As a Cuban, lesbian, and feminist, Alina Troyano (a.k.a. Carmelita Tropicana) draws insight from her experiences not by exoticizing them but by playfully drawing attention to them in order to reveal all there is at stake in the creation of identity. This book offers the first comprehensive collection of her work.

American Encounters: Greater Mexico, the United States, and the Erotics of Culture
by José Limón

The idea of crossing the U.S.-Mexico border has always conjured images of racial hostility and exclusion. Award-winning anthropologist José Limón offers an alternative history of attraction and desire between the United States and Mexico that both embraces the border crossings and envisions hope for the future of power relations.

Review: Latin American Literature and Arts

This journal, now in its 31st year, is a publication of the Americas Society. The major U.S. forum for contemporary Latin American literature in English translation and for articles on the Latin American arts, it first brought the work of writers such as Alejo Carpentier. José Donoso, Gabriel García Márquez, Manuel Puig, and Mario Vargas Llosa to critical attention in this country. Review's editor is Alfred Mac Adam. professor of Spanish American literature at Barnard College-Columbia University. Published twice per year.

$19.95/year (individuals); $29.95/year (U.S. institutions). $35.00/year (foreign). Americas Society: (800) 785-4903.

Six Nuevomexicano Folk Dramas for Advent Season

by Larry Torres

The folk plays included here are performed during the six-week period before and after Christmas known as Advent Season, but can be appreciated at any time. The author's presentation enables the reader to understand them as cultural experiences within a centuries-old tradition of sacred ritual.

Antonio Machado: A Lomos de la Quimera

Spanish poet Antonio Machado shared the misgivings voiced by other members of the Generation of '98 regarding the decadence and complacency of Spain. Compounded of documentary material and dramatizations, this program profiles the life and achievements of a Spanish literary master.

(Spanish, 60 min., color) Item #FFH 9125

Miguel de Unamuno: El Rector

This program combines documentary material and dramatizations to present the story of a multitalented Spanish philosopher, novelist, poet, and playwright against the backdrop of his turbulent times.

(Spanish, 55 min., color) Item #FFH 9122

José Marti: Cuba's Patriot-Poet

A tireless proponent of freedom from Spanish rule, José Marti is known as "The Apostle of Cuban Independence." Combining documentary material with dramatizations, this program celebrates the selfless life of the freedom fighter, which was marked by imprisonment, exiles and, ironically, death in his first appearance on the battlefield.

(Spanish, 65 min., color) Item #FFH 91

Acts of Faith: Jewish Civilization in Spain

This program looks at remnants of what was once the great Jewish civilization in Spain: the artifacts, which were Christianized or destroyed, and the people, many of whom continued to practice elements of the religion and folklore of Judaism and for most of whom the menorah's Jewishness has long since been extinguished.

(50 min., color) Item #FFH 3989

Christians, Jews, and Moslems in Medieval Spain

Spain's history is traced from the first landing of Berbers and Arabs in 711, through the expulsion of both Moors and Jews in 1492. Also outlined: the development of a culture whose people spoke various Spanish dialects; the role of the School of Toledo in preserving, translating, and making known the ancient Gr scientific texts as well as Arabic treatises in Toledo; and the history of Jews in Spain.

(52 min., color) Item #FFH 9158
Cuba: Holding Back the Tide

"What is keeping Castro in power?" This video examines the problems that face the Cuban people—Cuba's economy and the government's initiatives. In addition, the program visits a hospital that offers a painful metaphor for the decay of Castro's country.

(30 min., color) Item #FFH 6124

CONFERENCES

AAC&U 86th Annual Meeting
January 20-22

The Association of American Colleges & Universities presents "Great Expectations: Of Our Students, Our Stakeholders, Ourselves," its 86th annual meeting in Washington, D.C.

In addition, see Web site at <www.aacu.edu> for information on four regional (San Antonio, Philadelphia, Tacoma, and Charleston) "Network for Academic Renewal" meetings.

Contact: (202) 387-3760, e-mail, <meetings@aacu.muw.org>; Web site: <www.aacu.edu>.

NAFEO 25th National Conference
February 13-17

Contact: (301) 650-2440, Web site: <www.nafeo.org>

NABE 2000/Millennium Conference
February 15-19

The National Association for Bilingual Education's five-day event includes keynote speakers and more than 200 workshops, symposia, papers, and demonstrations focusing on the education of language-minority children and the development of multilingualism and cultural understanding in San Antonio, Texas.

ACE 82nd Annual Meeting
March 18-21

Contact: Web site: <www.acenet.edu>.

AHP Convention 2000
March 29-April 1

The National Association of Hispanic Publications presents "the Hispanic print event of the new millennium." At the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tombar, Executive Director/CEO, (202) 662-7250.

AAHE 2000 National Conference
March 29-April 2

The American Association for Higher Education's 2000 national conference has as its theme "To Form a More Perfect Union: Diversity and Learning" in Anaheim, Calif.

Contact: Kerry Newberry, conferences and meetings assistant, (202) 293-6440, Web site: <www.aahe.org>.

NCA-CIHE 105th Annual Meeting
April 3

The North Central Association of Colleges and Schools (Commission on Institutions of Higher Education) presents "The Quest for Quality: Mission, the Commission, and a New Century." In Chicago, at the Hyatt Regency Chicago.

AACC 80th Annual Convention
April 8-11

The American Association of Community Colleges presents its annual convention, this year on the theme "A World of Possibilities," and an academic marketplace. At the Hilton Washington in Washington, D.C.

Contact: Web site: <www.aacc.nche.edu>.
Book Review

by Eduardo Mendiesta

Jorge J.E. Gracia is without question one of the best-known Latino/Hispanic philosophers in the United States and abroad. He is a founding member of the American Philosophical Association's (APA) committee on Hispanics, and its first chair. There is something, however, unique to say peculiar, about this recent book by Prof. Gracia. He was trained as a medievalist. His area of expertise are late medieval philosophy, the problem of individuation, a central topic within ontology, or more broadly defined metaphysics. Scholars trained in such fields tend not to be concerned with contemporary manners, social reality, and the vagaries of "identity politics." Yet, Gracia, has taken on a topic that prima facie could be construed as being antithetical to his own philosophical orientation. As he declares in the "preface," he writes not as a leader, or prophet, or even ideologue of a movement. He writes as both a "Hispanic" and an "American" who is concerned with the fate of the nation and her people, and who happens to be a philosopher. And that is what makes this book refreshing and insightful.

Gracia is not peddling some new intellectual fashion. Nor is he compromising his intellectual orientation in order to make it fit some political agenda. Gracia demystifies a lot of sacred cows and is able to question many presuppositions taken for granted in the "movement." Again, not because he is pushing a particular agenda. There is a lot of honesty, clarity, in this book, and that is refreshing.

On one hand, as an intellectual outsider to identity politics, Gracia asks questions that those who have endured prolonged dwelling in the midst of engaged and embattled political activism have forsaken or forgotten to ask. What should we call ourselves, as a people in the United States? Why, what are the criteria, and are they coherent? Why is naming significant to a people, even to a movement? How did we become the people that we have become? What is our relationship to other groups with whom we share very close narratives? And, then, as a philosopher, he asks, what does philosophy say to and about "Hispanics/Latinos? Is there a Latin American philosophy? And if there is such a philosophy, what relationship does it have to "Hispanics" in the U.S.?”

Several of the answers that Gracia offers will be unsatisfactory to many, but this is a laudatory, to the goals of the text. What is significant, instead, is the way in which Gracia has advanced by clearing the ground of presuppositions and biases, to then proceed by developing a set of plausible and intellectually honest responses. For instance, Gracia finds it unsatisfactory and distasteful to call us "Latino," or "Latino." He thinks it makes more sense to call ourselves Hispanics. The text, however, uses the "Hispanic/Latino" to talk about Hispanics in the U.S.

Also, what makes us a people? Neither race, nor religion, nor language, nor nationality alone is the point of reference. For Gracia, we are "Hispanics" due to a history that has traced a series of family characteristics that make us resemble one another and make us want to claim family membership. History, and not some ethereal essence, makes us a people. The history that has painted our family portrait is history that includes mestizaje, syncretism, and linguistic creolization. To deny one aspect of this history is to misrepresent us. To reduce to one characteristic is to deny the complexity of our history. In both cases, homogenization is in the service of hegemony, and as such should be resisted.

The book also discusses questions of Hispanic and Latin American philosophy. By the former, Gracia means specifically the philosophy that emerged in Spain, and the colonies, during the fifteenth, sixteenth, and seventeenth centuries. Unfortunately, for ideological reasons, this has been pushed out of the narrative of the evolution of Western thought. With respect Latin American philosophy, Gracia discerns three meta-positions: the universalist, the historicist, and the critic. The analysis of these three positions is not only informative about philosophy, but also about the kinds of intellectual currents that have shaped Latin American intellectual life in the second half of the twentieth century.

For Gracia, it is clear that there is Latin American philosophy. The pressing issue for him is: why don't we study it? Or, why is it so deliberately ignored and neglected? The U.S. academy? This is the question that is taken up in the final chapter of the book. This last chapter, in fact, is a blistering indictment of the discipline. The numbers of both graduate students and professors in philosophy are deplorable. But the attitude and the will are even worse. Gracia, however, wants things to change. He has shown as much by having given so much of his professional efforts working within the American Philosophical Association (APA) to improve the conditions for Hispanics/Latinos, and changing curricular requirements and expectations. This book will be de rigueur with the disciplines and few those interested in things Hispanic. It is an indispensable resource and point of reference for debates about Hispanics in both the U.S. and throughout Latin America. It will certainly become a required text in classes on Latin American philosophy. Were there to be audacious professors desiring to teach a "Philosophy of the Hispanic Experience," they would find in this book their map and essential primary text.

Eduardo Mendiesta is assistant professor of philosophy and associate director of the Center for the Study of Latinos in the Americas (GELASA) at the University of San Francisco.

BRIDGEWATER STATE COLLEGE

FACULTY POSITIONS AVAILABLE

Bridgewater State College is a comprehensive public college serving approximately 8700 students. Its 270 full-time faculty offer over one hundred baccalaureate and master's level programs. The J. Joseph Mooney Library for Technological Applications provides advanced computing and telecommunications technology to support academic programs. The campus is located in southeastern Massachusetts, in an attractive New England town, easily accessible to Boston, Cape Cod and Providence. For additional information, visit the web site.

Bridgewater State College seeks applicants for the following full-time, tenure-track faculty positions, which include opportunities for teaching and advising undergraduate and graduate students during the nine-month academic year. Opportunity exists for additional teaching in the summer.

All positions require an earned doctorate, unless otherwise noted. Applicants should be strongly committed to excellence in teaching and advising, and to working in a multicultural environment that fosters diversity. Applicants should also have the ability to use technology effectively in teaching and learning, the ability to work collaboratively, evidence of scholarly activity, and a commitment to public higher education.

SCHOOL OF ARTS AND SCIENCES

Assistant Professor, Department of Biological Sciences. Specialty in Genetics. Teach courses in genetics, introductory biology and upper level courses that support the Department's Medical Laboratory Science program. Responsibilities also include supervising undergraduate research, advising students, participating in procurement of equipment, and serving on department and college committees. Requires an earned Ph.D. and a strong commitment to research in an undergraduate setting, as well as to advising undergraduates and supervising original undergraduate research. Knowledge of human genetics and general zoology is desirable. Teaching experience is preferred.

Assistant Professor, Mass Communication, Department of Communication Studies and Theatre Arts. Position 1 - Mass Communications. Duties include teaching introductory and advanced television production, general mass communication and media studies courses: supervising student production crews and internships; acting as liaison with local television stations, communication centers, teaching in departmental curriculum development and advising students. Requires a Ph.D., a strong commitment to excellence in teaching mass communication and media studies, excellent communication skills, and video/production experience preference. Preference will be given to those with demonstrated operational knowledge of state-of-the-art video technology.

Assistant Professor, Mass Communication, Department of Communication Studies and Theatre Arts. Position 2 - Mass Communications. Duties include computer-mediated teaching of mass communication and public relations courses with emphasis on new communication technologies, advising students; participating in departmental curriculum development and working with departmental and college committees. Requires an earned Ph.D., a strong commitment to teaching excellence, excellent communication skills, and experience and professional experience in media and public relations, especially with new communication technologies.

Assistant Professor, Department of Earth Sciences and Geography. Teach introductory physical geography, meteorology, and climatology. Responsibilities also include student advising, supervising undergraduate research and internships and serving on department and college committees. Ph.D. required as well as a strong commitment to undergraduate teaching. In supervising undergraduate research and internships, and advising and mentoring students. Ph.D. in Geography preferred. An ability to teach geotourism and/or allied specialties is desirable.

Assistant Professor, Department of English, Position 1 - Irish Literature. Teach upper-division courses in field of specialty, sophomore courses in general education literature, and freshman writing. Academic advising of students. Teaching in department and college community. Opportunities also exist to teach in the department's graduate program. Requires an earned Ph.D. with emphasis in Irish literature. Secondary interest in one or more of the following: postcolonial literature, cultural studies, women's literature. Since many faculty in the department teach freshman writing, preparation in composition will be an advantage.

Assistant Professor, English, Department of English. Position 2 - Rhetoric and Composition. Teach advanced courses in writing and freshman composition, academic advising, service to the department and college community. Opportunities exist to teach in the department's graduate program. Ph.D. in English. Specialization in rhetoric and composition preferred. Primary focus in Professional/Technical Communication. Secondary focus in one or more of the following: fiction writing, nonfiction writing, writing for periodicals.

Assistant Professor, Department of Foreign Languages. Specialty in English as a Second Language (ESL). Duties include teaching a variety of ESL courses, and a second language as appropriate. Candidate must be committed to broad, campuswide ESL involvement and work with non-native speakers of English through various venues as academic support services. Requires earned Ph.D. in ESL or related field, experience teaching at the college level and ability to teach a world language other than Spanish.

Assistant Professor, Department of History, Position 1 - Ancient Greece and Rome. Specialty in the history of ancient Greece and Rome. Duties include teaching upper-division and graduate courses in ancient history; teaching lower division courses in Western civilization. Serve on graduate student committees, and participate in departmental and college decision-making processes and activities. Requires an earned Ph.D. in history or a related field and teaching experience.

Assistant Professor, Department of History, Position 2 - Latin American History. Specialty in Latin American history. Duties include teaching upper-division and graduate courses in Latin American history, upper-division courses in another area of world history (other than Latin American history), and courses in Women's Studies and upper division courses in World History: advising undergraduates and graduate students; participating in departmental and college decision-making processes and activities. Requires earned Ph.D. in history or a related field and teaching experience.

Assistant Professor (tenure track) or Instructor (one year temporary) in Computer Science, Department of Mathematics and Computer Science. Responsibilities include teaching computer science and mathematics courses, advising undergraduates and supervising graduate students, participating in departmental curriculum development, supervising student research and professional activity. The Assistant Professor position requires an earned Ph.D. in Computer Science (or a closely related field). The Instructor position requires a master's degree in computer science (or a closely related field) and enrollment in an accredited doctoral program in computer science (or a closely related field). All areas of specialization will be considered, although Architecture and Operating Systems are especially favored.

Assistant Professor of Mathematics, Department of Mathematics and Computer Science. Position 1 - Math Education. Teach a range of undergraduate and graduate courses for both majors and non-majors, advise undergraduate and graduate students, participate in curricular development, including the use of new technologies in teaching and learning. Requires an earned doctorate in Mathematics (or a closely related field). Ability to teach courses in discrete mathematics, linear algebra, calculus with technology and other areas that support the major in computer science preferred.

Assistant Professor, Department of Mathematics and Computer Science with a specialty in mathematics education. Position 2 - Math Education. Duties include supervising secondary mathematics student teachers, teaching undergraduate courses such as Strategies for Teaching Mathematics in Middle/High School and working cooperatively in assisting with Curriculum development and technology integration. Requires an earned doctorate in Mathematics or Mathematics Education. Knowledge/competence in NCTM Standards and the Massachusetts Curriculum Frameworks in Mathematics preferred.

Assistant Professor, Department of Music. Specializes in piano (especially collaborative piano) and piano pedagogy. At all levels, sight-reading and ear-training to music majors, and service courses to non-majors. Responsibilities also include collaborating with performance faculty to provide student accompanists, student advising, and participating in the functions of the department and the college. Requires an earned doctorate in music with an emphasis on piano; experience at the college level, in teaching class piano, recital piano, and duo piano; and experience in accompanying soloists and ensembles. Preference experience in accompanying teaching music appreciation, non-Western music or other courses for non-majors, and community outreach.

Assistant Professor, Department of Physics. Duties include teaching a full range of undergraduate physics courses for both majors and non-majors; advising students seeking a diverse range of post-baccalaureate goals, such as graduate school, industry and teaching, and supporting the department in expanding its offerings and continuing to build on the strong teacher education programs of the college. Requires an earned Ph.D. in Physics.

Assistant Professor, Public Administration, Department of Political Science. Primary responsibility will be to teach and work closely with students in the department's growing MPA program. In addition, undergraduate teaching in related areas is expected. Requires an earned Ph.D. in Public Administration, Public Management, Public Finance and Budgeting, or Public Policy. A commitment to teaching excellence, and evidence of scholarly activity. Candidates with some practitioner experience and strong methodological skills preferred.

Assistant Professor, Department of Psychology. Position 1 - Psychology/Clinical. Teach courses in introductory psychology, clinical psychology, and related fields. Responsibilities include instruction, supervision of student internships and research, as well as serving in professional service to the department and the college. Requires an earned Ph.D. or Ed.D., Massachusetts State licensure or licensure eligibility, as a Health Service Provider, and evidence of quality teaching ability and clinical experience. Also required is ability to supervise student internships and research.

Assistant Professor, Department of Psychology. Position 2 - Psychology/Cognitive. Teach courses in introductory psychology, research methods, statistics and quantitative psychology. Responsibilities also include advising, supervising student research, and participating in professional service to the department and the college. Requires an earned Ph.D. or Ed.D., Massachusetts State licensure or licensure eligibility, as a Health Service Provider, and evidence of quality teaching ability and ability to supervise student research.

www.bridgew.edu
Assistant Professor in CSWE-accredited Department of Social Work bachelor level program. Duties include teaching social work theory and practice to 50 or more students; above average students, and research. Applicants should be strongly committed to excellence in teaching, and to working collaboratively, to mentoring students of diverse backgrounds, and to public education.

Assistant/Associate Professor, Criminal Justice/Criminology, Department of Sociology and Anthropology. Duties include teaching undergraduate courses in Criminal Justice, Criminology, or Sociology, with specialties in at least two of the following: deviance and criminal justice; race and ethnicity; gender and criminal justice. Applicants should be strongly committed to excellence in teaching, and to working collaboratively, to mentoring students of diverse backgrounds, and to public education.

Assistant/Associate Professor, Criminal Justice/Forensics, Department of Sociology and Anthropology. Duties include teaching undergraduate courses in Criminal Justice, Criminology, or Sociology, with specialties in at least two of the following: deviance and criminal justice; race and ethnicity; gender and criminal justice. Applicants should be strongly committed to excellence in teaching, and to working collaboratively, to mentoring students of diverse backgrounds, and to public education.

Assistant Professor, School of Education and Allied Studies, Department of Elementary and Early Childhood Education. Teach undergraduate and graduate methods courses in mathematics and science education; assist in undergraduate and graduate program development; supervise student teachers; write and support the development of grants; advise undergraduate and graduate students. Required: earned doctorate in Education with strong background in mathematics and science education; demonstrated teaching experience at the Early Childhood level (PK–3). Preferred: familiarity with NAEGY guidelines and a constructive philosophy; successful college-level teaching experience in both mathematics and science education; in at least one of the following areas: social studies education, educational assessment and technology, or technology education.

Assistant Professor, Elementary Education, Department of Elementary and Early Childhood Education. Teach undergraduate and graduate methods courses in area of literacy; assist in undergraduate and graduate program development; supervise student teachers; write and support the development of grants; advise undergraduate and graduate students. Required: earned doctorate in Education with strong background in reading literacy and successful classroom teaching experience at the Elementary Education level. Preferred: familiarity with ACEC or IRA guidelines and a constructive philosophy; successful college-level teaching experience in reading literacy and/or language development and assessment, reading and comprehension in at least one of the following areas: early childhood curriculum development, assessment, teaching, and test development of teaching, young children with special needs in the regular classroom, student teacher supervision.

Assistant Professor, Elementary Education, Department of Elementary and Early Childhood Education. Teach undergraduate and graduate methods courses in literacy, assist in undergraduate and graduate program development, supervise student teachers, write and support the development of grants; advise undergraduate and graduate students. Required: earned doctorate in Education with strong background in reading literacy and successful classroom teaching experience at the Elementary Education level. Preferred: familiarity with ACEC or IRA guidelines and a constructive philosophy; successful college-level teaching experience in reading literacy and/or language development and assessment, reading and comprehension in at least one of the following areas: early childhood curriculum development, assessment, teaching, and test development of teaching, young children with special needs in the regular classroom, student teacher supervision.

Assistant Professor, Physical Education, Department of Movement Arts, Health Promotion, and Leisure Studies. Teach courses in motor development, motor learning and adapted physical education; teach a variety of physical education classes; supervise interns; manage, staff, and support the development of grants; advise undergraduate and graduate students. Required: earned doctorate in Physical Education, demonstrated teaching and research experience, demonstrated competence in at least one of the following areas: physical education curriculum and instruction, physical education administration, and special education. Preferred: earned doctorate in Physical Education, demonstrated teaching and research experience, demonstrated competence in at least one of the following areas: physical education curriculum and instruction, physical education administration, and special education.

Assistant Professor, Physical Education, Department of Movement Arts, Health Promotion, and Leisure Studies. Teach courses in Exercise Physiology and Fitness ability to teach a variety of fitness classes; advise undergraduate students; supervise interns, and teach a variety of graduate courses. Required: earned doctorate in Physical Education, demonstrated teaching and research experience, demonstrated competence in at least one of the following areas: physical education curriculum and instruction, physical education administration, and special education. Preferred: earned doctorate in Physical Education, demonstrated teaching and research experience, demonstrated competence in at least one of the following areas: physical education curriculum and instruction, physical education administration, and special education.
THE NATIONAL ACADEMIES
Advisory to the Nation on Science, Engineering, and Medicine

NATIONAL RESEARCH COUNCIL
Postdoctoral and Senior Research Awards
opportunities for research in:

Chemistry • Physics • Life & Medical Sciences
Space & Planetary Sciences • Earth & Atmospheric Sciences
Engineering, Mathematics & Applied Sciences

Also teaching/research opportunities at the US Military Academy in
Mathematics, Physics & Mechanical Engineering

• 350 awards for independent research at over 120 laboratories
representing nearly all US Government agencies with research facilities
• 12-month awards renewable for up to 3 years maximum
• Annual stipend for recent PhD or MD graduates $30,000 to $52,000 depending
upon sponsoring laboratory; stipend appropriately higher for senior researchers
• Support for relocation and professional travel; health insurance program offered
• 3 annual award competitions for most participating laboratories

Applications are accepted on a continuous basis throughout the year.
Postmark deadlines are January 15, April 15 and August 15 for reviews in
February, June and October respectively.

Further information and application materials may be obtained from our
Web site at http://national-academies.org/rap or by contacting:
MAIL: Associatehip Programs (TJ2114/RNL)
NATIONAL RESEARCH COUNCIL
2101 Constitution Avenue NW
Washington, DC 20418
FAX: (202) 334-2759
EMAIL: rap@nas.edu

Qualified applicants will be reviewed without regard to race, creed, color, age, sex or national origin.

Andrew W. Mellon
Postdoctoral Fellowships

Grinnell College invites applications for Mellon Postdoctoral Fellowships for new Ph.D.s in the following fields:

English
Sociology
History
Music—candidates with specialties in the areas of music theory, composition, or electronic music are preferred, but other specialties will be considered.

Political Science—candidates whose fields are international relations, comparative politics, and/or political theory are of particular interest.

Economics—fields are open, but candidates able to teach on nonacademic inequality in the U.S., public economics, economic development, and macroeconomic policy are of particular interest.

Anthropology—substantive specialty is open, but desire candidates with area specialties in Latin America, North America, or Africa

Appointments will be made in four academic departments for a term of two years each, beginning in July or August, 2000. In addition to a salary comparable to that of new Assistant Professors, the fellowship includes benefits and support for research and travel.

These fellowships are designed for promising new scholars to enhance their transition from graduate program to academic careers in the humanities and social sciences. Among the qualifications for the appointments is the Ph.D. in hand (or expected by June 30, 2000). Candidates will generally have received the Ph.D. in 1997 or later. Working with the individual guidance and support of a faculty mentor, fellows will have responsibilities for teaching two courses each year. Candidates must demonstrate their interest in teaching in an undergraduate, liberal arts environment that emphasizes close faculty-student interaction. We also expect fellows to work as scholars and to engage in the intellectual life of the College.

Founded in 1846, Grinnell College enrolls 1300 undergraduate students from every state and the District of Columbia in the United States, as well as over 50 other countries. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunity-rich education with emphasis on one-on-one interactions between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the most liberal arts colleges and universities in the nation. Additional information can be found at the College’s Web site: www.grinnell.edu

Application Process: To be assured of consideration, submit a letter of application with a statement of teaching and scholarly interest, a resume, and a list of three academic references to: Jim Swartz, Vice President for Academic Affairs and Dean of the College, Mellon Postdoctoral Program, Grinnell College, P.O. Box 850, Grinnell, Iowa 50112 by February 1, 2000. Questions may be directed to Jim Swartz at (515)223-3100. Application materials received after that date may be considered until the positions are filled.

Grinnell College

Grinnell College is an equal opportunity/affirmative action employer committed to employing a highly qualified staff which reflects the diversity of the nation. As such, we will not discriminate on the basis of race, color, religion, sex, national origin or ethnicity, age, disability, marital status, veteran status, or sexual orientation.

The University of Illinois is an affirmative action/equal opportunity employer.

CHANCELLOR
University of Illinois at Springfield

Nominations and applications are invited for the position of Chancellor of the University of Illinois at Springfield (UIS).

The Chancellor is the chief executive officer of the campus and reports to the president of the University of Illinois. The University seeks a proven leader who will continue the successful development of the campus’s academic programs and public service mission.

Founded in 1969 as Sangamon State University, UIS became the newest and smallest campus of the University of Illinois on July 1, 1995. Emphasis is placed on public affairs instruction and research and service carried out through community partnerships.

The campus offers bachelor's, master's degrees, and a Doctor of Public Administration. UIS currently enrolls students at the second-semester sophomore level and continues their education through junior, senior and graduate levels. State approval was granted this fall for the Capital Scholars Program, which will result in the admission of first-year students in the fall of 2001. Current student enrollment is 4,100 with 188 faculty, 194 professional and 265 support staff.

The Chancellor must have significant diverse senior administrative experience, an earned doctorate, demonstrated leadership ability, as well as understanding and appreciation in the uniqueness of the campus within the University setting. A successful record on inclusiveness, diversity and sensitivity relative to a multicultural campus is required.

The Chancellor Advisory Committee will begin reviewing nominations and applications immediately and will continue to accept applications until a new Chancellor is selected. To assure full consideration, however, candidate materials should be submitted by January 1, 2000.

Dr. Frank Kapecky, Chancellor Advisory Committee
University of Illinois
Office of the President
364 Henry Administration Building, m/c 346
506 S. Wright Street
Urbana, IL 61801

The University of Illinois is an affirmative action/equal opportunity employer.
EXECUTIVE DIRECTOR,
Comprehensive Learning Center (CLC)

Brookdale Community College invites applications for an exciting new growth position! The College is recognized for its vision, excellence in educational practices, effectiveness in meeting diverse and eclectic student needs, utilization of state of the art technology and resources, and its capability to anticipate the current and future needs of the students, citizens & community it serves. The campus is located in an attractive rural area of Monmouth County, NJ, approximately, 60 miles south of New York City & 70 miles north of Philadelphia.

Brookdale is an innovative and comprehensive open admissions two-year college with an enrollment of approximately 11,500 credit and 15,500 non-credit students. Through the CLCs, Brookdale partners with other colleges and universities to offer seamless educational opportunities for associate, baccalaureate, and graduate degree in addition to providing comprehensive student services, business and professional development for corporate partner and community activities. The incumbent will be responsible for the development, operation and oversight of one or more CLCs and will provide leadership in the expansion of partnerships and services with institutions of higher education, corporations, local businesses and state government agencies. Candidates with a strong desire to be involved in educational innovation, with an interest in growth opportunities, and with the drive to succeed are encouraged to apply.

Candidates must be team oriented, entrepreneurial, and possess a strong work ethic. A Master’s Degree and five years experience in academic administration, two of which must include supervision within a college environment, are required. Must have excellent planning and organizational skills. Must also be able to demonstrate effective interpersonal and presentation skills. Additionally, computer literacy and a valid New Jersey driver’s license are necessary. Annual salary will be within a range of $55,438 to $67,204, with career opportunity potential within a dynamic leadership team.

APPLICATION PROCESS: Applicants interested in the above position should submit a letter of application, resume, copies of graduate transcripts and three letters of recommendation to Human Resources via fax at (732) 224-2870, or by mail to the address as noted below. Yo may also apply in person at the Human Resources Office, 6:30AM to 5:30PM, Monday through Friday. Our Job Hotline telephone number is (732) 224-2821. APPLICATION DEADLINE: A materials must be received postmarked no later than December 15, 1999.

BROOKDALE
COMMUNITY COLLEGE
765 NEWMAN SPRINGS ROAD
LINCROFT, NJ 07738

Visit our website: http://www.brookdale.cc.nj.us

Brookdale Community College is an Equal Opportunity/affirmative action employer and its staffing processes are pursued through an unwavering commitment to diversity, not only as a compliance responsibility, but as an active conscious effort to build and develop diversity within the faculty and staff.

EMINENT SCHOLAR OF HISTORY
Gadnessville College invites applications and nominations for its Eminent Scholar of History endowed chair, a tenure track position reporting to the chair of the Division of Social Sciences. Primarily responsibilities include involvement in research activities focused on the local and state level, development and implementation of educational programs for the entire community, service as a College liaison to the community and appropriate educational institutions, and services to the College's students through the teaching of four courses per year. See http://www.gc.peachnet.edu for a complete description and application procedures.

The University of South Florida is currently recruiting for various faculty and/or staff positions. For more information about the University’s vacancies, please visit our Web site http://usfjobs.usf.edu or call our Job Line for staff positions at (813) 224-9379.

USF is an equal opportunity/affirmative action institution, committed to excellence through diversity and inclusion.
Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 5,000 undergraduate and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT provides a quality of life appreciated by students and families. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada, one hour’s drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and Interstate 87.

WRITING SPECIALIST – Plattsburgh State University seeks qualified candidates for the full-time, twelve-month position of Claude J. Clark Learning Center Writing Specialist. This individual will report to the Director of the Learning Center. Responsibilities: Supervision of the writing classroom and its functions; recruiting, training and supervising writing tutors; teaching one to three credit courses per year that serve as the primary recruitment and training component of the Learning Center’s writing tutors. In addition, the Writing Specialist will be responsible for working with students on a one-on-one basis, writing workshops and providing support services for ESL students.

Qualifications: Master’s degree in English or Writing; minimum of three years experience in a higher education setting; excellent interpersonal skills; willingness to work collaboratively with faculty, staff and students. Teaching experience is highly desirable and demonstrated computer proficiency is requested.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

Salary: $30,000 with excellent benefits. Review of applications will begin immediately and continue until position is filled. Send letter of application, current resume, and the names, addresses and telephone number of three references to: Chair, Search Committee, (PJ #2373-5689), C/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2661. Fax # (518) 754-2060.

UIC

DEPARTMENT OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE

FACULTY POSITIONS

UNIVERSITY OF ILLINOIS AT CHICAGO

The EECS Department is in the process of a major expansion of its Computer Science research activity, and invites applications for tenure-track positions at all ranks, as well as applications for higher and adjunct positions. Exceptional candidates in all areas of research are encouraged to apply; a Ph.D. in Computer Science or closely related field is required. The department is interested in candidates who are engaged in fundamental research or application-grounded creative work likely to generate maximum impact on society. Interdisciplinary applicants are especially encouraged to apply. Applicants should demonstrate research and teaching potential and accomplishments commensurate with the rank they are seeking.

The University of Illinois at Chicago has undertaken a major shift aimed at establishing itself as one of the nation’s premier state universities. The EECS Department, best known as the birthplace of the CAVE virtual reality environment, hosts active research groups in computer graphics and virtual reality, networks, data mining, artificial intelligence, human-computer interaction, software engineering, computer architecture, database systems, computer vision, and theoretical computer science. The Computer Science faculty (36 members within the departmental faculty of 53) has been awarded over eight million dollars in external research grants for the current academic year.

The EECS Department offers B.S., M.S., and Ph.D. degrees, and has a strong reputation for teaching excellence. It attracts a diverse student body, and is seeking candidates who have an interest in defining and implementing innovative learning programs. The UIC campus is located near downtown Chicago and offers rich opportunities for collaboration with other universities, national research laboratories and high-tech industry. Applicants should send a resume and the name and addresses of at least three references to: Faculty Search Committee, EECS Department (MC 154), University of Illinois at Chicago, 851 South Morgan Street, Chicago, IL 60607-7054. Applications will be reviewed as they are received, but must be received before March 1, 2000 for full consideration. Candidates are also strongly encouraged to submit electronic versions of their applications, for instructions, see the web site http://www.eecs.uic.edu/search

UIC is an Affirmative Action/Equal Opportunity Employer. We are interested in receiving applications from a broad spectrum of people, including women, minorities, and differently-abled individuals.

OKLAHOMA STATE UNIVERSITY

EARLY CHILDHOOD EDUCATION

Assistant/Associate Professor, specialization in Early Childhood Education.

Responsibilities: The successful candidate will teach undergraduate and graduate courses in early childhood education and/or other courses as needed by the department, develop and maintain an active research program that includes seeking extramural support consistent with the department’s mission, needs, and priorities; advise graduate and undergraduate students; engage in outreach consistent with the land grant mission of the University; collaborate with departments and university colleagues as well as professional educators; and participate in academic governance and community service to further the mission of a comprehensive land-grant university.

Qualifications: Candidates should have an earned doctorate in Early Childhood Education, Child Development, Curriculum or related field and evidence of teaching at a state accredited program. Grades 1-3. Preferred qualifications include experience teaching at the university level, a record of scholarly publication, participation in professional activities at the national level, evidence of ability to work cooperatively with schools and university faculty; and interest in Special Education.

Appointment: Starting date August 2000, tenure track.

Salary: Commensurate with qualifications and experience.

Environment: Oklahoma City is a vibrant city of approximately 1,000,000 that is located within 15 miles of both Tulsa and Oklahoma City. Collaborative research and placement relationships have beennegotiated in surrounding rural school districts and similar opportunities exist in the two metropolitan areas.

Application Deadline: January 15, 2000 or until position is filled.

Send letter of application, current curriculum vitae, copies of transcripts, and three letters of reference to: Chair, Early Childhood Education Search Committee, Department of Family, Relations and Child Development, Oklahoma State University, Stillwater, OK 74078-1532. Telephone: (405) 744-5087.

Oklahoma State University is an Affirmative Action/Anti-Discrimination Employer. Candidates from minority groups are encouraged to apply.

TECHNICAL SUPPORT ENGINEER

(Associate Director I)

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York metropolitan area and is one of nine state college universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250. The University’s 45 acre campus has over 900,000 gross square feet of academic, administrative and residential structures.

Under general supervision of the Director of Facilities, the Technical Support Engineer will be responsible for the operation and maintenance of the control boiler plant and steam distribution network, building and mechanical systems and energy management systems. Ensures compliance with applicable state and federal regulations. Recommends mechanical upgrades and manages maintenance projects. Responsible for management of technical drawings and documents and supervision of assigned personnel.

BS Degree in Mechanical Engineering or closely related engineering discipline required. Extensive knowledge of boiler plant operations, HVAC and Energy Management systems. Maintenance experience in facilities maintenance overseeing HVAC and Energy Management systems is desired. Must have demonstrated ability to manage Mechanical Capital Renewal project. Strong computer skills and experience with maintenance management and CAD programs preferred.

Salary range is $53,471 to $95,213.00.

Send resume to: Robert Pliszkowsky, Search Committee Chair

New Jersey City University

Hebrew Hall, Room 105
2039 Kennedy Boulevard
Jersey City, NJ 07305

New Jersey City University is an Affirmative Action, Equal Opportunity Employer. Women, minorities, persons with disabilities and veteran candidates are encouraged to apply.
UNIVERSITY OF FLORIDA

Counselor Education
Faculty Position

Position Vacant: The University of Florida Department of Counselor Education is accepting applications for an Assistant Professor position to begin August 2000. The position is tenure-track, and involves teaching, research, and service in a CACREP-accredited School Counseling program. Salary is open and competitive and dependent upon professional qualifications and experience.

Required: Applicants eligible for consideration for this position must have experience as a school counselor and provide evidence of potential for excellence in teaching, research, publication, and professional service. A demonstrated commitment to diversity is essential. Applicants for this position must have an earned doctorate in Counselor Education or a closely related field. Preference will be given to applicants having academic preparation and/or professional experience in career development or substance abuse prevention. Preference will also be given to graduates of CACREP-accredited doctoral programs. Familiarity with the use of computers and other technology in counseling and teaching is highly desirable. Applicants should submit (1) a current professional vita; (2) three letters of recommendation; (3) documentation that the doctoral degree was or will be awarded by August 2000; (4) a letter of interest that includes a description of professional and personal qualifications and their match to the position-specific requirements and preferences; and (5) a statement of the applicant's philosophy of counselor education. All materials, including references, must be received by January 15, 2000. Incomplete applications will not be considered. Send application materials to: Search Committee Chairperson, Department of Counselor Education, University of Florida, 1215 Norman Hall, P.O. Box 117046, Gainesville, Florida 32611-7046.

The University of Florida is an affirmative action/equal opportunity employer.

Texas A&M University
Vice President for Administration

Texas A&M University invites applications and nominations for the position of Vice President for Administration. As a member of the University’s executive management team, this position provides support and counsel to the President. University-wide issues will be the primary focus. Expertise and experience in the management of support components is essential. The position requires experience in the design and implementation of human resource programs, and a commitment to education.

QUALIFICATIONS: A master’s degree in business or public administration is required. A Ph.D. degree is preferred. Experience in strategic planning and corporate communications is desirable. A Bachelor's degree in business or public administration, plus three years of related experience, is desirable. Experience in the management of support components is essential. The ideal candidate should have demonstrated leadership ability; exceptional skills in oral and written communications; ability to work independently; ability to accomplish objectives through the development and utilization of human resources; ability to design and implement new programs. Knowledge of university operations is preferred.

TO APPLY: Nominations or applications with resumes should be addressed to the Search Advisory Committee for the Vice President for Administration. Applications should be accompanied by a resume and a letter of interest stating qualifications and a list of five references. No contact with references will take place without clearance by the Search Committee. Nominations and applications will be reviewed beginning immediately. Send application materials to: Search Committee Chairperson, Department of Counselor Education, University of Florida, 1215 Norman Hall, P.O. Box 117046, Gainesville, Florida 32611-7046.

Send applications and additional information to the following university:
http://www.tamu.edu/administrative/position

College of Technology, Engineering and Management

The University of Wisconsin-Stout is seeking a Dean of the College of Technology, Engineering and Management (CTEM). The dean is the chief academic and administrative officer for the College of Technology, Engineering and Management and reports to the Provost (Vice Chancellor for Academic and Student Affairs). The college is organized by departments which include Business, Communications, Education and Training, Industrial Management, and Technology; as well as units including the Stout Technology Transfer Institute, Center for Training and Technical Education, Northwest Wisconsin Manufacturing Outreach Center, Risk Control Center, Packaging Research and Development Center, Economic Development Administration University Center, and Technical Instructor Institute. The dean is eligible to become a tenured faculty appointment within the college.

RESPONSIBILITIES
- Administer the college.
- Facilitate the development and evaluation of curriculum, instruction, advising, research, service, outreach activities.
- Identify, secure and allocate resources for administration of the college budget.
- Provide leadership in developing and implementing programs to attract and retain students.
- Support on-going faculty hiring.
- Serve as a member of the university's leadership teams.
- Nurture an environment that supports excellence in teaching, research, diversity, and encourages professional development, open communication, honesty, and teamwork.
- Participate in shared governance with faculty and staff.

QUALIFICATIONS
- An earned doctorate, with at least one degree in a technology-related discipline.
- Administrative and/or managerial experience which includes management of personnel, budgets, facilities, and equipment.
- Education or experience which relates to several of the disciplines within CTEM.
- Experience in teaching and/or training experience.
- Involvement in scholarship and academic research, or applied research.
- Experience in establishing partnerships between business/industry and educational institutions.
- An educational philosophy which is compatible with CTEM's mission and values.

Contact: http://www.uwstout.edu/ctem/geminfo.html#missions
- Excellent communication and human relations skills.

The University of Wisconsin-Stout is located in Menomonie, Wisconsin, a community of about 14,600 that surrounds the shores of Lake Menomin, 66 miles east of Minneapolis-St. Paul, Minnesota, and 25 miles west of Eau Claire, Wisconsin. The university enrolls 7,600 students who prepare for careers in business, industry, technology, family and consumer sciences, education, and human services, and art and design at the bachelors' and masters' levels. Learn more about UW-Stout by visiting our web site at www.uwstout.edu.

For full consideration, send a letter of application, detailing your qualifications and a resume including a list of references to: Robert Spohrer, Chair, Search Committee, Rentschler Hall, University of Wisconsin-Stout, Menomonie, Wisconsin 54751. Applications close on May 1, 2006.

Plattsburgh State University of New York is a comprehensive, coeducational institution offering 14 undergraduate majors, 23 graduate degrees and 6 certificate programs. Located on the shore of Lake Champlain, the college is the intellectual center of the Lake Champlain-Adirondack region of New York State. The small city of Plattsburgh and neighboring Burlington provide a quality of life unsurpassed for the whole Family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and at Olympic resort village of Lake Placid while the urban, multicultural life is rich in neighboring Montreal, Canada, one hour's drive from car. Plattsburgh is easily accessible to New York City and Boston via air, bus, and interstate 87.

STAFF ACCOUNTANT - The Business Affairs Division of Plattsburgh State University of New York invites applications for two (2) Staff Accountant to be supervised by a fiscal officer.
Responsibilities: Perform professional accounting tasks requiring a knowledge of accounting principles and procedures in the development, examination, and analysis of financial and accounting records, including preparation of reports and statements. Assist with design and revision of existing accounting systems.

Qualifications: Bachelor's degree in Accounting, Finance, Economic, or related business degree; at least two years of responsible experience; knowledge of generally accepted accounting principles, procedures, and techniques; ability to maintain financial accounting records, and auto accounting systems.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

Salary: $30,000 minimum; excellent benefits. Review of applications is immediate and continues until positions are filled. Please send or fax an application, resume, and three letters of reference to: Chair, Search Committee, (P) 2373-8096, c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2605.

Rensselaer Polytechnic Institute - Troy, New York

Dr. Shirley Ann Jackson, Rensselaer Polytechnic Institute's 18th president, has recently completed the search for the college's next provost. A key note member of the leadership team, the provost plays a critical role in advancing the university's mission and in developing new programs and initiatives.

Salary: The salary will be competitive and commensurate with qualifications and experience. Start date: Tentatively September 1, 2006.

Applications should be submitted by February 1, 2006, to: Provost's Office, 330cod administration building, University of Wisconsin-Stout, Menomonie, Wisconsin 54751. The University of Wisconsin-Stout is an equal opportunity, affirmative action employer.

These positions are for the MSW Off-Campus Program in Arlington, VA, and the on-campus program in Richmond, Virginia. Ability to teach direct practice, research and/or diversity content is BSW, MSW and Ph.D. Program. A background in gerontology is a plus. Applicants are sought who will contribute to the School's mission of social justice and multi-cultural practice. Applications will be reviewed until the positions are filled.

To apply, send letter of application, vita, names, addresses and phone numbers of three references and examples of written/published scholarship to:

Dr. Marcia Harrigan
School of Social Work
Box 842027
Richmond, Virginia 23284-2027
(804) 828-6888

Virginia Commonwealth University is an equal opportunity/affirmative action employer. Women, minorities and persons with disabilities are encouraged to apply.

UNIVERSITY OF FLORIDA

COLLEGE OF EDUCATION

EDUCATIONAL PSYCHOLOGY

PROFESSOR AND CHAIR

The Department of Educational Psychology at the University of Florida invites nominations and applications for a position as Professor and Chair. The department has three graduate programs: Educational Psychology, Evaluation and Measurement, and School Psychology, and offers service courses at the undergraduate and graduate level. The University of Florida is among the nation's most academically diverse public universities, a member of the Association of American Universities, and has a comprehensive land-grant institution. It serves a wide geographic area and culturally diverse population normally distinguished faculty.

The chairperson will be expected to provide leadership in an administrative environment that promotes teaching, research, and service; and represent the interests of the department and the college and university. Applications from faculty members with the ability to provide leadership in the Educational Psychology area are especially encouraged. Essential qualifications include excellence in research, teaching, and service; and the ability to communicate effectively with the internal and external constituencies of the department, and to a degree, national research. Essential qualifications include prior experience in higher education. Applications are encouraged in the Education Psychology area especially.

Send a letter of application addressing these qualifications, a curriculum vitae, and copies of three relevant publications to:

Dr. James McLean, Chair
Educational Psychology Search Committee
G-315 Norman Hall
PO Box 117050
University of Florida
Gainesville, FL 32611-7050

Three letters of recommendation should be sent to the same address. Applications must be postmarked no later than January 14, 2000. The anticipated starting date is July 1, 2000.

The University of Florida is an Equal Opportunity/Affirmative Action Employer.

The University of Texas

Pan American

Chair of the English Department

Dissipates information on grant opportunities by targeting individuals and departments. Assists Associate Dean as liaison with sponsoring agencies and the University.

Qualifications: Minimum requirements for interested applicants include a Bachelor's Degree, Master's Degree, a plus (Doctoral Degree preferred). The successful candidate will have at least three years of experience in grants, and sponsored programs in sciences, social sciences, allied health areas, and related fields. Computer, web site, and grant writing skills required. Candidates must be accustomed to working under pressure, and be familiar with the policies and application procedures of the National Science Foundation—including the FASTLANE process—NIH, HHS, and related federal agencies.

Application, Salary and Benefits Information for all positions: Candidacy review begins immediately and continues until appointment is made. Send letter of interest, current resume, names, addresses, and telephone numbers, of three references. Official transcripts and three current letters of recommendation are required prior to the appointment. Apply to: Dr. Mark Lender, Associate Dean, Nathan Weiss School of Graduate Studies, Kean University, 1000 Morris Avenue, Union, NJ 07083

Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits package included

kean University is an EEO/AA Institution

Kean University is committed to excellence and to developing and strengthening interactive ties with the community. Kean University takes pride in its continuing efforts to build a multicultural professional community serving a diverse student population of 12,000.
Wayne State University invites nominations and applications for Vice President for Student Development and Campus Life.

Wayne State University is a Carnegie Research University I, with an urban teaching and service mission. Wayne State is the nation's twenty-first largest university by enrollment; 31,000 students study in 15 schools and colleges offering more than 350 degree programs. Forty-one percent of Wayne students are enrolled in graduate and professional programs, which makes WSU's graduate school the seventh largest in the country. Located in Detroit's Cultural Center, the university mainly serves students from the metropolitan area, but also enrolls students from most states and over 50 foreign nations.

A new position created in 1998, the vice president for student development and campus life is the university's senior officer responsible for a comprehensive program of services that complements and supports the academic mission of the university and enhances student development and the quality of campus life. Reporting to the president, he/she is responsible for the formulation, management, oversight, and delivery of services and programs designed to enhance the educational and social experience of students.

The vice president for student development and campus life will work with the university community to assess and improve student services, foster faculty and student collaboration, and enhance the sense of campus community. Drawing on the strengths of a distinguished faculty, a rich array of undergraduate and graduate programs, and a deep commitment to the values of diversity, the vice president will have an opportunity to play a decisive role in the development of a learner-centered, urban university. The university is in the initial stages of the creation of an academic success center to coordinate and focus its advising, counseling, and retention programs.

Qualifications include a commitment to the mission and purpose of an urban university; familiarity with the goals and purposes of higher education; relevant and practical experience in the area of student development and campus life; extensive experience in the delivery and oversight of student services programs; strong planning and problem-solving abilities; considerable knowledge of student life and legal issues in higher education; sound organizational skills and ability to coordinate programs and activities; excellent communication and interpersonal skills; ability to plan, organize, and effectively present ideas and concepts to groups; an ability to work collaboratively with others; the capacity to take on additional responsibilities with a minimum of five to seven years of progressively responsible management experience in higher education administration.

Review of candidates will begin by November 30, 1999, and will continue until a suitable candidate has been identified.

Letters of nomination and applications should be submitted in confidence to Meredith E. Gibbs, Chair, Vice President Search Committee, Wayne State University, 656 W. Kirby, 4105 Faculty/Administration Building, Detroit, Michigan 48202. The University is being assisted in the search by Katherine T. Slaughter, Compass Group Ltd., 401 South Old Woodward, Suite 400, Birmingham, Michigan 48009; phone (248) 540-9111; e-mail ktslaughter@compassgroup.com.

Wayne State University is an equal opportunity/affirmative action employer.
UNIVERSITY OF WISCONSIN - RIVER FALLS
CHANCELLOR

The University of Wisconsin System (UW-S) invites applications and nominations for the position of Chancellor of the University of Wisconsin-River Falls. Founded in 1874, UW-River Falls is located 30 miles east of Minneapolis/St. Paul and is one of 11 comprehensive universities in a public higher education system. The Chancellor reports to the President of the UW System and provides institutional leadership within Wisconsin’s tradition of shared governance with faculty, academic staff and students.

UW-River Falls’ primary mission is undergraduate education with a commitment to teaching excellence. The student-to-faculty ratio is 19:1 and in fall 1999, UW-River Falls enrolled 5,134 undergraduate and 1,278 graduate students. The operating budget is $38 million, and the Foundation’s endowment exceeds $9 million. University resources are consistently invested in faculty development, instructional technology, and classroom and laboratory renovation following priorities set in its strategic plan.

UW-River Falls seeks a chancellor with the capacity to lead an energetic institution within a large and dynamic public higher education system. Characteristics of the ideal candidate include a commitment to the University’s mission; a record of academic accomplishment, teaching experience and administrative experience, commitment to enhancing the quality of student life; and the ability to build strong relationships with System Administration, the Regents, legislators, donors, and community leaders.

Evaluation of applications will begin on December 17, 1999. The position is available in May, 2000, and applications will be accepted until the position is filled. The search committee will conduct a national search and not be limited to current UW System faculty members. Applications and nominations should be sent to:

Dr. Thomas L. Parle, Chair
Search Committee
University of Wisconsin-River Falls
131 North Hall, 410 South Third Street
River Falls, WI 54022

Phone: (715) 425-3395; Fax: (715) 425-3939
E-mail: chancellorsearch@uwrf.edu

Applications and nominations should address:

1. why the candidate is interested in the position
2. qualifications and experiences
3. leadership and management philosophy
4. goals to improve UW-River Falls
5. research interests

The search committee will begin reviewing applications in early January. For further information, contact:

Dr. James A. Colby
Dean of Faculty
University of Wisconsin-River Falls
131 North Hall, 410 South Third Street
River Falls, WI 54022

Phone: (715) 425-3395; Fax: (715) 425-3939
E-mail: chancellorsearch@uwrf.edu

The University of Wisconsin is an Affirmative Action/EQUAL OPPORTUNITY employer and a smoke-free environment. It is the policy to provide reasonable accommodations to qualified individuals with disabilities who are employees or applicants for employment.

EOE/ADA/AA
DEAN
Radcliffe Institute for Advanced Study
Harvard University

Harvard University is seeking a Dean to lead its newly created Radcliffe Institute for Advanced Study.

The Radcliffe Institute is an integral part of Harvard University, with a distinct identity of its own. Building upon programs and facilities already established at Radcliffe, the Institute will be committed to advanced scholarship at the highest level, across a wide range of disciplines and fields, including the full span of the arts and sciences, the major professions, and the creative arts. A very important focal point, within the Institute, will be significant work in the broad field of women, gender, and society.

The Dean will report directly to the President of Harvard and will be equivalent in standing to the other senior Deans of the University. As such, the Dean will be a member of the Academic Council, as well as the President's academic advisory group, which meets regularly with the President and Provost to plan major academic initiatives for Harvard as a whole.

The primary duties of the Dean will be to lead the Radcliffe Institute and to guide the Institute's future programmatic development. These tasks will include initial determinations concerning the ways in which existing programs and activities should evolve, and new activities should be shaped — including collaborative arrangements with Harvard's already established Facilities, Schools, and other units. From its inception, the Radcliffe Institute will be well endowed, with approximately $300 million already committed, and an expectation of continued fund-raising.

Requirements for the Deanship include scholarly achievement and high academic standing — in any discipline or field of study — equivalent to those expected of a tenured professor at Harvard. Broad intellectual and scholarly interests across a range of academic fields are essential, in addition to a strong commitment to carry forward the Institute's significant work related to women, gender, and society. Finally, some demonstrated ability in academic administration and leadership is an important requirement, as is the ability to work well with colleagues, at all levels, in a major university setting.

Letters of nomination or application should include a brief description of the applicant and his or her qualifications for the position of Dean, together with curriculum vitae or resume. Please direct letters of nomination or application to: Neil L. Rudenius, President, Harvard University, c/o Clayson Spencer, Massachusetts Hall, Cambridge, MA 02138.

At Harvard University, diversity is an essential source of vitality and strength.
ASSISTANT PROFESSOR, PHYSICS
TENURE-TRACK POSITION

The Physics Department of Union College invites applications for a tenure-track position beginning September 1, 2000.

Qualifications: recent Ph.D., demonstrated interest in both teaching and research, and an interest in mentoring physics majors in individual research or independent-study projects. Preference will be given to a theoretician, located in the Capital District of New York State, an area heavily engaged in academic and industrial R&D. Union is a small liberal arts college with a strong Undergraduate program in the sciences and an engineering division. The Physics Department has a strong reputation in research and in teaching. The candidate will be expected to teach a range of courses from introductory to advanced levels, to work closely with students on research projects, to develop and maintain a small research group, and to participate in the College's general education program. A commitment to student engagement is required.

Special facilities include: a newly installed observatory with a 20" telescope; a Center for Advanced Spectroscopy Studies with picosecond and nanosecond lasers, a 2MV Pelletron accelerator, and a dynamic light scattering lab. Our largest teaching responsibility is in calculations-based introductory courses, which are taught in studio-style classes of 12-18 students. There is a special emphasis on active learning and student engagement. All members of the department participate in these introductory courses, including their laboratory components. Upper level courses are typically small and are designed to prepare students for graduate work in physics and astronomy and for technical careers. The department is also heavily engaged in a college-wide general education program.

Salary competitive, commensurate with experience, and includes an exceptional benefits package consisting of medical, dental, and vision insurance, life insurance, disability coverage, a generous retirement plan, and tuition remission. Check our website at www.union.edu. Interested candidates should submit a letter of application including: CV, statement of teaching interests and experience, a research plan including description of startup needs, and three letters of reference by February 1, 2000.

Professor S. Malek
Search Committee, Physics Department
Union College
507 Union Street
Schenectady, NY 12308

Union College is committed to a program of affirmative action and equal employment opportunity. Women and minorities are strongly encouraged to apply.

ASSOCIATE/ASSISTANT PROFESSOR, MATH EDUCATION
TENURE-TRACK POSITION

The Department of Curriculum and Instruction is searching for a faculty member in Mathematics Education program whose responsibilities will include teaching a mix of content and methods courses for preservice elementary and middle school teachers and for those courses in the graduate program, supervising field experiences and student teaching, providing ongoing support and guidance, and collaborating with public schools. Candidates must have a commitment to teaching excellence and continued scholarly activity. Opportunities available to participate in ongoing research, initiate new research projects, and apply for external funding. Minimum qualifications include: earned doctorate in Mathematics Education with a strong graduate mathematics component; documented evidence of accomplishment in teaching, research, and service; at least three years of experience teaching mathematics at the middle grades or high school level; experience in educational technology and multicultural education is highly desirable.

Applications for all positions will close on January 15, 2000. Complete packages include a letter of application and curriculum vitae, three letters of recommendation, and an interview. Applications and detailed position descriptions are available from the Department of Curriculum and Instruction, 2 Milton Carothers Hall, College of Education, Florida State University, Tallahassee, FL 32306-4496. For further information, contact Dr. Elizabeth Jakubowski, Chair, Mathematics Education Search Committee, Department of Curriculum and Instruction, 2 Milton Carothers Hall, College of Education, Florida State University, Tallahassee, FL 32306-4496. Fax: (850) 644-1800. Email: ejakubowski@ece.fsu.edu.
FACULTY POSITIONS ACADEMIC YEAR 2000-2001

The University is pleased to solicit applications and nominations for faculty positions for the academic year 2000-2001. Unless otherwise indicated, faculty appointments are tenure-track at the rank of Assistant Professor and require an earned doctorate or appropriate terminal degree in the field (ABD's considered for appointment at the rank of instructor, pending completion of degree requirements). Candidates should send letters of application, current curriculum vitae, and dossier to the Chair of the respective Department, Drawer HO, William Paterson University, 300 Pompton Road, Wayne, NJ 07470. Documentation of a high level of teaching effectiveness and commitment to scholarship and/or creative expression is highly desirable. Applications for any position will be considered on a rolling basis until the position is filled. The academic year commences September 1, 2000.

College of the Arts and Communication

Otella Garcia, Dean

Department of Art
Professor Charles Magistro, Chair

Assistant Professor, Specialization in Computer Art and Animation. Extensive experience in 3-D computer animation programs (Alias/Maya), systems administration, UNIX/Windows/NT platform preferred. Assistant or Associate Professor, Specialization in History of Art, 19th and 20th Century, with additional expertise in history of photography or modern architecture and/or design. Ph.D. in Art History and a record of research and publication and successful college-level teaching experience required.

Assistant Professor, Specialization in Graphic Design/Typography. Visual communication designer with strong graphic design, typography, and advertising skills, professional graphic design experience, and successful college-level graphic design experience preferred. MFA in Graphic Design and knowledge of Macintosh computer platform required.

Department of Communication
Professor Tina Lesher, Chair

Assistant Professor, Specialization in Film Studies and Production. A current record of professional creative work in film production, college-level teaching experience, and ability to teach foundation and advanced course in film studies (including film history and screenwriting) required. Terminal degree preferred, although evidence of equivalent level of professional accomplishment will be considered.

Assistant Professor, Specialization in Theater. Ph.D. or Theater required with ability to teach acting and directing as well as performance courses in communications area (public speaking, oral interpretation, radio/TV, or voice/speech).

Assistant Professor, Specialization in Television Production. Familiarity with contemporary television production studio techniques, ENG/EFP techniques, and nonlinear video editing systems required. Evidence of media production skills preferred. Terminal degree preferred, although evidence of equivalent level of professional accomplishment will be considered.

Assistant Professor, Specialization in Interpersonal Communication. Evidence of ability to teach courses in research methods, public speaking, and foundations of language required. Evidence of ability to teach course-level writing and research courses and topics in contemporary media/society and telecommunications issues preferred.

College of Business

Frank Grippo, Dean

Department of Accounting and Law
Professor Reginald Grier, Chair

Assistant Professor, Specialization in Accounting. Candidates should have an earned doctorate and CPA, a strong commitment to scholarly research and be able to teach a broad range of accounting subjects, excluding taxation. A working knowledge of computer technology is required. International exposure a plus.

Department of Economics, Finance and Global Business
Professor C.K. Leung, Chair

Assistant Professor, Specialization in Economics. Candidates should have an earned doctorate, a strong commitment to scholarly research and be able to teach a broad range of economics subjects. A working knowledge of computer technology and a strong international orientation are required.

Assistant Professor, Specialization in Finance. Candidates should have an earned doctorate, a strong commitment to scholarly research and be able to teach a broad range of finance subjects. A working knowledge of computer technology and a strong international orientation are required.

Department of Marketing and Management
Professor Prabhaker Nayak, Chair

Assistant Professor, Specialization in Management. Candidates should have an earned doctorate, a strong commitment to scholarly research and be able to teach a broad range of management subjects. A working knowledge of computer technology and a strong international orientation are required.

College of Education

Leslie Agard-Jones, Dean

Assessment and Educational Leadership
Professor Maureen Gillette, Assistant Dean

Assistant Professor, Specialization in Assessment, Experience with qualitative and quantitative assessment models and design/analysis of assessment instruments for programmatic and individual student assessment and ability to teach graduate and undergraduate courses in assessment methods recommended. Ability to provide leadership on university-wide assessment matters preferred. Doctorate or ABD with completion date by August 2002 required.

Assistant or Associate Professor, Specialization in Educational Leadership. Proven public school teaching and leadership experience (urban preferred), appropriate state certification, evidence of scholarship and exemplary interpersonal skills in working with students, faculty, and school communities required. Doctorate in educational leadership or related field and demonstrated experience in the use of information technology required.
Department of Curriculum and Instruction
Professor Mildred Dougherty, Chair

Assistant Professor, Specialization in Science Education. Background in science education with expertise in teaching elementary and middle school science methods, classroom experience and college-level teaching experience required. Evidence of ability to promote interdisciplinary understanding of science and its relationship to contemporary events preferred. Doctorate or ABD with completion date by August 2002 required.

Department of Special Education
Professor Susan Kupeke, Chair

Assistant Professor, Three Positions: (1) Specialization in Teaching the Behaviorally Disordered; interest in adaptive technology preferred; (2) Specialization in Learning Disabilities and Instructional Management; and (3) Specialization in Diverse Educational Issues (experience in collaborative and inclusive settings required). To teach graduate and undergraduate classes and supervise field experiences. Classroom experience in teaching exceptional children, college-level teaching experience, and evidence of scholarship required for all positions. Doctorate or ABD with completion date by August 2002 required.

Assistant Professor, Specialization in English. Experience teaching in Urban/Multicultural settings preferred. To teach graduate and undergraduate classes and supervise field experiences. Experience in working with Child Study teams, eligibility of NJ Teacher of the Handicapped Certification, and demonstrated interest in the use of instructional technology required. Classroom experience in teaching exceptional children, college-level teaching experience, and evidence of scholarship required. Doctorate or ABD with completion date by August 2002 required.

College of Humanities and Social Sciences
Isabel Tirado, Dean

Department of African, African American, and Caribbean Studies
Professor Ronald Parris, Chair

Assistant Professor, Specialization in Expressive Culture. Background in academic/theoretical and performance components of African-American, and Carribbean musical traditions (including sacred music and jazz) and demonstrated teaching, research, and performance experience in those areas required. Doctorate required.

Department of English
Professor Catarina Edinger, Chair

Assistant Professor, Specialization in Children's and Young Adult Literature. Secondary specialization in creative and/or professional writing preferred. Publications, college-level teaching experience and Ph.D. required.

Department of Languages and Cultures
Professor William Rosa, Chair

Assistant Professor, French and Francophone Studies. Specialization in one of the following preferred: Francophone studies, cinema studies, cultural studies, or applied linguistics. Ph.D., demonstrable potential for future scholarship, and experience with new technologies in foreign language teaching required.

Department of Philosophy
Professor Daniel Kolak, Chair

Assistant Professor, Specialization in Cognitive Science, and/or artificial intelligence. Expertise in computer-related technologies preferred. Ability to assist in running departmental cognitive science laboratory required. P. commitment to undergraduate teaching, and evidence of interest and on-going philosophical thinking and research is required.

Department of Sociology
Professor Vincent Parrillo, Chair

Assistant Professor, Specialization in Methodology. Preparedness to teach courses in quantitative and qualitative sociological methods, statistics, introductory sociology required. Ph.D. or ABD, teaching experience demonstrated commitment to teaching, research and scholarship required.

Department of Women's Studies
Professor Arlene Scala, Chair

Assistant Professor. Specialization in Global Feminism. Demonstrated ability to make global connections in curricula and pedagogy and to teach introductory core courses required. Ph.D. in Women's Studies or related field, teaching experience in Women's Studies, and commitment to developing courses programs in Women's Studies required.

College of Science and Health
Eswar Phedia, Dean

Department of Biology
Professor Jane Voo, Chair

Assistant Professor, Two Positions: (1) Specialization in Genetics; Specialization in Vertebrate Zoology. Ph.D., demonstrated potential for research and evidence of successful teaching required. Post-doctoral experience preferred.

Department of Community Health
Professor Michele Grodner, Chair

Assistant Professor, Specialization in Nutrition. Doctorate or ABD in Nutritional Health-related field with at least one graduate degree in nutrition, clinical and community experience, evidence of commitment to teaching, and well-developed research agenda required.

Department of Computer Science
Professor Erih-Wen Hu, Chair

Assistant or Associate Professor, Specialization in Software Engineering, Programming Languages, or Computer Networks. Ph.D. or ABD in Computer Science or related field, and evidence of commitment to teaching, and well-developed research agenda required.

Department of Mathematics
Professor Mahendra Jani, Chair

Assistant Professor, Specialization in Applied Mathematics. Ph.D. and evidence of commitment to teaching, and well-developed research agenda required.

William Paterson University is an Affirmative Action/Equal Opportunity Employer: the University values diversity among faculty, staff and students. Minority and women candidates are encouraged to apply. Information about the University can be obtained electronically through access to its website at http://www.wpunj.edu

William Paterson UNIVERSITY
WAYNE, NEW JERSEY
An Equal Opportunity Institution Committed to Diversity
AMERICAN UNIVERSITY
DEAN
COLLEGE OF ARTS & SCIENCES

American University invites applications and nominations for the position of Dean of the College of Arts & Sciences. The Dean is the chief academic and administrative officer of the College and reports to the Provost. American University enrolls a diverse student body of over 10,000 students in a wide range of undergraduate, graduate and professional degree programs through its six major divisions, of which the College of Arts & Sciences is the largest.

The university seeks an innovative academic leader who will: bring an excellent record as a scholar, teacher and administrator; provide strong leadership in teaching and scholarship and creative vision in developing new programs and opportunities for the College; work effectively and collegially with diverse constituencies; possess an understanding of and commitment to experiential education, interdisciplinary inquiry, and new information technologies; inspire a cohesive team of individuals and energize academic units; effectively oversee budgets and fundraising; communicate effectively to others the diversity and richness of the College's academic offerings.

Projected starting date of the appointment is summer 2000. Nominations and expressions of interest will be treated in confidence and should be sent to:

Dr. Richard Breitstein
Chair Dean’s Search Committee
Eagle Station
Box 159
American University
4400 Massachusetts Avenue
N.W., Washington, D.C. 20016

Applications should consist of a curriculum vitae and cover letter addressing the above qualifications. Dr. Tom van der Vorst of Academic Search Corporation is assisting with the search. The search may be reached at 202-263-7473 or pvd@academic-search.org. Please visit the AU web site at www.american.edu for more information.

American University is an equal opportunity employer that actively seeks and encourages applications from women and members of underrepresented populations.

FRAMINGHAM STATE COLLEGE
DEPARTMENT OF MODERN LANGUAGES - SPANISH

Teaure-track, Assistant Professor of Spanish, beginning September 1, 2000.
Ph.D. required. Ability to teach a range of Spanish courses for undergraduate majors and non-majors including elementary level courses. Candidates must have native or near native fluency in Spanish and a strong preparation in Latin American cultures. Knowledge of Portuguese is desirable.

To apply: Send letter of interest, recent evidence of good teaching, curriculum vitae, and three (3) letters of recommendation no later than Dec. 15, 1999, to:
Dr. Marguerite Mahler,
Chair, Spanish Search Committee
Department of Modern Languages
Framingham State College
Framingham, MA 01701

Framingham State College is an equal opportunity/affirmative action employer. Persons of color, women, and persons with disabilities are strongly urged to apply.

DIRECTOR OF SOCIAL EQUITY
The State System of Higher Education seeks to fill the position of Director of Social Equity. The State System is guided by a 20-member Board of Governors and is comprised of the Office of the Chancellor and fourteen universities throughout the Commonwealth of Pennsylvania. The incumbent reports to the Chancellor directly or through the Executive Deputy and serves as a member of the Chancellor's senior staff.

The director's primary responsibility is to provide effective leadership and promote action that will enhance educational and employment opportunities for all qualified individuals, more especially racial/ethnic minorities, women, the economically disadvantaged, persons with disabilities and returning military veterans. The variety of duties inherent in this responsibility include: the design, implementation, and monitoring of an ongoing System-wide equity plan, serving as Office of the Chancellor liaison to the presidents of the constituent universities in matters related to social equity issues and providing leadership to campus social equity directors in addressing equity concerns and advancing the equity plan. In addition, the director sponsors and assists in the coordination of the ongoing implementation of the Partnership Program that serves educationally at-risk low-income high school students. The director also serves as the affirmative action officer for the Office of the Chancellor and as the System coordinator for the Americans with Disabilities Act. The position requires some travel.

A minimum of five years management experience in equity-affirmative action programs and/or human resources or human relations, preferably in an educational setting, and a graduate degree are required. Candidates must be knowledgeable about all Equal Employment Opportunity laws and regulations and committed to the values inherent in promoting public higher education. A demonstrated commitment to diversity and the value of a pluralistic society is essential. Past experience with programs designed to prepare educationally at-risk low-income high school students for college is preferred. Superior communications skills, both written and oral, are critical, as is the ability to efficiently accommodate multiple demands and to quickly adjust to changing needs and priorities. Candidate should be proficient with modern office technology. finalists must successfully complete an interview.

Full consideration will be given to applications received by December 30, 1999. Interested candidates must submit a letter of application, resume, and the names, addresses, and phone numbers of at least three professional references to:

Vice Chancellor for Employee and Labor Relations
State System of Higher Education
Dixon University Center
2366 North Second Street
Harrisburg, PA 17110

Applications are not acceptable.

Kean University is an EEO/AA Institution.

Kean University is committed to excellence and to developing and strengthening interactive ties with the community. Kean University takes pride in its continuing efforts to build a multicultural, diverse community among a diverse student population of 20,000.

RESIDENCE HALL DIRECTOR
Office of Residence Life and Housing
Division of Student Affairs
12-month Position

Responsibilities: Coordinating operations of a residence hall that houses a diverse population of 200-250 students; coordinating developmental opportunities for student residents through programming, advising, and discipline; implementing appropriate University policies and procedures; and supervising a staff of Resident Assistants, Community Assistants, and Student Security. Collaborative work required in all facets of a Residence Life and Housing Program. This position requires on-campus residency.

Qualifications: Bachelor's degree and one year of residence life work experience are required. Master's degree in student personnel or related area preferred.

Application, Salary and Benefits Information: Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits package included. Candidacy review begins immediately and continues until a satisfactory candidate is found. Send a letter of interest, current resume, names, addresses and tele phone numbers of three references who can comment on candidate's professional qualifications. Three letters of recommendation and Official transcripts required prior to appointment. Apply to: Kacee Boone, Acting Director, Residence Life and Housing, Kean University, 300 Morris Avenue, P.O. Box 431, Union, NJ 07083.
THE LOS ANGELES COMMUNITY COLLEGE DISTRICT invites applications and nominations for the following position:

- DEAN OF ACADEMIC AFFAIRS
LOS ANGELES SOUTHWEST COLLEGE

Filing Deadline: December 02, 1999. File immediately interested individuals who possess the required training and experience are invited to submit applications.

Requirements: Applicants must have earned master's degree or an advanced degree of at least equivalent standard from a recognized college or university. Also required are two years of successful full-time experience as an administrator or faculty member in accredited institutions of higher education, and two years of successful full-time experience in administrative or management positions in business, industry, education, or government.

Compensation: The current salary range is $63,908 to $79,163 annually. New employees to the District will be allocated within the salary range according to previous salary. Student employees include 15-30 paid holidays annually, 15-30 paid vacation annually depending on length of District service, district-paid medical/dental plans and a $40,000 group life insurance policy.

Filing An Application: Candidates in the District continuos pool for Dean of Academic Affairs will be reviewed by the college selection committee after the deadline. You must indicate interest in instructional positions. For those not in the pool, applications may be obtained by calling (213) 891-2111. A descriptive flyer for this position is available. Send application to Academic Selection Unit, LACCD, 770 W Whipple Blvd., Los Angeles, CA 90017, on or before December 02, 1999.

THE LACCD IS AN EQUAL OPPORTUNITY EMPLOYER. WOMEN, MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY.

WESTERN NEBRASKA COMMUNITY COLLEGE

Diversity Programs and Services Direc
Western Nebraska Community College is currently accepting applications for the following position: Diversity Programs and Services Director. Responsibilities: Assist in planning, directing, managing, overseeing and evaluating the Diversity Programs at WNCC. Diversity programs include but are not limited to multi-ethnic students, students with special needs, and training and education for faculty and staff. Will include coordination of assignments with other campus departments and outside agencies. Duties include teaching transportation and training of faculty and staff in cultural diversity and related activities. Salary: $40,000 per year. Application Deadline: 7, 2000. Application Procedure: Send letter of application, current credentials and/or academic transcripts and three letters of recommendation to Human Resources Director, Western Nebraska Community College, 1601 East 27th Street, Scottsbluff, NE 69361-1899.

EEO/Affirmative Action Employer.

EEO/AA/Title IX
The Associate Vice President provides leadership in the graduate research and international education missions of the University. Illinois State has approximately $12M in grants and contracts processed through its University Research Office, with a significant number of these grants supporting the study and practice of education at all levels. Currently, Illinois State offers graduate programs in each college including eight doctoral, 32 master's, and one bachelor's programs. Approximately 14 percent of the students enrolled in the University are graduate students.

The Associate Vice President has administrative responsibility for planning and policy direction of the University Research Office, the Graduate School, and International Studies. Specifically, the Associate Vice President will be responsible for leading and expanding the quality of graduate academic and international programs, creating a climate for obtaining external funding, and refining and developing policies and procedures related to these areas. The Associate Vice President administers a combined budget of $3.5 million, reports directly to the Provost, works in close consultation with the College Deans, and oversees a staff of 35 through four units.

Counselor/Academic Advisor

The Student Development Division of Harper College seeks to fill the position of a full-time tenure track counseling faculty position.

Responsibilities include: academic advising, counseling, teaching and diversity education and programming. Experience and expertise with college counseling, high risk, multicultural and commuter populations is preferred.

This 10 month position requires a master's degree in College Student Personnel, Counseling or related field. This position is available in January 2000. Screening of applicants will continue until the position is filled. Applicants should send a letter of application, a current resume, and at least three references to:

William Rainey
Harper College
Attn: Employment Specialist-UAA
1200 W. Algonquin Rd.
Palatine, IL 60067

Harper College is a Community College in the northwest suburbs of Chicago with an enrollment of over 26,000 students. Visit our website at http://www.harper.cc.il.us

Career Coordinator

Temple University is seeking an individual to develop full-time, permanent employment positions for designated college(s) and/or college(s) of students and alumni of appropriate employers. Will advise students and alumni of the colleges on employment opportunities; promote on-campus recruiting programs; coordinate special educational and placement programs; and work with the college faculty and administrators to establish objectives for placement efforts.

Bachelor's degree, preferably in higher education, with a minimum of 4 years experience required. Must possess counseling and/or advising, verbal, written, organization, and PC skills.

We offer a competitive salary and comprehensive benefits package, including 100% tuition remission. Qualified candidates should send a resume, including salary requirements, to: Marion Parker, Employment Rep., Fisc 319-9, Temple University, 1601 N. Broad St., 203 U.S. Phila., PA 19122. EOE: M/F/D/V.

Massachusetts College of Liberal Arts

Vice President for Academic Affairs

Massachusetts College of Liberal Arts seeks a talented and energetic individual who would welcome an opportunity to provide academic leadership and vision for an evolving public liberal arts college. Located in the beautiful and historic Berkshire region of Massachusetts, the mission of MCLA is to provide a high quality public alternative to the many fine private liberal arts colleges in New England. Formerly North Adams State College, Massachusetts College adopted its new mission in 1993, received its new name in 1997 and has already achieved distinction as one of the top four public liberal arts colleges in the northeast. With 76% of its recent graduates earning degrees in the arts and sciences, the College continues to provide an educational curriculum that prepares students for further study and for a wide variety of careers.

The Vice President for Academic Affairs reports to the President of the College and is responsible for the development of the College's academic programs, policies, and procedures. The position requires a strong commitment to the development of programs and services that support the College's mission.

The College is seeking a candidate who is committed to excellence in teaching and scholarship, and who has demonstrated a strong commitment to undergraduate education. The candidate should have a broad range of disciplines, experience with institutional administration of academic programs, research, grants management, and international education.

Compensation is commensurate with experience. The preferred start date is July 1, 2000. To assure full consideration, a letter outlining your interest in the position, a curriculum vitae, names, addresses, and telephone numbers of five references should be submitted by January 31, 2000 to: Associate Vice President for Graduate Studies, Research, and International Education Search, Campus Box 4000, Office of the Provost, Normal, IL 61790-4000. Finalists for the position should be prepared to provide three letters of reference on request.

Massachusetts College of Liberal Arts is an Affirmative Action/Equal Opportunity Employer. Persons with a diversity of backgrounds and experiences are encouraged to apply.
THE LOS ANGELES COMMUNITY COLLEGE DISTRICT
invites applications and nominations
for the following position.

• VICE PRESIDENT OF STUDENT SERVICES,
LOS ANGELES SOUTHWEST COLLEGE

LAST DATE TO FILE: DECEMBER 32, 1999. WOMEN MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY.

The Los Angeles Community College District is seeking a Vice President of Student Services to serve at Los Angeles Southwest College. Interested individuals who possess the required training and experience are invited to submit applications. Reporting to the College President, the Vice President of Student Services provides administrative leadership and operational supervision for a comprehensive student services program.

REQUIREMENTS: Applicants must have an earned master's degree or an advanced degree of at least equivalent standing from a recognized college or university. Also required are three years of successful full-time experience as an administrator or faculty member in accredited institutions of higher learning, and two years of successful full-time experience in administrative or management positions in business, industry, education, or government. Administrative experience in an accredited institution of higher learning may count for both requirements.

COMPENSATION: The current salary range is $57,089 to $87,988 annually. New employees to the District will be allocated within the salary range according to previous scale. Employee benefits include 15 paid holidays annually, 30 days paid vacation annually, district-paid medical/hospital, dental and vision care plans and a $40,000 group life insurance policy.

FILING AN APPLICATION: Candidates in the District pool will be notified by letter and will be reviewed if they respond. For those not in the pool a resume with letter of intent and three letters of recommendation must be received no later than 4:30 p.m. on Wednesday, December 32, 1999. Selected candidates will be interviewed and selected for the position, subject to the approval of the Board of Trustees. Applications and associated documentation (three letters of recommendation) must be received no later than 4:30 p.m. on Wednesday, December 32, 1999. All candidates will be interviewed and selected for the position, subject to the approval of the Board of Trustees.

THE LACCD IS AN EQUAL OPPORTUNITY EMPLOYER.
MILLS
PROVOST AND DEAN OF THE FACULTY
Mills College - Oakland, California

Mills College, the oldest women's college established west of the Rockies and located in Oakland, California, invites applications and nominations in its search for a Provost and Dean of the Faculty.

Founded in 1852, Mills College is an independent, liberal arts college offering 34 undergraduate majors and 22 graduate programs. With approximately 750 undergraduate women and 400 graduate women and men students, the faculty numbers 167 members, 79 full-time and 88 part-time. Mills College is a community of people committed to women-centered education, a dynamic environment in which students work, learn, and explore together.

The Provost and Dean of the Faculty is the ranking educational officer of the College, reporting directly to the President. In this role, the Provost and Dean of the Faculty shapes in the College-wide leadership and in institutional policy formulation, planning, and administration.

The College seeks a Provost and Dean of the Faculty with strong leadership skills, integrity, creativity, and energy who will: advance the mission of the College as a women-centered liberal arts institution in a global, multicultural society; cultivate collaborative environment among the faculty members, faculty committees and administrative departments; and provide leadership and advocacy for the academic programs and curricular innovation; overseeing academic departments, in conjunction with the Academic Deans and Department Heads; and supervising the work of the Director of Library and Academic Computing Services, the College Chaplain, the Director of the Art Museum, and Director of Technical Services.

Qualifications Required:
- ALA-accredited MLS degree, or ALA-recognized foreign equivalent
- Significant experience in cataloging operations, including original cataloging, database management, and digital resources cataloging
- Experience with AACR2, LC classification, MAAR format, and automated library systems
- Effective organizational communication and interpersonal skills, and demonstrated superior, experience
- Strong service orientation and commitment to professional growth
- College, team-focused management philosophy and orientation

Desired:
- Familiarity with evolving Metadata standards, Dublin Core, TEL, etc.
- Familiarity with mark-up languages (HTML, SGML, XML, etc.)
- Familiarity with UNIX, Access, Perl, and Z39.50

Appointments/Benefits: 12-month administrative faculty appointment. Salary competitive and commensurate with experience. Excellent benefits, health plan options and paid life insurance. Several retirement plans, including TIAA-CREF. 22 vacation days and 11 paid holidays. Tuition waiver to self.

The University: George Mason University is a doctoral-level, state-supported institution in Northern Virginia with campuses at Arlington, Fairfax, and Prince William counties, with an enrollment of more than 24,000 students and 3,100 faculty. The University Libraries is an active participant in VIVO the Virtual Library of Virginia, Project the Virginia Research Library Consortium, The Association of Southeastern Research Libraries, and is an associate member of the Center for Research Libraries. More information about the Libraries is available at http://www.gmu.edu

Applications: Send letter of application, resume, and three current references to:
Chair, Bibliographic Services Search Committee
Library Administration, MSN 213
George Mason University
Fairfax, VA 22030-4444

We are an Equal Opportunity Employer.
Prairie State College

PRESIDENT

The Board of Trustees of Prairie State College invites nominations and applications for the position of President of Prairie State College. The President will take office no later than July 1, 2000.

Prairie State College is a comprehensive community college, located in Chicago Heights, Illinois, 25 miles south of Chicago. The College, recognized for its outstanding faculty, staff, programs, and state-of-the-art facilities, serves approximately 4,880 students (1,612 FTET) and approximately the same number of students in non-credit offerings. The College District consists of 20 communities which reflect a great economic, social, and ethnic diversity. The College’s budget is $29.4 million, with 16.6% of that in operating funds. There are approximately 83 full-time faculty, 225 adjuncts, 28 administrators, and 28 support staff.

The Board of Trustees seeks a strong and dynamic leader who can build upon an outstanding record of previous success and accomplishment and take the College to yet another level of excellence into the new millennium. The President shall be a visionary who possesses outstanding interpersonal skills. The Board is especially interested in finding a person who can represent the College with intelligence and enthusiasm in the efforts to maintain old friends, gain new ones, while seeking new students continued community support, and additional resources.

Nominations and applications will be received in confidence and should be sent to:

The Bickert Group, Ltd.
1340 Wilmot Road
Deerfield, Illinois 60015-2070

Dr. James O. Hardin and Dr. James H. Burd, of The Bickert Group, Ltd., are conducting the search. Inquiries may be directed to either consultants at (708) 361-4997 or fax (708) 948-9659. Credentials will begin to be reviewed in late January and continue until an appointment is made.

Prairie State College is an equal opportunity/affirmative action employer.

San Jose State University

Dean of the College of Humanities & the Arts

San Jose State University invites applications and nominations for Dean of the College of Humanities & the Arts. The successful candidate will provide the University with strong and imaginative leadership to continuously improve instruction, productivity, scholarship, and community building. The Dean is responsible for academic planning and development, for external fund-raising, and for the recruitment, retention, and evaluation of faculty and staff who are responsive to the diverse interests reflected in the student body at San Jose State University and the State of California.

The College of Humanities & the Arts is one of eight colleges at San Jose State University and employs 387 faculty, 40 staff positions, and enrolls approximately 4,100 full-time equivalent students.

The full printed text of the position announcement is available by writing to the Office of the Provost, San Jose State University, One Washington Square, San Jose, CA 95192-0820, or by calling (408) 924-2448. Candidates should send a letter of application, a current vita, a list of five references, and a statement of the area of teaching and research. Applications must be received by January 14. Applications will be reviewed on a continuing basis until the position is filled. Applications will be accepted until the position is filled. The appointment will begin July 1, 2000. The screening process will begin January 14. 2000 and applications must be received by that date in order to receive full consideration. Applications will be accepted until the position is filled. The position available July 1, 2000, with the exact date of appointment negotiable.

San Jose State University does not discriminate on the basis of race, color, religion, national origin, gender, sexual orientation, marital status, pregnancy, age, disability, veteran or Vietnam veteran status. San Jose State University is committed to creating a community in which a diverse population can learn and work in an atmosphere of tolerance, civility and respect for each individual.
Aurora University, an innovative institution dedicated to "the liberally educated professional," seeks nominations for and expressions of interest in the position of President.

Founded in 1893, Aurora has evolved from an independent liberal arts college to a multi-dimensional university. The main campus is located in the economically booming "Silicon Prairie" high-tech corridor 40 miles west of Chicago. The institution maintains additional campuses in downtown Chicago and on Lake Geneva in Williams Bay, Wisconsin. These multiple locations and the breadth of the academic program - consisting of the University College of Arts and Sciences, the George Williams College of Aurora University (which includes the Schools of Social Work, Education and Recreation Administration/Physical Education), the John and Judy Dunham School of Business and Professional Studies, the School of Nursing, and New College: A Center for Lifelong and Professional Education - allow Aurora to serve over 4,000 degree-seeking students and another 10,000 students in non-degree programs. The University's annual budget exceeds $25 million. The institution is governed by an independent, 30-35 member Board of Trustees and has for the last several years undertaken a transition to a governance system that gives faculty and staff a unified voice on issues of policy and procedure.

Aurora is not the average university. It does not award tenure; the faculty work on renewable contracts. While its foundation is rooted in the liberal arts, the preponderance of Aurora's growth over recent years has come as the result of targeted and ambitious graduate and professional programs that address real workplace needs in Aurora's community and its environs. The University serves aspiring students, often people who are fighting long odds to attain their goals. The institution seeks a Chief Executive with the energy, creativity, leadership, intelligence, management skills, and vision of higher education to build on this record of service, innovation, and entrepreneurship. Appointment is anticipated during the summer of 2000.

Aurora University is being assisted by Educational Management Network/A Division of Witt/Kieffer, an executive search firm serving higher education and the not-for-profit community. Nominations, expressions of interest and inquiries should be forwarded to:

Aurora University Presidential Search

98 Old South Road
Nantucket, MA 02554

Inquiries and requests for a copy of the Position Specification should be directed to consultants Dennis M. Barden at 630/990-1370 or Nancy A. Martin at 508-228-6700, or via the search's e-mail address, aurora@emnccm.com. Aurora University has an Internet Web site at http://www.aurora.edu.

**HARVARD LAW SCHOOL LIBRARY**

The Harvard Law School Library has a collection of more than 1.5 million volumes, and more than 14,000 active serial subscriptions. Materials are in all languages and all formats. The 100-member staff includes 45 professional librarians. The Cataloging Services Department consists of a staff of 14 in three units, the Monograph Catalogers, Serials Catalogers, and Copy Cataloging and Database Maintenance staff. The Library is a member of the Research Libraries Group, the New England Law Library Consortium, and is a tape-leading member of OCLC.

**Romance Languages Cataloger**

Under the supervision of the Cataloging Services Librarian, the Cataloger for Romance Languages is responsible for cataloging monographs in Spanish, French, Italian, and Portuguese. This position requires MLS from an ALA accredited school; excellent knowledge of Spanish and French; working knowledge of other Romance languages; a minimum of 3 years cataloging experience, preferably in an academic or law library; and familiarity with RLIN or OCLC and automated cataloging procedures.

Position requires ability to work as part of a team in a fast-paced environment.

Send resume, cover letter, and names of three references to: Harry Martin III, Librarian, Harvard Law School, 1260 Boylston Street, Cambridge, MA 02138.

COLUMBIA UNIVERSITY

Vice President for Student Services

Columbia University in the City of New York seeks applications and nominations for the position of Vice President for Student Services. Reporting to the Executive Vice President for Administration, the Vice President leads a division that provides a wide range of services to Columbia students and to the University community as a whole. The division of Student Services was founded by the University administration four years ago and charged to improve the quality and convenience of nonacademic support services, to ensure that students at Columbia have an excellent experience in all dimensions of university life.

The departments reporting to the Vice President are: Registrar and Student Information Systems, Student Financial Services, University Residence Halls, Business Services (including Dining and Bookstores), Health and Related Services, and Learner Hall—the new student center. Student Services has annual revenues of approximately $50 million and a total staff of 450 employees who provide services to 23,000 students on both the Morningside Heights and Health Sciences campuses.

Student Services has grown since its inception into a strong, cohesive division with strong staff at all levels. The team has been widely recognized for significant success in improving the quality of basic services, and making major innovations to improve the ease and comfort of a student’s daily life outside the classroom. Columbia seeks a seasoned, responsive executive to maintain the momentum and continue to build a strong service culture throughout the division.

The Vice President will work closely as a partner with his/her colleagues in student affairs at all fifteen schools of the University to support and complement such activities as academic advising, student activities, and residential life programming; the goal of seamless coordination of all student support services is integral to the creation and cultivation of community at Columbia.

Qualifications: The successful candidate for this role will be an experienced executive with a proven capacity to lead simultaneously a program of operations improvement and culture change. S/he will possess excellent business sense, strong financial skills, and experience managing a comparable budget with revenue targets. A successful track record as a senior officer in a highly complex, decentralized organization, responding to and collaborating with many constituencies, is required. Experience working closely with and providing excellent services to students is desirable. Experience working in an urban setting with a unionized workforce is preferred. 8 to 10 years of experience or the equivalent combination of education and/or experience required. Bachelor’s degree required: MBA or other advanced degree preferred. MINORITIES ESPECIALLY ENCOURAGED TO APPLY.

Inquiries, applications, and nominations should be directed to Lisa Savereid or Rohini Sabikhi, Isaacson, Miller, 334 Boylston Street, Suite 500, Boston, MA 02116-3805. Fax: 617-262-6509. E-mail: lsavereid@imsearch.com or rsabikhi@imsearch.com.

Columbia University takes affirmative action toward equal employment opportunity.

Review of applications begins 1/15/00. For complete position description and application process, call (612) 772-4333, TDD users (612) 772-7346 or email laura.mirlatt@metrostate.edu. AA/EEE

Associate Director of Athletic for Fund-raising & Special Event

See our ad in the Chronicle of Higher Education, November 26, 1999 or our web page at www.montclair.edu for complete job description. Screening of applications begins immediately, and a January 2000 standard date is expected. MONTCLAIR STATE
OLD DOMINION UNIVERSITY
Darden College of Education

Assistant Professor of Higher Education Administration
Responsibilities: The successful candidate is expected to teach courses in the Educational Leadership and Services program with particular emphasis in Higher Education Administration. This individual will assist in administering the program, advertising and recruiting students for the program, and updating the curriculum of the program as needed. Participation in scholarship and service activities is also expected.
Qualifications: Applicants must hold an earned doctorate in higher education. Prior administrative and teaching experience in the higher education setting is highly desirable. Candidates must demonstrate an ability to engage in scholarly research and publication and participate in professional organizations and activities. Applicants should be capable of addressing issues of instructional technology and diversity.
Search Committee Chair: Dr. Edward Neukrug. E-mail eneukrug@odu.edu

Assistant/Associate Professor of Reading Education
Responsibilities: The successful candidate will teach undergraduate and graduate reading education courses at elementary and secondary levels. The candidate also will be expected to conduct research in reading and reading-related areas; to provide community service to primarily urban school systems; and to actively participate in grant-writing activity. This person may be asked to become involved in interdisciplinary programs, Professional Development Schools, and distance learning as an instructional delivery medium.
Qualifications: Applicants must hold an earned doctorate in Reading and/or Literacy Education with experience as a reading teacher in K-12 settings. The successful candidate must demonstrate a strong commitment to scholarly research and publications, participate in professional organizations and activities, and grant proposal writing, provide evidence of potential excellence in teaching, and be willing to integrate instructional technology into the curriculum. In addition, the candidate should have a background in language arts and language acquisition, including expertise in the teaching of phonics and phonemic awareness. Candidates should also be strong in assessment and the diagnostic teaching of reading.
Search Committee Chair: Dr. Raymond Morgan. E-mail rmorgan@odu.edu

Assistant/Associate Professor of Educational Research
Responsibilities: The successful candidate will be expected to teach master’s and doctoral level educational research courses in the Department of Educational Curriculum and Instruction, including courses in classroom action research in teacher education programs. In addition, the successful candidate will work with master’s and doctoral students in preparation and completion of master’s research and doctoral dissertations. The faculty member is expected to participate actively in current College initiatives to expand technology-based statistical software packages and to work with faculty in research and other scholarly pursuits. Additional responsibilities include grant development, research and publication, and service to the university, college, and community.
Qualifications: The candidate must have an earned doctorate in Educational Research; preference will be given to applicants whose background includes quantitative and qualitative research design, and classroom-based research. Desired areas of expertise include statistical and qualitative software applications. Applicants who have a record of scholarship, including writing for publication and attracting external funding, will be given priority.
Search Committee Chair: Dr. F. Murray Rudisill. E-mail crudisill@odu.edu

Assistant Professor of Educational Leadership
Responsibilities: The successful candidate will be expected to teach undergraduate and graduate courses in quantitative and qualitative research methods. The individual will work with master’s and doctoral students in preparation and completion of master’s research and doctoral dissertations, participate actively in current College initiatives to expand technology-based statistical software packages, and work with faculty in research and other scholarly pursuits. Additional responsibilities include grant development, research and publication, and service to the college, university, and community.
Qualifications: The candidate must have an earned doctorate in Educational Research that includes quantitative and qualitative research design. Knowledge of classroom-based research and facilitation with research in community and educational leadership is helpful. Background and experience in statistical and qualitative software applications is necessary. Applicants should be capable of addressing issues of instructional technology and diversity.
Search Committee Chair: Dr. Edward Neukrug. E-mail eneukrug@odu.edu

Assistant Professor in Special Education
Responsibilities: The successful candidate will teach undergraduate and graduate courses in special education, advise students, conduct research and other scholarly activities, provide community service, and assist with the coordination of the special education program and the department. Candidates will be expected to teach on/off campus and in field-based or distance learning programs.
Qualifications: Applicant must hold an earned doctorate in Special Education with emphasis on mild to moderate disabilities (e.g., emotional/behavioral disorders, learning disabilities, and mental retardation). Certification in one or more areas of special education in teaching experience in K-12 settings with diverse cultural and ethnic groups and in settings serving students with and without disabilities. A successful candidate must demonstrate a strong commitment to scholarly research and publications, participation in professional organizations and activities, grant proposal writing and provide evidence of potential excellence in teaching and willingness to integrate instructional technology into the curriculum.
Search Committee Chair: Dr. Cheryl Baker. E-mail cbaker@odu.edu

Assistant Professor in Sports Management
Responsibilities: Teach selected courses in the sports management curriculum (e.g., introduction to sports management, management and leadership in sport, undergraduate sport facility and event management, personnel management in sport, research methods in sport, and/or sports psychology). Candidate must have a strong background in sport management theory and its application to sport settings including organizational behavior, communications, human resources, leadership theory, and sports governance. The successful candidate will be expected to develop and carry out an active research and publication agenda in sports management, display exemplary classroom teaching abilities, demonstrate the ability to write, develop, and implement sports related grants, and provide an exceptional level of university and community service.
Qualifications: Applicant must possess the minimum of a doctorate in sports management and a master’s degree in sports management or business and/or sports psychology. Strong ABED applicants will be considered. Prior work experience in sport event and facility management is desirable. A background in organized athletics and coaching is preferred. The candidate must possess excellent verbal and written communication skills and the potential to be an effective college teacher. There should also be evidence of involvement with professional organizations and an existing or potentially strong commitment to the pursuit of external funding and opportunities to promote program prominence within the discipline. Integrating instructional technology into the classroom is also highly desirable. This position may include teaching selected courses at a satellite campus.
Search Committee Chair: Dr. Robert Case. E-mail: rcase@odu.edu

Assistant Professor in Recreation and Leisure Studies
Responsibilities: Duties include teaching content and skill areas within recreation and leisure studies such as, but not limited to, computer applications, research methods, and tourism. The applicant should expect to assist in academic program development and engage in productive research and scholarly pursuits. Emphasis is also given to enhancing internship site database placements and providing academic advising to student majors. Procurement of external funding in recreation management and service to the department, college, university, and professional associations are also reasonable expectations. A firm commitment to pursuing and sustaining an exceptional research agenda and cultivating collaboration among colleagues is a priority.
Qualifications: Applicant must possess a doctorate preferably in recreation, parks or tourism management and have prior teaching experience at the university level. Candidate must have expertise and experience in computer programs, research methods and or tourism management. In addition, candidate must have effective communication skills for both classroom teaching and professional networking. Candidate must possess a commitment to pursue scholarly, external funding and program leadership within the discipline.
Search Committee Chair: Dr. Jodd Colston. E-mail: jcolston@odu.edu

Application/Nomination Procedure: Applicants should submit a letter of interest specifying position applied for, a curriculum vitae and the names, addresses and telephone numbers of at least two references to the appropriate Search Committee Chair at the Office of the Dean, Darden College of Education, Old Dominion University, Norfolk, Virginia 23529-0156. Nominations of candidates will be accepted until January 31, 2000, and the positions will be filled until the positions are filled.

Old Dominion University is an equal opportunity, affirmative action institution.

DEAN, COLLEGE OF BUSINESS

San Jose State University seeks an innovative, dynamic, and inspiring leader to serve as the Dean of the College of Business. Nominations and applications are invited.

The College of Business is the largest business school in the Silicon Valley region with a diverse student body of approximately 4,500, and a productive and collegial faculty of 120 members. Our mission is to develop an institution that is world-class, providing innovative business education and research for the Silicon Valley region. Our core values respect individual efforts and contributions, inclusiveness and collaboration, lifelong learning, professional development, responsiveness to community, risk-taking and innovation, and environments supportive of learning.

San Jose State enrolls approximately 27,000 undergraduate and graduate students. San Jose, the nation's 11th largest city and a vibrant multicultural community, is in the heart of Silicon Valley. Our location, reflecting an internationally-renowned quality of entrepreneurship, technology, and innovation, provides us with unique opportunities and challenges.

The SJSU College of Business, fully accredited by the AACSB, is strategically positioned with a newly-renovated, state-of-the-art classroom building, public support and dynamic growth in major gifts and endowments. Our institutional commitment, coupled with the strong support of College alumni and friends, promises significant opportunities.

In this regard we are looking for: A proven leader with the vision, passion and integrity and global outlook necessary to leverage our resources to reach our fullest potential; a builder of ties to the varied stakeholders across the College, the University, and the Silicon Valley region; to achieve excellence in the College's teaching, research, and service mission; a leader successful in attracting significant external resources; an effective communicator and consensus builder who can operate in an environment of shared governance; a professional who is skilled in strategic planning, implementation, and administration; and, a developer of human capital who will be effective with recruitment, selection, and professional development of faculty and staff.

The Dean is expected to have an outstanding record of achievement in higher education, research, business, or public service. Candidates should possess a graduate degree, preferably a doctorate.

Applications: A complete application package should contain a statement addressing the candidate's qualifications and vision, a curriculum vitae, and a list of five references. The candidate screening process will begin on January 31, 2000. Applications must be received by that date in order to ensure receiving full consideration. However, applications will be accepted until the position is filled.

Applications can be submitted in hard copy or electronically to:

STATE UNIVERSITY OF NEW YORK
COLLEGE AT ONEONTA

The College at Oneonta invites applications for twenty-eight tenure-track positions at the rank of Assistant Professor. The initial appointment for these positions is two years. SUNY Oneonta, a four-year arts and sciences college with a pre-professional focus, offers liberal arts and professional programs at undergraduate and master's levels. Increasing emphasis is placed upon technology and community service across all disciplines and the campus has announced a Universal Computer Access Program (UnCAS) for its students. The College, with 5500 students and 240 full-time faculty, is located in the scenic Catskills, three and one-half hours from New York City. See the Oneonta home page for additional information (http://www.oneonta.edu).

The expectations of all positions include teaching 12 hours per semester, unless otherwise noted; research; advisement; and college service. All positions begin with the Fall 2000 semester, unless otherwise noted and continue until positions are filled. Send application letter, resume, names, addresses and telephone numbers of three professional references, official transcripts, and additional material as specified below to: Chair Search Committee (name listed in each department), Box H, SUNY Oneonta, Oneonta, NY 13820-4015.

ANTHROPOLOGY

Two positions. The Anthropology Department maintains a strong undergraduate and graduate program that provides general education courses and two anthropology major tracks: (1) Archaeology. PhD required, North American specialization preferred. Must be able to teach introductory archaeology, develop and teach suitable upper-division electives, and develop and teach a local summer field school in archaeology. (2) Applied Cultural Anthropology. PhD required. Preferred expertise in one or more of the following: medical anthropology, educational anthropology, the anthropology of business organizations, rural development. Geographic specialization open. Must be able to teach introductory courses in cultural anthropology, teach an upper-division course in applied anthropology, and develop and teach other suitable upper-division courses, and supervise student internships for our applied anthropology major.

Applications
Include letter outlining teaching and research interests and goals to: Dr. John Reithel, Department of Anthropology, (www.oneonta.edu/anthro).

BILOGY

The Biology Department maintains a strong undergraduate biology program with multiple tracks and participates in the environmental biology area of an interdisciplinary undergraduate environmental sciences program. Teaching responsibilities include general ecology, environmental science and issues, and general biology. Other courses might include: conservation biology, environmental capstone seminar, plant ecology, wetlands ecology, or wildlife conservation. Opportunities for research and teaching also exist at the Biological Field Station located in Cooperstown, NY. Required qualifications: PhD in biological sciences with emphasis in ecology or a related field. Evidence of ability to teach and develop departmental courses at all levels, ability to integrate computer-based technology into the curriculum preferred.

Applications
Include current vita, statement of teaching and research interest, and three letters of recommendation to: Dr. William J. Pietrafesa. Chair, Search Committee, Department of Biology.

COOPERSTOWN GRADUATE PROGRAM

The Cooperstown Graduate Program, a nationally recognized program for the training of museum professionals, seeks a versatile scholar with a proven ability to teach through the observation and analysis of artifacts. The Program is co-sponsored by the SUNY College at Oneonta and the New York State Historical Association. Applicants must be able to demonstrate commitment to museum work. Responsibilities: teaching or coordinating courses in American material culture, popular culture, decorative arts, American architecture and museum practice. Participation in Program admissions, field trips, seminars, student advisement, planning, student recruitment and other activities is also required. The successful candidate will be actively involved in the life of the College at Oneonta and the museums in Cooperstown and will work closely with a teaching team including university faculty and museum staff. Required qualifications: Master's degree in American studies, art history, or American History with emphasis on material culture. PhD strongly preferred.

Applications
Include current curriculum vitae, statement of teaching and research interests and goals, writing sample to: Ms. Gretchen Serbin, Chair, Search Committee, Cooperstown Graduate Program, Box H, YO Box 809, Cooperstown, NY 13326.

ECONOMICS AND BUSINESS

Three positions. The Division of Economics and Business strives to provide undergraduate students with the opportunity to focus on career preparation, as well as to develop their intellectual capacity and knowledge of the liberal arts. In Graduate level education, the Division offers graduate business education to business graduates seeking permanent teaching certification. 1) Accounting: Duties: Teach undergraduate and graduate courses, research leading to publications in refereed journals. Required qualifications: Earned doctorate in accounting (ABD considered). Preferred qualifications: ability to teach accounting information systems; teaching experience; a record of published research in the area; license as a Certified Public Accountant. 2) Management Information Systems: Duties: Teach undergraduate and graduate courses in management information systems and computer applications in support of the Division's programs. Required qualifications: Earned doctorate (ABD considered) in management information systems or related field. Preferred qualifications: secondary field in accounting, marketing, finance, insurance, or economics; teaching experience, a record of published research, willingness to participate in possible cooperative program in Russia. 3) Finance: Duties: Teach undergraduate courses in finance, money and banking, and principles of economics. Teach graduate courses in financial institutions and markets. Required qualifications: Earned doctorate (ABD considered) in finance or economics with the other as secondary field, teaching experience. Preferred qualifications: a record of published research, willingness to participate in possible cooperative program in Russia.

Applications
Include three letters of recommendation to: Dr. Wade L. Thomas, Chair, Search Committee, Economics and Business Division.

EDUCATIONAL PSYCHOLOGY AND COUNSELING

Two positions. 1) Educational Psychology. 2) Special Education. Required qualifications for both positions: Earned doctorate in Educational Psychology or Special Education; three years teaching experience in K-12 schools or equivalent history of school-based research. Preferred qualifications include preparation to teach introductory level undergraduate or graduate level courses in learning and motivation, child development, and either assessment or special education knowledge and/or experience with NCATE certified programs helpful.

Applications
Submit to: Dr. Joan Marshall, Chair, Search Committee, 337 Fitzell Hall.

ELEMENTARY EDUCATION

Four Positions: 1) Elementary Mathematics Education. Required qualifications: dynamic team member to teach undergraduate and possibly graduate courses in Elementary Mathematics Methods. Appropriate doctorate (e.g., Mathematics Education, Mathematics Discipline, Curriculum and Instruction with Mathematics emphasis, etc.) Required qualifications: dynamic team member to teach undergraduate and graduate courses in Reading and Literacy, appropriate doctorate (e.g., Reading, Literacy, Curriculum and Instruction with Reading emphasis, etc.) Preferred background in assessment-diagnostic skills, children's literature, special education, multicultural education. 3) Elementary Science Education. Required qualifications: dynamic team member to teach undergraduate and possibly graduate courses in Elementary Science Methods, appropriate doctorate (e.g., Science Education, Science discipline, Curriculum and Instruction with Science emphasis, etc.), science education experience preferred. 4) Elementary Education in the SUNY Oneonta and Mohawk Valley Community College (MVCC) joint program. Duties: teach courses in child development, educational psychology, education, or elementary methods. Required qualifications: earned doctorate in education. Required qualifications for all four positions include: teaching certificate, and three years teaching experience in K-12 schools. Preferred qualifications for all four positions include experience with NCATE, integration of technology into the curriculum, and teaching experience in special education.
Applications
Submit to Dr. Constance Feldt, Chair, Department of Elementary Education and Reading.

FOREIGN LANGUAGES
Two positions: 1) Spanish. Areas of specialization: 19th or 20th century peninsular literature, or Spanish linguistics. Qualifications: PhD highly desirable, ABD acceptable if degree is conferred by August 2000; native or near-native fluency in both English and Spanish; demonstrated teaching abilities; and experience with computer-equipped language laboratories. Duties include: teaching Spanish language courses at all levels and operation of the language laboratory. 2) French. Areas of specialization: 20th century literature and francophone literature. Duties include: teaching French language and literature courses at all levels. Required qualifications: PhD; native or near-native fluency in both English and French; demonstrated teaching abilities; and experience with computer-equipped language laboratories. Ability to teach in another area desirable (Spanish, Italian, German, Portuguese).

Applications
Include three letters of recommendation to: Dr. David L. Anderson, Department of Foreign Languages, 300 Scheffer Hall.

HISTORY
Two positions: (1) American History. Primary teaching responsibilities in United States history. Will include courses within the successful candidates' specialization as well as introductory survey courses. Other teaching responsibilities include the early national period, Jeffersonian-Jacksonian America, and the Rise of the Antebellum South. Required qualifications: PhD at time of appointment. (2) American/Asian History. Primary teaching responsibilities in United States history and a secondary teaching field in Asian history as well as courses within the successful candidates' specialization, introductory survey courses, as well as courses in South and East Asian history. Required qualifications: PhD at time of appointment; a candidate conversant in U.S. diplomatic history from the mid-nineteenth through twentieth centuries preferred.

Applications
Include statement of teaching philosophy, sample course syllabus if available, and three letters of recommendation to: Dr. William Stroumsa, Chair, U.S. History Search Committee, History Department.

HUMAN ECOLOGY

Applications
Submit to: Dr. Loraine Tyler, Chair, Human Ecology Department. For further information, contact Dr. Tyler at 607-436-2705, e-mail: tylerl@oneonta.edu.

MASS COMMUNICATIONS
Duties: Teach introduction to telecommunications, audio production, video production (studio and remote), and broadcast journalism. Professional experience and ability to teach public relations or advertising highly desirable. Required qualifications: PhD or equivalent at time of appointment, an excellent record of undergraduate teaching, and evidence of strong commitment to academic collaboration.

Applications
Include three letters of recommendation to: Dr. Ali Zohoort, Chair, Department of Communication Arts.

MATHEMATICAL SCIENCES
Three positions. The Mathematical Sciences Department offers major and minor teaching excellence; and ability to teach diverse courses in an undergraduate Computer Science major program are preferred. 2) Statistics/Mathematics. Required qualifications: PhD or ABD in Statistics or Mathematics. Strong probability theory, operations research, and/or statistical inference; demonstrated collegiate teaching excellence; ability to teach diverse courses in undergraduate Statistics and Mathematics major programs are preferred. (3) Mathematics. Required qualifications: PhD or ABD in Mathematics. Strength in geometry, diophantine equations, and/or differential equations; demonstrated collegiate teaching excellence; and ability to teach diverse courses in an undergraduate Mathematics major program are preferred.

Applications
Include curriculum vitae, graduate transcripts, and arrange to have three letters of reference sent to: Dr. Leo J. Alex, Search Committee Chair, Mathematics Department. Please indicate Box #1, #2, or #3 for appropriate position.

MUSIC
Two positions in Music Industry: Duties: Teach courses relating to the record industry or computer-assisted theory, and some area of studio performance; ensemble. Participate actively in departmental, recruitment, and outreach. Required qualifications: Juris Doctorate or Master's degree. Doctorate preferred. Successful experience and expertise in at least three of the following areas: Business Affairs, recording operations, middle or senior level recording company management, and marketing, A&R creative, publishing, promotion, song-writing, recording technology, computer-assisted theory instruction. A complementary performance in keyboard, voice, or wind instrument.

Applications
Include performance tape or CD to: Robert Eustow, Chair, Department of Music.

PHYSICAL GEOGRAPHY/ENVIRONMENTAL GEOGRAPHY
The Geography Department maintains a strong undergraduate geography program and handles the environmental planning area of an inter-disciplinary environmental sciences program. Teaching responsibilities include courses in physical geography, regional climate, and environmental planning. We seek candidates with experience in introductory geography and environmental issues. Opportunity will exist to develop new courses or redesign existing courses. Candidates must have commitments to undergraduate teaching. Required qualifications: PhD; good oral and communication skills; ability to actively pursue outside grants and develop a solid research record. Successful candidate expected to support established and growing undergraduate programs in geospacial environmental sciences.

Applications
Submit to: Paul N. Baumann, Chair, Search Committee, Department of Geography, Voice 607-436-3459, Fax 607-436-2656.

POLITICAL SCIENCE
The Political Science Department offers both an undergraduate major and a Political Science, baccalaureate program. The position requires a strong background in American Political Institutions and Processes. The successful candidate will be required to teach the introductory survey of U.S. Government and many of the following courses: Congress, Presidency, Public Policy, Interest Groups, Political Parties, State and National Government, and Urban/Metropolitan government. Duties include teaching responsibilities in U.S. Government and two or three upper-division courses. Required qualifications: PhD in Political Science at the time of appointment. Experience in government and in public service is desirable. Teaching responsibilities include courses in government. Applications should be addressed to: Dr. Carl E. McSheeha, Chair, Political Science Search Committee.

Applications
Include statement of teaching and research interests and three professional reference letters to: Dr. Carl E. McSheeha, Chair, Political Science Search Committee.

SOCIOLGY
Primary focus: Crime and deviance, criminology or criminal justice. Seeons of interest: social problems. Duties: teach and develop courses in subje Required qualifications: PhD in Sociology. Required qualifications: proficiency in SPSS, computer-based academic applications; interest in technological instruction, distance learning, newsted information; publication record, experience.
Vice Chancellor for Research

Applications and nominations are invited for the position of Vice Chancellor for Research effective July 1, 2000.

The Vice Chancellor for Research will provide coordinated and full-time executive leadership for research at UCLA. The position will report to the Chancellor through the Executive Vice Chancellor and is expected to have responsibility for the following major areas:

- Campuswide research policy, planning, initiatives and coordination
- University-industry relations and technology transfer
- Research growth and investment strategies
- The welfare of human and animal research subjects
- Scientific integrity and the management of conflict of interest
- Reviews of organized research units and advice to Deans on their management

In pursuing these responsibilities, the Vice Chancellor for Research will work collaboratively with UCLA's provost, deans, department chairs, faculty and Academic Senate, building on campus strengths, finding synergies, and supporting collaboration for the greater benefit of UCLA and individual academic units. The incumbent will work closely with the Vice Chancellor for Graduate Studies and Dean of the Graduate Division in coordinating areas of mutual relevance. Also, the incumbent will work closely with the Associate Vice Chancellor for Information Technology in developing plans and policies related to research computing. The Vice Chancellor for Research will be a member of the Chancellor's Executive Committee, and will have a close working relationship to Sponsored Research and Extramural Fund Management.

The Vice Chancellor for Research will be responsible for representing the university to external agencies, serving as a legislative liaison, and promoting international and cooperative research arrangements with governments, other universities and private industry. The Vice Chancellor for Research must be cognizant of all State and Federal regulations and compliance requirements on animal, human, and biological safety, conflict of interest, scientific ethics, and patent and other intellectual property matters.

Candidates should have demonstrated leadership and experience in academic administration in a research university setting; a good understanding of federal and corporate funding opportunities; a distinguished personal record of funded research; demonstrated experience in the development of collaborative research ventures and sensitivity to the research needs of all disciplines represented at major research universities.

Candidates must have the academic credentials to qualify for a tenured appointment at UCLA. Salary will be commensurate with background and experience.

For additional information, please go to:
http://www.apo.ucla.edu/apoe/vc-research/

To be assured full consideration, nominations and applications should be sent by December 31, 2000 to:

DEAN OF COMMONWEALTH COLLEGE

The University of Massachusetts Amherst invites applications and nominations for the position of Dean of Commonwealth College, the newly established Honors College of the Massachusetts Public Higher Education System. The College is located at the University’s flagship campus at Amherst. The goal of the College is to be an undergraduate honors college of national distinction in the public sector. The purpose of the College is to increase the number of outstanding Massachusetts high school graduates at the University, to provide an innovative interdisciplinary honors curriculum, and to spearhead the development of honors courses and programs throughout the Massachusetts higher education system.

The Dean of Commonwealth College must be a creative leader who can work with Commonwealth College students and staff and University faculty and administrators to build a program of academic excellence. The dean oversees all aspects of college life on campus: the recruitment and advising of honors students, the development of the academic curriculum, including skill-based learning programs, the Office of National Scholarship Advisement, and the expansion of undergraduate research and internship opportunities. The dean must have a balance of teaching, administration, and faculty development experience. The dean is expected to have a strong research program, as well as be able to secure external funding for research and programs.

Qualifications include: a Ph.D. or equivalent degree, a national academic reputation, a distinguished teaching, research, and publication record, and a demonstrated commitment to undergraduate education and experience in developing and implementing programs for student learning. The ideal candidate will have a track record of successful experience in academic administration, and a strong commitment to diversity and inclusion. The dean must have a deep understanding of the Commonwealth System and be committed to its mission.

The preferred starting date for this position is July 1, 2022. Salary is competitive. Applications should include a letter of interest that describes the candidate’s qualifications and vision for an honors college curriculum, a statement of personal and professional values, and a detailed plan for implementing a vision for student success. Applications and nominations should be sent to Professor Mary C. Wilson, Chair, Commonwealth College Search Committee, University of Massachusetts Amherst, MA 01003. The committee will begin reviewing applications January 1, 2022.

East Stroudsburg University
Pennsylvania

ASSISTANT PROFESSOR
Department of Mathematics

East Stroudsburg University is seeking Assistant Professor for a continuing post in Mathematics, with a Ph.D. in Math or a strong background in educational theory. The position requires a commitment to undergraduate education and experience in developing and implementing programs for student learning. The ideal candidate will have a strong commitment to diversity and inclusion and a proven track record of success in achieving these goals.

Applications should include a detailed statement of vision for the position and a list of three current letters of recommendation. Please send applications to Professor Edwina S. Dwyer, Search Committee Chair, Mathematics, East Stroudsburg University, East Stroudsburg, PA 18301-1998.

**UNIVERSITY OF MINNESOTA**

**ROCHESTER, MINNESOTA**

**Provost**

The University of Minnesota invites applications and nominations for the position of Provost of the University of Minnesota Rochester (UMR). UMR is housed within Minnesota's higher education collaborative, the University Center Rochester (UCR) - an evolving higher education complex that includes Rochester Community and Technical College (Rochester, Minnesota), and University of Minnesota Rochester.

The Provost is responsible for the development, implementation, and administration of academic programs, services offered by the University of Minnesota Rochester. Candidates will be expected to provide vis-à-vis leadership and foster a culture of collaboration, innovation, and service. The candidate works in partnership with the University of Minnesota College Deans and the academic leadership of other state institutions of higher education to enable the delivery of coordinated upper division, post-baccalaureate, graduate and continuing education programs through UCR. The Provost will also provide leadership to position the University Rochester's program as a major educational resource in Southeast Minnesota.

**Qualifications include:** Earned doctorate or terminal degree. Experience in academic administrative management, and senior administrative leadership. Experience in the integration of innovative technology, higher education and supervision. The anticipated starting date is on or prior to July 1, 2000. Salary and tenure are based upon qualifications and experience.

**Review of applications begins January 1, 2000 and will continue until position is filled. To apply:** Submit a curriculum vitae, description of commitment to diversity, 3 letters of recommendation, and a list of recent publications. All applications should be submitted to:

Chair of the Search Committee

Office of the Provost

University of Minnesota Rochester

244 Morrill Hall
100 Church Street S.E.
Plattsburgh State University of New York invites applications for Fall 2000 tenure track positions.

Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduates and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT, provides a quality of life unsurpassed for the whole family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Mountains. The city offers excellent transportation, with the university only 40 miles from the busy international gateway of Montreal, Canada, one hour’s drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and interstate 87.

Successful candidates must be committed to excellence in teaching in an emerging state university, offering programs in the arts and letters, education, human and health services, business and economics with an understanding of and sensitivity to minority and gender concerns. Selected candidates will have an interest in interdisciplinary and collaborative programs such as Women’s Studies, Latin American Studies and Canadian Studies, all of which are special focus for the College; a desire to integrate information technologies; and a willingness to participate with new distance learning programs.

The faculty is challenged to redefine their teaching roles by incorporating recent research in teaching effectiveness. The college supports faculty scholarship through the NYS/UPF Bannberg agreement; faculty and women faculty may apply for one-year Affirmative Action leaves to pursue scholarly projects. Other faculty development opportunities include the State U/Union travel grants and College Funded-In-House Mini-Grants to provide seed funding for research activities. Reday Teaching Enhancement Awards, Presidential Research Awards, and Educational Technology Awards.

We offer a competitive salary and an excellent benefits package. Unless otherwise stated, review of applications begins immediately and continues until the position is filled.

Application Procedure: Please send or fax cover letter, resume, curricular vitae, transcripts, three letters of recommendation to Chair, Human Resources, Plattsburgh State University of New York, 101 Broadway, Plattsburgh, NY 12901/0261. Fax: (518) 564-5060.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

COMMUNICATION

Multimedia (PJ# 2371-808) ASSISTANT PROFESSOR - Qualifications: Ph.D. is preferred for this position, but ABDs will be considered at lecturer rank. Master’s degree holders with substantial industry experience will also be considered at assistant professor rank. Successful teaching and/or industry experience is required. FACULTY POSITIONS

Nazareth College of Rochester is a comprehensive institution offering a wide range of baccalaureate and master's degree programs. The college is a strong, independent, coeducational institution with 1,900 undergraduate and 1,000 graduate students. The college is located minutes from downtown Rochester, New York, the third largest city in the state. Rochester is noted for its internationally recognized industries and museums, and for its cultural diversity. In keeping with its mission and ideals as a liberal arts institution, Nazareth College of Rochester seeks individuals with an understanding of the benefits and importance of ethnic and cultural diversity on campus and a demonstrated commitment to the promotion of such diversity.

Nazareth College of Rochester anticipates the following tenure-track positions for Fall 2000:

- **Art History:** To teach general survey courses and most western area courses such as Greek and Roman Art, Renaissance, Baroque, and American Art interests in non-western multicultural curricula desired.

- **Business/Management:** To teach both undergraduate and graduate levels. Preference given to a candidate with experience in a specific area such as human resources, organizational behavior, or business policy and the ability to infuse information technology into the curriculum.

- **Education:** Doctorate required; preference given to candidates with experience in high school teaching. Teaching experience at the graduate or professional level preferred. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **Environmental Education:** Preference given to candidates with experience in environmental education. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **History/Political Science:** To teach American History survey courses and upper division courses in 19th and 20th century America. Specialization in one of the following areas preferred: American politics/government; African-American history; or American Catholic history.

- **Music Education:** Preference given to candidates with experience in music education. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **Philosophy:** Preference given to candidates with experience in philosophy. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **Physical Therapy:** To teach undergraduate and graduate courses in physical therapy. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **Psychology:** To teach courses in the major program and in areas of interest. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

- **Sociology:** To teach courses in the major program and in areas of interest. Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred.

Appointments for the above positions will be at the Assistant Professor rank, and, unless otherwise noted, a doctoral degree is required or near completion. Salaries are competitive.

In addition, we seek to fill the following two positions:

- **William H. Shannon Chair in Catholic Studies:** Appointment as a visiting professor for one semester in Fall 2000 or Spring 2001. Recognized scholarship and teaching expertise in an area of the Catholic intellectual tradition such as theology, biblical studies, spirituality, ethics, philosophy, history, literature, art, music, or women's studies. Responsibilities include teaching one course and one seminar for undergraduates and delivering a lecture open to the general public.

- **Visiting Minority Scholar:** To teach a specific, limited period of time. Either one semester or one academic year (fall/spring). Knowledge of testing and evaluation required. Prior experience in developing and teaching specialized courses in education preferred. Candidates for this position should have a Ph.D. in one of the college's interdisciplinary programs.

Applications will be considered until positions are filled. For more information, please visit our website at www.ncro.edu.
COMMUNICATIONS AND PERFORMING ARTS

COMMUNICATIONS AND PERFORMING ARTS: position available in area of Broadcasting, Radio and Television. Responsibilities include coordination of programming, public relations, and administrative duties. Qualifications: Bachelor's degree or equivalent experience. Salary: $35,000 to $40,000. Please send resume to: College of Media Arts, University of Georgia, Athens, GA 30602.

STCC Office of Human Resources
PO Box 9701
McAllen, TX 78502 (956) 928-5082

Individuals must submit a separate application for each teaching position.

No person shall be excluded from participation in, denied the benefits of, or subject to discrimination under any program or activity sponsored by South Texas Community College on the basis of race, color, national origin, sex, age, veteran status, or disability.
EMORY
DEAN OF THE GRADUATE SCHOOL
Emory University - Atlanta, Georgia

Emory University seeks a dynamic academic leader to serve as Dean of the Graduate School of Arts and Sciences. The Dean is responsible for overseeing 28 graduate programs with 642 faculty members and 1400 enrolled students and for developing new programs across the Arts and Sciences and the Professional Schools. The Dean represents the voice of the faculty to the University administration and to the Board of Trustees. The Dean reports directly to the Provost and serves on the Council of Deans. The Dean manages a budget of approximately $28 million dollars.

Emory University, a private university established in 1836, has a student body of more than 11,000 and 2,400 full-time faculty members. The University encompasses nine divisions, a number of centers for advanced study, and a host of prestigious affiliated institutes. Emory is actively committed to enhancing its academic stature and is in an excellent position to achieve ambitious goals.

The ideal candidate will be an accomplished scholar with a record of demonstrated achievement in creating distinguished and distinctive academic programs in collaboration with colleagues both within disciplines and across disciplinary lines. Experience in budgetary management is desirable.

Nominations, candidacies, and requests for further information should be directed to the Chairperson of the Search Committee:

Dr. Rebecca S. Chopp
Provost and Executive Vice President for Academic Affairs, Emory University
c/o Paula Carabelli and Dennis M. Barden
Educational Management Network/a division of Witt/Kieffer
1920 Main Street, Suite 310, Irvine, CA 92614

Applications should include a letter of interest; a current curriculum vitae; and the names, positions and phone numbers of five references who will be contacted only with candidate's approval. Questions regarding this search may be directed to the consultants supporting Emory, Paula Carabelli at (404) 851-5070 or Dennis M. Barden at (630) 990-1370, or directly to Provost Rebecca Chopp, Suite 404, Administration Building, Emory University, Atlanta, GA 30320. Screening will begin immediately and will continue until an appointment is made. All communications will be treated confidentially. EEO/AA Employer.

Indiana University
DE 'N
School of Public and Environmental Affairs

The School of Public and Environmental Affairs (SPEA) at Indiana University is seeking applications and nominations for an outstanding individual to assume the position of Dean on or after July 1, 2020. Applications or nominations received on or before January 15, 2020 shall be preferred.

SPEA is an interdisciplinary, university-wide division of Indiana University, organized as a professional school committed to excellence in teaching, research, and service, addressing critical issues of public and environmental policy and management and environmental science. With over 100 faculty (tenured or tenure-track) systemwide, SPEA is the largest school in the nation offering programs in public affairs and environmental science. Several of the school's graduate programs consistently rank among the best in the country.

The Dean is responsible for the leadership of the statewide school which has faculty and students on seven campuses. An overall mission guides the operation and curriculum of the school at all locations. The school has an interdisciplinary faculty and covers the following seven fields: Policy and Administration, Environmental Sciences and Policy; Policy Analysis, Urban, Regional Analysis and Planning; Public Finance and Policy Analysis, Healthcare Management, and Criminal Justice. Law and Public Safety. The school offers Associate, Bachelor's, Master's, and Doctoral degrees.

Candidates should have proven administrative experience and possess the qualifications and achievements consistent with a tenured appointment at the full professor level. They should also have an understanding of the curricular and professional issues relevant to a school of public and environmental affairs, including the ability to provide leadership in a school that emphasizes interdisciplinary collaboration in various areas of public and environmental affairs and science. The Dean is the primary external representative of SPEA and should have the skills and commitment needed for success in these roles, including fundraising and developing positive relationships with important constituents.

Applications and nominations should be submitted to:

Dean Alfred C. Aman, Jr.
Chair, Search and Screen Committee
c/o School of Public and Environmental Affairs
Indiana University
1315 East 10th Street, Rm 310
Bloomington, IN 47405
aaman@indiana.edu
http://www.indiana.edu/~speaweb/

Indiana University is an Equal Opportunity/Affirmative Action Employer and strongly committed to diversity in the hiring of faculty, scholars, and staff. The University actively encourages applications or nominations of women and persons of color, as well as individuals with disabilities, and members of other understudied groups.
ASSISTANT VICE PRESIDENT FOR CURRICULUM AND ASSESSMENT

Central Michigan University is a comprehensive state university with over 800 faculty serving an on-campus enrollment of approximately 18,000 students. The university's eight colleges offer more than 20 undergraduate and graduate degrees and 150 major areas of study. The main campus is situated on an 854-acre site in Mount Pleasant, a city of 25,000 residents located in the heart of the lower peninsula of Michigan. The institution is nationally recognized for offering one of the most extensive extended learning programs in North America. The off-campus programs serve an additional 8,500 students at 70 sites and utilize 1,200 adjunct faculty.

Position Description/Responsibilities: The Assistant Vice President for Curriculum and Assessment reports to the Vice Provost for Academic Affairs and has university-wide responsibilities for facilitating the university's commitment to learning centered education. In addition to leading university efforts to embrace this philosophical position, the assistant vice president (AVP) is responsible for coordinating and facilitating the university's curriculum development agenda, including the review and development of academic programs and, in particular, the university's commitment to student outcomes assessment. The AVP will be thoroughly familiar with curriculum development, committed to the assessment of student learning, and provide leadership to academic departments, colleges, and the university in related matters. Assisted by one full-time professional reporting to the position and support from other staff in academic affairs, the AVP is expected to provide active leadership and direct assistance to academic departments, college and university curriculum bodies for purposes of focused university curriculum and instructional resources on student learning.

Qualifications: The position's responsibilities require a demonstrated leader in curriculum, teaching, and assessment with a record of outstanding teaching, significant academic program and curriculum development, and effective leadership in student outcomes assessment. Additional requirements include excellent communication skills, written and oral; small group facilitation skills; and possession of the terminal degree, earned tenure and associate professor rank or higher. It is strongly desired that the AVP have a record of publication and/or consulting and professional presentations in the areas of curriculum, teaching, and assessment.

Preference will be given to candidates with the following qualifications who have been successful academic leaders at the department level or above and who demonstrate high levels of job satisfaction, attention to detail and follow-through. Additional preferences of importance to the university include allegiance to the primacy of faculty in curricular matters, a clear commitment to diversity, familiarity with academic computing, strong interests in faculty development, and pedagogical studies and keen appreciation for the value of academic planning and program review. Interest in interdisciplinary curriculum and an equal regard for both professional and academic curricula are highly desired.

Salary/Benefits/Starting Date: The position is a full-time, twelve-month administrative position at the senior officer level of the university. Salary/benefits will be competitive; position is scheduled to begin July 1, 2000 or earlier, depending upon availability.

Procedures for Applications/Nominations: Applicants and nominees should forward current curriculum vitae, including copies of degree transcripts (unofficial copies accepted) and a letter of interest responding to stated qualifications, along with the names, addresses, and phone numbers of five professional references who can speak directly to the applicant's qualifications for the position to Office of the Provost, AVP Search, Warriner Hall 312, Central Michigan University, Mt. Pleasant, Michigan, 48859, Tel (517) 774-3932, FAX (517) 427-2472. Review of applications is scheduled to begin on or about January 4, 2000, and will continue until the position is filled. Central Michigan University, an AA/EEO institution, is strongly and actively committed to increasing diversity in its community. URL's include: http://www.cmich.edu, http://www.cmich.edu/AACO.html.

CLAREMONT McKENNA COLLEGE

DEAN OF THE FACULTY

Claremont McKenna College seeks nominations and expressions of interest for the position of Dean of the Faculty, who will be working closely with President Pamela Cann.

Consistently ranked as one of the nation's best colleges, Claremont McKenna College is a highly selective independent liberal arts college preparing students for leadership in business, government, and the professions. Located 35 miles east of downtown Los Angeles, Claremont McKenna College enrolls nearly 1,000 students and offers majors in more than 20 fields, in humanities, sciences and social sciences. The College has more than 135 total faculty and an endowment of approximately $350 million.

CMC is a member of the Claremont Colleges, a consortium of five of the nation's finest small colleges and two graduate institutions. The five undergraduate colleges include CMC, Harvey Mudd College, Pitzer College, Pomona College, and Scripps College.

Successful candidates should have a distinguished record in their scholarship, teaching and service, strong administrative skills, and a commitment to the College's mission and its continued excellence.

Review of candidates will begin in mid-January 2000 and will continue until the time of selection. Candidates should submit a letter of interest and a current curriculum vitae, including five names of references with title and contact information to:

Dr. Asuman Aksoy
Chair, Dean of the Faculty Search Committee
C/O the President's Office
Claremont McKenna College
500 East Ninth Street
Claremont, CA 91711

We are being assisted in this search by Shelly Weiss, Storbeck and Susan VanGilder of A.T. Kearney, 333 John Carlyle Street, Alexandria, VA 22314, phone: 703/730-4627, facsimile: 703/518-1782, email susan.vangilder@atkearney.com.

Claremont McKenna College is an Equal Opportunity Employer.
VICE PRESIDENT FOR
HUMAN RESOURCES

The University of Utah seeks an experienced and dynamic leader to provide effective human resources services in a newly created vice presidential position. This individual will have the opportunity to shape human resources programs, directions and organization for Carnegie I research university. Reporting to the president, the vice president for human resources will lead the University of Utah in developing policies and programs to attract and retain an excellent workforce for the entire campus, including the health sciences and the hospital. The vice president will also oversee human resource planning and also administer all employee training, employment and compensation, benefits administration, dispute resolution, employee relations and training, equal opportunity/affirmative action and academic human resources. The vice president for human resources will work closely with the president, vice presidents, senior academic and administrative leaders, faculty, staff, and students.

Qualifications:
• Extensive experience in and broad working knowledge of human resources management, policies, and procedures in complex academic institution.
• Ability to create and lead a forward-thinking, customer-oriented human resources organization.
• Experience with and commitment to equal opportunity and diversity through a commitment to equal opportunity, affirmative action, and diversity initiatives.
• Experience in fostering an organizational culture that supports and enhances the University's mission, research, and service initiatives.
• Excellent management, interpersonal, and communication skills, including a strong ability to lead and manage conflict.
• Knowledge of successful strategies to recruit and retain a technologically aware workforce.
• Ability to manage complex, high volume and high complexity human resource information systems.
• Preference will be given to applicants with advanced degrees in fields related to human resource management and human resource management and human resource development.

The University of Utah is an equal opportunity, affirmative action employer and encourages applications from women, men and minorities. University employees are required to follow all University policies and guidelines.

The University of Utah is committed to equality of opportunity in employment and candidature for all qualified persons and does not discriminate on the basis of race, religion, color, national origin, citizenship, age, sex, sexual orientation, gender identity, disability, or veteran status in employment, educational programs and activities, and admission to University programs. Individuals with disabilities are encouraged to request reasonable accommodation. Application materials become the property of the University of Utah.

Carthage

TENURE-TRACK FACULTY APPOINTMENTS

Carthage invites nominations and applications for new tenure-track members of the faculty. The College makes appointments with the hope that the successful candidates will be part of the campus community for many years into the future.

Candidates must hold the Ph.D or appropriate terminal degree. In addition to normal scholarly credentials, candidates must demonstrate enthusiasm for teaching in a small college atmosphere. Carthage faculty members share a commitment to a liberal arts curriculum. They are expected to teach five courses regularly, including either the Heritage seminar on the humanities, first-year and social science, or the Discovery seminars in the natural sciences.

Salaries and benefits are highly competitive. The College immediately integrates new members into faculty decision-making.

Located on the shore of Lake Michigan midway between Milwaukee and Chicago, Carthage offers a quick urban access from the relaxed environment of a small city. Predominantly Midwestern, students come from approximately half the states in the Union, and from a variety of foreign countries. Founded in 1847, Carthage is affiliated with the Evangelical Lutheran Church in America.

Nominations and applications, including a current curriculum vitae, statement of teaching philosophy, and a letter of recommendation should be sent by the deadline indicated. Address replies to the appropriate chairperson at Carthage College, 2001 Alfred Park Drive, Kenosha, Wisconsin 53140-1994.

Women and minorities are encouraged to apply.

ASIAN HISTORY: Assistant Professor. The successful candidate will be a specialist in Asian History committed to teaching undergraduate introductory and upper division courses in the history of Japan and China. Preference will be given to candidates with additional specialization in East Asian religions. Teaching responsibilities will include courses for the Asian Studies minor and teaching in the Heritage seminar that focuses on Asian cultures. Respond by January 1, 2000, to Professor Rom Macias, Chair, Division of the Humanities.

COMPUTER SCIENCE: Assistant/Associate Professor. The successful candidate will help mold the newly introduced computer science major. The College seeks applicants with expertise in networking and computer architecture. Recent campus initiatives include renovation of science/math/computer facilities, completion of fiber-optic cabling to all faculty offices, and establishment of a summer student research program. Respond by January 1, 2000, to Professor Charlotte Chell, Chair, Division of the Natural Sciences.

GRAPHIC DESIGN: Assistant/Associate Professor. The successful candidate will demonstrate expertise in Macintosh graphic design software (Adobe Illustrator, Photoshop, PageMaker, and QuarkXPress) and have the ability to run and maintain an established Macintosh studio. Multimedia or animation experience is also desirable. Teaching responsibilities include teaching design courses at all levels. Please submit slides of recent work in a labeled, clear flat slide sheet or electronic portfolio. Respond by January 1, 2000, to Professor Richard Spiera, Chair, Division of the Fine Arts.

MICROBIOLOGY: Assistant Professor. The successful candidate will demonstrate a commitment to undergraduate education in the biological sciences and have two or more undergraduate courses in research. Teaching responsibilities will include introductory biology, microbiology, immunology, and virology. A background in epidemiology and virology is desirable. Include a personal statement detailing current research interests. Respond by January 1, 2000, to Professor Charlotte Chell, Chair, Division of the Natural Sciences.

SECONDARY EDUCATION: Assistant/Associate Professor. The successful candidate should have a minimum of three years of teaching experience at the middle/secondary level. Willingness to work collaboratively with colleagues across disciplines is desired as is interest in coordinating secondary education and content areas. Teaching responsibilities will include teaching secondary education methods courses, including reading in the content areas and language arts, and supervising student teachers. Opportunities are available to teach graduate courses and to work as a graduate student advisor. Networking with area middle and secondary schools is encouraged. Respond by January 1, 2000, to Professor Judith Schuumberg, Chair, Division of Education.

SPECIAL EDUCATION: Assistant/Associate Professor. The successful candidate should have a minimum of three years of teaching experience at the elementary/middle school level. Experience in a variety of settings such as inclusive classrooms and regular education programs is desired. The candidate should have an interest in building programs and a willingness to collaborate with colleagues across disciplines. Responsibilities will include teaching special education and regular elementary education courses and supervising student teachers. Opportunities are available to teach graduate courses and to work as a graduate student advisor. Networking with area elementary and middle schools is encouraged. Respond by January 1, 2000, to Professor Judith Schuumberg, Chair, Division of Education.

SOCIOLOGY: Assistant/Associate Professor. The successful candidate will demonstrate expertise in criminology with a strong teaching focus, demonstrated by a record of teaching and student evaluations. Respond by January 1, 2000, to Professor Judith Schuumberg, Chair, Division of Education.

DIVISION OF OCEAN SCIENCES

NATIONAL SCIENCE FOUNDATION

Arlington, VA 22230

NSF's Directorate for Geosciences seeks a new Chief, Ocean Sciences Research. In position in its Division of Ocean Sciences, incumbent will provide leadership and direction to program activities supporting research and education in oceanography, physical oceanography, marine geology and geophysic and ocean technology.

Appointment to this Senior Executive Service position may be on a career basis, or on a 2-5 year term basis with a current salary range of $110,200-130,184 for a new SES appointment. Alternative arrangements may be available for qualified applicants.

Applicants are encouraged to apply by January 28, 2000. For complete details, please see the following URL: www.ostp.gov/Depts/whs/whs-flyer.htm.

NO FEE, no prior employment experience is required.

NSF is an equal opportunity employer committed to employing a highly qualified staff reflecting the diversity of our nation.

THE COLLEGE OF

WOOSTER

1189 Beall Avenue

Wooster, Ohio 44691-2363

Tenure-Track Appointment

beginning Fall, 2000

Art
Chinese
Psychology

The positions are being posted jointly with the Five Colleges of Ohio Consorti. For complete descriptions, go www.w.c.wooster.edu.

Willow down and select the Quick Employment Opportunity or call or e-mail Lindy Farm.
UCSD
Governmental & Community Relations
Manager, Governmental Relations, Health Sciences

Responsible for the development and implementation of strategies and coordination of governmental relations programs to monitor, respond to, and shape county, state and federal health science policies that effect UCSD. Effectively represent the interests of the School of Medicine and UCSD Medical Center at the federal, state, and local levels.

For details, please see our web site at: www.hr.ucsd.edu
Salary commensurate with experience. Apply by 12/15/99 referencing Job # 118265-X to: resume@ucsd.edu or mail to: UCSD Human Resources, La Jolla, CA 92037-0967. AA/EOE.

University of California
San Diego

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you'll work in a collaborative environment that lives its values, supports diversity and encourages professional development.

Faculty Positions in Computer Science, Information Systems, and Telecommunications

Computer Science faculty are actively pursuing research in artificial intelligence, biomedical signal and image processing, computational complexity, computer vision, intelligent agents, distributed computing, databases, human computer interaction, foundations of programming languages, graphics, parallel and distributed algorithms, quantum computing, software engineering and software reliability. Information Systems faculty are actively pursuing research in electronic commerce, technology supported learning, group support systems, collaborative systems design, and IT strategy.

Telecommunications faculty are actively pursuing research in performance analysis of data networks, techniques for providing differentiated quality of service to Internet applications, formal methods in protocol development, simulation tools for network education, and distributed multimedia systems.

DePaul University offers competitive salaries, best-in-class benefits including: life, medical (Blue Cross Blue Shield), dental, retirement plan, generous vacation plan, and tuition assistance for yourself and dependents. Candidates should have a Ph.D. in a relevant field by the date of appointment.

To apply, complete the application form at http://www.cs.depaul.edu/facultyapp.html and send a curriculum vita, a research statement, a teaching statement and at least three letters of reference to: Donna Max, Executive Assistant to the Dean, School of Computer Science, Telecommunications and Information Systems, DePaul University, 243 South Wabash Avenue, Chicago, IL 60604-3391. E-mail: faculty_searches.depaul.edu. More information about CTI may be found at http://www.cs.depaul.edu DePaul University is committed to diversity and equality in education and employment.

COLUMBIA UNIVERSITY
Director of Minority Affairs and Special Programs

The Graduate School of Arts and Sciences of Columbia University is seeking a Director of Minority Affairs and Special Programs who will be responsible for recruiting M.A. and Ph.D. applicants from members of minority groups, for networking with institutions that produce minority B.A.'s (particularly in the New York metropolitan area), for monitoring these applications, and for utilizing University resources designated for minorities. The goal of the Director will be to increase the School's recruiting of M.A.'s and Ph.D.'s held by members of historically underrepresented populations. In addition, the incumbent will administer minority fellowship programs within the Graduate School, including the Summer Minority Research Program and the Dean's Summer Minority Fellowship Program. This involves writing grant proposals and researching resources available to minority students. Instructing the Director of Development in locating and soliciting donors for the programs, preparing brochures and announcements, collaborating with faculty, and program logistics. The Director of Minority Affairs and Special Programs serves as a contact and advocate for all minority students entitled to GSAS.

Qualifications: Bachelor's degree or equivalent experience required. Graduate degree preferred. Minimum of four years related experience required. Experience in academic administration in a graduate school setting preferred. Background in, and demonstrated sensitivity to, particular problems facing minority graduate students. Experience in demographic analysis and statistical presentation desired.

Send applications, including a curriculum vitae, to Edna G. Macagno, Dean, Graduate School of Arts and Sciences, Columbia University, 109 Low Memorial Library, Mail Code 4306, 535 West 116th Street, New York, NY 10027.

ENGAGEMENT OF LATINO STUDENTS

The 15th annual Status Report on Minorities in Higher Education by Carney and Wilson (1997) offered interesting information on Hispanic enrollment. The number more than doubled between 1984 and 1995. And much of the growth took place at two-year colleges. One possible inference is that four-year institutions need to design programs, curricula, and strategies that attract and retain Latino students. A projected increase in potential Latino students suggests a need to establish model curricula and programs that embrace the historical experiences of these students. Additionally, universities should examine factors that engage students at the institution and help them move steadily toward graduation.

There is no question that campuses embracing a multicultural perspective examine variables associated with minority student academic satisfaction, performance, and desires to become involved in groups and extracurricular activities that nurture a sense of belonging. These variables include multicultural curricula and programs, minority faculty and staff hires, scholarships, grants, and more. But in some cases, institutions set admission policies and procedures that deter minority students.

For some Hispanic students, the most serious problems are not those they confront getting into college, but those they face once they get there. These range from lack of Spanish language use in school to the tensions inherent in finding their way in large, impersonal, fast-paced institutions.

Research has brought a better understanding of student behaviors in this context, but many in academia agree that developmental theories of Hispanic students have not been sufficiently examined. Theorists have evolved from studies of majority students. Research about Latino students that focuses on their cultural backgrounds could be useful too for the development of projects, extracurricular activities, and specific curricula.

One theme surfacing in the literature is the cultural dissonance between schools and Latino students. The lack of synchronization between academic programs, college life, and students has a direct impact on their performance and academic achievement. Colleagues across the U.S. grapple with low retention rates for Latino Relevant programs should be developed now. It is not prudent to wait for a large influx of Latino students before developing such programs.

Richard P. Durán (1983) focused his research on transition experiences of Latino college students and denoted dispassionately why so many Hispanics never go to college or, when they do go to college, why they invariably encounter difficulty. Durán points out that Hispanic high school seniors acknowledged that their part-time and at times nearly full-time job obligations took too much time away from studies. The greatest discrepancy between Hispanic and non-Hispanic seniors in Durán’s research is the compatibility of students’ home life and school life. One-third of Hispanic seniors—att an academic level higher than that of non-Hispanic Whites—worry about financial problems, family obligations, a lack of a good place to study at home, and parental disinterest in their education. Durán further notes that high school guidance counselors often fail to explain college application and financial aid processes to students and families, resulting in many otherwise qualified Hispanic students failing to apply to college.

Most research studies on racial identity of minority students have been designed with African Americans as the central focus. Moreover, academic satisfaction and student involvement are quite complex. The university might have good intentions, but if its climate is perceived as hostile, retention can be affected. The identification of variables in the social, academic, and institutional support systems available to assist Hispanic students is critical to achievement and retention.

It is time for educators to engage in a dialogue with Latino constituents to accommodate a new student majoring for partnerships with families extremely important to ensure that those students, their parents, and their siblings view the institution as an extension of their home. Replicating the Hispanic culture can take place through mentoring programs and by linking up community-based organizations and governmental agencies, such as the providing vocational training to parents through the Job Training Partnership Act.

To effect a smooth transition from home to school, universities must insist that all activities from orientation to graduation include and reflect community and the student body.

Finally, the mission and vision of the university should be examined to ensure that admission policies, programs, and curricula place the university as a viable alternative to two-year colleges for Hispanic students. The experiences of Latino students inside and outside the classroom can significantly influence their academic satisfaction, collegiate involvement, and desire to maintain their culture through use of the Spanish language while embracing elements of the dominant culture. Acceptance by peers, faculty, and staff, and inclusiveness of both the curricular and extracurricular programs are factors that influence Latino students directly impact their academic satisfaction and collegiate involvement.
Scoring ON the field and OFF
FACULTY POSITIONS (10 Months)

All open faculty positions are full-time tenure track assignments, effective September 1, 2000. Rank is Assistant Professor unless otherwise specified. General responsibilities include ongoing research and publication, involvement in professional organizations, participation in curriculum development, committee service, student advisement and interest or experience in using instructional computer technologies to improve the teaching/learning process.

SCHOOL OF BUSINESS, GOVERNMENT AND TECHNOLOGY

Department of Accounting. Teach graduate and undergraduate courses in Accounting, Auditing, and Taxes. Preference will be given to individuals who have completed or are in the process of completing a Doctorate in Accounting or Management (with a concentration in Accounting), and who have relevant graduate teaching experience.
Chair: Prof. Gary Schader.

Department of Economics and Finance. Teach introductory courses and advanced classes in Finance, i.e., International Finance, Investments, etc. Doctorate in Finance, Economics or Finance is preferred. ABD considered. College level teaching experience desirable. Chair: Dr. William Kemp.

Department of Public Administration/Health Services Administration. Candidate must have either a completed Doctorate or ABD status in Health Administration. Public Health, and/or a related field in Health Care Management. Experience in Health Care Finance, Health Care Economics, or Health Care Information Systems preferred. Teaching experience, particularly at the graduate level, is desirable. Chair: Dr. Dawood Faraz.

Department of Technology/Graphic Design. Teach courses in printing technology including lithography, desktop publishing, digital photography, screen-printing, color separation and business-related graphics. Advanced computer graphics experience necessary. Doctorate or other terminal degree required. Experience in industrial experience desirable. Coordinator: Dr. Donald Lokute.

SCHOOL OF EDUCATION

Department of Communication Sciences and Educational Services/Reading Specialist. Teach developmental and corrective reading with college freshman and college work relative to teacher training. Preference will be given to individuals who have completed or are in the process of completing a Doctorate in Education. Experience in developmental reading with college students is essential. Experience in teaching strategies is desirable. Chair: Albert J. Mazurek.

Department of Early Childhood and Family Studies/Early Childhood Development Specialist. Teach graduate and undergraduate courses in the development and Early Childhood field. Experience in curriculum design and implementation in preschool settings is desirable. Chair: Dr. Cynthia Gannett.

Department of Physical Education, Recreation and Health/Physical Education Teacher. Candidate must have either a completed Doctorate or ABD status in Physical Education and/or related field. Experience teaching graduate and undergraduate courses is desirable. Chair: Dr. Richard S. Bakker.

Department of Physical Education, Recreation and Health. Teach Physical Activity, Consumer Nutrition, and Exercise Science courses. Critical issues and values in sport and physical education are emphasized. ABD preferred. Chair: Dr. Richard S. Bakker.

Department of Special Education and Individualized Services. Teach courses in special education and related fields. Experience teaching undergraduate and graduate students is desirable. Chair: Dr. Elaine Fisher.

SCHOOL OF LIBERAL ARTS

Department of Design/Interior Design. Teach CAD and studio courses in Interior Design in FIDER accredited program. Experience in the design community preferable. Chair: Prof. Mark Holloway.

Department of English/English as a Second Language. Teach courses in English as a Second Language and related subjects. Experience in teaching English as a Second Language is preferred. Chair: Dr. Robert Criscione.

Department of Music/Studio. Conduct and build the instrumental program, including teaching, working with area high school music educators, and teaching of courses depending on areas of specialization. Public school teaching experience and instrumental performance experience desirable. Chair: Dr. Mark Tonsor.

Department of Music/Music Education. Teach theory, music education, and electronic music. Experience teaching secondary music education is desirable. Chair: Dr. Mark Tonsor.

Department of Psychology/School Psychology. Teach undergraduate and graduate courses in psychology. Experience teaching psychology courses is desirable. Chair: Dr. Martin Harris.

Department of Psychology/Marriage and Family Therapy. Teach undergraduate and graduate courses in psychology. Experience teaching psychology courses is desirable. Chair: Dr. Martin Harris.

Department of Sociology and Anthropology. Teach courses in statistics and research methods. Experience in specialized areas of sociological research is desirable. Chair: Dr. John Danner.

SCHOOL OF NATURAL SCIENCES, NURSING AND MATHEMATICS

Department of Biological Sciences/Biotechnology Master's Program. Teach graduate courses in Molecular Biology. Experience teaching and research is encouraged and modest facilities and support are available. Chair: Mr. David Mancarella.

Department of Chemistry/Physics. Teach introductory and advanced courses in Analytical, Physical Chemistry or Inorganic Chemistry in a department housed in an American Chemical Society accredited program. Chair: Dr. Donald Criscione.

Department of Mathematics and Computer Science. Teach curriculum development in the undergraduate Computer Science major programs, Information Systems, Database Management systems, and Computer Networks. Experience teaching and research is encouraged. Chair: Dr. Carson Krantz.

Department of Mathematics/Computer Science. Teach introductory and advanced undergraduate and graduate mathematics and statistics. Experience teaching and research is encouraged. Chair: Dr. Carson Krantz.

Department of Occupational Therapy. Teach courses in the area of pediatric and geriatric Occupational Therapy. Experience teaching and research is encouraged. Chair: Dr. Paula Kramer.

APPLICATION, SALARY BENEFITS INFORMATION ON ALL POSITIONS:

Candidates with experience in teaching and research are encouraged to apply. Salary and benefits vary depending on qualifications and experience. Please submit a letter of interest, a current resume or CV, and three references to the Office of Human Resources, Keen University, 1 University Drive, Union, NJ, 07083. Applications must be received by January 30, 2000. Send letter of interest, up-to-date resume, names, addresses, telephone numbers of three references. Official transcripts required.

Demographic Realities

by Gustavo A. Mellander

It is not surprising to any Hispanic educator, but certainly a foreign world to those who have yet to peer into tomorrow's reality, is the fact that there are going to be vast changes in the composition, number, and gender makeup of those seeking a college education in the years ahead.

The highly respected Western Interstate Commission for Higher Education has published an excellent study entitled The Road to College: Educational Progress by Race and Ethnicity. The title accurately reflects the content but not the laborious research that was clearly necessary to compile this study.

Findings

When the study was released in Washington, D.C., its principal author, Robin Eter Zuliga, stated, "For the first time, officials can pinpoint the patterns of the increasingly multicultural student body and then make plans to better educate underserved—but increasingly significant—racial and ethnic groups."

The study, conveniently broken down among the states, projects the ethnic and racial composition of elementary and secondary school students as well as college students.

Futureists will not be surprised by the study's findings, which show that clearly one-third of all school children, including the college-age population, will be non-white or Hispanic by the beginning of the new century. Conversely, a decline is projected among the White non-Hispanic school-age population. All constituencies should be aware of these demographic changes, which will obviously pose significant challenges not only for higher education but for all Americans.

The study is unique because it examines the grade-by-grade progress of school-age children by racial and ethnic identification in every state. It also projects numbers of public high school graduates for such groups as African Americans, Native Americans, Asians, Pacific Islanders, Hispanics, and White non-Hispanics. Replete with charts, data, and useful statistics, its detailed state-by-state work sheets and projection tables are easy to read.

Key Highlights

Looking at 13 western states, Hispanics are the fastest growing racial/ethnic group, with graduates up almost 60 percent.

Population growth in the west is expected to push the number of high school graduates in that thirteen-state region ahead of the northeast region, making the west second only to the south in its number of high school graduates.

Non-Whites and Hispanics make up a majority of public high school graduates in California, Hawaii, Mississippi, New Mexico, and the District of Columbia. Some 40 percent of New Mexico's graduates are Latinos, and 12 percent are other non-Whites.

College Bound?

These are not fuzzy predictions. These youngsters are already in our schools. How well we serve them will impact the very fabric of America in the 21st century.

When most of us went to school, we were lucky if an interested teacher took us aside and spoke to us about our career options. In far too many cases, that advice and attention was usually granted only to superior and attractive students, the upper-middle-class. For the group that could be argued needed career guidance much less than the rest of us.

If you were Hispanic, in many cases, what few suggestions you received invariably pushed you towards a low-level vocational field. A Hispanic classmate, who ultimately became a college president, was encouraged to major in vocational education and seek a job in the trades.

More than ever before, pragmatic student-specific career guidance is a legitimate need for all students. Bright ones, privileged ones, and then the rest of us. To paraphrase Abraham Lincoln—God must like common people—that's why He made so many of us.

The need to help students explore their many options emerged as part and parcel of the community college fabric. It was part of their founding philosophy. Further, the "open door" community college philosophy and their targeting of first-generation college students created an optimistic "can do" attitude among staff and students.

Community college counselors' role as student advocates and promoters of student retention has a long, successful tradition and continues to grow.

Problems

But there is a downside. California State University (Hispanics in Higher Education CAS' Imperative) states that 8 cent of the California Hispanic students who enter college enter community colleges. Unfortunately an unacceptably high number of these students drop out, and fewer transfer to baccalaureate institutions. That high attrition rate rarely highlighted the minority college publically.

Four-year colleges have become more interested in their students succeed. Many motivated by altruistic reasons, others, said to note, "teach light" in direct correlation to enrollment shortfalls. Students' tuition are too important a factor at most colleges to be ignored. For whatever reason, the "sweat" days might well be over.

With that as a given, colleges have found that it is not enough to merely provide. Freshman Orientation week must be systematic follow-up to help Hispanics explore aptitudes, attitudes, internal values. Once understood, they then be related to potential educational choices. This protracted course, then leads back to selection of logical major. A better sense of direction is more systematic, through necessary.
The Trio from Rio

USF's Latino Football Coaches

BY TODD MARTINEZ-PADILLA SIMMONS

University of South Florida

"We want to start a national Hispanic coaches association—something that will help us continue the growth of American football among Hispanic Americans," says Hernandez.

In the ranks of collegiate football, Hispanics are a rarity. Hispanic players make up only an estimated two percent of all players, the percentage of coaches is smaller than that.

So the fact that the University of South Florida has not one, not two, but three Hispanic football coaches is extraordinary. Add to that their key collective role in transforming USF from a university without a football program into a school making the quickest ascent ever into big-time Division I play, and you have something very special indeed.

"I'm grateful for the opportunity here—we all are. I realize how difficult it is to get into college coaching, period," says Receivers Coach/Recruiting Coordinator Frank Hernandez. Adds Special Teams Coach Renato Diaz, "I'd like to think that there's a higher purpose to us coming together."

Bulls fans might be inclined to agree. To understand why, one needs to look back to 1996, when University leaders and newly hired head coach Jim Leavitt were working to get the recently approved football program on the field. USF had no special reputation as an athletics powerhouse and faced the prospect of years of Division I-AA in which little-known opponents would visit neighbors Florida, Florida State, and Miami all basked in the national spotlights so frequently on their teams.

But Leavitt, a highly regarded defensive coordinator at Kansas State University, was determined to build an immediately competitive program. And for expert help, looked right away to Mike "Chico" Canales, a bright young quart who had known as a player at Kansas State.

"When I found out Chico was hired, I thought he might be a good fit," says Hernandez. "When
built. The Tampa Bay area hadn't seen college football played locally since the University of Tampa abandoned its program in the 1970s. Season tickets began to fly out of the box office—5,000, 10,000, 15,000, and up. Before the Bulls ever took the field, they had set a national Division I-A record by selling more than 20,000 season passes.

The program's debut lived up to the hype—an 80-3 blowout over Kentucky Wesleyan before 50,000 fans at Tampa Stadium. The Bulls finished that first season a respectable 5-6 and improved to 8-3 the following year. Through eight games this year, they were 6-3, nationally ranked, and still vying for a playoff berth.

"We've had an amazing record. This has been an experience we'll be able to look back on for many years to come," says Hernandez.

Even more important is the fact that his boys have the opportunity to play for a national championship, which is something that hasn't happened in Tampa since the 1960s.

**Told me, I was like, 'All right, man! This is great!'**

Once in Tampa, they met Diaz, whose route to college coaching was far different from theirs. Born in Cuba and raised in Miami, Diaz was a rabid football fan and a two-year starter for Miami Senior High in the late 1970s. His playing days behind him, he enrolled in USF and graduated in 1983 with a geology degree, subsequently working for both the U.S. Geological Survey and Texaco.

But after a decade in the field, he took some time to "do a little soul searching." Coaching, not geology, was his passion, he decided. And he began writing and calling the new coach at his alma mater: Leavitt, anxiously looking for a way to turn his passion into employment.

Impressed by Diaz' knowledge of the game and his enthusiastic eagerness to be involved, even as a volunteer, Leavitt hired him as an administrative assistant with limited coaching and recruiting duties.

Well aware of how uncommon their situation was as three Hispanic coaches on the same squad, Diaz, Canales, and Hernandez gave themselves a nickname that is part reference to their Latin heritage and part a celebration of the area in Texas to which each has some family connection: The Trio from Rio.

**Ambition and Opportunity**

As Diaz, Hernandez, and Canales worked with Leavitt and the rest of the Bulls staff to prepare for the season's first 1997 kickoff excitement Conference USA will admit the Bulls as a football school (USF is already a league participant in most other sports) beginning in 2003, USF will move to Division I in 2001. Those two actions will represent the fastest ascent to Division I and to a major sports conference that any program has ever achieved. In preparation, the Bulls scheduled their first Division I opponent this season—San Diego State, to whom USF lost 51-12—and have scheduled Kentucky and Baylor for next year.

All of that will bring unprecedented attention not only to USF and the team, but to the Trio from Rio as well. They have ambitious plans they might use the spotlight for both cultural educational purposes. "We want to start a Hispanic coaches association—something that helps us continue the growth of American among Hispanic Americans," says Hernandez. "We want to educate people about the game raise its profile in the Hispanic community about five percent of players at the college are Hispanic, even though there are a lot of Hispanic people playing American football."
game, and by the time his father had retired and moved the family to Palm Springs, Calif., he was a standout young quarterback for the local high school team (his idol at the time: New England Patriots Quarterback Jim Plunkett, also Hispanic). Canales' hard work and athleticism paid off with a full scholarship to Utah State University, where he moved up from seventh on the quarterback depth chart to become a three-year starter.

He quickly moved on to Brigham Young, where he earned a master's degree in physical education and worked with the football team's quarterbacks, receivers and defensive backs for three seasons. A seven-year stint at Snow College followed, with Canales producing four junior college All-American quarterbacks, and then a one-year stop at the University of the Pacific, where he was quarterback and kicking coach in 1995. Leavitt picked him up from there.

Few Hispanics at the collegiate level get the kind of support that enabled Canales to become successful, experts say. The 1998 Racial Report Card on intercollegiate athletics (created by researchers at Northeastern University's Center for the Study of Sport in Society) found that "college sports had the smallest percentage [relative to major professional sports] of people of color among head coaches, athletic directors...senior administrators and administrators in general." The report graded college sports an "F" in this area.

The study showed that according to NCAA data, fewer than 21 percent of head coaches of men's Division I teams in 1997-98 were Hispanic. And in that report, Hispanics were lumped into an "other minorities" category. In the previous year's report, which included a Hispanic-specific breakdown, the percentage of men's Division I teams led by Hispanics was zero.

Among football teams, Hispanic assistant coaches represented less than 19 percent of the total in 1997-98; Hispanics were less than 1.2 percent of male college athletics administrators and less than 1.1 percent of female administrators, the report showed. Hispanic male athletes meanwhile made up 3.1 percent of all male college athletes in 1996-97 and 2.8 percent of women athletes. Both numbers are on the rise, each having grown by more than half a percentage point over the previous five years.

NCAA Executive Director Cedric Dempsey expressed concern last year that minority coaches face a dearth of opportunities.

"When you're talking tennis, golf, swimming, and other sports where there are poor percentages of minority participation, [this] is a reflection of the fact that in our society, we don't provide a lot of good programs at the secondary level, so we don't see high participation rates for those sports," he said in a statement in the 1997 report. "But it's the same in sports like baseball, football and track, where we have high participation numbers of minorities, not to have more minority coaches."

Canales, Hernandez, and Diaz are always on the lookout for more Hispanic counterparts across the field and at NCAA meetings. "We've had opportunities to mingle and interact with others on the national level," says Hernandez, as he and the others rattle off names of Hispanic coaches at Wisconsin, Stephen F. Austin, and a handful of other schools.

Those opportunities have assured the men that there is much more that can be done. Canales proposes organizing a Hispanic caucus at the 2001 NCAA convention, while Hernandez envisions the possibilities of creating educational resources such as special camps for Hispanic football players.

"Part of my passion for football is being able to pass on this game to Hispanic youngsters, especially those who didn't realize they had an opportunity in this game," says Diaz. "Some athletes and coaches complain about the responsibility of being a role model. Not me. I cherish that responsibility. I want to be a role model."
Sports

Sport in Society: 10th Annual Racial and Gender Report Card

Center at Northeastern University Widens Scope

By Ed Brennen

Northeastern University’s Center for the Study of Sport in Society issues an annual report analyzing the diversity of players, coaches, and key administrators at both the professional and college levels.

For nine years, the report was known simply as the Racial Report Card, but the name and mission expanded in this year’s 10th edition to become the Racial and Gender Report Card.

Jose Maso, senior associate director of Sport in Society, said that given the evolving face of athletics in America today, widening the scope of this one-of-a-kind report was inevitable. “When we spoke of the racial report card 10 years ago, when you looked at the world of sports, it was male-dominated and Black and White—period,” Masso said from the Sport in Society’s Boston office in early October two months after the report was released. “You looked at the field or the court and it was men—White men and Black men. That was 10 years ago. In quick fashion over the last 10 years, the panorama has changed. On the racial side, it’s no longer Black and White. Now its international, it’s global, led by the influx of Latinos in the world of professional sports—soccer and baseball in particular.”

But when you look at sports in general over the last 10 years, with Title IX, you now have the gender issue. Sports are no longer simply Black and White. They’re no longer male. It’s now also women at all levels—high school, college, and professional.”

And given the impact of Title IX, the section of the 1972 Federal Education Amendments requiring that “no person in the United States shall, on the basis of sex...be subjected to discrimination under any education program or activity receiving federal financial assistance,” what did the 1999 Racial and Gender Report Card have to say about the status of women in sports today?

Well, the results were mixed. At the collegiate level, things were just average overall with a “C” grade being given. On the playing field, 39 percent of all student-athletes were female in 1997, an all-time high for a “C” grade. The NCAA’s own headquarters reflected the most gender diversity, with a 49 percent female professional staff in 1998—a number down, however, from 54 percent in 1997.

In the college head coaching ranks, 41 percent of all Division I women’s teams were coached by women in 1997-98, up slightly from two years prior. At the Division II level, that figure was 38 percent, while at Division III it was 48 percent.

What weighed the overall grade down, however, was the fact that only 8.2 percent of all Division I college athletic director positions were held by women in 1997-98, although this was up slightly from the 5 percent two years earlier.

When looking at the professional sports ranks, the 1998 Racial and Gender Report Card also widened its scope this year by including comparative data for the first time from the National Hockey League, Major League Soccer, and the women’s basketball leagues—the Women’s National Basketball Association and the defunct American Basketball League—in addition to the previously studied National Football League, National Basketball Association and Major League Baseball.

In the league offices, the NHL, MLS, and WNBA reflect the most overall gender diversity. In the WNBA, 69 percent of the professional staff was women, while NBA (45 percent), NHL (41 percent), MLS (37 percent) all far exceed Major League Baseball’s 26 percent.

In terms of the teams’ administration, the NBA led the way with 41 percent female contribution (up from 31 percent in 1997) followed by the NHL (35 percent), NFL (27 percent), and MLS (22 percent). Sufficient data were provided by Major League Baseball to determine a comparative statistic.

Sport in Society Director Richard E. Lapchick, who authored the report along with Res Director Kevin J. Matthews, said that when compared to the grades given for race, partisanship at the college level, women are doing better when it comes to number of available opportunities.

“A major finding of the report was that for professional off-the-field positions in both college and pro sports, the growth opportunities for women continue to exceed those for people of color by significant numbers.”

Richard E. Lapchick, Director, Sports in Society.
color are underrepresented, aside from the NBA, in senior management. This is especially true for Latinos."

Masso, a former sports agent who specialized in Latino players, took particular interest in the fact that in 1998 the percentage of Major League Baseball players who were Latino reached an all-time high of 25 percent. Yet in the management ranks, that percentage dropped dramatically.

"You would imagine that if there is a growth of Latino players on the field, there would be a similar growth as far as coaching and front office personnel," Masso said. "But that's where Major League Baseball still needs to grow. Because we are going into the millennium, and we have two assistant GMs in baseball...So it doesn't go hand in hand. The growth happens on the field but not necessarily on the front office side. You have 25 percent Latino players, but the number of managers is one--Felipe Alou with the Montreal Expos. In 97-98, eight percent of coaches were Latino. Eight percent of the total are Latino. Eight percent of the total bodies."

"Soccer, from the very beginning, was looking south or to Europe for the expertise on the field and off the field. Why? Because soccer is not really a U.S. product, if you will. Baseball is a U.S. product, so baseball's move to become international is only a result of the need for players to be representative of those countries. It's sort of like a yin-yang. Yes, we have more players, but that doesn't mean we'll reflect that in the front office or bench."

"Soccer recognized right from the beginning that they were not experts, if you will...They have to find the players and the coaches, the technicians who know the game, who have the capacity to put it together. That's the specific reason why you find me of an eclectic group in soccer."

When looking at Hispanics the collegiate level, however, numbers were far from eclectic. According to the study, six percent of college students are Latino, while 29 percent of college student-athletes are Latino. In comparison, percent of college students: African American, while 23 percent of student-athletes are African American.

"Colleges have a way to go," said Masso, who added that the number of Latino coaches at the college level was below the athletic participation rate."

number of Latino athletes is still very small compared to the Black players, and therefore the number of coaches in those ranks is still very small.”

In addition, there were only two Latino athletic directors at the Division I level in 1997-98—Rudy Davalos at New Mexico University and Dan Guerrero. Masso said that this likely leads to a trickle-down effect on the playing field and sidelines.

“I think part of it has to do with the decision-making power of hiring athletic directors,” he said, “in a sense of, ‘Will I be able to hire a Latino who will be coaching at a college level, and what sport will they be coaching? Soccer would be the one they’d be thinking off, maybe baseball, maybe football’.”

Beyond the hiring practices at the college level, Masso said that improvement will come about if high schools do a better job of nurturing the young Latino student-athlete.

“Let’s face it. The same way that the Latino athlete has been basically tracked to see their sports as a being a way for them to make it professionally, very few high schools move student-athletes who are Latinos to think about themselves as having the ability to take the next step, which is college. Junior college maybe, but not Division I college,” Masso said. “So until there’s a mindset that says Latino student-athletes at the high school level will be given the same type of attention as an African American or White student-athlete with regards to going to college as an option, you’re always going to see that small percentage.”

“We have to re-examine that system, because high school is the farm system for the colleges,” Masso added. “Until the powers that be in the school systems—meaning the high school athletic director, the high school counselor, the high school senior advisor—until they start embracing the young Latino as having the potential to go on to college, we will always see them being profiled as, ‘Well, he’s a good kid. He’s one of our best athletes. He’s a great kid. What’s the future for him?’

Well, he’s going to do all right. Is he going to college? Well, he doesn’t really have the GPA; he doesn’t have the SATs...It’s based on expectations. If that’s the expectation you have of a person, you’re not going to push them to excel. A lot of these student-athletes have been able to excel because of the expectations set by them.”

As with any grading system, the Center for Sport in Society’s 1998 Racial and Gender Report Card is simply a marker documenting the past, a “snapshot in time,” as Masso says. It cannot reflect change on its own, and how the college and professional sports worlds react to their grades is up to them. The Center has created a program called Sports CAP. which is designed to provide women and people of color with improved access to the sporting industry, ranging from internships to high-level management, as well as legal and medical positions.

“We try to work with those organizations in any of the areas that they are deficient in or need some help on, in particular areas of identifying candidate positions within their organization,” Masso said.

He hopes that the Report which can be downloaded from the website www.Sportsings.org will motivate the institutions to work toward those ends.

“The greatest part of Racial and Gender Report Card shows us there’s opportunity. It shows there’s a way that you can look five years down the road and put together a plan of that says, OK, within five yet is what our student body is going to look like. This is what we’re talking about. This athletic community will look like. If that’s the case, let’s start changing people in these areas will be able to work with student-athletes. Coaches, supp
Omar Minaya Climbs Front Office Ladder

Many Succeed On the Field but Few Off

By Gary M. Ste

From Sammy Sosa, Juan Gonzalez, Bernie Williams, and Ivan Rodriguez to "El Duque" Orlando Hernandez, Hispanics are prospering as major league players. But there's one area of baseball where Hispanics have not thrived—the front office. While a handful of Latinos have made manager, such as Felipe Alou of the Montreal Expos, no general manager of a baseball team has ever been Latino. The highest-ranking Hispanic baseball executive of any major league team is Omar Minaya, senior assistant general manager with the New York Mets.

Minaya's eye for talent emerged in the early 1980s when he scouted 10-year-old Sammy Sosa playing baseball in the Dominican Republic and signed him for a modest $3,500 for the Texas Rangers.

Minaya's rise from minor league baseball player, minor league coach, intern manager, international scout, director of scouting to assistant general manager proves that Latinos can achieve as baseball executives. But Minaya acknowledges that Latinos often get " pigeonholed" as international scouts, using their Spanish-speaking skills and knowledge of Latin America to sign high school players.

"Latinos become specialists in international scouting and are not allowed to go beyond that role," he said. In order to succeed in the executive suite as they do on the ballfield, Latinos require "opportunities in the lower ranks," Minaya said. Due to publicity about the lack of entry-level jobs for Latinos, Minaya senses that doors will be opening for Hispanics in baseball management.

The Northeastern University's Center on the Study of Sport in Society issues a Racial Report Card every year on major sports and noted how few Latinos hold executive positions. Its 1997 Racial Report Card showed that while 24 percent of all major league players were Hispanic, only nine percent of baseball officials were Hispanic. Richard Lapchick, the Center's director, attributed the dearth of Latino execs on baseball teams to either "racism or the old boys' network" feeding from office positions. "There's a consciousness now in baseball that says, 'We've blown it. We haven't taken a look at talented people from the Latino community who can play a role in the front office,'" Lapchick said.

Soccer has been the most ambitious professional sport in making a concerted effort to recruit Latinos into its front office, and basketball has begun to inroads. "In the past, the consciousness has been largely White or Black, about different kinds of people making it—including international people said. But what pressured baseball to make an effort to hire Blacks Lapid noted, was "people protesting, standing figures and good leadership the commissioner." It will take same pressure to influence has leadership to hire more Latinos, he suggests. Minaya made it in baseball management own initiative. Born in the Dominican Republic, old Minaya moved to New York City at age eight in 1967. He was drafted in the 11th round by the Oakland Athletics. He signed it for $1,500, using his bonus to help his parents retire in their Dominican Republic. Though his dream was to reach the major leagues, .220 his first year and was released by Oakland and signed Seattle Mariners. After playing for minor league teams in Bend, Oregon and Wausau, Wisconsin, Minaya looked at himself in the mirror during batting practice, "I realized that I wasn't able to compete at that level. When you're young and have a dream to play, reality does kick in. I wasn't performing as well as others," he admits.

After playing two years in a professional baseball league in Italy early 1980s, Minaya returned to the states and was interviewed by Joe Johnson, the Texas Rangers director of scouting, for a scouting position Minaya impressed him with his enthusiasm and knowledge of baseball and was hired in 1985 at age 26. He started out as international scoutizing in his native Dominican Republic. On a dirt field in Puerto Rico he first spied Sosa, who impressed him because...
strength to hit a ball, his great desire to succeed, his good arm—and he was loud. With proper nutrition, he would gain strength and hit more home runs," said Minaya. But he never envisioned that Sosa would grow so strong that he would hit 66 home runs in 1999, making him the second-greatest home-run hitter in baseball history behind Mark McGwire.

Sandy Johnson became Minaya's mentor. "Johnson taught me the business. I learned to identify what to look for in a baseball player, learned how to sign players and how to bring them along. I learned how to sign a player to a minor league contract, send him to double-A ball, and develop him," asserted Minaya. To assess baseball talent, Minaya evaluated a player's bat speed, body control, balance, and athleticism. He studied not only a player's current skills but considered his potential to become a major league several years down the road.

Minaya said Johnson from Phoenix, Arizona, the Arizona Diamondbacks' assistant general manager, "had tremendous people skills. People respond to him in a positive way." Johnson sent him to the Dominican Republic "to test him, to see how serious he was and how badly he wanted to make it in baseball. He started on almost no money and had to overcome many obstacles. He learned his craft," he said.

As coach of the Gulf Coast Rangers, Texas' lowest-level minor league team, in 1985, Minaya coached a very talented group of 16- to 18-year-olds including Juan Gonzalez, Sammy Sosa, Dean Palmer, and Kevin Brown, a 21-year-old pitcher signed out of college. Every one of them would star in major leagues, including Brown, who signed at eight-year, $100 million dollar contract with the Los Angeles Dodgers last year. Minaya groomed and developed players on and off the field.

"When players came from foreign countries, we were interested in nurturing them, helping them make the transition to the U.S. We would take them to a supermarket, help them shop, teach them American etiquette," said Minaya.

In 1986, Minaya was named interim manager of the Gulf Coast Rangers when its manager was forced to take time off and recuperate from a knee operation. Winning was not everything in the minor leagues. What was most important was developing players' skills and preparing them to become a major leaguer. If a manager was winning, but his players were stagnating and not expanding their skills and learning the fundamentals, the manager was not doing the job. "I was learning leadership skills," Minaya said.

He returned to scouting in 1986 and became the Texas Rangers' Latin American scouting coordinator in 1987. Gradually, Minaya was climbing the executive ranks, expanding his skills at every new position. Besides Sandy Johnson, he worked closely with Texas General Manager Tom Grieve and Doug Melvin, the current Texas general manager. Promoted to director of professional and international scouting in 1995, he helped the Texas Rangers trade for John Burkett and Ken Hill, and sign Kevin Elster, a former Mets whose career appeared to have ended after knee surgery. "We had good reports on Kevin, that he had good hands, and his hitting skills were returning," said Minaya, who helped negotiate his contract. Texas were credited with signing the talent that contributed to the team's success.

Minaya moved up the executive ranks because "I was able to work all facets of the game. I started out as an area scout, coached in the minor leagues, moved up the ranks as supervisor and director of scouting, international and for professional scouting dealing with major league trades. In 15 years, I've gone through all the levels that you can go through. That has been my road to get me where I am today," he said.

In 1997, New York Mets general manager Steve Phillips hired Minaya as the Mets' assistant general manager because of his expertise in evaluating players. Choosing which players to keep is "like putting together a portfolio of financial stocks, you have to know what stocks to hold and which to sell," Minaya said. His responsibilities as assistant general manager involve signing player contracts, which in this day of $100 million contracts is a major skill.

Minaya is involved in all areas of running the New York Mets, including developing players, evaluating them, helping with the annual baseball draft, scouting international talent, and, when Phillips assigns, conference with umpires during a delay about whether a game should be played. Delayed. During the off-season, Minaya helps Mets sign Robin Ventura, their free-agent third baseman, and Ricky Henderson, the best lead-off hitter in baseball history, and he helped with the trade Todd Hundley with the Cubs.

What advice would Minaya offer a young Latin who wanted to enter baseball's executive office? "Tell your family about baseball operations," he said. "It's a muscle, it's a job, it's a job, it's a job. As more people enter the minor leagues, more people will come to be involved in baseball. There has to be a hands-on experience," said the highest-ranking Latino in baseball.

But a sports management degree helps doors, said Anthony Missere, assistant professor/director of the sports management program at St. John's University in Flushing, Queens. Their four-year undergraduate program includes 72 credits of core requirements and 36 credits in professional preparation, including the business of sports, baseball operations, public relations, sports marketing, and writing. "There's a marriage between experience and education. It's a key to success," noted Missere. Richard Lapchick added that there are many routes to success in sports management: one is through graduating with a degree in business, and the other is to "learn the trade by doing." Graduates of St. John's sports management program include H1 George Boriera, who is Major League Baseball's administrator for America; Roy Kranik, director of operations for Major League Baseball; and Lou P'ermillo, vice-president of media for Fox Sports.

Though Minaya has ascended the baseball ladder to become the highest-ranking Latino official, he has one dream remaining: to be a general manager. "He's on the verge. Now all he needs is someone to take a chance on him," declared Sandy Johnson.
Frozenia Jerro, Winning Basketball Coach

"We’re comfortable around her. She’s always high-spirited and positive, showing us how to be better people as well as better basketball players," Curry said of Jerro in a school magazine article at season’s end.

The first official practice of the season was still a good two weeks down the road, but already the basketball juices were coursing through Frozenia Jerro’s veins.

Not that they ever really stop for someone like Jerro, whose life has been guided by the game ever since she first started playing competitively back in the eighth grade. As a young basketball player growing up in San Francisco, there was no off-season when it came to working on her free throws or perfecting her cross-over dribble.

But now, as an NCAA Division I women’s head coach at California State University-Northridge, Jerro’s commitment to the game has reached a whole new level. The team’s season might come to an end with the madness of March, but for coaches like Jerro, the work never ends. Not with so much recruiting and signing and preparation to attend to during the spring, summer, and fall months.

So with two weeks still to go before her second season at the Matadors’ helm officially began, Jerro’s mind was already cluttered with Xs and Os.

"We’re going through our pre-season workouts now, and we start practice on Oct. 16, so we’re excited and anxiously awaiting that," said Jerro.

"The team is looking good... The kids we have in right now are looking good, and we’re ready to roll.

If only Jerro could have been so optimistic heading into her first season as head coach at Cal State-Northridge, their 1998-99 season, disaster struck. Abraham abruptly resigned as head coach after an arrest on drug charges.

It was November, and the young team was without a leader. With the regular season looming, the players were allowed to chose their own interim coach. They tabbed Jerro.

"Life is full of surprises, and you just have to kind of be ready for them as they present themselves, good and bad," Jerro said of the unfortunate set of circumstances that led to him being named the Matadors’ Interim coach. "You can never really predict those types of things out.

But to have such a bizarre events befall such a young team surely you could count the Matadors out. Could it be you?

"It was pretty much expected that after something like that team would probably fall apart and not be able to do a whole lot," recalled Jerro, "and they really determined to make that didn’t happen. They went on to win a piece of our puzzle, they went on to do everything they could get it done... We just had fighters.

And if the team needed something to focus on, it was always hoops.

"We were just basically concentrating on playing some good basketball," Jerro said. "We changed a whole lot system-wise with the same amount of work, but we just went on to make sure mentally that we were where we needed to be to play some good basketball, be that obviously a huge distortion for us.

Even before Jerro assumed head coaching duties, the Matadors expected to be an improved team within their conference—the BWC. "I think we were picked to third in the conference, which is a huge step up from where we were in the past," said Jerro, who returned seniors on last year’s "Talent-wise, we knew we..."
compete. It would just be a matter if we could build the chemistry and get that experience, because we were a young team with eight sophomores....This time last year, we thought we'd be maybe a year away.”

It turns out Cal State-Northridge was much closer than that. Despite the upheaval, the Matadors went on to finish 21-8 overall last season, capturing their first-ever Big Sky Conference championship and advancing to the NCAA Division I Women's Basketball Tournament for the first time in school history.

The dream season finally ended when the 15th-seeded Matadors lost to second-seeded Colorado State in the first round of the NCAA tournament, 86-70, but that loss could hardly spoil all that the team had achieved. The 21 wins were a school record, as was the team’s 72% winning percentage. Jerro also became the first Matador women’s basketball head coach to win 20 or more games in her first season.

While Jerro had confidence in her young team even before she became head coach, she could see the team’s confidence growing in itself around mid-season.

“Once we got to conference time, particularly the second half of our conference season, once we’d gone through and seen everybody and how we matched up, we were pretty confident we had a shot at getting it done,” said Jerro.

On the court, the Matadors were led last season by 5-foot-5 sophomore point guard Ednesha Curry. The team’s most valuable player both as a first-year student and as a sophomore, Curry led the Matadors in scoring last season with 18.4 points per game, good for second in the conference. Curry then lit up the competition in the Big Sky Tournament, scoring a total of 47 points in a pair of wins to earn tourney MVP honors.

“She’s probably the focal point of our team,” said Jerro, who added that it took more than just basketball skills for her team to succeed last season. “As well as they were talented, the mental toughness that they showed throughout the year probably contributed to most of our success....We just had a good group of very, very competitive and tough kids who didn’t really want to allow anything to become an excuse.”

That the Cal State-Northridge players chose Jerro as their head coach, despite her having been an assistant coach there for only one season, shouldn’t come as a surprise. A 1993 graduate of Arizona State University, Jerro wasn’t too far removed from being a teammate with her players.

“We’re comfortable around her. She’s always high-spirited and positive, showing us how to be better people as well as better basketball players,” Curry said of Jerro in a school magazine article at season’s end. “You can always go to her and feel comfortable talking to her about anything.”

Which is exactly the kind of interaction Jerro had hoped to have with her players.

“I just like the interaction with the kids,” Jerro said of coaching. “I love basketball—I love playing it, and I love teaching it.”

As a youngster, Jerro learned the game by going to the park and playing pickup games with the guys. By the time she graduated from Cathedral High School in 1988, she was a four-time all-conference basketball selection.

After high school, Jerro went on to Saint Mary’s College in Moraga, Calif. As a first-year student, she led the team and the West Coast Conference in steals with 100 en route to all-league honorable mention status. Jerro lettered in both her first and sophomore seasons, helping the Gaels to a 40-16 record during that time.

But heading into her junior year, Jerro decided to transfer to Arizona State. She went on to win two more overseas to play professionally after suffering a broken elbow in her senior season with the Devils. Jerro thought twice about leaving the country, wondering if she might cope with another setback so far away from home.

Instead, at the advice of college coach, Jerro turned to her. She headed to the University of Houston, where she worked as graduate assistant coach in the coaching job—at the junior high school. It wasn’t difficult, but it was basketball.

In 1997, she was back in the ranks after being offered th put’s job at Cal State-Northridge.

“If kids play any sport, basketball, they’ll develop characteristics that they’ll be able to use for life—leadership, teamwork, competitiveness, and all that stuff,” Jerro said.

“So I wanted to help young women in particular, to get advantage through a game that they love.”

The first official practice season was still a good two down the road, but already of the game had a hold of Je

The Matadors still had tough questions to answer into the 1999-2000 season, but those questions pertained” what was happening on th not what was swirling all them, beyond their control. Now the questions were will the team deal with the loss of the coach?” or “How Coach Jerro ever be able to young team to focus?”

Questions were “Can the team come close to matching Jerro’s brilliance?” and “Can we make it all the way back to the NCAA Division I tournament?”

They were questions Jerro the Matadors couldn’t wait to
avid L. Boren has served as president of The University of Oklahoma since 1994. Boren, 13th to lead the institution, tells The Hispanic Outlook, "The university is truly great [institution], rapidly becoming a pacesetter for public higher education." He also notes, "We must no longer keep it a secret! It's time for us to let others know about the strengths of our university and our determination to make it even better." We at The Hispanic Outlook are impressed with the University of Oklahoma and with the institution's new slogan, "OU Excellence—it's no secret." This affirmation brings OU to the honor roll and certainly we'll do our part to help get the word out.

“Diversity is one of the greatest strengths of the University of Oklahoma,” he adds, suggesting that excellence in higher education and encouraging diversity go hand in hand. The president cites some statistics to prove this point. “OU is not only first in the nation per capita in National Merit Scholars of all public universities,” he says. “The university is in the top 10 nationally among all universities for the number of National Hispanic and National Achievee Scholars. Currently, OU has 11 National Hispanic Scholars. In addition, OU has ranked either first or second in the Big 12 through the past five years in the percentage of minority student enrollment.

The growing minority enrollment figures are impressive. For 19 through 1998, the total enrollment at the University of Oklahoma remained nearly constant—20.3% students attending the university. Norman Campus in 1978 and 21.0% in 1998. Yet the overall minority enrollment at the main campus has grown nearly threefold, up from eight percent in 1978 to 22 percent in 1998. Even more noteworthy is the fact that in 1978, 1,190 Hispanics attended the university. That figure had grown to 2,919 in fall of the 1998-1999 school year—an increase of more than 500 percent. In 1998-99, there were 1,200 African American, 1,040 Asian, and 1,400 Native American students attending OU as well as 1,600 nonresident aliens.

And while these numbers have steadily risen, so too have retention rates for first-time first-year students. These are up from 76 percent in 1993-94 to 82.1 percent in 1997-98. President Boren says that “OU is committed to helping students develop skills necessary for success on all levels. One of the reasons so many of OU’s engineering students achieve academic distinction is the Minito-Engineering Program, which is considered one of the best such p

grams in the country. OU's Minority Engineering Program is home to
almost 541 Hispanic American, African American, and Native
American students pursuing degrees in engineering. The minority
student enrollment comprises over 20 percent of the undergraduate
engineering enrollment at OU. These students are supported by an
outstanding retention component that allows them to reach their
academic and social potentials.

OU offers educational programs of recognized high quality for all
types of learners, from high school students to octogenarians. The uni-
versity's nearly 27,000 students on all campuses are enrolled in 18 col-
eges located on the Norman Campus, the University of Oklahoma
Health Sciences Center in Oklahoma City, and the OU Health Sciences
Center-Tulsa Campus. Students are also enrolled in OL courses at the
University Center at Tulsa, on U.S. military bases around the world, and
through the College of Liberal Studies' innovative programs for non-
traditional students. In addition, many courses and programs are of-
erred through the Division of Continuing Education and Public
Service. OU has approximately 1,850 full-time faculty members. The
university's annual operating budget is about $972 million.

The main campus and the offices of administration of the
University of Oklahoma are located on some 3,000 acres in Norman, a
city of 80,000 residents. Norman is located near the center of the state,
20 miles south of Oklahoma City, the state capital. The Norman campus
consists of three sections-central, south, and north. Most of the acade-
mic and administrative buildings are located on the central campus.
(OCCE), a year-round educational center and conference site.

The south campus is the site of the Law Center and OU Foundation: the University Apartments; the tennis complex; the Golf Course; the L. Dale Mitchell Baseball Park, the Sam Verson Gymnasium Center; and Our Children’s World University Child Care Center.

The north campus houses the University Computing Services. It also houses Swearingen Research Park, where government and private agencies have established facilities; and the Weather Center, a complex of federal, state, private, and university meteorological agencies, including the National Severe Storms Laboratory, the National Weather Service Forecasting Office, Applied Systems Inc., the NEXRAD Operational Test Facility, and the Max Westheimer Airpark, the university-operated airport that also serves the city of Norman.

Notable off-campus facilities include the Biological Station on Lake Texoma, the Oklahoma Geophysical Observatory at Leonard, and the Aquatic Biology Fisheries Research Center in Noble.

The first of the college’s students were enrolled in 1893, and the first degree was conferred—that of pharmaceutical chemist—in 1896. When President Theodore Roosevelt issued a proclamation admitting Oklahoma as the forty-sixth state of the Union, OU automatically became the State University. Today, OU is a doctoral degree-granting research university serving the educational, cultural, and economic needs of the state and region.

President Boren suggests that OU is a great growth opportunity for all students, pointing out that “OU is one of the very few public universities to receive the Templeton Foundation Award as a ‘Character Building College’ for stressing the value of community and encouraging more informal contacts between faculty and students and to enhance opportunities for mentoring, every floor in the residence halls and all fraternities and sororities have adopted individual faculty members in our Adopt-a-Prof program. Also, OU has established a faculty-in-residence program with faculty members and their families living in apartments in the student residence halls.”

Then there is excellence on the field of athletics at this proud institution. The University of Oklahoma athletic teams have a history of championships that makes the school fertile in sports one of the most distinguished athletic programs in the nation. Throughout the years, Sooner squads have combined for 89 team national championships, 154 conference titles, one NCAA crown, 668 All-Americans, 43 Academic All-Americans, and one Academic National Championship. The NCAA honors the Top Six student-athletes each year, and twice it has named a Sooner. Tight end Keith Jackson grabbed the honors in 1988, and offensive lineman Tony Phillips earned the same award in 1989. Sooner defensive lineman Lee Roy Selmon posted some impressive performances on the playing field but none more impressive than when he was elected to the GTE/CoSIDA Academic All-America Hall of Fame in 1994. And, six times in school history, a Sooner has been named the Big Eight Athlete-of-the-Year. Lee Roy’s older brother, defensive lineman Tommie Selmon, was first to do so in 1974, and defensive back Randy Hughes followed suit in 1975. Lee Roy wasn’t about to be outdone by his big brother—and earned the honor himself in 1976. Heisman Trophy winner Billy Sims was named Big Eight Athlete-of-the-Year in 1980, and Olympic gold medal gymnast Bart Conner did the same in 1981. Basketball and baseball star Ryan Minor was the last Sooner to earn the award, when he accomplished the feat in 1995.

By the way, college sports fans would be hard pressed to find a nickname that is as unique and as tied to a school’s history as that of “Sooner.” Here’s the background. The Oklahoma territory opened with the Land Run of 1889. Settlers from across the globe, seeking free land, made their way to the prairies of the plains to stake their claim to a new life. One of the few rules to claiming a lot of land was that all participants were to start at the same time, at the blast or boom of a cannon. All settlers who started at the same time were labeled “Boomers,” and the ones who bolted too soon were called “Sooner.” OU athletic teams were called either Rough Riders or Boomers for ten years before the current Sooner nickname emerged in 1908. The university actually derived their name from a pep club called “The Sooner Rooters.” The success of the University of Oklahoma athletic teams over the years made the nickname synonymous with winning.
Playing for Keeps

Profiles of three UCLA Bruins

BY B.J. VIOLETT, ‘81
PHOTOGRAPHY BY MICHAEL TIGHE

Reprinted in part, with permission, from UCLA Magazine fall 1999.

For most of us, it seems, summer speeds by more rapidly with each passing year. But for many collegiate athletes, it is the time to take a bit of a breather—work out on their own, help in a sports camp, catch some rays at the beach. When autumn comes, however, everything for them shifts into high gear. The spotlight shines, and the time arrives to perform on the field as well as in the classroom.

For two of the three student-athletes featured in this photo essay, it also means the autumn of their Bruin careers, years removed from their days as teenaged frosh new to campus life. They'll get one last shot at a national championship, and all plan to make the most of the opportunity.

All have fulfilled one paramount dream: playing at the major college level at one of the country's finest universities.

We celebrate their journeys, derive pleasure from their play, and wish all Bruin student-athletes the very best in the coming season.

Carlos Bocanegra, Junior

Sport: Soccer, defender
Major: History

Carlos Bocanegra plays on the U.S. Under-20 National Team and started on the 1997 Bruin national championship squad as a freshman, where he was an all-Final Four selection. He has twice been named first-team all-conference, was a freshman All-American and second-team All-American as a sophomore, and had a busy summer working out with the Los Angeles Galaxy and playing in the Pan Am Games.

Best moment as a Bruin: Winning the national title over Virginia in Virginia. “That was awesome.”

Worst moment: Losing to Creighton in the playoffs last year. “I thought we were going to win it all—we had beaten Stanford and Indiana, who played in the NCAA title game.”

Ironic tidbit: “I hate running—especially to get in shape. It's I play soccer and hate to run.”

Unique playing experience: “We [Under 20 team] played a Nigeria last year for the World Championships, and the fans chanting, blowing horns, singing the whole game. I loved the energy keeps you going.”
ERICA GOMEZ, SENIOR

Sport: Basketball, point guard
Major: Sociology

Erica Gomez is the Bruins’ single-game and career-assist leader. She was Pac-10 Freshman of the Year and first-team All-American in 1996 before tearing a knee ligament the day before her sophomore season. She was National Comeback Player of the Year in 1998 and first-team All-Pac-10 in 1998 and 1999 before badly spraining an ankle in last year’s tournament. Her father, a former Puerto Rican national team player, used to make her play pick-up games against men on the playgrounds in New York. “It made me so much stronger and confident. I hated him for it then, but love him for it now.”

Strengths as a player: Passing and ball-handling.

Weaknesses: Outside shooting and unselfishness. “Defenders know I’m going to pass, and they slack off, making the passing lanes tougher.”

Life goal: “After the WNBA, I’d like to raise a family. I would love to be a mom. Regardless of what happens in basketball or with family, I want to stay in sports. It’s been so much a part of my life that I could never give it up completely.”

Why I chose UCLA: “The school is so beautiful, and the balance of academics and athletics is wonderful. But mostly it was the coaches and their personalities. I needed a coach I could vent to and relate to. I can call Kathy at 3 a.m. to talk about anything and I love that about her.”

MATT ARMATO, SENIOR

Sport: Water polo, attacker
Major: Economic Geography with Business Administration specialty

Matt Armato played on back-to-back Bruin national champion teams in 1995 and 1996. He has played polo all over the world—in E (his favorite) Cuba, Italy, France, Slovakia, Hungary, Mexico, Austria, Switzerland.

Learning experience: “When I redshirted last year, I learned much I missed not being in the pool and was able to see the game a different perspective. And to watch the team deal with frustration we’re not playing well, to remember to have fun, stick to the plan.”

Mental vs. physical: “I’d say our sport is 60 percent physical, 40 percent mental, maybe even 70-30. It’s a tough sport to play. Swin is not a normal, everyday activity like walking or running. To play level requires quite a bit of training, and you have to be in great sh"
"Stark Inequities" Persist in Some New England Schools

Ten years after a report revealed "stark inequities in minority participation in New England higher education," officials who helped write the report say progress among the 282 schools in the six-state region has been mixed.

"Some campuses are bloody awful," said John Moody, vice president of the New England Board of Higher Education (NEBHE) and director of the NEBHE Doctoral and Dissertation Scholars Program. "But in other areas, we feel we are having good success."

John Hoy, president of NEBHE, agreed with her assessment, saying that since the report, some campuses had made significant progress in addressing minorities' needs in higher education while others still lagged.

"It's a mixed picture," he said.

NEBHE is a nonprofit, congressionally authorized interstate agency whose mission is to encourage cooperation and the efficient use of resources among New England's schools.

New England's vital role in higher education cannot be denied; the schools in Maine, New Hampshire, Connecticut, Massachusetts, Rhode Island, and Vermont confer about seven percent of all bachelor's degrees granted by U.S. colleges and universities; nine percent of master's degrees; eight percent of doctorates; and seven percent of first-professional degrees in fields such as law and medicine.

In 1996, for example, New England's schools conferred a total of nearly 154,000 degrees. Hispanics earned nearly 3,900, or only 2.5 percent, of those degrees. However, New England's share of admissions and that the strong need for clarity in policy on affirmative action be nationwide.

"The nation must clarify affirmative action at this important time," Hoy said. "In the 1990s, we have seen a clear sense of commitment that we're going to win this battle of optimism." The level of optimism among campus administrators is not because of lack of clari

Hispanic enrollments grew by 46 percent in the New England region between 1990 and 1996, and the percent of degrees conferred on Hispanics during that period increased nearly 35 percent. Nearly 800,000 Latinos enrolled in New England schools in 1996, according to the latest data available. NEBHE President John C. Hoy told NEBHE's report on Latino faculty in the region.

While data on Latino enrollments and degrees conferred on campuses by colleges and universities in the hiring of Latino faculty was disturbing, the lack of progress was alarming. A small percentage of the 12-to-24-year-old population was hired into professional, first professional, and doctoral degrees between 1990 and 1996.

Moody said the anti-affirmative action policies across the country have had an impact. "They have scared off some people but made others dig deeper," Moody said.

Hoy said there is a great deal more caution in the handling of admissions and that the strong need for clarity in policy on affirmative action be nationwide.

Sixteenth Annual Status Report on Minorities in Higher Education.
Latinos comprised only 2.4 percent of all full-time faculty nationwide in 1995. Information on the percentage of Latinos in faculty positions in New England schools was unavailable, but several officials said they believed the percentage was lower than the national average.

"We applaud the schools for doing a better job of recruiting minority students, but they have to work more to retain minority faculty," said Moody. "Otherwise, we have an apartheid-like system."

Moody said that she and others in higher education know what needs to be done to improve the picture of minority faculty in higher education, but often schools don't know how to best carry out the task.

"We know what will work," said Moody. "It's no mystery. But we have done it on an ad-hoc basis. The schools have to be coached. There is good will, but they don't know how."

But numbers alone do not tell the whole story in New England. The 1989 report by NEHE called Equity and Pluralism: Full Participation of Blacks and Hispanics in New England Higher Education pointed to a number of areas that needed work to make the region's schools more inclusive. By looking at the key findings of the report, some of the writers of the report offered their assessment 10 years after its publication. Among the findings:

- A more nurturing climate on New England campuses is required for Black and Hispanic students, faculty, and staff;
- Racist behavior and attitudes on New England campuses must be acknowledged and eradicated;
- Black and Hispanic students possessing average academic abilities require special encouragement. Colleges perform a disservice to themselves and society when they aggressively compete for academic superstars and exclude students with more modest credentials who are capable of demanding academic work;
- Inadequate financial aid is a barrier for low-income students in many areas of the region and accounts in large part for the disappointing rate of participation of Blacks and Hispanics in New England undergraduate and graduate study.

- An unacceptably low number of Black and Hispanic students receive undergraduate, graduate, or professional degrees from the region's colleges and universities.

Moody, who helped write the report, said the situation for minorities has improved in New England. More minorities are attending and graduating from New England schools today than in 1989; more schools are actively recruiting minorities, and more schools are providing students with the resources needed to attend their institutions. "The climate is warming up," she said.

"The majority of the [campus] leaders are committed to the diversity effort," Joy said. "They are trying to figure out how to squeeze resources to get the job done. There is a level of equity, a celebration of pluralism that is pretty healthy on New England campuses. I am not discoursed."

But another area of weak points in the data collection of student progress and of rates of minorities. The need to do a better job of mining the retention rates minorities. Most schools conduct exit interviews to mine what students will do if they leave the institution. They will continue pursing degree and where.

"What we want our campus do to is to get to know their students. It's better," she said. "If you have a meaningful relationship with students, you will retain them."

Among the recommendations, the report made, two addressed to NEHE:

- Circulate information on the progress of the England states and their efforts in heightening Black and Hispanic participation in higher ed - as students, faculty, administrators, and staff members.
- Circulate information on successful efforts that are campuses more pluralistic.

Joy said that the report recognizes that NEHE could not provide specific data on numbers of

faculty at New England schools.

But Moody said the organization has gone beyond the recommendations in the report and will conduct a follow-up report on the region's progress next year.

Among the efforts that have been undertaken by the region are:

The NEBHE Science and Engineering Academic Support Network is a comprehensive initiative to increase the number and success of underrepresented minority students and faculty at New England colleges and universities. The program's region-wide science and engineering network and smaller statewide networks provide special mentoring, community building, and internship opportunities for 3,000 minority students at the high school through graduate levels. The program connects students with one another and with attentive, accomplished advisors and mentors, both minority and White, through a system of support networks.

The organization also developed two programs to groom future faculty as part of a grow-your-own faculty effort in the region.

A Doctoral Scholars Program in Science, Math and Engineering Departments helps those departments recruit and retain under-represented minority graduate students in their first year of doctoral study. The schools underwrite all five years of the graduate scholars' work through research stipends, loan forgiveness, and other methods. The programs pair the students with mentors and get the departments to agree to adopt several good practices including:

1) Improving the environment of support for the minority scholars by assigning them attentive faculty advisors; organizing frequent orientations to the school and department that inform them of faculty expectations, protocols, and idiosyncrasies; and involving the scholars in professional activities in their field.

2) Guaranteeing mentoring relationships between graduate faculty and scholars, not just providing them an impersonal advisor.

3) Providing supervised teaching opportunities to scholars in the middle years of their graduate studies.

4) Providing employment opportunities to hire the student as a future faculty member, but the year gives both parties an opportunity to get to know one another and determine whether the arrangement could work.

5) We want to show them that New England would be a good place to stay, but we would never make them to speak of here," Vivanco said. "We're dropping in a bucket. It's a bit isolating. But the prog one way to bring Latinos into the community that otherwise have not come here."

Vivanco said that the exp was much more than was expected. He said that since mia is so competitive, the gave him an edge when he: teaching position and the ence with his assigned me very beneficial.

"It makes a big different mentored," he said. "It open that I could not have opened.

Julia Rodriguez, an assistant professor of history and studies at the University of Virginia in Durham, said participation in the school program also made a huge d in finishing her studies.

"It made everything p she said. "It gave me the time to write."

The organization also has a NEHHE directory of a doctoral students of color in securing faculty posi

In addition to the pi NEBHE has established serves as a consultant region's schools on how to recruit, and retain minority.

"I tell the schools not recruiting minorities until a retention plan so they don't want to leave," said M Moody said that many turn to her in frustration aft an advertisement for faculty and not getting minority app.

"I teach them to this football coach," she said. "coach gets outs and mee and figures out who would be good. A football coach put an ad in the paper."

Sunshine Menezes NEBHE Doctoral Scholar, Biological Oceanography, University of Rhode Island

"The level of timidity among campus administrators is not borne out of ignorance. It is borne out of lack of clarity."

NEBHE President John Hoy

And a Humanities/Social Science Dissertation Scholars-in-Residence Program enables advanced graduate students in their dissertation year to spend a year in residence at one of seven host campuses in New England. Of the students who have participated in the program, 12 have been Latino. The schools fund the students' year, and the students dedicate their time to finishing their dissertations and getting to know their host campus. There is no obligation from either the student or the university to sign on to stay," said Moody. "We advise our students not to take jobs that are not tenure track."

Luis Vivanco, assistant professor of anthropology at the University of Vermont in Burlington, is a native of California who had enjoyed his undergraduate and graduate studies in New England enough to consider extending his stay. He decided to apply for the NEBHE scholar's program and was accepted and later hired by the university for a tenure track position.

"There isn't a Latino community..."
Teaching Strategies That Promote Equal Opportunity

Part two: Constructive controversy, the jigsaw technique, and focus groups

What specific collaborative learning strategies can faculty employ that will improve the teaching-learning process? In Part I (December 3, 1999 issue), I discussed how the creation of learning teams and the use of collaborative learning strategies in the college classroom can facilitate reduction of prejudice, a greater appreciation of diversity, the development of critical thinking skills, and enhanced learning and retention. In this article, I will offer some examples of collaborative strategies that can be used widely across the curriculum.

Johnson, Johnson, and Smith suggest the following five essential components underlying any collaborative learning strategy:

1. Interdependence: The instructor defines the task. This might be the most important piece. The instructor must create a task for which the final product makes sense only as a collaborative effort. Students need to believe that they are engaged in a collective effort and that their success is based on interdependence. Instructors can ensure interdependence by assigning roles such as summarizer, recorder, reporter, synthesizer, researcher, and accuracy coach (who makes sure everyone understands). As well as observers who oversee how well the group process is working.

2. Interaction: Students are encouraged to assist each other. This contrasts with other learning models in which student sharing of information is considered cheating.

3. Individual accountability: Instructors usually create small groups; usually, four or five students work well. Instructors can give individual assessments to each student; ask each student questions, observe the groups in action, assign roles, and ask students to teach to someone else what they have learned. Students are instructed that the group is responsible for educating all its members and that any group member might be asked to report the results of the group's efforts.

4. Development of social skills: These collaborative exercises can teach students valuable communications skills, and instructors can point out the importance of such skills throughout life.

5. Mechanisms for the group to evaluate progress and working relationships

If these criteria are met, and the group carefully designed so that the end product or benefits from a collective effort, collaborative learning strategies can work well. Coop Mueck suggests that it is possible to use cooperative learning strategies within more traditional frameworks without a big class-time commitment. They suggest some simple exercise instructions to start experimenting. These can be full-blown collaborative learning strategies; they do get students into the mode of working together cooperatively. For example, the instructor can initiate discussions after fifteen or twenty minutes and ask pairs or groups of students to reflect on the lecture material in particular ways. Students must create examples and develop their own questions related to the lecture material. Annotate the text with what you consider important and then reach a consensus concerning the answers.

Modified Focus Groups

A collaborative learning strategy that applicability across the disciplines is modified focus groups. For these groups successfully, the instructor must set up a task, e.g., a question or problem to be solved; requires a collaborative effort and benefit multiple perspectives. All students are think about the issue, perhaps to research, and to do so writing. It helps students generate ideas and to list them. The instructor can set up groups of five students randomly or by design. What of best and has the added advantage of he deets to appreciate diversity is set across gender, race, ethnicity, and age.

The instructor asks the groups to group recorder, making sure that some automatically chosen to take notes, an
The Jigsaw Technique

Another collaborative learning technique that has wide applicability across the disciplines is known as the "jigsaw" technique. King says that jigsaw exercises are designed such that each student in a group gets only part of the learning materials and must learn that one part in order to teach it to the others in the group. Each student's part is like one piece of a jigsaw puzzle, and because students must combine their pieces to solve the problem, each team member's contribution is highly valued. In fact, social psychologist Elliot Aronson and his colleagues showed that this technique was highly effective in building team spirit and reducing prejudices.

To use this technique, the instructor needs to divide the material to be learned into several parts (no more than five or six). Students are assigned to "home teams" with as many members as there are parts of the learning materials. Each home team member learns one part of the material to be learned. Students reassess into "expert groups" where they teach the other students who received the same material as they did. Within these expert groups, students read and discuss their part so that they learn it thoroughly. They then return to their home teams and teach the part they have learned to their home teammates. This way, "jigsaw" emphasizes interdependence. Each student is then tested independently, and this emphasizes individual accountability.

There are several aspects that make the jigsaw technique particularly effective. First, students are bonded with their home teams; they not only get to interact within the expert groups. Students are highly motivated to learn their parts within the expert groups because they know they will be responsible to teach their home teammates. Second, within the home teams, everyone is invested in everyone else's success since their own success depends on how well their teammates learn their parts. Finally, because of the emphasis on individual accountability and the need for everyone's contribution, there is little chance that what psychologists refer to as social loafing, that is, the slacking off or free-rider phenomenon discussed in Part 1 of this two-part series. The jigsaw technique is highly effective in producing cohesive learning teams.

Constructive Controversy

Another technique described by King is known as "constructive controversy." Students work in groups of four, and pairs of students within these groups are assigned to opposing sides of a controversial issue. Each pair researches its position, and then the pairs discuss the issue as a team. This technique is designed to help students become more informed on a topic and is not meant to encourage debate. In fact, after some discussion takes place, pairs of students switch sides of the issue; then argue the opposing side. The "constructive controversy" technique has multiple goals: get students to gather data and become more informed, give students practice in articulating a position, have students listen carefully to other perspectives, and to think critically about a topic. Each team is tested on the material individually to assess comprehension of the material.

These few collaborative learning strategies can be used in the teaching of many different content areas. Used properly, they can be effective in enhancing learning and retention, promoting critical thinking skills, facilitating appreciation of diversity in terms of other people and their perspectives, and building a team spirit of cooperation in the learning process. Eubanks found increased rates of retention and persistence on graduation, particularly for minority students, and he noted that collaborative learning strategies are most effective when students are assigned to small groups of students with diverse perspectives. Students list the following advantages of collaborative learning strategies: more subject matter, quality of peer interaction, and the ability to understand divergent points of view. In addition, students say they get a greater interest in and enjoyment of the class, an increased motivation to attend classes! This data, in particular, motivates me to explore more with these strategies in my own classes.

Gap Remains in Minority SAT Score

The College Board Launches Remedial Program

BY MARILYN GILROY

Minority students were one-third of SAT takers in the Class of 1999, up from 23 percent 10 years ago, according to a report issued by The College Board. The one-third figure includes 11 percent African American, nine percent Asian American, four percent Mexican American, three percent Hispanic/Latino, and one percent Puerto Rican. In addition, the report indicates that minority students now represent 30 percent of all AP (advanced placement) students.

College Board officials called the figures grounds for “cautious optimism” and cited the 1990s as a “decade of promise” for many American high school students. However, College Board President Gaston Caperton pointed out that “we must not be complacent about these gains. There is still much more work to do if we want all our students ready to function effectively in a knowledge-based economy.”

Caperton noted that despite these recent gains, math and verbal scores remain lower than they were 30 years ago when the Class of 1969 posted results. His report also shows that the gap in test results between Whites and most minorities is widening despite minority gains over the past decade. During this period, scores have risen for all but two racial/ethnic groups—Mexican Americans and Hispanics/Latinos. The 1999 scores indicate that those who describe themselves as Hispanic/Latino lag behind Whites by 128 points and that Mexican Americans lag behind by 146 points.

Hispanics are also trailing other groups in taking the kinds of academically rigorous courses that can raise SAT scores. For example, this year’s data show that Mexican Americans take the least number of year-long courses during four years of high school—18.1 as compared to 19.6 for Whites. These courses, which often include mathematics and science, have been correlated to higher SAT scores for students who study more difficult subjects.

Officials say that scores for Hispanics/Latinos/Mexican Americans have remained flat for several other reasons. Part of the explanation could be due to socioeconomic factors such as parental education and family income, where Hispanics continue to fall below average. In addition, there might be other attitudinal factors concerning higher education in general.

“We know some of the cultural differences are probably contributing to discrepancies scores,” said Janice Gams, of The College news office. “For example, Asian American value education for upward mobility, but N Americans do not have a sti dition. That is why we are w with minority populations to sure that we are breaking do barriers to taking the SATs.”

But Gams is cautious drawing too many conclu from the data.

“The College Board can too far into cultural differences job is to report the data. There are researchers who this data base to start probi tural differences,” she said. could do is report the numb to try to show the trends ove Then we hope that the public makers will use the informi adopt measures that will i things so the educators can the numbers and say, ‘Well what we are doing right; this is good wrong’.”

The socioeconomic di; Gams is referring to are g when students take the SAT are asked to fill out a sc descriptive questionnaire race, income level, and fa cation. There are three s categories for Hi because, as Gams says, “We know th groups consider themselves to be differ one another. It’s like Hawaiian Americ don’t want to be included in the As; it skews the scores. Of course, all change when the new census is taken n We will fall into line with their categorie.
SAT averages rose for all but two racial/ethnic groups between 1989 and 1999.

But other information garnered from the student profile section can serve a variety of purposes.

"It can be helpful to us and helpful to the student," said Gams. "For example, some students are unfamiliar with the college application and admissions process because no one in their family has gone to college. When we turn this information over to a college, it takes the burden off the student, and the college admission office contacts them and provides help."

The pool of potential college applicants who take the SATs is, to 1.2 million in 1999. More females than males took the SATs in every category of race/ethnicity; however, boys continue to outscore girls in math. The College Board attributes some of the gap in scores to the larger number of students taking the test. Many of whom would not have aspired to a college degree in earlier years. Indeed, the report cautions that "the higher the percentage of students taking the test, the lower the average scores."

The Educational Testing Service, which administers the SATs, recently announced a research initiative using the student background information and focusing on students whose SAT scores fell into the range of 1000 and 1190. The researchers are studying the effect of considering additional background information about candidates applying to college that would provide a richer context for candidate's scores. This information might include the student's family socioeconomic status, race and ethnicity, quality of the school, the student's high school GPA, and the academic rigor of the student's core curriculum. Known as the "strivers" research because it used that term to designate certain disadvantaged students, the project was greeted with criticism when it was publicized earlier this year. Despite the controversy surrounding the "strivers" project, which has now been placed on hold, ETS and College Board officials are committed to continuing a dialogue about fairness and equity in higher education.

As President Caperton states in a recent New York Times interview: "The SATs are a measure of students' readiness for college and describe what currently exists. What currently exists is a system where people of different races and backgrounds are not getting the same opportunities, and that is reflected in the SAT scores."

According to a report in the The Wall Street Journal, Congress might begin taking a closer look at the achievement gap between the races. States are already undertaking various measures to raise scores on achievement tests and might feel the pressure to raise performance of various subgroups, such as Hispanics, in order to receive more federal funds. Some members of Congress have expressed interest in holding the states accountable for improvements in the scores of subgroups, not just improvements in overall state averages.

Meanwhile, Caperton recently announced that The College Board has initiated a national learning program to work directly with students and parents to improve academic achievement in school, in college, and on the SAT.

"Our new program is just one example of how The College Board is going to put student needs—not tests—first," said Caperton. "We are going to go where the students are as well as find other ways to reach out to young people and their parents."

The College Board learning program has two major elements:

1. Opportunities for Web-based discussions among students, teachers, and experts about SAT questions and different ways to solve them; to help students identify areas in which they further work; and to share tips on how to improve overall student knowledge and confidence.

2. New materials, information kits, and outreach efforts to help students and parents understand, in lay language, what study scores mean and how to put the scores into perspective.

For Hispanics to see significant gains, every teacher must be at the forefront of his class. The college board officials such as Janice Gams explain: "Families often encounter difficulties without understanding the SAT process, whereas parents with knowledge of the SATs might have their children taking the test early or more often. If it is a problem, the public schools work with the parents to determine if the test fee should be waived but The College Board knows that it will ably require even more aggressive and concerted efforts to narrow the gap between men and between Whites and other races.

"We will do everything we can to help students and parents," said President Caperton. "We want to make sure they see the SAT as a gateway, not a gate, to the future."

Anytime...Anyplace: Distance Education
Inter American University of Puerto Rico Off to Good Start

BY SHARON CLAMPITT-DUNLAP, ED.D.

"Professor, I'm going to have to drop all my classes in the university. My father got a job in the States, and we are moving."

"Professor, I can't attend class any more. My boss changed my work hours."

"My car broke down...I don't have anyone to take care of the kids..."

These explanations are commonplace at any university campus these days. Students of all ages and backgrounds are telling us day after day that coming to campus 12-15 hours a week just isn't a viable alternative of study for them anymore. Moreover, the great number of students whose first language is Spanish, and it isn't difficult to see why Inter American University of Puerto Rico has established distance learning as one of its priorities for the new millennium.

Founded in 1982, the university is a private, not-for-profit institution located in the beautiful Caribbean. It has nine campuses, located in Aguadilla, Arecibo, Barranquitas, Bayamón, Fajardo, Guayama, Ponce, San Germán, and the San Juan metropolitan area. It also has a law school, aviation school, and optometry school. It serves a total population of approximately 42,000 students, making it one of the largest private universities in the Western Hemisphere.

Inter American is unique in that it serves an almost entirely Hispanic population and the language of instruction for the majority of the undergraduate and graduate degrees offered is Spanish. Inter American is also one of the most technologically advanced universiti-
courses through alternative methods, including distance learning.

By 1998, the university’s board of trustees had established a Distance Learning Policy, which, among other things, defined distance learning as a formal educational process in which the majority of the instruction occurs while the instructor and student are not in the same place at the same time. The university expected to achieve the following objectives:

- Strengthen the university’s mission in a global context through the use of technology.
- Develop a new focus so that the students can assume more responsibility for their learning and faculty can become better facilitating agents in this process.
- Share and maximize the academic offerings and institutional resources, transcending campus boundaries.
- Promote equal opportunity for access to information, overcoming limitations of time and space.
- Increase the student population that can benefit from Inter American University’s academic offerings.
- Facilitate the establishment of collaborative agreements and consortia with other educational institutions, on and off the Island of Puerto Rico, in order to strengthen and share academic offerings.
- Strengthen and enrich professional development and continuing education programs.
- Satisfy the special needs of disabled students.

The university’s Ponce Campus, located on the southern coast of the island, has always been a leader in the incorporation of technology in the teaching learning process. In fact, the Middle States Association, in a recent periodic review, recognized the Ponce Campus as being “well ahead of its sister campuses” in this respect. So it was no surprise that several of the professors from the Ponce Campus were the first in creating courses that could be offered at a distance. The first efforts were by Dr. Migdalia Pérez, who developed and offered Spanish Writing and Composition as a Web course, and Dr. Blanca Reyes, who put Man and His Formative Processes online. Contemporary Society and Culture (Dr. María Rodríguez), Industrial Microbiology (Prof. Lourdes Díaz), and other courses were soon to follow.

In the first semester that the Ponce Campus began to offer Distance Education courses, nine online courses were developed, and approximately 150 students registered. In the second semester, an additional six on-line courses were added, and the number of distance education students increased to close to 300.

Perhaps the most surprising results came from the creation of a videocourse version of Basic Accounting 1 by Prof. Hugo Burgos. This course, when offered in its traditional on-campus, in-a-classroom form, has a high dropout and high failure rate. The very first time the videocourse was offered, 24 students registered. The lowest grade on the midterm exam was 75 percent—and none of the students had dropped. The professor was thrilled, the students were ecstatic. Stude constantly asked, “Why hadn’t a one thought of this before?”

Curiously enough, all of the early innovators in this project, no could really be considered to be techies of the campus. In fact, all of the professors who designed the first distance learning courses were somewhat wary about using technology to any great extent. Some even used e-mail before, yet they saw the importance of this alternative teaching/learning process. In order to meet their students’ needs and they rose to the challenge.

The Ponce Campus provides excellent support team for faculty development (CID) with the help of a faculty trainer who specializes in instructional technology and design, a graphic artist, a videographer, computer technicians, faculty who concentrate on content and the quality of the learning experience, and CID helps with the technical knowledge. At the end of their first experience, without exception, all of the professors commented on enriching the experience and how the students had enjoyed it.
communication, and were more in tune with their distance education students' academic needs. WebCT was recently acquired to help facilitate course management and provide more tools for interaction between students and faculty and among students. Other similar tools are being evaluated as well.

Also, the first semester that "distance" courses were offered, all of the students were in reality not so "distant." The students who had registered in the distance education courses were also registered in on-campus courses. It wasn't until our second semester that there were true distance education students. One of the students was a young woman who was in her third year at our campus. She had the opportunity to live in Great Britain for a year but didn't wish to miss a year of study. Another student was a Puerto Rican woman who had married into the military. She found herself stationed with her husband in Germany and wanted to complete her degree, but feared that she had begun at our Metropolitan Campus. Three other students, Puerto Ricans who were living in the United States, wanted to complete their degrees. All of these students did have something in common. They were native Spanish-speakers who felt they would have to learn to complete their degree requirements in Spanish, and all of them found it impossible to do so at their current place of residence.

These true distance education students presented a challenge for the campus that not only was there an obligation to offer courses at a distance—student services such as admissions, registration, financial aid, educational resources, bookstore, and others also had to be provided for these students. Luckily, the university's information management system, BANNER (by SCT), allowed the campus to provide services such as registration online. The Ponce Campus had already set up an admissions form online, and the Department of Education was up and running with financial aid request forms online as well. As long as the required textbooks were in English, students could usually be referred to online bookstores such as Amazon.com, but books written and published in Puerto Rico were more difficult for the students to access. Professors were extremely helpful in this aspect, often sending their own desk copies to the students; however, the university is working towards bookstore services available at a distance in the near future.

Test-taking was a real challenge as well. As long as the students were all residents of Puerto Rico, they could be asked to come to campus for the tests, but obviously the young students in Germany and England couldn't do so. Should professors rely on an honor system for these students, or should arrangements be made for proctored exams? As long as there were only a few students, some professors were willing to use the honor system, but most expressed that they would like some sort of proctored exam system to be set up for these students.

Finally, other support services that the university considers vital for its on-campus students also had to be made available to the distance education students. The library, or Center for Access to Information, as it is called at Inter American University, was way ahead of the game. A virtual library and electronic reserve section were in place. The library catalog system, Unicorn (by SIRSI), was already available online so users could access electronic resources, or request interlibrary loans from any of Inter American University's campuses. The Counseling Center was among the first to set up a discussion board where students could ask questions openly or by e-mail. Soon the center will have chatrooms in order to converse "real-time" with students with the required privacy. The Religious Center (Christian-eccumenical) established an online chaplain to help distance education students with their spiritual needs as well.

Inter American University's Ponce Campus is well on its way to making the Visión a reality for the year 2012, which marks the institution's 100th anniversary. By the year 2001, the campus hopes to have at least two undergraduate degrees available entirely at a distance.

Without much of an effort to market the distance education offerings, the campus has already begun to receive a large amount of e-mail from Latin America and from Boricuas (Puerto Ricans) and Hispanics living abroad. All are eager to know more about college-level courses and services available to them in their native language from a prestigious and accredited university.

Many challenges lie ahead in order to guarantee the same quality of educational services that on-campus students receive to students at a distance. But Inter American University of Puerto Rico continues to focus on finding ways to meet the Hispanic population's need for quality higher education in Puerto Rico, abroad, anytime, and anywhere.

About the author:
Dr. Clamptit-Dunlap is the dean of technological services for academic information at American University of Puerto Rico. She has a A.S. in ESL curriculum and instruction and a certificate in distance education at the Distance Education Research Center at Texas A&M University.
PEOPLE

Arrieta and Huebner Work on Space Station Project

Dr. Jay Huebner (pictured at r), University of North Florida (UNF) professor of natural sciences, and Rudy Arrieta (l), UNF graduate, are conducting research with the help of a $21,000 grant from NASA and the Florida Space Grant Consortium.

Their project, the development of compact and lightweight membrane sensors that can detect pathogenic bacteria in wastewater, if successful, would assure that the international space station's recycling system could provide potable water. Arrieta believes there also could be many commercial applications, such as in the shellfish industry and public utilities.

Arrieta has a bachelor's degree from UNF and a master's from the University of Florida.

Galindo Performs at Long Island University-Brooklyn

Galindo performed in a dramatic adaptation of Cristina García's acclaimed novel, Dreaming in Cuban, at LIU-Brooklyn (N.Y.).

Galindo, a native New Yorker of Cuban, Puerto Rican, and Spanish heritage, has worked extensively off-Broadway, including Expecting Isabel, 1998 Kennedy Center awardee for New American Plays. Her film credits include featured roles in The Super and Row Your Boat. On television, she co-hosted the Emmy Award-winning PBS family science show Newton's Apple for two seasons and has appeared on Law and Order and Loving.

Dreaming in Cuban has been praised for its poignant depiction of women who struggle to regain a sense of personal and cultural identity in the aftermath of the Cuban Revolution.

Valdés Named 1999-2000 TACHE President

Dr. Jude Valdés was appointed president for the coming year by the Texas Association of Chicanos in Higher Education (TACHE) executive board, replacing outgoing president, Sylvia Rodriguez, who is unable to complete her term.

Valdés has been active with TACHE since its founding more than 25 years ago and was its president in 1998-99. During his tenure, the TACHE endowment was established, the TACHE archives at the UT-Austin Library were set up, and several initiatives were launched with the Mexican American Legislative Caucus and the Texas Coordinating Board regarding faculty recruitment and student admission.

Pantin a Barry Trustee

Leslie V. Pantin, Jr. (pictured), is one of four new members of the Barry University (Fla.) board of trustees.

Pantin, 51, is an active member of the Non-Group and past president of the Inter-American Business Association, the oldest Hispanic business group in Miami. He was the first Hispanic president of the Orange Bowl Committee, 1997-98, and vice president of Ameriwork since 1971.

The board approved two new degrees in electronic commerce: a Bachelor of Science in business administration with a concentration in e-commerce, and a Master of Science in e-commerce.

Armas Lectures at St. Joseph's on Cuba

Dr. Antonio Armas spoke on "Cuba: Political Transformations and Future Challenges" at a lecture presented by the St. Joseph's College (N.Y.) political affairs club, department of social sciences, and department of modern languages.

Armas is professor of history and philosophy at the University of Havana, and an professor at the Medical School Cienfiglos. His specialties are philosophy of medicine and health, bioethics, and the history of philosophy (pragmatism).

The co-author of five volumes, incl. Ecología y Sociedad, Armas is editor of "Electronic Bulletin of Philosophical and Cuban Society." He organized the National Congress of History of Medicine in Havana, and was Cuban delegate to the XVIIth Cong. Latin American Studies Association in Puebla.

Herrera-Sober Speaks at New M:

Maris Herrera-Sober shared the concerns of Chicana writers and artists through their work in "Environmental Matters: Ecological Critical Theory and Chicana Literary and Artistic Expressions," her lecture at the University of New Mexico for the third annual "Critica Nueva: Lectures on Chicana/Chicano Literary Criticisms." A professor of Chicana-Chicano studies at the Univ. California-Santa Barbara, she was the only woman selected for the series.

Herrera-Sober also presented 5 paintings by Chicana artists that reflect environmental concerns.

Scholar from Mexico at Ramapo

Imer B. Flores, Fulbright Scholar at the Universidad de las Americas, Mexico, spent the fall semester teaching Latin American studies at Ramapo College of New Jersey in the fall.
of American and International Studies. A researcher and professor at the Legal Research Institute of UNAM, Law School, National Autonomous University of Mexico, his main fields of study are jurisprudence and legal theory.

Flores taught Comparative Perspectives on Human Rights with Terrence W. Miller, director of international and multicultural studies at Ramapo. In the spring, he will teach Human Rights in Latin America, and will be responsible for the spring Ramapo Lecture Series "Culture of Peace: Global Challenges for the 21st Century.

Jose Quintero Exhibit at Houston

The University of Houston's (UH) M.D. Anderson Library is presenting "Long Day's Journey into Light: Theater Master, Jose Quintero," a major exhibit reflecting the career of the late, legendary, award-winning director and former UH theater professor. The free, public exhibit continues through Feb. 6, 2000.

Quintero produced and directed more than 50 off-Broadway and Broadway shows as well as TV and cable productions. He was singularly instrumental in revitalizing interest in Nobel Prize-winning playwright Eugene O'Neill, whose works he produced and directed over 50 years, working with actors such as Jason Robards, George C. Scott, Geraldine Page, Ingrid Bergman, Kirstie Alley, and Calista Flockhart.

Negrón Builds Bridges for LIU-Brooklyn

Laura McKae Negrón, dean of institutional advancement at Long Island University-Brooklyn (NY), develops resources and partnerships with the campus' external community, including businesses, community groups, other not-for-profit organizations, and elected officials. She also identifies grant funding opportunities and coordinates related program planning and writing teams for government, foundation, and corporate proposals.

"Laura McKae Negrón has an excellent track record as a program developer with a talent for building bridges to the Brooklyn campus' outside constituencies," said Provost Gale Stevens Haynes.

Negrón has a bachelor's degree from State University of New York-Binghamton and a master's from the Hunter College School of Social Work.

Powell Presents Scholarship to Sanchez

Gen. Colin Powell, one of City College of New York's (CCNY) most distinguished graduates (Class of 1958), presented the first Maud and Luther Powell America's Promise Scholarship—which he and his sister, Marilyn P. Berns, established this year in memory of their parents—to Beatriz Sanchez, a CCNY first-year architecture major.

"I'm the first member of my family to attend college, and the scholarship will help me fulfill my academic goals," said Sanchez, who was born in Mexico and graduated from high school in Manhattan.

At the same ceremony, Florida-based philanthropist Lois Pope presented Leaders in Furthering Education America's Promise Scholarships to KiYanda Baldwin and Krystal Pagan, both sophomores in the Sophie Davis School of Biomedical Education/City University of New York Medical School at CCNY.

Pictured (l. to r.): Baldwin, CCNY board chair Herman Badillo, Pagan, Pope, Sanchez, and Powell.

Durán President of New Tribal College

Pima Community College (Ariz.) administrator Dr. Richard E. Durán was named founding president of the Tohono O'odham Nation's new tribal college. Scheduled to open with 200 to 400 students in fall 2000, it will be the second tribal college in Arizona.

"Tohono O'odham Community College will be comprehensive, with adult basic education, developmental, occupational, and transfer courses," said Durán, who has bachelor's degree and master's from Adau State College and a doctorate from University of Northern Colorado.

There are 31 accredited tribal colleges the U.S. and several more under development.

Ortiz Takes Training to the Street

New Haven police captain Francisco Ortiz was one of 26 students learning leadership skills at the Management Training Institute, a joint effort by Yale University and the city of New Haven.

"Traditionally, policing is rudimentary in defining statutes, making arrests, investigating crime, testifying in court, following rules and procedures," said Ortiz, who is the community patrol resource coordinator, overseeing 300 officers. He said the classes help him see the department as if it were a private business organization seeking to implement motivational techniques.

Ecuadorean Tenor Visits Roosevelt University

Juan Borja, leading operatic tenor from Ecuador, taught voice students at Roosevelt University's Chicago Musical College (III.) Ecuadorean songs as part of a cultural exchange made possible through the Chicago Artists International Program.

Borja, who is involved in a fledgling movement in Ecuador to create an opera...
pasy, helped 10 selected Roosevelt students prepare for a concert of Ecuadorian music.

A graduate of the Colon Theater in Buenos Aires, Argentina, Borja, who has appeared in operas all over the world, works to increase understanding of Latin America's art song tradition. He hopes to elicit suggestions on getting a successful opera movement off the ground in Ecuador.

Cole 8th President of Montclair State

Americans hold the view that access to higher education has become a central and defining quality of American life,” Dr. Susan A. Cole said as she was inaugurated as president of Montclair State University. “It is largely public higher education that has been and continues to be called upon to meet this voracious and growing appetite among the people of this nation for access to advanced educational opportunities.”

Cole is the first woman to head the 91-year-old university, the second largest in New Jersey. She has a bachelor’s degree from Columbia University's Barnard College and a masters and doctorate from Brandeis.

Electronics Student Receives Scholarship

Two years ago, Yvette Rodriguez was a Levi Strauss employee. Today she is pursuing a career in electronics, and her skills in the field have already impressed one potential employer. Rodriguez, 28, is the first female recipient of a $2,000 scholarship from the El Paso Energy Foundation.

Last summer she interned at El Paso Natural Gas Company's Roswell Operating Complex in New Mexico. She worked alongside company employees, helping with pipeline measurement and maintenance. She was soon accepted and respected as a fellow employee.

Rodriguez is married, enjoys sports, and is currently the vice president of the Electronics Club at Eastern New Mexico University-Roswell.

Austin Peay Professor Completes Work of Villa-Lobos

Austin Peay University

A challenge of a lifetime beckoned to Dr. Stanley Yates when he was given the chance to complete the long-lost work of a celebrated composer. Yates, director of guitar studies at Austin Peay State University (Tenn.), found and finished an early guitar piece, “Valfa Concerto No. 2,” by Brazilian musician Heitor Villa-Lobos (1887-1959), a prolific and colorful composer of the 20th century.

An article authored by Yates about the discovery and completion of the piece was published in musical journals in seven countries. He plans to release a recording of the complete guitar works of Villa-Lobos next year.

Villa-Lobos, a celebrated figure of South American musical tradition, began as a street musician and achieved wide acclaim as a symphonic composer. “Absolutely every guitar piece we have of his is a masterpiece,” said Yates.

Artist Sacharny at Mott Community College

Mott Community College’s (Mich.) Fine Arts Gallery presented an installation by artist Lida Sacharny in November.

Sacharny, who intends for viewers to develop an interactive relationship with her work, describes her installation as “a circle of dirt measuring 10 feet in diameter that has at its center an electric outlet. On the dirt are extension cables. Also in the dirt, there is a plain, unplugged lamp.”

Sacharny has a licentiate in drawing and plastic arts from the Federal University of Rio de Janeiro, Brazil; a master's from the University of Texas-Las Vegas; and a master's from Michigan State University. Her work is in the collection of the Council of Latin American Studies at Yale University.

Pérez Named Regents Professor

Texas A&M University-Kingsville biology professor Dr. John Pérez was named a 1999 Regents Professor by the Board of Regents of the Texas A&M University System.

Pérez has worked for Texas A&M-Kingsville for nearly 30 years and is best known for his research with snake venom. He and his students were among the first researchers to discover that certain snakes are resistant to snake venom.

At Kingsville, Pérez has brought in $85 million in research grants. He is director of the Natural Toxins Research Initiative which seeks to provide modern research equipment and a diverse faculty to the state to foster excellence in research.

Day for Women Coming to Cal Lutheran

California Lutheran University (CLU) held the 21st annual “Creative Options: Women,” an all-day event, in March, presented by the American Association of University Women, Thousand Oaks Branch, and the CLU Women's Resource Center. Each year more than 1,000 women attend. Workshops are presented by professional women—highly respected in their fields—who donate their time and expertise.

Marcia Ann Gillespie (pictured), chief of Arts magazine and president of Media for Women, a corporation of women investors who purchased thein 1998, will be a keynote speaker.

New Post to Advise California on Diversity

A new one-year post has been created to advise the chancellor and provost of UC how to best diversify a growing campus community and how to create and sustain a welcoming environment for faculty, staff, and students.

Roberto Paes, director of the School of Medicine's educational opportunity programs sits became special assistant to the chancellor and diverse in California. Paes is the interim lead...

"I intend to do my best to help the leadership advance the campus' commitment to making progress in these very important areas in an equitable and constructive manner," said Paez.

Hispanics in Media Debated at University of Miami

Prominent experts debated the changing role of Hispanics in the media in October at the University of Miami (UM). The event, "Breaking Barriers: Hispanics in Media," featured industry representatives discussing the rapidly growing Hispanic population in South Florida and its impact on local and national media.

Participants ( pictured l. to r. ) included Juan Carlos Espinosa, assistant director for the UM Institute for Cuban and Cuban American Studies; Raul Lopez, director of sales, U.S. Hispanic and Pan Regional, <vupi.com>; Lourdes Cue, freelance writer for Generation X and The Miami Herald; Beatriz Canals, news anchor at WSVN-Channel 7; Jeanette Riveras-Lyles, reporter for El Nuevo Herald; and Gustavo G. Godoy, publisher of Vista Magazine.

Smith College Co-Sponsors "Los Ninos de los Barrios"

The Smith College School for Social Work (Mass.) in conjunction with the New York-based Puerto Rican Association of Community Affairs (PRACA), co-sponsored "Los Ninos de los Barrios," a conference examining government policy and practice as it impacts Latino children and families. This conference—one of several PRACA organized in six states and Puerto Rico—held at Western New England College of Law examined political, social, and economic factors that account for Latino children entering the welfare system, and set the stage for creating culturally responsive family interventions and alternatives to foster care.

Irene Rodriguez Martin ( pictured ), director of external affairs at the Smith School for Social Work, was on the conference planning committee member along with others from western Massachusetts.

Texans Present Trilingual Sign Language at Boston Conference

The first national assembly of trilingual sign language interpreters, "Mano en Mano," was held in Boston with major support and guidance from El Paso Community College's (Texas) National Multicultural Interpreters Project ( NMIP ). More than 100 representatives from different national educational institutions that provide services for the deaf were present to learn more about trilingual sign language, and to discuss the need for certification and the need for additional compensation for their abilities.

"I'm very excited because we were able to demonstrate that it can be done, that you can speak in Spanish and translate into American Sign Language, and that you can speak in English and have it translated into Mexican sign language," said Mary Mooney, El Paso Community College's sign language instructor and NMIP director.

El Sauce Performs at Stetson

Historic dance and costumes from the heartland of Argentina were featured at Stetson University (Fla.) as El Sauce, a dance troupe from the School of Folklore, performed authentic Argentinian dance styles ranging from the well-known and sensuous tango to dances popular in the school's town of Villaguay in the province of Entre Rios. Dr. William Nylen, chair of Stetson's Latin American Studies Program coordinated the event.

Raul Ricardo Olivera founded the troupe in 1964, at age 21, to share his passion for tango, dance, and music. The group has received many awards in Argentina, including the Fuente Prize of Dance in the Festival of San Martin 1990 and has represented Argentina in U.S., Chile, Brazil, Paraguay, and Uruguay among other venues.

MLA Report Shows Increased Foreign Language Study

MLA A report recently released by the Modern Language Association America (MLA) indicates that overall college-level enrollments in foreign language study have increased, reversing a downward trend foreign language study noted in a 1995 report.

According to the new survey, there were 1,151,283 U.S. college students studying modern foreign languages in 1998, up from 1,096,602 in 1995. MLA's 1995 study had indicated a 3.6 percent decline between 1990 and 1995.

Spanish accounts for 55 percent of total foreign language registrations in higher education. More than three times as many students are enrolled in Spanish classes as study the next most popular language, French.

Rodriguez Awards at St. Louis' Washington University

Ana Cespedes, Quetzal Torres, and La Mendola ( pictured l. to r. ) were awarded

Annika Rodriguez Scholarship for Hispanic Students by Washington University in St. Louis (Mo.) Designed to recognize Hispanic students of exceptional merit, the Annika Rodriguez Scholarship for Hispanic Students is awarded each year to outstanding first-year students. The scholarship is named in honor of an exceptional young alumna of Washington University, Annika Rodriguez, who was killed during a flash flood while volunteering for the Peace Corps in Central America.
South American Artists Showcased at Bronx Museum

The Bronx Museum of the Arts (N.Y.) presents "Amnesia," a major traveling exhibition running through Feb. 27. The show includes works of 16 contemporary artists from South America who examine the themes of memory, loss, desire, and mortality. The exhibit investigates the notion of South America as a forgotten continent within the context of dominant or traditional art historical narratives and how issues are still formed, shaped, and processed through a colonial history.

Artists include: Miguel Rio Branco, Waldecio Caldas, José Gabriel Fernández, Mónica Girón, José Antonio Hernández-Diez, Ilídio Mangano-Ovalle, Oscar Muñoz, Ernesto Neto, Roberto Obregón, Marcelo Pombo, Alfredo Ramirez, Miguel Ángel Rios (whose "Peats and Borders #5, 1995" is shown here at top), Pablo Siquier, Valeska Soares, Tunga ("P from the series Seeding Mermaids, 1999/1998," bottom), and Sergio Vega.

Florida International Hosts First ROTC/HACU Conference

The U.S. Army wants Hispanic officers.

Secretary of the Army Louis Caldera was the keynote speaker at the first meeting of Army ROTC and the Hispanic Association of Colleges and Universities, which took place at Florida International University in October.

Michael W. Thomas, public affairs officer of the U.S. Army Cadet Command, said the purpose of the conference was to identify methods to increase Army ROTC opportunities for Hispanics.

Caldera has statutory responsibility for all matters relating to the Army and is responsible for the department's annual budget of nearly $70 billion. He holds degrees from the U.S. Military Academy at West Point and Harvard University.

Victoria Students Celebrate Day of the Dead

Spanish students celebrated the Day of the Dead tradition at the Victoria Mall with a decorative display featuring an altar in memory of Don Martin de Leon, founder of The Victoria College, now in its 175th year. Students from the college's Spanish classes explained the exhibit to visitors.

In the Hispanic cultures of the Americas, as in many others, there is a sense of reverence for both life and death that is remembered and celebrated through a variety of folk customs and rituals. Many families erect home altars, where they can place the favorite food or drink of the departed.

A national holiday in Mexico, "el día de los muertos" originated before Columbus brought Catholicism to the new world in 1492.

New York Minority Business Student Group Hosts Conference

The Association of Hispanic and Black Business Students from New York University (NYU) Stier School of Business hosted a conference for MBA candidates from leading MBA programs across the U.S. The 4th annual business conference, "New Directions: Realizing Futures and Options," addressed career development of MBA candidates and professionals in the next century.

The event included informative panels on such topics as e-commerce, day trading, and entrepreneurship, and provided tools and resources to empower future business leaders.

Students from Stern organizations—including Stern Women in Business, the Latin Business Association, the Asian Business Society, and the Lesbian and Gay Business Association—took part in a student-organized leadership forum.

Colorado-Boulder Creates Diversity Scholarship

The School of Journalism and Mass Communication at the University of Colorado-Boulder established the Columbine Unity and Diversity Scholarship for minorities or other pre-journalism majors who help promote diversity through their news coverage.

Colorado-Boulder first-year students Issac Lopez and Michelle Flores, first awardees, each received $1,000. Both enrolled as pre-journalism majors after completing a journalism course in the summer 1998 under Colorado-Boulder's Pre-Collegiate Development Program.

Ray Chavez (pictured), director of the Office of Student Diversity in the journalism school and the Multi-Ethnic Media Organization, a student group, created the scholarship in reaction to the Columbine High School shootings.

Eastern Michigan Honors Illingworth-Rico

Eastern Michigan University faculty member Alfonso Illingworth-Rico was honored with a 1999 Teaching Excellence Award during the university's 1999 homecoming festivities.

"Many educators today stress the importance of having students make connections between the different disciplines. Illingworth-Rico's teaching style is certain reflection of this concept," said Alice Bu who nominated him.

An associate professor of Spanish, Illingworth-Rico stresses the interconnectedness between language, culture, literature, history, and politics. He has a bachelor's degree from Instituto Tecnológico y de Estudios Superiores de Monterrey, a master's from New Mexico State University, a doctorate from University of Arizona, and is affiliated with Sigma Delta Pi Hispanic Honorary Society.
Manhattan Community College Benefits McDonald's Employees

In a unique partnership with Steck-Vaughn Company, an education publisher, and with Austin Community College (Texas), Borough of Manhattan Community College’s (BMCC’s) Office of Adult and Continuing Education has been teaching language skills to employees of McDonald’s franchises in New York City for whom English is a second language.

BMCC president Antonio Pérez says the program is another example of how the New York college is at the forefront in taking quality educational programs out of the classroom and into the community.

Pérez is pictured here amid (l to r) McDonald’s manager Maria Alvarez-Zion, employee/student Noelia Enríquez, employees Stephanie Arnaudo and Jerby Almazan, and Acte Maldonado, BMCC dean of adult and continuing education.

DePaul Professor Studies Latino Fatigue

A groundbreaking, community-based study of Chronic Fatigue Syndrome (CFS), headed by a DePaul University (Ill.) professor of psychology, shows Latinos have the highest prevalence of the condition—726 cases per 100,000 people. The study explodes the myth that individuals with the condition are largely White, middle-class women.

Leonard Jason’s “Community-Based Study of Chronic Fatigue Syndrome,” which appeared in the Oct. 1 issue of the American Medical Association’s Archives of Internal Medicine, reports that there is greater prevalence of CFS among Latinos, African Americans, and women, and that CFS affects 1.22% of every 100,000 Americans. The rate of prevalence is twice as high as rates previously reported by the Centers for Disease Control, which means as many as 800,000 people nationwide might suffer from the condition.

Texas A&M-Kingsville ROTC Students Receive Awards

Texas A&M University-Kingsville Army ROTC cadets Regina Rios, Humberto Alvarez, and Daniel Williams received recognition awards from Communities in Schools (CIS) volunteer coordinator Jeannette Price.

The cadets were volunteer CIS tutors at a local middle school. Other volunteer cadets during the 1998-1999 school year were David Flores, Jose Jaramillo, Mario Jaramillo, Jennifer Salazar, and Rebecca Salinas.

CIS is part of a stay-in-school network composed of 150 independent agencies in 33 states throughout the country. CIS empowers students and their families through the delivery of supportive guidance and counseling, health and human services, parental and family involvement, pre-employment, enrichment, and educational enhancement.

Democracy Lectures at Florida International

Florida International University (FIU) held this year’s State of Democracy Lecture Series in October. Keynote speakers were Jesus Reyes-Heroles, Mexico’s ambassador to the U.S., and Alberto Andrade, mayor of Lima, Peru. Roundtable discussions, lectures, and workshops delved into issues associated with Peru’s and Mexico’s social and economic state.

The Summit of the Americas, established by FIU’s Latin American and Caribbean Center, was designed to overlook initiatives agreed upon during the Summit of the Americas held in Miami in 1994. The center provides independent analyses of the impact on Florida’s free trade and other dimensions of the hemispheric integration process.

New Mexico-Los Alamos Creates Sagel Scholarship

The University of New Mexico (UNM)-Los Alamos has created a memorial scholarship and lecture series in memory of the late Jim Sagel, a faculty member at UNM-Los Alamos for 12 years. Sagel taught Latin American literature, Native American literature, Chicano literature, Southwest literature, Spanish, and more. Best known for his writing, he won many international awards, including the Premio Casa de Las Americas a Concurso Internacional de la Revis award, and the Spanish El Premio Ciudad de San Sebastian award.

The Jim Sagel Endowment Scholarship helps students who plan to earn a degree in liberal arts or southwest.

“Batting Cleanup, Bill Conlin

Kevin Kerrane, ed.

Bill Conlin probably is best known for his tremendous contribution to the Philadelphia Daily News. In this collection of his best sports writing, Conlin presents athletes as all too human, but his descriptions of game action convey the magnitude of a star’s talent and the demands of the game.

The Braves Encyclopedia

by Gary Caruso

This comprehensive history begins with the team’s birth in 1871 as the Boston Red Stockings, and follows them to Milwaukee in 1953 and to Atlanta in 1966, playing under such a variety of names as Beanaters, Doves, Rustlers, Bravos, and back to the Braves. Because of the Atlanta Braves’ franchise being moved to Milwaukee in 1953, the book begins in 1871 with the team’s birth as the Boston Red Stockings. The book covers 137 seasons of the Atlanta Braves, from 1966 to 2003.

The Yankees: An Illustrated History
by George Sullivan and John Powers

This book offers the non-stop excitement of the illustrious story of the New York Yankees, captured in more than 450 photographs and entertaining anecdotes about favorite players. Year by year, from 1903 through 1996, readers will relive the celebration and disappointment of each season.

Philadelphia's Old Ballparks
by Rich Westcott

Experienced baseball writer Rich Westcott takes readers back in time to an era when Philadelphia's ballparks were as famous and as much a part of the game as the teams that took the field. This book is both a documentary and an oral history, providing colorful descriptions of all the old professional parks and the many teams that played in them.

The Ball: Mark McGwire's 70th Home Run Ball and the Marketing of the American Dream
by Daniel Paisner

On Sep. 27, 1998, 26-year-old research scientist Phil Ozersky's life was forever changed when he caught Mark McGwire's 70th home run ball. In January 1999, the ball was sold at auction for just over $5 million. This book assesses the big picture of how we work, live, and play, against the backdrop of the wheeling and dealing that surrounded Ozersky and the ball.

Race, Police, and the Making of a Political Identity: Mexican Americans and the Los Angeles Police Department, 1900-1945
by Edward J. Escobar

This study examines the history of the Los Angeles Police Department and the Chicano community from the turn of the century, when the police first became a professional organization, to the era of the Zoot Suit riots in 1943. It shows how police increasingly characterized Chicanos as a criminal element, and how Mexican Americans increasingly assumed that the police were deliberately targeting them.

Continuing Professional Education in Transition: Visions for the Professions and New Strategies for Lifelong Learning
by William H. Young, ed.

This book considers important dimensions of the current changing environment of continuing education, including cultural and ethnic diversity of professionals and the impact of technological developments on professional practice and, therefore, continuing education.

Inca Myths
by Gary Urton

Beginning with an introduction to the land and people of the Andes and a review of sources of our current knowledge of Inca mythology, this book recounts various creation myths, including a selection from ethnic groups and regions around the empire, and illuminates the nature and relationships of myth and history.

Machado de Assis: Reflections on a Brazilian Master Writer
by Richard Graham, ed.

Joaquim Maria Machado de Assis, a native of Rio de Janeiro, Brazil, is widely acknowledged by those who have read him as one of the major authors of the 19th century. Yet, because he wrote in Portuguese, those with access to his writings are relatively few. This book is designed not only to call new attention to this master but also to raise questions about the nature of literature itself and current alternative views on how it can be approached.

Pobre Raza!: Violence, Justice, and Mobilization Among México Lindo Immigrants, 1900-1936
by F. Arturo Rosales

This book examines the response of Mexican immigrants to Anglo American prejudice and violence early in the 20th century. The author traces the rise of "México Lindo" nationalism and the efforts of Mexican consuls to help poor Mexican immigrants defend themselves against abuses and flagrant civil rights violations by Anglo citizens, police, and the U.S. judicial system.

On Becoming Cuban: Identity, Nationality, and Culture
by Louis A. Pérez Jr.

This book is a sweeping cultural history of the sustained encounter between the peoples of Cuba and the United States and of the ways that this encounter helped shape Cubans' identity, nationality, and sense of modernity from the early 1890s until the revolution of 1959.

Investing in Latin America: Best Stocks, Best Funds
by Michael Molinski

Latin America is poised to be the fastest-growing region in the world over the next decade. Author Michael Molinski says that by keeping an eye on current events, small investors can gain an advantage over big institutional investors who often don't have the time to research Latin American countries. This book contains Molinski's "favorite sources" of meaningful, timely data on Latin American companies.

Operation Pedro Pan: The Untold Exodus of 14,048 Cuban Children
by Yvonne M. Conde

Between 1960 and 1962 more than 14,000 children were sent out of Cuba alone, by desperate parents who feared for their children's future under Fidel Castro. In this book, hundreds of these children relate their uplifting, poignant, and sometimes tragic experiences in American foster homes and orphanages, and their long-awaited, awkward, and delicate reunification with their parents.

Cuando Hablan Los Santos: Contemporary Santero Traditions from Northern New Mexico
by Mari Lyn C. Salvador

This lavishly illustrated book includes background information on the santero traditions of New Mexico, pictures of the artists and their work accompanied by their own comments and essays by six scholars on various aspects of the history, iconography, and marketing of these increasingly popular woodcarvings and paintings.

Many publications featured in this section are available through amazon.com.

CONFERENCES

AACU 86th Annual Meeting
January 20-22

The Association of American Colleges & Universities presents "Greater Expectations: Of Our Students, Our Stakeholders, Ourselves," its 86th annual meeting in Washington, D.C.

In addition, see Web site at <www.aacu.edu> for information on four regional (San Antonio, Philadelphia, Tacoma, and Charleston) "Network for Academic Renewal" meetings.

Writing

Pending approval and funding, the Department of English at the University of San Francisco invites applicants for a full-time tenure-track position in Writing at the Assistant Professor level. Applications are due by February 15, 2000.

The Writing Emphasis, a track of the English major, is distinct from Expository Writing and prepares students for field publishing, and other careers in writing. It consists of required courses in theories of writing and language as well as elective in creative writing.

Responsibilities: Instructor and teaching in the Writing Emphasis for English majors. Primary teaching load and also teaches in two areas: in English; and in linguistics; oral and visual; and second language acquisition. This program may be redesigned in the future, the department in particular are interested in applicants with innovative ideas for structuring a writing curriculum.

Qualifications: University teaching experience, an earned doctorate or MFA by Fall 2000 with specialization in the theories of writing, evidence of a strong commitment to teaching, publications, experience and willingness to work in a diverse environment, and an understanding of and commitment to support the mission of the University are required.

We particularly encourage mature and women applicants for all positions. The University of San Francisco is an Equal Opportunity Affirmative Action Employer and will provide reasonable accommodations to individuals with disabilities upon request.

Applicants should submit a letter of application, curriculum vitae, statements of teaching philosophy and teaching experience, and recent publications. Three letters of recommendation are required. Applications must be received by February 15, 2000. All materials should be submitted to:

Writing Search Committee
11000 Fulton Street
San Francisco, CA 94117-1080.

Established as San Francisco's first institution of higher learning in 1855, the University of San Francisco prepares students in the arts and sciences, business, education, nursing, law, and professional studies. The University is a private and Jesuit Institution and particularly welcomes candidates who will positively contribute to such an environment.
Book Review

by Mark Saad Saka, Ph.D.

The Chicano movement, 1967-1975, represented the most significant cultural, ideological, and political revolution in twentieth-century Mexican American history and in the formation of Mexican American ethnic identity. In a short span of time, Mexican American youth and university students redefined the entire notion of what it means to be Mexican American in the United States. In so doing, Chicana and Chicano alike laid the basis for an ethnic renaissance that has forever changed the American political and cultural landscape. Central to this wave of political radicalism was the notion of “inclusion,” the integration of Mexican Americans into the broader American political and social mainstream. David Montejano has compiled ten important specially commissioned essays to address and assess Mexican American political identities, policies, and tactical alliances in the “post-Chicano” era, 1975-2000. In the process, Montejano has laid bare the challenges and social complexities that modern Mexican Americans face at the advent of the twenty-first century.

Montejano groups the essays into three categories—community, institutional, and general studies—as well as providing a comprehensive introduction and conclusion to successfully synthesize the ten articles. Space constraints restrict a review of every essay, so I have chosen to review the three articles that my summer school students enjoyed the most. The students in my Mexican American history seminar responded favorably to the book, and I received no negative comments in our group discussions.

Mary Pardo’s essay is entitled “Gendered Citizenship: Mexican American Women and Grassroots Activism in East Los Angeles, 1986-1992.” This essay was many of my students’ choice for favorite, particularly among the Chicana and Anglo women. The central theme of the essay revolves around the grassroots activism of working-class Chicanas who mobilized community support to prevent the state of California from “dumping” a state prison in East Los Angeles. Calling themselves the “Mothers of East Los Angeles” and donning white mantillas (traditional head scarves), these working-class, active Catholic, middle-aged mothers formed tactical alliances with community groups and the Catholic Church and generated tremendous media coverage not only to protest the proposed prison in East Los Angeles but later to oppose a toxic waste incinerator, a chemical waste treatment plant, and an oil pipeline from being “dumped” on their “community of color.” The activist role that these mothers played dispels many myths of the “traditional, docile, conservative-religious” stereotypes that many non-Hispanics hold of Mexican women. In fact, most of these mothers found deep consolation and motivation in their religious faith, community support, and ethnic identity. Pardo’s essay demonstrates how gendered identity, ethnic solidarity, and community mobilization can impact the political process.

In “Protest and Affirmative Action in the 1980s,” Philip Gonzales examines a major conflict that emerged at the University of New Mexico. This essay covers the controversy that developed between the board of regents for the University of New Mexico, the newly appointed president, Tom F. and the Mexican American governor, Tony Anaya. Two Chicano members of the board of regents objected to and became “ethnically hostile” to F’s presidency on the grounds that Fifer failed to promote an aggressive affirmative action hiring policy in cabinet appointments. Although Fifer did promote minority recruitment in his hiring of two Chicano vice presidents for an Hispanic research position, the resignation of Dr. Francisco A. Jaramillo in 1986 may have ended the hiring policy of Chicano history professors.

Dr. Saka, a fullbright scholar, completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, Dr. Saka has taught in the History Department at New Mexico State University, Albuquerque, New Mexico, since 1995.
THE NATIONAL ACADEMIES
Advisors to the Nation on Science, Engineering, and Medicine

NATIONAL RESEARCH COUNCIL
Postdoctoral and Senior Research Awards
opportunities for research in:
Chemistry • Physics • Life & Medical Sciences
Space & Planetary Sciences • Earth & Atmospheric Sciences
Engineering, Mathematics & Applied Sciences
Also teaching/research opportunities at the US Military Academy in
Mathematics, Physics & Mechanical Engineering

• 350 awards for independent research at over 120 laboratories
representing nearly all US Government agencies with research facilities
• 12-month awards renewable for up to 3 years maximum
• Annual stipend for recent PhD or MD graduates $30,000 to $52,000 depending
upon sponsoring laboratory; stipend appropriately higher for senior researchers
• Support for relocation and professional travel; health insurance program offered
• 3 annual award competitions for most participating laboratories

Applications are accepted on a continuous basis throughout the year.
Postmark deadlines are January 15, April 15 and August 15 for reviews
in February, June and October respectively.
Further information and application materials may be obtained from our
web site at http://national-academies.org/rsp or by contacting:

Qualified applicants will be reviewed without regard to race, creed, color, age, sex or national origin.

UNIVERSITY OF MISSOURI-ROLLA
invites applications for two tenure-track faculty positions
specializing in MICROELECTROMECHANICAL SYSTEMS (MEMS).
One faculty position will be in the
Department of Electrical and Computer Engineering
(R5293) and one in the Department of Mechanical Engineering
(R53150).
The appointment, beginning Fall 2000, is
anticipated to be at the assistant professor level.
Applications from well-qualified candidates at all levels will be considered.
Further information about the campus and departments can be
found at www.umr.edu/umrjobs/mems.html.

Qualifications include an earned doctorate degree in
Electrical Engineering / Computer Engineering / Mechanical Engineering / Aerospace Engineering / Engineering Mechanics,
and strong commitment to teaching and research. The successful candidates will be expected to teach courses in MEMS and related areas, advise students in a build-funded research program. The application deadline is

Please submit a curriculum vitae and a list of three references
including Human Resources Services, Reference Number R5295
or R53150, University of Missouri-Rolla, R202 No. 2

Making a Difference
MINORITY POSTDOCTORAL FELLOWSHIP PROGRAM

Teachers College, Columbia University is the largest and most comprehensive graduate and professional school of education in the United States. The College has a diverse culture, with minority students constituting 29 percent of the student body, international students constituting 11 percent.

The Program aims to increase the number of minority faculty members at graduate schools of education. It provides recent doctorate recipients the opportunity to develop a program of research, teach one course and participate in the life of a graduate research university.

Qualifications: Earned doctorate in any area within the past three years. Commitment to research and teaching in an education related field.

Responsibilities: Conduct research as outlined in the application proposal, provide written report of research program; participate in an academic department; teach one course.

Duration: One Year

Stipend: $30,000, plus $3,000 for research. Free campus housing, if desired, and limited relocation costs.

For the application procedure, call 212/678-3050, or write to the Office of the Dean, Teachers College, Columbia University, 525 W. 120th St., New York, NY 10027. Application deadline: February 1, 2000.

The Search Committee will continue to seek nominations and expressions of interest of interest until candidates are reported to the President. Review of application files will begin in late January; candidates accepted prior to that date will be assured of receiving full consideration.

Shelly Weiss Storbeck, Managing Director and Lesley Boyd, Consultant Education Practice A.T. Kearney Inc. 333 John Carlyle Street Alexandria VA 22314 703/739-4627 fax 703/739-1782 email: lesley.boyd@atkearney.com

The University of Hartford invites nominations and expressions of interest for the position of Provost.

The Provost reports directly to President V. Harrison and is the chief academic officer of University. The provost will provide academic and financial leadership and vision to nine schools and colleges as the University defines strategic direction.

The University of Hartford is an independent, non-sectarian institution founded in 1877. Just minutes from the State Capitol in Hartford, the University is situated on two campuses: a 230-acre wooded campus located in Hartford, and a 13-acre camp in Bloomfield. It includes nine schools offering some 70 undergraduate majors; 5 graduate programs in liberal arts and social sciences, engineering, technology, business, education, and allied health professions, and music. University also offers doctoral programs in music, educational leadership, and music. Its 6,682 plus 4165 (61%) of whom are full-time undergraduate from 40 states and 70 countries.

Preferred Qualifications:

- Earned doctorate and record of teaching, and scholarship achievement consistent with the rank of full professor.
- Experience in academic administration at an academic level in a complex educational institution.
- Demonstrated skill in complex budgeting and financial management, and a demonstrated understanding of the academic/student life relationship.
- Successful experience in managing academic and financial responsibilities.
- Demonstrated commitment to a diverse faculty and student body.

University of Hartford

PROVOST
QUALIFICATIONS: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, and an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to supporting the mission of the University. The candidates will be expected to develop an independent and ongoing research program.

Applications must be received by January 7, 2000, in order to ensure full consideration.

The University of San Francisco is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively contribute to such an environment. USF is an Equal Opportunity/Affirmative Action Employer and will provide reasonable accommodations to individuals with disabilities upon request.
Southern Connecticut State University

VICE PRESIDENT
FOR ACADEMIC AFFAIRS

Southern Connecticut State University invites nominations and applications for the position of Vice President for Academic Affairs. The VPAA is the chief academic officer of the University and reports directly to the President. The VPAA will manage the academic programs and faculty of the University to assure the quality and appropriateness of education for the University's students. The VPAA directs the work of the entire teaching faculty of the University through the deans of the various schools and chairpersons of the department of schools and other academic departments as well as related administrative offices, including academic affairs, information technology, library services, research, and planning. The VPAA's responsibilities also include strategic planning, administrative, and instructional faculty union relations, and administration of the academic budget.

Southern Connecticut State University, founded in 1893, is a fully accredited institution of higher education authorized by the Connecticut State Board of Regents for Higher Education. The University has offered courses and programs leading to bachelor's and master's degrees in various fields of study. Southern also offers a two-year associate's degree in several areas of study.

The University seeks highly qualified and experienced candidates who have demonstrated leadership and personal integrity and who will possess the following qualifications:

- Strong academic record: Hold an earned doctorate from a regionally accredited institution; have a distinguished record of scholarly activity that will earn the respect of the academic community.
- Administrative and faculty experience: Have a significant record of accomplishment and commitment to excellence in teaching, research, service, and shared governance as a faculty member and administrative leader beyond the department level, preferably at the level of dean or higher; have experience in designing and evaluating outcome-based academic programs.
- Management experience: Have successful experience with academic budgeting, personnel management, strategic planning, and continuous improvement.
- Communication and collaboration: Have demonstrated ability to communicate effectively and work collaboratively with faculty, staff, and the university's many constituencies; have a working knowledge of collective bargaining.
- Commitment to diversity: Have demonstrated commitment to diversity and equal opportunity for students, faculty, and staff.
- Strong leadership skills: Have demonstrated proven experience in decision-making and strong implementation skills, have demonstrated ability to provide innovation and dynamic leadership in promoting both the academic and institutional missions and goals.

Letters of nomination and applications from interested candidates are requested. Nominations should be received by January 15, 2004. Applicants should submit a letter of application, a detailed resume, and the names, addresses, and telephone numbers of five references. Review of candidates will begin in December 2003. The anticipated starting date is July 1, 2004.

Dr. Sandra C. Holley
Dean, School of Graduate Studies

The Master's College (TMC) is seeking to hire full-time faculty members to begin employment August 2000 in the following areas: (1) B Studied, specifically Bible exposition and theology; Biblical Counseling; (3) Computer & Information Sciences; (4) Home Economics; (5) Statistician Mathematics; (6) Music: specifically orchestra, advanced theory, piano and/or vocal instruction; (7) Phi Education and Health Training; and, (8) T Education, specifically secondary education and technology within education. TMC is a non-denominational, Christian liberal arts college that offers 50 programs of study and serves approximately 1,000 students. TMC holds to a conservative, non-charismatic, premillennial doctrinal position. Faculty are responsible for teaching up to seven semester credit hours per semester and must maintain good classroom teaching style. They should also have a strong commitment to the College's mission and vision. Applicants must be committed to the College's doctrinal position and philosophy. Applicants should submit a resume, three references, a brief statement of teaching philosophy, and a statement of faith to The Master's College, VP for Academic Affairs, P.O. Box 3313, Santa Clarita, CA 91392.
DEAN OF UNIVERSITY LIBRARIES

Illinois State University is seeking a forward-thinking and experienced administrator to provide leadership for its library and information services. Illinois State University, founded in 1857 as the first public institution of higher learning in Illinois, is a multi-purpose University with over 20,000 students and approximately 800 full-time faculty. Academic programs and courses are offered in thirty-five departments organized into six colleges with master's degree programs in most fields and doctoral degree programs in biological sciences, school psychology, curriculum and instruction, educational administration and foundations, special education, English, and mathematics education. The University is located in Bloomington-Normal, a community of 100,000 people situated halfway between Chicago and St. Louis. In support of Illinois State University's primary mission as the premier undergraduate institution in Illinois, Milner Library is the central library facility for the University community, with a staff of 110, including thirty-five faculty, over 1.4 million volumes, and an annual budget of nearly $6.5 million. The Library offers a broad spectrum of campus library information services, and participates in several statewide consortial programs including a 45-library union catalog.

The Dean of University Libraries reports directly to the University's chief academic officer, the Vice President and Provost, and serves on the Provost's Advisory Council, and other appropriate academic and administrative councils. The Dean of University Libraries has administrative responsibility for library-wide planning and policy direction, for centralized library services such as budget, personnel, systems development and information services, and for fund-raising initiatives. The Dean of University Libraries plays a university-wide leadership role in the development and implementation of information technologies, and represents Milner Library within the University and throughout the larger library and higher education communities.

An ALA accredited Master's in Library Science and a second advanced degree are required with a Doctorate preferred. The candidate should possess a minimum of five years of progressively responsible administrative experience in a medium to large academic library, and a strong record of professional participation and scholarship. Candidates are required to demonstrate a clear understanding of the evolving role of the academic research library, and provide evidence of strong and innovative leadership skills in a shared decision-making environment. Candidates must have excellent communication skills and be able to establish and maintain effective relationships with University administrators, faculty, staff, students, and the extended community. Salary is competitive and commensurate with qualifications. Rank will be associate or full professor, and academic tenure upon appointment is possible. Preferred start date is July 1, 2000. To assure full consideration, send a curriculum vitae, a letter of application outlining appropriate experiences, and the names, addresses and telephone numbers of at least three references by January 31, 2000 to:

Dean of University Libraries Search Committee
Office of the Provost
Campus Box 4000
Illinois State University
Normal, IL 61790-4000

DEAN
Derner Institute of Advanced Psychological Studies

The Gordon F. Derner Institute of Advanced Psychological Studies at Adelphi University is seeking a new dean. The Derner Institute consists of an internationally recognized, psychodynamically oriented, APA accredited Ph.D. program in Clinical Psychology (established in 1957), and post-doctoral training programs in psychoanalysis and psychotherapy. In a recent university reorganization, the institute was expanded to include both undergraduate and Master's programs. Interested applicants should have a strong record of scholarly activity and publication, demonstrated success in obtaining research funding, and substantial university administrative experience. The new dean will have the opportunity to shape psychology at Adelphi University, with probable authorization for several new hires. Prospective candidates should be experienced in administering a full range of academic programs. Inquiries, referrals and vitae should be sent with a cover letter to:

David A. Haley or Amy E. Tapia, Issacson, Miller, 334 Boylston Street, Suite 500, Boston, Massachusetts 02116-3805. Telephone: 617-262-6500, x171 or x122. Fax: 617-262-6509.
E-mail: dhaley@imsearch.com or atapia@imsearch.com

With a copy to:
Dr. Gayle D. Insler, Chair, Search Committee, Adelphi University, South Avenue, Garden City, New York 11530.

ECONOMICS
(TWO YEAR VISITING POSITIONS)

The Department of Economics invites applications for two, two-year visiting positions at the assistant or associate level (CO-Applied Econometrics, EO-Macroeconomics, FP-International Economics, HO-Public Finance, LO-Industrial Organization). Applicants at the Assistant level should hold a Ph.D. in hand by the starting date of September 1, 2000. Applicants at the Associate level should have excellent records for both teaching and scholarly research. A successful candidate is expected to offer courses and to undertake research in one of the areas listed above.

Union College has a strong commitment to scholarly research and excellence in undergraduate teaching. All majors in the department are required to complete a two-term senior thesis. Union offers an attractive teaching load and a highly competitive salary and benefits package, in a department of 11 faculty. Additional information about Union can be found at www.union.edu.

To apply, please submit a letter of application, a current vita, a writing sample, summaries of teaching evaluations or other evidence of teaching ability, and three letters of recommendation. Review of application materials will commence on December 20 and only finalists will be notified. Be sure to indicate how we can contact you during the last two weeks in December. We will interview at the AAS meetings in Boston. Respond to:

Professor Suthathip Yaiswarung
Chair, Department of Economics
Union College
807 Union Street
Schenectady, NY 12308

Union College is committed to a program of affirmative action and equal employment opportunity. Women and minorities are strongly encouraged to apply.

Stanford University
President

Stanford University Board of Trustees invites applications and nominations for the position of President. Founded in 1891, Stanford is a private university with a sustained record of excellence in many fields. The University is committed to innovative teaching and research and to maintaining a diverse, inclusive academic community.

The new President will be selected by the University’s Board of Trustees on the basis of recommendation from a committee composed of representatives of the trustees, faculty, student body, alumni and staff. We expect the appointment to begin in the academic year 2000-01.

Please send a letter of application and/or nomination by January 14, 2000 to: Donna Lawrence, Executive Vice Chair, Stanford Presidential Search Committee, P.O. Box 60190, Palo Alto, CA 94309-0190. Stanford is an equal opportunity employer through affirmative action.
UNIVERSITY OF REDLANDS

ADMISSIONS DEAN

The University of Redlands invites applications and nominations for the position of ANWC Admissions Dean. Responsible for the management of the enrollment of Alfred North Whitehead College students with a focus on business programs. Identifying enrollment goals, integrating the efforts of five regional centers in their recruiting activities, and managing the admissions function. Master's degree in business with a good grounding in marketing, organizational behavior, and finance, plus a minimum of five years of hands-on marketing experience at a mid-level position.

Applicants should send letter of interest, resume, salary history, salary requirement, name, address, telephone number, and five professional references to: University of Redlands, Human Resources, 20, Box 3080, Redlands, CA 92373-0999. (909) 359-5119. Fax (909) 359-5154.

Located in an ethnically and culturally diverse region midway between Los Angeles and Palm Springs, the University of Redlands is a private, selective, liberal arts university. Approximately 3,700 undergraduate and 700 graduate students are enrolled in the residential College of Arts and Sciences and the Alfred North Whitehead College. The college enrolls approximately 2200 adult learners pursuing undergraduate and graduate degrees.

University of Redlands is an Equal Opportunity Employer and actively encourages applications from women and members of under-represented populations.

CHRISTOPHER NEWPORT UNIVERSITY

PROVOST

Christopher Newport University (CNU) announces the search for a provost. Located on a beautiful 125-acre campus on the Virginia Peninsula, CNU is a comprehensive state university with 5,000 students in four baccalaureate, five master's programs in the College of Business, Science and Technology, and the College of Liberal Arts. Faculty members are dedicated to teaching and the entire University community is committed to student success.

President Paul Trible, in the past three years, has focused the University's activities, energized faculty, staff, and students, and encouraged a spirit that is vibrant and creative. Freshman applications have increased by 120%, and the average SAT score has increased by 50 point scale, and the quality of the faculty generation has been greatly enhanced. The U.S. News & World Report has documented CNU's move to the top echelon of public liberal arts colleges and universities. In June, a 540,000 renovation completed.

The provost will work in partnership with the president in shaping a top liberal arts college, building a superior academic program, and enhancing the entire collegiate experience for students. CNU candidates who possess:

- Demonstrated ability to build on the strengths of the academic program to create a truly superior liberal arts, undergraduate educational experience where great teaching is the first priority;
- Energy, passion, creativity, and enthusiasm for the distinctive and mission of the University;
- Academic credentials and experience that will enhance the standing and reputation of the University;
- Ability to work constructively and collaboratively with all constituents.

Compensation for this position is highly competitive. The position is a 7.5 position available on the web at http://www.cnu.edu/search/.

Dr. Jean Dowdall, vice president, and her associate, Elizabeth Mosley, Kearney Executive Search, are assisting the Search Committee. Applications and nominations are invited and will be treated confidentially. Candidates should submit a letter describing their interest and qualifications for the position, a curriculum vitae, and a statement of academic and professional goals. The committee expects to interview candidates by April 20. Additional information about Christopher Newport University is available at its website: http://www.cnu.edu/.

Christopher Newport University does not discriminate in admissions employment or any other activity, on the basis of race, color, religion, sex, gender identity, sexual orientation, age, national origin, disability, or political affiliation. This University complies with all applicable state and federal constitutional provisions, laws, and regulations concerning discrimination. Anyone having questions concerning these laws in contact the Office of Equal Opportunity/Affirmative Action Officer.
SCHOOL OF BUSINESS

FACULTY POSITIONS FOR FALL 2000

The School of Business at Southern Connecticut State University invites applications for several faculty positions and a position as Director of the MBA Program for appointment in the Fall 2000 semester. This pool of vacancies represents a significant opportunity for the University to enhance curricular vitality and refresh faculty perspectives.

Each position listed is a tenure track appointment. Appointments will be made at the rank of Professor, Associate or Assistant Professor depending on the qualifications and experience of the successful applicant. Search committees will begin examination of applications on January 1, 2000; searches will continue until the positions are filled.

Southern Connecticut State University is a comprehensive metropolitan public university located in historic New Haven. Enrolling some 12,600 students, SCSU offers 40 undergraduate programs and 40 graduate programs at the masters and sixth year professional level. The School of Business contains the department of Accounting, Economics and Finance, Management, Marketing, and an MBA Program. The School awards approximately 200 baccalaureate and master's degrees annually.

SCSU is an equal opportunity, affirmative action employer. The University wishes to ensure the diversity of its instructional staff. SCSU actively encourages women and members of minority groups to apply.

Quinsigmond Community College

Associate Deans

Quinsigmond Community College is a part of the public system of higher education in the Commonwealth of Massachusetts. Founded in 1983, QCC has continued to grow in student numbers, additional programming, and in its outreach and partnerships with the various communities it serves.

As the College grows up to meet an aggressive agenda of change for its 7,500 full and part-time students, we are recruiting a team of energetic men and women who are passionate about teaching and learning, innovative and expansive in their thinking, and eager to assume the challenge of moving the College's ambitious agenda forward.

Nominations and applications for Instructional Deans in the following divisions are being accepted:

- Associate Dean of Technology
- Associate Dean of Business and Human Services
- Associate Dean of Continuing Education

The Associate Deans of Technology and Business/Human Services will be responsible for the overall leadership and management of programs within their academic disciplines. The Associate Dean of Continuing Education will have similar responsibilities and will utilize an entrepreneurial approach for the blending of non-credit to credit programming. The Associate Deans will be innovative thinkers who can create and deliver on opportunities.

Minimum qualifications for these positions include a Master's Degree in an appropriate discipline. Please forward cover letter, resume, vitae, and supporting materials to:

William Darin
Director of Human Resources
Quinsigmond Community College
678 West Swifton Street
Worcester, MA 01606
Attn: Job Code: H05E

Credential review will begin on January 10, 2000. Application period will remain open until positions are filled. Salary is competitive and will be commensurate with experience. For complete job description(s) and listings of preferred qualifications, please visit our website www.qcc.mass.edu. Application materials can be E-mailed to crosseye@qcc.mass.edu. We can also be reached by telephone at (508) 854-4259 or Fax at (508) 854-4239.

QCC is an equal opportunity employer where diversity is everybody's business.

PRESIDENT

TEXAS TECH UNIVERSITY

The Presidential Search Committee and the Chancellor of the Texas Tech University System seek nominations and applications for the position of President of Texas Tech University. Texas Tech, founded in 1923, is one of the leading universities in Texas and is part of the Texas Tech University System. The other sister institution is the Texas Tech University Health Sciences Center (including schools of medicine, nursing, pharmacy and allied health) with campuses in Lubbock, Midland/Odessa, El Paso and Amarillo. Texas Tech University is located in Lubbock, Texas, in a community of about 200,000 people on the South Plains of Texas.

The Texas Tech campus in Lubbock (1,839 acres in size) has a student population of over 55,000 - including over 20,000 undergraduates and 4,000 graduate students. The University is comprised of 10 colleges and includes agricultural sciences and natural resources, architecture, arts and sciences, business administration, education, engineering, humanities, sciences, and law, as well as the graduate school and honors college.

Texas Tech University offers 119 undergraduate and 99 master's and 50 doctoral degrees. Texas Tech is a Research I institution under the Carnegie Foundation classifications in effect for 1999. Texas Tech's library system is a member of the Association of Research Libraries.

The President exercises broad authority and responsibility for all aspects of University administration. The President is the Chancellor of the Texas Tech University System and the Texas Tech University System Board of Regents.

Review of applications will begin immediately and will continue until an appointment is made. Texas Tech treats inquiries, nominations, and applications for this position and others in a confidential manner. Applicants should confide in their letters that they wish their applications to be kept confidential. Nominations and applications should be sent to:

Dr. Nancy E. Jones
Chairman, Presidential Search Committee
Texas Tech University
P.O. Box 42013
Lubbock, Texas 79490-2013
(806) 742-0012
www.texastech.edu

Texas Tech University is an Equal Opportunity Employer and encourages nominations and applications from minorities and female applicants.
West Chester University of Pennsylvania is offering summer teaching opportunities to graduate students entering the final year of terminal degree programs and preparing to be college teachers, for the purpose of attracting graduate students from historically underrepresented and undeserved populations. Students selected will teach one course during a five-week term June 26-July 28.

This program is designed to give these graduate students teaching experience and to explore employment opportunities with this university, which is committed to cultural diversity. This is in keeping with the spirit of Douglass’ life of public service and the University’s mission to be a source of encouragement to the African American, Native American, Hispanic American, and Asian American communities.

Minimum requirements are: masters degree completed or equivalent and currently enrolled in a terminal degree program; academic background in one of the fields taught at West Chester University; and at least three favorable letters of recommendation from faculty or professionals in the student’s field, including the student’s advisor. Preferred: experience teaching or as teaching assistant. Current compensation will be as adjunct faculty, $2574 (subject to change and taxation). Scholars are expected to live in on-campus housing in an apartment that will be provided at no charge and to participate in campus activities. Priority consideration will be given to applications received by January 15, 2000.

For information/application, contact: Associate Provost Office, c/o Marion Hyder, 143 Bull Center, West Chester University, West Chester, PA 19383, Phone (610) 436-3557, mhyder@wcupa.edu, or visit our web site at www.wcupa.edu.

West Chester University of Pennsylvania, a member of the Pennsylvania State System of Higher Education, is continuing to build a culturally diverse, broadly trained faculty and administration capable of fostering an inclusive environment, which we feel, is necessary to help prepare our students for the 21st Century. West Chester, located 25 miles west of Philadelphia, is convenient to major cultural and commercial institutions, recreational activities, and is within driving distance of Wilmington, DE, NYC, and Washington, DC. The university is an equal opportunity, affirmative action employer encouraging diversity.

www.usma.edu

Affirmative Action Officer

New Jersey City University in its nominations and applications for Affirmative Action Officer. The successful candidate will report direct to the President and will serve as an effective part of the campus leadership, in establishing an environment in which all students and employees can flourish, have opportunities to reach their full potential, and contribute at the highest level. The individual will develop, coordinate and implement programs and policies, designed to advance the University mission to equality and equal opportunity for all persons.

New Jersey City University is a culturally diverse public urban institution located in the greater New Jersey metropolitan area and one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to approximately 10,000 students. The University has an extensive Cooperative Education program, as well as an expanding continuing education program.

Position responsibilities include, but are not limited to, developing and implementing an affirmative action plan, including training and monitoring complaints of discrimination, and implementing training programs addressing various aspects of E.O./employment opportunities and affirmative action policies, monitoring all activities for compliance, and serving as a liaison with federal and state offices regarding compliance reviews and complaints of discrimination.

Qualifications: A Master's degree is required as well as a demonstrated record of accomplishments in higher education or extensive work experience including significant administrative experience, employment opportunities or affirmative action plan development, and interpersonal communication skills. The ability to develop and implement effective diversity and leadership skills are also required.

Salary: The salary range is $30,144-$54,210 and will be competitive with experience.

Applicants should send a letter of application, resume, three references, transcripts, and telephone number to:

Joyce A. Ford, Chair

ASSISTANT OR ASSOCIATE PROFESSOR

COLLEGE OF EDUCATION

DEPARTMENT OF EDUCATIONAL LEADERSHIP AND COUNSELING PSYCHOLOGY

Washington State University
Vancouver

TITLE: Assistant or Associate Professor

SALARY: Competitive, commensurate with experience

POSITION: Tenure- or non-tenure-track

EFFECTIVE DATE: August 2000

POSITION

The Department of Educational Leadership and Counseling Psychology is seeking
qualified applications for a permanent tenure-track faculty position in Educational
Leadership at the Vancouver, Washington campus.

WSU VANCOUVER

The WSU Vancouver campus is located in southwest Washington state just across
the Columbia River from Portland, Oregon. A growing research campus of the Washington
state university system, WSU Vancouver expects to double its student body (currently
1,400 students) and faculty in the next six years.

DUTIES AND RESPONSIBILITIES

The Department of Educational Leadership and Counseling Psychology is seeking a
faculty member who can comfortably collaborate with colleagues across the College of
Education, with professional colleagues from school districts and professional associations,
and with community members. In addition, the person must be prepared to teach
graduate courses in educational leadership and related areas (see preferred areas below),
conduct research, write proposals for extramural funding, publish in areas of specialization,
advise and direct graduate student studies at the masters and doctoral level, develop
collaborative relationships with school districts, professional associations, and government
agencies, and supervise administrative interns in the State of Washington.

REQUIRED QUALIFICATIONS

Earned doctorate at time of employment in Educational Leadership or related field.

DESIRED QUALIFICATIONS: Evidence of teaching effectiveness, post-secondary
experience, evidence of successful professional experience in the field of educational leadership,
related work, school administrative experience, specialized knowledge and competencies; at
least one of the following: educational leadership, policy formation, educational
administration, educational research, or measurement and assessment of learning,
evidence of scholarly productivity, and evidence of experience within diverse educational
settings or of scholarship that addresses diversity in education.

APPLICATION AND SCREENING PROCEDURES

Screening of applications will begin February 1, 2000 and continue until the position is
filled. Interested applicants and applicants are encouraged. Persons wishing to apply for
this position should send a letter of application demonstrating the qualifications external
or current letter of recommendation (within one week, two samples of scholarly
work, letters of reference, and a current comprehensive vita including the names,
addresses, and phone numbers of at least three additional references.

NOMINATIONS AND APPLICATIONS SHOULD BE SENT TO:

Dr. Cap Peck, Chair
Educational Leadership Search Committee
Washington State University
1240 E. 10th St., Vancouver WA 98686
Phone: (360) 546-9063

For details regarding this position, contact Dr. Peck at (360) 546-9063.

THE COLLEGE OF NEW JERSEY

WOMEN'S AND GENDER STUDIES PROGRAM

ASSISTANT PROFESSOR POSITIONS

Applications are currently being accepted for two tenure track Assistant Professor positions
in the Women's and Gender Studies Program beginning September 2000. Requirements:
Ph.D., doctorate in Women's Studies, Politics of Sexuality, Gender Studies, Feminism,
Feminist Theories. The College has a general graduate requirement in gender studies. The program offers
a minor and is planning a major in Women's and Gender Studies. For more information about the program, consult our
web site: http://www.tcnj.edu/~wgst

Deadline for applications is January 15, 2000. Please send a
application, c.v., statement on teaching philosophy and 3 letters to:
Search Committee, Women's and Gender Studies Program
College of New Jersey, 1240 E. 10th St., Ewing, NJ 08638.

To enhance educational diversity, The College of New Jersey is an Equal Opportunity
Employer.
DIRECTOR OF UNIVERSITY COUNSELING SERVICES

The Division of Student Affairs at Virginia Commonwealth University invites applications and nominations for the position of Director of University Counseling Services.

The mission of University Counseling Services at Virginia Commonwealth University is to provide psychological services to VCU students and the university community in such a way that the students can meet their academic and career goals while maximizing their potential personal and social development.

Service delivery includes individual counseling, group psychotherapy, crisis intervention, couples counseling, mental health consultation, and outreach programs.

The Director is responsible for effectively implementing the mission of University Counseling Services in order to provide psychological services to VCU students and the university community.

QUALIFICATIONS:
- A doctorate in counseling psychology or related field from an accredited institution.
- Experience in psychological services, including counseling, assessment, and consultation.
- Demonstrated leadership skills in the provision of psychological services.
- Ability to work effectively in a team environment.

APPLICATION PROCESS: Applications will be accepted until the position is filled. Send a letter of interest, resume, and three references to:

Ms. Carmen H. Bell, Division of Student Affairs
Virginia Commonwealth University
DeVine Hall, Box S4001
Richmond, VA 23284-0017

Non-Unit Professional Positions

Dean of Community Education

RESPONSIBILITIES: The Dean of Community Education reports to the Vice President of Academic and Student Affairs and is responsible for non-credit courses, the Weekend and Evening College (which offers packaged credit programs), satellite centers, and adjunct faculty development. This is a new position requiring the talents of a creative, hardworking, and persistent individual.

QUALIFICATIONS: A Master's degree in Community or Adult Education or closely related field (Doctorate preferred); Administrative experience at the Director’s level above, with continuing education programs and/or with distance learning programs (community college experience preferred); Adjunct or full-time teaching experience; Entrepreneurial spirit resulting in innovative and profitable programming.

PROVEN ABILITY TO: Develop and manage dynamic programs that meet educational community needs with an emphasis on life-long learning; Work with faculty; diverse populations; Develop and manage budgets; Understand the professional development needs of adjunct faculty; Develop off-campus sites from concept to reality; Design and administer weekend and/or evening instructional programs.

SALARY RANGE: $60,000.00 - $65,000.00/yr.

Director - Office of Grants and Contracts

RESPONSIBILITIES: BHCC seeks an experienced and energetic funding development professional to provide leadership for the College’s Office of Grants and Contracts. In addition to the capacity to secure external funds to support the College’s mission and goals, the position requires the ability to work collaboratively across the College to develop ideas for grant projects. Reporting to the Executive Dean of Workforce and International Development, the Director’s responsibilities include: supervising one professional staff member; identifying and obtaining funding to support a broad range of activities such as: acquisition of capital equipment, staff recruitment, retention and success, professional development, curriculum and instructional materials development, translation of “travel” programs, and other initiatives that address college goals. The Director will provide leadership in refining internal processes for proposal development, review, and implementation.

QUALIFICATIONS: Bachelor’s degree, Master’s degree preferred; A minimum of three years of progressively responsible experience securing grants in an academic or non-profit setting with evidence of outstanding accomplishments; Demonstrated leadership and project development skills; Administrative and computer skills.

PROVEN ABILITY TO: Identify funding sources that support college goals; Present funding opportunities to senior management, faculty and staff; Engage active participation in resource development projects; Collaborate with senior management, faculty and staff to develop competitive grant proposals; Direct and supervise the preparation of college proposals that result in the acquisition of external funds; Monitor grant awards from startup to project completion; Work in a diverse environment with an ability to capitalize on multicultural resources; Work in an environment in which change is a highly valued cultural characteristic.

SALARY RANGE: $60,000.00 - $65,000.00/yr.

Executive Dean of Institutional Effectiveness

RESPONSIBILITIES: As a senior level administrator reporting directly to the President, the Executive Dean is responsible for providing College-wide leadership and direction in the areas of strategic planning, institutional research and assessment. The Executive Dean supervises the Director of Research and Assessment.

QUALIFICATIONS: A Master’s degree in Social Science, Psychology, Mathematics, or related field with applied research emphasis, earned Doctorate preferred; Management experience at the Director’s level above; Experience in research design, statistical analysis and interpretation of findings related to higher education; Experience with appropriate statistical and reporting software; Experience in leading planning and assessment initiatives.

PROVEN ABILITY TO: Coordinate College-wide strategic planning, monitor and assess results; Initiate and conduct a College-wide assessment process with emphasis on academic programs; Assess trends and develop evaluation tools to support planning and overall institutional effectiveness; Work effectively with faculty and staff within an ethnically and culturally diverse environment; Monitor and ensure compliance with all state and federal reporting requirements such as IPEDS; Prepare self-study reports for accreditation or for other agencies; Develop and maintain institutional databases to identify key variables related to student success; Present complex material to a variety of audiences so that essential information is understood.

SALARY RANGE: $68,000.00 - $73,000.00/yr.

Temple University

College of Education

Temple University is a senior, comprehensive, public research university located in Philadelphia. The current student enrollment is approximately 28,000. The College of Education seeks to fill six tenure-track faculty positions effective September 1, 2000. Salaries will be commensurate with qualifications and experience.

Counseling Psychology. The Department of Psychological Studies in Education seeks to fill a tenure-track position in Counseling Psychology at the assistant or associate professor level. Applicants should have an earned doctorate in counseling psychology or a related field. Preference will be given to candidates with experience and expertise in developing counseling programs, and a record of professional accomplishments in one of the following areas: higher education such as the administration of academic programs or the administration of student services. Successful applicants must demonstrate a commitment to counseling psychology and to the College's mission.

Instructional Technology. The Department of Psychological Studies in Education seeks to fill a tenure-track position in instructional technology at the assistant or associate professor level. Applicants should have an earned doctorate in instructional technology in educational psychology or a related field. Preference will be given to candidates with experience and expertise in developing instructional technology programs, and who are committed to the advancement of educational technology.

Kinesthetics. The Department of Kinesthetics seeks to fill a tenure-track position in Exercise Science at the assistant or associate professor level. Applicants should have an earned doctorate or be in the process of completing a doctorate in Exercise Science and a record of professional accomplishments in one of the following areas: higher education such as the administration of academic programs or the administration of student services. Successful applicants must demonstrate a commitment to the advancement of educational technology.

School Psychology. The Department of Psychological Studies in Education seeks to fill a tenure-track position at the assistant professor level in its APA-accredited School Psychology program. Preference will be given to applicants who are graduates of APA-accredited programs in psychology, who are certified school psychologists, and who are licensed or eligible for licensure in Pennsylvania. Successful applicants must be committed to the advancement of educational technology.

Science Education. The Department of Curriculum, Instruction and Technology in Education seeks to fill a tenure-track position at the assistant professor level in the Science Education program. Applicants should have a Ph.D. or an Ed.D. in science education. Preference will be given to candidates with experience in one of the following areas: higher education such as the administration of academic programs or the administration of student services. Successful applicants must be committed to the advancement of educational technology.

Applicants interested in the above positions should send a letter of application including a current vita containing the names, addresses and phone numbers of at least three references. Materials should be sent to: Search Committee, c/o Dean Trevor E. Sewell, College of Education, Temple University, Philadelphia, PA 19122.

Carleton College

AMERICAN STUDIES-ETHNIC STUDIES

MINORITY PRE-DOCTORAL
TEACHING FELLOWSHIP

One-year teaching fellowship available for minority students. Appointment involves three to four courses per term and half-time teaching load per term. Applicants must have a master's degree in American studies or a closely allied field. Prior teaching experience and evidence of teaching excellence are desirable. Salary is $12,000 per academic year. On-campus housing and a stipend for health insurance are available. The position will be available September 1, 2000. Submit applications to: Robert F. Hanrahan, Carleton College, One North College Street, Northfield, MN 55057. (Tel: 507-224-3200 FAX: 507-224-3215)
UNIVERSITY OF NORTHERN COLORADO
College of Arts and Sciences  •  Greeley, CO 80639

LANGUAGE ARTS EDUCATION CENTER DIRECTOR

Applicants sought for a tenure-track associate professor or professor, starting August 21, 2000. Tenure may be considered based on qualifications and experience.

QUALIFICATIONS AND EXPERIENCE: Two qualifying graduate degrees, including an earned doctorate from an accredited institution. One degree must be in one of the following disciplines: English, foreign language (French, German, Spanish), speech communication, English as a second language or bilingual education; the other degree should be in an area of language arts education or a related degree with an emphasis in language arts. Preference will be given to candidates holding a doctorate in a field of language arts education. A record of teaching excellence and of scholarly contribution including grants and other external funding, in one of the areas encompassed by language arts education, sufficient to merit appointment as an associate professor or professor in English, Foreign Languages, Hispanic Studies or Speech Communication. A commitment to outreach in pre-K-12 education is essential.

APPLICATION DEADLINE AND MATERIALS: Review of application materials will begin January 15, 2000 and continue until the position is filled. Please submit a letter of application speaking to the position qualifications, a current vita, transcripts, and names, addresses and phone numbers of 5 references. INQUIRIES: College of Arts and Sciences (970) 351-2707.

The position is contingent upon adequate funding from the state legislature and final approval by the Board of Trustees. For a position announcement giving complete details, write on call the College or view the vacancy announcement on the College's web site: http://www.unco.edu/vacancies.htm.

The College of Arts and Sciences consists of departments in humanities, social sciences, and sciences. The College is committed to the values of excellence and of offering programs leading to degrees at the bachelor's, master's, and doctoral level. There are currently approximately 4,000 undergraduate and 170 graduate majors in A & S programs. The College is nationally acclaimed for its array of learning communities for new students, a program of interdisciplinary general education courses (Life of the Mind), the interdisciplinary mathematics and science teaching (MAST) Center and the interdisciplinary Institute for History and Social Science Education.

For more information about the University of Northern Colorado please visit our home page at: http://www.unco.edu.

UNC is an AAEO employer and is committed to fostering diversity in its student body, faculty and staff.

BROWARD COMMUNITY COLLEGE

Department Head, Science/Wellness: (South Campus)
Department Head, Aviation Institute: (South Campus)

The South Campus of Broward Community College invites applications for two academic departments. The Department Head positions include an Associate Professor of Science, Wellness, and a full-time and part-time faculty. Qualifications include a Master's Degree in Science, Wellness, or a related field. A successful candidate will possess the ability to provide leadership for curricular and program development, employing collaborative, team-building management skills. Preferred qualifications include earned doctorate in a relevant discipline. Experience in an educational setting and successful grant writing experience.

The Aviation Institute Department Head oversees three Associate in Science degree programs: Preparatory to become an aviation professional, and an Associate in Science degree in Aviation Technology. The Institute has a staff of full-time faculty and staff, and six adjunct faculty. Qualifications for the Aviation Institute Department Head position include: Bachelor’s Degree, current FAA certificate in a background in aviation and supervision. Computer literacy, the ability to work with flight controllers, and to ensure the growth of the aviation program. Responsibilities include managing the Institute's budget, hiring and supervision of faculty and students, promoting the aviation program. These are 12-month administrative positions with some travel and supervision. Starting date is August 8, 2000. Salary range: $43,000-$45,000. Applicants interested should submit a letter of application, a complete BCC application form, a current resume, and three current professional references by June 15, 2000 to the Human Resources Department at Broward Community College.

ETHNIC PARTICIPATION IN ACADEMIA: A CALL FOR STRONGER LEADERSHIP

Early this year, the National Center for Public Policy and Higher Education published Taking Responsibility: Leaders’ Expectations of Higher Education, by John Immerwahr.

The manuscript contains twelve major findings. These findings and surveys of business and higher education leaders focus on: the inherent importance of a successful and accessible higher education system; obstacles related to students’ lack of motivation and preparation for college; disagreements between business leaders and academics on how higher education is operated; disagreement on what should be taught and how faculty should spend their time; business leaders’ desire to see costs in higher education cut; and business leaders’ tendency to believe that racial balance should “evolve naturally,” whereas other leadership groups prefer a more proactive approach.

Asked how colleges should deal with issues concerning the number of African American and Latino students attending their schools, 43 percent of the business leaders surveyed recommended paying no attention to race and ethnicity. Only 12 percent of the higher education administrators gave the same response.

This national report should alert academia to the need to educate business leaders more effectively on the consequences of inaction. By not working to increase participation among two of the fastest-growing segments of our population, Latinos and African Americans, the U.S. faces serious social and economic backlash. Countries that deal more effectively with issues of ethnicity and how participation will undoubtedly move ahead of the U.S. economy.

Education leaders should be concerned as well about the reported efforts of the Center for Individual Rights. The center is apparently focused on curtailing affirmative action practices in higher education with handbooks and information for trustees and students. This organization presents an interpretation of federal laws relating to college admissions and advocates for a partisan ideology.

The organization makes no attempt to objectively demonstrate social or economic impact of the existence or absence of affirmative action.

American Council on Education President Stanley Metzger and Association of Governing Boards of Universities and Colleges President Richard Ingram addressed college presidents early this year in a special letter about affirmative action. Both organizations advocate for race- and ethnic diversity in admissions and hiring. And they list the value of such diversity.

1. Enrichment of the learning experience through diversity and the impact it can have on civility and respect for inherent differences.

2. Promotion of personal growth through critical thinking and the broad view of such growth for developing a healthy society, including the ability to communicate and understand people from different cultures.

3. Strength gained by communities and commerce, built by learning experience that helps instill values based on the quality of character and contribution.

4. Enhancement of economic factors, which begins with an understanding of how diversity does not warrant the admission or hiring of unqualified individuals.

Academia is ideally suited to lead in developing improved strategies for attracting American leaders on the value of diversity. So many of its members grounded in the science of objectivity and quantitatively based outcomes conclusions, the academic community is surely able to demonstrate how economic and social factors will be impacted by any attempt to ignore race and ethnicity decision-making on college admissions and hiring.

The report of the National Center for Public Policy and Higher Education clearly supports the need for academia to stand behind its claim that those policies designed to create opportunities for those underrepresented make important difference in the lives of Americans.

In addressing the business community, it will be particularly important concentrate on the economic consequences of avoiding race and ethnicity considerations in higher education. With more and more public higher education boards supportive of diversity without regard to race or ethnicity, some sawment of the effects on underrepresented groups will become available. So it is possible to demonstrate consequences.

An agenda to regularly measure and monitor the opinion of leaders and outside higher education, and to measure the impact of a range of repetitive policies on key social and economic factors, will be critical to resisting the practices designed to address underrepresentation in academia.

Information based on solid research and aimed toward eventual conclusions for the nation is likely to aid academia the most in moving toward cities that promote inclusion, civility, and economic prosperity for the nation.

Until then, America might be surpassed economically by countries that are more effective on issues more effectively. The emergence of global economics has driven that the collective intellectual capacity of populations will weigh heavily in the economic success of the countries in which these populations e

Taking Stock and Looking Ahead

BY GUSTAVO A. MELLANDER

How else to begin the year's first column than by wishing all of you a Happy New Year? Not Happy Millennium, for as readers of this column know, I am sure, the millennium does not really begin until next year—2001.

Hispanics and the Future

So without getting hung up on when a century ends or when one begins, what about the future? Specifically, let's explore how Hispanic Americans will fit in. Let's not make the same mistake made by many national magazines, academic pundits and various others who form public opinion.

Remember the touted "Decade of the Hispanic"? The time when Hispanics would arrive, claim their places in the sun, become a real force in this country, etc.? Well, much of that did not come to pass in the '80s as predicted. Luckily, though, a very firm foundation was established in the '80s and '90s. Hispanics can look ahead with a high degree of optimism as we enter the new century—whenever it arrives.

Bilingualism

There was a time—the heavy Americanization days—when Hispanics were forced not to speak Spanish in school. In fact, they were punished and ridiculed if they did. From that and from other societal realities, many grew up being ashamed to speak Spanish. Some were embarrassed that their parents were not fluent in English or accent-free.

Much of that has changed—turned around. Recent studies indicate that a growing number of established Hispanics are now embarrassed that they don't know Spanish. The "opening" of Mexico via NAFTA has brought that home.

More importantly, there is another group of Hispanics who because of blind luck or careful planning have become truly bilingual. It is not at all, a liability but an asset.

A study titled "The U.S. Hispanic Market Study," by the Strategy Research Corporation, found that some 64 percent of Hispanics do not have a strong preference for one or the other language and are equally proficient in English and Spanish.

Hispanics in the U.S. will enjoy more economic opportunities due to their increased bilingualism. Secondly, they as a group are assimilating more easily into the mainstream culture than are other minorities.

One of the surprises in the report is that the Hispanic market is much more bilingual than in previous years. The study found that 32 percent of Hispanics have no preference as far as the language used for advertisements. However, 41 percent prefer bilingual advertisements and 30 percent want them in Spanish.

The corporation president, Rick Tobin, told a group in Washington, "The most important facet of the study is that Hispanics now understand English better. Therefore, they will have a better future in this country."

Money Counts; Politics Influences

Second on everybody's wish list is invariably money. In this case, we explore purchasing power. For Hispanics as a group, purchasing power is expected to grow from 273 billion dollars to about 325 billion this year. That translates from a current median family income of $22,600 to $34,900 annually. That will bring more Hispanics into the American mainstream and impact the nation's direction.

Hispanic political viability was well demonstrated in the 1988 elections where scores were elected to numerous positions nationwide. It is clear from all the publicity, campaign efforts, and dollars being spent that both political parties are focusing on seizing the Hispanic vote for next year's presidential election. That vote may well decide who's elected.

Education Realities

On the education front, more Hispanics will be attending college next year than ever before. Many, although still a small percentage, work as administrators and teachers at America's colleges. More than 60 percent of all Hispanics who go to college begin their careers at the nation's 1,200 community colleges, but they are found in every type of college nationwide.

It is good to note that more and more Hispanics are turning to technology. The study found that 30 percent of their homes have computers, 19 percent have access to the Internet, and 35 percent own and use a cellular telephone. They might not be as "wired" as the rest of America, but they are getting there.

Numbers and Locales

The Census Bureau recently announced that by the end of this century, the Hispanic population will reach 34 million inhabitants to comprise an estimated 12 percent of the total United States population (276 million).

This means that by 2000, than one of every ten people country will be a Hispanic.

The market study, released in Washington, interviewed 1,500 Hispanic in the ten main Hispanic markets indicated that persons Mexican descent will comprise percent of the Hispanic pop. They will remain by far the Hispanic cohort. Those of Cent South American descent will mi 14.8 percent; Puerto Rican d 105 percent; Cuban descent; cent; and descendants from Latin countries, 69 percent.

Sixty percent of all His will live in ten cities: Los Angeles the immigrants' 21st-century way; will have 69 million; New York, 38 million; Miami, 15; San Francisco and Chicago, lion each; and Houston, 1.3 mi.

The Hispanic population Antonio will reach 1.2 mi while Dallas and McAllen will each have 900,000. San will have 800,000 Hispanics.

The study also found that seven U.S. states will have a population of more than one inhabitants. In those states, H will comprise 34 percent of population of California; 19.2 in Texas; 8.6 percent in New York; 73 percent; in Illinois; 35 percent in Texas; in Arizona; 35 percent in New Jersey; 32 percent.

How will all this imp nation? Dramatically, I dare.

Dr. Mellander is a pro George Mason University
Columbia School of Journalism
Awards Cabot Prizes

by Jeff Simmons

It was an elaborate affair to mark one of Columbia University's grandest traditions. Close to 400 guests, dressed to the nines in evening gowns and crisp tuxedos, gathered in the rotunda of the Low Memorial Library to honor a distinguished group of their peers.

The lights dimmed, George Rupp, president of the college in New York City, stepped to the podium. "It gives me great pleasure that you are here this evening," Rupp said. "Tonight we recognize the excellence achieved by veteran journalists—and the promise of a new generation of journalists."

The 61st Annual Maria Moors Cabot Prizes were recently bestowed, awards that recognize accomplished reporting on Latin America. Judges cited journalists for providing insightful coverage and securing a long-time commitment to achieving freedom of the press.

The Cabot Prizes—the oldest international awards in journalism—were first presented in 1939, though founded the year before by Boston's Godfrey Lowell Cabot as a memorial to his wife. Cabot envisioned the prize as a way of fostering improved relations between the United States and Latin America.

The prizes have since been administered by the university's Graduate School of Journalism. An advisory committee of journalists and educators—seven of them former Cabot winners—works with the school's dean to select the winners, who often make recommendations themselves the subsequent year.

University trustees have conferred 221 prizes and 51 special citations to journalists from more than 30 countries. Winners this year each received a $1,500 honorarium.

"Their reporting contributes to Americans' understanding of Latin America, and in Latin America, the reporting contributes to the strengthening of the press institutions and the strengthening of democracy in a free press," said John Dinges, an advisory board member and previous winner.

Dinges, a journalism professor at Columbia, added, 'A major reason that this is an important prize is because it represents the common ground between United States journalistic institutions and Latin American institutions and values.'

He added, "The main impact is on journalists in newsrooms all over Latin America and newsrooms all over this country, and it represents the shared goal of quality journalism that we have in common..."

University officials hope that the awards, and their purpose, make their mark on the more than 220 students involved in the school's graduate journalism program.

Winners have met with students to discuss their determination against adversity. This year, building upon that philosophy, the school held a roundtable discussion the day after the awards in which graduate students met with the winners.

"We're trying to strengthen the connection between the journalism program and the awards," said Ann Nelson, director of the International Division of the journalism school and previously the executive director of the Committee to Protect Journalists. "We did a roundtable on journalism education in their home countries. We're just trying to create more and more links."

"For the school, the end goal is to have a more informed program available for Latin American students, increase the dialogue between U.S. journalism and what's going on in journalism in Latin America. I think we'd also like to be a bridge between
Based in Guadalajara, Mexico, Público has exposed how drug traffickers influenced Mexico's political institutions and elites. The paper disclosed that a brother of Mexico's president had nearly completed a deal with money launderers involved with a drug cartel.

Previously, Patterson was a reporter at Siglo 21, which gained a reputation for setting high standards when it followed the 1992 explosion of an underground pipeline to Guadalajara in which more than 400 people died.

Siglo 21 reported on drug searches at the home of a powerful military commander who was appointed to a federal anti-narcotics agency. That report subsequently forced the military to concede that the general, Jesus Gutierrez, was linked to a notorious Mexican trafficker. Patterson weathered problems at Siglo 21, and left amid pressure to curb editorial freedom.

Now, he explained, "there is a much more powerful free press. In some ways, it has taken us by surprise, the arrival of democracy in our city," he said. "This prize gives us a new kind of support for the kind of journalism we are doing. I will do my best to live up to what this award represents."

The awards committee noted that he now strives for editorial independence, and the college president called him "one of the most important figures in Mexico's complex and perilous transition to greater press freedom."

Said Rupp, "When you were forced to water down your journalism there, you walked out and founded another paper, Público, that continues in the same hard-hitting investigative tradition."

Juan Tamayo, Latin American correspondent for the Miami Herald, "It is not just coups and earthquakes," Tamayo said about journalism in Latin America. He said journalists recognize one simple fact: "I believe they will read it when we write it well."

He added, "Make sure that the stories of Latin America are told."

Born in Cuba, he came to the United States at the age of 13. He joined the Herald in 1982 as the paper's Central American correspondent and later served as its Middle East and European bureau chief and as foreign editor.

A winner of the Overseas Press Club award for foreign analysis, he has covered Central American conflicts by offering a historical context so that readers can better understand their relevance.

Rupp said that "his journalism has transcended debates and policy disputes to show us the people behind the conflicts" and added that "your investigative reporting unraveled the mystery of La Penca, the brutal bombing of a press conference in Costa Rica—long after everyone else had given up on identifying the perpetrators."

James McClatchy, publisher of McClatchy Newspapers.

He received a special citation for conceiving the 1994 Declaration of Chapultepec, a free speech proclamation penned by private citizens and endorsed by 19 heads of state (including the leaders of Argentina, Brazil, Chile, Colombia, Guatemala, Mexico, and the United States).

The committee noted that he has striven to "bring about, promote, and disseminate principles of freedom of expression and of the press in the hemisphere."

Said Rupp, "You labored for years to call attention to the issue, and for many years, you have led the way in promoting and defending the ideal of press freedom in the Americas."

He previously reported for The Sacramento Bee and The Fresno Bee, both in California, and had served as an editor and publisher of a series of weekly papers.
Raúl Rivero, president of the Cuba Press news agency.

He received a special citation—but was the only winner who could not attend, because of the threat that he was unable to return to the country. The university tried to secure exit and re-entry visas for Rivero.

His presence was felt, though. Attendees watched a videotaped segment in which he expressed his gratitude for receiving the award. "This award gives me confidence to keep on working," he said, and to produce journalism that is "clean, honest, and fair."

Rivero has lead a group of non-government journalists to crusade for free speech. He was trained as a journalist in Havana after the 1959 revolution. He founded the cultural magazine Cañam Barbudo and was Prensa Latina's correspondent in Moscow for three years during the 1970s.

Rivero has had an illustrious career. In 1991, he signed a petition calling on Castro to free prisoners of conscience, and he was the only one of the 10 signatories still living in Cuba at the time. He subsequently abandoned official journalism that year, calling it a "fiction about a country that does not exist."

Four years later, he started the Cuba Press news agency, pioneering dissident press on the island. He has written on the Internet and in El Nuevo Herald, a Knight-Ridder Spanish-language newspaper in Miami, and has published collections of poems and interviews with Cuban intellectuals.

Said Rupp, "Cuba Press has contributed a small but vital stream of information from the island to the outside world."

Since founding the agency, Rivero has reported from Cuba despite undergoing threats, arrests, and harassment from the government.

"It is an honor for all of us in Cuba to receive this special citation," he told the advisory committee via telephone. "It is also an encouragement for those of us who exercise free journalism."

The dean of the journalism school, Tom Goldstein, said the threat shows that efforts still exist to crush free speech.

"This action by Cuba is a vivid reminder of the sorts of obstacles that journalists around the world encounter in the pursuit of their profession," Goldstein said. "We at the journalism school are terribly about Latin America, this is the most important award you can receive," said Dinges, who has written books on the Bolivian government and the assassination of the Chilean ambassador to the United States.

But he lamented the fact that while coverage has been high in the past—amid civil wars, military dictatorships, and the invasion of Panama—it has somewhat dipped in recent years. Now, he said, is not America. The hot stories tend to be Mexican politics and trade, and Colombia in terms of the drug trade. I'm not sure the reading public is being made fully aware of all of the issues."

At the same time, there is more communication in the intellectual, educational, and journalistic worlds. Dingess said that the program at Columbia is just one example of that greater communication.

"I talk to people almost every week who are coming up to the United States and visiting newsrooms and universities, and I and other American journalists are frequently traveling to Latin America, giving workshops and exchanging ideas."

The school has already etched plans to ensure more coverage. It recently established a Howard Fellows scholarship fund in which international students could be selected if they wished to go back to their home countries to work as journalists. Each year, there will be a connection to Latin America.

And a number of students were invited to the Cabot awards ceremony, sitting shoulder-to-shoulder with media leaders from New York City to South America.

Nelson recalled of one student from Brazil who landed a job with a start-up new media company. "She sent me an e-mail saying this experience [at Columbia] had grounded her and keeps her aware of what all of us is about. It's quite easy for us here in New York to lose sight of what journalism is like on the ground in other countries."

Nelson called this a "dynamic period" for Latin American journalism.

"It's exciting to see these papers in Brazil, Argentina, Chile really start to flower after the dictatorships and periods of censorship. They're starting to do quality reporting. This is a way for us to feel connected to that process and do what we can to help and do what we can to learn from it."
hurricane named Floyd blew into town on
Thursday night, September 16, bringing with
it—really in spite of it—more than 130 teachers
of Spanish from colleges and universities and
high schools in 30 states and four foreign
countries. What is it about the teaching of Spanish
these days that might inspire such devotion? And
why, of all places, Spanish in New England?

"Of all the metaphors I could have thought of
to describe this event, or to describe what
Spanish is in the United States, a hurricane was
the last thing on my mind," said Nancy Saporta
Sternbach, chair of the department of Spanish
and Portuguese at Smith College, in welcoming
speakers to the opening session of a two-day
forum devoted to "The Future of Spanish
Departments on College and University
Campuses." Later, in opening remarks to the
gathering being hosted at the Smith campus, she
noted with some pride that this was "the first
such conference of its kind" in her memory:
"This is to be a conversation," she told those who
had braved a hurricane, "about issues that have
been on our collective agendas for all too long.

"We all know that Spanish is no longer a for-
language in the United States," Sternbach
said. "We all know that the training that we
received as graduate students is no longer
appropriate or up-to-date enough for what we
should teach our students today. We all know
that the literary canons are only a small portion
of what we do. We've had to rethink our
departments could meet the extraordinary
demand for Spanish that has been growing
nationally over the last decade." One of the rea-
sons for this meeting, she noted, was "to share
our individual and collective and creative labors
with each other. But there are many other rea-
sions why we've gathered here today." Among
those she cited were the role and needs of her-
itage speakers, new options in study abroad, the
undergraduate curriculum, the graduate cur-
rriculum, "and perhaps most acutely, the hordes
of students clamoring at our doors."

The idea for the conference, Sternbach says,
had been percolating for some time but took
shape at a recent gathering of Five College
department chairs. In planning the conference
and seeking funds to make it happen, she credit-
ed the aid of a committee of Five College col-
leagues representing the departments: Norma
Holland (Hampshire College), Jeanne Brownlow
(Mount Holyoke College), Michael Fas
(University of Massachusetts-Amherst), an
Hilda Otaño Benítez (Amherst College).

Those speaking represented a wide range of
departments and programs elsewhere in the
country. To encourage an in-depth airing of the
issues raised during the panel presentation
each panel was followed by an informal round-
table session, and participants took all meat
in their classes.
A guest of honor at the opening din-
ner Friday evening was Ricardo Peidro, Spain
consultant general in Boston, who was paying his
first visit to the Connecticut Valley.

Sternbach acknowledged the support
received from the presidents of the five campu-
es, the provosts and the deans of the five college
and from Lynn Sanstead, head of the America
Association of Teachers of Spanish and
Portuguese (AATS), "for his enthusiasm and
ongoing willingness to co-sponsor this right fro
the very beginning." She also acknowledged the	special assistance of Five Colleges, Incorpate
"If you don't have a consortium," she told th
gathered, "try to get one. It really helps."

Additional support had come, she noted, from the Andrew W. Mellon Foundation, the Consulate General of Spain in Boston, the Program for Cultural Cooperation between Spain's Ministry of Education and Culture and United States' Universities, and the Instituto Camões of Lisbon, "who had the vision and the generosity to share some funds with us even though this is a conference on the future of Spanish departments. They knew that the role of Portuguese was also very high on our agenda." For inspiration and encouragement, however, she and her colleagues singled out for special praise the keynote speaker for the conference, David Maxwell.

A former director of the National Foreign Language Center, David Maxwell has been for many years a staunch supporter of the idea for a national dialogue about the teaching of Spanish. In introducing him, Nancy Saporta Sternbach expressed her gratitude publicly: "He began talking to me about this almost three years ago, and agreed with us about the need for it. He also helped us find funding to make it happen," she added.

Currently president of Drake University, David Maxwell served from 1993 to 1999 as director of the National Foreign Language Center (NFLC), a policy center and think tank for language as a national issue and an issue of national need. Maxwell, a specialist in Slavic languages and literatures, is widely recognized for his skill in strategic planning and his long-standing interest in issues of higher education. A former president of Whitman College and dean of undergraduate studies at Telos, during his six years with NFLC he interacted with hundreds of colleges and universities on issues of foreign language learning and institutional planning, as well as with the National Endowment for the Humanities and the Council for International Educational Exchange. His talk, entitled "Do We Know Where We're Going? And Do We Know Why We're Going There?" offered what he characterized as "a broad-brushed overview of what NFLC sees as the situation of foreign language learning in higher education."

Excerpts from his talk appear below and on the following page.

David Maxwell on the Language Crisis

On the National Proportions of the Crisis

What is the nature of this crisis that I'm about to describe? It has a variety of characteristics. The most important characteristic is the fact that very few students in higher education are engaged in the study of language, or are engaged in the issue of language at all. The last objective data we have are from enrollments in 1995 [the MIA he noted, is about to release updated figures]. In the fall of 1995, 7.6 percent of all undergraduates in the United States were enrolled in a language course. Eighty-five percent of those students were enrolled in French, German, and Spanish, and I suppose the significant change over the last four years is that most of them are in Spanish now.

...only one-tenth of one percent of all the undergraduates currently in higher education in the United States will ever reach a usable level of competence in a language outside French, German, or Spanish. To me, that's one of the definitions of a crisis.

On Student Attitudes

Student attitudes, however, are more complex. The students look at language learning as unimportant, irrelevant, or impossible. The unimportant is reflected in the cultural attitudes that I just talked about: You don't need to know another language. Everybody speaks English, and besides that, you can always use a translator.

I now live in Des Moines, Iowa. Think about your stereotypes for Des Moines. Last Friday morning, standing in the departure lounge at Des Moines Airport, in five minutes I heard Spanish, Japanese, Arabic, Basque, and French. In Des Moines, Iowa. And there wasn't an international congress going on in the airport.

Irrelevant doesn't refer to their belief that language is irrelevant, but we believed, at the NFLEC that there are lots of students out there who feel that competence in a language other than English would indeed be useful to them. Communicative competence. But they look at the language programs on their own campuses, and they see them as irrelevant to that goal. They don't see people coming out of those programs competent in another language.

And the impossible refers to the fact that students believe you can't learn language in a classroom... from the way in which language is done. A lot of language in this country, people suspect it's impossible.

The Campus Perspective

Let me give you a quick litany of other issues... the descriptors of this crisis that we're hearing from the campus:

1. Dramatic shifts in enrollments
2. Resources: cuts to resources, threats to resources, often connected to the enrollment issue, but often connected to institutional restructuring, reconfiguring mission, et cetera...
3. Staffing issues... including the nature of faculty appointments and instructional appointments... and the adjuncts...
4. Governance: Where does language learning fit in the institution? Is it part of a language and literature program? Is it part of a language and linguistics program? Is it part of a world literatures department? Is it a department of foreign languages? Is it first and second and elementary and intermediate language done in a language center that is disconnected from the other culturally related activities?
5. The attitude of the institution and of colleagues toward language teaching, toward research and production in language pedagogy, and all the things connected with it [and the perception] that these do not have the same intellectual weight as other things on the campus
6. Foreign language requirements: Those institutions without language requirements are talking about them endlessly.

Globalization and internationalization are now starting to come home to roost in language and literature departments.
7. Heritage students. We are hearing more...
and more about them.

9. Technology, its applications, how you integrate it into language learning, appropriate uses, faculty development, the lack of rewards....

I have also heard from faculty all over the country that they think that the deans are staying up at night, trying to figure out how you can replace your language department with a computer lab...

**A Taxonomy of Missions for Language Learning**

Spanish has the issues of the privileged, as much as that may be difficult to recognize, but ultimately I think you have the same set of bigger issues to face, because what I just described to you are not the problem, they’re symptoms of a problem. At the National Foreign Language Center, we spent a lot of time talking about these issues in the context of institutional mission. The thesis is basically that most of these problems derive fundamentally from lack of clarity about basic issues of why it is that we offer and/or require language learning in higher education and in our institutions in particular.

**General education mission:** Studying another language gives you insights into another culture and to other ways of thinking, a perspective on your own culture, insights into the functions of language, reflections back on your own language, enhanced cognitive skills—you know the litany. It’s stuff of catalog copy. This is why we want you to study a language. All very valid. Perhaps not best addressed by three semesters of grammar, but a very valid mission nonetheless.

**Applied mission:** Learning a language in order to be able to do something with it.

**Expertise mission:** That’s the major...preparing students to go on into graduate work in the field to become teachers and/or scholars.

**The heritage mission:** Providing instructional or learning opportunities for students in the language and culture of their own family.

What we saw nationally...is an incredible disconnection among these missions. That the institutional rhetoric about language was the general education mission: It’s good for you. You learn important things. But the majority of students who are in language courses of their own volition were in there for the applied mission. They wanted to be able to do something with it. The majority of programs, however, are designed for the expertise mission. It’s a four-year track for the major leading to graduate school, and outside of Spanish, no one knows what to do with the heritage students.

So what we see as the fundamental issue, and what I spent six years talking to presidents and provosts and deans about, is that language is an institutional issue. That when you look at the facts that you don’t have students enrolled in your language programs, and you have all these other problems I’ve referred to, you have to make some institution-wide decisions about why you offer language in the first place.

**On Some Solutions: A Field Issue**

How do we address these issues? We have to address them in ways that can transform institutional culture. And that means leadership. That means leadership on the campus by people who believe in this—by you, and by the administrators who can make things happen. We have to institutionally make activities in these areas a part of the rewards system and part of the responsibility system. You have to look at new governance structures in the institution to be able to accommodate it.

Most of all, though, I think at this point it’s not just an institutional issue, and it’s not just a personal issue. I think it has to be a field issue...it has direct relevance to what you’re doing here for these two days... If language learning is to get better, to improve and to become relevant and to become ubiquitous in higher education, then the fields have to behaving differently; as fields...Historically, there has been a relationship between the indi
teacher and scholar and the profession: Individual fields are there to support you, they are there to publish your scholarly national conferences for personal development. But they have not taken responsibility for support and development of programs on campus to make sure that one of the things supposed to be doing, which is teaching, is takes place and is taken seriously.

So what I’m urging is that the fields control of [their] own future. If you, as a don’t take charge of your own future and charge of the ways in which program designed and the ways in which program implemented, people like me are going to these decisions. That’s what deans and presidents are for. You an have an opportunity to take charge of your own fate. What does that mean in some sense, setting expectation goals and standards for grade...pros teacher training, materials development, research, assessment, use of technology, looking at ways, I would think you through distance learning, of supporting institutional programs, offering in-service training, providing materials and learning opportunities to institutions that cannot afford to have on campus otherwise. Most of all, I think requires that the field develop some kind of sense on where you’re going, and why you’re going there. In terms of mission. And devise strategies to get there.

**The Model: A 10,000 Pound Gorilla**

Clearly, this is what you’re talking about... This is a wonderful first start, a wonderful beginning. I think, for Spanish, and a great opportunity to serve as a national model... somebody said last night, you’re the 10,000 pound gorilla. You’ll gain more faculties, more students, and more money, and that gives you more authority. It gives you a leadership position. And I think it would be a big mistake to enjoy that a little bit too much and not recog that...you have a real opportunity to exert that! leadership with some of these issues takes leadership, it takes vision, it takes energy, it takes commitment, and it takes creativity. Looking at this program and from the things. I’ve heard today, I think you’ve got it. So let’s do it.
The Role of Latino Studies in Spanish Departments

"When the Steering Committee sent out the call for papers, we were surprised by the fact that we received very few proposals on such an important issue, so we decided to create a panel drawing on our own five College faculty members. Hence, the kind of homegrown nature of this panel and its panelists," Norm Holland, Latin American, as well as Latino/Latina Studies, Hampshire College

"Dis-locations: Teaching Spanish to the Heritage Speakers on the Border and in New England"

Michelle Joffroy Department of Spanish and Portuguese, Smith College

What does it mean to teach Spanish to heritage speakers on the U.S. border, in a state university, in an urban setting, and what does it mean to teach Spanish to heritage speakers in New England, in a private liberal arts college, for women? They're two very different experiences. The surface question is: What is the role of Latino/Latina studies in Spanish departments? That's an important question. But equally important is the question of the role and the place for Latino students in Spanish departments. Where do we think Latino students belong, and where do Latino students think they belong? And what can we as Spanish departments do to make Spanish departments welcoming environments for Latino students?

Spanish for Heritage Speakers is not the only heritage language program, but it is the fastest-growing program in this country, and it's putting pressure on curricula at all kinds of institutions: elementary schools, high schools, and institutions of higher education. So we can't ignore it. We need to continue evaluating where second-language acquisition is important, and where heritage speakers need to be taken on their own terms.

Students here and at the University of Arizona (where I used to teach) come to the Spanish department to a course for heritage speakers seeking very specific things. They want to reacquaint a language that they experienced in the home or in some other community; they want to develop literacy skills; in many cases, they want to actually learn, for the first time, the grammar of the language they speak; they want to develop some sense of an understanding of their cultural heritage. They're coming to us, at all of these different institutions, with the same kinds of needs. And I think that's something we all share.

Now, the differences, I think, are also very real. Demographics, first of all. To be living on the U.S.- Mexico border in Tucson, Arizona, a public university whose primary mission is to educate residents of the state, located in a state that is demographically very heavily Latino already, defines for a Spanish department one of its functions. To teach in that kind of environment already presents several systems of support for the kinds of work that we ask our students to do as they develop grammatical skills, communication skills, writing skills, and in many cases research skills that they can then apply to other areas of interest and study. Teaching here, by contrast, in Northampton, by all accounts a pretty typical small New England town, doesn't offer the same range of demographic support. When you're in a small town, in a small college with a small Latino population, you don't always feel that the Spanish you're learning in a language class is meaningful or even something to be valued. To structure a course for heritage speakers at Smith College, then, I have had to grapple with demographics in order to make it meaningful for the heritage students.

And this leads into a second area of difference: the relationship between the academic institution and the nonacademic community. The University of Arizona in Tucson is very well connected to its community, a community with a Latino presence in virtually every sector of life, from business and medical to political, artistic, and social services. Students have access not just to these places but also to other Latinos in these communities, and that has been very, very important for a successful Spanish for Native Speakers program at the University of Arizona. Small, private, liberal arts colleges don't necessarily have a natural or organic relationship to the Latino communities that surround them. So although Northampton itself has a sizable Latino population, and we are within a few miles of both Springfield and Holyoke, cities with very large and active Latino communities, access to them is limited for Spanish-speaking students who want not just to participate in a community but also to see themselves reflected in that community. There are no natural networks, as of yet. And to establish a network falls not on the social and volunteer services at the campus but more likely on the Spanish department. Which points to yet another area of difference: the matter of integration into an external community, and, in turn, integration with the internal community of the college. I do not mean to hold out the University of Arizona as a utopia, which it isn't, but in terms of these kinds of organic relationships, it offers a stark contrast to what exists here (on the East Coast). One of the most successful components in the Spanish for Native Speakers program there is the presence of the Latino scholar on campus. Many of them are from neighboring towns, from California, and from Mexico. That's the way it is there. These Latino faculty have committed themselves to participating in Spanish for Native Speakers' programs, using this mentoring program. This means that students in a Spanish for Native Speakers course can opt for a project component to their language course that entails their meeting with a Latino faculty member working in another area of study four times during the course of a semester. For example, a Cuban anthropologist might agree to help a student develop proficiency in anthropological jargon. That is: How do you speak in anthropological terms? Where do you look? What do you read? And all of this in Spanish. This teaches a student to be a scholar who also speaks Spanish, and who therefore has access to a very profound vertical structure.

We're missing an opportunity, I think, in the Spanish department when we don't open up avenues for access to scholarship as Spanish speakers. Students come to us with an asset. They speak Spanish. If we give them solid and helpful Spanish language courses, and offer them curricula that legitimate their decision to continue speaking Spanish, then we're serving them in ways that other departments can't. To do this, however, we have to locate other Latino faculty on campus and integrate them into what we do in the Spanish department. As Spanish departments, I think we're at a critical moment where we have to sit around the table and say, 'Do we want Latino students?' If we want Latino students, we should be asking our-
selves what we have to do to get them to our department, and what we have to do to educate them and the administration to the fact that pursuing Spanish is legitimate, is valuable, and is part of a liberal arts education, despite the fact that they got here speaking some Spanish.

"Natives in a Foreign Land"
Luis Marentes, Department of Spanish and Portuguese, University of Massachusetts-Amherst

I chose as the main title for my talk today "Natives in a Foreign Land" because of the position that U.S. Latinos occupy currently, both in the curriculum and perhaps principally in society at large. The recently coined category of U.S. Latina/Latino carries it with it a paradoxical combination of nativeness and foreignness. Either in the United States or in Latin America, U.S. Latinas and Latinos are both.

In the United States, for example, U.S. Latinos are insulators, either citizens or residents, legal or illegal, of the nation-state. They are to a greater or lesser degree active members of the community and the economy, the culture, and the politics. Yet that adjective turned into a noun, "Latino," also suggests a certain foreignness, which can either be self-selected or imposed by bureaucracies or even mailing lists. South of the border, U.S. Latinos or Latinas may be natives by genealogy and cultural roots, but often they're too American, too gringo, culturally, linguistically, economically, and they find themselves, again, in a foreign land. The latter phenomenon exists in our department of Spanish and Portuguese, and relates to the second part of the title of my talk: "Reflections on the Place of Latina/o Studies in Spanish Departments." Although we all know that the nature of our departments is changing, it is still the Spanish language itself that justifies our existence as language-based centers.

The new emphasis on culture emerging in these departments, however, opens up new possibilities for study on two levels: first, in terms of the field as an object of study and research and then in terms of the students who come to study in that field. What I call the studying subjects. Departments that are attempting to make sense for Latina/o studies do so now in a more or less ad hoc fashion. Instead of creating courses about Latinos, we include a couple of texts into the syllabus of a more generic Latin American literature or culture course. Often, but not always, these texts appear toward the end of the syllabus, almost as an afterthought, and if we have a snow day, we miss that unit. We also tend to bring U.S. Latinos into focus, when we do, as part of a broad diaspora from Latin America proper. In this case, Latina/Latino studies are taught as one manifestation of the Latin American experience. In my opinion, however, U.S. Latina/Latino studies must also be seen as part of the United States’s culture, its language, its tradition, and its literary canon. What’s more, U.S. Latina/o studies should be approached as an interdisciplinary course of study within the department, with due attention given to the specific characteristics of this group as an object of study. By to the addition of new materials to the syllabus, its emphasis on hybridity, minorities, migration, diaspora, and borders has the potential to enhance the way we approach the study of the Latin American experience as well. The fact that Latina/o studies is rooted in the tradition of ethnic studies infuses it with yet another positive element.

Unlike area studies programs, which emerged in the postwar years to serve the military and commercial interests of the United States, ethnic studies programs were born of the Civil Rights movement of the 1960s and ‘70s. The result was the creation of centers of study with a mandate to produce and teach a broad archive of knowledge specific to particular “minority” groups in the United States, and to grant professional credentials and serve these communities in an affirmative fashion. Of particular importance also was their mission to turn a particular group of people not only into an object of study but also into studying subjects. And this crucial element of the students themselves must not be overlooked as we work to give Latina/o studies its rightful place within the Spanish department.

Some students come to our departments because they want to learn about their heritage, and their relation to it. Some also come to us to improve their Spanish language skills. They come to us, but we don’t always put their needs and interests first. Every Martínez, Pérez, Rodríguez, or Marentes with some working knowledge of Spanish who wants to take the class, for example, may register. The result is an extremely broad array of students, ranging from daughters of Spanish teachers who have recently migrated from the Dominican Republic to those who grew up in Holyoke learning Spanish from a grandpa.

The common factor they have is that they are all "na..." Often we deal with this situation by these students a Spanish-speaker cred after a brief oral interview and a written to certify that they have a language comp. equivalent or superior to that expected of one taking the regular four-semester seq. Most, if not all, of the students who come fulfill these criteria. Many of them don’t need extra training. Others, however, need improvement in spelling and grammar skills. We offer them courses that we regularly offer to our students at a level that makes sense for t.

Our basic language sequences, design students just beginning to learn the lang. too boring and trivial for students already flu... speaking Spanish, though they may neither nor write it. So we push those who intend to take into more advanced classes, where deficiencies in spelling and grammar put us that we'll have to address their needs. Those who want to continue Spanish studies simply certificate and go on with their academic car.

“Milagro or Nightmare? Latino Studies in Spanish Departments”
Alberto Sandoval, Department of Spanish and Portuguese, Mount Holyoke College

The summer of 1999 will always be remembered as the time when Latinos took over U.S. popular culture and the media. Ricky Martin, Jennifer Lopez, Enrique Iglesias, and Christina Aguilera skyrocketed to number one in the Billboard hit parade. John Leguizamo starred in Spike Lee’s film The Sum of All and received an Emmy for his HBO production of the Broadway hit Freak. Salma Hayek was the leading lady of Wild, Wild West. The MacArthur Foundation honored artist Pepon Osorio with a scholarship in the political arena, and George Bush displayed his fluency in Spanish, defining himself as a “Republican conservativo” to attract Latino voters. In sports, Oscar De La Hoya, undefeated welterweight champion, and Papi Chulo, lost to Felix Trinidad. Major magazines featured special Latino issues with Latinos/Latinas on their covers, among them George, Time, and Newsweek.

A July 1988 issue of Time, in fact, had even earlier declared the ’80s the decade of Hispanics: “Magnifico! Hispanic Culture Breaks Out of the Barrio.” Yet the magnitude of the transformation would not become fully evident until the last summer of the millennium.

What do Spanish departments and U.S. Latino literature studies have to do with this boom that some have called the Latinization of America? As Latino demographics have increased, a new global economy affects Spanish departments in two ways: First, Latinos will be enrolling in Spanish courses to reconnect with their heritage. What’s more, Spanish will increase in demand as the impact of NAFTA is felt both abroad and at home. Latinos have become a marketable, profitable target, and have a purchasing and spending power of about $300 billion ($500 billion by the year 2020). Advertising and media reach-out strategies in Spanish also reflect the fact that Spanish is here to stay. Spanglish, it seems, is good for business. Research has confirmed that Latinos are devoted buyers, as faithful to one brand as they are faithful to familia.

As Anglo America has been consuming whatever has a Latin flavor, U.S. Latinos in turn have been saturated with statistics about who we are and what we mean for the new millennium in both social and economic spheres. This mainstream obsession has, in other words, set in motion a counterreaction in which Latinos have become increasingly aware of their status as a majority-minority culture and its potential as a source of empowerment, political clout, and cultural intervention. Colleges and universities, for one, have become contested sites for U.S. Latino demands for everything from changes in curriculum and admission requirements to hiring of Latino faculty and staff, funding for Latino student organizations, and allocations of space for social and cultural meetings.

All these demands have a history. They are possible today because of the social movements of the ’60s and ’70s. During those early years of minority activism within the academy, there were some allies who integrated Chicano and Puerto Rican literature into the curriculum of Spanish departments...It was right to site that literature in the Spanish department, although it is a bilingual and bicultural product. The politics of solidarity that characterized the ’60s and ’70s, however, overrode the issue of language that we see resurfacing now in some Spanish departments. On the one hand, U.S. Latino students were demanding courses in Chicano and Puerto Rican literature in the department because Spanish was a place they could call home. But those courses also benefited the departments by attracting Latinos to minor and major in Spanish.

In the last two years, a trend evident in the hiring practices of Spanish departments suggests the pressures on them to integrate Latino studies into their curriculum. Unfortunately, the emphasis on the Latino specialization has been largely incidental: that is, hiring someone who also happens to have interest in Latino literature or Latino studies, or someone who has the potential to develop a U.S. Latino language course. At least 27 of these positions were advertised in the MLA Job Information Letter in 1997, and 24 in 1998. Yet the nature of the positions being advertised suggests more tokenism than real evidence of change or commitment. Often they feature unimaginable and bizarre specializations in combination with Peninsular and Spanish-American literary periods and Hispanic topics. One ad, for example, indicated that the department was looking for a specialization in pre-19th-century Latino American literature and indigenous literatures, as well as preparation in U.S. Latino literature.

As interdisciplinary studies have become the favored approach for teaching and scholarship, increasing student demands for culture courses offered in English, as well as for Latino and Latin American studies, they increase the opportunities for crossovers and fruitful dialogue between the new interdisciplinary programs and Spanish departments. Professors of Spanish are teaching in English in Latin American studies programs, and Latin American professors are teaching cultural courses in Spanish departments. This collaboration has the potential to benefit both parties in a number of ways. Meanwhile, as Latin American studies and Latino studies are joining forces, American studies is redefining itself in an inclusive way under the rubric of the Americas. This, too, is all to the good. Nonetheless, it is important to recognize and understand that all these programs have their ideological agendas and specific histories. I am greatly concerned, for example, that Latino studies, and particularly Chicano studies, might be colonized by the major program...I am worried that both Latin American and Latino studies will be absorbed into a new imperialist maneuver. The wolf may be in sheep’s clothing...

[Yet español is here to stay, I believe, for a number of reasons: 1) the geographic proximity of Latin America to the United States; 2) the circuits of migration within the Americas; 3) the constant interaction in urban centers between recent immigrants and U.S. Latinos from different generations; 4) the capital interdependency between Latin America and the United States, with increasing migration of bilingual professionals to this country; 5) the demographic increase of Latino, Spanish-speaking communities in urban areas; 6) the increased use of Spanish on a daily basis, thanks to new technologies that cross borders and provide instant communication between U.S. Latinos and Spanish-speaking countries; 7) Unirresión, Telemundo, particularly TV, popular music, pop stars, and idols. All help U.S. Latinos retain their Spanish language skills...What’s more, Spanish seems no longer a barrier in the English music world, where the new stars are themselves bilingual and bicultural, and sell records on both sides of the border. They exemplify a new U.S. Latino/Latina identity, in all its hybridity and heterogeneity....

If Spanish departments are seriously committed
to Latino literature and Latino studies, they should seek advice from those who pioneered the field, as well as from a new generation of U.S. Latino scholars, hired mainly in English departments. This *nueva generación* is trained in theory, and their appointments are joint positions that intersect and overlap with multiple interdisciplinary programs. What they all have in common is diversity and a common interest in the performative aspect of cultural studies. Indeed, they are as versatile as Ricky Martin and Jennifer Lopez. If new Latino pop stars, as the *New York Times* has said, share an ability to move between different mediums, whether they make records, movies, do television, theater, or the internet, the latest generation of U.S. Latino scholars is also blurring genres, traversing borders. They’re even becoming stars in the academic field with a following of U.S. Latino/Latina graduate students. They are Latinos who have crossed over without silencing their *latinidad*.

“Against the Ostrich Syndrome: Spanish Departments into the Next Century”

*Ilan Stavans, Department of Spanish and Portuguese, Amherst College.*

I want to talk about the total sense of schizophrenia that encapsulates Spanish departments today. By *schizophrenia* I mean dislocation, the feeling, beautifully expressed by Julio Cortázar, of not being quite here, of facing, but not up to, the standard, the challenge of belonging to so fluid a society as ours. Latino studies have erupted, exploded, emerged in the last five, ten years, and are doing so. I foremost to learn the tongue used from the Argentine Pampa to the U.S.-Mexican border, from Madrid to Santo Domingo. Some are fluent in it, others half-fluent, one-fifth fluent, or not fluent at all. A substantial part are non-Hispanics eager to learn who we are.

But no longer can we afford to perceive ourselves solely in that way. Teaching the Spanish language in the United States at the turn of the 20th century is not the same as teaching Russian, German, or Italian. It isn’t even the same as teaching Spanish 20 or 30 years ago. At Amherst College alone, there are more students in Spanish classes than in classes of all other foreign languages. And we are no exception; at institutions like Harvard and Yale, Spanish is by far the most popular language on campus. When we train students in our language, what is it that we tell them? One starts with “¿Cómo te llamas?” but larger, all-encompassing topics soon pop in. Those topics are nothing but a reflection of the Hispanic people–their angst and dreams, their love, friendship, death, and redemption. In the end, it is a map to Hispanic culture, imperfect as it is, that we hand our pupils. They could choose to go to elsewhere to get a similar map: the departments of history, sociology, American studies...But they know that with us they get as close as possible to what William H. Gass calls “the heart of the heart of the matter.”

Are we fully aware of what it means to give them a map? As a graduate of the Spanish department at Columbia University, I hereby testify to the painfully fragmented way we introduce the Hispanic world. The tension that existed in my graduate program between Hispanistas from Spain, the so-called “peninsulares,” and their counterpart, the “latinoamericanistas,” was nothing short of frightening. People with offices across the hallway had legally sued each other and therefore would not sit together at faculty meetings. With few exceptions, the latinoamericanistas were more popular; so the peninsulares felt displaced and unhappy.

That wasn’t really the cause of the tension between the two groups, though. Visitors to Casa Hispánica soon realized that the building was not of this world. Just before you entered the place, you came across scores of Puerto Ricans, Dominicans, and Colombians on the street. They spoke idiosyncratic Spanish, or Spanglish. Indoors, absolutely nothing was ever said about them. The classroom belonged to Lope de Vega and Francisco de Queveda, but not to any Puerto Rican or Dominican author. It was as if one were entering a spaceship programmed to revisit the past but never to explore the present, let alone the future. For instance, the daily affairs of Mexico, my country of birth, had no

The Hispanic world has undergone a profound transformation in the 20th century, on makes its borders almost invisible. It is no easy to separate Spain and Latin America distinct areas of study. Likewise with our own. Where does Mexico end and the States begin? Isn’t Miami the real capital of at least one of them? Like an ostrich, the in Spanish departments have long buried heads in the ground. But the strategy no works. Scores of students are banging at us asking us to present our heritage in a dynamic, even provocative way. The urge today isn’t reality if we are going to allow studies into our classrooms or not. Instead how we should teach the rest of the material: Quixote side by side with *Don Quijote vis-a-vis the Chicano Movement.*

Academics are known to be te dancers—they can hardly keep a tune. And the civilization they study and teach an unbeatable rhythm at its core, the awkwa is all the more apparent. It’s our duty Spanish departments to accelerate, to tune-in step—with the Iberian, Latino, an American communities. It’s about lan what we do, but also about politics, dansine, history....Last night I heard so describe how difficult it is to teach Latinies in Spanish when most of the texts English, or vice versa. But it strikes me a ous that most of the students who come offices use the two languages constantly, ing back and forth from Spanish to Engi why can’t we? Ours is an incredibly contr cavity society: If you come from the lower cl you’re bilingual, you’re penalized. If you’re the upper class and you’re bilingual, yo Rhodes Scholarship. I don’t advocate teac Spanglish, even though I’m proud to s Amherst College is the first institution area to offer special topics courses on not—in Spanglish.

We surely must teach our student Spanish and also remind them wha English ought to be. But we don’t have the two languages into acerbic enemies. We ought to present them as partners.

The Honor Roll

University of California-Berkeley
Diversity, Dissent, and Discovery

by Roger Deitz

Chancellor Robert M. Berdahl reports that the history of the University of California-Berkeley "is the story of building a great public university."

"Berkeley has looked to the future since its very beginnings," he says, "when its founders plotted the campus's boundaries along two forks of Strawberry Creek on its journey to the Pacific." And he adds, "the campus is no longer bounded by the streams defined by two intersecting purposes—to excel in all that we undertake and to serve the public trust in all that we do." Certainly institutions can match UC-Berkeley for academic excellence innovation and for growing beyond its original borders in so bold and modern directions. At UC-Berkeley, students can themselves of unique initiatives such as the Undergraduate Resend Apprentice program that brings students in contact with cutting-edge researchers and right into the high-level research itself. At the same time, UC-Berkeley is at the forefront of minority and American issues and education, and even in touch enough to disabled students program to publish a new teaching manual helps UC-Berkeley professors better understand students with disabilities. It's not just administration and faculty who press boundaries. The Greek system of fraternities and sororities is a of the nation in advocating responsible use of alcohol with a student-taught course on alcohol use and abuse. And the university established a substance-free dormitory several years ago.

There are other legacies. This past year marked the 30th anniversary of high-profile, history-making political protests at Berkeley. The campus remains a vital and actively political environment. Regarding a recent hunger strike and protest by students who accused a decline in commitment to the Ethnic Studies Department, Chancellor Berdhal remarked, "It ended as it should have been, talking until deep-seated misunderstandings were overcome. Ensurances for a strong department were clarified. And for the first time in our history, graduate student instructors at Berkeley across the UC system voted to be exclusively represented by a union affiliate of the United Auto Workers."

Bob Dylan wrote back in the '60s protest movement, "The Times They Are a-Changin'" Nowhere is that more evident than on

The two schools merged to their mutual advantage. On March 23, 1868, the governor signed into law the Organic Act, which created the University of California. The new university used the former College of California's buildings in Oakland until South Hall and North Hall were completed on the Berkeley site (South Hall is still standing), and in September 1873, the university moved to Berkeley with an enrollment of 191 students.

Robert M. Berdahl, University of California-Berkeley chancellor
Architecture marked the growth of the university when Phoebe Apperson Hearst, one of the university's most generous benefactors, conceived of and financed an international competition for campus architectural plans that she stipulated should be worthy of the great university whose material home they are to provide for. The competition was won by a Parisian, Emile Bernard. The London Spectator wrote, 'On the face of it, this is a grand scheme, reminding one of those famous competitions in Italy in which Brunelleschi and Michaelangelo took part. The conception does honor to the nascent citizenship of the Pacific states...'. John Galen Howard, the supervising architect charged with implementing the Bernard plan, took advantage of his 'permission to spare no expense' and developed a style of architecture that 'reinterpret the grace, dignity, and austerity of classical lines to suit the California environment.' Some of the campus most elegant and stately structures were erected during Howard's tenure, including the Hearst Memorial Mining Building (1902-07), the Hearst Greek Theatre (1903), California Hall (1905), Doe Library (1911-17), the Campanile (1924), Wheeler Hall (1917), Gilman Hall (1917), and Hilgard Hall (1918).

In the 1930s, research on campus burgeoned in nuclear physics, chemistry, and biology, leading to the development of the first cyclotron by Ernest O. Lawrence, the isolation of the human polio virus, and the discovery of all the artificial elements heavier than uranium. Fifteen members of the Berkeley faculty have been awarded Nobel Prizes for these and subsequent discoveries, as well as in literature and economics, as liberal arts kept pace with physical science. In 1966, UC-Berkeley was recognized by the American Council on Education as 'the best balanced distinguished university in the country.' The total number of UC-Berkeley faculty is 3,637. There are 499 Hispanics on the faculty roster—9% tenured and 9 non-tenured.

South Hall and the many other stately structures, the oak trees lining Strawberry Creek, and a famous eucalyptus grove are links to the university's beginnings, a more tranquil time reflecting a rural past that still presents a 'park-like oasis' in an urban setting. Today, students study work, and relax among the neoclassical buildings, wooded glens, and parklands that cover 1,242 scenic acres overlooking San Francisco Bay. The new 12,600-seat Haas Pavilion, with twice the seating of the old Harmon Gymnasium, opened in September. A new 2,000-seat theater to house the Pacific Film Archive has been constructed at the new Hearst Field Annex, just west of Hearst Gymnasium. The theater will remain there until the fate of the 'seismically poor' Berkeley Art Museum is decided. The new annex buildings will also be home to some of the faculty, staff, and students in the College of Environmental Design. Wurster Hall, the current home of the college, is under 'seismic repair.'

With more than 40,000 students, a distinguished faculty, nearly 300 degree programs, and alumni in positions of national and international leadership, UC-Berkeley has become a large and complex institution, offering students a vast range of scholarly endeavor and a great opportunity for personal growth. The total enrollment for fall 1999 was 48,570, with 22,600 undergraduate and 8,530 graduate students. For the second year in a row, fees at UC-Berkeley, and the entire UC system, have gone down. With an increase in state funding for California resident students, fees have declined by nearly eight percent in two years. For example, at UC-Berkeley, fees for all but graduate students in the profession schools are $1,046, including student health insurance the 1999-2000 academic year. Entering first-year students for the 1999 totalled 3,673, including 15 international students. There are 4,230 Hispanics in the undergraduate class—1,821 C and 2,472 Latino. That same group included 207 American Indian, Asian American, and 1,139 African American students.

There is much on this campus is of interest to Hispanics and to studying Hispanic culture and issues. Casa Joaquin Murieda, the independent Xicano/o students cooperative in the country has a fixture on the Berkeley campus for 28 years. Casa offers room, and an academic support program for 42 students in a 22-bed home. Established initially and for the Hispanic and /o students, Casa offers tutorials, academic, financial, and personal counseling, groups, seminars, research and writing assistance, a large conference facility, a library, and study halls. Casa Magdalen Mora is a cross-disciplinary program for 27 Spanish-speaking residents who share in the Chicano/Mexican relations and culture. Laura L. Gomez, a foreign student intending to major in business administration, says, 'Casa is a great place to create friendships and meet others who share our cultural background. I loved walking down the hall and listening to the music in my language. It's a great experience.' Vanessa Peña, a more in English, notes, 'At Casa on campus, I feel part of a community. Meeting and getting to know other Latinos, through meetings, and social events, has allowed me to feel like a part of a community. It feels good to belong to a community with such a population on campus. I'm not just one person, I'm part of a whole.'

Support groups include the Chicano/Latino Office of Academic Student Development and the Raza Recruitment and Retention. There is also the Chicano/Latino Studies Department, the Chicano/Latino Studies Collection, and the Center for Latin American Studies. Available too is an undergraduate group major in Latin American Studies, including a balanced curriculum of the history, society, culture of Latin America for students wanting a broader perspective than is usually available through a department major.
NEW YORK UNIVERSITY
Metropolitan Center for Urban Education
Working with Individuals, School Districts, and Cities

BY
Gary M. Stern

Located in the heart of Greenwich Village and attended by more than 35,000 students, New York University (NYU) has always been one of the city's most influential colleges. While its motto is "a private university in the public service," NYU, unlike the City University of New York (CUNY) colleges, has never garnered a strong reputation for helping the often-troubled New York City public school system. But one of its programs, the Metropolitan Center for Urban Education, founded in 1978 and still directed by Professor LaMar P. Miller of NYU's Department of Education, has spearheaded a move to improve education in public schools in the city and beyond.

Funded by the Department of Education, the N.Y. State Education Department, foundations, and grants, the "Metro Center" has an annual budget of more than $6 million and is staffed by 70 or so full-time staff. It describes its mission as "helping local and state education agencies ensure that all students have equal access to education and can meet high standards of performance and achievement." The Metro Center includes the Equity Assistance Center, which addresses issues of desegregation, sexual harassment, and national origin; the New York Technical Assistance Center (NYTAS), a resource center to improve the performance of poorer school districts; the Teacher
for Urban Education and declared its goals as improving "equity, school improvement, and achievement." Twenty-one years later, the Center's mission remains the same.

In its two-decade history, NYU's Metro Center has been in the forefront of major educational changes across New York State. When a judge ordered Buffalo to desegregate its school system, in which its 60 percent White student population attended separate schools from its 40 percent minority population (mostly African American), the Metro Center worked with late Superintendent Eugene Reveille to integrate Buffalo's schools. In the late '80s, when a judge ordered Yonkers to integrate its school system, the Metro Center again offered expertise in professional development and initiating multicultural programs. Indeed, it introduced Yonkers educational leaders to their Buffalo counterparts, since Buffalo at that time was well on its way to integrating its schools.

One way the Metro Center helped Buffalo make its schools educationally strong and appealing to children of all colors was by establishing magnet schools—27 of them. Part of each school's mandate was to populate the school with one African American student for every one White student to ensure a diverse student population. Innovative school designs such as a science curriculum connected with a natural history museum and a science school associated with a zoo established high standards and attracted diverse students. The Metro Center "met with the superintendent, reviewed plans, made suggestions, and ironed out problems," Miller said.

The Metro Center serves as one of the state's 15 Technical Assistance Centers. State Commissioner Mills established these Technical Assistance Centers to improve standards in poorly performing school districts and to help school districts overcome the state's more demanding math and English testing requirements. "The Metro Center," Miller noted, "provides technical assistance to state educators and school districts to improve student achievement" and provides professional development as well. For example, it is working closely with the New York City chancellor's district, which entails 40 failing schools overseen by the chancellor's staff. In addition, it is offering expertise on expanding technology in Manhattan and has spurred change through organizing two conferences focused on improving technology.

As an Equity Assistance Center, the Metro Center serves as a problem-solver, resource center, and teacher training center in poor school districts for New York, New Jersey, the U.S. Virgin Islands, and Puerto Rico. The Equity Assistance Center helps any school or district that is suffering inequities or needs to reform an educational problem. Funded by Title IV Civil Rights Act, the Equity Assistance Center aims to "work with public school districts to reduce segregation and deal with equity issues of national origins," said Lathith Gray, deputy director of the Metropolitan Center for Urban Education.

Public school districts invite the Equity Assistance Center into a school district to address and rectify an inequity. For example, if a school system is suddenly faced with an influx of Russian or Dominican immigrants, it will turn to the Equity Assistance Center for help in training teachers in the use of effective models for English-language instruction. "We assist schools in identifying alternative assessments, help schools look at biased instructional materials, and train them to use multicultural materials," said Gray. The Equity Assistance Center has helped teachers in Newark and Pleasantville, New Jersey, school districts that faced an influx of immigrant students and wanted help in integrating ESL students into mainstream classes.

Issues of segregation and integration are still in the forefront, but problems dealt with by the Equity Assistance Center have grown even more complex and ambiguous over the years. When the Central Islip (Long Island) school district faced an overrepresentation of Hispanic boys in its special education classes, it turned to the Equity Assistance Center for help in assessing students and working them into the mainstream. The Metro Center's Equity Assistance Center helped that district's Special Education teachers revise its handbook, update its policy, review its procedures, and establish a locally based task force to solve problems.

Historically, school systems were ordered by the Department of Education to desegregate, noted Daniel Shanahan, a project associate at the Metro Center who has a doctorate in ESL from NYU. "Now the mission is to decrease isolation on the basis of race, gender, or national origin," he said. A much more complex and
ambiguous task. In order to foster equity in the school, the Department of Education considers the racial breakdown of specific programs, not just the entire school's racial population. The Equity Assistance Center trains teachers in "awareness building, racial or ethnic awareness building, and looking at their own attitudes," Shanahan said.

The issues tackled by the Equity Assistance Center are increasingly multifaceted. "We deal with sexual harassment, bilingual education, isolation of ESL students, and dealing with a racially hostile environment," noted Shanahan. Increasingly, the Equity Assistance Center tackles issues beyond the racial composition of a school. Just because a school has a diverse population doesn't necessarily mean that Whites, African Americans, and Latinos are integrated in classroom and activities. "We're no longer limited to desegregation," asserted Shanahan.

In addition to the Equity Assistance Center, the Metro Center sponsors the Teacher Opportunity Corps (TOC) funded by New York State. TOC encourages minorities who are already teaching to gain their master's degree in math and science at NYU and become teachers in economically disadvantaged school districts. In addition to their NYU graduate course work, the TOC teacher participates in special seminars aimed at dealing with the specific needs of minority and disadvantaged students. "By the time the NYU teacher graduates, he or she is equipped to teach math or science in grades 7-12 at schools such as Boys and Girls H.S., Martin Luther King High School, and Paul Robeson H.S.," said LaRuth Gray. "We've placed 100 teachers in New York City high schools since 1987 and worked with 200 certified teachers," said Gray.

The Metro Center launched the first Upward Bound program in 1983. The program brings 50 students with disabilities to NYU to prepare them for postsecondary education. Most, but not all, are minorities who qualify by being eligible for the federal free-lunch program. Without the support of this program, many of these disabled students would not have been able to gain confidence and academic skills to attend college. A study of the program revealed that 95 percent of its participants improved their math grade by one grade level.

"The Metro Center has for 20 years been working on the policy level in helping to build equity funding. It also provides technical assistance to public schools. The Metro Center is also involved in several projects such as working with after-school improvement centers in Harlem," noted Thomas James, vice dean for the NYU School of Education. The Metro Center sent 80 teachers to work in New York City's schools, a sign of NYU's commitment to improving education on a classroom level, said Dean James. "We don't have high walls around NYU," noted Dean James. "We're part of the City, not an Ivory Tower," he said. He suggested that the Metro Center's commitment to helping impoverished students underscores the NYU School of Education's commitment to public education.

Why has the Metro Center been successful in helping solve educational problems in poor or troubled school districts? Miller replied that "We do things with people, not for people. From the beginning, we were a center that works coopera-

The Metro Center's Upward Bound program, founded in 1983, brings 50 students with disabilities to NYU to prepare them for postsecondary education.
Large Surge in Latinos Taking Test

DESPITE A 62 PERCENT INCREASE SINCE 1990 IN THE NUMBER OF HISPANIC STUDENTS TAKING THE COLLEGE-BOUND ACT EXAM, LATINOS STILL BARELY COMPRISE FIVE PERCENT OF ALL ACT TEST-TAKERS, SAID KELLEY HAYDEN, A SPOKESPERSON FOR THE ACT NATIONAL OFFICE IN IOWA CITY, IOWA.

"THE NUMBERS ARE POSITIVE—BUT NOT POSITIVE ENOUGH," SAID HAYDEN OF THE INCREASE AMONG LATINO TEST-TAKERS, THE LARGEST INCREASE OF ANY GROUP. THE PERCENTAGE OF LATINO STUDENTS TAKING THE ACT HAS GROWN MORE THAN TWICE THAT OF THE TOTAL ACT-TESTED POPULATION. "THE INCREASE HAS OCCURRED LARGELY BECAUSE MORE LATINO STUDENTS ARE BEING ENCOURAGED TO APPLY TO COLLEGE, TO THINK OF THEMSELVES AS GOING TO COLLEGE, AND TO GO TO COLLEGE."

THE ACT TEST, ADMINISTERED SINCE 1959, MEASURES SKILLS IN READING, ENGLISH, MATH, AND SCIENCES. THE TEST IS MORE CURRICULUM-BASED THAN THE SAT, WHICH MEASURES MORE ABSTRACT REASONING IN ENGLISH AND MATH.

THE TOTAL ACT-TESTED POPULATION GREW 25 PERCENT DURING THE SAME PERIOD. A RECORD 1,015,053 STUDENTS TOOK THE TEST THIS YEAR. OF THOSE, 53,330 WERE HISPANIC, UP 2.3 PERCENT FROM LAST YEAR. THE SCORES OF HISPANIC STUDENTS HAVE REMAINED RELATIVELY CONSTANT, WHICH HEARTENED ACT OFFICIALS.

"USUALLY WHEN YOU HAVE INCREASES IN THE NUMBER OF STUDENTS TAKING A TEST, THE SCORES GO DOWN BECAUSE YOU ARE GOING INTO A LESS PREPARED POPULATION," SAID HAYDEN.

AUGUSTINE GALLEGO, AN ACT BOARD MEMBER AND CHANCELLOR OF THE SAN DIEGO COMMUNITY COLLEGE DISTRICT, SAID THERE IS A CORRELATION BETWEEN FAMILY INCOME AND STUDENT TEST SCORES.

"ARE THESE TESTING INSTRUMENTS ESSENTIAL?" GALLEG0 ASKED. "I THINK SO, BUT WE MUST USE OTHER IMPORTANT MEASURES FOR ADMISSIONS—WHERE THE STUDENTS ATTENDED HIGH SCHOOL, WHAT KIND OF INVOLVEMENT THEY HAD IN THEIR COMMUNITY, WHERE THEY LIVED, WHAT THEIR GRADES WERE, THE COURSE PATTERN THEY TOOK, AND OTHERS.

"THESE ATTRIBUTES SHOW PERSISTENCE AND ABILITY—THAT THESE STUDENTS HAVE BEEN ABLE TO SUCCEED DESPITE DIFFICULT OBSTACLES THEY HAVE HAD TO OVERCOME. THEY ARE SURVIVORS. TO RELY ON NUMERIC MEASURES KEEPS A LARGE NUMBER OF TALENTED STUDENTS FROM ATTENDING HIGHER EDUCATION INSTITUTIONS THAT HAVE THE REPUTATION OF BEING PRESTIGIOUS."

THE NUMBER OF LATINOS TAKING THE SAT JUMPED BY 77 PERCENT OVER THE DECADE, AND THE NUMBER OF MEXICAN AMERICANS INCREASED BY 71 PERCENT.

Dr. Max Castillo, president of the University of Houston-Downtown, said that these tests need to be seen as more of a "rite of passage" in the Latino community and that one way to assure that that occurs is by finding a way to provide the tests free of charge to low-income minorities. He said that he and several college presidents have been exploring how to make that idea a reality. Castillo said the state of Texas has taken the idea one step further by allocating $100 million to guarantee college scholarships to low-income students who take college prep courses in high school and requiring the high schools throughout the state to offer those courses.

"AS LONG AS THOSE TESTS ARE USED BY UNIVERSITIES FOR ADMISSIONS, WE SHOULD BE ABLE TO UNDERWRITE THAT," SAID CASTILLO.

THE COLLEGE BOARD LISTS LATINOS, MEXICAN AMERICANS, AND PUERTO RICANS IN SEPARATE CATEGORIES. ACT MAINTAINS THE SAME CATEGORIES, BUT HAYDEN SAID THAT THE ORGANIZATION IS REVIEWING WHETHER HISPANICS SHOULD BE DIVIDED INTO THOSE CATEGORIES BECAUSE THERE HAS BEEN CONFUSION OVER HOW PEOPLE SHOULD IDENTIFY THEMSELVES; ALSO, THE ORGANIZATION HAS NOT BEEN ABLE TO CONSISTENTLY TRACK HISPANIC PROGRESS BECAUSE ONLY TWO CATEGORIES—MEXICAN AMERICAN AND CUBAN/PUERTO RICAN—WERE USED IN THE '80S AND EARLY '90S.

"SOME PEOPLE WANT TO BE CATEGORIZED ONE WAY, AND OTHERS WANT TO BE CATEGORIZED ANOTHER WAY," SAID HAYDEN.

HISPANIC STUDENTS RECORD SIGHT INCREASES ON THE 1998-1999 ACT EXAM IN EVERY CATEGORY EXCEPT ENGLISH. ON AVERAGE, LATINOS SCORED 18.9 OF A POSSIBLE 36, COMPARED TO 17.1 FOR BLACKS AND 21.7 FOR BOTH WHITES AND ASIAN AMERICANS. HAYDEN SAID SCORES FOR LATINOS SHOULD INCREASE OVER TIME AS MORE AND MORE STUDENTS ARE BETTER PREPARED FOR THE TEST.

DR. PIEDAD ROBERTSON, PRESIDENT OF SANTA MONICA COLLEGE, AN HISPANIC-SERVING INSTITUTION IN CALIFORNIA, SAID MORE EFFORT IS NEEDED TO MAKE SURE THAT STUDENTS ARE CHALLENGED IN K-12. SHE SAID SHE UNDERSTANDS THAT MANY K-12 SCHOOLS DO

The number of ACT-tested students identifying themselves as Hispanic has increased steadily in the '90s. This population has, in fact, grown much more since 1990 – by 62% – than the total ACT-tested population, which has increased by 25% in that time. The addition of the phrase (non-Hispanic) to both the Caucasian American/White and African-American/Black identifiers beginning with the 1997-98 school year may have contributed to the increases in Hispanics for 1998 and 1999, but we have no way of measuring that.

not have the funds to do the job by themselves but that many community colleges like hers are stepping in to assist in whatever ways possible.

"The test is nothing more than a confirmation of what has happened before," she said. "We need to ask ourselves what the level of expectation in K-12 is. If we don't teach them there, then how can we expect them to pass a test?"

Students taking core and non-core classes who identified themselves as Puerto Rican/Cuban/Other Hispanic fared slightly better than did Mexican American/Chicano students—196 vs. 186. The results do not include test-takers in Puerto Rico.

In general, ACT officials were pleased with the results among Latino students and students in general. Richard L. Ferguson, president of ACT Inc., said there have been 10 consecutive years of either stable or increased ACT scores among all students, which is unprecedented.

"This is the first time the ACT score at the end of a decade has been noticeably higher than it was at the beginning," Ferguson said. "Over the 1960s, the national score decreased nearly one full point, and in the '70s it fell another 1.3 points. At the end of the '80s, the score was one-tenth of a point above where it was when the decade began. In the '90s, however, we've experienced a significant gain of almost half a point."

ACT researchers found that students who take college prep courses have higher ACT scores than those in non-college-prep courses.

"ACT research indicates that students who prepare academically by taking a core high school program consistently score higher on the ACT assessment than those who do not," said an ACT brochure. "These same students also earn better grades in college. These facts underscore the value of a strong basic program of study in high school."

ACT defines college prep, or core, courses as:

- four or more years of English
- three or more years of mathematics (including algebra, trigonometry, and calculus)
- three or more years of natural sciences (including biology, chemistry, and physics)
- three or more years of social sciences (including history, psychology, economics, geography, and government).

"We've seen a significant increase in students' preparation for college in the last decade," Ferguson said. "In 1989, less than half of the graduates—46 percent—reported taking a core curriculum. This year, 63 percent reported having done so on the basis of their performance on the four ACT tests, members of the class of 1999 appear to be best prepared to succeed in their [first-year] college English and social studies courses."

Among Hispanics, Mexican Americans in core classes scored 196 compared to 174 for those in non-core classes. Puerto Rican, Cuban, and other Latino students in core classes received a 207 score while those non-core students scored 179.

Among Hispanics, Mexican Americans in core classes scored 196 compared to 174 for those in non-core classes. Puerto Rican, Cuban, and other Latino students in core classes received a 207 score while those non-core students scored 179.

"Scores of 1 to 15 indicate that students are likely to need additional pre-college classes or on-campus developmental assistance if they're to succeed in standard [first-year student] courses," Ferguson said. "Even scores of 16 to 19, depending on the subject area, indicate only minimal readiness. Many colleges will expect higher levels of performance from their entering students."

Many educators have expressed concern that Latino students are increasingly attending schools where minorities are the majority population. Those schools, says educators, tend not to offer as many college prep classes as schools where Whites are the majority, making it difficult for minority students to compete for top colleges nationwide. The American Civil Liberties Union has filed a class-action suit against California Education Department on behalf of four Los Angeles high school students, says that the school the students attend, which is 97 percent minority, offers only three higher-level courses compared to 14 at Beverly Hills High with eight percent students of color.

Still, ACT researchers are heartened by the news of more test-takers and the test results. They say the recent performance is especially significant in light of increasing numbers of college-bound female and minority students. In 1989, 54 percent of ACT-tested students were female, and 17 percent were minorities. Today those percentages are 57 and 24.

"This combination of trends—more students preparing for college while achieving higher entrance exam scores—should be welcomed by those concerned about American education, especially as it pertains to college readiness," said Ferguson.

The SAT has experienced similar increases in the number of test-takers. The scores too have been affected by the surge, with mixed results. During the past decade, average scores rose for all racial and ethnic groups except Latinos and Mexican Americans.

Since 1989, the average combined math and verbal score fell by 12 points to 999 for Mexican Americans and by five points to 927 for Latinos. Yet Puerto Rican students increased their average combined score by 28 points to 903, even as 23 percent more took the test.

Over the decade, the combined score rose by 10 points to 1016 for all SAT-takers. There was a gain of nine points on the math section and a single point on the verbal section. Last year's national score stayed about the same as the previous year's. The average verbal score remained at 505, and the math average dipped one point to 511.
Remedial Education at the Crossroads

By Marilyn Gilroy

Community College of Denver Hosts Nationwide Conference

One of the most intense debates in academia during the last few years has revolved around the question of remedial education. What should colleges and universities do about the thousands of students who enter their doors with reading, writing, and mathematical skills that are, on the average, hovering at the 9th grade level?

Until the mid-1990s, most institutions answered this challenge by dramatically expanding their remedial or developmental educational departments. In the last 10 years, college English and math departments across the country have hired scores of faculty members to teach low-level skills courses, most of which did not carry college credit but were required before students could legitimately begin college-level work.

This was not just a temporary solution. The problem of underprepared students did not go away; in fact, it got worse. One writer described the proportion of high school graduates who now require remedial courses when they enter college as growing from a trickle to an "avalanche" threatening to bury public higher education systems such as California and New York with huge costs.

And so the inevitable debate about the merits of developmental education began to surface and swirl around those higher education systems such as the City University of New York (CUNY) that were especially hard hit with large numbers of underprepared students.

New York politicians and CUNY trustees led the charge against remedial education and began to ask: have colleges erred and, in essence, lowered their academic standards to accommodate these students? Shouldn't college be for those who can do college-level work? Indeed. NYC Mayor Rudolph Giuliani proposed removing remedial work altogether from the CUNY system.

Meanwhile, states such as Georgia, Florida, Missouri, and South Carolina have started to abolish or limit remedial programs, especially among four-year colleges and universities.

Increasing numbers of policymakers are promoting the theory that more stringent high school graduation requirements and more demanding college entrance requirements will eliminate the need for remediation at the college level.

At a recent national conference on developmental education hosted by the Community College of Denver, experts converged to discuss these very trends and issues. Conference organizers brought in leaders from around the country to examine the changes in where and how developmental education is being delivered and to hear ideas to meet the challenges of the 21st century.

Conference coordinator Orlando Griego, Emeritus at the Community College of Denver, said the more than 300 participants heard presentations on some of the best:

"Our presenters were top-notch faculty and staff who share a commitment to students in a learning college milieu," said Griego. "Individuals know how to customize assignments to meet new ideas, and they helped make program successful."

CCD was a logical conference site and currently provides one-third of all instruction in Colorado public higher education and has been cited as a model program in several national publications. The college's most diverse higher education institution with a student enrollment that is 54 minority, 61 percent women, and nine persons with disabilities.

In some ways CCD's remedial education program parallels those of many other institutions. Prior to enrolling, students are tested basic academic skills and, according to scores, are placed in appropriate classes. Placement is not mandatory, but students may choose not to enroll in developmental classes.

However, CCD takes this standard developmental education and adds a multifaceted approach, using what it terms a "learner-centered" method of instruction, which officially says has an "enjoyable" approach, focusing on the individual needs of the student. This is accomplished by having student-directed in-class work and requiring students to spend one hour per week in the A Support Center lab. The center is open...
through Saturday, 72 hours per week, and offers students access to faculty, tutors, and technology in the following areas of specialization:

- English as a Second Language—assistance with pronunciation, conversation, grammar, reading, and subject areas
- General Equivalency Diploma—help in passing the Colorado High School Equivalency test
- Reading Study Skills—teaches reading, note-taking, organizational skills, and test-taking techniques
- Math—computerized and personal assistance in math skills and the opportunity to join study groups
- Writing—online writing and instruction on all types of writing at every level
- Special Learning support—tutoring for students with learning disabilities and other unique learning needs
- Student support services—a federally funded program that supports advising and career counseling for low-income students

On average, the Academic Support Center serves 6,000 to 7,000 students during the fall semester. CCD measures the success of these students annually using performance data based on course completion rates, retention rates, and, most importantly, numbers of students who go on to complete their first semester and ultimately continue as degree-seeking students.

According to reports issued by CCD, studies over a five-year period revealed that students using the Academic Support Center had an 82 percent semester success rate, measured by an overall GPA of 2.0 or higher. Even more impressive are statistics that show both White and minority remedial students had significantly higher fall-to-fall retention rates than did non-remedial students in these same categories.

Dr. Byron N. McClennen, president of the Community College of Denver, has written extensively about the CCD program and the need to continue remedial studies in higher education.

*Dr. Byron N. McClennen, president of the Community College of Denver, has written extensively about the CCD program and the need to continue remedial studies in higher education.*

"we must continue to support programs in basic skills as the foundation from which students can advance into college courses and succeed."

But while McClennen's views were echoed throughout the conference and CCD's developmental education program was offered as a beacon of success, there was also a warning note sounded by keynote speaker John Rouche, director of the Community College Leadership program at the University of Texas at Austin. Rouche and his wife, Suann, director of the National Institute of Staff and Organizational Development, have spent the last few years examining the issue of remedial education.

The Rouche's findings have been published in a new report commissioned by the American Association of Community Colleges entitled High Stakes, High Performance: Making Remedial Education Work.

Essentially, the authors warn that "if colleges don't begin to get serious about ensuring high levels of success rates with remedial education, then they will probably find that the job contracted out to other providers." According to the Rouche, community colleges often tout how well they have done in expanding remedial services but have spent little time developing a coherent strategy that addresses the ongoing problems of a "faltering public education system, changing demographics, and burgeoning technologies."

In addition to doing a better job of tracing student success and adopting a performance-based and "results achieved" approach, the Rouche suggest that colleges need to learn from model programs around the country. Some of the recommendations suggest that colleges should:

- Expand collaborative efforts with the public schools. This includes creating a plan for improving student performance from elementary to high school students in order to help them achieve readiness for college.
- Provide a holistic approach to programs for at-risk students. Successful college remedial programs include peer and faculty members as well as support groups. They also supplement classroom work with skill practice and supplemental instruction.
- Employ more collaborative efforts to learn from each other. The Rouche noted that colleges are not reaching out to learn from the success of other institutions, even ones that are nearby.
- Evaluate student and programs outcomes regularly and disseminate the findings. The authors point out that under new federal guidelines taking effect after March 2000, colleges will have to change how they measure and describe their performance or they will risk losing federal funding.

Other recommendations that are based on the characteristics of successful remediation programs include: requiring orientation, abolishing late registration since students who start late are far less likely to finish the semester, and requiring working students to take fewer credit hours.

John Rouche feels passionate about the subject of developmental education and has been presenting his findings at conferences throughout the country during the last few months. He said in a recent interview, "With all that community colleges know today, we should be doing a lot better. We have been providing remedial education for 30 years, and if we don't get serious about it soon, we won't be doing it."
Grand Valley Professor Brings Latin American Literature to Life

By Tim Penning

Alvarez has focused his literature classes on the 1970s and '80s in Guatemala because the U.S. was deeply involved in Guatemala during those years and because those decades generated a groundswell of literary writing in that country.

David Alvarez, an assistant professor of English at Grand Valley State University, found himself struggling to help his students thoroughly understand the Central American subjects of the books he teaches in his course on Central American literature. So he decided to bring a few of them to class.

Alvarez went to Guatemala this past June to interview Guatemalan writers and common citizens. Alvarez traveled with independent video producer Jeff Smith, who is also the director of the Grand Rapids Institute for Information Democracy and works in the city's Community Media Center. Together they videotaped interviews for Alvarez to use in his literature classes to give his mostly White, North American students a reality-based image of the Central American people, places, events, and ideas that they discuss in class based on various works of fiction.

"All literature I teach I do contextually, explaining to students the history and economic and political situations that are described in a story or book," says Alvarez, a native of Gibraltar who is fluent in both English and Spanish. "Latin American literature cries out to be contextualized because of the students' lack of knowledge about that region of the world. Plus, all Latin American countries are going through some form of crisis right now, and writers, sensitive souls that they are, are preoccupied with those conflicts and write about them. We all need to understand that."

Ever the teacher, Alvarez is quick to give an example. He describes the civil war in Guatemala from 1954 to 1996, a war that left deep scars in that country's society. It's a situation that is frequently mentioned in works of literature he teaches in his classes.

For that reason, among the interviews he taped when he went to Guatemala in June was with a representative of the Archdiocese of his students, who feel so remote from the fictitious characters, sitting in their classroom thousands of miles from the scene that is described in their reading assignment, can grasp the story better.

Another interview was with a Mayan woman, a citizen who is no connected with the church, the military, or the government. The woman speaks of her efforts to locate family members who had been missing since the war, and the death threats she received for simply trying to learn the truth about her loved ones. Alvarez says that it's a story somewhat typical of the harsh reality for people living in Guatemala—but something the North American media rarely mention. In fact, says Alvarez, literature is the best way for the typical North American college student to read..."
about this situation in Guatemala and others in Central America.

"There's a palpable climate of fear in Guatemala, even though the war there is over," says Alvarez, who says that his recent trip was a learning experience for him even though he has taught the subject for several years. "In the states, we just don't understand this. It will be good for students to hear about all of this directly from the people who live there."

Alvarez adds that the videotape will help students see as well as hear these real people. He mentions that the Mayan woman he interviewed is a vivid and visible example of a typical character in many books by Central American authors, including the acclaimed and controversial autobiography of Rigoberta Menchú, a Mayan author who describes in detail the Mayan clothing, customs, and more. Menchú has been criticized for fabricating parts of her own history, but Alvarez says her description of Mayan life is accurate. He included this book in the syllabus for his class last semester.

Funding for the trip came in part from the Faculty Teaching and Learning Center at GVSU, a three-year-old office on Grand Valley's campus that provides training and encouragement, often in the form of grants, to help faculty members improve their teaching. GVSU's primary mission is teaching, as opposed to research, and thus the proposal by Alvarez was deemed appropriate.

"I hope to find out whether writers are still preoccupied by the events of the 1970s and '80s and their aftermath or whether they have turned their attention to new themes," he wrote in his grant proposal. "I believe my trip to Guatemala will enhance my teaching by lending my account of life in that vibrant yet troubled nation something of the authority of lived experience. I see my teaching and my presentations as contributing directly to the university's mission of internationalizing the curriculum."

Alvarez, who also teaches in GVSU's Latin American Studies program, has focused his classes on the 1970s and '80s in Guatemala because the United States was deeply involved in Guatemala during those years and because those decades generated a groundswell of literary writing in that country.

"Studying this chapter of Guatemalan history from the perspective of its literary commentators allows North American students to acquire a more nuanced sense of how the U.S. has been perceived abroad," he says.

Alvarez is most pleased with a one-hour interview he conducted with Adolfo Mendez Vides, a 44-year-old considered to be the best Central American writer in his generation. While not well known in the United States, Vides has just had a novel published by a major Mexican-Spanish publisher. Alvarez says Vides is hoping his novel will be translated into English, which would make it available to the vast North American market. If that happens, Alvarez will have a treasure on his hands with the videotaped interview with Vides before he gains large-scale popularity on the level of prize-winning author Gabriel Garcia Marquez of Colombia. For now, Alvarez will show the videotaped interview in class as they read one of Vides' works.

Alvarez had hoped to interview other prominent writers while in Guatemala as well, including Humberto Ak'abal, a bilingual Mayan poet; Marco Antonio Flores, journalist and novelist; and Ana Maria Rodas, a prize-winning feminist poet and journalist. But he was only able to catch up to Vides in the two weeks he was in the country. So for the remainder of his time he pursued his second objective which was to interview the more common members of society. In addition to the Mayan woman, he interviewed land rights activists, human rights workers, relatives of the disappeared, students, artists, workers, feminists, ecologists, and many other representatives of current Guatemalan society.

"Our overriding purpose is undertaking this trip was to discover whether social, economic, and political conditions have changed in Guatemala since leftist guerilla; and the state signed peace accord three years ago, thereby putting an end to four decades of armed conflict," Alvarez explains. "In addition given the United States' role in stifling Guatemala's fledgling democracy in 1954, and also given President Clinton's recent apology to the Guatemalan people for the nature of U.S. involvement in their country, we asked the Guatemalans to tell us what positive actions they thought the U.S. could now take to help consolidate peace there."

Alvarez and Smith have both had professional interests in Guatemala for a long time and have worked with Guatemalan refugees in the United States, helping them gain legal status and social services. While living in Austin, Texas, in the early 1990s, Alvarez worked as a bilingual translator for the Central American Resource Center, a non-profit clearinghouse for information related to the region. He developed a series of programs intending to help refugees orient themselves to life in the United States. Smith has served as an election observer, testi
fied as an expert witness for political asylum cases, and made documentaries on the status of women in Guatemala and human rights violations by the military.

With about 3,000 Guatemalan refugees in west Michigan alone, Alvarez and Smith are taking the videos outside of Alvarez’ classroom and sharing them with the broader west Michigan community. They plan to make presentations in the Community Media Center, on public access television, and at area churches and other colleges. They began this outreach into the community in October, with a presentation to a group of area Hispanic residents at Heartside Ministries, an inner-city organization in Grand Rapids.

"The local Central American population, Guatemalan and otherwise, will really appreciate these interviews," Alvarez says. "In Central America, writers play a social role that they don't have. They are looked at for advice and considered to be politicians."

As they begin sharing the information with classes and other community groups, Alvarez and Smith point out three common themes that emerged from their various interviews. First, for instance, Guatemalans they interviewed pointed out that the government still represses dissent with violence, even though political conditions are more open. Also, those responsible for past repression are not having a good time. A second common theme in the interviews is that the conditions that gave rise to the 40 years of war have not changed, especially the extreme concentration of wealth in just a few members of the population and the corresponding poverty of the majority of Guatemalans. Finally, Alvarez says the interviews suggest that the U.S. government can play a positive role in Guatemala's reconstruction by making classified documents dealing with the repression available to human rights organizations. Alvarez adds that the U.S. should offer economic aid to counter effects of years of warfare, such as underdevelopment. It pains Alvarez that the situations described by the people he interviewed persist and that they still go mostly unreported and unnoticed by the North American media. Alvarez keeps up on the news by reading Guatemalan papers on the internet. In mid-October, he noticed that the front-page news in the daily newspapers of Guatemala carried a story about a judge fleeing the country because of death threats against him and his family. The judge had been in charge of the investigation into the murder of Catholic Bishop Juan Gerardi. Alvarez had interviewed another member of the church about the bishop's murder during his recent trip.

"Today's news confirms what all the organizations we spoke with emphasized, that repression has not ceased but has become more selective," Alvarez says. "But it adds that the spirit of simple resistance is still very strong and hopeful.

"Despite Guatemala's history of violence and exploitation of the mood among the Guatemalans we spoke with was resilient and optimistic," he points out. "Look to internationals for solidarity with their sacrifices to create a Guatemala and the world better for the next 50 years."

In the end, that might be the best lesson for Alvarez' students—and anyone else watching his videos.

Tim Penning is a new information services manager, Grand Valley State University.
Taking Good Care of TRIO
Council for Opportunity in Education Ever Alert

Mounting loan debt for low-income students, the shortage of male students on college campuses, assuring equal opportunity in a post-Hopwood era, and the relationship between TRIO and the newly authorized GEAR UP program were among the issues addressed at the 18th annual conference of the Council for Opportunity in Education, which drew more than 1,600 educators, policymakers, corporate leaders and students to San Antonio in September.

The Council, a nonprofit organization, works with the more than 1,200 colleges, universities, and 160 community agencies that host TRIO programs—Talent Search; Upward Bound, Upward Bound Math and Science, Veterans Upward Bound; Student Support Services; Educational Opportunity Centers; and the Ronald E. McNair Post-Baccalaureate Achievement Program.

Two-thirds of the 780,000 students who participate in TRIO programs each year come from families of four with annual incomes of less than $24,000. Sixteen percent of TRIO students are Hispanic. 39 percent are White, 36 percent are Black, five percent are Native American, and four percent are Asian. More than 16,000 TRIO students have disabilities.

The council conference agenda included time for honoring high-achieving TRIO alumni, including Virginia Martinez Victorin, who emerged from a gang-riddled Los Angeles neighborhood to graduate from the University of California-Los Angeles.

Victorin now directs education and arts and humanities grant programs as a senior program officer at the ARCO Foundation, the philanthropic arm of the nation’s fifth largest oil company. In 1998, the foundation awarded $13.8 million in grants.

Victorin credits the UCLA Upward Bound program with recognizing her potential, which was masked, she said, in a tough veneer.

"TRIO staff challenged my thinking and raised my expectations," she said. "Before Upward Bound, I would have been happy as a cashier, like my mom, or becoming a hairdresser. With me, the TRIO counselors had a big job on their hands. I did not make it easy." But the counselors, she said, recognized the promise and drive despite a "real sense of nonconformity that would have made most counselors turn away."

Also honored with TRIO Achievers Awards were seven members of the Cervantes family, whose humble beginnings gave way to stellar careers in law, education, community service, and corporate America.

The seven brothers and sisters—Guadalupe, Jose, Juan, Manuel, Raquel, Ricardo, and Ramona—credit their parents and the federally sponsored TRIO Programs with opening doors of education and opportunity to them.

The nationally recognized TRIO Programs provide low-income, first-generation college students and students with disabilities the services they need to enter and succeed in college.

"As a result of the TRIO Programs, my education opened doors of opportunities that were previously only a dream," said Jean A. Cervantes, who manages multicultural sales for The St. Paul Companies in St. Paul, Minn., who earned his undergraduate degree in psychology in 1994, is also completing an executive master's degree in business administration from the University of St. Thomas.

His sister, Raquel Cervantes Bethke, was destined for a secretarial career when Marcus Bell, a Upward Bound Program counselor convinced her that she could succeed in college. Cervantes-Bethke graduated in 1970 with a double major in Spanish and sociology.

Today she is an elementary school social worker in St. Paul.

"My parents came to the United States from Mexico with little in terms of personal wealth—my mother did other people's laundry and sold hand-made tortillas and hand-sewn crafts to make ends meet, and my father worked from dawn until dusk in the fields of this country," recalls Manuel Cervantes. The Upward Bound graduate was appointed in 1986 judge to the Minnesota Workers' Compensation Court of Appeals, making him the only third Hispanic judge in the state of Minnesota.

"I consider the support that TRIO provides a catalyst to my success," he says.
Like several of her brothers and sisters, Guadalupe Cervantes-Ortega credits the guiding force of Macalester College TRIO counselor Max Van Riebena with much of her college success. Cervantes-Ortega teaches elementary school in St. Paul.

Ricardo X. Cervantes, an assistant supervisor for housing inspections in Minneapolis, says he has been able to use his college education to "participate in work to improve conditions of so many people and to give back to the community some of what I have gained."

For Ramona C. Garcia, Macalester's TRIO Programs and her degrees in sociology and Spanish served as a bridge to her community and to a successful career as an educator in Edinburg, Texas.

Jose Cervantes, last of the seven brothers and sisters to participate in TRIO, says that the counselors there "took a personal interest in me, as they had known all of my brothers and sisters before me." He graduated in 1974 with a degree in sociology, went on to earn an M.A. in public administration from Hamline University, and today is director of the Minneapolis City Hall/Hennepin County Court House in Minneapolis.

Terry Miller, doctoral candidate in politics at Brandeis University in Waltham, Mass., also received an award. She is currently teaching at Wesley College.

Since its founding in 1981, the Washington, D.C.-based Council for Opportunity in Education has been dedicated to expanding the inclusion of the disadvantaged—throughout the U.S., the Caribbean, and the Pacific Islands.

Last year marked the 35th anniversary of the Higher Education Act—a sweeping piece of social legislation driven by the demands and aspirations of the civil rights movement and by President Lyndon Johnson's conviction that education is one of the most efficient approaches to providing opportunity for America's poor.

1990 also marked the 30th anniversary of TRIO, which got its start with the Economic Opportunity Act of 1964, an act that authorized 18 pilot Upward Bound programs. Next came Talent Search, part of the 1965 HEA. These programs, like Head Start, were part of a vision of a "Great Society" that included all Americans.

In 1968, the term "TRIO" was coined to encompass the three initial programs—Upward Bound, Talent Search, and the newly authorized Student Support Services. Four years later, largely through the strong support of Senator Jacob Javits of New York, an amended HEA authorized a fourth TRIO program, Educational Opportunity Centers, which primarily serve displaced or underemployed workers. A fifth TRIO program, the Ronald E. McNair Post-Baccalaureate Achievement Program, was authorized in 1986.

Another significant step was taken in 1972 when Mr. Walter O. Mason organized the first regional association of TRIO personnel—the Southwest Association of Student Assistance Programs. Initial interests were professional development, evaluation, and research. By 1977, there were nine regional TRIO associations, and there was a TRIO appropriation that had been fixed at $703 million for long enough to suggest that Congress and the Executive Branch had decided to phase out TRIO, which until that time had no effective advocates to speak for its continuation. This would soon change, as the fledgling regional associations began to be involved in policy for the first time.

By the time of the 1976 reauthorization, TRIO associations had mobilized enough support to begin to affect policy decisions. It was not an easy task, because the TRIO community came into the debate late and poorly informed. But Congresswoman Shirley Chisholm of New York was a powerful ally, and with her help, the community was able to raise a $100 million authorization to $300 million.

Equally significant, a training component in TRIO extended professional development opportunities to TRIO personnel. As a result, the TRIO community improved the services it provided disadvantaged students. This led, in the next years, to the "big bang"—a 64 percent increase in TRIO appropriations from fiscal year 1977 to fiscal year 1978. Thanks largely to Congressmen Louis Stokes of Cleveland, actual funding from $85 million to $115 million. This increase gave a real identity to TRIO across the country, while also encouraging the activists to work harder to form a national network.

Organizing the Advocates

In September 1977, Jerry Lewis of University of Maryland invited six TRIO leaders, including Oscar Hernandez, executive director of Project Stay in San Antonio, TX, and M. Perez, director, office of college development at Rio Hondo College, Whittier, Calif., to come together in Columbia. Maryl This group agreed on the need for some kind of national body representing L programs and agreed too on the posed functions of that body: to improve communications; coordinate professional development activities; sponsor related research, seminars, and publications; disseminate technical knowledge and skills; and publish a national directory of EOP personnel. The group also set up a call for TRIO professionals to get together the next year in New Orleans.

The year 1978 in New Orleans marks the birth of The National Coordinator Council of Educational Opportunity Associations; the parent of today's Council had three goals: to form a national association with a legal identity and a permanent presence in Washington; to try to reach a consensus about eligibility for and purposes and function of TRIO programs; and to continue to involve TRIO community in federal appropriations.

By the fall of 1979, the council had agreed on a definition of which students TRIO should serve, and the familiar phrase of "first generation, low-income" (meaning 150 percent poverty) was presented. As to TRIO function, the group developed a series of recommendations to Congress, which were incorporated into a bill that adopted "every recommendation we have given (even our spelling)," according to council archives.

In early 1981, the organization ratified a statement that formally established the Natic Council of Educational Opportunity Association. But it was not an easy time for the new ass
tion. President Ronald Reagan, who had just taken office, did not agree philosophically that the federal government should be paying for TRIO programs.

"But we were convincing in our argument that poverty is a national problem, and we eventually won the war with Reagan," states the archives.

It was not without great effort, effort that the council has needed to sustain over the ensuing years. The council's president of many years, Arnold L. Michem, has been described by a government insider as "the most effective lobbyist in education that I've seen."

A child of the public housing projects on Chicago's West Side, Michem acknowledges that he was a campus rebel and had a difficult time getting through college. But he eventually graduated from the University of Southern Colorado and earned a Woodrow Wilson Fellowship to study history at the University of Wisconsin.

Michem's TRIO affiliation began in 1969 when he took a job as director of Marquette University's new Educational Opportunity Program.

"They were proposing to do what we now call TRIO," said Michem, as reported in the National Journal in '94. "It was a radical idea that wouldn't work." It did work, and, in the middle of the Reagan years, Michem moved to Washington to take on a greater role with TRIO.

The legislative and organizational histories of TRIO and the Council have been closely entwined. Both TRIO and the Higher Education Act of 1965 have proven to be vehicles of opportunity for poor students, empowering America's children with the knowledge and skills inherent in a bachelor's degree, and preparing them for the complex society we all share today.

A Trio of Successes

Franklin Chang-Diaz, the first Hispanic astronaut, received Student Support Services at the University of Connecticut. Participants, who include disabled college students, receive tutoring, counseling, and remedial instruction. The program exists at more than 800 colleges and universities.

John Quiñones, ABC correspondent featured in Prime Time Live, participated in Upward Bound at St. Mary's University. Participants receive instruction in literature, composition, math, and science on college after school, on Saturdays, and during the summer. More than 1,200 programs are now in operation throughout the U.S. Upward Bound Math and Science programs, of which there are now about 80, teaches students computer technology as well as English, foreign languages, and study skills. Veterans Upward Bound programs provide intensive basic skills development and short-term remedial courses for military veterans to help them successfully transition to postsecondary education. Veterans also learn how to secure support from sources such as the Veterans Administration, veterans associations, and various state and local agencies that help veterans. The program serves more than 400 veterans a year.

Henry Bonilla, Texas Congressman representing Texas 23rd District in the U.S. House of Representatives, took part in Talent Search and Project Stay, Inc. Talent Search is an early intervention program targeting students in grades six through twelve. In addition to counseling, students receive information about college admissions, scholarships, and other financial aid. More than 300,000 young people are enrolled in 300 or so Talent Search programs.

The TRIO programs continue to have strong bipartisan congressional support. Congressman Bonilla, one of TRIO's strongest champions, took up the position on the retirement of Congressman Louis Stokes (D-H)., who was historically TRIO's best friend in Congress.

TRIO was appropriated $64.5 million in FY 2000, $15 million more than the President's budget request, as a result of the added support of Congr ...
Racism continues to be a sad commentary on American society. Census statisticians have predicted that in the 21st century, the number of Hispanics will grow larger than that of the non-Hispanic African American population. Will the Hispanic population replace African Americans as the primary recipients of racism?

Americans of different cultural and ethnic backgrounds encounter racial issues in school, the workplace, and community. Issues related to race are a part of the American experience. Children, adolescents, adults, and the elderly confront them on a daily basis. Growing up in America ensures that one becomes race conscious.

As we approach the millennium, demographers predict that America will undergo a significant change in its racial populations. One of these changes is the growth of a multiracial population. Multiracial refers to an individual of mixed heritage. Also, it may refer to people who are mixed by language, ethnicity, and/or culture. Will multiracial Americans have to learn the same lesson that Hispanic Americans, Native Americans, Asian Americans, and African Americans have had to learn? Cornel West has eloquently informed us that race does matter in the United States.

What is racism? Webster's dictionary defines it as a belief that race is the primary determinant of human traits and capacities and that racial difference produces an inherent superiority of a particular race. A review of American history documents the existence of a segregated society. Even today, one finds evidence of a segregated social order. Segregation has its positives and negatives. For example, many ethnic groups segregate to reinforce their own language and culture and to help each other achieve success in our country.

Discussion of racism in the counseling field necessitates a discourse on the development of the counseling profession. The American Counseling Association (formerly the American Personnel and Guidance Association) was officially established in 1952. One of the leading principles of counseling was "guidance is for all." In theory, then, guidance was for everybody. In reality, minorities living in the United States received sub-par or inappropriate guidance and counseling.

The social and cultural climate of this country prior to the 1960s assured Hispanic, African, Native, and Asian Americans a distinct disadvantage in the counselor and in the client. Racism reared its ugly head to make sure that minorities were not involved in building the foundation of the counseling profession. Segregation, racism, discrimination, and prejudice prevented minority counselors from having direct input into shaping the profession. It was not until 1960s that minorities in the United States began to have any say in the development of the counseling field. Since education and counselor training were denied minorities, there existed few qualified minority individuals to counsel people from their same ethnic background.

The White American counselor and minority client were the common counselor dyad during the days of segregation and integration. Part of the reason for this was the low number of minorities in the population in comparison to the White American population.

The years of segregation in the U.S. make possible for American minority clients to shun their counseling skills with clients from same racial background. From them arose cadre of professionals prepared to lead the battle against racism in the profession. Their effort the 1960s addressed some of the inequities experienced by minority clients. One of the acts of these minority counselors was to form new division, now called Association for Multicultural Counseling and Development (AMCD). Few minority counselor educators provided the opportunity to contribute their experience to the counseling literature. Articles, chapters, and books on how to counsel minority clients were not available. However, after establishment of AMCD and the development of their journal, the number of research articles increased. Mono-racial dyads—with counsellor and client from the same racial background—were the norm during segregation and the early years of the counseling profession.

Racism is alive and well in the counseling fields. Multicultural and diversity courses arrived on the counseling scene in response years of racism in the profession. Racism is and multicultural issues are related. Counselors need to be aware of these issues with the ethnic population they are counseling. Much work needs to be done to address their counseling concerns. Race has been found to be a factor in the counseling relationship. Most areas of the counseling relationship have been affected by racism. Racism is considered a significant barrier to the development of the counseling relationship. In the counseling and psychological literature, racism been reported to negatively affect the establishment of rapport, diagnosis, prognosis, and testi
ing.

Saving children from the effects of racism is an admirable goal for counselors. Hispanic other minority groups in the United States have utilized counseling services for first-generation minority group experiences with institutions on the state and national levels. They have convinced them that racism is a fact of life and the quality of assistance rendered. These par
share those experiences with their children, and the cycle continues. I am reminded of a 13-year-old minority female student who had earned a GPA of 35 out of a possible 4.0. She sought out her guidance counselor for advice and direction. The student had aspirations to attend college one day. She went to her counselor so that she could register for the academic courses required for the college track. The guidance counselor denied her request and stated that "The college track would be difficult for you, and I do not want you to fail." The student's parents were both college educated. They intervened and made sure that their daughter would not be denied her rightful opportunity to register for college preparatory courses in high school. She was fortunate. Many minorities are first-generation college-bound and do not have parents with college information to intervene.

Racism in the United States has a lot to do with the color of one's skin. Hispanics might self-identify with any one of the racial categories. Counselors need to know how their Hispanic client self-identifies. Hispanic Americans experience different degrees of racism based on the color of their skin. Thus, White Hispanic Americans might experience racism to a lesser extent than Black Hispanic Americans because they are able to assimilate more easily into the American society. The coloring of America has resulted in viewing race beyond a Black and White issue. The various skin colors of Hispanic Americans are similar to those of African Americans. A racial commonality of these two groups is that some might elect to pass for Anglo.

In an effort to upgrade their counselor training programs, educators at universities added a multicultural counseling course to their curriculum. Its purpose was to train graduate students as effective helpers with all racial minorities. The second effort by counselor educators was to request that diversity issues be infused in all counselor education courses. The current course offerings, however, are not sufficient to prepare graduate students for the challenge of the 21st century. Counseling administrators should consider adding a Practicum in Multicultural Counseling to the curriculum. Today diversity includes so many groups that the concerns and issues of Hispanic Americans and the other minorities are receiving less attention. Minorities continue to be underrepresented among faculty and graduate students in counselor education. You still find today at best one minority faculty member—who is generally expected to be the resident expert on racial issues. Minority graduate students are lucky if they look around the class and find another minority student of the same ethnic background. The coloring of America has not made a significant difference in influencing major reforms in the training of graduate students.

In general, counseling scholars and researchers have hypothesized that race is a factor in the therapeutic outcome of the counseling relationship. However, some writers state that the race of counselors should make no difference in their ability to counsel racial or ethnic minority clients. Both counselor and client bring racial issues into the counseling process. It is important for counselor educators to examine and rectify racial bias found in counselor trainees. It is difficult for counselors to be effective in the counseling relationship unless they have dealt with their own racial biases. This suggests that counselors need to be willing to invest time, energy, and money on their own professional development. Where necessary, the counselor should help clients resolve racial issues that might impede the therapeutic process.

Some of the qualities a counselor might exhibit to overcome racial concerns in the counseling relationship are human empathy, genuineness, unconditional positive regard, and excellent listening skills. I think counselors need to focus on becoming the best human beings they can in order to work with clients from different racial backgrounds. This is a challenge for counselors because it calls upon them to be able to identify their own weaknesses and to work to strengthen them. Counselors should take the time to work on their own personal shortcomings just as their clients do to overcome their problems in life.

In the beginning of the diversity counseling movement, cross-racial counseling dyads consisted of White American counselors counseling Hispanic and African American clients. Hispanic and African American clients were seldom in the role of counseling Anglo American clients. The same could be said for Native and Asian Americans. It is clear to me that cross-racial counseling will be the norm with all racial groups having the opportunity to counsel one another. The one exception will be the expanding category of multiracial people in the United States. For the first time, Anglo Americans will experience minorities and multiracial counselors as helpers. All are members of the human race. As such, there are commonalities enabling racial group members to communicate with one another with a sense of ease and comfort.

Counselors are asked to consider focusing or academic and career concerns of ethnic minorities as a means of establishing rapport and trust. Graduate students are advised to seek a discussion with the client to ascertain if there exist racial concerns of importance to the client. If so, counselors need to begin counseling with a focus or racial concerns, which might hinder growth in clients. Racism in counseling will not be eliminated in the near future. As long as multicultural and diversity counseling initiatives are needed, racism in counseling will be present. Racism and multiculturalism are the same family. Race and multicultural issues are related. Counselors need to be aware of the impact and influence of these issues on the ethnic population they will be counseling.

Life is full of differences. Every day we are challenged to deal with differences. In the 1960s the focus of the multicultural counseling was on differences. Thirty years later, the focus is still on differences. This is because the problems of racism are still in counseling.

It is popular today for many ethnic and cultural groups to self-identify with the diversity movement. Hopefully, their inclusion will not weaken the therapeutic attention needed for racial minorities in the United States. After all, the list of ethnic and cultural groups continues to expand, the efforts of the pioneers of the cross-cultural/multicultural and diversity counseling movement will have been for naught. Ever though counseling is for everyone, racism still lives on. Each minority group member is different, unique, and similar at the same time. The counselor's recognition of that is important.

It is time for multicultural and diversity counseling to focus on similarities. This new emphasis might result in reducing racism in the counseling relationship. Counselors seeking to be effective in the 21st century might want to prepare themselves for working in cross-racial dyads.

Morris Jackson is community programs officer at American University and adjunct professor of counseling at George Mason University.
Tull and Ramos Win St. Francis Writing Contest:
Desiree Tull of Brooklyn Friends School and Shawnee Ramos of Seward Park High School finished in first and second place respectively in the Hispanic High School Writing Contest, sponsored by St. Francis College (N.Y.) and Fleet Bank. The topic was “Why I’m Proud of My Hispanic Heritage.”

Pictured (l. to r.): Dr. Frank Macchiarella, president of St. Francis College, Tull, Ramos, and Steve Kerner from Fleet Bank.

PADRÓN WINS LEADERSHIP AWARD

Dr. Eduardo J. Padrón (pictured r.), Miami-Dade Community College (Fla.) president, was presented with the Florida Community College System’s first Executive Director’s Leadership Award. The award was established to recognize leadership in promoting Florida Community College System objectives statewide.

“Dr. Padrón has shown outstanding leadership in the Florida Community College System,” said J. David Armstrong (l.), executive director of the Florida Community College System. “He worked very closely with me, our State Board of Community Colleges, and our other college presidents as he chaired the legislative committee... of the Council of Presidents. Now, he continues those leadership activities as chair of the Council of Presidents.”

HINOJOSA SPEAKS AT BRONX COMMUNITY COLLEGE AND UNIVERSITY OF SCRANTON

Bronx Community College (N.Y.) and the University of Scranton presented talks by award-winning reporter María Hinojosa in November, in celebration of Hispanic Heritage Month.

Hinojosa, a native of Mexico City, is currently an urban affairs correspondent for CNN in New York and the host of National Public Radio’s Latino USA. She has been reporting for CNN for six years and is the author of Creosú--Gang Members Talk to María Hinojosa. Her recent book, Raising Roxy (see listing in Publications section), is a personal account of the challenges of raising a Latino child in a multicultural society. Hinojosa was named by Hispanic Business Magazine as one of the “100 Most Influential Latinos in the United States.”

At the University of Scranton (Penn.), Hinojosa’s topic was “The U.S. Mambo: One Step Forward, Two Steps Back—the State of Latinos in America.”

ARAGON DIRECTS SEED AT COLORADO-BOULDER

David Aragon, former associate director of the University of Colorado-Boulder’s Minority Engineering Program, returned to the campus as director of the nationally recognized program, now called Success in Engineering through Excellence and Diversity (SEED).

“I’m very excited about this opportunity. It’s a great challenge for me personally,” said Aragon.

The SEED program has the highest minority retention rate among engineering institutions nationwide, according to study by the National Action Council for Minorities in Engineering, published in September 1999.

The program focuses on African American, Hispanic, and Native American students who are underrepresented in the college and in the field of engineering nationally.

CARDOZA HEADS COLLEGE BOARD’S WESTERN REGION

Dr. Raul Cardoza, provost and vice president of National Hispanic University in St. Jose, Calif., is new executive director of The College Board’s Western Region.

“I am thrilled that Dr. Cardoza will be leading efforts in our Western Region because his diverse experience in the California education system will be an asset in a region experiencing rapid growth,” said College Board president Gaston Caperton.

Cardoza, who succeeds former Western Region executive director Richard Pesqueir has both a bachelor’s and master’s degree from CSU-Los Angeles and a doctorate from UCLA.

Cartagena Addresses Latino Images in Media at Nassau Community College

What and who are missing in this year’s television season? Why are minorities often depicted in a negative, stereotypical light? Chiqui Cartagena (picturred), editor of TV Guide Español, answered these questions while addressing the lack of Latino and African American images in mainstream media.
Currently the Hispanic Development Consultant for TV Guide. Cartagena has developed a series of Spanish-language, TV Guide-branched products designed to increase circulation by attracting new Hispanic users to TV Guide's new multi-media platform.

Garza Establishes National Council for Community and Educational Partnerships

Hector Garza, vice president of the American Council on Education's (ACES) Division of Access and Equity Programs, took a two-year leave of absence to start up a new organization, the National Council for Community and Educational Partnerships (NCCEP).

NCCEP is an independent, nonprofit organization. Under Garza's leadership, the partnership council will work to bring together colleges and universities with local schools, government, businesses, and community-based organizations to foster programs to increase educational opportunities for low-income families and first-generation college students, including minorities.

"America needs all of its children to succeed," said Garza.

Tullos Garcia Receives 1999 Mujer Award

The National Hispania Leadership Institute (NHLI) presented Hispanic educator Mary Lou Tullos Garcia with the 1999 Mujer Award at the 7th Annual Mujer Award Gala, held in November at the Walt Disney World/EPCOT American Adventures Pavilion. Each year, the event pays tribute to a Hispanic woman who has served her community and acted with justice, love, and deep pride in her culture.

Tullos Garcia, teacher and department head of the special education program at Coakley Junior High School in Harlingen, Texas, has dedicated her life to the improvement of schools and schooling for severely and profoundly disabled Hispanic students. Her stated philosophy is, "A glimmer of hope is a glow of accomplishment." She has both a bachelor's degree and a master's from the University of Texas. She also has special certification in learning disabilities, mental retardation, and kinesiology from the University of Texas-Southmost.

Romo Installed as Texas-San Antonio President

Ricardo Romo was installed as the fifth president of the University of Texas-San Antonio (UTSA) at a convocation in October during which he received the university's presidential medalion from UT system Chancellor William H. Cunningham and UT system Regent Patrick Oxford.

Romo is the first Hispanic to lead UTSA, which ranks fifth nationwide in undergraduate degrees awarded to Hispanics in H.O.'s annual ranking of colleges and universities.

"Thirty years ago, a new vision was born when the promise of hope and opportunity was made to the citizens of South Texas of receiving a first-class university for San Antonio," said Romo. "We, all of your support, intend to keep that promise."

Hernandez Trejo Lectures at New York University

Helmo Hernandez Trejo, president, Ludwig Foundation of Cuba, gave a lecture and slide presentation on Cuban art and culture at New York University in November. His presentation discussed Cuban artists' expressions and responses to the dramatic changes in Cuban cultural, socioeconomic, and political experiences at the end of the millennium.

As a result of cultural and educational policy, Cuban art has experienced a strong and particular development. Despite being closed to the avant garde movements of the western world, Cuban artists have been involved in their country's history and its sociopolitical developments by addressing issues of independence, race, gender, isolation, under-development, and culture.

New Mexico Leaders Speak at UNM

Six of New Mexico's leaders presented lectures during the fall 1999 Chicano/a Speakers Series at the University of New Mexico (UNM). The purpose of the lecture series is to give students and the public the opportunity to hear their elected officials and community leaders, said Steve Martinez (pictured), UNM Chacoan studies instructor.

New Mexico Senate President Pro Tem Manny Aragón and New Mexico Speaker of the House Raymond Sánchez began the series with "Chicano Leadership in the New Mexico State Legislature" U.S. District Judge Martha Vázquez and Lillian Apadona, president of the National Hispanic Bar Association, presented "Judgeship and the National Hispanic Bar Association." New Mexico Secretary of State Rebecca Vigil-Girón and State Sen. Linda Lujan gave "Hispana Political Leadership in the State of New Mexico."

Rivera Oversees Student Development at Del Mar

Jose R. Rivera, dean of Del Mar College's (Texas) division of student development, is overseeing support services that ensure students reach their academic goals.

"I plan to continue to build upon the student services that already exist at Del Mar," said Rivera, who assumed his duties in September. "Student development will never arrive at the point of being perfect, but we'll always continue to revise and modify services to our students need."

Rivera, who attended San Jacinto College, has a bachelor's degree from the University of Texas-El Paso and master's from Our Lady of the Lake University. While employed at Richard J. Daley College, he was named "Innovator of the Year."

Tijerina Donates Papers to University of New Mexico

Reyes Lopez Tijerina officially donated his political papers to the University of New Mexico (UNM) General Library.

A controversial figure in New Mexican history, Tijerina—pictured (p.36) holding up a map to explain New Mexico's land grant history and ties to Mexico—is remembered for his activism with land grant issues in the northern part of the state. He became
Tijerina is pictured shaking hands with local community member Christopher Martinez, as Martinez' father Elmer looks on.

Southern Colorado's Sandoval Addresses International Scholars

Dr. David A. Sandoval, professor of history and Chicano studies at the University of Southern Colorado, presented "Conquest, Commerce, and Conspiracy: Mexican Merchants During the Mexican War" at the 4th International Congress of the Americas in Puebla, Mexico, at the Universidad de las Americas campus in September.

The conference, attended by more than 1,000 scholars from around the world, was organized with the support of the American Academy of Political and Social Science, the American Culture Association, the Canadian Embassy, the Hoover Institute at Stanford, Phi Beta Delta Honor Society, the Popular Culture Association, the U.S. Embassy, and the William and Flora Hewlett Foundation.

Amateur Boxer Gomez Acts in Irvine Valley Theater

Irvine Valley College (Calif.) presented the musical comedy Good News, a boy-meets-girl story with more than 30 song and dance numbers, including many old Broadway favorites.

Set in a small-town college, the plot revolves around a boy, a girl, and a football game. Directed by Ron Ellison, the musical starred Irvine Valley College talent Patrick Rowley, Claire Broderick, and Alphonso Gomez.

Gomez, a U.S.A. native National Boxing Champion, was invited to compete for Mexico in the Olympic Trials, which took place during a production break on Thanksgiving weekend.

Author Santos Visits the New School

Santos combines memoir with ancient Mexican history and travel and landscape in his book. Connecting the history of his family to the story of Mexico itself, his book reaches back to the time of the conquest to find the sources of which the Mexicans, part Spanish, part Indigenous, were to become. Born and raised in San Antonio, Texas, Santos spent much of his time moving north and south across the Mexican border while growing up.

Other participants in the "Mexico in Print" series were Neil Baldwin, Pete Hamill, and Friedrich Katz.

Spanish Professor Translates Borges Collection

Often called the most influential writer of 20th-century Latin American fiction, the metaphysically inclined Jorge Luis Borges was equally eloquent in his poetry and nonfiction. Borges' characteristic erudition and versatility are showcased in the volume Jorge Luis Borges: Selected Non-Fictions (Viking Press).

Among the translators of this 600-page book is University of California-Santa Barbara professor of Spanish and Portuguese Suzanne Jill Levine, who has helped bring to the English-reading public the works of Guillermo Cabrera Infante, Jose Donoso, Julio Cortazar, Adolfo Bioy Casares, Severo Sarduy, and Carlos Fuentes. She is the major translator for Manuel Puig; Levine's latest book is the first biography of Puig, Manuel Puig and the Spider Woman: His Life and Fictions (Farrar, Straus and Giroux).

Arte Público Press Celebrates 20th Anniversary

Arte Público Press, a showcase for U.S. Hispanic literary arts and culture, celebrated its 20-year anniversary with a gala fundraiser to benefit the Press; Pifafri Books, its imprint for children and young adults; and its Recovering the U.S. Hispanic Literary Heritage Project.

"When we set out on this great literary adventure, we were realistic enough to view our future one book at a time," said Dr. Nicolás Kanellos, founder and director of Arte Público Press and holder of the Brown Foundator Chair at the University of Houston (Texas).

As part of the celebration, Arte Público Press inaugurated the city of Houston with daily literary events at area schools, libraries, and community centers featuring numerous award-winning writers from around the country including Graciela Limón and Victor Villaseñor.

NACME Names Texas-San Antonio Top for Retention

According to a research study conducted by the National Action Council for Minorities in Engineering, the University of Texas-San Antonio (UTSA) offers minority engineering students greater opportunities for success than any other minority-serving institution in the nation.

The study, "Keeping What We've Got: The Impact of Financial Aid on Retention in Engineering," documents graduation rates for African Americans, Latinos, and American Indians at more than 100 engineering schools across the country. The minority retention rate at UTSA is more than twice the national rate, according to the study.

Motorola Gift to Southwest Texas State Physics Program

Motorola of Austin, Texas, donated more than $260,000 worth of specialized material and equipment useful for semiconductor industry-related training to Southwest Texas State University (SWT). The donation supports the university's materials physics and engineering technology programs, which wor
together to educate students for careers in the Central Texas region's growing high-tech industry.

Carlos Gutierrez, SWT professor of physics, said the gift lends further credence to his belief that "it takes an industry to educate a worker. The more involved the industry can become and the more partnerships that can be forged between education and industry, the better educated and prepared our workforce will become."

Mexican American Awards at Loyola Marymount

The Loyola Marymount University (Calif.) Mexican American Alumni Association held its 18th Annual Scholarship Benefit, awarding $50,000 in scholarships to 47 deserving students.

In the wake of Chile's military coup of 1973, more than a thousand dissidents were arrested, tortured, and murdered. The play is a memorial and homage to the "disappeared" community leaders of Yumbel, drawing parallels between the religious martyrdom of the town's patron saint and the political martyrdom of its leaders. The topic is still current as former Chilean dictator Augusto Pinochet is beginning to be held accountable for the many disappearances and tortures that occurred during his regime.

Grand Valley Hosts Multimedia Brazil Fest

The Latin American Studies Program at Grand Valley State University (GVSU) in Michigan and the Grand Rapids Community Media Center sponsored "Brazil '99 Medialife."

The event offered Brazilian-made videos on topics such as soccer, land struggle, women's empowerment, citizenship, gender and racial stereotyping, teen expression, poverty, memory, and the maldistribution of food. Cliff Welch (pictured), a GVSU professor who specializes in Brazilian history, and Rodrigo Ascunpao, a Sao Paulo community media activist, joined others in a panel discussion, offering clarification of contemporary Brazilian reality as reflected in the videos. The event also featured a dance workshop and Brazil's national dish, "feijoada."

Newsmakers at DePaul University

Martin R. Castro (at l.), a partner at the international law firm Baker & McKenzie, was elected to DePaul University's (Ill.) board of trustees. Castro represents corporate clients in commercial and international litigation while acting as the hiring partner for his firm's Chicago office and heading the firm's national attorney divers effort. He is a member of many legal associations, including the American, Illinois, Chicago, and Hispanic bar associations.

DePaul named former Illinois State Sen. Jesus Garcia (at r.) a community fellow in the university's Egan Urban Center and Center for Latino Research. The one-year fellowship involves research initiatives at the two centers, including an oral history project being organized by the Center for Latino Research.

News from Rio Hondo College

Dr. Richard Arvizu (pictured) is the new executive dean, institutional planning and effectiveness, at Rio Hondo College (RHC) in California. Arvizu's diverse academic and professional engineering experience, coupled with his strong organizational skills, make him an ideal candidate to oversee facilities, technology, research, and planning. Arvizu has a master's degree from California State University-Dominguez Hills, another from the University of Southern California, and a doctorate from United States International University.

RHC recently presented the exhibition "Mexico, Influence" in the college art gallery. The display showcased paintings and drawings by 13 Southern California artists who, influenced by living or traveling in Mexico, produced work reflective of the visual vitality and cultural complexity found below the border.

Tufts University Showcases Chicana Art

Tufts University Gallery (Mass.) recently displayed "Imagenes e Historias/Images and Histories: Chicana Altar-Inspired Art," a one-of-a-kind exhibition portraying altar-inspired art by Mexican American women artists.

"Although home and public altars are not exclusive to the Mexican American culture, they are central to the spiritual and home..."
experience of all of us,” said guest curator Constance Cortez, assistant professor of art history at Santa Clara University. “These altars are multifunctional, where religion is affirmed, desires for the future are voiced, and social and personal histories are merged.”

Artists featured in the exhibition: Delilah Montoya (whose photo mural “La Guadalupe,” 1998, is pictured here), Anna Ruth Jaquez, Tina Fuentes, Connie Arismendi, Kathy Vargas, Gloria Osuna Prez, Barbara Carrasco, Ester Hernandez, Celia Herrera Rodriguez, and Marta Sanchez.

In the News at Florida Southern College

Dr. Luis A. Jimenez, professor of Spanish at Florida Southern College (FSC), has written Hispanic Women Voices at the Turn of the Century, a collection of 44 essays about women writers in South and Central America and the Caribbean between 1800 and 1900. Jimenez says the women are “pioneers” in their quest for women’s education and for their insistence on equality between the sexes and articulate in clear fashion the first public manifestations of Hispanic women’s right to suffrage.

Al Burt, one of Florida’s premier journalists, spoke at FSC as part of the 1999-2000 Florida Lecture Series. Burt has won numerous national and state awards, including the Ernie Pyle Award for stories written about Cuba in 1961. His two most recent books, Al Burt’s Florida: Snowbirds, Sandcastles, and Self-Rising Crackers; and The Tropic of Cracker are both available from the University Press of Florida.

Kean Opens Multimedia Technology Center

Kean University (N.J.) opened an advanced technology center that provides a unique combination of instructional resources as part of the university’s new Global Reach program.

Kean University president Ronald Appbaum, pictured here (c) cutting the ribbon during the center’s opening with Kean University Student Organization President Henry Ambroise (l.), explained that this technology was part of Kean’s mission to improve the quality of education offered to its students and to bring the outside world onto the Kean campus.

“Sitting at any workstation, our students are able to interact with students from Barcelona, Beijing, or Stockholm,” said Appbaum.

South Mountain Participates in Groundbreaking

The citizens of Guadalupe, Ariz., witnessed the beginning of an enterprising building project during a groundbreaking ceremony in October. The project will add 45,000 square feet of space for recreation, education, and community services.

Speakers at the ceremony included Guadalupe mayor Frances Osuna, vice mayor Veronica Flores, and town manager Luis Gonzales; Ramon Elias, president and CEO of the Boys and Girls Club of the East Valley; Dr. John Cordova, president of South Mountain Community College (SMCC); Linda Rosenthal, president of the Maricopa Community College District Governing Board; and Mary Rose Wilcox, Maricopa County supervisor.

Facilities for the town, the Boys and Girls Club, and SMCC are expected to be completed by November.

First-Ever Presidential Inauguration at Grand Rapids

For the first time in its 85-year history, Grand Rapids Community College (GRCC) in Michigan held an official ceremonial presidential inauguration. Dr. Juan Olivarez, appointed president in February 1999 by the trustees, is the first president to be so honored.

More than 1,200 community members—including representatives from local, regional, and state government; West Michigan business and educational communities; and GRCC students, alumni, and employees—attended the ceremony.

During the past 84 years, the Rapids Public School system oversaw appointments of GRCC’s leaders.

Cal Poly-Pomona Hosts Ninth Luncheon

California State Polytechnic University Pomona, in an effort to prove that a campus community can come together and work to create a better learning and living atmosphere, held its ninth annual Unity Luncheon. Keynote speaker Lecia Brooks, human rights consultant to the Los Angeles County Commission on Human Rights, addressed the audience that each person needs to contribute to honest dialog every day.

The event was sponsored by five opus organizations: the Latino Faculty and Student Association; the Native American Outreach Committee; the Black Faculty Staff Association; the Asian and Islander Faculty Staff, and Student Association; and the Gay, Lesbian, Bi and Transgender Faculty/Staff Association.

Cal Poly-Pomona President Bob also was a key speaker.

Arizona State to Increase Min Graduate Degrees

ASU The National Science Foundation awarded $2.5 million to State University (ASU) for a five-year increase minority graduate degrees in science, mathematics, and engineering.

Working with other universities, ASU will boost the number of underrepresented minorities qualified for positions on
university faculties and in the high-tech work force. ASU wants to increase by 75 percent the number of master’s degrees and to double the number of doctorates received by minorities in these fields, all in five years.

In 1996, only one Mexican American received a doctorate in computer science and one American Indian earned a doctorate in math in the entire U.S., according to the National Research Council.

NYU Hosts Cuban Culture Conference

New York University (NYU) hosted a three-day international conference on the impact of Cuban culture on the U.S.

"Cuba: 170 Years of Presence in the United States," at NYU’s King Juan Carlos I of Spain Center, explored diverse manifestations of Cuban culture, including Cuban participation in baseball and popular music, as well as Cuba’s intellectual, entrepreneurial, political, and artistic contributions. Participants included Lisandro Pérez, director of the Cuban Research Institute, Florida International University; William Lewis, Vanderbilt University; Carlos Victoria, El Nuevo Herald, Miami; Antonio Benitez Rojo, Amherst College; Leonardo Acosta, Cuban musicologist; Gustavo Pérez Firmat, Columbia University; and Roberto González Echevarría, Yale University.

Ford Foundation Minority Fellowships Awarded

The National Research Council of the National Academies awarded Ford Foundation minority fellowships, seeking to increase the presence of underrepresented minority groups on the nation’s college and university faculties.

The Ford programs provided funding for 117 nationally competitive grants to support the studies of 51 beginning graduate students, 33 students writing their dissertations, and 29 recent doctorate recipients. Their areas of interest cover mathematics, engineering, education, humanities, and social, physical, behavioral, and life sciences. The current fellowship pool includes 31 Mexican Americans, 13 Puerto Ricans, and 1 John Garcia, political science professor at the University of Arizona, was a keynote speaker at the program’s annual conference, held in October.

Pictured here at his conference presentation is Peter Barbosa, associate professor of microbiology at California College of Podiatric Medicine, Ford Fellow in 1991-92, who researches the molecular events underlying the replication of the AIDS viruses.

Cal State-L.A. Hosts Latin American Studies Conference

California State University-Los Angeles hosted the Pacific Coast Council on Latin American Studies conference “Latin America on the Brink of the Millennium: Retrospect and Prospect,” an annual event promoting wider interest and academic learning in Latin American studies.

More than 100 participants delivered presentations dealing with several disciplines in the areas of Latin American studies, such as social sciences, humanities, natural sciences, environmental studies, Chicano/a studies, and the study of the Latin American diaspora.

The conference was organized by Cal State-L.A. faculty members Dr. Peter Sigal, assistant professor of history; Dr. Ignacio López-Calvo, assistant professor of history.

Kevin Danaher (pictured) from Global Exchange delivered a keynote speech, “Democratizing the Global Economy: The Case Against the World Bank, the International Monetary Fund, and the World Trade Organization.”

News from the White House

Congressional leaders and the White House reached an agreement in principle that will preserve the President’s plan to hire 100,000 teachers over the next six years to reduce class size in the early grades.

The agreement ensures that all teachers hired under the class size program must be fully qualified. Teachers must be certified in their state or have completed an alternative route to certification, must have a baccalaureate degree, and must know the subjects they are teaching and demonstrate the skills to teach them.

Latino Psychological Association of N.J. Holds First Meeting at Montclair

The Latino Psychological Association of New Jersey held its inaugural meeting at Montclair State University (MSU) in November.

The mission of the group is “to serve as an advocacy group with regard to the education of psychologists and other mental health professionals in the advancement of mental health research, training, and the treatment of Latinos in the state of New Jersey.”

The association’s board of directors are president, Dr. Robert DeVeGris McCormick, director of MSU’s Hispanic Institute; vice president, Dr. Magda T. Garcia of MSU’s psychology department; treasurer, Dr. Milton Fuentes of MSU’s psychology department; secretary, Riva Bennett; members-at-large, Maria Xiques and Ricardo Martinez.

Madonna Holds Multicultural Affairs Open House

The office of multicultural affairs at Madonna University (Mich.) held an Oper House in September. More than 200 people attended the event, which featured drum demonstrations by Osvaldo Rivera (pictured at drums), the director of the office of multicultural affairs; samples of ethnic foods; and presentations on services provided by the office.

“It is important for all students to understand that an appreciation of diversity is the interests of all U.S. citizens, not just for people of color,” Rivera said. "The world and the United States are becoming more diverse and we should be prepared for that. If we do, then all will benefit."
PUBLICATIONS

Healing South, Looking North: A Bilingual Journey
by Ariel Dorfman

In this memoir, Ariel Dorfman describes an extraordinary life, torn between the United States, South America, and his Jewish heritage, between English and Spanish, between revolution and repression. Interwoven with the story of how Dorfman switched languages and countries—not once, but three times—is a day-to-day account of his multiple escapes from death during Pinochet’s military takeover in Chile in 1973.

Raising Raúl: Adventures Raising Myself and My Son
by María Hinojosa

This book takes us on María Hinojosa’s adventure as she struggles to become both the mother she wants to be and the woman she wants to be. With the insight and passion of her award-winning journalism, she gives us a story of personal history and self-discovery, and of all the fear, joy, and challenge that comes with being a woman today.

After Exile: Writing the Latin American Diaspora
by Amy V. Kaminsky

Can an exiled writer ever really go home again? What of the writers of Argentina, Uruguay, and Chile, whose status as exiles in the 1970s and 1980s largely defined their identities and subject matter? This book takes a critical look at these writers, at the effect of exile on their work, and at the complexities of homecoming—a fraught possibility when democracy was restored to each of these countries.

The Mexican American Heritage
by Carlos M. Jiménez

Covering Mexican American history from pre-history to the present, this textbook features contributions from both men and women. It includes writing exercises at the end of each chapter; it contains 32 full color plates and more than 40 black and white photographs and illustrations; and an index. Author Carlos M. Jiménez is a history teacher at Garfield High School in Los Angeles, Calif.

An Unfinished Memoir
by José Limón

Both as dancer and choreographer, José Limón electrified audiences from the 1930s to the 1960s. With his striking good looks and charismatic presence, he was American modern dance’s first male star. This book includes a complete list of Limón’s works, richly informative notes, rare photographs, and a detailed bibliography. Edited by Lynn Garafola.

Empress of the Splendid Season
by Oscar Hijuelos

This book tells the story of Lydia España, beautiful and formerly prosperous émigré from pre-Castro Cuba, who becomes a cleaning lady in New York. Once the spoiled, pampered daughter of a small-town mayor and adored by men, she is forced by a youthful indiscretion to leave home and, in 1947, finds herself suddenly living the life of the working poor. Throughout this novel, Lydia remains a sensible and powerful woman—an empress of fortune, of dignity.

The Notebooks of Don Rigoberto
by Mario Vargas Llosa

Don Rigoberto, an insurance executive, has separated from his wife Lecenia in the aftermath of her apparent inappropriate relationship with her son Alfonso. Obsessed with the erotic painter Egon Schiele, Alfonso—a fay, angelic creature—tries to convince Lecenia to make up with his father. This book is a seductive tale of desire and jealousy, innocence and cannibalism, and art and life. Translated by Edith Grossman.

Nationalist Myths and Ethnic Identities: Indigenous Intellectual and the Mexican State
by Natalia Gutiérrez

This timely study examines the processes by which modern states are created within multi-ethnic societies. How are national identities forged from countries made up of peoples with different...
and often conflicting cultures, languages, and histories? How successful is this process? What is lost and gained from the emergence of national identities?

**Spanish Film Directors (1950-1985): 21 Profiles**
by Ronald Schwartz

This book presents essays on virtually every Spanish film director since 1950 (and known to American audiences). It limits itself to films produced and directed in the Iberian peninsula, sound films of feature length, and live action film, with occasional forays into the areas of documentary and "experimen-tal" films.

**Picture Collections in Mexico: A Guide to Picture Sources in the United Mexican States**
Martha Davidson, Carla Duarte, and Raúl Solano Núñez, eds.

This book is a directory of more than 500 public and private collections of pictorial documents created and preserved in the United Mexican States.

**Spain at the Crossroads: Civil Society, Politics, and the Rule of Law**
by Víctor Pérez-Díaz

This book explores the trials of Spanish democracy from the death of Franco to the present. The author probes the roots of the scandal, corruption, and serious law-breaking that occurred in the 1990s—crimes that shook the country's confidence in its legal and political institutions and in its ability to hold its leaders to the rule of law.

**Blood of Requited Love**
by Manuel Puig

Set in a provincial Brazilian town, this inventive novel is a series of questions and confeSSIon-AL answers, an internal dialogue between Josemar, a construction worker, and Maria, a privileged young woman. Looking back at the teenage passion they shared in the summer of 10 years, they try to reconstruct their story despite the obstacles of time's passage, social disapproval, and family pressure. Translated by Jan L. Grayson.

**Contemporary Spanish Film from Fiction**
by Thomas G. Deveny

Cinema often relies on novels or short stories for narrative material. This book examines cinematic versions of post-Civil War narratives that had their debut during three key decades of recent Spanish cinema (1965-1995).

Many publications featured in this section are available through amazon.com.

---

**CONFERENCES**

**AAC&U 86th Annual Meeting**
January 20-22

The Association of American Colleges & Universities presents "Greater Expectations Of Our Students, Our Stakeholders Ourselves," its 86th annual meeting. In Washington, D.C.

In addition, see Web site at <www.aacu.edu.org> for information on four regional (San Antonio, Philadelphia, Tacoma, and Charleston) "Network for Academic Renewal" meetings.

Contact: (202) 387-3760; e-mail, <meetings@aacu.nw.edu>; Web site, <www.aacu.edu.org>.

**AAHE 8th Conference on Faculty Roles & Rewards**
February 3-6

This year's theme: "Scholarship Reconsidered: Update and New Directions," emphasizing the scholarship of teaching and learning, of engagement, of integration and synthesis, and of discovery, plus academic careers for a new century. At the Hyatt Regency Hotel, New Orleans.

NAFEO 25th National Conference
February 15-17

Contact: (301) 650-2440; Web site, <www.nafeo.org>.

NAEBO 2000/Millennium Conference
February 15-19

The National Association for Bilingual Education's five-day event includes keynote speakers, and more than 200 workshops, symposia, papers, and demonstrations focusing on the education of language-minority children and the development of multiculturalism and cultural understanding. In San Antonio, Texas.

2000 NAWE Conference
February 24-27

The National Association of Women in Higher Education presents its annual conference on Advancing Women in Higher Education. Featured speakers will be Judith Sturmick, director of ACE's Office of Women in Higher Education, and Sheila Kaplan, president of Metropolitan State College of Denver, Colorado.

Contact: NAWE, (202) 659-9530; e-mail, <nawe@nawe.org>; Web site, <www.nawe.org>.

NAHLS National Conference
February 21-26

The National Association of Hispanic & Latino Studies' national conference will take place this year in Houston, Texas.

For additional information: Dr. Lemuel Berry, Jr., Executive Director, NAHLS, Morehead State University, (606) 83-2650.

ACE 82nd Annual Meeting
March 18-21

NAHP Convention 2000
March 29-April 1

The National Association of Hispanic Publications presents "the Hispanic print event of the new millennium" at the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tobar, Executive Director/CEO, (202) 662-7250.

AAHE 2000 National Conference
March 29-April 2

The American Association for Higher Education's 2000 national conference has as its theme "To Form a More Perfect Union: Diversity and Learning." In Anaheim, Calif.

Contact: Kerry Newberry, conferences and meetings assistant, (202) 293-6440; Web site, <www.aahe.org>.

NCA-CHE 165th Annual Meeting
April 1-4

The North Central Association of Colleges and Schools' Commission on Institutions of Higher Education presents "The Quest for Quality: Mission, the Commission, and a New Century." In Chicago, at the Hyatt Regency.

AAHE 80th Annual Convention
April 8-11

The American Association of Community Colleges presents its annual convention, this year on the theme "A World of Possibilities," and an academic marketplace at the Hilton Washington in Washington, D.C.

UCEA 85th Annual Conference
April 16-18

University Continuing Education Association presents its 85th annual conference, "Riding the Waves: Strategies for the New Futures of Higher Education," dealing with trends in markets and futures, in leadership and management, and in learning and instructional technologies. Includes a special seminar on Continuing Education Trends in Latin America and Puerto Rico (in Spanish). In San Diego, Calif.

Contact: UCEA, (202) 659-3130; e-mail, <postmaster@nucea.edu>; Web site, <www.nucea.edu>.

3rd Annual Conference on Diversity in Teaching and Learning in American Higher Education
April 19-22

"Text and Context: The Structures of Learning" includes among the keynote speakers José Cuellar, chair, La Raza Studies, California State University-San Francisco. At The Westin St. Francis Hotel in San Francisco.

AAHE Assessment Conference 2000
June 14-18

The American Association for Higher Education's 15th annual conference on assessment asks, "Rising Expectations: Can Assessment Deliver?" In Charlotte, N.C.

HACU 14th Annual Conference
November 4-7

This year's theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

Book Review

by Isabel Schon

Recommended Books about Latinos for Adolescents

The importance of reading in our highly technical and perplexing world can not be overemphasized. We should all strive to make reading a prominent part of the lives of adolescents. The only way to do this is to offer a wide selection of books that will appeal to them. From an engrossing biography about the deadly battle at the Alamo to insightful depictions of family life today; these books will ring true to adolescents as they venture into a universe of images, fantasy, and reality.

Serious students of Texas history will be enthralled by this accessible biography of three who met death at the Alamo. Depicting Bowie as a man of audacious bravery, Travis as a young lawyer and political writer “with more libido than conscience,” and Crockett as a daring hunter and larger-than-life folk character, Davis, a distinguished historian, narrates in meticulous detail their lives and the inevitable events that led to the deadly battle. Black-and-white reproductions, extensive historical notes, and a bibliography of primary sources and published works supplement this exhaustive and engrossing narrative.

This cleverly designed edition might be just right for students tired of traditional historical narratives. Each two-page spread includes flashy magazine-style graphics, reworked paintings and photographs, collages, numerous fonts, maps, and time lines, as well as catchy chapter headings, such as “After Three Months of Siege, Fat Rats Look Tasty.” Alas, gory depictions add to the sensationalistic style. Despite the minimal index and at times shocking-for-effect content, this is an intriguing introduction to the Aztecs, their leaders, lifestyle, and conquerors.

A powerful portrayal of the hunger, poverty, terror, and abuses that the Mayas have endured during the last 40 years. Husbands shot in front of their wives, the remnants of torture victims: men, women, and children carrying heavy loads—the compelling color photographs attest to the life of the Maya in Guatemala. Stunning shots of festivals and archaeological sites are here too, but the brief text and most of the visuals describe the effects of the brutal civil war upon the Maya, who now must learn to deal with the ‘lures of capitalism and pop culture.’ Artistic photographs at its best.

A well-known international photographer captures impressions of rural Cuba. From images of foods and fine tobacco leaves to young communists celebrating the revolution, this large-format album provides provocative insights.

Some might object to the pro-Castro captions; others, to photographs ofely dressed nightclub dancers or the birth of a pig. But these at times stilted photographs, with quotes from such authors as Reinaldo A. Graham Greene, and Federico Garcia Lorca, are intense and stimulating.

Emphasizing Morgan’s role in breaking Spain’s West Indies monopoly, M arrin’s engaging portrait depicts the buccaneer’s boundless ambition and re-imaginative. Drawings, paintings, and maps add interest to this account most feared pirate in the New World,” who terrorized the Spanish colonies northeast coast of South America and her mainland possessions. Some speaking historians might disagree with the author’s explanation of La lla negra (the Black Legend); he explains that buccaneers “were men of their time and not no worse...So when dealing with the hated Spaniards, they did came naturally.” Includes extensive notes, a bibliography, and index.

This compelling novel narrates with painful honesty the lives of a large family in New York City. Ilana, the young children, encounters prejudice at the university and confides her violent father, an alienated mother, a sister and mental breakdown, and brothers who are finding life equal. The book insightfully depicts family life in a new way: which being a Spanish-speaking black Hispanic makes you even more formidable obstacle. Yet a mother and her da reach out to each other despite the brutality, violence, sexual exploitations, ken truths, and resentments.

Rina, the oldest of three children, lives with her Puerto Rican mother and abusive alcoholic stepfather. Despite frequent and vicious beatings, the always forgives him. Told in the alternating voices of Rina and Ms. Mar sympathetic counselor, who also suffered with a violent, alcoholic father, a haunting narrative about the pain and effects of domestic violence on women children. English-speaking readers might be frustrated by the Spanish w scattered throughout, but they add to the Latino ambiance and character aunts. Rina’s inner conflicts are solved a little too easily at the end, but the anguish is universal.

Dr. Isabel Schon is the acclaimed director of the Center for the Study of Books in Spanish for Children and Adolescents/Centro para el Estudio de Libros Infantiles y Juveniles en Español at California State University-San Marcos. She can be reached at ischoen@csusm.edu.

FACULTY POSITIONS:
2000-2001 ACADEMIC YEAR
SCHOOL OF EDUCATION

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you'll work in a collaborative environment that lives its values, supports diversity and encourages professional development. The School of Education's mission is to cultivate urban, professional, multicultural educators, and to provide educational experiences that facilitate social transformation. We encourage applications from candidates who are committed to issues of social justice and knowledgeable about current educational policies and practices that affect youth and education in public and private institutions. DePaul University has a strong commitment to building and maintaining a diverse community and seeks faculty who will enhance this mission.

Director of Ed.D. Program * Senior-Level Position Responsible for providing leadership and direction for the new doctoral program in Educational Leadership, the Director will monitor program quality and create possibilities for further program development. Applicants should be prepared to teach graduate courses in the program, sustain a scholarly agenda, and work with students and faculty in related endeavors. Strong interpersonal skills and the ability to foster collaborative working relationships within and outside the university combined with excellent written/verbal communication skills required. Selected individual should be committed to maintaining/expanding student diversity in accord with the university's mission.

Position requires an Associate/Full Professor in educational leadership/curriculum with strong background in related disciplines; strong record of scholarship; broad-based knowledge/experience in teaching/research; considerable leadership in higher education; and demonstrated leadership competencies related to program development/implementations. Administrative/teaching experience in other educational contexts and collaborative research across institutions/communities would be valuable. Terminal degree required. Candidates must demonstrate commitment to diversity and cross-disciplinary inquiry of issues in urban education.

Assistant Professor * Physical Education: The individual we seek will have expertise in Physical Education with particular emphasis in Fitness Management, Fitness Assessment and Health Education. The primary teaching responsibility will be to implement graduate and undergraduate courses in the Physical Education Program that offers concentrations in Coaching K-12 and Fitness Management. Additionally, this individual will advise Fitness Management majors through their courses, clinical requirements, and internship. The successful candidate will work in our newly renovated state-of-the-art Fitness and Wellness Center; collaborate with the Director of the Recreation Facility; and contribute to community outreach programs.

Assistant Professor * Bilingual Education: Requires expertise in bilingual and bicultural education and literacy in this diverse role. Candidates should have a strong academic and experiential background in at least two of the following fields: early childhood education, second language acquisition, bilingual and biliteracy pedagogy, critical literacy, culture and identity. The individual we seek will demonstrate a commitment to teacher education and be prepared to contribute to new program initiatives.

Required qualifications for all positions: earned doctorate required for appointment; defined research agenda; ability to work collaboratively within and across programs; two areas of expertise to contribute to the School; recent experience with culturally diverse urban populations; commitment to urban education, and excellence in teaching, service and scholarship or demonstrated potential.

Salary is commensurate with qualifications and experience. Please send letter of application clearly delineating qualifications for areas of expertise; complete and up-to-date vita/transcripts; one example of recent professional publication/presentation; one page statement on philosophy of teaching; and three to five professional letters of reference sent directly. Review of applications will begin February 15th and continue until the positions are filled.

Send all applications and materials to: Quinio Vargas, Dean, School of Education, DePaul University, 2200 North Kenmore Avenue, Chicago, IL 60614. Fax: 773-525-7728. E-mail: qvargas@wpp.tnt.depaul.edu. Applications received by e-mail will not be accepted. DePaul University is committed to diversity and equality in education and employment.

Carleton College
AMERICAN STUDIES-ETHNIC STUDIES
MINORITY PRE-DOCTORAL TEACHING FELLOWSHIP

One-year teaching fellowship for minority ABD available in September 2000. Appointment involves half-time teaching (one course per term) and half-time working to finish the dissertation. Applicants should have completed all graduate coursework by January 2000, and have the dissertation under way by September. We will consider applicants from the fields of American Studies or Ethnic Studies, or from traditional disciplines with appropriate specialization.

Carleton is a selective liberal arts college with 1200 students located five miles south of the Twin Cities of Minneapolis and St. Paul. Carleton is an affirmative action, equal opportunity employer.

Letters of inquiry and application should be directed to Robert Precious, Director of American Studies, Carleton College, One North College Street, Northfield, MN 55057.

ONONDAGA COMMUNITY COLLEGE

ASSISTANT TO THE PRESIDENT

The President's Office seeks a full-time assistant to work on a broad range of assignments. The president, with executive responsibility for the college, needs someone who is familiar with college administrative procedures and is involved in most aspects of the college's operation.

The assistant coordinates meetings, committees, and events. The assistant also assists the President with all other responsibilities.

The President's Office is located at:

5500 Old Shore Road
Syracuse, NY 13215-2099

OFFICE OF THE PRESIDENT

Applicants must have at least two years of experience in a similar position. The salary range is $20,000 to $25,000.

Applications review begins January 19, 2000, and will continue until the position is filled.

Applicants must submit a current resume by letter of application together with the names, addresses, and telephone numbers of three professional references.

Applicants must submit a current resume by letter of application together with the names, addresses, and telephone numbers of three professional references.

Onondaga Community College

5500 Old Shore Road
Syracuse, NY 13215-2099

OFFICE OF THE PRESIDENT

Applicants must have at least two years of experience in a similar position. The salary range is $20,000 to $25,000.

Applications review begins January 19, 2000, and will continue until the position is filled.

Applicants must submit a current resume by letter of application together with the names, addresses, and telephone numbers of three professional references.
Southern Connecticut State University
VICE PRESIDENT
FOR ACADEMIC AFFAIRS

Southern Connecticut State University invites nominations and applications for the position of Vice President for Academic Affairs. The VPAA is the chief academic officer of the University and reports directly to the President. The VPAA will manage the academic program and faculty of the University to assure the quality and coherence of education for the University's students. The VPAA directs the work of the vice teaching faculty of the university through the deans of the various schools and colleges of each school's departments as well as related administrative staffs including enrollment management, information technology, library services, research and planning. The VPAA's responsibilities also include strategic planning, administration and instructional faculty union relations, and administration of the academic budget.

Southern Connecticut State University, founded in 1893, is a fully accredited institution of higher education authorized by the Connecticut General Assembly to offer courses and programs leading to bachelor's and master's degrees in the arts and sciences and professional fields. Southern also offers a sixth year diploma in six areas. Located in New Haven, Southern is one of four regional campuses of the Connecticut State University system and governed by the CSU Board of Trustees.

The University seeks highly qualified and experienced candidates who have demonstrated leadership and personal integrity who will possess the following qualifications:

- **Strong academic record:** Hold an earned doctorate from a regionally accredited institution; have a distinguished record of scholarship that will earn the respect of the academic community;
- **Administrative and faculty experience:** Have a significant record of accomplishment and commitment to excellence in teaching, research, service, and shared governance as a faculty member and administrative leader beyond the department level, preferably at the level of dean or higher; have experience in designing and evaluating outcome-based academic programs;
- **Management experience:** Have successful experience with academic budgeting, personnel management, strategic planning, and continuous quality improvement;
- **Communication and collaboration skills:** Have demonstrated ability to communicate effectively and work collaboratively with faculty, staff, and the university's many constituencies, have working knowledge of collective bargaining;
- **Commitment to diversity:** Have demonstrated commitment to diversity and equal opportunity for students, faculty, and staff;
- **Strong leadership skills:** Have demonstrated proven experience in decision-making and strong implementation skills; have demonstrated the ability to provide innovation and dynamic leadership in promoting both the academic and total institutional mission and goals.

Letters of nomination and applications from interested candidates are requested. Nominations must be received prior to January 15, 2006, so candidates may be notified prior to January 20. Candidates must submit a letter of application, a detailed resume, and the names, addresses, and telephone numbers of five references. Nominations and applications should be sent to:

Dr. Sandra C. Holley
Dean, School of Graduate Studies
Southern Connecticut State University
Engleman 111
501 Crescent Street
New Haven, Connecticut 06515

For more information about Southern Connecticut State University, candidates are encouraged to visit the University's website at http://www.scsu.ctstateu.edu.

Southern Connecticut State University is an equal opportunity employer and applications from members of historically underrepresented groups are especially invited to apply.
St. John’s University, one of the largest Catholic universities in the U.S., boasts an enrollment of over 18,500 students pursuing bachelors, masters, doctoral and professional degrees in seven colleges. St. John’s University, New York invites applications for the following positions for Fall 2000.

UNIVERSITY LIBRARIES
Tenure Track and Administrative Appointments

Teaching expectations include doctoral, master’s and undergraduate courses in the speciality noted, as well as survey courses in world history. PhD. or D.A. in his or her field is required. Send letter of application, resume, and three letters of reference to: Dr. Dooreis L. Augustino, Chair, History Department. Or e-mail: augustino@stjohns.edu

Department of Mathematics and Computer Science
Assistant Professor
The Department of Mathematics and Computer Science invites applications for a tenure-track position from candidates with a Ph.D. in Mathematics and a Master’s in Computer Science, or Ph.D. In Computer Science. Candidates are expected to teach undergraduate courses primarily in computer science and to participate in developing the computer science major. Candidates should have an interest in research and must demonstrate teaching ability. Send letter of application, resume, and three letters of reference to: Dr. Charles Traina, Chair, Mathematics and Computer Science. Or e-mail: traina@stjohns.edu

Department of Modern Foreign Languages and Cultural Studies
Assistant Professor (Spanish)
The Department of Modern Foreign Languages and Cultural Studies invites applications from candidates for a tenure-track position in Spanish. Candidates must have a Ph.D., experience in 19th and 20th century Hispanic Studies, evidence of scholarly potential and ability to teach language courses. Applied linguistics a plus. Send letter of application, resume, and three letters of reference to: Dr. Gastano Cipolla, Chair, Modern Foreign Languages. Or e-mail: cipollag@stjohns.edu

Department of Physics
One Tenure/One Year Contract/Assistant Professor Positions
The Department of Physics invites applications from candidates who are effective teachers at the undergraduate level. An experimental background is preferred and a research affiliation with a major New York metropolitan or Long Island institution is desirable. Candidates must have a Ph.D. in Physics. Send letter of application, resume, and three letters of reference to: Dr. Robert Finkel, Chair, Department of Physics. Or e-mail: finkelr@stjohns.edu
Department of Psychology
Two Assistant/Associate Professor Positions
The Department of Psychology invites applications for two tenure track positions in clinical psychology. Applicants should have a Ph.D. in clinical psychology from an APA-approved program. For position one we are seeking an individual with interest and expertise in developmental psychology, and/or neuropsychological assessment. For position two we are seeking an individual with interest and expertise in clinical child psychology. Send letter of application, resume and three letters of reference to: Dr. Jeffrey Fagen, Chair, Department of Psychology. Or e-mail: fagenj@stjohns.edu

Department of Psychology
Assistant/Associate Professor
The Department of Psychology invites applications for a tenure track position in school psychology. The successful candidate will have a doctoral degree in school psychology preferably from an APA approved program. The successful applicant will be expected to develop a research program in behavioral consultation, training disabilities and/or neuropsychological assessment. Send letter of application, resume and three letters of reference to: Dr. Jeffrey Fagen, Chair, Department of Psychology. Or e-mail: fagenj@stjohns.edu

Department of Speech, Communication Sciences and Theatre
Assistant/Associate Professor
The Department of Speech, Communication Sciences and Theatre invites applications for a tenure track position in Speech-Language Pathology specializing in Child Language. The successful candidate will teach undergraduate and graduate courses; conduct research, supervise MA students’ research. Ph.D., ASHA Certification, CCC-SLP, NYS License eligibility, teaching and/or clinical and supervisory experience is required. Send letter of application, resume and three letters of reference to: Dr. Nancy McGarr, Speech, Communication Sciences and Theatre. Or e-mail: mcgarrn@stjohns.edu

Department of Theology and Religious Studies
Assistant/Associate Professor
The Department of Theology and Religious Studies invites applications for a tenure track position in pastoral theology, to teach undergraduate core and elective courses as well as graduate courses in pastoral theology and pastoral counseling. A doctorate in the field is required, together with evidence of scholarly potential and teaching ability. Applicants seeking appointment at the level of associate professor should provide evidence of significant achievement in teaching and research. Send letter of application, resume and three letters of reference to: Rev. Jean Pierre Ruiz, Chair, Department of Theology and Religious Studies.

SCHOOL OF EDUCATION AND HUMAN SERVICES
Tenure Track Positions
Division of Administrative and Instructional Leadership
One Mathematics or Science Educator - Assistant Professor
The Division of Administrative and Instructional Leadership invites applications for one position in mathematics or science. The successful candidate will teach undergraduate courses in elementary and secondary education, guide faculty development in schools, and conduct research and training to create and evaluate school programs. Earned doctorate in math or science education and classroom teaching experience with elementary/secondary students required. Publications required, as well as securing external funding. Send letter of application, resume and three letters of reference to: Dr. Gene Geisert, Chair, Division of Administrative and Instructional Leadership. Or e-mail: geisertg@stjohns.edu

Division of Human Services and Counseling
One Reading/Literacy Associate/Full Professor
The Division of Human Services and Counseling seeks an Associate/Full Professor of Reading/Literacy Education. Responsibilities include teaching graduate courses in literacy, advising graduate students, and conducting research and presentations at scholarly meetings and externally funded projects are required. Send letter of application, resume and three letters of reference to: Dr. Richard Sinatra, Chair, Division of Human Services and Counseling. Or e-mail: sinatra@stjohns.edu

Division of Human Services and Counseling
One Counselor Education Assistant/Associate Professor
The Division of Human Services and Counseling seeks an Assistant/Associate Professor of Counseling Education. Responsibilities include teaching courses in counselor education, advising graduate students, and conducting research and presentations at scholarly meetings and externally funded projects are required. Send letter of application, resume and three letters of reference to: Dr. Richard Sinatra, Chair, Division of Human Services and Counseling. Or e-mail: sinatra@stjohns.edu

Division of Education, Staten Island Campus
Two Elementary Education Assistant Professor Positions
The Division of Administrative and Instructional Leadership (Queens campus) and the Division of Education (Staten Island campus) invites applications for two positions in Elementary Early Childhood Education. The successful candidates must teach undergraduate courses in a content area (e.g. math, reading, science, special education, social studies) guide faculty development in schools, and conduct research and training to create and evaluate school programs. Earned doctorate in elementary education or related field and classroom teaching experience with early childhood/elementary age students required. Publications on elementary methods and elementary supervision required, as well as securing external funding. Send letter of application, resume and three letters of reference to: Dr. Gene Geisert, Chair, Division of Administrative and Instructional Leadership. Or e-mail: geisertg@stjohns.edu

COLLEGE OF BUSINESS ADMINISTRATION
Tenure Track Positions
Department of Economics and Finance
Associate Professor
The Department of Economics and Finance invites applications for a tenure track position from candidates who possess strong research capabilities as well as demonstrated high quality teaching performance in finance and international finance. Ph.D. in Finance required. Candidates are expected to conduct research that leads to publication in recognized refereed and professional journals. Send letter of application, resume and three letters of reference to: Dr. Nejdet Delener, Associate Dean, College of Business Administration. Or e-mail to: delener@stjohns.edu

Department of Management
Assistant/Associate Professor
The Department of Management invites applications for a tenure track position from candidates who possess strong research capabilities as well as demonstrated high quality teaching performance in Management Information Systems or Operations Research. Ph.D. in Management required. Candidates must show evidence of an interest in pursuing scholarly work and have substantial practical management consulting experience. Send letter of application, resume and three letters of reference to: Dr. Nejdet Delener, Associate Dean, College of Business Administration. Or e-mail to: delener@stjohns.edu
Department of Marketing
Assistant/Associate Professor
The Department of Marketing invites applications for a tenure track position. The candidate who has demonstrated high quality teaching performance in Advertising/Sales Promotions. Ph.D. in Marketing required. Candidates are expected to also demonstrate evidence of excellent communication skills and demonstrated potential to conduct applied research. Rank and salary for this full time position is competitive and based on qualifications and experience. Send letter of application, resume and three letters of reference to: Dr. Nejdet Delener, Associate Dean, College of Business Administration. Or e-mail: delenern@stjohns.edu

COLLEGE OF PROFESSIONAL STUDIES
Tenure Track Positions

Real Estate Management
Assistant/Associate Professor
Exciting tenure track position for innovative candidate to help develop and teach in Bachelor of Science in Real Estate Management degree program recently approved by New York State Education Department. Texas A&M University
Vice President for Administration

Texas A&M University invites applications and nominations for the position of Vice President for Administration. As a member of Texas A&M University's executive management team, this position provides support and counsel to the President in all University matters. The Vice President for Administration's primary focus is on the management of support and service components including Administrative Geographic Information Systems; Airport Operations; Children's Center; Facilities Coordination; Faculty Clubs; Food Services; Graphic Services; Human Resources; Parking, Transit, and Traffic Services; Physical Plant; Presidential Conference Center; Research Park; and the University Police Department.

**Qualifications:** Candidates for the position must have a Bachelor's degree (master's degree preferred). The successful candidate is expected to have a minimum of ten years experience dealing with resource allocation and fiscal management to include five years experience in an upper-management role, preferably at an institution of higher education. The ideal candidate should have demonstrated leadership ability, exceptional skills in oral and written communication, ability to work effectively under pressure, ability to accomplish objectives through the development and utilization of human resources, ability to creatively design and implement new programs. Knowledge of university operations is preferred.

**To Apply:** Nominations or applications with resumes should be addressed to the Search Advisory Committee for the Vice President for Administration. Applications should be accompanied by a resume and a letter of interest addressing specific qualifications and a list of five references. No contact with references will take place without clearance by the applicant. The committee will begin screening applications on Tuesday, February 1, 2000 and continue until the appointment is made.

The job description and additional information is available at the following university website: [http://www.tamusc.edu/vpresident](http://www.tamusc.edu/vpresident)

WILLIAMS COLLEGE
DEPARTMENT OF MUSIC
ARTIST IN RESIDENCE
Fall 2001

Williams College invites applications for the newly created position of Artist in Residence in Orchestral and Instrumental Activities. The Artist in Residence is responsible for developing and teaching courses in conducting, advising the Student Symphony, and organizing and coaching chamber music activities.

Duties include conducting, advising, organizing, and teaching courses in conducting, advising the Student Symphony, and organizing and coaching chamber music activities. The Artist in Residence is expected to participate in the academic calendar, attending concerts, participating in rehearsals, and directing the Student Symphony. The Artist in Residence is expected to participate in the academic calendar, attending concerts, participating in rehearsals, and directing the Student Symphony.

Candidates must have a master's degree or equivalent professional experience. Successful candidates will be expected to demonstrate a commitment to excellence in the teaching of music. The Artist in Residence is expected to participate in the academic calendar, attending concerts, participating in rehearsals, and directing the Student Symphony.

A letter of application, detailed resume and three letters of reference should be sent by February 1, 2001 to:

AIR Orchestral/Instrumental Activities Search
Department of Music
Williams College
54 Chapin Hall Drive
Williamstown, MA 01267

All application materials must be in the form of hard copy submitted by regular mail. A short list of applicants will be chosen, and interviews will be held in the spring of 2000. Finalists will be engaged as guest conductors during the 2000-2001 season of the Berkshire Symphony, after which the final candidate will be chosen.

Williams College is an equal opportunity institution, offering undergraduate education to all students. The College has built its reputation on a long tradition of outstanding teaching and scholarship, and on the academic excellence of its students. Among the opportunities that Williams offers to students and faculty members are interdisciplinary programs and centers, including the Multicultural Center, The Oakley Center for the Humanities and Social Sciences, an active concert program and performance schedule, extensive library and museum collections, computer center and well-equipped laboratories.

An Affirmative Action/Equal Opportunity Employer: Williams College especially welcomes applications from women and minority candidates.
SYSTEMS LIBRARIAN

Your primary responsibility will be for the operation of the library's computer systems. You will participate in planning, development and management of the library's computing and networked resources.

Requirements include MLS from an ALA accredited program; knowledge of automated library systems, web page design and programming; HTML coding, Windows 95 and 98, Windows NT servers and workstations; CD-ROM index administration; strong customer service orientation; excellent interpersonal, written and oral communication skills. Library automation experience required preferably with Endeavor Voyager (currently use ORA) and will migrate to Voyager in early 2000. Experience in an academic library with a broad range of library software products and knowledge of relevant standards and protocols preferred. Salary $31,416+ with excellent benefits.

STARTING DATE: ASAP
APPLICATION DEADLINE: February 4, 2000

For your application to be considered, please reference Pos. No. 00-120 and provide the following as a single packet: (1) letter of interest, (2) resume, (3) unofficial copy of graduate transcript(s), and (4) list of 5 professional references (names, addresses, telephone numbers) to:

Judy Chastony, Human Resources Department, 2251 Panthersville Road, Decatur, GA 30034.

DEPARTMENT OF APPLIED LINGUISTICS/ESL

Two Tenure-Track Assistant/Associate Professor Positions
Fall 2000

Georgia State University's Department of Applied Linguistics/ESL is accepting applications for two full-time, tenure-track positions at the assistant or associate professor level. Because of the significant differences in responsibilities of each position, application must be made to each separately. Responsibilities in both positions involve teaching courses in the M.A. program in applied linguistics, training ESL/EFL teachers, and in an anticipated new doctoral program in applied linguistics with emphasis on the development of second/foreign language academic literacy. Candidates hired will have a doctorate in applied linguistics or a closely related field, and will have a specialty in either second language acquisition theory or discourse analysis (oral or written discourse) and a record of relevant publications. Preferred candidates will have additional qualifications in qualitative research methodology and experience teaching ESL/EFL. Successful candidates should already have held previous appointment at the assistant professor or associate professor level and demonstrate appropriate teaching and research credentials to warrant appointment at the advanced assistant or associate professor level.

POSITION #1
Additional responsibilities include providing academic (but not administrative) leadership to the department's Intensive English Program (IEP) for non-native English speakers.

POSITION #2
Additional responsibilities include participation in the development of grants and contracts focused on international training and research. Preferred candidates for this position will have a record of successful development of grants/contracts with a focus on international training/research. Because of GSUs emphasis on the Middle East, candidates should highlight knowledge and/or professional experience in that area of the world.

Letters of application for each position, a curriculum vitae, copies of research publications, and 3 letters of professional recommendations should be sent to:

Chair of Graduate Search Committee
Position #1 or Position #2
Department of Applied Linguistics/ESL
Georgia State University
P.O. Box 4099
Atlanta, GA 30302-4099

Review of applications will begin January 15, 2000, and will continue until successful candidates are identified. Positions start August, 2000.

Georgia State University is an Equal Opportunity/Equal Access Employer.

For further information about our program - visit the Department's website at:

http://www.gsu.edu/alesl

THE UNIVERSITY OF WEST FLORIDA

Public Administration Generalist

The Division of Administrative Studies at the University of West Florida invites applications for a tenure-track position at the assistant professor level in the Master of Public Administration (MPA) Program. The appointment will begin with the Fall, 2000 semester. The MPA Program is NASPA accredited and has strong ties to both governmental and non-profit organizations.

Applicants from all fields within public administration will be considered. Those who have proven ability to teach in any two of the following areas will have preference: Human Resource Management, Quantitative Applications, Organizational Analysis, and Conflict Management and Resolution.

Teaching in the program will consist of courses taught at the main campus and at our Fort Walton Beach Campus. The successful candidate will be expected to do both theoretical and applied research in higher area of specialization and to publish in refereed outlets.

By the time of appointment, applicants will be expected to have completed a Ph.D. in Public Administration or a closely related field. Potential for scholarly publications and successful teaching are important. Salary is competitive based on experience and qualifications. Candidates should forward a cover letter summarizing interests and skills applicable to the position, a curriculum vitae, and the names, addresses, and other contact information for at least three referees. Submit all materials by February 14, 2000 to:

Rosalind Fisher
Executive Assistant to the President for Equal Opportunity and Diversity
The University of West Florida
11000 University Parkway
Pensacola, Florida 32514

The University of West Florida is an Equal Opportunity/Acess employer. Women and minorities are encouraged to apply.

MIT Media Laboratory

Tenure Track Faculty Position

The Media Laboratory is seeking faculty with records of world-class creative talent, communication skills, and productivity.

Candiates should have demonstrated expertise in the study of interaction, expression, communication, or learning, and the development of technologies related to these areas. Of particular interest are human and machine learning, common sense reasoning, auditory and visual perception, design, and graphics. Applicants should have a Ph.D. degree or equivalent.

Responsibilities include: teaching (graduate and undergraduate), research, and supervision of graduate students. Appointments will be principally at the Assistant Professor level.

Qualified candidates should submit a resume, representative materials of portfolio, the names of three references, and a complete summary of their teaching and research interests by February 21, 2000 to: Faculty Search Committee, Media Laboratory, MIT Media Laboratory, E15-218, 2 Ames Street, Cambridge, MA 02139-4307. Inquiries should be sent to search@media.mit.edu. For additional information about the Laboratory, see our web page http://www.media.mit.edu. MIT is a non-smoking environment.

Water Resources Faculty Position Available

The Department of Civil and Environmental Engineering at UC Davis invites applications and nominations for a tenure-track position in water resources engineering with specialization in computational environmental fluid mechanics. The position is open at all levels for outstanding candidates. Requirements include a doctorate in civil engineering or related field and a demonstrated record of success in, or evidence of outstanding potential for, both teaching and building a vigorous independent research program. The successful candidate will have a strong background and interest in computational fluid mechanics and hydraulics and will also have additional background and interest in the modeling of turbulent transport as related to environmental flow and transport processes. Hosts will join department colleagues in teaching undergraduate and graduate courses related to fluid mechanics and numerical applications.

To be assured of consideration, applications must be submitted by February 21, 2000. Applicants should submit a complete resume, including a statement of teaching and research interests, transcripts, a list of relevant professional experience and publications, and the names and addresses of three references to:

Professor Bruce E. Larock
Department of Civil and Environmental Engineering
University of California
One Shields Avenue
Davis, CA 95616-5294

Email inquiries may be addressed to blarock@ce.berkeley.edu. Information about the department can be found at http://civil.berkeley.edu. UC Davis and the Department of Civil and Environmental Engineering are interested in candidates who are committed to the highest standards of scholarship and professional activity, and to the development of a campus climate that supports equality and diversity. The University of California is an affirmative action/equal opportunity employer.
ILLINOIS STATE UNIVERSITY
Bloomington-Normal

Vice President for Student Affairs

Illinois State University is a student-centered, multipurpose institution committed to providing a premier undergraduate education and high quality graduate programs in selected areas. It is the oldest public university in the state and enrolls approximately 20,000 students. The residential campus has a new student services building, a new science laboratory building, and a performing arts center under construction. Plans are also underway for a new building to house the College of Business. The Bloomington-Normal community has a population of approximately 100,000 and is mid-way between Chicago and St. Louis. It is one of the most dynamic and economically prosperous communities in Illinois.

The Vice President for Student Affairs reports directly to the President and is the principal university spokesperson regarding student issues. The Vice President has primary responsibilities for the direction of all departments in the Student Affairs division and works closely with other vice presidents, president’s staff, faculty, and major elected student leaders and student organizations.

Through the central office staff (Associate Vice President, Assistant Vice President, and Associate Dean) supervision is exercised over the Student Center and Student Services, Student Counseling Services, Student and Alumni Services, Disability Services, Intercultural Programs and Services, Recreation Services, University Housing Services, Student Health Services and Student Insurance, Student Support Services, Students’ Legal Services, Campus Dining Services, and the Office of Student Life.

Minimum requirements for the position include: a demonstrated capacity to administer a complex and multifaceted Student Affairs division; sensitivity and commitment to cultural diversity; commitment to the development of student potential; ability to work effectively with students, student affairs professionals, faculty, administrators, and staff; a strong commitment to shared governance; an understanding of fiscal matters and budgets; experience with a broad range of issues in contemporary higher education; creativity in program development and enhancement; and the capacity to represent the Student Affairs Division effectively within the University, to other constituencies, and to the public.

The candidate must have at least five years of relevant experience in higher education administration with progressively increasing responsibility. A doctoral degree is required.

The compensation is competitive and is based on experience. The position is available July 1, 2000.

To assure full consideration, nominations and letters of interest should be postmarked by February 25, 2000. Candidates should submit a letter outlining their interest in and vision for the position, a vita, and the names and telephone numbers of three professional references who may be requested to submit letters of reference. The search will remain open until an appointment is made.

Illinois State University encourages diversity.

EASTERN WASHINGTON UNIVERSITY

DEAN, COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT
DEAN, COLLEGE OF BUSINESS AND PUBLIC ADMINISTRATION
DEAN, COLLEGE OF ARTS AND LETTERS

Following a successful reorganization Eastern Washington University invites nominations and applications for three dean to begin July 1, 2000. The University is being reorganized under the leadership of President Stephen M. Jordan, who was in office from 1993 to 1998. The deans will be key members of the leadership team as the University continues the process of transformation. The deans will report directly to the Provost and will be responsible for providing effective leadership and managing their colleges.

Eastern Washington University is a student-centered comprehensive university of over 8000 undergraduate and graduate offering high-quality professional and liberal arts programs in Cheney, the Spokane metropolitan area and elsewhere in W State. The University’s mission is to prepare broadly educated, technologically proficient, and highly productive citizens meaningful careers, to enjoy enriched lives, and to make contributions to a culturally diverse society. The University has a renewal process involving reorganization of the academic structure, program review, and a new approach to budgeting of the mission. Enrollment has grown in the last two years from 6,800 to 7,700 full-time equivalent students. In order to accommodate the increased demand, particularly from students from other parts of the state, planning is under way for construction of a new hall and an existing residence hall has been renovated. The region provides outstanding four-season recreational opportunities. The city of Cheney offers a safe, small-town atmosphere 20 minutes from Spokane, Washington’s second largest city.

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

The College of Education and Human Development includes the Department of Education, the Department of Physical Education and Recreation, and the Department of Counseling, Educational and Developmental Psychology. Each of these departments offers nationally accredited programs at the undergraduate and graduate levels. The college employs approximately 70 equivalent faculty and is affiliated with the Robert Reed Laboratory School located on the University’s Cheney campus.

COLLEGE OF BUSINESS AND PUBLIC ADMINISTRATION

The College of Business and Public Administration includes the Departments of Management, Accounting and Information and Urban Planning, Public and Health Administration. The college offers a range of graduate and undergraduate programs in the MBA, the MPA, and the MUP. The college’s administrative headquarters are located at the Spokane Riverfront Instructional Programs are offered on both the Spokane and Cheney campuses. The college employs approximately 45 equivalent faculty.

COLLEGE OF ARTS AND LETTERS

The College of Arts and Letters is a new college formed by the separation of the university’s programs in arts and letters from the College of Letters, Arts and Social Sciences. The college will come into existence in July 2000 and will include the departments of Music, Philosophy, Art, English, Modern Languages, and Fine Arts. The college of Music and Theater Arts is a fully accredited school of music and theater arts.

Candidate Qualifications:

The ideal candidates for each of these deanships will be persons of energy and integrity who have the following qualifications:

- Strong academic record: Academic credentials and experience that will earn the respect of the academic community and provide eligibility for a tenured appointment within a department in the college.
- Faculty and administrative experience: A significant record of accomplishment as a faculty member and academic administrative experience at the department chair level or above including strategic planning, budget responsibility, management of staff, innovative and collaborative program development, development of partnerships and the implementation of c
- External relations skills: Ability to communicate and work effectively with professional associations, advisory groups, and other community leaders.
- Internal communication and collaboration skills: Ability to work effectively and collaboratively with all elements of the college, with all university faculty, in collective bargaining with the faculty union and in shared governance with the academic senate, and with all other members of the academic community.
- Commitment to diversity: Demonstrated commitment to equal opportunity and diversity.
- Fund-raising skills: Demonstrated commitment to external fundraising in support of the university mission.

Compensation is highly competitive and commensurate with education and experience. Inquiries, nominations and applications are encouraged and should include a letter describing interest and qualifications, a resume and the names and telephone numbers of three professional references. All materials will be held in strictest confidence and references will not be contacted until candidates have been selected. Materials should be sent to Human Resources, MS 114, Eastern Washington University, CW 99004. For more information, candidates are encouraged to visit the University’s web site at http://www.ewu.edu. Review of applications will begin January 20, 2000, and will continue until filled.

These positions, during the course of university employment, will be involved in an unusual level of campus social and professional activities which are directly related to their job responsibilities. The social and professional activities include participation in campus social and professional activities which are directly related to their job responsibilities.
ASSOCIATE VICE PRESIDENT
INFORMATION TECHNOLOGY
Office of Information Technology

responsible for all aspects of management, planning and program development of the Office of Information Technology (OIT). Three major units comprise the Office of Information Technology: administrative systems and services, networking and telecommunications, and academic computing and support services. The academic computing and support services unit subsumes responsibilities for management of student computer laboratories, a media resource center, instructional and learning support services, and a comprehensive training program. Administratively, the associate vice president for OIT reports to the vice president for budget, planning and information technology.

Qualifications: Graduate degree required; and at least five years of relevant experience, preferably as a senior manager in higher education. A proven record of successfully managing an information technology organization at another college/university, or major components of one, is essential. Similar responsibilities in a non-academic environment will be considered if the experience can be demonstrated to be applicable.

Strong managerial and interpersonal skills, as well as a collaborative approach to problem solving are required. The ability to communicate effectively, written and oral, and to make clear presentations is crucial. Also important is the ability to function with a high degree of autonomy and creativity. The associate vice president must have a successful record of planning and effective resource management in an environment that includes both academic and administrative responsibilities. A demonstrated ability to manage and work in a complex and changing environment, successfully managing people of diverse interests and perspectives, is essential. Some university teaching experience is a plus.

A deep general knowledge of current information technologies and future trends is imperative. The associate vice president must also possess sufficient in-depth technical knowledge to have a full understanding of the contemporary academic and administrative computing issues that are found in institutions of higher education in general, and at Montclair State University in particular.

Salary Range: Commensurate with background and experience.

Starting Date: April 1, 2000

Send letter and resume (include V#) to: Montclair State University, Box C316 V#63/HO, Upper Montclair, NJ 07043

Apply by: January 12, 2000

DIRECTOR OF THE LATINO CULTURAL CENTER
(LA CASA)

The Office of Multicultural Affairs and Indiana University seeks qualified candidates for this full-time, 12-month Director position.

General Description: The Director oversees the operation and staff of the Center, which is designed to contribute to the social and educational enrichment of Latino/a students in the areas of academic progress, integration into the mainstream of university activities, and all other aspects of campus life. The Director manages all phases of operations and budgets and develops policies and procedures to ensure the efficient operation of the Center. In addition, the Director is responsible for the development, implementation, and coordination of curricular activities and educational support programs. The Director serves as a liaison for faculty, students, administration, and staff in creating and administering programs conforming to the general guidelines of the Office of Multicultural Affairs and Indiana University. Other duties include general advising and support for student organizations, leadership development, and serving on campus committees.

Qualifications: Applicants with a Master's degree in Education or related field are preferred. 3-5 years of full-time experience in college student activities, educational agency programming, or in a related area with transferable skills. Excellent communication, writing, and organization skills; ability to work effectively with students and faculty; bilingual and bicultural; and computer proficiency.

Salary: Commensurate with experience plus benefits.

Application Procedures: Submit a cover letter, resume, and contact information for 3 references to:

Indiana University
University Human Resources
400 East Seventh Street
Bloomington, IN 47405

Indiana University is an Affirmative Action/Equal Opportunity Institution

VICE CHANELLOR FOR HUMAN RESOURCE: Community Colleges of Spokane invites applications for the position of Vice Chancellor for Human Resources. The Vice Chancellor reports directly to the Chancellor/CEO, and is responsible for the administration and direction of district human resource programs consistent with Washington State Law, Washington Administrative Code, policies of the CCS Board of Trustees, and district procedures. Specific duties and responsibilities include the development of recruitment, selection, and orientation processes for faculty, staff, and support staff; administration of equal opportunity affirmative action and Affirmative Action with Disabilities Act; labor relations and negotiation; implementation of state rules and regulations governing classification of employees; administration and implementation of collective bargaining agreements for faculty and classified staff; implementation and supervision of employee training and development programs; and providing assistance to administrators, managers, and supervisors regarding employment discipline, grievances, and other personnel-related matters. The Vice Chancellor is responsible for the implementation of employee records and records systems.

Minimum acceptable qualifications include a master's degree in a relevant field of study, professional experience in human resources with at least three years at a supervisory level, and labor relations and negotiation experience. Desirable qualifications include experience in the areas of personnel-related questions, problems; experience with and commitment to equal opportunity; and knowledge of successful strategies to recruit and retain qualified staff. Written and oral communication skills are required. The ability to lead effectively with employees and with district personnel is important. Experience with and commitment to equal opportunity is also important.

Salary: Commensurate with experience and qualifications. A comprehensive benefit package is included.

Application process: Incomplete applications will not be considered. A complete application consists of the following items:

1. Official application
2. Letter of interest addressing the duties and responsibilities of the Vice Chancellor
3. Resume
4. Names, addresses, and telephone numbers of three references
5. Transcripts (unofficial copies are acceptable)

AA/EOE

Application Deadline: To be guaranteed consideration, the completed application must be received by January 10, 2000. The position will remain open until filled.
UIC
DEAN OF THE COLLEGE OF BUSINESS ADMINISTRATION
University of Illinois at Chicago

The University of Illinois at Chicago (UIC) invites applications and nominations for the position of Dean of the College of Business Administration. The appointment will become effective on or beginning with the 2000-2001 academic year.

The University is one of the largest comprehensive institutions of higher learning in Illinois and is comprised of 15 colleges and schools with approximately 16,000 undergraduate students, and 8,000 graduate and professional students. UIC is classified as a Research 1 University by the Carnegie Foundation.

Located in the heart of one of the world's foremost centers of business and commerce, the College of Business Administration offers undergraduate degrees in accounting, business administration, economics, finance, information and decision sciences, management, and marketing as well as MBA and PhDs in various fields. The College's approximately 2,000 undergraduate and 600 graduate students are served by 85 faculty.

The successful candidate will be an innovative leader committed to enhancing a strong college of business in a public university and to working effectively with the faculty. The new dean must be able to develop the College's programs to address the changing global business climate in which our students will be employed. The individual chosen is expected to interact strongly with the dynamic Chicago business community and be able to raise external funds. The dean will lead the planning of a new College of Business Administration building which will incorporate facilities to conduct dynamic and innovative programs. The incumbent is expected to have a distinguished scholarly or professional record and be qualified for the rank of Professor in one of the departments of the college.

Traditional and non-traditional candidates who possess the attributes required and the commitment to achieving the goals of the position are encouraged to apply.

Applications should be accompaniment by a letter of interest and a resume. Review of applications and nominations will begin immediately and will continue until the position is filled. Applications and nominations should be sent to:

Dr. Rosalie Sagraves, Chair
Search Committee for the Dean of the College of Business Administration
The University of Illinois at Chicago
Office of Academic Affairs (M/C 165)
601 S. Morgan Street
Chicago, IL 60607-7128

The University of Illinois at Chicago is an Affirmative Action/Equal Opportunity Employer.

**AGNES SCOTT COLLEGE**

**THE WORLD FOR WOMEN**

**ASSOCIATE DEAN OF THE COLLEGE**

Agnes Scott College invites applications and nominations for the position of associate dean of the college. This position reports directly to the vice president for academic affairs/dean of the college and assists in planning and overseeing the academic program.

Responsibilities include providing leadership and management of a specific set of academic programs/offices, including the Atlanta Semester, Academic Advising, and the Office of International Education; assisting the vice president for academic affairs with strategic planning in academic affairs and in the development and monitoring of budgets for faculty salaries and academic departments and programs; coordinating annual reports and periodic reviews of departments, programs, and offices; working with departments to hire non-tenure-track faculty; managing special projects for the vice president for academic affairs; and representing the vice president for academic affairs on committees and at professional meetings.

Requirements: Ph.D. in the humanities, fine arts, natural sciences or social sciences; minimum of four to seven years related work experience, including teaching and administration, preferably in an undergraduate, liberal arts setting; qualifications appropriate for appointment as a tenured associate or full professor; strong leadership, interpersonal and communication skills, both verbal and written; strong analytical and computer skills; and ability to prepare and manage academic budgets.

Agnes Scott College is a highly selective, independent, national liberal arts college for women located in metropolitan Atlanta. Founded in 1889 by Presbyterians, it has had a chapter of Phi Beta Kappa since 1926, and its endowment per student ranks among the highest of all colleges and universities and first among women's colleges. It currently has a full-time faculty equivalent of 87 and a diverse student population of nearly 900. A program of controlled growth is adding new faculty and is on target to reach an enrollment of 1,000 students early in the 21st century. A strategic plan emphasizing international education, science, experiential learning and interdisciplinary study is being implemented, and a $100 million dollar building and renovation program is underway.

Submit nominations or applications with a letter of interest, curriculum vitae and contact information for three professional references by February 15th to: Edmund J. Sibree, Vice President for Academic Affairs/Dean of the College, Agnes Scott College, 141 East College Avenue, Atlanta/Decatur, GA, 30030-3797.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age, or disability in its employment.

An Equal Opportunity Employer.

Send applications, vitae, and three letters of reference for the position of the School of Education, Aurora University, 5000 Kennedy Ave., Aurora, IL 60506. Contact: Linda B. Dvorak, Dean of Education.
CLARION UNIVERSITY
Clarion University of Pennsylvania
PROVOST AND ACADEMIC VICE PRESIDENT

The University: Clarion University of Pennsylvania invites nominations and applications for the position of Provost and Academic Vice President. Committed to a strong teaching mission complemented by research and service, Clarion University takes pride in the accomplishments of its students, who graduate from quality undergraduate and graduate programs that have earned the most prestigious accreditations. Founded in 1867 and located in scenic western Pennsylvania, the university enrolls approximately 6,000 students in academic programs conducted through the Colleges of Arts and Sciences, Business Administration, and Education and Human Services, and through the School of Nursing. Students attend classes at campuses in Clarion and Oil City, the Pittsburgh site, and at various distance education locations throughout the state. Clarion University is one of fourteen comprehensive public universities in the Pennsylvania State System of Higher Education.

Responsibilities: The Provost and Academic Vice President reports directly to and works closely with the President and acts as the chief executive officer in the absence of the President. As the chief academic officer of the University, the Provost and Academic Vice President is expected to promote academic excellence in the faculty and academic programs, and to strive for efficiency in instructional operations. Major responsibilities include providing creative and dynamic academic leadership and policy direction for university-wide planning and resource allocation; providing energy and vision to facilitate curriculum development and assessment and the acquisition and implementation of technology; identifying and facilitating opportunities for academic collaborations; and promoting a collegial working environment within a collective bargaining setting.

Qualifications: An earned doctorate from an accredited institution; a distinguished record of achievements in teaching, scholarship, and service; broad-based experience and leadership in academic administration and financial management, preferably at the dean’s level or above; demonstrated commitment to equal opportunity, cultural diversity, and global education; strong managerial and communication skills; a record of commitment to teaching excellence; commitment to the advancement of technology; understanding of the nature of a university’s mission and the state system of higher education; understanding of the essential values of academic integrity and civility in a community of learners; understanding of the procedures for establishing harmonious working relations within a collective bargaining agreement; a record of support for professional development and scholarly activity, and completion of a successful interview.

Applicants and Appointment: Candidates for Provost and Academic Vice President must submit the following materials: a letter of application addressing qualifications for the position, a resume, and three current letters of reference (including phone numbers and e-mail addresses). The evaluations of references must be based upon personal knowledge of the applicant’s professional performance. Application materials and requests for additional information concerning the position should be addressed to:

Ms. Linda Campbell, Search Committee Coordinator
202 Carrier Administration Building
Clarion University
Clarion, PA 16214

Applications received by February 4, 2000, will receive full consideration; review of applications will continue until the position is filled. Salary and benefits are competitive; appointment is effective July 1, 2000. Additional information is available at www.clarion.edu.

Clarion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply. AA/EOE.

DIRECTOR
CENTER OF TOURISM STUDIES

A Director is sought for a newly established College of Business Administration program in Tourism and Travel. Candidates should have industry experience or managerial level in some segment of the tourism-travel industry. Administrative experience is critical in order to handle all operational aspects of the program. Director will have extensive external contacts requiring excellent communication skills. A Ph.D. or significant progress toward imminent completion of the degree is required. Rank up to Associate Professor. Salaries are competitive and commensurate with qualifications. Position will remain open until filled. Send credentials to:

Dr. John Whollihan, Dean, College of Business Administration
Loyola Marymount University

LOYOLA MARYMOUNT UNIVERSITY

IONS COLLEGE
New Rochelle, Westchester County, New York

ADVERTISING, NEW MEDIA, TV

The Department of Mass Communication, a flagship program of Iona College, is seeking candidates for full-time tenure track positions in the following areas:

Advertising
To teach undergraduate courses such as advertising, copywriting, media planning and campaigns.

New Media
To teach undergraduate courses in areas such as multimedia, desktop publishing, communications graphics and Web design. Ability to teach courses in mass communication journalism or public relations desirable.

Television/Video
To teach undergraduate courses in television and video production and editing. Ability to teach related courses in mass communication desirable.

Although doctoral degree is preferred and required for tenure, initial appointment requires Master’s degree and professional experience. Other duties include academic and professional advisement as well as scholarship and professional activities. Rank and salary commensurate with qualifications. The position begins September 1, 2000.

Send curriculum vitae, a letter of application and a statement of one’s teaching philosophy along with the name, address and phone number of three references by January 31, 2000 to:

The Chair, Mass Communication Search Committee

*15 North Avenue, New Rochelle, NY 10801

and as a college in the tradition of the Christian Brothers and...
VICE CHANCELLOR
FOR SYSTEMS ADMINISTRATION

Community Colleges of Spokane invites applications for the position of Vice Chancellor for Systems Administration. The Vice Chancellor is an executive officer of the multi-campus district, reports directly to the Chancellor/CEO, and will assist in administering the District, consistent with Washington State Law, Washington Administrative Code, policies of the District Board of Trustees and District procedures.

Challenges: As an advisor to the Chancellor/CEO, the Vice Chancellor will ensure effective operation of district programs and services; provide leadership in district-wide systems administration and review; provide direction for institutional advancement and development; lead district-wide strategic planning and direct research and administration.

As a chief district administrator, the Vice Chancellor is responsible for strategic planning initiatives, short and long range planning, research and needs assessment projects, district information and technology systems, workforce development, telecommunications systems, district athletic programs, and fundraising and development activities. The Vice Chancellor serves as a member of the Chancellor’s immediate support group, serves on various district, college and state committees and performs other related duties as assigned by the Chancellor.

Profile: The Vice Chancellor must possess strong organizational and management skills; demonstrated experience in leadership, planning and consensus building; understanding of systems approach to administration; strong verbal and written communication skills; and the ability to promote and effectively embrace change. Additional minimum qualifications include a master’s degree from an accredited college or university (a higher earned degree is desirable), supervisory experience, two years experience in administration, technology, planning, budgeting, development, higher education systems or a related field. The successful candidate must demonstrate a commitment to and understanding of the community college philosophy and the ability to communicate effectively with internal and external constituencies. The desirable candidate will have higher education experience, an understanding of multi-campus district operations, including the interaction between district and college departments and a commitment to diversity.

Salary is commensurate with experience and qualifications. A comprehensive benefit package is included.

Application process: Incomplete applications will not be considered. A complete application consists of the following items:
1. official application
2. letter of interest addressing the challenges and the Vice Chancellor Profile
3. comprehensive resume
4. names, addresses and telephone numbers of at least three references
5. transcripts (unofficial copies are acceptable)

An official application may be obtained by contacting the Human Resources Office, Community Colleges of Spokane, 2000 N. Greene Street, Spokane, WA 99217-0499, Phone: (509) 533-7429; for TDD: (509) 533-7466. Website: http://ccs.spokane.cc.wa.us

AA/EEO

Application Deadline: To be guaranteed consideration, a complete application must be received by January 10, 2000. The position will remain open until filled.

Director of the Haas Center for Public Service

Stanford University is seeking an inspired national leader in the arena of public service to carry the Haas Center for Public Service into the next phase of its development. Established in 1984, the Haas Center promotes, organizes and supports public and community service by members of the Stanford community, especially students.

The Haas Center is a prominent organization that places more than 2500 students each year in academic and co-curricular programs in the local community, at the state and federal levels and overseas. The Center collaborates with deans, department chairs and faculty to build connections between service and academic instruction and research across the curriculum. It also serves as the campus base for Stanford in Washington and Upward Bound.

Serving as the executive leader of the Center, you will be responsible for establishing its vision in consultation and collaboration with the Faculty Steering Committee, the National Advisory Board, the Haas Alumnae Board, and the senior administration of the University. As chief administrator of the Center, you will be responsible for planning and management of its programs and operations; the quality of service to students, faculty and community organizations; program planning; budgeting and fundraising. The Director recruits, supports, leads and manages a diverse staff of 21, more than 30 part-time student employees and volunteer mentors.

Qualifications include a passion for public service education; demonstrated leadership; a clear position on national leadership in the arena of public service, the non-profit sector, and/or education-relevant public service programs; and the ability to engage faculty in the pedagogy of service-learning in an academic setting. Experience in designing and teaching college-level service-learning courses is highly desired. Additional requirements include a desire to work with university students; an in-depth understanding of the relationship between a research university and its surrounding communities at the national, state and regional levels; the ability to represent the Haas Center effectively to diverse constituencies; an understanding and appreciation of cultural and ethnic diversity; successful management experience, including financial management, recruitment, development and supervision, program planning, design and implementation; and demonstrated successful experience in fundraising and stewardship necessary to support a $1 million organization. An advanced degree is strongly preferred.

Applications will be reviewed beginning January 15, 2000, and accepted through the end of January. For complete position description and additional information about the Haas Center, visit http://haas.stanford.edu. Salary commensurate with experience. Applicants should submit a letter describing their personal philosophy of public service in education and resume to: Haas Center Director, c/o Ms. Suzanne Schaffler, Office of the Vice Provost for Student Affairs, 459 Lagunita Drive, Suite 6, Stanford, CA 94309. Equal Opportunity Employer. Women and minorities encouraged to apply.

Oak Knoll School of the Holy Child
Summit, NJ
Director of Development

Oak Knoll School of the Holy Child, an independent Catholic school in North-Central New Jersey for grades K-12, seeks a Director of Development beginning January 2000. Reports to the Head of School and supervises a staff responsible for annual giving, endowment campaign, alumni relations, volunteer and parent relations, public relations, special events, and cultivation. The school of 260 students is coed K-6 and young women in grades 7-12. This position requires excellent skills in organization, planning, leadership, and written and oral communications. The candidate should demonstrate qualities of initiative and enjoyment of teamwork and have proven success in staff development. Independent school development experience and familiarity with Blackbaud Raiser's Edge are preferred. Send cover letter and resume to Head of School, Oak Knoll School of the Holy Child, 44 Blackburn Road, Summit, NJ 07901, e-mail: (908) 277-3838.

Position Announcement

HEAD
SCHOOL OF INDUSTRIAL ENGINEERING

The Schools of Engineering at Purdue University invite nominations and applications for the position of Head, School of Industrial Engineering. The successful candidate should possess outstanding leadership qualities, communication skills, administrative abilities, and understanding of the current needs and future directions of the industrial engineering profession. Candidates should be eligible for appointment as full professor with immediate tenure based on a distinguished record of teaching, research, and service.

Located at West Lafayette, Indiana, between Indianapolis and Chicago, Purdue is one of the nation’s leading land grant universities with a full range of academic majors and over 50,000 students. The School of Industrial Engineering has approximately 35 faculty members, 430 undergraduate students, and 125 graduate students. Annual research expenditures exceed two million dollars. Consistently ranked among the top industrial engineering programs in the US, the School’s teaching and research activities cover a broad range of topics including engineering economy, human factors, manufacturing engineering, operations research, and production systems.

We seek to fill the position as soon as possible. Applications will be considered until the position is filled; screening will begin February 1, 2006. Nominations and applications with names of at least three references should be sent to:

Professor James J. Sollberg, Chair
11 Head Search Committee
School of Industrial Engineering
Purdue University
West Lafayette, IN 47907-1287

Purdue is an equal opportunity employer, and applications from women and underrepresented minorities are particularly encouraged.

FACULTY POSITIONS FOR 2000-2001

Green River Community College is located on a 168-acre wooded site in East Washington, about 30 miles from both Seattle and Tacoma. The college opened in 1955 with an enrollment of 6,000 students. It includes 11 instructional divisions and offers 50 vocational programs. The college is committed to diversity, student development, job placement, excellence, and meeting the needs of community, industry, and government.

Green River is a comprehensive community college that supports its students as they begin their lives through education. The college assists students in achieving their personal goals as they train to enter the job market, prepare to transfer to other colleges, universities, build their basic skills, and seek personal enrichment, through instructional programs, student services, opportunities to our community and beyond.

The college seeks innovative, creative, experienced faculty who are dedicated to students achieve excellence in their academic work, who are able to employ alternative instructional methods and approaches, and who are committed to a variety of teaching situations of the following full-time, part-time faculty positions available beginning Sep 2000 and continuing with annual nine-month contracts:

GRCC is an Equal Opportunity Employer/Affirmative Action Women and Minority Recruitment/Completion Program.
DEAN
SCHOOL OF EDUCATION

University of Colorado at Colorado Springs invites applications for the position of Dean of the School of Education (SOE). The University of Colorado at Colorado Springs is a dynamic, modern, community-based institution located in southeast Colorado Springs. The 500-acre campus sits on the eastern plains and the Garden of the Gods. CU Colorado Springs is the designated growth campus of the four-campus CU system. The School of Education is one of seven colleges on campus. The University has an enrollment of approximately 6,700. Colorado Springs, the second largest city in the state of Colorado, is home to the U.S. Olympic Training Center, the United States Air Force Academy, NORAD, and a rich tapestry of natural and cultural attractions.

The School of Education offers undergraduate and post-baccalaureate teacher licensure preparation programs and graduate training. The professional development school model is an integral part of teacher preparation within the College. Professional licensure programs lead to endorsement in school counseling, reading, middle school, special education, gifted and talented education, and educational administration. Students may earn a Master of Arts degree in Curriculum and Instruction, Counseling and Human Services, and Special Education. A Ph.D. program in Educational Leadership is offered in collaboration with the University of Colorado at Denver. The School of Education budgets for full-time faculty as well as extended tenure resulting in a combined total of 1.5 million dollars. Programs are accredited by the National Council for the Accreditation of Teacher Education and approved by Colorado Department of Education.

BASIC QUALIFICATIONS:
- Earned doctorate in education or related field from a regionally accredited institution.
- Excellent administrative leadership in higher education or state/federal educational agencies.
- Evidence of excellence in teaching, service, scholarly achievement sufficient for appointment to the rank of tenured full professor.
- Commitment to service in faculty and student body.
- Demonstrated ability to manage a budget in an era of limited resources.

PREFERRED QUALIFICATIONS:
- Experience in fostering the collaborative participation of people to achieve organizational goals.
- Notable experience in K-12 schools.
- Commitment to and knowledge about requirements for state and national (NCATE) accreditation.
- Demonstrated ability to maximize internal and external resources.
- Commitment to the integration of teaching into the teaching/learning process.
- Understanding of national trends and issues related to K-12 education and counseling services.

SALARY: Salary will be commensurate with experience and qualifications.

APPLICATION: An application package must include a letter of interest, detailed summary of your qualifications, and indications of your leadership experiences, how these experiences have influenced your orientation and philosophy of educational leadership; and how this will translate to your leadership of the SOE in a dynamic, diverse, and collegial environment. The package should also include a current vitae including names, addresses, telephone numbers, fax numbers, and e-mail addresses (if available) of five persons who can provide recommendations upon request. The successful candidate will need to provide copies of transcripts and verification for employment in the USA. Screening of applicants will commence January 15, 2005, and continue until the position is filled.

The University of Colorado at Colorado Springs is an Affirmative Action/Equal Opportunity Employer and encourages a diversity of applicants. Nominations and application should be addressed to: Joseph C. Ballo, Ph.D.

AGNES SCOTT COLLEGE

DIRECTOR OF ALUMNAE RELATIONS

Agnes Scott College seeks a Director of Alumnae Relations to provide strong leadership for traditional and new 

alumnae programs that engage Agnes Scott's alumnae body in the ongoing life of the College.

The director oversees an office that provides support to alumnae classes and regional associations offers a growing 

number of opportunities for alumnae education; facilitates alumnae participation in various forms of service to the College; 

encourages active communication among alumnae and the College; and coordinating procedures that select alumnae for 

alumnae leadership and are a variety of alumnae awards. The Director serves as the executive officer of the Alumnae 

Association Board of Directors; supervises a two-member staff; and engages and supports superior volunteer leadership.

This position requires strategic planning, event planning and management experience, a capacity to work effectively with volunteers, demonstrated ability in and effective use of technology, a 

commitment to the College's overall mission, the ability to work evenings and weekends, to travel and to balance competing priorities under deadline pressures. Prior association with Agnes 

Scott College and familiarity with its mission and traditions are highly desirable.

For full consideration, please submit nominations and application materials by January 31 to 

Dr. Lewis Thayne, Vice President for Institutional Advancement, c/o Office of Human Resources 

Agnes Scott College, 141 East College Avenue, Decatur, GA 30030-3757

Agnes Scott College is a highly selective, independent, national liberal arts college for women located in metropolitan Atlanta. Offering "the word for women," Agnes Scott College encourages participation in diverse, interconnected disciplines, across campus and across communities. Founded in 1889 by Presbyterians, Agnes Scott is a diverse and growing residential community of scholar with one of the largest endowments per student of any U.S. College or university.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age or disability in its employment.

Agnes Scott College has a strong commitment to diversity and seeks members of underrepresented groups to apply. An Equal Opportunity Employer.

www.AgnesScott.edu
DIRECTOR OF RESIDENCE LIFE AND HOUSING

Kean University, a publicly-supported, comprehensive university is seeking a Director of Residence Life and Housing. The Director is responsible for providing leadership and direction to an office that has a residential population of over 1,200 full-time, undergraduate students. The Director has responsibility for the overall management of the Residence Life Program that serves resident students and the University.

Responsibilities: The successful candidate should demonstrate creative management, planning, and problem solving ability. Strong interpersonal and communication skills, proficiency with computer applications, and an extensive knowledge of budget management, purchasing and vendor agreements. The Director should have experience and a record of success in selecting, leading and training professional staff to provide exemplary services to a diverse residential population. Active participation in professional associations.

Qualifications: Master’s degree. A minimum of five years managerial experience in Residence Life and Housing in a college/university setting. Review of applications will begin immediately until the position is filled. Application materials should include a cover letter, current resume and names, addresses, and telephone numbers of three references. Official transcripts and three current letters of recommendation are required before appointment. Apply to: Patrick J. Ippolito, Vice President for Student Affairs, Director of Residence Life and Housing Search, Kean University, 1000 Morris Avenue, Union, New Jersey 07083. Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits program included.

Kean University is an EEO/AA Institution.

DIRECTOR OF HUMAN RESOURCES

RARITAN VALLEY COMMUNITY COLLEGE (RVCC)

is a dynamic and growing institution at the hub of educational and cultural life of Somerset and Hunterdon counties. Set on 240 rolling acres just outside Somerville, NJ, RVCC serves the educational needs of a diverse student body exceeding 10,000. Florida Gulf Coast University
Faculty Positions

Join a new, growing, and innovative university on the beautiful southwest coast of Florida. Florida Gulf Coast University opened in August 1997 as the tenth member of the Florida public university system. A comprehensive university offering a broad range of undergraduate and graduate programs, it has 170 full-time faculty and 3,300 students. The 760-acre campus, located between Ft. Myers and Naples, is in the midst of a continuing capital expansion that will provide two additional academic buildings, a fine arts complex, a student activities center, and athletic facilities to support an expected enrollment of 8,000 students by 2003. Mandated by the Florida Board of Regents to experiment with innovative ideas and technologies, from multi-year faculty appointments to distance learning, FGCU is forging an academic culture that maintains traditional foundations but supports thinking and acting outside traditional boundaries. Florida Gulf Coast University received accreditation by the Southern Association of Colleges and Schools effective January 1999.

Applicants should be committed to quality, learning-centered education; have experience in, knowledge of, or openness to the uses of information technology and interdisciplinary approaches to teaching and learning; be willing to participate in a collegial working atmosphere and broaden professional identity beyond discipline/department boundaries; be flexible beyond lecturing and traditional professorial and institutional preferences in meeting student learner needs; support the University's commitment to diversity and its other founding principles; and possess an overall willingness to experiment, assess, and change. Appointments will be made on a multi-year renewable contract basis. The application deadline date is January 25, 2000 unless otherwise noted.

College of Arts and Sciences

In addition to the application materials requested below, for each position in the College of Arts and Sciences in which you are interested (see specific notes under Art), please submit one copy of the following: a statement of educational and assessment philosophy; two syllabi you have either taught or developed, and copies of student evaluations of your teaching, if available.

Computer Science - Ph.D. in computer science and significant experience in the field. Specific expertise in software engineering req. Masters degree in computer science with exceptional industrial experience will be considered. Knowledge of computer networks, Internet technology, or compiler technology desirable. Asst./Assoc. Professor rank. Position #12019.

Biological Sciences - Ph.D. or AB.D. (degree to be completed prior to contract start date) in any biological sciences discipline. Prefer applicants with interests in integrating organismal biology with molecular biology (no phylogenetic preferences). Candidates dedicated to supervising undergraduate research are encouraged to apply. Asst./Assoc. Professor rank. Position #3139. Also include a statement of research interests articulating how you will involve undergraduates.

Economics - Ph.D. or AB.D. near completion of Ph.D. Experience teaching principle courses in microeconomics and macroeconomics. Demonstrated ability to teach upper division courses in microeconomics. Candidates with interests in environmental economics are preferred. Interdisciplinary teaching and outcomes based pedagogy experience is likewise desirable. Asst./Assoc. Professor rank. Position #3162.

Statistics - Ph.D. in statistics conferred by August 2000 with specialty in statistics or operations research. Prefer experience using computer algebra systems and/or statistical software in instruction. Ability to direct undergraduate research projects is a plus. Asst./Assoc. Professor rank. Position #31149 (ready).

Art - MFA in 3-D area or graphic design. Broad range of technological experience appropriate to area of expertise. Commitment to teaching the visual arts within a liberal arts educational context. Prefer demonstrated involvement in pedagogical and student assessment issues. Asst./Assoc. Professor rank. Position #31620. Also include a single set of the following four items (required for consideration): 20 slides/examples of your own work; two syllabi of courses you have taught/developed; a statement of educational and assessment philosophy (no more than 2 pages in length), and if available, five samples of your students' work, either visual or written, with a brief description of the assignment and student's educational level and SASE. Deadline: 7/10/00.

Spanish - Ph.D. in Spanish. Native fluency in spoken and written Spanish. Experience teaching lower and upper level language courses in Spanish. Solid background in Latin American/Hispanic civilization, culture and literature. Fluency in spoken and written German and ability to teach lower level German courses desirable. Asst./Assoc. rank. Position #31623.

Theatre - Ph.D. or MFA in theatre or related field. Demonstrable interest in teaching acting and experience in one of the following: musical theatre, dance, cinema, arts management or television. Prefer professional experience (ARA, AFTTRA, SAG) with training in teaching acting. The ability to teach major voice and movement concepts. Asst./Assoc. rank. Position #31624.

English - Ph.D. in English, Renaissance literature with background in Shakespeare and Composition. Prefer interdisciplinary teaching and curriculum development experience. Asst./Assoc. rank. Position #31956.

College of Education

The College of Education is committed to site-based preparation of teachers, counselors and educational leaders. Faculty are expected to be excellent teachers, responsive to community and local school district needs, and committed to the effective use of technology including distance learning. In addition to the application materials requested below, for each position in the College of Education in which you are interested, please submit one (1) copy of a statement of your educational and assessment philosophy.

Science Education - Earned doctorate in science education or closely related field, 3 years experience in secondary teaching in science, teaching at the college level. Academic preparation in and experience with environmental education required. Prefer experience with school partnerships and/or professional development schools. Asst. Professor rank. Position #31626. Deadline: Open until filled. Screening will begin on 1/28/00.

ESOL - Earned doctorate in ESOL, multicultural education, second language acquisition, applied linguistics or closely related field and 3 years experience in public school teaching, administration or equiv. Asst. Professor rank. Position #31625. Deadline: Open until filled. Screening will begin on 1/28/00.

Special Education - Earned doctorate in special education or related field and 3 years teaching experience in public schools teaching individuals with disabilities. Prefer experience in higher ed., recent experience with students with developmental disabilities or behavior disorders. Asst. Professor rank. Position #31134.

Social Studies Education - Earned doctorate in social studies education or related field and 3 years experience in secondary teaching in social studies. Prefer experience with school partnerships and/or professional development schools. Asst. Professor rank. Position #31277.

College of Health Professions

Occupational Therapy Chair - Masters in appropriate discipline, relevant experience in an OT academic program and Florida license (or elig.). Prefer earned doctorate, experience as an administrator in an OT academic program. Asst./Assoc./Full Professor rank. Position #31100.

Occupational Therapy - Advanced masters degree in OT or related discipline, 5 years OT practice experience, 2 years full time teaching experience in a four-year college or university program and Florida license (or elig.). Prefer an earned doctorate, experience in geriatric, orthopedics, and/or community-based practice. Asst./Assoc./Full Professor rank. Position #31630. Deadline: Open until filled. Screening will begin on 1/28/00.

Library Services

Technical Services Team Leader - MLS and 3 years exp. Prefer exp. in library mgmt. or mgmt. exp. in public or non-profit agencies. Manages and directs Technical Services with responsibility for overall effectiveness. Position #11136. Deadline 1/31/00.

TO APPLY: Applicants and nominees should submit an original and a copy of the following: a letter expressing interest and qualifications for the position, current curriculum vitae, and a list of at least five professional references to Florida Gulf Coast University, Position #, HR Dept., 10501 FGCU Blvd. South, Ft. Myers, FL 33965-6655. Additional information can be obtained by visiting our website at www.fgcu.edu or call our 24-hr jobline at 941-590-1111.

Florida Gulf Coast University is an Equal Opportunity Employer and encourages women, people of color, and people with disabilities to apply. The search is being conducted under the Public Records Act and the Government in the Sunshine laws of the State of Florida.
East Stroudsburg University of Pennsylvania
DEAN
SCHOOL OF HEALTH SCIENCES AND HUMAN PERFORMANCE

East Stroudsburg University of Pennsylvania invites nominations and applications for the position of Dean at the School of Health Sciences and Human Performance.

Founded in 1855, East Stroudsburg University, with an enrollment of 4,000 students, is one of the universities in the Pennsylvania State System of Higher Education. Approximately 60 undergraduate degree programs are available and graduate studies are offered in 15 areas of specialization. The University is located in the Pocono Mountains of northeastern Pennsylvania, 75 miles west of New York City and 100 miles north of Philadelphia.

The Dean reports directly to the Provost and Vice President for Academic Affairs and is the chief academic and administrative officer for the School of Health Sciences and Human Performance which includes the departments of Health, Movement Studies and Exercise Science, Nursing, and Speech Pathology and Audiology. The School has approximately 1,000 undergraduate and graduate majors. This is a senior management position without faculty rank.

The Dean is responsible for the leadership in planning, organization, administration, and evaluation of the educational program of the School. The successful candidate will possess:

REQUIREMENTS:
• An earned doctorate from an accredited university
• Seven years of experience as a faculty member in higher education
• A minimum of three years experience in higher education as a department chair, assistant or associate dean

PREFERENCES:
• An earned doctorate in an appropriate discipline
• Extensive experience in curriculum development at the undergraduate and graduate levels
• Experience in budgeting, program development and evaluation, personnel supervision and evaluation, student service and advocacy
• A commitment to the principles of social equity and to quality education for a multicultural society
• An understanding of and appreciation for the application of the shared governance process
• Substantial experience working in a collaborative bargaining environment
• Demonstrated ability in grant writing and research activities
• Experience in establishing relationships with internal and external constituencies
• An understanding of the application of new technologies in education

Projected starting date for this position is July 1, 2000. Competitive salary plus excellent benefits. Final selection will be based on final interview. Qualified candidates must submit a letter of application, current vita, transcripts, three professional letters of recommendation, and the names, addresses, and telephone numbers of three additional references to: Ms. Renee Riedel, Human Resources, Position #14-99-FEO, East Stroudsburg University, 200 Prospect Street, East Stroudsburg, PA 18301. All materials must be received by February 4, 2000.

ESU is an equal opportunity employer. Minorities and women are strongly encouraged to apply. Visit our homepage at www.esu.edu

NEW PALTZ FACULTY POSITIONS

State University of New York at New Paltz is a small, selective public university whose essential character is shaped by its location in the Mid-Hudson Valley region. SUNY New Paltz maintains a strong commitment to the primacy of undergraduate and graduate teaching, as ethnically and culturally diverse campus population, and international studies. It serves about 6,000 undergraduate and 1,300 graduate students, both traditional and non-traditional.

SUNY New Paltz has created a fund to enhance the diversity of its faculty. We are striving to better reflect the ethnic distribution of our student body. Currently, eight tenure-track positions are available for Fall 2000 for excellent teachers/scholars who meet the departmental teaching needs and assist the university in meeting this goal. The departments with faculty position authorizations are as follows:

- Anthropology
- Business Law
- Psychology
- Education Administration
- Biology - Physiology
- History
- Strategic Management-Operations Research
- Mathematics Education

The successful candidate must hold a Ph.D. in the designated discipline to be appointed in a professional title. ABD candidates may be considered for lecturers. The University emphasizes a balance between teaching and research. Although primary responsibility is on teaching, ongoing research/publication record is essential for tenure. Teaching duties will be assigned in both upper and lower division courses.

Searches begin immediately and continue until position authorizations are filled. Please send a vita and three letters of recommendation to: Chair F997X, SUNY New Paltz, 75 South Main Street, New Paltz, NY 12561.

AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER.
ITHACA
ROY H. PARK SCHOOL OF COMMUNICATIONS
Cinema and Photography Department
Two Film Production Positions

Two tenure-eligible film production positions starting August 15, 2000 offer successful applicants the opportunity to teach and produce work in a lively, creative, and engaging environment and to take part in shaping an evolving curriculum in one of the strongest undergraduate communication programs in the country.

The Department of Cinema and Photography at Ithaca College offers both B.S. and B.F.A. degrees. Our degree programs have a strong commitment to integrating production and critical studies. We offer courses in 16mm production and post-production, film sound post-production, directing, screenplay writing, and computer animation. Other specialized areas of study include narrative, documentary, experimental, and hybrid forms. Our program has significant resources, including contemporary digital technology and support staff for both traditional 16mm production (including an on-site 16mm black-and-white processing lab) and post-production (e.g., Avids and Telecine).

The Park School and the College actively promote and support faculty development, made possible by a $17 million bequest from the late Justice B. Pendleton to the Park School. The Pendleton Endowment provides significant internal grant support for faculty and student production and research. Additional funding is provided by the College through a series of grant programs.

POSITION DESCRIPTION

MFA in filmmaking or related discipline and a strong record as a practicing filmmaker are required. Candidates with other graduate degrees as well as significant teaching experience may be considered. It is required that they have outstanding records of exhibition and creative accomplishment.

An ideal candidate should demonstrate evidence of: 1) teaching effectiveness appropriate for an undergraduate film program; 2) significant experience in traditional and/or digital filmmaking technology and techniques; and 3) a strong commitment to encouraging filmmaking as a creative practice within cinema as an academic discipline.

Primary teaching responsibility will be across the range of film production and post-production courses at all curricular levels. Additional teaching responsibilities may include courses in the candidate's areas of expertise.

Each candidate will also act as an academic advisor to students and serve on department, school, and college committees.

Tenure-eligible positions: Assistant/Associate Professor rank; salary competitive, depending upon experience and qualifications.

Applicants should forward a resume/ vita, statement of interest including areas of teaching and professional experience, names and phone numbers of at least three references, and sample of creative works (on film or video) to: Janice Levy, Chair, Film Production Search Committee, Cinema and Photography Department, Roy H. Park School of Communications, Ithaca College, Ithaca, New York 14850-7251. Additional samples of creative works and other supporting material may be requested at a later date. No faxed or electronically transmitted application materials will be accepted. Screening will begin January 28, 2000 and will continue until the position is filled.

Ithaca College is an independent, residential, comprehensive college with an undergraduate enrollment of approximately 5,000 students. It is located in the scenic Finger Lakes Region of central New York.

The Roy H. Park School of Communications is one of four professional schools within the College, and enrolls approximately 1,200 students in the majors of three undergraduate departments (Cinema and Photography, Television, Radio, and Organizational Communications, Learning, and Design); a B.A. in Journalism, a B.S. in Telecommunications Management, a B.F.A. in Film, Photography, and the Visual Arts, and a B.A. in Media Studies are also offered. The Ithaca College Los Angeles Communications Program offers an internship-based full-semester program to junior and senior communication students. The Graduate Studies program offers an M.S. in Communications. Recent grants and bequests from the Park Foundation and the estate of James B. Pendleton, totaling over $25 million, have positioned the Park School as one of the strongest undergraduate communication programs in the nation and created state-of-the-art support facilities in audio, video, film, photography, multi-media and telecommunications.

ITHACA COLLEGE IS AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER MEMBERS OF UNDERREPRESENTED GROUPS INCLUDING PEOPLE OF COLOR, PERSONS WITH DISABILITIES, VIETNAMESE VETERANS AND WOMEN ARE ENCOURAGED TO APPLY.

PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Florida Gulf Coast University (FGCU), the State University System's newest member institution, seeks an energetic and accomplished academic leader to serve as Provost and Vice President for Academic Affairs. The position is the senior vice president and chief academic officer of the university reporting to President William C. Merwin.

The university is a new, comprehensive public university offering a broad range of undergraduate and graduate areas of study, with a mandate from the Florida Board of Regents to employ innovative ideas and technologies in the development and delivery of programs and services. FGCU opened for classes in August 1997 and received accreditation by the Southern Association of Colleges and Schools in June 1999. The 760-acre campus, located in one of the fastest growing regions of the United States, complements the natural beauty and ecology of Southwest Florida. In only its third year of operation, FGCU boasts a student body of 3,300 students, a full-time faculty of 170 and an annual operating budget of $36.5 million. A capital expansion program will provide two additional academic buildings, a fine arts complex, a student activity center, and athletic facilities to support the expected enrollment growth to 8,000 students by 2003.

The Provost is expected to continue the advancement of FGCU's unique mission and guiding principles, to facilitate the work of an energetic faculty in a student learning environment, and to bring strong, innovative, and imaginative leadership to the university community. In order to gain additional insight into the position requirements and the university, applicants should access the Provost Search Web site at www.fgcu.edu/provost. The following units report through deans or directors to the Provost: the colleges of arts and sciences, business, education, health professions; the school of public and social services; the office of student services, library services, instructional technology, planning and evaluation, and research and sponsored programs.

The university seeks candidates who possess an earned doctorate from an accredited institution, preferably in a field represented at the university, and with strong academic teaching and scholarship credentials. Candidates must present evidence of successful experience within complex organizations in positions of increasing responsibility in all aspects of academic administration, budgeting, and resource allocation, and have at least three years of distinguished academic leadership at a dean or equivalent level, with five years highly desirable. Candidates must be able to demonstrate a commitment to participatory management and diversity, possess exceptional interpersonal and communications skills, and partnership building.

Screening of applications began on December 8, 1999 and will continue until the position is filled. The anticipated starting date for the position is July 1, 2000. Applications should be received by January 31, 2000 to assure full consideration in the screening process. Electronic mail inquiries may be addressed to: provost@fgcu.edu.

Applicants and nominees should submit a letter expressing interest and qualifications for the position, current curriculum vitae, and a list of at least five professional references to:

Provost Search Committee
Florida Gulf Coast University
Human Resources, Pos. #11227
A. D. B. Oates Hall

The search is being conducted under the Public Records Act and the Government in the Sunshine laws of the State of Florida.
HILLSBOROUGH COMMUNITY COLLEGE

Hillsborough Community College (HCC) is a dynamic multi-campus, state-supported Community College accredited by the Southern Association of Colleges and Schools. Located in the Tampa Bay Area on Florida's west coast, HCC assists individuals in developing academic excellence by providing university parallel, technical and continuing education programs complemented by comprehensive student support services. The College supports community growth and development through participation in programs dedicated to environmental conservation, promotion of fine arts, development of a productive and contributing citizenry, joint economic development initiatives with business and industry partners and cooperative arrangements with other educational and health care institutions. For more information about the College and Tampa Bay, access the HCC Web Site at www.hcc.edu or call the HCC JOBLINE at (813) 253-7185.

CAMPUS ADMINISTRATOR OPPORTUNITIES

Dean of Academic Affairs, Brandon Campus

The Brandon campus is home to the College's Honors Institute and the Distance Learning Program. The main campus located on an 82-acre site off Falkenburg Road between SR 60 and SR 574, serves the central portion of Hillsborough County and the developing corporate-industrial corridor along Interstate 75 and 4. This position supervises and coordinates the operations and administration of the Academic Affairs program for the Brandon Campus to ensure effective delivery and management of all campus instructional programs. Responsible for Academic Affairs programs activities including, but not limited to: curriculum development and evaluation; academic planning and outcome assessment; budget management; faculty and support staff development and evaluation; and scheduling and staffing of classes. Requires Master's degree and a minimum of five years of experience. Preference will be given to candidates with a doctorate in a related discipline. Probable starting salary is $52,407 pending Board of Trustees approval.

Dean of Associate in Science Degree Programs, Dale Mabry Campus

HCC's largest campus is located on Dale Mabry Highway, adjacent to Raymond James Stadium, home of the Tampa Bay Buccaneers and to the center of a major professional sports complex including the spring home of the New York Yankees. The campus specializes in health sciences and technology and intercollegiate athletics, and offers the required courses for both the Associate in Arts and the Associate in Science degrees. This position supervises and coordinates the efforts and resources of the Division of Technical Programs. The Division of Technical Programs supports multi-faceted programs in architectural design and construction, electronics, biotechnological engineering, computer sciences, hospitality and tourism management, culinary management, accounting and business. Responsible for program activities including, but not limited to: curriculum development and evaluation; academic planning and outcome assessment; budget management; faculty and support staff development and evaluation; and scheduling and staffing of classes. Requires Master's degree and a minimum of five years related work experience. Preference will be given to candidates with a doctorate degree in a related discipline, with an advanced degree in one of the disciplines supported by the Division. Probable starting salary is $52,407 pending Board of Trustees approval.

Dean of Arts and Sciences, Plant City Campus

The Plant City Campus is located on SR 55 and SR 56 on Park Road, one-half mile south of Interstate 4 off Exit 14 in Plant City. A full range of university transfer and technical courses are offered as well as a large variety of continuing education courses. This campus contains the College's horticultural greenhouse and the Institute of Florida Studies Program, which features the Florida Studies Center and the College's environment centers. This position supervises and coordinates the operations and administration of the Arts and Sciences and College Preparatory programs for the Plant City Campus to ensure effective delivery and management of all campus instructional programs. Responsible for program activities including, but not limited to: curriculum development and evaluation; academic planning and outcome assessment; budget management; faculty and support staff development and evaluation; and scheduling and staffing of classes. Requires Master's degree and a minimum of five years of experience. Preference will be given to candidates with a doctorate degree in a related discipline, small campus/College experience, hands-on management style and an understanding of and experience with transfer and development programs ("prep" programs) in Florida's community colleges. Probable starting salary is $52,407 pending Board of Trustees approval.

DISTRICT ADMINISTRATOR OPPORTUNITIES

Dean of Continuing Education Programs

This position is responsible for the College's continuing education programs and services. This position supervises and develops program coordinators, oversees class development; prepares new courses for approval; and plans advisory meetings. Responsibilities also include design and implementation of informational materials, and maintaining contact with local, state and regulatory agencies. Requires a Master's degree and five years of prior related work experience. Preference will be given to candidates with a Doctorate in a related discipline and prior supervisory experience in a community service program. Probable starting salary is $52,407 pending Board of Trustees approval.

Dean of Learning Resources

This position plans, directs and evaluates all aspects of the daily operation of a campus library and district-wide library services. This includes providing and coordinating acquisition, cataloguing and processing of material; and audiovisual and automation services. Reviews, trains, supervises and evaluates all assigned campus and district library services faculty and staff; and communicates and strengthens relations for the campus library and district library services. Requires a Master's degree in library or information science from an ALA accredited program and five years of prior related work experience. Probable starting salary is $52,407 pending Board of Trustees approval.

Executive Director of Economic Development

Through management of the College's VISION initiatives, establishes and implements education and training services which maximize employment opportunities; enhances economic development efforts and increase productivity and productivity of local businesses and industry. Assures labor organizations in establishing economic development efforts to increase productivity and productivity of local businesses and industry. Requires a Master's degree and a minimum of seven years of related work experience. Probable starting salary is $52,407 pending Board of Trustees approval.

International Education Program Director

Responsible for the professional coordination of international education programs at the College. Develops proposals and serves as liaison to establish and maintain international partnerships for student work and internships. Requires a Master's degree and a minimum of three years of related work experience. Probable starting salary is $45,427 pending Board of Trustees approval.

To apply, send a letter of interest, detailed resume and three professional references received or postmarked by February 21, 2000 to:

HILLSBOROUGH COMMUNITY COLLEGE, EMPLOYMENT OFFICE, P. O. Box 3127, Tampa, Florida 33601-3127
(813) 253-7030 www.hcc.cc.fl.us

HCC is an equal opportunity/affirmative action employer. Persons of color, women, and persons with disabilities are strongly urged to apply.

Framingham State College

MATHEMATICS DEPARTMENT

Tenure-track Assistant Professor of Mathematics, beginning September 2000

The Mathematics Department invites applications for a tenure-track, assistant professor appointment beginning Sept. 2000.

Applicants must have a doctoral degree in mathematical sciences and show evidence of a strong commitment to excellence in teaching and continued scholarly growth. The successful candidate would teach courses throughout the mathematics curriculum, including courses satisfying the college's mathematics requirement. The teaching load is three courses per semester (12 hours per week).

To apply, please send vita, official transcripts, a statement of teaching philosophy, and three letters of reference, at least one of which comments on teaching ability, to Search Committee, Department of Mathematics, Framingham State College, Framingham, MA 01701. The closing date for applications is Feb. 29th.
Senior Evaluation Officer

The Wallace-Reader’s Digest Funds, NYC

The evaluation department manages the Funds’ efforts to elicit major lessons from its grant-supported work in order to bring about improvements in the Funds’ fields of interest and in public policy. To leverage the combined fruits of research and evaluation, grant-funded work, and effective communication on behalf of a major philanthropy, this senior, strategy-level position is responsible for identifying strategic learning opportunities in the Funds’ fields of interest, linking Fund-supported research and evaluation to field leaders and policymakers; and getting the most productive work from outside research firms.

Ph.D. in a social science discipline related to the Fund’s areas of interest strongly preferred. At least ten years’ experience as a manager or principal investigator on multi-year, multi-site research projects or evaluations of programs in education, community and youth organizations, other community and human services, and/or arts and cultural organizations. A facility for policy analysis and other ways of understanding major issues of importance to the Funds (e.g. school leadership, out-of-school time, arts participation), and for thinking analytically about how organizations or sectors such as education change. Also required: highly developed organizational skills; grounding in data collection, statistical analysis and databases; flexibility about method, rigor about results; exceptional interpersonal, communication and administrative skills; proven facility for collaborative work, developing rapport with research subjects, and shaping appropriate evaluation designs that serve the interests of all parties.

Competitive salary; generous benefits. Reports to the Director of Evaluation.

Nominations or resumes promptly in confidence to: Ned Rightor, MXCIX, 111 Fairchild Street, Needham, MA 02492. Suggestions welcome. Telephone: 781-449-4448. Fax: 781-449-3112. E-mail: mxcix@medaone.net. Closing date: 12/8/00.

The Funds are an equal opportunity employer, committed to maintaining a diverse workplace where differing perspectives are a source of strength. People of color and women are strongly encouraged to apply.

**UNIVERSITY OF LOUISVILLE**

**VICE PRESIDENT FOR DEVELOPMENT AND ALUMNI**

The University of Louisville (UofL) invites nominations and applications for the position of Vice President for Development and Alumni. Founded in 1798, The University of Louisville is a state-supported institution with a private endowment ranking in the top 80 of all American universities. UofL has the mission of becoming a pre-eminent metropolitan research university. It offers more than 160 degree programs in 11 schools and colleges, including four professional schools (Medical, Dental, Law, and Engineering). The University enrolls 21,000 students and has an operating budget of $420 million and an endowment of $375 million—the largest endowment of any public university in Kentucky.

The Vice President for Development and Alumni reports to the Provost, and as a member of the executive leadership team works directly with the President on the solicitation of major gifts. The Vice President is responsible for the overall leadership and management of the University's development and alumni relations programs.

We are seeking an individual with a significant leadership experience in a senior development position with a complex university or college and a proven record of fundraising. Candidates for this position must also possess excellent communication skills; demonstrated ability to work with other members of the management team, the Boards of Trustees, the Foundation, the Overseers and other volunteers; and the ability to build effective relationships with varied constituencies. A baccalaureate degree is required, an advanced degree is preferred.

The University offers an extremely attractive and comprehensive benefits package. Nominations and resumes should be forwarded to:

Neil A. Stein, Vice President
R.H. PERRY & ASSOCIATES
2607 31st Street, NW
Washington, DC 20008
Tel: (202) 965-6644
Fax: (202) 338-3953

University of Louisville is an affirmative action equal opportunity institution.
University of Wisconsin-Extension
CHANCELLOR

The University of Wisconsin System (UWS) invites applications and nominations for the position of Chancellor of the University of Wisconsin-Extension (UWE). Unique in public higher education, UW-Extension is one of fifteen institutions in a higher education system, which also includes two doctoral universities, 11 comprehensive universities and a network of freshman-sophomore transfer colleges. The Chancellor of each UWS institution reports to the President of the UW System.

Headquartered in Madison, Wisconsin, UW-Extension embodies the "Wisconsin Idea" (i.e., the boundaries of the campus are the boundaries of the state). UW-Extension coordinates and funds a statewide extension/outreach program with the other 14 UW institutions, the 72 county Extension offices, public broadcasting, and a host of public local, state, and federal agencies and other groups and private partners. This statewide responsibility is organized around the following programming divisions/units: Business & Manufacturing, Continuing Education Extension, Cooperative Extension, and Wisconsin Public Radio and Public Television.

In FY98, UW-Extension and its educational partners used a variety of instructional media and methods to extend UW resources to over one million Wisconsin residents in the state's urban centers and rural communities. UW-Extension employs 1,969 full-time-equivalent employees, including faculty, academic staff, and classified staff. The UW-Extension annual operating budget is approximately $153 million and includes student fees, gifts, contracts and support from federal, state and county governments.

UW-Extension seeks a chancellor with the capacity to lead an energetic institution within a large and dynamic public higher education system. Applicants or nominees should have:

- Academic credentials and accomplishments of a quality which will command the respect of the academic community, including scholarly contributions in extension/outreach, teaching, research, and public service, and administrative and academic tenure may be granted upon the recommendation of the appropriate department;
- Desire and ability to advance the institution's mission of extension/outreach, to provide leadership to the faculty in advancing the scholarship of extension/outreach, teaching, research, and public service, and to extend the UW's educational programs beyond the campus boundaries;
- Significant administration experience, including the ability to lead faculty, staff, administrators, and other constituents in implementing the current and future strategic plan;
- Commitment to utilizing distance education (e.g., multiple applications of technology) to achieve the outreach goals of the UW System;
- Understanding and acceptance of Wisconsin's tradition of shared governance with faculty and academic staff;
- Recognition and acceptance of the need to work collaboratively and share decision-making with the other UW chancellors on programs using integrated faculty and resources.
- Ability to represent the institution effectively to its many internal and external constituencies, including UW System Administration, the Board of Regents, community and business partners, and other educational institutions, governmental agencies, legislative and executive branches of the state and federal government;
- Evidence of accomplishments of creating, and work experiences resulting in, an inclusive workplace and work environment, and development of multicultural educational programming;
- Personal qualities including integrity, intellectual curiosity, compassion, resilience, and energy.

The position is available July 1, 2000. Application materials should include a letter addressing the attributes noted above, a curriculum vitae, and the names, addresses, and telephone numbers of at least five references which include faculty and community leaders. Evaluation of applications will begin on February 1, 2000 (date revised). In accordance with Wisconsin's open records law, requests for confidentiality by nominees and applicants will be honored, except that names and titles of the finalists must be disclosed, if so requested.

Requests for information, and submission of nominations and application materials should be directed to: Professor Lee Cunningham, Chair, UWEX Chancellor Search & Screen Committee, 527 Extension Building, 632 North Lake Street, Madison, WI 53706-1498; Tel: (608) 262-3788; Fax: (608) 262-5722; E-mail: chancellorsearch@uwex.edu.

Dr. Jean Dowdall, A.T. Kearney Executive Search, is assisting the Committee. Questions may also be directed to Dr. Dowdall or to her associate, Elizabeth Moseley, at (763) 739-4725, 333 John Carlyle Street, Alexandria, VA 22314; jean.dowdall@atkearney.com; elizabeth.moseley@atkearney.com.

Further information about the position, the application process, and the institution is available at http://www.uwex.edu/chancellorsearch.

The University of Wisconsin is an Affirmative Action/Equal Opportunity employer and actively seeks and encourages applications from women, minorities, and persons with disabilities. It is our policy to provide reasonable accommodations to qualified individuals with disabilities who are employees or applicants for employment.

ASSISTANT PROFESSOR IN HUMAN PERFORMANCE AND FITNESS

- The University of Massachusetts Boston invites applications for a full time tenure track position beginning Fall 2000. Candidates with experience teaching physical education in the public schools are encouraged to apply. An earned Doctorate in Physical Education or related field, undergraduate and graduate teaching experience and evidence of a clearly established research agenda is required. Candidates are expected to teach undergraduate courses in motor learning and methodology. They are also expected to supervise student teachers as well as teach graduate courses in philosophical issues, curriculum development, and research methods in physical education. Candidates are also expected to develop a nationally visible research program and participate in College and University service. Salary and academic rank will be commensurate with experience. Completed applications will be reviewed beginning Spring 2000, and will continue until the position is filled. Please send a cover letter, curriculum vitae, and three letters of recommendation to: Office of Human Resources, University of Massachusetts Boston, Search 970-140, 100 Morrissey Blvd., Boston, MA 02125-3393.

U Mass Boston

ASSOCIATE VICE PRESIDENT FOR HUMAN RESOURCES

Dartmouth College invites nominations and applications for an Associate Vice President for Human Resources. This senior level position reports to the Vice President and Treasurer and manages the functions of Faculty and Staff Benefits, Employee Relations, Employment, Training and Development, Salary Administration, and Information Processing Services.

The Human Resources office provides programs, consultation, and information that empower and support managers, faculty, and staff to meet the goals of the campus. Serving as a supportive partner in the teaching, research, and public service mission of the College, the role of Human Resources is to provide vision and leadership that promotes an environment that values excellence, diversity, autonomy, creativity, and productivity at all levels of the organization. To achieve the mission of the office, the Associate Vice President must possess a flexible and diplomatic leadership style, a belief in inclusive decision making, a commitment in balancing the interests of the College with the needs of its employees, and well developed organizational skills. The Associate Vice President must be an effective, solution-oriented project manager, able to execute efficient judgment in identification of best practices and management of changes that may be required to implement these changes. The successful candidate for this position must be a person of outstanding professional and personal integrity who acts with sensitivity, judgment, and appropriate flexibility in all associated contexts. Experience in human resources strategic planning with the ability to conceptualize, articulate, and implement a human resources vision for Dartmouth College that is consistent with the institution's mission and culture is key to this position.

A Bachelor's degree is required, and there is a strong preference for a Master's degree in Business Administration, Human Resources Administration, Organizational Psychology, or other related areas. The successful candidate must possess at least twelve years of experience in a career of increasing responsibility, with a minimum of six years in higher education or academic medical centers, experience as a human resources generalist and as a specialist in two or more of the typical human resources functions is essential.

The review of applications will begin immediately. Nominations and applications should be sent to: Associate Vice President For Human Resources Search Committee, 601 South Parkhurst Hall, Hanover, NH 03755.

Dartmouth College is an Equal Opportunity/Affirmative Action employer, and thus applications from women and members of minority groups are strongly encouraged.
Assistant Director
for The Office of Cooperative Education,  
Division of Academic Planning and

FDU
Fairleigh Dickinson University
DEAN 
UNIVERSITY COLLEGE 
Teaneck, New Jersey

Fairleigh Dickinson University invites qualified 
applicants for the position of Dean of University 
College: Arts, Sciences and Professional Studies at 
the Teaneck-Hackensack campus, located on 100 
acres in a park-like setting along the Hackensack 
River, just 10 minutes from Manhattan.

University College, the largest of FDU colleges, 
consists of the Schools of Psychology; Natural 
Sciences; Communication Arts; History; Political 
& International Studies; Nursing; Computer 
Science and Information Systems; Engineering 
& Engineering Technology; Education; and 
the Programs in Sociology and Criminal Justice. 
The Teaneck-Hackensack Campus boars a culturally 
diverse student body including 600 international 
students from more than 60 countries. 
The College offers 2 doctorates and a variety of 
masters' and bachelors' degrees.

RESPONSIBILITIES

Reporting to the Provost, the primary 
responsibility of the Dean is Academic 
Leadership. The Dean has responsibility for 
collaborating in budget-building and 
insuring fiscal accountability; participating with other 
Deans and academic administrators in the 
formation of University-wide policies; working 
closely with school and program directors, other 
faculty committees, and with students; directing 
curriculum development toward encouraging 
global vision for students and faculty; 
covering pedagogical excellence; and 
enhancing the scholarship and professional 
activities of the faculty.

QUALIFICATIONS

Applicants must have an earned doctorate in one 
of the academic disciplines represented in the 
College, an outstanding teaching and 
administrative record with scholarly publications. 
The ability to relate effectively with multiple 
comstituencies is essential. Experience in global 
initiatives and design including the delivery of 
innovative programs is highly desirable.

SALARY

Competitive and commensurate with qualifications.

The anticipated appointment date is July 1, 2000. 
Minorities and women are encouraged to apply. 
A letter of application, full curriculum vitae and 
names, addresses, and phone numbers of three 
references should be sent to Prof. Anthony 
Adriguolo, Chair, Dean's Search and Screen 
Committee, 1000 River Road, Robinson Hall 
Room 35 - T120C, Teaneck, NJ 07666. 
Resumes will be accepted until the position is filled.

FDU is an Affirmative Action/Equal Opportunity 
Employer committed to a diverse workforce.

ITHACA
ROY H. PARK SCHOOL OF COMMUNICATION

The Television-Audio Department in the Roy H. 
School of Communications at Ithaca College has a 
recently recruited position in the fall of 2000 for an 
associate professor to teach scriptwriting, as well as 
a combination of courses in media production and/or 
theory/technology. 

Successful candidate will interface as coordinator 
of scriptwriting concentration, advise students and 
serve department, school and college committees. 
Maintaining an active scholarship and professional 
profile is also required.

Ph.D., M.F.A. or Master's degree in video/film 
related discipline and a strong record in the practice 
video/film writing required. Successful teaching 
expertise is required, and a commitment to a liberal 
education within a professional program is expec.

Applications must be submitted by January 15, 2000, 
including a curriculum vitae, statement of teaching and 
research interests, three letters of recommendation, 
and samples of work. 

Send application to: 
Professor William G. Good, Chair 
Department of Television-Audio 
36 S. Harrison Street, Suite 106 
Ithaca, NY 14850.
East Stroudsburg University of Pennsylvania

DEAN OF GRADUATE STUDIES AND RESEARCH

East Stroudsburg University of Pennsylvania (ESU) invites applications and nominations for the position of Dean of Graduate Studies and Research.

Founded in 1893, East Stroudsburg University, with an enrollment of 9,000 students, is one of 14 universities in Pennsylvania State System of Higher Education. Approximately 60 undergraduate degree programs and 20 graduate programs are offered in 20 areas of specialization. The University is located in the Pocono Mountain northeastern Pennsylvania, 75 miles west of New York City and 100 miles northeast of Philadelphia.

The Dean reports to the Provost and Vice President for Academic Affairs and is responsible for the administration, leadership, and advocacy of graduate education and grant activities across the University. RESPONSIBILITIES include collaboration with academic deans in new graduate programs; long-range planning; development and implementation of recruitment, admissions and retention strategies for graduate students; review and implementation of institutional polices for graduate education; grants administration; and development of external funding sources to support graduate education and graduate education awards.

Requirements:

- An earned doctorate from an accredited university
- Familiarity with scholarly and academic research
- Knowledge of trends and trends in graduate education, for example, collaborative inter-institutional program technological applications in graduate education
- Demonstrated ability to work collegially with faculty and administrators in a collective bargaining environment
- Experience with private and public fund-raising activities
- Demonstrated commitment to the principles of social equity and to quality education for a multicultural society
- Minimum of 3 years experience as a faculty member in higher education

Projected starting date for this position is July 1, 2000. Competitive salary plus excellent benefits. Initial review of applications begins June 1, 2000. E-mail or submit applications, three current professional letters of recommendation, current curriculum vitae, transcripts, and telephone numbers of three additional references to: Ms. Renee Biega, Office of Human Resources, Position #1A-99-3190, East Stroudsburg University, 200 Prospect Street, East Stroudsburg 18301. All materials must be received by February 4, 2000.

ESU is an equal Opportunity employer. Minorities and women are strongly encouraged to apply. Visit our homepage at www.esu.edu

Community College of Philadelphia

THE COLLEGE OF WEST VIRGINIA

ASSOCIATE/ASSISTANT VP PRESIDENT
OF ACADEMIC AFFAIRS

The College of West Virginia seeks applicants for the position of Associate/Assistant VP of Academic Affairs. CWV is located in the beautiful mountains of southern West Virginia and is the largest private college in the state, with graduate, baccalaureate and associate degree programs in a variety of fields. The Associate/Assistant VP heads the newly named Massey School of Business, exercises curricular leadership, develops and administers the budget, oversees and monitors faculty development, manages full-time and adjunct faculty recruitment and evaluation, and participates in overall academic planning. The Associate/Assistant VP will be responsible for the following academic areas: Accounting, Banking, Broadcasting Technology, Economics, Management, Marketing, Office Management, Secretarial Studies, Travel and Tourism, and Word Processing. The Associate/Assistant VP will report directly to the VP of Academic Affairs. CWV offers generous benefits and a competitive salary, which is based upon qualifications and experience.

Qualifications:

An earned doctorate in a discipline within the School of Business: a minimum of 3 years experience as an academic manager; excellent interpersonal skills; a strong commitment to excellence in teaching, research and creative activity; an ability to work with students, faculty, administration and the local and regional business community.

Send letter of application, current vita, and three letters of reference to: Roxanne L. Hudson, Personnel Coordinator, The College of West Virginia, P. O. Box AG, Beckley, WV 25802. FAX 304-253-0789, email roxanne@cww.edu.

DICKINSON COLLEGE

LUCE DISTINGUISHED VISITOR SCHOLAR
DIASPORA & COMMUNITY STUDIES

Dickinson College invites applications for appointment as Henry Luce Foundation Distinguished Visiting Scholar in Diaspora & Community Studies for the 2001-2002 academic year. The Visiting Scholar will play a central role in a college-wide initiative in "Crossing Borders" that aims to combine global education and study of U.S. diversity in innovative ways.

The Luce Visiting Scholar will be expected to teach one course in the field of Diaspora Studies each semester, lead a faculty seminar on Diaspora & Community Studies, share research prospectively with faculty and students through the college's Common Studies Center. The successful candidate will have research expertise in at least one Diaspora experience and demonstrated ability to lead students and faculty in comparative, interdisciplinary projects. Appointment will be at the level of Associate or Assistant Professor depending upon qualifications.

Dickinson is a top tier national liberal arts college of 2,000 students located in Carlisle, Pennsylvania. The college is particularly distinguished by its international education program (including ten centers abroad in Asia, Africa, Europe, and Latin America), interdisciplinary programs, and field work especially through its Community Studies Center. Dickinson is also the host site of "Frontiers: The Interdisciplinary Journal of Study Abroad" and of the national headquarters of the Oral History Association. Dickinson is a "Crossing Borders" initiative, supported by grants from the William and Flora Hewlett Foundation and the Henry Luce Foundation, includes the development of research seminars on unity and diversity, superior-level courses in cross-cultural study and student field work in communities locally and globally.

Candidates should submit a letter of application indicating the nature of their research and potential course offerings on Diaspora, a current vita, and three letters of reference to Neil Weisenstein, Dean of the College, Dickinson College, Carlisle, PA 17013. Applications will be accepted until January 20, 2000. Dickinson is an Affirmative Action/Equal Opportunity Employer. Women and minorities are encouraged to apply.
UNIVERSITY OF COLORADO AT BOULDER
SCHOOL OF EDUCATION
2000-2001 FACULTY POSITIONS

The School of Education at the University of Colorado at Boulder announces the following tenure track positions for the 2000-2001 academic year. The UCB School of Education is located at the major comprehensive research campus in Boulder. The School has 34 faculty members and offers initial teacher licensure/certification programs, and graduate degrees (M.A. & Ph.D.) in four degree areas - Social Multicultural Bilingual Foundations, Instruction and Curriculum, Educational Psychology, and Research and Evaluation Methodology. The primary goal of the School is to remain a distinguished educational research center, recognized for the quality and importance of the scholarly contributions made by its faculty and students, and to have exemplary, research-based teacher education programs that are an integral part of the life of the School and university.

Qualifications: Candidates for the positions must have an earned doctorate in the specialized area or the equivalent and either a record of research or potential for a career of research and scholarship. The School is seeking applicants at the Assistant and Associate Professor levels. Applications at all levels will also be considered from those who would strengthen the School's diversity.

Requirements: Candidates for the positions must be willing to contribute to teaching and program development in the teacher education and graduate programs, conduct research, publish in significant refereed journals and seek outside funding. Candidates must be committed to working with culturally and linguistically diverse populations.

Salary: Negotiable, commensurate with education and experience.

Literacy Education: Candidates for this position must have an earned doctorate in reading/reading with an emphasis on early reading. Candidates should have a strong background in the teaching and learning of beginning reading including phonemic and phonological awareness, as well as other decoding processes related to early reading acquisition. Candidates should also have either a record of research or potential for a career of research and scholarship in the area of early reading. Experience teaching at the elementary level with diverse populations, students who are learning English as a Second Language, and/or in urban settings is highly desirable. Equally desirable is experience in developing and implementing standards-based literacy programs and assessments.

Contact for Literacy Education:
Dr. Kathy Escamilla (303) 492-0147,
e-mail Kathy.Escamilla@colorado.EDU

Bilingual Special Education: Candidates for this position must have an earned doctorate in Education and must have strong preparation in Moderate Needs Special Education with training and experience in Bilingual and/or ESL Education. Candidates will also be expected to have an active research agenda or potential for a career of research and scholarship related to special education for diverse populations. Candidates for this position will be expected to teach courses in learning disabilities and bilingual assessment as well as special education classes for regular education teachers. Preference will be given to candidates with bilingual special education teaching experience in public school settings with diverse populations.

Contact for Bilingual Special Education:
Dr. Leonard Baca (303) 492-3353,
e-mail Leonard.Baca@Colorado.EDU

Application Materials: Completed applications must include a letter of application specifying the desired position, a curriculum vita, and three letters of recommendation. Applications should be sent to:

Dean William B. Stanley
School of Education
Campus Box 249
University of Colorado at Boulder
Boulder, CO 80309-0249
Fax: 303/492-7090

Closing Date: The review of applications will begin on December 1, 1999 and continue until the positions are filled.

The University of Colorado at Boulder is committed to diversity and equality in education and employment.

INFORMATICS FACULTY POSITIONS

THE UNIVERSITY OF TEXAS HEALTH SCIENCE CENTER
AT HOUSTON (IN THE TEXAS MEDICAL CENTER)

The University of Texas Health Science Center at Houston is seeking additional faculty members in the Department of Health Informatics. The Positions are at any level. The individuals should possess a doctoral degree in Health or Medical Informatics or a related cognate field, i.e., Nursing, Dentistry, Bioinformatics. Applicants with substantial expertise in the sub areas of bioinformatics, biomedical computing, neuroinformatics, educational uses of technology or cognitive sciences in biomedicine or healthcare are encouraged to apply. A record of external funding and evidence of graduate level teaching abilities are preferred for more junior positions and required for more senior ones. The faculty member will be expected to develop an active interdisciplinary investigative and teaching program in the sub area of expertise. The positions will remain open until filled. Applicants should send their curriculum vitae with the names of three references to:

Randolph H. Scott, Ph.D., M.B.A
Assistant Dean for Management
The University of Texas Health Science Center at Houston
7000 Fannin, Suite 600
Houston, Texas 77030
Fax: (713) 500-3907
Randolph.H.Scott@uth.tmc.edu

AA/EOE
Baldwin-Wallace College invites applications for the position of Vice President for Academic Affairs and Dean of the College. The new VPAA will serve as the institution’s chief academic officer, collaborating with the President and CO to set the intellectual tone and promote a vital educational climate.

B-W is a private educational institution offering liberal arts-based undergraduate and graduate study. Located near Cleveland, B-W is one of the first Ohio colleges established to admit students without regard to race or gender. That spirit has flourished while B-W has developed as a comprehensive college, combining strengths of its liberal arts heritage with opportunities for career preparation and pre-professional training. U.S. News & World Report lists B-W among the top colleges and universities in the Midwest, as well as one of the region’s college values. B-W highly values excellence in classroom teaching and supports innovative, award-winning programs.

B-W has a student body of 4,000 undergraduate and 600 graduate students from across the U.S. and around the world. The College is committed to the highest standards of student success. B-W is governed by a 45-member board of trustees and has a full faculty of 164, with a student-faculty ratio of 14:1. B-W’s faculty and staff support programs and systems that students at their present levels and encourage them to attain their highest possible intellectual and personal growth. The College has a record of operating within a balanced budget, and the recently completed Campaign for the 21st Century generated $55 Million, exceeding its goal by 25%.

B-W seeks a creative, visionary VPAA with a successful commitment to the intellectual and personal growth of students to the values of a rigorous liberal arts education. The successful candidate should possess an earned doctorate, preferably in an academic discipline, significant undergraduate teaching experience, excellent written and oral communication skills, and a record of solid institutional and strategic planning. The candidate should be a team player, committed to diversity, fairness, equal opportunity, and a history of proactive leadership on issues of race, ethnicity, gender, and sexual orientation.

Compensation will be highly competitive and commensurate with the successful candidate’s experience. Baldwin-Wallace College is an EOE/AA employer and actively seeks a diverse pool of candidates in this search.

The College expects to announce the selection of the new Academic Dean in the spring of 2004. For more information, please contact John Issacson, President, Nancy S. Issacson, Associate, Miller, 334 Boylston Street, Suite 500, Boston, Massachusetts 02116. Email: jisaacs@bw.edu; Telephone: (617) 262-6500. Fax: (617) 262-6501.

Additional information can be found on the Internet at http://www.baldwinwalex.edu and at www.specjobs.com/baldwin-walace-vice.html

SOUTHWEST TEXAS STATE UNIVERSITY

Southwest Texas State University invites applications for one tenure-track Assistant Professor position with expertise in one or more of the broadly construed areas of applied sociology: evaluation research, social impact assessment, and community research. Secondary specializations should include criminology, deviance, social control, juvenile delinquency, industrial, medical, or aging. The Ph.D. should be completed by September 1, 2000. Evidence of strong commitment to excellence in teaching is required. To apply, send a letter indicating the position for which application is being made and suitability for that position, as well as a curriculum vitae, a statement of teaching philosophy, and names of three references to Dr. Audra Anderson, Department of Sociology, SWT, San Marcos, TX 78666. Review of applications will begin March 1, 2000, and will continue until the position is filled. Southwest Texas State University is an Equal Opportunity/Affirmative Action employer.

AA/EO
President
Spokane Community College
Spokane, Washington

The Board of Trustees of Washington State Community College District 17 invites applications and nominations for the position of President of Spokane Community College (SCC), one of three publicly funded educational institutions comprising Community Colleges of Spokane. At SCC, the president is the chief executive and reports to the district chancellor/chief executive officer. The chancellor reports to a five-member board of trustees appointed by the governor for five-year terms.

The board, along with the chancellor and SCC administrators, faculty and staff, seeks an individual who possesses exceptional personal and leadership qualities, a reputation for innovation and effectiveness in academic, student services, and business operations. The candidate must possess a strong commitment to the mission and goals of SCC and be experienced in leading an institution in the competitive marketplace.

Application Information: Applicants must request a presidential search brochure, which includes details about Spokane Community College, challenges at the college, a presidential profile, and application instructions, by contacting the search committee. Application materials must be submitted by the deadline.

The Internet address for Spokane Community College is: www.scc.spokane.cc.wa.us

Nominations and applications will be accepted until the position is filled. However, the SCC Presidential Search Committee will begin reviewing applications on February 1, 2020. The SCC president will be appointed by the chancellor/CEO in consultation with the CCS Board of Trustees.

For additional information, contact: Del M. Anderson, Search Consultant, Association of Community College Trustees (ACCT), 4100-10 Redwood Road, #251, Oakland, CA 94619; Telephone: 510-638-5288; Fax: 510-382-9637; e-mail: delimiter@webtv.net.

All inquiries, nominations, and applications will be held in strictest confidence.

Community Colleges of Spokane provides equal opportunity in education and employment. Applications and nominations of individuals who would increase the richness of the district's diversity are welcome.

Vice President for Academic Affairs and Provost

Wesleyan University seeks nominations and expressions of interest for the position of Vice President for Academic Affairs and Provost (VPAA). Wesleyan University is a highly selective liberal arts institution located in Middletown, Connecticut. It has 2,700 undergraduate students, 150 graduate students, and 270 faculty.

Applicants must be distinguished scholars, qualified for tenure at Wesleyan. The ideal candidate will have outstanding leadership and communication skills, as well as relevant experience in a highly selective liberal arts institution. Commitment to diversity and liberal learning and a thorough understanding of the goals of Wesleyan's liberal arts education are required.

The VPAA will provide intellectual leadership for implementing the recently completed Strategy for Wesleyan. Candidates are encouraged to read more about Wesleyan's strategic planning by visiting the university's website at http://www.wesleyan.edu and clicking on the "Strategy" button. In addition to the Strategy for Wesleyan, candidates will be interested in the Wesleyan Education for the 21st Century, which can be found on the same website.

The VPAA oversees policy, budget, and personnel matters within Academic Affairs. Academic departments and units are formed into three divisions, each with a dean. Academic Affairs also oversees major university departments such as the Center for the Arts, the Graduate Liberal Studies Program, the School of Architecture, and the School of Education. As an officer of the university, the vice president will report to the president and serve as a member of the senior staff.

The search committee will begin the screening process in January and continue until the position is filled. Please forward nominations, inquiries, and expressions of interest, in confidence, to:

Vice President for Academic Affairs and Provost
Wesleyan University

E-mail: s.storbeck@atkearney.com

Wesleyan University is proud of its commitment to diversity and especially seeks nominations and applications from women and persons of color.
Washington State University

2000 Summer Doctoral Fellows Program

Washington State University invites applications and nominations from doctoral candidates who have completed all requirements for the degree other than the dissertation. Summer fellowships are available in Education, Business and Economics, Agriculture and Home Economics, Engineering and Architecture, Liberal Arts, Nursing, Pharmacy, Sciences, or Veterinary Medicine. Selected doctoral candidates will have an opportunity to work closely with faculty mentors at Washington State University in preparing for academic careers as future faculty members. Fellows will be actively engaged in seminars on the changing roles and expectations of faculty, the future of the profession, the changing nature of higher education, and issues facing faculty of color and women in higher education. Fellows will be expected to design individualized programs for enhancing their ability in teaching, research, and scholarship during the six-week summer term. June 18-July 22, 2000.

Eligibility:

All requirements other than the dissertation should be completed by June 1, 2000.

Terms:

$3,000 stipend plus University housing provided.

Application:

Candidates should submit a curriculum vita, graduate school transcript, three letters of recommendation, and a 1-3 page career goals and research interest statement to the following:

Dr. Karen E. DePaauw, Dean
v/c Lynda Curry
PO Box 641050
Washington State University
Graduate School
Pullman, WA 99164-1030

The program is designed primarily for U.S. citizens from diverse backgrounds.

Notification:

Candidates will be notified in April 2000.

Application Deadline:

March 15, 2000

Dean-Graduate Studies

The Dean is the chief executive and academic officer for Graduate Studies reporting to the Vice President for Academic Affairs. The Dean provides academic leadership for Graduate Studies, supervises its personnel, and administers graduate programs and graduate student services. The Dean has responsibility for academic program quality, enrollment management, program planning, budget, faculty and staff assignment and evaluation, and determining equipment and facility needs.

Empire State College is a national leader in non-traditional higher education. Graduate Studies offers five master’s degree programs delivered in a combination of weekend residencies and distance learning: master’s arts in social policy, business and policy studies, labor and policy studies, liberal studies, and a master of business administration. Graduate Studies serves 300 students, has five full-time faculty and three professional staff and draws on faculty throughout the College for teaching services.

Earned doctorate in subject related to the graduate program fields: substantial college-level administrative and teaching experience, experience in program development, demonstrated interest in education of adult students and interdisciplinary programs, familiarity with learning technologies, distance education and innovative program delivery, capacity to work collaboratively. Anticipated start date: June 1, 2000, 6-18.

Competitive salary and benefits. Apply by submitting letter of application and resume to: Dr. Marjorie W. Lavin, Vice President for Academic Affairs, SUNY Empire State College, One Union Avenue, Saratoga Springs, New York 12866. Review of applications will begin January 28, 2000, and continue until the position is filled. For more information, see College’s web site at www.escc.edu. AA/EOE

Empire State College

State University of New York

THE LOS ANGELES COMMUNITY COLLEGE DISTRICT

invites applications and nominations for the following positions:

- PRESIDENT, LOS ANGELES MISSION COLLEGE

FILING DEADLINE: MARCH 1, 2000.

The Los Angeles Community College District is seeking a President to serve at Los Angeles Mission College. Interested individuals who possess the required training and experience are invited to submit applications.

REQUIREMENTS: Applicants must have an earned doctorate from an accredited college or university or a master’s degree combined with exemplary professional experience. Also required are three years of full-time experience in higher education in administrative positions as Dean or above, and two years of full-time faculty experience with some classroom experience.

SALARY: A revision of salary and benefits for President that is now underway will make the compensation package highly competitive.

FILING AN APPLICATION: A detailed brochure is available. To apply, send (1) a letter of application, preferably five pages or less, which includes a statement of background and experience that demonstrates how your knowledge and expertise apply to this position, (2) a current resume of professional experience, educational background and other pertinent information, (3) a list of eight references with business and home telephone numbers, including two supervisors, two subordinates (including one support staff member), two faculty and two community members. All materials should be received no later than 4 p.m. on Wednesday, March 1, 2000, but applications will continue to be accepted consistent with the process until the position is filled. Completed applications will be sent to additional application materials. If selected, additional documentation, such as original transcripts will be required. Send to: Human Resources Division, Los Angeles Community College District, 7700 E. Imperial Highway, Los Angeles, CA 90017. Letters of nomination may be sent to the same address. For additional information, contact Human Resources at (310) 917-2533. FAX (310) 981-8411. Our website is www.laccd.org on Internet.

For confidential inquiries, contact Dr. Al Fernandez of Community College Search Services at (805) 650-5546; fax (805) 650-8469; email: atdnche@msn.com

THE LACCD IS AN EQUAL OPPORTUNITY EMPLOYER. WOMEN, MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY.

Western Michigan University

DEPARTMENT OF COMMUNICATING ARTS

The University of Wisconsin-Superior is the northernmost campus of the University of Wisconsin System and is nestled on the scenic shore of Lake Superior. As Wisconsin's public liberal arts college, we require a strong liberal arts core curriculum for all undergraduates. Communication is a key asset at UW-Superior, and we strive to offer quality programs in an environment of trust and cooperation that centers on the worth of all individuals. We are seeking candidates who will contribute to the achievement of this goal.

Tenure track position, academic year, teach courses in Mass Communication, Television, Film and Appreciation and the Department's Introduction to Speech Communication course. Responsibilities include advising students, supervising cocurricular video productions, assisting students directed video productions for course assignments, and other university faculty responsibilities in governance and service. Candidate's ability to work in additional Communicating Arts disciplines is preferred. The Department of Communicating Arts encourages a multidisciplinary approach in education for its students and an expectation that its faculty will provide the broad perspective necessary to assist that process. Women and minorities are encouraged to apply.

Doctorate or MFA required. Evidence of excellence in teaching and appropriate scholarly activity. Professional and/or academic video experience and supervision of video projects required. Rank and salary are dependent upon qualifications and experience.

Send a letter of application, including a statement of qualifications, resume, transcripts, and an example of your video work. Have three letters of reference sent. We may also contact others for additional information. We request examples of student work under your supervision. Send materials to Stewart Plattner, Chair, Search Committee, PO Box 2000, University of Wisconsin-Superior, Superior WI, 54880-4500. Incomplete applications cannot be considered. Application deadline is February 15, 2000. We are required to provide a list of nominees and applicants if requested. A written request can exclude one from this list. Names of all finalists must be disclosed if requested. AA/EOE.

Writing

PENDING APPROVAL AND FUNDING, the Department of English at the University of San Francisco invites applications for a full-time tenure track position in Writing at the Assistant Professor level, anticipated to begin in the Fall 2000.

The Writing Emphasis, a track in the English major, is distinct from Expository Writing and prepares students for fields in law, publishing, and other careers in writing. It consists of required courses in theories of writing and language as well as elective courses in creative writing.

Responsibilities include coordinating and teaching in the Writing Emphasis for English majors. Primary teaching may include intermediate composition courses in three areas: textual analysis and rhetoric; theoretical issues in writing; and creative writing workshops and advanced composition. Since this program may be redesigned in the near future, the department is particularly interested in applicants with innovative ideas for structuring a writing curriculum.

Qualifications: University teaching experience, an earned doctorate or MFA by Fall 2000 with a specialization in writing and theories of writing; evidence of a strong commitment to teaching; publications, experience and willingness to work in a culturally diverse environment; and an understanding of and commitment to support the mission of the University are required.

We particularly encourage minority and women applicants for all positions. The University of San Francisco is an Equal Opportunity/Affirmative Action Employer, and will provide reasonable accommodations to individuals with disabilities upon request.

Applicants should submit a letter of application, curriculum vitae, graduate transcripts, brief description of research plans, copies of recent publications, statement of teaching philosophy, evidence of teaching ability, including copies of teaching evaluations, and three letters of recommendation to:

Writing Search Committee
O/C Carolyn Brown
Department of English
University of San Francisco
2130 Fulton Street
San Francisco, CA 94117-1089.

Applications must be received by February 15, 2000, in order to ensure full consideration.

Established as San Francisco's first institution of higher learning in 1855, the University of San Francisco presently serves 8000 students in the arts and sciences, business, education, nursing, law, and professional studies. The University is a private, Catholic and Jesuit Institution and particularly welcomes candidates who will positively contribute to such an environment.

SCC

SEMINOLE COMMUNITY COLLEGE

VICE PRESIDENT, EDUCATIONAL PROGRAMS

DEAN OF ARTS AND SCIENCES

DEAN OF BUSINESS, INFORMATION TECHNOLOGY, AND CORPORATE SERVICES

Due to expansion and growth, Seminole Community College has openings for three top-level positions. SCC is a comprehensive, learning-centered institution located just north of Orlando, Florida. With a commitment to supporting Seminole County's workforce development, the college serves nearly 30,000 students annually with a wide range of college credit, career, continuing education, vocational training, and adult education programs.

The Vice President of Educational Programs is the chief executive officer, promoting academic excellence and providing leadership college-wide.

The Dean of Arts and Sciences provides overall leadership and direction for curriculum and programs within the Arts and Sciences division and the Associate of Arts Degree.

The Dean of Business, Information Technology, and Corporate Services supports industry workforce development through college credit, noncredit, and continuing education programs.

To request a job announcement and application materials, please send your email to www.seminole.edu (note: jumps to Employment Opportunities) or contact Human Resources at e-mail hr@seminole.edu or call 407-396-2101.

Application screening will begin January 28, 2000. Applications received after that date may not be eligible for consideration. EEO/AA.
BROWARD COMMUNITY COLLEGE

Broward Community College is a large, multi-campus urban institution in Broward County located in Southeast Florida. Founded in 1964 as the first public higher education institution in the county, Broward Community College functions as the principal provider of undergraduate higher education for the residents of Broward County. Through a wide variety of degree and certificate programs and continuing education courses, the college attracts a great diversity of students, including individual planning to complete a bachelor's degree program, people seeking to acquire job-entry skills, employees desiring to upgrade skills for promotion or career changes, and individuals seeking education for their personal enrichment. In addition, the college is also a source of cultural enrichment, a resource for community development, business, and industry, and an avenue for continued skill upgrading and enhancement and retaining. As a public comprehensive community college, the college serves well its role as a significant segment of Broward higher education effort.

</table>
As we finish the millennium, the world’s population continues to increase, and our industrial activities perceptively change our surroundings near and far. There is heated discussion on possible effects on “global climate.” Other, more tangible effects—such as increased air pollution, diminishing fisheries, deforestation, and problems with water resources—are being felt in many places. How do we deal with these effects? The first thing we need to do is develop a deeper understanding of connections between physical, chemical, biological, and geological processes that make our world work.

This is the work of science. Indeed, scientists play a unique role in society because they are responsible for figuring out how things work. The principles discovered through basic science are the foundation for new technologies that progressively improve the quality of our life on this planet.

Opportunities abound for scientists to do socially relevant work—to develop new concepts and new technologies and to participate in great scientific adventures. For example, NASA is about to launch its most significant tool to help manage Earth’s resources (the Terra and Aqua satellites). Simultaneously, geologists are digging in the deeper parts of the ocean for oil and gas resources, physicists are uncovering secrets of weather and ocean motions, and chemists are making great strides in the development of new chemicals and methods for detecting the most minute concentration of various key substances. These observations and models need to be guided by very sound scientific questions.

So, where has the Hispanic scientist gone? Is he or she taking part in the new opportunities for science adventure?

Even though in the U.S. there has been a steady increase in the number of doctoral science and engineering degrees awarded to minorities (American Indians, Blacks, Hispanics, and Asians), Hispanics remain severely underrepresented. In the natural sciences alone, of about 14,500 doctorates awarded in 1996 to U.S. citizens and U.S. residents with permanent visas, only 1,261 were earned by Hispanics. Blacks, Hispanics, and American Indians are disproportionately likely to earn degrees in the social sciences (defined by the National Science Foundation as degrees in science and engineering) and to be employed in social services occupations (e.g., social worker, clinical psychologist) that are defined by the NSF as non-science/engineering occupations. A problem is that the social sciences are less likely to offer employment in business or industry. In academic settings, Hispanics represented only about 2% percent of full-time, ranked, doctoral science and engineering faculty in 1995.
ANTICIPATED OPENINGS FOR FALL 2000

ASSISTANT PROFESSOR, ART HISTORY
Develop and teach courses in Contemporary Art and New Media, Introduction to Fine Arts and other specialized Art History areas. Contractual skills for active art exhibition series preferred. Ph.D. required. The successful candidate will be expected to maintain an active program of scholarly work and must have excellent teaching skills.
CODE: ARTHIS

ASSISTANT PROFESSOR, BIOLOGY - CELL PHYSIOLOGY
Develop and teach on updated general and comparative physiology taught in anatomy, physiology, and related courses. Ph.D. required. Contractual experience preferred.
CODE: BIOPHYS

ASSISTANT PROFESSOR, BIOLOGY - MOLECULAR CELL IMMUNOLOGY
Develop and teach new molecular biology lecture/ laboratory. Biotechnology experience required. Students have the opportunity to participate in the development of a new Master’s degree program in Biotechnology. The successful candidate will have a commitment to undergraduate and graduate teaching and research, and to provide extra-curricular funding for students.”
CODE: BIOMIM

ASSISTANT PROFESSOR, BUSINESS
Assist in curriculum development and teach courses in business and computer applications. Teaching/scholarship may vary depending upon programmatic needs. Ph.D. or JD required. Emphasis expected in International Business preferred. The successful candidate will have a strong knowledge of computer and business applications.
CODE: BUSINESS

ASSISTANT PROFESSOR, CHEMISTRY
Teach instrumental analysis or organic chemistry, advanced electives, be able to maintain an active research program supported by external funding. Ph.D. required. Post-doctoral research experience preferred.
CODE: CHEM

ASSISTANT PROFESSOR, ECONOMICS - HEALTH MANAGEMENT
Teach courses in health economics, health management, and related courses. Knowledge of basic economics theory is essential.
CODE: ECONOM

ASSISTANT PROFESSOR, ENGLISH/WRITING
Teach courses in composition and advanced writing, including Business Writing, and carry out related activities as appropriate to rank. An appropriate doctorate is required.
CODE: ENGLISH

ASSISTANT PROFESSOR, ENVIRONMENTAL HEALTH SCIENCE
Teach undergraduate courses in environmental health science, environmental management, environmental health science. Ph.D. required. The successful candidate is expected to maintain an active program of research and to contribute to the development of a new Environmental Health Science program. The successful candidate will also be expected to contribute to the development of a new interdisciplinary graduate program in Environmental Health Science.
CODE: ENVHE

INSTRUCTOR OR ASSISTANT PROFESSOR, HEALTH EDUCATION
Teach courses in Health Education major, including Health Behavior, Health Counseling, Drug Use, and Abuse, Stress and Health, and Program Planning and Evaluation. For appointment to Instructor: Master’s degree is required. For appointment to Assistant Professor: A Doctorate in health education is required.
CODE: HEH

ASSISTANT PROFESSOR, HEALTH EDUCATION K-12
Play a leadership role as the development and program of teachers of health education (K-12) and in the professional development of faculty in schools. Lead a team of faculty in schools and develop courses in health education. Ph.D. preferred. The successful candidate will have a strong commitment to the development of a new interdisciplinary graduate program in Health Education. The successful candidate will also be expected to contribute to the development of a new interdisciplinary graduate program in Health Education.
CODE: HEK

ASSISTANT PROFESSOR, MEDICAL COMPUTER STUDIES
Teach computer science courses, conduct research, participate in department and college committees and activities. Ph.D. preferred. An appropriate doctorate is required.
CODE: MCS

ASSISTANT PROFESSOR, MEDICAL TECHNOLOGY
Teach courses in clinical pathology, clinical immunology, parasitology, clinical chemistry and microbiology, research/scholarship, advise students, assist with research and grant writing, Ph.D. or M.S. with ACP certification or equivalent required. The successful candidate will have experience in clinical teaching and in a medical technology setting.
CODE: MCT

ASSISTANT PROFESSOR, NURSING
Teach undergraduate courses in Medical-Surgical/Adult Health Nursing and other related courses in the baccalaureate program for RN’s. Conduct research and clinical instruction. In addition to teaching and research/scholarship, the successful candidate will also be expected to contribute to the development of a new interdisciplinary graduate program in Adult Health. Ph.D. preferred. An appropriate master’s degree, licensure as a registered nurse, and appropriate clinical experience required. The successful candidate will be expected to maintain an active program of research and teaching and to contribute to the development of a new interdisciplinary graduate program in Adult Health.
CODE: NURSING

ASSISTANT OR ASSOCIATE PROFESSOR, COORDINATOR OF OCCUPATIONAL THERAPY PROGRAM
Exceptional administrative and leadership abilities with excellent teaching skills. Responsibilities include planning, developing, directing, and coordinating activities of the Occupational Therapy Program. The successful candidate will have a commitment to research/scholarship and teaching and to the development of a new interdisciplinary graduate program in Occupational Therapy.
CODE: OCOT

ASSISTANT PROFESSOR, OCCUPATIONAL THERAPEUTIC PHYSICAL DISABILITIES (K-12)
Teach undergraduate courses in physical disabilities occupational therapy and related courses. Ph.D. or clinical experience required. The successful candidate will have a strong commitment to the development of a new interdisciplinary graduate program in Occupational Therapy. Ph.D. preferred. An appropriate master’s degree in Occupational Therapy, and appropriate clinical experience required. The successful candidate will have a commitment to research/scholarship and teaching and to the development of a new interdisciplinary graduate program in Occupational Therapy.
CODE: O17

ASSISTANT PROFESSOR, PHYSICAL EDUCATION AND DIRECTOR OF ATHLETICS
Teaching responsibilities include but are not limited to: teaching physical education, coaching, and administrative duties. The successful candidate will have a commitment to research/scholarship and teaching and an appropriate master’s degree in physical education. The successful candidate will have a strong commitment to the development of a new interdisciplinary graduate program in Physical Education and related courses. Ph.D. preferred. An appropriate doctorate is required.
CODE: P

ASSISTANT PROFESSOR, PSYCHOLOGY - CLINICAL/COUNSELING
Teach courses in Clinical/Counseling Psychology (Human Development, Personality, Group Dynamics, Assessment, Test Development, and other related courses). Ph.D. preferred. The successful candidate will have a strong commitment to the development of a new interdisciplinary graduate program in Clinical/Counseling Psychology.
CODE: PSY

ASSISTANT PROFESSOR, THEATRE - THEATRE DESIGN
Teach courses in Theatre Production, Theatre Design and Technical Theatre. Ph.D. preferred. An appropriate master’s degree is required. The successful candidate will have a strong commitment to the development of a new interdisciplinary graduate program in Theatre Design.
CODE: DTH

SALARY RANGE:
Instructor: $29,997 - $48,204
Assistant Professor: $32,703 - $57,049
Associate Professor: $42,616 - $68,174

FEATURES

Gates Give $1 Billion for Minority Scholars Program
This largest-ever such fund will support many minority college students.

Uncle Sam Wants Usted!
The Army co-sponsored a Ricky Martin concert as one way to recruit more Hispanics. Another way is to get the word out about college benefits.

COSTEP Student Loans Invaluable for Hispanics
Three of four borrowers in the South Texas program are Hispanic.

New Era for Hispanic Scholarship Fund
$30 Million from Lilly and 20-Year Plan from Gates

Government Wired For Students
Offers one-stop online gateway for government services for lifelong learning.

Wilson’s Economist at University of Oregon
New career in academia for Philip Romero, who welcomes the heightened competition among business schools.

Excellence Through Passion and High Standards
SUNY Binghamton professor puts student brains to work.

Expanding the Pie
New minority alliance formed to present a united front and work for the common good.

Estrada: Ethical, Energetic Entrepreneur
Poor children, farmers, U.S. national parks, and Hispanics at Georgia Tech benefit from his generosity.

Hispanics, Financial Aid, and Higher Education

by Gustavo A. Mellander

We all know the importance of education. It is and has always been the "open sesame" to a better life. As we swim full speed ahead into a technologically-driven age, education is all the more crucial for those who want to control their destiny.

And education never ends. It is a lifelong adventure. We really must inculcate that mind-set, that belief, not only among the young but in all of us.

Centuries Past

Education has long been a valued and a valuable asset. But for many, it was very hard to come by. Abraham Lincoln attended school for less than a full year.

At the beginning of this century, only 15 percent of our population completed high school. Boys and girls, yet unformed, were pushed into the workplace. It was pretty tough. Not only were they denied an opportunity to study while they were young, but since so few continuing education opportunities existed, they were in effect doomed. Doomed never to reach their highest potential.

What about the lucky ones?

What of those privileged ones who were able to finish high school? Well, even among those lucky ones, only one in ten high school graduates went to college. One reason was that no government financial aid existed.

No wonder power and influence remained within a small sliver of the population. The ruling elite—mostly Anglo-Saxons—were firmly in control of the levers of power and influence well into this century. Their children attended America's elite universities. Their financial aid came from their families.

The Beginnings

Only in the Midwest and West did we see the influence of the Morrill Act, passed during Lincoln's presidency, which established land grant colleges. Low tuition, non-class-related institutions began to open doors for America's rural population. That is, if you were White, the doors opened. Hispanic farm and migrant workers most assuredly did not go to college until well after the 1950s.

Harry S Truman, a man who never went to college, wanted to open higher education to the masses. One of his initiatives led to the establishment of community colleges. Between that and the salubrious effect of the G.I. Bill of Rights, millions of Americans went to college. The dreams of their grandparents and their parents came to fruition. Somebody from the family finally went to college.

Sputnik

The U.S. government, aside from the Morrill Act and the G.I. Bill of Rights, had not been very successful in providing financial aid to college-bound students. Further, the constitution's failure to grant the national government a role in education, the clear separation of church and state, and other time-honored guidelines kept Congress from aiding the nation's youngest who wanted to go to college.

That would all change in 1957. In that year, the Soviet Union surprised the world and scared America by launching Sputnik. The cold war was propelled into a different arena, and America felt it was lagging behind. Something had to be done to energize and focus higher education on science. Congress passed a series of wide-ranging defense spending bills. More money for armaments but funds to train college students to enter fields that would assist the U.S. in the Cold War.

It was that marriage of defense and education that opened the floodgates of financial assistance to college students and to their institutions. It would change financial aid and colleges forever.

Assistance was now widely available to those who wanted to go to college. New generations would benefit from federal assistance.

The First Steps

The success rate of these programs was phenomenal. Ambitions that had been pent up for generations blossomed. Many economists trace the prosperity that the United States has enjoyed for the past 50 years to the intellectual ferment and focused achievement that was forged in the 1950s and '60s. It would never have been possible on such a massive scale without the creation of federal financial assistance.

That was also the era when Hispanics, mostly World War II veterans at the beginning, were able to appear on campuses nationwide in large numbers. In some states, such as Texas, the universities and colleges were in the Anglo parts of the state. Although a deterrent, that did not keep thousands of Chicano and Chicana from seeking the American dream. Their success rate was comparable to that of the rest of the population.

The '90s

By the 1990s, although they had not yet seen the much-vaulted "decade of the Hispanics," the doors had opened wide for Hispanics nationwide. In parts of Florida, New Jersey, New York, and Illinois, there were colleges that had become predominantly Hispanic.

In the Southwest and the West, Chicano and Chicana students were widely represented in all sectors of higher education. Much of this was possible because of financial aid.

Financial aid for students at institutions is very much part of the fabric of higher education in this country. It is also an unheralded success story.

Dr. Mellander is a professor at George Mason University.
Gates Gives $1 Billion for Minority Scholars Program

By Amalia Duarte

When you are the richest man in the world, you can make a decision and change the lives of thousands of people.

In September, the world’s wealthiest man, Microsoft Chair and CEO Bill Gates, made just such an historic move. He pledged $1 billion to create the Gates Millennium Scholars Program. Aided at African American, Hispanic, and Native American students, the landmark program is the largest such fund ever established for higher education. It will provide financial assistance to 1,000 new students each year over a 20-year period. At any one time, there will be 4,000 Millennium Scholars receiving aid.

In making the announcement, Gates cited the dearth of minorities in his own high-tech industry as one impetus for creating the Millennium Scholars Program. “It is critical to America’s future that we draw from the full range of talent and ability to develop the next generation of leaders,” said Gates. “The Millennium Scholars Program is intended to ensure that we build a stronger America through improved educational opportunities.”

While Gates has been criticized for not giving away more money earlier in his life, his timing for this effort couldn’t have been better. With attacks on affirmative action from Texas to California reducing scholarship opportunities for many minority students, the program seems especially important. Indeed, the affirmative action debate has played out right in Gates’ own backyard. In Washington state, where Microsoft is based and Gates makes his home with wife Melinda, voters in the fall of 1998 passed Initiative 200, which banned the consideration of race, gender, or ethnicity in admissions at the state’s public universities.

But Jack Faris, director of community strategies for the Bill and Melinda Gates Foundation, which established the Millennium Scholars, said the program’s origins go back a number of years and predate Initiative 200. “The announcement was not meant as a statement about affirmative action,” said Faris. “I would say it was meant as a statement about how important it is that our nation’s leadership in the future is reflective of our country and the full range of our nation’s potential.”

Such far-reaching goals are the mainstay of the Bill and Melinda Gates Foundation, which places a major focus on helping to improve people’s lives through education and health. In 1994, Gates started the William H. Gates Foundation, named for his father and led by the elder Gates. The Foundation supports causes on a global and local scale. Significant Foundation projects include a $750 million vaccination program for children in developing countries; a $50 million commitment to prevent pregnancy-related deaths of women in developing countries; and the Gates Library Initiative, a major effort to bring the Internet to poor communities in Canada and the United States. More than 700 underserved libraries have been supported through this endeavor.

Now Gates makes a similar big move into higher education. The Foundation wants to close the gap for the thousands of minority students who are not attending college annually because of financial limitations. The Millennium Scholars Program will be operated by three organizations, each with a successful track record of raising money and awarding financial aid to minorities.

The United Negro College Fund was chosen as the lead organization and will administer the scholarships. A consortium of 39 private, accredited historically Black colleges and universities, it is the nation’s oldest and most successful African American higher education assistance organization. At the time of the announcement, an excited William Gray, president and CEO of the United Negro College Fund, called the Millennium Scholars Program “earth-shattering.” He said, “This is a historic effort to improve the diversity of higher education. All of society benefits when the doors of education are opened to a group of kids who wouldn’t otherwise get the chance.”

Chosen to play a supporting and partnership role were the Hispanic Scholarship Fund (HSF) and the American Indian College Fund. HSF was
founded in 1975 and has awarded more than 34,000 scholarships totaling almost $35 million. The Denver-based American Indian College Fund was created to raise desperately needed scholarship, endowment, and operating funds for 30 tribal colleges across the country.

These groups are charged with promoting the program and recruiting candidates from within their respective communities. In addition, a six-member advisory board was chosen to develop policy, make fiscal funding decisions, and administer the final application review. The board’s members are: Santa Monica College President Piedad F. Robertson; Ruth Simmons, Smith College president; African American scientist Walter Massey; Gilberto Cardenas, director and Julian Samora chair of Latino Studies at Notre Dame; James Larimore, dean at Dartmouth; David Chang, Polytechnic University president; and Patty Stonesifer, co-chair of the Bill and Melinda Gates Foundation.

For Sara Martinez Tucker, CEO and president of HSF, it has been like an early Christmas. The Gates announcement came on the heels of another windfall for HSF in the form of a $50 million grant unveiled this summer from the Lilly Endowment, Inc., the largest single donation to promote Hispanic higher education, and the largest amount given to a Hispanic organization. In addition, it was the single biggest gift to a non-Indian entity in the Endowment’s history. Martinez is ecstatic about both donations, but she said Gates has effectively changed the landscape for Hispanic students. “What Gates has allowed us to do is tell a college student, ‘We will support you throughout your college experience.’ Latinos are the best at working and the worst at taking out student loans,” said Martinez Tucker. “This program really frees them up from those financial obligations. They can spend more time studying and participating in activities on campus.”

A Web site, toll-free number, posters, targeted letters to Hispanic organizations, speaking engagements, and lots of media interviews are just some of the ways HSF plans to get the word out among the Hispanic community about this new program. HSF’s stated goal is to double the rate of Hispanic college graduates from where it stood in 1996, at nine percent, to 18 percent in 2006, and Martinez Tucker is hopeful these mega donations will not only fund programs but also encourage others to give. “With only nine percent of Latinos holding a college degree, we need this infusion of cash and credibility for our cause,” said Martinez Tucker.

In its first year, the Millennium Scholars Program hits the ground running. This coming fall, scholars will be chosen from among current sophomores, juniors, and seniors. After that, scholars will be picked from the year’s crop of high school seniors. For undergraduates, the fields of study are open. Grad students are also eligible but must be in math, the sciences, engineering, library science, or education. Support is for up to four years and can include doctoral degree work.

Gates’ goal is to foster a generation of leaders that represents the full talents of society. As a result, the scholarships are not being awarded just on the basis of outstanding academic achievement or because of severe financial hardship. The scholars must be well-rounded young people with financial needs who also possess uncommon ability both inside and outside the classroom. Students must maintain a minimum grade point average of 3.3 and must be applying to an accredited college or university. Candidates must demonstrate significant financial need and must be nominated by a teacher or principal. A 500-word essay outlining their career goals, a major life event, and stipulating their commitment to community service, among other things, must be submitted. Additionally, students need to demonstrate leadership skills through participation in community service, extracurricular activities, or activities that reflect leadership abilities.

Initially, community college students were not clearly eligible for the program. Because many Native American and Hispanic students enrol in two-year schools, however, the program has been modified to allow their participation. Students attending community college must be on an academic track to qualify.

Advisory board member Piedad F. Robertson emphasized that the college panel is only representative of a community college, and applauded the charity “Community college students are the same, and usually taking care of families, and they succeed, it’s despite the odds,” she said.

But for all minority students, Robertson said this is not a case of affirmative action but an “act of excellence policy.” Gates is saying, “If you have the brains, I will open the financial doors.”

Andy Ferrer grew up with a distinct impression of the armed forces. There were the scenes of combat, the soldiers on the front-line protecting the nation's interests. The portrait wasn't always pretty, but it was an honorable endeavor.

"I've wanted to go into the military since I was a little kid," admits Ferrer, on the day he is sitting in an upstairs Army recruitment office in the borough of the Bronx in New York City. "My father had me growing up watching Army movies. That's why I decided to go. I wanted to do what they did."

So on this day—only a few after many of his fellow 20-year-olds across the nation stepped into college classrooms for the new semester—Ferrer enlisted in the Army. He arrived with his family's blessing, seven years' experience with the New York City Cadet Corps, and with an open wallet ready to receive better benefits than he originally could have imagined.

"My friends in the military say it's like a regular job. You do your job, and when you finish, you can do whatever you want," says the soft-spoken Ferrer. The experience, he hopes, will hone skills so that he can eventually seek a career in law enforcement, and possibly become a New York City police officer.

It's a transition that many young Latinos, primarily men, are now making: joining the armed forces in much greater numbers. Nationally, the number who enlist in the Army, Air Force, Marines, and Navy has plummeted dramatically over the last decade. But as the nation's Latino population has grown, the percentage of Latinos who have enlisted has similarly made an upswing.

"There is no doubt that the Latino community is growing faster within the service," says First Sgt. Miguel Ramos of the Army. "They've shown a higher propensity for staying on active duty for their second and third terms, and enlistments are increasing with the Latino community."

Still, that news is overshadowed by a more disturbing trend: a dire shortage of military recruits. In late September, Pentagon officials revealed that the Army's recruitment efforts had fallen for the second year in a row. While Ramos estimated that the number could be around 80,000, it apparently was 5,500 shorter.

Last fall, government reports exposed a similar wane in recruits in the Navy and Air Force, although Marine recruits remained steady. The shift left military officials worried about the future of the armed forces, and looking for methods to reverse the downward spiral.

Experts reasoned that the drop was precipitated by a shrinking pool of the youngest available enlistees, men and women between the ages of 18 and 22. Those numbers fell by five million over the last two decades. Couple this with a booming economy, one that has shrunk the unemployment rate dramatically, and it seems apparent why fewer have been showing up at recruitment stations across the nation.

The news did not surprise the military, which had observed the decline and begun to devise instruments to attract new recruits. At the same time, studies indicated a need to consider who is filling its ranks, because Latinos remained a highly underrepresented presence.

A recent report by the National Council of La Raza pointed out that Hispanics continue to be underrepresented in the Department of Defense workforce and in most of the active and reserve components, and that despite a distinct desire in the Latino community to serve, Hispanics were but a small percentage of the Army's officer corps.

"Thirty years ago, we had the same underrepresentation of African Americans: officers in the Army, but since we established a relationship with the Historically Black Colleges and Universities, we're at the point where African Americans are well represented," says the report's author, Colonel Hector Topete.

He says that the picture has been improving. "The glass is really half full. We're doing well, but we have to keep the momentum going."

Topete, who was born in Mexico, graduated from West Point in 1976 and is an Army pilot selected to serve as the Brigade Commander of the 3rd ROTC Brigade in California. He is now in charge of the Army's ROTC programs in California, Arizona, Nevada, and Utah.

Topete questioned why the ranks of the Army's officer corps don't reflect true diversity, given that the Hispanic American population will
become the largest minority group in America in the next six years, and is already the largest among youth 18 and under.

While Hispanic Americans represent 11.4 percent of the U.S.—12.8 if Puerto Rico is included—they are only 35 percent of the Army Officer Corps.

"The visibility was just not there until we realized how much the Hispanic population is growing in this country," Topete says. "Once demographics showed that Hispanics will become the largest minority by the year 2005, I think all governmental agencies started looking at how well represented they are and realized that holly-moly, they were not. There was a realization that this group was growing by leaps and bounds."

Topete, who interviewed dozens of officials, held focus groups, and questioned ROTC members over nine months, came to the firm conclusion that Hispanic American youth know little about the Army and therefore don't see a place for themselves there. This stretches beyond the barracks to ROTC programs and the West Point academy.

Experts say that the findings are reflected in other branches of the military and that similar methods are being undertaken to address the problems.

Among the other findings in the landmark report:

- Few Hispanic parents or family members are Army veterans, so Hispanic youths have considerably less knowledge of the military than other youth. They also are unaware that they don't have to put off college but can attend under a military scholarship, earn a degree, and then enter the service.

- School counselors often are not armed with ample—or correct—information. One counselor, the report indicates, simply directs his charges to a recruiter when asked about the service. Counselors might know about economic incentives but have little to offer students wondering about the "officer side" of the Army.

- The Army experience is often invisible to those attending two-year colleges, where ROTC scholarships are not available. And base closings, particularly in California, have led to decreased exposure.

- There is a drastic "void" of Hispanic American senior officer role models. At present, there are only three active Hispanic American general officers in the Army. But there are 28 African American and 275 White general officers.

- But once in the Army, Hispanic Americans have a stellar record. They represent the largest percentage of Medal of Honor recipients, and they have the highest retention rates. Topete points out that 28 percent of the name the Vietnam Memorial in Washington, D.C., are Hispanic American.

- There are cultural barriers. Hispanic students had a greater tendency to stay near home to help out with family responsibilities. Many also follow the work force early. Hispanic men represented the highest labor force participation of any group of American male workers.

Two years ago, 80 percent of Hispanic males over age 16 were working or looking for work, the highest of any group, according to Topete's research. This has discouraged many from continuing high school and entering careers that require a college degree. So the military life often was even a bleep on their radar screen.

Often, parents are unable to offer much guidance because of the impressions of the Army, he says.

"Families can help if they realize that their kids can make a lot of money if they stay in school, stay in college, perhaps become an officer. The ROTC program," Topete says. "Parents can help by not influencing them to drop out of school to go to work, and by showing them they can make a lot of money if they stay in school."

The recruitment station in the Bronx boasts the highest number of recruits of New York City's five boroughs. But of the 2,000 people who through its doors or make inquiries each year, only 10 percent—a 200—eventually enlist.

Opportunity Management Institute Patrick AFB March 1998
Joel Figueroa, shortly after beginning his first day as the station commander at the East Fordham Road office, explains: “A lot has to do with the generation of parents. Parents right now have grown up during the Vietnam era and had seen a lot of kids go into Vietnam who didn’t come back. They think the Army is the same.”

“Right now we’re going into the 21st century, and parents still think the Army is in the 1960s,” he says.

Yet he won’t have a difficult time attracting Latinos to enlist because the surrounding neighborhood, the South Bronx, is heavily Latino. Around 40 percent of the station’s recruits each year are Latinos, often drawn by the promise of good educational fortune.

“We have kids that are looking for a way to go to college, and basically right now we’re offering anywhere from $18,000 to $50,000 for college if they enlist for two to five years,” he says. “The recruiter has to basically sell himself and get the trust of the applicant himself.” The recruiters tell their own story and what they’ve been through since joining the Army—“showing them that we made it.”

Figueroa tries to dispel any fears by his words and by his presence. He talks to schools and recruits, but also to parents.

“We try to talk to parents as well as the applicants to let them know the Army has changed as far as technology,” he says. At the station, and over the phone, the discussions involve descriptions of Army life and the avenues one could pursue. It’s a common misconception that enlistment will send someone immediately out to the front-lines.

“We put that in perspective,” he says. “You create a model, and most of these kids don’t have fathers to look up to, so you do get that also, where you are looked up to as a figure of authority.”

“You figure if a recruiter came from Boise, Idaho, over here and tried to recruit, the kids would look at him and say ‘This guy isn’t from here—you can tell that.’”

“I use an approach to where they need me the most. I say, ‘Listen, I really care about what your future is about. I know you don’t have a plan, and I have a way in which in two to three years you can have a concrete plan on how to succeed in life—if you use the Army to your advantage.’”

For Figueroa, his experience is a major selling point. His family did not want him to enlist. His mother feared he could be injured, or worse, and that it would be her fault. Those fears diminished eventually. But he harbored the same desire that many still do—a decision that was based on economic logic.

“I was out there trying to go to college, and my mother was on welfare, and it was hard for me to go to a very good college,” he says. “I had fear that if I wanted to go to college, I would need money from my mother, and she would have to send it to me, and I would have to get a part-time job.”

So, the Army became an appealing avenue.

Army officials say that the percentage of Hispanics who enlist is steadily growing, though overall numbers of recruits are down. In 1985, 35 percent of enlistees were Hispanic. Ten years later, that number was at 77, and in 1998, 10.2 percent.

The seeds of change have been planted. Recruiting commanders have started Hispanic Leadership Summit Conferences on a national level. Recruiters are forming alliances with community leaders.

Advertising is more targeted. The ROTC Cadet command has increased the number of ROTC scholarships for Hispanic Americans and also emphasized the National Guard and Reserve commissions. West Point has begun bringing in Hispanic students as a group to visit the site (overall, 85 percent of those who visit accept and attend West Point).

The Army has set up programs to reach out to “at-risk” students who have dropped out of high schools. The program helps them earn GEDs. Other programs are designed with the premise that younger recruits might have a greater influence on their peers.

Corey Woods has only been in the Army for a few months and, even as a private, has been returning to schools to talk with youth.

“They think the Army’s a difficult thing, and it’s not,” says Woods, a 20-year-old private who has become part of the hometown recruiting program. He has met with hundreds of teenagers so far. Often they come armed with misperceptions. “They don’t think they will be able to take being away from home.”

Type that outreach is a recommendation offered by the Topete report. The author believes that the Army needs to do a better job reaching out, and that effort is one that can be replicated by the other branches of the military. Among those recommendations:

- The Army should beef up advertising and disseminate more information about ROTC programs, and give greater exposure to Hispanic American veterans in areas with high Hispanic populations, such as California and Texas. This fall, for instance, recruiters blitzed a Ricky Martin concert at Madison Square Garden in Manhattan. The Army...
co-sponsored the event, a banner was strung outside, and Latino concert-goers were handed pamphlets as they walked inside.

- ROTC programs should forge better ties with Hispanic groups, such as the Hispanic Association of Colleges and Universities, and should establish more mentoring programs.

- The Army should devise plans to boost the number of Hispanic American senior officer role models and should establish a timetable to double the number of officers within the next decade.

- It should also target specific divisions to bring more Hispanics into them, such as Airborne, Ranger, Green Berets, and Special Forces. These are areas with higher numbers of Hispanics.

- Recruiters from the Army, Navy, Air Force, and Marines should work more closely together to steer candidates to ROTC or West Point. And West Point's admission goals should be reviewed and altered. Topete faults the process for seeking to enroll four to six percent Hispanic Americans, maintaining that it should be higher.

- The Congressional Hispanic Caucus should also urge members of Congress to use more of their nominations to recommend Hispanic American candidates for West Point.

"If I look at every one of the recommendations, I would say that something is being done now," Topete says. In fact, he also recommended that the Hispanic Association of Colleges and Universities (HACU) collaborate with the Army to boost enrollment in ROTC programs, and this past fall, the Army planned to attend HACU's conference in Miami.

At the Bronx recruitment center, there is a slow stream of people, more recruiters than recruits. But when visitors step inside, they are given a great deal of attention, shown pamphlets, and engaged in conversation about their life and their interests.

First Sgt. Ramos says he joined for the same reason that many still do: He wanted to travel abroad and also to defray college expenses. He dropped out of college to join.

"I got a $20,000 college fund in 1982, a $3,000 enlistment bonus, a guarantee to go to Germany," Ramos says. "I thought it was great." He adds, "I have thoroughly enjoyed my 17 years in the service."

"Right now we're offering anywhere from $19,000 to $50,000 for college if they enlist for two to five years."

Joel Figueroa, Station Commander, East Fordham Road, The Bronx

THE ARMY OFFERS AN EDUCATION FOR LIFE...

...AND THE FUTURE OF YOUR CHOICE.
COSTEP Student Loans Invaluable for Hispanics

South Texas Program Stepped up When Banks Balked

BY GARY M. STERN

Nana Guerra Valdez was teaching math in the early 1980s at a private high school in Texas and was interested in studying for her master's. She turned to the Council for South Texas Economic Program (COSTEP) for financial aid.

"The private school didn't pay as much as most public schools," she said, explaining why a loan was essential. Now a math teacher at Nickki Rowe High School, a public school in McAllen, Texas, she acknowledges that without the $5,000 loan, she would not have been able to afford her master's from the University of Texas-Pan American. Her straight 4.0 average underscored that she was an excellent student who just needed financial incentives. "COSTEP's purpose is to help those in need of furthering their education. It exists to help people succeed," she said.

When most commercial banks realized that the loan provisions of the Higher Education Act of 1965 would earn them only a minimal profit, they balked at being the prime suppliers of loans. In response to the banks' resistance, states established nonprofit organizations to offer and service loans. The Council for South Texas Economic Progress (COSTEP), established in 1975 by then-Senator Lloyd Bentsen, has been in the forefront, enabling South Texas students, nearly half of whom are minority—and 75 percent of those are Hispanics—to gain financial aid towards a college education. Since COSTEP started, it has granted more than 40,000 student college loans.

"At least 75 percent of its borrowers were Hispanic in 1995," said Dr. Griffith. The average loan was $5,500. Students used these loans for 120 different institutions. Most were in Texas, but loans can be used for out-of-state colleges as well.

"They offer exceptional customer service...[and] have been instrumental in helping our institution minimize loan defaults."

ARNOLD TREJO,
DIRECTOR OF FINANCIAL AID, UT-PAN AMERICAN

Why borrow from COSTEP rather than a traditional bank? Borrowers who take a loan from the South Texas Higher Education Authority (STHEA) and make timely payments over three years, their
rate goes down by three percent. If a student opts to repay by automatic checking or savings, the interest rate is reduced by another quarter of a percent. Lastly, if a student can't afford the guaranteed $50 a month payment, COSTEP will renegotiate a lower fee and guarantee the loan.

Not only has COSTEP maintained its commitment to granting loans to qualified students—its mission has intensified over the last few years. Granting loans to students in South Texas “is increasingly important because we know that most Hispanics don't come from families that are highly educated. They are poorer than the average person in the state of Texas,” said Dr. Susan Griffith, chief planning officer at COSTEP. “If the state of Texas wants to be successful in the twenty-first century, it has to educate its Hispanic students.” Dr. Griffith noted. As Austin and other South Texas cities become technological centers, the need for Hispanic students to gain a college education increases.

COSTEP provides an invaluable service. “COSTEP provides a specialized service, an ability for a student to get a loan at a cheaper rate. We will also work with students in a period of hardship. We'll rather see them pay something than go in default,” stated Robert F. Ziemski, president of COSTEP, who had spent more than 20 years in corporate finance at several banks before joining COSTEP in 1995.

Working closely with COSTEP is the South Texas Higher Education Authority, the tax-exempt financing arm that issues bonds and has its own board of directors. There are 39 higher education authorities in the United States (seven are in Texas) that raise funds to finance college loans. Most recently, the South Texas Higher Education Authority issued a $35 million bond in April 1999. “First we must receive a commitment from banks, savings and loans, and credit unions that they will sell us the loans,” Ziemski noted.

COSTEP serves a vital role to the University of Texas-Pan American, primarily because close to 50 percent of loan volume goes through its servicing program,” asserted Arnold Trejo, its director of financial aid. “They offer exceptional customer service. In addition, they have been instrumental in helping us realize that defaulting might damage their credit rating for seven years and make them unable to take out a loan or buy a car.

Since Texas passed an education law that as of 1998 required high schools to offer financial aid counseling, COSTEP is playing a more active role with guidance counselors in high schools. We can offer students counseling. Whatever they need is help. We don't want to do is to take money as a barrier to college out of the equation. If you want to go to college you can get the money. We do just sell loans. We offer scholarships and grants searches and show students how to arrange package,” said Dr. Griffith.

Offering loans to students in South Texas is critical to enabling Hispanic students access to a college education. In The Hispanic Outlook's annual list of the 100 colleges granting the most bachelor degrees to Hispanics, 13 of the 25 schools were located in South Texas, which includes areas where unemployment is 17 percent to 2 percent, nearly five times the average unemployment in most states. “Along the border, there are pockets of Hispanics who live in colonia rural slums dominated by substandard housing, often without running water. Without a loan, these students would never gain an education,” Ziemski affirmed. More than 250,000 people reside in the 1,200 colonias in South Texas. Of those who are 17 years or older, only 17 percent are high school graduates, and only 80 percent have attended college. That's why COSTEP offers students specialized outreach counseling.

Many of the high schools in South Texas are located in rural communities that have no Internet access. COSTEP's Netmobile van that circles through the area, possesses a computer in which students can learn about financial aid and have counselors work with them to perform a scholarship search. “Consultant charge $300 to $500 for the searches. With us, they're free,” Ziemski said. In fact, students who apply for federal assistance directly through the Internet, “it takes weeks via computer and six weeks through the mails,” said COSTEP president. COSTEP counselors help students fill out an application.

“All of our outreach counselors are bilingual,” said Dr. Griffith. “That's particularly important when communicating with parents, many of whom speak only Spanish.
Students in South Texas still must apply for a loan at a local bank, like Broadway Bank, explained Diana Perez, the coordinator of financial assistance at the School of Law at St. Mary's University in San Antonio, Texas, and a member of COSTEP's advisory board. But after the bank or credit union grants the loan, COSTEP becomes the servicer of the loan for those banks who originate and sell to South Texas Higher Education Authority. "COSTEP becomes the owner of that loan. They adopt the student and will be with that student from the day they borrow until they repay," Perez noted. COSTEP operates as a "support system. It offers the personal touch," she said. Most students get frustrated dealing with automated voice-activated mail systems and an inability to reach a human voice.

Its Web site, accessible at www.costep.org, provides invaluable information to students on how to apply for loans and how to perform a scholarship search; it provides links with Texas colleges and lists lenders as well. "The Web site helps students navigate the loan maze," said Dr. Griffith.

After the student is granted a loan, COSTEP does not fade from the picture. It sends out bills and works with students to help them repay their loans. "If they're in trouble, we help them gain deferment and forbearance," said Dr. Griffith. If a student encounters a problem like a severe illness, COSTEP performs "default prevention. "As soon as the loan is 30-days late, we start calling them to counsel them," Dr. Griffith asserted.

COSTEP was always a very important initiative to Senator Penisten, said Jack Devore, his press secretary from 1972-1993, speaking for the senator, who was ill and unable to comment. "South Texas is his home country. He was a country judge there, was educated there, and went to war from there. If you look at the statistics, the metropolitan areas of South Texas are some of the poorest in the country, especially along the border. One of their big problems has always been affordable education. COSTEP was his way to help resolve that issue," said Devore, who is now a public affairs consultant with PSI based in Austin.

If COSTEP didn't exist, undoubtedly fewer students and fewer poorer students would be able to afford college. Ironically, Ziemski said that COSTEP is as much about economic development as it is about education. "We've zeroed in on education," Ziemski said. COSTEP reports that a typical worker who has gained a four-year diploma earns over 70 percent more than does a high school graduate over his or her working years. In fact, a few years of college will boost income by 30 percent. "We fill the void that helps working-class kids and parents finance their higher education. With our outreach and inexpensive loans, we're assisting students who would not otherwise pursue a higher education," Ziemski stated.

University of Texas-Pan American's Trejo remembers when banks didn't want to offer secondary student loans because the profit margin wasn't high enough. If COSTEP couldn't offer loans through issuing bonds, "we might have a scarcity of banks willing to offer student loans," he said. "COSTEP is out there in the Rio Grande area of South Texas doing outreach. The mentality there," said Perez, a financial aid officer for 23 years, "is often that education is not affordable. COSTEP, along with financial aid officers, tells them, 'Yes, it is affordable. You can gain assistance. They don't deal just with loans; they deal with a student's psychology.'

---

**Water Resources Faculty Position Available**

The Department of Civil and Environmental Engineering at UC Davis invites applications and nominations for a tenure-track position in water resources engineering with specialization in computational environmental hydrodynamics. The position is open at all levels for outstanding candidates. Requirements include a doctorate in civil engineering or related field and a demonstrated record of success in, or evidence of outstanding potential for, both teaching and building a vigorous independent research program. The successful candidate will have a strong background and interest in computational fluid mechanics and hydrodynamics and will also have a background and interest in the modeling of turbulent transport as related to environmental flow and transport processes. He/she will join departmental colleagues in teaching undergraduate courses in water resources engineering and graduate courses related to fluid mechanics and numerical applications.

To be assured of consideration, applications must be submitted by January 21, 2000.

Applicants should submit a complete resume, including a statement of teaching and research interests, transcripts, a list of relevant professional experience and publications, and the names and addresses of three references to:

Professor Bruce E. Larock
Department of Civil and Environmental Engineering
University of California
One Shields Avenue
Davis, CA 95616-5294

E-mail inquiries may be addressed to belarock@ucdavis.edu

Information about the department can be found at [http://cee.engr.ucdavis.edu/](http://cee.engr.ucdavis.edu/)

UC Davis and the Department of Civil and Environmental Engineering are interested in candidates who are committed to the highest standards of scholarship and professional activities, and to the development of a campus climate that supports equality and diversity. The University of California is an affirmative action/equal opportunity employer.
New Era for Hispanic Scholarship Fund

$50 Million from Lilly and 20-Year Plan from Gates

BY ED BRENNEN

Sara Martinez Tucker, president and CEO of the Hispanic Scholarship Fund, is quick to admit that "I couldn't have planned this year better."

And how could she? In July of 1999, the HSF was awarded a $50 million grant from the Lilly Endowment Inc., the single largest amount ever given to promote Hispanic higher education and the largest amount ever pledged to a Hispanic organization.

While that windfall alone would make 1999 a banner year for the HSF, there was more.

Just two months later, in September, the Bill and Melinda Gates Foundation announced that the HSF was one of three organizations included in the newly formed Gates Millennium Scholars Program, a 20-year plan to provide financial assistance to high-achieving minority students in need of financial aid. The program, which also includes the United Negro College Fund and the American Indian College Fund, will begin in the fall of 2000, giving financial assistance to 1,000 new students per year with an annual investment of $50 million.

Not a bad year indeed for the HSF. But as Martinez Tucker quickly points out, the work has just begun.

"Just to put it in [perspective], last year, which was our best year ever, we gave out $35 million in scholarships," a slightly fatigued Martinez Tucker said during a November telephone interview from the HSF's San Francisco headquarters. "This year, with Lilly, we're going to jump up to $9 million. And my expectation is [that] with Gates, next year we're going to jump into the $25-30 million scratch the surface of what community needs. So I know got a long way to go before I sleep. And the HSF staff won't be to truly sleep well until it fulfill:"

Approximately $25 million of the Lilly grant will go to students already attending college through the HSF College Retention Program.
have imagined.

Founded in 1975 by Ernesto and Dora Robles, HSF has awarded more than 36,000 scholarships totaling nearly $38 million over the past two decades. With 1999’s Lilly grant alone, the HSF will be expanding on those numbers by leaps and bounds over the next five years. Of the $50 million grant, $45 million will be awarded for program expansion. The additional $5 million is a challenge grant to create a $10 million endowment for HSF (contingent on HSF’s raising $5 million).

Approximately $25 million of the Lilly grant will go to students already attending college through the HSF College Retention Program, which will provide an additional 2,000 academic scholarships per year over a five-year period to current four-year college students in all 50 states and Puerto Rico.

The HSF’s Community College Transfer and High School Programs, meanwhile, will together receive an additional $12.5 million over the next five years. The Community College Transfer Program, which assists Latinos in making the transition from community college to four-year institutions, will receive an additional 600 scholarships, while the High School Program, designed to assist Latinos making the transition from high school to college, will be expanded to approximately 25 school districts in cities throughout the U.S.

In addition, the HSF plans to spend $75 million on ongoing education research and targeted initiatives that promote community participation. One way to do that is by decentralizing its operations, expanding from its current San Francisco headquarters with a half dozen new regional offices across the U.S. While no locations had been finalized as of November, Martinez Tucker said they were leaning heavily toward New York, Miami, Chicago, and Los Angeles, as well as Texas and the Southwest.

With regards to education research, the HSF recently completed its first qualitative analysis of its scholarship recipients from 10 cities across the U.S. Martinez Tucker said that the results were enlightening.

“I think the thing that I’ve learned is that the Latino students who are making it to college have been able to find the inner strength that they’re facing.”

“But as I’m spending time with the students who are not yet at the four-year institutions, whether it’s sitting with high school students or community college students, the social and academic support are as crucial as the financial support,” Martinez Tucker added. “So we’ve got to be able to mobilize our alumni and get them out there so they can be that visible embodiment of the work that we’re doing so students can say, ‘If she can do it or if he can do it, I can do it.’ At the scholarship fund, we’re fully committed to raising the money that our kids tell us that they need, but we also know that if we’re going to serve the community and deliver on the mission of doubling, we’re going to have to mobilize the community to provide that social and academic support for our kids.”

One student who is helping deliver that message is Xavier Peña. A native of Mission, Texas, Peña applied for his first HSF scholarship as a senior in high school back in 1992.

Peña went on to the University of Texas at Austin, where he graduated in 1997 with a bachelor’s degree in accounting and a master’s degree in tax. Each year throughout his studies, Peña received an HSF scholarship of between $1,500 and $2,000.

After graduating in 1997, Peña worked for two years as a tax consultant for Arthur Anderson in Dallas. In 1998, however, he returned to the University of Texas to attend law school. And once again, the HSF was there to help defray the cost.

“It would be seven years this year if I get the scholarship again,” the 25-year-old Peña said in November. “It’s been quite a trip with them. They’ve just stayed really dedicated to me.”

To help repay the favor, Peña agreed to be a guest speaker at an HSF fundraiser in Dallas two years ago. He returned to speak at the 1999 Dallas fundraiser, as well as another one during the fall near his

Thanks to the publicity from the Lilly and Gates gifts, the number of scholarship applications that the HSF distributed in 1999 skyrocketed from 40,000 to 60,000.
hometown of Mission.

"I tell people it's important to support organizations like HSF who are trying to make a difference," said Peña, who plans to go into corporate law. "I just tell my story, I tell how college wasn't necessarily very easy for me to pay for, how my family couldn't necessarily help that much, and how I was very dependent on trying to work hard to get scholarships."

By speaking at the fundraisers, Peña realizes that he is not only helping spread the HSF message, he is also putting a face to its cause. "At the last event that I spoke at, a lot of people were there—Jay Leno was one of the guest speakers—and it was a big fundraiser," said Peña, who added that he might have found his "second calling" as a public speaker. "But you kind of lose track of what you're doing. You lose sight of the purpose of the whole event, which was to raise money for the scholarship fund. So it's nice to have someone who can tell their story, to be able to let everyone who's donating the money see a face behind it all. And it's nice to be able to let people know how much the organization meant to me and probably means to a lot of other people, too."

And with the recent Lilly and Gates donations, Peña is happy to see the HSF enjoy such unprecedented success of its own.

"It's just really neat to see what they're doing. I think it's been great to see the organization grow as well," he said. "They're so much larger now than when I first started with them. The goals that they've set for themselves are pretty impressive."

But, as Martinez Tucker points out, the work has just begun. Thanks to the publicity from the Lilly and Gates gifts, the number of scholarship applications that the HSF distributed in 1999 skyrocketed from 40,000 to 60,000. (Scholarship information can be downloaded from the HSF Web site at http://www.hsf.net or by calling 1-877-HSF-INFO.)

"In a typical year for the scholarship fund, a staff of 13 to 15 could handle the volume of work," said Martinez Tucker, who has served as HSF president and CEO since August of 1997. "We had a small fundraising arm, and then our scholarship department would take all the applications and administer all the programs that we did.

"But this fiscal year, we're going from 13 people to 28 people," she added. "And that's before we even start thinking about the regional offices that the Lilly gift is making possible on top of this."

The back-to-back contributions have not only helped the HSF coffers; they've also given the organization increased credibility. "I'm getting my phone calls returned a lot faster now," Martinez Tucker said. "People are willing to carve out time and hear the students' stories."

While the Lilly and Gates donations will go a long way in helping the HSF reach its goal of doubling the Hispanic college graduation rate by 2006, Martinez Tucker has done the math and realized that it's still just a drop in the bucket. By doing a statistical analysis of the Class of 1996—those who would be seniors in college this year—Martinez Tucker came to the following realization.

"Of the 2 million Latinos who graduated from high school in 1996, 1.3 million will drop out. Of the 700,000 who start college, 400,000 will start at a community college. Less than 35,000 will get their associates degree, and then less than 9,000 of those will transfer to the four-year institution. They'll join the 300,000 who started there, but ultimately only 68,000 will get their college degree to double that 68,000, it would provide $35 billion in scholarships."

"If I were back to that original two out of 10 high school graduates and 18 percent of them should get college degree, I've got a $9 billion proposition."

"So growing the school from $35 million to $30 million is a terrific first step," she said. "Lilly and Gates are giving down payment to move the country to a nice neighborhood we've got to afford the mortgage."
University of Pennsylvania

Many Firsts, Including Its President

BY ROGER DEITZ

University of Pennsylvania is a university of significant
firsts, and an institution with a brilliant past. Founded in
1740 by a group of colonists that included Benjamin
Franklin, Penn was the first school in America designated as a uni-
versity. That was back in 1779. Penn is also among the nation's four
oldest institutions of higher learning.

America's first medical school was launched at Penn as well as
the country's first collegiate school of business. The medical school
was established in 1765 by John Morgan, which makes it the first in
the colonies. The Wharton School was the nation's first collegiate
school of management when it was established in 1881. Penn also
instituted higher education's first botany department in 1768, as well
as departments of hygiene and public health, and medical research.

The world's first psychological clinic was opened at the University of
Pennsylvania in 1896. Then too, Penn can take credit for creating the
first modern liberal arts curriculum, the first journalism program,
and the first university teaching hospital.

Another significant first is Judith Rodin, the president of the
University of Pennsylvania. Dr. Rodin is the first woman to head an Ivy
League institution as well as the first Penn alumna to lead the university.

Dr. Rodin is most concerned that the first-rate education that students
receive at Penn be as affordable as possible. For the 1999-2000 academic
year, total student charges increased only 3.7 percent, the lowest in more than three decades. For that and
for all that is first and foremost about the University of Pennsylvania, The Hispanic Outlook has selected
Penn to the Honor Roll.

President Rodin reports that Penn is holding the line on costs. She says that the tuition and fees
for undergraduate students have increased 2.2 percent, from $23,254 to $24,330. Average room
and board increased 2.2 percent, from $7,206 to $7,362. That means that total student charges went
up 3.7 percent, from $31,960 to $34,692. "This maintains our commitment to limit the rate of
increase for both tuition and total student charges for our undergraduates at Penn," observes Dr.
Rodin. She notes that the 3.7 percent increase in charges is slightly below last year's growth rate for
per capita personal income, which registered about 4.1 percent across the nation. President
Rodin stresses that total student charges at Penn for the 1999-2000 academic year are the lowest in
the Ivy League, based on charges announced at Brown, Cornell, Dartmouth, Harvard, Princeton, Yale, and Columbia.

Dr Rodin says that with the active support of the trustees, Penn "is able to maintain its need-blind admission policy," continuing to provide financial aid packages to those students who demonstrate need throughout their undergraduate experience. Penn's undergraduate need-based budget for the 1999-2000 academic year will exceed the $55 million budgeted last year, reflecting the university's commitment to enrolling the most talented students without regard to their financial circumstances.

In 1998-99, more than 40 percent of Penn's undergraduates received grant support from the university. Dr. Rodin says that the trustees are "resolve based efforts to Penn's campaign to raise $200 million to further enhance Penn's endowment for undergraduate financial aid, one of the goals of the Agenda for Excellence, the university's strategic plan. She states that more than $75 million has been raised to date in the campaign due to the leadership of P. Roy Vagelos, M.D., former chair of the Board of Trustees and former chair of Merck & Company, Inc., who has made building the undergraduate financial aid endowment his personal priority.

Dr. Rodin adds that new applications to the class of 2005 ran well ahead of the prior years—a six percent increase. There is no question that prospective students and their parents are responding very positively

to the scope and breadth of the educational opportunities afforded undergraduate students at Penn." observes Dr. Rodin. "And our applicant pool is exceedingly broad-based." The president says that extraordinarily talented students from around the world are applying to Penn in record numbers. She believes that with the support of the trustees, several new financial aid initiatives instituted at the university can maintain its financial program as one of the largest and most competitive in the country.
"The trustees," Rodin maintains, "continue to send a very clear, strong, and positive message to present and future Penn students, which is "This institution will continue to recruit and enroll the finest students, and no student will need to decline the opportunity to participate in and benefit from the Penn experience for financial reasons." The president concludes, "We are holding the line on our costs, and we are maintaining our financial aid program as one of the nation's best to continue to keep Penn's doors open to the nation's most qualified students."

Financial aid initiatives include the Trustee Scholarship for the most academically gifted students with demonstrated financial need. Trustee Scholars receive aid packages that contain no loan component; grants and work-study opportunities cover the full amount of the students' demonstrated need. More than 90 Trustee Scholars are enrolled at Penn with an estimated commitment of more than $365 million for their financial aid throughout their four undergraduate years. The Mayor's Scholarships are for exceptionally gifted students from public, private, and Archdiocesan high schools in Philadelphia, with demonstrated need. These scholars, too, receive loan-free aid packages. Last year, the 145 Mayor's Scholars at Penn included 43 first-year students with a commitment of about $3 million throughout their four years.

Annenberg Scholarships, made possible through the generosity of the Hon. Walter H. Annenberg and his wife, the Hon. Leonore Annenberg, are given to exceptional students with outstanding leadership potential and demonstrated financial need. These scholars receive "strong, highly competitive" financial aid packages, including the maximum grant award possible. These scholarships began with the class of 2003 Leadership Grants, which contain no loan component, are awarded for exceptional students who have shown "impressive" leadership skills in high school—through excellence in the performing or visual arts, athletics, community service, student government, or similar activities—and who have maintained strong academic records.

Penn's total enrollment includes 9,177 full-time undergraduates, 8,110 full-time graduate and professional students, and 4,455 other students, a total of 21,742. In 1997-1998, the total international enrollment was 2,010 students from 114 countries. About 36 percent of those accepted to the Class of 2005 are either African American, Hispanic, Asian, or Native American. Hispanics make up 4.08 percent of the entire enrollment. Women comprise 49.6 percent.

There are 2,110 standing and 2,236 associated faculty for a total of 4,346. The most recently available student-faculty ratio is 10:1. Measures of faculty distinctions include 53 members of the Academy of Arts and Sciences, 50 members of the Institute of Medicine, and 50 members of the National Academy of Sciences. There are 87 Guggenheim Fellows, 10 members of the National Academy of Engineering, seven MacArthur Award recipients, three Nobel Prize recipients, and two Pulitzer Prize winners. Penn has 20,793 alumni of record.

Penn's four undergraduate schools—the College (School of Arts and Sciences), the School of Engineering and Applied Science, the School of Nursing, and the Wharton School—are among the most selective in the country. About 15 percent of all applicants matriculate each year. The total number of undergraduate majors being pursued is 79. Penn offers 63 study-abroad programs in 26 countries. Of the more than 10,000 students who are enrolled in Penn's 12 graduate and professional schools, 84 percent are leaders in their fields. The Wharton School consistently ranks among the nation's top three business schools. The School of Nursing is one of the two best in the United States, and the School of Arts and Sciences, Law School, and School of Medicine rank among the top ten in their respective categories. Penn is one of only two private institutions in the country with a school of veterinary medicine. Penn's other graduate and professional schools are the Annenberg School for Communication, the School of Dental Medicine, the School of Engineering and Applied Science, the Graduate School of Education, the Graduate School of Fine Art, and the School of Social Work.

Penn's 262-acre "urban park" campus: West Philadelphia includes many notable landmarks. Houston Hall is the nation's first student union, and the University of Pennsylvania Museum is one of the fine art and anthropology museums: the country. Franklin Field is the oldest college football field still used in the country's first double-decked college stadium. There are 122 buildings on campus. In addition to being Philadelphia's largest private employer, Penn is also a major part of the West Philadelphia community and a major part of the model university-community-school program that is being emulated nationally. Through the West Philadelphia Improvement Corps, community residents and public school pupils receive enhanced education opportunities, and programs at Penn incorporate real-world research into their academic studies. Penn also participates in several other programs designed to preserve the livability and economic health of the community.

The Cantor-Fitzgerald Center for Research on Diversity Education was established in 1996 in cooperation with the Anti-Defamation League (ADL), with funding from the Cantor-Fitzgerald Foundation. A primary responsibility of the Center is to design and conduct a national longitudinal evaluation of ADL's A World Difference Institute. In addition, the Center conducts an ongoing Seminar on Diversity in Education at Penn. This is an "intellucent greenhouse" that reviews a variety of assumptions and approaches to diversity education, generating working papers on basic issues and diversity education.
IT’S YOUR LIFE,
Why spend it waiting?

Tired of hunting for the
government information you need?

Feel that if you spend one more minute
waiting on the phone you’ll scream? Had it
with long lines to get a simple piece of
paper?

Access America for Students is the solution!
Log onto www.students.gov and discover how
information technology is transforming the
federal government.

Access America for Students is a U.S.
government-wide initiative to provide services
and information online to postsecondary
students – on your time, on your desktop.
Through this innovative program, the
government is out to change the way it does
business with you.

A few years ago, there was talk on the stump and inside the Beltway of
"reinventing government." And that talk has turned into action.

Spurred by Vice President Al Gore, federal agencies have been brain-
storming jointly on how to improve their products and services—specifically,
at this juncture, on how to ensure instant access to those products and
services by all citizens, everywhere. One venture is AAFS, Access America
For Students.

An early result of their combined thinking is a work-in-progress Web
site—www.students.gov—that holds enormous promise for narrowing the
information gap when it comes to minorities and higher education.

HO’s visit to the “beta” model of the Web site, soon to be supplanted by
a new, improved version, began with this welcome:

“AAFS is a one-stop Internet gateway (www.students.gov) linking stu-
dents to U.S. government services. Through AAFS, students can find infor-
mation on everything from paying for school to finding internships to fil-
ing their taxes. Led by the U.S. Department of Education in collaboration
with 11 other government agencies, AAFS is already processing stu-

HO talked with two AAFS team members, Charles Coleman, directe
Access America at the Department of Education, and Carole Kuziak
who manages the content of the Web site.

The opening question, said Coleman, was “How can our citizens ac-
their government electronically?” One way to take a look at our citizen
is by demographics—like students and seniors and small business—
start to put together some ideas about how we could serve those var-
demographic groups.”

Students are “early adapters to information technology,” he said, as
such, would offer a good test across federal agencies. Working with
DOE on this are the Department of Labor, the U.S. Postal Service, Vete-
Affairs, IRS, and more. “The Department of Labor has a whole host of
ices for nontraditional students,” said Coleman. “What it’s about is

Government Wired For Students

by Adalyn Ho
How do people plan for jobs? What are the salary ranges?” America's Job Bank, he said, had already started to build around the private sector.

Carole Kuriatnikova described it as "government agencies coming together to figure out new ways of serving the public. The Post Office can say, 'I'm going to develop an electronic certification so customers can change their address online. Or the VA says that veterans can file for benefits over the Web.'"

"We're not reinventing the wheel." What Access America does, she says, is produce services that otherwise would entail contacting--by phone, by mail, by in-person visit--10 or 25 agencies. She calls the collaborative approach not so much a "new movement in government" but rather "the way things have to be now" for economies of scale.

Participating Schools

"How do we get to students?" was an early question, said Coleman. "We put together a program with 11 universities to be partners the first year to test out some of these ideas on our products and services on our Web site, as well as other things that we are trying to test, for instance, how to get the money to the school in an effective way so the students have more idea of what kind of aid they're getting.

"And eventually, we'd like to conduct some testing around electronic certificates—something like the PIN that banks use to get into your ATM—so people could do more transactions with the government over the Internet.

"Very cutting-edge.

Initial pilot schools were: DeVry Institute of Technology, Iowa State University, New York University, Tarrant County College, the Universities of Florida, Missouri-Kansas City, Northern Colorado, and Western Governors. Pilot schools have direct input into the potential national roll-out design of Access America for Students including the development of an electronic signature process.

"We have some new ones coming on board," said Coleman. "We tried to expand geographically and tried to get a diverse student population, working with two- and four-year schools, public and private."

"Carol put together some stats on the universities we're including as current and future pilot participants, and we had fairly good representation from the Hispanic community." Part of the AAFS mission is to increase access to information for postsecondary students of Hispanic origin. "Twenty-three percent of DeVry's student body is Hispanic. At Florida State, of their 30,000 students, 1,800 are Hispanic. And the University of Alaska surprised me. Eight percent of their population is Hispanic!"

Asked how the schools were selected, Coleman said, "We sent out a letter to all schools that are eligible for federal funding and said 'We've got this program going on.' Schools then volunteered for the project. Some of the schools that we have are supposed to be on the cutting edge of new
things. And I'm sure that one of the reasons [they joined in] is to test for their own business cases."

In addition to the pilot schools, George Washington University, the University of Maryland-College Park, and Tennessee State are helping AAFS in an advisory capacity.

Last semester, the AAFS pilot schools began to implement the Education Department's Student Account Manager (SAM) and the VA's Web-Automated Verification of Enrollment (WAVE). SAM handles student financial aid and dollar transfers at seven colleges and universities. WAVE will allow students to electronically verify their enrollment over the Internet. At present, every month, more than 12,000 students receiving VA benefits must verify their enrollment before a monthly benefit check is issued. Currently, the VA prints and mails the student a form that has to be returned and processed prior to payment. WAVE should reduce the burden on both students and the VA processing staff—it is slated to begin in January.

Web Site Action

Students.gov was launched in April. Coleman said it's getting nine or ten thousand hits a month simply by word of mouth.

"This whole thing is being done on what private corporations would consider a shoestring budget," said Kurianikova. "We ourselves have a lot of talent internally, and a lot of our business partners have cut us some good deals in putting it together."

"On our new site," she said, "we're going to have the Financial Aid Super Center. We have information in there ranging from scholarships and grants to loans, and we've got this information targeting special populations as well. Another Access America product that we'll have is called InternNet, an attempt to draw together federal, state, and local internship opportunities. Right now, there is no one place you can go to to research government internships. You have to go from agency to agency to agency. They hope to have InternNet up this summer. This venture involves the Department of Labor, Office of Personnel Management, and GITC-Government Information Technology Services.

The High School Connection

"Part of what our Web site and our project will do is move toward the self-help model," said Charles Coleman, AAFS Director for the Department of Education.

"Part of what our Web site and our project will do is move toward the self-help model," said Coleman. He speculates that middle school and high school counselors who are familiar with AAFS could help many students merely by pointing them to students.gov. Students needing more information might then get help from the counselors.

Kurianikova said, "We also feel it is important to reach libraries and the American Library Association because when you're dealing with minority populations, you have to be very careful that you are keeping in mind the 'digital divide.' Not every family and perhaps not even the school has access to computers and the Internet. Public libraries need to know about students.gov."

"Part of what our Web site and our project will do is move toward the self-help model," said Coleman. He speculates that middle school and high school counselors who are familiar with AAFS could help many students merely by pointing them to students.gov. Students needing more information might then get help from the counselors.

Kurianikova said, "We also feel it is important to reach libraries and the American Library Association because when you're dealing with minority populations, you have to be very careful that you are keeping in mind the 'digital divide.' Not every family and perhaps not even the school has access to computers and the Internet. Public libraries need to know about students.gov."

Currenty the Department of Education offers the following publications in Spanish: Preparing Your Child for College; The Student Guide Federal Student Aid; and The Free Application for Federal Student Aid (FAFSA), and Spanish-speaking operators are available at the Education Department's toll-free hotline, 1-800-4-FED-AID.
Wilson's Economist Now at University of Oregon

BY WENDY MITCHELL

Philip J. Romero became dean of the University of Oregon's Lundquist College of Business in August 1993. He freely acknowledges that he was a very nontraditional candidate: "I had not come up through the faculty ranks, which is both a blessing and a curse." But, as he contends in the accompanying article, business schools are increasingly turning to business and government for their leadership. "Like several other industries that are suddenly having competition thrust upon them—think of utilities or banking, for example—business schools are looking outside for fresh ideas and skill sets."

Romero, a second-generation product of Spanish immigrants, has spent his career crossing professional cultural boundaries. In his early career, he trained to be a defense policy analyst. After a bachelor's degree in economics and government at Cornell, he spent the 1980s performing studies of defense issues for the Pentagon, the White House, and the CIA, at a consulting firm in Washington, D.C., and at the RAND Corporation, one of the world's original "think tanks."

"I was very lucky to get my Ph.D. at the interdisciplinary RAND Graduate School, which required students to work on major policy analysis projects to complement classroom learning," Romero said. "The tremendous value of learning and practicing concurrently deeply impressed me. In fact, at Oregon, we have revolutionized our curriculum so that the majority of learning occurs in student teams working on projects for real companies, with active coaching by their faculty."

But Romero's plans for a Pentagon career collapsed in 1989 for the best of reasons—because the Cold War ended. "That's when I appreciated my interdisciplinary training. Suddenly, I needed to find a whole new market."

"It is ironic that one of the last industries to experience hyper-competition is the business education industry itself. But in the late 1990s, it is finally here...."

PHILIP J. ROMERO, DEAN, LUNDQUIST COLLEGE OF BUSINESS

To his surprise, that market was corporate strategy at the CEO level, where Romero says that multidisciplinary perspectives are critical. "Most functional specialists in business look at problems myopically—finance, marketing, etc. But a CEO must, by definition, consider all disciplines. Romero became a strategic planner for a division of United Technologies and quickly came to the attention of its chair. "I had a bull. Business strategy is intellectually so much richer than defense; and I had a remarkable mentor."

Then plans changed again, this time not because of a forcing event but because of an opportunity. While at RAND, Romero had turned down an offer from Senator Pete Wilson to be his national security adviser in favor of joining the corporate world. In 1990, Wilson was elected governor of California and approached Romero with a different idea: to run analysis and research of economic policy. As Romero put it, "I just couldn't refuse a chance to play with a $1 trillion box of toys. If California was a separate country, it would be the seventh largest economy in the world."

Romero played two main roles in California government. In Pete Wilson's first term, Romero was chief economist and second-in-command or acting director of the state office of planning and research. Romero led studies on a variety of policy topics. His personal favorites were those that designed improvements in California's "atrocious business climate."

In the early 1990s, California was gripped by its worst recession in 60 years, and was losing 1,000 jobs per day. In response, Romero developed a package of tax cuts to spur investment in new firms that The Economist termed "the most significant tax legislation since Prop. 13." Within a few years, California was adding 1,000 jobs a day.

During Wilson's first term, Romero worked on
two issues that received special notoriety in the Hispanic community: NAFTA and illegal immigration. "On NAFTA, I was in accord with most Hispanic leaders: NAFTA would be good for Mexico's economy and for most Hispanics in the U.S.," Romero said. However, his study of the fiscal impact of illegal immigration—that found that illegal immigrants in California typically consumed far more in state-funded services than they paid in state taxes—put him at odds with many Hispanic leaders. "Unfortunately, some characterized my study, and the stands my boss took based on it, as 'racist' or 'xenophobic.' Generally, the criticisms were based on the sophistry that opposition to illegal immigration is synonymous with opposition to all immigration, or even more ludicrously, to Hispanics." Despite criticism, in 1995, Romero received a federal award for Outstanding Leadership by a Latino.

In Wilson's second term, Romero continued serving as chief economist but otherwise moved from analysis to operational management. He became Gov. Wilson's deputy cabinet secretary, overseeing 11 state agencies with business or economic responsibilities. During this period, he led the "restructuring"—the opening to competition—of California's electricity and telecommunications industries. He also directed a blue-ribbon panel on HMO reform that generated more than 100 pieces of state legislation.

With Wilson term-limited out of office at the end of 1998, Romero expected to return to the corporate world, "but I realized that I am passionate about ideas, so I needed to work in the ideas industry."

He is candid about his goal for the University of Oregon's business school: "to achieve a reputation and stature commensurate with Oregon's emerging role in the Pacific Rim economy." He stresses the critical importance of strong partnerships with the business community. "If any business school doesn't ultimately provide value to its core constituency, it will be outshone by a competitor that can."

Defense, corporate strategy, economic policy; and business education—Romero adds value by bringing the best from each profession into the next. "The settings might change, but the skills needed are very similar. And in any industry, understanding your suppliers or your customers can be a great competitive advantage. I hope this other kind of multiculturalism can also be an important part of our B-school experience."

Dean Philip J. Romero Updates the Business School Missi

Business schools need to serve the "underrepresented"—including Hispanics—and business itself.

The virtues of competition are well known to most scholars. Increased competition lowers prices and raises quality for consumers, and challenges producers to continuously improve their business. This has been demonstrated by massive amounts of research by economists and corporate strategists in the nation's business schools. It is ironic, therefore, that one of the last industries to experience hyper-competition is the business education industry itself. But in the late 1990s, it is finally here, which is good news for several communities poorly represented in B-schools—including, in some cases, actual businesses.

The signs of increased competition among business schools are not hard to find:

Supply has outstripped demand. Enrollment in MBAs climbed steady through the 1980s; and universities were happy to oblige. But growth slowed in the early 1990s, and supply growth hasn't throttled back commensurately. Thus more B-school seats are chasing (relatively) fewer students.

New competitors have entered the market. Forprofit providers of educational services, such as the University of Phoenix, DeVry, and ITT have very successfully gained market share from less aggressive incumbents. So far, their success has been concentrated at levels below that of top MBA programs, but it is only a matter of time. Evidence that traditional B-schools take these upstarts seriously is that forprofits have joined the American Association of Schools and Colleges of Business, the premier trade association of B-schools.

Geographic barriers to entry are eroding. Communications technology will allow institutions thousands of miles away to offer education to the most remote market. In fact, overcoming geography is behind at least two well-capitalized "distance learning" initiatives, the Western Governors University (a consortium of Western states seeking to offer higher ed to rural learners) and California's Virtual University (which markets courses at premier California universities to students living overseas.) If you have a solid educational brand, you can probably fill a niche in even very distant markets.

My own appointment as dean of the University of Oregon's Lundquist College of Business is symptomatic of the competitive response of traditional business schools. I was a corporate strategist (the chair of Landmark Technologies Corp.) and a public policy skeptic (for the governor of California) before I joined UO. In each case, my job was to implement strategies to help my boss get the most for his money at the best price. It is not coincidence that the two business schools that I have been associated with are the same region of the country (and more even than that). In any effective organization, competition forces it to cease looking inward and instead look outward—towards its customers. The corner of any B-school is business.

In my brief tenure, I have hired B-school graduates, explored new academic models, and focused on building new relationships with companies and students. It is not a coincidence that the two business schools that I have been associated with are the same region of the country (and more even than that). In any effective organization, competition forces it to cease looking inward and instead look outward—towards its customers. The corner of any B-school is business.

In any effective organization, competition forces it to cease looking inward and instead look outward—towards its customers. The corner of any B-school is business.

In any effective organization, competition forces it to cease looking inward and instead look outward—towards its customers. The corner of any B-school is business.

Excellence through Passion and High Standards

Binghamton Professor Puts Students' Brains to Work

BY KATIE ELLIS, DIRECTOR OF MEDIA RELATIONS, BINGHAMTON UNIVERSITY

A photo of Kelvin Santiago-Valles hung on the "Wall of Fame" in the Administration Building at Binghamton University, State University of New York (SUNY), all last year, though it's doubtful that he ever went by to check it out. He was too busy preparing for his classes, teaching, and meeting with students.

His presence on the wall resulted from his being selected for a SUNY Chancellor's Award for Excellence in Teaching—a well-deserved accolade, according to those who've been in his classroom.

Nominated by his students for the award, Santiago-Valles said he felt a bit awkward at the surprise, but after he got over the shock, he was flattered. "Most of the students involved were no longer taking courses from me," he said. "Their letters resonated with what I try to do, but that's the way I teach. I'm not tailoring my classes for good evaluations."

Santiago-Valles is an associate professor of sociology who came to Binghamton in 1984. He is the first in his family to attend college. "I was an active and visible advocate of students as a mentor, advisor, and speaker, supporting such student organizations as the Latin American Student Union and such academic programs as the Equal Opportunity Program.

He has published one book and numerous chapters in scholarly anthologies and articles and is a past director of the Latin American and Caribbean Area Studies program. His interests include cultural studies, colonialism, political economy, Caribbean and U.S. Latin/o studies, the African Diaspora, critical race theory, gender and sexuality, urban studies, and the sociology of education. One colleague wrote, "Not only is his own work thoroughly historical and not only does he provide professional expertise in Latin American and Caribbean histories, but such is his theoretical scope and interest that his work and his teaching are more than germane to students in other fields."

Another colleague noted that his work "revealed to me detailed, peoples, textured accounts of Puerto Rico from challenging viewpoints. Such familiarity shows Santiago-Valles as a highly original contributor. The accounts also show him a marvelous interpreter, able to tease meaning out of detail and place the detail in a large frame work. The accounts show his capacity to bring to bear on the interpretation several strands of thought in a highly interdisciplinary manner."

Santiago-Valles challenges his students to think, but he is also known for challenging his students to think for themselves. "I give them a hunch out at the beginning of each course that says students can say anything they want in class, but it has to be informed," he said. "I'm willing to challenge them in the right direction, but they have to do the work."
Students registering for courses taught by Santiago-Valles are also the recipients of what most would call demanding guidelines for written assignments. Requirements that he expects students to meet include: proper use of grammar and punctuation; precision in footnoting and endnoting and/or providing a bibliography as applicable; adequacy vis-à-vis brilliance; and coherency and consistency. He assesses penalties for sexism and ethnocentrism in word usage, and for missed deadlines.

Along with these guidelines, Santiago-Valles distributes a syllabus for each course. Excerpts from his syllabus for the course Representing 'Race' and U.S. National Identity provide a glimpse into what students can expect during the semester. "The course is intended to complicate the way we think because it complicates the way we make sense of a history, which has profoundly affected our own identities and those of other peoples. I am aware that this might be difficult for some of you, but I will do all I can to help you get a handle on the course content: during class discussion and during my office hours. PLEASE NOTE: You don't have to agree with me, nor with any of the scholars we are going to be reading and discussing...you will be expected to substantiate your opinion (a) by referring to the existing research (feel free to use reference material from outside this course) and/or (b) by coming up with original interpretations of your own."

His student nominators commended him for having high expectations of them—serving students, helping them to grow, holding them to high academic standards, and inspiring them to excel. One student wrote, "Yes, the material was complex, and yes, there was a lot of it, but it was balanced by his willingness to meet students on a one-to-one basis." Another student commented that "his classes taught me how to think critically. When you enter his classroom, you know—visual, direct experience, dialogue."

After class, Fountain said, students "literally mob him for his office hours, just to talk, debate, and discuss more." Such interaction was life-altering for Fountain. "He really helped me as an individual— to really see the ability within myself and to push myself more. It was helpful to walk out of his class believing in myself."

Though his background is middle-class, Santiago-Valles understands the struggles of the underdog and is familiar with the movements in the 1960s and '70s that forced job openings for people like him—non-White. He feels a debt to them and is paying that debt by teaching what he does, the way he does. For that reason in particular, he likes the variety of teaching at both the undergraduate and graduate levels.

"I like undergraduate teaching because it keeps me honest," he said. "It's important to work with students for the rest of my life," she wrote. "I only hope that I can pass on a fraction of what I have learned from him to those who cross my path in my own career as an educator."

Santiago-Valles himself has mixed feelings about being a mentor. "It's a joy when you see students shifting in terms of seeing the world differently," he said. "There's a major reward in seeing students go from that glazed look to running with an idea—those Eureka! moments."

But he also has concerns that his students might follow his same path, which hasn't been an easy one. "The painful moment is when you end up promoting illusions you know will be shattered. I don't think it's going to be easy to be like me, he said."

Perhaps that's because Santiago-Valles doesn't truly feel comfortable living in the United States. Unable to embrace the White culture, or to be embraced by it, he has not had department. But about a year half ago, he began working behind the scenes to try to the tensions and misunderstandings in the department. Apay full of faculty and students with conflicting opinions and interests as well as with many different personalities and backgr

"Until very recently, I had given respect and had absolute illusions about acceptance," he said. "When asked why he hadudev..."
Expanding the Pie

Minority Institutions Form New Alliance for Equity

BY
Inés Alicea

A new alliance representing the higher education needs of the largest minority groups has been created, and Latino leaders involved in the organization say that it should help improve the overall educational offerings to Latino youth and other minorities.

“It is a good idea to do this,” said Dr. Fiedad Robertson, president of Santa Monica College in California, which is an Hispanic-Serving Institution with nearly 30,000 students. “It will assure we create a united minority voice. The best thing we can do is help each other.”

“This was much needed and long overdue,” said Dr. Antonio Flores, president of the Hispanic Association of Colleges and Universities (HACU), a member of the coalition. Founded in 1986, HACU is a membership organization of more than 200 institutions—more than half which are HSIs—located in Puerto Rico, H states, and six countries. As an association representing Hispanic-Serving Institutions, HACU’s work is to promote nonprofit accredited colleges and universities where Hispanics constitute a minimum of 25 percent of the enrollment. “HACU is optimistic about the success of the coalition. We are glad to be a part of it.”

The organization, formally called the Alliance for Equity in Higher Education, will promote the interests of 75 Hispanic-Serving Institutions (HSIs), 118 Historically Black Colleges and Universities and other predominantly Black institutions, and 31 Tribal Colleges and Universities. Combined, these colleges educate 42 percent of all Hispanic students, 24 percent of African American students, and 16 percent of American Indian students. Together, they represent about 10 percent of all students enrolled in American higher education.

“Forged out of unique purposes and circumstances, the members of the Alliance for Equity in Higher Education have joined together to advance our common bonds and goals and reinforce our individual efforts,” said a statement from the Alliance. “By working together, we are uniting for America’s future and the invaluable contributions that our students and institutions can make toward that future. Together, we will work to develop a nation that is more economically competitive, socially stable, and culturally rich for all Americans.”

The Alliance is comprised of HACU, the American Indian Higher Education Consortium, and the National Association for Educational Opportunity in Higher Education. The Alliance is coordinated by the Institute for Higher Education Policy, a Washington-based nonprofit educational group. The institute will help the coalition’s logistics and make sure that the group’s work remains on track, said Flores. Each organization has assigned representatives...
conduct the coalition's work through a working group that will meet on a regular basis. The leaders of each of the individual organizations involved in the coalition also will meet regularly. The W.K. Kellogg Foundation provided start-up funding for the Alliance in the coming year.

"The emphasis of the coalition is on policy issues," said Flores. "This will ensure that [the government's], regulations and legislative initiatives do reflect the needs and best aspirations of people of color."

Flores said that the coalition came about because the coalition's members learned a lot from the reauthorization of the Higher Education Act, which was signed into law in October 1998. The reauthorization showed them that there needed to be a more united effort among the different minority groups. The coalition should have a larger impact on the next reauthorization of the law.

"Instead of coming from different directions, we are unifying our efforts and voices to make sure the so-called 'pie' is not viewed as a zero sum game but as an expanding pie," said Flores. "We want to be more proactive to get a fair share of resources."

Robertson said that each of the groups brings different strengths. For example, she said that the African-American groups already had a strong presence and many contacts in Washington while "Latino organizations were slow in coming forward and having a voice."

Flores said that the coalition's initial challenge will be to "identify a common agenda embraced by all of us with enthusiasm and commitment."

But the group has agreed that one of its first missions is to call for urgent and expanded support for the nation's "seriously underfunded" minority-serving colleges and minority students.

Robertson said the three groups that joined forces realized access to low-income and underserved populations and have higher student success rates than do mainstream colleges, despite underfunding. Alliance member colleges awarded nearly 188,000 degrees in 1996. Also, despite record enrollment increases at these institutions, Alliance member colleges receive 36 percent less revenue per student than do other U.S. colleges. By 2015, Hispanic student enrollments are expected to increase by 73 percent, and African American enrollments will increase by 20 percent while enrollments for White students will rise 5 percent.

In the year 2000, minorities will comprise 28 percent of all Americans. By 2020, people of color will reach 36 percent, and by 2050, will account for 47 percent of all Americans.

Dr. Max Castillo, president of the Hispanic-Serving Institute 8,700 students, said that biggest challenges the Alliance faces is in increasing awareness in the society and among policymakers that minority institutions have a significant role to play in providing access and opportunity for students and communities.

"This initiative will all take time and hard work, but the coalition is well-positioned to make a difference," said Castillo, president of the University of Houston-Downtown's Hispanic-Serving Institute.

"Instead of coming from different directions, we are unifying our efforts and voices to make sure the so-called "pie" is not viewed as a zero sum game but as an expanding pie," said Flores.

Robertson said that each of the groups brings different strengths. For example, she said that the African-American groups already have a strong presence and many contacts in Washington while "Latino organizations were slow in coming forward and having a voice."

Flores said that the coalition's initial challenge will be to "identify a common agenda embraced by all of us with enthusiasm and commitment."

But the group has agreed that one of its first missions is to call for urgent and expanded support for the nation's "seriously underfunded" minority-serving colleges and minority students.

Robertson said the three groups that joined forces realized access to low-income and underserved populations and have higher student success rates than do mainstream colleges, despite underfunding. Alliance member colleges awarded nearly 188,000 degrees in 1996. Also, despite record enrollment increases at these institutions, Alliance member colleges receive 36 percent less revenue per student than do other U.S. colleges. In the year 2000, minorities will comprise 28 percent of all Americans. By 2020, people of color will reach 36 percent, and by 2050, will account for 47 percent of all Americans.

Dr. Max Castillo, president of the Hispanic-Serving Institute 8,700 students, said that biggest challenges the Alliance faces is in increasing awareness in the society and among policymakers that minority institutions have a significant role to play in providing access and opportunity for students and communities.

"This initiative will take time and hard work, but the coalition is well-positioned to make a difference," said Castillo, president of the University of Houston-Downtown's Hispanic-Serving Institute.
policy goals; promote student access, success, and equal opportunity through increased student financial assistance and fair admission standards; enhance teacher preparation, faculty development, and leadership; and strengthen institutional infrastructures.

The Alliance expects to release several reports and studies and will strive to influence public policy on higher education issues that are of common interest.

Many Alliance member colleges strive to keep tuitions affordable for students even as they struggle to increase revenues from non-tuition sources. They charge an average of $3,180 in tuition, 30 percent less than the average of $4,561 at all institutions. Meanwhile, total institutional revenues from all sources at Alliance member institutions are 36 percent lower than the U.S. average—$12,700 per student at Alliance member colleges, compared to about $20,860 at all postsecondary institutions.

Moreover, endowment revenue for Alliance member colleges is quite low, averaging $68 per student, compared to $437 per student at all postsecondary institutions.

The W.K. Kellogg Foundation
provided start-up funding for the Alliance in the coming year.

"These institutions represent the vanguard of the nation's emerging majority population in the new millennium," said a statement released by the Alliance. "The colleges serve high proportions of low-income, educationally disadvantaged students and offer a pathway to educational and life success despite significant underfunding and often limited physical facilities.

A high percentage of students of color come from the lowest income groups: 41 percent of American Indian, 41 percent of Black, and 38 percent of Hispanic undergraduates come from families in the lowest income quartile, compared to 19 percent of White students.

The percentage of American Indians, African Americans, Hispanics 25 and older who have a bachelor's degree or higher is matically lower—nine percent percent, and 11 percent, respectively, than for Whites, 25 percent.

"The shared values and experiences of these colleges and universities include commitment to community ideals and civic responsibility; dedication to student access and success; emphasis on teaching and scholarly excellence; belief in the power of colleges and universities to provide personal and spiritual fulfillment; devotion to the elimination of poverty; and encouragement of cultural diversity," said a statement release the Alliance. "These shared values experiences mandate that we work together to build the strength of the institutions and our communities."
Estrada: Ethical, Energetic Entrepreneur

Georgia Tech Alum Creates Opportunities

BY ADALYN HIXSON AND VICTOR ROGERS

"I worked in many different countries—England, Holland, Brazil, Spain—and became acquainted with a lot of different ways of thinking and of going about work and all kinds of activities. That is a terrific experience."

ALFREDO ESTRADA

This month marks the second semester of the Fred and Teresa Estrada Young Professorship in the College of Engineering, Georgia Tech. The Professorship supports the development of a leading Hispanic faculty member at Georgia Tech, providing $30,000 a year for five years, encouraging innovation, education, and research.

The first to receive the scholarship is Dr. Jorge Vanegas, an associate professor in the School of Civil and Environmental Engineering. A graduate of the Universidad de los Andes, Santa Fe de Bogota, Colombia, with a bachelor's in architecture, Vanegas continued his education at Stanford, earning a master's and doctorate in civil engineering.

Alfredo Estrada, who, with his wife of 42 years, opened this opportunity for Vanegas, took a somewhat different route on his way to success as a businessman and a community leader.

HO recently talked with the gracious Mr. Estrada—chair and CEO of Pan American Enterprises, a diversified holding company with substantial interests in publishing, management consulting, banking, construction, and the environmental protection industry—about his college years, his life thereafter, and his charitable works.

First off, HO asked Estrada what circumstances took him from Cuba to Georgia Tech, from which he graduated in 1954 with a degree in mechanical engineering.

"My father was an engineer," he said. "So we were kind of inclined to go into engineering. This is when we were living in Cuba. I have two older brothers. One went to Georgia Tech before me, and everything worked fine. This was in the '40s. I graduated from high school [a Jesuit school] in 1950. When I decided to go into mechanical engineering, it was not available in Cuba at that time. The Cuban universities only had civil, architectural, and electrical engineering. So when I decided, it was almost automatic that I should go to Georgia Tech. Georgia Tech was then and still is a highly selective and prestigious engineering school—perhaps most eminent of its kind in the South," says A Comparative to American Colleges, 3rd ed. And to many students, then as an engineering curriculum received as being especially rigorous.

HO asked Estrada if he pointed early influences that were critical to his success as a businessman. "By the time I got ready to go to college, to Georgia Tech, ultimately, my father had died," he...
"He died when I was a junior in high school. And my mother had to make a tremendous effort to send me to university at Georgia Tech. With my father having died, we were reasonably well off, but not wealthy. For my mother, it was quite a sacrifice to send me from Cuba. So I felt the obligation to study very hard and to go through very fast—to spend less money, or the least amount possible."

The Shell Oil Company hired the young Estrada shortly after he graduated, assigning him to engineering and management posts at its refineries in several countries, including Cuba, over five years. Between ’59 and ’61, after the oil industry was expropriated, he was appointed director of petroleum refining for the Cuban government.

In ’61, Alfredo Estrada decided to leave Cuba for political reasons, and went to work for Marathon Oil, then Mobil Oil, then Occidental Petroleum, C.E. Lummus, and Beker International, in positions of increasing responsibility.

"I worked in many different countries and became acquainted with many cultures while in the oil industry and in the chemical industry—England, Holland, Brazil, Spain. I became acquainted with a lot of different ways of thinking and of going about work and all kinds of activities. That is a terrific experience."

But, says Estrada, it took a long time for him to become an independent businessman. "I started working in 1954. And I didn’t become an independent businessman until 1980."

He decided, he told Blue, "that what I was doing for corporations, I could do for myself. And that’s when I went into business for myself. Fortunately, I was able to succeed. I had acquired enough experience on how to do business, because in my last job I was president of the international division of a large company. I knew all the aspects of setting up and running a business, so I decided to do it for myself. I didn’t get into it right after college."

"But always when you go into business by yourself, the element of luck and timing is always very important. And don’t let anyone tell you differently! You might have the best experience, the best intentions—but if things don’t fall into place.... I was lucky. I had a very lucky career."

"That son, Alfredo J. Estrada, is presently taking a sabbatical from the magazine but will return to head up the Hispanic Publishing Group. But the magazines are only part of Estrada’s Pan American Enterprises, which frequently take him to Mexico, for his environmental business, and to Puerto Rico, to supervise his banking and construction companies. Traveling in his own corporate jet makes the commuting manageable."

And then there are his philanthropic enterprises.

Returning to Georgia Tech

"For many years after I left Georgia Tech," said Estrada, "I never even visited it again. And then at one point when I was back in the United States and things were going well, I thought, Georgia Tech helped me get to what I am now. So maybe I can do a little bit for Georgia Tech."

The same way where I went to high school in Cuba. A lot of the activities that were in Cuba are now sort of activated in Miami, in one way or another. So a Jesuit school in Havana, which has been closed down—the same organization now has a school in Miami. It’s the best school in Miami. I am very active with the board of directors of that school."

Estrada’s support for Georgia Tech included funding for a garden in memory of former Dean of Students George Griffin. And the Alfredo Estrada Academic and Service Awards for Hispanic Graduate Students. Begun in 1994, the scholarship is awarded annually to Georgia Tech students who demonstrate above-average achievements academically and show a concern for the issues and welfare of the Hispanic community by being active volunteers and/or role models. The purpose of the scholarship is to help create a camaraderie and to develop strong and productive relationships that will extend beyond the college years.

In bestowing the 1995 awards, which went to Hispanic students of civil engineering, physics, and electrical engineering, Mr. Estrada made this charge: "In accepting these awards, I ask that you are able, you pass on to others the hope and help to become the ethical leaders of tomorrow.”

Alfredo Estrada’s support for Georgia Tech is only part of his philanthropic and community endeavors. Chair and founder of the Hispanic Educational Fund, he is also on the executive committee of Corporate Supporters of SER Jobs for Progress; a managing trustee of the Democratic National Committee; and a member of the board of directors of the National Park Foundation and of the board of advisors of Helen Jesuit School of the U.S. Vice President’s Residence Foundation, and of the National Park Foundation.

"As far as philanthropy is concerned, to be very candid, for many years I was really so busy trying to get established, I didn’t even think..."
about philanthropy. But at some point in my life, maybe six or seven years ago, I felt that I was established and could afford to get into philanthropic activities.

"I began to look around and see where I can help. And I've been selective in the things that I do. I do a lot of things primarily because I think it is my obligation. And because I can afford to. I concentrate on educational activities, give scholarships and things like what I'm doing at Georgia Tech. And I have several other programs.

"I help very young children to become computer literate—first and second grade. Disadvantaged families here in Miami. It's a very interesting program, that I created and have been funding for about six years. I do things like that, I donate to the arts, too, and I participate in a number of foundations where you not only contribute but you put a lot of time into.

"I also help in the Dominican Republic and I am on the board of an organization that provides medical services and training for farmers in some of the poorest areas of that country."

HO asked Estrada how he happened to join the board of the National Park Foundation.

"I am interested in the environment. Some of my business is environmental, and through associations with different people...It's never just one thing. These things evolve. But the central idea there is that I felt that I had been very lucky in this country, and profited greatly from all the opportunity I had here, and I felt I just had to give something back."

Asked what aspect of his enterprises is most satisfying, Estrada didn't miss a beat before answering. "What brings me the most pleasure is to provide gainful employment to people. I have created a number of new enterprises in several countries. Right now my businesses are in the United States, Puerto Rico, and Mexico, and to the extent that I can, I really get a good sense of doing that."

New York, ones lives in Austin, Texas, and one lives in Colorado. Geography [makes it] a hard thing to get together with our children. But I am lucky. Because of my businesses, I am free to travel. I can spend a lot of time with my family.

"We were very fortunate that we were able to leave the country and come to the United States. A lot of us have been able to make a new life here, which in many ways has been very, very rewarding. We were very, very lucky, and I am absolutely happy that we are in this country and that I have grown my family in this country. We are fortunate. We are fortunate."

The Most Important Part

"I love my family, my wife, my children, my grandchildren. We have been married 42 years and been through a lot together. We went through the experience of early exile, which was very, very tough, you know. And well, I guess that is the most important part of my life.

"I have a close family and a loving wife and loving children. And they have always supported me. When I was going all over the world, and moving from one job to another, she was always right behind me and helped me, taking care of the children and all that. One hell of a good partnership."

The Estrada Professorship

"I became very enthusiastic about the program and decided to fund it," said Estrada. "Because it supports not only the university and the development of a deserving young professor, but also the many students who someone like Dr. Vanegas will be able to advise and guide with his bilingual and bicultural abilities."

And Vanegas' abilities are well documented. His honors and awards include: Visiting Eminent Scholar, Universidad Autonoma de Yucatan, Merida, Mexico, 1997; Construction Industry Outstanding Instructor Award, 1995; Visiting Eminent Scholar, The Del E. Web School of Construction, Arizona State University, 1995; National Science Foundation National Young Investigator Award, 1992; and the GE Foundation Junior Faculty Fellowship, Faculty for the Program 1992-93. SHPE, the of Hispanic Professional En Purdue Chapter, recognize two years running for "E. Contribution as a Faculty"

"I firmly believe that ability follows recognition. Professor Vanegas on his comment as Fred and Teresa. Professor. Consequently respond to the generosity of Alfredo Estrada, to the spirit and upon which the professor is established, and to the faith that Georgia Tech me. This appointment has in new level of energy and pass me," said Vanegas.

If Jorge Vanegas can career replicate the energy and passion of Alfredo Estrada, surely become one of the leaders of his generation.
PEOPLE

Reyes Receives HACU Award

Frank G. Reyes, governmental affairs assistant to Chancellor Stuart M. Bundy, San Bernardino Community College District in California, was honored by HACU for his work with the chancellor to help influence the release of federal money for major district construction projects. HACU president Antonio Flores presented Reyes with an Educational Leadership Award named for P. Gus Cardenas, HACU's chief operating officer. Reyes serves on HACU's government affairs committee.

New Provost at George Mason University

Peter N. Stearns, former dean of the College of Humanities and Social Sciences at Carnegie-Mellon, is the new provost at George Mason University (Va.).

The chief academic officer belongs to many professional organizations, including the American Historical Association, the Society of French Historical Studies, the Social Science History Association, and the International Society for Research on Emotion. Books by Stearns include The Battleground of Desire: The Struggle for Self-Control in Modern America; Fat History: Bodies and Beauty in Western Society; The Other Side of Western Civilization; and World History: Patterns of Change and Continuity.

Stearns earned his undergraduate and graduate degrees and doctorate at Harvard University.

Vega Performs at Bronx Community College

Latin jazz musician Ray Vega and his quintet performed at Bronx Community College in New York.

Growing up in the South Bronx, Vega studied the trumpet in junior high school and graduated from the High School of Music and Art.

Vega has played with Ray Barretto's New World Spirit Band and with the orchestras of Tito Puente and Mongo Santamaria. Many of his arrangements have been recorded. Last year his own group performed at the Museum of Modern Art and in concert halls around the country. His recording, Boperation, was released last summer.

Brazilian Activist Lectures at Stetson

STETSON. Brazilians official Jesus Mario de Almeida Lima, during a lecture at Stetson University (Fla.), described his government's efforts to "democratize democracy" by including the city's poor and working population in decisions about municipal administration. Stetson's Latin American Studies Program presented the lecture.

A founding member of the Workers' Party in the Brazilian state of Minas Gerais, Lima was vice mayor during the first Workers' Party administration in Betim, 1992-1996, and elected mayor in 1996. Since 1992, Betim has built and maintained a new hospital offering free medical care, constructed a decentralized system of public health centers and emergency care facilities, upgraded the public transportation system, and improved city services such as electricity, underground utilities, trash collection, and roads.

Gracia Lectures at Austin College

Hispanic philosopher and author Dr. Jorge J.E. Gracia gave a lecture, "Hispanic/Latino Identity: Foreigners in Our Own Land," at Austin College (Texas).

Gracia, Samuel P. Capen chair and distinguished professor of philosophy at State University of New York-Buffalo, drew upon his book, Hispanic/Latino Identity: A Philosophical Perspective, which discusses topics such as the nature of ethnicity, the origin of the Hispanic/Latino identity, the role of mestizaje in Hispanic/Latino identity, the history of discussion of Latin American identity, and the status of Hispanics/Latinos in American philosophy today. The book is interdisciplinary, drawing on recent research in anthropology, sociology, history, philosophy, literature, and Latino studies.

(See Eduardo Mendieta's review of Hispanic/Latino Identity in the December 3, 1999, issue of The Hispanic Outlook, page 41.)

Jimenez Conducts Concert at Western Connecticut

The music department at Western Connecticut State University and the Danbury Council of Veterans presented the Western Symphonic Band in a concert, "A Salute to Our Veterans' Heritage of Freedom."

Conducted by Dr. Luis Fernando Jimenez, director of Western's music department's bands and orchestra, the program represented an eclectic collection of American music and pageantry. The Danbury High School ROTC was present with its honor guard.

Martinez Speaks at Technical Assistance Conference

Consuelo G. Martinez, Texas A&M University-Kingsville special programs director, discussed its College Exploration Program (CEP) at the conference "Creating Partnerships with Hispanic Serving Institutions to Build America's 21st Century Workforce," in Santa Monica, Calif.

Organized by the U.S. Department of Labor Employment and Training Administration and the Hispanic Association of Colleges and Universities (HACU), the conference provided
a forum for information sharing and discussion on workforce development activities at the national, state, and local levels.

The CEP offers graduating high school seniors from area school districts the opportunity to enroll in college courses and work on campus at Texas A&M-Kingsville.

Garcia and Sanchez Receive UNM Zia Awards

Nasario Garcia (l.) and Michael Sanchez (r.) were among those receiving Zia Awards.

given to celebrate the accomplishments of University of New Mexico (UNM) alumni.

Garcia is a professor of Spanish at New Mexico Highlands University. He has published more than 50 works, including 10 books, and writes mostly about brujas, bufones, and y bracas. He holds a bachelor’s degree and master’s from UNM, and a doctorate from the University of Pittsburgh.

Sanchez, elected to the New Mexico State Senate in 1997, is a member of the conservation, judiciary, and water and natural resources committees, and interim member of the criminal justice committee. He helped establish the Legislative Success Scholarships. Sanchez earned a bachelor’s degree and a Juris Doctor from UNM.

Other awardees included Margaret Duke, Debbie Johnson, Myrna Smer, and Thomas Steele.

Argentine Studies Center at UT-Austin

Jorge Rodriguez, minister of the cabinet and former minister of education of the Argentine Republic, and Larry R. Faulkner, president of the University of Texas (UT)-Austin, hosted a reception to announce the formation of a new Center for Argentine Studies at UT-Austin.

The center will have four main goals: to facilitate exchange of faculty and students between Argentina and UT-Austin; to provide mechanisms to improve research on Argentina; to enhance Argentina’s visibility in the United States; and to strengthen the binational community that exists between both countries.

The center will join three other semi-autonomous centers already in the Institute of Latin American Studies at UT-Austin—the Mexican Center, the Brazil Center, and the Center for Environmental Resource Management in Latin America.

Cantú Named Distinguished Law Graduate

St. Mary’s University School of Law (Texas) Professor Charles Cantú, the most senior Hispanic faculty member of any law school in the U.S., was named the 1999 Distinguished Law Graduate for his outstanding contributions to the legal profession over four decades.

Cantú, who was chosen by the Law Alumni Association for the honor, received his Juris Doctor from St. Mary’s in 1964 and has taught there since 1966. In 1994, he became the younger law professor in the nation. After a Fulbright Fellowship to Bolivia.

Cantú was also named the South Texas Professor of Law, a new post endowed through a recent anonymous $1.7 million gift to the law school.

Rivera Presents at National Research Council Forum

Charlene Rivera, director of George Washington University’s Center for Equity and Excellence in Education, in D.C., was one of more than 20 researchers and policymakers presenting information at a National Research Council forum on how to include limited-English-proficient (LEP) students in standards-based reform efforts particularly testing.

Title I of the Elementary and Secondary Education Act specifically requires “the inclusion of LEP students, who shall be assessed to the extent practicable, in the language and for most likely to yield accurate and reliable information on what such students know and can do.”

Many of the states’ written LEPs are so vague that they leave import unresolved, says Rivera.

White in First Fulbright Administrative Exchange

Peter White, vice president of student at Grossmont College (Calif.), participate first Fulbright Administrative Exchange between the United States and Mexico, a venture designed to foster international understanding and cooperation and ongoing ties between colleges and educators.

White spent six weeks “job shadow” his counterpart, Higinio Ordonez, a student at Escuela Normal de Ayalcomulco, Mexico City. This spring, Ordonez, a student at Grossmont College, spent six weeks at Grossmont College.

White, fluent in Spanish, has studied in Spain, Peru, and Ecuador.

Salvadoran Labor Organizer Speaks at Siena

Irina Orellana, a maquiladora organizer of the Melida Araya Montes Movement in El Salvador, spoke at Siena College in New York. Orellana is a program coordinator with the Women’s Garment Worker Project, which educates women workers about their rights as workers at maquilas/maquiladoras.

Movimiento de Melida

Hansul, a woman from El Salvador, served as her translator.

Gutierrez and Jesurun Visit Cal State-L.A.

California State University—Los Angeles invited two MacArthur Fellows to speak on campus during the Third Annual Latino/Latina MacArthur Fellows Reunion.

The Department of Chicano Studies hosted Ramon A. Gutierrez who...
spoke to students, staff, and faculty on Mexican and Chicano cultural history in the context of present-day race relations in the U.S. Gutiérrez is an award-winning author, a cultural historian, the founder and director of the Center for the Study of Race and Ethnicity, and associate chancellor at the University of California-San Diego.

The Department of Theatre Arts and Dance hosted John Jesurun (pictured), who spoke to beginning acting students. Jesurun is a theater director, writer, and designer who combines elements of film, literature, and television into unique performance pieces filled with imagination, humor, and aesthetic challenges.

**Ramirez New Principal at St. Martin Hall**

Robert Guerra Ramirez is the new principal of St. Martin Hall in Texas, a pre-K through eighth grade school located across the street from Our Lady of the Lake University (OLLU), and a demonstration facility for OLLU education majors who gain experience working with the school's students and faculty.

Guerra Ramirez, employed by the Alamo Heights Independent School District for 22 years, holds a bachelor's degree from Trinity University and a master's from Texas A&M University.

St. Martin Hall is accredited by the Texas Education Agency since 1965, the Texas Catholic Conference Education Department, and the Southern Association of Colleges and Schools.

**New Student Center at Essex County**

Essex County College's new Clara E. Dasher Student Center—designed by the Newark, N.J., architectural firm Grad Associates—reflects a growing optimism in the future of Newark, said Grad president B. Allen Trousdale.

The 20,000-square-foot building takes its inspiration from a 19th-century meeting house or “revival” tent, with its octagonal shape and exposed outer beams. Featuring a curved glass wall offering views of the landscaped inner courtyard, and glass stairwells that let passers-by glimpse the activity within, it replaces the previous student center—a “megasstructure” that had a “fortress” quality with few windows.

**Vigleias Serving California Community Colleges**

Dr. Kenneth Vigleias, Golden West College (Calif.) president, has been serving a three-year term as vice president of the South on the board of directors of the California Community College Chief Executive Officers.

The executive committee of that body consists of the president, immediate past president, vice president of the North, and vice president of the South. The board—which members are elected by their presidential peers in the nine regions of the California system—advises State Community College Chancellor Thomas Nussbaum on the views of the 107 California community colleges and their presidents.

President/CEO of Golden West since 1996, Vigleias is a member of the Policy Council of the Commission of Athletics of the California Community Colleges.

**Negrete Presents Results of Floristic Survey**

Texas A&M University-Kingsville biology graduate student Irma Negrete presented a paper at the Native Plant Society of Texas' annual meeting on her survey of the university's biology department field station (Site 55).

Dr. Alice Hempel, assistant biology professor, said that the previous plant list for Site 55 contained only 76 species and that Negrete thus far has documented 136.

**Fuentes Publishes in Spain**

Two books on Spanish literature were published in Spain by Victor Fuentes, chair of the Spanish and Portuguese department at the University of California-Santa Barbara (UCSB).

*La Regenta*, a critical look at the 19th-century Spanish novel of the same title by Leopoldo Alas “Clarín,” was published in August, followed in November by *Poesía Bohemia Española: Antología de Temas y Figuras* (Spanish Bohemian Poetry: An Anthology of Themes and Figures). The poems by bohemian writers included in the anthology were written in the mid- to late-1900s through the 1930s.

Fuentes, a UCSB faculty member since 1965, specializes in 19th- and 20th-century Spanish literature and film and contemporary Latin American drama and poetry.

**Moreno Attends Speech-Language-Hearing Conference**

Juliet Marie Moreno, a senior communication disorders student at New Mexico State University (NMSU), attended the American Speech-Language-Hearing Association's national conference in California, as a 1999 Minority Student Leadership Program fellow.
Moreno participated in leadership-focused educational programs and activities, interacting with professionals in audiology, speech-language pathology, and speech-language, and hearing sciences.

Moreno is pursuing a bachelor’s degree through NMSU’s College of Education. She is NMSU Crimson Scholar and a member of the Golden Key National Honor Society and the NMSU chapter of the National Student Speech-Language-Hearing Association.

PLACES

Latina Health Study Published

The first national study of pregnancy-related deaths in Hispanic women in the United States by the Centers for Disease Control and Prevention found that pregnancy-related deaths occur more frequently in Hispanic women than in non-Hispanic White women.

The November 1999 issue of Obstetrics and Gynecology released the study “Pregnancy-Related Mortality in Hispanic Women in the United States,” based on a review of all reported pregnancy-related deaths occurring between 1979 and 1992 in states reporting Hispanic origin for each year of the study.

Because Hispanic women have a higher risk of death associated with pregnancy, more research and surveillance are needed to determine the medical and non-medical factors that contribute to the problem, according to the study’s authors.

international Business Conference at Lewis University

Attorneys, bankers, directors, and executives from Brazilian, Mexican, and U.S. agencies and corporations were featured in a conference, “International Opportunities: Practical Aspects to Doing Business in Mexico and Brazil,” at Lewis University (Ill.). The conference addressed management and financial strategies, markets, barriers to doing business internationally, and creative solutions to these issues.

Lewis University president Brother James Gaffney (pictured with Brother Lucio Tasser, FSC, president of Universidad La Salle Mexico), presented during opening remarks at the conference.

Juan Randazzo, director of international business for Jordan Industries, took part in a panel discussion, “Breaking into the Mexican Market.”

NJPAc Hosts Interpreter of Flamenco

The musical ensemble Paco de Lucia and Septet performed at the New Jersey Performing Arts Center (NJPAc) as part of “World Festival III: Vision of New World-Spanish Routes and Rhythms.”

Paco de Lucia is known worldwide for his interpretation of flamenco, the rhythmic improvisational style of Spanish playing. The Flamenco guitarist has been both hailed and criticized for his forays into other styles. “The training ground for a Flamenco guitarist is the music around you,” said de Lucia. “It’s the music made by the people you see, the people you make music with. You learn it from your family, from your friends, in la juerga (the party).”

At NJPAc, de Lucia’s ensemble included Ramon de Algeciras, Duquende, Jose Banderas, Jorge Pardo, Ruben Dantes, Carlos Benavent, and Joaquin Grilo.

Garden City Holds Hispanic Student Day

Garden City Community College (GCC) in Kansas held its 12th annual Hispanic Student Day, an opportunity for high school students to learn about support services at GCC, programs at Kansas State University and Fort Hays State University; empowerment; bilingual advancement; and possible civilian and military careers.

Eduardo Garza (pictured), Midwest business coordinator for the U.S. Hispanic Leadership Institute, was the main presenter. Garza is an advocate of Latino community empowerment and is credited with pioneering the Hispanic Leadership Opportunity Program, a high school level, student-run effort to develop leadership skills and increase community involvement.

St. Thomas Given HACU Award

Monseignor Franklyn M. Casas, president of St. Thomas University (Fla.), was presented with the 1999 Outstanding Member Institution Award, given by the Texas-based Hispanic Association of Colleges and Universities (HACU) at its 15th Annual Conference in November.

“I feel honored to receive this very prestigious award for St. Thomas University,” said Casas. “This first-time award recognizes efforts to ensure a university education for the Hispanic American community.”

Virginia Commonwealth Hosts Latino Leadership Conference

Virginia Commonwealth University (VCU) preparing the Latino community and its future leaders for what is being called “The Hispanic Century” by the U.S. Hispanic Chamber of Commerce, hosted its third annual Latino Leadership Conference. Renowned public school teacher Jaime Escalante delivered the keynote address.

Dr. Consuelo Navarro (pictured), assistant professor in VCU’s department of foreign languages, and Dr. Harrel Greer, VCU’s associate professor of Latin American history, led a panel discussion, “History, Identity, and Education: The Making of Today’s Latinos.”

The panel discussion “The Political Agenda: A Look at Public Policy Issues and Latino Participation” was led by Teresa Martinez and Juan Herrera, among others.

**Washington State Program Recruits Minority Teachers**

Future Teachers of Color (FTOC), an outreach program sponsored by the Washington State University (WSU) College of Education, hosted a recruitment reception in Seattle for students of color interested in becoming teachers or attending WSU.

Ken Alibadi, a Seattle businessman and philanthropist who has supported FTOC since its inception, provided the keynote address.

Workshops were held for minority educators who are interested in graduate degrees in education. Known as Future Leaders of Color, this separate program is designed to facilitate graduate studies for teachers and administrators of color.

**Cal State-Dominguez Hills and El Camino Receive Funds for Teacher Prep**

California State University-Dominguez Hills (CSUDH) and El Camino College (ECC) received a five-year $3.15 million federal grant designed to bolster their teacher education programs.

The “cooperative arrangement” between the two-year college and the four-year university will focus their efforts on recruiting, transferring, and educating students to become teachers, from the day they enroll at ECC to the day they graduate from CSUDH.

A considerable percentage of the ECC and CSUDH students are Hispanic, and the grant aims to repair what the application called “the leaking pipeline of Hispanics as teachers.”

**$250K to Claremont for Scholarships**

Claremont Graduate University (CGU) in California received a five-year grant of $250,000, to be paid over a five-year period, from The Rose Hills Foundation in support of a merit scholarship fund. The fund serves to recognize and support academically gifted individuals from the San Gabriel Valley who wish to attend a master’s degree program at CGU.

The university will award two full scholarships annually, granting one year of tuition remission to qualified students, said Steadman Upham, CGU president.

The Rose Hills Foundation supports qualified tax-exempt charitable organizations for the benefit of the people in Southern California, with an emphasis on the greater San Gabriel Valley.

**$1.2 Million to Texas Wesleyan for Bilingual/ESL**

Texas Wesleyan University’s bilingual program received a $1.2 million grant from the Office of Bilingual Education and Minority Affairs of the U.S. DOE. The five-year grant will provide about $280,000 in scholarships and $80,000 for technology and program support. Annually, Scholarships are available for undergraduate and graduate students and for teachers currently working in the field who seek bilingual/ESL certification.

“This program will help students fund their education as well as give support to local school districts, which will benefit from hiring highly trained graduates,” said Carlos Martinez, assistant professor and director of Wesleyan’s bilingual/ESL program.

**Yale and Latino Research Center Sponsor AIDS Symposium**

The National Latino Research Center (Conn.) and the Yale University School of Medicine (Conn.) are sponsoring a free but competitive seminar series for Hispanic researchers addressing drug use and HIV/AIDS within the Hispanic population.

The teleconferenced symposium, linking the San Diego and New Haven communities, began Nov. 19. The series has provided a unique opportunity for national scholars to discuss health and drug use and HIV/AIDS within the Hispanic population.

Hispanics account for 38 percent of the AIDS cases reported to the Centers for Disease Control as of June 1990. Of male Hispanics with AIDS, 42 percent are categorized as injecting drug users. Drug use is one of the primary means of spreading HIV among Latinos.

**Latin American Economies Conference at Princeton**

Participants in the symposium, which was organized by the Program in Latin American Studies, explored the current transformations of Latin American economies and the microfoundations of growth. The event focused on the supply-side changes within market factors and changes in the microeconomic policy climate, capital markets, and technology. Specific topics included private savings and inequality, capital markets and banking, technology and manufacturing, and fiscal and regulatory policy.

Pictured left to right: Pedro-Pablo Kuczynski, president and CEO of the Latin America Enterprise Fund, L.P.; Armindo Fraga, governor of the Central Bank of Brazil; and Guillermo Calvo, distinguished university professor and director of the Center for International Economics, University of Maryland-Collage Park.

**San Mateo Reaches out to Latino Parents**

Individuals from educational institutions throughout San Mateo County, Calif., attempted to demystify higher education for Latino parents who, because of language and cultural obstacles, are generally unfamiliar with and often feel closed off from the system.

The conference “Educación Sin Barreras” held at the College of San Mateo, featured a keynote address by Cañada College interim president Rosa Pérez (center). Three loosely structured “conversations”—Understanding Your Teenager.
Realities of Life After High School, and Understanding the System of Higher Education—offered parents the opportunity to ask questions.

"Parental buy-in to pursuing a college education is critical to the success of Latino students," said organizer Martha Gutierrez, counselor and instructor at the College of San Mateo.

**Cleveland State Holds Hispanic Awareness Week**

Cleveland State University (CSU) in Ohio recognized and honored Hispanics during its Hispanic Awareness Week.

Cuban artist Augusto C. Bordelois (pictured) exhibited his works and lectured on the socio-political-cultural environment for Cuban artists.

As part of "La Promesa de las Culturas Latinas en el Siglo 21," sponsored by the CSU Office of Minority Affairs and Community Relations (OMACR), a Latino Awards Luncheon was held. Attendees included Maritza Perez, multicultural programming coordinator, OMACR; students Michelle Gray, Vanita Thompson, and Marlayna Jacinto, all of whom have participated in study abroad programs in Spain and Mexico; and Donna Whyte, assistant vice president, OMACR.

**Play of Argentinean Struggle Opens in NYC**

The full-length play *I Hear (Oigo)*, written by Adina L. Ruskin and produced by Asa Productions, will begin a six-week run at the John Houseman Studio (N.Y.) in February.

*I Hear (Oigo)* is the story of a deaf songwriter, Isabella, in Argentina in the 1970s. She is shot for writing a song about freedom of expression. Her spirit returns to introduce five characters—a Jewish journalist, a Catholic teacher, and some Mothers and Grandmothers of the Plaza de Mayo—through whom we learn the very human stories of the Argentinean people struggling to survive the repression.

The play is performed in American Sign Language and English, and through singer/songwriter Gerard Edery (pictured at l. with Jackie Roth), we hear the passionate music that emanates from Isabella's soul.

For ticket reservations, call (212) 721-7886.

**APA Offers Summer Fellowships for Minorities**

The American Psychological Association (APA) Minority Fellowship Program (MFP) will be conducting two summer programs to support the training of researchers and practitioners.

**Summer Program in Neuroscience, Survival, and Ethics (SPINES)—**funded by the National Institute of Mental Health—is a month-long program, from June to July, at the Marine Biological Laboratory in Woods Hole, Mass. SPINES is designed to broaden knowledge of neuroscience, scientific ethical issues, and scientific survival skills. Those selected for a Neuroscience Fellowship are required to attend SPINES. Deadline: March 1.

Summer Institute on Aging—funded by the National Institute on Aging—is a one-week institute/research in July designed to introduce undergraduate juniors and seniors and first- and second-year graduate students to aging research in the field of psychology. Deadline: March 15.

Guardians of the Other Am:
**Essays on the Military Force in Latin America**

by Russell W. Ramsey

These essays were written and/or edited throughout 35 years of scholarly research and teaching contact with the military forces of Latin America. Ramsey contends that the region's armed forces have been an escort to modernity within freedom that is different from that of North America, yet equally valid in broad Judeo-Christian context.

Cocaine Quagmire: Implement the U.S. Anti-Drug Policy in North Andes-Colombia

by Sewall H. Menzel

This study of the U.S. anti-drug policy in Colombia suggests that the drug war continues to be lost, not because of the amount of effort expended but because of an improper focus on the center of gravity of trafficking supply and demand relations.

called his goal a "confluence" of literature and journalism.

The Fencing Master
by Arturo Pérez-Reverte

Set in Madrid in the torrid fall of 1868, this is the story of fencing master
Don Jaime and his encounter with a beautiful and mysterious woman
who draws him into a plot that includes seduction, politics, secret documents, and murder.
Translated from Spanish by Margaret Jull Costa.

An Affair of State: The Investigation, Impeachment, and Trial of President Clinton
by Richard A. Posner

President Clinton’s year of crisis, which began when his affair with
Monica Lewinsky hit the front pages in January 1998, engendered a host of
important questions of criminal and constitutional law, public and pri-
moral morality, and political and cultural conflict. This book attempts to present a balanced and scholarly understanding of the crisis with the freshness and immediacy of journalism.

The United States and Latin America: The New Agenda
Victor Bulmer-Thomas and James Dunkerley, eds.

The end of the Cold War removed hemispheric security from the top of the agenda of U.S.-Latin American relations.

Democracy, trade and investment, drugs, and migration rose in importance. Pressures to eliminate the anachronistic U.S. embargo on Cuba increased. The new agenda also includes Latin America’s growing ties to the countries of the European Union and other regions. This book contains 15 essays by dis-
tinguished scholars on each of these issues.

paper. Harvard University Press. (800) 448-2242.

Sor Juana's Second Dream
by Alicia Gaspar de Alba

This novel unravels the mystery and complexity of the woman whom Carlos Fuentes calls "the first great Latin American poet." Sor Juana Inés de la Cruz (1648-1695), poet, playwright, rhetorician, and musician, is often equated with Sappho, the lesbian poet whom Plato baptized the "Tenth Muse." The Mexican nun has fascinated readers around the world for centuries.

1999, 480 pgs. ISBN 0-8263-2091-0. $24.95
cloth. University of New Mexico Press. (800) 248-7737.

Eating Landscape: Aztec and European Occupation of Tlaxcalan
by Philip P. Arnold

In 16th-century Mexico, Aztec and Spanish conceptions of land formed the bases of their cultural identities and established the traumatic character of cultural contact. This new study on the subject explores how rituals enabled the Aztecs to meaningfully occupy the material world in such a way as to critically reflect on European and European American understandings of land.

1999, 307 pgs. ISBN 0-87049-518-0. $45.00

Latin American Classical Composers: A Biographical Dictionary
Miguel Ficher, Martha Furrman Schleife and John M. Furrman, eds.

This book contains biographical data on hundreds of composers from Latin America: dates of birth and death, information on their background and training, a selective listing of their works, and sources for further study.

1996, 410 pgs. ISBN 0-8103-3185-6. $56.00

**CONFERENCES**

**AAHE 8th Conference on Faculty Roles & Rewards**

February 3-6

This year's theme: "Scholarship Reconsidered: Update and New Directions," emphasizing the scholarship of teaching and learning, of engagement, of integration and synthesis, and of discovery, plus academic careers for a new century. At the Hyatt Regency Hotel, New Orleans.

Contact: (202) 293-6440; Web site: www.nawe.org

**NAFEO 25th National Conference**

February 13-17

Contact: (301) 650-2440; Web site: www.nafeo.org

**NAHE 2000/Millennium Conference**

February 15-19

The National Association for Bilingual Education's five-day event includes keynote speakers and more than 200 workshops, symposia, papers, and demonstrations focusing on the education of language-minority children and the development of multilingualism and cultural understanding. In San Antonio, Texas.

Contact: NABE, (202) 698-1829; Web site: www.nabe.org

**NAHLS National Conference**

February 21-26

The National Association of Hispanic and Latino Studies’ national conference will take place this year in Houston, Texas.

For additional information: Dr. Lemuel Berry, Jr., Executive Director, NAHLS, Morehead State University, (606) 783-2650

**1999 NAAW Conference**

February 24-27

The National Association of Women in Higher Education presents its annual conference on Advancing Women in Higher Education. Featured speakers will be Judith Gurnick, director of ACE's Office of Women in Higher Education, and Sheila Kaplan, president of Metropolitan State College of Denver, in Denver, Colorado.

Contact: NAAW, (202) 659-9350; e-mail: info@naww.org; Web site: www.naww.org

**ACE 82nd Annual Meeting**

March 18-21

Contact: ACE, (202) 939-9410; Web site: www.acenet.edu

**NAHIP Convention 2000**

March 29-April 1

The National Association of Hispanic Publications presents "the Hispanic prize event of the new millennium." At the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tobar, Execut Director/CEO, (202) 662-7250

**AAHE 2000 National Conference**

March 29-April 2

The American Association for Higher Education's 2000 national conference has as its theme "To Form a More Perfect Union: Diversity and Learning." In Anaheim, Calif.

Contact: Kerry Newberry, conferences manager, (202) 293-6440; Web site: www.aahe.org

**NCA-CHE 105th Annual Meeting**

April 1-4

The North Central Association of Colleges and Schools Commission on Institutions Higher Education presents "The Quest: Quality, Mission, the Commission, and a New Century." In Chicago, at the Hyatt Regency Chicago.

**AACC 80th Annual Convention**

April 8-11

The American Association of Community Colleges presents its annual convention, this year on the theme "A World of Possibilities," an academic marketplace at the Hilton Washington in Washington, D.C.

UNIVERSITY OF NEW HAMPSHIRE

Dean
College of Life Sciences and Agriculture

The University of New Hampshire invites nominations and letters of application for the position of Dean of the College of Life Sciences and Agriculture. The College consists of eight academic units: the Thompson School of Applied Science, Animal and Nutritional Sciences, Biochemistry and Molecular Biology, Microbiology; Natural Resources, Plant Biology, Resource Economics and Development, and Zoology, enrolls 1,800 undergraduate majors, 400 graduate students, and 129 M.S. and 84 Ph.D. students. Reporting to the Provent, the Dean is responsible for the administration of the College’s academic programs in biological sciences, natural resources, plant biology, soil science, wildlife management, and animal sciences. The College, in collaboration with the Human Development and Community Studies College, offers interdisciplinary programs and applies research in its areas of expertise.

QUALIFICATIONS: Earned doctorate; record of teaching and scholarship appropriate to an appointment as a tenured professor in one of the College’s departments; leadership skills to work effectively with faculty, students, administration and diverse constituencies outside of the University. The successful candidate will have shown evidence of administrative experience including personnel and program management, evaluation and development, budget development and management, significant record of accomplishment in teaching and research.

APPLICATIONS: Nominations and letters of application should include the name, address, telephone, and email address of five references and should be submitted to:
COLSA Dean Search Committee
Office of the Provost and VP for Academic Affairs
Thompson Hall 207
University of New Hampshire
Durham, NH 03824

The Committee will begin review of applications immediately and continue until the position is filled. Date of appointment will be no later than July 1, 2000.

UNH is strongly committed to achieving excellence through diversity. The University actively encourages applications and nominations of women, persons of color, people with disabilities, and members of other underrepresented groups.

SUMMER 2000

Colégio Mayor Nebrija

MADRID - SPAIN

Scholarship Program for Teachers, Counselors & School Administrators

Three weeks of intensive Spanish language study from July 27 to August 17, 2000.
Includes: round trip airfare, three meals a day, room accommodations and instruction at Colégio Mayor Nebrija of Universidad Complutense. From: $1,995

For information. Write or Fax your request to:
Center for International Studies
42-32 De Bruin Drive

Fax: (201) 368-0433

BLACKHAWK TECHNICAL COLLEGE

Vice President of Learning - Blackhawk Technical College is located in the heart of the Milwaukee - Chicago - Madison triangle of South Central Wisconsin. In addition to a central campus located between Beloit and Janesville, there are four satellite centers. Blackhawk Technical College is one of twenty 2-year colleges in the Wisconsin Technical College System.

The Vice President of Learning will provide leadership and direction for the Learning Team of six divisional deans and a staff of 100 full-time & 400 part-time instructors. This position is responsible for the learning process in the areas of curriculum, teaching and learning, student development, academic services, and support of the technical education programs.

QUALIFICATIONS: Candidate will have a master's degree (doctorate preferred), 1-3 years teaching experience in post-secondary level, 1-2 years of full-time teaching experience, 1-2 years of educational administration experience outside the field of education. 3-5 years of educational administration experience is preferred.

APPLICATION PROCESS: To request an application packet, contact:
Human Resources Department
Blackhawk Technical College
6004 Prairie Road R.O. Box 5009
Janesville, WI 53547-5009
(608) 757-7775
E-mail: dreve@blackhawk.terc.wi.us
Or visit us on the World Wide Web at http://www.blackhawk.terc.wi.us

Review of applications will begin on February 28, 2000. Applications will be accepted until position is filled. The anticipated starting date is June 1, 2000.

Equal Opportunity/Affirmative Action Employer
Book Review

by Javier A. Martínez, Ph.D.

The Fence and the River examines representation of the U.S.-Mexico border in literature, art, and mass media. The author points out that "an abstract, metaphorical 'border' has gained widespread currency in academic writing, particularly in cultural studies, but this usage is rarely tied to the U.S.-Mexico border region." Fox makes the case that the border needs to be understood as a "polylemical location" or as "a place where urban and rural, national and international spaces simultaneously coexist, often in complex and contradictory ways.

Moving from this premise, the author examines a variety of artistic representations about the border and its ever-changing nature.

Chapter One, "Cultural Exemptions: Cultural Solutions," explores the impact of NAFTA and GATT on artistic importation and exportation. More specifically, Fox discusses the reactions of some Mexican intellectuals to Free Trade and the consequences, both positive and negative. For Mexico, historical reactions to NAFTA are brought up to date in Fox's readings of the photographic art of Karl Beveridge and Carole Conde. Fox's interpretation of the artists' work helps illuminate some of the anxieties that surround Free Trade, including exploitation of workers, especially women.

These same types of concerns abound in the various multimedia artistic productions that Fox examines in Chapter Two, "Establishing Shots of the Border: The Fence and the River." The author's reading of multimedia artist Terry Allen's work echoes some of the internalized stereotypes that many artists bring to their conception of the Border. Allen's work, while intriguing, is marred by recurring stereotypes and an underlying implication that the Border is a type of no-man's-land, a place from which to escape civilization. Fox is quick to point out this flaw but is just as quick to make that concept a means of investigation into how artists who genuinely care about the Border and its people fall into colonialist traps of representation.

Chapter Three, "U.S.-Mexico Border Conflict in U.S. Popular Culture," is perhaps the book's most fascinating chapter. Fox argues that images and photographs from the Mexican Revolution 1910-20 coincided with the rise of mass media in the U.S. and, as a consequence, images of that war have forever entered and to some extent marred the North's perception of the country to the south. Fox claims that "developments on the border are perceived to be symptomatic of the overall status of the U.S.-Mexico relations." Fox examines the rise of the picture postcard industry and its portrayal of "dead or stained Mexicans, burnings, lynchings, and executions. Often these were editorialized with captions featuring racist epithets." From these images, she argues, the construction of Mexico was born and exists to this day in popular culture. A current example that Fox examines for its subtle racism are mislaid of Mexican history is the television series Young Indiana Jones.

In Chapter Four, "Narratives of Cross-Border Migration during Revolution's Development Stage," Fox turns her attention to Mexican novel and cinema and its representation of border cross. The book is the classic Murieron a mitad del río (1948) by Luis S. Fox's reading helps uncover the underlying machismo of the novel that promotes an idealized Mexican nation even as it documents lence against women and, ultimately, their dismissal. The Border, in the novel, works as a barrier preventing Mexican men from achieving desires. Similar themes are uncovered in Fox's reading of the film, Espaldas Mojadas, in which "betrayal and redemption by [the primary driving force of the film]." In these narratives, we see function as a catalyst to action or as an anathema to it. N if it seems, are they ever fully realized. This interpretation nothing new, but it does cast light on how the Border been constructed as an essentially male space.

In the fifth and final chapter, "Mass Media, Specificity, and Representations of the U.S.-Mex Border," Fox turns her attention to Border constructed of today. She offers a refreshing approach by focusing Terri Windling's Bordertown, a fantasy lands shared by many fantasy genre writers, Bordertown as a role reversal that nevertheless has very real assoc tions with the export-crossing zone of the U.S. Me Border. Fox also focuses on the performance art of the most singular and fascinating Chicano artist, Guillermo Gómez-Peña. Fox helps suture Gómez-Peña's work in a postnational world dominated by technology. Her rea serves as both an introduction for those unfamiliar with the artist as an elaboration for those already familiar with his work.

Fox's book would be of use in a graduate class in Cultural Studies, academic or otherwise. Those who focus on contemporary art and its construction of ethnicity, The : ve pages are devoted to videos about free trade and related issues. resource for those with a political science and economic background.

Overall, Fox's book is a valuable piece of scholarship that smoothes over between disciplines.

Dr. Martínez completed his B.A. at the University of Texas at Austin, his M.A. at the University of Texas-Pan American, and his Ph.D. at Ohio State University. He is currently the assistant to the president at the University of Texas at Brownsville and Texas Southmost College.

NATIONAL INSTITUTES OF HEALTH
UNDERGRADUATE SCHOLARSHIP PROGRAM

Undergraduates can train and be mentored at the cutting edge of biomedical research while receiving scholarship support.

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government’s premier biomedical research and research agency. NIH offers scholarships to qualified undergraduates who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualifying expenses (food, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks (with salary/benefits) in our research laboratories in Bethesda, MD. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

WE SEEK YOUR ASSISTANCE IN IDENTIFYING STUDENTS WHO:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5 percent of their class;
- Are a U.S. citizen, national, or permanent resident; and
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

FOR MORE INFORMATION, CONTACT THE UGSP AT:
- Internet: http://ugsp.info.nih.gov
- E-mail: ugsp@nih.gov
- Phone: 1-800-526-7689
- TTY: 1-888-352-3001

This is a special opportunity for special students.

NIH is dedicated to building a diverse community in its training and employment programs.
Rice University seeks a professional for the position of Registrar.

Located in Houston, Texas, Rice University is a private, coeducational, research university dedicated to undergraduate teaching and to graduate studies in selected fields.

The Position: Reporting to the Vice President for Enrollment, the Registrar is responsible for the maintenance and integrity of all student academic records, the administration of the registrar's office, and establishing policies and procedures for the equitable and consistent administration of University academic policies and procedures as they relate to the registration process. Responsibilities include the assignment of classroom space and the overseeing of classroom maintenance. The Registrar also serves as the officer in charge of retention studies and is an integral part of the enrollment management unit, participating in the strategic plan for the University. The Registrar demonstrates the ability to balance institutional traditions and academic integrity with the individual needs of students and faculty and will articulate a vision for a registrar's office within the larger institutional context that embraces the use of technology in information management, the concept of service to campus constituents, and the role of faculty and students in developing academic policies and procedures.

Qualifications: The successful candidate will possess a Bachelor's degree, a Master's degree is preferred, with previous supervisory and management experience in a registrar's office at an accredited institution of higher education. Thorough knowledge of federal and state laws regarding student records, and experience in the design and implementation of computerized student records. Excellent interpersonal and communication skills, as well as the ability to foster effective campus and external relationships, are also required.

Application and Nomination: Review of applications will begin immediately and will continue until the position is filled. Nominations of individuals for this position may be made to the Spelman & Johnson Group as indicated below. Applications for this position should include two resumes and cover letters and should be sent to:

The Spelman & Johnson Group
Registrar - Rice University
William Spelman, President
38 Mulberry Street, Box 304, Leeds, MA 01053
Phone: 413-534-7089, Email address: mail@spelmanandjohnson.com
Applications may be submitted on-line at: www.spelmanandjohnson.com
Visit Rice's website at: www.rice.edu

Rice University is committed to affirmative action and equal opportunity in education and employment. Rice does not discriminate on the basis of race, color, religion, sex, sexual orientation, national or ethnic origin, age, disability, or veteran status.

PUTTING MINDS TO WORK

GREEN RIVER COMMUNITY COLLEGE

FACULTY POSITIONS FOR 2000-2001

Green River Community College is located on a 168-acre wooded site near Auburn, Washington, about 30 miles from both Seattle and Tacoma. The college opened in 1965 and enrolls over 8,000 students. It includes 11 instructional divisions and offers 50 vocational programs. The college is committed to diversity, student development and job placement, teaching excellence, and meeting the needs of community, industry, and government.

Green River is a comprehensive community college that supports its students as they transform their lives through education. The college assists students in achieving their personal and professional goals as they train to enter the job market, prepare to transfer to other colleges and universities, build basic skills, and seek personal enrichment, through innovative programs, responsive services, opportunities to our community and beyond.

The college seeks innovative, creative, experienced faculty who are dedicated to helping students achieve excellence in their academic work, who are able to employ alternative instructional methods and strategies, and who adapt to a variety of teaching situations. Most of the following full-time, tenure track faculty positions are available beginning September 2000 and continuing with annual nine-month contracts.

Aviation (Contingent upon funding) Five years of professional (paid) experience in the aviation industry, minimum one-year successful teaching experience in either a college setting or in a FAA approved course directly related to pilot or airline certification or in airline operations. Knowledge of Code of Federal Regulations.

Library (contingent upon funding) Collection Development Librarian: Master's degree in library science or equivalent, with three years, professional experience in an academic library environment.

Math: There are three different math positions available. Master's degree in mathematics or equivalent or a Master's degree in math education.

Salary range: $32,107 - $47,618

Closing: Friday, March 17, 2000 (For most positions). For complete job description and application materials, call the Office of Human Resources' job opportunity line at (253)382-3380 or TDD (253)388-3345, or visit:

WICHITA STATE UNIVERSITY

Wichita State University invites applications and nominations for the position of Dean of the College of Engineering. The Dean provides leadership for the College’s faculty and students and reports directly to the Vice President for Academic Affairs and Research. The Dean is responsible for strategic planning and creating a long-term vision for the College; enhancing and sustaining the quality of the College’s undergraduate, graduate, and research programs; promoting professional development opportunities for faculty; managing financial matters of the College; and advancing and supporting excellence in teaching, research, and service.

Wichita State University is located in a metropolitan area with a population of more than 400,000. It currently enrolls 14,500 students, of which about one in five is a graduate student, and employs more than 700 full-time faculty. The College of Engineering serves more than 900 undergraduate and graduate majors with 50 faculty members. Each of the four engineering departments, Aerospace, Electrical and Computer, Industrial and Manufacturing, and Mechanical offers degrees including the B.S., B.S.E., and B.S.M.E. degrees. The University is also the home of the National Institute for Aviation Research (NIAR), which enhances research opportunities for faculty and together with the College will generate about $10 million in external funding this year. More than 100,000 Kansas students are employed in the aircraft, materials, or information and communications industries, about 45,000 are employed in four major aircraft companies in Wichita. This industrial base provides great potential for growth in the College. Additional information about WSU, its College of Engineering, and NIAR can be found at http://www.wichita.edu.

Qualifications: Candidates for the position must possess an earned doctorate in engineering and meet the requirements for an appointment to the rank of professor in the College. Also required are successful teaching experience in an academic institution and appropriate research experience; demonstrated leadership skills and administrative experience appropriate to the position of dean, demonstrated success in obtaining external funding; evidence of ability to form working relationships with individuals and teams in business, government, and academia; and successful experience with diverse populations. The Dean’s experiences must demonstrate a commitment to educational excellence, diversity, and support for a strong research program. Excellent communication and interpersonal skills are a must. Successful experience in an industrial or commercial setting is preferred.

Applicants should submit a letter of interest, curriculum vitae, and the names, mail and e-mail addresses, and telephone numbers of at least four people who can provide professional references. The starting date for the position is July 1, 2000. The deadline for the receipt of applications is March 3, 2000. Please send all applications and nominations to:

Dr. Gerald Loper
Associate Vice President for Research
Wichita State University
Wichita, KS 67260-0007

Inquiries may be directed to Dr. Loper by e-mail or by phone at 316-978-205.

COLEGE OF ARTS AND SCIENCES
POSITION DESCRIPTION - DEAN

The University of Toledo (UT), one of 13 state-assisted institutions in
Ohio, invites applications and nominations for the position of Dean of
the College of Arts and Sciences. The Dean is the chief administrative officer and academic
leader of the College and reports directly to the Provost and Vice President for Undergraduate
and Graduate Education who is the chief academic officer of the University. Responsibilities
include the administration and development of academic, research, and public service
programs; budget and resource allocation; fund raising and external development; and
representation of the College to various constituencies.

The College of Arts and Sciences, the largest of the University’s eight colleges, is divided into
four divisions, with 19 departments, 10 programs, and an annual budget of over $25 million.
Reporting to the Dean are the Associate Deans for the Humanities, the Natural Sciences and
Mathematics, the Social Sciences and the Visual and Performing Arts; the department chairs
and program and center Directors; and the Directors of Student Services and College Computing.

The new Dean, working with the new President and Provost, will have a unique opportunity to
shape the College and the University faculty during this period of transition and to enhance
already strong academic and research programs. Baccalaureate degrees are offered in all
departments. Graduate degrees are offered in most departments. Six departments offer the Ph.D.

The Dean will have the opportunity to hire significant numbers of tenured and tenure-track
faculty. Candidates for the position of Dean must possess the credentials to qualify for tenure
at the rank of full professor in one of the departments of the College. Candidates also must
have a record of excellence in teaching and scholarship, demonstrated leadership abilities,
and administrative experience. Candidates should be student-oriented and be able to relate to
and work collaboratively with the faculty of the college, the University administration, and other
groups within and outside the University.

The starting date is negotiable. Salary and other considerations will be consistent with the
commitment of The University of Toledo to recruit and select the best qualified candidate.
Consideration will begin on January 21, 2000. The Search Committee will begin screening
applications on that date and will continue to review applications until the Dean is selected.
Transcripts will be required of candidates who are invited to the campus for interviews.
Applicants should send (1) a letter describing how they meet the required and preferred qualifications, (2) curriculum vitae, and (3) the names and addresses of at least three references to:

Dr. Samir Abu-Abi
Chair of the Dean of Arts and Sciences Search Committee
Department of English Language and Literature
The University of Toledo
2801 W. Bancroft Street
Toledo, Ohio 43606-3390

UNIVERSITY COLLEGE
POSITION DESCRIPTION - DEAN

The University of Toledo currently has an opening and invites nominations and applications
for the position of Dean, University College. The Dean is responsible for the academic leadership
of the college. The duties would include, but are not limited to, academic policy,
administration of instructional and research resources, personnel matters, fiscal and personnel
management of the college, student recruitment and retention.

The preferred candidate will also demonstrate the following characteristics:

• ability to promote excellence in teaching, scholarship, and professional activity in the
college.
• ability to manage a complex budget strategically.
• ability to secure external support.
• ability to provide leadership in the use of new educational technology.
• ability to build and maintain effective teams.
• ability to resolve complex personnel issues.
• ability to foster trust and respect.
• a creative and energetic style of management.
• excellent communication and interpersonal skill.
• commitment to diversity and the advancement of multicultural and interdisciplinary
  programs.

The Dean will report directly to the Provost and Vice President for Undergraduate and
Graduate Education.

University College is located on the Scott Park Campus, in a park-like setting 5 minutes from
the main campus.

The University of Toledo is actively a partner and innovator in community/school/business/relationships. The University College faculty and staff have close ties to schools and work with numerous educational and human service organizations. The Dean is expected to support functions and carry out the administration of University College to the fullest extent. Candidates should be qualified for appointment as Professor in one of the divisions of the college.

The starting date is negotiable. Salary and other considerations will be consistent with the
commitment of The University of Toledo to recruit and select the best qualified candidate.
Consideration will begin on January 21, 2000. The Search Committee will begin screening
applications on that date and will continue to review applications until the Dean is selected.
Transcripts will be required of candidates who are invited to the campus for interviews.
Applicants should send (1) a letter describing how they meet the required and preferred qualifications, (2) curriculum vitae, and (3) the names and addresses of at least three references to:

COLLEGE OF EDUCATION
POSITION DESCRIPTION - DEAN

The University of Toledo seeks a creative, dynamic leader to take its College of Education into the 21st century. We seek a leader who possesses a balanced record of scholarly productivity and a working knowledge of how to develop and enhance the abilities of its current faculty and hire new faculty. Due to a university-wide restructuring, the College of Education anticipates hiring a substantial number of new tenure/tenure-track faculty over the next five years.

The College of Education will be a major participant in the long-term strategic plan of The University of Toledo. This will specifically mean developing doctoral and master's programs for the institution's flagship College is the production of doctoral degree graduates. The new Dean will be expected to forge consensus and provide for these endeavors.

The Dean will report to and work with the Provost and Vice President for Undergraduate and Graduate Education. The duties would include, but not be limited to:

- Enhance existing graduate and undergraduate programs;
- Support outreach efforts to promote and conduct training and life-long professional development;
- Augment the professional development of faculty, consistent with the University's desire to enhance its research status and increase its level of external funding;
- Maintain the College's consistent record of national program accreditation and program approval within the State of Ohio;
- Develop and support a strategic planning and resource allocation process that promotes faculty, program-level, and department-level excellence;
- Foster College- and University-wide initiatives in technology;
- Develop educational partnerships with other Colleges within the University.

ABOUT THE COLLEGE

The College of Education is accredited by the National Council for Accreditation of Teacher Education (NCATE) and a member of the University Council on Educational Administration. It offers over 50 programs at four degree levels (baccalaureate, master's, education specialist, and doctorate) for continuing education needs. The College is recognized as a leader in teacher reform, urban education, and educational policy studies. It maintains on-campus clinicals and a teacher education center that provide materials and curriculum for student use. The College enjoys a tradition of strong, positive relationships and active partnerships with school districts, colleges, universities, and appropriate agencies within the Northwest Ohio community.

POSITION REQUIREMENTS

The new Dean must have an earned doctorate and be capable of achieving status as a tenure full professor in one of the departments within the College. Candidates also must have a record of excellence in teaching and scholarship, demonstrated leadership abilities, and administrative experience.

PREFERRED QUALIFICATIONS

The new Dean should demonstrate evidence of: a) an ability to maintain and develop strong fully-accredited graduate and undergraduate academic programs; b) an ability to promote the intellectual development of students; c) an understanding of how to enhance faculty members professional development; d) oral and written communication skills to work effectively with internal and external constituencies in developing consensus regarding missions, functions, and programs; e) significant scholarly work that includes published research; f) a commitment to cultural diversity and its role in the educational process; g) an ability to engage area educational agencies and institutions in forging strong partnerships; and h) experience in financial budgeting, fund-raising, and externally funded activities.

The starting date is negotiable. Salary and other considerations will be consistent with the commitments of The University of Toledo to recruit and select the best qualified candidate. Consideration will begin on January 21, 2000. The Search Committee will begin screening applications on that date and will continue to review applications until the Dean is selected.

Proposed candidates will be required to provide letters demonstrating the ability to meet the expected qualifications. They should send (1) a letter describing how they meet the required and preferred qualifications, (2) curriculum vitae, and (3) the names and addresses of at least three references to:

Dr. Earl Mury
Interim Vice Provost for Faculty Development
2801 West Bancroft Street
University Hall 3330
Toledo, Ohio 43606

ABOUT THE UNIVERSITY AND COMMUNITY

The University of Toledo is a public university with an enrollment of approximately 20,000 students. The University is one of America's 100 most wired colleges according to U.S. News & World Report. Toledo is a major manufacturing center located in the heart of the Great Lakes region. The city of Toledo has a rich cultural life with its own symphony, opera, theater, and art museums. It is less than a 30 minute drive to any of the large metropolitan areas of Ohio, Michigan, or Indiana.

QUALIFIED WOMEN, MINORITIES, VETERANS AND PEOPLE WITH DISABILITIES ARE ENCOURAGED TO APPLY.
Dean

Bouvé College of Health Sciences

The Dean is the chief academic and administrative officer of the College and reports to the Provost and Senior Vice President for Academic Affairs. The Dean is responsible for curricula, budgets, personnel matters and planning in the College, as well as external relations and fund raising.

The Bouvé College of Health Sciences was formed by the combination of the Bouvé College of Pharmacy and Health Sciences and the College of Nursing. The College is to achieve national leadership as a comprehensive, practice-oriented college of health sciences. The new College houses 148 faculty, 2,070 undergraduates, and 869 graduate students. It offers 40 bachelor's, master's and doctoral degrees (Ph.D., Pharm.D.) and certificate programs. The College's programs include athletic training, biomedical science, cardiology, physical medicine and rehabilitation, therapeutic and special education, school and counseling psychology, speech-language pathology and audiology, and therapy. The College has an outstanding record of contributions to research with extensive funding from government, industry and foundations.

The successful candidate must possess an earned doctorate in a health-related discipline and an outstanding record of research, teaching, and scholarship appropriate for appointment at the rank of Professor with tenure in one of the departments in the College. The candidate should be prepared to provide evidence of substantial administrative experience. Candidates should have strong interpersonal and communication skills and the ability to represent the College within the University and the professional community, to attract external support, and to administrate the diverse academic and professional programs within the College. A commitment to cooperative education, a history of success in promoting the goals of Northeastern University, a clear commitment to University affirmative action program and an active involvement in University administrative activities and/or responsibilities.

Salary and benefits are highly competitive and commensurate with qualifications. Applicants should submit a cover letter detailing administrative and academic experiences related to the position, complete curriculum vitae and list of publications. Review of applications will begin on February 1, 2000 and continue until the position is filled. Women and minority members are encouraged to apply. Appointment is expected to be effective on or before September 2000.

All materials, including nominations and inquiries, should be directed to: Professor Robert Schatz, Chair, Bouvé Dean Search Committee, 619 Human Resource Management, Northeastern University, 500 Columbus Place, Boston, MA 02115. Person-Area Consultants, Inc. has been retained to assist with the search. Maria Pezza can be reached at personar@bestweb.net. Equal Opportunity/Affirmative Action, Title IX Employer.

DIRECTOR OF DISTANCE LEARNING

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York metropolitan area, and is one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to over 8,000 students, an extensive cooperative education program and an expanding continuing education program. Faculty number almost 250.

Responsibilities: The director will report to the Vice President for Academic Affairs and will coordinate all aspects of distance learning. He/She will assist faculty with course design and will recommend specific software and hardware for the delivery of quality educational programs.

Minimum Qualifications: A Master's Degree in Instructional Technology, or related field, plus one year experience in the area of Distance Learning and Educational Technology that includes planning, design, and development of instructional models. Also, the applicant should have a demonstrated ability to work with multiple constituencies and an openness to innovation and change.

Applications: Applications are encouraged to submit a statement on how their experiences have prepared them for such a position. Exceptions to the degree requirement may be made for an exceptional candidate.

Send a letter of application, resume, and a list of references to:

Vice President of Academic Affairs
New Jersey City University
2030 Kennedy Boulevard, Jersey City, New Jersey 07305

An Affirmative Action, Equal Opportunity Employer, the College especially welcomes women and minority candidates.

The College of Health, Physical Education, Recreation, Teacher Education is seeking an Associate Dean/Dean of Teacher Education for the college.

Responsibilities: Reporting to the Dean, the Associate Dean and Director of Teacher Education is the primary campus officer for teacher education on a university-wide basis and has delegated responsibility for administration of leadership of department and programs in the School of Education. This person will also provide leadership responsibilities for NCATE accreditation and the Wisconsin Department of Public Instruction's licensing requirements. This position also involves leadership responsibility for coordinated external funding efforts.

Qualifications: Earned doctorate in one of the academic areas represented by the College. Minimum of five years experience (or equivalent) in higher education. Record of exemplary teaching, scholarship, and professional service that warrants appointment to the faculty; one of the departments at the rank of associate professor or professor. In addition, the Associate Dean must possess the following:

1) administrative experience in higher education and/or K-12 school settings with demonstrated exception leadership skills; 2) demonstrated knowledge of commitment to teacher education; 3) evidence of interdisciplinary cooperation and collaborative activity and/or with K-12 environment; 4) evidence of success in facilitating the acquisition of grants and external funding; 5) record of commitment to promoting ethnic diversity in education.

Other desirable qualifications: 1) teaching experience K-12 schools; 2) consultative skills to relate effectively with faculty, academic staff, administrators, and school district personnel; and community members; and ability to work cooperatively with external educational agencies and relevant state and federal agencies.

PORTLAND STATE UNIVERSITY

DEAN

SCHOOL OF BUSINESS ADMINISTRATION

Portland State University invites applications and nominations for the position of Dean, School of Business Administration.

UNIVERSITY AND SCHOOLS: Portland State University aspires to be the best university in the 21st century. Our motto, "Let Knowledge Serve the City," epitomizes our leadership across the region, the state, and the nation. The University is strategically located in the population and business center of Oregon on a 22-acre campus with 41 major buildings in the tree-lined South Park Blocks district of downtown Portland. Total enrollment exceeds 35,000, including more than 3,500 graduate students. Portland State was granted university status in 1969 and is a relatively young and growing university with an active continuing education program. The Bratton Price Miller Library holds 1.265 million bound volumes and 9,000 serial subscriptions. As an urban university, Portland State serves as the center of the educational network in the Portland metropolitan area.

Distinctive features of the School of Business Administration include the integration of information technology and international business in teaching, research, and applications of business management practices. The School enjoys a fundamental commitment to competitive excellence, strategic challenges, and the globalization of the market place. All academic programs, undergraduate and graduate, are AACSB accredited. At the undergraduate level, the School offers special emphasis options within the business administration major. These options are accounting, finance, general management, human resource management, information systems, marketing, advertising management, and supply and logistics management. Other undergraduate special emphasis programs include international business studies certificate, food industry management certificate, and a paralegal certificate in accounting. At the graduate level, the School offers MBA degrees, the MISM (Master of International Management), MISP (Master of Science in Information Systems and Management), and specialized options within the MBA, namely, Management of Information and Technology, and International Business.

The School is a partner in the Oregon Executive MBA program and participates in the University's system science doctoral program. The School additionally offers non-degree programs through the University's School of Extended Studies and through the School's Food Management Institute and the Free Market Development Institute (worldwide). The approximately 2000 undergraduate and 700 graduate full- and part-time students are served by 90 full-time and 25 part-time faculty. The School is actively supported by the business community through sponsored projects, direct contributions, and through the Business Advisory Council and the Corporate Associates Program.

RESPONSIBILITIES: The Dean provides academic and administrative leadership to the School of Business Administration and reports directly to the Provost. The Dean is responsible for improving and promoting the quality and effectiveness of the School's teaching, research, and service missions. The Dean is also responsible for the financial growth of the MBA and development of industry and community partnerships.

QUALIFICATIONS:

- Candidates with an academic background must possess an earned doctorate and qualify for appointment as a tenured professor in the School;
- Candidates with a business background must have a strong record of leadership and achievement and a demonstrated commitment to and an understanding of higher education that would merit appointment as a tenured professor in the School;
- Demonstrated ability to lead, offer vision, and successfully manage professionals in diverse academic, corporate, community, and governmental organizations;
- Demonstrated success or related experience in securing external support and/or fund-raising with a commitment to broadening support for the School of Business Administration;
- Possess personal qualities that will facilitate collaborative relationships within the University, the School, and among business leaders and alumni;
- Demonstrated commitment to diversity.

SALARY: Competitive.

BEGINNING DATE: July 2000.

APPLICATIONS AND NOMINATIONS: Review of applications will begin January 15, 2000 and will continue until the position is filled. Applications received by February 29, 2000 will be given priority. Candidates should submit a letter of interest, curriculum vitae or resume, and names of three professional references to:

Bodderic C. Dixon, Search Chair
Vice Provost & Special Assistant to the President
Portland State University
Post Office Box 751
Portland, Oregon 97207-0751
Phone: (503) 725-4499 FAX: (503) 725-4499

To receive full consideration please submit a Curriculum Vitae and personal statement, academic transcripts, three letters of recommendation and a DD214 (if claiming veteran preference) to the United States Military Academy, Department of Systems Engineering, ATT: Mr Betty Malta, West Point, New York 10996-1779, phone: (914) 938-2701, or email: edwards@usma.edu. All applications should arrive before February 29, 2000.

The above appointment is a three-year renewable appointment expected to begin in the June/July 2000 timeframe. This position is not restricted to U.S. citizens, but non-citizens will not be hired if qualified U.S. citizens are interested and available. Salary is commensurate with qualifications and experience.

The United States Military Academy is an Equal Opportunity, Affirmative Action Employer. Women and Minorities are encouraged to apply.

UNIVERSITY OF FLORIDA

The Florida Board of Regents announces a nationwide search to recruit a new President for the University of Florida.

The University of Florida is an AAU and Carnegie Research I institution. Located in Gainesville, the University is the sixth-largest and one of the most academically diverse in the nation. The University of Florida enrolls over 43,000 students; employs more than 4,000 faculty members, and has an annual operating budget in excess of $1.6 billion.

The University of Florida is a major research-intensive university with 22 colleges and schools. It offers more than 100 undergraduate majors, coordinates almost 200 graduate programs, and offers professional degree programs in architecture, dentistry, engineering, law, medicine, nursing, pharmacy, and veterinary medicine. It is the state land grant university with a distinguished record of developing Florida agriculture.

The President is the chief executive officer of the University and works closely with the Chancellor of the State University System. The President is charged with leading the University academically, administratively, and financially, guided by the University's mission and values. The next President is expected to provide leadership that incorporates vision and creativity. Candidates should have distinguished records of senior-level leadership in an educational institution of significant size and complexity.

Review of candidate materials will begin immediately and will continue until a new President is selected. For more information about the University of Florida go to www.ufl.edu. Expressions of personal interest with resumes and nominations should be sent to:

MIDWESTERN STATE UNIVERSITY
Wichita Falls, Texas

PRESIDENT
Search Extended

The Board of Regents of Midwestern State University, a university of approximately 6,000 students offering degrees through the Master's level, has extended its search to find an individual to succeed Dr. Louis J. Rodriguez as President following his retirement on August 31, 2000. The President is the chief executive officer of the University, reporting directly to a nine-member Board of Regents appointed by the Governor of the State of Texas.

With an annual budget of over $41 million for the 1999-2000 academic year, Midwestern State is located in Wichita Falls, Texas, a progressive community of 100,000 people in North Central Texas. Founded in 1922, the University offers 47 undergraduate and 16 graduate programs in six colleges, including the Colleges of Business, Education, Fine Arts, Health Sciences, Liberal Arts, and Science and Mathematics. Detailed information regarding the MSU campus, student life and academic programs can be found at http://www.mstate.edu. Information on the City of Wichita Falls can be found at http://www.cwflis.com.

Preference will be given to applicants who have:

- An earned doctorate and evidence of successful teaching experience at the university level.
- Proven administrative abilities, to include planning and managing large budgets, preferably at a tax-supported, state university.
- The ability to communicate effectively with and elicit support from the local community, alumni, and state educational and legislative agencies.
- The highest degree of personal integrity, honesty and ethics in dealing with others, and the strength of character to stand by personal convictions and principles.
- A history of working closely with students to understand their problems and needs.
- An understanding of the changing nature and scope of higher education and its increasing use of distance education and the Internet to achieve educational goals.
- A demonstrated commitment to equal rights for all people.

Applications and nominations should be sent to:

Kathryn A. Yeager, Chair
Presidential Search Committee
Midwestern State University
P.O. Box 2100
Wichita Falls, TX 76307

Applications and nominations should be submitted by February 15, 2000, and should include a letter of application, resume, and at least three letters of reference. The appointment will be effective September 1, 2000. Telephone inquiries may be directed to Mr. Steve Holland, Director of Personnel, (940)397-4133.

Midwestern State University is an Affirmative Action/Equal Opportunity Employer.

WEST CHESTER UNIVERSITY

Associate Vice President
for Advancement

West Chester University of Pennsylvania seeks persons of energy, enthusiasm, and progressive vision as applicants for the position of Associate Vice President for Advancement. West Chester, the second largest of the fourteen universities, which comprise the Pennsylvania State System of Higher Education, is ideally located 25 miles west of Philadelphia. West Chester was founded in 1871 and provides a high quality comprehensive educational program to approximately 12,000 students.

The Associate Vice President for Advancement is responsible for overseeing the daily operation of the Department of Development, which consists of a professional staff of five and support staff of five, and the following programs: annual giving, major gifts and planned giving, corporate and foundation relations, and prospect research; the overall direction of revenue generation from constituencies such as alumni, parents, friends, corporations and foundations; and establishing goals, policies and procedures. Also, the Vice President, along with the Vice President for Advancement, will develop and implement capital fund-raising projects, including campaigns.

The successful candidate must demonstrate a record of accomplishment in the development area for the past five years with at least two years experience in involvement with a successful campaign. The candidate must possess exceptional interpersonal and communication skills; excellent management, supervisory and analytical abilities; technical competence and high integrity; a commitment to the University's mission, the ability to understand the University's external/internal environment, and commitment to diversity, social equity and equal opportunity. A willingness to travel is preferred. A Bachelor's degree is required; Master preferred. The entiance salary for this position is in the range of $83,000+, depending on qualifications and is negotiable. Excellent benefits package, including undergraduate tuition fee waiver for self and dependent. Finalist must successfully complete the interview process.

Applicants must submit a letter of interest describing relevant professional accomplishments, a current resume, and name and addresses and telephone numbers of at least three references to Ms. Valerie Dusko, Employment Manager, c/o Associate Vice President for Advancement, Search, Human Resource Services, 201 Carter Drive, West Chester University, West Chester, PA 19383; Applications will be handled confidentially; Review of applications will begin early February 2000 and will continue until the position is filled. Position is available on or before June 1, 2000.

West Chester University is actively building culturally diverse academic communities which fosters an inclusive environment that encourages a broad spectrum of candidates: including women, people of color, and people with disabilities to apply. For more information about the University and to see a more detailed description of the position, see our web site: http://www.wcupa.edu.

Eugene Lang College is committed to building a diverse community for learning and teaching. Affirmative action/equal opportunity employer.

New School University

INTERNSHIP TRAINING DIRECTOR

The University at Stony Brook is looking for an Internship Training Director for its APA-accredited psychology internship program in the University Counseling Center. Stony Brook is a large research university with an exceptionally diverse student body of 19,000, located on the beautiful north shore of Long Island, 60 miles from Manhattan. A multidisciplinary counseling staff collaborates to offer individual and group psychotherapy, outreach, consultation, training, and psychiatric services. Emphasis on relationally-based models of human development facilitates an exciting blend of psychodynamic and multicultural perspectives. We are seeking an energetic psychologist to coordinate and supervise our training programs, to administer the psychology internship program, and to provide supervision, clinical, and outreach services. This is a permanent position, with a calendar year appointment to begin Summer, 2000. Salary commensurate with experience, excellent benefits. Information about the Center and the internship is available at www.sunysb.edu/counseling. Review of applications begins 2/15/00 and will continue until the position is filled. Partial interview expenses included.

Minimum Requirements: Ph.D./Psy.D. in clinical or counseling psychology; licensed as a psychologist (or license eligible) in New York, APA internship. Three years clinical work experience, at least two of which must be postdoctoral clinical and supervisory or teaching experience.

Desired Qualifications: Experience and interest in multicultural approaches; prior counseling center experience; psychodynamic/developmental perspective; demonstrated skills in psychotherapy; good interpersonal and organizational skills.

To Apply: Send a letter of interest, a written psychotherapy case summary, vita, and three letters of reference to Cheryl Korash, Ph.D., Chair, Search Committee for Training Director, University Counseling Center, University at Stony Brook, Stony Brook, New York 11794-3100. The University at Stony Brook is an Affirmative Action/Equal Opportunity Educator and Employer.

EXECUTIVE DIRECTOR
HONORS PROGRAMS AND ACADEMIC SCHOLARSHIPS
TEXAS A&M UNIVERSITY
COLLEGE STATION, TEXAS

Texas A&M University announces the search for an Executive Director for the Office of Honors Programs and Academic Scholarships. The review of applications will begin on February 15, 2020. The successful applicant is expected to start August 1, 2020.

Texas A&M University, a land-, sea-, and space-grant university has a 5,200-acre main campus with a research park, a study center in Santa Fe, New Mexico and a center in Mexico. With an endowment that totals more than $2.9 billion, TAMU has formal cooperative agreements with more than 100 institutions in 40 countries and currently ranks 9th nationally in value of research. Fall 1999 enrollment was 34,412 students of which approximately 11% are ethnic minorities.

The Office of Honors Programs and Academic Scholarships enables the enrollment of over 2,500 Honors eligible students in over 200 Honors courses that are taught by Honors faculty from across the university. Additionally, these students have the opportunity to enroll in their classroom experience through research programs, faculty mentoring, and national scholarship preparation. The Office of Honors Programs and Academic Scholarships is also responsible for recruiting and retaining high achieving students, especially National Merit Scholars. For the past ten years, Texas A&M has remained among the top ten universities enrolling National Merit Scholars. The office has an operating budget of $4,000,000 and awards over $7,000,000 in scholarships annually.

The executive director leads the development and implementation of diverse and enriching honors curricula within each college and designs and pursues novel recruitment programs to attract outstanding students. The director administers the university's principal comprehensive academic scholarship program, oversees the professional school advising program, and participates in external development activities.

Applicants must have a Ph.D. and should possess strong scholarly, teaching, and administrative records. Visionary leadership coupled with energetic and effective interpersonal skills is essential to build on the success of the present program.

Please submit application letter, curriculum vita, and three references to Dr. Ordain Ordonez, Honors Search Committee Chair, 206 Jack Williams Administration Building, Texas A&M University, College Station TX 77843-1125. Applications are also invited to include a brief statement describing their vision for an exemplary Honors program. Email inquiries to honors@atm.edu.

Plattsburgh State University of New York

VP FOR STUDENT AFFAIRS & ENROLLMENT MANAGEMENT

Plattsburgh State enjoys a rich history that reflects impressively on its current quality and provides direction for the future. Our college was founded in 1869 as an institution to train teachers and became an original member of the State University of New York system when the University of the State was created in 1948. Today, Plattsburgh State University is a comprehensive four-year, coeducational college that offers nearly 60 majors and a variety of special programs and services. Our academic community supports high standards of scholarship and expectations for our students in a caring and supportive environment. We are dedicated to advancing knowledge in a setting that is open and friendly. Our 300 faculty, over 90 percent of whom hold the highest degree in their fields, is devoted to both quality teaching and ongoing professional development and academic research.

Responsibilities: The Vice President for Student Affairs & Enrollment Management is the chief student affairs officer and provides leadership to the directors and coordinators of the division, including: Student Health Center, Counseling and Psychological Services, the Wellness Center, Greek Affairs, Career & Placement Center, the Registrar's Office, Student Life, Student Government Association, Intercollegiate Athletics, Intercollegiate Student Services, University Police, Judicial Affairs, Housing, College Center, Service Learning and Leadership, and Admissions. The Vice President has the primary responsibility for the development and implementation of an effective enrollment management plan in close cooperation with campus constituents.

Qualifications: An earned doctorate is required; demonstrated administrative experience and accomplishments appropriate for the position of vice president; demonstrated skills in enrollment, assessment, and fiscal management; strong interpersonal and communication skills; experience in working with media; evidence of success in working with student bodies, student governments, student organizations, faculty, and alumni; demonstrated commitment to effective team building; capability and willingness to provide a demonstrated commitment to achieving and sustaining diversity in all aspects of university life, especially in developing diversity in student body, faculty, staff and in student program activities, and organizations; and commitment to enhancing student campus life and services through traditional and non-traditional programs.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

Salary: Dependent upon qualifications and experience; excellent benefits. Review of applications begins immediately and continues until position is filled. Please send nominations or resumes, letters of application, and the names, addresses and telephone numbers of three references to: Chair, Search Committee (F) 3300-900, c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, New York 12901-2681. Fax: (518) 564-3600.

HUMAN RESOURCE MANAGERIAL POSITIONS (3)

We are a progressive human resource organization in a dynamic and growing university. We have a unique opportunity to build a department by filling three key openings within our department with individuals who bring the best experience, abilities and talent to add to our established complement of human resource professionals. There are two senior and one mid-level human resource management positions available. The areas of work across those three positions include but are not limited to the following: classification, compensation, data base management, records, management, training, organizational development and general human resource project oriented work.

Our intention is to select from among those applicants who can demonstrate most effectively their ability to contribute to our organization and ultimately the university community, the three who, in combination with one another and existing staff, provide the strongest complement of areas of expertise, talent and commitment to human resource work. We therefore invite interested individuals to submit current vitae and any other supporting material that would enable us to identify your potential to contribute. Our organizational style is client-centered, creative and grounded in an organizational development model. We are looking for professionals who will not only be a good fit, but will also help us move the university forward by strengthening and deepening our employee resource.

Salary Range: Commensurate with the level of responsibility and negotiable based upon the candidate’s credentials and experience.

Send letter and resume (include V): to: Judith Hain, Vice President for Human Resources, Montclair State University, Box C316-V, WO66/HO, Upper Montclair, NJ 07043, or hain@montclair.edu

Starting Date: March 1, 2000

Apply by: Applications will be considered until all positions are filled.

An Equal Opportunity/Affirmative Action Institution

THE UNIVERSITY OF MICHIGAN-FLINT

COOPERATIVE EDUCATION AND CAREER CENTER

The University of Michigan-Flint, a regional institution of 6,300 students, invites nominations and applications for the position of Director of Cooperative Education and Career Center. The University of Michigan-Flint seeks a progressive, creative leader who will contribute to enhancing the University’s career services including cultivating working relationships with employers and the University Community. The selected individual will be responsible for the administration of a comprehensive education and career center. The Director will serve as a member of the Student Services and Enrollment Management leadership team.

QUALIFICATIONS: Significant management and leadership experience, master’s degree with relevant experience, demonstrated oral and written communication skills, experience with information technology resources, and ability to collaborate with faculty and external constituencies.

A curriculum vitae, copies of several recent publications, a statement of research & teaching interests not to exceed three pages, and the names of three references should be forwarded to: Professor Robert Lynch, Chair, Department of Biological Sciences, University of Massachusetts Lowell, One University Avenue, Lowell MA 01854. Position is contingent upon funding.

The University of Massachusetts Lowell is an Equal Opportunity/Affirmative Action Employer
NJ Medical School

DEAN

New Jersey Medical School
University of Medicine and Dentistry of New Jersey
Newark, New Jersey

New Jersey Medical School announces its search for a new Dean and invites nominations and expressions of interest in the position. Witt/Kieffer, an executive search firm focusing on health care and higher education, is supporting NJMS in this search.

New Jersey Medical School is the academic medical center of northern New Jersey, a focal point of the largest free-standing health sciences institution in the nation, the University of Medicine and Dentistry of New Jersey (UMDNJ). Its mission is to educate highly qualified physicians, conduct basic and applied research and provide health services to its community.

The Dean will
- drive a strong research agenda tied to the School’s broad-based mission,
- oversee the planning and staffing of an ambitious building program for new research facilities and infrastructure,
- lead and guide the adjoining 460-bed University Hospital,
- provide progressive academic leadership to the medical education program and enhance teaching excellence,
- develop partnerships within the University and with other higher education institutions, northern New Jersey hospitals, public and private entities and the community.

The 620 full-time faculty members of the School support 700 medical students and 500 residents. The faculty is the core faculty of the UMDNJ-Graduate School of Biomedical Sciences at Newark. The School has strong connections with a broad affiliated network of northern New Jersey hospitals and clinics, the nearby Science Park, and with other institutions that contribute to realizing the mission of the Medical School. It has contributed in major ways to the Newark renaissance.

The Dean will be a visionary and dynamic leader with senior experience in a complex medical school environment. She will be a demonstrably strong manager with deep understanding of financial issues. She will serve as a senior officer of the University, reporting to the Senior Vice President for Academic Affairs, and will work closely with the University’s President and Board of Trustees. The Dean will have been successful as an effective fund-raiser and shown the ability to enhance an institution’s national visibility. An earned M.D. or Ph.D. degree in an appropriate field is required as is a strong record of research. Superb communication skills are essential.

The search is underway and will continue until the position is filled. Expressions of interest and nominations should be sent, in confidence, to:

Chair
New Jersey Medical School Dean Search Committee
c/o Office of the President
University of Medicine and Dentistry of New Jersey
65 Bergen Street
Suite 1352, Newark, New Jersey 07103
or to NJMS@wittkieffer.com

NJMS is an affirmative action and equal opportunity employer.

U.S. Department of Education
Pre-Application Technical Assistance Workshops for Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR-UP)
GRADUATE SCHOOL OF EDUCATION

The Graduate School of Education at George Mason University is a dynamic, growing professional school committed to excellence in teaching, research, and service, especially through collaborative field-based projects with schools, businesses, and community agencies. Just 16 miles west of Washington, D.C., in Fairfax, Virginia, with additional programming at the University’s Arlington and Prince William campuses, the Graduate School of Education offers a variety of programs designed to meet the needs of educators, scholars, practitioners, and leaders in education for the challenges of the 21st century.

The Graduate School of Education is seeking to fill ten faculty positions (seven tenured, three pending funding) in its state-approved and NCATE accredited teacher education, school counseling, and instructional technology programs. All positions are tenure-track and have an initial start date of August 29, 2000. Rank is open for all positions. Current and successful candidates who have experience in education and anticipate tenure-track positions in the fall of 2000 should submit materials by June 1, 2000. Applicants should submit a letter highlighting their qualifications, a current vita, the names, addresses, and telephone numbers of three professional references, and a two-page statement that addresses the following: (a) your vision for teaching and advising at the Masters and Doctoral levels, and research in academic and administrative settings; (b) the specific program at the University that has attracted you; and (c) the potential for publication that you believe you will achieve in this position. All applications should be submitted by June 1, 2000. Materials will be reviewed until the positions are filled.

Early/Elementary Education: Applicants should have a broad background in child development and a demonstrated record of successful teaching and leadership in early childhood settings. Candidates are expected to have experience in pre-kindergarten, kindergarten, and first-grade classrooms.

Elementary Mathematics Education: The primary focus of this position will be on teaching and mentoring elementary mathematics methods courses, working with pre-service teachers in the Elementary Education program, and mentoring pre-service teachers in field placements.

Secondary Education Program Coordinator: The position involves the development and implementation of a comprehensive and integrated curriculum for secondary education programs. The coordinator will be responsible for curriculum development, assessment, and implementation.

Instructional Technology Program Coordinator: The position involves the development and implementation of an innovative and integrated curriculum for instructional technology programs. The coordinator will be responsible for curriculum development, assessment, and implementation.

Multilingual/Multicultural Education: nationally recognized teacher preparation programs serve a faculty member who can coordinate the ESL research base to effective teaching and assessment practices that reflect current trends and innovations in the field. Responsibilities include coordinating and delivering field-based research and teaching courses in second language acquisition, teaching methods, curriculum development, and assessment.

Special Education (EDAD): The position involves the development and implementation of a comprehensive and integrated curriculum for special education programs. The coordinator will be responsible for curriculum development, assessment, and implementation.
Assistant Dean for Development
College of Literature, Science, and the Arts
And
Assistant Vice President for Development
University Development Office
University of Michigan • Ann Arbor, Michigan

The University of Michigan seeks an Assistant Dean for Development, College of Literature, Science, and the Arts (LS&A) and Assistant Vice President for Development, University Development Office to assume the key leadership role in setting the strategic direction for all fundraising for one of the largest liberal arts colleges in the country.

Since 1818, the College has educated students in courses of study leading to a bachelor’s degree. Today the LS&A faculty of more than 1,000 offers more than 3,200 courses to its 15,114 undergraduates, nearly two-thirds of the total undergraduate enrollment on the Ann Arbor campus. Many of the departments in the College are ranked in the top five of all U.S. colleges and universities, and all are ranked in the top 25 in the United States. Research expenditures for LS&A from external sources, as well as those supported by University funds, were $145.8 million in fiscal year 1998.

The position has a dual reporting relationship to both the Dean of LS&A Shirley N. Newsman, and the Vice President for Development for the University, Susan Fragin, both exceptionally talented individuals. The primary objective of this office is to bring in gifts to the College that will enable it to enhance its research and instructional efforts, and to establish and maintain good relations with alumni(e)s and friends of the College by keeping them aware of its ongoing programs and goals. The primary functions include LS&A fundraising including major gifts, fellowships, and endowments; providing leadership to identify, cultivate, and close significant major gifts. The candidate must function effectively in a complex organizational environment; provide sound management for advancement activities; and be a key contributor to the University’s Development Officers as well as a key development leader for the University as a whole.

Inquiries, applications, and nominations should be directed to Samuel D. (Manny) Berger at 781-272-8999 or at mberman@icloud.com or to Annemarie E. (Tom) Farley at 508-573-6174 or at tom@vittlfeuer.com. Our Web site address is www.vicepier.com or www.ennemet.com.

Resumes and cover letters may be sent to The University of Michigan, Assistant Dean for Development, College of Literature, Science and Arts and Assistant Vice President for Development, University Development Office, 1282 MIP, 105 Wilder Hall, 100 West Ann Arbor, MI 48109-1282. The University of Michigan is an equal opportunity employer.

OBERLIN COLLEGE
STUDENT LIFE & SERVICES

Student Life and Services invites nominations and applications for 2 separate positions. Both are full-time, twelve (12) month positions. Experience must reflect ability to work collaboratively with other administrators and faculty, and to contribute to a socially diversified environment. Applications from women and minorities are especially encouraged.

**Director of Multicultural Resource Center/Asst. Dean of Students:** Requires a specialist who possesses knowledge and skill to support historically under-represented student communities as well as to lead the broader campus community in an open and broad-ranging discussion of social diversity and a generalist who will advise students concerning academic, social, and personal matters. The director will also be involved with the planning of Deans of Students’ Office activities and programs. Requires Masters degree with 3+ years of experience in student services, related field, or equivalent. Doctorate (ideally in field taught at Oberlin) desirable. Advanced degrees should be in fields reflecting knowledge of social diversity in America.

**Asst Dean of Students and Director of Orientation:** Requires a generalist who will advise students concerning academic, social, and personal matters as well as a specialist with familiarity with the planning and implementation of Orientation programs. The Director will be involved with planning of Deans of Students’ Office activities, programs and publications. Requires Masters degree with 3+ yrs experience in student services, related field, or equivalent. Doctorate (ideally in field taught at Oberlin) desirable.

**To Apply:** Send letter of application, resume, and names, addresses and telephone numbers of three references to Chair, Assistant Deans Search Committee, 105 Wilder Hall, Oberlin, OH 44074. Please specify the position for which you are applying. Review of applications will begin on 2/15/00 and may continue until positions are filled.

OBERLIN COLLEGE

MESSIAH COLLEGE

As part of a campus-wide commitment to renewing our focus on student learning and to building on the strength of current programs, the Department of Student Life at Messiah College invites applications and nominations for the following positions:

ASSOCIATE DEAN FOR RESIDENTIAL EDUCATION

The Associate Dean provides vision and leadership in developing educationally purposeful living communities for 2200 residential students. Principal responsibilities include the supervision of 12 professional staff and over 70 student staff, coordinating educational programs, and developing and implementing policies for the college's 10 residential facilities. The position also serves as Dean in the Dean's absence. Required qualifications include skills in supervision, educational programming and assessment, budget development, developing campus partnerships, and strong verbal and written communication abilities. Commitment to the intellectual, faith, and interpersonal development of students and to the mission and identity of Messiah College is also required. A Master's Degree in student affairs or a related field and five years experience in higher education is required. Anticipated start date: June 1, 2000.

ASSISTANT DEAN FOR MULTICULTURAL STUDENT PROGRAMS

This position provides leadership in a wide range of multicultural student programs and serves to advance the College's mission for reconciliation in the areas of cultural, ethnic, and racial diversity. Responsibilities include student organization advising, implementing students learning programs, and coordinating retention initiatives, and hosting major events. The position provides oversight and supervision to International Student Programs. Required qualifications include skills in multicultural programming; commitment to the intellectual, faith, and interpersonal development of students; strong skills in coalition and consensus building; strong verbal and written communication skills; appreciation for the mission and identity of Messiah College. A Master's Degree in student affairs and four years experience in higher education is required. Anticipated start date: July 1, 2000.

Messiah College is a selective Christian college of the liberal and applied arts and sciences located in Grantham, Pennsylvania near the state capital of Harrisburg. Messiah College enrolls nearly 2700 students in over 50 academic programs. Additional information may be accessed through Messiah's website at http://www.messiah.edu

Applicants for either position should provide a letter of application summarizing interest in the college and the position, a comprehensive resume, and contact information for three references. Applicants should also submit a brief statement of faith and a statement of educational philosophy regarding program area (1-2 pages). Application materials should be sent to: Messiah Coll'g Human Resources, Grantham, PA 17027. Review of applications will begin February 7, 2000 and continue until positions are filled. EOE.

Princeton University

Human Resources Region Manager

The Human Resources Region Manager leads a small staff which is responsible for delivery of Human Resources services and programs to a departmental region of approximately 600 to 700 employees. These services include: Compensation - position classifications and promotions, annual salary review, salary equity; Employment - affirmative action recruiting and staffing strategies; Organizational Development - training, performance management, coaching and consulting with managers; process improvement, and organization issues; Employee and labor relations - policy development and review, oversight of the disciplinary and grievance processes, conflict management, and union issues; Benefits - administration of the plans, including case management of temporary disability and workers' compensation. A highly skilled human resources professional whose goal is to promote good employee relations and effective management within the region, the Region Manager offers a wide range of consulting services to departments and employee: and coordinates the activities and Professional development of the Human Resources team members so that there is effective delivery of service. The Region Manager works collaboratively with Human Resource directors to ensure timely development and revision to current policies, procedures, and programs that are responsive to a diverse and changing workplace.

Position requires a bachelor's degree and a minimum of 4-5 years of experience as a human resources professional or comparable combination of work experience. Basic knowledge of all human resources functions preferred, with emphasis in the areas of employment law, including the administration of collective bargaining contracts. Individuals should have proven analytical skills and be effective in both written and oral communications. Position requires initiative, flexibility, skill in setting priorities and ability to work under pressure within a matrix organization, and in a team environment. University experience is helpful.

Princeton provides an exceptional benefits package. Interested candidates should submit a resume and letter of application on plain white paper with standard 12 pt. New Times Roman or similar font with three (3) current references and a writing sample to: Human Resources, Clio Hall/99-0586-HHE, Princeton University, Princeton, NJ 08544-5264. For more information on how to apply, please see our Web site at: http://webware.princeton.edu/hr/howtoapply.htm or call our Employment Opportunities Hotline at (609) 258-6130. An equal opportunity employer Review of resumes will begin immediately and continue until position is filled.

International Business Faculty

METROPOLITAN STATE UNIVERSITY

Metropolitan State University invites applications for a full-time, tenure track faculty position in the International Business Department with a specialization in International Business. Requirements include at minimum a master's degree in international business or a master's business administration with a focus on international business, a minimum of five years of executive experience overseas, preferably in more than one country. A minimum of three teaching experience at the college level or experience conducting workshops, seminars, conferences or other venues for educating managers is required. Review of applications will begin February 5, 2000 and continue until positions are filled. EOE.
HARRISBURG AREA COMMUNITY COLLEGE

FACULTY 2000-2001

Harrsbug Area Community College (HACC) announces tenure-track positions available for 2000-2001. Believing a committed and diverse faculty to be the College's most important resource and teaching and learning its most important mission, the President and Board of Trustees seek to strengthen the institution by filling the full-time faculty positions listed below.

Established in 1964 as Pennsylvania's first community college, HACC is now a multi-campus institution offering a variety of degree, certificate and diploma programs that prepare students for the job market or continuing studies at a four-year institution. The college also plays a vital role in improving the quality of life in Central Pennsylvania by providing high-quality, low-cost educational opportunities, strengthening the local economy, training the region's workforce, and sharing our cultural and educational resources with the community to enable people to make the most of their potential.

The College's Wildwood Campus is located in Harrisburg; other campuses are located in Lebanon (35 miles from Harrisburg) and Lancaster (40 miles from Harrisburg), with the Gettysburg Campus located 42 miles from Harrisburg. Headcount enrollment (Fall credit) was 7,745 (Wildwood), 1,570 (Lancaster), 762 (Lebanon), and 622 (Gettysburg).

The College's priorities emphasize multicultural initiatives, workforce development, a strengthened student-centered learning environment, employee development and collegiality, and quality and consistency of standards. The College, a multi-campus institution with over 10,000 credit students, seeks enthusiastic faculty members who share a commitment to these beliefs and priorities.

TENURE-TRACK FACULTY POSITIONS AVAILABLE

All positions require a related Master's degree as specified in position announcement materials (unless otherwise indicated), a demonstrated knowledge of and commitment to the community college mission, and active involvement in collegial/committee activities and professional development activities. College teaching experience and knowledge of instructional technology are desirable. Salaries are generally between $31,000 and $34,750 for 9-1/2 month positions and between $38,700 and $43,388 for 12-month positions based on experience and education. All positions and salaries are pending Board approval. Excellent fringe benefits. Application review begins February 21, 2000. Position Identification Numbers follow each position title.

East Stroudsburg University of Pennsylvania

OFFICE OF SOCIAL EQUITY

East Stroudsburg University of Pennsylvania (ESU) invites applications and nominations for the position of Director of Social Equity.

Founded in 1893, East Stroudsburg University, with an enrollment of 6,000 students, is one of 14 universities in the Pennsylvania State System of Higher Education. The University is located in the Pocono Mountains of northeastern Pennsylvania, 75 miles west of New York City and 100 miles northeast of Philadelphia.

The Director of Social Equity reports directly to the President of the University. The Director will work closely with the University community to develop programs that will enhance social equity on campus and will serve as an advocate for all its members. The Director’s office will monitor, coordinate, and assure compliance with Federal and State laws, and University affirmative action and equal opportunity employment policies. These policies include but are not limited to regulations, and guidelines for all categories of employees and students at the University. The Director will also be responsible for coordinating investigations of social equity issues and complaints of discrimination and harassment.

REQUIREMENTS:

- A minimum of a Master’s Degree
- A minimum of three years’ experience in social equity, affirmative action, and ADA preferably in higher education.

PREFERENCES:

- A demonstrated understanding of the higher education culture
- Experience working with federal and State agencies
- Experience with assessment and monitoring of an Affirmative Action Plan
- Understanding of statistical reporting and working knowledge of computer software

ESU is an equal opportunity employer. Minorities and women are strongly encouraged to apply. Visit our homepage at www.esu.edu

ASSOCIATE PROVOST

California State University, Fresno is seeking an outstanding individual to serve in the capacity of Associate Provost.

The Associate Provost reports to the Provost and:

- Provides academic leadership for institutional planning and oversight for institutional research, assessment, evaluation, accreditation, and program reviews;
- Integrates and communicates data analysis pertinent to curricular and academic issues;
- Fosters cooperation, innovation, and the enhancement of faculty development and student learning including distance education, and supervises the campus Center for the Enhancement of Teaching and Learning;
- Supports the University role in teacher preparation;
- Coordinates the University catalog and academic calendar, undergraduate program review, student outcomes assessment, and the approval process for new and revised academic courses and programs;
- Serves on various faculty and administrative committees and assumes other responsibilities as directed by the Provost.

Qualifications:

The successful candidate must have:

- An earned doctorate in an academic discipline taught at the University;
- An established record of teaching and scholarly activity;
- Three years of successful experience in academic administration and/or three years successful experience in the management of programs appropriate to the position;
- Demonstrated knowledge of institutional research and data management practices;
- Demonstrated specific knowledge of the public and regional comprehensive university and the ability to frame arguments and positions of support for the mission of such a university.

The Associate Provost must possess and have a demonstrated record of the ability to work effectively with faculty, administrators, staff, students, and the general public, from diverse ethnic, cultural, and socioeconomic backgrounds, and should be able to work with a high level of energy.

Candidates are encouraged to visit the campus website at http://www.csufresno.edu.

Correspondence, applications, and confidential papers should be sent to:

Dr. Priscilla Chaffe-Stengel, Chair
Associate Provost Search Committee
California State University, Fresno
5241 N. Maple MS TA/54
Fresno, CA 93740-8827
Phone: (559) 278-2636
Fax: 278-7987
Email: patrich@csufresno.edu

Open Until Filled: To ensure full consideration, applicants are encouraged to have all application information on file by February 25, 2000.
FACTOR Positions

Founded in 1953, Florida's first public community college, Palm Beach Community College is a comprehensive two-year institution with four locations serving a large and diverse population in South Florida. The college's mission is to provide an accessible and affordable education through a dedicated and knowledgeable faculty and staff, a responsive curriculum, and a strong community partnership, which together will enable students to think critically, demonstrate leadership, develop ethical standards, and compete effectively in the global workplace.

PBCC offers associate degrees for transfer to four-year colleges and for entry into the workforce. The college also offers certificate level occupational programs and continuing education courses. We are a premier teaching and learning institution in a highly desirable place to live.

We invite applications for the following faculty positions:

- Accounting
- Anatomy and Physiology
- Art
- Chemistry
- College Writing
- Computer Science
- Economics
- History
- Mathematics
- Political Science
- Nursing
- Speech
- Spanish
- Theatre
- Sociology

A Master's degree in teaching field or a Master's degree with 18 graduate semester hours in field is required. Teaching experience is preferred.

- English Prep
- ESL
- Math Prep
- Reading
A Bachelor's degree in field and teaching experience in field or graduate training in remedial education is required. Teaching experience preferred.

- Electronics
An Associate of Science or an Associate of Arts degree in field with work experience in electronics required.

- Professional Pilot Technology

DIRECTOR, OFFICE OF STUDENT DEVELOPMENT

COLUMBIA COLLEGE CHICAGO has recently renewed its institutional commitment to improving the academic performance and persistence of its new students, and has allocated impressive College resources to the creation of a new Office of Student Development. The Office was conceived to manage an array of new and improved services and programs that will assist new freshman and transfer students in making a successful transition into Columbia's unique community of artists and scholars.

Responsibilities will include revamping the Summer Bridge Program, new student orientation, freshman advising, services for special populations, early intervention with at-risk students, and developing partnerships with the College's student service offices, academic departments, Freshman Seminar Program, and Developmental Education. The Director of Student Development position offers a unique and exciting opportunity to create a new, student-centered service department.

Prior experience and a successful record in the development and management of college-wide initiatives encouraging student development, a Master's degree and a minimum of five years experience is required. The ability to establish strong collaborative relationships, as well as knowledge of the latest developments in student development theory and practice, is essential.

Columbia College is a diverse, open admissions, urban institution of 6,800 undergraduate and graduate students emphasizing arts and communications in a liberal education setting.

We offer a competitive salary and excellent benefits package. Minority and Women applicants are especially encouraged to apply. Please send letter of application and resume. For more information, see web page http://www.colum.edu/home.html.

To learn more about Rutgers University and its Affirmative Action Program, go to http://www.rutgers.edu/hr/careers.html.
Anticipate an exciting future at Cuyahoga Community College, a 2-year institution with three modern campuses. Nationally recognized as a leader in innovation, technology and workforce development, the college is a co-founder of the prestigious League for Innovation, a consortium of the country’s most technologically advanced and innovative two-year colleges.

Campus President/College Vice President
Western Campus

This leader will provide executive-level vision, academic leadership and direction to the Western Campus of Cuyahoga Community College as its Chief Academic and Administrative Officer. The Western Campus has a current enrollment of 10,000 students and is the largest of three Campuses within the College District.

We'll look to this visionary to plan, direct, manage and evaluate the instructional, student development and support service programs of the Campus, while using a collaborative leadership style. This role includes responsibilities for preparing and managing the Campus budget and undertaking resource development initiatives to support existing and emerging programs. In addition, the qualified candidate will be responsible for recommendations concerning campus faculty, staff and administrative personnel for their productivity and performance.

The Campus President/College VP will serve as a member of the College Cabinet, providing college-wide leadership for specific programs and functions as assigned by the Executive Vice President for Academic and Student Affairs. This contributor will use a matrix approach within a multi-campus district to coordinate activities of the central district office with the Campus, as well as provide strategic outreach support to Campus service areas.

Qualifications include a doctorate degree and progressively responsible administrative experience in higher education. Teaching experience is preferred, particularly at the community college level. Sensitivity to diverse issues within the community and an ability to promote information technology applications to teaching/learning and administration are desired. Evidence of effective leadership in supporting community economic development and workforce training and the ability to work effectively within and across community institutions are desirable, as is a demonstrated record of building strong programs to increase enrollment and address student and community needs.

Application review will begin February 14. The search will remain open until filled. The College offers excellent compensation and benefits package. Interested applicants should submit a current resume, a statement of your view of the role of a comprehensive community college, photocopies of transcripts for all earned degrees, a list of three employment/professional references, and an Employment Application Form. The application form will be forwarded with a letter acknowledging receipt of application materials. Submit materials to:
Director-Staffing/HOII, Human Resources, Cuyahoga Community College, 700 Carnegie Avenue, Cleveland, OH 44115. Fax: 216-987-4799.

ascular Education - Bachelor's degree with 18 graduate hours in physical education. Reference #02187

GENERAL INFORMATION

Established in 1972, NHMCDD comprises four comprehensive colleges (North Harris, Kingwood, North Central, and Tomball), five modern outreach centers, and a university center (a consortium of six state universities offering upper level undergraduate and graduate degree programs). The 1,100 square mile college district is located in the northern suburbs of Houston, Texas, serving a population in excess of 1 million. NHMCDD serves 24,000 credit and 10,000 continuing education students each long semester. NHMCDD is recognized for the quality of its educational programs and is considered a leader in technological innovation.

TOMBALL COLLEGE

Chemistry - Bachelor's degree or equivalent in chemistry or a related field. Reference #02188

Computer Information Systems (Networking) - Bachelor's degree in computer science or related field. Reference #02189

Mathematics - Master's degree in mathematics. Reference #02190

Music - Bachelor's degree in music. Reference #02191

Physical Education - Bachelor's degree in physical education. Reference #02192
education certification or willingness to obtain within one year as professional development. Proficiency in MS Office software packages. Ability to integrate and use technology in the classroom. Preference: Educational preparation in physical education beyond the Master's degree. Distance education certification or training. Community college teaching experience. Prior active in grant writing and community organizations. Reference #01076

Speech - Master's degree with 18 graduate hours in speech or applicable communications courses. Preference: experience teaching college level speech. Community college teaching experience. Ability to apply technology to student learning. Rhetorical approach to speech arts supported by practical experiences. Reference #01019

Sociology - Master's degree with 18 graduate hours in sociology. Preference: community college teaching experience and the ability to apply technology to student learning. Reference #01018

MONTGOMERY COLLEGE

Biology (Two positions) - Master's degree with 18 graduate hours in the field of biology that would enable the candidate to teach general biology for majors and non-majors, microbiology, and human anatomy and physiology. Ability to teach in the area of biotechnology a plus. Preference: ability to work as team member. Commitment to a learning-centered environment and the use of computer technology. Reference #01014

Computer Information Systems - Master's degree or equivalent in an appropriate field. MSCE, CNA, CCNA certification or willingness to obtain certification within two years. Three years teaching experience. Preference in PC hardware and application software packages. Experience in curriculum design and development. Preference: Industry experience. Community college teaching experience. Distributed learning course delivery experience. Active in professional and community organizations. Reference #01019

English (Two Positions) - Master's degree with 18 graduate hours in English. Experience or training in teaching reading is preferred and experience or training in the teaching of writing classes is essential. Reference #01013. Portfolio is requested with original application. Portfolio content is located at http://job.nmccd.edu

Foreign Languages - Master's degree with 18 graduate hours in Spanish. Three years teaching experience. Knowledge of cultural differences among Spanish-speaking countries. Knowledge of utilizing technology in teaching foreign languages. Preference: Community college teaching experience. Experience with study abroad programs. Additional 18 graduate hours in another foreign language. Distributed learning course delivery experience. Active in professional and community organizations. Reference #01014

Geology - Master's degree with 18 graduate hours in geology. Ability to teach in a broad range of geology areas including physical, historical, and environmental geology. Teaching experience Ability to use computer technology. Ability to teach in an area of geology. Ability to work as a team member. Interest in developing a learning-centered environment. Reference #01019

Government - Master's degree with 18 graduate hours in political science. Preference: Master's or Doctoral degree in political science with emphasis in American politics. Community college teaching experience. Desire to teach in a learning-centered environment. Reference #01016

History - Master's degree with at least 18 graduate semester hours in history. Preference: Master's or Doctoral degree in history with emphasis in American history. Community college teaching experience. Desire to teach in a learning-centered environment. Reference #01017

International Business / Economics - Master's degree with 18 graduate hours in economics. Teaching economics, management, marketing and international business courses. Three years teaching experience. Experience in curriculum design and development. Preference: Industry experience. Community college teaching experience. Distributed learning course delivery experience. Additional 18 graduate hours in management, marketing, and/or international business. Active in professional and community organizations. Reference #01018

Librarian - Master's degree in library science from an ALA accredited institution. Minimum of one-year professional library reference experience. Experience with using technology in a library or educational setting. Experience with electronic databases. Web page development/maintenance helpful. Familiarity with Microsoft Office products. Coursetwork in education or teaching desired. Reference #01022. Portfolio is requested with original application. Portfolio content is located at http://job.nmccd.edu

Math - Master's degree in math including a minimum of 18 graduate hours in math with ability to teach developmental as well as college transfer classes. Preference: experience at the community college level teaching a full spectrum of courses is highly valued in this selection. Reference #01019. Portfolio is requested with original application. Portfolio content is located at http://job.nmccd.edu

Philosophy - Master's degree with at least 18 graduate semester hours in philosophy. Preference: Master's or Doctoral degree in philosophy plus a second teaching field. Community college teaching experience. Desire to teach in a learning-centered environment. Reference #01020

Speech (Two Positions) - Master's degree with 18 graduate hours in speech. Preference: experience or training in teaching business speech. Reference #01021. Portfolio is requested with original application. Portfolio content is located at http://job.nmccd.edu

Application Process

Review of materials will begin 2/23/00 and all positions will remain open until filled. Applicants should submit a letter of application specifically addressing the qualifications including the job title and while a resume, extended resume, names, addresses, and telephone numbers of five professional-related references plus copies of transcripts of all college work. If applying for multiple positions a separate cover letter and application material should be submitted for each position for which you are applying. Unless portfolio is requested with initial submission, candidates will be screened from these materials and finalists will be asked to submit complete portfolios for Montgomery Community College positions. Applicants with foreign credentials should submit a US transcript evaluation. Material may be mailed, faxed or forwarded electronically to North Harris Montgomery Community College District, Human Resources, 250 N. Sam Houston Parkway E. Houston, TX 77060 or Fax 281-250-3186 or email jobs@nhmccd.edu. For more information visit our web site: http://job.nmccd.edu

COME WITH US AT...

The fastest-growing college in Ohio, Owens Community College is a public, state-assisted, two-year institution of higher education. On its two campuses in the Toledo area and Findlay, Ohio, Owens Community College serves more than 16,000 students with over 100 career-oriented programs and majors in Agriculture, Business, Public Service, Health, Industrial and Engineering Technologies, as well as the first two years of a bachelor's degree. In addition Owens offers a variety of specialized credit and non-credit programs through the Center for Development and Training.

We currently are seeking applicants for the following positions on our Toledo-area Campus.

Position              Desired Hours
Director, Public Relations & Marketing 2-18
Executive Director, Institutional Advancement 2-18
Executive Director, Student Development 2-18

To request application materials, please contact:
Human Resources, Owens Community College, P.O. Box 10,000
Toledo, OH 43699-1947, 419/661-7292. Please specify position

Affirmative Action/Equal Opportunity Employer

PACE UNIVERSITY SCHOOL OF EDUCATION

ANNOUNCEMENT OF TENURE TRACK FACULTY POSITIONS IN SPECIAL EDUCATION AND READING FOR FALL, 2000

Pace University School of Education invites application for three tenure track faculty positions for our graduate and undergraduate inservice and preservice programs in Special Education (one New York City Campus and one Westchester Campus), and one in Reading (Westchester Campus), to begin September 2000. Candidates must have K-12 experience, preferably in urban schools and should demonstrate a record of successful scholarship in their disciplines.

Pace is an affirmative action/equal opportunity employer. Consistent with our commitment to a diverse faculty, applications from persons of color are strongly encouraged. Please find a full description of the position and our programs, additional information about eligibility requirements, and application procedures at our web site: http://www.pace.edu/education/.
BRYN MAWR

SENIOR ADMINISTRATIVE OPPORTUNITY

Bryn Mawr College, a distinctive and highly selective liberal arts college located in the suburbs of Philadelphia, seeks applications and nominations for the new position of:

DIRECTOR OF DEVELOPMENT

Reporting to the Chief Advancement Officer of the College, the Director will provide leadership and oversight to the College's development program, and serve as member of the CAO's core management and campaign planning group. The Director will work with the CAO to achieve increasing integration of the giving programs in anticipation of the College's largest capital campaign, now in the planning stage.

Specific responsibilities include oversight of the day-to-day operations of the Resources (development) Office, supervision of the four senior directors and their respective programs (annual giving, major gifts, corporate and foundation relations, planned giving), and organization of a principal gift program (including management of a portfolio with some of the College's most important donors and prospects).

Working closely with the CAO, the Director of Development will establish individual and programmatic goals for the campaign, monitor progress to those goals, and provide annual performance evaluations for each program and its director. The Director will work in conjunction with other leadership committees related to the Campaign.

Requirements include the minimum of a bachelor's degree, minimum of ten years of progressively responsible experience implementing and managing comprehensive fundraising programs with at least three years of supervisory experience. Preference given to candidates with significant experience in institutions of higher education, academic health centers, or major arts institutions. Prior experience in a capital campaign is required, as well as prior experience in and comfort with volunteer-rich fundraising programs. Candidates must demonstrate experience in and understanding of the full range of development programming including cultivation, solicitation and stewardship of significant gifts from individuals and organizations; program planning and development; systems, including prospect research, gift administration, personnel management, program budget management. Candidates must have the ability to work comfortably and closely with senior administration, faculty, and lay leadership including trustees. Excellent organizational, written and spoken communication skills; demonstrable ability to handle multiple tasks with varying deadlines, and to work under pressure. A sense of humor, familiarity with and understanding of the issues facing higher education are necessary.

The successful candidate will receive a comprehensive compensation/benefit package and be part of an environment conducive to professional and personal growth. For immediate consideration please send cover letter, resume and list of three professional references to Human Resources, Bryn Mawr College, 101 N. Merion Ave., PA 19010-2899. EOE. M/F. Materials received on or before February 18, 2000 will be

Princeton University

DIRECTOR OF THE PROGRAM IN TEACHER PREPARATION

Princeton University invites applications and nominations for Director of the Program in Teacher Preparation. Grounded in strong liberal arts studies and closely supervised classroom experience, the Program prepares students for elementary and secondary school teaching. It allows students to fulfill state requirements for certification within the framework of the AB and BSE degrees at Princeton. The Director serves as the vehicle for special educational programs linking the University and local schools.

The Director provides intellectual leadership and administrative direction for the Program, with a wide range of responsibilities including teaching, designing, developing, and evaluating course curriculum; supervising student teachers and staff supervisors; advising students on professional opportunities and graduate programs in education; supervising placement activities for seniors and alumni seeking teaching positions; and hiring, supervising, and evaluating administrative and support staff. As the principal point of contact between the University and the schools, the Director initiates and manages special educational programs providing preprofessional classroom experiences for Princeton undergraduates and professional development opportunities for precollege teachers.

The Director interacts regularly with faculty in academic departments at Princeton and with education faculty in other colleges and universities.

The Director is expected to have a minimum of six to eight years of professional experience with direct relevance to teacher preparation. The ideal candidate will have been both a teacher and an administrator and will have had experience at both the college or university and the elementary or secondary school level. Unusually strong candidates with more limited experience (e.g., teaching and administration only at the elementary or secondary school level, or teaching without a formal appointment) will also be considered. The Director must hold a Ph.D. or an Ed.D. with a teaching or master's degree in a liberal arts discipline and must be prepared to teach in the Program with appropriate scholarly and professional credentials. The successful candidate may also find opportunities to teach in one of the academic departments. The Director must have excellent organizational, personal, and communication skills and a substantial record of accomplishment in planning and implementing programs, solving problems, and leading colleagues in collaborative efforts. Evidence of research or clinical work on effective teaching is desirable, as is experience in writing grant proposals.

The position will be available on July 1, 2000. The review of candidates will begin immediately. For full consideration, applications should be received by February 15, 2000. Candidates should submit two copies of a letter of application and curriculum vitae and one copy of a course syllabus, short report, project plan, published article, or other written document illustrative of their work (non-refundable) to:

TRUSTEE DIVERSITY: A QUIET CRISIS

Once upon a time, members of boards of trustees were expected to be advocates for their colleges and universities. This means that they provided oversight of academic, fiscal, and student programs and articulated the community's needs to "the administration."

Of course, they also raised money, increased the endowment, and carried the institution's message far and wide to win new supporters and donors. Their most sensitive internal role was to evaluate the president and reward or replace him or her, as they saw fit.

As political power has shifted all across the nation, increasingly conservative elected officials have tended to appoint more conservative trustees.

This new breed of trustee has tended to move toward undertaking "reform" as a mission, often out of conservative ideology, and tending to eliminate shared governance, which once assured faculty of at least some voice.

The focus on ideology has politicized some systems and created a disconnection between faculty and staff on the one hand and the system-wide policy-making board on the other. In California, affirmative action-based admissions policies have been eliminated, while the City University of New York's board of trustees unilaterally eliminated remediation at the senior campuses.

In both systems, faculty and administration did not support the initiatives. One trustee in Virginia publicly announced the intention to review the catalog course by course, "to see what I don't like and what I think doesn't have a place on our campus."

Board intrusion into the curriculum is inappropriate. Areas such as remediation, women's studies, and ethnic studies have been attacked in different states from a political perspective as the climate has changed. This can chill new research and into new areas of inquiry and teaching.

The new conservatism might also be changing the role of the board in subtle ways. Boards historically assured "fairness" in all operations. Board policies were expected to assure that all sectors of the business community had fair access to institutional contracts and purchasing efforts, and that the decision was made justly.

Board policies have historically been expected to assure that diverse audiences had access to personnel vacancies, and that hiring grew out of qualifications. Where will minority communities stand, with the demise of affirmative action and minority set-asides? Some recall the days when "color blind" policies resulted in hiring of no minorities, and contracting and purchasing with no minority businesses.

Traditionally, trustees have been White and male. In 1969, only three per cent of trustees were African American. Hispanic and other minorities were not even statistically significant then.

That has improved somewhat. In 1997, 11.7 percent of trustees were African American; 22.7 percent, White; 21 percent, other minorities; and 31 percent Hispanic. But the fact that Hispanic representation on boards of trustees barely now exceeds the 30 percent representation in 1986 should be a matter of grave concern.

Access and diversity are very much at risk. Heretofore it was believed that education of an individual enriched society. This justified public subsidy and investment. The conservative philosophy is that the individual educated is the beneficiary. Hence, that person should pay. Those needing help to enter or succeed higher education, thus, should not be there. The impact of current trustee selection trends on the educator of Latinos can be devastating.

The Latino bridgehead in higher education has been nurtured by affirmative action, financial aid, and institutional policies of inclusion. As these are eliminated, Latino faculty and staff representation can suffer.

Latino and African American enrollment is already plunging in Texas, California and Washington. Similar losses can be anticipated in New York. As we project a worse force that is one-third Latino and Black, current trends should concern rational people.

These "culture wars" are political. In New York, one trustee, a former let official, changed parties to align himself better with the governor and the mayor. Activist, conservative trustees are a factor in New York, Michigan, California, Virginia, Massachusetts, and a growing number of other states.

Historically, higher education has been an apolitical participant in the political process. Politicization of curriculum and admissions issues can only do damage.

As these ideological conflicts are played out in boardrooms, who will speak for the aspirations of Latino students?

Who will advocate for their access, and for the increased presence of Latino facul?

Addressed representation among trustees in all states should be the high priority for all Latino professional and educational organizations.

If interested in submitting a Punto Final "Think Piece," please e-mail us at sloutbook@aol.com for guidelines.

The Florida State University is classified as a Research 1 University by the Carnegie Foundation for Advancement of Teaching and is located in the State Capitol. The College of Education has a long and honored history as the second founded college in the University. The institution and the units hold numerous accreditations. The advanced graduate and research mission is central to the College with 21 doctoral degree programs. Undergraduate education and the cooperative improvement of K-12 education are essential to the mission.

The college seeks accomplished, motivated, enthusiastic, and energetic candidates for the following four positions:

ASSISTANT/ASSOCIATE PROFESSOR
SOCIAL SCIENCE EDUCATION
(TENURE-earning)

The Department of Educational Theory and Practice is searching for a faculty member in Social Science Education that grants Bachelor's, Masters, Educational Specialist, and Doctoral degrees. Certification component is available to students at the Masters level. The position requires teaching graduate and undergraduate courses in a field of Social Science Education program; service on departmental, college, and university committees; supervision of field experiences, involvement and service to the education community; advising undergraduate and graduate students conducting research and publishing. Minimum qualifications include: earned doctorate in Social Science Education; three years in public school teaching experience; evidence of continuous scholarly growth; ability to teach methods courses in Social Studies at secondary elementary levels; willingness to work cooperatively in collegial endeavors.

Send application package, including letter of application, current vitae, and three letters of recommendation to: Dr. J. R. Nunnstrom, Chair, Social Science Education Committee, Department of Educational Theory and Practice, 115 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4457. For further information, contact him at (850) 644-4878, (850) 644-7736, or mailto:jnunnstrom@mailer.fsu.edu. Applications for this position will close on February 25, 2000.

ASSISTANT PROFESSOR
PROGRAM EVALUATION
(TENURE-earning)

The Department of Educational Research at Florida State University is seeking a faculty member who has experience in qualitative methods of research and program evaluation. Responsibilities include teaching graduate courses in program evaluation and qualitative methods, conducting a program of research, and engaging in service to the university and profession. Minimum qualifications include an earned doctorate degree. Candidates should demonstrate potential for scholarly achievement and the ability to secure external funding for research projects.

Send application package, including letter of application, current vitae, and three letters of recommendation to: Dr. Walter Wagner, Chair, Program Evaluation Committee, Department of Educational Research, 307 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4457. For further information, contact him at (850) 644-4335, fax (850) 644-7736, or mailto:wwagner@mailer.fsu.edu. Applications for this position will close on February 25, 2000.

ASSISTANT IN PHYSICAL EDUCATION
PHYSICAL EDUCATION
(NON TENURE-earning)

The Department of Physical Education is seeking a highly motivated individual to teach full time in the teacher preparation program. This position provides an excellent opportunity to work with five faculty members in providing pedagogical instruction in a progressive clinical education setting. Candidates must have a strong background in K-12 public school teaching experience, and instructional technology expertise. Candidate must also have teaching expertise in several of the following: Instructional Methodology, Educational Games, Dance, Gymnastics, Foundations of Physical Education, Curriculum, Research Methods, Teaching Practice, and St. Teaching. Work in practice and student teaching will also involve the development of placement sites and the supervision of students at those sites. This is a 9-month appointment with a 100% teaching assignment. Minimum qualifications include Masters in Physical Education or Teacher Education; earned doctoral degree preferred.

Send application package, including letter of application, current vitae, and three letters of recommendation to: Dr. Susan Lynn, Chair, Physical Education Committee, Department of Physical Education, 122 Tilly Gym, College of Education, Florida State University, Tallahassee, FL 32306-4280. For further information, contact her at (850) 644-3607, fax (850) 644-0975 or mailto:slynn@mailer.fsu.edu. Applications for this position will close on March 31, 2000.

ASSISTANT IN RECREATION AND LEISURE SERVICES
RECREATION & LEISURE SERVICE ADMINISTRATION
(NON TENURE-earning)

The Assistant in Recreation and Leisure Services will be responsible for the internship and field work courses which will include: the organization and administration of these courses, the placement and supervision of students, the evaluation of student performance, the identification and evaluation of quality internship and field work and travel for student visitation. Responsible for teaching an introductory course and others as needed and assigned. The coordination, organization, and advising incoming undergraduate majors will also be a responsibility of this position, along with the advisement of the student majors' club. Minimum qualifications include earned Master's degree in Leisure Services, Recreation, or Parks.

Send application package, including letter of application, current vitae, and three letters of recommendation to: Dr. Julie Dunn, Chair, Leisure Search Committee, Department of Human Services and Studies, 215 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact her at (850) 644-4244, fax (850) 644-7736, or mailto:jdunn@garnet.acms.fsu.edu. Applications for this position will close on February 25, 2000.

Completed packages will include a thorough letter of application documenting interest and qualifications; a current vita, sample publication, transcript, names, addresses and telephone numbers of five references who may be contacted. Positions will begin no later than August 20, 2000.

The Florida State University is an equal opportunity, affirmative action employer and women, minorities, and individuals with disabilities are strongly encouraged to apply.

The Digital Divide and Hispanics

By Gustavo A. Mellander

The National Telecommunications and Information Administration has released "Falling Through the Net: Defining the Digital Divide"—its third report examining which American households have access to telephones, computers, and the Internet, and which do not.

The "digital divide"—the gap between those with access to new technologies and those without—is now one of America's leading economic and civil rights issues. The report clearly points out that Hispanics and Blacks are falling further behind.

Information tools, such as the personal computer and the Internet, are increasingly critical to economic success and personal advancement. But in many instances, the digital divide has widened in the last year.

This report provides an updated snapshot of how "wired" we are as a nation.

The good news is that Americans are more connected than ever before. Access to computers and the Internet has soared for people in all demographic groups and geographic locations.

At the end of 1998, more than 40 percent of American households owned computers, and one-quarter of all households had Internet access. Additionally, those who were less likely to have telephones (chiefs, young and minority households in rural areas) are now more likely to have telephones at home.

Accompanying this good news, however, is the persistence of the digital divide between the information rich (such as Whites, Asians/Pacific Islanders, those with higher incomes, those more educated, and dual-parent households) and the information poor (such as those who are younger, those with lower incomes and education levels, Hispanics and Blacks, and those in rural areas or central cities).

The report reveals significant disparities, including the following:

- Households with incomes of $75,000 and up are more than 20 times more likely to have access to the Internet than are those at the lowest income levels, and more than nine times as likely as a White household.
- Whites are more likely to have access to the Internet from home than are Hispanics or Blacks from any location. Hispanic and Black households are approximately one-third as likely to have home Internet access as are households of Asian/Pacific Islander descent, and roughly two-fifths as likely as White households.
- Regardless of income level, Americans living in rural areas are lagging behind in Internet access. Indeed, at the lowest income levels, those in urban areas are more than twice as likely to have Internet access than are those earning the same income in rural areas.

For many groups, the digital divide has widened as the information "haves" outpace the "have nots" in gaining access to electronic resources. The following findings with regard to home Internet access are representative:

- The gaps between White and Hispanic households and between White and Black households are now more than six percentage points larger than they were in 1994.
- The digital divide based on education and income level have also increased in the last year alone. Between 1997 and 1998, the divide between those at the highest and lowest education levels increased 25 percent, and the divide between those at the highest and lowest income levels grew 29 percent.

Nevertheless, the news is not all bleak. For Americans with incomes of $75,000 and up, the divide between Whites and Blacks has actually narrowed considerably in the last year.

This finding suggests that the most affluent American families, irrespective of race, are connecting to the Net. If prices of computers and the Internet decline further, the divide between the information "haves" and "have nots" might continue to narrow.

Until every home can afford access to information resources, however, we will need public policies and private initiatives to expand affordable access to those resources. Plans are under way to include all Americans in the National Information Infrastructure, a project that would connect all households.

Pro-competition policies, to reduce the prices of basic phone and information services, and universal service policies will be important parts of the solution.

Community Access Centers (CAGs)—such as schools, libraries, and other public access points—will play an important role. The data: demonstrate that community access centers are particularly well used by those groups who lack access at home or at work.

These same groups (such as those with lower incomes and education levels, certain minorities, and the unemployed) are also using the Internet at higher rates, to search for jobs or take courses:

Providing public access to the Internet will help them advance economically, as well as provide them with the technical skills to compete professionally in today's digital economy.

Establishing and supporting community access centers, among other steps, will help ensure that a Americas can access new technologies. As we enter the Information Age, access to computers and the Internet is becoming increasingly vital. It is in everyone's interest to ensure that no America is left behind.

The report provides a wealth of information that can be used by policy-makers, researchers, academics, and the general public.

The entire report can be obtained through NTIA's Web site: www.ntia.doc.gov, or you may contact NTIA's Office of Public Affairs at (202) 482-7002 for further information.

Dr. Mellander is professor, George Mason University.
Celebrating Hispanic Colleagues

NMSU Colleague Zárate Endows Scholarship

by María G. Cortez

As the new millennium was approaching, the Hispanic Faculty/Staff Caucus (HF/SC) at New Mexico State University (NMSU) focused on the achievements and accomplishments of several Hispanics associated with and/or employed by this university and on the legacy that one of them has established for helping NMSU students step through the threshold of this Hispanic-serving institution.

Dr. Narcisa Zárate

Dr. Narcisa Zárate, formerly employed by NMSU as associate director in the office of Chicano Programs, was one of those outstanding people acknowledged by HF/SC “in appreciation and recognition of her dedication to the educational achievement of Hispanic students at New Mexico State University.”

Richard Silva, Doña Ana Branch Community College, noted that “Narcisa was a great supporter of the branch in its early years of establishing the college and throughout her years of employment at NMSU. We could always depend on her for enrollment information for students wishing to transfer or enroll at the main campus.”

Dr. Mala González, NMSU College of Education, remarked that “back in 1980 when she was in the program of Educational Management & Development, there were only three Hispanic women throughout the NMSU campus: Drs. Zárate, Rossalinda Barrera, and Guadalupe Valdez. Narcisa always has been a role model and a supportive participant in community activities.”

Dr. Zárate was employed by NMSU from the late 1970s to the late 1980s, when she had to take early retirement to care for her ailing mother. In addition to serving as associate director of Chicano Programs, she taught a class in the College of Education. Some of her 100 students remarked that she was their first Chicana professor.

Zárate recently established the Dr. Narcisa Zárate Endowed Scholarship. This is a full scholarship, and it will be awarded each semester.

Dr. Esteban Herrera, NMSU College of Agriculture, pointed out that with the establishment of the Dr. Zárate Endowed Scholarship, “Narcisa can be looked upon as a Hispanic ‘trail blazer’ who can serve as an encouragement for other Hispanic NMSU faculty as retirement approaches ‘because there is always a need for scholarships for Hispanics.’ This is especially true of NMSU, a Hispanic-serving institution with a population of more than 5,000 Hispanic students—nearly one-third of the total NMSU student population.

When asked what prompted her to establish this scholarship, Dr. Zárate remarked that it probably was sparked by a vow she made to herself many years ago when she worked to support six family members while attending the university. After she completed her master’s degree, her university advisor urged her to continue toward a doctorate.

She stated: “I swore then that I would never go back to school without some kind of financial aid.” So, while working at the NMSU Campus in Grants, New Mexico, under Dr. Carl Westbrook, director of that campus, she obtained a fellowship from the U.S. Department of Education.

“Being the stubborn individual I am, I did not settle for the limitations the fellowship placed. The fellowship was for a degree as education specialist. I wanted a doctorate, so the director, another student, and I requested the U.S. Department of Education give us the option of a doctorate. The request was granted, and five out of the 17 who received the fellowship took the doctorate option. Two of those five completed the degree.
Judy English and I,” she recalled.

Dr. Zárate’s involvement in education dates back to 1950 when she taught at Gadsden High School in Anthony, New Mexico. Most of her students were low-income, as indeed they still are at Gadsden. In the late 1950s, she taught in Camuillo, New Mexico. Then in the early 1960s, she taught in The Azores (mid-Atlantic islands) while employed by the U.S. Air Force. In the mid-60s, she taught in the Panama Canal Zone through the U.S. State Department, returning in the late ’60s to New Mexico to teach at New Mexico State School in El Río. In the early 1970s, she worked at NMSU-Grants as financial aid officer/counselor, and also taught psychology. Her areas of teaching were business, social studies, and the English and Spanish languages.

With that kind of career background, it is little wonder that the idea of an endowed scholarship would gradually evolve. In spite of her busy schedule and daily commitments, Dr. Zárate has always devoted time to community activities and volunteer service.

“Often times, face to face with the struggles of balancing family, work, and studies myself,” she said, “this made me more aware of how other Hispanics also struggle to do the same balancing in order to be more successful in life. That led to my desire to one day make a significant contribution that would help other Hispanic students get a college education.”

Indeed, her contribution is significant, and all the more outstanding since it is the first time that a former Hispanic female employee of New Mexico State University has established an endowed scholarship. This gesture deserves high acclaim and gratitude from the New Mexico-born Hispanic students who will attend NMSU in years to come.

Since the establishment of this scholarship, two NMSU students have been awarded the Narcisa Zárate Endowed Scholarship. The recipient of the Fall 1999 award was Peter R. Barbo. A junior seeking a degree in government and international business, Barbo was doing a summer internship through the U.S./Mexico Chamber of Commerce in Mexico City when he was notified of his award. He is a Crimson Scholar and a highly motivated student who says that “motivating students to overcome the obstacles we face is one of tasks as a club officer.”

The recipient of the Spring 2000 Narcisa Zárate Scholarship was NMSU sophomore Michael P. Wood. In his essay, Wood stated that his “motivation for applying for the Dr. Narcisa Zárate Endowed Scholarship is based on my ambitions and aspirations plus financial need, and on the fact that there is underrepresentation of Hispanics in the engineering and scientific community in the United States.”

Another noteworthy scholarship established by employees of NMSU is the Hispanic Faculty/Staff Caucus Scholarship, awarded to qualified Hispanic students each year since the 1960s. The Hispanic employees of NMSU, scions of the need to increase the number of Hispanic graduates and leaders who can become among our nation’s effective leaders and decision makers, contribute what they can to this fund either directly or through roll deductions. Recipients in the past two years include Gabriela Peña junior who is a Crimson Scholar majoring in elementary/bilingual education. Peña’s personal goal is “to make a positive difference in the lives of children who are less fortunate.”

Cyrus Salazar

The other individual celebrated by the Hispanic Faculty/Staff Caucus was graduate Cyrus (“Cy”) Salazar, Hispanic student elected to the Associated Students of New Mexico State University (ASNMSU) 19th presidential term. The last Hispanic student elected to this post was in 1988-89. Salazar fulfilled his role in a truly admirable fashion and was the voice of the NMSU student body at the Board of Regents Commission on Higher Education and at the ASNMSU branch campus.

Salazar commented that his position required long hours of work and had been very rewarding contributing tremendously to his learning experience. It led him to involve with the university administration and with community—always with the interests of NMSU students in mind. Salazar completed a summer internship with the U.S. Department of Agriculture through placement by the Hispanic Association of Colleges and Universities, of which NMSU is a member. During his tenure in Washington, Salazar had the opportunity to contact and visit with Dr. Miley González who was appointed by President Clinton as Secretary of Agriculture.

New Mexico State University
NOTABLE ACHIEVEMENTS

The Hispanic Faculty/Staff Caucus celebrated other accomplishments as well.

Tenureship recipients at NMSU in 1998-99 included:
- Elizabeth Gutierrez, Doña Ana Branch Community College
- Elba Serrano, Biology
- Antonio Lara, Chemistry
- Erendina Vasquez, Counseling & Educational Psychology
- Luis A. Vasquez, Counseling & Educational Psychology
- Robert Paz, Electrical Engineering
- Daniel Villa, Language & Linguistics
- Ana Huerta Macias, Curriculum & Instruction

Significant projects funded in 1998:
- Dr. Carmen Gonzales, Curriculum & Instruction, Kellogg Foundation
- Dr. Antonio Lara/Robert Marquez, Chemistry, El Paso Community Foundation and the U.S. Environmental Protection Agency

Teaching Excellence Award 1998:
- Dr. Elba Serrano, Biology

Outstanding Professor Award - 1998-99:
- Dr. Esteban Herrera, Ag Science Cooperative Extension
- Dr. Antonio Lara, Chemistry/Biochemistry
- Dr. Larry Lucero, Social Work Department
- Dr. Marie Mora, Economics Department

The list of those celebrated is by no means all-inclusive. Many other Hispanics deserve to be included, and in the course of the next year, there will be other opportunities to join together in celebrating outstanding faculty and personnel employed at New Mexico State University.

As a Hispanic-serving institution, NMSU has been a member of the Hispanic Association of Colleges and Universities for several years now. In 1997, HACU held its first annual conference on environmental issues and topics, in cooperation with the Department of the Interior, and hosted by NMSU. The annual event has continued to attract increasing numbers of attendees and participants, especially students. So far, it has been held at a different location throughout the United States each year, hosted by a different university or agency member of HACU.

Maria Cortez was assistant director of NMSU Chicano Programs from August 1997 to December 1999. She is currently employed by the New Mexico Space Grant Consortium (NMSGC) at NMSU. Among its activities, NMSGC serves as a source of scholarships and project funding for New Mexico students enrolled in science, engineering, math and technology courses or programs.
The University of Southern California was not Grace Gacutan's original choice for secondary education. She had pinned her hopes on Boston University but found administrators there unwilling to deal her a fruitful financial aid package.

So the South Pasadena native shifted her sights from the East Coast to her backyard, although still with some reluctance.

"Growing up, I abhorred USC because I was a major UCLA fan. I did not get accepted to UCLA, so I went to its rival, USC," she says, and, the senior quickly notes, "I do not regret it one bit."

At USC, Gacutan says, she learned more than lessons in the classroom; she also learned lessons about life. The school focuses heavily on volunteerism and on getting students involved in the surrounding community. It's this message, for instance, that spurred her to coordinate a trip to Monterey to discuss homelessness in America.

"I was unable to go on with my life thinking that everyone in the world has a fair chance of becoming successful," says Gacutan, who is Filipino.

That type of awareness—of society outside the college walls—has embraced many students at USC in recent years. And it recently caught the eye of the 2000 edition of the Time/Princeton Review College Guide, which anointed USC as its "College of the Year."

Editors of the annual guide selected the 15,000-undergraduate-student university for not only has the 'hood dramatically improved, but so has the university," USC, they said, "has done to be different, in making a difference—and its success has spread beyond its ivy-draped walls."

And in 1998, General Co Powell's America's Promise honored USC as the "University of the Year" for similar reasons.

Such designations buttress their contention: undergraduate applications have nearly doubled in the last few years, SAT scores have risen by 200 points, and endowments given to the school have more than doubled, to 15 percent.

At the heart of USC's community outreach is a respectful partnership between the university and people, organizations, and institutions around us," says St Sample, USC's president. "All have been working hard to achieve c
mon goals—great public schools, a safe and attractive environment, and economic and academic opportunity.”

Added Sam Mark, assistant vice president for community relations: “This was a validation that our community work is worthwhile, that what we’ve been doing in the community is recognized nationally. I was delighted when I heard the news because at a private university, sometimes community service is not a priority for some people.”

It’s been a priority for the school for some time now. More than half of the undergraduates volunteer in some way—amassing 350,000 hours of volunteerism in the last academic year—and more than three dozen classes each semester award credit to students who volunteer. An estimated 1,700 students have chosen that route.

Sample assessed the school’s more than 200 outreach programs when he first landed there eight years ago, and he surmised that it was biting off more than it could chew. To be successful, it needed to focus more specifically on certain outreach endeavors and focus more heavily on certain geographic areas. In essence, it needed to effect change in its backyard.

Even three decades ago, the value of community involvement was stressed on the campus. Mark, who has earned three degrees at USC, spent his undergraduate years arranging cultural events and inviting the surrounding Latino community to attend.

The community was not always involved in the school, and the surrounding neighborhood is largely Latino. Fifty-four percent of residents in the neighborhood are Latino, and 29 percent are African American, while 12 percent are White. Forty-four percent speak Spanish at home.

Realizing that the school was largely White and that the community did not reflect the campus, Mark created the College of Arts and Science’s Office of Hispanic Programs.

He met with middle school-aged Latino students to advise them on college prep skills and to motivate them to seek higher education. “At the height of my work, I had a database of 55,000 Latino students across the nation,” Mark says.

“In general, I think that private institutions have to fight the perception that they are inaccessible because of the expense. USC is no exception,” he says. “We face that today. We constantly tell kids that if they work hard in school, they can come here. If the kids work hard and get good grades, even if the family didn’t have enough money, they could make it.”

Mark, who has since published eight editions of the Directory of the Hispanic Community of the County of Los Angeles, now works with one of the university’s most acclaimed outreach projects.

Called “Family of Five,” the program began in 1994 in an effort to transform five nearby schools with 8,000 students—most of them Latino—into the brightest lights in the neighborhood.

More than 1,000 students at USC volunteer at the schools, three of which are elementary and two, kindergarten through 12th grade. The undergrads tutor the kids, work with them in after-school programs and sports clinics, and teach them about everything from science to literature.

“We prefer to say we do the work with them,” instead of adopting them, Mark says. “The whole model is a partnership model. We respond to a school’s request for assistance and try to work with them to come up with solutions.”

Parents and administrators at the schools identified areas of trouble, which USC then attempted to address. The two key concerns were a lack of after-school activities and criminal activity in the neighborhood. So now, about 1,000 students at the schools receive tutoring through a USC Readers Project, and more than 6,000 take part in after-school sports and performing and visual arts programs.

“We also bring kids to the campus for sports like swimming and golf,” Mark says.

The project has already produced signs of success. Ninety-eight percent of the 1998 graduates at one of the schools was accepted into college. Attendance has soared. Two of the schools were designated as California Distinguished schools, considered in the top 10 percent of all public schools in the state.

As for safety, USC has created a much-heralded “Kid Watch” program. Parents feared their children could be victimized by crime on the way to and from school, and so USC worked with local law enforcement to assemble an army of residents along the way.

Six hundred residents in the 3.4-square-mile neighborhood position themselves outside to ensure that students safely arrive at their daily destinations. “We ask them to watch from the window or porch, and we also tell kids if they’re in trouble, to look for a decal in the window of a house or church or business and to go there to call police,” Mark says. “This has now been replicated in other parts of the city.”

University police have fanned out beyond the campus lines to monitor the surrounding streets as well. And another program dispatches volunteers to clean graffiti within 24 hours. The result of these efforts: crime has dropped 30 percent between 1995 and 1998, more than in the rest of the city.

USC’s efforts are designed as well to encourage greater numbers of local students to consider the university and to view it as accessible to them. USC started a Neighborhood Academic Initiative, which identifies sixth grade students to take classes on campus each morning.

Parents sign a contract so that
the between 30 and 60 students get academic tutoring and enrichment courses after school, and the adults attend parenting workshops and classes. If the kids successfully complete the program and then meet admissions standards, the hard work pays off: full-time four-year tuition to USC for free.

"It's a big payoff for the kids," Mark says. "They have to study and put in a lot of effort, but there's a payoff at the end. If they're accepted at USC, they get full scholarships."

Ingrained in all of the university's programs is an effort to assist the disadvantaged, or those without the same opportunities that many of the students might have had. A 170-page guide of outreach programs displays how students and faculty are involved in everything from public safety to medicine to scholarships.

The Latino and Language Minority Teacher Project, for instance, establishes a career path for practicing Latino teacher assistants to enter the profession and offers financial, social, and academic assistance. The Spanish Cultural Resource Center helps institutions and educators interested in teaching Spanish. And Fiesta Educativa organizes an annual bilingual education conference for the Latino parents of children with disabilities.

"The demographics of the city have changed and helped us to increase the number of Latinos on campus," Mark says. "We have made efforts that target long-term strategies to attract Latinos." The increase in diversity has broadened the student interest in activities.

USC now has a number of Latino, Chicano, and Mexican student groups and a strong Mexican American Alumni Association. "It's membership has become very large and successful in raising funds for scholarships," Mark says.

At the center of all these efforts is a Volunteer Center, where students routinely drop by to learn about opportunities in the area.

Besides the Family of Five project, the center organizes a Literacy Project in which staff and faculty and alumni are paired with at-risk students; a Volunteer Corps, which places students in museums, AIDS hospices, and after-school programs; and Community Action Short Term, which offers one- or two-day commitments to students with busier schedules.

But one of the most popular projects is the Alternative Spring Break program, in which students give up their spring break to volunteer for projects like cleaning up Death Valley, visiting a Navajo Indian Reservation, or assisting in a homeless shelter.

Michael King, a San Diego native who is a junior majoring in Psychobiology, works with Grace Gacutan to coordinate the program exploring homeless issues. "I have always had an interest in giving aid to the homeless," King says. "To help them, I knew I had to learn to understand them on a deeper level. The best way for me to do this was to keep getting more and more involved in activities like Alternative Spring Break."

"I get a special feeling knowing that I can make a difference," he adds. King says that he was initially attracted to the university because of its growing diversity and small size.

Addo Michelle Blanchet part-time graduate student assistant director at the Valu Center: "We are smack dab in the middle of an urban labora where students can put the thing they are being taught in the class the test in the neighborhoods live in. Our strongest asset is the community we live in."

The Time/Princeton Review, she says, helps to even misperceptions. "It means we finally been recognized for something other than our sports rivalries. It means that USC trul is something to be proud of. It is longer the University of Sp. Chlldren but the University of the Community."
students who intentionally failed their science test at Chicago’s Whitney Young High School were reported by Newsweek last September as writing, “We refuse to feed into this test-taking frenzy.”

Recent articles in both Newsweek and The New York Times Book Review have questioned the validity of the SATs and standardized testing in determining access to college.

This issue is old news for Clifford Adelman, senior research analyst for the Department of Education (DOE). “I don’t want to hear about SATs anymore! We have used the test in public discourse to block any other conversations. We need other matrices,” he told HO from his office in Washington, D.C. Having completed a very relevant and revealing research study, Adelman is “out on the pulpit” about a subject that matters much more to him than standardized tests. The subject is “curriculum,” and according to Adelman and his latest study, Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor’s Degree Attainment, it is curriculum that plays an extremely important role in determining bachelor degree completion rates for all students, and especially for Latinos.

Adelman and DOE researchers tracked students of 1,000 high schools from 10th grade in 1980 until roughly age 30 in 1993, and of their accumulated data asked the question: “What contributes most to long-term bachelor’s degree completion of students who attend four-year colleges?” The results of the study were that the correlation of curriculum with bachelor’s degree attainment is indeed higher (.54) than that of test scores (.48) or GPA (.44).

Said Adelman: “Public propaganda, when it comes to talking about who’s prepared for college and who isn’t, talks only about test scores and class rank and grades. And there is no mention whatsoever of curriculum. Yet there’s no question that curriculum beats the pants off of the other two as a predictor of finishing bachelor’s degrees. A test score is a snapshot of three hours on a Saturday morning, while curriculum is an investment of four years of work. Grades from one school to another are as reliable as a pair of dice.”

The tool box study also revealed that African American and Latino students are more greatly influenced by a high school curriculum of high academic intensity and quality than are White students. “You see that minority students and Latinos in particular are affected by high schools that don’t offer the opportunity to learn [with the right curriculum in primary courses such as math, science, and English],” said Adelman. “A good number of those high schools are located in rural areas. And since 38 percent of Latino high school graduates in the United States come out of rural high schools, Latino students are overly affected by the lack of opportunity to learn.”

The results of the study also showed that of all pre-college curricula, the highest level of mathematics one studies in secondary school has the strongest continuing influence on bachelor’s degree completion. Finishing a course beyond Algebra II more than doubles the odds that a student who enters postsecondary education will complete a bachelor’s degree. The study also revealed that only 39 percent of students who were assigned to remedial reading courses in college completed their bachelor’s degrees, whereas 60 percent of students did when they took only one of two other types of remedial courses, and 69 percent for those who never took remedial courses.

Said Adelman: “If you need remedial reading, it’s the kiss of death. Remedial reading can best be addressed by community colleges. The four-year colleges can’t do it.”

The message that Adelman and his study clearly purport is for high schools and earlier grades to effectively prepare students for college with quality curriculum, rather than providing inadequate curriculum and focusing on strong grades and test scores. “Opportunity to learn is the issue,” he said. “And curriculum is the only area [in which] you can do anything about it.”

Based on his findings, Adelman also offered the following advice for students who have matriculated into higher education and want to improve their odds for completion:

- Continuous enrollment is important. Do not stop for more than one semester.
- Earn more than 10 credits before transferring between schools.
• When dropping a course would result in penalties, it is advisable to receive a lower grade rather than drop.

• Don’t be distressed if first-year grades are not as high as you would like. It is more important to receive more than 20 credits the first year.

Adelman also sees three potential options for rectifying problems relating to ineffective curriculum offered prior to college. His answers include legal action, dual enrollment in high school and college, and college support in high school instruction.

“Colleges and universities have to get off their butts and demonstrate that they are really sincere about minority students’ success, not merely bringing minority students through the door just so the institutions look good for five minutes, but rather making sure minority students really finish,” said Adelman. “If we do the kinds of things that this study implies, then we are going to have natural affirmative action, and it’s going to happen where it counts so the kids actually finish. There is no reason now why the degree completion rates for White students who go to four-year colleges is 72 percent and that for Latino students is 20 points below that.”

Theresa Fay-Bustillos, vice president for Legal Programs at the Mexican American Legal Defense Fund, has been executing Adelman’s first bit of advice for years in an effort to obtain equality in education for Latinos. “Answers in the Toolbox is like a lightning rod,” she said. “We were thinking curriculum mattered, but we weren’t thinking it mattered that much in terms of college degree attainment. It’s reinforced our litigation practices.”

Fay-Bustillos has been filing “opportunity to learn” suits such as Rios vs. California on behalf of MALDEF. She recognizes that in many cases, Latinos are not given access to algebra in 8th grade and beyond, especially in overcrowded urban schools where only a percentage of students are “tracked” into the curriculum-rich classes while others remain unprepared for college. “If we can show that these decisions are being made where it disproportionately disadvantages Latino students, then we have a viable case,” said Fay-Bustillos. “And we do!” While she might have known all along that tracking practices are discriminatory, she said, “Until you have the research that says there’s a connection, then you can’t act upon it. The Toolbox talks about the harm that these academic choices create.”

Fay-Bustillos recognizes, however, that fighting curriculum issues is always a struggle. “Courts are very reticent to get schools to change curriculum,” she said. Fay-Bustillos then added, “This report documents that these kids can be successful, but until we fix K-12, let’s support affirmative action.”

While Adelman’s study is simply that—a study—people like Paul Ruiz of The Education Trust have taken it upon themselves to actually implement his findings in local communities. The Education Trust is a nonprofit education reform program that works with about 45 communities to set up local K-12 councils. They provide information from DOE research studies to these councils that helps them measure the effectiveness of their school systems. “We try to craft a public discourse around the data, and then we push local communities to embrace the findings and do something about it,” said Ruiz.

When Ruiz works with local districts like Pueblo, Colorado, he knows to expect “that a grade A in an urban school is a grade C in a suburban school.” “But do Mom and Dad know that?” he asks. “No....Do high school students know that?...No. They find out in college when they take remedial courses.” Ruiz then asks students and their parents whether they expect to go to college, and while a majority do, “their expectations are out of sync with their course loads.”

“Adelman’s advice that people access pro curriculum is right on target,” said Ruiz. “The key is how to make this more real to the public.”

While Ruiz will take a study such as Toolbox and use it as a benchmark for determining which courses and level of teaching required in high school to assure bachelor degree completion, he feels there are few capitalizing on DOE findings. “My worry is there are enough intermediaries who can take this wondrous work and insist that people pay attention he said. “The traditional structures are not fitting a way to embed this information into schools. Right now there is no high conception what we want our school systems to do.”

Adelman has been making his effort to the word out about curriculum by speak with the media and giving workshops: speeches throughout the country. One journalist in Detroit who spoke with 60 high school in her district discovered that few schools supplied students with adequate curricula based on The Toolbox study, said Adelman adding that the study is unique in measuring curriculum adequacy against degree completion rather than mere college entrance. “In a massive number of studies, it’s absolutely shocking to me that I found only two out of national studies out of 2,900 that used bachelor’s degree completion as an outcome variable,” he said.

Adelman’s point is to look at that which really counts and to discard factors that are providing false benchmarks for success, trying to slam some common sense into people’s minds,” he said. “We need to stop arguing about test scores and class rank and grade work on curriculum. I want to hear a portion of your entering students that beyond Algebra II in high school.” While road might seem dim, Adelman does believe that high schools are beginning to look at curriculum more carefully. And if not, he’s confident that they “are going to have to change because laws are going to push them.”
Why Bilingual Educators Get No Respect

Focus of a Long Island University Conference

BY
GARY M. STERN

Most educators in the United States, not to mention many parents, consider bilingual education to be remedial education. Like Rodney Dangerfield, no matter what bilingual educators do and no matter how much they help foreign-born students and natives master a new language, they have trouble gaining respect. But bilingual education doesn’t have to be seen as remedial, and, in fact, a recent conference showed that bilingual education can help students succeed in the 21st century.

“Bilingualism and Bilingual Literacy Through Schooling: An International Symposium,” held at Long Island University in Brooklyn, New York, for four days last July, demonstrated that bilingual education can be challenging and intellectually rewarding. Bilingual education can help students adapt to a changing global economy and teach them to appreciate their own identity and background.

“If bilingual education is seen as a program that will remediate a problem—that children don’t speak English—it won’t be an enrichment activity. In today’s global economy, bilingual isn’t adequate. We need multi-language citizens,” declared Dr. Ofelia Garcia, organizer of the conference and dean of the School of Education at Long Island University.

Attended by more than 300 people, about half of them bilingual educators and researchers from Israel, New Zealand, Belgium, Spain, Haiti, Germany, Scotland, Great Britain, Australia, Paraguay, and Hong Kong, the conference showed that “there are many societal uses all over the world for bilingual programs.” The chief reason is to make sure that children are bilingual,” said Garcia. Several speakers presented papers from polyglot countries demonstrating that educating multi-language students is an achievable goal that could be duplicated in the United States. “The conference showed that bilingual education should be viewed as an enrichment program, not as compulsory education. Language is something that should be developed—not eliminated.”

“Education policy writers ought to put as much emphasis on language as they do on math and science if we’re going to be competitive in the world,” said Nancy Zelasko, research scientist at the National Clearinghouse for Bilingual Education, a federally funded research center and a conference speaker.

But in the U.S., a bias against bilingual education has damaged its image and educational reputation. “We as a nation,” Dr. Garcia asserted, “believe it’s not possible to have multiple language identities. You can be a loyal U.S. citizen and have multiple language identities.” In the American educational system, schools inculcate students to become immersed in speaking English, writing English, and knowing English. Knowing any other language is treated as an extra, added attraction, but in many international schools, becoming polyglot is an accepted part of the curriculum. In most American schools, Dr. Garcia noted, “bilingual classes take away the native language and replace it with the majority language.” She suggests that another model could be used that views learning a second language and becoming multilingual as essential ingredients to succeeding in a global marketplace.

Bilingual teachers, too, must fight for respect, struggle to be accepted, and often are the brunt of
In most American schools, Dr. Garcia noted, “bilingual classes take away the native language and replace it with the majority language.”

Educators from all over the world attended the July 12-16 symposium on Bilingual Education.
Whether the impact of rising standards will affect bilingual students has not been fully determined. Carmen Perez Hogan from New York State's Office of Bilingual Education said that the state is making every effort to ensure that higher standards will not prevent minority students or eroding intensive English programs. But skeptics wonder, in a state where students are being pressured to meet higher standards, how immigrants who barely speak English can do so when no additional funds have been added to meet those needs.

Despite the onslaught of criticism leveled at bilingual education, an enlightened principal can create an innovative way to teach bilingual education. Dr. Garcia pointed to PS 84 in Manhattan, which created a dual-language program from a student's strengths in first to third grades. Both minority and majority students were taught together in their respective native language. In that way, Spanish-speaking students learned English and English-speaking students mastered Spanish.

In his talk on "The Sociology of Bilingualism and Bilingual Education," Joshua A. Fishman, professor emeritus at Yeshiva University, discussed how in cultures outside the United States, students are respected for learning multiple languages, while in the U.S., bilingualism has become predominantly associated with poverty and fragmentation.

What positive changes will be triggered as a result of this conference? Dr. Garcia stated that the attitude of bilingual teachers will change once they see bilingual teaching "as an enrichment tool for the benefit of the child and for the benefit of the society." She added that most educators in New York, for example, overlook the fact that 41 percent of all students speak another language at home. She envisioned that this conference would lead to a more expanded and less narrow role for bilingual education. "Spanish can be used not only as an instrument to teach English literacy, but Spanish can be used with its poetry, literature, and history," Dr. Garcia asserted.

Because the conference tried to uplift and validate bilingual teachers, it did not focus on what changes should be made to improve bilingual education. "The conference didn't focus on classroom practice," said Zelasko. "Instead it focused on educational policy and language policy throughout the world." Still, "the conference reinvigorated us and motivated us to return to the classroom to do a better job, look closer at language and education policies to push for more inclusive and positive policies and practices," Zelasko noted.

Looking two or three years ahead, Dr. Garcia is considering a follow-up conference on the assessment of bilingual students. "Standardized assessments," she noted, "don't do students justice. Bilingual students can't be compared on a majority-language measure," she said. If American schools can learn how international schools assess bilingual students, students in the United States will benefit.

What will it take for bilingual education to gain respect in the United States? Zelasko replied succinctly: "a change in attitude toward language by mainstream America and by those who make educational policy." Dr. Garcia replied, "it would take all of us to get to know and trust each other, because I don't see things being done only through federal support. Anything that is federally supported through Title VII programs will have limitations. It needs support from the bottom up, from the community. The community must recognize that their children need to be bilingual. And the support must come from the majority as well."

With schools so often controlled by the majority and run to reinforce the status quo, she said, "we need an enlightened majority."
Utah State University President George H. Emott stresses that service is the cornerstone of a great university. "Muhammad Ali said that service is the rent you pay for your room here on earth. I am here to tell you that Utah State University is actively, dynamically, holistically engaged in service. In truth, we are bound in service to each other and to our students."

USU's commitment to that ideal is exemplified by the activities undertaken by its director of multicultural affairs, Everardo Martinez-Inzunza, who makes a promise to all his students. "If they want to graduate, I will find a way to make certain they do so," he says. Martinez-Inzunza assumes that minority students might not all know about the opportunities at Utah State University and that college can be a challenge even to the most academically prepared students, so he works tirelessly to "recruit and retain as many minority students as possible." At USU, the director has created an atmosphere in which the minority students look after one another. He asks that the best or better students serve as tutors and mentors and requires that 12% of students participate in accelerated study programs.

Cache County, where the university resides, has a growing Hispanic population. Martinez-Inzunza works with that population to explain the value of education and help them adapt. He plans to help minority students succeed academically even if that means working with them from kindergarten on. He also is getting the students linked with every national ethnic professional organization. Tirelessly, the director meets with deans and department heads to explain his goals and enlist their help to form partnerships beneficial to his students. In doing so, Martinez-Inzunza strives to "help the university community understand and appreciate minority cultures and people."

Founded in 1888 as a land-grant college, Utah State University has developed an international reputation for research and teaching and is a Carnegie Foundation Research 1 institution (top three percent of research institutions in the U.S.). USU's extension programs deliver the resulting innovations to the state's citizens and actively seek ways to assist people worldwide. The institution is part of the public education system of Utah and operates under the constitution and laws of the state. Originally called the Agricultural College of Utah, then Utah State Agricultural College, it became Utah State University in 1957.

A 16-member State Board of Regents governs the Utah State sys-

and assistantships to qualified students.

International students from more than 100 countries worldwide account for more than 15% of matriculated graduate students. A students enrolled last fall totaled 2,086, with 1,038 enrolled on campus and the remaining attending branch campuses around the state. 47 percent are male and 53 percent are female. Students come from every U.S. state and 8 foreign countries as well as all counties in Utah. Minority students make up four percent of the enrollment, with Hispanics numbering 9.

There are 152 Native Americans, 200 Asian Americans, 82 African

ystem of higher education as well as the Utah State University. The board has the responsibility for statewide master planning for higher education, assignment of roles to the several institutions in the state system, and control of operating and capital budgets for the institutions. A 10-member Board of Trustees is responsible for implementing the assigned roles, including the appointment of personnel and the enactment of rules and governing regulations.

Located in northern Utah's beautiful city of Logan, the campus includes more than 400 acres and 100 major buildings. Logan is the seat of Cache County, which has an approximate population of 83,000. An array of local shops, services, and other amenities complements the university. Many recreational activities are within easy access of USU, including skiing, snowmobiling, boating, hunting, fishing, hiking, camping, and sightseeing. The 2002 Olympics is set for nearby Salt Lake City.

Utah State University is composed of 95 departments in eight academic colleges that provide comprehensive academic programs along with an extensive School of Graduate Studies. There are 770 full-time faculty members. Colleges include: Agriculture; Business, Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. The university also offers distinguished cultural programming and exciting athletic events, featuring regional, national, and international participants. The School of Graduate Studies offers 34 doctoral and 22 master's programs as well as engineering and specialist degrees. The Graduate School offers more than $1.8 million in fellowships, scholarships, waivers,
Americans, and 859 international students enrolled.

USU has a strong presence in international academics and research. The university strongly supports international students, who make up approximately five percent of the total student population, with a variety of programs, including the Intensive English Language Institute and the International Students and Scholars Office. The Cache Valley community welcomes and supports the international population and seeks to integrate it with local residents. Many USU programs promote global understanding and research, such as the International Irrigation Center, Study Abroad, Asian Studies, Center for International Studies, and International Programs and Studies. USU currently has major research projects in Ecuador, Ethiopia, Kenya, Russia, Sri Lanka, Thailand, and Uganda.

At $125 million received, Utah State University faculty set a new record in 1999 in research funding, surpassing 1998’s record of $107 million and placing USU solidly in the ranks of the top 50 universities nationally for annual research dollars generated. USU Vice President for Research Peter Gerity credits the year’s funding success to the faculty and administration’s “entrepreneurial spirit,” faculty commitment to making great strides in research even while adjusting to a new calendar, and moves to diversify the areas in which the university seeks research dollars. The $125 million figure means USU holds steady as one of the top national research institutions in dollars generated per faculty member, with the $125 million mark breaking down to $230,000 each! Gerity said that USU capitalized on its strong international programs in irrigation and water systems and increased its distance education and training programs in connection with many international partners. Nutrition, health, and aging research are also important programs at the university.

In addition to being part of USU’s mission, increased research funding means more resources for students and faculty. Gerity said, “This is not surplus money,” he points out. “We do the work to satisfy our clients, and then we get paid. Most of the new buildings on campus in recent years have come about through research dollars, the very buildings where we conduct research, teach students, and have faculty offices. We would never have the quality of equipment and facilities we enjoy today if we were not engaged in this volume of research.” For undergraduate and graduate students, learning from teachers who actively do research means getting cutting-edge information and unique opportunities to participate in hands-on research programs.

Studies and work on real-world problems in irrigation engineering, groundwater quality, water use policy and economics, water-efficient landscaping, fisheries quality, and related topics bring together faculty experts and students from many different departments. USU experts from engineering, natural resources, economics, biology, plant science, and the Utah Water Research Laboratory continue to build the university’s reputation in this area.

Programs in the Mechanical and Aerospace Engineering Department place particular emphasis on aerospace design, and many faculty members and students work at the USU Space Dynamics Laboratory designing and building space hardware for NASA and other government and industry partners. The Physics Department Center for Atmospheric and Space Sciences is home to a team of atmosphere researchers focused on gaining a better understanding of the earth’s atmosphere and space weather that can affect satellites and our own climate.

USU’s Get Away special program pioneered the opportunity for students to build and fly experiments aboard the space shuttle. Students from all majors are invited to join the team, which also mentors high school students interested in space science. To date, USU has flown more student-constructed shuttle projects than any other university.

USU’s Department of Elementary Education is nationally recognized for its field-based program in which students are involved extensively with school children from the day they enter the program until the day they leave. The department is also unique in that it works closely with the on-campus Edith Bowen Laboratory School and two research centers of excellence, the Center for the School for the Future and the Emma Eccles Jones Center for Early Childhood Education.

Students in the Department of Landscape Architecture used sophisticated satellite imagery to design a plan for new communities and development in the area of the Grand Staircase-Escalante National Monument. The purpose was to locate development so that it had good scenic views yet was still invisible from the highway that passes through the area, one that gets heavy tourist traffic. The project received an Award of Merit from the American Planning Association. Students in this department were also asked to submit their design for the Little Big Horn Memorial at the site of Custer’s Last Stand.

The Communication Department has the foremost professional journalism program in the state, according to the Pacific Northwest Newspaper Association. The Department of Art’s commercial art program, which specializes in graphic design and illustration, consistently places students in important jobs in advertising and design. Many graduates have written and illustrated successful children’s books.

The Hispanic Outlook is very pleased to add Utah State University to its Honor Roll.
Latin American Student Organizations in the Northeast

BY ADRIANA MEUCCI

"You want the students to be able to develop leadership skills, and you want them to be able to make decisions for themselves and to develop good organizational skills...."

Latin American student organizations on college campuses offer both Hispanic and non-Hispanic students a chance to embrace, celebrate, and learn more about culture. Not only do these associations help foster a sense of camaraderie amongst students, but also they provide them with important opportunities, activities, and, of course, a chance to just enjoy college life.

"I've met many interesting people from all sorts of ethnic groups and found out that we all have one thing in common--our Latin sangre y corazón (blood and heart)--meaning that whatever we put our soul and energy into, we feel we can accomplish it and there exist no boundaries," says Jacqueline Lebron, a communications major and president of the Latin American Student Association at Bergen Community.

The group, which meets once per week, has been in existence about 15 years and enjoys a tradition of being very active. However, according to Professor Amparo Coddington, academic coordinator of foreign languages and the advisor to LASA, the pendulum can sometimes swing from having a few students show up to having 100 participants. But no matter the numbers, what the organization can offer is universal.

"We do try to encourage activities open not only to the Hispanic population but to the college community as well," says Coddington. "Something that anybody and everybody can enjoy."

In the past, the group has enjoyed a plethora of activities mostly with a cultural tone. LASA members have taken advantage of trips to the Metropolitan Museum of Art, the Museum of Natural History, Ellis Island, and the Statue of Liberty. But of all the activities, Coddington is always excited to bring students to Repertorio Español (Spanish Theatre) in New York City. Students are able to see comedies, dramas, and musicals by playwrights such as Federico Garcia Lorca, the famous Spanish dramatist. The plays, says Coddington, are not your typical Broadway production because a lot of time and money goes into the costumes or set design. The low overhead for production costs allows students to attend quality performances at a reasonable price, about $10, which usually includes transportation.

A short distance from Bergen is Kean University (N.J.) where Hispanic students make up about 21.62 percent of the full-time undergraduate students, and they can join the Association of Latin American Students (ALAS)—a group well known on and off the campus community. Its roots date all the way back to 1967 when La Terrulita was the Hispanic organization on campus, and then spin-off groups...
formed in the 1970s with the Spanish Cultural Club, the Cuban Committee, and the Puerto Rican Organization for Unity and Development.

ALAS meets biweekly, and the meetings are held mostly in Spanish with a mix of English, depending on the participants. Like the other colleges featured here, a wide range of activities including parties, cultural/folkloric dances, and special holiday events are just part of the scenario.

The advisor to this organization, Sara Torres, a counselor and adjunct professor, says that ALAS is "open to all Latinos and other students who are Latinos in heart." Members represent various Latin American and Central American countries.

Of special significance among the year's activities, says Torres, is the Hispanic Parent's Dinner that honors Latino parents. This is a formal event, which usually draws about 200 parents and students. Students also volunteer their time to Proyecto Adelante, a high school having a "college upward bound" focus.

ALAS officers and selected members have an opportunity to attend an annual leadership retreat, which usually takes place in the Pocono mountains of eastern Pennsylvania. Torres says that it is during this weekend of "intensive but fun" leadership workshops that "bonding and planning for the next year" take place.

A good advisor like Torres can make a big difference to any Latin American club's success in fulfilling its goals, especially when it comes to providing students with leadership skills, one of the primary purposes of most student organizations. At Bergen, Professor Coddington tries to stay in the background, acting only as the advisor, not the leader, in order that students develop this all-too-important skill.

"It's a challenge because as an advisor you don't want to take over," says Coddington. "You want the students to be able to develop leadership skills, and you want them to be able to make decisions for themselves and to develop good organizational skills. My job as an advisor is to guide them and give them ideas."

In order to help Hispanic students reach their potential, some colleges, like Tufts University (Mass.), are able to offer Hispanic students more tangible support in addition to students clubs. The university supports The Latino Center, La Casa Latina, and The Association of Latino American Students, formerly known as the Hispanic American Society.

"Our Hispanic students are extremely active in our community and offer some interesting and valuable resources to their fellow students," says Pete Sanborn of the Office of Public Relations.

The Latino Center opened in 1993, and has been a valuable resource for the ever-growing Hispanic/Latino population at the college. The center's objective is to provide a nurturing environment for students to foster pride in Latino culture. To achieve this, the Center offers numerous programs, such as a Latino peer advisor program and Latino Women's Group, as well as internships in the Latino community. Recently, the center has featured a Chicana art exhibit entitled "Imagenes y Historias/Imagery and Histories: Chicana Altar Inspired Art." This exhibit focuses solely on Chicana art inspired by the home or church altar.

Tufts' Association for Latino American Students is a society of about 200 members that works with the Latino Center and the Hispanic House (a residence for students who share an interest in Latino culture). The organization prides itself on being dedicated to serving the needs of the university's Latino community, and of course features numerous events and activities. In the past, the club has planned as many as 13 events per month, such as a mariachi folk dance night, social activities (via the Hispanic House), and guest Hispanic speakers. The group also considers itself a political organization, seeking to better the Latino community both on and off campus.

Reuben Salinas Stern serves as the director of the Latino Center and as the advisor to La Casa Latina and as well as to The Association of Latino American Students. Besides having such a broad range of duties to fulfill, Salinas also works closely with student leaders in the Latino Peer Leader program; the student in turn, work with first-year Latino students.

Salinas believes that having a culture house, clubs, and centers helps attract Latinos to the university. "I was hired in 1993 to create a center when there were approximately 180 Latino students," she says. "Today that number is 320. I believe that the existence of the center is, in part, responsible for this increase. Very few universities nationwide have Latino centers, particularly on the East Coast. I make the center." Even a small school like Nazareth College (N.Y.) offers two venues for Hispanic students: the Casa Hispana and the Spanish Club Cervantes. Casa Hispana is one of four language and cultural centers at the college. The Casa is a very active place for students and community members to gather to enjoy films, art exhibits and events related to the cultures of Spain and Latin America.

But the Casa is also a place to congregate and engage in conversation. The House expanded in 1995 to include a multipurpose spacious room, enlarged patio, and handicapped accessibility. Architectural elements were also added to provide building with a Spanish flavor.
addition, the Casa also houses the offices of faculty, a library, and classrooms serving as a place for the teaching of language and literature classes.

A group of about 40 students usually participates in both Casa Hispana and Spanish Club Cervantes events each semester. Students joining the organization are undergraduate, part-time students, and graduate students. A group of about 30 Hispanics from the community are also members of this active group.

According to Kim Messina, a senior at Nazareth College and previous president of the Spanish Club Cervantes, "As the former president of Club Cervantes, I have found that most students, especially incoming freshmen, are very enthusiastic about becoming involved in the club. Attendance at the tertulias and all other major cultural events sponsored by the Casa Hispana has been impressive. Students often bring students who may not be directly involved with the Casa Hispana to participate in the cultural events. In general, I think that the Spanish Club Cervantes is one of the largest and most popular clubs on campus."

Latin American clubs, like all other student organizations, must abide by procedures governing student activities. Most hold regular elections, which are structured in a traditional fashion, such as electing a president and vice president. Many have a secretary, public relations person, treasurer, social director, historian, etc.

Meetings are usually set up on a weekly or biweekly basis. At Nazareth College, for example, the Junta Directive meets every Tuesday with their advisor, enjoying lunch at the Casa Hispana while they work on planning the club's upcoming events.

Most of the organizations have constitutions, which are typically required in order to obtain funding, and they usually follow the laws and by-laws set by the institutions at large. At Keen University, for example, the club is funded via the Students Organization's governing body, from monies collected as "activities fees" from student tuition. At Tufts University, monies are available through the student activity fee that is collected by the university and controlled by the student senate. The groups, however, have a lot of flexibility in developing programs and activities that help them carry out their goals.

And what are those goals? Besides helping students to embrace Hispanic culture, it is perhaps maintaining customs and traditions that best describes the purposes of many of these groups. And, it is this heartfelt love of the culture that keeps not only present members participating but former members as well.

Perhaps Dr. Tina Pereida sums it up best: "I have received comments from students who have only graduated from Nazareth College who return to the Casa Hispana with their spouses and their children to participate in the cultural events. These former students, especially the ones who chose to become teachers, express an interest in continuing and reinforcing these cultural traditions. For me, it is great to see that the students have the desire to continue the traditions that we try to instill in them."

---

**Washtenaw Community College**

**Position Openings**

A comprehensive two-year college dedicated to student, community and staff success is presently seeking individuals for the positions listed below. The College is located in the city of Ann Arbor, MI, a community of over 100,000.

**Student Development and Activities Director:** Master's degree preferably in student affairs, higher education administration, counseling, recreation or related field; two years experience in human development program activities with increasing levels of responsibility. Initial salary range is $44,000-$45,400.

**Director of Admissions:** Master's degree in relevant area; three years experience including a minimum of one year supervisory experience; some student services experience preferred. Initial salary range is $32,000-$37,000.

**CIS/Instructor/C++ Programming Specialty:** Bachelor's degree in Computer Information Systems, Management Information Systems, Computer Science or related field, teaching experience is required, two years preferred, three years industry experience with emphasis on programming. Initial annual base load salary range is $40,160-$55,670.

**Anticipated appointment for the instructor positions is Fall 2000 semester. Applications will be accepted until the positions are filled.**

Interested persons should send official completed WCC application form, with credentials (all college transcripts, student copies acceptable) and candidates statement of the number of clock hours taught in front of students for current and prior teaching assignments) to Washtenaw Community College, Office of Human Resource Management, First Floor Business Education Building, Room 120, 4800 E. Huron River Dr., PO Box D-1, Ann Arbor, MI 48106. (734) 973-3497. Job Hotline (734) 973-3510. For job postings and application materials see our website at [http://www.wccnet.org/jobs](http://www.wccnet.org/jobs)

---

**CHAIR**

**DEPARTMENT OF PHILOSOPHY**

**UNIVERSITY OF MARYLAND**

The University of Maryland seeks a distinguished scholar who will help to build an outstanding Department of Philosophy. Candidates should have an excellent record of publication and teaching commensurate with appointment to the rank of professor, as well as administrative skills for leading a program with strong interdisciplinary connections that offers undergraduate, master's, and doctoral degrees. Candidates may specialize in any area of philosophy. Starting date is negotiable but could be as early as July 1.

Interested candidates should send a letter of application, a curriculum vitae, and the names and addresses of at least three references to:

Professor Susan S. Lanser
College of Arts and Humanities
1102 Francis Scott Key Hall
University of Maryland
College Park MD 20742-7311

For best consideration, applications should arrive by April 1, but applications will continue to be considered until the position is filled.

The University of Maryland is an equal opportunity employer and actively encourages applications from women, members of ethnic minorities, and individuals with disabilities.

**UNIVERSITY OF MARYLAND**
Mentoring the College-Bound Latino Student

Extra-curricular Activities Crucial for Success

BY JOSEPH BECK

Kevin Anderson credits his Spanish teacher, Regina Cofrin, with saving his life by being his mentor and teacher. His academic life, that is. For that, Anderson, a senior at Lawrence High School in Lawrence, New York, who is preparing to enter college in the fall of 2000, is eternally grateful. He’s told her how grateful he is on more than one occasion. “My parents aren’t really educated formally,” he says. “So I didn’t grow up with a lot of value attached to higher education. My parents were expected to get out of school and start working as soon as possible to support their families.”

In addition to Spanish, Cofrin also taught Anderson the correlation between a quality education and a quality of life. “Now I know that a good education increases my chances of getting a good-paying job when I get out of school. Ms. Cofrin helped me see that,” Anderson commented. He is especially proud of his accomplishments because he will be the first in his immediate family to attend college. Cofrin encouraged Anderson to become eligible for and join the Spanish National Honor Society, which increases his chances of attending the college of his choice. His extra-curricular accomplishments will also increase the number of colleges from which he can make a selection.

Anderson’s success story isn’t unique. Many other college-bound Latino students view their teachers as role models in and out of the classroom. Andy Castillo also is a senior at Lawrence who is preparing for college in 2000. Jeannine Avallone is Castillo’s Spanish teacher and the faculty advisor of the school’s Latin American Club. “Andy has been involved in the school’s Latin American Club for a while and served as the vice president of the club,” she said.

“We have many Hispanic kids involved in the club. A central part of the mission of the club is to mentor other Hispanic students who might be new to the school or having academic or social difficulties, and to perform community service when we can,” Avallone noted. She believes there is a need for Latino kids to identify with a larger community. “As a mentor and teacher, it is important to give the Latino kids a sense of community outside their own Latino friends in school, as part of the entire school and town community,” she said.

Imbuing college-bound Hispanic students with a sense of community is a primary goal of mentors in Lawrence High School. The bylaws of the Latin American Club reflect these values. They require all club members to agree to the following:

- Attend all meetings.
- Provide Hispanic representation for school committees.
- Involve more students and encourage students to participate in clubs regardless of their ethnic background.
- Participate in activities that will assist the Hispanic community. These could include food drives, clothes drives, etc.
- Help to promote a positive image of the Latino students within the school.
- Organize and provide translators for “Back to School Night.”

Leaders of the club are held to even higher standards of achievement, assuming the need for the experience of working in leadership roles when it comes time to attend college. Officers must meet the following requirements:

- Be a member of the Latin American Club for at least three years;
- Participate in all activities and attend meetings;
- Have leadership skills;
- Maintain a decent academic average;
- Have a clean discipline record;
- The president must be a senior; the vice president, a senior or junior.

Another mentor and teacher always work to encourage her Hispanic student Alene Pantoja. An ESL teacher at Lawrence, she realized that that of the school’s ESL program quite clear. “The whole idea of the progr
get Hispanic kids ready for the mainstream school experience," she noted. "Oftentimes, the pressure of their culture causes them to relate to only each other, and they are reluctant to socialize with other kids," she added.

In recent years, Paone's mentoring and persistence have paid off. Eddie Flores, a particularly successful student of hers, with her encouragement and letters of recommendation, attended Briarcliff, a technical college. Flores now works for IBM and has returned to the high school, at Paone's request, to speak to her current students and convey his experience with the program and how he took full advantage of it.

"Ms. Paone was the kind of teacher that looked for the good in everyone. She continued to encourage me, and she kept telling me I could achieve whatever I set out to achieve," he said. Flores' highly developed sense of community and family also helped Paone help him. "I knew that my family always encouraged me, and when I wanted to be lazy in school, Ms. Paone made sure I did my work, and I thank her for that," he added.

In addition to classroom mentoring and clubs that meet in the school, outside activities help to instill valuable lifelong lessons. Hispanic kids involved in mentoring programs have the opportunity to visit nursing homes as visitors and translators, work at soup kitchens, engage in community improvement projects, and involve themselves in other worthy causes.

One such activity, the ANGELO DEL TORO Hispanic Youth Leadership Institute, helps Hispanic students explore their intellectual lives in a whole new fashion. Sponsored by the New York State Assembly/Senate and the Puerto Rican Hispanic Task Force, the institute invites students to Albany, New York, to represent their county, Nassau County, New York. To be considered, an applicant must be a high school junior or senior, submit a persuasive essay, and submit two letters of recommendation from school administrators, teachers, or counselors describing achievements and personal characteristics.

Another important element of mentoring is helping students contribute something positive to their school environments and the community as a whole. Paone believes that life lessons impact just as much as school lessons. "I try my best to teach life lessons to my ESL students because whatever ethnicity someone belongs to, the need to see oneself as a contributor to a larger community is important," she said, adding that those life lessons are often taught through stories, sometimes funny ones. The life lessons benefit all students, whether they choose to attend college or go directly into the working world.

The effects of positive mentoring last, lasting impressions on kids who leave the high school and enter colleges and universities. Regina Cofrin and Jeannine Avalone and Alene Paone have impressive track records when one counts the sheer number of success stories they have helped achieve. Some of their former students, Latino and non-Latino, have gone on to major in Spanish in college, traveled abroad (Argentina and Spain) to study Spanish, and graduated from high school with honors in advanced placement courses in Spanish, as well as earning recognition as members of the National Spanish Honor Society.

Erika Ramos, a former leader in the Latin American Club, is now a liberal arts student at Buffalo State University, aspiring to work as a lawyer or teacher. Joseph Tontino was a member of the National Spanish Honor Society, excelled in a Spanish AP course, and was a leader in the Latin American Club before his graduation from Lawrence in 1998. Jeffers Sosa, a 1997 graduate, takes Spanish in college and continues to be a top student. Richard Duran served as a translator for his back to school night, maintained a 95 average in an AP Spanish course, and enjoyed membership in the National Spanish Honor Society. Peter Nudman, a 1997 graduate, majored in Spanish in college, is completely fluent, and is preparing for travel abroad in Argentina and Spain. Dana Polsin also a 1997 graduate, is Spanish major at Binghamton University, is also preparing to travel to Spain to enhance her education.

Spanish Club members serve as translators at school functions such as dances, theatre shows, and dinners. A non-Latino student of Spanish at Lawrence, who is applying to Tufts University shone in an essay on Miguel de Unamuno, an author from whom many Latino students draw inspiration.

"Many of the kids who take the Advanced Placement Spanish exam do well because they are capable of studying and translating literature in addition to knowing the structure of the language," said Cofrin.

Translating literature is just one of many skills that Cofrin, Paone, and Avalone recognize in their college-bound Latino students. And like all good mentors, they help students recognize and capitalize on their individual strengths and ultimately take leave of the mentor. Flourishing as productive, inspired citizens of the world.

Joseph Beck is an English teacher, education writer, and playwright from Huntington, New York.
The Many Hats of NACME

Analyzing, Advocating, and Enabling

BY GUSTAVO A. MELLANDER AND NELLY MELLANDER

"The world has changed much faster than anyone ever imagined, and, as a nation, we've been slow to harness that change to our advantage."

DR. GEORGE CAMPBELL, JR., NACME PRESIDENT

As we study the ancient civilizations of the Mayas, Incas, Aztecs, Egyptians, and Chinese, to name a few, one cannot help but appreciate and respect the significant contributions that engineers have made throughout the ages. Engineers have indeed been at the forefront of significant human advances since the dawn of civilization.

When the United States turned the Panama Canal over to the Republic of Panama in December, attention was riveted not only on the political and global implications of that action but once again on the engineering marvel that is the Panama Canal.

Built between 1904 and 1914, the canal is widely regarded as one of the outstanding engineering accomplishments of the 20th century. But it is not the only one. The entire 20th century and even the 19th century were science oriented, and engineers played key roles in moving civilization forward.

That game is far from over. Engineers are poised to continue their leadership role in the 21st century. Whether it be in Silicon Valley and the magical field of computers or in new arenas that the average person has yet to dream of—engineers will be in the very front ranks.

But one flaw has consistently permeated the past. Very few minorities, Hispanics, African Americans, or Native Americans, have been trained as engineers. Why not? Because of lack of opportunities. In every grade school across the nation, there are potential engineers. They must be identified, encouraged, and provided the rigorous educational foundation that they need to succeed.

NACME

Twenty-five years ago, a group of forward-thinking people in business and academia decided to address head-on that issue of underrepresentation. They founded the National Action Council for Minorities in Engineering, NACME.

General Colin L. Powell described it succinctly: "The essence of NACME, for the past twenty-five years of its distinguished history, is to make sure that our children get the marketable skills that they need to be successful in the 21st-century workplace."

Supported by America's leading technology-intensive companies, NACME is the nation's largest privately funded source of scholarships for minority students in engineering.

Since its beginnings in 1974, it has been focused on the face adversity. Success came early. B of late, disturbing trends have emerged. Over the past six years minority enrollment as first-year students in college has declined considerably.

In 1992-93, there were 15,1 Hispanic, African American; Native American beginning students in engineering. That number dropped 8.2 percent, to 13,929, 1997-98. The decline clearly impacts minority graduation rates—and will continue to do so for years to come. Fewer a enrolling; fewer will graduate.

Low math and science requ
ments in predominantly minority high schools across the nation add to the problem. And only a fraction of all engineering institutions have successfully enrolled or graduated minority engineers.

The statistics speak for themselves. Forty percent of all minority first-year college students enroll in just 35 or 11 percent, of all colleges or universities. Fifty percent of all minority graduates receive their B.S. degrees from 34 institutions, only 10 percent of all engineering schools.

What about Hispanics?

Seven of the ten members of the Hispanic Association of Colleges and Universities with accredited engineering programs are among those top 50 for enrolling minorities.

They are University of Texas, El Paso; University of Texas, Pan American; Florida International University; CSU-Los Angeles; University of New Mexico; Texas A&M University, Kingsville; University of Texas, San Antonio.

What to Do?

How to address this imbalance? NACME's plain-speaking president, Dr. George Campbell, Jr. placed the challenge in perspective when he recently stated, "The hard truth is that we simply haven't gone far enough. That's because, fundamentally, the world has changed much faster than anyone ever imagined and, as a nation, we've been slow to harness that change to our advantage.

"Making the right investments in the face of enormous change is never easy. But there is one investment we can be certain is risk free.

the investment in diversity."

To address the present situation and to forge a better future, NACME developed or strengthened several major initiatives. NACME redefined itself as a data and analysis center for trends in engineering enrollment, graduation, and retention by ethnicity and gender. Its work has already been recognized by members of Congress here in Washington, D.C. Its "Research Letter" and fact-filled analysis reports, have addressed the critical issues of mentoring, university diversity performance, and the impact of affirmative action on engineering education.

NACME also keeps in touch with its engineering students once they graduate, noting career paths and engaging them in special programs and surveys.

Scholarship Programs

Each year, thousands of high school seniors are overlooked by engineering schools because they didn't go to the "right" school. Or they didn't do well on a standardized test. Clearly many talented young people, potential engineers, were being shortchanged. Rigorous, real-time programs and engineering case studies have been developed for urban minority students.

Further, college-level problem-solving exercises have been developed to fill academic gaps in high school programs. Once students pass those hurdles, they are granted full scholarships to partner universities. Many of these students, who probably would not have been admitted to engineering schools otherwise, go on to success—in college and later on, after graduation.

Many of the men and women who've graduated with NACME's help have become leaders in industry, government, and education. NACME scholarship programs combine financial assistance with academic enrichment, internships, mentoring, and industry partnerships, and NACME adapts and enhances those programs as the needs of students and employers change.

A NACME-commissioned survey discovered that more than 50 percent of students in fifth through eighth grades nationwide said that they planned to drop math and science as soon as they could. Only 15 percent of all American students—and only six percent of minority students—graduate from high school having taken math through calculus and science through physics. The vast majority are not prepared for science-based study in college for the increasingly technical workplace.

Why is that? Because schools fail to require necessary courses and allow students to opt out at age 11 or 12. With the de facto endorsement of their parents, children are
Making uninformed decisions.

NACME responded by launching a national “Math Is Power” public service advertising campaign to provide students and their parents with the information needed to make informed decisions. It tells them specifically that if no one is talking to them about the importance of math and science, they must demand to be told.

The campaign has reached millions of children and their parents. Nearly 1,000,000 have called 1-800-977-NACME or visited www.nacme.org to request information about the benefits of math and science education.

The “Math Is Power” campaign and various training programs have focused on three critical areas: the number of students graduating from high school prepared to pursue an engineering education; the number of minority first-year college students who not only persist through graduation but achieve academic excellence; and bridging the gap between academic skills and those skills needed to succeed in the workplace.

The programs and training are designed to impact and assist students through the entire educational and professional pipeline, from middle school through their university years and into early careers.

NACME has also sharpened its extensive information network, via conferences, meetings, publications, and electronic media. Twenty-seven percent of its outreach is to colleges and universities, 20 percent to corporations, and 14 percent to pre-college entities. Structured meetings and seminars share best practices and explore new possibilities. Newsletters, reports, and regularly updated Web site postings provide vital news to a national audience.

Achievements

Annual minority graduations have increased from 1,423 in 1974, the year that NACME was established, to an all-time high of 6,446 in 1998.

The following three NACME programs have been cited for their innovation and direct success rate. They offer the Hispanic Outlook readers an opportunity to connect Hispanic high school and college students to seasoned programs that work.

NACME’s Corporate Scholars Program offers students professional development, academic support, an industry mentor, and valuable experience through summer internships. The result has been a remarkable retention rate of 83 percent and an average GPA of 3.3.

The Engineering Vanguard Program, an innovative scholarship effort, provides intense academic and leadership training to culturally diverse teams of high school students from economically disadvantaged communities. Together each group attends a top engineering institution that has worked with NACME to build an enhanced academic infrastructure and to offer full financial support. The result has been an outstanding 98 percent retention rate, with many students achieving a GPA of 3.0 or better.

The NACME Diversity Seminars, based on models long employed by the corporate sector, allow faculty and students to examine deeply held attitudes about race, class, and gender, and facilitate cross-cultural communication on the university campus. These seminars have developed powerful tools for improving the educational environment for all participants.

For further information about these three programs and about how you and your college can participate, readers may contact: Dundee Holt, vice president public affairs at dholt@nacme

Penn State's Diversity Progress Report

Latino Student Enrollment up in All but Law School

BY INÉS ALICEA

Penn State’s minority enrollment for Fall 1998 reached a record-breaking high of 8,292, including 1,706 Hispanics.

"We know where we want to go, and we are making progress and a contribution to the future of our university," said W. Terrell Jones, vice provost for educational equity at Pennsylvania State University, commenting on its five-year diversity plan. Jones, who is also affiliate assistant professor of counselor education and African and African American studies, said that there's a "genuine commitment" from both members of the university and local communities, without which they couldn't accomplish the tasks called for in the plan, now in its second year.

The Penn State Board of Trustees recently got an update on how the plan, which is 40 pages long and titled "A Framework to Foster Diversity at Penn State: 1998-2005," is progressing.

Among the projects undertaken since the diversity plan was developed are the following:

• Penn State's Office for Disability Services created a student handbook that provides useful information about succeeding on campus and in the classroom. Included are policies and lists of resources—including modified tests, loaned tape recorders and phone amplification handsets, special housing requests, and other accommodations for students with disabilities.

• The university's Commission on Racial/Ethnic Diversity joined with the State College Downtown Business Association to ensure that minority students are treated appropriately as they shop at local businesses. The commission was created in 1989 as a university-wide advisory body to the president in matters relating to racial and ethnic diversity.

• The Commission on Lesbian, Gay and Bisexual Equity implemented a liaison network for non-University Park locations and is expanding its involvement in training programs.

• The Commission for Women is implementing a pilot mentoring program aimed at women in all employment categories.

• The university's International Council set a goal that 20 percent of the students participate in a study abroad program at some point in their undergraduate career to broaden cultural understanding.
• The university created several videotapes to help faculty, staff, and students understand the university's diversity objectives.

• The Fast Start program was created, pairing incoming minority students with a faculty or staff "buddy" and alumni "buddy" to serve as advocates, confidants, and support networks for the students.

• Integration of a multicultural curriculum—the university's Equal Opportunity Planning Committee, which recommends and oversees the allocation of special institutional funding to individual units for new and continuing equal-opportunity programs and activities, provided funds for a Summer Academy on Teaching and Human Service careers for seventh grade minority students.

In March 1997, the University Planning Council directed the office of the vice provost for educational equity to produce a university-wide strategic plan for diversity. The framework was created and implemented in February 1998.

The Diversity Plan calls for exposing students to a variety of cultures and international perspectives, fostering a humane university community and developing social responsibility. A unique aspect of the framework is its detailed action plan for the achievement of measurable outcomes related to each challenge. The challenges set forth in the plan include: developing a shared and inclusive understanding of diversity; creating a welcoming campus climate; recruiting and retaining a diverse student body; recruiting and retaining a diverse workforce; developing a multicultural curriculum; diversifying university leadership and management; and coordinating multicultural transformation and organizational change.

"The goals and action plans outlined in this document are designed to meet the challenges of transforming Penn State into a truly multicultural institution," said the framework. "It now becomes the responsibility of all of our constituencies to operationalize the plan set forth herein."

Thomas G. Poole, associate vice provost for educational equity, who helped write and edit the framework, said that "There wasn't much controversy about the seven challenges" and that he was pleased by the university's progress in carrying out the recommendations outlined in the framework.

"There is a great deal of planning, and many new initiatives are growing out of our plan," said Poole. "That's very good."

Soon after the plan was released to the public, the university launched a series of focus group sessions at all Penn State locations that gave the office a broad-based understanding of how diversity is interpreted across the Penn State system.

Then a number of pre-existing programs that addressed the needs of minority students and faculty and staff were expanded or strengthened and others were added. But many challenges remain.

While minority enrollment at Penn State is growing, there is still a need to focus on retention and on early intervention programs to increase the pool of prospective students, the framework said.

Penn State's minority enrollment for Fall 1998 reached a record-breaking high of 8,292. Minorities made up 103 percent of the total Penn State enrollment, including the Pennsylvania College of Technology Williamsport and The Dickinson School of Law of the Pennsylvania St University in Carlisle. Overall enrollment for Penn State's 24 locations is 80,787. Latinos comprise 1,706 of the students at Penn State. That number climbed to 1,747 in the fall of 1999, said Poole.

In Fall 1997, minority enrollment was 7,721, or about 98 percent of Penn State's total enrollment of 78,956. In 1987, minority enrollment made up

Note: Pennsylvania College of Technology became an affiliate of Penn State in 1989-90 and Dickinson School of Law in 1997-98. Enrollments reflect these changes. Prior to 1992, continuing education enrollments are excluded from these counts.

percent of total enrollment at Penn State. "We have worked hard and are continuing to work hard to encourage growth in minority enrollment at Penn State," said Penn State President Graham Spanier. "Pennsylvania is a state of great diversity, and we want Penn State to reflect that diversity."

Overall minority enrollment in Fall 1998 was 74 percent higher than it was in Fall 1997. The Latino enrollment grew 87 percent over that same time period.

largest growth in Latino enrollment during that time frame with a 35 percent increase in student enrollment.

Among the reasons for Penn State's growing success in attracting minority students is a group of programs aimed at low-income and first-generation college students, said a university press release. Known as TRIO programs, they were established by Congress in the mid-1960s to help disadvantaged
The report said that retention of Latino students is lower than for other groups and attributes that to a need for a more personalized connection between the students and the university.

... students. They help support the university's goals of increasing minority enrollment and helping minority students succeed in their college and post-secondary careers.

"I'm pleased that overall enrollment continues to grow in a managed way and that we are delivering on our commitments to prospective students, public officials, and the citizens of Pennsylvania," Spanier said.

But the numbers of minority faculty and administrators at Penn State are dismal, particularly among Latinos. There is only one Latino among the 38 people in the executive ranks at the university, and there are no Latino administrators nor Latino academic administrators. The framework urges the university to create ways to train faculty interested in administrative work through short-term rotations so they get the visibility and experience to move up within the university.

"Penn State's commitment to diversity must be visible in its most face, that of the senior managers and leaders of the university," the said. "The charge to colleges, units, and departments to recruit and a diverse faculty and staff rings hollow if not modeled in the leads and management of the university."

In terms of faculty, Latinos comprised only 70, or 1.6 percent, of the faculty members at Penn State's campuses. Among minority groups, represented the largest presence in Penn State's faculty ranks with 351 f members.

The report said that the problem of retaining minority faculty and is "multifaceted."

"One of the most serious problems at present is the aggressive re- ment of high-caliber faculty and staff by other institutions," said the re. "The success of such efforts is compounded by limited opportunities and other rewards within the Penn State system."

As a result, a senior mentor position was created to help unite minority faculty navigate the tenure and promotion process. "The rooted in the conviction that the development of understanding is part of Penn State's educational mission that seeks to prepare us for life and work in a civil democracy," said Poole. "The framework calls us together...in the common project of teaching those skills and eling those public virtues...necessary for the vitality of communities, lies, and social institutions in our increasingly diverse nation as our global village."

**UIC**

**ADMINISTRATION**

**ASSOCIATE DIRECTOR OF CAMPUS UNIONS/PROGRAM SERVICES**

Reporting to the Director of Campus Unions, the Associate Director is responsible for the administration and direct supervision of the Campus Programs: Characteristic and Core Program and policy development; student organization administration; management of facilities, including craft shop and music lounge; advising programming committees; developing educational thrust of social and cultural programs, facilities, and services.

Qualifications include a Master's in Student Personnel or related field. A minimum of four years of college union and/or student activities programming experience. Demonstrated effectiveness in leadership of college union students and program professionals. Must possess sound concept of social cultural programming, educational and student development process.

The Associate Director must have an understanding of the most recent programming and infrastructure as well as exposure to fiscal management. Salary is commensurate with experience.

Send letter of application, resume, and the names of three references to:

Shane Siene, Assistant Employment Director
Associate Director, Campus Unions
Room 2560 Student Services Building
1200 West Harrison, Sumer
Chicago, Illinois 60607

For full consideration applications/resumes must be received by March 6, 2000

Start date: ASAP
The Pursuit of Happiness and Confidence, and Maturity

by Mike Taylor and Adalyn Hixson

After Shirley Torres graduated from West Covina High School in 1998, she found herself without any plan to continue her education. Without confidence in her abilities, and without goals for the future. But all of that was about to change. Once she enrolled in Mt. San Antonio's Summer Bridge Program, Shirley discovered a whole new world.

"Just having goals is something different for me," said the 19-year-old Torres, now a sophomore at Mt. SAC.

Admittedly, she wasn't the most industrious high school student. Studying wasn't a big priority, and college didn't seem like an option. She carried a grade point average of a little more than 1.0 throughout high school.

"My life was one big indecision," she said. "I was the girl who sat in the back of the classroom in high school and never said a word."

Yet the young Palina woman would become the first in her family to attend college.

"I didn't even think about going to college," said Torres, who now has a 3.46 grade point average as a Spanish major at Mt. SAC. "It's just too hard to go when no one in your family has ever gone."

In the summer of 1998, she was on the Mt. SAC campus and, by accident, came across an orientation event for the college's Summer Bridge Program, designed to transition first-time, at-risk first-year students to the demands of college life. "Just seeing the way the professors and everyone on campus worked together really made an impression on me," she said.

Torres enrolled in the program.

Crossing the Bridge

The idea behind this program is to help students succeed in college through the use of learning groups and linked classes. It addresses risk factors that can lead to attrition, one of which is the basic skills levels of entering students. An additional risk factor is a sense of not fitting in. By employing a learning communities model, students and faculty of the Bridge Program engage in a learning experience that empowers both groups with a collective sense of direction and purpose.

Participants are given a jump start on their college experience and form meaningful associations with peers and with college personnel. The majority are transitioned into courses offered through what is called the Freshman Experience.

In the Bridge Program, students take on an intensive course load.

A seven-unit, six-week summer program links English 67, math, counseling, speech, and LERN classes into course clusters that give the 70 students in this year's academy an orientation to the academic and social aspects of college. English 67 is a writing course that helps get students up to a transferable level.

Many of these students, HO is told, are a couple of levels below college English will present them with materials and concepts they have never encountered in high school. LERN teaches study skills to help students improve in all other classes they are taking.

John Arboleda, a co-coordinator of the program, tells HO the program is changing in its second year. "The way that we work," he said, "it is an evolving program. We learn from our previous experience." Of Year Two, he said, "We increased—it almost doubled the size of the program."

 Asked who is eligible, Arboleda says, "You have to be a high school graduate and a first-generation college student. In our program, we have Asian, African American, Caucasian, Latino—but the largest concentration is Latino. The average age is 17 or 18. We will have a couple a little older, but overwhelmingly, they are just recent high school graduates." Participants, says Arboleda, are not going to be at the transferable level for English and math. It's up to us to address the challenges they are facing.

Classes are team taught, says Arboleda. And students go on a series of field trips. "It gives the students an opportunity to go beyond the classroom and see things they have not seen before," he said. "It gives them a feel for what college is like. It gives them a feel for what life is like."
Cal State to the Getty Museum. We try to take the students out of their environment. A lot of them don’t have those opportunities.

“We have a series of events, and we also have a family component—from the very first day.” Parents and other family members are invited to opening and closing ceremonies for the program, says Arboleda, because “families are significant. Having the families is a part of the process. And a lot of these families don’t know the process.” The opening event last June drew more than 300 students, family members, and college staff. And at the closing ceremony in August, both students and faculty talked about the “magic” they experienced through the power of their learning community.

“This is a big change for the student and for the family,” said Arboleda. “I was a transfer student, and went through similar experiences.” Arboleda transferred from Cerritos Community College to UCLA, from which he graduated in 1996. “UCLA has a bridge program. And I have worked for others that do. But this is the first time I’ve seen a program addressing this population and the need that they have to feel connected.”

The Mt. SAC Environment

Mt. SAC describes itself as “a public community college owned, governed, and maintained by the people of Baldwin Park, Basset, Charter Oak, Covina, Diamond Bar, southern portion of Glendora, Hacienda Heights, Industry, Irwindale, La Puente, La Verne, Pomona, Rowland Heights, San Dimas, Valinda, Walnut, and West Covina.” The population count is about a million.

Arboleda tells HO that Mt. SAC is the largest community college in the state of California, with more than 40,000 students. Hispanics represent 39 percent of the student body; Asian and Pacific Islanders, 19 percent; African Americans, six percent; and Whites, 26 percent.

“Where are we? Where we are is the suburbs,” says Arboleda. “All suburbs, about a half hour from the City of Los Angeles, in the San Gabriel Valley, which has a large Hispanic population. Diamond Bar and Walnut (Mt. SAC is in Walnut) have mostly middle- to upper-class income levels. But other areas, such as West Covina and El Puente, have high concentrations of medium to low income. And some of the cities, the extremes, really low, low income.”

“Audrey Yamagata-Noji, vice president of student services—she is the one who really started the Bridge Program here at Mt. SAC. She is the one the college supported in giving funding to the program. We owe her a lot of credit, and she has been a wonderful mentor for me.” [Dr. Yamagata-Noji had analyzed physiological, sociological, and cultural factors associated with the educational achievement of Japanese American college students for her Ph.D. dissertation. And she is cited as a consultant to David Drew for his book *Aptitude Revisited: Rethinking Math and Science Education for America’s Next Century*, published in 1996 by the Johns Hopkins University Press.]

Support is provided for the Bridge participants, too. During Mt. SAC’s 1999 Summer Bridge Program, Shirley Torres worked as one of eight peer advisors. Seven of the eight were well acquainted with the Summer Bridge Program since they, like Torres, were students in the program in its initial year, 1998, when it was named the Student Success Summer Academy.

The peer advisors helped the students “learn the system” and also would call students if they were not attending classes and act as ombudspersons between the students and college personnel.

“We served as role models for the students, and we let them know that it’s okay to be scared,” said Torres.

“It’s really about building a bridge from where they are and giving them access and support,” said counselor/coordinator Jim Sm.

“If they’re first-generation college students, they are at risk,” he said. Smith said too that of the most important reasons students are at risk is that they call a lack of connectedness is that connection that the Summer Program makes—not just between students, but between the faculty members involved as “Students develop associations, a sense of connectedness with each other, and they working together,” he said. “It’s not just to teach a student, but teacher to teacher.”

Leadership—the New Dimension

Both Smith and Arboleda said they that students in the program wanted to be more connected. And so a leadership team was born. About twenty-five Bridge students were targeted to go on a retreat, a planned with family, faculty, counselor administrators.

A chief intention, says Arboleda, was to them about leadership and how they could it effectively. He told HO that the retreat has found effect on him. “This past weekend perhaps one of the most amazing experiences ever had working with students.” He sai...
took them to the university overnight for activities and exercises that were basically students breaking out of their shells. They were learning about themselves. Learning to open up to others, trusting others, seeing the potential within themselves. We just facilitated the process."

The Bridge Leadership Program involves "having the students go out into the community, learning about leadership skills, and putting those skills to work at Mt. SAC and then after they leave here."

"This program is in development," said Arboleda. "It is an evolving program. We are willing to make adjustments as we go and learn as we go."

Armando

"He told me that when he was in high school, he probably went to school once or twice a week. Shirley Torres recruited him," Arboleda talked with him about Armando, a Bridge student.

"This is what he wrote. It really addresses some of the core issues."

"Well, I'm not a great writer yet, but I just want to express myself a little to you. The last six months have been so good to me. I actually felt like I belonged somewhere. For the first time I feel like I'm beginning to understand the world. I feel good about being an example for my family and friends. I'm trying to encourage my friends to feel this great sense of happiness."

"This is a student who rarely went to high school," said Arboleda. "He realized this is a learning community that we have here."

"Before the Bridge program, he got Ds and Fs. Armando came into the Bridge Program and never missed a day of class. He did really well in the summer program. Take some of the classes we offer in the summer. Two As, a B, a C. Armando is receiving an award from his English instructor for his writing abilities. And applying to the HACU International Program. He volunteers for a women's shelter."

Overall Outcomes

Just how well does the Summer Bridge Program work in terms of helping students succeed?

Numbers from the first year's session give the story. Of the 83 students who enrolled in the summer of '98, 80 completed it. The pass rate (C or better) last year was approximately 9 percent. In terms of retention, about 80 percent of the students who were in the '98 summer session were enrolled in classes in the spring of '99.

And Arboleda says that some of these "at risk" students are passing their math courses with marks that are "really high compared to the general population at the college."

Asked to evaluate their experience, students were asked, "What were the most beneficial parts of the program?" Some of their responses were:

* Learning about college and what's expected of me.
* Knowing where to find help.
* Learning to be more responsible.
* Overcoming the fear of going to college.
* Learning never to give up.

"As a result of the Bridge Program, Torres also learned about another important side of herself. "I learned from the Summer Bridge Program that you have to give back," she said.

Knox College

Business Office

Galesburg, Illinois 61401-4003

www.knox.edu

ASSISTANT/ASSOCIATE DEAN OF STUDENTS

FOR INTERCULTURAL LIFE

Knox College invites applications and nominations for the position of Assistant/Associate Dean of Students for Intercultural Life. This position reports directly to the Dean of Students/Associate Dean of the College and is an active member of the Division of Student Affairs. The Office of Intercultural Affairs is charged with providing leadership for the College's commitment to intercultural understanding (within both international and national contexts) as a fundamental part of a liberal education. This position is a full-time, 12-month appointment.

Responsibilities: Actively engages the Knox community on issues surrounding both national and international cultural diversity. Collaborates with members of the Student Affairs and Academic Affairs staff to advise domestic students of color as well as international students on matters related to cultural adjustment and immigration. Provides collaborative leadership for the College's recent academic and co-curricular "Pluralism and Unity" initiative, funded through a Hewlett Foundation award. Provides oversight and management of the Office of Intercultural Affairs. Serves as an institutional resource to students, faculty and staff members in realizing the mission of the Office. Advises various clubs and organizations as related to intercultural life.

Qualifications: Master's degree; demonstrated experience working with diverse student populations; demonstrated experience working with immigration documentation and knowledge of U.S. immigration regulations; demonstrated experience working with domestic students of color; excellent cross-cultural and interpersonal communication skills; familiarity with undergraduate liberal arts education and residential colleges; ability to work independently and as a member of a dynamic team; and must possess a sense of humor.

Nominations and applications will be received until the position is filled. For full consideration please submit a letter of application/nomination, resume, and list of five references to:

Xavier E. Romano

Dean of Students &

Associate Dean of the College

Knox College

Box K-236

Galesburg, IL 61401

Founded in 1837, Knox College is an independent, four-year liberal arts college with 1100 students from 42 states and 33 nations. In keeping with its 163-year commitment to equal rights, Knox College particularly welcomes applications from individuals in under-represented groups.
Latinas Cultivated as Leaders of a New Indian
Saint Mary’s and Lilly Endowment Offer Assistance

BY MARILYN G.

"I am often out in the community talking to parents, grandparents, aunts, and uncles of potential Latina college students because in this culture, the whole family is involved in the decision to attend college."

Mona Bowe, Assistant Director of Admissions

Latinas who want to make the most of their future now have a great resource in a somewhat unlikely place—the state of Indiana. Thanks to a generous grant from the Lilly Endowment, Saint Mary’s College in South Bend, Ind., has launched an ambitious program to recruit, educate, and develop leadership potential in young, bright Latinas.

Saint Mary’s, ranked for several years as the #1 Midwest regional liberal arts college by U.S. News and World Report, has recently put together special initiatives to help talented Latinas in their high school and college years. Under the umbrella of the Leaders of a New Indiana (LONI) Project, female students are invited to explore their potential as leaders in their community, state, and beyond.

The LONI Project was initiated to address the needs of two specific student populations in Indiana—those who were raised in communities of less than 25,000 and Latinas. These two groups were targeted because they are underserved and underrepresented in colleges and universities (as compared to their White urban counterparts) and both often have strong family ties and values, families they must leave in order to get a college education. The LONI Project extends academic, emotional, and financial support to help make the transition possible.

“We want young women to consider ALL of their possibilities,” says Maria Thompson, director of the LONI Project. “We want to make sure that they finish high school and contemplate the future.”

Knowing that the road to college for Latinas is a journey that must begin early and include the support of family, the LONI Project staff has created several opportunities to make the dream of higher education a reality.

Reaching Out to the Pre-College Crowd

It all starts with Encuentro. Encuentro, which means “to gather/to find oneself/to meet,” was carefully chosen as the name of a two-week program that beckons high school Latinas to explore the possibilities for academic achievement and personal growth. The Latina students who enroll in Encuentro get an opportunity to preview college courses in the areas of chemistry, art, Latina literature, history, and computer science.

But they also get the chance to explore who they are now and who they want to become. Encuentro challenges Latinas to ask themselves: How do I make my what I want it to be? How can I realize my goals? How can I be a leader to those within my community who will follow my path?

The two weeks on campus packed with all aspects of life, including field trips and activities. There is also time to reflect on faith and identity during special work and service events. The Lilly Endowment funds this possible to offer Encuentro to participants.

Encuentro is only one pre-college programs spons

Encuentro challenges Latinas to ask themselves: How do I make my future what I want it to be?

Participants from Encuentro at St. Mary’s University
LONI; another is called My First Day of College. It allows first-year and sophomore high school students to preview college through a 24-hour stay on campus. The students are invited to visit and stay with a current Saint Mary’s student in a residence hall. The Saint Mary’s student acts as a host and takes the guest to various classes and social gatherings. In addition, the visiting student attends two workshops: one is on requirements for college and admissions; the other, on how to navigate the financial aid application process.

The campus visit also offers an opportunity for lunch with faculty and administrators who can provide information on a particular discipline. Finally, there is a question-and-answer session with a panel of Saint Mary’s women at which the high school students can get answers to questions that they might not want to ask college officials.

Encuentro and My First Day at College might sound like typical recruitment programs, but when it comes to reaching out to Latinas, it takes more than the usual strategies.

To get students to enroll in the pre-college programs, LONI Director Maria Thompson says that the groundwork must be laid through a series of contacts.

“We know that a connection must be made within a community before young Latinas are allowed to attend activities,” she says. “We send letters to high school counselors explaining the purpose of our pre-college programs and encourage them to refer students who they believe would benefit from involvement in these activities.”

Leadership Academy

One component of the LONI Project that goes beyond introducing young students to college life is the Leadership and Development Academy (LCDA). This one-week summer program is designed to help high school first-year, sophomore, and junior women become aware of their own leadership qualities. Its goals are ambitious, and it offers participants a chance to:

- develop confidence in their ability to lead,
- address real issues in their communities and schools,
- enhance communication and critical thinking skills, and
- gain an understanding of collaborative leadership and community development.

LCDA also invites parents to participate in a special weekend program so they can learn firsthand about student projects created during the academy while they also explore options for their daughter’s education.

Students accepted to the Leadership and Community Development Academy receive a full scholarship to cover program costs, including supplies, room, and meals. Fifteen senior high school students enrolled during the first year of the academy; six of those are currently attending Saint Mary’s.

Recruitment with a Personal Touch

All of these pre-college recruitment initiatives are combined with person-to-person outreach efforts by the admissions staff of Saint Mary’s. Mona Bowe, associate director of admissions, says that she has spent a lot of time in rural high schools, churches, and community centers in order to meet with prospective Latina students.

“The LONI Project has enabled us to visit many high schools,” says Bowe, “but I am often out in the community talking to parents, grandparents, aunts, and uncles of potential Latina college students because in this culture, the whole family is involved in the decision to attend college.”

Parents and other relatives take an active interest in the choice of sending a Latina away to school. Family concerns range from academics to safety on campus.

“If their daughter is going away to live on campus, they want to know how safe it is,” says Bowe.

And of course, with college costs at Saint Mary’s running close to $25,000 per year, everyone wants to know about financial aid.

About 70 percent of Saint Mary’s students receive merit or need-based scholarships, grants, loans, and work opportunities. In addition, the Lilly Endowment’s five-year support of the LONI Project goals has made it possible to offer $5,900 grants to students who qualify.

But despite the expense and distance from home, many Hispanic families feel that an all-women’s Catholic college is a good match for their daughters. Hispanics now represent 62 percent of minorities at the college. That is due in part to the efforts of Bowe, who has been at Saint Mary’s for five years and is a good ambassador from the college to young Latinas and their families. She grew up in Mexico City and was the first in her family to go to college.
“I know what a difference college can make,” Bowe says. “I believe in what I do.”

A Helping Hand on Campus

Although much of the emphasis of the LONI Project is helping Latinas get to top-notch college such as Saint Mary’s, once they are there, there is plenty of support, such as the mentoring program.

Mentoring involves linking groups of four to six students with administrators or faculty members who act as coaches and facilitators in various aspects of campus life. Together, the members of mentor groups plan and attend functions such as plays, sports events, religious ceremonies, and social activities in order to help LONI students adjust to college life.

“We nurture a closeness that is in line with what Latinas are used to in their families,” says Maria Oropeza, director of multicultural affairs.

Through these associations, Latinas often begin developing the confidence they need to become leaders—a role unfamiliar to those who have been brought up in a traditional Hispanic household where the females are not usually the decision-makers.

“As Latinas become involved in student activities, student governing boards, and campus ministries, they begin to develop life skills that will help them succeed outside Saint Mary’s,” says Oropeza.

One student organization, La Fuerza, has been “phenomenal,” according to Oropeza. With the slogan “Because Strength Is Feminine,” members of La Fuerza have cultivated leadership roles by conducting fund-raisers, doing community service, and establishing a Big Sister/Little Sister program.

But embracing diversity and providing opportunities for growth go far beyond the multicultural office: it is a college-wide commitment that stems from the basic mission of Saint Mary’s. “We are preparing our students to become global citizens,” says Oropeza. “So our academic programs reflect that emphasis. We offer courses in Latin American politics, history, and literature. We want to foster pride in our students; Latinas are stronger when they know their history and culture.”

Once students have reached junior or senior status, they can benefit from a LONI program that sets up paid summer internships. They are also invited to become mentors to first-year students.

The LONI Project has been funded by the Lilly Endowment for five years. Although it is too early to measure results, Saint Mary’s officials report that the retention rate for Hispanic women is improving.

“We are a small college,” says Maria Oropeza. “We can work across departments and take a personal interest in the success of our students. It is vital to our mission.”

Note:

Saint Mary’s College, founded in 1844, enrolls 1,500 women from 48 states and 12 countries. Approximately 65 percent of its students ranked in the top 25 percent of their high school classes.

The Lilly Endowment, based in Indiana, is a private philanthropic organization created in 1937 by J. K. Lilly Sr. to support their interests in taxation, community development, and religion. According to the Chicago of Philanthropy, the Endowment has assets of $4 billion and is the second largest philanthropy (The Bill and Melinda Gates Foundation is #1).
**PEOPLE**

**Perez Expanding Multicultural Awareness at Cleveland State**

Maritza Perez is the multicultural programming coordinator for Cleveland State University's (CSU's) Office of Minority Affairs and Community Relations in Ohio. She is responsible for coordinating and implementing multicultural programs and events with broad involvement of CSU faculty, staff, students, and alumni. She also assists with community relations.

Perez, who has also worked in recruitment and counseling, wants to "expand the awareness of multiculturalism within CSU and the greater Cleveland community." She has a bachelor's degree from State University of New York-Old Westbury and a master's from Bank Street College of Education in New York.

**Armas and Hernández Visit St. Joseph's**

St. Joseph's College (SJC) in New York recently welcomed two visitors from Cuba.

**Conrado Attends Salzburg Symposium**

Dr. Eduardo Conrado, director of international programs for the Alamo Community College District (ACCD) in Texas, attended the Salzburg Seminar Universities Project’s 11th Symposium as a Salzburg Fellow, representing the United States and the ACCD. The symposium, “Globalization and the Future of the University,” was held in Salzburg, Austria, in November.

"At the conference, I gained experience from sharing ideas with top academics from diverse universities, not only from the U.S. but also from the states of the former Soviet Union who are undergoing a transition to the democratic process," he said.

Conrado has a Juris Doctor from the National University of Nicaragua. He has pursued graduate studies at the Iberoamerican Institute in Madrid and at the Social Science Institute in Paris. He also studied at Texas Tech University.

**Hernandez Named Pasadena Distinguished Alum**

Rancho Santiago Community College District (Calif.) Chancellor Dr. Edward "Eddie" Hernandez, Jr., was named one of the 75 Most Distinguished Alumni from Pasadena City College (PCC). The selections were made for PCC's 75th anniversary celebration.

A 1964 graduate, and district chancellor since July 1997, he is CEO of Santa Ana College, Santiago Canyon College, Centennial Education Center, Santiago Canyon College Continuing Education/Orange Center, and other sites in central Orange County.

"As a community college graduate, I understand its mission," said Hernandez. "I was one of those students referred to as having some potential, but not necessarily because of high school grades. It was PCC that provided me the educational opportunity to strive for bigger and better things."

**Morales Receives Lewis Achievement Award**

Lewis University (Ill.) honored Carmen G. Morales with an Alumni Achievement Award.

Morales is community relations director for Nicor Gas and chaired Nicor's United Way campaign the past three years, helping to raise more than $2 million in employee contributions.

A board member of the Chicago Southland and the Joliet Region Chambers of Commerce, Morales is a member of several other chambers of commerce, the Will County Governmental League, the Latino Business Association, and the Joliet Council for Working Women.

**Washington State Honors Martínez and Loera**

Cecilia A. Martínez and Lucila Loera (pictured) were honored at the 10th annual Multicultural Student Services Convocation at Washington State University (WSU).

Martínez, an undergraduate student, received the Leadership Award from the Council of Multicultural Student Presidents. Born in El Salvador, Martínez immigrated with her family to the United States in 1990. She is active with MEChA, Mujeres Unidas-MU, Children of Aztlan Sharing Higher Education-CASHE, Semana de la Raza, McNair Program, and The Multicultural Student Mentor Program.

Loera, career counselor and multicultural liaison in the WSU Office of Career Services, received the Faculty/Staff Award from Multicultural Student Services. She co-chairs the Chicana/o Latina/o Faculty and Staff Association; is treasurer and president-elect of the Washington Association for Multicultural Counseling and Development; advises Gamma Alpha Omega; is past associate director the Coalition for Social Justice; is past president of CAMARADAS; and created the Herrera-Loera Los Padres Memorial
Society of Latino/a Engineers and Scientists Scholarship Fund.

**Orona, Park, and Pellow at Colorado-Boulder**

Kenneth Orona (pictured), Lisa Sun-Hee Park, and David Pellow, new faculty members in the department of ethnic studies at the University of Colorado-Boulder, are helping students prepare to live and work in a global community. They bring expertise in interdisciplinary teaching and research, with an emphasis on global issues and multicultural thought and experiences.

Orona, a Chicano and a Colorado-Boulder alumnus, is an ethnic studies instructor teaching Introduction to Chicano History, Rethinking Southwestern Studies, and Race and Identity in Post-Colonial History. Park, an Asian American, is an assistant professor in women's studies and ethnic studies. Her interests include international migration, Asian American families, immigrant women's labor, and global political economy. Pellow, an African American, is an assistant professor in sociology and ethnic studies. He teaches a course on environmental racism, an overview of literature that combines theory-building with student research projects.

**Glandt Made Dean at University of Pennsylvania**

Eduardo D. Glandt is the new dean of the School of Engineering and Applied Sciences at the University of Pennsylvania, where he has been a distinguished member for more than two decades.

Glandt served as interim dean since August 1998, in what university president Dr. Judith Rodin termed an exemplary period in which the school made extraordinary progress in attracting new resources, making significant faculty appointments, and supporting interdisciplinary teaching and research.

Glandt received a bachelor's degree, magna cum laude, from the University of Buenos Aires, and both a master's and doctorate from the University of Pennsylvania.

**Reyes Awarded NJ Nets Scholarship**

Bloomfield College (N.J.) first-year student Zorimar Reyes received a $4,000 scholarship to be paid over four years from the New Jersey Nets Foundation through the Community Youth Organization. Bloomfield College will match this scholarship and will provide a mentor to Reyes as part of the program.

The presentation was made before the start of an NBA game at Continental Airlines Arena. Scholarship selections are based on factors including financial need, GPA, and a history of community service.

"This scholarship means a lot to me," said Reyes, who attends college full time and also works full time in security for Blue Cross/Blue Shield. "Some nights I go to bed at 4 a.m. after studying. It's hard to balance everything."

**Vela New Dean at Texas Health Science Center**

Dr. Leonel Vela is new regional dean at the University of Texas Health Science Center at San Antonio. He directs the Lower Rio Grande Valley Regional Academic Health Center (RAHC), an education, research, and health promotion center along the Texas-Mexican border.

A board-certified diplomate of the American Board of Preventive Medicine, Vela was appointed by the U.S. Secretary of Health and Human Services to chair the National Advisory Council on Migrant Health. He owns two bachelor's degrees from Stanford, a master's from Harvard, and a doctorate from Baylor College of Medicine. He was a Kellogg Fellow in Health Policy and Management at Harvard in 1986.

**Municipio de Santiago de Cuba Honors Danger**

Ivonne Danger, director since 1989 of the Career and Transfer Center at the Miami-Dade Community College (M-DCC) Wolfson Campus, received the Municipio de Santiago de Cuba's "Honra de Honor" award. The award was presented at a ceremony held in Havana in recognition of her contributions to the development of the Career and Transfer Center.

**Muñoz Attends Film Premie at Texas Wesleyan**

Hollywood producer and director Rick Muñoz attended the premiere of a feature film, "No Mothers Crying," at Texas Wesleyan University in Fort Worth, Texas. The film stars Danay Trejo, Mike Moroff, and Ontiveros, and portrays the story of a family's struggle with violence.

**U.S. Sugar Scholarship to Fernandez**

The United States Sugar Corporation granted a scholarship to Victoria Fernandez for the school year 1999-2000. It is awarded to students attending each of the Independent Colleges of Florida (ICUF).

Selection was based on academic standing, GPA, and co-involvement. Fernandez will attend Florida Southern College this year and work in education.

The award was made possible by the Florida Independent College Fund, a nonprofit foundation for the development of the ICUF's financial assistance programs in education.
Flores Raises Funding Package

HACU president Antonio Flores praised Congress' decision to earmark record funds for federally designated Hispanic-Serving Institutions--those with a Hispanic student enrollment of at least 25 percent. "While these spending measures represent just a fraction of the investments still needed to reverse years of federal neglect of the higher education needs of such a large part of our population, the recent and rapid increases in funds are very gratifying," said Flores.

The $42.25 million spending package is a big increase over the $28 million designated for those campuses for fiscal 1999. Earlier years, the annual amount sent to Hispanic-serving institutions was $12 million.

Flores noted that Senators Kay Bailey Hutchison (R-Texas) and Jeff Bingaman (D-New Mexico) led a bipartisan effort to win their colleagues' support.

Suarez Lectures at Stetson

STETSON: Rep. Anthony "Tony" Suarez lectured on "Central Florida and World Economic Regionalism" at Stetson University (Fla.).

"Unfortunately, most Americans see Latin America in a negative light, from business to immigration to culture," Suarez said. "The world is developing into regional blocks and regional currencies. It is of national importance that Central Florida follow and exceed Miami's example and make Central and South America the core of our business attention." Suarez feels the business and academic communities should take the lead in asserting Central Florida's place in a global economy.

Elected to the Florida House of Representatives in 1998, Suarez has been an attorney in private practice for 20 years, specializing in defense, legislative analysis, commercial, and real estate law.

Rodriguez on Mexican American Studies Center Faculty

Dr. Gregory S. Rodriguez joined the faculty of the University of Arizona's Mexican American Studies and Research Center, increasing its number to six.

His research interests include the historical uses of popular culture for the mobilization of ethnic, national, and gender identities within Mexican national and Mexican American communities.

Rodriguez has a bachelor's degree from CSU-Sacramento and both a master's and doctorate from the UC-San Diego.

Vargas Receives National Scholarships

Elmhurst College (Ill.) junior Maritza Vargas was honored with two national scholarships--a Dr. Juan Andrade Scholarship and a Hispanic Alliance for Career Enhancement Scholarship.

Vargas was one of 27 receiving the Andrade Scholarship, named after the president of the United States Hispanic Leadership Institute. The Alliance Scholarship was awarded to 23, including students at Harvard, DePaul, and the University of Illinois-Chicago.

Vargas moved to the U.S. with her family from Quito, Ecuador, when she was 13. She has been speaking English for only six years. "If you really want to succeed, there are no obstacles, language or cultural," said Vargas.

Penn State York Celebrates Puerto Rico Awareness Week

Penn State York's Hispanic Student Association sponsored activities throughout the school's Puerto Rico Awareness Week celebration in November.

Members of the campus and local communities learned about the plena, merengue, salsa, bomba, cha cha, and more as El Grupo Forlancio performed folklore and modern dances from the Caribbean. with special emphasis on the Puerto Rican culture and music.

A food sale, craft display, workshop, and student panel rounded out the events.

Texas-Kingsville McNair Scholars Present Research

Texas A&M University-Kingsville Ronald E. McNair Scholars presented research at the national annual Mid America Association of Educational Opportunity Program Personnel conference in Wisconsin.

Senior chemical engineering major Arturo Castilleja's research is titled "Climate Control System for the Texas A&M-Kingsville's Serpentarium Using Real Time Climate Conditions Downloaded Continuously from the Net." His research mentors are Dr. William Heenan and Dr. John Pérez.

Junior biology major Daniel Gonzalez's research is titled "The Molecular Characterization of an Open Rectifier Potassium-Channel Gene in Drosophila melanogaster: Evidence of Alternative Splicing and Initial Characterization of the 5' Untranslated Region." His research mentor is Dr. Enrique Massa.

Also attending the conference were Yvonne Puente, senior chemical engineering major; Mary L. Gonzalez, McNair Scholars program director; Petra Lopez, McNair graduate mentor; and Joe Valenzuela, McNair academic coordinator.

Pictured l. to r.: Daniel Gonzalez, Lopez, Carl McNair (brother of the late Dr. Ronald E. McNair), Puente, and Castilleja.

New Mexico Professors Study Rio Grande Bosque

The National Science Foundation awarded the University of New Mexico (UNM) $920,000 for a study on the conservation and restoration of the Rio Grande Bosque.

The study is on the role of seasonal flooding in maintaining the ecological integrity of
the native cottonwood bosque in the semiarid Southwest.

UNM biology professor Dr. Manuel Molles is spearheading the study, and Clifford "Jim" UNM biology professor, and Clifford Crawford, biology professor emeritus, are co-investigators of the project—a multidisciplinary effort that will include representation from Earth and Planetary Sciences at UNM.

"Water is very important in the state of New Mexico," Molles (pictured) said. "And the research on the bosque should help us learn more about the state's water."

**Movida Performs at Nazareth**

Local dance company Movida performed at New York's Nazareth College during the fifth annual African-Caribbean and Brazilian Music and Dance Conference.

Movida, along with Bata Con Pies, performed dances from Africa, Brazil, and the Latin Caribbean islands. The Vazquez Dance Company, Percussion "Ah" Saleem, and the African Cultural Center of Buffalo's African Dance and Drum Performing Group also appeared at the college.

Artists Melodie Melon, Sophia Roberts, Tiffany Mingg, Ramon "Sunshine" Perez, Aida Veras, and the Pandoo Steel Band presented workshops.

**Good Triumphs in Texas-Kingsville Pastorela**

*La Transformación*, a play written and directed by Texas A&M University-Kingsville senior theatre arts and history major Jesus Pantel, was performed at La Procesión de La Posada y Pastorela in December. It was the first student-written pastorela—a genre in which good ultimately triumphs over evil—to be staged by the communication and theatre arts department.

In the play, set in Mexico in 1520, a priest named Juan, overzealous in his attempt to convert the Indians he encounters, strays from the path. Eventually, he realizes the error of his ways and discovers the true spirit of Christmas.

Pantel, performing the role of Jesus Christ, was joined by actors Nino Castillo, Ian Scott Ray, Abigail Vargas-Luna, Timothy Day, Violeta Castro, and Robert Balbaugh; narrator, Angela Prazzo; and stage manager, Denise Elaine Gomez.

Pictured here (l. to r.) are Balbaugh, Pantel, and Ray.

**Princeton Theological Launches Garcia-Treto Faculty Fellowship**

The president and board of trustees of Princeton Theological Seminary (N.J.) have established the Garcia-Treto Faculty Fellowship in the name of Trinity University (Texas) religion professor and Princeton Seminary trustee Francisco Garcia-Treto (pictured). The annual fellowship, part of the Hispanic Summer Program, which empowers Hispanic Americans for ministry in their own communities, will be awarded to a different scholar each year to teach biblical studies.

Justo Gonzalez, executive director of the Seminary's Hispanic Theological Initiative, said that the fellowship demonstrated an ongoing and increasing commitment to the Hispanic church and community. "It is very fitting that it is in honor of Garcia-Treto, who not only has been a leading scholar in the Hispanic community but who has long served in the Princeton community."

**California-Dominguez Studen International Program**

Five students from CSU-Don Hills are pursuing their I study abroad this academic year: Salvador Jaimes, studying at the 1 Tecnológico de Estudios Superiores Monterey, Campus Querétaro, Mexico Mendoza, University of Granada, Spain; M. Montero, University of Madrid, Maria A. Rodriguez, University of Guadalajara; and Anita J. Cole, University of Madrid.

Developing intercultural communication skills and international understanding students has been key to the CSU n Since 1965, more than 12,000 students participated in this study option.

**Colorado-Boulder Welcomes the Underrepresented**

At the University of Colorado, Black-ast is placed on a climate of health and safety, one in which people value individual and group differences, respect the perspectives of others, and communicate openly, according to Ofelia Miramontes, associate vice chancellor for diversity and equity.

Colorado-Boulder actively promotes health and safety as important to the campus community. Among the programs designed to promote the underrepresented groups, Cultural Unity Center, Minority Affairs Program, the Multicultural Students Association, Office of Diverse Equity, Success in Engineering, Excellence in Diversity, and Summer Access to Research Training.

**Coca-Cola Receives HACU Award**

The Hispanic Association of Colleagues Universities (HACU) presented the Company with its Outstanding Private Sector Partner Award for the company's extraordinary leadership and commitment to Hispanic higher education.
HACU's president, Dr. Antonio R. Flores (pictured l), presented the award to Rudy Beserra (r). The Coca-Cola Company assistant vice president, corporate Latin Affairs, who accepted the award on the company's behalf.

Coca-Cola funding supports partnerships between universities and local schools, global education programs, and “first generation” scholarships, among other initiatives.

Oregon Institute Honors Mt. Hood Latino Club

Mt. Hood Community College’s (MHCC) Latino Club was named the 1999 Oregon Diversity Institute's Outstanding Student Group.

Members of the Club accepted a plaque at the Institute's annual conference. The award recognizes leadership and innovation in diversity among colleges in Oregon. Club advisor Gayle Parke, MHCC Transiciones coordinator, and Al Sigala, director of media and public relations, were also recognized. The MHCC Latino Club, formed in 1998, now has the largest membership of any club at MHCC.

Pictured here l. to r.: Sigala; Holly Sobella, Latino Club secretary; Pedro Miguel, Club member; Denise Diaz, Club president (holding plaque); Mayra Zaragoza, Club member; and Parker.

Mt. Hood Offers Horticulture Class in Spanish

Mt. Hood Community College (Oreg.) received a $4,000 grant from the J. Frank Schmidt Family Charitable Foundation to be used for purchasing books, videos, and handouts in Spanish for the Introduction to Horticulture class.

Mt. Hood houses an operating nursery; greenhouses; an arboretum; and a land lab for turf and irrigation projects, landscaping, and growing plant material. By offering the class in Spanish, the school expects to further the knowledge and skills of Spanish-speakers in the field whose English is limited or absent.

Retablo Scholars at New Mexico State Symposium

Prominent scholars in the field of devotional painting traditions of Mexico and Latin America gathered for a two-day symposium at the New Mexico State University (NMSU) Art Gallery. Refugio I. Rochin, director of the Smithsonian Institution's Center for Latino Initiatives, and Miguel Breto, senior scholar at the Center, moderated the symposium—held in conjunction with “El Favar de los Santos: The Retablo Collection of NMSU,” which is, according to gallery director Charles Lowell, the most comprehensive exhibition to date on the subject of 19th-century Mexican retablos. Shown here, from the exhibition, is “El Sagrado Corazon de Jesus. The Sacred Heart of Jesus,” Anonymous, Mexico.

Participants included: Felipe Solis Olguin, subdirector of archaeology at the National Museum of Anthropology in Mexico City; Marcus Burke, curator of Paintings, Hispanic Society of America, New York; Elizabeth Zarur, NMSU assistant professor of art; Jacinto Quiarte, professor emeritus at the University of Texas-San Antonio; Manuel Olman Nolasco, general director of the National Commission on Sacred Arts in Mexico City; Ramon Gutierrez, associate chancellor of the University of California-San Diego; Solange Christine Behocarey de Alberro, professor at the College of Mexico, Mexico City; Claire Farago, University of Colorado-Boulder associate professor of art history; and Victor Zamudio-Taylor, University of Texas-Austin assistant professor of art history.

National Hispana Leadership Institute Board Notes

The National Hispana Leadership Institute (NHLI) welcomed new board member Art Ruiz. Ruiz brings expertise in public affairs, federal issues management, and community outreach, and extensive involvement with not-for-profit organizations. Ruiz said he intends to work with the board "to see a growth in the number of women trained, to obtain measured results of the training program, and to garner recognition for the organization's contributions to the American society as a whole."

Dr. Fern R. Espino, NHLI board chair, plays an important role in the economic development of Southeast Michigan. Espino was selected to join the executive committee of the Detroit Regional Chamber of Commerce program "Leadership Detroit," where she and others are responsible for program oversight and development.

Santa Ana Newspaper & Magazine Receive Honors

SAC (ACP) honored the Santa Ana College (Calif.) student newspaper el Don with the National Pacemaker Award. Theresa Salinas, 1998-99 editor-in-chief, accepted the award at the ACP/College Media Advisors conference in Atlanta, Ga.

The Pacemaker Award recognized el Don as the nation's top two-year college tabloid publication for excellence in design, editing, reporting, and content. Editors from the Atlanta Journal and Constitution judged the paper.

ACP also honored el Don, as well as West 17th, the Santa Ana College student magazine, with first place in the Best of Show General Excellence Awards. The two publications took top honors for the fourth year in a row.

Salinas was awarded second place in the Adobe Collegiate Designer of the Year competition.

NACME Ranks Northwestern No. 1 in Retention of Minority Engineering Students

Northwestern University (Ill.) is ranked No. 1 in the country in the retention of minority engineering students over the past eight years, according to a National Action Council for Minorities in Engineering (NACME) report.

Northwestern's average retention rate of 78% percent is more than double the national average of 36.5 percent, topping peer institutions, including Princeton, Duke, the University of Michigan, and Stanford.

The NACME study focused on African Americans, Latinos, and Native Americans in minority-serving institutions.
Indians, comparing average incoming first-year-student minority classes in the years 1991 to 1993 to average graduating minority classes in the years 1996 to 1998 to determine national and individual school retention rates.

1996 Northwestern graduate Tanya Ortega, an embedded software engineer with Xerox Corporation, said that since being helped by Northwestern's Minority Engineering Opportunity Program (renamed EXCEL), she has been inspired to help other students.

Newspaper Publishers Discuss Press Freedom at Michigan State

Peter Kann, CEO of Dow Jones and publisher of The Wall Street Journal, and Alejandro Junco of El Norte in Monterrey, Mexico, were the keynote speakers.

"As Latin America and the Caribbean enter into the 21st century, the new sets of economic, social, and regional perspectives will impose a rapid transformation of the region," said Manuel Chavez, assistant director of the MSU Center for Latin American and Caribbean Studies. "Human rights and press freedom play a critical role in the stability of the region and in the progress of the new economic alliance of the Americas."

NCLR and Latino Officer Organizations Form Partnership

The nation's largest Hispanic civil rights group and the two largest organizations representing Hispanic law enforcement officials joined forces to address growing concerns about racial/ethnic profiling, law enforcement abuse, and the low representation of Latinos at all levels of the nation's law enforcement structure.

The National Council of La Raza (NCLR), the Hispanic American Police Command Officers Association, and the National Latino Peace Officers Association formed a historic partnership, announced in December.

A NCLR study on hate crimes found that there are few high-ranking Latinos in law enforcement available to help address recent dramatic increases in law enforcement abuse and racial profiling affecting Latinos.

American Historical Association Holds 114th Annual Meeting

AHA The American Historical Association, together with 42 of its affiliated societies, held its 114th annual meeting in Chicago in January. More than 4,000 historians presented and debated new research and interpretations on a wide range of subjects. Many of the 751 sessions, designed to appeal to the broadest possible audience, featured audience participation and lively discussion. "Approaching the Borders of American Juvenile Justice," "National Security As Cultural Product," and "The American Presidency and Popular Culture: Imaging in the American Mind" were some of the topics.

Portland Community Targets Hispanic Entrepreneurs

Portland Community College (PCC) in Oregon is again offering a business lecture series targeting Hispanic-owned businesses. Co-sponsored by the Metropolitan Hispanic Chamber of Commerce, the Small Business Administration, and PCC's Small Business Development Center, topics include e-commerce, human resources, and Total Quality Management (TQM).

Mario Pedraza (pictured), a small business counselor for PCC, said, "It is affordable, informative, and a great way to network with other Latino entrepreneurs."

Capirotada: A Nogales Memoir

by Alberto Alvaro Rios

A rich mélangé, this memoir stirs together Rios' memories of family, neighbors, friends, and secrets from his youth. It addresses the quiet, the overlooked, the everyday side of growing up. Not about prison, or famous heroes, this book is instead about the many which is often the most interesting place to find news.

Cuentos from Long Ago

by Paulette Atencio

This bilingual sampler of southwestern tales, legends, and myths offers the modern reader wisdom passed down for hundreds of years. The themes of these stories are universal—love and its costs; forgiveness, good versus evil— voices, images, and incidents are uniq the Southwest.

Best Careers for Bilingual Latin Mark Your Fluency in Spanish Get Ahead on the Job

by Graciela Kenig

This book offers advice on finding rewarding career while maintaining uniquely Latino identity. From health care to high tech, it presents the latest informati
mum results in today’s hottest fields.

Never to Return
by Esther Tusquets

A witty, penetrating account of a woman’s inner journey to understanding through her encounter with Freudian psychoanalysis—this book is characterized by a winding, associative style that captures the vibrant ebb and flow of a woman’s inner life. Translated by Barbara F. Ichishi.

Community Colleges as Cultural Texts: Qualitative Explorations of Organizational and Student Culture
Kathleen M. Shaw, James R. Valadez, and Robert A. Rhoads, eds.

This book takes a step towards developing a nuanced understanding of the rich and varied cultures inherent in community colleges. The contributors use critical qualitative frameworks to address the question of whether, and how, community colleges confront the challenges of diversity and provide real opportunities for upward mobility.

Who Is My Neighbor?: Social Affinity in a Modern World
by James A. Vela-McConnell

The author explores the emergence of what is called “social affinity,” a concept bridging classical notions of social cohesion with contemporary social psychology. The ideas underlying social affinity focus on the sentiment of moral obligation, which holds society together.

Maya Conquistador
by Matthew Restall

Matthew Restall offers the first Mayan accounts of the Spanish Conquest. The story holds surprising twists: The conquerors were not only Spaniards, but also Mayans, reconstructing their own governance and society, and the Spanish colonization of the Yucatán was part of an ongoing pattern of adaptation and survival over centuries.

A Nation Divided: Diversity, Inequality, and Community in American Society
Phyllis Moen, Donna Dempster-McClain, and Henry A. Walker, eds.

Leading social scientists explore how different groups become socially and economically unequal and how the persistent patterns of durable inequality affect national stability. The researchers describe the changing demography of diversity and inequality and the interplay of diversity, inequality, and community in educational institutions, the military, the family, popular culture, and religion.

Preparing a Nation’s Teachers: Models for English and Foreign Language Programs
Phyllis Franklin, David Laurence, and Elizabeth B. Welles, eds.

The question of how to improve teacher education and preparation takes on a new urgency as the demand for well-trained teachers is growing dramatically. This book provides an insightful and timely overview of the challenges of improving teacher education and a practical guide for faculty members, department chairs, administrators, and educational policy-makers.

Rigoberta Menchú and the Story of All Poor Guatemalans
by David Stoll

David Stoll compares a cult text, Rigoberta Menchú—the book that propelled native Guatemalan Indian Rigoberta Menchú to the 1992 Nobel Peace Prize—with conflicting local testimony. In challenging the accuracy of a widely hailed account of Third World oppression, this book goes to the heart of contemporary debates over political correctness and identity politics.

Saudade/Sorrow
by Claribel Alegria

Claribel Alegria—who has long been a revered voice for the struggle for self-determination in Central America—plumbs the depths of grief and w Kern from pain and memory in lyrics written as love letters to her deceased husband. The poems not only summon their shared past in vivid detail but also...
ponder the meaning of death and separation, and the yearning for eventual reunion. Translated by Carolyn Forché.

**Angels on High: Márton Váró's Limestone Angels on the Nancy Lee and Perry R. Bass Performance Hall in Fort Worth, Texas**

Text by Ronald G. Watson

This book chronicles the creation, carving, and installation of Márton Váró's imposing angels on the façade of the Bass Performance Hall. Approximately 48 feet tall, the angels are of the same limestone as the building and inseparable from it. Váró also carved three sets of smaller angels in preparation for work on the actual sculptures.

**Contemporary Latin American Artists: Exhibitions at the Organization of American States 1941-1964**

Annick Sanjurjo, ed.

This book contains information on those internationally known artists who exhibited at the Museum of Modern Art of Latin America, Organization of American States, from 1941-1964.

**America's Fastest Growing Jobs, 5th Edition: Details on the Best Jobs at All Levels of Education and Training**

by J. Michael Farr

Jobs with high pay and fast growth are available at all levels of education and training—but you have to know what they are. This book provides descriptions of major jobs with average or higher growth rates plus jobs that are projected to create the largest number of openings.

Many publications featured in this section are available through amazon.com.

## Conferences

**NAFEO 25th National Conference**

February 13-17

Contact: (301) 650-2440; Web site, www.nafeo.org.

**NAHE 2000/Millennium Conference**

February 15-19

The National Association for Bilingual Education's five-day event includes keynote speakers and more than 200 workshops, symposia, papers, and demonstrations focusing on the education of language-minority children and the development of multilingualism and cultural understanding. In San Antonio, Texas.

**2000 NAWE Conference**

February 24-27

June 21

The Latin American Educational Foundation hosts its annual Golf Tournament. In Sedalia, Colo.

Contact: (303) 446-0541

HACU 14th Annual Conference
November 4-7

This year's theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

Book Review

By Rosita Lopez Marciano

Con Valor y a Como de Lugar is a fibana Puertorriqueña’s (Puerto Rican rural woman) beautiful story that translates emotions and experiences into poetry. Carmen Luisa Justiniano (Doña Carmen), now deceased, takes us through an unforgettable journey in her poignant memoirs. The author stated that writing a book about one’s life is not an easy thing to do. “It is like taking your clothes off in a public place, in the daylight, for all to see that there were many imperfections and imperfect people, but that is the way life is. You bring them with you in your memories, they become part of your life.”

The author does a splendid job of describing childhood in Puerto Rico. In the United States, much has been written about a child’s early transition to work and about child abuse. This book documents a child’s view of events happening around her interaction between home and school, violence towards children, and what it means to be a child in Puerto Rico during the 1930s. Puerto Rico and the United States, like most places around the world, have had a long history of problems stemming from gender and cultural misunderstandings, differences and stereotyping. Con Valor y a Como de Lugar clearly provokes reflection on a number of issues, including love, innocence, discrimination, poverty, inequalities, and oppression, that will generate different emotions throughout the book.

I learned some deep lessons from this outstanding book. Among them, courage, perseverance, and the cycle of existence. It made me think about the Puertorriqueña of yesterday and today’s Hispana. We must never give up. Her example of courage and determination to her family, friends, and countless readers clearly has had a positive effect on many lives. Two of her children, Dr. Samuel Betances and Dr. Carmen Gladys Perez Justiniano, are highly involved in educating and authoring books and other publications. Her children and grandchildren continue to climb the ladder of success by achieving the highest honors and degrees in their continuing quest to be the best they can be.

This lady, little in stature but mighty in courage and vision, has truly left a legacy to all whose lives she has touched. Doña Carmen believed in the heating power of touch. She had learned as a young girl that sick people can benefit from a gentle massage and prayers. She also used herbal remedies to cure her children’s ailments. This is a longstanding custom of country folk in Puerto Rico and one that from experience I know really works.

This book would be an excellent source of study in Hispanic history and culture courses. It is a complete story of a generation. Also, I highly recommend it for use in women’s studies courses as supportive material because this autobiography expresses the conflicts, courage, and experience of a woman’s life and journey in and out of her homeland. Most of all, it is a powerful testament to anyone who is interested in learning more about the power of never giving up!

Dr. Marciano is a professor in the Department of Educational Administration and School Business Management, Department of Leadership and Educational Policy Studies, at Northern Illinois University (NUI) in DeKalb, Illinois. Formerly she coordinated programs for the Department of Equal Educational Opportunities. A certified bilingual educator, she is a graduate of the University of Illinois-Chicago and holds a Ph.D. in education from Northern Illinois University.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewer’s Guidelines.
The University at Albany seeks nominations and applications for the position of Director of the Office of Affirmative Action. The Director serves and reports directly to the President, and provides a leadership role to the University Community on issues pertaining to Affirmative Action and related concerns.

The Director’s major responsibilities include preparing the Affirmative Action Plans for the University and the Research Foundation; advising the President and Vice Presidents on the implementation of the University and the Research Foundation Affirmative Action Plans and employment planning; reviewing and reporting on institutional compliance with SUNY, N.Y.S., and federal guidelines; advising, as needed, the President on special projects and procedures for full-time faculty, professional, and management confidential positions as well as entry level labor positions within the University and all full-time positions within the Research Foundation; assisting the University in its efforts to support the retention and success of protected classes persons and implementing the University’s Inquiries, Complaints, and Grievance process for allegations of illegal discrimination, including sexual harassment.

Additionally, the Director supervises the professional responsibilities and duties of the Associate Director of the Office of Affirmative Action and the office secretary. Facilitates the smooth functioning of the University Commission for Affirmative Action, chairs the President’s Task Force on Women’s Safety, manages the Sexual Harassment Prevention Program, is the Title IX Coordinator, and is responsible for University compliance with the Americans with Disabilities Act, and Section 504 of the Rehabilitation Act. Finally, the Director assures that the Office is a confidential resource for employees and students who have concerns they may wish to discuss about their professional and educational progress, and may represent the President in the larger community.

Candidates must possess a minimum of five years experience in a position of major responsibility working with Affirmative Action issues in higher education. A Ph.D. or equivalent is strongly preferred, although candidates with a Master’s degree and extensive experience working with Affirmative Action issues in a leadership role also will be considered. Candidates must work effectively with diverse individuals and groups, and be familiar with and able to work effectively within the environment of a research University.

Starting date for the position is August 1, 2000, or earlier if possible. Salary will be nationally competitive and commensurate with qualifications.

Candidates must send a letter of application including a description of relevant experience and a statement expressing their views about the appropriate role of affirmative action in higher education, a curriculum vitae, and three letters of reference to:

Professor James Acker
Chair, Search Committee for the Director of the Office of Affirmative Action
Office of the Chancellor
Administration Building 332
University at Albany
1400 Washington Avenue
Albany, New York 12222

The University at Albany is an Equal Opportunity/ Affirmative Action Employer.

Visit the University at Albany Web site at http://www.albany.edu/
**DIRECTOR OF FIELD EXPERIENCES**

This visionary leader will promote field experiences as part of a Wheelock education and develop field sites within Boston and surrounding areas. The selected candidate should have a strong record of collaboration with students/faculty/practitioners, and display evidence of excellence in an early childhood, elementary school, community agency, or higher education setting. Must have a record that warrants appointment to faculty status and a background that indicates effective working relationships with culturally and ethnically diverse populations. An understanding of national/regional trends and issues related to education and experiential learning is essential. Preference given to candidates with a doctorate in education or related field.

Screening of applications will commence as soon as possible and continue until position is filled. Candidates should submit curriculum vitae, letter of interest, and three letters of recommendation to: Joseph L. Chillo, Vice President for Enrollment Management, Wheelock College, 200 The Riverway, Boston, MA 02215.

For full job description, see Wheelock Home Page: http://www.wheelock.edu/job/

Wheelock College is an Equal Opportunity/Affirmative Action Employer and a member of the Colleges of the Fenway consortium.

**OCEAN COUNTY COLLEGE**

**PRESIDENTIAL SEARCH**

Ocean County College, New Jersey's first community college, is a public two-year institution with an enrollment of 7,500 students and a full-time faculty of 120. OCC is located in the heart of the beautiful Jersey Shore on a 275-acre wooded campus, equidistant from New York City, Philadelphia, and Atlantic City. The Board of Trustees of Ocean County College is pleased to invite applications and nominations for the position of President. This position will become available July 1, 2000, following the retirement of the current President. Excellent benefits and competitive salary.

**Leadership Profile/Criteria**

In its search for a new President, the Ocean County College Board of Trustees seeks a visionary and scholarly leader who will foster an inclusive climate and campus. The successful candidate will possess the highest professional standards and an open management style. The next President will have:

- An understanding of and a commitment to the mission of a community college.
- An earned doctorate from an accredited institution.
- Successful senior-level administrative experience in higher education.
- Community college experience and college teaching experience highly desirable.
- Strong decision-making experience and decision-making style based on collaborative relationships and the ability to empower others.
- Effective interpersonal communication skills and the ability to foster trust through an open exchange of ideas.
- Evidence of effective leadership in establishing a positive institutional presence and image in the community.
- Successful educational leadership experience in program development, evaluation, outcomes assessment, and understanding of how to motivate members of the campus community in achieving academic excellence.
- Demonstrated management skills in supporting resource development, financial/facility management, institutional planning, and public relations.
- Evidence of a working knowledge of the use and implementation of technology in academic and administrative environments.
- Demonstrated success with institutional advocacy in representing the college's needs at all levels of government.
- Evidence of an active involvement with students and an awareness of student services essential to student success.
- Successful record of promoting partnerships and building coalitions with various groups such as other higher education institutions, businesses, other schools, and community organizations.
- An understanding of our community that values and respects differences by being an advocate for diversity.

Candidates for this position must submit a resume, which includes a complete salary history, and three professional references. All candidates must also include a written response to the Leadership Profile/Criteria, above, which specifies if the candidate will meet these expectations. The college will contact a candidate with additional information and requirements. All correspondence should be addressed to:

FAX: (732) 355-0444
WEB: www.ocean.edu

APPLICATION DEADLINE NOT LATER THAN MARCH 17, 2000.

This is a Gold Hill Associates assisted search.

Ocean County College is an AA/EEOA Employer.
The Florida Board of Regents announces a nationwide search to recruit a new President for the University of Florida. The University of Florida is an AAU and Carnegie Research 1 institution. Located in Gainesville, the University is the sixth largest and one of the most academically diverse in the nation. The University of Florida enrolls over 43,000 students; employs more than 4,000 faculty members, and has an annual operating budget in excess of $1.6 billion.

The University of Florida is a major research-intensive university with 23 colleges and schools. It offers more than 100 undergraduate majors, coordinates almost 200 graduate programs, and offers professional degree programs in architecture, dentistry, engineering, law, medicine, nursing, pharmacy, and veterinary medicine. It is the state land grant university with a distinguished record of developing Florida agriculture.

The President is the chief executive officer of the University and works closely with the Chancellor of the State University System. The President is charged with leading the University academically, administratively, and financially, guided by the University’s mission and values. The next President is expected to provide leadership that incorporates vision and creativity. Candidates should have distinguished records of senior-level leadership in an educational institution of significant size and complexity.

Review of candidate materials will begin immediately and will continue until a new President is selected. For more information about the University of Florida go to www.ufl.edu. Expressions of personal interest with resumes and nominations should be sent to:

William (Bill) Funk
Education Practice Managing Director
Korn/Ferry International
500 N. Akard
3232 Lincoln Plaza
Dallas, Texas 75201
Fax: 214-954-1849
Email: krisha.creal@kornferry.com

The State University System of Florida is an equal opportunity employer and encourages women, people of color and people with disabilities to apply. The search is being conducted under the "Public Records Act" and the "Government in the Sunshine" laws of the State of Florida.

Faculty are expected to conduct appropriate research and scholarship in their field in addition to teaching, advising and service responsibilities. UW-Stout values faculty and staff who are supportive in working with diverse populations of students and staff. The ability to incorporate new instructional methods (including instructional technology) into teaching is desirable. Instruction is student-centered and may require the delivery of course work via alternative delivery methods, times and locations in order to serve the needs of a changing student population. The positions are expected to be filled on a full-time basis. Salary will range from $40,000 to $90,000, depending on qualifications. Review of applications will begin March 1, 2000. Interested applicants are encouraged to submit a letter of application, curriculum vitae, graduate and undergraduate transcripts, publications and a statement of teaching philosophy. Address all materials to the Search Committee Chair, School of Education, California Lutheran University, 60 West Olsen Road, Thousand Oaks, CA 91360.
St. Thomas University
The Archdiocesan Catholic University of Florida

Vice President for Academic Affairs/Dean of Undergraduate Studies

Saint Thomas University invites nominations and applications for the position of Vice President for Academic Affairs/Dean of Undergraduate Studies. The position will open on June 1, 2000.

DESCRIPTION OF THE UNIVERSITY: A growing, private comprehensive University committed to its Catholic mission, Saint Thomas University celebrates the racial, ethnic and international diversity of its student population of more than 2,200. Because of its commitment to educating a diverse student body, the University has attracted numerous grants and prestigious awards. As a Hispanic Serving Institution, the University has a strong commitment to developing a faculty that is recognized for both its outstanding competence and diversity. Over 80 full-time faculty teach in 24 undergraduate programs, 9 graduate programs and the Law School. The Main Campus is situated on 140 wooded acres, located north of the City of Miami. Outreach centers serve the people of southwest Miami-Dade and Broward Counties. The University has recently completed a new 5-year plan reflecting the presidential vision for academic excellence and program innovation.

RESPONSIBILITIES: Building on the 5 successful years of leadership of the outgoing Vice President for Academic Affairs, the University is seeking an academic leader with skills to advance the University in both excellence and innovation. As chief academic officer, with responsibilities for the academic areas of the University outside of the Law School, the Vice President for Academic Affairs/Dean of Undergraduate Studies reports to the President. Reporting directly to the Vice President are the Academic Deans, Assistant Vice President, Department Chairs, Director of the Main Library and the Registrar/Director of Institutional Research.

QUALIFICATIONS:
- Demonstration of academic leadership through strategic planning in order to implement the new University plan which is aggressive in its demands on the academic units of the University
- Demonstration of ability to develop and implement a model of academic governance which furthers academic excellence and innovation in the academic dimensions of the University
- Commitment to the Catholic Mission of Saint Thomas University
- An entrepreneurial record of building academic partnerships with the external community, particularly a record with business community partnerships
- A record of improving academic quality through assessment
- A record of successful leadership in complex and non-traditional settings
- Extensive knowledge of higher education and best academic practices
- Extensive knowledge of and experience in leading initiatives in teaching and learning with technology
- Leadership skills to attract a diverse faculty
- A record as a decisive academic leader able to manage change
- Ability to work collaboratively with and lead a diverse and committed faculty community
- Appropriate academic credentials, including an earned doctorate from a regionally accredited institution, as well as the teaching, service and research record that will model high academic expectations

The faculty of Saint Thomas University is deeply committed to the University's Mission of Student Success, Diversity, Catholic Identity, Life-Long Learning through Technology, Community Service and Centers for the Natural Environment.

APPLICATION PROCEDURE: Applicants should submit a resume, 2-page statement addressing qualifications for the position, and the names, addresses and telephone numbers of 5 professional references. Please include email addresses and fax numbers if available. Persons wishing to nominate a candidate can provide the candidates name and resume. Review of applications will begin March 2, 2000 and continue until the position is filled. Submit application materials to: Chair, Search Committee for Vice President for Academic Affairs, Saint Thomas University, 16400 NW 32nd Avenue, Miami, FL 33154. Email: VPAppSearch@mt.edu. Fax: 305-628-6682.

Saint Thomas University is an equal opportunity employer committed to hiring a diverse work team.

Brevard Community College
Cocoa, Florida
www.brevard.cc.fl.us

Brevard Community College and the Cocoa Campus Presidential Search Committee invite nominations and applications for the position of the Cocoa Campus President.

The Cocoa Campus President is the chief academic and administrative officer of the Cocoa Campus, under the general direction of the District President according to the policies set by the Board of Trustees.

Qualifications for the position include:
- 5-years experience in senior-level leadership at an institution of higher education and a clear commitment to the unique, multipurpose a community college plays.
- Openness to innovative programming to expand the college's reach the community and to better serve its students.
- An earned doctorate and a record of scholarly and/or professional achievement.
- A commitment to enhance the quality of student life and strengthen the delivery of services to a multicultural student body.
- The ability to communicate with, and represent, the institution to outside constituencies, including the residential and business communities, alumni, and legislative and other governmental bodies.

The salary and benefits package is competitive. Application packets received in the Human Resources Office by 5:00 p.m., Friday, April 14, 2000. The position is available July 1, 2000.

Applications: Applicants should send (1) a letter expressing their interest in the position that addresses and demonstrates how they meet the Committee’s preferred qualifications, (2) their curriculum vitae, and completed BCC application form which requests the names of four referees (one each: superior, subordinate, faculty member, and community/business leader). References will be contacted.

Nominations: Nominators should send a letter of nomination and, if possible, the nominee's curriculum vitae.

Applications and nominations should be sent to:
Office of Human Resources
Brevard Community College
1519 Clearlake Road
Cocoa, FL 32922-6597
ATTN: Cocoa Campus President Search

DARTMOUTH COLLEGE
COLLEGE COUNSEL

Dartmouth College invites applications and nominations for the position of College Counsel.

The College Counsel is Dartmouth’s principal legal officer, reporting to the President. The College Counsel provides general legal guidance and advice to the Board of Trustees, the President, other administrative officers, and to the faculty with respect to all legal issues affecting the College. The College Counsel supervises the staff, operations and budget of the Dartmouth Legal Affairs Office and when necessary, coordinates interaction with external legal counsel.

Qualifications: Bachelor’s degree plus J.D. (or LL.B.) degree and ten years of legal experience required. Preference given for a varied and complex legal practice (including experience with non-profit organizations) and for a demonstrated record of wisdom and good judgment. Applicants must show an appreciation and strong interest in working within an academic community and diverse constituency. Must have an interest in a demanding legal practice.

Salary: Commensurate with qualifications and experience and consistent with an academic institution.

Description: Dartmouth, a private, co-educational institution and member of the Ivy League, was founded in 1769 in Hanover, New Hampshire and holds a strong commitment to undergraduate teaching and the liberal arts. In addition, Dartmouth College has three professional schools: Dartmouth Medical School, Thayer School of Engineering, and Tuck School of Business Administration, and 16 graduate programs in the arts and sciences. They are all integral and important parts of the educational mission of the College and assist in making Dartmouth College a unique educational institution.

Applicants should submit a cover letter, curriculum vitae and a list of at least three references. The review of applications and nominations will begin in March and continue until the position is filled.

VON DER AHE CHAIR IN COMMUNICATION ETHICS

Loyola Marymount University, a comprehensive Catholic University, located in Los Angeles, invites nominations and applications for the Von Der Ahe Chair in Communications. The Chair will provide the leadership to develop a strong focus on theoretical and applied ethics for students in film, television, screenwriting and communication studies. The Chair will:

1. Teach theoretical and applied ethics across disciplines and preprofessional programs in the College of Communication and Fine Arts.
2. Support innovative research in applied ethics in the fields of entertainment and communications.
3. Foster collaboration between the University and its publics, most particularly, the entertainment industries located in Los Angeles.

The University desires to appoint an individual who will have a positive impact on the creative work of students and assist entertainment professionals and executives in dealing with their ethical challenges. The candidate must demonstrate a background in ethical theory and applications and must have evidence of a demonstrated ability to integrate and apply that theory to the ethical problems facing by communicators in film, television, public relations and advertising. The candidate must be able to demonstrate a record of publication in ethics and/or communications.

The Chair will teach two courses per semester. The Chair will also provide leadership and management of events and colloquia with other professional groups and companies involved with ethical questions in the entertainment and communication fields. The Appointment to the endowed Chair will provide, in addition to a competitive salary, support for research, events and colloquia.

Applications must include a letter of interest that briefly indicates the candidate’s vision for the development of the Chair, curriculum vitae, and the names and addresses of three references. The review of applications will begin February 15, 2005, and continue until the position is filled. Nominations and applications to:

ADDITIONAL RESPONSIBILITIES: In addition to the specific duties associated with the position, all successful candidates are expected to conduct research, pursue publication and external funding; contribute to the College's doctoral program in education; and provide service to professional associations, the University and the local community. University-school partnerships are encouraged. SALARY AND BENEFITS: Salary is commensurate with entry-level appointment at the rank of assistant professor. Nine-month, tenure track positions include a competitive benefits package and frequent summer appointments if sesquient. APPLICATION PROCEDURES AND PROCESS: To apply, please send a letter of interest, curriculum vitae, three current letters of reference and official copies of all college transcripts to: Dr. David Adams, College of Education, Curriculum and Foundations, Cleveland State University, 1860 East 22nd Street, Cleveland, Ohio 44114-4435. Review of all applications will begin immediately, until filled.

UCLA invites nominations and applications for the position of Vice Provost for International Studies and Overseas Programs (ISOP), effective July 1, 2000.

The Vice Provost has responsibility for the coordination and direction of UCLA's programs in international and area studies. In June 1999, the new position of Vice Provost was created to strengthen UCLA's commitment to international and area studies and to enhance opportunities for effective collaboration among all academic units active in this critical part of the university's mission.

ISOP includes eleven multidisciplinary research centers: five centers on Africa, Latin America, the Near and Middle East, International Relations and East Asia are supported by Title VI funds; the other centers focus on China, Japan, Korea, Southeast Asia and the Pacific Rim. As a central part of its mission ISOP works closely with programs in the professional schools, including the Center for International Business and Education Research (CIBER) in the Anderson School of Management.

ISOP also includes the International Development Studies Program, the South Asia Studies Committee, the Education Abroad Program and the Language Resource Program. ISOP coordinates the activities of the International Visitors Bureau and the International Student Center, oversees all formal UCLA/ international academic exchange and research agreements, and provides liaison with extramural agencies/Federal government, other institutions of higher education, learned societies, private foundations and community organizations/active in international and foreign area studies.

The Vice Provost, who has administrative, budgetary, personnel and physical resource responsibility for ISOP and its various components, reports to the Provost of the College of Letters and Science. An internal advisory committee of deans and faculty advises the Vice Provost on matters of policy, governance and resource allocation. An external advisory council advises and assists the Vice Provost in developing and maintaining relationships with external constituencies. The Vice Provost participates in campus-wide planning in the College and with the deans of the professional schools.

Applicants should have qualifications appropriate to the rank of full professor and high visibility in scholarly and other communities of importance to international and area studies. Candidates should have demonstrated capacity for academic leadership, and for engaging constituencies at the local, state, national and international level. Salary will be commensurate with background and experience.

For additional information, please go to:
http://www.apo.ucla.edu/apoweb/vice provost-isop/

To be ensured full consideration, nominations and applications should be sent by March 15, 2000 to:

Miami University of Ohio

Director of Admission

The position: Reporting to the Associate Vice President for Enrollment Services, the Director of Admission will work closely and collaboratively with other members of the University community, particularly student financial assistance and enrollment and retention staff, and serve as a key point of contact for prospective students and families. The Director will manage an admission staff of 40, prepare budgets, and provide leadership and direction in identifying and implementing effective recruitment strategies. The Director is responsible for overseeing the recruitment efforts of the University and for providing leadership in the development and implementation of strategies to effectively market the University to prospective students.

Qualifications: A strong candidate will possess advanced degree, along with seven to ten years of progressively responsible admission experience. Excellent track record of enrollment growth, a clear understanding of enrollment trends, and experience in marketing and communications. Excellent interpersonal and leadership skills are essential. The person in this position will also possess an understanding of national trends in admission, the vision and skill to lead a complex admission program at a selective institution, and an appreciation, passion, and personal commitment to diversity with a vision for what that means to an institution of higher education.

Application and Nomination: Review of applications will begin on October 15, 2000, and continue until the position is filled. Nominations of individuals for this position may be made to The Speelman & Johnson Group at 38 Mulberry Street, Box 504, Leeds, MA 01056. Phone: 413-584-7089; Fax: 413-584-7089; Email: mjm@speelmanjohnson.com. Applications may be received on line at www.speelmanjohnson.com.

Princeton University

Associate Director
Office of Career Services

The incumbent will serve as a member of the leadership team of the Office of Career Services, which serves approximately 4,600 undergraduate and 1,700 graduate students, and will assist in fulfilling the department's mission and goals. He or she will have oversight of the operations of the office and its strategic planning, overseeing the internship and job search opportunities for current students and alumni. He or she will also assist in preparing materials to be used for job search and public relations purposes. The individual will provide counseling in both job search and career development and employment recruiting experience, which includes administrative responsibilities and the supervision of staff. The incumbent must possess the ability to develop and implement effective policies and procedures, and to communicate effectively with students, faculty, staff and employers. The incumbent will be responsible for the management of the office in the absence of the director.

The successful candidate must have a graduate degree and at least three years (5-7 years of experience strongly preferred) of progressively responsible career development and employment recruiting experience, which includes administrative responsibilities and the supervision of staff. The incumbent must possess the ability to work independently and as a contributing member of a team required experience with information technology, including the use of the Internet as a counseling tool, team-building project management and the ability to manage multiple priorities is required. A high degree of familiarity with a variety of software packages for word-processing, spreadsheets, databases (Microsoft Office preferred), and Web site creation (e.g., HTML, Claris, Front Page) is needed. The ability to write clearly and concisely is also required. For full consideration, applications (resume, cover letter and the names of 3 references) should be received by MARCH 30, 2000.

Princeton University provides an exceptional benefits package. Interested candidates should submit a letter, resume on plain white paper with standard 12 pt. New Times Roman or similar font and informal resume to: Human Resources, 711-2-07-287-CHE, Princeton University, Princeton, NJ 08544-5254. For more information on how to apply, please see our Web site at: http://www.princeton.edu/hr/howtoap.htm or call our Employment Opportunities Hotline at (609) 258-6500. NO FAXES, PLEASE. An equal opportunity employer.
THE UNIVERSITY OF NEBRASKA AT OMAHA

ASSOCIATE VICE CHANCELLOR FOR RESEARCH & DEAN FOR GRADUATE STUDIES

The University of Nebraska at Omaha (UNO) is one of four campuses in the University of Nebraska and is located in the heart of Nebraska’s largest metropolitan area. In the University of Nebraska there is a single Graduate College that functions on all four campuses. The executive vice president and provost also serve as Dean of the Graduate College and in that capacity presides over the university-wide graduate faculty and its elected Executive Graduate Council. On each campus a graduate council supervises programs and other matters of local concern within the framework of the governance document and policies of the Graduate College.

On the UNO campus there are 347 members of the graduate faculty and 53 different graduate degree programs, including three doctoral programs. Graduate student enrollment is over 2600.

The Associate Vice Chancellor for Research and Dean for Graduate Studies reports to the Vice Chancellor for Academic Affairs. The Associate Vice Chancellor for Research is responsible for encouraging and supporting efforts to obtain external funds for instruction, research and service; supporting the objectives of the University Committee on Research; and supervising the staff of the Office of Sponsored Programs and Research. As campus Dean for Graduate Studies, the individual in this position is responsible for the welfare of all graduate programs on the UNO campus and for implementing the policies of the Graduate faculty and their elected representatives on the Graduate Council. The campus dean also supervises the staff of the Office of Graduate Studies.

Preferred qualifications include an earned doctorate; a distinguished record of scholarship to qualify for professorial rank and for membership as a Fellow in the Graduate Faculty; and academic administrative experience at the departmental level or higher, preferably in a graduate and/or research program. The individual in this position will be expected to have a strong commitment to the role of faculty governance, to collaboration with the deans of the academic colleges, and to the university’s mission as a metropolitan institution of distinction.

Nominations and applications should be sent to: Dean John Christensen, Chair, Search Committee, KH 334, University of Nebraska at Omaha, Omaha, Nebraska 68182-0161, FAX (402) 554-2879. Application should include a letter discussing experience and accomplishments relevant to this position, vita and the names, addresses, and telephone numbers of three references. Review of applications begins on 3-15-2000 and will continue until the position is filled. UNO is an equal opportunity employer.

DIRECTOR, Student Financial Services

Massachusetts Institute of Technology, Cambridge, Massachusetts

The Massachusetts Institute of Technology (MIT) seeks a creative policy maker and skillful manager to lead its Department of Student Financial Services. The Director will lead in formulating and articulating MIT financial aid policy and will oversee the efficient provision of financial aid services. The Student Financial Services Department has responsibility for guiding a wide range of student financial services, including the maintenance of the financial record, processing financial aid, billing and collecting tuition and fees, disbursing and collecting loan funds, donor relations related to scholarship funds, and student employment. The Director will manage a department of approximately 40 full-time professionals and report to the Dean of Students and Undergraduate Education (ODSUE).

Qualifications will include an undergraduate degree from an accredited institution, with an advanced degree preferred; a record of achievement in the development and implementation of financial aid policies, formulas, and procedures, preferably in a needs-blind admissions and needs-based financial aid environment; participation in regional and national committees within the financial aid community that define financial aid policies; a record of success as a manager of financial and human resources, including experience working with sizable financial aid budgets, office administrative budgets, large staffs including student assistants, and building motivated and skilled teams; accurate record maintenance and financial accounting and faculty in governmental/regulatory authority compliance and reporting.

A complete position description is available at www.mit.edu Please submit letter of application and resumes to Beverly Brady, Associate, Lea Ann Miller, 334 Boyland Street, Suite 500, Boston, MA 02116; fax (617) 262-5095; e-mail bbrady@mit.edu

Colorado State University invites applications and nominations for the full-time position of Vice President for Research & Information Technology (VP-RIT), to be available August 1, 2000.

One of five Vice Presidents, the VPRIT reports directly to the President/Chancellor of the CSU System, and serves as the institutional advocate and facilitator for faculty research activities. S/he is responsible for programmatic excellence in research and in integration into the graduate and undergraduate learning-experience. The VPRIT coordinates development and realization of institutional research goals that are consistent with Colorado State University’s Land Grant mission and status as a Carnegie Class I Research University, interwoven with our many publics and proactively promotes diversity. Specific responsibilities include:

- Oversight and promotion of external research funding and associated facilities, equipment and infrastructure needs and capabilities, including recognition and retention of faculty.
- Liaison with the Federal and State political and legislative environment.
- Identification of research opportunities and development of interdisciplinary programs.
- Transfer of technology from research endeavors with the assistance of the Colorado State University Research Foundation.
- Oversight of the Graduate School.
- Provide for planning and administrative oversight of the University’s Information and Instructional Technology Programs in the areas of teaching, research, service and administration.

QUALIFICATIONS: Earned doctorate and eligibility for academic tenure. Demonstrated record of scholarly accomplishment, funded research, graduate student advising, and administrative experience (at least at the Department Head or equivalent level). Demonstrated commitment to, and experience in achieving, diversity goals and objectives. Familiarity with the utilization of information technology in the academic/research environment is desirable.

Colorado State University is a comprehensive research university, with annual research expenditures in excess of $140 million and a total annual budget of $465 million. With 18,800 undergraduates, 3,472 graduate students, 530 professional veterinary medicine students, and approximately 7,060 employees, CSU is the flagship institution of the Colorado State University System (CSU, the University of Southern Colorado and Fort Lewis College). With its main campus located in Fort Collins, CSU’s Denver Center, Agricultural Experiment Station research centers, Cooperative Extension, and State Forest district offices connect the University’s research and educational programs to citizens throughout the State. For more information, please visit the materials available through the University and VPRIT web-sites: http://www.colostate.edu/ and http://www.engr.colostate.edu/level2/research.htm.

Applications will be accepted until the position is filled; however, to be guaranteed full consideration by the Search Committee, applications must be received by March 24, 2000, and include letter of application stating applicant's qualifications and nature of interest in the position, a C.V. and names and contact information of three individuals who can comment on the applicant's abilities to assume this leadership role. Applications will be accepted, however, until the position is filled. All applications or expressions of interest will be handled confidentially until the short list of candidates is invited for on-campus interviews is announced. References will not be contacted without the prior consent of the applicant.

Submit applications to:
Dr. Gordon D. Niewender, Chair
VPRIT Search Committee
Colorado State University
Fort Collins, Colorado 80523-2001
FAX 970/491-5541
E-mail or voice inquiries should be directed to Search Support at SPC@research.colostate.edu, or (Voice) 970/491-7194.

McHenry County College

VICE PRESIDENT FOR ADMINISTRATIVE SERVICES/TREASURER

McHenry County College is seeking a professional for the position of Vice President for Administrative Services/Treasurer. McHenry County College is a public, comprehensive community college offering both credit and non-credit programs. Founded in 1967, the College serves approximately 20,000 credit and non-credit students on a 108-acre campus in Crystal Lake, Illinois. One hour's drive from northwest Chicago and one hour south of Milwaukee, McHenry County is the fastest growing county in Illinois. McHenry County College is committed to serving and supporting students in pursuit of their educational program.

The Position

Reporting to the President and serving on the President's cabinet, the Vice President is the chief financial officer of the institution. The Vice President has oversight for administration and finance including budgeting, purchasing, human resources, administrative information systems, physical plant, campus safety, the campus bookstore, and food service auxiliary enterprise areas. McHenry County College currently has total financial assets in excess of $29 million with multiple funding sources including the Friends of McHenry County College Foundation. The Vice President will work closely with the President's cabinet, will oversee the College’s investment program, and will serve as College Treasurer to the Board of Trustees. The person in this position is also responsible for serving as a liaison to Federal and State agencies with regard to financial matters, for sharing in the development and review of policies recommended by the President to the Board, and for supervising the administration of the institution's collective bargaining agreements.

Qualifications

The successful candidate will possess a Master's degree in business, management, accounting, or a related field, have significant and progressive fiscal experience in a complex educational institution, and extensive experience in budgeting, fiscal affairs, accounting, and administration. A demonstrated ability to successfully manage and develop staff, to work collaboratively with multiple constituencies, and to represent the fiscal affairs operations broadly across the College are all important qualifications for the Vice President. Experience with computer based fiscal planning and participatory management, as well as superior interpersonal skills and the ability to think creatively, strategically, and proactively are important considerations in the selection of the Vice President.

Effective Date of Employment

August 1, 2000

Application and Nomination

Review of applications will begin on March 6, 2000, and will continue until the position is filled. Nominations of individuals may be made to Nancy Loomis as indicated below. Applications for this position should include a letter of application addressing the listed qualifications, a resume, and the names and telephone numbers of three references. This information should be sent to:

Ms. Nancy Loomis
Assistant Vice President of Human Resources
McHenry County College
8900 U.S. Highway 14
Crystal Lake, IL 60012-2761
Phone: 815.455.8736

The Spelman & Johnson Group is assisting the search process and confidential inquiries may be made to William Spelman at 703.927.8000.

Visit McHenry County College's website at www.mchenrycoll.edu

McHenry County College is committed to diversity in its community and is an equal opportunity/employee.

Montclair State University

DIRECTOR OF INTERNAL AUDITING

The position reports to the President and is responsible for conducting financial, operational, and compliance audits of University departments and programs and for evaluating the system of internal controls. Specific responsibilities include providing management with independent analyses and evaluations of the adequacy and effectiveness of internal operational controls, the reliability and integrity of financial information, compliance with policies and regulations and the efficient use of resources.

Qualifications: Candidates must possess a bachelor's degree in accounting, finance or a closely related field; MBA with CIA certification preferred. Eight to ten years' experience in progressively responsible roles in internal auditing with higher education experience preferred. The candidate should also have administrative or managerial experience, knowledge of electronic data processing systems, problem solving ability, strong analytical and reporting capabilities and the ability to effect change. Excellent communication skills and the ability to interact with a wide range of constituencies required.

Salary Range: $49,241 – $78,798

Starting Date: May 1, 2000

Apply by: Consideration of candidates will commence on March 15, 2000. The search will remain open until the position is filled.

Send letter and resume (include V-number) to: Valerie L. Van Baaren, Search Chair, Montclair State University, Box C316-V#031/HOHE, Upper Montclair, NJ 07043

An Equal Opportunity/Affirmative Action Institution

East Stroudsburg University of Pennsylvania

DEPARTMENT OF EARLY CHILDHOOD & ELEMENTARY EDUCATION

The Department of Early Childhood and Elementary Education invites applications for one full-time, tenure track position. The mission of the Department is to prepare a community of learners who are competent and reflective professionals able to teach each child in any setting. We are seeking a candidate with a record of scholarship/creative activity, service and continual professional development.

POSITION TITLE

Assistant Professor, Department of Early Childhood/Elementary Education, full-time tenure track position

REQUIREMENTS

Earned Doctorate required at time of appointment. Successful teaching experience in early childhood, elementary and/or middle school education. Teaching certification required. Final determination will be based upon successful interview, which will include a teaching demonstration.

PREFERRED

Experience in university-level teaching and/or supervision of student teachers. Candidates are asked to highlight self-identified areas of expertise as related to the field of teacher preparation.

DATE OF APPOINTMENT

August 2000

East Stroudsburg University of Pennsylvania, one of the fourteen state-owned universities in Pennsylvania, enrolls approximately 5,000 undergraduate and graduate students in the Schools of Professional Studies, Arts and Sciences, Health Sciences and Physical Education. The Department of Early Childhood and Elementary Education currently has an enrollment of approximately 800 undergraduate and graduate students, the largest department in the School of Professional Studies.

The University is located in the Pocono Mountains, two miles from the Delaware River, New York City is 75 miles to the east via I-80, and Philadelphia is 100 miles to the south.

Full consideration will be given to applications received by March 10, 2000. Applications for this position will be held in a pool for one year in the event that a similar position becomes available. Interested persons in these positions must send a letter of application (that may include areas of expertise), vita, official graduate transcripts, and three recent letters of recommendation to:

Dr. Margaret Einboden
Chairperson, Search & Screen Committee
Department of Early Childhood & Elementary Education
East Stroudsburg University of Pennsylvania

DIRECTOR
Center for Effective University Teaching

Northeastern University is seeking an experienced individual to direct its Center for Effective University Teaching. The director is responsible for planning, coordinating and implementing programs and activities of the Center. The Center's mission is to strengthen the quality of teaching at Northeastern. Located in Boston, MA, Northeastern University is a Carnegie II research university that is student-centered, practice-oriented and urban. Founded in 1858, the University is a world leader in cooperative education, offers diverse curricula and research programs and has an overall enrollment of 27,500.

The director reports to the Vice Provost for Undergraduate Education and is expected to play a leadership role in promoting effective teaching and student learning across the University, organize training and support programs for faculty and graduate students on teaching and the evaluation of teaching, work to strengthen teaching effectiveness through workshops, individual consultations, publications, and serve as a resource person to university administrators on issues related to teaching and learning in higher education. Candidate must have a doctoral degree and significant program experience in faculty development and teaching improvement. Teaching experience at college/university level, Must be able to work effectively with faculty, administrators, and students and have strong writing, speaking, and organizational skills. Must be able to work in a diverse and multicultural environment and be able to adapt to the cultures of a variety of traditional and professional academic programs.

Salary and benefits are competitive and commensurate with qualifications. Review of applications will begin immediately and will continue until the position is filled. Applications should include a cover letter, curriculum vitae, statement of philosophy of teaching and faculty development, and the names of three references. Women and minorities are encouraged to apply.

Appointment is expected to be effective on or before August 2000. Application materials should be sent to: Dr. Gilda Barabino, Vice Provost for Undergraduate Education, Northeastern University, 112 Hayden Hall, Boston, MA 02115.

Northeastern University is an Equal Opportunity, Affirmative Action Title IX Employer.

ART EDUCATION

Tenure-track faculty position, August 1, 2000, pending funding. Ph.D. or Ed.D. in Art Education; considered. Three years public school art teaching experience; university teaching experience desired. Computer and research skills important. Application letter, with brief statement of teaching, philosophy, transcripts, and three letters recommendation to Art Education Search Committee, Department of Art, APSU Box 4426, Clarksville, Tennessee 37044. Tel (931) 221-7242. Fax (931) 221-7245. If available, include 20 slides student work as well as individual's art work. Exam of research or reference for any published work will be included. Review of applications will begin April and continue until the position is filled.

GEOGRAPHY

Search reopened. The Department of Geology Geography invites applications to fill a full-time, tenure-track position in Geography at the Associate Professor level for Fall 2000. Ph.D. required. Responsibilities include teaching and serving as director of the GIS program. Candidate must have a strong background in teaching and an interest in geography. The candidate is also required to develop an active research program in a specialized area of geography. Experience with geographic information systems is required. Ability to teach GIS courses is essential.

Applications should be submitted to:
Dr. Robert Sirk, Chair, Search Committee, Department of Geography and Geology, Voice 221-7454. Fax 931-221-7284. Review applications will begin April 15, 2000 and continue until the position is filled.

MANAGEMENT

(Positions vary by location. A more detailed job description can be found in the Human Resources Department.)

Minorities, women, members of other protected groups are encouraged to apply.

Austen Peay State University is an Affirmative Action/Equal Opportunity Employer.
Plattsburgh State University of New York invites applications for Fall 2000 tenure track positions.

Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT provides a quality of life unsurpassed for the whole family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada, one hour's drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and Interstate 87.

Successful candidates must be committed to excellence in teaching in an undergraduate institution offering programs in the arts and sciences, education, human and social services, business and economics with an understanding of and sensitivity to minority and gender concerns. Selected candidates will have an interest in interdisciplinary and collaborative programs such as Women's Studies, Latin American Studies and Canadian Studies, all of which are special foci for the College; a desire to integrate information technologies; and a willingness to participate with new distance learning programs.

The faculty is challenged to redefine their teaching roles by incorporating recent research on teaching effectiveness. College supports faculty scholarship through the NYS/UP bargaining agreement, minority and women faculty may apply for one year, limited commitment to pursue scholarly projects. Other faculty development opportunities include joint State/Union travel grants and College Funded-in-House Mini-Grants to provide seed funding for research activities. Reday Teaching Enhancement awards, Presidential Research Awards, and Educational Technology Awards. We offer a competitive salary and an excellent benefits package. Unless otherwise stated, review of applications begins immediately and continues until the position is filled.

Application Procedure: Please send or fax cover letter, resume, or curriculum vitae, transcripts, three letters of recommendation and other requests mentioned in individual ad to: Chair, Search Committee (P#-), c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2681, Fax (518) 564-5900.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

The University of Scranton announces the availability of three tenure track positions in its Education Department. The positions, available at the associate or assistant professor rank, have a starting date of the Fall semester, 2000. Reviews of applications will begin 1 March 2000 and will continue until the position is filled. Descriptions and contact names for each of the positions follow:

1. Special Education (new position) The search committee seeks a candidate with classroom-based and advanced strengths in high incidence disabilities for its emerging special education program. The successful candidate should have a strong generalist ability to teach courses in special education curriculum and methods, learning disabilities and supervision of student teachers. Preference will be given to those who have supervisory and administrative experience. Send materials to Dr. Deborah Eiffe Lo, Special Education Search Committee.

2. Secondary Education The search committee seeks a generalist in its secondary education program. The successful candidate should be able to teach general methods and planning, and any combination of special methods in social studies, foundations of education, evaluation and measurement, or educational technology. This position will also supervise student teachers. The committee prefers a candidate with significant teaching experience and leadership skills. Send materials to Dr. Kathleen Montgomery, Secondary Education Search Committee.

3. Educational Administration (pending funding) The search committee seeks an experienced educational leader who has served the public schools in central office (superintendent/assistant superintendent) positions. The successful candidate should be able to teach courses in supervision and administration, lead the principalship. The candidate, depending upon areas of strength, will also be expected to teach courses in the Superintendent/Assistant Superintendent's position. Evidence of effective leadership skills will be expected by the search committee. Send materials to Dr. David A. Wilfey, Chair.

Qualifications for these positions include a doctorate earned in an appropriate field, and articulate research focus, significant experience in basic education in an appropriate area, and possession of state or national certification, Pennsylvania certification. Service to the profession is expected, and evidence of professional activity is desired.

The Education Department at the University of Scranton offers range of degree and certification through basic, master's, and post-master's programs, and is accredited by the Pennsylvania Department of Education and the NCATE. The Department is housed in the Panasque College of Professional Studies. Noted for its academic programs and professional education, the University is recognized for excellence in U.S. News and World Report. The University offers a competitive salary and attractive package of benefits. Located in the historic Pocono mountainous region of Pennsylvania, the University is close to skiing and recreation areas, and is within three hours of the major metropolitan centers of both New York City and Philadelphia.

The University of Scranton is proud of its mission in the Catholic and Jesuit tradition and spirit. Candidates must be able to support the mission within their position at the University. Send a letter of application addressing the qualifications listed, a statement of research interest, a current curriculum vitae, and three letters of reference (with current phone numbers of reference) to the Education Department, University of Scranton, Scranton, PA 18510-6603.

The University of Scranton is an EOE/AA/Acrostic Employee/Employer

HUSTON-TILLLOTSON COLLEGE
VICE PRESIDENT FOR ACADEMIC AFFAIRS

Huston-Tillotson College (HTC) invites nominations and applications for the position of Vice President for Academic Affairs. The Vice President will report directly to the President; in providing leadership in a dynamic and rapidly changing environment. The Vice President will organize, monitor, and coordinate all aspects of the academic program, including the curriculum, educational policies, academic budget, and academic personnel in consultation with the President, senior academic administrators, and the faculty. Senior academic administrators reporting directly to the Vice President are the Dean of General Studies; the Chairs of the Colleges of Humanities, Social Sciences, Natural Sciences, and Arts and Education; the Director of the Library; and the Registrar.

HTC, the older institution of higher learning in Austin, the capital of Texas, is located on a 23 acre, tree-lined campus overlooking the city's downtown. The college is a church-related, historically black institution affiliated with the United Methodist Church, the United Church of Christ, and the United Negro College Fund.

HTC's mission is to provide educational opportunities for a diverse, multicultural community to deliver a challenging, student-focused undergraduate education in an effective and flexible manner. The college is fully accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award baccalaureate degrees. HTC is also accredited by the Texas Education Agency and the University Senate of the United Methodist Church.

The college enrolls a diverse student body of about 600 students from the United States and 18 other countries. BS and/or BA degrees are offered in 19 areas within the natural sciences, social sciences, humanities, education, and business. Curricular emphasis is on core competencies that prepare students for success in careers, graduate study, leadership, and community service.

HTC employs 38 full-time faculty and about 20 part-time adjunct instructors. The faculty's primary focus is on teaching, and faculty are recipients of grants that allow them to provide community and civic service research, foster collaboration with students. A faculty-student ratio of 1:13 supports a sound learning environment and individual attention to students. More than half of the faculty hold doctoral degrees, and their ethnic and racial backgrounds are highly diverse.

The Ph.D. or its equivalent is required, as is college or university teaching experience, academic administrative experience and direct experience of research faculty in collaboration with students. A faculty-student ratio of 1:13 is key. Teaching experience and familiarity with the candidate's research and teaching area is also desirable.

The deadline for nominations and letters of application is March 17. The deadline for all candidate application materials being completed is March 30, 2000. While negotiable, the preferred starting date is July 2000. Huston-Tillotson is an AA/EEO employer.

Qwest Associates is assisting in the search. All inquiries, nominations, and applications will be held in the strictest confidence. Please direct nominations and applications to:

The anticipated starting date is June 1, 2000.

Kutztown University is an Equal Opportunity, Affirmative Action Employer.
THE UNIVERSITY OF NEW MEXICO
DEPARTMENT OF INTERCOLLEGIATE ATHLETICS

Are You Interested in Living and Working in the Land of Enchantment?

The University of New Mexico, a NCAA Division I-A institution and member of the Mountain West Conference, has established a continuous recruitment program for all of its coaching and administrative staff positions in the Department of Intercollegiate Athletics. The purpose of the program is to identify candidates and develop a talented pool for coaching and administrative positions that may become available in the future.

The university is currently soliciting expressions of interest and nominations for a variety of senior management and entry-level administrative positions in the areas of business finance, marketing, development (fundraising), media relations, academic advising, counseling, NCAA compliance, ticket services, facility/event management, video services, equipment management, and athletic training. In addition, expressions of interest and nominations are being accepted for coaching positions in the sports of men's and women's basketball, men's and women's soccer, men's and women's track & field/cross country, men's and women's tennis, men's and women's golf, men's and women's skiing, Women's volleyball, women's softball, women's swimming/diving, men's baseball, and football.

QUALIFICATIONS: Bachelor's degree required for most positions. Coaching or administrative experience at the Division I level preferred, but generally not required, for most positions.

SALARY SCHEDULE: Commensurate with position and selected candidate's qualifications and experience.

EXPRESSIONS OF INTEREST/NOMINATION PROCESS: Expressions of interest and/or nominations of candidates should include a cover letter, resume, e-mail address, list of references and telephone numbers, and a completed application form. The application form can be found at the University of New Mexico's employment website. When a position for which an individual has expressed interest, is nominated, becomes available, the university will notify the individual by e-mail of the university's formal application procedures.

The University of New Mexico is an Equal Opportunity Affirmative Action Employer.

ILLINOIS CENTRAL COLLEGE

TENURE TRACK FACULTY POSITIONS-FALL 2000

APPLICATION DEADLINE: March 10, 2000

A.L.E. - Master's degree in art required. Courses in art history, design, and aesthetic appreciation and art appreciation and art appreciation and art appreciation and art appreciation and art appreciation and art appreciation.

EARTH SCIENCE - Master's degree in the earth sciences or in a closely related field with adequate experience in graduate-level earth sciences.

ELECTRONICS - Bachelor's degree in electrical engineering or electronics technology or equivalent degree or graduate of a four-year institution with training in electrical engineering or related field.

ENGLISH - Master's degree in English or related field.

EUROPEAN HISTORY - Master's degree in history required.

GRAPHIC DESIGN - Master's degree in graphic design or related area or a bachelor's degree plus equivalent professional experience required.

MATHEMATICS - Master's degree in mathematics or in a closely related field with at least thirty (30) semester hours in graduate-level mathematics required.

MUSIC - Master's degree in an area of music discipline required.

OCUPATIONAL THERAPY OR OCCUPATIONAL THERAPY ASSISTANT - State licensed and/or nationally certified by AOTA/NCOTA; three years of professional experience required.

APPLICATION DEADLINE: FEBRUARY 2000

COMPUTER SCIENCE - Master's degree with course work in computer science or a bachelor's degree with one or more years experience in the computer area. Candidates should have a demonstrated ability to teach classes in one of the following areas: C++, Data Structures, UNIX, and C++. To teach the CSCE approved course, the candidate will be required to be a CSCE certified and have a minimum of one year of teaching experience. Initial screening of candidates will begin after FEBRUARY 2000 and will continue until a successful candidate is selected.

PSYCHOLOGY - Master's degree in psychology with a strong background in general psychology. Submit application materials by January 4, 2000 (completed application forms must be submitted by January 4, 2000).

Submit a detailed letter of application, current resume, copies of undergraduate and graduate transcripts, and three letters of recommendation to: Human Resources, Illinois Central College, One College Drive, East Peoria, IL 61615-0001. A professional application can be downloaded from the Illinois Central College website or you can apply online at the College's website. Applications postmarked after this date will not be accepted. Any additional materials, including photographs, will not be accepted. Inquiries will be mailed in response to your inquiries. The completed application form and all other materials must be received by February 2000.

GLOBALIZATION AND BEYOND: WHAT WE NEED TO LEARN FROM LATIN AMERICA

News of Latin America is generally not well reported in the U.S. media. This is unfortunate given its growing importance and the increasing ties that bind us.

The world in general and U.S. media in particular were greatly shocked, for instance, by the recent Seattle protest against globalization and the World Trade Organization. The media had generally represented free trade and globalization as beneficial to all. Messages from the protesters were quite different: free trade and globalization were not working for many people; policies were being dictated by large multinational corporations and their cost in human suffering and environmental destruction was high; and policies were being made by an isolated few, far removed from the lives and necessities of the masses.

Media hype about globalization's glories had missed a lot of the real story—that a substantial part of humanity was not prospering. Yet, Latin Americans have been registering these and similar messages for years. As the century ended, a totally new constitution was approved by popular plebiscite in Venezuela, a country largely ignored by U.S. media after a watershed election in December 1998, when the electorate voted into office a previously imprisoned colonel who had staged a military coup against the government in 1992. His 1998 election did get some coverage. The story that did not get covered was how Hugo Chávez was able to rally the support of close to 60 percent of the electorate. Like the Seattle protesters, he had run a campaign that said the people would not be kept prisoner by a small group of bureaucrats in international financial institutions. The masses, he said, deserved more.

They needed policies that would protect them from the vicesides of brutal free market and free trade policies that organizations like IMF (the International Monetary Fund) and the World Bank were recommending. His new movement presented an alternative to the corruption and complacency of the old parties and traditional politicians. The people wanted leaders more attuned to their daily lives and real needs and not those restricted to the rarified atmosphere of international financial circles and elitist national politics.

The two parties that had dominated Venezuelan politics and most of the old-line politicians received a combined vote of little more than 11 percent, and were discredited. The old parties and old ways were not putting into power politicians who were willing or able to achieve fundamental change. The second leading candidate was an insurgent political leader who had also tried to mold a new national coalition.

Such events have not been limited to Venezuela. Throughout the Americas, a growing number of people are seeking new voices. For some years, the Yanomami of Brazil and Venezuela have been decrying the disastrous effects of impinging globalization on their lands and people. Few news reports explained the role of international financial institutions like the World Bank in promoting such development.

Since the early '90s, CONADE, the confederation of indigenous people in Ecuador, has protested the way that Ecuador's political elite have ignored its protests and petitions. Like many of the farmers in Seattle and common people throughout the hemisphere, they sought policies that would give them the resources and access to land to make a living and care for their families. With little US press coverage this past year, some of the CONADE groups in Ecuador also have been vigorously protesting the despoling and pollution of their environment by some multinational oil companies.

Like the unionists in Seattle, workers in Nicaragua, Costa Rica, Ecuador, and throughout the hemisphere have organized massive strikes and demonstrations in past years to protest negative effects on wages and working conditions of globalization and of IMF and World Bank policy recommendations.

Fellow unionists in Brazil organized their own Workers Party (PT) more than a decade ago and have vigorously resisted the concentration of power and wealth in the hands of the rich and the powerful and the influence of large corporations. They nearly won the 1989 presidential election; their candidates have been elected to congress and to mayorships in major Brazilian cities.

In Mexico, members of the Revolutionary Democratic Party (PRD) and the Zapatistas in Chiapas have been resisting the globalization process because of its pernicious effect on so many people—workers, small farmers, native peoples, members of the middle class, and some small and medium-size businesses. The Zapatistas struggle in Chiapas, and a PRD candidate is now mayor of Mexico City.

A political coalition in Uruguay dedicated to resisting globalization nearly won the presidency at the end of 1999.

Media in the U.S. have rarely reported this part of the story. If they had, events in Seattle would have been much less surprising. To better comprehend future events, all of us would be well advised to listen to the messages coming from the rest of the Americas.

PLANTIO FINAL

Mutual Discovery 8a
American Association of University Women (AAUW) has long worked to help women enter and succeed in college. Therefore, it has had of necessity to study the impact of society on the education of girls long before they get to college.

For years, several national administrations. Democrats and republicans, have called for the establishment of computer literacy programs in schools. Any such program will impact girls significantly because there are more female students, K-12, than males.

But do boys and girls become proficient in the same way? Should different teaching approaches be developed?

It is clear that new teacher education programs must be created. Educators must be steeped in the new technologies and perhaps new procedures. After all, these programs must train future teachers so that they will not be less computer literate than their students.

Aware of all of this, AAUW has undertaken a new study to examine the interconnections between gender, technology, and teacher education. It is the first-ever commission to study specifically the differences in the way children, girls and boys, accept and use computer-based technologies.

Further, it will study which strategies and techniques are best for teachers to employ to ensure equity in the classroom. Lastly, it will explore whether there is a gender difference in how students learn.

The commission, chaired by Patricia Diaz Dennis, an executive with SBC Communications, Inc., and former member of the Federal Communications Commission, has been meeting periodically in Washington since September. Other commission members are on the cutting-edge of technology. They include co-chair Sherry Turkle, professor of sociology at the Massachusetts Institute of Technology; Mae Jemison, professor of environmental studies at Dartmouth and the first African American female astronaut; Kim Polase, president and CEO of Marimba, Inc.; and Jane Metcalfe, founder of Wired Ventures, Inc.—all high-powered and accomplished women.

Observations
Some recent comments indicate the direction and thrust of the commission. "America is transforming into an information-based economy where technological thinking is a must for 21st-century education, employment, communication, and entertainment," said Janice Weinman, executive director of AAUW. "AAUW's commission recognizes that one key to helping students make this transformation is teachers. Teachers who understand how technology shapes and changes the way we think can help ensure that girls aren't just users of technology but also creators.

"Girls are using technologies in new and creative ways. It will be important for us as a commission to understand these current activities as well as discuss new initiatives that will ensure that girls have an opportunity to be conceptually literate and reach their educational goals," added Dennis.

"We expect that the AAUW's commission will open the doors to new thinking about how girls and boys relate to technology and science more broadly and how teachers can use this information to ensure a more inclusive technological future for all students," Weinman concluded.

Woman and Integrity
When it's time to hire that next CEO, companies might have yet another reason to consider breaking down the glass ceiling and promoting a woman into the job. Research at Michigan State University (MSU) indicates that, all other factors being equal, women generally are better suited for positions of trust and security than are men.

"Increasingly, women are holding corporate positions of power and trust," said Judith Collins, an MSU professor of criminal justice and an industrial and organizational psychologist, who conducted the research.

"This research indicates that, from a security standpoint, they are extremely well-suited to such positions. That's something that companies need to consider as they hire for the future."

The research could be used to enhance the hiring processes that both private and public organizations use in selecting top managers, as well as to determine effective deterrents to white-collar crime.

Reasons for Criminal Behavior
Collins interviewed 71 women imprisoned for white-collar crime and 172 women holding upper-level administrative and managerial positions, studying both personal and situational factors in the women's lives.

Personal factors include a person's inherent personality traits; situational factors include workplace in a smile, relating to such thin family and friends.

Within those general cateq the research measured fact socialization, self-control, er and responsibility, as well as ership activity, social involve and social dominance.

"Females, in general, more positively on all of these sures than males," said Collins has conducted similar research male executives. "Those men of integrity clearly indicate women are a better risk in high-level positions than men."

When women do cr crimes, she said, the research cath that their motives are different. They tend to be "other-directed," meaning the perceive the crime as bene others rather than themselves.

"It's very interesting that the son for the criminal behavior empathy," Collins said. "A cosa characteristic for most crime lack of empathy. In other word are thinking only of themselves their own needs. The female committed crimes were actual of empathy; they took the mon example, because their spouse unemployed, their parents n money, or their children needes.

"That could mean that the whole different set of rules in to live by when we're putting through the hiring process. A asking the right questions? A weighing the right factors?"

**Latina Lawyers Go the Distance**

*John Marshall Students and Alums Speak Out*

**BY MARILYN THOMAS**

Cook County Circuit Court Judge Elizabeth Loredo-Rivera remembers being stereotyped by her high school counselor, who told her she should develop strong secretarial skills and get a good job because her Mexican immigrant parents didn't have enough money to send her to law school.

"I didn't have any role models. My biggest supporter and mentor was my mother, who'd been a teacher in Mexico. She kept telling me I could do it. I remember her walking into that counselor's office and telling him she shouldn't be discouraging a child's dreams," the judge says.

Loredo-Rivera, a 1983 graduate of The John Marshall Law School in Chicago, said that her three years in law school were tough, but "I felt welcomed. I felt like I was part of a big family." And after the trials and tribulations of law school, "I felt prepared. John Marshall taught you to learn on your feet, to anticipate the next move."

She is proud of her accomplishments both as a Cook County assistant state's attorney in Chicago and on the beach. Her success started while she was still in law school when, as a third-year student, she was hired by the State's Attorney's Office. Upon passing the bar exam, Loredo-Rivera began work in the State's Attorney's criminal division. After several years in court, she held a first chair in a felony trial courtroom. Later, she did extensive work in domestic violence proceedings, which led to her being named family issues coordinator on the executive staff of the State's Attorney's Office. In 1997, she was elected a judge.

Loredo-Rivera's accomplishments speak to her abilities, which is why it is distressing for her to hear stories today of counselors belittling Hispanic women's attempts to have professional careers. "When I go to address students in high schools and colleges, they will come up to me and tell me similar stories," she says. "I tell them not to believe it [the misinformation]. I can make it through college and law school. They can have a profession as well."

Elizabeth Salgado, a second-year law student at John Marshall, tells the story of her high school counselor refusing to give her a college application. "My dad always told us to stay in school, but my guidance counselor said he didn't think it was a good idea for me. I've always wanted to come to law school, to be trained to work with people and show them how it affects them," Salgado relates.

Despite the counselor's misgivings, Salgado got herself admitted to the University of Illinois at Chicago where she earned a bachelor's degree in political science. Salgado laments that she is the only one of her high school friends to finish college.

Grisselle Camacho, an Hispanic attorney in New Jersey who helped organize the successful Electo Latina program in 1998 as an active member of the Hispanic National Bar Association, considers it sad th
some people still stigmatize the role of Hispanic women in society. She thinks that low expectations for young girls are especially damaging. "If no one is there to expect them to achieve, they won't be as successful. It is crucial that they get guidance, especially in high school when it can be critical," Camacho says.

"A lot of young Hispanics have parents that are supportive, but they may not know the system. Consequently, they don't argue to have their children in a college preparatory curriculum, and they don't know what options are offered to get their children into college," Camacho says. "If they can't advocate, then they rely on the teacher and counselor. And sometimes they [school staff] don't make the best choices for the student."

Angel Traub, a second-year student at John Marshall, missed out on some of those advantages. Her parents, Rosita Martinez-Dalton and Robert Dalton, have worked in restaurants for decades to raise their family. They had always been supportive of Traub, and her father encouraged her to be a lawyer since she was very young.

Believing there was no way to finance a higher education, Traub took a pass on college and waitressied, saving her tips so that she could eventually pay college tuition. It was only after she married Terry Traub and her daughter, Angelca, was born that Angel Traub began giving serious consideration to college education.

"She's what made me go back to school," Traub says of her six-year-old daughter. Traub enrolled at the College of DuPage, where she was in the honors program and on scholarship. She transferred to Northern Illinois University as a President's Scholar and received a scholarship that helped pay for her bachelor's degree. Traub now is a student at The John Marshall Law School. She ranks seventh in her law school class, and her outstanding academic record entering law school won her status as a Distinguished Scholar, which included a full scholarship.

Being a returning adult, Traub believes she has a maturity that's necessary to meet the challenges of law school, but she wishes she'd known earlier about the college financial aid and scholarships that were available. It would have relieved much of the stress and burden from her and her parents.

Raquel Martinez, deputy general counsel of the Illinois State Assn Commission, appreciates noting a chance to offer informal assistance from state, federal private sources that can help and future students ease financial burdens of college or training. She knows it can be.

"There wasn't money away to get me for it myself to make me more appreciative of education. I was singing in a Bohemian restaurant, other jobs, to pay my tuition college and law school. It was a lot of work that life is so sh in someone else's mold that going."

Alfredo Avila, president of Marshall's Hispanic Law S Association, agrees that each challenge for Hispanic students is not discouraging. "There are now open doors of law schools are open now."

But John Marshall al Marcel Benavides, a June 1996 ute with the Cook State's Attorney's Office Hispanics as a growing and powerful group. Yet he was "shocked to see the numbers of Hispanics in law," arguing the more are needed to fairly represent Hispanics as a major force in the community that many prosecutors are representing if only. There's always room for improvement." Benavides said.

Camacho is optimistic the number of Hispanics in law improve, but she thinks there is a leveling off of minority groups in law school. Statistics the American Bar Association Section of Legal Education Admissions to law schools 3,224 Hispanics in 1980. The number more than doubled to 70 in the 1998-99 academic year.

"I think there are some encouraging things happening, but there are some steps back that several states have suspended giving

**Judge Loredo-Rivera's entering class in 1980 had just 20 Hispanics enrolled; The John Marshall Law School today has 68.**
perience to minority candidates. Camacho says.

Admission to law school depends greatly on LSAT scores and college grade point averages, said William B. Powers, associate dean of admissions and student affairs at The John Marshall Law School. His admission committee's decision on a candidate is predicated on those scores as well as a student's background, work experience, and personal statement. Minority status may be a factor in admission.

Today's Hispanic enrollment at John Marshall is encouraging. Loredo-Rivera's entering class in 1980 had just 20 Hispanics enrolled; the law school today has 68 Hispanic students. Powers says that while the students are homogeneous in their Hispanic heritage, they are coming from a variety of backgrounds.

"I will say that they are hardworking and determined students. Many are the first in their families to graduate from college, much less attend professional school. Going to law school is a very big step for them," Powers said. "And a good number want to do it not only for themselves but for the Hispanic community. As attorneys, many of them will become actively involved in community activities and will act as role models for future generations of Hispanic attorneys."

A second-generation Mexican American, Salgado says she believes having a career is important, and she knows that she will be a role model not only for her young daughter but for others in the community. "I think I surprise a lot of the women in my family," Salgado says. "Especially accomplishing these things with a young child. My husband is very supportive. We take it one semester at a time."

Law school also takes a special camaraderie. Loredo-Rivera, a founding member of the Hispanic Law Students Association in 1981, "We needed support and we needed each other," she said. "When I came to law school, I didn't do well in my first year. Tech was hard, and I didn't have a clear understanding of the material. But we shared all that, as well as information about teachers and their approaches in class."

Last year, the Hispanic Law Students Association initiated a mentoring program that pairs graduating law students with first-year students. Salgado has been one of its beneficiaries. "I didn't know what to expect from law school. My mentor was very encouraging. In the beginning, we tend to have difficulty with the writing classes, and the mentors are a big help," she said.

From its inception, the association has encouraged networking, which is how Martinez, as a second-year student at John Marshall, got her first job in the legal profession. "I remember I was at a Christmas party hosted by the Hispanic Lawyers of Illinois, and Illinois Attorney General Neil Hartigan was there as the guest speaker. I thought I'd take advantage of the situation," Martinez remembers. "I walked up to him and introduced myself and said I'd like to work in his office. He handed me his business card and said to call. I clerked there for two years, and after I passed the Bar, I became an assistant attorney general."
The Story of National Women's History Month

BY NELLY MELLANDER AND GUSTAVO A. MELLANDER

The Beginning

As recently as the 1970s, women's history was virtually unknown among the general public. Since it did not exist in our schools' curricula, this comes as no real surprise.

A few groups decided to address the void. One of them, the Sonoma County Commission on the Status of Women, in California, was particularly successful. It initiated a "Women's History Week" celebration in 1978. The commissioners chose the week of March 8 to make International Women's Day the focal point of the observance. They sponsored a series of activities that met with enthusiastic response. Within a few years, dozens of schools joined the cause and presented programs highlighting women's contributions to American history.

In 1979, members of that pioneer California group were invited to participate in the Women's History Institute at Sarah Lawrence College. The institute was attended by the national leaders of organizations for women and girls. When they learned about the Sonoma countywide Women's History Week celebration, they decided to initiate similar celebrations within their own organizations and school districts.

The group coalesced to seek a Congressional Resolution declaring a "National Women's History Week." It succeeded in 1981, when Senator Orrin Hatch (R-UT) and Congresswoman Barbara Mikulski (D-MD) co-sponsored the first Joint Congressional Resolution.

Overwhelming Response

As word spread rapidly across the nation, state departments of education encouraged celebration of National Women's History Week as an effective means toward achieving equity goals within classrooms.

Before long, many states developed and distributed curriculum materials to all of their public schools. Organizations sponsored essay contests and other special programs in their local areas.

Within a few years, thousands of schools and communities were heralding National Women's History Week, supported and encouraged by resolutions from governors, city councils, school boards, and the Congress.

Entire Month of March

In 1987, the National Women's History Project petitioned Congress to expand the national celebration to the entire month of March. Since then, National Women's History Month is annually proclaimed by the President or the Presidium. Each year, programs and activities in schools, workplaces, and communities have become more extensive as information and program ideas have been developed and shared.

Growing Interest in Women's History

The popularity of women's history celebrations has sparked a new interest in uncovering women's forgotten heritage. As states and cities have instituted "Women's Hall of Fame" programs, biographical materials about prominent women in the history of their particular locality have been compiled.

In many areas, state historical societies, women's organizational networks, and community groups have been instrumental in promoting and implementing Women's History Month activities.
tions, and groups such as the Girl Scouts of the USA hold joint programs. Under the guidance of the national Women’s History Month educators, workplace program planners, parents, and community organizations in thousands of American communities have turned National Women’s History Month into a major celebration and a springboard for celebrating women’s history year-round.

Showcasing the Role of Hispanic Women

Given the dearth of historically sound material on the contributions of Mexican American/Chicana women, the National Project decided to produce a video.

The program, partially funded by the U.S. Department of Education, was four years in the making. One of the most difficult problems to overcome was to secure photographs. It was very difficult to locate pictures of women other than in formal family portraits.

Women’s photographs were seldom indexed in archival collections, making it necessary to sort through vast numbers of images in hopes of locating pictures of women involved in daily life activities. Alternatively, families needed to be found who had such photos in their private collections and who would entrust their personal treasures to the researchers.

Since funding was insufficient to bring together the historians involved in creating the half-hour script, Mary Ruthsdofter coordinated this collaborative project entirely by mail and telephone, a difficult process. However, the resulting historical video is widely agreed to be an excellent, balanced telling of a complex story.

¡Adelante Mujeres!

¡Adelante Mujeres! a 30-minute video, covers the major events, themes, organizations, and personalities of Mexican American women’s history from the Spaniards’ arrival in this hemisphere to the present day.

Latin American scholar Diane Sollies (University of Wisconsin-Madison) asserts that ¡Adelante Mujeres! offers “a record of the accomplishments and achievements of Chicanas that’s difficult to find elsewhere.”

In her laudatory review, Solies rhetorically asks, “Where else are there so many positive and varied images of Chicanas?”

Hundreds of photographs gleaned from archives and private collections across the continent provide visual testimony to Mexican American women’s everyday lives and experiences and to their many noteworthy accomplishments.

Specialists in Mexican American women’s history (Dr. Vicki Ruiz, Arizona State University; Dr. Elizabeth Salas, University of Washington; Dr. Martha Cotera, Chicano Research and Learning Center, Austin; Christine Marin, Arizona State University) collaborated with the National Women’s History Project to develop the script for this unique documentary.

The English-language narrator is Maria Cuvas (co-founder of the National Women’s History Project); the Spanish-language narrator is Sylvia Parra, Noticias television announcer. They are joined by the voices of Jessie Lopez de la Cruz (United Farm Workers organizer) and Dr. Martha Cotera (historian/activist) to weave together the compelling story with authentic background music.

The program debuted before members of the Hispanic Caucus of the U.S. Congress, and has met with nothing but favorable comment ever since.

A copy of the complete script is included with the purchase of ¡Adelante Mujeres! to facilitate group discussions. The video is available in either English or Spanish, and is suitable for high school, college, and adult audiences.

Purchase price is $49.95, plus $5.00 shipping and handling, from the National Women’s History Project, 7738 Bell Road, Windsor, Calif. 95492-8518. Credit card orders can be called in to (707) 838-6000.

As an extension, published photos of the featured women in two formats are available: one is a ready-to-post display set of twenty 8 1/2 x 11” photos with Spanish and English biographies for each ($14.95); the other is a booklet of 17 of these women, same format, same biographies ($8.90).

Other activities

The project also produces a variety of material for those who want to learn more about women’s contributions. Organizing guides, curriculum units, posters and display sets, videos, and a wide range of celebration supplies are available to interested readers.

For more information, contact Mary Ruthsdofter at the National Women’s History Project: nwhp@ix.netcom.com or (707) 838-6000. Also visit www.nwhp.org for information about women’s history and National Women’s History Month, and www.legacy98.org for the history of the Women’s Rights Movement in the United States.

Nelly Mellander and Gustavo Mellander teach at George Mason University.

APPLICATION DEADLINE: March 17, 2000
The Learned Latina Behind Latina

BY ADRIANA MEucci

As a teenager, Christy Haubegger would read the many magazines targeted to girls in her age group. But something always seemed to be missing. Haubegger never noticed any models who looked remotely like her; instead, they were mostly tall and blonde. Nor did she come across any articles or information that embraced her experience as a Mexican American.

All that has changed now that the 30-year-old Haubegger has launched her very own high-gloss magazine called Latina. The monthly publication, out since May of 1996, shares space on the newsstand with the likes of Glamour and Vogue. The magazine also joins other periodicals targeted to Latinos such as People en Español and Glamour en Español.

Latina is the first national, bilingual lifestyle magazine for Hispanic women in the United States. And Haubegger, who oversees the production and publication of the periodical, hopes to provide positive images for Latinas as well as valuable information and a voice for Hispanics.

Haubegger, adopted as a child by a White family in Houston, was enrolled in a bilingual preschool class. She was taught to embrace her Hispanic heritage, and she grew up feeling comfortable in both cultures. After graduating from college, Haubegger set out to create her dream magazine—and swiftly drew up a business plan. She had already given considerable thought to the matter while attending Stanford University Law School. During a business law class, she was asked to design a business plan, and the groundwork for Latina magazine was laid.

After a meeting with Edward Lewis, the founder of Essence magazine, Haubegger got her big break. As part of her pitch, she drove him through a Latino neighborhood, pointed out Hispanic women carrying copies of magazines such as Glamour, and told Lewis that the women “need their own.” Latina is thus the joint product of Haubegger’s company, Alegría Enterprises, business attire and looking quite profesh. After the successful meeting, while he was back to her hotel room, she was stopped elderly couple and asked to bring ice to room. Their apparent assumption that she had just the type of ignorance Hispanics that fueled Haubegger to dispel stereotypes. Latina would p. her with the voice she need reach a large audience.

And reaching people is just she has accomplished. Haul has been the subject of both broadcast media in both Spanish and English throughout the United States. She has been featured on 60 minutes and ABC. She has become a mentor for young Hispanic women and entrepreneurs and has honored for her achievement: service in helping others.

In 1997, she was chosen one of the Top Ten Role Models by the International Foundation for Women. Her awards include the Calif. Association of Hispanic Education Award and a Big Sisters of Los Angeles Honor for providing a role model to young women.

Interviewed by The His, Outlook, Haubegger answered questions about herself, Latina magazine, and issues affecting Hispanic women as well as men.

HO: What has been most rewarding about Latina magazine?

HAUBEGER: The most rewarding part of that magazine has been to get the feedback from readers. I meet someone who tells us that we ma feel beautiful. that we inspired her with st
Latina women’s achievements, or counseled her in career, health, or her home, I feel like it’s all worth it. It’s also personally satisfying to build a media company where Latinas can shape their own images and tell their own stories and build careers.

HO: What are some of the most critical issues that you believe Latinas face today? How does your magazine bring attention to them?

HAUBEGGER: What are some of the most critical issues that you believe Latinas face today? How does your magazine bring attention to them?

HAUBEGGER: The ups and downs within even a given hour are too numerous to chronicle fully in this space. However, it would be safe to say that it’s never dull—from the eternal challenges of being an entrepreneur to the tremendous victories of challenging the media’s view of Latinas to the battle for advertising, from the lows of our team’s exhaustion to the highs of the reader feedback.

HO: How is your magazine helping to change perceptions about Hispanics, particularly Hispanic women?

HAUBEGGER: I think that the fact that we present Hispanic women as the standard—they occupy all the pages and images of mothers, daughters, lawyers, doctors—is subtly revolutionary given our invisibility in other media. At the same time, the fact that you see an article quoting a doctor surname Garcia means that some young women might now consider being a doctor someday. I hope our Triumph section challenges all of us to achieve great things. Reading about a Latina astronaut such as Ellen Ochoa or an EEOC chair such as Ida Castro should be required for all Americans, in my opinion.

HO: How do you attract advertisers?

HAUBEGGER: Advertising is extremely difficult for a number of reasons. First, many of our clients—from cars to cosmetics—do not picture their customers as Hispanic women. Therefore, we are largely in the education business rather than the sales business. Secondly, we have to replace any stereotypical images that may suggest we can’t afford products with that of a dynamic, valuable customer. Third, all new magazines have advertising challenges. Most clients would like to wait and see who else advertises before taking the plunge. All of these factors create an amazing challenge that is nonetheless successfully met and overcome by our fantastic, enthusiastic sales team.

HO: Who or what has most influenced your life? Your career?

HAUBEGGER: I was fortunate to have parents who believed in me 100 percent, even when I put my law degree under my bed to start a magazine. I have also had the blessing of many mentors (most of whom do not look like me) in my education and my industry.

HAUBEGGER: Find mentors now, and don’t wait for someone who looks like you. Get help wherever you can find it.

HO: You have received a B.A. degree in philosophy from the University of Texas at Austin, and went on to earn a Juris Doctor from Stanford Law School. How has your education prepared you for your career success today? What advice do you have for Hispanic women seeking higher education?

HAUBEGGER: My education has been a tremendous help to me. Law school, for example, gave me the skill to engage in disciplined thinking, while philosophy gave me an interest in thinking flexibility. At the same time, I believe that as a Hispanic woman, having degrees from very established universities gives me a level of credibility that I might not have needed if I were a White, male entrepreneur.

I hope that Hispanic women continue to seek higher education, despite the occasional lack of support from family or friends or for doing so. Seek out organizations such as the National Hispanic Scholarship Fund, or programs such as SED or www.MLAt.org that encourage, mentor, and support us.
Challenge Everything! Says Emma Pérez

Chicana historian hits the ground running at

BY
MIA ANDERSON

Emma Pérez, born in the small, rural town of El Campo, Texas, is today the Distinguished Visiting Scholar/Professor at William Paterson University (WPU) in Wayne, New Jersey, the first to hold this prestigious title at WPU. She is an associate professor of history and for nine months was assistant vice president for graduate studies at the University of Texas at El Paso (UTEP); the author of *The Decolonial Imaginary: Writing Chicanas into History* (Bloomington: Indiana University Press, 1999), which explores the history of Chicanas in the twentieth century; the author of the novel *Gulf Dreams* (Third Woman Press, 1996), which chronicles a young Tejana's coming of age in a small Texas town; co-editor with Norma Alarcón and others of *Chicana Critical Issues* (Third Woman Press, 1993); and a nationally recognized Chicana historian and feminist scholar.

El Campo, located southwest of Houston in eastern Texas, was a migrant camp in the 1880-90s. When Pérez was growing up there, it had a "rural, Southern, cotton-growing essence" and was home to a mix of African Americans, Mexican Americans, Anglos from the South, and a small Jewish population. "It was a rough place to grow up," Pérez recalls, "because a unique kind of racism was acute. That was the first thing I was faced with going off to first grade. Also poverty—we were poor...Race and class consciousness were pretty apparent to me in the first grade. Gender consciousness? That was also pretty apparent in the first grade, when I was about seven years old...There was a social structure that put me in a box—and I knew that I would have to struggle with it all my life."

Pérez remembers Anglo teachers censoring and even punishing the Mexican American elementary school students when they spoke Spanish, and calls what she and others suffered "psychic at "But I became a survivor, myself that I'd better learn English language, and I'd learn it well. I'd better learn complex language as I po:ould...I'm still doing this."

"You know, Audre Lorde that 'the master's tools will
dismantle the master's house"—but I only have the master's tools. Gayatri Spivak (she's at Columbia University, in the English department) said that you master language to invert the ideologies that the master imposes on the truth. I ascribe to that."

Pérez' brother, she says, was her best friend during those difficult early years. "He's older—a very sensitive man. He experienced more of the psychic destruction that racism can wield. My privilege was that I am light skinned."

There were five children in her family. Besides her brother, there were two older sisters, one of whom went on to earn her B.A. in Spanish literature, and another who earned an M.A. in Spanish literature. Emma Pérez earned the Ph.D.—in history, from UCLA.

"My mother, a native of Texas whose family had been in the Tejas province for generations, only attended school to the third grade. She has told me stories about racist White kids who would slam her body with their book bags. My father had only a seventh grade education," Pérez continues; "that's all he was allowed. But he was an avid reader, and he encouraged all of his daughters and his son to get an education. He had a real hard time with his daughters' dating, but he did encourage us to go as far as possible with our education, even if it meant traveling far away from home to get it. He was very proud of us. He was especially proud, as I am, of my youngest sister, who is currently pursuing her Ph.D. in English literature."

From El Campo, Pérez moved to Pasadena, "urban cowboy country," for three years of high school, but finished high school in Cheyenne, Wyoming. She attended a series of junior colleges, including California State University-Northridge. Then she arrived at UCLA, immediately loved it, and stayed.

UCLA was the "hot bed for Chicano studies," and the history curriculum, significantly, included women in general, although Chicanas specifically needed to be studied too. "There were many wonderful faculty and mentors, many from the East Coast. There was Emma Kapan, who has returned to the Northeast and is now at SUNY-Stony Brook; Juan Gomez-Quinones, who was important for setting up Chicano history and historiography. Another outstanding faculty/mentor was Kathryn Rish Sklar in history, who is now at SUNY-Binghamton."

"Gomez-Quinones taught me about Chicano history. He was significant because as a student in the '60s, he was involved in the student movement—he was one of the students at UCLA fighting for this thing called Chicano studies. He ended up getting hired, has been instrumental in advancing Chicano studies, and has also trained many of the initial scholars, that first group of self-named Chicano historians. He believed in the importance of doing research in Mexico, not just in the US."

"Sklar, 'Kitty' was and is a prominent women's historian and taught me about women's social history during the progressive era (late 19th and early 20th centuries). Kaplan was one of the first who sat me down and said, 'Write a paragraph—one of the first who took the time out to help me with my writing. Write succinctly, she told me; write short, declarative sentences, and you'll communicate with your audience.' And she made global connections," Pérez recalls, "and that was very important to me."

"You know," Pérez laments, "there are only 21 Chicana historians in the universe—and only about 50 Chicano historians, for that matter. There's Vicki Ruiz; she's at Arizona State University and trains history students in graduate school. Camille Guerin-Gonzalez is at the University of Colorado at Boulder. Deena Gonzalez, at Pomona College, a liberal arts college, sends graduates from her program off to Ph.D. programs. MALDEF won the suit, and now more M.A. and Ph.D. programs are being developed at, for example, UT.

"This year is the first year that we will have incoming Ph.D. program students in history—Borderlands History, the only program of its kind in the nation (UT-Austin has only a specialization). But I'm still concerned about getting funding for the students. I have a general concern that they not be excluded from major funding."

The William Paterson University's distinguished visiting professorship is being funded through a partnership between the University's Alumni Association, Office of the Provost and Executive Vice President, and the Foundation. She's been busy since arriving on campus, starting with an address at University Day, one of the semester's opening events. She's talked with students at a roundtable series on "Privilege and Entitlement: Historical Legacies"; was a panel member presenting on "Feminism Today"; held "conversations" with groups of faculty and students on diversity issues; was the commencement speaker in January; and will present at the (TPU-based) New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching's ALANA (network by and for women of color in higher education) conference, among many other
appearances. This spring semester, too, she is teaching a course titled "Autobiography: Women Writing Memory" for the Women's Studies and English departments.

"It was competitive, yes," Pérez answers when asked about her current position. "It was advertised in the New York Times, and I understand they had 20-30 applicants... My application was put forward by both a faculty member of the history department and one in the English department. I thought it was a long shot, but I think I'm being hired is a testimony to WPU's commitment to diversity at this time in history, given the fact that I am rather specialized. William Paterson appears to be open to different kinds of cultures."

The Office of the Provost tells The Hispanic Outlook that WPU is "extremely fortunate to have Dr. Pérez on campus... She was selected because of her impeccable scholarship, her commitment to her discipline and her career, and for her personal philosophy and perspective." Speaking for the Provost's Office, Dr. Nina Jenmott, associate vice president and dean, graduate studies and research, went on to say, "We believe the university, both students and faculty and staff, will benefit greatly from her presence. We will all learn from her to appreciate excellence and diversity and that the two are mutually exclusive. We use her as that example."

Indeed, Jenmott says, "Pérez has already become a very important member of the university community as she lectures and runs workshops and seminars in a broad range of topics and disciplines. We couldn't be happier with her choice and ours."

Another piece of Pérez' identity--another piece of her philosophy and perspective--concerns her sexual orientation. "Being an out lesbian has been very important for me in the academy. In the "Yes, for example, at UCLA, the women's studies program and the Women's Center meant a safe place for me. Crossing races, crossing classes--those we were always crossing... I've been out since I was about 19, and it's been a negotiation that I've had to do constantly. It's been problematic because homophobia in the academy is pretty severe."

Pérez recalls the 1990 plenary keynote at the National Association for Chicano Studies' conference in Albuquerque: "It was openly called a 'talk from a lesbian, socialist-feminist perspective.' And it caused quite an uproar. That's when we decided to have a lesbian caucus and were told we couldn't. If you have a lesbian caucus, then you must also have a marijuana caucus--this was the level of discourse. It was fun! We got our caucus, and from there, it grew. Now it's the lesbian/bisexual/transgender caucus, and the gay men have their own caucus. We've been targeted ever since then as political troublemakers or 'terrorists' who were silencing the homophobic conservatives. We forced people to think about these issues, and that is called 'terrorism'... Unfortunately, it's pretty much the same today."

Pérez has said that she found herself interested in history 'only when growing up. I had a passion to know the stories of those whose stories have not been heard.' In addition, I know that making sense of the past is what helps us to understand the present. Context is so important for understanding anything." Asked how her perspective affects her work, as an historian, Pérez explains that she is "always doing a Chicana/lesbian/feminist perspective. These pieces of who I am are always going to mark and imprint the way that I see. This is precisely what literary/cultural theorists are forcing people to do today--to recognize that who you are marks your ideology. The documents do not speak for themselves as many people still believe... I have a real primary concern about the way gender and sexuality are marginalized in the traditional writing of history. I want to write Chicanas into history, including lesbian Chicanas."

Pérez has this advice for Chicana students: 'Above all, be persistent. Challenge everything--I'd say this to all students. Challenge what you read, challenge what your professors say, know who your allies are among your professors, among your classmates. Seek out the allies. It's work. But that's part of your education. I'd advise them to build coalitions. I worry that students don't realize that this isn't an individual effort; there are communities to call upon. Through the centuries, there have been intrusions into the conservative White male bastion of academe. There have been backlashes more reason to build coalitions across race, gender, sexuality.'

Asked what she would say to historians in the fight to challenge them," she says, "them to be more interdisciplinary. To ask questions in different ways, ways that challenge the notion... There are texts, so many resources--all of us historians going to fall behind. The v students are that they force you to keep up. For some, teaching is to transform the educational teaching is because of the lack but for the most traditional increadibly threatening because it threatens core beliefs about education. It becomes the empowered education. Nobody wants to be there."

Asked if there is anything that she'd like to say, Pérez says, "Hope... How are you going to continue into the new millennium given the complexities that you are faced with. If you look around a lot of hopelessness. Two hundred Mexican women have been murdered in Juarez, Mexico--right on the border from El Paso--since they were as young as eight, a third brutally raped and murdered. What kind of society are we living in? How can we be? When we look at these stories... We have to take a leap... We have to ask ourselves how going to social responsibility our daily lives, and we have to transform the consciousness of students and colleges around race, gender, poverty, world. We have to strategize and coalitions across all those identities--and still respect identities. If we're not hopeful, we can't continue. I have to say that people are basically good colonial hope--right now that helps us all move forward."
Lesley College is a multi-site university with undergraduate and graduate programs for women and men in education, management, human services, and the arts. And it is the 16th largest grantor of master's degrees in the United States. The institution offers programs at its Cambridge campus and at more than 150 sites in 15 states. Lesley's five schools include the School of Undergraduate Studies, the School of Education, the Graduate School of Arts and Social Sciences, the School of Management, and the Art Institute of Boston.

A distinctive and fundamental aspect of education at Lesley is the conviction that "people matter, and that the professionals who respond to their needs provide a unique service to society." To this end, "faculty and students believe in the power of individuals—working collectively—to bring about constructive change." Margaret A. McKenna, president of Lesley College, is also an attorney, so she understands first the importance of the practical nature of a fine education. She says that "Education at Lesley combines theoretical and practical approaches to learning, blending a strong liberal arts foundation with substantial professional preparation. The result is a balance, an integrative theory and practice. That is the heart of a Lesley education."

McKenna adds that "Lesley's Women's College prepares women for successful careers in the professions that put people first. Centrally this mission is a commitment to excellence and creative instruction offered in an intimate college environment in which each student is seen, contributing, and valued. Equally important is our shared dedication to a community that is truly multicultural, one that welcomes and benefits from diverse perspectives and life experiences."

One example of Lesley's dedication to a multicultural community is the appointment of Dr. Elsa Núñez to the position of provost and vice president for academic affairs at the college. She becomes chief academic officer for the 7,000-student undergraduate and graduate institution. Dr. Núñez was former university dean of academic affairs at City University of New York, and served as vice president for academic affairs at Wheelock College prior to her appointment at Lesley. She brings to her position both administrative experience.

Lesley College's Founder's Hall is the cornerstone of the Cambridge campus.
Honor Roll Facts in Brief

Its reputation for innovation began with founder Edith Lesley’s vision of schools transformed by teachers trained to be dedicated, committed, and creative professionals. A successful, determined teacher in an emerging educational institution, the kindergarten. Ms. Lesley founded a school of her own, the Lesley Normal School, centered on professional training for kindergarten teachers. She guided her school well into the 1930s, aided first by her sister Olive and later the woman who succeeded her as principal, Gertrude Malloch. From the start, the school was a success—professional teacher education ranging 30 years. A former associate professor of English at Ramapo State College of New Jersey, Nuñez is a strong supporter of integrating liberal arts with areas of professional studies. At the time of her appointment, she remarked, “My former teaching experience has enhanced my effectiveness as an administrator.” She reflected, “By working directly with students and developing curricula, I learned how important it is for faculty to continuously improve and create courses and programs for both the liberal arts and for professional studies. And I believe that these areas of study need to be integrated.”

Nuñez is the author of Pursuing Diversity: College Minority Student Recruitment, published by the George Washington Press. And she has a work in progress on the high school dropout phenomenon in the Hispanic student community. She is also writing a novel about a young Puerto Rican woman and her conflicting relationships.

Dr. Nuñez earned her Ed.D. in Linguistics at Rutgers University, her master of arts degree in English at Fairleigh Dickinson University, and her bachelor of arts degree in Spanish and English at Montclair State University. “I want to provide strong academic leadership to an institution with a student-centered mission,” says Nuñez. “That’s why I chose to come to Lesley.” That’s also why Lesley is The Hispanic Outlook’s present choice for induction to the Honor Roll.

A Little History

When Lesley College opened its doors in 1909, it had one mission, to prepare women to teach in the newly emerging kindergarten field.
was increasingly recognized as being of "surpassing importance."

Lesley College was incorporated in 1942 as a "nonprofit institution of higher education" under the direction of a board of trustees. Guided by its first president, Dr. Trentwell Mason White, the college received its undergraduate accreditation and in 1954 established a graduate school. The college has been proud of its ability to offer high-quality, experientially based education relevant to the needs of students and society. Starting in the 1970s, Lesley began developing other programs to educate women for professional careers. All programs continued to adhere to Lesley's long tradition of creative instruction and integration of academic and field-based learning. The school's current professional and interdisciplinary liberal arts majors provide "a range of academic paths to prepare professionals who are skilled in working to improve the situations of others and whose lives exemplify "confidence, compassion, and commitment."

One big development of late was the merger of the Art Institute of Boston (AIB) and Lesley College. The combination made good sense for both institutions. Under the merger agreement approved by the boards of both institutions, the Art Institute, one of the finest visual arts institutions in the region, became a school within Lesley. The Art Institute retains its name, its current location in Boston's Kenmore Square, and its mission to provide comprehensive art education to students pursuing visual arts careers. The union helps each institution provide a broader range of academic offerings, and enables the establishment of new programs that neither college could easily develop on its own. Also, operational efficiencies will be used to increase investments in teaching, technology, and facilities at AIB. As a result of the merger, both institutions expect to increase future student enrollment and retention.

"Joining with Lesley will enable us to raise an already strong visual arts program to the next level," says AIB President Stan Tracker. "We are choosing to affiliate with Lesley at this time from a position of strength. Our academic program is more competitive than ever, enrollment levels are at a 25-year high, and our financial health is robust. Lesley President Margaret McKenna agrees that the merger is a good idea for both institutions, adding, "AIB has a distinguished history and an even more promising future. AIB is now positioned to become one of the top arts colleges in the nation. By combining our strengths, Lesley and AIB will move in new directions for the benefit of our current and future students and for the community as a whole."

Total enrollment this year at Lesley is 6,655 students, of whom 1,643 are full-time and 4,812 are part-time. On campus there are 2,884, with 3,371 attending off-campus sites. There are 1,889 undergraduates and 4,766 graduate students. The minority breakdown of the 1999-2000 first-year class is nine percent African American, six percent Asian American, and 10 percent Hispanic. There are 1,644 full-time faculty members. Eight are Hispanic.

Lesley College received a $1.2 million grant from the U.S. Department of Education to prepare teachers to meet the needs of young children who speak limited English during their most critical years of language development. About one-third of Boston's children speak a first language other than English. As the population of Boston grows increasingly diverse, the need for qualified early childhood teachers is becoming critical.

Lesley's new program—the Boston Collaborative Bilingual Educator Project—is part of an effort to improve the academic performance of limited-English-proficient (LEP) students, who tend to score lower than native speakers on standardized tests and higher dropout rates than does the rest of the population. Under the project, the college will prepare 40 master's degree-level teachers to serve children in Boston and early childhood programs. More than one in four of the state's LEP students attends school in Boston.

The Bilingual Project helps fulfill a national promise to be more diverse as the population of Boston grows more diverse, observes President McKenna. "It is imperative that we reach these children early in their school lives." Lesley is already a leading bilingual education, offering courses and programs in a variety of areas, including early childhood education, helping educators at all levels understand the needs of these special populations.

In August, the college was awarded a $303,000 U.S. Department of Education grant to develop an online science education curriculum that helps teachers learn about science in a hands-on, investigational manner. The curriculum design is based on recent research on how students learn. The program is designed to help meet the needs of teachers who teach science classes in an inquiry-based format. This approach to teaching science has been shown to increase student achievement and interest in science.

Last November, the college hosted Literacy & Learning 99 at Boston's Hynes Convention Center. The three-day event brought together under one roof three of Lesley's most prestigious professional development conferences for educators: The England Kindergarten Conference, the Northeast Early Literacy Conference, and The Reading Recovery Institute. The event combines programs for classroom teachers, child care professionals, administrators, parents, and children.

"All Lesley students share a deep conviction and commitment to the importance of working with people," says McKenna. "Our faculty also believe in their individual and collective power to make a difference. Not only in their individual lives, but with organizations and social systems as well."
Maria Vallejo New Provost at Palm Beach Community College

Florida's Palm Beach Community College (PBCC) kicked off the 1999-2000 academic year with much enthusiasm, welcoming students, staff, and its new provost—Maria M. Vallejo.

Vallejo assumed the position on September 7, 1999, after serving as vice president for student affairs at Rockland Community College since 1996.

"I've been in the N.Y. tri-state area most of my life. When I came from Puerto Rico, I lived in the Bronx. I was ready for a challenge. I wasn't looking, but if an opportunity came up, I would consider it since my son was going to college," recounts Vallejo.

She recalls the events that lead to her recent relocation to sunny Florida: "I got a call from Eduardo Padrón [Miami-Dade Community College president] saying, 'I think you will be perfect for it. It's an up and coming institution, the oldest community college in Florida.'"

"I thought it was a big move but that it wouldn't hurt to give it a try. I had a long conversation with the president of PBCC. Even the telephone interview was relaxing. We joked around. It was nice. Then when I went to the interview, it was very well done—the forum with faculty and staff was great. Very supportive. Some of them had come from the Bronx. It was the first time that I felt an acceptance. They were concerned about the leader on the campus being an advocate for them."

It was meant to be. "I was one of 170 candidates. I had to go through the search committee and no one had any idea that Padrón had nominated me."

As provost, Vallejo is the chief executive officer for the Central Campus, a 15-acre complex at Lake Worth, which includes classroom and laboratory buildings, a gymnasium and athletic complex, a theatre, and a library resource center.

The various PBCC locations are Belle Glade, Boca Raton, Lake Worth, and Palm Beach Gardens. According to PBCC data, more than 11,000 students are served in courses annually, and there are more than 17,000 students enrolled in credit courses. Approximately, 25 percent are students of color, of which nine or 10 percent are Hispanic.

Academic program offerings include nursing, business, legal assisting, criminal justice, respiratory, tech, paramedic, and drama design. More than 2,300 degrees and certificates are awarded annu-

Vallejo's reception was warm, says Vallejo, "It is better in terms of welcoming me posted."

Vallejo's credentials are fine—a bachelor's degree from the University of New Hampshire College, two degrees from Columbia U. and a Ph.D. in bilingual curricular development from New York University.

Prior to her years at PBCC, she was vice president of academic student services at Community College (NJ) and dean of academic support at Bergen Community College.

"I'm driven and very attitudes. When I stop learning, it's move on. I knew that I was ahead. I have stamina and if People can read through valued to have an impact in it just my students. I moved from seling to dean, etc." Vallejo said with each position, she also has a more global impact students, faculty, and admin-

Her New Role

Part of her response involves making decisions to campus buildings. The largest campus of the dist
there are a lot of construction needs. Florida does not fund new construction; the state only funds refurbishing of buildings. So I am involved in deciding which buildings on campus need to be taken care of first, as well as when to move faculty and how to work politically with them about the move," she notes. Vallejo mentions that students also are affected by the construction needs at PBCC, so she takes that into consideration when determining what has to be done first.

Vallejo also partakes in the "day-to-day of the campus. What is happening with students? With customer service? Are checks getting to students on time? Etc."

Another exciting aspect of her position is curriculum development. Vallejo says, "I'm working with faculty, helping with the development of new curriculum. I went to Orlando recently because I'd like to start an internship program at Disney in the hospitality area for our students in culinary arts."

Vallejo also is responsible for dual enrollment for the district, which encompasses the college and high school. "I need to determine what the weaknesses in the system are and achieve improvement. The idea is that we follow the same policies and procedures for high school students, who can get high school and college credits on campus or at high school. These are all courses that have been approved by the president of the district, who is interested in having a one-college concept."

Throughout her career, Vallejo has been committed to promoting and mentoring women and people of color. PBCC has launched a leadership program of which Vallejo is proud. "It's something that I love doing, and now it's part of my job."

"Participants must do a project aimed at helping their professional growth and that of the institution. They also must attend two conferences a year—one to learn about government and how laws affect colleges; the second covers professional development. It is a yearlong program, when participants are given mentors based on where they want to go in terms of their career," says Vallejo.

"Florida has a real strong commitment. We are in a consortium with Florida Broward County Community College, Florida Atlantic, and PBCC. In addition to her duties at PBCC, Vallejo, who is a member of the Board of Directors of the National Community College Hispanic Council (NCCCH), was also appointed to a three-year term on The College Board National Task Force on Minority High Achievement. Stated Vallejo, "NCCCH represents the interests and concerns of Latino students, faculty and staff at community colleges. We try to be advocates for the group on our own campuses. When issues are out there, we can take a stand."

In 1999, this task force produced a report entitled Reaching the Top. Vallejo explains, "We have two more coming out. But this particular report looks at why minority students do not compare favorably with White students even when they go off to college—even the best and the brightest."

The report's findings answer the questions. "Why is that happening? What are the variables that affect that?" notes Vallejo. "Some of the findings are commonsensical."

Future at PBCC

"It's not completely set right now. I have a vision, but I need followers. I need to work with people on the campus by being their voice. I'm trying to get to know people. They felt they hadn't had a voice in a while. The person who filled the position before had two hats, so it was difficult to devote the kind of energy needed."

"Given that we are the largest community college in the district, I'd like to find out what our niche is. What do we want to be known as? Are we the campus that has initiated the internship program, which has incredible outreach? Right now I'm investigating, meeting community people to get a sense of community, to see how I can forge partnerships. I want to be here for my campus. I want people to be happy here, and I want them to know that their voice counts in what we do."

And making time to connect with staff outside of her immediate circle is an ongoing goal. "I started having brown bag lunches. I started having brown bag lunches so faculty and staff can sit down and have lunch once a month. While the lunches have been a hit, according to Vallejo, she's eager for more open forums. "I'll go into peoples' staff meetings, too."

Good things have come out of the brown bag lunches. For example, the idea for a dessert reception. Vallejo described: "The entrance fee is to bring a dessert, a recipe, and canned goods for the pantry. We will publish a dessert recipe book and use the book to fundraise for scholarships."

Despite Vallejo's busy schedule and commitment to this new challenge in her career, she takes pleasure in the treachery of academia. Vallejo told HO, "I still would like to teach early childhood courses and the freshman seminar."

Selected Honors and Affiliation

The following represents a sample of Vallojo's involvement in higher education and the honor that she has received:

- ACE/National Network of Women Leaders "Dr. Carol Russe Award" by Westchester/Rockland region, 1999
- Distinguished Community Service for 21st Century Collaborative, 1999
AAHE
AMERICAN ASSOCIATION FOR HIGHER EDUCATION

Bridges Diversity and Learning

Organization Has an Action Agenda and Takes Action

by Mia Anderson

Tito Guerrero, president of the University of Southern Colorado and current chair of the Hispanic Caucus of the American Association for Higher Education, calls AAHE “the premier organization in higher education.” If service to diversity is any criterion, this might very well be the case. The AAHE board of directors approved a “Statement on Diversity” last April, the organization has devoted its national conference next month to “Diversity and Learning,” and AAHE envisions and realizes diversity in many other ways as well.

Mildred Garcia, associate vice provost for academic affairs at Arizona State University-West and AAHE board member, says that through the Statement, “AAHE has forcefully acknowledged that if our campuses are to be viable and vital and communities aimed to educate all students, diversity must be an integral part of higher education.” In its Statement, the board “forcefully affirmed the interlocking values that are essential to the Association’s work: quality, diversity, and improvement.” But they go a step further by acknowledging that “statements alone, however compelling, are rarely sufficient to bring about systemic change.” And they commit themselves and the organization to action: “AAHE will continue—through its projects, conferences, and publications—to help campuses increase access and diversity for students, faculty, administrators, and staff as well as in curricula and programs.”

Asked how the Statement could possibly be implemented, Guerrero comments, “As with any statement by a national organization, it will be largely dependent on the people back at the colleges and universities.” However, he continues, “even more important is the moral, the ethical leadership potential that such a statement has in the schools and communities when an organization like AAHE backs an issue like diversity.” Garcia hopes that “through the learning and deep dialogues occurring through the projects, conferences, and publications, the members will...bring back to their campuses new knowledge learned through AAHE’s efforts.”

Carlos Hernandez, president of New Jersey City University and member of the AAHE board, speaks of “focusing our attention on going beyond statements and creating a mechanism, a structure for implementing diversity...We’ll need to work on how we influence institutions,” he says.

Margaret A. Miller, “Peg,” president of AAHE, offers some background on “the Statement.” When she became president in June of 1997, she says, “relations among the caucuses and constituency groups [American Indian/Ala Native Caucus, Asian and Pacific Caucus, BL Caucus, Hispanic Caucus, and Women’s Caucus] the Community College Network, Grad Student Action Community, Research For National Network of Faculty Senates, and Pro Group] were not as good as they should be. I hadn’t understood the depth and degree upset over the selection of Anaheim [Calif. the site of the 2000 national conference]. A this led to a lot of discussion, and we took a this to the board. and there was a lot more discussion.”

“Coincidentally,” Miller continues, “they [in the process of reviewing their advocacy policy—the whole question of what issues they should support] were going to the campuses and other groups and asking for opinions...Only very rarely does the board a stand on an issue, but this turned out to be one of those issues. And now there’s a ‘Statement on Diversity’ and a ‘Diversity Action Agenda’ see that it gets carried out.”

The second item on the “Diversity Action Agenda,” after declaring that the 1998 Conference would include sessions and speakers who “articulate the value of diversity and how it is accomplished,” was setting the stage for the 2000 National Conference: “ways we keep higher education open to all Americans and help everyone succeed in our institutions.” The theme would be “To Form a More Perfect Union: Diversity and Learning,” and the locale would stay Anaheim. What better place to explore the many complex whys, how-tos, therefore of diversity than California—the heart of Propositions 209, 227, and 187.

According to Miller, a number of presid
of California colleges and universities were asked for their position on this controversial "site" question. and, of Anaheim, they all said, "Yes, yes, yes." The Black Caucus Executive Committee, however, resolved not to participate.

Their statement, prepared by the chair of the AAHE Black Caucus, Joseph H. Silver, Sr., vice president for academic affairs at Savannah State University, pointed out that "the anti-affirmation action movement [in California] adversely affected the constituents of the AAHE Black Caucus and other minorities. We felt that the anti-affirmative action agenda should be addressed by AAHE and that, as a caucus, we did not want to support an area that had a blatant disregard for these matters." While the declaration ends by applauding AAHE "on the steps taken since the Black Caucus raised the issue of the 2000 conference being held in California," and cites "an inclusive mission statement, a diversity statement, and a decision to take an advocacy role from this point forward," the Black Caucus offered an alternative site and forum to address the concerns of Blacks in higher education.

That summit was held this week, February 25-27, in Savannah, Georgia. Miller told readers in the June 1999 AAHE Bulletin that the board of directors "respects the resolution" but "conclude[s] that AAHE can be of most use to California's colleges and universities in particular, and to higher education generally, if the Association goes where issues of access and diversity are being wrestled with most intensely." Hernandez says, "What we don't need is an irreparable schism. Fortunately, positions have been taken that allow consensus. There is enough good will among the caucuses and between the caucuses and the board that despite our differences, we can come together."

The third item was developing a project on "increasing the success of students of color, as an example of the ways in which [AAHE] plans to support the [diversity statements'] goals through its projects." To use an old cliché, they began to put their money where their mouth is.

The project that quickly emerged—funded by a $200,000 grant from the Knight Foundation—is a series of monographs on "best teaching practices" for specific disciplines across the curricula for getting minority students involved and helping them to succeed. (An earlier monograph series focused on service-learning practices in specific disciplines.) The project will be directed by Carolyn Vasques Scalera, a sociologist from the University of Michigan, who came on board in January.

Further, the "Diversity Action Agenda" asserted that AAHE will:
- increase attention to diversity issues in all projects;
- increase communication with those representing diverse voices, welcome their input, and build and sustain their trust;
- act affirmatively in hiring at all levels of the organization;
- act affirmatively in recruiting and encouraging people of color to participate;
- ensure that AAHE programs, speakers, and conferences sustain attention to diversity;
- periodically invite constituency group leaders to meet with the board; and
- periodically produce reports about progress on the action agenda.

A lengthy list of actions under way followed this list of intentions. One item of particular interest to Hispanics refers to the service-learning (monographs) project that included "an effort to interest Spanish teachers in collaborating more with Hispanic communities. The American Association of Teachers of Spanish and Portuguese (AATSP) now has a proto-task force that will work on this." The status report notes that "our monograph work has an important diversity connection that the models are often directed at students of color, and their schools. Every volume has at least one model of essay on the why's and what's of minority outreach."

A report on AAHE's hiring noted that of its 13 administrative staff positions, six are held by African Americans and one by a Hispanic. "The problem we have at that level is the gender balance, with only one man." Of the four office directors, one is African American, and all are female. The project directors, the two vice presidents (Theodore J. Marchese and Kathleen Curry Santora), and the president are White. The 1999-2000 board of directors of ten men and ten women includes four (or 20 percent) Hispanics.

**Vision and Mission**

The "inclusive mission statement" referred to by Joseph Silver, Sr., says that "AAHE is the individual membership organization that promotes the changes higher education must make to ensure its effectiveness in a complex, interconnected world. The association equips individuals and institutions committed to such changes with the knowledge they need to bring those changes about." Once again, this sounds progressive and inspirational on paper, but how can it be implemented so that it makes a difference to the students in the classrooms across the nation?

Specifically AAHE "envision and articulates agendas for change." Good—someone has to be able to step back and see the situation and
imagine a solution, and clarify the steps needed to effect that solution.

The organization includes among its reasons for being “contributing to the knowledge of a diverse group of leaders committed to the systemic, long-term, cost-effective improvement of American higher education.” Good—it must be recognized that both the problem and the solution are systemic; that improvement of higher education, especially with regard to diversity issues, is not something that is worked on for a while and then allowed to fade as some new agenda attracts attention; that such improvement must be cost-effective or real-world considerations will eliminate it; and that someone needs to gather (and/or do) the research and the knowledge on these issues and get it out to the teachers and administrations and communities.

A third (of seven) specific activity embraced to carry out AAHE’s mission is “providing forums in which individuals from a variety of positions and institutions, within and outside higher education, can engage in constructive conversations about difficult issues.” Good—forums aren’t always available even when someone has a great deal to contribute, and conversations about “difficult issues” can’t rise very high without multiple perspectives on these issues being voiced and heard.

History and Membership

AAHE began as the higher education department of the National Education Association (NEA)—way back in the 1870s. That department, according to www.aahe.org, was called the Association for Higher Education (AAHE) and had as its primary function to organize an annual national conference, which continues to this day. In 1969, however, a group of AAHE members disassociated themselves from the NEA, “rejecting the NEA’s increasing emphasis on union activity... [and] forming the independent American Association for Higher Education.”

AAHE’s special programs have developed in-depth, long-term commitments such as the following:

- an Assessment Forum, which “advances the thoughtful practice aimed at improving the quality of undergraduate education”;
- the Forum on Faculty Roles & Rewards, which redefines faculty priorities and institutional expectations in the context of a rapidly changing workplace;
- the Quality Initiatives, working to help campuses implement “best practices”; and
- the Program for the Promotion of Institutional Change, which, with funding from the National Science Foundation (NSF), provided support to networked campuses working to improve “SME” education—science, mathematics, engineering, and technology.

AAHE “provides members with information, insight, and innovative thinking” through its publications, the bimonthly Change magazine, edited by Vice President Marchese, and the monthly (except July and August) AAHE Bulletin. It also offers books, monographs, directories, conference papers, and other publications “reflecting AAHE’s work on specific issues.” (For ordering information, contact the Pubs Order Desk at (202) 293-6440 x780.)

AAHE’s members are more than 9,000 faculty, administrators, and students from all sectors, disciplines, and positions, plus policy-makers and leaders from foundations, government, accrediting agencies, the media, and business—all working to carry out the vision of helping “all Americans achieve the deep, lifelong learning they need to grow as individuals, participate in the democratic process, and succeed in a global economy.”

Peg Miller came to the presidency, succeeding Russ Edgerton, from her position as chief academic officer of the State Council of Higher Education for Virginia. She will be leaving by August 1st of this year. Tito Guerrero says that she “has provided outstanding leadership during her tenure, and we wish her all the best.”

AAHE Hispanic Caucus

“Given attacks on affirmative action and changes in support for Hispanic students, from financial aid to remediation, we stand to lose an enormous amount of talent without more coordinated efforts,” says AAHE board member Sylvia Hurtado, associate professor of education, Center for the Study of Higher and Postsecondary Education, University of Michigan—Ann Arbor. “Organizations like AAHE are important in directing the national conversations among educators and identifying successful practices that hold promise for creating a more equitable society.” The Hispanic Caucus in particular lends voice to those concerns that have the heaviest and most direct impact on Hispanic students.

When asked what the business of the Hispanic Caucus is, Chair Tito Guerrero says that it provides an opportunity for Hispanics “to network within our own group, to maintain ongoing professional ties,” and “to bring to AAHE perspective.” “Our caucus provides us with the opportunity to have our voice heard by other higher education organizations, or nation... higher education’s positive response to diversity is a ‘national imperative,’ he adds, ‘given the dramatic increase in the Hispanic population’.”

Carlos Hernandez, a past caucus chair, aids that “it has been instrumental in the heard awareness of diversity in the bnc sense. Within itself, there is tremendous disparity. Hispanics from all levels and positions in higher education—so we’re in a good position to understand and speak to diversity issues.”

Guerrero, while he understands that “might be a group of two or concerned about location in Anaheim,” is looking forward to the 2001 conference. Typically, he says, there about 1,500 individuals who attend—administrators, faculty, and students involved in or interested in issues of diversity. The Hispanic Caucus provides scholarships for 12 graduate students from all over the country to attend. “It’s a wonderful opportunity for them.” They can be professional networks before they complete. They can talk with other Hispanics who have already successfully negotiated academia. They can also talk with other Hispanics about particular dilemmas they face in degree work—a problem in their dissertation work, for example.

Also, the Hispanic Caucus each year spo
a Tomás Rivera Lecture at the national conference. In 1999, Jim Cummins, professor of curriculum, teaching, and learning at the University of Toronto, addressed "Research, Ethics, and Public Discourse: The Debate on Bilingual Education" (see the June issue of AAHE Bulletin). Next month, in Anaheim, David Hayes-Bautista, professor of medicine and director of the Center for the Study of Latino Health, School of Medicine, University of California-Los Angeles, will lecture on "The Demographics of Civil Society and Intellectual Tradition."

The American Association for Higher Education views higher education as a key route through which individuals achieve the lifelong learning they need to grow as persons, participate in democratic processes, and succeed in a global economy. This view presumes structures of educational opportunity that are focused on teaching and learning accessible to our diverse populations, and purposefully evolving. The values of quality, diversity, and individual and institutional growth are all ethical components of this ideal.

Since its formation, AAHE has embodied these values in its various projects, conferences, and publications. AAHE has also been a cosignatory on documents such as the American Council on Education statement "On the Importance of Diversity in Higher Education" (February 1998, revised February 1999) and the Downs/Calumet brief (August 1998).

But a spreading wave of political and judicial decisions affecting higher education—Propositions 209, 227, and 187 in California, the Hopwood ruling in Texas, Initiative 100 in Washington state, the Boston Latin case, and others—has increased the AAHE Board's concern that the Association's vision and the values that support it are threatened. These actions, which have eliminated race, ethnicity, and gender as considerations in admission and scholarship decisions in the affected states, have led to cutbacks in recruitment programs for a diverse faculty and staff, and threaten to undermine decades of progress in broadening access to higher education and reducing social stratification within it. In an alarmingly short time, their chilling effect on the racial and ethnic diversity of key campuses has become apparent. The board believes that these rulings threaten not only diversity and access but also the overall quality of higher education and the public good it serves.

The AAHE Board of Directors forcefully affirms the interlocking values that are essential to the Association's work: quality, diversity, and improvement. Diversity creates the rich environments that are so crucial to democratic, real-world learning. Since by 2025 the American workforce will be predominantly comprised of people of color, access to higher education for historically underserved individuals is also in the nation's economic self-interest. The board believes that institutions of higher education have a moral and educational responsibility to ensure that talent is developed in all communities, and that American colleges and universities collectively and individually are strengthened by diversity in campus populations.

But statements alone, however compelling, are rarely sufficient to bring about systemic change. So AAHE will continue through its projects, conferences, and publications—to assist campuses to increase access and diversity for students, faculty, administrators, and staff, as well as in curricula and programs. Given the momentum and gravity of the threats to achieving an equitable system of higher education in this country, the association will sustain its efforts for years to come. It will also continuously reconsider the ways in which it carries out its organizational business to ensure that they are congruent with its values.

Finally, the board calls upon the associations members to commit their wisdom, energy, and resources to promote and strengthen diversity in and access to American higher education. It asks members to confront threats to diversity and to join the board's efforts to transform higher education and ourselves.

Approved by the AAHE Board of Directors
April 26, 1999

Jorge Klor de Aisa

Speaking about higher education generally and AAHE in particular, Sylvia Hurtado says, "We are all learning how to work together, and we need to form alliances across campuses and organizations if we hope to narrow the gaps in educational attainment." With similar emphasis on individuals and the alliances that they forge, Jorge Klor de Aisa, president of the University of Phoenix and newer AAHE board member, says that AAHE is an "extremely important organization because it's focused on individuals rather than institutions." It's a "very important voice in higher education policy-making," he says.

In the same vein, Hernandez, praising the unique contribution of AAHE to higher education, points out that it is the one membership organization, that it is the organization with "many, many different voices without the filtering of departments and institutions." He says that it's "not like the United Nations, which has its formal structure of ambassadors; it's a grassroots organization—like the N.G.O.s [non-governmental organizations]—that represent the people and that work to shape national policy." He looks forward to being involved. As our student populations become ever more diverse, the nation's need for work such as that being done by AAHE has never been greater, and we can only hope that Hernandez's optimism is contagious.
The Vanishing Campus Male
Should We Be Alarmed?

BY JEFF SIMMONS

During his 30 years in education, Tom Mortenson has watched trends evolve from the time when they weren't even considered trends. In the early 1970s, as a higher education analyst, he watched without any hint of concern as the pool of women enrolling in college began to rise.

Now, he's worried.

The number of female applicants has outstripped those of male applicants at many colleges, and, at the risk of sounding sexist, Mortenson believes there's much cause for alarm.

"I started off this process looking at their progress as a sort of cheerleader for women, and it was 10 years ago that I realized that the guys were not making progress," says Mortenson, a senior scholar at the Center for the Study of Opportunity in Higher Education. "The world is changing in ways that favor females and disfavor males."

Last fall, Mortenson penned the cover story for The College Board Review posing the question: "Where are the boys?" and analyzing the growing gender gap in higher education. His analysis spoke to a debate that, like the numbers of female enrollees, is picking up steam.

Goucher College in Towson, Md., drew together hundreds for a conference entitled "Fewer Men on Campus: A Puzzle for Liberal Arts Colleges and Universities" in November. Organizers helped officials decide how they should adjust their campuses, their curriculum, and, possibly, their marketing.

The reason for concern, they say, is that nationally, the percentage of males enrolled in undergraduate programs has plummeted to 45 percent, down 10 percent from 1970. Mortenson says that in 1997, men earned 520,500 bachelor's degrees, yet women earned 652,400.

The trend, he reports, crosses ethnic lines, so what is true for the general college-age population is occurring in Latino communities as well. "We see already that Blacks and Hispanics are less likely to go to college," he says, reasoning that the numbers of Latino men attending would then shrink to a much smaller percentage than those of White enrollees.

Mortenson's research found, for example, that between 1977 and 1996, the proportion of degrees awarded to Hispanic males dropped from 55 to 42.8 percent, a 12.2 percent decline. That drop is larger than that of other ethnic groups. Only American Indian males decreased at a greater percentage, by 12.9 percent.

At the Goucher conference, psychology professor Aida Hurtado of the University of California at Santa Cruz, cited one reason for the lower Latino enrollment: treatment of boys and girls in households. Because Latino parents grant boys freedom, they became more self-reliant and, in turn, attracted to a college education. Girls, however, were involved in household chores than previously an enroll at a higher rate.

"The conference ended with a desire for more dialogue and attention to the issue," says Debra Rubino, communications director at Goucher. "We are a lot of threats to liberal education, and this is yet another. There is a large issue of how to allow the arts to flourish because we believe it's really a positive, important, and vital type of education for our society."

Goucher figures only skim the face of the trend and its origins. A decade ago, the scales tipped in favor of women after generations of college marketing efforts designed to boost the numbers of women on campus. Numbers just shift to a leveling off: they could skyrocket.

In 1996, according to the U.S. Department of Education, there were more college-aged men women in the nation. Yet, 8.4 million women were enrolled college, while men accounted for 6.7 million enrollees. For the previous five years, the number of men enrolled in college declined.

The number of women rose. That gender shift also is reflected when looking at those who take the Scholastic Assessment Tests and at the applications that are delivered to admissions offices.

Education experts indicate that female enrollments have surpassed enrollments in both public and private, and four-year and two-year college. The U.S. Education Department forecasts that the trend will continue and beyond. This year, 92 million women will be enrolled and 69.6 million. That has prompted some, like Tom McEvoy, vice president of enrollment services at Beloit College in Wisconsin, to lobby for colleges to address the issue to determine what anything—a college needs to do to adjust to the changed demographics.
"The world is changing in ways that favor females and disfavor males."

Tom Mortenson, Senior Scholar, Center for the Study of Opportunity in Education

"I tend to agree with Tom Mortenson about the general dynamics of the problem," McIvor says, "from the perspective of the residential liberal arts college where one of the objectives of the institution, in addition to academics, is a learning environment where young men and women learn to live and grow together."

McIvor unsuccessfully urged the Associate Colleges of the Midwest, which is comprised of 14 liberal arts schools, to examine the issue. He says he wanted colleges to consider strengthening academic programs that appeal to men to attract more males.

"The consensus was that there isn't an issue," McIvor says, "and collectively, at this point in time, there would be no new initiatives to investigate the matter." He disagrees with the decision, saying, "a balanced residential community, and by 'balanced' I mean an intellectual balance of bright men and women, provides the richest environment for intellectual and personal growth."

Additionally, The College Board has been studying the trend, which it has traced through the numbers of students who take the SATs and their scores. Wayne Camara, the Board's executive director of research, reports that in 1998, 674,415 females took the SATs, while 579,235 males did. The percentages are the same for all ethnic groups (see accompanying chart). For Hispanics/Latinos, 22,593 females took the exam and 16,995 males.

Yet, males still score better than females. The average scores for males: Hispanic/Latinos were 570 in verbal and 489 in math, while for females they were 445 in verbal and 449 in math. Experts reason that one reason for this could be that more lower-performing females are now taking the exam, inevitably lowering the average score.

"You would assume that their chances of getting into college would be less than males," says Camara. "They might have lower scores than males, but that doesn't seem to be impacting their level of success in admissions."

The gender lines in higher education raise a number of questions, chief among them: What are the reasons for the trend? Mortenson says the figures speak to decades of "accumulated experiences in the lives of boys and girls and young adult men and women." His research examined their experiences at home, with their families, at school, and in the workplace. Like other experts, including those who spoke at the Goucher conference, Mortenson explains that women are better prepared psychologically and academically in the changing world.

Mortenson notes, for instance, that:

- Many boys are affected by living in single-parent households. In 1998, 68.1 percent of all children in the nation lived in households with two parents. For Hispanics, that number was lower, at 63.6 percent. More often than not, the single parent raising the children is female, and boys thereby lose a male role model.

- Boys are more likely to be shuttled into special education classes than are girls. Three-quarters of all children in K-12 classes for students with emotional disabilities are boys, and 73.4 percent of those identified with learning disabilities are boys.

"[Female applicants] might have lower scores than males, but that doesn't seem to be impacting their level of success in admissions."

Wayne Camara, College Board
Overall, girls fare better academically than boys do and are more likely to seek help from tutors or counselors. In 1998, for example, 30.8 percent of female college first-year students achieved an A or better, but only 27.4 percent of men did so.

"If you want to look at the learning styles of boys, boys mature a little bit later and develop social and academic skills later than girls, so girls have been given a huge head start in elementary schools," Mortenson says. "Boys are struggling to catch up, and a few do, but many don't." This, experts say, could be a key reason why more girls take the SATs to enter college.

"Adolescent girls are more much on task," says Gretchen W. Rigol, vice president of The College Board. "They are more likely to do their homework, more likely to be good students. The 'Miss Goody Two Shoes' image is unfortunate, but it's somewhat real. Females are more likely to have their act together and do some longer-range planning."

- Boys were more likely to spend their final year of high school participating in non-academic activities, such as partying, playing video games, and watching television. Girls, on the other hand, were more apt to spend that period focusing on reading, housework, homework, and volunteer activities.

- Females possess more skills suited for the urban world than do males because the changing labor force has shifted from a goods-producing industrial environment to a service-producing economy that favors females. "You see economic opportunity expanding for women and constrained for men," he says.

"What I think is happening is that the world is changing in ways that favor women's natural talents and disfavor men's," he says. "You see declining male labor force participation rates since the end of World War II at the same time that the female labor force participation rates are growing very rapidly."

Some colleges see a problem needing to be redressed. Others don't view it as an issue at all because women appear to make better students than do men. So admissions officers are reluctant to accept lesser qualified students and instead recruit more women who are better prepared and more committed.

"If you are a faculty member and you want to teach better motivated and prepared students and they happen to be women, then fine," Mortenson says. "If the guys aren't motivated, I don't think that colleges are going out of their way to better prepare them and motivate them."

At New York University, for example, the gender scales have shifted toward women. An estimated 60 percent of its undergraduate students enrolled at the College of Arts and Science are women.

"My sense is that we have strong students of both gender. I am not overly worried about this as I don't sense among student faculty an awareness of a political majoritarianism," says Santirocco, dean of the College of Arts and Science.

"I'm happy when I see ful opportunities for women. It pleases me that women are thriving in a field where they were in the past."

Students at New York University are more likely to major in the sciences and humanities, with 53 percent of women and 47 percent of men. While the disparity is shrinking, women still lag behind in receiving degrees in engineering and technology, such as Carnegie Mellon, 5 more males than females, as do Ivy League schools such as Harvard. Yet, most liberal arts schools currently enroll more females than males.

Goucher is struggling to even out its gender demographics. Of students, 50 percent are males. Yet, the percentage of undergraduate males on campus (54 percent) is now higher than that of underclassmen males (27 percent) and of African American males (29 percent).

Mortenson says that schools should look at the impact beyond the gender balance. For instance, he says, many young college-age women are too old to find college-educated men to marry. He goes so far as to say that boys who ignore traditional economic and civic roles could lose in the prison population.

This has drawn the ire of equal rights advocates who fear there will be a backlash against women. But Mortenson dismisses that he is calling the problem as he sees it, and he says that already might be practicing a behind-the-scenes form of gender affirmative action.

Some institutions, he says, might be bending the admissions standards a bit to bring more men into the fold. Others might attempt to attract athletic programs to attract males.

"We miss the causes of the problem when we approach the issue," Mortenson says. "I live on the lives of children growing up and I can't help but think that where you see adult male engagement from family life and social roles, there is a much greater problem."

The world is changing; these changes have different effects on women and men, and gender has to be to add these global changes are at the design level for the genders."
Assessing Equity for Women

Latina Earnings Lowest: 58 Cents on the Male Dollar

BY
Marilyn Gilroy

The good news: women are now the majority (56 percent) of students enrolled in both undergraduate and graduate institutions and, as a group, have surpassed men in degree attainment at the associate's, bachelor's, and master's levels.

The bad news: on average, a White man with a high school diploma still earns more than a woman college graduate of any racial, ethnic, socioeconomic, or ability group. Women overall earn 74 cents for every dollar earned by men; Latinas earn 58 cents, African American women earn 67 cents, White women earn 75 cents, and Asian American women earn 80 cents.

These findings were issued recently by the Women's Educational Equity Act (WEEA) Equity Resource Center at Education Development Center, Inc., as part of its compilation of existing research on equity for women and girls.

"There is still a real concern for equity issues," said Katherine Hanson, director of the Center. "Women and girls need a lot of resources and help." The WEEA Equity Resource Center was started in the mid-1970s to work with schools, community organizations, businesses, and individuals to:
- publish and market gender-fair education products;
- fight against discrimination based on gender, race, class, language, and disability; and
- disseminate the latest resources for multicultural gender-fair education.

The Center is an outgrowth of the Women's Educational Equity Act, a U.S. Department of Education program started in 1974, dedicated to reducing the educational disparity between men and women. It is the only federally funded program devoted exclusively to promoting gender equity and has been a major catalyst for infusing equity into educational systems. The WEEA program has awarded more than 700 grants to schools, universities, community organizations, and individuals. It also funds the WEEA Equity Resources Center at Education Development Center.

Although WEEA can boast a number of dramatic gains toward the goal of equity in the last 25 years, statistics show that there is still a long way to go.

"There has been an incredible amount of change since the enactment of Title IX," said Hanson. "But a lot of that progress has been for White women. That's a real concern for us."

The situation is especially critical for Latinas, who often lag behind women and girls in all categories of achievement. For example, the percentage of all females ages 16-24 years who are not in school and have not completed high school is 10.9 percent; for Latinas, it is 28.3 percent, almost triple the overall rate.

"We find that Latinas lag behind other groups in part because they are socialized to think of motherhood as their primary role," said Hanson. "The challenge is to try and increase their options."

WEEA has funded a number of grants that specifically targeted younger Latinas as well as those in college. The projects included one at six California elementary school sites where 120 Hispanic girls in grades three through five were introduced to math and science through intensive tutoring, guest speakers, and counselors who tackled self-esteem issues. The girls also attended a six-week summer institute that included programs for their parents.

On the opposite end of the spectrum, Westchester Community College, located north of New York City, targeted Hispanic women whose first language is not English and provided support for study in technological fields (engineering and computer sciences). In addition to offering academic support, this two-year program provided women with career counseling and mentoring from individuals who worked in local businesses.

The Resource Center works with these schools and other grantees of the WEEA program to translate the latest grassroots research and development into replicable models. These "field tested" methods are used to encourage innovation in schools, universities, and community organizations throughout the nation.

WEEA has also published bilingual resource guides for educators, single mothers, and community leaders who want to encourage gender equity (see end of article).

All of these efforts have raised awareness of the critical need of continuing toward the goal of equity. But even a concept as democratic as gender equity can have its critics.
“Some people believe that boys are losing out because of the emphasis on gender equity for girls during the last 20 years,” explained Hanson. “They believe that these efforts have been damaging to boys. That is clearly not true from the most recent statistics on test scores and achievement.”

Moreover, says Hanson, society in general benefits when everyone, regardless of gender or race, is included and provided with equal opportunity. And indeed, that is the true definition of gender equity, which is defined as a set of actions, attitudes, and assumptions that provide opportunities and create expectations about individuals regardless of gender.

In order to help turn this goal into reality, the WEEA has gone beyond grant programs and publications. Like many other organizations, the Center has been turning to the Internet and the World Wide Web to help reach new audiences.

For example, it has sponsored the Educational Equity Discussion list (EDEQUITY), an international online discussion about all aspects of educational equity in a multicultural context. EDEQUITY gives people an opportunity to ask questions and exchange information about teaching strategies, useful texts and films, innovative programs, current research, and funding sources.

“We have had a wonderful response to this,” said Hanson. “Our last online forum drew 680 participants who signed on for a discussion about the current status of gender equity initiatives.”

The Center is also offering an online course for teachers who want to explore ways to engage middle school girls in math and science. It was developed in response to research that shows that middle school is a critical transition period for girls. In analyzing achievement test scores, results show that through 5th grade, girls and boys score nearly identically in math and science; after that, girls’ scores begin to plummet. As girls reach middle school, they are also less likely to take elective courses in math and science. The downward spiral is even more severe for Latinas, who might come from poorer families where English is a second language.

“This course deals with the whole range of equity issues due to gender, race, ethnicity, and disabilities,” said Hanson. “It also explores power dynamics in the classroom.”

Of course, the overall purpose of the course is to help teachers increase the interest and achievement levels of middle school girls in math and science, thereby laying the foundation for a variety of options in college and, later on, management-level careers research.

The course is comparable to 16 hours of traditional instruction, and participants can receive credit toward their professional development requirements.

To round out its array of materials, the Equity Resource Center has also developed the WEEA Digest, available in print and online. The Digest offers articles and discussions on equity theory and research from national authorities on education. It is often used as a tool in teacher education courses and workshops.

For those who think that the battle for gender equity is slowing down, the WEEA Equity Resource Center provides new energy and tools to face the challenges that remain. Its mission is clearly defined and best expressed in the words of a former WEEA project director: “Gender equity is an alive and vital discipline that continues to evolve and change, just like the entire field of education. It is an issue that needs to be continually examined, revised, and supported. Even though it changes over time, gender equity is a real issue that needs to be addressed anew every year.”

The following is a partial listing of publications that can be found through the WEEA Equity Resource Center’s Web site: www.eewomen.org.

**Raising the Grade: A Curriculum**

A collection of fun and interactive activities that will strengthen the knowledge of K-12 students.

*Las matemáticas, las ciencias, y su biografía from the Encouragement of Girls in Math and Science Series*  
Open the doors of opportunity for girls in math, science, and technology with a pamphlet that shares current research on math and science and girls into practical, concrete action.

*Las matemáticas, las ciencias, y su biografía helps parents encourage their daughters in math and science.*
and overcome the barriers of sex discrimination by learning about the roles women play in science.

These pamphlets are especially appropriate for distribution at workshops and conferences.

Dr. Patricia B. Campbell, Campbell-Kibler Associates, 1992.

**ESL: The Whole Person Approach** for K-12 bilingual teachers

An innovative approach to ESL teacher training, this guide introduces the practitioner a holistic, humanistic method of bilingual education. The text fully integrates bilingual education with gender equity concepts both to improve Latino/Hispanic students’ English proficiency and to remove gender bias from multicultural curricula.

**Guía de Recursos para la Madre Sola (Single Mother’s Resource Handbook)**

For teen parenting programs, middle and high school teachers, counselors, resource centers, and individual mothers. An important addition to all programs serving pregnant and parenting teens, this all-time bestseller helps single mothers develop positive self-images, recognize available alternatives, better express their needs and feelings, positively influence their children, and use problem-solving skills to make better decisions. Updated in 1992 and translated into Spanish by the WEEA Equity Resource Center.

**Checklists for Counteracting Race and Sex Bias in Educational Materials**

For over 35 years, this easy-to-use handbook has helped parents and teachers evaluate bilingual and multicultural curriculum materials for the presence of race and gender bias. Martha P. Cotera, 1982.

**The Equity Principal: Administrator’s Handbook**

The Handbook provides practical workshop plans to help administrators promote equity as a criterion for excellence in today’s increasingly diverse population of learners.

**GESM: Generating Expectations for Student Achievement—Teacher Handbook**

This invaluable GESM (Generating Expectations for Student Achievement; formerly Gender/Ethnic Expectations and Student Achievement) handbook identifies five major areas of classroom disparity and offers research-based strategies to counter inequities. It will help teachers look at the impact of gender, race, and ethnic biases in their teaching and discover what happens when they reduce bias in their classrooms.

**Going Places: An Enrichment Program to Empower Students**

It details how to implement the “Going Places” program, explains how to recruit students, and guides teachers through the daily plan for 18 weeks. Finally, it emphasizes support groups, a sense of belonging, and parents’ involvement in the education of their children.

San Diego City Schools, 1991.

**The Hidden Discriminator: Sex and Race Bias in Educational Research**

The Hidden Discriminator provides an in-depth examination of stereotypes and bias in educational research. It explores the hidden effects of bias on decision-making and program design. It reveals numerous examples of bias in research—past and present—and concludes with guidelines for evaluating and eliminating sex and race bias in research. The set consists of a book and one each of the five pamphlets. The pamphlets are especially appropriate for distribution at workshops and conferences.

Dr. Patricia B. Campbell, Campbell-Kibler Associates, 1989.

**Infusing an Equity Agenda into Education**

The Infusion Process Model uses existing organizational structures and communication systems to generate broad-based advocacy for educational equity and infuses equity concerns into all levels of school district operation.

Record Numbers of Women Earn Ph.D.s

Minority Gains Even More Dramatic

BY AMALIA DUARTE

In the 1996-97 academic year, 42,705 research doctorate degrees were awarded—more than in any other year. But the big news is the record-breaking number of doctorates earned by women and, especially, minority women.

"The real story is that minority women have made huge gains," said Susan Hill, director of the Doctorate Data Project at the National Science Foundation (NSF), one of five federal agencies that sponsor the annual Survey of Earned Doctorates. "We see really incredible changes across the board for underrepresented women—Puerto Rican, Mexican American, African American, Asian and Pacific Islander, and American Indians."

According to the survey, women have made significant gains in doctoral programs throughout the academy. But what is the payoff for these newly conferred Ph.D.s?

Unfortunately, as in the past, the gains are unevenly spread across the campus. Not surprisingly, women remain underrepresented in the traditional arts and sciences. And they are still vastly underrepresented in other areas of study, such as engineering, computer science, and physics, which continue to be male bastions.

And there are questions about whether more women with Ph.D.s will translate into greater numbers of female deans, department heads, and even college presidents down the road. As women and minorities set new records for earning doctorates, fewer White males are choosing to get a Ph.D. Some speculate that White males are less interested in seeking a Ph.D. because higher education isn't offering the same long-term rewards anymore, particularly when weighed against the quick dividends found in the booming economy of the Information Age.

“We are delighted to see that more women are getting advanced degrees, and it would seem to follow that this would lead to more women in leadership positions on campus,” said Pamela Haag, director of research at the American Association of University Women (AAUW). "But higher education is moving away from those tenure-track positions, which might be why fewer White males are choosing to pursue a Ph.D. Too often women end up in part-time adjunct positions and can't make the jump onto the tenure track. So, we'll have to wait and see how this plays out."

The record-breaking 1997 figures, however, vividly demonstrate the inroads women have made into graduate degree programs. Women received a record number of 17,322 doctorates in the 1996-97 academic year. This figure represents 40.5 percent of all doctorates granted that school year. It was both the highest number given to women and the highest percentage compared to men. This record-breaking year continues the accelerated progress that women have made over the past three decades in earning advanced degrees as they got greater access to higher education. Much of it is pure demographics. As greater numbers of women went to college, more of them chose to go for a master's degree or a Ph.D. But in the 1990s, the trend has ratcheted up from slow and steady to overdrive. The number of women earning a Ph.D. in 1997 was 52 percent higher than in 1987; 20 percent higher than just 5 years earlier in 1992.

Why are so many women pursuing advanced degrees? According to Haag at AAUW, women, in gene value, have made significant advances in the past. And sometimes don't have loftier goals in mind when they pursue a master's or Ph.D. "Women put a much higher value on education, degrees, and credentials than men do," said Haag. "And one asked about why they got advanced degrees, women often mentioned personal reasons, such as want to be better educated or to be a better person."

Additionally, the recession of early 1990s might have diverted some women who were able to finish getting their degrees, into the economy when they couldn't find jobs. And there are other economic motivations as well, including keeping up with men in the corporate world. "Our research has found that women need to see an advanced degree as a way of getting ahead. It's a route to economic self-sufficiency," added Haag. 'A woman with a college degree earns about as much as a man with a high school diploma. So, getting an advanced degree can make up for those disparities in the job market. It gives some women more self-confidence in the workplace.'

PAMELA HAAG, DIRECTOR OF RESEARCH, AAUW
During the 1990s, the gains have come in programs throughout the academy, although unevenly. "In some fields, we've reached parity, but in other areas, women have barely made a dent," said Hill. In the physical sciences and engineering, for example, women are still a small minority in most programs. Chemistry is one area where women are now getting about a third of all Ph.D.s granted, but they remain isolated in many other physical science departments. Hill says that research has found that many women don't feel comfortable in the combative classroom style of these disciplines. "Women have a hard time surviving in that culture," said Hill. The women who do venture into such fields are often following in their father's footsteps.

"There is still profound segregation in terms of disciplines that men and women study, and it's most pronounced at the graduate level," said Haag. "Women tend to pursue advanced degrees in fields that pay less. And these are fields where there are fewer tenured positions and more adjunct and part-time jobs." But there are some real bright spots of success highlighted in the survey. For example, women in 1997 earned almost half, or 45 percent, of the doctorates awarded in the life sciences, which includes, of course, the biological sciences, health sciences, and agricultural sciences. This was a sizable improvement from just a decade before, when women got 35 percent of doctorates awarded in the life sciences, and a huge leap over 1977, when women got just 20 percent of Ph.D.s awarded in this field. Similarly in engineering, where while women only got 12 percent of Ph.D.s awarded in 1997, that was a big jump over 1987, a year in which women got a paltry 6.5 percent. And looking back to 1977, when women got just 3 percent of the engineering Ph.D.s, the overall

![Graph showing the number of doctorate recipients by sex from 1967 to 1997.](Image)

SOURCE: NSF/NIH/NEH/USED/USDA, Survey of Earned Doctorates
The really dramatic gains, however, came for minorities, and, especially, minority women. Minorities earned a record 3,840 doctorates in 1997, an 8.4 percent jump over the previous year, marking an amazing 40 percent increase over 1992. Minorities earned nine percent of all doctorates awarded in 1997. While Asian Americans made the largest gains, Hispanics, African Americans, and Native Americans enjoyed greater success as well. From 1987 to 1997, the number of Hispanics earning doctorates increased by 67 percent; the number of African Americans getting Ph.Ds jumped by 75 percent, and Native Americans experienced a 30 percent boost in Ph.Ds awarded. And from 1977 to 1997, the number of minorities getting doctorates doubled, while the total number of Whites remained stagnant.

Hispanics made tremendous gains in the 1990s. In the 1996-97 academic year, Hispanics earned almost as many doctorates as did African Americans. And figures just released for the 1997-98 academic year show that Hispanic men outpaced African American men in important to success," said Haag.

Recruitment programs and—in the case of Asian Americans and Hispanics—sheer demographics play a large part in the gains seen today. But Hill points to lessons learned by those who are trying to recruit and retain minorities in advanced degree-granting programs. For example, she said, it used to be that many research assistant positions went to foreign students who did not qualify for other types of financial aid. This gave foreign students a higher connection to their professor, the department, and the university as a whole compared to minorities whose aid came in the form of a fellow offered strictly cash. No minority fellowships often research assistant's postdoc minorities that same inside field.

In the years to come, that women and minorities turn to set records for advanced degrees. And: women and minorities that final lap toward the their influence on the acad become adjunct instruc
tenured professors. "There! impact on higher education, you see more women and in teaching positions," said offers a tangible role model.

Amalia Duarte is a relations manager at Technologies.
DiSalvo Finds Academic Success at Delaware State

Sophomore broadcast journalism major Keyla DiSalvo, 17, has taken a circuitous route to the campus of Delaware State University (DSU).

Born in Maryland, her father was a high-ranking military official in the Venezuelan army, and their family traveled extensively from Caracas to Europe and back. At 17, she dropped out of high school to accept an unpaid full-time position at a public broadcast station in Caracas, later managing a department there, overseeing a staff of seven—many of them college students.

Speaking very little English, DiSalvo moved to her brother's house in Delaware and attended a local adult high school, graduating with a 4.0 GPA. After that, she was offered a position as a motivational speaker with the Organization of Adult Alumni Students in Service.

Since then, DiSalvo entered DSU, made the dean's list twice, and became a yearbook editor-in-chief and president of the Society of Professional Journalists. "I am living my dream," she said.

Luna Appointed to Women's Commission

Texas Governor George W. Bush appointed Dr. Marlene Luna to serve on the Governor's Commission for Women. Luna is dean of health sciences at Laredo Community College in Texas.

The commission identifies, researches, and develops strategies and projects that increase awareness of key issues affecting Texas women. Luna said that Bush expressed a great interest in the commission's working as well on initiatives for the health and welfare of the people of the state. With more than 20 years of teaching and administrative experience in the field of health education, Luna hopes to utilize her skills to help the commission address these issues.

Luna, a member of the National League for Nursing Accrediting Commission, has a bachelor's degree and a master's from Texas Woman's University, and a doctorate from the University of Houston.

Rubin to Lecture on Cuban Artists

New York City-based writer/photographer Edward Rubin will be giving a free illustrated lecture, "La Vida Loca: The Life of the Artist in Cuba," at the Cooper Union for the Advancement of Science and Art's Wollman Auditorium (N.Y.) on April 10.

Using pictures and words, Rubin will offer a penetrating view of Cuban society and how it got that way, as well as an intimate look at the lives of major artists living and working in Havana today. (Pictured here: a photo taken by Rubin of Alexsis Esquivel's Absolute Cuba.)

intending to put everything he has into the lecture, Rubin hopes to play to a full house. "Not an easy thing to do in New York City, where everybody, if they are not already jaded, has far too many things to do and not enough time to do them in," said Rubin.

"The lecture will be candid, pointed, and political. As a 'performer,' I tend to do a lot of 'off the cuff' stuff. Hopefully people will tear their hair out as they run from the auditorium. I certainly don't want to bore anybody. I want to thrill while informing."

Sanchez Receives Peace Prize

The California Wellness Foundation presented Gilbert Sanchez, director of the Gang Violence Bridging Project, based at the Edmund G. "Pat" Brown Institute of Public Affairs at California State University-Los Angeles, the California Peace Prize Award. The statewide prize, carrying with it a $25,000 grant, celebrates the courage and perseverance of California's most dedicated violence-prevention advocates.

Sanchez, who initiated the project and has been its director for nearly six years, was selected for having provided guidance and resources for young people whose opportunities for success have been thwarted by violence and poverty. A former gang member, Sanchez makes frequent presentations about the causes of gang and youth violence in government and law enforcement agencies and often testifies as a gang expert in court and before legislative committees.

Aparicio Wins MLA Award

The Modern Language Association awarded Frances Aparicio of the University of Michigan-Ann Arbor the 9th annual Katherine Singer Korac Prize for her book Listening to Salsa: Gender, Latin Popular Music, and Puerto Rican Cultures (Wesleyan University Press). The award is for an outstanding scholarly book published in English in the field of Latin American and Spanish literatures and cultures.

Rebecca Hardt of Ohio State University-Columbus also won the award for her book Embodying Enlightenment: Knowing the Body in Eighteenth-Century Spanish Literature and Culture (St. Martin's Press).

Martinez Addresses Eastern New Mexico-Roswell Graduates

Adrian Martinez was the featured speaker at Eastern New Mexico University-Roswell's thirty-second commencement convocation.

Martinez is a native New Mexican, born in southern Rio Arriba County in the village of Capulin. Because the one-room schoolhouse
in Capulin accepted students only through the eighth grade, and no one ever made it that far. Beginning with the seventh grade, his father sent him to boarding school in Santa Fe, and he graduated from Menaul High School in Albuquerque. He has academic degrees from the University of New Mexico and did his education administration work at Western New Mexico University. He also studied at ESNC, the University of Arzona, San Diego State University, the Universities of Valladolid and Salamanca in Spain, the Hellenic American Union in Greece, and the University of Guadalajara in Mexico. In 1988, he retired at New Mexico Military Institute, ending a thirty-year career in education.

Cortés Jr. Speaks at St. Mary’s

Community activist Ernesto Cortés Jr. gave a Lin Great Speakers Series lecture on “Community Organizing for Justice” at St. Mary’s University in Texas. Cortés is the Southwest regional director of the Industrial Areas Foundation (IAF), a non-profit community-based organization founded in Chicago to bring change to poor and moderate-income communities.

Cortés began his IAF affiliation in 1972, and in 1974 launched the San Antonio Communities Organized for Public Service, a church-based grassroots operation. He has initiated similar groups across the nation that are part of the IAF network. IAF leaders identify issues of neighborhood importance, including equalization of funding for public schools, indigent health care, job training, and economic development.

Hernandez Joins Roster of Wildlife Experts

Bird enthusiasts and game hunters often agree that one of the most popular native birds living in South Texas is the northern bobwhite quail. In fact, this bird species is the most economically important game bird in South Texas. With such a strong recreational and economic-based species, the Caesar Kleberg Wildlife Research Institute and the animal and wildlife sciences department at Texas A&M University-Kingsville hired a quail biologist.

He is Dr. Ridel Hernandez, a recent graduate of the joint doctoral program between Texas A&M-Kingsville and Texas A&M University. Hernandez continues the four-year South Texas Quail Research Project and also teaches range land plants and wildlife habitat management.

Rangel Speaks at UT-Austin Grad School Convocation

Rep. Irma Rangel, chair of the House Committee on Higher Education, was the featured speaker at the University of Texas-Austin Graduate School Convocation. Rangel spoke on “Sharing the Wealth of an Education.”

Rangel is the first Mexican American woman elected to the Texas House of Representatives, the first Mexican American woman elected as chair of the Mexican American Legislative Caucus, and the first Mexican American appointed to serve as chair of the House Committee on Higher Education. She is also a member of the Pensions and Investment Committee and the Education Committee of the Southern Legislative Conference.

Delossantos Honored for Commitment to Mental Health, Hispanic Community

Cristiana Delossantos, a master’s degree candidate in the University of Rhode Island’s (URI’s) College of Nursing, received both the $1,000 Clare Sullivan Memorial Nurse Leadership Scholarship and the Progresso Latino’s Health Award.

The Sullivan Scholarship, awarded by the Nursing Foundation of Rhode Island, honors students pursuing psychiatric nursing. Progresso Latino honored Delossantos for her work and perseverance in promoting good health for Latinos and other immigrants.

“I want to start a Hispanic nurses association at URI,” said Delossantos. “I want to go into the high schools, get into classes, inspire students to seek nursing as a career. Delossantos has been a registered nurse since 1994.

Vera Awarded University of Minnesota Puckett-Robinson Scholarship

Eyma Vera was one of eight high-achieving students honored with University of Minnesota Puckett-Robinson Scholarships for 1999-2000. The scholarships, sponsored by former Minnesota Twins baseball great Kirby Puckett and his wife Tanya, and the Jackie Robin Foundation, go to outstanding students color who have strong academic background and are active in serving their communities.

Vera, born in Bolivia, has undergone two surgeries aimed at correcting bone damage to her legs and arms and now wants to be an orthopedic surgeon. “I am so thankful,” Eyma Vera. “My brother and I are both attending University of Minnesota, and economically hard for my parents to have two children go to college. This will help my family so much.”

Pictured: Vera. Kirby Puckett and family and other scholarship winners.

Gonzalez Receives Educational Administration Council

Maria L. Gonzalez, head of New Mexico State University’s educational management and development department in the College of Education, is the president-elect of the University Council of Educational Administration (UCEA)—a consortium of 60 research universities that have doctoral programs in educational administration: leadership. She is serving in that position one year, followed by a year as president: one as treasurer, respectively.
“UCEA is the premiere organization in the field of educational administration,” Gonzalez said. “Founded more than 40 years ago, it aims to improve the preparation of school administrators and the profession’s knowledge base.”

**Chavez-Martinez, Hernandez, and Lopez Address Five-State Multicultural Conference**

Dr. Jeannie Chavez-Martinez (pictured), Roger Hernandez, and Dr. Martha Lopez will give presentations at the ninth annual Five-State Multicultural Conference co-sponsored by Garden City Community College in Garden City, Kansas, March 30-31.

Chavez-Martinez helps lead the Multicultural Resource Center at Pittsburg State University (Kan.). Pittsburg is one of dozens of communities across the nation that has looked to Southwest Kansas for advice and insight on dealing with a growing ethnic and cultural diversity.

Hernandez, a nationally-syndicated newspaper columnist based at the New Jersey Institute of Technology, writes on topics ranging from bilingual issues to Hispanic life in the U.S.

Lopez, with the California Extension Service, discussed health issues and trends in nutrition for Latino families at the conference.

**Zermeno Named “Year 2000 Teacher of the Year” by Sacramento County**

Alicia Zermeno, 1996 master’s degree alumna of the Orientation and Mobility Specialist Training Program at California State University-Los Angeles, has received the Sacramento County Office of Education’s “Year 2000 Teacher of the Year” award.

Prepared by Cal State L.A. to teach skills in independent movement and travel to persons who are blind or visually impaired, Zermeno described her career as unique and challenging. “I am a teacher outside the classroom walls,” Zermeno said. “My classroom is on school campuses, at stores, on public transportation, and at street intersections. During a community-based lesson, I can work on at least five different daily living skills without the student even knowing it.”

Pictured l to r: Associate Professor Diane Fazzi instructs Alicia Zermeno during a training session.

**Marcano Designs Poster for National Conference**

Vanessa Marcano, 27, Nuclear Medicine Technology student at Bronx Community College (BCC) of the City University of New York (CUNY), designed a poster on Implantable Cardiac Defibrillators (ICD) for the Society of Nuclear Medicine’s national conference in Philadelphia.

The poster illustrates “the importance of uncertain types of nuclear medicine imaging to assess which patients would benefit the most from ICD.” Marcano explained that “the study will save many patients from going through the implant process if it would not help them in the long run.”

Marcano has a bachelor’s degree from CUNY-City College. She decided to enroll in BCC’s Nuclear Medicine program before applying to medical school.

**Gomez a State Executive in Texas**

Vickie Gomez, director of admissions at the University of Texas of the Permian Basin, is the new vice president of admissions for the Texas Association of Collegiate Registrars and Admissions Officers, serving a two-year term.

“It is both humbling and very gratifying to have been selected by my peers to play a leadership role in our professional association. I am especially thankful to my university for supporting my nomination and look forward to a very exciting two years,” said Gomez.

**Loyola-New Orleans Names New Alumni Association President**

The Loyola University New Orleans Alumni Association (La.) named Marla L. Donovan the 1999-2000 board president. A school spokesperson said that Donovan exemplifies those characterisits Loyola seeks to form in its graduates—embodying the Jesuit spirit to serve as “people for others” in their community.

Donovan received a bachelor’s degree from Loyola’s City College in 1988 and has been involved with the university ever since. She was a founding member of the Loyola University New Orleans City College Leadership Committee, which evolved into the City College alumni board, and served as vice president of the board. She is a member of Loyola’s Heritage Society.

**Anacani Performs at Riverside Community College**

Renowned Latin recording artist Anacani, a regular performer on Lawrence Welk’s popular TV series during its heyday, appeared at Riverside Community College (Calif.) as part of Performance Riverside’s Big Band Pops Series concert “A Taste of Latin,” which featured a 17-piece professional orchestra.

Forerunner to such tremendously successful Latin American crossover singers as Ricky Martin, Christina Aguilera, and Selena, Anacani has continued to record and tour with the elegant, high-energy style that made her famous during the 1970s.

Anacani still tours with the Lawrence Welk group and is putting together a new CD that will emphasize both Latin and English music. “I really hope that the public continues to support Latin crossover music. It brings us all closer together as a common frame of reference through music we can bridge other gaps,” she said.

HOSTS Program Thrives in El Salvador

Help One Student To Succeed (HOSTS) structured mentoring is a research-based and
nationally evaluated program for accelerating learning using one-to-one or small-group instruction in reading, writing, math, and Spanish language arts. Founded by teacher Bill Gibbons of the Vancouver, Wash., school district in 1977, the program has served hundreds of thousands of students in the United States.

In 1997, Salvadoran educator Licenciado Joaquin Garcia, working with HOSTS educators, brought the program to the Juan Bueno schools in his country. Many of the children who attend Juan Bueno schools are orphans as a result of a civil war. Many live in poverty, and about 80 percent receive partial or complete scholarships.

In its first application outside the U.S., the HOSTS program is thriving.

As HOSTS continues to succeed in El Salvador, it will continue to be embraced in all of Latin America," said HOSTS Spanish language arts manager Nancy J. Carter.

Pictured left: Garcia, Gibbons, and Carter.

New Mexico Universities Collaborate on NAFTA Studies

New Mexico State University (NMSU) and the University of New Mexico (UNM) are collaborating on research dealing with the effects of the North American Free Trade Agreement (NAFTA).

Jose Z. Garcia, director of NMSU’s Center for Latin American Studies, said that NMSU is focusing primarily on NAFTA’s impact on the U.S.-Mexico border region while UNM is looking at the broader context of the trade agreement. Results of the studies will be discussed at a conference to be scheduled in November.

The joint initiative was originally announced as the two universities celebrated the 20th anniversary of the New Mexico Consortium on Latin America, a partnership of the NMSU Center for Latin American Studies and the UNM Latin American and Iberian Institute.

Natural Toxins Research Center Proposed at Texas A&M-Kingsville

A Texas A&M University-Kingsville Natural Toxins Research Center might soon become a reality. A concept paper proposing a center, presented by Marc Cisneros, Texas A&M-Kingsville president, was acceptable to the Texas A&M University System Board of Regents; a full proposal by Dr. John C. Perez, biology professor and Natural Toxins Research Initiative director, was submitted for consideration.

Certain types of snake venom—a complex mixture of chemicals—have important medical properties. The goals of the center would be to provide reliable, single-source snake venom and venom products to biomedical researchers and to improve the biomedical research environment at Texas A&M-Kingsville.

Mayan Leader and Zapotec Cultural Agent Speak at Emory

EMORY Arcadio Salanic, from Quetzaltenango, Guatemala, and Eucario Angeles Martinez, from Oaxaca, Mexico, held a discussion, “Revitalizing Indigenous Culture, Grassroots Development, and the New Millennium: Voices from Rural Latin America,” at Emory University in Georgia. Both men explored the challenges of grassroots development in the midst of ethnic and civil strife and the effort to revitalize indigenous traditions in an increasingly global culture.

Salanic is a Quiche-speaking Mayan leader who has worked in the area of human rights and linguistic pluralism with the United Nations. Martinez is a Zapotec cultural agent with lifelong work experience at the grassroots level.

Arizona State Web Exhibit Examines Life of Mexican Americans in Arizona

A new Web exhibit prepared by a team from the Arizona State University (ASU) Department of Archives examines the history of Mexican Americans in Arizona since territorial days. "The Chicanita/Chicano Experience in Arizona" draws from materials in the department’s Chicano Research Collection and Arizona Collection.

Pictured here is a sample photo: Maria Flores, dressed in this costume, presents an image representative of the Indian, Spanish, and Mexican cultures indigenous to the southwestern region.

The exhibit contains sections on tribulations of Mexican Americans, acquainting viewers with the organiza- tion formed to preserve Mexican American culture in a Euro-American society.

With a poem by Alberto Rios, ASU professor of English and a native of Nogales, Web site has bilingual text and contains information on occupations and landmarks.

Web site address: www.asu.edu/archives/website/index.htm

University of San Francisco Hires Affordable Housing Conference Coordinator

The University of San Francisco (USF) Hispanic-Latino Association, La Compañía, sponsored the first annual California conference on affordable housing in community development. Since the 1970s, there has been a declining availability of affordable housing units.

Participants discussed family living, job creation, homelessness, education, children/youth and families, and community development. The Rev. Joe Haca assistant to the secretary of the Department of Housing and Urban Development, for increased partnership between governmental and private actors and government agencies.

Top Ethnic Studies Scholars Gather at California-Santa Barbara

UCSB Born of anger and socio- political ideologies of the late 1960s, ethnic studies programs at the University of California (UC) have reached a mature middle age.

About 10 of the university’s top ethnic studies scholars met at its Santa Barbara campus to look back at three decades of progress and to consider ways of uniting an ever more progressive future. Cliff Michel, director of UC-Santa Barbara’s...
for Black Studies, came up with the idea for the conference, "Celebrating 30 Years of Ethnic Studies Research: A Dialogue Among UC Ethnic Studies Faculty."

News from U.S. Department of Education

A major flood devastated the Rio Grande communities of Del Rio, Texas, and Acuña, Mexico, in August 1998. Although federal assistance and donations of money and supplies immediately poured into Texas to help the people of Del Rio rebuild quickly, their sister city of Acuña wasn't so lucky.

Elizabeth G. Flores (pictured), mayor of Laredo, Texas, and chair of the Border Coalition, was one of the conference leaders.

Río Bravo Association to Meet at Texas A&M-Kingsville

The Río Bravo Association will hold its annual meeting, "Camino y Ciudad: Borderlands in Transition," at Texas A&M University-Kingsville, March 30-April 1.

Río Bravo is the only organization devoted to examining educational issues promoting scholarly activities in higher education in the northeastern Mexico and Texas borderlands.

The conference—coordinated by Dr. Ward S. Albro, Texas A&M-Kingsville history professor emeritus, and María Elena Ramos Tovar, from the Universidad de Monterrey—was formed as an attempt to develop a closer connection between Texas' and northeastern Mexico's institutions of higher learning.

Dr. Rosario Torres Reyes (pictured), director of the university's Southwest Borderlands Cultural Studies and Research Center, is accepting paper and panel proposals on any topic dealing with the Texas and Mexico borderlands.

Contact: Dr. Torres Reyes, (361) 593-2569

Maes New Director of Pre-Collegiate Development Program at Colorado-Boulder

Johanna R. Maes is the new director of the Pre-Collegiate Development Program at the University of Colorado-Boulder. Housed within the Student Academic Services Center, the program is designed to motivate educationally or economically disadvantaged high school youth to complete high school, graduate, and successfully matriculate to a postsecondary institution.

Maes has broad experience as a presenter and consultant and is the recipient of many grants and awards. She is a member of several organizations, including the National Latino Children's Institute and the University of Colorado Hispanic Alumni Association. She has a bachelor's degree from Colorado-Boulder and expects to earn her master's from Regis University this year.

North Carolina Colleges and Universities Host Film Festival

Sewn North Carolina colleges and universities hosted the 13th annual Latin American Film and Video Festival, highlighting music and dance in popular films. "One Hundred Years of Latin American Film/ Cien Años de Cine Latino Americano" featured the best of Latin American films since the advent of sound pictures.

Screenings and discussions took place at Duke University, the University of North Carolina (UNC)-Chapel Hill, North Carolina Central University, North Carolina State University, Guilford College, UNC-Greensboro, and UNC-Charlotte.

Mexican film director Marcela Fernandez Voigante (pictured) introduced two films, including La Negra Angustias, a 1949 film about a female colonel in Emiliano Zapata's guerrilla forces during and after the Mexican Revolution (1911-17).

"This film offers an opportunity to better understand the many Mexicans who are coming to North Carolina by learning about their history," said Sharon Mijica (c), of UNC-Chapel Hill.

Northern Essex Receives Government Funding for Business Center

Sen. John Kerry and Rep. Marty Meehan presented Northern Essex Community College (Mass.) President David Hartleb with a check for $400,000 from the U.S. Department of Housing and Urban Development's Hispanic-Serving Institutions Assisting Communities Program for the establishment of a business assistance center.

"The Lawrence Business Assistance Center will provide information, technical assistance, education, and training to Latino business owners and entrepreneurs," said Hartleb. "The center will assist Latino microenterprises to develop, maintain, and expand their businesses and help them to market their products and services to the larger economic mainstream."

Pictured l. to r.: Kerry; Lawrence, Mass. Mayor Patricia Dowling; Meehan; and Hartleb.

Cuban Film Premieres at Lincoln Center

A new kind of Cuban cinema was born almost simultaneously with the 1959 revolution. Since then, it has been a powerful force in the collective memory of the Cuban people, providing both history and social cohesiveness. Cuban film celebrates the lives of ordinary folk, the emotional, economic, and sociopolitical reali-
ties of everyday life. Moreover, it offers surprisingly frank criticism of contemporary Cuba.

The acclaimed Cuban film If You Only Understood (Rolando Díaz, 1998, 87 min., First Run/Icarus Films) had its theatrical premiere at the Film Society of Lincoln Center (N.Y.).

A documentary "musical" about Havana, the film draws attention to the underlying conflicts in Cuban society today, including taboo subjects such as race, not usually represented in Cuban cinema.

University of Rhode Island Partners with Progreso Latino

The University of Rhode Island (URI) has formed a partnership with Rhode Island's Hispanic community. URI President Robert L. Carriker and other URI officials signed an agreement with representatives from Progreso Latino, the primary community-based organization in Rhode Island that advocates for the needs of Hispanics.

URI faculty members and psychologists Dr. Ann Varna Garis, Dr. Lawrence Grebstein, and Dr. Maria Garrido met weekly to train Progreso Latino staff to enhance the organization's mental health intervention capacity to the community.

“The multicultural exposure for our graduate students will better train them to work with Rhode Island's increasingly diverse population,” said Garis, director of the URI Psychological Consultation Center.

In the News at Pima

Pima Community College Downtown Campus (Ariz.) President Dr. Noelia Vela (pictured) was named one of Tucson's 1999 Women on the Move by the YWCA of Tucson, for professional and community service. She also received the 1999 Southern Arizona League of United Latin Americas Citizens award for community service.

Pima Community College, in partnership with Tucson Unified School District (TUSD) and Big Brothers-Big Sisters of Tucson, has reprinted the Amigo Mentoring Program. "Amigos" are TUSD personnel who each take on a one-to-one mentoring relationship with an at-risk grade-schooler. Trained as a Big Brother/Big Sister, a TUSD Amigo can help a Little Brother/Little Sister make progress in some key areas that ultimately helps him or her stay in school and thrive.

Austin Participates in Global Exchange Program

Seventeen students and three faculty members of Austin Community College (Texas) participated in a cultural exchange program with the Universidad Tecnológica de Coahuila in Saltillo, Mexico. The students brought with them various dreams of being a photographer, a historian, a writer for National Geographic, and more. All were eager to embark on an adventure and immerse themselves into a new culture.

Highlights of the trip included a visit to the archeological site Rincon Colorado, the Museum of Natural History in Monterrey, La Grulla de Garcia (Garcia’s Cave), and a performance of folkloric dances.

SBC Foundation Awards Grant to Hispanic College Fund

The SBC Foundation awarded a $50,000 grant to the Hispanic College Fund (HCF) to provide scholarships for deserving Hispanic students in Texas, Missouri, Oklahoma, Arkansas, Kansas, California, Nevada, Illinois, Indiana, Michigan, Ohio, Wisconsin, and Connecticut.

Based in San Antonio, Texas, the SBC Foundation has established a comprehensive record of providing scholarship support to HCF. The latest grant is its sixth to HCF since 1994. In 1999, the foundation won the HCF Corporate Partnership of the Year Award.

SBC Foundation President Gloria Delgado is pictured here accepting the award.

University of Miami Honors Amos

The University of Miami (UM) in Florida bestowed a Presidential Order of Merit award on prominent Cuban American philanthropist Erica Diaz-Verson Amos (pictured r.).

A member of the UM International Advisory Board since 1998 and co-chair of the Amigos, a support group benefit university's Cuban Heritage Collection has been instrumental in directing fundraising efforts for the collection and other study programs at the university.

"It is my great pleasure to honor Amos for her dedication to UM," s President Edward T. Foote II (picture) "Her commitment to the university has made it possible for me to become an international excellence in the area of Cuban studies.

Austin's Sembradores Gala He Underprivileged College Students

Club Sembradores de Am group dedicated to helping college students, sixth annual black tie Valentine's Day. Money was raised for scholarships at the University of Texas-Concordia University-Austin, Huston-T College, and St. Edward's University.

Preference for the scholarships with Central Texas students who are among generation of their family to attend college who qualify as being financially and educationally disadvantaged," said Dr. F. Miranda, president of the Austin, Texas, of Sembradores de Amistad. The name international nonprofit organization, with its headquarters in Monterrey, N.L., means "Sowers of Friendship" in Spanish.

Something to Declare

by Julia Alvarez

The 24 personal essays that make up this book are like snapshots rendered in prose, capturing the life and mind of an artist as she meditates on the dual themes of coming to America and becoming a writer. Julia Alvarez relates her inspirations and motivations, the secrets of her craft, and the de
dness and the repercussions of becoming an author.
paper. Plume. (800) 788-6262.

¡Yo!
(Spanish)
by Julia Alvarez

¡Yo! sigue las aventuras de Yolanda, quien se ha convertido en escritora. ¡Yo! es una completa y verdadera exploración del alma de una mujer, una meditación sobre la vida de una escritora, y una narración lírica de la búsqueda de identidad y lugar en el mundo del inmigrante.

paper. Plume. (800) 788-6262.

Tan lejos de Dios
(Spanish)
by Ana Castillo

_Tan lejos de Dios_ es un pueblito tranquilo en el centro de Nuevo México. En manos de Ana Castillo, sin embargo, _Tan lejos de Dios_ se despide como un sitio lleno de vida y de toda clase de choques: el pasado se enfrenta al presente, lo real con lo sobrenatural, lo cómico con lo horrible, el mundo indígena con el mundo latino y anglo, y las mujeres con los hombres. _Tan lejos de Dios_ cuenta la historia de dos décadas llenas de acción en la vida de una familia chicana.

paper. Plume. (800) 788-6262.

Women Authors of Modern Hispanic South America: A Bibliography of Literary Criticism and Interpretation

by Sandra Messinger
Cypress, David R. Kohut, and Rachelle Moore

This book lists references to critical and interpretive studies of the literary output of 169 major and minor Hispanic South American women writers active from the turn of the 20th century to 1989.

cloth. Scarecrow Press. (800) 462-6420.

Index Guide to College Journals
by Suzanne Milion and Elizabeth Malia

This book is an efficient reference source indexing approximately 16,000 journal titles represented in 48 core indexes used in college and public libraries. Emphasis is on English-language sources.

1999. 672 pgs. ISBN 0-8108-3569-X. $65.00
cloth. Scarecrow Press. (800) 462-6420.

Annick Sanjurjo, ed.

This publication recognizes the work of the well-known critic and Latin American art expert, the late José Gómez-Sicre, who from the 1940s until 1983 provided continuity in the temporary exhibitions program with a fervent and unmitigated faith in the art of his continent. A rich and unique reference source, it documents the history of the birth of Latin American modern art, and gives evidence of its worth and strength.

cloth. Scarecrow Press. (800) 462-6420.

Twenty-First-Century Poetry from Spanish America: An Index to Spanish Language and Bilingual Anthologies

by Iliana L. Sonntag Blay

This book provides access to 12,000 poems from 72 separate anthologies in three distinct indexes, making access to the verse writing of Spanish American writers easy.

cloth. Scarecrow Press. (800) 462-6420.

Behind the Mask: Destruction and Creativity in Women's Aggression
by Dana Crowley Jack

This book explores the origins, meaning, and forms of women's experience of their own aggression. Drawing from in-depth interviews with 60 women of different ages and ethnic and class backgrounds, Dana Jack—who teaches at Fairhaven, an interdisciplinary college of Western Washington University—provides a rich account of how women explain (or explain away) their own feelings and acts of rage and violence. She shows the positive sides of women's aggression, and the potential for destructive aggression to be transformed.

cloth. Harvard University Press. (800) 448-2242.

Crossing Borders
by Rigoberta Menchú

In this, the second installment of her autobiography, the celebrated Guatemalan Indian leader and Nobel Peace Prize winner picks up the story where her first volume, _I, Rigoberta Menchú_, ended. This book chronicles her role as roving ambassador for indigenous peoples and her...
return to the traditions of her Mayan background. Translated and edited by Ann Wright.

**Luddens’ Adult Guide to Colleges and Universities: A Directory of Thousands of Adult-Friendly Degree Programs**

by LaVerne L. Ludden and Marsha J. Ludden

This book emphasizes programs designed for working adults with information on nontraditional degrees, evening hours and other flexible schedules, credit for life experience, video learning, special services for adult students, and more.

**The Immortal Rooster and Other Stories**

by Diane de Anda

This book contains five tales about boys and girls facing the worries and joys of growing up and dealing with the new and unknown: the strange world of wild creatures, and the even stranger world of adults. Author Diane de Anda is a professor in the department of social welfare at the University of California-Los Angeles.

**The Love You Promised Me: A Novel**

by Silvia Molina

A modern professional woman in her forties, after a brief but intense extramarital affair, looks into her own and her family’s past to come to terms with her present, to deal with loss, to learn forgiveness and self-forgiveness, and to enter the future with grace and stability. Set in Mexico in 1994. The winner of the sixth annual Sor Juana Inés de la Cruz Prize at the Guadalajara International Book Fair for a work of fiction by a woman writer in the Spanish language. Translation by David Unger.

Many publications featured in this section are available through amazon.com.

**VIDEOS**

The following video recordings are available from:

**FILMS FOR THE HUMANITIES & SCIENCES**

PO Box 2053
Princeton, NJ 08543-2053
(800) 257-5126

**Spain: The Birthplace of a Language**

This program traces the linguistic foundation of the Spanish language and the historical influences that have shaped modern Spanish in general and the Castilian culture in particular: the Roman Empire, Catholicism, and Islam. Grammatical constructs, gender, and articles are also discussed.

(Spanish, 28 min. color) Item #FFH 9114

**The New Spain**

This program explores the cultural conquest of Mesoamerica through language, religion, and technology such as the printing press—and the influences that the native cultures exerted to give birth to the Spanish of Latin America.

(Spanish, 28 min. color) Item #FFH 9115

**The Forging of the New World**

As Mexico was born through the fusion of two traditions, a unique culture emerged—one that embraced liberal philosophies, such as those promulgated by Rousseau and Voltaire. During this period, Mexico gave birth to such great philosophers as Sor Juana Inés de la Cruz. Despite the efforts of the Catholic Church to suppress new traditions, this program explores the clash between the emerging culture of the New World and the conquerors from the Old World who imported the Inquisition.

(Spanish, 25 min., color) Item #F

**Teatro Español del Siglo de C**

Dramatic writing reached unequalled heights during the golden age (1500-1700), the crowning glory of Spain’s intellectual and artistic achievements. This program traces its development and provides unprec-
sent. Bibliographic information, in a number of languages, covers a wide range of subject areas, including literary theory, popular literature, and Hispanism.

(Spanish interface)

**Directorio de Bibliotecas Españolas**

Providing access to records from more than 9,000 Spanish libraries, this program is a vital first-stop reference resource for use in research, marketing, and promotion in the Spanish library market. It enables users to search detailed information on every Spanish library: full name, address (city, province, etc.), number and type of holdings; and specialty.

(Spanish interface)

**Bibliotecas sin Fronteras: Catálogo Colectivo de Fondos Iberoamericanos en Bibliotecas Españolas**

This publication contains three databases: a catalog of holdings on Latin America in important libraries in Spain; more than 10,000 records of articles on Latin America in scholarly Spanish journals; and records of doctoral theses on Latin America presented in European universities. The program provides a completely new reference work for researching any aspect of Latin American history and culture.

## CONFERENCES

**Technology in Education Hands-on Conference**  
March 6-9

“TechEd2000,” an international conference and exposition relating to teaching and learning in a network world. At the Palm Springs Convention Center, Palm Springs, Calif.

**New Jersey Project ALANA Conference 2000**  
March 10

The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching’s ALANA network of African, Latina, Asian, and Native American women in higher education in New Jersey holds its annual conference, this year on the theme “Personal Journeys/Common Destinations.” Keynote speaker is Emma Pérez, William Paterson University (N.J.) Distinguished Visiting Scholar, speaking on “Who Speaks for Women of Color?” At the Douglass College Student Center, Rutgers University, New Brunswick, N.J.

Contact: (973) 720-2296; e-mail, njp@wpunj.edu.

(See related story, pages 13-15)

**TESOL Convention and Exposition**  
March 14-18

Teachers of English to Speakers of Other Languages holds its 34th annual convention and exposition. In Toronto, Canada.

Contact: (703) 836-0771.

**ACE 82nd Annual Meeting**  
March 18-21

Contact: ACE, (202) 939-9410; Web site. www.acenet.edu

**2000 5-State Multicultural Conference**  
March 30-31

The 9th annual conference sponsored by Garden City Community College (Kan.). Keynote speakers include Jeannie Chavez-Martinez, Pittsburg State University (Kan.), and Roger Hernandez, nationally syndicated columnist.

Contact: Carole Huxman at GCCC Trio Programs. (316) 276-9538; Web site. gccc.cc.ks.us.

(See related story, pages 35)

**NAHP Convention 2000**  
March 29-April 1

The National Association of Hispanic Publications presents “the Hispanic print event of the new millennium.” At the Monte Carlo Resort & Casino, Las Vegas, Nevada.

Contact: Andres Tobar, Executive Director/CSO, (202) 662-7250.

**AAHE 2000 National Conference**  
March 29-April 2

The American Association for Higher Education’s 2000 national conference has as its theme “To Form a More Perfect Union: Diversity and Learning.” In Anaheim, Calif.

Contact: Kerry Newberry, conferences and meetings assistant, (202) 393-6440; Web site. www.aahe.org.

(See related story, pages 21-24)

**NCA-CIHE 105th Annual Meeting**  
April 1-4

The North Central Association of Colleges and Schools’ Commission on Institutions of Higher Education presents “The Quest for Quality: Mission, the Commission, and a New Century.” In Chicago, at the Hyatt Regency Chicago.

**New Jersey Project Spring 2000 Conference**  
April 7

The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching’s spring conference focuses on “Global Translations: Thinking, Writing, and Teaching across Borders” and features, among others, Ruth Behar, Cuban-born anthropologist at the University of Michigan. At New Jersey City University, Jersey City, N.J.

Contact: (973) 720-2296; e-mail, njp@wpunj.edu.

**AACCC 80th Annual Convention**  
April 8-11

The American Association of Community Colleges presents its annual convention, this year on the theme “A World of Possibilities.” and an academic marketplace at the Hilton Washington in Washington, D.C.

Contact: Web site. www.aacc.nche.edu
Teaching, Learning, and Technology Conference
April 12-15

Florida Community College-Jacksonville, among others, is sponsoring "Teaching, Learning, and Technology: Challenges for Creating Sustainable Change in the New Millennium." At the Radisson Riverwalk Hotel, Jacksonville, Fl.

Contact: Jack Chambers, (904) 632-3231, or Jeana Davis, (904) 692-3088.

The Latino Book Summit
April 15-16

This book summit celebrates books, careers, culture, education, health, and more. In San Diego, Calif.

Contact: (323) 255-9206.

UCEA 85th Annual Conference
April 16-18

University Continuing Education Association presents its 85th annual conference, "Riding the Waves: Strategies for the New Futures of Higher Education," dealing with trends in markets and futures, in leadership and management, and in learning and instructional technologies. Includes a special seminar on Continuing Education Trends in Latin America and Puerto Rico (in Spanish). In San Diego, Calif.

Contact: UCEA, (202) 659-3150; e-mail postmaster@nucea.edu. Web site: www.nucea.edu.

3rd Annual Conference on Diversity in Teaching and Learning in American Higher Education
April 19-22

"Text and Context: The Structures of Learning" includes among the keynotes José Cuellar, chair, La Raza Studies, California State University-San Francisco. At The Westin St. Francis Hotel in San Francisco.

Contact: (408) 864-8309/8393; Web site: www.TeachLearn.lhsda.edu.

American Educational Research Association Annual Meeting
April 24-28

7th Annual IDRA Early Childhood Educators Institute™
April 25-27

This year’s Intercultural Development Research Association La Semana del Niño institute is on the theme, “Educating the Next Generation.” Speakers include Regina Benjamín, Gloria Rodriguez, founder of AVANCE; Bertha Perez, UTSA-Downtown; and Diane Gonzales Bertrand, internationally known author of children’s literature. On two mornings, participants will visit schools that showcase innovative programs for diverse learners.

Contact: Carol Chavez at IDRA, (210) 444-1710; Web site: www.idra.org.

Illinois TESOL- BE 2000 Annual Convention
April 28-29

Illinois Teachers of English to Speakers of Other Languages/Bilingual Education presents its 26th annual convention, "Options and Opportunities." At Navy Pier in Chicago, Ill.

Contact: e-mail, enulm@harper.cc.il.us or G.porter@irc.deplaines.org.

NCORE 2000
June 1-5

16th Annual National Conference on Race & Ethnicity in American Higher Education. Sponsored by The Southwest Center for Human Relations Studies, Public and Community Services Division, College of Continuing Education, The University of Oklahoma. Among the keynotes is Edward James Olmos, in Santa Fe, N.M.

Contact: Web site: www.occe.ou.edu/NCORE.

AAHE Assessment Conference
June 14-18

The American Association for Higher Education’s 16th annual conference on assessment asks, "Rising Expectations: Is Assessment Delivering?" In Charlotte, N.C.

Contact: (202) 293-6440; Web site: www.aahe.org.

Latin American Educational Foundation Golf Tournament
June 21

The Latin American Educational Foundation hosts its annual Golf Tournament in Sedalia, Colorado.

Contact: (303) 446-0541

HACU 16th Annual Conference
November 4-7

This year’s theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, New Mexico.

Book Review

By Maria J. Estrada

Julio Marzan has compiled a volume of innovative pedagogical essays primarily for teachers of bilingual/bicultural Latino students. However, as Marzan states in his preface, "the intention is to introduce all students to models that they can emulate in their own imaginative writing."

The twenty-one essays include teaching techniques from grade school through college. Still, all of the essays have valuable information for any teacher needing to expose students to Spanish or bilingual writers. Through the emulation of established writers such as Whitman and García Lorca, for example, Julio Alvarez in "Missing Zebras" shows how to teach grade school students to write beautiful poetry. Alvarez also shows the value of intermixing cultural experiences in teaching students to write about their experiences in Puerto Rico and the exciting/new experiences about living in America.

In "Ode to Pablo Neruda," Martín Espada writes on using Neruda's odes as inspirational models for students.

Similarly, Federico García Lorca becomes the central inspiring fulcrum for Kenneth Koch's "Writing Poems Inspired by Lorca." Koch's emphasis is on color imagery and on having students, both Spanish- and non-Spanish-speaking, cooperate with each other in their translations.

David Mills, in "Ritmo y Vida: Rhythm and Life," uses Lorca's use of poetic devices, rhythm, and life associations to inspire students. Mills also talks about language issues with his students and the implications of translating Spanish into English.

In "Dia del Dulce/Sweet Day," using Paz, Pacheco, Gutierrez, Dertoro, and Blanco, Naomi Shihab Nye's pedagogical strategy is to have students explore their imagination as these established poets do in their writing.

But not all of the essays deal with traditional poetry or award-winning writers. "Inspiring Young Writers with Chicano Pinto Poetry," by Mary Sue Galindo, focuses on various prison poems' use of "sínto (pronto for prison), folk sayings (debo) and profanity" to inspire Texas teenagers.

"The Flowered Song: Learning from Aztec and Mexican Poetry" focuses on pre-colonial (Aztec) "Flor y Canto" or flower and song poetry for California elementary school children.

John Oliver Simon uses corridos and mariachi music to show rhythm in poetry.

Students are also taught to use creativity in shaping the structure of their poems in "Reading and Seeing: Teaching Bilingual Calligrams" by Mark Statman.

The book therefore offers a wide range of pedagogical techniques that focus on diverse teaching and poetic styles. The book also contains a useful bibliography of books and other sources for instructors wishing to add to their library and numerous pieces of student writing that testify to the success of the teaching strategies. These writing samples are probably one of the highlights of the book, as they show not only successful poems but exemplary composition samples. The book is also highly accomplished in its translations of Mexican poetry. There is a sense of history in the book that traces Mexican poetry all the way back to Aztec poetry, and the book captures the multiplicity of the Mexican American identity, a feat that is difficult in many cases.

However, the book falls short in its representation of authors. There are plenty of women authors not mentioned who work with Latina/o poetic forms and publish pedagogical essays, such as Pat Mora. Most of the emphasis is on established male authors such as Lorca and Neruda. Only two essays focused on women writers: "Waiting, Listening, and Wondering: Using Three Poems by Mayra Jiménez, Homero Aridjis, and Ernesto Cardenal" by Mark Statman and "Writing Vignettes with Sandra Cisneros's House on Mango Street" by Suzann Steele Saltzman.

In short, the book sets a patriarchal tone and offers an uneven representation of Latin and Latin American poets and writers, many of whom are women.

Although post-colonial issues and reader response theories are implemented in many of the essays, the writers do not set their teaching strategies within any given theoretical framework. For the instructor seeking theoretical approaches to teaching, this omission might be unappealing.

Overall, though, the book is an excellent resource, especially for the beginning teacher in need of strategies to involve bilingual or Spanish-speaking students in writing. The pedagogical strategies can also be applied to mainstream students as Marzan has done an exemplary job of outlining ways to include mainstream students and of translating the poems in the book from Spanish into English in order to make the lessons more inclusive. For the experienced instructor working with multicultural texts, there are several alternatives offered at the end of the book and some refreshing ideas on how to approach Spanish and/or bilingual literature.

True to Marzan teaching objective, the book offers strategies for a wide range of people to learn from.

Maria Jesús "Jesse" Estrada is a research assistant in the English department at Washington State University.

If interested in submitting a book review, please e-mail us at outlookq@aol.com for Book Reviewers' Guidelines.
Qualified undergraduates can train and be mentored at the cutting edge of biomedical research while receiving scholarship support.

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified individuals who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks (with salary/benefits) at NIH employees in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

INTERESTED STUDENTS SHOULD APPLY IF THEY:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

FOR MORE INFORMATION, CONTACT THE UGSP AT:
- E-mail: ugsp@nih.gov
- Phone: 1-800-528-7689
- TTY: 1-888-152-3001

This is a special opportunity for special students.

NIH is dedicated to building a diverse community in its training and employment programs.

St. Lawrence University invites applications for the Jeffrey Campbell Graduate Fellows Program. Named for the university's first African-American graduate—Jeffrey Campbell class of 1933—the Fellows Program seeks to attract outstanding beginning scholar-citizens to teach while working on their dissertations or terminal degree projects. Candidates must have completed coursework toward the Ph.D. or M.F.A. and must be members of underrepresented groups at St. Lawrence University and in American higher education, especially ethnic and racial minorities. Fellows receive a stipend of $25,000 the year, the possibility of additional funds for travel to conferences and professional meetings, and office space with computer. The institution expects Fellows to participate in the academic year, to teach one course each semester in a departmental program, to contribute to their research interests, and to present a research-based paper in the Fellows Lecture Series each semester as well.

Address applications and requests for information to: Peter J. Bailey, Direct Jeffrey Campbell Graduate Fellows Program, St. Lawrence University, Canton, New York, 13617. Review of applications will begin on May 15, 2000. Fellows will be selected and notified, when possible, by April 30.

St. Lawrence University is an independent, private, non-denominational university firmly committed to undergraduate liberal arts education and cross-cultural opportunities. Located half-way between the high peaks of the Adirondack Mountains and the national capital of Canada in Ottawa, the University provides unparalleled access to outdoor recreation and international social and cultural opportunities. University offers a unique learning environment with 160 faculty providing 33 majors, 32 minors, and 11 interdisciplinary programs, including a nationally recognized 1 Year Program. http://www.stlawu.edu.

SLU is an AA/EEO employer. Women, minorities, veterans, and persons with disabilities are encouraged to apply.
Saint Mary’s College
The Nation’s Premier Catholic Women’s College

- Making a difference by preparing women for roles of leadership and action in the worlds of work, church and community.
- Academic Emphases: Four-year liberal arts-based programs in humanities, natural and social sciences, fine and performing arts, professional and preprofessional majors. Excellent preparation for graduate and professional programs.
- The Financial Aid Office works closely with students and parents to help them develop ways to afford a Saint Mary’s education through a variety of financial aid options.
- The Office of Multicultural Affairs is committed to increasing multicultural awareness and encouraging meaningful interactions between people from different cultures.

UNIVERSITY of DENVER
DEPARTMENT of PSYCHOLOGY

The University of Denver Department of Psychology is searching for an exceptional, qualified researcher and teacher who has established a program of research and developmental processes. We hope to fill this position in either September 2000 or September 2001, and the position will remain open until if filled. Level is open, but our preference is to hire at least at the advanced assistant level. Applicants with developmental interests in an area of psychology will be considered. Send letter of interest, vita, at least three letters of recommendation (or the names and addresses of three referees who will not be contacted without your permission) and reprints/preprints to:

Developmental Search Committee
Department of Psychology
University of Denver
Denver CO 80208

The University of Denver is committed to enhancing the diversity of its faculty and staff and encourages applications particularly from women, minorities, veterans,
Assistant/Associate Professor
Special Education

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York Metropolitan area, and is one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250.

One position exists involving teaching undergraduate and graduate courses related to high incidence and multiple disabilities, advisement, supervision, and research.

Eligibility Requirements: Earned doctorate in an appropriate discipline, professional experience with school age children or youth with disabilities and evidence of potential for significant scholarly accomplishment. Preference will be given to candidates with experience in university teaching, proposal writing, and school based research. Applicants must be committed to a collaborative, unified approach to teacher preparation and an inclusive model of service delivery.

Applicants should send a letter of application, resume and the names, addresses and telephone numbers of three (3) references to:

Yiping Wan, Ph.D., Dean
College of Education
New Jersey City University
2039 Kennedy Boulevard
Jersey City, NJ 07305

Closing Date for Applications: March 21, 2000
DEPARTMENT OF FRESHMAN ENGINEERING

The Schools of Engineering at Purdue University invite nominations and applications for the position of Head, Department of Freshman Engineering. The successful candidate should be eligible for appointment as a full professor with immediate tenure based on a distinguished record in engineering education, research and service.

The candidate should be responsive to the needs and development of the faculty and staff; possess outstanding leadership qualities, communication skills, and administrative abilities; and support the following objectives of the Freshman Engineering Department:

- Identify future directions of the program and seek means for successful implementation.
- Provide high quality and innovative introductory engineering instruction, academic advising, and career development.
- Effectively recruit and retain talented engineering students.
- Motivate and prepare students to either enter the various professional Schools of Engineering or identify appropriate careers and educational programs.
- Support quality opportunities for women, underrepresented minorities, and students with special needs and abilities.
- Conduct research in engineering education.

Purdue is located between Indianapolis and Chicago in West Lafayette, Indiana. It is one of the nation’s leading land grant universities with a full range of academic majors and over 37,000 students. The Department of Freshman Engineering has a staff of approximately twenty, including seven faculty members and four academic advisors, with 1,700 entering students per year.

Applications will be considered until the position is filled; screening will begin immediately. A letter expressing interest in the position, a curriculum vita, and names and addresses of at least three references should be sent to:

Professor James W. Barnum, Chair
Freshman Engineering Department Head
Search Committee
School of Industrial Engineering
Purdue University
1287 Grissom Hall
West Lafayette, IN 47907-1287

Purdue University is an equal opportunity employer, and applications from women and underrepresented minorities are particularly encouraged.

Barry University – Your Choice for All the Right Reasons!

UNIVERSITY OF NEW HAMPSHIRE

DEAN

School of Health and Human Services

The University of New Hampshire invites nominations and letters of application for the position of Dean of the School of Health and Human Services. The School offers undergraduate instruction leading to baccalaureate degrees in Communication Disorders, Family Studies, Health Management and Policy, Kinesiology, Medical Laboratory Science, Nursing, Occupational Therapy, and Radiologic Technology and in Social Work. Graduate degrees are offered in Communication Disorders, Family Studies, Health Management and Policy, Kinesiology, Nursing, and Occupational Therapy. Each program enables students to acquire the basic knowledge and skills needed to practice their chosen professions and to obtain a broad cultural background in the humanities and social sciences.

The Dean: The successful candidate will have demonstrated record of administrative experience, including personnel and program management, program evaluation, program development, budget development and management, as well as a significant record of accomplishment in teaching and research. The Dean is expected to: act as an advocate for the College's programs; consult with faculty, facilitate undergraduate and graduate education, research and outreach; have successful record in building external relationships and in fundraising; and promote faculty development in teaching and scholarship, and advance the College's affirmative action goals. The candidate's qualifications must include an earned doctorate and a record of teaching and scholarship appropriate to an appointment as a tenured professor in one of the College's departments. Above all, the Dean must possess the leadership skills to work effectively with faculty, students, and administrators within the University as well as with diverse constituencies outside the University.

Applications: Nominations and letters of application should include name, address, phone and e-mail address of five references and should be submitted to:

SHHS Dean Search Committee
Office of the Provost and VP for Academic Affairs
Thompson Hall 207
University of New Hampshire
Durham, NH 03824

The Committee will begin reviewing applications immediately and will continue until the position is filled. Date of appointment will be no later than July 1, 2000.

UNH is strongly committed to achieving excellence through diversity. The University actively encourages applications and nominations of women, persons of color, people with disabilities and members of other underrepresented groups.

Chairperson, Department of Computer Science

The Department of Computer Science at Wayne State University invites applications and nominations for the position of department chair. The Department of Computer Science is one of nine departments in the College of Science, and currently has 13 faculty members, approximately 350 graduate students, and 300 undergraduate majors. The department offers B.S., M.S. and Ph.D. degrees. Federal agencies as well as industries support a variety of research programs within the department.

Wayne State University, located in Detroit's cultural center, is a national comprehensive research university (Carnegie I) serving 32,000 students. The university has made a strong commitment to information technology and academic computing.

The chair will provide leadership in building and enhancing the department's research and teaching programs and play a leading role in campuswide initiatives in information technology. Candidates should have a strong research record and leadership skills. A Ph.D. in computer science or a closely related field is required. Women and minorities are particularly encouraged to apply.

Persons wishing to be considered for the position should include a curriculum vitae and the names of at least three professional references.

Please send all inquiries and application materials to:

Professor Bill Hase - Chair, Selection Advisory Committee
Office of the Dean
College of Science
2155 Old Main
Wayne State University
Detroit, Michigan 48202

Wayne State University is an equal opportunity affirmative action employer.

Chairperson, Department of Education

Elmhurst College seeks a Chairperson for its Department of Education. This is a tenure-track, academic year appointment (stipend available for summer responsibilities) with academic rank of Professor of Education, to begin August 1, 2000.

We seek a chairperson who will: administer a dynamic department of 8 full-time students who are enrolled in four undergraduate programs and one masters degree program; provide leadership in the area of program and curriculum development on both the undergraduate and graduate levels; prepare the department and the College for state and national accreditation (next visit is in Spring 2004); perform service at the department, College, local, state, and national levels; coordinate and work with other departments and College offices; mentor and assess department personnel; teach one course per semester; advise undergraduates beginning in the second year of the position and staff departmental courses and develop and implement the department budget.

Qualifications: Earned doctorate degree; at least 3 years of teaching experience as a certified teacher in K-12 settings; evidence of effective college teaching, experience in working with the NCATE accreditation process, a demonstrated record of scholarship; a record of demonstrated achievements in working with various educational constituencies; evidence of leadership and/or administrative experience; interest and experience in teaching diverse population and interest in pursuing the integration of technology with teaching and learning. We seek candidates with demonstrated ability to contribute to a multicultural campus community.

Salary and benefits commensurate with Chicago-area private schools and universities.

Elmhurst College is a private, church-related liberal arts college located 16 miles west of Chicago, Illinois. It offers programs at both the undergraduate and graduate levels. Its programs are accredited by NCATE, the North Central Accreditation Association, and the Illinois State Board of Education. The College's day and evening enrollments total approximately 2,600 students. Candidates should send letter of application indicating areas of interest, curriculum vita, 3 recent letters of recommendations with at least one indicating evidence of effective teaching and administrative skill, and at least one example of academic writing to Dr. Debra Moyer, Chair, Search Committee, Department of Education, Elmhurst College, 190 Prospect Ave., Elmhurst, IL 60126 by March 15, 2000.
ASSOCIATE VICE PRESIDENT
ACADEMIC OUTREACH AND SUPPORT

The Associate Vice President for Academic Outreach and Support is responsible for the coordination of academic support and promoting the integration of academic programs to all campuses. The Associate Vice President will assist the Vice President for Academic Affairs to ensure that the goals and objectives of all division representation are college-wide initiatives, and that there is a continuity of effort in academic support. The Associate Vice President represents the college in regional, educational, and professional networking activities. The Associate Vice President is responsible for providing academic leadership and strategic planning to the Academic Support Center and ensuring that the university's mission is achieved.

VICE PRESIDENT FOR INSTITUTIONAL EFFECTIVENESS

The Vice President for Institutional Effectiveness will report to the President of the College. The Vice President will serve as the chief administrative officer for the university and will be responsible for all aspects of academic, student support, and institutional effectiveness. The Vice President will be responsible for the development and implementation of strategic plans and initiatives that support the university's mission and goals.

EXECUTIVE ASSISTANT TO THE PRESIDENT

The Executive Assistant to the President will serve as a member of the President's Cabinet and will serve in the capacity of the President's personal assistant. The Executive Assistant will be responsible for coordinating all aspects of the President's schedule, including travel arrangements and correspondence. The Executive Assistant will also be responsible for managing the President's office and ensuring that all tasks are completed in a timely manner.

MCC Manchester Community College
MARY WASHINGTON COLLEGE

Director of Student Activities

Mary Washington College seeks applications for the position of Director of Student Activities. Mary Washington College is a coeducational, selective, public liberal arts college with approximately 3,800 full-time students. The Student Activities Office, as part of the Student Life area of the Division of Student Affairs, supports the College’s mission by fostering a diverse and student-oriented environment for learning, leadership, community-building, and creative expression beyond the classroom. The Director of Student Activities will have the primary responsibility for the day-to-day operations of Student Activities, including: advising, coordinating, promoting, and operating campus social, cultural, and educational activities. The Director is responsible for providing direction, leadership, and assistance to all aspects of campus programming. Duties include coordination of office activities, professional and support staff supervision, organizational advising, supervision of campus events, and outcomes assessments. The Director should be innovative, collegial, student-oriented, motivated, creative, and able to communicate well with students, faculty, staff, and members of the community. The Director shall act as a consultant to the Dean of Student Life and the Vice President for Student Affairs on all issues regarding student activities, student leadership development and event programming. Evenings and weekends are routinely part of this position.

A master’s degree in student affairs/higher education administration or related field, substantial experience in student organizational advising, progressively increasing experience in the student life area, and the ability to provide leadership, direction, planning and assessment at the divisional level required. Demonstrated experience advising/planning events and programs on a college level, including familiarity with entertainment or performance contracting required. Demonstrated experience working with diverse populations of students, staff, and faculty required. Experience with living-learning environments, in personnel and budget management required.

The start date for the Director of Student Activities position is June 25, 2000. Applications for this position should include a resume, a cover letter, copies of transcripts, and a statement regarding your philosophy of promoting student development through programming and leadership education. Candidates should also submit the names and phone numbers of three references to: Office of Human Resources, Box 615/DSA, Mary Washington College, 1301 College Avenue, Fredericksburg, VA 22401-5358. Deadline for receipt of applications is March 17, 2000 by 5 p.m. Postmarks will not be honored. Mary Washington College is deeply committed to affirmative action and encourages minorities and women to apply.

AAHE: American Association for Higher Education

Washington, DC
President

The Board of Directors of the American Association for Higher Education (AAHE), through its designated Search Committee, seeks nominations and expressions of interest for the position of President.

AAHE seeks an individual who has demonstrated the vision and courage to address critical and often groundbreaking issues in higher education. The President must be an individual with the values, capacities, and interpersonal skills to work with a heterogeneous membership of diverse backgrounds from all positions and sectors and to lead and inspire a 25-person staff. The President must provide the intellectual leadership and possess the administrative and fund-raising expertise to support and strengthen the organization.

AAHE is an individual membership organization of 9,200 faculty members, administrators, students, trustees, and others, that is committed to being the early champion of new concepts and breakthrough ideas dedicated to enhancing the effectiveness of American higher education. AAHE strives to set a national agenda for emerging issues in higher education, with a particular focus on improving undergraduate education. In April, 1999, the Board of Directors adopted the "AAHE Statement on Diversity" and has taken an active role in promoting issues related to diversity within all institutions of higher education. Other current initiatives focus on improvements in teaching and learning, faculty roles and rewards, quality and technology initiatives, student outcomes assessments, and service learning.

AAHE sponsors an annual conference and several special focus conferences, as well as an extensive set of publications, including Change magazine. In addition, the Association has a number of voluntary communities and caucuses that contribute to the life of the organization. The annual operating budget of approximately $4 million is generated from grants, dues, registration fees, publications and investments.

The search will continue until the position is filled, with an expected appointment date of July 2001. Letters of nomination or application, including curriculum vitae, may be submitted, in confidence, to:

President
American Association for Higher Education
e/o EDUCATIONAL NETWORK/KITZKIEFFER
98 Old South Road, Niantucket, MA 02554-6000

Educational Management Network's division of Kitzkieffer is supporting AAHE with this search. Requests for a copy of the Position Specification or questions may be directed to Lucie Leake or Nancy Martin via e-mail at ahe@emn.com. Additional information about AAHE is available at the organization's Web site: http://www.aahe.org

AAHE is an equal opportunity, affirmative action employer and actively solicits applications by and nominations of women and minority candidates.

NEW YORK CITY TECHNICAL COLLEGE

DEAN OF THE SCHOOL OF ARTS AND SCIENCE
DEAN OF THE SCHOOL OF PROFESSIONAL STUDIES
DEAN OF THE SCHOOL OF TECHNOLOGY AND DESIGN

New York City Technical College is the designated college of technology of The City University of New York, currently offering both baccalaureate and associate degrees, as well as specialized certificates. The college, located in downtown Brooklyn adjacent to the MetroTech Complex and succeeding complex, enrolls 11,000+ students in the technologies of: arts, business, communications, health and engineering; human services and law-related professions; technical and occupational education; and liberal arts and science and is approximately 275 full-time faculty.

The deans will report directly to the provost/vice-president academic affairs and will provide academic leadership to the school including curriculum and instructional design; annual and long-term academic and fiscal planning; personnel evaluation; enrollment and retention initiatives, and developing a teaching/learning environment.

The successful candidates will have a demonstrated record of commitment to providing for student success with a diverse student population and the ability to manage and direct institutional change. A doctorate in a relevant discipline or its equivalent and a minimum of 8 years of experience in administrative positions in a college or university setting is required, preferably in an urban institution. Resumes to: Michele Schain, Human Resources, New York City Technical College, 300 Street, N.Y.M.C. 11201. www.nycitytech.cuny.edu

---

The University of Colorado is committed to diversity and equality on its campuses and in its employment practices.

The Board of Regents invites nominations and applications of candidates for the position of President, University of Colorado System. The President is the chief executive officer of the University of Colorado System. The President reports to the Board of Regents, the nine-member publicly elected governing Board.

The University of Colorado is a four-campus system with three general campuses in Boulder, Colorado Springs, and Denver, and a Health Sciences Center in Denver. The President's office is located on the Boulder campus. The student body includes over 44,700 students, almost a third of whom are graduate students. The University has a full-time faculty of 3,109 persons. The 1999-00 operating budget for the system approximated $1.3 billion, including $420 million in faculty generated research awards.

Qualifications include: a distinguished record of leadership accomplishments at a senior level in education, business, public and/or government service; a terminal academic degree; institutional advancement abilities; an appreciation for instructional and information technologies; an understanding of the changing demographics of a university and global community; and an ability to communicate effectively and openly.

Nominations must include the individual's current occupation, address, telephone number, and confirmation that the individual has been nominated. Nominations that choose to apply must complete the application requirements. Applicants must submit a letter addressed to the Presidential Search Committee, and include a resume and any additional pertinent information. The University of Colorado has retained the services of Heidrick & Struggles to assist with this search. Nominations and applications should be directed to Mr. William J. Bowen, Heidrick & Struggles, 233 South Wacker Drive, Suite 7000, Chicago, Illinois 60606-6402. Review of applications will begin March 8, 2000. Inquiries should be directed to Mr. Bowen at (312) 496-1794 or via e-mail at wjb60000@heidrick.com.

Colorado Revised Statutes (C.R.S.) 24-72-204 requires that applicants 'make a written request that the records be kept confidential at the time of submission of the records.' Records of applicants who do not make a written request for confidentiality must be disclosed upon request. To request confidentiality, include the following statement in the application letter. I wish to keep all records pertaining to my application for the presidency of the University of Colorado confidential to the extent permitted by state statutes.

For more information about the University of Colorado and the presidential search, please visit: http://www.cu.edu/regents.
Vice President for Student Affairs

Boston College invites applications and nominations for the position of Vice President for Student Affairs. The Vice President is responsible for providing leadership and direction in the development, implementation and supervision of programs and services to support the educational and personal formation of students outside the classroom. Reflecting its Jesuit, Catholic mission and heritage, Boston College endeavors to educate men and women to lives marked by integrity, faith and service.

Major areas currently reporting to the Vice President for Student Affairs include Student Development, Housing, Counseling Services, Health Services, Career Services, AHANA (African-American, Hispanic, Asian and Native American) Student Programs, Learning Resources for Student Athletes, Theater Arts Center, First-Year Experience, and Learning-to-Learn.

The Vice President must be able to contribute to the mission and heritage of Boston College. Candidates should have a minimum of ten years of significant, increasingly responsible administrative experience. Necessary qualifications include leadership, vision, exemplary skills in the development and formation of students, a strong commitment to student success, demonstrated competence in strategic planning, budget administration, communication skills, performance management and crisis management. An earned doctorate is required.

Founded in 1863, Boston College is a Jesuit university committed to excellence in teaching and research in undergraduate, graduate and professional programs. It has an enrollment of 13,000 students including 4,000 graduate students and 9,000 full-time undergraduates, 6,500 of whom live in University residences. Please refer to the Boston College web site for further information at www.bc.edu.

Nominations and applications should be sent to: Leo V. Sullivan, Vice President for Human Resources, Boston College, More Hall 315, Chestnut Hill, MA 02167-3819; Phone: (617) 552-3335.

Boston College is an Affirmative Action/Equal Opportunity Employer.

BOSTON COLLEGE
A Jesuit, Catholic University

The Chancellor and Board of Trustees of The Community College of Baltimore County invite nominations and applications for the position of Vice Chancellor for Institutional Advancement. This position will provide an extraordinary opportunity for leadership of the institution's advancement program, including fundraising, alumni relations, marketing, public relations, grants, and communications. The Vice Chancellor will also work closely with other members of senior management, the three campus presidents and campus-based foundations to develop a first-rate development program, including the launching of a major capital campaign.

The Community College of Baltimore County (CCBC), serving more than 60,000 credit and non-credit students annually, is Maryland's largest community college system, with three ethnically diverse campuses and four extension centers in suburban Baltimore County, Maryland. The College, which is the number one provider of undergraduate education and workforce training in the Baltimore metropolitan area, offers a broad array of transfer and career programs and services, including general education, basic skills instruction, employment training, student and community services, and economic development activities. The Board of Trustees recently approved a five-year strategic plan, LearningFirsts, which is designed to position CCBC as a premier learning-centered community college for the 21st century.

The Vice Chancellor for Institutional Advancement will be expected to provide collaborative, future-oriented leadership in the following areas: building a strong and effective annual giving program, soliciting major gifts, obtaining corporate and foundation support, raising funds from special events or initiatives, and planning for a future capital campaign by preparing the capital campaign strategy, overseeing campaign plans, and organizing the time and activities for the Chancellor and the Trustees devoted to the campaign.

Candidates for this position should possess strong communication skills, interpersonal and planning skills and the ability to work collaboratively with others as a member of a senior management team. Required: at least ten years' progressively responsible experience, including fundraising, marketing and management within a well-established, comprehensive development program. Experience with strategic and operational planning for external relations, marketing and development programs. Knowledge of, and commitment to, the use of information technology to achieve advancement goals, and broad experience in planning and executing a major capital campaign. Bachelor's degree required.

Applications will be accepted until the position is filled. Semi-finalists will be selected by mid-March. Compensation and benefits are competitive. Information about the College can be found on its web site: cbcc.cc.md.us. CCBC is firmly committed to institutional equity and diversity; people of color and women are strongly encouraged to apply. Applicants should submit a letter of interest, resume, and the names, addresses and telephone numbers of five references to:

Dr. Carol E. Kirwan, Chair
Vice Chancellor for Institutional Advancement Search Committee
10 DeBole Drive, Second Floor
The Community College of Baltimore County
109 South Rolling Road, Suite 200
Baltimore, Maryland 21228-5300

Nominations and letters of interest (addressing the qualifications) are invited and will be kept in confidence.

For additional information, contact:
The Honorable Paul L. Shaffer, President, Paul Shaffer, Inc.
2925 S. Meadowbrook Road, Suite B
Springfield, Illinois 62707

Vice President for Human Resources

Kent State University seeks a person with proven leadership ability to serve as Vice President for Human Resources. The position provides a unique opportunity to play a critical role in the human resource management of a major public university. The Vice President for Human Resources will serve as a key member of the University's senior management team and will report to the President. The position offers an opportunity to lead a diverse and dynamic human resource department.

In addition to the duties and responsibilities described below, the Vice President for Human Resources will be responsible for ensuring compliance with federal and state laws and regulations, as well as Kent State University policies and procedures. The Vice President for Human Resources will also be responsible for the development and implementation of human resource strategies and programs that support the University's mission and strategic goals.

The Vice President for Human Resources will be a strategic thinker with a strong ability to lead and manage teams, as well as the ability to work effectively with senior management and other stakeholders. The ideal candidate will have a strong commitment to diversity, equity, and inclusion.

The ideal candidate will have a minimum of ten years of progressive experience in a human resource leadership role, with a demonstrated ability to develop and implement strategic plans. A master's degree in human resource management or a related field is required. Experience in higher education is preferred.

Nominations and letters of interest (addressing the qualifications) are invited and will be kept in confidence. Applications should be submitted on or before March 1, 2020.
Assistant Vice President for Major Gifts

Recent promotions offer an opportunity to bring new fund-raising expertise to Carthage.

Within weeks, the College formally will launch a campaign for a new library and athletic arena. Lead gifts of $1 million and $7 million are financing approximately half the total project costs. Construction already is underway. The campaign aims to complete that financing.

The new officer will be the deputy leader of the campaign. Carthage seeks vitality, ambition, sound judgment, and reliable personal values in that individual. Whereas this high-visibility position requires candidates with fund-raising experience, an individual’s potential for future promotion is equally important. Other initiatives for further campus development will follow this campaign.

Located on the Lake Michigan shore midway between Chicago and Milwaukee, Carthage offers quick urban access from a relaxed, small-city environment. More than ten million people live within a two-hour drive. Total college enrollment exceeds 2,200. Founded in 1847, Carthage is the fourth-oldest Lutheran college in the country.

Statements of interest and resumes should be addressed to:

William S. Johnson
Associate Vice President for Major Gifts
Carthage College
2001 Alford Park Drive
Kenosha, Wisconsin 53140

---

Susquehanna University

President
SUSQUEHANNA UNIVERSITY
Selinsgrove, Pennsylvania

Susquehanna University seeks nominations for and expressions of interest in the position of President. During the past decade, Susquehanna has achieved significant national recognition as a selective, private university committed to its mission of educating capable undergraduate students for productive and reflective lives of achievement, leadership, and service in a diverse and rapidly changing world.

Susquehanna is a growing institution of more than 1,600 students organized into three schools: the School of Arts, Humanities, and Communications; the School of Natural and Social Sciences; and the Sigmund Witt School of Business. The University’s 200-acre campus, recognized for its beauty, is located in the Susquehanna River valley, fifty miles north of Harrisburg and approximately three hours from Philadelphia, New York City, and Washington, DC.

The President will lead a committed, enthusiastic faculty and administration in responding to the challenges and opportunities offered by an independent, undergraduate university. Susquehanna seeks a leader with the intellect, integrity, vision, energy, creativity, and management skills to build on the University’s record of success.

Inquiries, nominations, and applications should be directed, in confidence, to the consultant supporting this search:

Nancy A. Martin
c/o Educational Management Network/Witt/Kieffer
98 Old South Road
Nantucket, MA 02554-6000
c-mail: susquehanna@cmnem.com

For more information about Susquehanna University and the presidential search, please visit http://www.susqu.edu

Susquehanna University is an Equal Opportunity/Affirmative Action employer. Applications from historically underrepresented groups are encouraged.

Carthage seeks one or more seasoned professionals to augment a team of senior admissions and financial aid officers. Growing numbers of student applications and the planned expansion of the College create the need to reinforce professional staff resources. New member(s) will carry the title "Director of Admissions and Financial Aid," will have broad decision-making authority, and will receive a highly attractive compensation package. The starting date can be immediate, or delayed to suit personal needs.

Carthage seeks energetic, ambitious individuals, with expertise in admissions work, who can work effectively on a team of similar professionals. The College provides an excellent springboard for professional advancement, either on campus or at other institutions. Carthage expects a minimum commitment of four years from members of its professional staff.

Located on the Lake Michigan shore midway between Chicago and Milwaukee, Carthage offers quick urban access from a relaxed, small-town environment. More than ten million people live within a two-hour drive. Total college enrollment exceeds 2100. Founded in 1847, Carthage is the fourth-oldest Lutheran college in the country.

CENTRAL MICHIGAN UNIVERSITY

PRESIDENT

Established in 1892, Central Michigan University (CMU) is a comprehensive state University with over 800 faculty serving an on- and off-campus enrollment of 26,000 students. CMU has eight colleges and offers more than 30 undergraduate and graduate degree and 150 major areas of study. The University competes in Division I-A athletics and provides public broadcasting coverage for the largest region of any radio and television station in the U.S. The main campus is located on 400 acres in Mt. Pleasant, and 15,000 students located in the heart of Michigan's Lower Peninsula. In two recent years, U.S. News and World Report ranked CMU at one of the top regional universities in the nation. Black Issues in Higher Education magazine ranked CMU second in the nation in the number of master's degrees awarded to African Americans and the 12th in the nation in master's degrees awarded to women.

The new President of CMU will inherit a dynamic, healthy institution that is moving forward in critical areas, including enhancing academic excellence, meeting the needs of students and society, and developing the physical needs of the campus.

The University seeks a president with the following leadership qualities: traits and characteristics; a demonstrated, effective leader with vision, strong external skills, an understanding of academic environment, and a commitment to diversity.

For more information about the University, the president, and desired leadership qualities, please consult this website: www.cmich.edu/position.html.

Applications and nominations may be sent in full confidence to:

Shelly Weiss Stoeckab, Managing Director and Vice President
Lesley Boyd, Consultant
The Education Practice, A.T. Kearney, Inc.
335 John Carlyle Street, Alexandria, VA 22314

VICE-PROVOST FOR MINORITY AFFAIRS AND FACULTY DEVELOPMENT

UNIVERSITY OF MISSOURI-COLUMBIA

The University of Missouri-Columbia invites applicants and nominations for the position of Vice Provost for Minority Affairs and Faculty Development. Reporting to the Provost, the Vice Provost provides leadership in support of diverse programs, curriculum, instruction, and research, and academic professional development programs. The Vice Provost has direct responsibility for Black Studies, Women's Studies, the Program for Excellence in Teacher Education, African American Studies, and Disability Studies.

The Vice Provost also serves as advisor to the Provost on academic policy matters, administers budget, plans programs, acts as ambassador for underrepresented campus groups, and provides oversight of diversity and professional development activities. The Provost and Academic Council are seeking a dynamic individual with experience in academic administration.

The University seeks an established scholar with credentials that would justify appointment as a tenured professor in an appropriate discipline. The person holding this position should have proven administrative experience, a record of scholarship, and a strong advocate for faculty development programs as well as for new and established faculty. A thorough understanding of and experience in academic administration is essential.

The University of Missouri provides a forward-thinking environment with a strong institutional commitment to diversity. Mizzou leads the Big 12 in African American student enrollment and boasts a growing number of minority faculty. A number of enrichment programs as well as curricular and extracurricular programs are in place to ensure opportunities for minority students.

Send all applications and nominations to:

The Office of the Provost
114 Jesse Hall
University of Missouri-Columbia
Columbia, MO 65211

To ensure full consideration, application and nominations should be received by March 10. Review of applications will begin March 15.

The University encourages applications from women, minorities and Vietnam-era veterans and is an Affirmative Action/Equal Opportunity Employer. Visit the University of Missouri-Columbia website at http://www.missouri.edu/
University of Michigan

Human Resources & Affirmative Action

The University of Michigan, one of the nation's preeminent research universities, seeks nominations and applications for the position of Associate Vice President for Human Resources & Affirmative Action. As the highest-ranking human resources professor at U-M, the Associate Vice President must possess a successful record that demonstrates strategic insight, strong management talent, and the ability to advocate for our resources issues with the leadership in both academic and non-academic units. The successful candidate must foster and promote the University's commitment to build a diverse community and supportive environment.

The Associate Vice President will have direct responsibility for University programs on:

- Recruitment and employment
- Classification and compensation systems
- Employee and labor relations
- Organizational design, management and information systems
- Policy development

The successful candidate will also possess outstanding written and oral communications skills and will be imaginative and creative problem solver. In addition to a significant record of achievement in human resources and some knowledge of higher education, an MA in a related field is required.

Nominations and applications will be reviewed on an ongoing basis beginning February 2000 and will be accepted until the position is filled. Correspondence should be addressed to:

Kim M Morrison, Ph.D., Managing Director or Jo-Anne Zoll, Vice President and Senior Associate Diversified Search Companies One Commerce Square 2005 Market Street, Suite 3300 Philadelphia, PA 19103 Phone: (215) 668-3586 Fax: (215) 668-6399 E-mail: jzoll@divearch.com

A Non-Discriminatory, Affirmative Action Employer

The Florida State University

The Florida State University is classified as a Research 1 University by the Carnegie Foundation for the Advancement of Teaching and is located in the State Capitol. The College of Education has a long and honored history as the second founded College in the University. The instruction and the unit hold numerous accreditations. The advanced graduate and research mission is central to the College with 21 doctoral degree programs. The Graduate School and the cooperative improvement of K-12 education are essential to the mission.

The College seeks accomplished, motivated, enthusiastic, and energetic candidates for the following position.

Community College of Philadelphia:

VICE PRESIDENT FOR STUDENT AFFAIRS

Community College of Philadelphia invites applications and nominations for the position of Vice President for Student Affairs. Founded in 1965, the College enrolls more than 18,500 students with an annual budget of approximately $79,000,000. The Community College of Philadelphia is seeking a Vice President responsible for all student services, including:

- Counseling/Adult & International Student Programs
- Admissions/Enrollment Management
- Financial Aid
- Records and Registration/Student Information Systems
- Testing and Assessment
- Intramural Athletics/Extra & Co-curricular Programs
- Career Planning and Job Placement
- Student Health
- Judicial Affairs

The successful candidate must be results-oriented, and demonstrate knowledge of the areas of responsibility, initiative and student advocacy. This position requires effective leadership and management skills in a complex organization. Personal qualifications include vision, creativity, a collaborative style, strong interpersonal skills, and a commitment to a diverse campus environment. A doctorate is preferred; master’s degree in higher education administration, counseling or a related area is required. At least five years of upper-level administrative experience in an institution of higher education is required. Community college experience is strongly preferred.

The position is available on or after July 1, 2000. A highly competitive salary and complete fringe benefits package are offered. In making application, candidate must be responsive to the listed experience and requirements shown above. Interested candidates should forward their resume, three letters of recommendation and a letter of application (including salary history), addressing and demonstrating how they meet the required and preferred qualifications of the search committee. Application materials must be postmarked by March 31, 2000 and addressed to:

Chair, Search Committee
Vice President for Student Affairs
C/o: Human Resources Office
Community College of Philadelphia
1700 Spring Garden Street
Philadelphia, PA 19130

Community College of Philadelphia is an affirmative action, equal opportunity and equal access employer. The College encourages applications from individuals traditionally underrepresented groups. AA/EEO
MARY WASHINGTON COLLEGE

Associate Director of Student Activities and Community Services

Mary Washington College seeks applications and nominations for the position of Associate Director of Student Activities and Community Services. Mary Washington College is a coeducational, selective, public liberal arts college with approximately 3,800 full-time students. The Student Activities and Community Services offices, part of the Student Life area of the Division of Student Affairs, supports the College's mission by fostering diversity of student opportunities for learning, leadership, community building, and creative expression beyond the classroom. The Associate Director of Student Activities and Community Services will have the primary responsibility for the coordination of the institution's community service program: Community Outreach Resource (COR) Program. The volunteer program is student-run, and the Associate Director advises students and faculty on the development of community service and service learning programs.

Reporting to the Director of Student Activities, the Associate Director will also serve in responsibility for the college's day operations of Student Activities, including assistance in advising, coordinating, promoting, and operating campus social, cultural, and educational activities. Specific skills in the area of leadership development, cultural awareness, and student-based program implementation are desirable. The Associate Director should be innovative, collegial, student-oriented, motivated, creative, and able to communicate well with students, faculty, staff, and members of the community. Evening and weekend work are routinely part of this position.

A master's degree in student affairs/highest education administration or related field, and/or an equivalent combination of education and experience, is required. Demonstrated experience in collegiate/community serv and leadership training highly desirable. Experience in grant writing, implementation, and program assessment preferred. Demonstrated experience in working with diverse populations of students, staff, and faculty required.

Experiences with living-learning environments, in personnel and budget management required.

The start date for this position is June 25, 2009. Applications for this position should include a resume, a cover letter, copies of transcripts, and a statement regarding your philosophy of promoting student development through service learning and leadership education. Candidates should also submit the names and phone numbers of three references to: Office of Human Resources, Box 615/ADFA, Mary Washington College, 1301 College Avenue, Box 61, Fredericksburg, VA 22401-5558. Deadline for receipt of applications is March 21, 2009 by 5 p.m. Notarized applications will not be honored. Mary Washington College is an equal opportunity employer and encourages applications from qualified minorities and women.

DISTANCE LEARNING REFERENCE LIBRARIAN

NEW JERSEY CITY UNIVERSITY seeks an energetic, service-oriented Reference Librarian. This is a full-time, tenure-track position. Provides reference service to distance education students; participates in the selection and evaluation of electronic reference resources, and in the planning and implementation of library technology applications. Serves on library and campus-wide committees as assigned.

Required Qualifications

An MLS from an ALA-accredited program; wide knowledge of electronic and print reference sources; excellent oral and written communication skills; knowledge and experience with electronic resources and library technology applications in a networked environment, especially distance education; evening and weekend hours required.

Preferred Qualifications

Experience in academic reference service, electronic distance education experience, some supervisory experience, demonstrated experience with a variety of microcomputer applications in a networked environment.

Application Deadline

The position will be available July 1, 2009. Deadline for submitting applications is April 15, 2009. Send a letter of application, resume, and names, addresses, and telephone numbers of three (3) professional references to: Grace Buia, Library Director, New Jersey City University, 2039 Kennedy Boulevard.
The University of South Florida, College of Nursing is seeking applicants for:

A COORDINATOR OF THE PRIMARY CARE PROGRAMS

Doctoral degree in Nursing or related field and Master's degree in Nursing required. Qualifications and experience to meet criteria for appointment at Assistant/Associate Professor level. National certification as a Nurse Practitioner, and eligibility or currently licensed to practice as a Nurse Practitioner in Florida required. Salary is commensurate with education and experience.

A PEDIATRIC NURSE PRACTITIONER FACULTY POSITION

Doctoral degree in Nursing or related field and Master's degree in Nursing required. Qualifications and experience to meet criteria for appointment at Assistant/Associate Professor level. National certification as a Nurse Practitioner is preferred, and eligibility or currently licensed to practice as a Nurse Practitioner in Florida required. Salary is commensurate with education and experience.

The College of Nursing is one of three colleges in the Health Sciences Center at the University of South Florida and offers a baccalaureate, masters and a Ph.D. program. The College is part of the 2nd largest university in the Southeast with more than 35,000 students and one of three Research I Universities in the Florida State University System.

To apply, please submit the following: curriculum vitae, USF application, original transcript of highest degree, current licensures, and five letters of reference. Application material must be received no later than March 31, 2000. All material should be directed to:

Rebecca Slasou, PhD, RN
Chair of Search Committee
College of Nursing
University of South Florida
12901 Bruce B. Downs Blvd., MDC 22
Tampa, FL 33612-4766

Deadline for submission is March 31, 2000.

Associate Professor/Dean of the College

Princeton University

Princeton University’s Office of the Dean of the Faculty seeks an assistant or associate dean to be responsible, with the Dean, for implementing policies and procedures affecting the Faculty and, in particular, the 1200 members of the Professional Research, Technical, and Library Staffs on the main campus and at the Princeton Plasma Physics Laboratory. The incumbent oversees all personnel actions for members of these staffs, including appointments, promotions, and annual salary review. He or she is also responsible for overseeing various faculty matters, including the administration of faculty summer salaries and the preparation of materials for the Faculty Advisory Committee on Appointments and Advancements. The individual must be tactful and discreet in handling confidential and sensitive information and must be able to work well with chairs, faculty, and staff while solving often difficult problems. Excellent written and oral communication skills, outstanding analytical skills, sound judgment, and the ability to organize and prioritize many ongoing projects are essential. At least five years of academic work experience (teaching, research, and/or administration) and familiarity with Princeton University or a comparable academic setting are required. A Ph.D. in a field taught at Princeton and an understanding of the scientific research environment are preferred.

Salary will be commensurate with the qualifications and experience of the applicant. The position is available July 1 or earlier if possible. For full consideration application materials must be received by MARCH 15, 2000.

Princeton provides an exceptional benefits package. Interested candidates should submit a scannable resume or, plain white paper with standard 12 pt. Times Roman or similar font and salary requirements to: Human Resources, Clio Hall/05647-HHE, Princeton University, Princeton, NJ 08544-5264. For more information on how to apply, please see our Web site at: http://www.princeton.edu/hr/emp/howtoapp.htm or call our Employment Opportunities Hotline at (609)...
FACULTY POSITIONS IN:
Business Administration
Education

ASSISTANT DEAN POSITION IN:
Academic Affairs

The College: Warren Wilson College is an independent liberal arts college located on a beautiful 1100-acre campus in the Blue Ridge Mountains on the edge of Asheville, North Carolina, one of America’s most livable cities. The College is recognized in the Making a Difference College Guide as progressive and committed to social, environmental, and global awareness; in Peterson’s Education for the Earth: A Guide to Top Environmental Studies Programs; and in Barron’s Best Buys. We enroll 760 undergraduates (including international students from 24 countries) in a range of baccalaureate programs in traditional and non-traditional liberal arts areas and selected professional programs, as well as 90 graduate students in an acclaimed low-residency MFA program in creative writing. Faculty members are ranked, with a system of extended contracts instead of tenure. The College is a cohesive community, with over 90% of students, about half of full-time faculty, and many staff members residing on campus; a shared governance system; and a sizable volunteer staff. Warren Wilson College offers a triad education program combining study, work, and service. All resident students work 15 hours per week on campus, providing the essential services to maintain the College, and all students engage in service to others as a requirement for graduation.

BUSINESS ADMINISTRATION: This is a one-year, full-time position, beginning August 1, 2000. We seek a faculty member with strong leadership and teaching abilities, for a department that has begun to offer minors and concentrations in entrepreneurship, non-profit management, and international management. Particular teaching responsibilities for this position include Principles of Management, Non-Profit Management, and Entrepreneurship, as well as directing the departmental internship program. Candidates with an earned doctorate or the M.B.A. degree are preferred. M.A. and A.B.D. candidates are also invited to apply.

ASSISTANT DEAN, ACADEMIC AFFAIRS: This is a full-time, twelve-month, continuing appointment, beginning July 1, 2000, and requires an earned doctorate. Under the direction of the Vice President for Academic Affairs, the person in this position assists in the administration of the academic programs, including curriculum development and implementation for the general education components of the education program, and academic program assessment; teaches at least one, four-credit course per year as a first-year seminar; and assists in the coordination of academic advising for all students. The successful candidate must have a record of teaching excellence and professional activity, preferably in an undergraduate liberal arts college, and administrative experience as an academic administrator (as in an academic programs, department or division). See a complete position description on our web page: www.warren-wilson.edu.

Interested applicants should submit a cover letter, curriculum vitae, official graduate transcripts, and three letters of reference to Dr. Virginia McKinley, Vice President for Academic Affairs, Warren Wilson College, P. O. Box 9006, Asheville, NC 28815-9006. Interviews of applications for all positions will begin immediately and continue until the positions are filled.

We desire a diverse faculty and a community that reflects a global outlook. We particularly invite applications from women, ethnic minorities, and members of other groups historically underrepresented in academia.

Assistant in Recreation and Leisure Services
RECREATION & LEISURE SERVICE ADMINISTRATION
(Non-Tenure-Earning)

The Assistant in Recreation and Leisure Services will be responsible for the internship and field work courses which will include: the organization and administration of these courses, the placement and supervision of students, the evaluation of student performance, the identification and evaluation of quality internship and field work sites, and travel for student visitation. Responsible for teaching an introductory course and others as needed and assigned. The coordination, organization, and advisement of incoming undergraduate majors will also be a responsibility of this position, along with the advisement of the student majors’ club.Minimum qualifications include an earned Master’s degree with at least one degree in Leisure services, Recreation, or Parks.

Send application package, including letter of application documenting interest and qualifications; current vitae; sample publications; and three letters of recommendation along with a list of names, addresses and telephone numbers of five references who may be contacted to: Dr. Julie Dunn, Chair, Leisure Search Committee, Department of Human Services and Studies, 215 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact her at (850) 644-4244, fax (850) 644-6403, or jsunn@edconfac.fsu.edu. Application deadline has been extended until March 10, 2000. Position will begin no later than August 1, 2000.

The Florida State University is an equal opportunity/affirmative action employer and women, minorities and individuals with disabilities are strongly encouraged to apply.

DIVISION DIRECTOR
TECHNOLOGY IN EDUCATION

Lesley College, www.lesley.edu, a private teaching institution located in Cambridge, Massachusetts, prepares women and men for professional careers in business, human services, management, and the arts. A commitment to teaching, the liberal arts, scholarly inquiry and lifelong learning are the foundations of Lesley’s educational philosophy. Our Technology in Education is a leading graduate program for the integration of technology in schools. It seeks a dynamic, visionary Division Director to actively move the program forward.

The Division Director will provide cutting-edge academic and administrative program leadership, particularly inspiring and supporting faculty with a vision for the power of educational technology in schools. In this twelve month position, the Director manages 12 core faculty, 6 support staff, 75 adjunct faculty, 150 students throughout the world. The program is delivered in three formats: on campus in an intensive weekend format in fifteen states, an Internet based distance learning format, and in a traditional semester format on campus. The Director will oversee the division’s academic and pedagogical quality. Requirements include an earned doctorate; eligibility for the rank of Associate or Full Professor; an exemplary teaching record; and experience in higher education and with integrating technology in education in K-12 classroom environments. Experience with strategic planning and progressive program development also necessary. Highly desirable: significant educational technology accomplishments, and ability to integrate student perspective into curriculum, a broad delivery, as well as recruit and retain diverse faculty, staff and students.

The starting date for this position is July 1, 2000. Review of materials will begin March 1, 2000. The position will remain open until the final selection is made. Applicants should submit a letter of intent, showing how their credentials and experience match the qualifications, current vitae and names and addresses of three references to: Kristie Cottone, Human Resources, Lesley College, 29 Everett Street, Cambridge, MA 02138; hrmail@lesley.edu.

Visit our job postings on our website: www.lesley.edu/jobs. For a more complete description of this position, Lesley College is committed to diversity in its workforce. Persons of Color are encouraged to apply.

Lesley College is committed to diversity in its workforce. Persons of Color are encouraged to apply.
ASSOCIATE PROVOST
FOR INFORMATION RESOURCES

Rowan University, a public comprehensive institution, is one of nine state colleges and universities in New Jersey. Recognizing and enhancing the role that technology plays in the campus, Rowan is in the second year of a five-year strategic planning effort in which technology has been featured as one of two top budget priorities. During this period, accomplishments include:

- Reorganizing all campus technology departments (Network and System Services, Instructional Technology, and Management Information Services), into a joint Division of Information Resources.
- Upgrading all campus networking infrastructure using OC-12 switches.
- Installing new high-speed servers.
- Creating an integrated campus help desk.
- Installing 35 smart classrooms.
- Providing phone to pull network connections for 3500 resident students.
- Adding new information and support staff, and creating a campus-wide technology advisory committee.
- Adding new voice-over Internet Protocol (VoIP) telephones, plus more than 300 students and part-time employees.

A master's degree from an accredited college or university is required; a doctoral degree is preferred. At least one experience of responsibility in a technology-related field, with extensive skills and technical knowledge in current computing and telecommunications technology, and at least three years of experience in a higher education setting, preferably on a college or university campus, are required.

In addition to the requirements above, the ideal candidate will possess the following qualifications and experience:

- Strong leadership, management, planning, budget, and written and oral communication skills.
- Ability to build strong teams, both within the Division and across the University.
- Ability to work effectively with people at all levels of the organization, including faculty, staff, and students.
- Experience in classroom instruction, preferably at the college or university level.

A salary range of $75,000 to $90,000 is available, along with a comprehensive benefits package. The starting date is July 1, 2000, or as mutually agreed.

Rowan University is an equal opportunity employer. Women, minorities, and individuals with disabilities are encouraged to apply.

SOUTHERN VIRGINIA COMMUNITY COLLEGE

Northern Virginia Community College (NVCC), one of the three largest multi-campus community colleges in the nation serving 50,000 students annually, is searching for a chief academic and administrative officer of its Loudoun Campus, one of five campuses. Loudoun, the fifth largest county, has a diverse student body of approximately 6,000 students in both credit and non-credit programs during Fall 1999. With a strong emphasis in technology, the campus has 2 academic divisions: technology and business.

Qualifications:

- A commitment to the mission of the community college.
- An earned Doctorate from an accredited institution of higher education.
- Progressive administrative experience at a division level.
- Strong written and oral communication skills.
- Experience with and knowledge of technology in higher education.
- Commitment to creating and maintaining high quality learner-centered programs and services.
- Commitment to building productive partnerships with the community.

Starting salary range: $82,497-$93,641 + benefits. Visit us on the web at WWW.NORTHVA.COM. Send a letter of application resume with the names, addresses, telephone numbers and email addresses of five (5) references to NVCC-VA, 4901 Wharton Chapel Road, Annandale, VA 22003 (Fax: 703-993-5862) or email submissions to provost@nvcc.cc.va.us. Closing date applications: March 15, 2000. Anticipated starting date: June 25, 2000. EEO/AA

CAPITAL COMMUNITY COLLEGE

12 Month Management Position
ANTICIPATED START DATE: AUGUST 1, 2000

MINIMUM QUALIFICATIONS:

Masar’s degree in Higher Education Administration or related field and six years of administrative experience in Higher Education with teaching experience, including three years of supervisory experience.

Responsibilities:

- Under the direction and supervision of the President, the Academic Dean is the chief academic officer of the college, responsible for the development of academic programs, student services, and the professional development and evaluation of faculty and staff. Providing leadership in the areas of academic standards and policies, instructional development, and instructional services, the Academic Dean oversees the assessment, planning, and implementation of academic programs and services.

Minimum Salary:

$76,000.06 approximate annual

Application Procedure:

Send letter of intent, resume, and three (3) references to: Mr. R. Fisher, Dir., Human Resources, Capital Community College, 61 Woodland St., Hartford, CT 06105

APPLICATION DEADLINE: MARCH 30, 2000

For full consideration, applications should be received by deadline.
State University of New York
COLLEGE OF TECHNOLOGY AT ALFRED
FACULTY POSITIONS
Fall 2000

Alfred State College is a baccalaureate and associate degree granting college of technology and a unit of the State University of New York with a commitment to quality undergraduate teaching. The college is one of five Colleges of Technology in the System which have formed an Alliance to better address the human resource needs of business and industry in the State with respect to technological education. Alfred State offers associate degrees in forty fields and a growing number of baccalaureate programs in engineering technology and related areas. A major new initiative is underway to convert the college to a 4-year and 2-year polytechnic.

The campus is located in a historic academic village containing three colleges, approximately 76 miles south of Rochester, New York. There is a separate vocational technology campus located 23 miles from Alfred in Willsville, New York. The region is one of great natural beauty and outdoor recreational attraction.

Alfred State has an enrollment of about 3,000 students, most of whom live on campus. Close personal ties between students and faculty characterizes the Alfred State experience. Programs emphasize science and technology applications.

The college has three academic schools: Arts and Sciences, Management and Engineering Technology, and Vocational Technology. Tenure track faculty positions needed for Fall 2000 are listed below. Preference will be given to candidates with earned Master's Degree or Ph.D. as indicated and who can demonstrate the following qualifications:

- Industrial work experience and/or professional licensure, where applicable
- A strong commitment to quality undergraduate teaching
- Proficiency in the use of computer technology
- Ability to enhance the diversity of the campus environment
- A willingness to participate actively in the college learning community

American History--Ph.D.: Western Civilization and other World Civilizations, relates closely to fulfilling general education requirements.

Interested applicants should send a cover letter and curriculum vitae to Temple University School of Dentistry, Room 415-LP, 3223 North Broad Street, Philadelphia, PA 19140. Minority and female applicants are encouraged to apply. An equal opportunity/affirmative action employer.

WANTED: An experienced, high energy, entrepreneurial chief financial officer with leadership skills to advance the academic, research, and public service agendas in higher education in dynamic, fast-growing Oregon.

The Oregon University System (OUS), consisting of seven universities, operates under the control of a single Board. This position reports to and is a member of the cabinet of the Chancellor, the System's chief executive officer, whose office is staff to the Board and responsible for academic planning, budgeting, administration, and the provision of information about System activities to the public and governmental agencies.

The Vice Chancellor for Finance and Administration is responsible for Systemwide financial, personnel, and administrative management, including supervision of staff engaged in collective bargaining, contraventions, internal audit, legal services, operating and capital budget processes, information services, and institutional research.

The individual leading financial and administrative affairs for the OUS during the next decade will be expected to enhance present working relationship operating under new authorities with state agencies that allow for to independently conduct business to move forward fully implementation of a new budget model recently approved by the Legislature to advance accountability framework reflecting the stature, responsibilities of the Board and Chancellor as well as a greater autonomy and expanded responsibilities at each campus. This Vice Chancellor is expected to be an entrepreneur and opportunity broker, as well as a reward of university resources, with significant experience in working with a governing board, campus leadership, and legislative committees.

Minimum requirements: a bachelor's degree at least seven years of related experience in increasing responsible positions (preferably in higher education in a multi-location system) and/or senior-level experience in public administration; and demonstrated ability to provide leadership in an ever-changing and dynamic environment. This position is located in Eugene, Oregon, and will be available immediately.

The search will continue until an appointment is made. Applications, nominations, or inquiries should be received by March 27, 2000 and directed to:

Dan Williams, Chair
Vice Chancellor for Finance and Administration
Oregon University System
P.O. Box 3175
Eugene, Oregon 97403
Phone: (541) 346-5798 Fax: (541) 346-5790
E-mail: Maria.Stewart@ous.edu

OUS is an Equal Opportunity and Affirmative Action Employer. Women, minorities, and underrepresented groups are encouraged to apply.
The William Paterson University of New Jersey is a comprehensive public institution of higher learning, committed to promoting student success, academic excellence, and community outreach with opportunities for lifelong learning. Members of the faculty are accomplished, distinguished, and diverse teachers and scholars, many of whom are recipients of prestigious awards and grants from the Fulbright Council (24 scholars), the Guggenheim Foundation, the National Endowment for the Humanities, the National Institutes of Health, the National Science Foundation, and the American Philosophical Society. Featuring nationally renowned academic programs, the University maintains a low student/faculty ratio (12:1) and small class size (12:3) for the 5,000 undergraduate and 17 graduate degree programs, supported by state-of-the-art information and communications technology. The University enrolls 10,000 students from across the country and from over 40 foreign nations. William Paterson University is situated on a beautiful suburban campus in Wayne, New Jersey, twenty miles west of New York City.

The University invites applications and nominations for these full-time, 12-month administrative positions.

**Director of Employment**

**Equity and Diversity**

Reporting to the Associate Vice President for Diversity and Minority Affairs, the Director is the University’s compliance officer and assists the campus community in promoting affirmative action, equal opportunity employment, and diversity. The Director interprets and administers state and federal affirmative action/equal opportunity employment laws and regulations as well as the University’s policies on diversity and discrimination to ensure compliance. The Director directs the faculty, staff and administrative offices in the development and implementation of strategies to encourage the recruitment, retention, and promotion of individuals to promote diversity in accordance with federal and state laws and institutional policies.

The Director also investigates all complaints and appeals from faculty, staff, and students regarding affirmative action, discrimination, sexual harassment and racial conflict, and recommends solutions with respect to these investigations to the Associate Vice President for Diversity and Minority Affairs. She prepares an annual report and carefully monitors the implementation of relevant policies and regulations in all University areas. Requirements include a Master’s degree from an accredited institution, plus five years of successful leadership experience supervising and administering related programs, as described above, preferably in a higher education environment, and proven ability as a strong advocate for minorities and underrepresented groups. Excellent written and oral communication skills are required, as is the ability to work closely and effectively with faculty, students, and staff. Also required are strong problem-solving and conflict resolution skills.

**Director of Instruction and Research Technology (Search Extended)**

The Director of Instruction and Research Technology provides vision, leadership, and management in support of the use of information technology in teaching and research for more than 300 full-time faculty in the five Colleges of the University (Arts and Communication, Business, Education, Humanities and Social Sciences, and Science and Health). Reporting to the Associate Vice President for Library Services and Information Technology, the Director works with the academic community to enhance curricular and research activities through the use of information technology. Responsibilities include management of public access computing facilities, training programs for faculty, oversight and administration of the unit budget, and preparation of related grant proposals and other documents. The four functionally defined departments in the unit are: Student Technology Instructional Design, Media Services, and Video Communications (satellite up/downlinks, and broadcast cable, and interactive facilities to support video and teleconferencing). The Director advises administrative leaders of developments and trends in the application of information technology to teaching and learning.

Requirements include at least five years related professional experience in higher education and experience working directly with faculty in this context; evidence of a strong user-service orientation; evidence of scholarship and excellent written, oral, and interpersonal skills required. Experience with use of the Internet (Web, e-mail, and other delivery methods); experience as a teaching faculty member helpful; knowledge of the use of statistical software for research (SAS, SPSS); and a doctorate in an academic discipline with experience in the use of technology to support teaching and learning are required.

For each of these positions, salary is negotiable and commensurate with expertise and experience. Letters of application accompanied by a recent curriculum vitae and the names and addresses of three references should be sent to: Dr. Robert Seal, Executive Assistant to the Provost, 300 Rarsoni Hall. Drawer H0, William Paterson University, 300 Pompton Road, Wayne, NJ 07470. Additional information about the Community College of Rhode Island is available at www.ccri.edu. The review of applications will begin immediately upon receipt and continue until each position is filled.

**COMMUNITY COLLEGE OF RHODE ISLAND**

**PRESIDENTIAL SEARCH**

The Board of Governors for Higher Education invites applications and nominations for the position of President of the Community College of Rhode Island. The President is the chief executive officer of the Community College and reports to the Board of Governors. The Board of Governors seeks a visionary leader. The successful candidate must have recent senior-level administrative experience at a community college; must be a person of integrity and should have excellent interpersonal and communication skills. Compensation will be commensurate with experience and qualifications. A comprehensive benefits package is available. Candidates should submit a letter of application, resume, response to the Presidential Profile and the names of three current professional references. For full consideration, all application materials must be received by March 24, 2000. For more complete descriptions of the Presidential Profile and the Community College of Rhode Island please contact:

**President**

Office of Higher Education
301 Promenade Street
Providence, RI 02908-5748

Telephone inquiries should be directed to: Sharon Tooze.

The University enrolls 30,000 students from across the country and from over 40 foreign nations. William Paterson University is situated on a beautiful suburban campus in Wayne, New Jersey, twenty miles west of New York City.

The University invites applications and nominations for these full-time, 12-month administrative positions.

Associate Vice President for Diversity and Minority Affairs

William Paterson University seeks an innovative and visionary individual with proven administrative ability and experience who can provide strong leadership for the continuing development, implementation, and refinement of programs and activities to promote diversity on campus. Reporting to the Associate Vice President for Diversity and Minority Affairs are the Office of Employment Equity and Diversity, the Office of Minority Education, and the Education Opportunity Program (EOP). The successful candidate reports to the Provost and Executive Vice President.

Qualifications and requirements for the position include an earned doctorate from an accredited university, with at least five years of successful related administrative experience in higher education; successful experience developing and supervising programs and initiatives of the three offices; demonstrated knowledge of federal and state regulations related to issues of educational opportunity, affirmative action and equal employment opportunity, access and student retention, equity, diversity and discrimination; program planning and grant-seeking experience; record of successful leadership to diverse constituents in higher education; demonstrated ability as a strong advocate for the concerns and perspectives of minority and underrepresented groups; excellent organizational and fiscal management skills; and excellent interpersonal skills and ability to communicate effectively with faculty, students, staff, administrators and external constituencies.

Executive Director of International Programs

Reporting directly to the Provost and Executive Vice President, the Executive Director of International Programs will have responsibility for providing campus-wide leadership in advancing and promoting the internationalization of the curriculum and the University. The University seeks a proven leader with vision, creativity, and ability to work collaboratively with faculty, students, staff and other administrators in developing, coordinating and managing a comprehensive international agenda. The Executive Director serves as head of the Center for International Programs and will supervise the Director of International Student Services, the Director of Study Abroad Programs, and support staff.

Requirements for the position include an earned doctorate from an accredited institution; successful experience developing and administering international programs in a college/university setting, especially international academic programming, international exchange agreements, international outreach and recruitment, study abroad, and international student services; evidence of successful grant writing; a significant record of teaching, scholarship, research/creative activity, and service at a four-year college or university; strong commitment to and successful experience with diversity issues in higher education; and excellent communication and interpersonal skills.

Assistant Dean of Graduate Studies (Search Extended)

Reporting to the Associate Vice President and Dean of Graduate Studies and Research, the Assistant Dean will assist in the development and implementation of graduate policies and procedures at the University. The successful candidate provides leadership for enrollment management at the graduate level, including marketing, recruitment, admission and retention, auditing and monitoring student academic progress, and the offering of quality graduate student support services; supervises the staff in the Office of Graduate Studies; and manages the graduate assistant selection and placement process.

Requirements and qualifications include an earned doctorate from an accredited institution; three to five years of successful experience in the administration of graduate education programs; demonstrated supervisory and budgetary experience in a responsible administrative position in a college/university; background and experience in graduate recruitment/admissions/retention, and in college level teaching; knowledge of the utilization of information technologies in admissions; effective interpersonal and communication skills; ability to work effectively with faculty, students, and staff; and demonstrated commitment to diversity.

For each of these positions, salary is negotiable and commensurate with expertise and experience. Letters of application accompanied by recent curriculum vitae and the names and addresses of three references should be sent to: Dr. Robert Seal, Executive Associate to the Provost, 100 Raubingel Hall, Drexel HS, William Paterson University, 30 Pompton Road, Wayne, NJ 07470. Additional information about the University can be found at https://wpunj.edu. The review of applications will begin immediately upon receipt and continue until each position is filled.

PRESIDENT

North Harris College

The North Harris Montgomery Community College District welcomes nominations and applications for the position of President, North Harris College.

North Harris College's 200-acre wooded campus is located twenty minutes north of downtown Houston and offers more than 60 programs of study in academic and technical areas. The campus reflects the rich diversity of our community and boasts students hailing from 53 countries. The college enrolls nearly 10,000 students in credit programs and 19,000 in the Community Education program.

The position reports to the Chancellor of the District and requires: an earned doctorate from a regionally accredited university, administrative experience at the president, vice-president or dean level at a comprehensive community college system; experience in providing educational or support services directly to students through teaching, student services, library assistance, or other areas of professional service where engaging students directly is required.

Qualifications important to the position: Applicants should demonstrate:

- Deep commitment to the comprehensive community college and to the fulfillment of the mission by developing and maintaining the highest academic and student service standards;
- Manifest integrity, highest ethical standards, and respect for the dignity and worth for individuals and groups;
- Excellent interpersonal and communication skills, good will, and a sense of humor;
- Understanding, respect, and support for diversity among students, faculty, staff and other constituent groups;
- Strong commitment to innovation and continuous improvement of the quality of educational programs and services to students;
- Significant and successful responsibility with budgetary and other financial matters;
- Ability to develop and expand partnerships with businesses, school districts, governmental entities, community organizations, and the general public to meet the educational and workforce needs of the community;
- Wide-ranging skills and sensitivity needed to be an effective campus leader and a district administrative officer in a multi-campus system;
- Expertise in organizational assessment, strategic planning and evaluation, and documentation of institutional effectiveness; knowledge and skills required to provide state-of-the-art technological support systems for students, faculty and staff;
- Personal attributes which help to create and maintain an environment of inclusiveness in planning and decision making.

Application material should include (1) a cover letter describing how the requirements and qualifications for the position are met by the applicant, (2) a current resume including major career accomplishments and (3) the names, addresses, and telephone numbers of five employment-related references. Letters of nomination and application material may be mailed, faxed or forwarded electronically to: North Harris College President Search, Department of Human Resources, 250 North Sam Houston Parkway East, Houston, TX 77060 or Fax 281-260-3186 or email jobs@nhamcc.edu

Final review of applications by the search committee will begin the week of March 31. Reporting date is expected to be no later than August 2000.

Peralta Community College District

President

Laney College, Oakland, California

The President of Laney College will serve as the chief academic and administrative officer of the college under the general direction of the Peralta Community College District Chancellor. The President of Laney College will provide outstanding leadership, displaying initiative, sophistication, and advanced professional development appropriate to that of a president of a major urban campus. Working in the San Francisco Bay Area, the President of Laney College will have a unique opportunity to lead the college through skillful strategic planning and program evaluation, and in an aggressive campaign to expand ties to the rapidly growing high technology business community.

Evaluating nearly 12,000 students per semester, Laney College is the flagship institution of the four community colleges comprising the Peralta District. Adjacent to scenic Lake Merritt, the 60-acre Laney campus is a community focal point, situated in the cultural and business center of the East Bay. Laney College and the Peralta District are committed to providing premier educational programs to the diverse communities of the San Francisco Bay Area.

Application Information: For a profile brochure, contact Larry Hardy, Director of Personnel and Affirmative Action, 333 East 8th Street, Oakland, CA 94606. Tel. (510) 466-7230, Fax (510) 466-7249. Or, see our Web site: www.peraltacs.co.us.

For additional information, contact Del M. Anderson, Search Consultant, Association of Community College Trustees, 4100-10 Redwood Road, #251, Oakland, CA 94619. Tel. (510) 638-5288, Fax (510) 382-9537.

The Peralta Community College District is an equal opportunity/affirmative action employer.
VICE PRESIDENT for Business and Finance

St. Norbert College invites inquiries, nominations and applications for the position of vice president for business and finance. Founded in 1898, St. Norbert is a private, selective, coeducational, primarily residential liberal arts college with a long tradition in Catholic higher education. Located in the Green Bay, Wisconsin area, the College enrolls about 2,000 traditional undergraduate students and 100 graduate students. With a corrective maintenance plan in place over the last fifteen years, the campus is exceptionally well maintained. The College has an annual operating budget of approximately $47 million, and an endowment of about $43.5 million. There are 116 faculty and the student-faculty ratio is 14:1.

The vice president is the chief financial officer of the college and works directly with the president and the Board of Trustees to establish budgets; manage endowments; oversee all business operations including financial aid; manage all auxiliary services, telecommunications, and conferencing activities; maintain all physical resources; and coordinate human resource needs. The vice president reports to the president and serves as an integral member of the institutional management team, the Administrative Advisory Council (AAC). The vice president staffs four Board committees: Finance, Investment, Audits, and Buildings.

The successful candidate should have experience in higher education administration and management. A master’s degree in a related field and a CPA are preferred. Compensation for this position is highly competitive with peer institutions. The position is available in June 2000.

Candidates should provide a resume, the names and phone numbers of five references, and a cover letter describing their interest in the position and the experience that they would bring. All candidate materials will be held in confidence. For fullest consideration, materials should be received by March 10, although the position will remain open until it is filled. Applications and nominations should be sent to:

Jean Dowdall or Robert Atwell
A.T. Kearney Executive Search
333 John Carlyle Street
Alexandria, VA 22314
fax (703) 518-1733

Inquiries should be directed to them at:

atwell@aol.com
phone (941) 957-0010
or to jean.dowdall@atkearney.com
phone (703) 739-4761

Submission of materials by e-mail as Word documents is encouraged.

All applicants will be given equal consideration regardless of race, sex, religion, age, color, national origin, marital status, disability, and sexual orientation, citizenship status, or other protected class status.

Agnes Scott College seeks highly qualified, experienced candidates for the position of Julia Thompson Smith Chaplain. An endowed position, the Julia Thompson Smith Chaplain fulfills a crucial role in the spiritual and intellectual life of the College. The dialogue between faith and learning at Agnes Scott College fosters academic freedom, as well as an appreciation of pluralism and a desire for diversity. Agnes Scott College is a highly selective, independent national liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott's curriculum encourages students to become fluent across disciplines, across continents and across centuries. Founded in 1889 by Presbyterians, Agnes Scott College is a diverse and growing residential community of scholars with one of the largest endowments per student of any college in the country.

JULIA THOMPSON SMITH CHAPLAIN

Responsibilities: The Chaplain provides spiritual and intellectual guidance to a diverse faith community of students, faculty and staff through worship, pastoral care and counseling. The Chaplain works with students, faculty and staff to offer a variety of programs, which emphasize the vitality of faith and learning, address challenging ethical and social issues and foster greater knowledge and understanding of all religions. The Chaplain coordinates campus volunteer efforts. The Chaplain develops and maintains good relationships with neighborhood churches, synagogues and houses of worship. The opportunity to teach seminars or courses in religious studies or related fields may be present.

The Chaplain conducts worship services during Orientation, Sophomore Family Weekend, Alumnae Weekend and Senior Investiture, as well as plans and coordinates convocations and baccalaureate services. This position reports to the Vice President for Student Life and Community Relations/Dean of Students and works with students, faculty, staff, alumnae, trustees, community leaders and members of professional organizations.

Qualifications: A seminary degree is required, as is ordination in the Presbyterian Church (U.S.A.). A doctorate in religious studies, ministry or related fields is highly desirable. Previous campus ministry experience will be helpful. The successful candidate will demonstrate knowledge of worship leadership. Qualified candidates will be proficient in counseling skills, small group leadership and homiletics. Excellent communication skills, both oral and written, are required.

Send letter of application, current résumé and names and phone numbers of three references to: Agnes Scott College, Human Resources, 141 E. College Avenue, Atlanta/Decatur, Georgia 30030. Review of applications begins immediately and continues until position is filled.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age, or disability in its employment.

Affiliated with the Presbyterian Church (U.S.A.), Agnes Scott College has a strong commitment to diversity and urges members of underrepresented groups to apply.

An Equal Opportunity Employer.

UNIVERSITY OF CALIFORNIA, BERKELEY

Director, Office of Undergraduate Admissions and Relations with Schools

The University of California, Berkeley, as the flagship campus of the University of California, is responsible for directing recruitment, admission and yield activities for entering freshmen and advanced standing students. The Director must articulate Berkeley's policies and decisions to prospective applicants, high school counselors, parents, faculty, senior administrators and other stakeholders in Berkeley's undergraduate admissions process. The Director must also be able to articulate effective strategies for recruitment and yield, particularly in light of the increasing diversity and complexity of the applicant pool.

The successful candidate will demonstrate a clear commitment to excellence in undergraduate admissions and a related field; a clear commitment to excellence in undergraduate admissions; a clear commitment to diversity and excellence in undergraduate admissions; a clear commitment to diversity and excellence in undergraduate admissions; and a strong commitment to the goals of the University of California, Berkeley.

Send nominations and applications to: Mr. David Karpinski or Carolyn Auteri, Office of Undergraduate Admissions, 3401 University Avenue, Berkeley, CA 94720. Phone: (510) 642-3300. Fax: (510) 642-3304. E-mail: carolyn.auteri@berkeley.edu

Nominees for the position will be invited to apply.

A complete application will include a letter of interest including a statement of how the candidate satisfies the position qualifications listed above and a current resume. At a later time the applicant will be expected to provide letters of reference, including the names, telephone numbers and addresses of colleagues who can provide assessments of the candidate's qualifications.

Deadline for applications is May 1, 2000. Review of completed applications will begin on February 24 and will continue until the position is filled. This is a full-time, salaried position with a comprehensive benefits package, including health, dental, vision, and retirement plans. The University of California is an equal opportunity employer and is committed to diversity in its faculty, staff, and student population, as well as diversity in its recruitment, selection, and promotion processes.

EOE/AA
Tenured Faculty Positions

Columbia Basin College, a comprehensive community college in southeastern Washington, is seeking tenure-track faculty with a passion for teaching and a commitment to student success, the community college mission, and shared governance. The college offers an excellent faculty development program, encourages a wide variety of backgrounds and interests, and is supportive of innovative and different modes of instruction. The Columbia Basin is a desert region with three cities and smaller communities, and is located near the Columbia, Snake, and Yakima rivers in southeastern Washington State. The area includes major science and technology centers, a thriving wine industry, agricultural development, and numerous recreational and cultural opportunities. Open until filled, but for best consideration apply by March 1, 2000.
