with the Blood of Our Veins: The Struggle for Resources in Colonial Puebla**

By Sonya Lipsin-Rivera

What happened when native peoples and Spanish landowners in 18th-century Mexico competed for increasingly scarce water? In a book that studies the interplay between the environment and colonial institutions, the author examines the exercise of power by elites in colonial Puebla and how it brought ruin on Indian communities by denying them access to the water they needed to survive.

**La Música de los Viejitos: Hispanic Folk Music of the Rio Grande del Norte**

By Jack Loeffler, with Katherine Loeffler and Enrique R. Lanadrid

A blend of religious and secular music from 16th-century Spain, Mexican-influenced folk tunes, and melodies indigenous to the life of the region, the music covered here includes romances, “cumbias,” “sones,” corridos, canciones, ceremonial and religious music, and dance music. Each song appears in both Spanish and English. A companion set of compact discs is also available. Photography by Jack Parsons.

**Democracy in Mexico: Peasant Rebellion and Political Reform**

By Dan La Bot

This book attempts to put the Chiapas Rebellion in the larger context of Mexican history and society. The focus is on Mexican struggle for democracy—not only free and fair elections, but human rights, civil rights, and the rights of workers as well.

**Hear My Testimony: Maria Teresa Tula, Human Rights Activist of El Salvador**

Lynn Stephen, ed. and trans.

There are thousands of women in El Salvador with little formal education, no political experience, and extraordinarily difficult lives who have participated in a wide range of struggles. This book documents the life of...
one such woman, María Teresa Tula, a working-class housewife who became an internationally known human rights organizer.

**The Political Calypso: True Opposition in Trinidad and Tobago, 1962-1987**

By Louis Regis

Calypso, a traditional form of music in the Caribbean, began in Trinidad and Tobago as a subtle protest against British rule. Louis Regis examines the evolution of the political calypso from 1962 to 1987, the period of Trinidad/Tobago's independence from Britain, and presents the text of lyrics from this popular folk-urban musical form.

**Curriculum, Culture, and Art Education: Comparative Perspectives**

Kerry Freedman and Fernando Hernández, eds.

Consisting of international case studies of art education by scholars in different countries, this book analyzes the translation of cultural knowledge through curriculum policy and practice. Each chapter focuses on historical and cultural influences on educational ideas that have crossed national borders and been transformed in the process.

**A Season in the Sun**

By Roger Kahn

In 1976, Roger Kahn spent an entire baseball season, from spring training through the World Series, with players of every stripe and compe-
tence. The result is this book, in which Kahn reports on a small college team's successes and hopes, a young New England ball club, a failing major league franchise, and a group of heroes on the national stage.

**Baseball and Other Matters in 1941**

By Robert W. Creamer

Robert Creamer said he would write whenever he saw current movies about the 1930s and 1940s that stress snap-brimmed fedoras and shiny old automobiles, as if those summed up the period. Creamer wrote this book to explain to his children and their contemporaries what 1941 felt like to him. "It is not a comprehensive account," writes Creamer. "It is merely an attempt to tell them how I felt, to talk a little baseball, to explain some heroes, and to puncture a few myths, although myths are puncture-proof and never die."

**Harvesting Coffee, Bargaining Wages: Rural Labor Markets in Colombia, 1975-1990**

By Sutti Ortiz

Offering an insightful scrutiny of rural market behavior and a convincing explanation of why farmers fail sometimes to manage their laborers in ways predicted by market models, this book shows how power imbalances and social conditions can impair the ability of laborers to attain a fair market contract during lax labor market periods.

**The Identity of Liberation in Latin American Thought: Latin American Historicism and the Phenomenology of Leopoldo Zea**

By Mario Sáenz

This is a book about a period of world history in which Latin American philosophers reflected and developed many of the most important philosophical ideas of the century. Those reflections and developments pertained to socioeconomic class analysis, and philosophies of culture and identity.

**Power, Patronage, and Political Violence: State Building on a Brazilian Frontier, 1822-1889**

By Judy Bieber

Judy Bieber explores the relationship between state centralization and municipal politics in Minas Gerais, Brazil, during the Imperial Period, 1822-89. She charts the 19th-century origins of "coronelismo," a form of machine politics linked rural power and patronage at municipal level to state and federal policies. Her research provides a key to explain Brazil's ability to maintain territorial political cohesion within the framework of constitutional monarchy instead of fragmenting violently, as did many Spanish republics.

Book Review

By John Wegner

Rudolfo Anaya’s most famous novel, Bless Me, Ultima (1972), is a classic in American literature. A novel that teaches well in both high school and college, it tells of Antonio Marez, a six-year-old Chicano boy living in New Mexico, and of the tumultuous year when Ultima, a woman old and wise, moves in with his family. The plot is exciting, and Anaya’s magical realism and eloquent prose make the novel very readable.

The novel traces Ultima’s influence on Antonio as she teaches him about his heritage and how to overcome the conflicts around him. In addition to seeing two men killed, Antonio sees Ultima accused of witchcraft and witnesses her amazing power in the face of evil. Her magical cures with herbs and potions challenge beliefs instilled in him by his parents.

As a young man, Antonio is torn by his parents’ conflicting dreams for him. His mother, the daughter of a farmer, believes that the blood of their ancestors will prevail and that Antonio will become a priest of the pasturas. The father hopes his son will choose life on the llano and become a vaquero, as the father was before marriage. This conflict between his mother’s people of the moon and his father’s people of the sun establishes one of the essential themes of Anaya’s work, and Antonio’s coming of age transcends cultural designations. His fear of school, his struggle to fit in with his classmates, even his first communion and questions about God’s presence in the world establish Anaya’s novel as one about growing up.

However, Bless Me, Ultima is fundamentally a novel that privileges Chicano heritage, culture, and art. Ultima is a curandera whose presence helps Antonio establish his own dream for himself. She arrives with an owl who acts as Antonio’s protector. This owl, overt symbol of Ultima’s magic, is her “spirit.”

“It had come with Ultima, and as men brought evil to our hills, the owl had hovered over us, protecting us. It had guided [Antonio] home from Lupito’s death. It had blinded Tenero the night he came to hurt Ultima, the owl had driven away the howling animals the night we cured no uncle, and it had been there when the misery of the Téllez family was removed.” Antonio’s connection to Ultima is strong. She delivered him, but more important is her ability to open Antonio’s eyes to his cultural heritage.

Anaya’s novel begins with Antonio’s first-person reminiscence that “Ultima came to stay with us the summer I was almost seven. When she came the beauty of the llano unfolded before my eyes, and the gurgling of the waters of the river sang to the hum of the turning earth... She took my hand, and the silent, magic powers she possessed made beauty from the raw, sun-baked llano, the green river valley, the blue bowl which was the white sun’s bone.” Ultima’s magic enters the dogma of the Catholic Church. Antonio’s discovery of pagan past of his people provides a mythic legacy as important as Catholicism of his mother, and Ultima’s presence opens his eyes to world around him. The lessons she teaches Antonio allow him to realize that his parents will not decide his future. Instead, he understands that he will “have to build [his] own dream out of those things were so much a part of [his] childhood.”

Anaya’s novel is a joy to teach because the students almost always enjoy reading it. Deceptively simple, students will easily recognize Antonio’s struggle to grow up. Further examination of the novel, though, reveals a complexity worthy of in-depth analysis. Students will help understanding the novel’s magical realism tendencies, and many dens will need a quick lesson in Chicano cultural symbology: The Virgin de Guadalupe, the Black Eagle, Aztlán, the Sun of La Llorona, and even La Huella (the Delano Farm Work Strike beginning in 1965) are important figures within the novel’s symbolism. The racial conflict between Chicanos and Anglo in town is a subtle but fertile area for discussion. Antonio’s brothers have been drafted in the and his father believes “that the town steals our fight.” The power structure of the town is not one oppressive, but Anaya includes enough images that all the reader to see that the conflict between an unjust and the Chicanos from across the river is real.

Award-winning novelist Rudolfo Anaya is Professor Emeritus of English at the University of New Mexico and Grandfather of Chicano literature. Along with the other books in New Mexico Trilogy (Heart of Aztlán and Tortuga), Ultima explores Chicanos’ sense of mixed heritage and cultural exile from their ancestors’ land. In each of the Trilogy novels, the life and growth of Ana Ulises seem directly related to re-creating with their Chicano heritage, an often painful journey, physically and psychologically. Albuquerque [sic] (1992), winner of the PEN Center West Award for Fiction, explores language and its appropriation to people’s sense of self. Zia Summer (1995), Rio Grande Fall (1996), Shaman Winter (1999) weave magic realism with the conventions of murder mystery. The Farilios of Christmas (1995) and Maya’s Children (1996) are children’s books, seamless and colorful re-tellings of age-old Chicano myths.

Anaya’s ability to create and re-create stories that cross cultural boundaries makes him an author of universal importance and appeal.

John Wegner teaches in the English Department at Angelo State University, San Angelo, Texas.

Position Announcement

FOUNDING DEAN
School of Science and Mathematics
California State University, Bakersfield

Description: Due to an academic recognition, California State University, Bakersfield (CSUB) is initiating a search for the Founding Dean of the School of Science and Mathematics. We seek an academic leader with vision and energy who will work collaboratively to build a distinguished School of Science and Mathematics. Science and Mathematics offers baccalaureate and masters degrees in disciplines of biological and physical sciences, and mathematics, and in professional programs of computer science, environmental resource management, and nursing. Our new baccalaureate degree programs in engineering will be hosted in this school. Science and Mathematics at CSUB participates in a diversified baccalaureate degree program in Liberal Studies for students interested in elementary school teaching. In addition, Science and Mathematics is establishing baccalaureate degree programs at the University's off-campus center in Antelope Valley.

CSUB enrolled its first students in 1970 and is one of the 23 campuses in the California State University system. In Fall 1999, CSUB enrolled 6,000 students and 5,246 full-time equivalent students (FTES). In Fall 1999, Science and Mathematics enrolled over 1,000 students and had 60 full-time faculty members. For additional information, please refer to CSUB Home Page at http://www.csusb.edu.

The service region for CSUB is larger than West Virginia and includes the Southern Sonoita Valley, the eastern Sonoita Valley, and the western Mojave Desert.

Responsibilities: The Founding Dean for the School of Science and Mathematics (SA) is expected to provide leadership within the context of the CSU system and CSUB service region. He/She is responsible for ensuring teaching excellence, research, scholarship, and community service within the School; recruiting, hiring, and evaluating all S&M faculty; and academic planning, budgeting, and personnel management for the School. The Dean is expected to work collaboratively with faculty and other academic administrators in all curricular matters and in the development of strong, innovative academic programs. He/She will have major responsibilities in acquiring grants and contracts.

Qualifications:
1. An earned doctorate and a record of teaching excellence and scholarly achievement and other qualifications sufficient to merit appointment as a Professor in one of the disciplines in the School of Science and Mathematics;
2. Appropriate academic administrative experience leading to the level and responsibilities described above;
3. Demonstrated success in the acquisition of external funding and the development of community partnerships;
4. Effective engagement of faculty, students, staff, other university administrators, and members of the greater community;
5. Commitment to the ethical and culturally diverse population served by the University.

Applications and Nomination: Review of applications will begin immediately and will continue until the position is filled. Applications must include the following:
1. Letter of application addressing the responsibilities and qualifications described above;
2. Current vita;
3. Names, addresses, telephone numbers, and e-mail addresses for at least four (4) references.

Nominations and applications should be sent to:

Chain Search Committee
Dean for the School of Science and Mathematics
Office of the Provost
California State University, Bakersfield
9001 Stockdale Highway
Bakersfield, CA 93311-1999

Salary and benefits are competitive and commensurate with experience and qualifications. Appointment is expected to begin as soon as possible.

CSUB favors and appreciates ethnic and cultural diversity among its faculty, staff, and administrative staff. Applications from women, ethnic minorities, veterans, and individuals with disabilities are welcome.
Capella University's School of Psychology is hiring adjunct faculty in the following areas of specialization: Addiction Psychology, Clinical Psychology, Educational Psychology, Family Psychology, Health Psychology, Organizational Psychology, and Sport Psychology.

Context: Capella University is a regionally accredited institution of higher education which offers undergraduate and graduate degree programs, certificates, and continuing education to adult learners who seek to integrate advanced study with their professional lives.

Responsibilities: Adjunct faculty are part-time faculty who serve as independent contractors. Adjunct faculty teach graduate courses in the core and specialty curriculum, mentor graduate students in their specialty area, and serve as residency faculty in academic sessions. They serve on School and program committees and share full voting privileges in academic matters. With members of the full-time core faculty, adjunct faculty are responsible for ensuring the student's educational experiences are consistent with the prevailing national standards for the education of professional psychologists.

Qualifications: 1) Earned doctorate; 2) Interest in and commitment to teaching in an online environment; 3) Proficient in the use of Internet tools; 4) Have prior graduate teaching experience.

Salary: Commensurate with experience and qualifications.

Starting Date: April 1, 2000

Deadline: Review of applications will continue until positions are filled.

Application Procedure: Send letter of application, vita, three letters of recommendation and transcripts to:

Janet Korpi
Human Resources
Capella University
330 2nd Avenue South, Suite 550
Minneapolis, MN 55401
Phone: (612) 252-4290 Fax: (612) 337-5396
E-mail: jkorpi@capella.edu

Attention: Human Resources.

NYU is an Equal Opportunity/Affirmative Action Employer.

DIRECTOR OF BOARD SERVICES
ASSOCIATION OF COMMUNITY COLLEGE TRUSTEES
Washington, DC

The Association of Community College Trustees (ACCT) invites applications for the senior level position of Director of Board Services. This individual will join the other members of the association staff in providing education, service, and advocacy efforts on behalf of member boards of trustees of community, junior and technical colleges.

The Director is responsible for the design, delivery and evaluation of the CEO Search Service, Intern CEO Service, and Board Leadership Retreat Service. He/she supervises the Associate for Board Services and the association's search, reference and retreat consultants.

The Successful Candidate Will:

- have a commitment to the values and principles of the community college mission, the lay governance of higher education, and diversity.
- exhibit the interest, enthusiasm, and creativity necessary to meet the challenges posed by the changing social, educational, political, economic and technological environment.
- have successful experience in the facilitation of group goal setting and achievement.
- demonstrate successful experience in management and supervision.

Citing experience or knowledge in the following areas can enhance candidate applications:

- Leadership experience with a community college
- Membership on a not-for-profit board
- Experience with executive search processes
- Use of information technology
- Designing education experiences or programs
- Association management

Individuals wishing to pursue this unique position should send a letter describing their interest, experience and qualifications to Ray Taylor, President, ACCT, 1740 N Street, NW, Washington, DC 20036; Fax 202-233-1297 or email rtaylor@acct.org. No phone calls, please.

HEAD, CATALOG DEPARTMENT
Northeastern University Libraries

Northeastern University Libraries invites applications and nominations of individuals with vision, enthusiasm and leadership ability for the position of Head, Catalog Department. The successful candidate will have the opportunity to lead the Libraries in the planning, development, and assessment of innovative programs for the organization, description, control of, and access to information resources, and to collaborate in the transformation of technical services.

Responsibilities: Administer the Catalog Department, including the cataloging, classification and content analysis of resources, database maintenance of Library catalog systems and physical processing and preparation of materials. Actively support and demonstrate commitment and sensitivity to diversity in the workplace. Ensure quality control and data integrity of the online public access catalog and Library holdings, and their linkages to networked and related systems. Establish cataloging policy and practices within the context of national and international standards, and in collaboration and consultation with other departments and libraries. Develop proposals for, negotiate, implement, and assess contract services. Assess the application of national and international cataloging, metadata and data definition standards. Research, test and evaluate information systems, and the effects of various search engines and retrieval techniques on the utilization of library management systems, virtual catalogs and other databases. Participate in consortial and other professional activities associated with information retrieval and data description and access.

Qualifications: ALA-accredited MLS degree required; additional advanced degree desirable. At least 5 years demonstrated successful experience in the management and supervision of cataloging and database maintenance activities in academic or research libraries. Demonstrated knowledge of national and international standards relating to the organization of knowledge, cataloging, classification, description and access, and emerging standards for digital resources. Demonstrated knowledge and experience with cooperative programs, consortia initiatives and operational workflow analyses. Knowledge of trends and issues in academic libraries, higher education, scholarly communication and emerging technologies. Ability to work with a wide variety of individuals at all levels. Strong service orientation. Commitment to staff development. Demonstrated commitment and sensitivity to diversity in the workplace. Excellent planning, analytical, communication, supervisory, project management and organizational skills.

Salary: Competitive, commensurate with qualifications and experience. Excellent benefits.

Review of applications will begin June 23 and continue until the position is filled. Please send letter of application, resume, and the names of three references to: Carol Chamberlain, Associate Dean Northeastern University Libraries, 320 Snell Library, 360 Huntington Avenue, Boston, MA 02115.

Please note: Northeastern University is an affirmative action, equal opportunity employer, and especially welcomes applications from minorities, women, and persons with disabilities.

Iona College is an equal opportunity affirmative action employer.
ROOSEVELT UNIVERSITY
College of Education
Associate Dean
The College of Education at Roosevelt University invites applications for the position of Associate Dean for the Albert A. Robin Campus in Schaumburg, Illinois. Roosevelt is a metropolitan University with campuses in Chicago and Schaumburg; the College offers certification and degrees in six program areas, a doctorate in Educational Administration and Supervision, and a number of special academic projects. The College has a dynamic faculty committed to teaching and committed to developing programs that meet the needs of graduates who will work in diverse and multicultural settings.

The position offers an excellent opportunity for a creative individual to implement new and innovative professional preparation programs in the College and to identify ways of better serving students and other constituencies. The Associate Dean will support the Dean in the management and operation of the College, including: strategic planning; development of department action plans; annual budget development; graduation clearance; and faculty searches, new faculty orientation and non-tenure faculty evaluation. The position is responsible for developing and implementing all grants, related on-campus and off-campus programs, and fundraising efforts.

Applications of individuals with vision, high energy, and a commitment to the development of collaborative relationships with community colleges, corporate and K-12 school district personnel is solicited. Desired experience includes: successful administrative work at the departmental or comparable college unit level; experience in developing partnerships that extend services to targeted education sectors; proven achievement in grant writing/research, teaching, and service; the ability to promote productive relationships with outside constituencies; familiarity with university advancement and development; and using technology to implement programs. Candidates for the position must also meet the requirements for appointment at the rank of Associate Professor in one of the program areas within the college, including an earned doctorate and a record of scholarship and teaching in the field of education. Background in Elementary Education and/or Early Childhood Education is preferred but not essential. A letter of application; a curriculum vitae; and the names, addresses, e-mail addresses, and telephone numbers of five references should be sent to:

Teryl Ann Rosen, Ph.D.
Chair of the Search Committee
Roosevelt University
College of Education
430 S. Michigan Avenue
Chicago, IL 60605-1394
tronso@roosevelt.edu

Roosevelt University is an equal opportunity affirmative action institution. Qualified minority candidates are especially encouraged to apply.

RECRUITMENT SPECIALIST
U.S. MERCHANT MARINE ACADEMY
The Academy offers a four year, residential Baccalaureate degree program to prepare selected young men and women for service in the United States Merchant Marine and United States Naval Reserve. The Recruitment Specialist will be involved in nationwide recruitment, selection, retention with particular emphasis on women and minority candidates and financial aid. Applicants should have a relevant bachelor’s or advanced degree. Required is professional experience in college level admissions programs, excellent communication skills; ability to manage and organize recruitment presentations; demonstrated knowledge of admissions counseling, current enrollment and retention issues and trends and knowledge of financial aid programs. The United States Government is an affirmative action and equal opportunity employer. Competitive service position in the Federal government. U.S. citizenship required. Send letter of interest and resume immediately to: Academy Personnel Office, U.S. Merchant Marine Academy, Kings Point, NY 11024. M/F/H/V.

ASSISTANT PROFESSOR
Operations Management

This tenure track faculty position requires a teaching interest and basic research emphasis in operations management or related field such as operations research or logistics.

Send application with curriculum vitae to Dr. Richard White, Chair Faculty Search Committee, Department of Management, College of Business Administration, University of North Texas, PO Box 305290, Denton, TX 76203-5290. Fax 940-565-4394.

The University of North Texas is an Equal Opportunity Employer. Women and minorities are encouraged to apply.

BOWDOIN COLLEGE

PRESIDENT

Bowdoin College, a private, highly selective, liberal arts college, seeks nominations and applications for the position of President. The new President will succeed Robert Edwards, who will retire on June 30, 2001, after 11 years of distinguished leadership.

Founded in 1794, Bowdoin College is situated in Brunswick, Maine, a town of approximately 22,000 on the Maine coast, 25 miles from Portland and 120 miles from Boston. Bowdoin's outstanding student body of 1,556 comes from 48 states and 32 countries and works closely with more than 150 distinguished full-time faculty. The endowment is approximately $470 million.

In recent years, the College has retooled its campus to include new and renovated science, math, coastal studies, and arts facilities as well as student residences and social spaces; completed a five-year comprehensive campaign that raised more than $135 million; expanded the number of outstanding faculty and continued to recruit strong students; established a plan and financial support for technology; and implemented a new residential life system without Greek societies.

The ideal candidate will be a proven, outstanding leader who can articulate a compelling vision that focuses on academic excellence and the value of education afforded by a residential, highly selective liberal arts college; effectively fundraise; develop a strong sense of community and be actively involved in the life of the College; exhibit a strong commitment to diversity and nurture a creative, intellectually stimulating environment for students, faculty and staff.

Members of the search committee will begin reviewing applications immediately and continue until the position is filled. For best consideration, please send materials no later than September 15, 2000. Nominations, inquiries and expressions of interest should be forwarded, in confidence, to:

VICE PRESIDENT FOR MINORITY AFFAIRS

The University of Washington invites nominations and applications for the position of Vice President for Minority Affairs. The appointment will be effective approximately January 1, 2001, or as soon thereafter as possible.

Founded in 1861, the University of Washington has been the nation’s leading public university in federal funding for research since 1960, with total external awards exceeding $600 million annually. It is also the preeminent teaching institution in the Pacific Northwest, enrolling an academically selective student body of almost 40,000 undergraduate and graduate students in 16 schools and colleges. Seattle is the center of a dynamic information industry with special ties to the Pacific Rim. Additional information about the University of Washington can be found at http://www.washington.edu.

Established in 1948, the Office of Minority Affairs is invested with the responsibility for ensuring diversity at the undergraduate level through its programs of K-12 outreach and recruitment, student counseling, instructional assistance, graduate and professional school preparation, and the activities and programs of its ethnic cultural centers. The Office of Minority Affairs is the parent organization for the University’s Educational Opportunity Program, which serves approximately 2,500 students.

The vice president administers all aspects of the office, which has a state-funded, bimennial budget of approximately $6.1 million, annual private donations and grants of approximately $2.3 million, and the equivalent of 80 full-time employees. The vice president reports directly to the president and is his primary advisor on matters affecting the well-being of students served by the office. The vice president also represents the activities, goals, accomplishments, and needs of the office to a variety of internal and external publics, and is expected to provide strong leadership for university outreach efforts and in its relationships with minority communities.

While the chosen candidate will possess a minimum of a master’s degree, an earned doctorate is preferred. Optimally, the candidate will have faculty experience and qualify for a faculty position in one of the programs within the University. He or she will have a proven record of understanding, respect, and appreciation for the ethically and culturally diverse populations of the Northwest. Strong oral and written communication skills, as well as substantial success in administering academic and student service programs for minority and disadvantaged students, are essential, as is a successful history of close working relationships with faculty and academic leaders. Strong scholarship fund-raising and development experience and skill are very important.

Although the vice president is primarily involved with undergraduate diversity, he or she will work with others in providing leadership for diversity and minority programs affecting all aspects of the University’s work. To that end, the vice president will convene regularly a council composed of diversity officers from the University. A collegial, consultative approach is essential.

Salary is negotiable.

To assure full consideration, applications and nominations should be sent by August 15, 2000 to:

Search Advisory Committee on the Vice President for Minority Affairs
Dean Emeritus Hubert G. Locke, Chair

Early Childhood Educator

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York Metropolitan area, and is one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in three colleges: Arts and Sciences, Education, and Professional Studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250.

The College of Education at New Jersey City University invites applications and nominations for the ten-year faculty position at the Assistant Professor (Ph.D. or Ed.D.) or Instructor (ABD) level in Early Childhood Education.

requirements: Classroom teaching experience in early childhood essential; public school teaching a plus; overall understanding of child development, early childhood curriculum development, and assessment a must; NJ Teaching Certification a plus; experience in teaching in urban settings a plus; evidence of scholarly potential.

Responsibilities: To teach a variety of undergraduate and graduate early childhood courses, supervise student teachers, advise students, serve as an advocate for early childhood, and serve on department, college and university committees.

This position is expected to begin with the Fall semester. Application deadline: June 14, 2000. Applicants should submit a letter of interest, resume, and the names, telephone numbers and e-mail addresses of three (3) references to:

Dr. Yiping Wan, Dean
College of Education
New Jersey City University
2039 Kennedy Boulevard
Jersey City, NJ 07305

DIVISION OF EARTH SCIENCES
NATIONAL SCIENCE FOUNDATION
ARLINGTON, VA 22230

NSF's Division of Earth Sciences seeks qualified candidates for 2 leadership positions:

Head, Special Projects Section (EP 00-12). This section coordinates the Division's multidisciplinary, educational, instrumentation, and facilities infrastructure needs of the earth sciences.

HISPANIC OUTLOOK 03 1999 54
AMERICAN UNIVERSITY
WASHINGTON, DC

ASSISTANT DIRECTOR OF ADMISSIONS

American University's Office of Admissions is seeking candidates for two Assistant Director positions: one for freshman recruitment and one for transfer recruitment. Experience in planning and implementing all recruitment activities in a defined U.S. recruitment region, evaluating freshman and transfer applications, and conducting presentations and interviews are required. Strong communication skills essential. Implementation of recruitment initiatives involves travel. B.A./B.S. required plus minimum of two years' direct admissions experience.

Candidates should visit the university's outstanding benefits package on our website at www.american.edu. To apply, complete an application in person or send your resume, cover letter and application or letters of nominations with resume and cover letter to American University, Office of Human Resources, 4400 Massachusetts Ave., NW, Washington, DC 20006-8954. Applicants may also call (202) 885-2591 for an application or download an application from our website. Fax: (202) 885-2558.

American University is an Equal Opportunity/Affirmative Action Employer. The university is committed to a diverse faculty, staff and student body. Women and minority candidates are encouraged to apply.

UCSF

Assistant-Dean for Curricular Affairs
School of Dentistry, University of California, San Francisco

The School is seeking qualified candidates for the full time position of Assistant Dean for Curricular Affairs. This new position was created to direct the refinement and implementation, and management of new curricular directions defined by the faculty, which include: integrating basic, clinical and behavioral science teaching, active learning, application of basic science principles to clinical instruction, and the transition of department-based to school-based curriculum direction and management.

The incumbent will be responsible for working with the faculty to oversee completion of a curricular planning process initiated by the faculty, implement the new curriculum, and oversee, coordinate, and manage future improvements and maintenance of the curriculum. In addition, the incumbent will be responsible for directing assessment of the curriculum and implementing faculty development activities regarding teaching and assessment of student performance.

Applicants should have training and substantial experience in education, experience in directing health science curricular affairs, preferably including dental education, and a doctoral-level degree. Salary and appointment for this position will be commensurate with the qualifications of the successful applicant. The position will remain open until it is filled. UCSC is an affirmative action/equal opportunity employer. The University undertakes affirmative action to assure equal employment opportunity for underutilized minorities and women, for persons with disabilities, and for Vietnam-era veterans and special disabled veterans.

Applications and nominations should be sent to:

Dr. Troy Daniels

COUNSELING MENTALLY-ILL HISPANIC IMMIGRANTS (MIHI)

Half of the immigrants to the U.S. are from Latin America. They share many common cultural characteristics, but the belief that they are alike is a stereotypical and misleading misconception. Newly arrived Hispanics acculturate, assimilate, and adjust to the American way of life. In that effort, they often experience strong feelings of anxiety, stress, insecurity, disappointment, fear, depression, guilt, doubt, frustration, avoidant behavior, and confusion. These internal states, combined with external demands, often lead to psychological stress reactions and psychosomatic symptoms.

Immigration frustrations of the mentally ill are maximized due to their restricted efficacy in adjusting. Feelings such as guilt and despair are often dominant: "I am a very bad and evil person..." a Mexican schizophrenic client told me; "I have all these bad thoughts and images because I am not good."

Other feelings are despair and shame. An Argentinean client diagnosed with manic depression confessed that no one in his familiar, social, or professional environments knew of his illness. "I cannot be a burden or a shame to my family." Their not knowing sometimes "makes things worse," but he must "continue pretending that everything is OK."

Often MIHI do not seek services until they have a serious breakdown and need hospitalization. A Venezuelan client, who holds a graduate degree, told me, after his first suicide attempt and hospitalization, "I have been having psychotic symptoms for two years now... This is why I had that car accident... This is the reason I stopped seeing my friends and broke up with my girlfriend... I tried so hard to hide my illness, but I failed. For anything in the world, I did not want to hurt my parents who sent me here to study; sacrificing so much..."

The Hispanic family with an ill member often experiences extreme frustration. The problem's complex effects create confusion and unpredictable family dynamics. The whole family undergoes a crisis.

Does American society support those who suffer a mental illness? Some express concern about the presence of mentally ill immigrants in the U.S. The mother of a Peruvian client told me in a very strong voice, "I came to the states very young, and I worked very hard all of my life. People can say that I worked to feed and raise my children. However, I believe that with my work, I have also contributed in my own, small way to the prosperity of this country. Latinos are not new in this country. We have been here for generations. We have contributed to this country as much as the other immigrants who came here five hundred years ago from Europe and now name themselves Americans."

The counselor of MIHI needs case management knowledge and skills, the ability to assess, link, and monitor services needed by client or family, and to function as an advocate, promoting client dignity and well-being. Volunteer counselors are needed for those MIHI lacking health insurance and ability to pay.

More education by the media is needed for Hispanics—about mental illness, services available, rights, and prospects. Support, guidance, and counseling on mental health issues are needed for Hispanic school and college students. Advocacy is needed for the MIHI. More research is needed on MIHI, the numbers affected, the frequency and variation of their illnesses and disorders, and new therapeutic approaches.

An effective intervener must be skilled, educated, and prepared. Immigration difficulties; cultural maladjustment; different cultural beliefs about mental illness; different family dynamics: financial, social, educational, and linguistic barriers; and different communication styles and body language complicate their work.

Counselors who have multicultural training, are open-minded and aware of personal biases, and are able to display empathy, concern, respect, and cultural sensitivity maximize their success with mentally ill immigrants.

A CAPITOL VIEW

BY GUSTAVO A. MELLANDER

Hispanic males, for all their bravado and braggadocio, are quite private and indeed shy about their personal sexuality. Hollywood publicity about Latin lovers aside, Hispanic males don't discuss their health problems, particularly if they are connected to their sexuality. They don't talk to their wives or lovers and, as bad, not even with their doctors.

That timidity can no longer be condoned. Many Hispanics are contracting AIDS and other sexually transmitted diseases as teenagers or in their twenties. They contract the disease through sexual contact or, if they are intravenous drug users, by sharing needles with infected persons. Heavy alcohol abuse is often part of the mix as well.

There was a time when drug abuse was considered to be an urban ill. But recent studies show that the most rural sections of the country have become lucrative markets for drug pushers. In short, there is nowhere to hide, not the manicured suburbs, not the most isolated rural location.

Education is the key to saving many college and high school Hispanic students who are at risk.

Homosexuals

If heterosexual Hispanics are reluctant to discuss their sexuality, Hispanic gays remain more closeted than other homosexuals. Many continue to deny their sexuality, and the down side of that is that they then don't seek the health assistance that could save their lives.

Although AIDS is not a gay disease—most African victims are heterosexuals—it has devastated the gay community. AIDS is an epidemic among Hispanic gays. Washington health officials have released a study that indicates that for the first time since AIDS was discovered, in 1998 AIDS was diagnosed among all more Black and Hispanic gay men than among white gays.

Since the AIDS epidemic began among gays, white gay men have made up the largest subgroup. But through the years, the percentages have steadily risen for Black and Hispanic gay men as those for white gay men decreased. For example, in the decade from 1989 to 1998, the percentage of AIDS cases among Black and Hispanic gay men rose to 51 percent from 30, and for white gay men, it dropped from 69 percent to 48.

Stigma about Homosexuality

The Center for Disease Control and Prevention officials said that the new figures were the strongest evidence yet of the magnitude of the epidemic among Black and Hispanic gay men, and they said that the shift had resulted from several factors. One was that while white gay men organized to educate themselves about the use of condoms and other prevention measures, minorities largely ignored the issue of infection with HIV, the AIDS virus.

The stigma about homosexuality seems to be playing a major role in the spread of infection, and the stigma might be even greater among Blacks and Hispanics than it is among whites, according to Dr. Helene Gayle, who heads the H.I.V. program at CDC.

Also, a CDC survey of 8,780 men found that many Black and Hispanic gay men who said they became infected with HIV from sex with other men did not identify themselves as homosexual or bisexual. Of those surveyed, 24 percent of Black and 15 percent of Hispanic men who said they had had sex with men identified themselves as being heterosexual compared with six percent among a similar group of white men.

By not considering themselves at high risk for AIDS, Black and Hispanic gay men might not seek or receive the H.I.V. prevention and treatment services they need and might unintentionally put their male and female sex partners and children at risk. Gay and bisexual Black and Hispanic men become infected at an earlier age than do white gay men.

The findings underscore the need for intensifying prevention efforts among Blacks and Hispanics, particularly those who might be poor and lack access to health care.

Dr. Campo said that when the Harvard AIDS Institute invited prominent Hispanic sports, entertainment, and health leaders and elected officials to a summit meeting on AIDS, "quite sadly," only one came.

"It was quite astonishing to see the silence in action when we were trying to develop initiatives in the face of these incredibly shocking statistics," Dr. Campo said.

"Some of the congressmen we invited represent districts that have among the highest AIDS rates in the nation, and none of them came."

The Future

Since powerful new drug treatments became available in 1996, the number of AIDS cases and deaths has declined among all gay men. But declines have not been as steep among Black and Hispanic gay and bisexual men when compared with white gay and bisexual men. This suggests possible differences in access to care and mindsets about seeking help.

Dr. Mellander is a professor at George Mason University.
Hispanics and the Health Professions

by Mari Carmen Sarracent

It used to be that the only health careers to which individuals could aspire were physician, nurse, or pharmacist. This is no longer the case. For Hispanics, entering one of these fields was and continues to be a personally challenging (financially and academically) experience, and a sign of having "arrived." While over the years the number of Hispanic physicians has increased, recently there has been a decline in the number of applicants to medical school (see article on page 11). Still, the number of Hispanics granted first professional degrees is up.

According to the U.S. Department of Education, in the 1995-96 school year, 702 Hispanics earned a medical degree compared to 648 in 1994-95. Marked increases were also reflected in optometry, osteopathic medicine, pharmacy, podiatry, veterinary medicine, and chiropractic medicine.

Outside of the traditional health careers mentioned above, in the last decade, the health professions category has grown to include a multitude of specialized technology-related and health administrative positions, all of which are reflected in the choice of majors available at colleges and universities. According to the Occupational Outlook Handbook 2000-01 Edition, which features data from the U.S. Department of Labor, Bureau of Labor Statistics, health services is one of the largest industries in the country, with about 11.3 million jobs, including the self-employed. About 14 percent of all wage and salary jobs created between 1998 and 2008 will be in health services.

The health services industry includes hospitals, nursing and personal care facilities, medical and dental laboratories, health and allied services (kidney dialysis centers, outpatient facilities), physician clinics, home health care services, dentist offices, and offices of other health practitioners, such as chiropractors, optometrists, podiatrists, physical therapists, speech language pathologists and dietitians.

According to the Outlook Handbook, health services firms hire individuals in what is referred to as professional specialty and service occupations in about equal numbers. Together, these two occupational groups cover nearly three out of five jobs in the health services industry. The next largest share of jobs is in administrative support occupations, followed by technicians and related support occupations. Executive, administrative, and managerial occupations account for only six percent of employment.

The professional specialty category includes occupations such as physicians, registered nurses, social workers, and therapists. Technicians and related support occupations refer to positions such as health information technicians, dental hygienists, and the like.

Universities and colleges, aware of the demand, have expanded their curricula to meet the need for more health professionals. According to the U.S. Department of Education, the health category is broken down into the following fields of study: communication disorders sciences and services, community health liaison, dentistry, dental services, epidemiology, health services administration, health and medical assistants, health and medical diagnostic and treatment services, medical laboratory technologies, pre-dentistry studies, pre-med, pre-pharmacy, pre-veterinary, medical basic sciences, mental health services, nursing, optometry, pharmacy, rehabilitation/therapeutic services, and veterinary medicine.

Overall, 1995-96, schools conferred 84,036 bachelor's degrees in the health professions and related sciences area. Master's degrees totaled 33,398, and doctorates numbered 2,119. Nursing degrees exceeded all other fields—44,544 followed by rehabilitation/therapeutic services (8,069); pharmacy (6,288); communication disorders sciences and services (6,120); health professions and related sciences, other (4,384); health services administration (4,247); occupational therapy (3,271); and physical therapy (3,225).

According to the U.S. Department of Education statistics indicating the TOP 100 schools conferring bachelor's degrees to Hispanics, nursing still topped the list. In the 1997-98 academic year, 1,096 Hispanics received a bachelor's in nursing; 32 schools awarded ten or more degrees. Florida International University awarded 61 nursing degrees, 45 of them to Latinos. Three Texas universities (University of Texas at El Paso, University of Texas Health Science- San Antonio, University of Texas-Pan American) held the next three positions.

Also from the Top 100 schools, rehabilitation/therapeutic services was the next most popular major, resulting in 283 B.A. degrees. CFU ranked No. 1 with 34 graduates in this area. Health services administration garnered 217 Hispanic graduates; medical laboratory technologies, 120; and health and medical assistance, 105. In the medical laboratory technologies field of study, no school exceeded 10 graduates.

In terms of first-professional degrees, the field of medicine still is by far the area with the heaviest concentration of Hispanics compared to other areas. However, other fields are recruiting growing numbers of Latinos as well. In 1997-98, Hispanics who received a medical degree numbered 766, followed by dentistry 138, chiropractic medicine 112, pharmacy 74, veterinary medicine 62, optometry 57 and podiatry 30.

**Health services is one of the largest industries in the country, with about 11.3 million jobs, including the self-employed. About 14 percent of all wage and salary jobs created between 1998 and 2008 will be in health services.**
Looking Beyond the MCAT and GPA

Admissions Committees Targeted for Training

BY ED BRENNEN

Across the board, the number of applications to medical schools was on the decline over the latter half of the 1990s. According to a 1999 *Journal of the American Medical Association* study, applications peaked in 1996, when 46,968 people applied for about 16,200 openings at the 125 medical schools accredited by the AMA. By 1998, applications had dropped by 12 percent, down to 41,004.

This drop was even more substantial among what the AMA classifies as underrepresented minority applicants—Mexican Americans, Puerto Ricans, Blacks, and American Indians. From 1996 to 1998, their figures had dropped by 12.8 percent.

When the study was released, observers noted that the overall decline could have been merely cyclical. Applications tend to decline during prosperous times, when students have many more options for high-paying careers. And with the growth of managed care, an unpopular trend from a doctor’s perspective, some students simply might have turned their backs on the medical profession all together.

But Dr. Barbara Barzansky, the principal researcher of the study and director of medical schools services for the medical association, was particularly concerned with the drop in minority applicants. The reason for her concern was that the decline came during a time of aggressive recruiting on the part of medical schools. She wondered what the long-term effects of the decline would be.

“Students who are from minority groups are more likely to serve minority groups,” Barzansky said in a Sept. 2, 1999 *New York Times* article. “In addition, there is a feeling [that] a diverse student body is considered a good learning experience for everybody.”

Even more of a worry was the fact that while the number of minority applications dropped, too did their acceptance rate. In 1997, the Association of American Medical Colleges released a report showing that the number of underrepresented minorities accepted to medical schools had dropped that year by 6.8 percent from 1996, down from 1,703 to 1,547. The primary culprit in this decline, according to the report, was the assault on affirmative action in higher education.

In 1995, the University of California’s board regents voted to end racial preferences in admissions to its medical schools. In 1995 California voters went on to pass Proposition 209, a sweeping anti-affirmative action measure. Then, in 1996, the Federal 9th U.S. Circuit Court of Appeals, in its *Hopwood* decision, ruled that race could no longer be used in admissions to higher education institutions (including medical schools) within its jurisdiction, which included California, Texas, Louisiana, and Mississippi.

“We fear that medical school admissions committees are being bullied into strict reliance on only quantitative criteria like grade point averages and test scores,” said AAMC President Dr. Jordan J. Cohen in a December 1997 article in *Focus* magazine. “Test scores are important for measuring an applicant’s knowledge, but we know that an individual’s character and ability to communicate are also critical.”
"This is an ominous sign for the medical community and our nation, which badly needs a physician workforce that is both diverse and reflective of our society as a whole," Cohen added. "We find it particularly alarming that a large percentage of underrepresented minorities are not just avoiding the medical schools in California, Texas, Mississippi, and Louisiana, but choosing not to pursue careers in medicine at all."

To help stem this tide, the AAMC offers the Expanded Minority Admissions Exercise (EMAE). Developed during the mid-90s, the EMAE is a workshop designed to train medical school admissions committees to see the potential for success among students whose standardized test scores and grade point averages might be lower than average. The EMAE is a revised version of the AAMC's two-decades-old Simulated Minority Admissions Exercise, which also studied the use of noncognitive variables for the assessment of minority students applying to medical school.

In the June 1996 edition of Academic Medicine, Dr. Timothy Ready, a senior staff associate in the DCM, co-authored a piece with the late Dr. Herbert Nickens, then vice president of the DCM, in which they explained why it was important to consider noncognitive variables when evaluating minority candidates.

"Although useful in predicting academic performance in medical school, there is no evidence that GPAs and [Medical College Admissions Test] scores predict who will be a good physician—one who will help patients avoid preventable illnesses and accurately diagnose and effectively and empathically treat those illnesses when they occur," they wrote. "Personal attributes such as integrity, leadership, emotionality, maturity, realistic self-appraisal, determination, and social interest are important in this regard. The AAMC's new Expanded Minority Admissions Exercise is designed to help identify these personal characteristics among minority applicants, lest they go unrecognized by predominantly white admission committees."

Since its inception, more than 800 faculty and administrators have participated in the EMAE, which is presented at medical schools.

The EMAE workshop focuses on non-cognitive factors that are believed to predict minority students’ success. They are:

* Leadership
* Realistic self-appraisal
* Determination and motivation
* Family and community support
* Social interest
* Maturity and coping capability, and
* Communication skills"

25 participants, is broken into three segments. In the first one-hour segment, the origin, background, and objectives of the EMAE are presented. Interviewing strategies, multiculturalism, and the predictability of cognitive and noncognitive factors in minority student success also are discussed.

In the second one-and-a-half-hour segment, participants break up into small groups and review actual real-life applications, rendered anonymous, of several minority students. Then a sequence of videotaped interviews with the applicants is shown. After the videotape, each small group must decide whom to accept or reject based on what they’ve gathered from the students’ applications and interviews.

In the third and final one-hour segment of the workshop, each group reports its selections to the rest of the participants. After a general discussion on the acceptance and rejection decisions, the EMAE facilitator summarizes the outcomes of the real applicants upon whom the presented case studies are based.

The EMAE is just one way that the AAMC addresses minority admissions to medical school. In 1991, the AAMC started a program called "3,000 by 2000" to increase medical school enrollment of underrepresented minorities to 3,000 by the turn of the millennium. After seeing some initial gains at the beginning of the decade, enrollment began to drop, however.

"We are basically at a point of enrollment where we would have been if the 3,000 by 2000 project had never been implemented," Dr. David Carlisle of the University of California, Los Angeles, said in a 1998 article in the Pediatric News. "I am very concerned about where enrollment will be in the next several years."

Another way that the AAMC addresses the enrollment of underrepresented minority students is through the Robert Wood Johnson Minority Medical Education Program (MMEP). Begun in 1994, the MMEP is grea...
"The impact of Hopwood decision and Proposition 209 on 1997 medical school minority applicants"

(Source: Association of American Medical Colleges)

Indeed, following the California Board Regents' vote to end racial preferences in admissions to its medical schools in 1995, the number of applicants, accepted students, and enrolled students took a nosedive. In 1994, there were 1,592 minority applicants to California medical schools, with 262 accepted and 185 enrolled. In 1997, only 1,216 minority students applied, with 186 accepted and 119 enrolled.

But even outside of California, medical school officials voiced a need for a more diverse workforce. Dr. Rubens J. Parnies, associate dean of students at the Case Western Reserve University School of Medicine, summed up the issue in a 1999 interview with Crain's Cleveland Business magazine. "There's a lot of very strong evidence that minority doctors are far more likely to set up practice in underserved areas," Parnies said. "That's critical with the population becoming more diverse."
Training Doctors to Treat Culturally Diverse Patients

Two-Year Program at Yale Med School

BY GARY M. STERN

How can doctors improve their skills with patients who might speak a different language and hail from a foreign culture? Or best serve patients with a wide range of attitudes toward health, medicine, and drugs?

In the past, doctors were left to improve their patient care skills on their own. But Yale Medical School, as well as several other nationwide leaders, has instituted a Cultural Diversity Program for the first two years of medical school that trains doctors to be sensitive to culturally diverse patients.

"The objectives of the program are to provide students with the knowledge, skills, and attitude to help them deal with cultural factors that impact on medical science," said Lisa Carriaga-Lo, director of the Office of Multicultural Affairs at the Yale School of Medicine in New Haven, Connecticut. She describes the major cultural factor as language differences, particularly patients who have limited English-speaking skills. But cultural differences can also involve varying attitudes toward health, such as a patient who believes in home remedies or alternative medicine, or patients whose religious beliefs affect their views on medicine. Other issues that emerge involve the patients' family structure and how that affects their attitude toward health, their lifestyle, and other psychosocial issues.

Yale Medical School developed its program in 1997, working closely with the Association of American Medical Colleges (AAMC), a Washington, D.C., nonprofit organization representing 125 medical colleges in the United States. Dr. Vanessa Gamble, former director of the University of Wisconsin Center on Culture and Medicine and now senior vice president of Community and Minority Affairs at AAMC, and the late Herbert Nickens of...
AAMC were instrumental in encouraging medical schools to train doctors to be sensitive to changing populations.

In fact, AAMC has spearheaded efforts to make the diversity class part of the curricula of all medical schools and a requisite for accreditation. By January 2000, public hearings had been held, and the AAMC had approved it. The AMA was deliberating on approval at press time. If approved, the Liaison Committee on Medical Education (LCME), which accredits medical schools, would make cultural diversity programs a requirement for all medical schools. “If it’s approved, it indicates that the accrediting body identifies cultural competence as an essential component in medical education,” said Dr. Deborah Danoff, assistant vice president in Medical Education at AAMC.

“More and more medical schools are including cultural diversity, either as a separate activity, as part of their curriculum, or integrated into their training,” explained Lily May Johnson, staff associate at the Association of American Medical Colleges. “Medical schools are focusing on preparing physicians to handle a diverse workforce. We want to see our physicians relate to people of different cultures,” said Johnson, a native of Trinidad. “Before a doctor can start prescribing medicine, he or she must accept a patient and be aware of their cultural differences,” Johnson noted. Dr. Danoff added, “The more a physician knows about himself or herself and about the population a doctor is serving, the more effective a physician will be.”

At Yale Medical School, the cultural diversity program is a required course and an integral part of the curriculum. Carriaga-Lo, who graduated from Harvard with a doctorate in psychology, describes the course as “a series of case studies ‘healing with diverse population groups.’” Learning takes place in groups of 10-15 medical students overseen by one clinical teacher.

It’s appropriate that this class occurs at Yale Medical School, whose students are quite diverse themselves. Of the 100 medical students in the class, half are minority, including about 25 percent Asian, 15 percent African American, and 10 percent Hispanic. New Haven, where the Med School is located, is also quite ethnically diverse, consisting of 40 percent African American, 15 percent Hispanic, and 55 percent Anglo, no Cariaga-Lo. Second-year Yale medical student Diana Bujorquez noted having day-to-day interactions with such a diverse student body enabled her to understand other cultures and will be reflected in better relationships with her future patients. Carriaga-Lo describes Yale’s curriculum: “community-based as well as research-intensive.” For example, its URI Health program focuses on health problems prevalent in urban environments, such as lead poisoning and asthma.

In the Cultural Diversity program, doctors are shown, for example, how to handle a 55-year-old Spanish-speaking man who enters a hospital to be treated for diabetes, accompanied by his daughter, who speaks English. One key issue involves communication with the patient’s daughter. Doctors are taught to consider the accuracy of the daughter’s translation of the father’s account. Since the daughter might be emotionally distraught because of her father’s illness, doctors are trained to calm her down to ensure that communication is accurate. How does limited English fluency impact a doctor gathering information? What if a patient is not compliant with the doctor’s prescriptive advice? Doctors are trained to be patient and uncover the patient’s motivation. They are trained to deal with potential issues that might affect this patient and his treatment, not only the needed issues of diabetes,” said Carriaga-Lo.

Doctors are also instructed how to handle a Spanish patient who uses curanderismo, a type of healing. Some patients will refuse to tell a doc...
about using *curanderismo* and will ignore traditional medicine. The more the doctor can establish trust with the patient, the more the doctor will be fully informed of the patient's medical and prescriptive habits. Another lesson taught in the class is that *curanderismo* itself is not necessarily harmful and should not necessarily be discouraged. Doctors are trained to uncover and elicit as much information as possible without being judgmental. 'The class aims to make them more sensitive, more aware, more competent in effectively communicating with a diverse student body,' Cariaga-Lo said.

Not only are language differences discussed in the class, but so are divergent attitudes toward health. If the patient believes in herbal medicine rather than traditional antibiotics, doctors are trained to deal with patients whose belief system differs from the doctor's or mainstream medicine's. What is the medical attitude that is most effective with patients who believe in alternative medicine? What biases and stereotypes do medical students bring to the patient that might need to be reevaluated? Once doctors understand their biases, how can they overcome them to deal with the patient most effectively? 'The class teaches the doctor to honor the cultural context of the patient. Practitioners should be able to gather appropriate information. Doctors are taught to get to the heart of the issue and not just deal in narrow, inappropriate medical terms,' Cariaga-Lo noted.

The cultural diversity class concentrates on improving a doctor's 'communication, getting the patient's history and story, and not trying to pigeonhole the patient in purely medical language,' explained Mary-Ann Etiebet, a second-year medical student at Yale Medical School and a native of Nigeria. She recalled one case study involving a Vietnamese patient who did not speak English and who was accompanied by his daughter who speaks English. But he was embarrassed to tell the doctor what was ailing him in front of his daughter and disguised what was really troubling him. "We learned not to use a family member as an interpreter but to always select a professional interpreter," said Etiebet. The class teaches her to be sensitive to a patient's non-verbal cues and that "doctor-patient confidentiality shouldn't be compromised."

"If you don't understand your own cultural biases, you're unaware of how stereotypes affect your behavior. The class helps doctors understand how everyone has a set of values, beliefs, and cultural attitudes, and that doctors are a part of this culture," said Cariaga-Lo. She added that health problems take place within someone's culture, not in a vacuum.

If a patient is a Jehovah's Witness who refuses a blood transfusion or raises questions about medical treatment, doctors learn how to handle this patient in a sensitive way. "In this case," said Cariaga-Lo, "there are legal issues that the doctor must be aware of. A doctor cannot force a patient to receive a blood transfusion without the patient's permission. But the class trains doctors to deal with the ethical issue surrounding this patient. How can a doctor deal with the patient empathetically and communicate effectively with the patient? If the patient refuses medical treatment, how can the doctor continue to support that patient and still provide the best medical care?"

In fact, the class enables doctors to be more effective with all patients, not just minority patients. Increasingly, many Anglos are involved in alternative medicine, so doctors who understand it will be more effective. Doctors who practice in urban centers such as New York, Miami, Los Angeles, and Chicago will benefit from this cultural diversity program, even smaller cities are undergoing population shifts. "This class will help me no matter where I end up as a doctor. In every little town in this country, even in the Midwest, doctors deal with immigrants," said Etiebet, the second-year student.

Ultimately, what effect will this "Cultural Diversity" program have on medical students who take it? The class taught Etiebet to be sensitive to all patients and never to presume anything based on the patient's nationality or ethnic background. "Listening to a patient's concerns is primary," said the second-year student. "Cultural diversity programs," said Dr. Danoff, "will improve a doctor's training, make them better able to meet the needs of the population they serve and better equipped to deal with their medical team." Diversity classes "get at the heart of doctor-patient encounters," said Cariaga-Lo. "This class helps develop doctors who understand and can focus on the needs of patients, regardless of whose the patient is from," she concluded.
University of Texas Health Science Center at San Antonio

Expanding Services to and for South Texas

BY ROGER DEITZ

With respect to serving the geographic region of South Texas, and therefore the sizable Hispanic population of this area, the University of Texas Health Science Center at San Antonio has a very special mission. Not only is the institution charged with delivering health care services, but also with training students in a wide range of specialties and educational programs.

John E. Howe, III, M.D., is the president of the UT Health Science Center (UTHSC). He recalls its beginnings: “We were chartered in 1959 with the mission of serving all of South Texas, from San Antonio to the Texas-Mexico border. Our Medical School opened its doors in 1968, and the Dental, Nursing, Graduate and Allied Health Schools opened in the ensuing years. Our commitment to quality education and training for the people of our region has never wavered.” That unwavering commitment has now earned UTHSC’s induction onto The Hispanic Outlook Honor Roll.

“Thanks to significant appropriations from the Texas Legislature in the 1990s,” he adds, “we have been able to create exciting new opportunities for health professional education in the Lower Rio Grande Valley, Laredo, Del Rio, and other areas. That commitment continues today as we develop a Regional Academic Health Center to be located in the Rio Grande Valley.” Providing health education affects the physical well-being of the community. And the various certificate and degree programs at UTHSC provide direct access to lifetime professions and coveted jobs. Training professionals to provide health care and do research is also of utmost importance in raising the standard of living for a community’s population. Then there is the pride that the diverse community has for such an institution. When people see familiar faces among the staff, they are reminded that the institution truly belongs to them, serve them.

“This city, this region, and this state have the talent, the infrastructure, and the commitment to be among the nation’s preeminent research centers,” says President Howe. “The Health Science Center and its programs help young people to become doctors, nurses, dentists, scientists, and allied health professionals. These talented individuals will treat patients and conduct research, and in doing so unravel the mysteries of illnesses affecting our own region—including diabetes, cancer.
Honor Roll Facts in Brief

INSTITUTION
University of Texas Health Science Center at San Antonio

LOCATION
Office of Student Services
7705 Floyd Curl Drive
San Antonio, TX 78229-3900
(210) 567-2628

ESTABLISHED
1959, doors opened in 1968

ENROLLMENT
2,556 (489 Hispanic)

DEGREE OFFERINGS
Bachelor’s
Master’s
Doctorate
Specialty Certificates

TUITION AND FEES
Varies greatly among the Health Science Center’s schools. (i.e. Master of Science in Clinical Laboratory Science, $2,500 (resident); Doctor of Dental Surgery (DDS), $34,000 (resident))

FACULTY
1,003 full-time (82 Hispanic); 297 part-time (40 Hispanic)

SEVERAL DEGREE PROGRAMS
Biochemistry
Dentistry
Medicine
Molecular Medicine
Nursing

NOTABLE HISPANIC-SERVING ORGANIZATIONS
Office of Special Programs
Texas Association of Mexican American Medical Students
Hispanic Dental Student Association
Mexican American Physicians Association

John P. Howe, M.D., president of the University of Texas Health Science Center at San Antonio

heart disease, tuberculosis, and even aging.”

The Health Science Center at San Antonio holds the official designation as a U.S. Department of Education Hispanic-Serving Institution (HSI). Hispanic-Serving Institutions are accredited and degree-granting public or private nonprofit institutions of higher education with 15 percent or more total undergraduate Hispanic full-time-equivalent student enrollment. Two of the five schools at the Health Science Center have exceeded the 25 percent criteria designated for HSIs—the School of Allied Health Sciences has 129 Hispanics or 27.7 percent, and the School of Nursing has 157 Hispanics or 26.4 percent of the class. Two other schools are more than halfway to reaching the 25 percent criteria.

Overall, Hispanics in both the graduate and undergraduate programs number 489, or 19.13 percent of the entire student body, which totals 2,556. The percentage of Hispanics in the total student enrollment has increased by more than three percent at the Health Science Center at San Antonio since 1995. Assuming that enrollment trends continue, overall Hispanic enrollment is projected to reach 25 percent by 1999. Forty of 71 Hispanics (56 percent) accepted the Health Science Center’s invitation to join the 1999 entering class. This figure was higher than in 1998 or 1997. Seventy-six Hispanic students entered the Medical School in 1998 and 1999, an increase of 200 percent from the previous two years (1996 and 1997). When ’98 entered the school, there are 1,003 full-time faculty, of whom 82 are Hispanic, and 297 part-time faculty, with 40 Hispanic members.

The Health Science Center occupies more than 100 acres of homes pastureland in the center of the South Texas Medical Center.
northwest San Antonio. The newly opened Robert F. McDermott Clinical Science Building and Allied Health/Research Building are situated on another 50 acres. The Institute of Biotechnology and the newly completed South Texas Centers for Biology in Medicine are located in the 1,200-acre Texas Research Park, a major biomedical research complex in western Bexar County. The Medical School and Bexar Hospital (now called University Hospital) were dedicated in 1968. The School of Nursing, Dental School, Graduate School of Biomedical Sciences, and School of Allied Health Sciences followed soon after. In 1972, the growing institution was renamed University of Texas Health Science Center at San Antonio.

The McDermott Building is home to the Research Imaging Center and the departments of ophthalmology and pharmacology. The adjacent Allied Health/Research Building houses the departments of occupational and physical therapy, clinical laboratory sciences, dental hygiene, physician assistant studies, and the Center for Biomolecular Structure Analysis.

The Health Science Center operates on an annual budget of $300 million, of which more than $128 million is sponsored annually in research and contract programs. As cancer research grows in prominence at this institution, there are plans to add an adult cancer research building and a new children's cancer research center, funded by a $200 million endowment, the largest ever in the history of cancer research. The institution is among the nation's leading schools in graduating primary care providers, and its Dental School has been consistently ranked No. 1 in the nation. The School of Nursing has been ranked among the best graduate schools in the country, and the respiratory care program in the School of Allied Health Sciences is nationally recognized. The Health Science Center is a major employer in San Antonio, with more than 4,600 employees. This also creates multiple business opportunities for local architecture, building, food-service, and medical-supply industries.

A new Regional Academic Health Center (RAHC) is an outreach of the Medical School in San Antonio. It will provide an upgraded health care delivery system and a sophisticated training program for physicians to a great segment of the poor population in an underserved region of the state. The Texas Legislature authorized the board of regents of the UT System to establish a medical education and research program serving Cameron, Hidalgo, Starr, and Willacy Counties. The legislature specified that, together with a community teaching hospital, the RAHC "may be used to provide undergraduate clinical education, graduate education, including residency training programs, or other levels of medical education." The regents assigned management of the RAHC programs to the UT Health Science Center at San Antonio, with the exception of public health initiatives, which will be the responsibility of the UT-Houston Health Science Center's School of Public Health.

Usually, starting a new medical school takes many years and many millions of dollars, and requires the presence of a large number of physicians, scientists, training programs, laboratories, classroom, etc. Using the Medical School in San Antonio as a "launching pad" for medical school training at the RAHC allows the creation of specialty training programs and the training of medical students without waiting for all of the above conditions to be met. This way, the new Regional Center is not starting from scratch. The regional dean will report to the dean of the Medical School in San Antonio, and academic oversight will rest with the San Antonio Medical School. Each student clerkship and resident specialty training program will be under the educational direction of the applicable chair of the corresponding academic department (medicine, pediatrics, obstetrics and gynecology, etc.) in San Antonio. The arrangement is necessary to meet the standards of the accreditation for medical schools. There is a scheduled completion date of February 2001 for a Hadaringen facility with a cost of about $25 million. Brownsville ($5 million) should be on about the same schedule, and Edinburg construction ($15 million) is about to begin, with discussions for a McAllen facility ($5 million) under way.

The Health Science Center has many more regional success stories—individual ones. Students from diverse backgrounds are found to excel at HSC, and there are ramifications for the community. Second-year medical student Manuel Ybarra grew up in Harlingen in the Rio Grande Valley and plans to return there someday. "My No. 1 choice, when I finish my medical residency and fellowships, is to practice in Harlingen or the area," he says. "I intend to make a difference." San Antonio's Cyndi Velasquez is a third-year medical student. "It's amazing to look around the class and see students from Yale and Harvard," she says. "I wanted to carnate Word here, but my parents came to every soccer game, while some of my classmates went to places like Stanford. But we're all in the same school now, so it doesn't matter."

Ybarra says he is "impressed with the Medical School's effort to increase the number of students from the South Texas/Border Region who return to practice there after graduation." Ybarra sees himself as part of the solution for that historically medically underserved area. Ybarra was one of 38 Hispanic students admitted to the Medical School in 1998 and one of 24 incoming students that year from the South Texas/Border Region. He is excited that the 1999 entry group grew to 42 Hispanics/22 South Texans, including a classmate, Luciano Vargas, from Carrizo Springs in Dimmit County; east of Eagle Pass and north of Laredo. Twelve Hispanics entered the Medical School in 1997; the year after the Hopwood decision ended affirmative action for admission to the state's universities. Velasquez was one of them. She is a member of a class that has posted extremely high scores in gross anatomy and biochemistry. Dr. Sylvia Fernandez is director of special programs at the Health Science Center. She says, "The 1997 class was a watershed, but thanks to Dr. David Jones [chair of the Medical School Admissions Committee] and his unbelievable commitment to making a difference—to recruiting talented and qualified Hispanic applicants to our school—we have rebounded in a very short time." The Health Science Center is among the nation's leaders in training Hispanic physicians and has been committed to this goal for a quarter century. The good news is that the dip in enrollment caused by Hopwood has been overcome.
Wake Forest University School of Medicine is situated in the center of a booming Hispanic community. There are now 30,000 Hispanics in the region, many of whom visit the institution for health care services. But Wake Forest faces a struggle common among institutions nationwide: the difficulty in understanding every community's needs.

"If you are not aware or you don't want to learn about the uniqueness of your community, then you miss a lot of opportunity to have connections to that community, and you probably will not meet the needs of that community," says Dr. Sonia Crandall, associate professor of family community medicine at Wake Forest.

Many institutions "certainly don't meet" and "would be insensitive to some," she says, adding that where that occurs, potential clients "won't be coming to your institutions."

Wake Forest began to address the concern by opening a Hispanic clinic. It is now going a step further, reaching out to students who might eventually staff that clinic, and to others across the nation. It is one of three schools that recently won grants to implement a diversity curriculum.

"Our communities are getting so diverse and have changed dramatically. We are constantly thinking about how we can serve the community better," Crandall says, adding that they are looking at both the present and the future.

That's the motivation behind two new programs designed by the American Medical Student Association. Last year, AMSA solicited requests from a number of medical institutions that want to pilot the programs to strengthen cultural education. AMSA announced grants in January.

"I think overall, doctors are ill-prepared to address patients' concerns of which patients are looking to address."

The curriculum comes on the heels of a published report that found that physicians today care for increasingly diverse populations but that many institutions have not
attention to the dynamics of difference, continuous expansion of cultural knowledge and resources, and a variety of adaptations to service models in order to better meet the needs of minority populations.

In 1995, according to statistics on AMSA's website, linguistic and cultural minority populations represented 26.4 percent of the U.S. population. By 2010, those populations will account for 32 percent of the population, and that number will climb to nearly 50 percent by mid-century.

But, say organizers, diversity within the physician workforce continues to lag behind the changing demographics.

"Medical schools overall have a responsibility to society at large, and AMSA felt over the years that medical education has not kept up with society's needs," says Grande, "such as what types of training doctors should have."

"Underrepresented minorities have really been declining in numbers of admissions to medical schools, particularly over the last five years," Grande says. "This is in the face of a growing minority population in the United States."

AMSA, which has 30,000 members, is striving to shape how future generations of doctors connect with the communities in which they work. But its largely white membership, its leaders admit, points to the difficulties in attracting minorities to the field of medicine: as few as five percent are Hispanic.

AMSA's Promoting, Reinforcing and Improving Medical Education (PRIME) program established two curriculum projects in conjunction with the federal Bureau of Health Professions, Health Resources and Services, and Administration.

Each school will design its project to implement either the Community-Responsive Curriculum Project or the Culture and Diversity Curriculum Project in collaboration with AMSA's PRIME Executive Panel and advisory group.

A school, for instance, is expected to instruct about two dozen students a semester in the program and to have it up and running between July and September, giving each about six months to plan. Those undertaking the diversity curriculum, like Wake Forest, get feel ill equipped—that they don't have the skills and knowledge to thrive in those environments. And that once they understand the different areas, students might alter their career paths and "their day-to-day experiences in the community/hospitals during their clinical rotations."

Three other schools are taking part in the culture and diversity program, which equips students with the skills to be "culturally competent" health care providers. Employing interactive sessions, it will involve students with patients and persons from various cultures to either reinforce or contradict their academic knowledge.

AMSA leaders say that this will prevent students from stereotyping a particular culture. The curriculum examines culture and its relationship to world view, and where a student sees himself or herself in the world.

Using a series of cultures, the curriculum will explore visible diversity—the physical differences—and invisible diversity—such as gender identification, socioeconomic status, and sexual orientation.

Learning about the ways different cultures view medicine and health issues affects patient treatment. According to the course description, "Failure to examine patient actions in the context of their cultural model of health and disease not only serves to deteriorate the physician-patient relationship, but can also lead to misdiagnoses."

"Cultures view different aspects of health and illness in a variety of ways. For example, the cause of illness might be attributed to organ failure for one culture, spiritual imbalance for another, or presence of bad spirits in a third," it continues.

The curriculum will teach students how to negotiate cultural conflict and will train them how to address situations where patients view treatment differently.

"We have many elements in our curriculum that address those kinds of issues, but we did not have a cohesive piece of the curriculum that would be focused on the issues of culture and diversity," Crandall says.

At Wake Forest, students won't start from a blank slate. Many originate from diverse communities. However, only two percent of the 432 students are Hispanic, and..."
percent of the student body is white. Meanwhile, the Hispanic community in the surrounding Piedmont Triad area has boomed.

"There's so much diversity within a community, regardless of the ethnicity, that they can be from similar ethnic backgrounds yet have a very diverse perspective on health care," Grandal says. "What I am hoping we can do is create a conscious awareness that maybe we don't know everything and perhaps we can learn a lot from the people in our environment who might have a different perspective."

She adds, "I certainly don't know the health care beliefs of all individuals in our community, and so it's an opportunity for me to learn more about how they view health, how they view illness, and what they think are appropriate treatments, whether these be Western or complementary or alternative practices."

While schools don't have to start the program until their summer or fall semesters, Wake Forest got a head start and began the program by winter's end. Grandal has high expectations that even after the pilot period ends, the program will thrive.

"It's like other pieces of the curriculum—nutrition education, for instance. We are figuring out where to get them into the curriculum. There has not been a concentrated, recognized format, a concerted effort," she says. "But this is very attractive."

In addition to Wake Forest, schools that will pilot the program are the Medical University of South Carolina and the Kansas University Medical Center.

In both projects, students will work in small groups each week and frequently visit outside agencies to meet with community members and leaders. AMSA also is bringing together students to urge them to take an active role in becoming leaders in their communities as well.

Twenty students from across the nation were nominated by deans to take part in the Primary Care Leadership Training Program at Ohio State University in Columbus, Ohio. Another 20 will meet later this year.

The leadership program engages students in curricular reform and health policy issues, and it aims to show the role of a primary care doctor in the community. The one-week program prepares students to care for underserved populations.

"AMSA felt it was critically important to begin to address diversity and cultural competency in medical education," Grande says.

Adds Lawler, "Everything that happens in the PRIME project comes back to improving medical education, and one of the primary concerns of any PRIME initiative is helping to serve the medically underserved populations."

AMSA now plans to monitor the progress of the curriculum. Schools are obligated to submit periodic reports, and AMSA must in turn report to the HRSA. AMSA also will provide technical and counseling students, visit the campuses, and help to design student activities.

Medical schools in piecemeal fashion have addressed cultural issues, but there hasn't been a specific curriculum before. The hope, Lawler says, is that others will follow suit and, inevitably, that students will seek opportunities in underserved regions.

"But what we're doing differently is making it its own small entity, its own adjunct curriculum," Lawler says. "It's definitely trying to improve upon the number of hours spent on this topic."

"Really, in the grand scheme of things, it falls down on the list on levels of importance," says Grande. "Oftentimes, unfortunately, these are looked at more as supplemental information, as nothing that is critical or required for education."

**UCSF**

Assistant Dean for Curricular Affairs

School of Dentistry, University of California, San Francisco

The School of Dentistry at the University of California, San Francisco, invites applications and nominations for the position of Assistant Dean for Curricular Affairs. The position is available immediately. The University of California is an affirmative action/equal opportunity employer and encourages applications from women and minorities. Applications are encouraged from those who have demonstrated a commitment to non-discrimination in educational programs and activities, and in providing an environment that is safe and free of discrimination and harassment.

The Assistant Dean for Curricular Affairs will provide leadership to the School of Dentistry in the development, implementation, and evaluation of the School's curriculum. The Assistant Dean will play a pivotal role in ensuring that the School's curriculum meets the needs of the profession and society.

The Assistant Dean will work closely with faculty, staff, and students to develop and implement new curricular initiatives. This position requires excellent interpersonal skills, strong organizational abilities, and a demonstrated commitment to diversity and inclusion.

Applications are encouraged from individuals who have demonstrated success in leading and implementing curricular initiatives, and who have a strong commitment to improving diversity and inclusion in educational programs and activities.

Applications are encouraged from individuals who have a PhD or equivalent degree in dental education or a related field. The successful candidate will have a strong background in curriculum development and implementation, and a demonstrated ability to work effectively in a team environment.

Applications are encouraged from individuals who have a commitment to diversity and inclusion, and who have a history of successful leadership in educational programs and activities.

Applications and nominations should be submitted to:

Dr. Troy Daniels
Office of the Dean
School of Dentistry
University of California, San Francisco
333 Parnassus Avenue, Room 5-660
San Francisco, CA 94143-0410

---

**THE UNIVERSITY OF UTAH**

ASSISTANT DEAN FOR DIVERSITY

The Graduate School at the University of Utah is seeking nominations and applications for the Assistant Dean for Diversity. A 12-month professional staff position reporting to the dean of the Graduate School. Candidates must have demonstrated ability and excellent interpersonal communication and problem solving skills. Experience with a diverse student population for recruiting and retention is preferred, and a master's degree in a related area is required. Primary responsibilities are recruitment and retention for graduate students historically underrepresented in graduate education. Administration of graduate and undergraduate student programs, development of externally funded grants and teaching and assessment of student performance.

Founded in 1850, the University of Utah is the flagship institution in the Utah system of higher education. It is accredited by the Northwest Association of Schools and Colleges with a graduate enrollment of over 4,900 students in 16 colleges. The University is located in Salt Lake City, a metropolitan area with a population of almost a million citizens in the greater Salt Lake Valley. The University of Utah is an affirmative action/equal opportunity employer and encourages applicants from women and minorities to apply. Applications are encouraged from individuals who have demonstrated success in leading and implementing educational programs and activities. Applications are encouraged from individuals who have a commitment to diversity and inclusion, and who have a history of successful leadership in educational programs and activities.

Applications are encouraged from individuals who have a commitment to diversity and inclusion, and who have a history of successful leadership in educational programs and activities. Applications and nominations should be sent to: David S. Chapman, Dean of the Graduate School, 310 Park Building, University of Utah, 211 South President's Circle, Salt Lake City, UT 84112-9016. 801/581-7642. This position will remain open until filled.
New Name and Expanded Mission for COSSMHO

Welcome to the National Alliance for Hispanic Health

By Inés Pinto Alicea

A Latino organization that has been around since 1973 and is dedicated to providing technical assistance, outreach, research, advocacy, training programs, and policy analysis on how health care issues affect Latinos is undergoing many changes, including a change in its name.

The organization, affectionately known as COSSMHO by those who have been touched by its work, will now be called the National Alliance for Hispanic Health—the third name in its history but one that its officials expect to stick for a long time because it reflects the organization’s present and future.

“We went through a deliberate process of asking ourselves who we are and who we should be,” said Dr. Jane Delgado, president and CEO of the newly named alliance. “For more than a quarter century, our members have delivered front-line health and human services to over 10 million Hispanic consumers. Our new name reflects the full range of our membership and recognizes that health and human services must be integrated to serve the consumer.”

Delgado said that nearly 70 percent of the organization’s 1,500 members voted, and of the voters, 97 percent endorsed the name change for the nonprofit. The alliance membership includes community-based organizations, health care provider organizations, governments, national organizations, universities, individuals, and for-profit corporations.

“It is invigorating to myself and my staff that our members are active,” said Delgado, adding that the growth in population of U.S. Latinos also prompted the need to change the name, refocus the mission somewhat, and strengthen some of the work of the alliance.

COSSMHO, the Coalition of Spanish Speaking Mental Health Organizations, was founded 27 years ago in Los Angeles. Two years later, and with a move of its headquarters to Washington, the organization again changed its name to the National Hispanic Conference on Health and Human Services, but still went by the acronym COSSMHO. Today, people are slowly adjusting to calling it The Alliance.

The nonprofit organization is now undertaking two major efforts—expanding its use of technology and strengthening its outreach to researchers at universities and other research organizations nationwide.

One such project is developing a database of service providers, clinics, and community organizations that serve Latinos with chronic illnesses or have been affected by domestic violence. Another involves a database of researchers and academicians who are Latino and/or are studying or are interested in studying Latino health issues so they can compete for National Institutes of Health grants and fellowships, said Falcon.

An Alliance brochure defines its challenge as follows: “to ensure that our nation’s research agenda addresses the unique research issues posed by Hispanic communities, brings the priorities of Hispanic communities to the full attention of policymakers and health service providers, and brings together data and communications technologies in ways that serve members and our communities.”

One related Alliance effort is to bring togeth-
er several of the National Cancer Institute's Comprehensive Cancer Centers and other university-based research centers or schools of medicine or public health to work in unison with community-based organizations. The project has developed a unique, comprehensive database on the treatment experiences of Hispanic women with breast cancer or abnormal mammograms and will publish a series peer-reviewed journal articles based on this database. The project also has developed a resource kit on the early detection and treatment of breast and cervical cancer. Hispanic women tend to have a higher incidence of cervical cancer than do other groups of women, and Latinas' incidence of breast cancer is said to be lower than that of others. Mortality of Latinas with breast cancer, however, tends to be higher because often treatment is delayed to when options are fewer and, as a result, the chances for survival reduced.

Lourdes Baexonde-Garbanati, an assistant professor for research in preventive medicine at the University of Southern California, is the coordinator of the western regional coordinating center of this cancer program, known as the National Hispanic Leadership Initiative on Cancer—Unidos Para La Salud, one of six sites under the initiative. She has worked closely with the Alliance on projects for about 13 years.

"The name change may expand opportunities for them, and it may begin to develop new and different roles for them," said Baexonde-Garbanati. "Communities respond to them, and they respond to communities."

She said that the organization, whose strengths lie in forming coalitions, doing advocacy work, promoting and using research for policy purposes, and encouraging groups to constantly evaluate their work, has had some challenges in dealing with university bureaucracies when expanding its outreach to that segment.

"They each have different systems, ways of doing work, and audiences," she said, adding that the Alliance is a vehicle for the distribution of research with policy relevance.

"This kind of data is often time-framed and therefore must be completed quickly. With policy research, if you don't catch the wave, it's gone. University survey research is not usually time-framed in the way policy research often is. University researchers tend to have more time to get the work done." Speaking of the Alliance and the university researchers, she said, "I think we've been able to work through the differences."

The Alliance has helped university researchers learn that they must be more diplomatic in community-based work by taking time to build relationships, she said.

"Researchers sometimes focus on the data collection aspects of their research in a community without always involving those communities from the beginning in the research process," she said, adding that the Alliance "has tried to encourage researchers to work with communities and vice versa on this effort."

Baexonde-Garbanati said that the organization should have an even brighter future in its efforts to work more closely with researchers since its history has been to work with community-based organizations. Many corporate and foundation grants are being tied more and more to community-based efforts, she said.

"The Alliance is in a prime position to contribute to that effort," Baexonde-Garbanati said.

Officials at the organization agree with her assessment.

"We are very focused on our role in communities and making sure that consumers get the services they need," said Adolph P. Falcon, the organization's vice president for science policy. Falcon added that their work is particularly critical since 451 percent of working Hispanics are uninsured in this country compared to nearly 23 percent of non-Hispanic whites and 34 percent of non-Hispanic Blacks.

Luis Mata, CEO and president of the Multicultural Area Health Education Center in Los Angeles, has worked with the Alliance and was a consultant to the organization for more than 10 years. In his work with the organization, he serves as a spokesperson for the March of Dimes and helped the organization develop a curriculum in Spanish on early prenatal care.

"What I love about the Alliance is that we are always partners in whatever we get involved in," Mata said. "It is a very fruitful relationship."

The Alliance was instrumental, he said, in helping his organization develop the infrastructure it needed to provide services and implement programs it wanted to carry out. His organization provides health education services focused on disease prevention in Los Angeles County. The organization also trains health professionals.

He would like the Alliance to take more steps to promote its work, and he feels that with sufficient financial support, it could capture a larger group of members. The limited funding also has affected the number of staff members available to its many projects, he added.

Mata said that his concerns about the organization's limited public relations efforts arise from a desire to see its great work receive more recognition. He praised the organization for including all segments of the Latino community.

in its work and for giving community-based organizations in Washington a voice. Mata himself travels to Washington about three times a year to advocate on Latino health issues.

"When the [politicians] are hearing it from community folks from different states, they know we mean business," said Mata. "We have been very successful in moving an agenda. Other organizations tell us what to do rather than ask us what we would like to do." The Alliance, he said, "has been very open with us. They don't try to do it on their own. They bring us to meet with public officials at the national level."

The organization's staff of 35 works on a relatively shoestring budget of $4 million. About 40 percent of its operating budget comes from corporate and foundation grants, another three percent from membership dues, and the remainder from government grants, individual grants, consultation fees, and sale of publications.

Alliance advocacy activities are based on three pillars: representing all Hispanic groups not accepting funds from tobacco or alcohol companies, and a commitment to community-based solutions. The organization says that its mission is to: inform and mobilize consumers, support health and human service providers in the delivery of quality care, improve the science base for accurate decision-making, promote appropriate use of technology, insure accountability, and advocate on behalf of Hispanics.

"It is not enough to have Hispanic health professionals," said Delgado. "Too often, the education they go through bleaches out their color."

The Alliance sponsors many programs and projects to carry out its mission. The following is a small sample:

- Operates the National Hispanic HIV Hotline linking callers to maternal and child health services (1-800-504-7081).
- Operates Proyecto ALFA (Aire Limpio para su Familia), a bilingual National Indoor Air Quality Hotline (1-800-SALUD-12). Part of this project also involved the development of publications about indoor pollutants. Also available to Hispanic consumers through this program is education on indoor air pollutants, referrals, and radon test kits.
- Operates the Hispanic Health Link, a Hispanic-focused national online network service bringing health information to thousands of agencies (www.hispanichealth.org).
- Published SALUD: A Latina's Guide to Total Health—Body, Mind and Spirit, a book that was also released in Spanish. More recently, the organization published The State of Hispanic Girls, a booklet that identifies factors and conditions that might lead Hispanic girls to engage in health-risk behaviors as well as those that might protect against such behaviors. The booklet provides messages that will encourage girls to make healthy life choices and the appropriate delivery system for these messages. The organization also offers a catalog of other publications for Hispanic consumers, health professionals, governments, and anyone interested in health issues.

- Provides training and technical assistance to health departments, governments, community-based organizations, health care providers, private organizations in a variety of areas, including: how to meet the needs of culturally and linguistically diverse populations and how to strengthen organizational capacity when working with Latinos who are at high risk for sexually transmitted diseases.

"Our work is not just identifying and solving problems in our community," said Delgado. "We believe in the power of education through education about how we live, our diverse, and the healthy choices we make—creating a new paradigm of health and well-being for the future and the nation. That is our commitment."

The Alliance advocates on behalf of Hispanics and ensures accountability of different entities nationwide in relation to Latino health. The organization studies whether the Environmental Protection Agency, the Department of Health and Human Services, the Department of Transportation, and their state and local counterparts carry out all programs with Hispanics in mind by ensuring that they have Hispanic action plans for all efforts.

"We are constantly getting the heartbeat of our community and bringing it back home," said Delgado.
Trinity's Inventive Hebe Guardiola-Diaz

Discovering Biochemistry in Everyday Life

BY ANDREA COMER AND SUZANNE ZACK

AZT, or zidovudine, is regarded as one of the most effective weapons against AIDS. But for Hebe M. Guardiola-Diaz, an assistant professor of biology at Trinity College in Hartford, Conn., the anti-viral drug is equally valuable for its ability to illustrate biochemistry in a very compelling way.

“When we were talking about enzymatic activity, I showed students the molecular structure of AZT and explain that by inhibiting enzymatic activity of AZT one is able, at some level, to help AIDS patients,” she explains. “Enzyme kinetics can be very cut-and-dry and very mathematical. Or, you can provide reasons why students should care about the understanding of molecular structure.”

Guardiola-Diaz teaches biochemistry and neurobiology in the biology department and in the neuroscience program. A Trinity faculty member for a year, she already has earned a reputation as a passionate and challenging teacher. It is a passion that she believes everyone should embrace. “How can you not care about life?” she asks. “We’ve all had headaches. We’ve all had the fear of getting an incurable disease. We all care about genetic diseases, especially young people who are thinking about starting families. How can you understand mental illness without understanding the biochemistry of the nervous system?”

Roasted in science

A native of Puerto Rico, Guardiola-Diaz’s interest in science with many other family members. She earned an undergraduate degree in chemistry from the University of Puerto Rico, then spent a summer doing research at the gerontology division of the Institute National de la Sante et de la Recherche Medicale (INSERM) in Paris. She earned her doctorate in biochemistry from the University of Michigan before doing a postdoctoral fellowship in the biochemistry of nuclear receptors at the Karolinska Institute, Sweden’s leading institution for medical education and research. Before coming to Trinity, she served as an instructor in biology at the University of Michigan. In her research, she is currently examining a family of proteins that reside in the nucleus of cells in the nervous system and that, when activated, control gene expression. An article based on related research into how cold affects an organism’s production of fat cells was recently published in the Journal of Biological Chemistry.

Says Professor of Psychology Priscilla Kehoe, who directs Trinity’s neuroscience program, “Dr. Guardiola-Diaz is an excellent teacher with serious concern for her students’ welfare and their advancement in scientific thinking. Her scholarly research adds another level of analysis to our diverse program. In the Neuroscience Methods course, her students have had the opportunity to examine cells of the nervous system called oligodendrocytes that cover certain neurons and are the very cells that as multiple sclerosis. The were able to learn to util niques that allow the g these cells in order to study nuration. For Trinity, this is a unique oppor to learn modern molecular n logical techniques as well ticipate in cutting-edge resea

Last summer, Guardiic and Professor of Chemists E. Henderson conducted an active phytoremediation project which students created an mental garden in a lead-c reaped vacant lot in Hartford. The goal was to remove the tox soil and reclaim the the neighborhood. Charles A. Dana Profes Biology and Department Chair Craig W. Schneider, “Hebe ideias and a bundle of

The six undergraduate and their two professors an in February that the speci of Indian mustard they pl the lot reduced lead from ees of 1,000 parts per (ppm) to fewer than 500 allowable level for soil that used for residential or ag purposes is 500 ppm.

“The garden was an demonstrates because that a poor neighborhood ted resources can tackle
The project appealed to our students who are very interested in the environment and very interested in doing something to improve the quality of life in Hartford.

The student research was supported with funds that Trinity received under a grant from the W.K. Kellogg Foundation and was conducted in association with a New Jersey-based biotechnology company that provided seeds and expertise for the project as part of its effort to explore the possible commercialization of the process known as phytoremediation, or the use of plants to remove pollutants from the environment or to render them harmless.

Phytoremediation promises potentially huge environmental and financial rewards because the use of plants poses a simple, safe, and cost-effective approach to the remediation of soils and water. The federal Environmental Protection Agency (EPA) estimates that there are more than 30,000 sites requiring hazardous waste treatment services throughout the United States. Lead contamination represents a particularly difficult problem because there are no permanent, low-cost solutions for heavy metal contamination.

The idea for the research garden originated with Guardiola-Diaz and another Trinity professor, David F. Henderson, who were interested in creating summer projects for their students. Guardiola-Diaz and Henderson, a professor of chemistry, independently approached college administrators for ideas. Each professor was unaware of the other's effort until administrators got them together.

"It was just great timing," said Guardiola-Diaz, explaining that she got the idea for the project when she and a neighbor who works for the Connecticut Department of Environmental Protection met at a housewarming party and began to discuss a plan to create a community garden.

The College agreed to finance the project, giving the professors $37,000 from its Kellogg Community Innovation Fund to hire students and purchase supplies. The fund was established in May 1998 when the Kellogg Foundation awarded Trinity a $5 million grant to support Trinity's strategic commitment to building academic-community connections that emphasize civic responsibility and educational innovation.

The lot selected for the garden project totals 1.2 acres and is adjacent to the House of Bread, a nonprofit and temporary housing for the homeless on Chestnut and Edwards streets in Hartford. It is also across the street from the city's Quirk Middle School and within a short distance of the gold-domed state capitol. The lot had formerly been the site of a paint store, accounting for the high levels of lead contamination in the soil. When the old paint store building was leveled several years ago, the debris was buried at the site, further contributing to the pollution problem.

A Trinity faculty member for a year, she already has earned a reputation as a passionate and challenging teacher.

The lot is owned by the City of Hartford, which had leased it to the Hartford-based Knox Foundation for use as a community garden. The foundation intended to create a community garden as it has done at 16 other locations in Hartford, but it was prohibited from going ahead with the plan once it was discovered that it could not be used for a new location to plant new experimental garden.

"This has been a great way to get students learning involved in the community," Guardiola-Diaz said. "The students have made presentations and talked to neighbors who stop by. It's been a really rich experience of being involved in the community, helping out our neighbors and learning. To a large extent this work is an extension of the classroom. It's something that is a part of what we are doing here at Trinity."
Problem-based Learning

Guardiola-Diaz tries to make her students care about what they're learning by making science relevant to them. Employing "problem-based learning" in her classes, she presents students with problems that relate to real-life situations. In a recent class, students considered the case of an unemployed man who was admitted to the emergency room in a coma, with alcohol on his breath. Students were given the results of a blood sample analysis—including alcohol, blood glucose, lactate, and pH levels—and told that after hemodialysis was started, the man's blood alcohol level fell, he regained consciousness, and he was released from the hospital two days later. The students were challenged to explain, based on the clinical evidence, what had actually happened to the man.

Neuroscience major Julie A. Plagenhoef, '00, who is currently taking biochemistry with Guardiola-Diaz, says that her professor's approach is very effective.

"One of the things that's difficult to do in the hard sciences is to relate what you're learning to the outside world," Plagenhoef notes. "But Professor Guardiola-Diaz gives us practice problems that could happen in our own lives." Since her junior year, Plagenhoef has worked as a research assistant to Guardiola-Diaz. She believes the experience will help advance her plans to attend graduate school and earn a degree in public health.

Says Isaac Bohannon, '01 biology major who's taken biochemistry with Guardiola-Diaz: "Professor Guardiola-Diaz wants students to think for themselves. In our biochemistry lab, we designed our own experiments using the scientific literature and techniques learned at the beginning of the semester. Doing experiments this way took longer than if we had followed the steps outlined for us, but it was much more out of it."

Guardiola-Diaz hopes that students will come to share enthusiasm for her subject. "Biochemistry is the study of molecules that do the wonderful things that we define as life," Guardiola-Diaz says. "It's very intellectually satisfying and a lot of fun to engage my students as they make this discovery."

UNIVERSITY OF HOUSTON
DEPARTMENT CHAIR
MECHANICAL ENGINEERING

The Cullen College of Engineering of the University of Houston invites nominations and applications for the position of Chair, Department of Mechanical Engineering. The successful candidate should have an established national and international reputation in research, and a distinguished record of academic and professional leadership. ME has programs leading to bachelor, master, and doctoral degrees. The department offers a highly ranked program with excellent faculty and research programs, and is actively building on these strengths through faculty searches. Detailed information about ME and links to university programs is available at http://www.me.uh.edu.

The position is available beginning January 2021, with a competitive salary and benefits. The Committee will accept and review applications until the position is filled. Send nominations and applications, including a current vita to: Dr. John C. Wolfe, Chair of the ME Search Committee, Office of the Dean, Cullen College of Engineering, University of Houston, Houston, TX 77204-4814 (or e-mail to wolfe@uh.edu).

NC State University invites applications and nominations for the position of Vice Chancellor for University Advancement. NC State, a strong tradition in science, engineering, and technology with a commitment to excellence in a comprehensive range of academic disciplines, is one of America's leading land-grant institutions. NC State has almost 30,000 undergraduate and graduate students, a world-class faculty, a $1 billion annual budget, and a $1 billion endowment valued at approximately $2.5 billion.

Vice Chancellor for University Advancement:

The position, which is available immediately, reports to the Chancellor of NC State University, and is responsible for increasing private financial support for the university, planning and implementing major capital campaigns, managing an effective alumni development and advancement program, and supervising the communication, alumni, and advancement programs. Applicants must have a master's degree and a minimum of five years of related experience with demonstrated success in raising institutional advancement. Candidates should have extensive experience in major gift solicitations, donor relations, and effective fundraising strategies.

Review begins immediately and will continue until June 16, 2000. Applications and nominations must include a statement of interest, resume, names, addresses and telephone numbers of four professional references. Nominations must include the current mailing address of the nominee.

Send to:
Chair
Vice Chancellor for University Advancement Search Committee
NC State University
Box 7004
Raleigh, NC 27695-7001
Telephone: (919) 515-2191

NC State University is an Equal Opportunity/Affirmative Action Employer and does not practice discrimination in any form, against students, employees or applicants on the ground...
Tuning in to Community Rhythms
University of Minnesota Breaks New Ground

By
ED BRENNEN

"It's part of course work—it's not a volunteer program—so what we really try to do is work with faculty and build it into their curriculum."

LINDA ERNST, CUPES PROJECT LEADER

For many medical students, part of the allure of becoming a doctor is being able to live the "E.R." lifestyle. It means rushing from one operating room to another, mending wounds and saving lives. But what they find once they graduate into the real world is quite different. Instead of working at a fast-paced hospital, most of them get their start in a much smaller, slower-paced community setting.

At the University of Minnesota, there is a pilot project that helps give advanced students in medicine, nursing, and other health professions a more realistic training ground. In the process, the project is also helping to improve the quality of health care in one of the most richly diverse neighborhoods in central Minneapolis.

The Community-University Partnership in Education and Service (CUPES) is a joint-program between the University of Minnesota's Academic Health Center and the Phillips neighborhood of Minneapolis. Launched in 1990, CUPES (pronounced "coops") is one of six similar projects nationwide funded by the W.K. Kellogg Foundation.

"In the past, 75 percent of students have been educated in their clinical experience in hospitals, and yet when they got out into practice, 75 percent were not in hospital settings," says CUPES project leader Linda Ernst. "This is certainly an evolution that's happening in health care. We need to
nity settings, since that’s more in line with what many of them will need to know.”

The challenge, however, is getting the results-oriented world of academia to mesh with the relationship-oriented community lifestyle. Angeles Juarez, CUPE’s board chair and Children’s Hospital director of pediatric clinics, says this takes some doing.

“Health professionals don’t always understand what it means to work with the community. It’s hard for doctors to move from ‘I know what’s best for you’ to ‘I know what’s best for me and I can pass on to you what I’ve learned in school and in my practice, but you are an expert on your family,’” Juarez says. “It’s hard for many university-trained health professionals to respect the ways people’s cultural experiences and beliefs shape their approaches to health issues.

“The university is results-oriented,” he adds. “Community people need to be nurtured, engaged, and trained. Focusing on goals and outcomes while feeding into the rhythms of the community and building camaraderie—that’s just starting to happen.”

Ernst, who has been involved with the partnership for two years, says that CUPE—which last year included nearly 200 graduate students—is making its mark on the academic landscape.

“It’s part of course work—it’s not a volunteer program—so what we really try to do is work with faculty and build it into their curriculum,” Ernst says. “It’s really meant to change the way the Academic Health Center teaches in that students get more learning in the community setting, and that it be done in an interdisciplinary way.”

“Both of those things are for the benefit of the patient,” Ernst continues, “because if students are working together and learning together, that will benefit the patient in the
division Program’s Off streets. “My whole experience as a graduate learner was very interesting,” she says. “It was wonderful to see how the health sciences training as to connect with these kids to serve some of our community’s needs.” The third prong is at the school, two E-8 schools, approximately 1,400 children from various backgrounds. The state and undergraduate lead health education at promotion programs for parents, and staff of the same 1998-99 school year brought 120 medical residents, and internists to Andesers, providing needed education that I missing until then.

“Even though school required by the state of I to provide health education, education got put on the back burner when math and English and so on,” I

Therefore they had no education in this school of I and our students going school provided some health education for these students. Now there’s something I never had.”

And the parents of school children are grate of times. Doctors come communities without knowing thing about us,” says Buckhanon, a Philips Andersen parent. “We have diverse community—Somalis, Hispanics, Americans, Native Americans, you don’t know another person’s culture or what they are, you make assumptions that are so off people. The results are not as we need or without leaving them out.

The pilot project helps give advanced students in medicine, nursing, and other health professions a more realistic training ground.
ter relationship," Buckmanon adds. 

"It brings graduate learners into our community to have a conversation with the people of Phillips. They learn that the branches and leaves grow from trunks and from roots. They start to see us whole."

Like many of the CUPES graduates, Eric Meininger was at Andersen a few days a week for an entire month. The physician-in-training worked in a team of students from differing health professions, leading class sessions on a variety of health care topics such as general hygiene, household poisons, and asthma. Meininger says that his time at Andersen was invaluable to his training as a doctor.

"My CUPES experience at Andersen opened my eyes to the wide range of cultural differences among people in city communities. It made me a better doctor," he says. "We don't see a lot of families from Andersen School in the hospitals where we usually work. When we do see people, it's because they're sick. It doesn't feel like an equal relationship. Families don't share the issues that affect their health. Being at Andersen has brought us into the lives of the people we serve in a real way."

Sometimes being there in that real way can open the medical students' eyes, ears—and even noses—to concerns they never would have before considered. Ernst recalls one example.

"There was one pediatric resident who spent time at the Andersen Elementary School, and she said. 'You know, I've always talked with children about hormone changes and so on. But never until I spent time talking to kids in a sixth to eighth grade classroom. Did I realize that I also needed to talk to them about hygiene.' She said, 'The body odor that the young adolescents begin to deal with, that goes along with hormonal changes, is something that just never t

t

CUPES also encourages members of the Andersen community to serve as "community faculty" for the University students, sharing experience and knowledge pertaining to health care issues.

School, a Latina woman, goes into homes and translates information, serving as a bridge between the health care system and that family.

"For example," says Ernst, "maybe that school is dealing with

theme, CUPES has undertaken as well.

And this promotora, as a community health worker, could be the person to go to that home and help that family learn how to do it. It's no high-level skills in terms of health professionals, but at the same time they can certainly help this family deal with something like lice."

When the W.K. Kellogg Foundation awarded its grant to the CUPES pilot project in 1996, it was only supposed to be a four-year project. But since CUPES has run under budget, it has been granted a two-year extension.

"So we're actually going to us the money over six years instead of four," says Ernst, who adds that the project is still evolving. For example, the promotora program might expand to include parents from surrounding schools.

"Eventually the goal would be that the student-learners from the University could go with [the promotora] into the home so that you'd also have a professional support person with you," she says. "But it's also...that [the] community person is opening the door to the health care profession."

"In evaluating the program," Ernst concludes, "what we see is that many of the students are learning much more about the larger context of people's lives."

"We certainly value the University professors, but we also value the community as a teacher," says Ernst. "We reimburse them financially, we identify them as community faculty, and we utilize them in going on campus and talking to classrooms. We ask them to help us in planning.

Taking "community faculty" a step further, the CUPES project also

the lice issue. It's really great to have the school send home information that says, 'Here's what you need to do to get rid of lice from your child'; however, if that person doesn't speak English very well or doesn't know how to navigate the pharmacy system, or get the products, then there's a big issue of how to get kids out of the child's head.
New Admissions Guidelines Boost Hispanic Enrollment

BY HEATHER FELDMAN

University admissions procedures have changed for Texas public universities since 1997, when the Hopwood vs. Texas court decision was announced. The result was a ruling not to consider an individual applicant's ethnic or racial minority status during the admissions process.

Despite the demise of affirmative action for admission, the University of Texas Health Science Center at San Antonio has continued to experience an increase in Hispanic enrollment, surpassing its admissions numbers from before the Hopwood decision.

To ensure continuing access for as many prospective students as possible, the Health Science Center instituted comprehensive admissions guidelines for its Medical School. Since 1997, these new procedures have emphasized both academics and personal qualifications—a balanced combination designed to select students most likely to complete the rigorous academic program and go on to careers as physicians.

"Hopwood guided us to develop a more useful set of guidelines with which to evaluate medical school applicants," said David Jones, Ph.D., associate dean for Medical School admissions and professor in the Department of Anesthesiology. "The goal was to give greater emphasis to the personal qualifications of an applicant, in addition to academic qualifications."

Beyond evaluation of grade point average (GPA) and Medical College Admissions Test (MCAT) scores, the Health Science Center's guidelines include consideration of bilingual language ability, socioeconomic history, community service, communication skills, success in overcoming adverse conditions or experiences, future goals, knowledge of the profession of medicine, whether the applicant is from a medically underserved area, and whether the applicant has the desire to serve in a medically underserved region of the state following graduation.

"These guidelines have allowed a wider

Mexican American Faculty Number 87 at UT-San Antonio Med School
career path was clear—medical school. Her mother went on to medical school as well and is now a primary care practitioner in Zapata. Treviño hopes to follow.

“It would be my goal to go back home,” said Treviño. “I can identify with these people. I am one of them. I understand their fears when it comes to medicine, and I understand the types of health problems prevalent in the area.”

The Health Science Center has been diligent in drawing students from South Texas through recruitment efforts and outreach programs designed to provide education on career opportunities in the health sciences. Mario Ramírez, M.D., vice president for South Texas/Border Initiatives at the Health Science Center and a native of the Rio Grande Valley, launched a program four years ago to encourage young people to consider health careers.

The program, called “Med/Ed,” is based in McAllen, Texas, and is a combination of academic preparation, community service, and mentoring. High school students from 25 area high schools participate in summer classes in biology, physics, and chemistry; participate in study skills and essay-writing sessions; and are involved in on-site internships with physicians. The hope is that these students will become health care professionals and bring their skills and knowledge home to the Valley.

The Health Science Center also sponsors programs for high school and baccalaureate students through the federally funded Medical Hispanic Center of Excellence—a way of introducing biomedical career opportunities. An example is the Hispanic Center of Excellence’s MCAT Preparation Program, a series of classes offered in San Antonio and Edinburg, Texas, for students preparing to apply for medical school.

The Medical Schools admission guidelines support these outreach efforts by underscoring the importance of the personal experiences and qualifications of applicants rather than focusing solely on academic standing and test scores.

“When you are considering applicants from medically underserved communities, those applicants also might come from an educationally or economically disadvantaged background,” said Dr. Jones. “You have to consider the barriers students have overcome as important aspects of the application for medical school.”

Jones said that these guidelines are not dependent on ethnicity. Rather, they value the individual applicant’s achievements and academic preparation from the “whole-person” perspective. This exhaustive process has the added benefit of allowing for the selection of Medical School classes that are more demographically balanced than before the Hopwood decision.

The new guidelines have resulted in a rise in minority enrollment since 1999. The Health Science Center’s Medical School recorded 42 entering Hispanic students in 1999, up from the 14 students entering in 1997. Hispanic enrollment at the Health Science Center is 19.6 percent and is projected to reach 25 percent by 2005.

The Medical School also is accepting more students from South Texas. In 1997, when GPA and MCAT scores still largely determined Medical School admissions decisions, 45 applicants from South Texas were interviewed, and seven were accepted. In 1999, with the new guidelines in place, 55 applicants from South Texas were interviewed, and 26 were accepted.

The Health Science Center is responsible for establishing and administering the Lower Rio Grande Valley Regional Academic Health Center (RAHVC), to support increased clinical training of medical professionals in South Texas. The RAHVC’s location, along the border with Mexico in the Valley, will encourage students there to pursue health professions. The research division of the RAHVC is located at the University of Texas-Pan American, will become an important site for the study of diseases prevalent in many people living along the border. Leonel Vela, M.D., M.P.H., is the newly appointed regional dean responsible for the RAHVC.

The Health Science Center continues to be one of the nation’s leaders in training Hispanic physicians and has graduated more Hispanic physicians than has any other medical school in the state. The University was officially designated by the U.S. Department of Education as a Hispanic-Serving Institution (HSI), recognizing the school’s efforts in attracting Hispanic students. The institution also was awarded the Hispanic Center of Excellence designation for outreach activities.

Leading Hispanic researchers, physicians, and educators also have been drawn to the Health Science Center. The Medical School has 87 Mexican American faculty members, the largest concentration at a medical school in the nation.

“...I think the University has done a good job of keeping the Medical School culturally diverse,” said Treviño. “...I never feel out of place.”

Neither did Sophia Piña Ph.D., a former Health Science Center graduate student. A San Antonio native, Dr. Piña’s interest in science began in the sixth grade when she was learning about the reproductive system and genetics. After receiving her Bachelor of Science degree, she began working at the Health Science Center as a laboratory technician.

“While working as a technician, I realized I wanted to do more.” said Dr. Piña. “I wanted to do the research.”

Dr. Piña, a graduate of the University’s Ph.D. program in microbiology, had been working for a local biomedical company but returned to the Health Science Center to teach microbiology. She was recently appointed to full-time faculty rank and will be instructing the next generation of scientists, including more Hispanics.
Texas-Austin Conference Held on Latinos and WWII

Dozens of nationally renowned scholars were featured during a two-day conference at the University of Texas-Austin about contributions of and issues concerning U.S. Latinos and Latinas during World War II.

Many aspects were discussed, including resultant advancements in civil rights. At roundtable discussions, men and women of that generation described their interpretations and recollections of the war and its impact on U.S. Latinos.

Maggie Rivas-Rodriguez (pictured), conference co-chair and assistant professor in the department of journalism, said that such luminaries as Rafael Chabrán, Rolando Hinojosa-Smith, Richard Griswold del Castillo, Jorge Rodríguez Beruff, Jose Limón, and Rita Sanchez proposed presentations.

In the News at Eastern New Mexico-Roswell

Yolanda Lopez, program instructor at Eastern New Mexico University (ENMU)-Roswell, participated in the National Board for Certification in Occupational Therapy’s standard setting for the 2000 certification examinations. The workshop was held in Kentucky. Lopez, an OTA instructor at ENMU-Roswell since the fall of 1998, was one of 12 panelists selected nationwide.

Adrian Martinez, constituent services representative for U.S. Sen. Jeff Bingaman, helped organize a visit by a special delegation to Roswell’s sister city, Cuahtémoc, in Chihuahua, Mexico. ENMU-Roswell adminis-

the Instituto Tecnológico to exchange faculty, students, programs, and ideas. The ENMU-Roswell Division of Health and the Roswell Public Health office worked to establish a linkage with the native Tarahumara Indians to provide medical services.

Award-Winning Author Addresses Saint Mary’s Commencement

Helena Maria Viramontes, critically acclaimed author and professor of English at Cornell University, delivered the commencement address at Saint Mary’s College in Indiana.

Viramontes, originally from East Los Angeles, has written extensively on the experiences of Mexican American migrant workers in this country. Her short stories and novels focus on the lives of these Chicano families through the eyes of mothers, wives, and daughters. She was the first Latina to receive the John Dos Passos Prize for Literature.

Purdue-Calumet Holds Study Program in Spain

Purdue University-Calumet’s (Ind.) department of foreign languages and literatures has organized a study program in Spain June 3 to July 5, designed to increase cultural horizons using the language, culture, and civilization of Spain. Classes will be held at the Universidad de Extremadura in Cáceres, 300 kilometers from Madrid and from Lisbon, Portugal. The area is rich in culture with architectural influences ranging from the Roman Empire to the Conquistadors.

“The best way to achieve fluency in another language is to use it in an authentic setting with the local people,” said M. Luisa García-Verduco, Purdue-Calumet assistant professor of Spanish and program director, a native of Spain.

Rio Bravo Association Meets at Texas A&M-Kingsville

The 11th annual conference of the Rio Bravo Association met at Texas A&M University-Kingsville. The theme was “Cultural and Political Issues Related to the Texas and Mexico Borderlands.”

Dr. Margarita Benítez (pictured) and Dr. Rodrigo A. Medellin were keynote speakers along with Dr. John Mason Hart.

Benítez, director of Institutional Development and Undergraduate Education Service at the Off Postsecondary Education in the Department of Education, is a full professor of humanities at the University of Puerto Rico, professor and researcher, Institute of Ecology at the National Autonomous University of Mexico, is scientific advisor, Director General of Wildlife in Mexico, and a history professor at the University of Houston.

In the News at Citrus College

Dr. Michael Hurtado (pictured), dean of continuing education at Citrus College (Calif) for four years, has been appointed head of the Los Angeles County Probation Commission, which is structured to bring expertise from the private sector to the oversight and evaluation of policies and operations of the LA County Probation Department. Hurtado taught sociology and psychology at Citrus for 28 years before being appointed dean of continuing education in 1998.

More than 250 Latino high school students attended Citrus’ 11th annual Latinx Conference. Pueblo Corporation, a privately owned company with a state-of-the-art center in El Monte, contributed $200,000 for the conference, and presented Citrus Leticia Guerrero, a second-year child development major, with $300 from Pueblo’s ship fund. La Becca del Pueblo.

Western Washington Class Trips to Tijuana

Western Washington University offered a class on U.S./Mexico border relations, allowing students to earn credit for travel and cultural immersion.
project. Western students have been traveling to Mexico for alternative spring breaks for about five years, but not in conjunction with a class.

Approximately 40 students of various majors enrolled in the course, taught by WWU Fairhaven College Professor Larry Estrada (pictured) and anthropology Professor James Touchey. The course explored border dynamics involving politics, militarization, economics, immigration, culture, and migrant labor. Students worked for Esperanza, a nonprofit organization that enables low-income families in poor barrios to build simple brick housing; explored Casa Del Migrante, an environmental center; and studied at El Colegio de la Frontera.

**NJPAC Features Chamber Music from the “South”**

NJPAC The New Jersey Performing Arts Center (NJPAC) presented the New Jersey Chamber Music Society featuring TRIANGULO—Paquito D’Rivera, Pablo Zinger, and Gustavo Tavares—with Peggy Schecter and Brenda Feliciano. This unique concert of chamber music by South American composers included works by Guastavino, Villa-Lobos, and Picinguinha as well as the world premiere of a new composition by D’Rivera. The event was part of NJPAC’s World Festival III: Visions of New Worlds—Spanish Routes and Rhythms.

In addition to performing and recording, Paquito D’Rivera is an NJPAC World Festival III artist-in-residence and artistic director for programming at the New Jersey Chamber Music Society, the state’s premier chamber music ensemble.

**Distinguished Military Leader Visits Central Michigan**

Retired Lt. Col. Consuelo Castillo Kickbusch, a 20-year U.S. Army veteran, discussed her leadership experience, success techniques, and motivational messages at Central Michigan University (CMU).

Kickbusch, the highest ranking Desert Storm war, appeared as part of the Phi Sigma Epsilon Speakers’ Series. “Consuelo Kickbusch’s story is a most interesting one,” said Dean Danfort, a CMU alumnus and Phi Sigma Epsilon member. “Despite growing up in a ghetto and sharing a small, two-bedroom house with her eight brothers and sisters, she fulfilled her dream of gaining an education.”

Kickbusch, who retired from the military in 1996, owns Educational Achievement Services, a consulting firm that trains and addresses corporate and business professionals.

**Miami-Dade Alumnus Awarded Scholarship to Oxford Brookes**

Karla Castellanos, a 1996 graduate of Miami-Dade Community College (M-DCC) in Florida, was awarded a Rotary International Foundation Ambassadorial Scholarship by District 6990, Rotary International. The one-year academic scholarship, for 2000-2001, will enable Castellanos to study for her master’s degree in architecture and urban planning at Oxford Brookes University in England.

Born in New York, Castellanos grew up in San Pedro Sula, Honduras. She returned to the U.S. to study architecture at M-DCC and earned her bachelor’s degree at the University of Miami. Currently, she is a graduate architect for the firm of Zyscowich, Inc., in Miami, and a teaching assistant in the architecture program at M-DCC North.

**Brazilian Activist Silva Discusses Future of Amazon**

Marina Silva, a senator of the Amazon state of Acre, joined an expert panel at the University of Texas-Austin to discuss the future of the Amazon rainforest.

Born near the borders of Bolivia and Peru, the renowned environmental activist co-founded the Rio Branco affiliate of the United Workers’ Federation, fighting to improve conditions for traditional rain forest populations. In 1995, at age 36, Silva became one of the youngest senators in the history of Brazil and one of only seven women in the Brazilian Senate.

At UT-Austin, Silva helped commemorate the 500-year anniversary of the discovery of Brazil. Her visit was co-sponsored by the University’s Institute of Latin America Studies Student Association and the Braz Center, demonstrating their dedication to bringing the vanguard of Latin America leadership to the Austin institution.

**News from Sonoma State University**

Sonoma State University (Calif.) student Miguel W. Hilario was awarded a Year 200 Paul and Daisy Soros Fellowship for New Americans. Born in a canoe in the rain forest on the Ucayali River in 1970, Hilario is a member of the Shipibo-Conibo tribe in Peru’s Amazon basin, where he grew up fishing for piranha and hunting monkeys and armadillos. The first of his tribe to live in the rain forest, Hilario studied in Lima before traveling to the U.S., where he attended Santa Rosa College and graduated from Sonoma State University in 1999. Hilario now focuses his studies on environmental issues in public policy, and Latin America.

University President Ruben Armiñana (pictured) and wine business director Armand Gilinsky accepted a $25,000 grant from the Wells Fargo Bank Foundation to support the Wine Business Student Internship Program.

**Cal State—L.A. Chemistry Professor Receives Award**

California State University (CSU)-Los Angeles professor Carlos G. Gutiérrez was one of four CSU faculty members to receive the $20,000 statewide CSU Wang Family Excellence Award.

A professor in the department of chemistry and biochemistry, Gutiérrez directs Cal State L.A.’s NIH (National Institutes of Health) Minority Access to Research Careers Minority Biomedical Research Support grant. In his 20-plus years at Cal State, Gutiérrez has significantly influenced minority student education, mentoring more
and participating in projects such as the National Science Foundation-sponsored Research Improvement in Minority Institutions and Research Experiences for Undergraduate programs.

**Eastern Michigan Regents Approve Staff Appointments**

The Eastern Michigan University (EMU) board of regents approved the appointments of Pete Alamar (photo top) and Jesus Hernandez to staff.

Alamar, the assistant head football coach, was the tight ends/linebackers/special teams coach at the University of Arizona and the head football coach at the Universidad Autonoma De Nuevo Leon in Monterrey, Mexico. He earned his bachelor's degree from California Lutheran University.

Hernandez, program coordinator for McKenny Union and Campus Life, was a student judicial affairs specialist and coordinator for student conduct/orientation at the University of New Mexico, and in charge of new student programs at Bowling Green State University. Hernandez has a bachelor's degree from EMU and a master's from Bowling Green State.

**Long Island-Brooklyn Showcases Two Emerging Artists**

The art department of Long Island University-Brooklyn (N.Y.) has been presenting the work of a pair of young artists, Joseph Omar Cordero (photo top) and Adriana Salcedo, at the campus' Salena Gallery. Cordero and Salcedo are the first two graduating seniors in the new Bachelor of Fine Arts degree initiated last year.

The talented students come from strong art backgrounds. Cordero, who won "Best in Show" in New York University's "Smallworks" exhibition last year, has mastered a variety of exhibit, he expresses concepts through visual objects and arrangements. Salcedo has explored different areas of art, including printmaking, photography, and ceramics.

The exhibition ends June 6.

**Galliegos in Diversity Forum at South Texas College of Law**

SOUTH TEXAS Senior Mario Galliegos, Jr., was a panelist at a South Texas College of Law Diversity Day Forum, co-sponsored by the American Bar Association and moderated by law Professor Neil C. McCabe. The topic was hate crimes.

Galliegos was elected to the Texas Senate in 1994, recently completing his third legislative session. Prior to that, he served two terms in the Texas House of Representatives. Among the many awards he has received are the Texas Municipal League’s “Distinguished Legislative Service Award”; “Legislator of the Year,” by the Mexican American Bar Association of Texas; and the Restas Patras “Distinguished Hispanic of the Year Award.”

**Two New Mexico Students Receive Prestigious Fellowships**

University of New Mexico (UNM) students Sarah E. Soliz (pictured) and Robert Ward received the highly coveted National Science Foundation Graduate Research Fellowship, which pays for three years of graduate school and includes a living stipend.

Soliz, an anthropology major, plans to study narratives of kinship—stories that family members tell to and about each other—and will examine ways in which sisters talk to each other. Her dissertation research will be conducted in Mexico.

Ward, a physics major, will work on his dissertation in quantum information once he finishes his studies at Oxford. He is a 2000 Marshall Scholar, the second UNM student to achieve the honor since 1977.

**Fresno State Sponsors Town Meeting on Foreign Policy**

The U.S. Department of State and Cali State University (CSU)-Fresno co-sponsored Town Meeting on U.S. foreign policy.

The event, “U.S.-Mexico Bilateral Relations,” was held to increase public awareness and understanding of current foreign policy issues. It encouraged public engagement in the policy process and pro opportunities for the exchange of views by officials who formulate and implement policy.

Participating CSU-Fresno faculty members included Luz Gonzalez ( pictured), department of Chicano and Latin American Sts Robert Perez, department of criminolog James Cypher, department of economics.

**Hernandez Honored at Cal State L.A. Awards Dinner**

Antonia Hernandez, president and general counsel of the Mexican American Legal Defense and Educational Fund, received the Community Service Award at the 19th Annual Awards Dinner of the Pat Brown Institute of Public Affairs. Affiliated with California State University-Los Angeles since 1967, the Edmond G. "Pat" Brown Institute of Public Affairs is a non-profit center for applied public policy focusing on community development and youth and empowerment.

Hernandez directs all litigation and policy programs, manages a $6 million budget an 83-person staff throughout MALDEF’s offices nationwide. Her prior position was general counsel.

**Jersey City Gallery Director Exhibits in Manhattan**

The Noha Haim Gallery in New York recently presented “Lines and Lies,” a series of paintings by Hugo Xavier Bastidas, a member of the Lois gardening groups. The gallery has been a leader in promoting emerging artists in the New Jersey area.
cultures, using irony and humor to juxtapose
the natural or even primitive with images and
ideas from modern life.

Known for the black and white photo-like
effect of his paintings, Bastidas achieves his
signature style by using a very dry brush and
minimal amounts of black paint.

Born in Quito, Ecuador, Bastidas moved to
the U.S. in 1960. He studied at Pratt Graphics
Extension, the Brooklyn Museum School, and
the Artists/Teachers Institute of Richard
Stockton College of New Jersey (then
Stockton State College). He holds a bachelor's
degree from Rutgers University and a master's
from Hunter College.

Ramapo Art Gallery Features
Contemporary Artists

The Berrie Center at Ramapo College of New Jersey recently
presented its first major exhibition, "This is Not the Place," an ambitious
group show outlining personal histories and tracing territories through the works of 12
diverse contemporary artists who negotiate ideas of "place" in the realm of painting, pho-
tography, video, and sculptural installation.

Virgilio Garza, a Manhattan, N.Y.-based gallery administrator, and Sydney O. Jenkins, art gallery
director at the Berrie Center, were co-curator.

The show featured works by Cuban "artist in exile" Luis Cruz Azaceta known for his
paintings of rafters afloat at sea; film artist
Marco Brambilla, director of the film
Demolition Man; former cloistered monk
Ernesto Pujol, featured on the cover of the
March issue of ARTnews; and Mexican artist
Betisfer Romero, who uses cars as a medium for exploring urban issues.

In the News at Fresno State

Joaquín Gutiérrez-Heras, one of Mexico's leading
art-music composers since the 1960s, was in
Fresno, Calif., as the guest of Orpheus, a com-
mon-bass instrumental ensemble direct-
ed by CSU-Fresno music Professor Jack
Forrer. A native of Tehuacán, Puebla, Mexico,
Gutiérrez-Heras, 73, has written music for
orchestra, chamber, and chorus, and numer-
ous scores for film and theater. Orpheus
performed "Postludivo," the first of Gutiérrez-
Heras' works for string orchestra.

Paul E. Chávez, son of the late United Farm
Workers Union founder César Chávez, was the
keynote speaker at the CSU-Fresno Peace
Garden Committee's annual Garlanding
Ceremony honoring his father's 73rd birthday.

Florida International Hosts Forum
on Cuban Americans

A group of experts in the mental health field gathered at Florida
International University to discuss
how Cuban Americans have adapted to life in
the U.S. and the challenges that new immi-
grants face as they enter the country. Topics of the symposium "The Psychology of Exile: The
Cuban American Experience" included per-
sonality and identity, career, family and self,
caring for the elderly, the Pedro Pan experi-
ence, Mariel detainees, and rafter children.

Jose Szapocznik, a pioneer in the psycholog-
ical research and treatment of Cuban exiles in South Florida, was a keynote speak-
er. Jose Ignacio Lasaga-Travieros, founder of
the second school of psychology in Latin
America at the University of Villanueva in
Cuba, was honored in a special ceremony.

Texas-Austin Celebrates Migrant Program

The University of Texas (UT)-Austin cele-
brated the successes of a migrant student
program that provides innovative distance
learning opportunities for migrant children.

The Continuing and
Extended Education
Migrant Student
Graduation Enhanc-
ment Program celebration
involved approximately 165 migrant students and their
parents or teachers from 11 Texas school dis-
tricts. Austin City council member Gus Garcia
was the keynote speaker; UT-Austin Vice
President Juan M. Sanchez (pictured) congrat-
ulated the students; and Tejano singer Mireya
provided entertainment.

The mission of migrant student programs is
to build on the students' strengths, eliminate
barriers, and provide continuity of education for
nities of the world. Texas has the second largest
program in the nation and the largest interstate
migrant student population in the country.

Cal Poly-Pomona Honors Gallegos

California assembly member Martin
Gallegos received the Outstanding
Public Leader Award, one of California
State Polytechnic University-Pomona's
University Awards of Excellence. Established
this year, the award honors extraordinary ser-
vice to the University and community by an
outstanding public leader as well as an out-
standing emeritus faculty, outstanding emer-
itus staff, and outstanding entrepreneur.

Gallegos, the first doctor of chiropractic
ever elected to the California State
Legislature, and his wife have twice hosted
more than 500 middle school children at Cal
Poly-Pomona for the "Believe in Your
Dreams" conference, which introduces them
to many professions. He was the first com-
 mencement speaker at International Polytechnic High School on the Cal Poly-
Pomona campus and has lectured in a
University political science class.

CSU-Fullerton Professor "Educator
of the Year"

The Hispanic Bar Association of Orange
County named Dr. Isaac Cardenas "Educator
of the Year." Cardenas is chair and professor
of Chicano studies at California State
University-Fullerton.

"It is thanks to edu-
cators such as Dr.
Cardenas that students
are able to appreci-
ate the importance of
not only receiving an education, but putting it to use
with social conscience," said Claudia Alvar.
president of the Hispanic Bar Association of
Orange County, a Cal State-Fullerton alumnus,
and one of the professor's former students.

Cardenas is faculty sponsor of the annual
Latino College Leadership Institute and a faculty
coordinator for Proyecto VECINO. He is active
in the TELACU Summer Upward Bound
Program, and he has been very effective in link-
ing the University with the Latino community.

New Mexico Celebrates Chávez's
Birthday

Seven years after his death, "Chavo"
Chávez's birthday was celebrated in
Albuquerque with a parade, a concert and a
}
sacrifices on behalf of human dignity and social justice for farmworkers continue to inspire people from all walks of life.

The University of New Mexico (UNM) celebrated his birthday with speakers, poets, dancers, and the musical groups Los Trinos, La Rondalla, Paul Pino, and Culicani. The event was co-sponsored by the Recuerda a César Chávez Committee, the Albuquerque Museum, the National Hispanic Cultural Center, and UNM's Chicano studies program.

Prior to the celebration, videos and discussions about Chávez’s life, the Grape Boycott, and the Chicano Movement were held. and Dolores Huerta, co-founder of the United Farmworkers Union, gave a lecture.

“The Trombone Man” Performs at New Jersey City Center

Torres’ most recent international release is the CD Descarga Afrohubana. A respected composer, director, and arranger, Torres was part of the Cuban vanguard. His ten albums with the band Juan Pablo Torres and Algo Nuevo initiated a musical revolution in Cuba and established him as a leader of Cuban popular music.

Legendary Latin percussionist Candido also performed, as did members of the NJCU Samba School and many others.

Ethics and Literature at St. Mary’s

St. Mary’s University (Texas) made a competitive showing in the Sixth Intercollegiate Ethics Bowl in Washington, D.C., matching 26 teams from around the nation. Inspired by television’s classic program College Bowl, the Ethics Bowl allows students to test their moral reasoning skills in situations involving difficult ethical issues. St. Mary’s six-member team included Raquel Mata, Julie Perez, Ramona Rodriguez, Elizabeth Sifuentes, and Brian Beaman. Team member Mike Palmer suffered a broken leg just before the event and could not compete.

The New York Public Library placed the book Lessons of the Game, by Diane Gonzalez Bertrand, on a list of recommended reading for teenagers. Gonzalez is a writer-in-residence in the department of English/Communication Arts at St. Mary’s.

Texas-Pan Am Studies Cancer Prevention

At the University of Texas-Pan American (UTPA), a biochemistry professor and some of his graduate and graduate students are studying whether parsley can prevent some forms of cancer. Using a National Institutes of Health-funded grant through the Minority Biomedical Research Support program, Dr. Hassan Ahmad has been investigating the functions of “glutathione S-transferase,” an enzyme that protects cells against various toxins, including some carcinogens.

Since 1994, at least 19 UTPA students have worked directly or indirectly with the professor. The first graduate student, Maria Tijerina, now a doctorate student at Oregon State University, initiated the parsley-related research. Current graduate student Eduardo Saldivar confirmed that parsley produces an enzyme that efficiently metabolizes some carcinogens.

St. John’s Holds Summer Program in Argentina

St. John’s University (N.Y.) has offered an exciting opportunity for students to improve Spanish while learning about the culture of South America’s second largest country.

In June, students in St. John’s study abroad program in Argentina will be spending three weeks in Buenos Aires and one in Corrientes. Classes will be held at the Instituto de Literatura Hispanoamericana of the University of Buenos Aires and at the Universidad de la Cuesta del Plata in Corrientes.

Dr. Alina Camacho-Gingerich, a tenured St. John’s faculty member and chair of the Committee on Latin American and Caribbean Studies, will be teaching two courses. Camacho-Gingerich is a leading scholar on Latin American literature and civilization.

Trinity Student Wins Goldwater Scholarship

Trinity College (Conn.) junior Duarte G. Machado was named a Goldwater Scholar, joining an elite group of 308 undergraduate students who will receive one- and two-year scholarships.

Machado, a 20-year-old neuroscience major who wants to become a doctor, received one of 306 scholarships for science majors. He is the only Trinity student and one of only four Connecticut natives to be named a 300 Goldwater Scholar.

Machado is involved in brain research. His article “Projection of the Marginal Shell of the Anterior Ventral Cochlear Nucleus to Olivocochlear Neurons in the Cat” was published in the April 21 issue of the Journal of Comparative Neurology.

Gonzalez School of Education at Indiana

Gerardo M. Gonzalez was named dean of the Indiana Univ. School of Education.

After more than a decade of leadership posts in the College of Education at the University of Florida, Gonzalez said that his goal is to make Indiana University the number one graduate school of education in America. He also wants to increase the already substantial program in doctoral education and research, enhance the school’s leadership in the use of technology and add to the diversity of faculty and student body.

Gonzalez has a bachelor’s degree in chemistry from the University of Florida; a doctorate in counseling education.

Mercer County Partners with Canada and Mexico

President Thomas D. S. Mercer County Community College (N.J.) joined the president of other colleges in the U.S., Canada, and Mexico, and via interactive television to announce a new educational partnership between the three countries. “Students will be able to study, learn, and work in Canada or Mexico, gaining cultural, intellectual, and business experience,” said Sepe.

In addition to Mercer, participants in the new multinational consortium—“Technology for Industry Through Multicultural Educational Sectors”—include Community College of Texas; St. Clair of Applied Arts and Technology in Ontario; University College of the Caribbean; Universidad Tecnológica de Tula-Tepexi, Mexico.

United States International University Honors Reyes

Roberto Reyes, executive director of CRECE, the Baja California Competition is United States International University (USIU) Alumni Association Volunteer Year.
Reyes was selected for his volunteerism with the USIU/Cal Western Alumni Association. A member of USIU's Alumni Board of Directors since 1999, he has contributed considerable volunteer time to promoting the university and its programs.

Born in Tijuana, Reyes has helped ensure that the alumni association reaches all USIU graduates in Tijuana, Mexicali, Rosarito, Ensenada, and beyond. Reyes has a master's degree from USIU and is close to receiving his doctorate, also at USIU.

Texas-Austin Conference Explores Astrophysical Issues

Professional astronomers, astrophysicists, and graduate students from several institutions in the greater Texas-Mexico region discussed astrophysical problems and presented research at a scholarly conference at the University of Texas (UT-Austin).

Its department of astronomy hosted the Seventh Texas-Mexico Conference on Astrophysics. "These are neighborhood meetings, but they have an international flavor," said Dr. Greg Shields, the Jane and Roland Blumberg centennial professor in astronomy at UT-Austin and chair of the scientific organizing committee, which also includes Dr. Reggie Dufour of Rice University, Dr. Manuel Peinert and Dr. Silvia Torres-Periment of National Autonomous University in Mexico, and Dr. Paul Shapiro and Dr. Craig Wheeler of the University of Texas.

Readings on Equal Education, Volume 16: Education of Hispanics in the United States (Politics, Policies, and Outcomes)

Abbas Tashakkori, Salvador Hector Ochoa, and Elizabeth A. Kemper, eds.

The editors plunge us into the disheartening state of Hispanic education today and what America has not done for its fastest growing minority in spite of innumerable legal challenges. Combined with the plight of Hispanic students is the scarcity of Hispanic teachers as well as inadequate access to higher education.

Beyond the Prado: Museums and Identity in Democratic Spain

By Selma Reuben Holo

When Francisco Franco's long dictatorship of Spain ended with his death in 1975, the transitional government set out to create a democracy that celebrated rather than suppressed regional and ethnic diversity. Selma Reuben Holo argues that Spanish state and regional leaders consciously used the power of museums to foster democratic identity in the country's citizens.

The Annual Review of Adult Learning and Literacy, Vol. 1

John Comings, Barbara Garner, Cristine Smith, eds.

The National Center for the Study of Adult Learning and Literacy co-established this publication to serve as the journal of record for the field of adult learning and literacy. Each year the authors whose work is published in the

**White Reign: Deploying Whiteness in America**

Joe L. Kincheloe, Shirley R. Steinberg, Nelson M. Rodriguez, and Ronald E. Chinnakal, eds.

What does it mean to be white in today's society? Is whiteness an ethnicity? This book examines whiteness as a cultural concept, which our society has created, and by exposing systems that teach us how we think about race. The essays explore the construction of white identity and the possibility of reshaping whiteness in a progressive, non-racist manner, presenting a culture of whiteness that can be employed by educators, parents, and citizens concerned with racial justice.

**Fictions of the Feminine in the Nineteenth-Century Spanish Press**

By Lou Charron-Deutsch

How was the female body perceived in the popular culture of late 19th-century Spain? Using images from popular magazines of the day, Lou Charron-Deutsch finds that women were typically presented in ways that were reassuring to the emerging bourgeois culture. Charron-Deutsch is professor of Hispanic languages at the State University of New York-Stony Brook.

**What Are We Afraid of? An Assessment of the "Communist Threat" in Central America**

By John Lamperti

This study lays bare the myth of "Moscow-inspired" Central American revolutions and calls into question the red-baiting rhetoric behind military control of the region. What Are We Afraid of? gives a step-by-step analysis and employs down-to-earth language.

series will present and analyze the research literature and best practices concerning issues of importance to the field.

Profession 1999
Phyllis Franklin and Carol Zuses, eds.

Profession is a journal of opinion about and for the modern language profession. The editors select articles covering a range of topics of professional concern, trying to give voice to Modern Language Association members working in diverse subject areas and situations. How to ensure appropriate employment opportunities for new doctors, how teachers and scholars can best fulfill their traditional responsibilities, and how the university is changing are among the topics discussed.

A Concise History of Mexico
By Brian Hanretty

Mexico's fascinating complexities are difficult to approach. This illustrated history begins with a brief examination of contemporary issues. The book ranges from the Olmecs to the present day, and combines a chronological and thematic approach while highlighting long-term issues and controversies over interpretation.

The Great Arizona Orphan Abduction
By Linda Gordon

In 1904, New York nuns brought 69 Irish orphans to a remote Arizona mining camp to be placed with Catholic families. The families were Mexican, as was the majority of the locals population. Soon the town's Anglos, furious at this "interacial" transgression, formed a vigilante squad that kidnapped the children and nearly lynched the nuns and the local priest. The Catholic Church sued to get its wards back, but all of the courts, including the U.S. Supreme Court, ruled in favor of the vigilantes.

The Web Learning Fieldbook: Using the World Wide Web to Build Workplace Learning Environments
By Valerie Beier

Corporations are spending billions of dollars on Web-based training. But you can't just slap some material up on a Web page and expect your employees and students to learn anything. To use the Web intelligently and effectively as a teaching medium, you have to understand how to create a learning environment.

Sandinista Economics in Practice: An Insider's Critical Reflections
By Alejandro Martínez Cuenca

In this frank and engaging assessment of the Sandinista revolution, Alejandro Martínez Cuenca critically reviews the Sandinista strategy of transformation and economic recovery, laying bare errors in implementation, institutional feudalism, and ideological divisions within the government.

Migrant Daughter: Coming of Age as a Mexican American Woman
By Frances Esquibel Tywniak and T. García

This memoir, based on an oral history by Mario T. García, is the powerful and moving testimonio of a young Mexican American woman's struggle to rise out of poverty. It is the coming-of-age story of Frances Esquibel Tywniak, one of the few American Indians to attend the University of California during the 1950s. García is professor of Chicano studies at the University of California-Santa Barbara.

Talavera Poblana: Four Centuries of Mexican Ceramic Traditions
By Joseph R. Wolin, ed.

This illustrated bilingual study explores the development of Talavera Poblana inglazed earthenware, from 17th century to the present day. Published on the occasion of an exhibition presented at Americas Society Art Gallery on Sep 12. 1999. Foreword by curator D. Connors McQuade.

City of Sacrifice: The Aztec City and the Role of Violence in Civilization
By David Carrasco

The author chronicles the fascinating story of Tenochtitlan, the Aztec capital, investigating Aztec religious practices and demonstrating that religious violence was integral to urbanization; the city itself was a temple to that Mexico City, the largest city on
built on the ruins of Tenochtitlan is a point he poignantly considers in his comparison of urban life from antiquity to modernity.

The Spanish Armada

Outwitted, outmaneuvered, and thwarted by the weather, the Duke of Medina Sidonia’s once-mighty Armada returned to Spain in defeat, signaling the end of Spanish naval supremacy. This program analyzes the political and military aspects of Philip II’s attempted invasion of England through expert commentary, battle maps, and reenactments involving the personalities and the ships that made this conflict a watershed in European history.

Fidel Castro: Maximum Leader

All of the milestones that have shaped Castro’s Castro are documented here from his ousting of Batista to his policy of brinkmanship with the U.S., to his ruinous economic reforms in the face of decades of embargo and the loss of Russian rubles. But as times continue to change, Cuba is experiencing a thaw, with a revival of tourism and a renewed tolerance of the Catholic faith. Isolated and aging, will Castro finally lower the flag of his revolution?
