Book Review

By Rosita Lopez Marciano

Few issues in education are of greater concern to policymakers, educators, and the general public than the plight of ethnic and racial minority students in the nation's urban schools. Many receive high-quality educations, achieve at admirable levels, and are well equipped for further education or entry-level employment. Some attend less than adequate schools and still do well. An alarming number, however, achieve at significantly lower levels than do their white counterparts and leave school—either through dropping out early, or at graduation lacking the skills and knowledge required by employers, colleges, and trade schools.

Ten Steps to the Head of the Class: A Challenge to Students highlights the skills and tools that students need to succeed in school. For the first time, a path to education is clearly marked. The book applauds the achievers, encourages those who are striving to reach the top, and provides clear information to those who are just starting out. It is most valuable, perhaps, to youth from working-class backgrounds whose parents lack college degrees and relevant resources.

Dr. Betances gives a fresh perspective on the habits that can help or hurt students in their quest for success in school. For example: “Procrastination and cramming—they are inseparable! These evil twins of academic mediocrity top the most wanted list of dangerous habits that kill students’ chances. When you welcome the first into your life, the second inevitably follows. One keeps you in check while the other saps creative energy from the intellect. Putting things off leads to the abandoning of fresh opportunities.”

The book as laid out can be used as a reference at any time or read through in a matter of hours. Every step or chapter has a section that offers brief vignettes from major works in education that can be easily brought to memory and shared with others. Dr. Betances is a firm believer that when you teach others, you instruct yourself. I particularly like the “Personal Commitment” page. It can be copied and posted as a reminder of where you are headed and who is involved in your successful journey.

Mentoring is an important part of the journey to success and helps keep us accountable to others. Dr. Betances writes about the dangers of “Doing Solo.” “Lasting Thoughts” provides quotations for reflection and inspiration. Dr. Betances provides an informative overview for those interested in expanding their journey.

In the past, young people without basic skills could expect to enter the workforce as low-paid workers. The U.S. no longer has numbers of jobs for the unskilled. This book makes it very clear that bad habits as highlighted in Ten Steps, such as “Reckless Re: ‘Fishing for Answers,’” and “Viewing Teachers as Adultists,” are devastating. If followed fervently, this book can improve test scores and reduce test-taking anxiety.

Betances has made important discoveries about practicality. Is it the best, ineffective and, at worst, very harmful. A high dropout rate is not a deterrent to success. He later received a doctorate from Harvard. This book is the experience, wisdom, and passion clearly throughout each section.

I learned deep lessons from this outstanding book addresses practices that benefit all students, in Black and Hispanic young people in inner-city schools would be an excellent resource in teacher education, preparation courses, curriculum courses, and recruitment departments. So often, students are taught without tools to successfully stay in school. I recommend it highly as a graduation gift to students at any level. It has been used by students in early grades and graduate programs for counselors, teachers, school districts, and colleges should have a copy to share with students of any age or grade level.

This book is also available in Spanish and on audio. Betances has concisely written a book for teachers in need of advice in the area of student achievement. The books can be ordered in a package, including tapes and books for students and teachers.

Dr. Marciano is a professor in the Department of Educ Administration and School Business Management, Department Leadership and Educational Policy Studies, at Northern Illinois University, (NIU) in DeKalb, Illinois. Formerly she coordinated programs for the Department of Equal Educational Opportunities and was also the director of Training for Reform Implementation in Chicago.

If interested in submitting a book review, please e-mail us at outlook@ad.com for Book Reviewers’ Guidelines.
KINGSBOROUGH COMMUNITY COLLEGE
THE CITY UNIVERSITY OF NEW YORK

UNIVERSITY OF CONNECTICUT LIBRARIES

HEAD, COLLECTIONS SERVICES
(SEARCH #00A387)

The University of Connecticut Libraries seek a forward-thinking, energetic individual to help lead the libraries into a rapidly evolving electronic environment. Reporting to the Director of Library Services, the Head of Collections Services is responsible for the Libraries' collection development, acquisitions, cataloging, preservation, and access management programs, comprising 30 FTE staff and a collections budget of approximately $16.5 million. Areas of expertise include strategic planning and program evaluation, environmental management, and technical services. The incumbent, together with the Director and other area heads, serves on the Libraries' leadership council. The position calls for in-depth knowledge of strategic planning and program evaluation, environmental management, and technical services. The incumbent demonstrates exceptional leadership and management skills and ability to apply technology effectively. A record of relevant professional publications and activities, especially in the areas of electronic information resources, is required. University of Connecticut Libraries.

University Setting:
The University of Connecticut, established in 1881, is a Carnegie Research 1 University. It was recently ranked among the top 20 national universities and is engaged in UConn 2000, an ambitious $1 billion campus building project. The main campus, situated on 3100 acres of woodlands and rolling hills, is locatedapproximately 30 miles from Hartford, the state capital, and mixes well with the New York City environment. There are approximately 21 students per full-time professor.

University Libraries:
As a member of the Association of Research Libraries, the Libraries have been technologically and administratively advanced and recognized as an exciting center of intellectual life on campus. The Libraries are organized in team structures and are engaged in exciting strategic programs. A dynamic organization, the Libraries offer creative, service-oriented individuals exceptional opportunity for personal growth and learning.

Compensation:
Anticipated salary range of $40,000 to $50,000. These positions offer an excellent benefits package including 22 paid vacation days/year, 12 paid State holidays, excellent health and retirement plans, and tuition waivers.

Application Procedures:
Submit a letter of application addressing how previous experiences and personal qualities meet the requirements for the position; a resume; the names, addresses, and telephone numbers of three professional references to Deborah L. Mathews, Assistant Director for Collections Services, University of Connecticut Libraries, Box U-1005A, 369 Fairfield Street, Storrs, CT 06269-1005. Screening will begin immediately and continue until the position is filled.

The University of Connecticut has a strong commitment to diversity. We actively encourage minority and people with disabilities to apply.
NETWORK/SYSTEMS MANAGER
The Network/Systems Manager is responsible for implementing changes to, and maintaining the College's campus-wide 2500 port LAN, connections to the internet and other external network services, as well as maintaining the College's existing central servers, 2000 member user base and designing and implementing future systems. This person is responsible for implementing and enforcing LAN and system security procedures and solving LAN/server problems as they arise. A minimum of five years' experience in Network/Systems administration and a computer-related undergraduate degree is required.

TECHNOLOGY ANALYST
The Technology Analyst will coordinate all desktop computer hardware and software purchases for the campus including needs analysis, setup/application of standards, and bid research and will maintain databases of installed hardware, software, maintenance agreements and licenses. Also, the Technology Analyst will act as project manager for the implementation of a campus one-card ID system and conduct research in the development and publication of institutional policies, guidelines and procedures.

WEB COORDINATOR
The Web Coordinator will function as the Office of Information Technology Department's contact for any web-related concerns. Specific duties include: HTML coding, Cold Fusion development, database driven site development, and graphic design refinements; preparing log analysis and feedback on current projects; providing support for the faculty, staff and students regarding personal and departmental web sites; training, developing, site design and coordination of the department's web content providers in order to achieve a consistent, effective information flow, for Emerson's web site. Additional responsibilities include work on day-by-day basis with work-study students assessing progress on projects and distributing web-related workload evenly; meeting with department heads, web content providers, and designers for site development planning and strategy. Position requires a Bachelor's degree in related field, certification in multimedia and/or information systems, and three years' management and production experience.

Send cover letter and resume indicating specific position you are applying for to: Office of Human Resources & Affirmative Action, Emerson College, 120 Boylston Street, Boston, MA 02116. Emerson College is an Equal Opportunity/Affirmative Action Employer focused on workforce diversity. Visit our web site at www.emerson.edu.

PRESIDENT
THE CITY COLLEGE
Of The City University of New York

The Board of Trustees of The City University of New York and The City College Search Committee invite nominations and applications for the position of President of The City College.

The City College is a Free Academy committed to offering higher education to the children of the working class and immigrants. The City College of New York is one of the nation’s great institutions of higher education and has been a primary avenue of economic advancement for generations of New Yorkers.

The City College includes the College of Liberal Arts and Sciences, the School of Architecture, Engineering, Education, and the Sophie Davis School of Biomedical Education/New York Medical College. Known as a great teaching and learning institution, City College has also become internationally famous for the research conducted by its faculty in such fields as molecular modeling, laser optics and environmental protection.

The University has the largest undergraduate research program in the New York metropolitan area, giving students the chance to work side-by-side with eminent scholars and scientists. Occupying 30 acres in the historic Harlem section of Harlem, the College enrolls more than 15,000 undergraduate and graduate students.

Today City College is a microcosm of New York City, with one of the most diverse student bodies at any college in America: over half of its 11,000 students are of color. City College also has the highest percentage of non-white incoming freshmen of any public university in New York City.

City College is a leader in the urban university movement and is a multi-cultural, multi-ethnic environment.

The College's faculty comprises nearly 1000 part-time and full-time professors, with an average age of 45 years.

This is an exciting time to be a part of the City College community.

The Ideal Candidate:

- A Ph.D. in Criminal Justice or related field
- A minimum of five years' experience in college administration
- Experience in strategic planning, budgeting and management
- Strong leadership and management skills

In your letter of application, it is strongly encouraged to include a resume and a statement of what you would add to the City College community.

The review of applications will begin July 1, 2002 and continue until the position is filled.

For complete position, qualifications, and application, visit our website: www.ccc.edu

USF University South Florida

The University of South Florida is currently recruiting for various faculty and staff positions. For more information about the University's positions, please visit our Web site: http://www.usf.edu/hr/careers or call our Job Line for staff positions at 1-800-243-2291.

USF is an equal opportunity/affirmative action institution, committed to excellence through diversity and education.

The University of Wisconsin-Madison is an affirmative action, equal opportunity employer.
Brown University

PRESIDENT

The Presidential Selection Committee of the Brown University Corporation invites nominations and applications of qualified persons for the position of President.

The President serves as an officer of the Corporation and as the chief executive officer of the University. In these capacities he or she has the ultimate responsibility for overseeing the planning, organization, and conduct of the affairs of the University. This includes the appointment of and retention on the faculty of the best scholars and teachers; the matriculation and graduation of the highest academic standards; the maintenance of educational and medical facilities; and the provision of services, facilities, and programs to support and enhance the educational goals of the University.

Brown is a university-college with a proud tradition of providing quality education for undergraduate, graduate and medical students and of supporting faculty who are outstanding teachers and researchers. The University seeks a President who will provide strong leadership to the academic mission, the external activities and fundraising, and the administration of the University. The successful candidate should be a strong and articulate leader of proven executive ability, an educator who understands the role of a highly selective private university in an increasingly global and technological society who can lead Brown to its full potential as a university college, and who has a strong commitment to the ideals of a liberal education and to promoting institutional diversity.

In order to receive full consideration, applications, which should include a curriculum vitae and a cover letter describing the candidate's interest in the position, and nominations must be received by June 15, 2000. However, the search will continue until a President is appointed.

Please send nominations and applications to:

Barbara R. Stevens
Vice President and Director
Innovation Center
1275 K Street NW Suite 1025
Washington DC 20005

FARMINGDALE

STATE UNIVERSITY OF NEW YORK

SUNY Farmingdale, Long Island's oldest public college, has the following full-time tenure-track positions for Fall 2000:

ASSISTANT PROFESSOR - Dental Hygiene

Teaches didactic, preclinical and clinical dental hygiene, counseling, academic advising, participation on departmental school and campus committees.

Doctorate required to be considered for continuing appointment. Must have licensure or eligibility for licensure in New York State, teaching experience in a dental hygiene program and 3 years of clinical practice. Must submit CV and names/addresses of five references by 6/23/2000.

ASSISTANT NURSING PROFESSORS (2)

Must have Master's in Nursing, New York State license or eligibility, college-level teaching experience in multiple areas of an integrated Nursing curriculum, including Medical-Surgical nursing. Ph.D preferred. Doctorate required to be considered for continuing appointment. Must submit CV and names/addresses of 3 references by 6/23/2000.

DEPARTMENT OF CRIMINAL JUSTICE

Teaches criminal justice courses, academic advising, recruitment, scholarly activities and participation in departmental, school and campus committees, continuing education and professional organizations.

We offer a salary based on educational background and years of experience. Send resumes and references to: Dr. John Burtont, Dean, School of Health Sciences and Human Services, SUNY Farmingdale, Route 110, Farmingdale, NY, 11735. FAX: (861) 420-2269. AA/EEO.
THE UNIVERSITY OF ILLINOIS AT CHICAGO

DIRECTOR OF CAMPUS RETAIL OPERATIONS

The University of Illinois is seeking a creative, dynamic manager to be the director of campus retail operations. The successful candidate must be committed to customer service, student learning, employee development, financial success, and facility improvements.

To support the university's academic mission and enrich campus life, Retail Operations provides merchandise, services, and amenities to UIUC's 25,000 students, 12,000 faculty and staff, and the general public. The director is responsible for:

- A 73,000-square-foot traditional college bookstore (annual sales of $18 million)
- Medical, dental, and trade bookstores
- Central stores (for departmental supplies)
- Two computer stores
- Four convenience stores
- Five copy shops and numerous self-service copiers
- Miscellaneous vending services and sales areas

All of these facilities are self-operated and self-supporting. In addition, the director is responsible for leased retail operations.

The successful candidate will possess these qualifications:

- A master's degree
- A minimum of 7 years of experience as a retail professional, five of them as director of a college or university bookstore
- Experience in running a complex retail operation and creating new markets
- Familiarity with the challenges facing retail in the college market
- Strong interpersonal and communication skills

Remuneration is extremely competitive, as is the excellent benefit package, which includes a tuition waiver.

Candidates should send a resume detailing work and educational experience and a brief statement (two double-spaced pages maximum) of their philosophy for directing academic retail operations to:

Ms. Shanae Sissac
Search Coordinator
Campus Auxiliary Services Employment (MC 117)
750 South Halsted Street, Room 703
Chicago, Illinois 60667

For fullest consideration, apply by July 1, 2000.
The Hofstra University Board of Trustees invites applications and nominations for the position of President to succeed Dr. James M. Shuart, who has announced his retirement effective June 2001, after 25 years in office.

Hofstra's exceptionally attractive 240-acre campus is a nationally accredited museum and registered arboretum located just 25 miles east of New York City. The campus is home to Hofstra College of Liberal Arts and Sciences; the Schools of Law, Business, Communication, and Education and Allied Human Services; School for University Studies; Hofstra's New College for personalized, innovative liberal arts studies modeled after the original at Oxford University; and University College for Continuing Education. Hofstra's fully computerized libraries hold 1.6 million volumes. There are approximately 8,000 full-time undergraduate and 5,000 graduate and part-time students from 44 states and 64 countries and more than 1,100 faculty members. Hofstra shares its excellent facilities with the greater Long Island community and hosts a broad range of Division I athletic events in the indoor and outdoor sports complexes. The more than 500 cultural events sponsored each year include international festivals, concerts and scholarly conferences.

The University seeks a leader who will work with the Hofstra community to build effectively on the institution's strengths and to achieve a level of academic standards commensurate with its excellent facilities, fiscal management and community pride. The new President must be able to effectively articulate Hofstra's special attributes to both internal and external audiences. In order to maintain an environment that fosters student learning and a strong faculty community, the President must be able to lead and empower an effective administrative team. Hofstra's next President must demonstrate experience in fund raising, a thorough knowledge of technology and the sciences, and outstanding leadership in all areas, including community relations.

The search committee will begin to review candidates in June 2000 and will continue until an appointment is made. Nominations and expressions of interest, which will be treated in confidence, should be sent to:

Mr. Frank G. Zarb, Chair
Presidential Search Committee
101 Hofstra University
Hempstead, NY 11549-1010

The search committee is being assisted by Dr. Patricia T van der Vorm of Academic Search in Washington, D.C. Inquiries may be directed to her at (202) 263-7473 or ptv@academic-search.org. Please review the Web sites at www.hofstra.edu and www.academic-search.org for additional information.

Hofstra University is an Affirmative Action/Equal Opportunity Employer

Director
NUway Program, Information Services

Northeastern University is currently interviewing for a Director, NUway Program Office. Responsibilities will include directing the three major initiatives of the University’s multi-year NUway program: Web student services applications; university-wide data warehouse and decision support capability; and enterprise-wide PeopleSoft implementation and integration. The Director will also be responsible for managing related business process re-engineering efforts central to successful PeopleSoft implementation. Our current implementation spans Student Administration, Human Resources, and Advancement.

Requirements:
- Minimum of a Bachelor’s degree in a related field, preferably with continuing professional development activities and coursework.
- Minimum 10-12 years management and technical experience to include extensive program and project management at a senior level.
- Demonstrated success implementing major projects via a matrixed management structure required.
- Must have higher education functional and/or technical skills and experience.
- Re-engineering experience, particularly in higher education, highly valued.
- Strong interpersonal team building, analytical and presentation skills required.
- PeopleSoft data warehousing and Web development skills highly desirable.

If you are interested in applying for this position, please send your resume to Denise Siciliano, Northeastern University, 190 Renaissance Park, Boston, MA 02115 or fax to Denise Siciliano, 617-373-2847 or e-mail to: dsiciliano@neu.edu.

Northeastern University is an Equal Opportunity, Affirmative Action, Title IX Employer. Minorities and women are strongly encouraged to apply.

Vice Chancellor for Student Development and Enrollment Management
The City University of New York

The Vice Chancellor for Student Development and Enrollment Management advises the Chancellor on all matters regarding student services and student life. Reporting to the Executive Vice Chancellor, the Vice Chancellor is the chief advisor to the Board of Trustees, the President and the Senior Vice Presidents on student life matters. The Vice Chancellor is responsible for the planning, development, and implementation of all aspects of the recruitment and enrollment process of the University. This includes:
- Providing leadership and direction for the development, implementation, monitoring, and evaluation of comprehensive services to students, including admissions, financial aid, counseling, health care, and other services.
- Working with the Deans and Vice Presidents for Student Affairs in the development and improvement of student programs, including counseling and advisement, to ensure that policies, programs, and services are effectively implemented, and to increase student participation in campus life.
- Overseeing the activities of the University Student Senate and work with the students to professionalize student government across the University and to develop the leadership skills of student representatives in ways that are aligned with student perspectives on academic, co-curricular, and career opportunities.
- Working with guidance counselors and principals in the schools to ensure effective and accurate communication of admissions policies, procedures, and information regarding CUNY programs and opportunities.
- Overseeing all aspects of the undergraduate and graduate admission processes to ensure effective and efficient student recruitment and retention efforts.

Candidates should have:
- A record of outstanding leadership and management skills and a proven track record of academic leadership.
- A minimum of 10-15 years professional experience in student affairs, higher education, or a related field, with a demonstrated record of success in managing large and complex programs and initiatives.
- Strong interpersonal and communication skills, with the ability to work effectively with students who are culturally and economically diverse and with students, staff, and faculty on issues related to student engagement, retention, and success.
- A strong understanding of the University’s mission, goals, and the strategic priorities of the University.
- Strong quantitative and qualitative analysis skills and the ability to work effectively with data and information to inform decision-making.
- A commitment to the principles of diversity, equity, and inclusion and the ability to lead and manage in a diverse environment.

Please forward applications including a letter expressing interest, a curriculum vitae, and the names of five references to:

Ms. Cathy Martinez, Director of Office of Executive Search and Evaluation
The City University of New York
530 East 80th Street, Room 126
New York, NY 10021

Applications should include a letter of motivation and, if possible, the online application form. Review of applications will begin immediately, and positions will remain open until filled. The position is available as of October 1, 2020.

The City University of New York is an EQUAAADCA/Equal Employer with a strong commitment to racial, cultural and ethnic diversity.

Dean of Community Life and Diversity

Newly created position available for a Dean of Community Life and Diversity who will have broad authority and responsibility for fostering and nurturing a campus ethos that invites, values, and affirms diversity and promotes a healthy quality of life in community in support of the strategic plan. The Dean will provide leadership in diversity education, in institutionalizing the college's diversity goals, and in maintaining and celebrating a campus culture where students, faculty, and staff demonstrate respect, integrity, and honesty in community relations.

For more information visit our web site at http://www.stolaf.edu/services/hr

Review of applications begins immediately and continues until the position is filled. Projected starting date: August 2020. To apply submit cover letter, resume and references by fax (507) 646-3960, email resume@stolaf.edu, or U.S. mail to Employment Coordinator at:

PRESIDENT
SAINT OLAF COLLEGE
Northfield, Minnesota

The Board of Regents of Saint Olaf College announces the search for a President to assume office in the fall of 2000 or as soon as thereafter as possible. Saint Olaf, a year college at the Evangelical Lutheran Church in America, provides an education committed to the liberal arts, rooted in the Christian gospel, and incorporating a global perspective. St. Olaf College strives to be an inclusive community, respecting the differing backgrounds and beliefs. Through its curriculum, campus life, and off-campus programs, it stimulates students' critical thinking and heightens their moral sensibility. It encourages them to be seekers of truth, leading lives of usefulness to others. It challenges them to be responsible and knowledgeable citizens of the world.

We seek a leader who will continue to build the high quality and distinction of college's liberal arts programs and the vitality of this educational community for undergraduate students. The President shall be a member of the ELCA congregational
council. We encourage both those who wish to nominate others and those who wish to make nominations of other candidates directly to address correspondence to:

Jerrold Tostrud, Chair
Presidential Search Committee
P.O. Box 968
Burnsville, Minnesota 55337

The Search Committee will respond to all nominations and inquiries, with the exception of those that are received by mid-July and those that are received after the third (3rd) week of July. The committee will evaluate and select candidates for interview.

Saint Olaf College (http://www.saintolaf.edu) is an affirmative action/equal opportunity employer and actively seeks diversity in its students, faculty, and staff.

St. Olaf College (http://www.saintolaf.edu) is an affirmative action/equal opportunity employer and actively seeks diversity in its students, faculty, and staff.

UNIVERSITY OF WASHINGTON
DIRECTOR OF UNIVERSITY LIBRARIES

The University of Washington invites applications and nominations for the position of Director of University Libraries. The University of Washington Libraries, recognized as one of the nation's premier academic and research libraries, is an integral partner in the education, research, clinical care, and service mission of the University. It is a national leader in the development and application of innovative strategies and technologies to meet information and research needs.

The University of Washington Libraries consists of the Suzzallo and Allen Libraries, with collections primarily in the humanities and social sciences; the Odegaard Undergraduate Library, the Health Sciences Libraries; the East Asia Library; 15 specialized branch libraries; and libraries at the UW Bothell and Tacoma campuses. The collections include over 6 million cataloged volumes, several million items in microform and other formats, extensive special collections including the University's Archives, 55,000 currently received serial titles, and a large and growing number of electronic information resources. The Libraries ranks ninth in the latest Association of Research Libraries index and has nationally recognized programs in information literacy and assessment. The Libraries collaborates with Computing and Communications and the Office of Undergraduate Education to provide information technology services and resources to students and faculty, including the award-winning UWired program, and the ARL-accredited School of Library and Information Science.

The Director will have a faculty appointment in the School appropriate to his or her academic credentials. The University Libraries is a member of the Association of Research Libraries, the Center for Research Libraries, the Washington Cooperative Library Project, and several library consortia. Further information on the Libraries can be found at http://www.lib.washington.edu.

Since 1969 the University of Washington has been the nation's leading university in federal funding for research, and total external awards exceed $800 million annually. It is also the preeminent teaching institution in the Pacific Northwest, enrolling an academically selective student body of almost 46,000 undergraduate and graduate students in 16 schools/colleges. Seattle is at the center of a dynamic information industry with special ties to the Pacific Rim. Additional information about the University of Washington can be found at http://www.washington.edu.

The Director reports to the Provost and Vice President for Academic Affairs and is a key administrative leader equivalent to a dean. The Director serves on the Board of Deans and other University policy bodies. The University seeks energetic and visionary leadership committed to the highest levels of excellence in the provision of library services and information resources in support of teaching, learning, and research in an increasingly digital world. The Director must work creatively and cooperatively with the entire university community and the public to create strategic visions of the future role of the Libraries.

Candidates should have at least 5 years experience at the senior administrative level in a major research library including at least 3 years of supervisory and administrative experience. Candidates must understand the academic environment and the issues facing higher education today, have significant experience with information technologies and networked information, and have strong leadership skills, including the ability to promote cooperation and collaboration on and off campus. They must be articulate and engaging advocates, have the entrepreneurial skills to gain external funding and support, and be experienced in managing budgets and other resources. The successful candidate will be able to recruit and develop a diverse and talented staff and will understand current trends and changes in scholarly communication. A record of research, publication, and/or professional contributions is required. A MLS degree from an accredited program is required; an additional advanced academic degree is desired.

Applications should include a resume and a letter of application addressing the position requirements. Names, addresses, and telephone numbers of at least four references should be provided. Applications and nominations received by June 16, 2000, will be given preferred consideration.

Please submit applications, nominations, and inquiries to:
Search Advisory Committee on the Director of UW Libraries
Dean David C. Hedge, Chair
301 Gerberding Hall, Box 351230
University of Washington
Seattle, WA 98195-1230

The University of Washington is building a culturally diverse faculty and administration and encourages applications from female and minority candidates. The University of Washington is an affirmative action/equal opportunity employer.

Visiting Assistant Professor
School Psychology

The Psychology Department at Plattsburgh State University of New York is seeking eligible candidates for a Visiting Assistant Professor position in School Psychology for the 2000-2001 academic year. This appointment is expected to begin on Aug. 28, 2000. The Psychology Department offers baccalaureate degrees in Psychology and the MA and CAS degrees in School Psychology. **HOW TO PLACE ADVERTISEMENTS**

*By Mail—All materials should be sent to: Hispanic Outlook in Higher Education, Display Advertising, 210 Route 4 East, Paramus, NJ 07652*

*By E-Mail—outlook@sprintmail.com*

*By Fax—Transmit to (201) 587-9105 seven days a week.*

*To Confirm—Call (201) 587-8800 (x102 or x106)*

Monday - Friday, 9 a.m. to 6 p.m., EST, to confirm receipt of your advertisement.
AUBURN UNIVERSITY
COORDINATOR OF MULTICULTURAL PROGRAMS

The Office of Multicultural Affairs at Auburn University solicits qualified applicants for the position of Coordinator of Multicultural Programs. The coordinator reports directly to the Assistant Provost for Multicultural Affairs (APMA).

Specific duties include: Supports the APMA’s efforts to recruit and retain critical mass of minority (AA/ADA) students, faculty, and staff; develops, plans, and implements year-round, campus-wide multicultural diversity programs including workshops and seminars; oversees the Minority Student Peer Mentoring Program; conducts yearly comprehensive assessment of DMD Multicultural Diversity Programs; assists other campus constituents in planning and implementing minority recruitment and retention programs; supervises some employees of the DMH; supports student, faculty, and staff multicultural diversity programming efforts; serves on various committees; performs other duties as assigned by the Assistant Provost for Multicultural Affairs.

Qualifications and Skills: A bachelor’s degree, preferably in Intercultural/Cross-Cultural Communication, Counseling, Student Personnel, or Social Work AND at least 5 years progressive experience in developing, planning, implementing, and assessing multicultural and diversity programs at a major university’s college campus OR a master’s degree and 4 years of experience. Candidates must also possess the following: strong programming and managerial skills, ability to develop and conduct effective campus wide diversity workshops and seminars at a major university while upholding strong expertise in developing advanced-caliber programming. Applicants should possess strong interpersonal and communication skills and ability to perform complex, multiple, and time-sensitive tasks without supervision. Experience and interest in working with students, faculty, and staff of diverse cultural backgrounds required. Knowledge of computer applications required.

Auburn University: To learn about the university please visit our website at http://auburn.edu.

Review Date: (No specific date) Position is available immediately and review of applications will begin after July 28, 2000. Salary is very competitive. Finalists’ current employers will be contacted for references before an offer is made. Applicants should send a letter of interest, explaining how their qualifications and experience have prepared them for the duties of the position, and the names telephone numbers, and e-mail addresses of at least three professional references to:

Search Committee-Coordinator, Multicultural Affairs Programs
Office of Human Resources, Langdon Hall
Auburn University, AL 36849

San Francisco State University

SFSU, Kinesiology Dept., Positions Available, Fall 2000

1) Graduate Teaching Assistant in swimming, weight training, and aerobics.

2) Full-Time 1 year appointment. Teach fitness program management, exercise prescription, and internships, and direct the faculty/staff fitness program. Doctorate or Masters Degree in this or related area; 2-3 years experience in fitness assessment program management in university or private setting preferred. Salary: Negotiable, dependent upon qualifications and experience.

3) Part-Time: Teach courses in physiological basis of movement to majors who are planning to teach physical education in the schools. Master’s degree in exercise science or related area, with specialization in exercise physiology required. Doctoral degree preferred. Salary determined by qualifications and experience.

Send cover letter, resume, and three letters of reference to Dr. Susan Higgins, Chair, Department of Kinesiology, San Francisco State University, 1600 Holloway Ave., San Francisco, CA 94132-1461. Application deadline: 7/16/00. Positions to remain open until filled.

SFSU, a member of the CSU system, serves a diverse student body of 27,000 undergraduate and graduate students. The mission of the University is to promote scholarship, freedom, human diversity, excellence in instruction, and intellectual accomplishment. SFSU faculty are expected to be effective teachers and demonstrate professional achievement and growth through continued research, publication, and/or creative activities.
What a wonderful surprise!” Dr. Sandin exclaimed to Dr. Lopez-Cepero. By way of the Clinical Microbiology Network (ClnMicroNet, for short)—a listserv comprised of Ph.D.- and M.D.-level directors of clinical microbiology and virology laboratories across the U.S. and abroad—he had just encountered another Hispanic microbiologist, Dr. Lopez-Cepero.

Unfortunately, this episode was as rare as it was joyful. Dr. Lopez-Cepero, too, can count on the fingers of one hand the Hispanics at her level across the entire U.S. with whom she can interact.

It is lonely at the top for Hispanics in positions of leadership as doctorate-level directors of clinical and diagnostic hospital laboratories. These include immunology, microbiology-virology, chemistry, genetics, molecular diagnostics, coagulation, toxicology, forensic sciences, and others. But there is no reason why this should remain so, given the increasing numbers of Hispanic students enrolled in graduate and medical degree programs. But what does a disciplined science student need to do to achieve the degree, certification, and license required to perform in such a position? Where’s the road map?

Let us summarize the steps required in order to become a laboratory director, using as prototypes the two laboratories directed by the authors. A histocompatibility laboratory director must have an earned doctoral degree (Ph.D.) in biological sciences, or be a doctor in medicine (M.D.) or osteopathy (D.O.) and licensed to practice medicine in the state in which the laboratory is located. Histocompatibility deals with the fields of solid organ and bone marrow transplantation. Subsequent to graduation, a Ph.D. must have four years of experience in immunology or cell biology, two of which must be devoted to formal training in human histocompatibility testing. The director then needs Board certification by the American Board of Histocompatibility and Immunogenetics (ABHI) or, if a physician, the American Board of Pathology or other Board deemed comparable by the Clinical Laboratory Improvement Act (CLIA) standards. The director must show competence in the activities in which the laboratory is engaged, as reflected by external measures such as participation in national or international workshops and publications in peer-reviewed journals. The director must also be available on-site commensurate to the workload of the lab and provide supervision of the technical personnel, develop new procedures as needed, and be responsible for the proper performance, interpretation, and reporting of all laboratory procedures. The supervised laboratory must also be successful in its participation in an external proficiency testing program.

Clinical microbiology and virology laboratory director infectious causes of human disease—such as bacteria, fungi, virus, mycobacteria, and parasites—are isolated and identified in these laboratories. The laboratory director must have an earned doctorate degree (Ph.D.) in microbiology or be an M.D. licensed to practice medicine in the state in which the laboratory is located. If a Ph.D., he/she should then complete an additional one- or two-year fellowship in clinical microbiology, in order to become eligible to take certification exams. If an M.D., he/she should complete a residency program in pathology or internal medicine, followed by an additional fellowship year in clinical microbiology in a certified laboratory program. I should make him/her eligible to sit for Boards in Medical Microbiology.

This road map has been laid out for some time now, and it wets Hispanics eager to accept the challenge and to put their dedication to the task! My wife, Dr. Lopez-Cepero, and I are willing to communicate further via e-mail with any student interested in pursuing this course. Scores of non-Hispanics have accepted the challenge; success and new joined the thrill and satisfaction that come with being able to contribute to the well-being of thousands of citizens by assuming positive responsibility in medical laboratories all across America. IT IS WORTH IT.

Hispanics enrolled in higher education programs in America are or rise. We have got the talent required to enhance Hispanic representation at the highest levels of responsibility and influence within medicine an many sub-fields in this country. We encourage interested candidates to follow the road map. The sky is the limit for Hispanics in these fields!

If interested in submitting a "Punto Final! "think piece," please e-mail us at outlook@aol.com for guidelines.
Students of Color Welcomed and Celebrated
CALL FOR APPLICATIONS AND NOMINATIONS FOR FELLOWSHIPS 2001-2002

THE INSTITUTE FOR THE ADVANCED STUDY OF RELIGION AT YALE

The Institute for the Advanced Study of Religion at Yale, established through a grant from The Pew Charitable Trusts, centers comprehensive interdisciplinary research around the broad themes of American Religion in a rapidly changing world and opens opportunities for scholars throughout the world to confront issues about the role religion has played nationally and internationally.

2001-2002 RESIDENTIAL FELLOWSHIPS

Three advanced scholars will be invited to Yale to pursue individual research and writing within an interconnected environment of seminars, symposia, lectures and scholarly presentations. Fellows will interact with Yale faculty fellows and a wide panoply of staff, students, academic centers and departments throughout Yale.

Fellows will be expected to be in residence from September through May, to attend all Institute functions and to produce significant scholarship individually or in conjunction with other fellows. Fellows will also be given the option of teaching an undergraduate or graduate course.

For the 2001-2002 academic year, the Institute's theme will be American Religion and the Family.

2001-2002 NON-RESIDENTIAL FELLOWSHIPS

The Institute will award between four and eight non-residential dissertation fellowships, research fellowships, and post-doctoral (or first book) fellowships.

Applicants for a post doctoral fellowship must have their doctorate before the application deadline of October 20, 2000. Candidates who expect to complete their doctorate after the application date but before the beginning of the fellowship year qualify for a research fellowship.

Non-residential fellows will be expected to complete their dissertations or first book during their tenure as fellows. They will also be expected to visit Yale twice during their fellowship year, first for the F Fellowship seminar and again for a national conference during the spring term.

Lectures Online
Enter New Era

College professors on campus are trying to adjust to and take advantage of the sharing and storing opportunities that are possible thanks to the Internet. Many teach courses "online."

To support this mode of education, they have begun to post their syllabi, lectures, class notes, and other academic material on the Net. Their students are taught how to access all of that information and other class material, which is available at all hours of the day.

If technology can now make that possible for one professor and one class, why not establish a system that would collect lectures and other relevant material from thousands of teachers?

The dream of creating such a database led to the establishment last summer of lecturesonline.org by Dr. Joshua Kim from the University of West Virginia.

The Perfect Medium

Kim told The Hispanic Outlook that the Web is "the perfect medium for scholars, academics, and educators to share materials, ideas, and experiences."

The site provides the mechanism whereby a professor, regardless of place of residence, can preview, examine, and download academically focused digital work products such as PowerPoint lectures, demonstrations, figures, charts, graphs, and HTML pages.

Lectures, reprints of articles, working papers, and conference papers have been listed in a variety of academic fields. They include business administration, computer science, education, engineering, the humanities, law, and life and physical sciences as well as a number of social sciences.

Lecturesonline.org has been characterized as the equivalent of an ongoing academic conference--one that encompasses all disciplines and one that can be accessed at any time.

A Clear Need

This totally nonprofit site is intended to provide a service to the academic community. The philosophy of lecturesonline.org is modeled after that of the traditional library--nonprofit and easily accessible.

If this experiment takes hold, lecturesonline.org could eventually become a giant searchable database of thousands of digitized academic lectures, educational pages, graphs, figures, charts, and research papers.

The goal of this site is to create a community of professionals who can freely share information and build knowledge together. This site materialized from Dr. Kim's efforts to research new lectures for the demography and sociology courses that he teaches at West Virginia University.

Dr. Kim's relatively new site (creation date 7/22/99) was designed to fill a gap in the academic world: the absence of a website that allows academics to easily find, distribute, and trade educational materials that they produce for teaching.

The Internet is a natural tool for this task as increasingly the material produced for teaching is digital, and therefore easily viewed and downloaded from the Web. Examples include PowerPoint and other presentation lectures made for teaching, subject-specific teaching websites done in HTML, and animations or online tutorials.

The main reason why this site did not exist heretofore might be a classic case of market realities. Since there was no profit to be made in sharing information, nobody had set up a mechanism to do so.

Dr. Kim's hope is that his site "will grow into a place where educators look first to find the basic information and materials they need to supplement their own teaching materials."

To Participate

Educators in all disciplines are invited to submit their own lectures, demonstrations, and course-based webpages while also utilizing materials submitted by other educators.

All materials on the site have been submitted by academics. None of the materials has been uploaded without the author's permission.

You would retain ownership of any material that you submit to lecturesonline.org--it would not be sold or utilized in any way. You can also remove your material at any time. Readers can submit pictures, Web-based education materials, and demonstrations by sending them as an attached document in an e-mail to jkim@wvu.edu or by letting him know the URL he can post a link.

In the brief life of lecturesonline.org, the site has been received by the academic community and the press. Favorable reviews have appeared in MSN and the Washington Post. The American Sociological Association has included lecturesonline.org in its October issue of Footnotes.

Dr. Mellander is a project director at George Mason University.
Minority Students “Exhausted but Inspired”

Tri-College Summer Institute Held at Haverford College

BY

Inés Pinto Alicea

“The truth is, I expected very little from this program,” said Vanessa Askot, an 18-year-old Swarthmore political science major. “All of the diversity workshops I had ever participated in had proven to be complete wastes of time. Tri-Co sent me on a whirlwind tour of intense emotion. The range and intensity of emotions that I experienced within those seven days left me exhausted but inspired.

“Tri-Co truly changed me and the very foundation of my ideas and philosophies. My peers are extraordinary people. Their experience is vastly rich, and what they’ve gleaned from it, even richer. I continue to learn from them and to mold my identity and my personality using the lessons they’ve offered me.”

Askot is commenting on an orientation program that three colleges near Philadelphia—Haverford, Swarthmore, and Bryn Mawr—present jointly every year to boost the confidence of incoming first-year minority students about the college experience and to improve their retention rate.

Sunni Green Tolbert, associate dean for Haverford, says that the program helps the students “figure out how college is organized, what to expect, and what resources they can access on campus.” Tolbert is director of Haverford’s multicultural affairs office and oversees the program for her school. “It helps the students get to know other people of color. They feel very energized and strengthened by meeting and bonding with other people of color.”

The program, called the Tri-College Institute, or Tri-Co for short, is offered to all incoming minority students, but is voluntary. Each year, 75 students from the three campuses participate, and each college takes a turn in sponsoring the week-long session. Tri-Co is held the week before the general orientation for all incoming first-year students.

“The students get a better understanding of how they will function in a college environment and they learn how to deal effectively with the realities,” said Tolbert. “We want to make sure they function well, feel included, and know the resources are there for them. We want to encourage them to take leadership on campus. It gives them a sense of confidence to get through the experience.”

Karen Henry, assistant dean of Swarthmore College and the Tri-Co director on her campus, speaks about the program from personal experience as a student. She participated in Tri-Co in the 1980s and graduated from Swarthmore in 1987. The program then was geared toward exposing minority student to what college academics would be like in the coming years. It lasted six weeks. The focus today is on leadership development.

“I didn’t have a clue as to what college wa
going to be like," said Henry. "You can't prepare students for the academic work in six weeks. Still, it was a great experience for me. I met my best friends there. I was excited to work with the program."

Programming for the Institute has evolved over the years, but generally it consists of seminars, group discussions, field trips, lectures, parties, and leadership workshops that focus on the social and non-academic aspects of college life for students of color. Issues addressed include the stereotyping of races and its effects on academic performance, being labeled "minority" for the first time, leadership training, and coalition building among ethnic groups. The program invites all students of color as well as students from other countries entering their first year at college.

"We look at a number of components of diversity, and we look at it so that it is informative and fun," said Tolbert, adding that the program is one of several designed to help minority students stay at Haverford. Tolbert said that 91 percent of the students of color graduate and graduate on time compared with 93 percent of the white population.

"We feel proud of our retention rate," Tolbert said.

Henry said the program has taken a turn toward leadership development because the students were being asked to take on the role of leaders on campus and the additional training proved helpful. "All of the students who have gone through the program think it's great," Henry said. "We found that these students are leaders on campus on the issue of race, and we wanted to give them the tools to encourage them to be leaders."

Zoila Airlall, director for institutional diversity at Bryn Mawr College, said that many of the students are asked to think about their identity and that of others, an experience that is new for many. "We talk about those kinds of things—race, ethnicity, gender, religion, sexual orientation," Airlall said. "We talk to them about meeting a diverse group of people. We try to give them a better understanding of what they might encounter."

Airall said that after the program is over, the students tell the coordinators the experience was good, but as the months pass by, their excitement over the experience grows even more. "They realize the value of it as the year goes on," said Airlall.

Last summer, Tri-Co was held at Bryn Mawr, and this summer, the 204-acre Haverford College will sponsor it, at the end of August. Haverford is located 10 miles west of Philadelphia in Haverford, Pa. It is a private, coeducational liberal arts institution founded in 1833 by the Society of Friends, better known as the Quakers. Of the 1,100 full-time students, about 20 percent are students of color, according to the college. About 50 are Latino.

Swarthmore and Bryn Mawr are nearby. Bryn Mawr has about 1,200 undergraduates and graduate students. About 25 percent are of color. Swarthmore College has 1,300 students.

Tolbert said that the program involves faculty from the three campuses as well as older students of color from the campuses who serve as advisors. The student advisors are upper-class mentors who will serve as liaisons for the incoming students at each campus, and they undergo extensive training to learn to serve as facilitators. The training is held days prior to the arrival of participants, making the weeks prior to the beginning of the fall semester rigorous for all involved. "It's exhausting," said Airlall. "This is an important message to the incoming students that they are coming into a new environment and all of their hands are reaching out to help them," Tolbert said.

Airall said that an important component of Tri-Co is the work that occurs during the week. Their particular number of participants is small, so it is an opportunity to form a network of support," Airlall said. "It makes the numbers bigger begin to realize that they are not only ones undertaking difficult.

Alicia Muñoz, an 18-year-old first-year student from Los Angeles who participated in the Tri-Co program and really enjoyed the experience. Muñoz said that she attended public school in Los Angeles. She said that 95 percent of the students Mexican American like herself and spent most of her life in the majority group.

"Tri-Co really exposed me to different groups and different economic statuses," Muñoz said. "It allowed me to voice my thoughts and ideas regarding class, gender, and race. It was a wonderful experience. It allowed me to find out with other students of color who were in a similar situation. It was also in a way a real eye-opener."

Muñoz said that she had 18th birthday party during the Tri-Co program and she was depressed about being so far from her during her birthday, but the officials for the program threw her a surprise birthday party and gave her a T-shirt.

"Entering college and adjusting to it is a difficult process," Muñoz said. "Being able to..."
students of color who you can relate to before starting college really makes the transition easier, especially if you’re coming from the other side of the country, like myself, and have no family nearby.”

Muñoz said that through the program, she met two who became her closest friends on campus. Neither one is Latino. “Tri-Co helped me better understand who I am as a person and allowed me the opportunity to interact and learn from others who were not from my race or social class,” Muñoz said. “I personally got a lot out of the experience.”

Representatives from the three campuses say that they constantly reevaluate the program and discuss its future—whether it should be opened to all students or expanded to assure all students of color participate. All agree, however, that the program is here to stay since the three campuses are striving for more diversity.

“The future of the program is bright and secure,” said Tolbert. “There is a real need for students of color to engage in these types of work before getting to campus.”

Airall said that the week-long program costs the schools about $40,000 all together but that if there were a need to expand it to include more students or all students from the three campuses, there would likely be financial support. “It would be more expensive, but I think the colleges would find the money.”

Airall said that the program continues to succeed because the representatives from the three schools cooperate. “The strength of this program is that we work well together. We don’t agree on everything. Our debates last for hours on decisions that need to be made. But that ends up giving us an excellent product.”

Another important key to their success is the support they get from the top of their institutions. Haverfords...
ACT Reports Graduation Rates at All-Time Low

Experts Fault Public Policy Shortfalls

BY MARILYN GILROY

Muraskin's report also notes that these five exemplary programs were staffed by dedicated personnel with strong institutional attachments and that the project was perceived as having an important overall role on campus.

Last month, thousands of public and private two-year and four-year colleges held traditional commencement ceremonies to mark this annual rite of passage. Jubilant graduates and their families joined in celebration of the long road to graduation and the coveted college degree.

But for the most part, these graduates were anything but traditional; that is, very few earned an associate's degree in two years or a bachelor's degree in four years. In fact, for many college students, the road to a degree has gotten longer and now takes at least five years.

This finding and others regarding graduation and retention rates are part of recent and troubling news from American College Testing (ACT), Inc. The ACT report shows that the rate at which undergraduates complete their degrees continues to slide and has now reached an all-time low. The percentage of students who earn a bachelor's degree within five years has dropped to 51.6, half a percent below the figure reported last year.

At two-year schools, the percentage of students earning a degree within three years has decreased to 33.1 percent. Furthermore, of students who entered a community college with plans of earning a baccalaureate degree, only 41 percent had earned a bachelor's degree five years later.

The statistics are even more discouraging when graduation rates are examined in terms of income. Students from high-income families are graduating from college at a much higher rate (69 percent) than are students from low-income families (42 percent).

The only good news reported was that the latest study of student-to-sophomore dropouts in four-year institutions is...

*Of entry. Figures in bold type are all-time lows.
cent, one percent below the high mark recorded in 1996. At community colleges, the attrition rate for 1999 was 44 percent, slightly better than last year. ACT computes this rate by asking institutions to report "the percent of last freshman class who enrolled this fall."

Community college leaders are quick to point out that statistics alone do not tell the story: A certain percentage of community college students begin their studies with the idea that they will transfer to a four-year school as soon as possible. Yet another component of the two-year college population enrolls in courses designed to teach skills such as the Internet, and then moves on to employment or other institutions.

Nevertheless, the ACT annual survey paints a clear picture that one Education Testing Service (ETS) policy report described as a "leak in the higher education system." The ETS report stated, "As the system operates now, higher education dips deeply into the pool of high school graduates with a sieve. The majority leak through before graduating. And it is getting worse, not better."

Moreover, behind those statistics is a trend toward inequality in higher education. ACT, ETS, and the Council for Opportunity in Education all agree: whether or not those who enter college secure a degree is very closely related to socioeconomic status. In addition, findings show that females are more likely to complete college than males, where students more likely than Black or Hispanic students, and younger students more likely than are older.

What is causing the delays in degree attainment and the continuation of large numbers of student dropouts?

"For some time, studies have shown the three primary reasons for students' dropping out of college to be financial problems, inadequate academic preparation, and difficulty adapting to college life," said Wes Habley, director of the ACT Center for the Enhancement of Educational Practices.

"Lately, universities and colleges have been addressing these problems more directly and increasing their high school graduates—now about 67 percent—going directly to college, you also have larger numbers of inadequately prepared college freshmen. These students have more academic gaps to fill before they can make requirements with such as "Consumer Math" than the traditional geometric curriculum to those who are college bound.

Habley points out that factors affecting the drop in retention rates are the increase in student enrollments and initiatives at two-year college current job-heavy market.

"Students in the first year are much less likely to a degree within five years their full-time and four-year counterparts," said Habley. "Economy plays a part by aging students to work hours and take fewer classes."

Thomas G. Mortenson, education policy analyst and scholar at the Center for Opportunity in Education, agrees with Habley. "We have published opinion on the causes of the downward trend, and students and Hispanic enrollment has not been as high as expected. Mortenson has identified barriers to higher education for students and adults, and the financial barrier is financial. The barriers are: academic preparation, socioeconomic status, cultural, genetic, and economic differences, and personal challenges."

"Dealing with any one of these barriers will be tough. Mortenson well-meaning politicians and educators may be the solution, but only part of the picture. Academic preparation, and the academic challenge need to be part of the conversation. We don't design c

"These students will not benefit from merit scholarships, tax credits, and college savings programs that are often proposed as the solution to the higher education opportunity dilemma."

Thomas G. Mortenson

"We are probably seeing the impact of all of these factors in the increased dropout rate of the last two years."

Several factors are likely influencing the continuing drop in graduation rates, Habley said. "With more effort to support and retain students, they satisfied their high school math requirements with such as "Consumer Math" than the traditional geometric curriculum to those who are college bound.

Habley points out that factors affecting the drop in retention rates are the increase in student enrollments and initiatives at two-year college current job-heavy market.

"Students in the first year are much less likely to a degree within five years their full-time and four-year counterparts," said Habley. "Economy plays a part by aging students to work hours and take fewer classes."

Thomas G. Mortenson, education policy analyst and scholar at the Center for Opportunity in Education, agrees with Habley. "We have published opinion on the causes of the downward trend, and students and Hispanic enrollment has not been as high as expected. Mortenson has identified barriers to higher education for students and adults, and the financial barrier is financial. The barriers are: academic preparation, socioeconomic status, cultural, genetic, and economic differences, and personal challenges."

"Dealing with any one of these barriers will be tough. Mortenson well-meaning politicians and educators may be the solution, but only part of the picture. Academic preparation, and the academic challenge need to be part of the conversation. We don't design c
sive public policy. We take one shot and walk away," he added.

Mortensen is especially concerned about students whose ethnic or cultural background has not included a strong tradition of understanding the value of higher education.

"Unless these students come from a community and a culture that values education and has a sense that it is important to get this generation ready for college, many of these first-generation college students might not succeed," he said.

The problem is particularly widespread in the Hispanic community, especially along southern border states such as Texas, California, and New Mexico, where 65 percent of the immigrants are Mexican Americans. Many of these immigrants come to the United States ready to work hard and believe that they will be rewarded for these efforts. However, in today's job market, it is those individuals with the best education and with technology skills who get the best-paying jobs.

Which brings Mortensen to the barrier of information technology often referred to as the "digital divide." Although some policy-makers have called the digital divide a myth, Mortensen says they are very wrong.

"The digital divide is huge and getting--it is growing along income, education, and racial/ethnic lines. The fact is that poorer, less-educated families do not have the technology access and skills that richer families do. As a group, Hispanics have been slower to learn and embrace technology.

And that has profound implications for their employment possibilities.

"Employers don't care where you are from or what your background is. They want to know--do you have the education, training, and skill necessary to contribute to the job? Are you familiar with the Internet? Can you facilitate E-commerce?"

Finding Solutions

So what can be done to increase college retention and graduation rates among the current crop of students?

With studies showing that a third of incoming first-year students are unprepared for college-level work, both two-year and four-year institutions are taking initiatives to deal with the problem. Some, like the City University of New York (CUNY) and the California State University system, have taken measures to exclude students who have failed one or more placement tests from their four-year colleges. Others have become even more vigilant about bringing students up to speed and helping them adjust to college life.

Dr. Lana Muraskin, senior scholar at the Center for the Study of Opportunity in Higher Education, has looked at models for helping unprepared students succeed in college. She examined programs throughout the country and issued a report entitled "Best Practices in Student Support Services (SSS)." SSS is one of the federally funded Special Programs for Disadvantaged Students collectively known as TRIO.

Muraskin looked for projects with statistically significant positive outcomes to see how they deliver services to students. Her study eventually identified five institutions, ranging from a small, rural community college to one of the largest state universities in the nation. The projects at these institutions made a positive difference in retention and success rates and had the following characteristics in common:

- A beginning-student year experience that helps shape the initial experience of the students it serves.
- These programs included an advisement component that encouraged students to enroll in courses where they are likely to perform well and for which academic assistance is available. In general, staff made a point of meeting with students in the summer before the start of fall registration. After school starts, project participants are tracked by what is termed "intrusive advising," meaning advisors monitor students via progress reports from faculty and offer continued career planning activities.

- Focus on academic support for developmental and popular first-year student courses.
- The five successful projects offered courses in basic reading and math skills either in the summer or during the first year. Two of the five institutions included classes in applied skills such as computer literacy and learning techniques. During the regular semester, study groups linked to specific courses and tutoring were also available.

- Maximizing student contact.
- Delivering more service per student is one of the most important characteristics of these five projects. Each one features full-time staff and advisors available for students for considerably more time than is usually allotted. These staff members do not spend large amounts of time on institutional committees or other responsibilities; rather, their time is devoted to student contact and is spent in leading study groups, workshops, and extracurricular activities.

- Targeting and motivating students to participate in student support services.
- Getting students to show up for support services and keeping them motivated is often a big factor in the success of these projects. Participation levels at the five institutions in this study were not an issue because at each site the staff managed to create support services that became a central element in the students' educational life. How? By offering rewards for attending services, by making sure that they are scheduled at convenient times, and by intervening with faculty when students face crises that can negatively affect their performance. In fact, one of the projects ensures that a student who regularly attends tutoring will not fail the course for which he or she is being tutored.

Muraskin's report also notes that these five exemplary programs were staffed by dedicated personnel with strong institutional attachments and that the project was perceived as having an important overall role on campus.

Researchers and analysts hope that more colleges will adopt similar measures to help disadvantaged students stay in school and earn a degree.

However, Thomas Mortensen cautions that even the best college programs can't make up for poor public policy that has left so many students at risk in the struggle for educational attainment. He says that legislators have a "narrow view of their social responsibilities" and feel they have ignored the "ticking time bomb" that shows that by 2012, approximately 40 percent of high school graduates will be minorities, many of whom come from low-income families and have inadequate academic preparation for college.

"These students will not benefit from merit scholarships, tax credits, and college savings programs that are often proposed as the solutions to the higher education opportunity dilemma," said Mortensen. "They represent the growing numbers who cannot pass high school graduation tests. They will continue to be casualties of the system that serves the white and affluent segment very nicely but ignores those who are being left behind because of race and family income."
NEW PRESIDENT OLIVAREZ INSPIRES BY EXAMPLE

BUILDING GRAND RAPIDS' "COMMUNITY'S COLLEGE"

BY JOE BECK

Juan Olivarez is on an incredible journey. One fueled by compassion for people, a commitment to hard work, and an unshakable belief that without community, the individual in society is lost. His life exemplifies his values.

Growing up poor in Texas and in the steel mill town of Gary, Indiana, Dr. Olivarez learned early that a quality education often translates to a higher quality of life. In fact, he is living proof of his philosophy. He now holds the president's office at Grand Rapids Community College (GRCC). He credits his family with instilling in him a respect for education and community.

"I was very fortunate to have people around me in my family to encourage me," Olivarez remembers fondly. "My mother told me to stay off the streets and study hard. My father is a wise man who was always a source of inspiration," he noted. "When a young person is encouraged and given the confidence they need to succeed, it makes all the difference."

Ever true to his values, Dr. Olivarez continues to offer the same encouragement and support he was offered as a student to GRCC students, faculty, staff, and members of the Grand Rapids community. His role as a college president enables him to give back what was given to him.

"Officially, as the CEO of the College, I report to a seven-member elected board. I see my job as a conductor of an orchestra. Our staff and community members are people who we engage in it. As the conductor, I am continually aware of what benefits the students. In this way, things are connected, and there is cohesiveness. It makes the orchestra sound good," he said.

His practice of giving back young people, particularly the Hispanic community, helped the Latino Congress 2000, an event he hosted on the GRCC campus last fall. The event proved to be the largest gathering of Latino youth in west Michigan history.

Lea M. Tobar, the Latino Congress 2000 facilitator, summed the day succinctly. "On this day, showed the larger community how powerful Latinos are, and we did so using our cultures at their best."

The vision of the Congress: to recognize and celebrate Latino youth leadership development for a better tomorrow. The goals: to empower Latino youth leaders; to bring together high school and college students as leaders to create their future; to unite Latino youth in Michigan to strengthen their sense of community; to bring together the community to create better relationships of understanding and acceptance: to celebrate Latino self-pride and self-worth.

As a leader, Olivarez understands that the best role models to follow are those who are examples. His time spent at the Congress, for example, served as a model of his commitment to young people. In Lea Tobar's letter of
Olivarez, she wrote: "Your gift of time to the students is another example of demonstrating how important you believe our youth are to our future. We look forward to seeing you next year."

Chances are, they will see Olivarez next year. His experience as a teacher stretches too far back to let him stop now. He started his career in 1971 as a teacher with the Grand Rapids Public Schools. He continued to work for the school district for twenty years, while spending two years with the Detroit Public Schools. It's a job that Olivarez loves.

"I started my career as a teacher, and I loved it. My success in education helped me to accomplish many things, like helping to continue to preserve our culture," he said.

Through these years of experience, Dr. Olivarez has held positions as a school psychologist, supervisor of special education, director of high incidence programs and services for special education, and executive director of research and development.

In 1991, he became dean of institutional research at Grand Rapids Community College and, in 1996, was promoted to CEO of the Community Learning Enterprise. Dr. Olivarez was appointed president of Grand Rapids Community College in February 1999.

Olivarez typically goes above and beyond what is required. It's in his nature. And many awards have come his way, among them 1999 Distinguished Community Trustee Award from Leadership Grand Rapids, the Executive Leadership Institute Award for potential community college presidents in 1998, and Master Presenter Recognition from the National Institute for Staff and Organizational Development.

Despite his intense schedule as CEO of a community college with an enrollment of more than 13,000 students, President Olivarez makes time to serve many state, local, and national educational and civic organizations. He is currently a board member with Delta Strategy Advisory, Kent County Workforce Development, Manufacturers Council Board, Grand Rapids Chamber of Commerce, Life Guidance Services Board, Student Advancement Foundation, Van Andel Public Museum Foundation, and Heart of West Michigan United Way; and he works too with the Woodrick Institute and the Hispanic Community Forum.

The very college where he is president represents diversity and opportunities that Olivarez welcomes. "The College is ethnically and racially representative of the community it serves," he notes. "The College is made up of approximately 13 percent minority population, which makes more than 70 percent a non-minority population. Our major focus is diversity, which makes the College experience vibrant and exciting," he concluded. In fact, contributing to the vitality of the community is part of the vision and mission of the college that Olivarez heads.

President Olivarez believes strongly that the community's ownership of the College is an important element of its future success. In the January 2000 issue of the College newsletter, he commented on the board trustees' approval in November '99 of the new "Mission, Vision, Ends at Values," calling them "defining statements of who we are, what we do, how we will accomplish our mission and our shared sense of values." And in his comments, the facilitator and communicator in Olivarez comes to the surface. "These statements represent the work of many community members, students, and employees who participated in the Board's ongoing Strategy Conversations." He also conveys his vision of the role of the College.

"To meet the needs of the future, we must grow beyond being the "community college" to becoming "the COMMUNITY'S COLLEGE.""

"Through the years," he wrote, "our open enrollment policy has greatly diversified the students we serve. We remain committed to offering diverse opportunities and to creating winners for every individual who chooses to invest in their futures with our institution."

"[W]e must find new ways to create educational opportunities for even greater numbers of individuals, removing whatever barriers stand in the way of developing winners."

Olivarez's message also includes the promise of personal and institutional accountability, as did his inaugural address on October 20, 1999.

"The COMMUNITY'S COLLEGE must be held accountable for providing a workforce that is large enough and dynamic enough to meet and exceed economic demands. The COMMUNITY'S COLLEGE must take a leadership role in: retraining the existing workforce for new jobs; bridging the transition from grades K-12 into postsecondary education; and preparing retirees to re-enter the workforce in new roles."

The community, and all the parts that comprise it, must work together according to Dr. Olivarez. "No single organization can ever do it all, but the COMMUNITY'S COLLEGE must act as a catalyst to connect all the pieces of the lifelong educational cycle. This will require moving side by side with new levels of collaboration and relationships," he states.

Dr. Olivarez's closing comments reflect the character and humanist values that continue to propel him on his fantastic journey.

"At the COMMUNITY'S COLLEGE, our shared values challenge us to focus on innovation, creativity, diversity, and collaboration. Our vision is focused enriching the lives of people and contributing to the vitality of the community.
Texas School Answering the Call

Austin Community College Embraces Diversity

BY
ELVA CONCHA ALLIE, PH.D.

A few months ago, I was at a lunch meeting with a group of Hispanic professionals and community leaders. Present were a college president, a college administrator, a public school administrator, two attorneys, a banker, and a city official. The purpose of the meeting was to identify possible solutions to increasing the graduation rate of Hispanics from secondary and postsecondary schools.

As we went around the table sharing our own educational experiences, our stories were remarkably similar. We had been poor as children, we struggled to adapt to the public school culture, some of us had to learn English, and all of us started our postsecondary education at a community college. Our reasons for attending community colleges were also very similar. The community colleges provided a quality education for the lowest cost, the open-door policy meant that students at different levels of readiness for college-level coursework had a chance to earn a postsecondary degree, the student population was more diverse, and college personnel and services were student-oriented. The community college experience gave us a chance to learn about other cultures, to acquire a better understanding of our culture while obtaining the knowledge and skills needed to move ahead in our education and careers.

Having said that, we still have a long road ahead of us in terms of educating our Hispanic population. Hispanics are greatly underrepresented in colleges and overrepresented in dropout rates from secondary schools—and in poverty. Increasing the number of Hispanics who graduate will benefit everyone because diversity is a resource. The power of creators rises with diversity and diverge.

Recently, Stephen Sore, Dominic Brewer, Stephen C., and Eugene Bryton release a RAND report entitled "Increasing Hispanic Participation in Education: A Desirable Investment." The report quotes 1990 U.S. Census as having that 78 percent of native Hispanics ages 22-24 completed high school, compared to...
84 percent for whites and Blacks. According to the authors, only 12 percent of Hispanic 22-year-olds have earned a bachelor’s degree. That is less than half the rate of whites. The report went on to state the obvious: direct correlation between low high school graduation rates for Hispanics and low enrollment rates in higher education, which has a residual effect on enrollment rates in professional or terminal degree programs.

Austin Community College (ACC) shares a common belief with other community colleges that diversity in their students, faculty, and staff is important for them to fulfill their primary mission, which is to provide a quality education. The College is currently attempting to increase diversity on its campuses in order to mirror the rest of the community.

In education, we frequently talk about the issue of readiness to learn to change attitudes and eventually change behavior. All of the variables have come together in creating this readiness to view diversity as an asset. ACC is taking several measures in addressing this important issue.

First, the board of trustees and top-level administrators have shown leadership and taken bold steps. They are committed to the mission of the college, which centers on the values of quality, flexibility, accessibility, and diversity. The board of trustees and the president continuously communicate the importance of recruiting minorities, and they address resistance to the frequently heard statement that “qualified minorities are difficult to find.” Clearly, top management is having to be courageous, hire minorities, and work toward giving them the support they need to be successful. The results have been significant in that of the three executive vice presidents at ACC, two are Hispanic women. The overall percentage of administrators is 66 percent white, 17 percent Hispanic, 14 percent Black, and three percent Asian. In terms of the faculty with supervisory responsibilities, the College is 62 percent white, 25 percent Black, and 13 percent Hispanic.

The board of trustees also expresses its commitment to diversity through policy. The purchasing policy, for example, directs that “In all purchasing and contracting decisions, employees shall make diligent efforts to include Historically Underutilized Business (HUB) vendors and shall, where practicable, avoid practices that tend to exclude the participation of minority-owned and women-owned firms in all phases of its procurement processes, supporting their efforts to compete for college business.”

Second, at the grass roots level, College personnel from student activities began a diversity initiative called “Campus Dialogue on Race and Diversity.” While the entire college community was invited, the program organizers envisioned students as being the primary participants and events to recruit students from diverse backgrounds. One example is the Latino Literary and Arts Festival held each fall. This past year, poet Arlene Sze, journalist Ruben Martinez, and film documentarian Hector Galan were keynote speakers during the two-week festival.

• appointed the Taskforce on Minority Recruitment and Retention to develop, implement, and evaluate a plan to improve the recruitment and retention of minority students.

• established academic links with secondary schools by initiating Early College Start programs that allow students to earn college credit prior to completing high school. Students from area public schools may take these college courses free of cost, which makes postsecondary coursework accessible to everyone. These academic links with secondary schools ensure a seamless transition from secondary to postsecondary institutions. Students who have earned some college credits prior to enrolling as a full-time student are more likely to continue their education.

• initiated articulation agreements with four-year institutions to facilitate the transferring of college credits. As community colleges make a deeper commitment to serve the needs of all of their students, articulation agreements are becoming more prevalent. Established between two institutions, the agreements identify which community college courses will transfer for credit to the other institution. For many students, the community college is just the beginning point for
their higher education. Articulation agreements help to ensure that it is not their stopping point.

- initiated participation in the Texas High-Tech Workforce Partnership, a consortium of higher education institutions working in collaboration with the private sector to address the training, education, and applied research needs of high-tech firms. The initial focus of the partnership includes colleges and firms from Waco to Laredo. Partnerships such as this one can potentially provide access to workforce education in high-tech for Hispanics and other minorities.

- encouraged young Hispanics and other minorities to participate in team building programs such as "If I Had a Hammer" to ensure that our college campuses are part of their comfort zone long before they reach college age.

Fourth, Austin Community College is increasing its ESL and Foreign Language programs. ACC is addressing the increased demand for ESL in several ways—through adult basic education, continuing education, and credit courses that prepare students for college-level work. During academic 1997-98, Hispanics made up 59 percent of the 10,106 adults registered for ACC's adult education program. Hispanic immigrants in the workforce have increased substantially, creating interest and a need on the part of many native English speakers to learn Spanish.

Fifth, Austin Community College has a strong commitment to workforce education and has strong partnerships with business and industry. Organizations throughout Austin are very aware that they cannot afford to overlook talent, whatever the color or creed. They agree that talent is talent and must be nurtured, rewarded, and cultivated. Consequently, business and industry are supporting ACC's diversity efforts. Our workforce education programs, such as the semiconductor manufacturing technology and nursing programs, have student populations that are very diverse and mirror the community.

While the commitment to diversity is clearly present, the College still has much to do before reaching its goals of having a community that is comfortable with diversity and looks like the population that becomes more and more diverse. When you have diversity, you also might have individuals working together who have fundamental differences in the way they view the world. The positive aspect is that you will come up with superior solutions to challenges because collective intelligence is far more powerful than one person making a decision.

REFERENCES

Dr Elva Concha Allie, vice president for instm. affairs at Austin Com College since July 1999, re B.S., Masters in Educati Ph.D. at the University of Texas. She completed post work at Texas A&M Univer participated in leadersi grams sponsored by the Community College Council of the At Association of Colleg Schools and the Wharton University of Pennsylvania.
There have been great changes at Richard J. Daley College in recent years. Even alumni do double takes when they return to their alma mater for a reunion. First, there are small new touches. Today, hallways are decorated with large plants. Photographs, art reproductions, and historical maps decorate the walls. And there are more prominent alterations. The cafeteria is lavishly painted in bright colors, highlighting copies of major twentieth-century works of art. New laboratories and specialized classrooms have appeared. There is even a new faculty and staff of tearing down the Polaski Road fence, taking out a few tennis courts, and creating a landscaped urban campus.

Richard J. Daley College is about transformation—and about growth on so many levels. It's had a good reputation and has long been a highlight of Chicago's Southwest Side, but new ideas and opportunities, and changes in demographics, make for development in the physical campus as well as in the educational programs. And the new look on campus is in many ways related to the new look among the student body for whom the school has instituted new projects and programs. A fact is that Richard J. Daley College has moved in recent years from an institution of predominantly African-American students to one serving a majority enrollment of Hispanic students. Most were born in Mexico and other Spanish-speaking countries.

The Southwest Side of Chicago is a focal point of cultural and Daley College has been adapting. Once the College was partly "South Side Irish" or European in family origin. Now the idea is multicultural in nature. The enrollment—at 56% Hispanic, 22% African American, 19% Caucasian, and two percent Asian American—makes for a unique urban environment, a great story, and a most worthy Honor Roll inductee.

Dr. Mark A. Warden says that serving as interim president of College "is an enjoyable and fascinating experience." He adds, "Not only do I enjoy the college community, but as a nearby with extensive experience with Hispanic language and culture, I appreciate the opportunity to serve College at this important time in its history." Warden says that students College are "a portrait of Chicago"—they range, he says, from school kids to mothers whose are now in school, from working adults upgrading their skills to citizens with a lively interest in immigration. Immigrants from Mexico, Central and South America, and Poland—and with long-timers whose families came to try two or three generations ago—Warden notes that he is
Mark A. Warden, Richard J Daley College interim president

about the faculty at Daley College and impressed by the energy and enthusiasm they bring to the classroom. "We have been especially fortunate in adding to the faculty this year," says Warden, "One of our new hires is Dr. Ricardo Lorenz, a Venezuelan-born composer and musicologist with his doctorate from the University of Chicago. Dr. Lorenz has a splendid background as a composer—his works have been performed in Europe and South America as well as in the United States. Working with the Chicago Symphony Orchestra, the Mexican Fine Arts Museum, and the Hispanic community, he has developed a program that brings together the classical European tradition of music and the folk music of Mexico. It was through this program that we had a performance this year of the Chicago Symphony Orchestra Brass Quartet with Sones de Mexico, a traditional Mexican band. Also, he notes, "he is another bilingual addition to our staff and faculty."

Richard J. Daley College was founded as Bogan College, established as a Southwest Side branch of the City Colleges of Chicago in Bogan High School in 1960. This was a modest beginning, with slightly more than 1,000 students mostly part-time, taking evening classes taught by part-time instructors. Bogan's expansion was rapid. It quickly outgrew its limited space, spreading east along 79th Street in trailers and storefronts. Demands for day classes were increasing. In 1970 having acquired fourteen acres on Pulaski Road, the City Colleges of Chicago opened its full-time school on an "interim-campus" of six prefabricated buildings and four trailers. The school was named Southwest College because it was a college for the Southwest community, a school for the neighborhood, for those whose jobs and families prevented them from seeking a college education on a university campus. Plans were in place for a $20 million facility that now serves only the Southwest community but the entire City of Chicago.

In 1977 the institution was named for the man who laid the plan and broke the ground for the school—Chicago's six-term mayor Richard J. Daley. It was Daley's commitment to the residents of Southwest community that made the College a reality. Mayor Daley did not live to dedicate the new building when its doors opened 1981. It was named for him one week after his death. But his ideals and aspirations for the institution and for the people of Chicago are said to be "embedded in its walls."
Daley College has committed itself to the changing workplace by major investments in computer technology and computer-assisted instruction. Fifteen Pentium computer labs at the main campus support students with cutting-edge technology. For this effort, the Illinois Community College Board recognized the College with the 1998 award for Excellence in Learner-Centered Instruction.

Top graduates of area high schools enroll at Daley for its honors program. Its honor society is rated among the top 20 Phi Theta Kappa chapters in the nation. Daley College maintains close ties to its surrounding communities. Hospitals throughout the area are staffed with graduates of its highly rated nursing and allied health programs.

Local Industries depend on Daley for graduates trained in manufacturing technology. The West Side Technical Institute, a satellite campus, has extended its technology-based programs to growing communities of Chicago’s West Side. Seventeen hands-on labs at the Institute prepare students for employment in fields ranging from horticulture to computer-assisted design and manufacturing.

Full-time faculty number 79 members, and the school has 2,810 credit-earning students. There are also 609 pre-credit, 416 continuing education, 1,665 special interest, and 333 adult special skills program, 245 vocational skills, and 157 manufacturing technology students. That makes for an unduplicated total of 11,219 residents served. Daley College ‘offers university-bound students a solid liberal arts education in their own neighborhood at a cost that working people can afford.’ Through its many programs, it continues to respond to the changing needs of Chicago and its people by augmenting traditional studies with the technical, career, and occupational curricula needed for today.

Another important service to the community is the Adult Learning Skills Project, offering free literacy and bilingual English classes that help more than 5,000 students. The ‘Amigos!’ Project is a program at Daley for enhancing cross-cultural learning in the urban community college. The ‘Amigos!’ Project brings together English as a Second Language (ESL) students and Spanish-language students, combining classroom and PC instruction with personal conversation—the oldest form of language instruction. Students are prizing this method, while achieving high grades. Equally important, ‘Amigos!’ creates a positive social dynamic, which promotes cross-cultural understanding.

Essentially, ‘Amigos!’ brings together students with complementary educational needs. One group is composed of college-credit stu-
dents who wish to learn Spanish. Most of these students were born in the United States. The second group contains ESL students, primarily Hispanic, born in Mexico or Central America. The students in this group have emigrated here and need to learn English. ESL students are in a non-credit program in preparation for college. It has found that the College and ESL students have much in common; a combination of traditional instruction, peer interaction, and real-world learning forms a strong learner environment—a solid foundation for both student groups.

Daley’s Bilingual Engineering Program, one of only four nation-wide, works with two universities in Puerto Rico to train bilingual engineers. The program has a "two plus two" bachelor's degree, which students begin by achieving a two-year degree at Daley College by completing the program in Puerto Rico. The high demand for bilingual professionals by corporations in America and the international business community continues to make for opportunities for students trained in such programs.

The National Bilingual Engineering Program, in cooperation with the Hispanic Alliance of Chicago and Universities, is currently recruiting students from public schools for the Bilingual Engineering Program and Associate in Arts in engineering at College, students on either Turabo University or at the Polytechnic Universities in San Juan, Puerto Rico. Scholarship aid is available.

Students from Daley College recently won the "Outstanding Delegation" award at the annual Model Illinois Governor Competition, held in Springfield, Illinois. In the 22-year history of the program, Daley is the only school to win in its first year of competing. Four of the five students in the delegation are Hispanic, especially proud of this accomplishment," said Dr. Warden, a physicist. "Most people know very little about state government and many of the crucial issues affecting Chicago are decided at the local level. This award shows that our faculties are not only addressing issues in the classroom but are involving students in the real world's level of how government works. The delegation includes Joseph Barnett, Alfonso Santon, Maria Centeno-Claudy and Mildred Grange and one faculty advisor, Constance instructor of chemical science.
Hispanic Keynoters Spirited at Garden City CC Conference

By Steve Quakenbush

"If there's anything that's important in America today, it's learning how to work together. That's linked to the quality of life for every child in this country, regardless of any element of culture." Dr. Jeannie Chavez-Martinez opened the 9th Annual Five-State Multicultural Conference with those words March 30 in the ethnically diverse Southwest Kansas community of Garden City.

The conference is hosted annually in the town of 30,000 which has grown dramatically over the past 20 years, due primarily to immigration from Mexico, Central America, and Southeast Asia. People are drawn to it to learn ways of thriving on diversity as their own communities change, and Chavez-Martinez had plenty of advice to share.

This year's event attracted 250 from all across the nation to focus on Garden City's success in adapting to ethnic and cultural diversity. The primary conference sponsor was Garden City Community College. Co-sponsors were Unified School District 457, Garden City, Finney County Research and Extension, an affiliate of Kansas State University; GCCC TRIO Programs; the Garden City Cultural Relations Board; and the Finney County Convention and Tourism Bureau. Support also was provided by Blue Cross-Blue Shield of Kansas.

Speaker Chavez-Martinez leads the Multicultural Resource Center at Pittsburg State University, the opposite side of Kansas, and has built a reputation both for discovering the roots of prejudice and working to eliminate them. "We are the past, we are the present, we are the future," Chavez-Martinez said. "Our challenge is to determine the direction of that future. You are the change makers."

In illustrating the diversity of her listeners, the professor had each person list five elements of his or her own "identity molecule," ranging from family, heritage, and education to religion, gender, and age, as well as personal values such as non-violence.

"If I've learned anything over the years," the scholar and grandmother explained, "it is that everything is connected. The things we are and the things we learn are not all programmed."

Prejudice is a learned trait. Often, she added, the facts that an individual picks up from experiences of childhood and later life might be facts at all, but simply well-enforced beliefs that provide comfort in the face of change.

"Don't be afraid to step outside your comfort zone into new experiences," she urged. "Change is on the way."

Among the most dramatic changes will be the face of America's population. The proportion of those projected for the year 2040, when 40 percent of the nation will be non-white. At that 50-year period, she said, the Euro-American population will rise by 13 percent the same time, African Americans will increase 50 percent; Hispanic Americans, 200 percent; and Asian Americans, 400 percent.

Prepare for the Future

While the population changes, the world is shrinking and growing more interdependent due to advanced travel, telecommunications, the Internet. "So," she said, "we must prepare our children. That preparation includes:

- Throwing out the idea that one language per person is enough. "The U.S. is one of the few countries where the majority of residents are not bilingual," she said, asking, "Why do we at a having a second language as something that's not an asset?"

"Our kids and grandkids won't be able to compete in the future if they're not bilingual, so economic issues," she said. She expects bills to find better job opportunities, as well as higher pay, and believes that everyone should work toward greater language diversity in schools.

- Breaking down barriers. The speaker daughter was told years ago by a seventh vice principal that her Hispanic name was a handicap and that she could be more successful changing it. "That," Chavez-Martinez said when I decided to stop accepting barriers that children start n
differences between people at the age of two and began to internalize reactions to those differences by five. One example of the wrong messages that these children receive, she said, are television programs that characterize minorities and the poor as the individuals most likely to be handcuffed and taken away by police.

The experiences of a Nigerian student at PSU, she said, serve as another example. Fellow students were dead serious in asking him whether he wore a loincloth at home and whether lions roamed there at will. "That's what the TV shows them," she explained. "A lot of students even think of Africa as a country, rather than as a continent."

- Realizing that shame is a mortal wound—Stereotyping by race can become a self-fulfilling prophecy and can prevent people with minority backgrounds from succeeding. The speaker said she came to that realization when appearing in a panel discussion with women of Latino, African American, and Jewish backgrounds. All of them, she recalled, shared accounts of pain and suffering as members of minorities.

"The question isn't really why more Latino kids don't graduate," she said. "It's—excuse my language—how the hell do so many of them graduate?" Besides telling minority children that their names were handicaps, school officials have also created numerous other barriers, she said.

In the case of the presenter's grandchildren, one teacher even assigned classroom grades on the basis of what friends each student associated with. To combat this, Chavez-Martinez suggested that each parent evaluate his or her own beliefs, as well as involve children in their communities and make them proud of that involvement.

"We shouldn't just tolerate diversity," she said. "We should embrace it."

- Avoiding top-down solutions and approaches—The educator pointed out the way schools tend to ignore differences among children and their heritage, too. Her own schooling included pre-conceived history book explanations about America, but those clashed with her true background.

"My father was from Mexico. My mother was born in Wales, had family from Dublin, and was raised in London," she explained. "What they told me about the Alamo in school certainly wasn't the same as what I learned at home. What they told me about the American Revolution wasn't the same either."

Chavez-Martinez also disputed the textbook notion that no significant history took place before the arrival of Columbus in what is now the U.S. "I'm sorry, but there were people here before 1492, and our kids know nothing about them," she said. "When you study history in school, and your history isn't there, it gives you the impression that you're a non-item—that you're not important." She cited the example of her own father, a veteran of World War II and the Korean War. He fared poorly in traditional school, largely because of language and other barriers. But it was the schooling, rather than the student, that deserved the blame. The same man went on to earn his GED, and also to graduate from college.

- Appreciating race and religious diversity as a means of success for all—Chavez-Martinez lives the stories of children's lives in the ghettos of today.

"We had better do something about it, or it's going to impact not just us, but the lives of o children," she said. Chavez-Martinez concluded by outlining her personal response to the 20th Census form. When it came to questions about race, she simply wrote down "human."

"Don't accept all this stuff that divides us," she said. "We are all one people."

Defining Themselves in America

Hispanics are changing the nation, and the nation is changing Hispanics. That was the message brought by the March 20 keynote speaker, Rog Hernandez, a syndicated columnist whose King features column is carried by 50 U.S. newspapers.

The nation's political right and left have damaged the interests of Hispanic America, Hernandez said. Conservatives have stereotyped Hispanics as gang members, welfare cheats, illegal immigrants, while liberals have portrayed them as poor, oppressed, and unable to compete or succeed.

Both views, he emphasized, are invalid stereotypes that serve someone else's political interest. Both will continue, he added, unless Hispanics stop allowing themselves to be defined by others.

Cultural Group, Not Racial

Hernandez, whose presentation took place in a community known nationally for diversity, said that Hispanics themselves are a cultural group, not a racial group such as African Americans, white Americans, or Asian Americans. He cited examples of diversity within Hispanic ranks, such as Hosto, San Antonio's President Benito Juarez, whose background was native Indian; President Albe Fujimori of Peru, who is Hispanic with Japanese ancestry; and Carlos Menem, former president Argentina, who is Hispanic with Arab ancestry.

"Hispanics can be black, white, Asian, or of combination," he told the crowd. "They can Mexican, Cuban, African. They can be Jewish. "

The terms Hispanic and Latino mean different things. One is in explaining the need for Hispanics to define themselves. Someone who is Hispanic shares the language and cultural characteristics of Spain, even though he or she might differ greatly from people in other Hispanic groups or nation.

"Cinco de Mayo is a Mexican holiday, but means absolutely nothing in Bolivia," he pointed out. Latino is a broader term. Latin American countries derive what they have in common from a European heritage, as far as the more Roman Empire, mixing that heritage with indigenous elements.
culture. Latino culture in Cuba, he said, might include African and Spanish influences. While in Argentina, the mixture could incorporate Spanish and Jewish heritage. Mexican culture, meanwhile, is a mixture of Spanish elements and those of indigenous peoples from the era before Columbus.

Columbian Commonality

It is the legacy of Columbus—which he described as a mixture of pride and pain—that all Hispanics have in common. "I think of October 12 as the birth of Latin America," he explained. "It was a painful birth, but it is our birth. Latin America did not exist before Columbus arrived."

Among the common inheritances of Hispanics is the Spanish language, he said. While the language and culture of Spain were forced upon pre-Columbian cultures in Central and South America, the culture also produced artistic and literary giants such as Picasso and Cervantes.

Beyond defining themselves and taking pride in their heritage, Hernandez said, Hispanic Americans need also to make their place known in America. He told the story of going as a child with his family from New York to Philadelphia because his father wanted to see Constitution Hall and the Liberty Bell.

Standing before the great bell, he said he sensed the freedom it symbolized. At the same time, still clear in his memory were images of machine gun-toting soldiers who had intruded into the family's former home in Cuba. The troops had been sent to inventory the households possessions once the Castro government learned that the family planned to leave for the U.S. The soldiers literally counted and listed every item in the house, right down to the number of forks in a kitchen drawer. The contrast is still clear to Hernandez. Despite racism and patronization in the U.S., liberty remains a promise that can be fulfilled.

Attaining that fulfillment requires the definition and understanding that Hernandez advocates. He sees opposition to bilingualism as nothing more than hostility toward immigrants, but also believes affirmative action is a damaging and misguided effort.

He spoke strongly against English-only initiatives, calling them "nativism," as well as useless. "English does not need to be made the official language," he said, "because it is already the most widely used language and is in absolutely no danger of the national language." He also pointed out that in 1900, the foreign-born percentage of the American population stood at 15 percent. In 2000, it was just eight percent. He acknowledged that affirmative action has protected individual rights. "But it's not worth the price," he added. "Because it labels people in certain groups as more disadvantaged than others." In reality, he said, an individual Polish immigrant, an Appalachian high school dropout, and an immigrant from Mexico might share equal challenge and adversity, so it's wrong to apply affirmative action only to the Mexican immigrant.

"But the end of affirmative action should not mean the end of equal opportunity," he stressed. "So the thing to do is refocus affirmative action on the disadvantaged, regardless of race." That, he said, would meet opposition from both left and right ends of the American political spectrum.

Hernandez also shared reflections a answered a number of questions from his listeners:

- The Garden City community, with near percent of its residents from Hispanic backgrounds, was a surprise to the journalist. "East, people don't think of Kansas as a diverse place," he said, drawing knowing laughter from the crowd. "But my impression is that people are really trying to get along and it's not something you see in many diverse communities." The town is said to have a long-established families and immigrants with Mexican heritage, as well as a Mexican-American, Vietnamese, and Latinito presence.

- "Hyphenated Americans"—such as those define themselves as Mexican American, American, or African American—amend to participate in culture. Instead, they're simply being part of their heritage. "We've had hyphenated Americans since this country was born," he said.

- Urban gang members have accepted the notion, wrongly, that being Hispanic is being part of a gang.

- On Cuban-American relations: "The nation should not be how we can improve relations with Cuba. Our task should be in helping bring democracy to the people of Cuba."

- On Cuban tourism by Americans against anything that strengthens Castro's regime: "I am in favor of American vacations in Cuba," he said.

- On presidential politics, Hernandez disagreed with Bob Dole's statement that immigration during the 1996 election would be a major issue. He perceived as catering to the right rather than encouraged to see and hear George W. Bush's newly announced policies.

- Hernandez himself suffered little discrimination as a child, at least from what he called "good old boy racism." Today, he receives letters from ultra-right proponents attacking what he writes in his column. The discrimination that he did face, Hernandez said from the left. "I got it from people who thought that because of my name, I needed extra help." What he realized while growing up, Hernandez said, was that people can offer assistance and more confidence and respect. Today, he explained, he doesn't have to paper to carry his column because he thinks he needs the support, but because others want to hear what he has to say.
Santa Ana Men’s Soccer Team
Voted “Numero Uno”

BY ED BRENNEN

Some people celebrate a national championship by going to Disney World. Others simply take a few days off to enjoy the fruits of their labor. But not Justo Pastor Frutos.

One day after his Santa Ana College men's soccer team put the finishing touches on its first-ever community college national championship, on November 28, 1999, Frutos was back on the soccer field, scouting high school talent for the 2000 team. "That gives you an idea of the kind of work that you have to put forth to get these kind of young men," says Frutos, who has been working at Santa Ana for the past 17 years.

But to Frutos, it doesn't always seem like work. To the 58-year-old native of Asuncion, Paraguay, having the ability to influence young lives seems more like a privilege. Winning a national championship is certainly a nice reward, but it isn't what motivates Frutos as a coach. He is much more concerned about what becomes of his players long after they've hung up their Santa Ana uniforms.

After the Dons wrapped up the 1999 national crown, one of Frutos' players, midfielder Jose Retiz, seemed to understand this perfectly. While he was thrilled to have won the national title, he understood that there was still so much more to accomplish. "It was just our year," Retiz said. "This is the happiest moment of my life...so far."

Put It to a Vote

Unlike many college sports, there is no national championship game to determine the top men's community college soccer team. Instead, at the end of the season, a vote is taken by two-year college coaches to establish the final national rankings. And when the National Soccer Coaches' Association of America/Adidas Men's Div. III rankings were released Dec. 10, 1999, Santa Ana was the unanimous No. 1 pick, thanks to its perfect 25-0-0 record.

"It's extremely gratifying to see that somebody notices and that effort is rewarded," Frutos says of the national title, the first ever for a junior college in California. "We're very, very pleased with that." Especially since Frutos and the Santa Ana program know how tough winning the national title can be.

The year before, in 1998, Santa Ana had finished an impressive 22-1-3, good enough to win its second state championship in four years but not good enough to be voted national champions. Heading into the 1999 season, Frutos and the Dons knew there was little, if any, margin for error.

"We worked very, very hard, and our goal from the very beginning was to win the conference and win the state, but we weren't sure about the nationals," he says. "It's a very competitive area. Our hope was to go undefeated, and that, by rights, would give us the title."

The Dons took care of their first goal last season by breezing to their sixth consecutive Orange Empire Conference title with a 12-0-0 record. Sophomore forward Tomas Serna, who would finish the season with a school-record 41 goals (and a two-year total of 75 goals) earned his second straight conference MVP honor. Teammates Andres Arroyo, Keith Buckley, Fernando Rico, Jose Bartillas, Carlos Rangel, Victor Lieva, and Jose Retiz were all named All-Conference, while Frutos, along with assistant Frank Rea and Jose Vasquez, were voted conference coaches of the year.

From there the Dons advanced to the Southern California Regional play-offs, where they beat Rio Hondo, 4-1, and Pasadena, 3-2, to earn a trip to the state semifinals. It was there that Santa Ana ran into its toughest obstacle of the season—Santa Rosa Junior College. The two schools battled to a 1-1 tie through 90 minutes of regulation play, but in the two 15-minute overtime periods, Santa Ana scored a pair of goals to escape with a 3-1 victory.

"It was the most difficult game of the year in the sense that we hadn't gone to overtime the whole year," Frutos says. "That was the biggest test of the year."

Indeed, in the state championship game on Nov. 28 at the Arcos Olympic Training Center in Chula Vista, Calif., Santa Ana stormed past Canada College...
That locked up the Dons' third California crown in five years and, as they would officially term several weeks later, their first national championship. Not only were the Dons voted national champions, but Serena received his second straight All-American honor. While the rest of his teammates were also declared All-Americans by virtue of their No. 1 ranking.

"[Santa Ana] is not a typical team," Canada coach Frank Mangiola said after the title game. "They're very well organized in all areas of the field... Our kids are not used to that kind of intelligence behind the ball."

To Frutos, that is perhaps the highest compliment that someone can pay his team. While he is proud of his players' skill and conditioning, it is their intelligence—both on the field and in the classroom—that he is most concerned with. "We have some outstanding players who could have played on any professional team," Frutos says, "but they were also good students, and we emphasize that. They don't come to Santa Ana College to play soccer; they come to go to school. And part of their experience in school is to play soccer."

A Familiar Path

it is a path to success that Frutos knows first-hand. As an impoverished youth growing up in Asuncion, Frutos joined a citywide soccer league at the age of seven. But as he began to develop as a soccer player, he also began to deteriorate as a person. Like so many kids around him, Frutos began smoking cigarettes and drinking alcohol at a young age, habits that quickly threatened his hopes and aspirations.

But fortunately for Frutos, he encountered someone who could put him back on track. Halver Skinner was a professor of agricultural engineering from Montana who was assigned to the U.S. Agency for International Development office in Asuncion. He was also a member of the CI Jesus Christ of Latter-day Saints. Frutos served as an interpreter for and quickly latched onto him as a mentor. Raised a Catholic, Frutos so far as to convert to Mormonism and serve on a mission for the in neighboring Uruguay. He also, as fate would have it, fell in love with Skinner's daughter Kathryn, whom he trained in Spanish.

In 1964, Kathryn returned to the U.S. to attend Brigham Young University. At the same time, Frutos, then 22, decided that he needed to leave Paraguay and carve out a better life for himself. The president of the University had visited Paraguay some years before and let Frutos, and that is where he decided to go.

"That was a way of getting out of a dead-end street," Kathryn says. "At the time, there was no industry; there was nothing to look to. There was a tremendous need to get out."

In the summer of 1966, while a student at Utah State, Frutos married Kathryn. Two years later, in 1968, he graduated from Utah State with a degree in education. Frutos and his new wife then moved to California, where he was recruited by the Santa Ana Unified School District to teach Spanish and English as a Second Language at the junior high school level. He later taught at Santa Ana High School, where he taught math and coached soccer.

Then, in 1983, Frutos joined Santa Ana College as a full-time faculty to teach. He teaches soccer classes, as well as the weightlifting and fitness classes he is also involved with, the school's continuing education division, the curriculum and teaching classes on both self-esteem and parenting.

Along the way, Frutos and his wife have raised six children—one chemistry and physics who works for Dow Corning in New York, o
play soccer professionally. In fact, in the recent Major League Soccer draft the Los Angeles Galaxy selected a pair of Santa Ana players—Retitz in the third round and Serna in the fifth.

As for next year's Santa Ana team, Frutos is already hard at work at bringing in a new first-year student class. The work began the day after clinching the national championship. "This afternoon, I met at Santa Ana High School with five young men, and they're all very interested in the college," Frutos said after a recruiting visit in early March. "We showed them the national championship ring and last year's (state championship) ring, and they really want one."

To get one, they first have to survive a rigorous tryout process. When the Don's first begin training during the summer, Frutos says, more than 10 players usually turn out. After the first month, he and his assistants trim it down to 40. By the end of July, the team is whittled down to its final count of 22. And to make things even more competitive, even returning players from the previous year must try out for the team again.

"Our policy is, even though you have been here, you have to earn your spc. Everyone starts even," says Frutos, who has a good feeling about the potential of next year's team. "We feel we're going to have even a stronger team next year. We're looking forward to it. I can hardly wait to get started and get going."

When asked if he ever considered moving on to a bigger school, coach soccer. Frutos does not hesitate in answering. "They need a Someone in Santa Ana to be the pied piper, to bring our youth in, and I think I've worked long enough there to know what their needs are, how to attract the students," he says. "And that's my contribution to the community."

---

**Chairperson**

**The Department of Anthropology**

**The Ohio State University**

The College of Social and Behavioral Sciences at The Ohio State University invites applications and nominations for the position of Chair of the Department of Anthropology. The position would begin July 1, 2001.

The Department of Anthropology currently has 12 full-time faculty, with additional hires pending or planned for the near future. Some 160 students are enrolled as undergraduate majors and approximately 80 students are pursuing degrees in the department's M.A. and Ph.D. programs. The department seeks to further develop its existing strengths in ecological anthropology, evolutionary anthropology, medical anthropology, and related fields of study.

The Department is part of the College of Social and Behavioral Sciences. The College includes nine academic units, including the departments of Economics, Geography, Journalism, Communication, Political Science, Psychology, Sociology, Speech and Hearing Sciences, and Public Policy and Management, as well the Department of Anthropology.

The Ohio State University is among the nation's premier research universities with a student population of 50,000 and 3,300 faculty. As Ohio's land grant institution Ohio State offers 12,000 courses to 19 colleges. The University is located in Columbus, Ohio, state capital; and a major metropolitan area with a population of 1.5 million.

Applicants for the position should have a record of scholarly excellence in Anthropology, including academic credentials warranting appointment as a Full Professor. Prior academic administrative experience is highly desirable. Applicants should submit curriculum vitae and the names, addresses, and phone numbers of three references to:

Nancy E. Betz, Ph.D., Professor
Chair, Search Committee
College of Social and Behavioral Sciences
The Ohio State University
1010 Derby Hall, 154 N. Oval Mall
Columbus, OH 43210
(614) 292-1165
(614) 292-9530 (fax)
betz.3@osu.edu (e-mail)

Review of applications will begin March 31, 2001 and will continue until the position is filled.

---

**Assistant Dean for Diversity**

The Graduate School at the University of Utah is seeking nominations and applications for the Assistant Dean for Diversity, a 12-month professional staff position reporting to the dean of the Graduate School. Candidates must have demonstrated writing ability and excellent interpersonal communication and problem-solving skills. Experience with diverse student populations is preferred, and a master's degree in a related area is required. Primarily responsibilities are recruitment and retention for groups historically underrepresented in graduate education. Administration of undergraduate summer research opportunities, development of externally funded grant proposals for graduate education, and other related duties.

Founded in 1850, the University of Utah is the flagship institution in the Utah System of Higher Education. It is accredited by the Northwest Association of Schools and Colleges with a graduate enrollment of over 9000 students in 11 colleges. The University is located in Salt Lake City, a metropolitan area with a population of almost a million students in the greater Salt Lake Valley. The University of Utah is an affirmative action/equal opportunity employer and encourages applications from women and minorities and provides reasonable accommodation to known disabilities of applicants and employees. Notification letters and letters from applicants with two copies of a curriculum vitae, plus names, addresses, e-mail, phone and fax numbers, to three referees should be sent to David S. Chapman, Dean of the Graduate School, 310 Park Building, University of Utah, 201 South President's Circle, Salt Lake City, UT 84112-9016; 801/581-7642. This position is available upon receipt of application.
Seeking Diversity with MAPs and FIG

Unusually Innovative Western Washington University

BY ADALYN HIXSON

Bellingham, Washington, is 87 miles north of Seattle and 55 miles south of Vancouver, British Columbia—some of the most beautiful country in North America. In Bellingham, you can even hop on the public ferry to Alaska, an affordable transport that's great for spotting the whales and seals and otters and eagles that inhabit the seas and skies of the renowned "inside passage."

And Bellingham offers another kind of transport, one that has its own rewards—Western Washington University (WWU), a 100-plus-years-old institution that one guide to American colleges cites as "unusually innovative."

That innovative spirit has been put to work in the wake of Initiative 200, the state's anti-affirmative action legislation, as WWU strives to develop and promote "a culturally rich and diverse environment."

HO's guide for this feature was admissions counselor Rafael Gomez, a very winning college graduate with a recent degree in politics and government. He's in the first year of his job at WWU, but clearly not in his first year of multicultural reflection. Gomez reports that Washington is not the most diverse state in the nation. It certainly has far fewer Latinos than his home state of Arizona, where Hispanics were nearly a third of the population ten years or more ago, but several of Washington's populations are on the rise. "The Russian population is steadily increasing," he said, "and there is a small but growing Asian and Latino population. I think the Latino population is growing very quickly," he said, "even in Bellingham." The Census folks would agree with him.

The U.S. Census reported Washington as having 215,000 people of Hispanic origin in 1990, an estimated 350,000 in 1998, and a projected 560,000 this year, growing to 750,000 by 2010. Projected votes in Washington in 1998 total 3,590,000. Ninety percent of WWU's students.

A constant barrier, said Gomez, is the limited pool of students of color within the state, the pre-existing competition between all the state universities for those students, and now, with the state passing anti-affirmative action regulations, the competition for those same students from outside the state.

He mentions "expanding the pool" as one possibility. "We are in the development phase of starting some new outreach efforts for students who start at a school with specific transfer relations."

"I think there is a lot of opportunity for us to increase out of state students," said Gomez. Given the beauty location and what seems an unprecedented commitment to diversify President Karen Morse and the entire university, attracting out state students seems quite feasible.

MAP Scholarships

"Just to give you a little background," Gomez said, "the Initiative 200 Arship, known as the Mit Achievement Program scholarships in which outstanding minority students were recognized with year tuition waivers." Since Initiative 200 took effect, however illegal to grant scholarships on race. But Western still offers scholarships to students who are "culturally rich and diverse environment."

One result is the Multicultural Achievement Program scholarship, awarded to students who demonstrate "solid academic abilities, strong leadership qualities and a commitment to multicultural activities in school or the community."

Ninety MAP scholarships $2,000 each were awarded: continuing Western students last compared to 71 at $1,800 the previous year. And 20 more were awarded to incoming first-year students, for a total of 110.

Karen Copetas, WWU's admissions director, explained the rationale. "Leadership, persistence, and GPA are important..."
overcoming diversity, understanding of multicultural issues, devotion to community—all of these contribute to a successful university experience and success in an increasingly multicultural nation. Students who exhibit these qualities and strive for academic excellence deserve to be recognized.

As expected, more specific examples of how a student might qualify, Gomez said, "by demonstrating leadership in campus organizations promoting diversity—through forums, conferences, campus awareness activities." Often, he said, MAPS awardees are students who've been presidents of cultural clubs in the community.

"A lot of high schools have cultural awareness programs that require mentors and moderators, and so oftentimes it is students who have been involved in those areas. Also students who in their essay express a unique cultural identity or approach to multiculturalism, whether it is a unique family experience, bringing a new perspective to our campus—or they've lived an extended period of time in another country or culture, have had the advanced study of language. Things of that nature. It is very broad because we want to recognize a lot of different kinds of contributions. I don't think there is one that we consider more than another."

"I asked about students who've had to work hard to earn money, in high school or in college, perhaps precluding extra-curricular activities. The scholarship does allow for working students to be eligible by considering unique personal or family experiences. Many scholarship essays include discussions on the immigration experience, the complexity of cultural identification as a child—i.e., dual cultures, family vs. school—and/or the experience as a bilingual and bicultural person. Awards are most commonly given to students who have been heavily involved in activism and community, and to those students who have had rich bicultural or immigration experiences. A number of other scholarships are given based upon a combination of involvement, perspective, and cultural experiences.

**Castellon and Vicente**

"A couple of examples from this year. Abe Castellon, a senior at Squallicum High School, who has worked to help support his family. His family, originally from Guadalajara, has slowly moved northward to settle in Bellingham. He began breaking dance with friends at Squallicum and has since per-}

formed at assemblies, during lunch, danced with other breakers around the region, and, most recently, organized an assembly at Whatcom Middle School. Abe and his friends took the time to talk to students there about how the activity has helped him feel confident, stay positive, and stay out of trouble.

"In his essay, Abe spoke about his family's move and adjustment to the States and his evolution as a person. I met Abe when he was selected for a Multicultural Achievement Award in February. I have to say, he is an incredibly respectful and thoughtful person." The same, in this reporter's view, could be said of Rafael Gomez.

"Alvaro Vicente, a senior at Ferndale High School, is both an excellent student and an important leader in the Hispanic student community," said Gomez. "I met him at the U.S. from Guatemalan at age six, Alvaro family were migrant workers for a number of years. Alvaro has been involved with the Mecha club at Ferndale High School and was elected president this year. According to his counselor, he has been a key element in unifying Guatemalan, Chicano, and Mexican elements of the Hispanic community at Ferndale.

"There are tons of other examples, but I don't really have the freedom to share the contents of their files. These two students were both given Multicultural Achievement Awards in February and later awarded MAPS.

"Beyond GPAs"

"The most important thing to mention is that we do consider the students' entire circumstances when evaluating their application. We informally factor AP courses, involvement, etc., but we also give our counselors the freedom to factor in personal circumstances and hardships. If a student expresses the necessity of working during school, then we keep that factor in mind when evaluating transcripts and activities.

"Western has always been after the individual rather than the GPA rating, so we look very closely for personal factors and motivations that reveal the person behind the grades. A progressive, active, and critical student body is what we're after. I think it is a very open process and allows for us to find some very talented and perhaps hidden students.

"I think the MAP scholarship is a great program that is really quite unique, but it is only a small part of a larger puzzle. Western struggles like a lot of other institutions with figuring out how to appeal to and keep students of color and first-generation students, and WCC, like most college campuses, needs to be very cog-
nizant of the many challenges we have to overcome in recruitment, campus life, and curriculum. We also have to be proactive, persistent, and creative in our attempts to increase students of color on campus.

"As far as our efforts, they are going more concerted in terms of reaching outside the bounds of traditional recruitment methods." And as for the one-on-one counseling, he said this to say:

"There is a real fine line in this business between being able to relate and just being plain ridiculous catering to the traditional high school mentality. For most people—we are all about the same things, nothing what age a person is. If you are down to earth with them, keep your guard down, and are honest, they are going to relate."

**FIGs a Success**

Recruitment, whether traditional or unorthodox, is just one element of university success. Retention is another that is of special interest to Hispanics. One WWU program that impacts retention and GPAs is FIGs, the Freshman Interest Group Pilot Project, explained to HO by Dr. Kris Bulcroft, special assistant to the provost for teaching and learning, who team-taught a FIGs course with his husband, who, like she, is a professor in the sociology department. "She is great," said Karen Copetas, and can be reached at kris.bulcroft@wwu.edu if you have specific questions. And FIGs has its own website: figs.wwu.edu.

"The Freshman Interest Groups pilot project," said Bulcroft, "started last fall with four clusters of general education courses." One course that HO had asked about, The Politics of Language and Ethnic Identity, was developed, she said, "by linking two large lecture sections of general ed requirements—Political Science 101 and Sociolinguistics 204."

"Fifty freshmen were co-enrolled in these two courses and also in one of two smaller integrative seminars. Library 125. In the seminar, they explored the common themes across these general ed courses and worked on a website that explored the politics of language by using library resources."

"We just completed a review of the first year of the program, and I am pleased to report that it seems to have been a great success on all counts. The program assessment was conducted by Gary McKinney in the Office of Assessment and Testing."

"We did some pre and post measures of student skills and attitudes. We also had the faculty submit narratives about their experiences in the program. And we compared GPAs and retention rates for the freshmen in the FIGs versus those who were in the large GUR courses but were not part of the FIGs program."

"Essentially, what we found was that the GPA was higher for the FIGs students and that retention was good for both groups but slightly better for FIGs students. The students seemed to most enjoy the learning community that the FIGs fostered, as well as learning to some of the technologies associated with doing a research project and creating a webpage. There were other strong elements of the program as well, but these stand out. As for the faculty, I believe it is a testament that all who participated in Year 1 of the FIGs will be joining us again this fall."

The most positive experience for the faculty, she said, seemed to be "the cross-disciplinary opportunities for faculty development in course enhancements, coupled with the technical support from the Center for Instructional Innovation."

"In terms of my own professional development, participating in the FIGs has been one of the best experiences in my professional career here at WWU. It has given me a better understanding of the richness that comes from interdisciplinary learning communities and has helped me better understand how my own teaching relates to the learning I hope will occur in my classes. I have an interesting and varied career here at Western, but the FIGs is definitely one of the highlights of it all."

FIGs is expanding to include linked courses, which vary across departments, and to accommodate 350 first-year students. "Two of the seminars will be also be residentially based," said Bulcroft. "This means that 50 students will co-enroll in a FIGs cluster of three courses and will live at a floor dedicated to the FIGs students in that cluster at Fairhaven Residential Complex."

Part of this year's FIGs faculty development will center on teaching about diversity, said Bulcroft. "There has been a growing interest on the part of the faculty here at WWU to learn from each other about what works and how questions that lead to better understandings about the world we live in. I think it is time that we help each other along."

Programs such as the said, require the cooperation of academic units—Support Services, Admissions Registrar, and Residence Hall—to help begin training the faculty and students. "All of us work toward this goal to be moving us closer to this end."

"That I'll gladly share with you" is what Rafael Gomez told HO when asked about his background—and with good reason. "My father is from Mexico, from Texas, my mother is Italian, from Northern California. They met in Brownsville where my dad was raised. My mom went to school in a big town, but it was very small. She grew up in Texas and pretty rare for a girl to leave California."

"In my family, I have been raised so that first of all, education is of very high priority. It's necessary in order for you to develop not just professionally but individually as a person—to develop your beliefs, to develop your understanding of the world. And frankly, I've had an example of two parents who have worked hard my entire life. My mother went to school when she was three years old. My father has worked his way up to be the director of a nonprofit health center."

"So I had a wonderful example—and also there was a healthy but of fear to go to finish—that was the expe-

Hispanic Caucus Honors Rowan Professor

The Hispanic Caucus of the American Association for Higher Education presented Dr. Yvonne Enid Gonzalez Rodriguez, an elementary education/early childhood professor at Rowan University (N.J.), the Hispanic Caucus Award for Outstanding Latina/o Faculty in Higher Education.

Rodriguez, a Rowan faculty member since 1973, has written close to 30 refereed journal articles, book chapters, monographs, and technical reports; conducted a wide range of research; and has been an educational consultant for many school districts, colleges, and other organizations.

Rodriguez has a bachelor's degree from Rutgers University, a master's from then-Glassboro State College (now Rowan), and a doctorate from Temple University.

Romero Presents Poetry at Purdue-Calumet

Poet, narrator, and critic Armando Romero—a native of Colombia who has lived in Chile, Mexico, and Venezuela—presented his work at the 12th annual poetry reading, “Todos Somos Poetas” (“We are all poets”), at Purdue University-Calumet in Indiana.

Romero, born in Cali in 1944, was part of the Vanguard Movement, “El Nadaismo,” during his youth. After leaving the country in 1967, he published many works in Latin America and Spain. Today, Romero is a professor of Spanish at the University of Cincinnati. He has a doctorate from the University of Pittsburgh.

Texas-Austin Museum Opens Summer Exhibitions

“Just Another Poster? Chicano Graphic Arts in California,” a groundbreaking exhibition of more than 100 works by 57 Chicano/a artists, recently opened at the University of Texas-Austin’s Blanton Museum of Art. Bold, intense, and colorful, the art of posters has long been used to express the Chicano experience. These powerful graphic messages, originally transmitted from building walls, telephone poles, and other surfaces on the urban landscape, are created to raise awareness and rouse conscience.

Complementing the poster exhibition, Blanton is also presenting “Pressing the Point: Parallel Expression in the Graphic Arts of the Chicano and Puerto Rican Movements,” organized by El Museo del Barrio in New York and featuring works from El Museo and from the Gilberto Cárdenas Collection on loan from the Blanton.

Both exhibitions extend to August 13.

Miami-Dade Student Wins State Award

Carmen Cardenas, a sophomore at Miami-Dade Community College’s North Campus (Fla.), was one of three students chosen by the Florida Office of Collegiate Volunteerism as 2000 Excellence in Service award winners. A statewide panel of community service and service-learning professionals honored her involvement and awarded her $1,000.

Cardenas reads to children at the Miami Rescue Mission every week, is an America Reads volunteer, and helps with shelter programs at Camillus House in Miami.

Mural at Portland Community College

During ESL Awareness Week festivities, Portland Community College (Ore.) unveiled a special mural created by ESL students, staff, and a local artist over three months.

More than 30 students from the multicultural alternative program and ESL helped sketch, design, and paint the mural. With help from local artist Angelina Marinc, the students were able to develop a colorful pattern sure to catch the eyes of passersby. The celebration saw cultural performances by Rafaela “Patty” Gillette, Flamenco Puro, and Portland Community College ESL Instructor John Cochran.

Valenzuela at UT-Austin Gets Award

Dr. Angela Valenzuela received the Outstanding Book Award for Subtractive Schooling: U.S.-Mexican Youth and the Politics of Caring at the American Educational Research Association's annual meeting, in New Orleans. The award was established for the best book-length publication in educational research and development.

P. David Pearson, head of the selection committee, said that the book "takes a provocative cluster of issues in American education—race, power, and language—beyond the usual rhetoric and adopts a fresh and thoughtful perspective."

Valenzuela, who earned a doctorate at Stanford, is an associate professor in curriculum and instruction and Mexican American studies at the University of Texas-Austin. Her current research interests include sociology of education, urban education, race and ethnicity in schools, multicultural education, and public policy.

California-San Diego Graduate School Part of Trade Mission

The University of California-San Diego's Graduate School of International Relations and Pacific Studies (IR/PS) played a pivotal role in last year's trade mission to Argentina, Brazil, and Chile (ABC Trade Mission), organized by the San Diego World Trade Center.
and the San Diego Regional Economic Development Corporation.

IR/PS was home to the mission’s kickoff event in early 1999, and it sent IR/PS doctoral student Ricardo Tavares on the trip to the South American countries.

Said Tavares, a Brazilian native who provided multilingual assistance and contacts to the delegation, “You learn about the foreign markets in a supportive environment, with the assistance of international organizations and experts who have previously visited and done business with those countries.”

Bardach Comments on Cuban Affairs at California-Santa Barbara

UCSB Officials at the University of California-Santa Barbara welcomed Cuban expert Ann Louise Bardach’s opinions on the Elian Gonzalez affair during the spring semester. The author, a visiting professor of international journalism at the university, shared her insights on Fidel Castro, his opponents in Miami, Elian, and his leading family as she has been doing in the national media since the six-year-old was rescued off the Florida Coast last last year.

During her 20-year career in journalism, Bardach has interviewed the Cuban leader twice and has written about both him and his country for many prominent newspapers and magazines in the United States. Broadcast news programs often invite Bardach’s commentary on Cuban affairs.

Life University Mobile Unit Launched in Costa Rica

Life University (Gz.) founder and president Dr. Sid Williams took part in the inauguration ceremonies for the first international Mobile Chiropractic Field Unit just outside San José, Costa Rica, in April.

Said Williams: “This mobile unit is the forerunner of the fleet of mobile units that Life International will dispatch around the world in the years to come.”

The First Lady of Costa Rica, Lorena Claire de Rodríguez, the Minister of Health, Dr. Rogelio Paredes, and the director and representative of Servicios Médicos Costarricenses, Bernal Aragón, joined Williams at the ceremony.

Cotrell Named First Lay President at St. Mary’s

Dr. Charles L. Cotrell, a tenured professor of political science, was named the first lay president at St. Mary’s University (Texas) 148-year history.

St. Mary’s is the largest Catholic university in Texas and the Southwest, and the oldest, founded by the Society of Mary (Marianists) religious order in 1852. Dr. Cotrell became its 12th president when he was elected to a three-year term in April.

Well known for his expertise on election systems, Cotrell has received many honors, including the Henry B. Gonzalez Hispanic Achievement Award. He holds a bachelor’s and a master’s degree from St. Mary’s, and a doctorate from the University of Arizona.

Esquivel Achieves a First at Wyoming

Lisa Renee Esquivel is the first Hispanic female ever elected vice president of the Associated Students of the Uni of Wyoming.

An elementary education junior, Esquivel has been a student senator. Her campaign for the office she won in April centered on recruitment and retention, classroom programming, and classroom climate.

Esquivel has been a committee member and student mentor with the university’s Minority Student Leadership Initiative and other campus and community activities. A member of various honor societies, she has made the Dean’s List three times.

University of Michigan in Collaborative Research

University of Michigan Associate Professor of Education Sylvia Hartado is principal investigator of a project that she says is “important in revitalizing higher education’s mission to prepare a diverse student body for future democratic citizenship.”

“Preparing College Students for a D Democracy” involves 10 public research universities: Arizona State University, University of California-Los Angeles, University of Maryland, University of Massachusetts-Amherst, University of Michigan-Ann Arbor, University of Minnesota, University of Michigan-Dearborn, Texas Southern University, University of Washington, and University of Vermont.

The project will examine how different campuses achieve goals for student life and address the skills needed for participation in a democracy.

U.S. Hispanic Leadership Institute News

July 1, 2009, is the deadline for students wishing to apply for the Juan Andrade Scholarship Young Hispanic Leaders. Applicants must be citizens or legal residents, enrolled or enrolled for enrollment as full-time students in four-year college/university in the United States or territories, and demonstrate a need for financial support. Interested students should call (312) 427-8683.

The U.S. Hispanic Leadership Institute (USHLI) can now be accessed via its website, www.ushli.org and www.usb Updates on USHLI events news, pro and publications are available, as is the reports, studies, and documents.

California-San Diego Exhibits Esposito Installation

The University of California-San Diego (UCSD) Art Gallery, in collaboration with UCSD Department of Visual Arts, recently presented an installation by Diego Esposito, an artist-in-residence and visiting faculty.

Esposito’s installations focus on space and time, the void that exists between objects, and the importance of placement. He uses experimental material, color, and form. Esposito calibrates a tension among these elements, achieving a synergy of internal and external spatial relationships, and meaning.
Marti Leads Queensborough Community College

Dr. Eduardo Marti, a respected educator with more than two decades of senior-level administrative experience, is the new president of Queensborough Community College in New York.

A biologist, Marti is currently president of the Association of Presidents of Public Community Colleges in New York and since 1994 has been a member of the Commission on Secondary Schools, Middle States Association of Schools, Colleges, and Universities. He has a bachelor's degree, masters, and doctorate from New York University.

Herman Badillo, chair of the board of trustees of the City University of New York (CUNY), said, "Dr. Marti is a prominent educator who has led three community colleges with distinction and ability."

Coors Honored for Providing Opportunities for Latinos

Coors Brewing Company was named to Hispanic Magazine's list of 100 companies providing the most opportunities for Hispanics. Each year the magazine honors companies that excel in recruitment and hiring, minority business development initiatives, and funding efforts for scholarships, grants, and organizations.

"We are proud of our ability to keep our commitments to the Latino community and maintain our quality relationships with groups that make a difference by helping people in need," said Carlos Soto, director of corporate relations for Coors Brewing Company. "Coors is aggressive in searching out and actively recruiting talented people from diverse communities."

Yale Student Receives Humanitarian Award

A Yale University (Conn.) senior majoring in Latin American studies was one of five recipients of the 2000 Howard R. Sweater Student Humanitarian Award for his commitment to community service, awarded at the National Youth Leadership Council conference in Rhode Island.

Gregory Duff Morton, of Riverside, Calif., was honored for his work in understanding and improving the lives of disadvantaged members of the New Haven, Conn., community. In the fall of 1998, he created a program called Outreach through which he helped train Yale students to work with the homeless, connecting people with shelters, food, drug rehabilitation, and job programs.

Miami-Dade Offers Free Refugee/Entrant Vocational Education

A new free program at Miami-Dade Community College (Fla.), the Refugee/Entrant Vocational Education Services Training program, helps refugees of all nations, Cuban and Haitian entrants, and Ameasians in vocational English training, high school equivalency preparation, vocational skills training, employability seminars, and other programs.

Classes provide job training for careers in international marketing, accounting, administration, computer programming, and customer assistance, and for occupations such as secretary and computer support specialist, among others.

St. Mary's Writer Honored by Journal

Diane Gonzales Bertrand, writer-in-residence at St. Mary's University in Texas, won ForeWord Magazine's second annual Book of the Year Award in the children's/young adult category for her fictional work Trinos's Choice.

A dramatic story, set in the barrio, about the obstacles confronting teenagers today, Trinos's Choice is Bertrand's sixth novel and eighth book, published by Arte Publico Press, University of Houston. Trinos's Time, Bertrand's sequel to Trinos's Choice, is due in May 2001.

The Michigan-based ForeWord Magazine, a leading trade and review journal of independent publishing, began its national awards program in 1998 to recognize vital books published by independent and university presses.

Texas-San Antonio Commends Service to Undergraduates

The University of Texas-San Antonio (UTSA) presented Richard S. Howe Excellence in Service Awards to Eva Perez, associate director of the UTSA Alliance for Education, and the staff of the UTSA College of Business undergraduate advising office—specifically staff members Amy Ramirez, Jane Cavazo, Beverly Ostmo, Linda Chalmers, Laura Harcock, and Nicki Phillips. The awards honor longtime engineering faculty member Professor Richard Howe.

President of El Salvador Speaks at Hartford Commencement

President Francisco Guillermo Flores Pérez of El Salvador, a 1979 graduate of the University of Hartford's Hillyer College, was the featured speaker at the university's 43rd commencement ceremonies. Flores received an honorary doctor of laws degree.

A member of the generation dedicated to renewing the political life of El Salvador after years of civil war, Flores was elected president by a substantial margin on March 7, 1999, as a candidate of the National Republican Alliance (Partido Alianza Republicana Nacionalista), commonly known as ARENA. Prior to his election, Flores was one of the youngest leaders ever of El Salvador's legislative assembly.

Flores has an associate's degree from Hillyer College (then known as the College of Basi Studies) a bachelor's from Antwerp, and spent year of his postgraduate studies at Harvard.

News from University of New Mexico

The University of New Mexico (UNM) Center for Southwest Research (CSWR) celebrated the work of graduate student fellows who have developed their own research skills while holding fellowships, and the University of New Mexico archives held by CSWR. Joseph Sanchez of the Spanish Colonial Research Center, a branch of the National Park Service, presented a microfilm containing copies of Spanish and Mexican documents to CSWR.

- Dennis Chavez Fellow Mark Valenzuela presented "Tomatanz Land Institute: Defended Traditional Land, Water and Sovereign
Rights," which concerned the rights of indigenous peoples.

- Juan and Virginia Charon Fellow Kari Schmidt explored the Albuquerque and Cerrillos Coal Company Manuscript Collection, which contains information on mining conditions, social activities, and more.

- George I. Sanchez Fellow Veronica Arias spoke on the Columbian Quincentenary Manuscript Collection, which documents how Christopher Columbus' 500th anniversary in 1992 was commemorated on both the scholarly and popular levels.

Salud.com Forms Full-Service Health Community

Salud.com, a Miami, Fla.-based Internet company, has been launched to produce a comprehensive, full-service health community for the Spanish-speaking consumer. It claims to be the first website to cross borders to the Spanish-language world by offering high quality medical and health content and aims to become the market-leading provider of original and proprietary health-related content for more than 550 million Spanish-speaking consumers and health care professionals in the U.S. Latin America, and Spain.

Jose Velez-Silva, chief marketing officer, has extensive experience with The Bravo Group, a Hispanic communications agency, in telecom technology, and the Spanish-language online audience, both domestic and international.

Bravo Group Managing Partner Honored by Advertising Publication

Linda De Jesús, senior vice president and managing partner of The Bravo Group, was named one of the "Women to Watch" by the editors of Advertising Age.

The Bravo Group, a Hispanic communications company with more than $200 million in billings in 1999, maintains a staff of 200 communications professionals, mostly of Latino descent, and has offices in New York, Miami, and San Francisco.

As its director of business development, De Jesús built and solidified the agency's No. 1 ranking in the industry and is now spearheading Bravo's newest off-line and online unit, Bravo 21. De Jesús has a bachelor's degree from the University of Puerto Rico in Puerto Piedras.

San Diego State's Pre-College Institute Sponsors Mural Painting

SDSU Celebrating its 30th anniversary, Chicano Park in San Diego, Calif., heralded the participation of Talent Search students from Sweetwater and San Diego Unified District middle schools, along with their mentors and counselors, in a mural painting project. Talent Search is one of three federally funded TRIO programs housed in the Pre-College Institute at San Diego State University (SDSU). Local artists and SDSU graduate Victor Ochoa worked with the Talent Search students in painting the murals, as did college-age mentors from the Pre-College Institute—a tradition that began in 1976.

Dr. Cynthia Park, executive director of the Institute, said, "Engaging students in a collaborative mural painting celebrates community and diversity through creativity."

Texas Wesleyan Student to Attend Conference in Puerto Rico

Texas Wesleyan University senior biochemistry major Nadia Martinez is one of 10 students from across the country selected to represent the U.S. mainland during the American Chemical Society's Pan-American Conference in San Juan, Puerto Rico, from June 29 to July 3.

Martinez was chosen because of her active membership in the Wesleyan chapter of the American Chemical Society Student Affiliates and her fluency in English and Spanish, which is mandatory for the conference. Martinez will present research she conducted at the University of North Texas Health Science Center on cellular-level nicotine addiction.

National Hispania Leadership Institute Elects New Chair

Linda Mazón-Gutiérrez, a longtime government and health care official, was elected chair of the board of directors for the National Hispania Leadership Institute.

Mazón-Gutiérrez, the administrative officer for intergovernmental relations in the Arizona Health Care Cost Containment System, is president of the Hispanic Women’s Corporation and a member of the Arizona Commission, Arizona Chief Action Alliance Advisory Committee. Mazón-Gutiérrez received her bachelor’s and master’s from Arizona State University.

Martinez Joins Latin Celebra at Hobart and William Smith Colleges

U.S. Deputy Assistant to the President and Speaker at the annual Cuban American Extravaganza at Hobart and Smith Colleges in New York, the American Organization, a diverse group of students, raises awareness of Latino issues and on the campus, organized the event.

Martinez has spoken extensively on the range of subjects, including the C. The project, which addresses health disparities, Head Start and the Welfare Reform Act, has received attention and support nationwide. Martinez has been quoted in the Los Angeles Times, New York Times, The Washington Post, and the Wall Street Journal.

Xochitl Palacios, a well-known Hispanic advocate, received a co-sponsor of the event.

Long Island-Brooklyn Catch Puerto Rican Bomba Dance

The second annual Bombazo, a bomba party in which drummers face off in Puerto Rico, was held in New York City. The event, held on the campus of Long Island University (LIU) Brooklyn.

LIU-Brooklyn anthropology professor Albert Aronson, a bomba performer, described the cultural expression of commu
emerged in Puerto Rico about 400 years ago from the children of African and Indian slaves and Spanish slave-owners and reflects the many cultures that landed in Puerto Rico.

Orange Coast College Professor Receives Honor

Orange Coast College (OCC) Associate Professor of Mathematics Dr. Eduardo Arismendi-Pardi won an Individual Achievement Award for outstanding leadership in faculty and staff diversity, at the annual Board of Governors and California Community Colleges Conference. California Gov. Gray Davis honored Arismendi-Pardi for "contributing to the promotion of affirmative action in the California Community Colleges."

An OCC faculty member since 1991, Arismendi-Pardi developed a national reputation as a proponent of ethnematematics, an emerging academic discipline. "Ethno-mathematics is not 'Brown Mathematics;' and it is not political correctness to the extreme," said the popular professor. "It is about the fact that there are historical, social, and cultural dimensions to math."

Arismendi-Pardi has a bachelor's degree from California State University-Long Beach, a master's from West Coast University, and a doctorate from Nova Southeastern University.

Purdue-Calumet Shows Romantic Cuban Comedy

Guantanamera, a romantic Cuban comedy, was shown at Purdue University-Calumet (Ind.) as part of an international film series sponsored by its Department of Foreign Languages and Literatures. The 1995 film, directed by Tomás Gutiérrez, is about Yolita, a world famous diva who returns to her hometown of Guantánamo for an elegant reception in her honor and a surprising reunion with her once beloved, Candido. It has been described as "a fluid and easygoing that viewers might not immediately realize that it is a bold overview of contemporary Cuba." Gutiérrez also directed the popular film Strawberry and Chocolate.

Dominican College of San Rafael Announces New Identity

Joseph R. Fink, president of Dominican College of San Rafael, announced that the 100-year-old institution will become Dominican University of California. The change was announced at the dedication ceremony for the new Sister Samuel Conlan Recreation Center. The college will officially become a university at the beginning of the 2000-2001 academic year.

In the past decade, Dominican has grown considerably. Enrollment has doubled, finances are more stable than ever before, revenues have tripled, and plans for significant future development are well under way. In addition, for many years, Dominican has been an institution with a global perspective, a diverse student body, and several graduate degree programs.

Hispanic Education Forum Held in Washington

Education and workforce development was the focus of the Hispanic Association of Colleges and Universities (HACU) Election Year 2000 National Capitol Forum on Hispanic Higher Education in Washington.

Members of Congress and federal agency leaders joined national minority and labor rights advocates in addressing issues ranging from the impact of the Hispanic vote on this year's presidential election to the lack of federal funding for those college campuses that are home to the largest concentrations of Hispanic students.

"Congress each year fails to adequately address the education needs of Hispanics," said HACU President Antonio Flores. HACU outlined new proposals for record federal funding increases for programs directly addressing the education needs of Hispanics from kindergarten through graduate school.

Subalternity and Representation: Arguments in Cultural Theory

By John Beverley

The term "subalternity" refers to a condition of subordination brought about by colonization or other forms of economic, social, racial, linguistic, and/or cultural dominance. Subaltern studies is, therefore, a study of power. Who has it and who does not? Who is gaining it and who is losing it? The author examines the relationship between subalternity and representation by analyzing the ways in which that relationship has been played out in the domain of Latin American studies.

Subject of Crisis: Race and Gender as Disease in Latin America

By Benigno Trigo

Described by intellectuals as a "sick continent," a racially handicapped people, a hysterical female body, or an unbalanced psychological subject, Latin America has materialized as a region in crisis. Disease has emerged as both a
Doña Inés vs. Oblivion
By Ana Teresa Torres

Doña Inés, an old matriarch of aristocratic family, is obsessed with finding her title to a piece of land. Searching through 300 years of Venezuelan history, she witnesses the fate of her descendants through the earthquake that devastates Caracas in 1810 and the War for Independence in 1814. She also witnesses the rise of the despised Domingo Sanchez, descendant of Cariepe slaves, who takes part in the civil wars of the 1850s and 1860s. Translated by Gregory Rabassa. Winner of the 1998 Pegasus Prize for Literature.

Power, Race, and Gender in Academia: Strangers in the Tower
Shirley Geok-lin, Maria Herrera-Sobek, and Genaro Padilla, eds.

The civil rights movement of the 1960s and the affirmative action programs enacted in the 1970s held great promise for people of color, women, and gays and lesbians seeking careers in higher education. Now, at the beginning of the 21st century, what is the status of these traditionally underrepresented groups in English and foreign language departments across the United States? This volume describes individual experiences in academia.

Voices of Resistance: Testimonies of Cuban and Chilean Women
Judy Maloof, ed.

Here are the testimonies of 13 women who fought for human rights and social justice in their communities. Some of the women played significant roles in the Cuban Revolution of 1959 that overthrew Batista, while others organized grassroots resistance to the 17-year Pinochet dictatorship in Chile.

El Camino del Río: A Mystery
By Jim Sanderson

Presidio, Texas, is hard country and hardship duty for U.S. Border Patrol Officer Dolph Martinez. When circling buzzards lead him to a corpse in Red Wing boots with a .22 bullet hole in an expensive haircut, Dolph realizes that this is no norteno trying to cross the border. It job and his destiny to unravel this my world where nothing is what it seems

Beyond the Binary: Reconstructing Cultural Identity in a Multicultural Context
Timothy R. Powell, ed.

This book proposes new critical models to engage the dilemmas posed by multiculturalism. The essays eschew the polarizing rhetoric of culture wars as they present the lived perplexities of specific historical moments.

Conversations with Picasso
By Brassaï

The noted photographer Brassaï by Picasso in the 1940s to doc painter's work. What emerged from the s was a series of extraordinary
tions about personalities, art, history, and contemporary events. Join Brassai as he sits in the cafes and studios of war-torn Paris, arguing with Picasso and his colleagues about slippers, flashlights, and Cezanne, all recorded in this new translation of the 1961 masterpiece. Translated by Jane Marie Todd.

Writing in Multicultural Settings
Carol Severino, Juan C. Guerra, and Johnella E. Butler, eds.

The 20 essays and four responses (“cross-talks”) in this volume confront the challenges presented by the racial, ethnic, class, gender, religious, age, and physical-ability differences among today’s writing students. The contributors discuss their immersion in students’ discourses and cultures and balance descriptions of their teaching experiences with careful and critical reflection.

Loving in the War Years: lo que nunca pasó por sus labios
By Cherrie Moraga

In a collage of essays, stories, and poems, Cherrie Moraga explores the political and personal meaning of being a Chicana and a lesbian in the U.S.

The Last Generation: Prose and Poetry
By Cherrie Moraga

Cherrie Moraga bravely and eloquently argues for a reconceptualization of gender, sexuality, race, art, rationalism, and the politics of survival. Crossing literary genres and moving freely between Spanish and English, Moraga illuminates her identity as a lesbian writer/activist and her role in the Chicano community.

Zapata’s Revenge: Free Trade and the Farm Crisis in Mexico
By Tom Barry

Visions of modernized and industrialized Mexico competing in the global market clash with the sobering reality of a desperate peasantry and falling agricultural production. Tom Barry views the crisis that confronts Mexico as alarming evidence of the incapacity of neoliberal and free trade policies to foster broad economic development.

Book Review

By Elizabeth Coonrod Martinez

Of the books and essays published by and about Latinas and Chicanas writing and publishing in the U.S., none has yet provided what this anthology achieves: a revelation of the creative spirit and background of many of these women, i.e., what instills and guides their writing. *Mascaras (Masks)* might not be easily found in bookstores, but it should be sought and considered for various classes—sociopolitical, literary, or historical.

*Mascaras* consists of intriguing and moving accounts of how 15 different writers create their craft, whether novels, short stories, or poetry. Each account invokes different ways the influences of cultural background and upbringing in determining who they are and how they write. And each account is an inspiring model for aspiring writers.

There has been little available on women writers and the nature of their writing, especially about women writers of color. In the early 1990s, collections of translated excerpts and interviews with popular Mexican and Latin American women writers appeared, but this is the first book that documents their motivation in their own words. (The University of New Mexico Press is currently publishing a book of interviews, *Latina Self-Portraits*.)

What makes this collection unique is that each writer tells her own story, in her own way, by means of her respective anecdotes and histories. Several talk about why they write in English and about how Spanish influences their writing, in dreams or in culture. Some, like Roberta Fernandez and Marjorie Agosín, explain that sometimes they write in Spanish, then re-write to English, while at other times their creative spirit flows in English. Cecile Pineda and Alma Villanueva tell about the lives of their grandparents, whose last names they use and whose stories inspired their writing. They write that they only came to understand their mothers’ lives once they were adults; their mothers immigrated to the U.S. as children and led difficult lives working to provide for their children.

Pineda’s professor-father asked her: “Why do you think there are no female Beethovens, no Mozarts? No Goys, no Rembrandts? Why?” Although his statement was meant to explain the “nature of women,” Pineda was influenced by the impression that women should not strive for greatness. Still, she knew she had things to accomplish. She left home and began supporting herself at age 18.

Villanueva lived in near poverty until early adulthood. She feels that her heritage is divided in several directions, much like the native-American sense of balance in life. Her father, who grew up in the South, is German-English, her mother is Yaqui-Indian and Spau Mexican, her grandmother nearly full Yaqui and, like the tribe, totally conquered, neither by the Spanish in Mexico nor the U.S., w she lived from early adulthood.

Agosín is inherently aware of her Jewish heritage, while Pineda learns of hers only as an adult. Bernice Zamora is keenly aware those without rights and privileges; her voice in writing calls atten to them, and she also strives for a genuine Chicana voice without incence from those who would be critics of Chicano writing. Villar and Helena María Viramontes speak of destruction/creation life/death as twin motions that inhabit any novel as they do our Their accounts come closest to attempting an explanation of that motivates creative production. Viramontes demonstrates the cooking symbology to reach her message: “From a small mound of flour dough, the rhythmic roll of the rolling pin, the bobs appear before me like my mother’s perfect tor. They begin to take on a shape that is beyond me, be that is directly connected to my hand.”

While this anthology includes the famous Castillo, Sandra Cisneros, Cherrie Moraga, and Alvarez, the other writers are less known and, in ways, are treated more thoroughly. Accounts by the tendency to be longer and to explain facets of their while the aforementioned writers’ accounts are req. But even the less-known have been publishing for a two decades. Some, like poet Naomi Quinonez, de: their work in writing groups with women. All are accomplished, having received literary and national awards. Ma: university professors.

There is one talented Tejana who also belongs in the group: Norma Elia Cantú. I would recommend her semi-autographical novel *Cacicuca: Snapshots of a Girlhood in la Fe* (University of New Mexico Press, 1995) to accompany the anthology. The two books, read together, would provide any reader with a nating sense of the life of the Chicana/Latina, mixed-breed, mixed-nationality, women of this country.

I strongly urge this type of reading for young women colleque: who have not seen their lives and those of their mothers’ grandmothers depicted in books. Such reading can greatly influence their development at the college stage of life.

Elizabeth Coonrod Martinez, Ph.D. assistant professor of Spanish and Latin American Literature at Sonoma State University, in the CSL system, has written four books for children: a history, three biographies of great Hispanic/Latino figures, and journal articles on Chicana and Latin American writers.

The University of Wisconsin-Madison is an Equal Opportunity/Affirmative Action Employer.
BOWLING GREEN STATE UNIVERSITY
OFFICE OF RESIDENCE LIFE

The Office of Residence Life at Bowling Green State University is seeking creative, dynamic professionals for the following key positions:

ASSISTANT DIRECTOR OF RESIDENCE LIFE FOR OPERATIONS (NEW POSITION)

The Assistant Director will be responsible for the management of the day-to-day operations for the Office of Residence Life. This includes ongoing maintenance and repair needs as well as assistance in the planning and implementation of upgrades to the residential facilities. Minimum qualifications include a bachelor’s degree in Engineering, Business, and training in construction technology. A master’s degree in College Student Personnel with appropriate experience would also receive consideration. Starting salary range is $32,600 to $41,244. Full benefit package available. To apply, submit a letter of application, resume, and three names, addresses, and phone numbers of professional references to Office of Human Resources (Search 5-006), Room 100, College Park Office Building, Bowling Green State University, Bowling Green, OH 43403. http://www.bgsu.edu/offices/ohr. Review of applications will begin on June 23, 2000 and will continue until the position is filled.

ASSISTANT DIRECTOR OF RESIDENCE LIFE FOR HOUSING ADMINISTRATION

The Assistant Director will manage the residence hall assignment process for all on-campus residents. As the primary contact person for student, parent, or advisor questions and issues related to the housing assignment process. In addition, he will coordinate all prospective visitation programs that occur during the academic year, oversee the production of all housing-related publications, and be the primary residence life representative in the summer orientation and registration program. Minimum qualifications include a master’s degree in College Student Personnel or related field, and 3-5 years of full-time experience in housing or residence life. Starting salary range is $32,600 to $41,244. Full benefit package available. To apply, submit a letter of application, resume, and three names, addresses, and phone numbers of professional references to Office of Human Resources (Search 5-007), Room 100, College Park Office Building, Bowling Green State University, Bowling Green, OH 43403. http://www.bgsu.edu/offices/ohr. Review of applications will begin on June 23, 2000 and will continue until the position is filled.

COORDINATOR OF GREEK AFFAIRS (SEARCH EXTENDED)

The Coordinator of Greek Affairs will be responsible for the administration of all fraternities, sororities, and educational services for all University-recognized fraternities and sororities. Responsibilities include the selection, training, and supervision of Graduate House Directors and House Assistants; program coordination and development; organization; counseling; advising; and, serving as a liaison between the Office of Residence Life and other University departments. Minimum qualifications include a master’s degree in College Student Personnel or related field, and one year of professional, full-time experience with fraternities or sororities, preferably in a residential setting, or in residence life. Starting salary range is $29,694 to $37,695. Full benefit package available. To apply, submit a letter of application, resume, and three names, addresses, and phone numbers of professional references to Office of Human Resources (Search 5-004), Room 100, College Park Office Building, Bowling Green State University, Bowling Green, OH 43403. http://www.bgsu.edu/offices/ohr. Review of applications will begin on June 23, 2000 and will continue until the position is filled.

Bowling Green State University is an Affirmative Action/Equal Opportunity Institution.

VICE PRESIDENT OF STUDENT SUPPORT, PLANNING AND RESEARCH

This position reports directly to the President and is responsible for student activities, student leadership, childcare, counseling, student government, international student programs, minority programs, career placement, and student center. The Vice President is a member of the President’s Executive Committee.

The successful candidate will have significant progressive leadership experience in student affairs, institutional planning and research, and be expected to lead a team that is committed to student development, and to prepare students to be successful and effective leaders. In addition, the successful candidate will be an individual with demonstrated management skills, collaborative working style, excellent written and verbal interpersonal skills, a commitment to diversity, and the ability to establish a partnership between student affairs and academics in order to achieve the educational mission of the college.

Annual Salary: $111,726 • Closing Date: July 7, 2000

Long Beach Community College District
Academic Selection Committee
4901 E. Ocean Boulevard
Long Beach, CA 90808

To be considered in the initial committee review, all materials requested in the vacancy notice must be received no later than 5 p.m. on the closing date. Submission of these materials is the applicant’s responsibility. Long Beach Community College District is an EEO/AA Employer.

Director of Multicultural Programs
Affirmative Action and Multicultural Programs

The director assists in the development of programs that have an impact on a diverse faculty, staff, and student body with special emphasis on African American and Latino students at the University of Delaware. Reporting to the assistant vice president for affirmative action and multicultural programs, the director provides sustained leadership to the Center for Black Culture, including training student leaders who are directly involved in multicultural student organizations. In addition, the director is expected to offer a balanced schedule of educational, social, and developmental programs for African American and Latino students. Important also is a commitment to building strong partnerships with the larger Wilmington and Newark communities. The equivalent of a Master’s degree in Student Personnel or Liberal Arts plus study of the field is required. The position requires an understanding of the experience in dealing with particular programmatic needs of African American and Latino students. Previous experience should include administrative duties, methodology research, and supervision of staff. Demonstrated experience in similar responsibilities at a four-year institution of higher education is preferred. Extensive training and experience in diversity education are expected as is the demonstrated ability to manage a well-maintained faculty, staff, and budget. Interested candidates should submit a letter, resume, and the names of three references to Mr. Andrew Turner, Jr., Search Committee Chair, University of Delaware, 124 Hulihan Hall, Newark, DE 19716. The deadline for submission of materials is July 3, 2000.

The UNIVERSITY OF DELAWARE is an Equal Opportunity Employer which encourages applications from Minority Group Members and Women.

The UNIVERSITY OF DELAWARE is an Equal Opportunity Employer which encourages applications from Minority Group Members and Women.

DEAN
THE NEW SCHOOL

New School University invites applications and nominations for the position of Dean of The New School. The originating unit of the University, which now has seven schools, The New School was founded in 1919 as a center for "discussion, instruction and counseling of mature men and women." Today, The New School serves a substantial undergraduate and graduate population in four degree programs (Bachelor of Arts, Master of Arts in Media Studies, Master of Fine Arts in Creative Writing and Master of Science in Teaching) and 25,000 adult education students annually. It has several research and policy centers including the World Policy Institute and the Vera List Center for Art & Politics. New School University is located in the heart of Greenwich Village in New York City.

The University seeks a Dean with the capacity to identify and respond to the educational needs of a rapidly changing, global, adult urban community. The Dean will have demonstrated leadership experience in higher education, at a foundation or at an art, cultural or other non-profit institution. An earned doctorate or its equivalent is preferred. He/she will have a keen sense of the changing educational landscape, and a strong fundraising experience. He/she must possess intellectual breadth and openness, the ability to articulate publicly the role of adult education in the 21st century, and a deep appreciation of the need for an informed citizenry in a democratic society.

Inquiries, nominations and applications should be directed to: Elizabeth Dickey, Provost, The New School, 666 Broadway, New York, NY 10012. The New School is an affirmative action/equal opportunity employer.

The New School

Director of Development

Temple University, Ambler Campus, located in suburban Montgomery County, is seeking an individual to be responsible for overseeing all development activities relating to the promotion and advancement of Ambler’s funding initiatives. Temple’s Ambler campus offers the best of two worlds: the coziness of small college campus plus the excitement and vast resources of a great University. The selected candidate will work closely with the Dean, members of the faculty, college administrators and staff to plan strategy, identify major gift prospects and solicit major gifts for all Ambler Campus projects. Plan and staff major donor and other special events to promote Ambler’s funding initiatives.

Bachelor’s degree and a minimum of 3-5 years demonstrated successful fund raising experience in high education required. Candidate should be well versed in the areas of prospect identification and management, personal solicitation, stewardship, planned giving and events management. Must be computer literate and possess strong organizational, managerial leadership, interpersonal, and motivational skills.

We offer a competitive salary and benefits package, including 100% tuition remission. To learn more about Temple University or to submit your resume online, go to www.jobnet.com/temple or e-mail (referencing Req. #803-9) to Temple@jobnet.com (no attachments please). You may also send a resume to:

Harry Young, Ass' VP, HR
1601 N. Broad Street, 203 USB
Phila., PA 19122
EOE. M/F/V.

The University does not discriminate on the basis of race, color, national origin, sex, religion, age, disability, or sexual orientation in employment or the provision of services.
THE STATE UNIVERSITY OF NEW JERSEY
RUTGERS
NEWARK

CRIMINAL JUSTICE FACULTY

The School of Criminal Justice at Rutgers University-Newark has approved to hire a tenure-track faculty member to join us in Fall 2001. The appointment can be made at any rank. The School seeks a candidate of exceptional promise as a scholar and as a teacher. Expertise in the area of race/ethnicity, urban studies, and crime is preferred.

The School of Criminal Justice is a graduate program offering M.A. and Ph.D. degrees in Criminal Justice. The School also directs a criminal justice undergraduate program which is part of the College of Arts and Sciences. In January 2000, the School moved into a new building on the Newark campus, which also houses the Rutgers-Newark Law School, the Center for the Study of Crime Prevention and Social Policy, and the Criminal Justice/NJCOD library. This library is widely regarded as the best specialist criminal justice collection in the nation, and it regularly attracts international visitors as part of its Fellows Program. The campus at Rutgers-Newark was ranked by U.S. News & World Report as #1 in the nation in 1998 and 1999 for student diversity. Research support is excellent. Women and minorities are strongly encouraged to apply.

Applications, including curriculum vitae and addresses of three references, should be sent to:

Dr. Mercer L. Sullivan, Chair
Search Committee
School of Criminal Justice
Rutgers University
123 Washington Street, 5th floor
Newark, NJ 07102-5094
mrsravc@adm.comc.rutgers.edu

Rutgers, The State University of New Jersey, is a member of the Association of American Universities and is committed to excellence in scholarship. Rutgers is an equal opportunity/affirmative action employer.

REVIEW OF APPLICATIONS WILL BEGIN NOVEMBER 1, 2000

Assistant to the Director

The Office of International Student Services and Programs at Plattsburgh State University of New York is seeking applicants for the position of Assistant to the Director. This is a full-time, twelve-month position.

Responsibilities: Perform, in a team setting, a variety of logistical projects and assignments in support of the Office of International Student Services and Programs. Duties would include: organizing and processing of inquiries, applications and admission files; organizing orientation programs and workshops; coordinating host and friendship family programs, student social & communication plan; coordinating with various student service providers including the Bursar, the Registrar, Housing, Student Life, and Financial Aid to facilitate student services. This position may require some evening and weekend commitments.

Qualifications: Bachelor's degree required. Master's degree preferred. Applicable disciplines: Business, Education, Social/Behavioral Science or a related field. Strong written, verbal and computer skills; three years related experience; and the ability to work in a fast-paced environment and meet deadlines are required. Ability to communicate fluently in a foreign language(s) and experience with technology, including web page and Access database design and management preferred. Experience working with people of diverse cultural, racial, ethnic and socioeconomic backgrounds and ability to work in a fast-paced, multitask environment is desirable.

Salary: $27,174 to $32,000, dependent upon qualifications and experience with an excellent benefits package.

Applications from women and minority candidates are especially welcomed. Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

Review of applications begins immediately and continues until position is filled. Please submit cover letter; resume; and the names, addresses and telephone numbers of three references to: Chair, Search Committee (PJH 2431-808), c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2581. Fax: (518) 564-5000

CWRU

DIRECTOR
Office of Multicultural Affairs
Case Western Reserve University
Cleveland, Ohio

The Mission of the Office of Multicultural Affairs is to develop and implement a University-wide strategy signed to increase the enrollment, success, retention, graduation of underrepresented undergraduate (African American, Latino/Hispanic, Native American, Pacific Islander) enrolled at CWRU. DEAN
COLLEGE OF BUSINESS AND MANAGEMENT

The University of Illinois at Springfield invites nominations and applications for the position of Dean of the College of Business and Management.

Located in the state capital, the University of Illinois at Springfield is the third campus of the University of Illinois. The UIS campus serves over 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and an increasingly technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students.

The dean will be expected to lead the college in the achievement of several newly endowed priorities. Foremost among these is the successful completion of the accreditation by the American Assembly of Collegiate Schools of Business.

Reporting to the Provost and Vice Chancellor for Academic Affairs, the dean is responsible for the progress of the college. The dean provides leadership for the college in developmental initiatives; assists in faculty recruitment, development, and evaluation; directs resource allocations of the college, and assumes responsibility for the institutional program of the college. The dean also provides liaison with the external community and relevant professional associations.

Candidates must have an earned doctorate in a business related field with academic qualifications necessary for a senior appointment in the college. Candidates must also have a distinguished record of teaching and scholarship; administrative experience in higher education which demonstrates innovative and effective leadership; professional achievements relevant to the responsibilities of this position; experience with AACSB accreditation standards; an administrative style which contributes to a sense of academic community; a demonstrated ability to foster strong links with the business community; and a sensitivity to diverse students, staff, and faculty.

Applications and nominations should be sent to:

Chair, Search Committee
Office of the Provost
Public Affairs Center, Room 530
University of Illinois at Springfield
P.O. Box 19243
Springfield, Illinois 62794-9243

Applications should include a vita; a discussion of the candidate's academic and administrative accomplishments and interest in the position; and the names, addresses, and telephone numbers of five references. Consideration of applications will begin on September 11, 2000, and continue until an appointment is made. The appointment will commence prior to the 2001-02 Academic Year.

The University of Illinois is an affirmative action/equal opportunity employer. Persons with disabilities, women, and minorities are encouraged to apply.

ALBUQUERQUE ACADEMY
Head of School

The premier independent school in New Mexico, Albuquerque Academy is a coeducational, non-denominational day school serving 1,037 students in grades 6-12 with a comprehensive program of rigorous academics supported by strong offerings in athletics, arts, and extra-curricular activities.

An extraordinary endowment of $200 million allows the Academy to seek out talented students, employ an outstanding faculty, and maintain a superb 312-acre campus. Committed to sustaining a diverse community, the Academy invests $2.6 million a year in financial aid.

The school is seeking an energetic and visionary educational leader to shape this institution in exciting and lasting ways and to oversee its educational outreach into New Mexico and Beyond.

Applicants should submit by August 7, 2000, a cover letter; résumé; statement of educational philosophy; and the names of five references. Send to:

James & Martha Wickenden
Wickenden Associates
1000 Herrontown Road
Princeton, NJ 08540.

Albuquerque Academy is an Equal Opportunity Employer.

Hunter College, 695 Park Avenue,
Room 1103E, New York, NY 10021.

HUNTER
CITY UNIVERSITY OF NEW YORK

AN EQUAL OPPORTUNITY/AFIRMATIVE ACTION
EMPLOYER
CLARION UNIVERSITY

DEAN OF ENROLLMENT MANAGEMENT

Clarion University of Pennsylvania

Clarion University invites nominations and applications for the newly created position of Dean of Enrollment Management.

Responsibilities:
The Dean of Enrollment Management reports to the Provost and Academic Vice President and is responsible for the development, coordination, and direction of the university's enrollment management program. Responsibilities include developing strategic and operational enrollment management plans, establishing enrollment management strategies and priorities, participating in university planning, and ensuring program success. The Dean oversees admissions, financial aid, scholarship administration, student retention and advising functions, and is responsible for working with faculty and staff to create a positive enrollment management environment throughout the university.

Qualifications:
A doctoral degree in an appropriate field is preferred. A master's degree with three years experience in an enrollment management environment is the minimum qualification. A thorough knowledge of strategic enrollment management principles and the ability to apply these effectively in a highly competitive market are required. A positive attitude and creativity in promotion of institutional image, an understanding of technology applications in enrollment management, a commitment to diversity, and the ability to work well with people are necessary characteristics. Competitive candidates will have significant marketing and research experience and will have previously supervised staff in at least one of the functional areas of responsibility for the position. Completion of a successful on-campus interview is required.

Applicants and Appointment:
Candidates for Dean of Enrollment Management must submit the following materials: a letter of application addressing qualifications for the position, resume, and three current letters of reference. The evaluations of references must be based upon personal knowledge of the applicant's professional performance. Application materials and requests for additional information concerning the position should be addressed to Ms. Bobbi Heeter, Search Committee Coordinator, 115 Carrier Administration Building, Clarion University, Clarion, PA 16214. Applications received by August 1, 2000, will receive full consideration; review of applications will continue until the position is filled. Salary and benefits are competitive; appointment could be as early as October 15, 2000.

The University:
Committed to a strong teaching mission complemented by research and service, Clarion University of Pennsylvania takes pride in the accomplishments of its students, who graduate from programs recognized for quality and that have earned the most prestigious accreditations including, AACSB, ALA, AOTA, ASHA, NASM, and NIMH. Located in a region of western Pennsylvania, the university enrolls approximately 6,000 students who attend classes at campuses in Clarion and Oil City, the Pittsburgh site, and the various distance education locations throughout the state. Clarion University, as one of fourteen comprehensive public universities in the Pennsylvania State System of Higher Education, offers a substantial general education core and makes the latest in technology available to its students who pursue associate, undergraduate, and graduate degrees. Academic programs are conducted through the Colleges of Arts and Sciences, Business Administration, and Education and Human Services, and through the School of Nursing.

PRESIDENT
University of Miami

The Board of Trustees of the University of Miami invites nominations and applications for the position of President to succeed Edward T "Tad" Foote, who has announced his intention to retire after nineteen years of distinguished service. The President is the chief executive officer of the University and reports directly to the Board of Trustees. The successful candidate for President will be an individual who can build upon President Foote's considerable accomplishments and provide leadership that will expand the vision of the future of a dynamic, emerging, urban research university.

Founded in 1925, the University of Miami is one of the largest, most comprehensive, private research universities in the Southeast, located in one of the leading international cities in the United States. The University's four campuses include the suburban Coral Gables campus, the School of Medicine in downtown Miami, the Rosenstiel School of Marine and Atmospheric Science on Virginia Key, and the South Campus in southwest Miami-Dade County.

The youngest of the 26 private research universities in the United States that operate law and medical schools, the University of Miami is known for its outstanding faculty and research, diverse student body, athletic excellence, and community service. The University enrolls over 13,000 students, employs more than 8,000 faculty and staff, and has an annual operating budget of $893 million. The University of Miami/Jackson Memorial Medical Center, the largest in the Southeast, is ranked by physicians as one of the nation's top 25 medical centers, serving the health care needs of the community.

Nominations and expressions of personal interest will be accepted until a new President is selected, and should be forwarded to the following address:

University of Miami
Presidential Search Committee
500 N. Akard Street
3232 Lincoln Plaza
Dallas, Texas 75201

The Search Committee and Board of Trustees are being assisted by R. William (Bill) Funk, the Managing Director of Korn/Ferry International's Education Practice.

"The University of Miami is an equal opportunity/affirmative action employer."

An EO/AA/IRCA Employer M/F/D/V.
BE HISPANIC, EDUCATED, AND PROUD

The face of America is changing. Ethnic communities, once anomalies, are now the majority culture in towns, rural and urban, across the land. Where commonalities are strongest, transnational groups gain enormous strength in all aspects of community life—economic, social, and political. And so long as those diaspora communities are young and frequently renewed, immense energy is generated. In no small way, the public institutions are similarly impacted among them, local schools.

At Washington State University, I live and work among towns where hundreds of Hispanic students, largely of Mexican heritage, attend and graduate from regional high schools, and where mid-life adults seek new opportunities. Community colleges have responded commendably to both realities. But the large research universities have remained somewhat aloof. At the same time, students candidates themselves seem less than proactive in their efforts to open the doors to those institutions.

There is great debate over the breakdown between potential Hispanic students and higher education. Stereotypic perceptions punctuate the rhetoric. The oft-cited tradition vs. education dichotomy rings hollow in a modern society where jobs and opportunities abound. Financial constraints to university resident study are critical to many. But work-study programs and student loans seem as substantial as ever. Accounts by first- and second-generation school-leavers of cultural and language discrimination in the rural schools of the Southwest take on the flavor of folklore at this juncture. And the persistent opinion that inadequate language skills are a deterrent to successful college studies is no more true for Hispanic students than for any other sub-group.

Conventional wisdom applied to potential Hispanic college students is no longer valid, if it ever was.

I tend to feel that the mismatch between young Hispanic persons and the pursuit of higher education is of a complex sub-cultural nature. Young people might try to distance themselves from certain conditions related to their ethnic roots—to the labor of their parents, to poverty; to the pain of imposed stereotypes or second-class status. In their effort to become something different, a sub-culture or transitional identity emerges, sustained by numbers and like-mindedness and outwardly manifested in dress, speech, music, consumer goods, and attitudes. Too often parents see this interim identity as inconsistent with traditional values. Neither is it well accepted by mainstream university society. Thus, those symbols that created an identity cushion in the locus high school years are out of sync with college expectations. The specter of reverse alienation looms large.

Earlier years might have generated a different interim identity cushion, or sustained and supported by Latino movements, civil rights legislation, affirmative action, and soft money. Those supports ushered in exemplary Hispanic leaders through higher education and into regional and national prominence. But the popularity of all that has since waned, along with the strength of its heritage and all its traditions. Today's young Hispanic persons are expected to compete successfully. And a great deal of cultural richness has been lost in resultant attempt by some to mainstream at all costs.

I detest a growing assumption by young Hispanics that breaking into mainstream university life and/or society at large must be achieved at the expense of the mother culture, a mindset I challenge and dispute. I feel deeply that one can be fully Hispanic and fully American. To a considerable degree, they are one and the same. My own bilingual, bicultural family resided throughout Latin America for many years, enriched by the several cultures among which we lived. At one time we were obliged to discard our own values in order to "belong."

The richness of Latin American languages, literatures, art, history, music and intellect is a heritage that should never be sacrificed. To be bilingual is a bicultural or cross-cultural is to be better endowed for the times and for the future. Role models for Hispanic students were once hard to find. Now other that true. Hispanic people have arrived. No student should hesitate to claim place in the sun. I encourage all to be who they are—but strive for excellence. Everyone respects excellence.

The university campus can be impersonal. It is not home, nor barrio, nor village, but a stepping stone to the wider world. I constantly encourage my university to recognize the wealth of the Hispanic culture, to embrace the presence of students on campus, and to help them reinforce the strengths of the heritage so that they in turn might enrich our own.

Corporate Philanthropy: An American Tradition

BY GUSTAVO A. MELLANDER

United States, unlike many other countries, has a long history of philanthropy. People give away their hard-earned money freely and with a degree of panache unheralded throughout history. The tradition goes back to America's very earliest days. Even during the colonial period, the idea of sharing was woven into the region's fabric. Higher education was an early benefactor, and millions of students have benefited from that tradition.

Nineteenth-Century Philanthropy

About a hundred years ago, a man who'd come to America from Scotland years earlier, Andrew Carnegie, began to write another chapter in America's philanthropic history. Having accumulated millions, when a million dollars was not the paragon of your next door neighbor, he announced that a man who died wealthy died disgraced.

He began to build and furnish thousands of libraries throughout the world. Later he turned his attention to higher education endowed scholarships, funded academic programs, and assisted scores of colleges and universities. Shocked by the penurious circumstances of retired faculty members, he decided to create a retirement organization to provide them with dignity and ease in their final years. Today, hundreds of thousands of college teachers and administrators are protected by his Teachers Insurance and Annuity Association and its partner, the College Retirement Equities Fund, better known as TIAA and CREF.

Carnegie's many philanthropic endeavors were not always appreciated. His reputation and thus his money were tainted by the harsh and exploitative 19th-century labor practices that prevailed in many of his business ventures. Some institutions and communities refused to accept his largess. Nevertheless, he persevered, and his positive monuments are legion.

The 20th Century

In Fall of 1999, billionaire Bill Gates, Microsoft's CEO, unveiled his largest philanthropic education initiative to date. Conscious of the small number of minorities in leadership positions in the burgeoning electronics, high-tech field, Gates felt that efforts had to be made to guarantee a diversified leadership in the new century. He felt that too much talent was not being developed.

Thus he pledged one billion dollars for total-cost college scholarships. These funds will be specifically targeted for African American, Hispanic, and Native American students. Although most will be utilized for undergraduate studies, graduate education, including doctoral studies, may be funded as well. Information is readily available at every college campus about this unique program.

Now another billionaire has stepped forward with a revolutionary idea. One that could not only benefit millions of students but challenge the very underpinning of higher education. MicroStrategy CEO Michael Saylor recently stunned those attending the Greater Washington Business Philanthropy Summit. He announced that he was going to establish and fund a free online university to serve the entire world.

To start the ball rolling, he formally announced that he will deposit $100 million to create the world's first totally free Internet university. Saylor's dramatic, ambitious plans envision free tuition for everybody. Courses will be offered by the best faculty in the world through the Internet. That's the plan in a nutshell.

He has already appointed three high-powered Washington, DC, advisers: Stephen Joel Trachtenberg, president of George Washington University; James Dyke, former Virginia secretary of education; and Bobbie Kilberg, president of the Northern Virginia Technology Council.

They have begun explaining the university to several Washington-based groups. At one of those meetings, Saylor noted he could have done something more conventional. In fact, a few months earlier, a college colleague from the Massachusetts Institute of Technology had pointed out that $1 billion would fund scholarships for every student there forever.

But that, Saylor said, only triggered his imagination on what the Internet might allow him to do. It occurred to him that a whole new system could be established to offer a college education to everyone, for free and forever. In the coming months, he will establish a studio in the Washington area to videotape lectures by today's best teachers—lectures that will form the core of his university.

In a perfect world, I could sit down and hear Michelangelo's sculpture, hear Beethoven about the Seventh Symphony, and Lincoln on the Civil War; he a Washington press conference when they launched the technology to capture great minds did not exist does today, and he is determined to seize the moment. Saylor is grateful for having been attend MIT on a scholars notes that a single year's was more than his family's savings. Knowing how close b to missing out, and know hundreds of thousands of well, he has carefully crafted his plan so that he will finance his desire to higher education free, ubiquitous, and available to all.

His university, he said, intended to replace those one by one but to expand beyond the others in the trenches. He is different, maybe even feels. He readily admits university will not offer the quality of a traditional campus—"which eating club to Harvard" is a decision that all of people will never get to. He added, at least Harvard-quality curriculum: A brave new experience in watching—and perhaps exporting.

Coca-Cola Investing in Education
And Bottlers Support Community Projects Nationwide

BY JEFF SIMMONS

Adrian Contreras-Rosenfeld settled into a job as an archivist at the Matthew Marks Gallery last year, maintaining photographic records of artists' works and addressing press requests. The 25-year-old doesn't entertain the notion of leaving anytime soon.

"This is a dream job," said the El Paso, Texas, native. "It's extremely dynamic, one of the premier galleries in the world."

It's a position that he most likely would not have achieved, he says, if it weren't for the financial foundation laid a few years back when he received a prestigious scholarship that allowed him to attend college. The scholarship program also strengthened his confidence.

"The most important thing the scholarship did was give me the confidence to go after really big things," he said. "My family wasn't well off, and growing up in one of the poorest cities in the nation, you don't really shoot for the stars as much as you should. This scholarship gave me the green light to dream a little."

Contreras-Rosenfeld has since been able to realize his dreams. He credits the Coca-Cola Scholars Foundation with charting him a brighter future. It's a corporate investment, he believes, that exceeds other scholarship programs because Coca-Cola maintains close ties with recipients even after college.

This spring, the $1.8 million program awarded scholarships to 200 students, bringing to 2,000 the number of recipients since it was founded in 1986 by Coca-Cola Bottlers and the Coca-Cola Company. The goal isn't to reward academic achievement as much as civic and community responsibility—to recognize students who are making contributions to their neighborhoods and to society.

Foundation president Mark Davis said that Coca-Cola has pursued well-rounded students, those who volunteer or have started organizing to raise awareness of local problems. And the students last year. And it's extremely competitive: more than 17,000 students applied for this year's scholarships, and 250 finalists were summoned to Atlanta for interviews. Of that group, 50 received $20,000 scholarships, and 150 were handed $4,000 ones.

The program has made a significant effort to encourage Hispanic students to apply, but their numbers have remained consistently low. Of the 117,000 applicants, only 8,300, or seven percent were Hispanic, and (by press time) 29 of the finalists, or 12 percent, were Hispanic.

That represents a trend, because over the last decade, the highest percentage of Hispanic applicants were eight percent in 1988. Davis couldn't explain why the number of Hispanic applicants has not increased, but he hopes that the future will draw greater numbers.

Reflecting on the growing Hispanic population nationally, he said, "From a business standpoint, corporations look for the type of worker they are going to need in the future. Organizations want to identify and help create the kind of workforce that comes out of college in the future, plus those are the consumers of the future."

He adds, "At Coca-Cola, we've always said that an educated population is the best kind of consumer for us. So Coca-Cola, as an organization, and not only our program, has committed $1 billion to education in general in the nineties."

That has ranged from donations to individual schools to supporting campus activities to reach in impoverished neighborhoods. In New York City, for instance, bottlers have supported anti-graffiti efforts and Little League teams. Atlanta, Coca-Cola recently organized a golf outi

Dr. J. Mark Davis, Coca-Cola Scholars Foundation president
Tucker said that Coca-Cola also targeted funds to aid Hispanics where they often need it most—to transfer from a two-year community college to a four-year institution. “We know that more than 50 percent of Latinos who start college do so at a community college, but few actually transfer to get their bachelor’s degree,” she said.

Coca-Cola provided the lead $100,000 gift to the fund’s community college program one year, a gift that got the ball rolling on other contributions. “We were then able to go to other corporations and get them to support the program,” she said.

Since then, the fund has been able to grant scholarships to 80 community college students to enable them to attend four-year schools.

Involvement has exceeded simply doling out money to encourage involvement. Coca-Cola hosted and organized the fund’s first golf tournament, the Coca-Cola Classic, in early April. The 18-hole event at the Atlanta Country Club raised $93,000. “They know that Georgia [has] the fourth fastest-growing Latino population in the nation,” said Tucker, who says that the money raised—and $93,000 in matching funds—will go to Hispanic students in Georgia.

She said that she is not leery of corporate involvement and acknowledges that often, when corporations become involved, it is to spur brand loyalty in the future. “When these same companies give me money and allow me to pick the best students, I’m grateful: I’m not leery,” she said.

“I know that Coca-Cola believes education is an important priority for this country. They seek partners that are innovative and creative in working with them to support students in unique ways. I think it’s a smart investment on the company’s part.”

HACR, a coalition of the 10 largest Hispanic organizations in the country, works with Fortune 1000 companies to create partnerships and assist them with employment, procurement of Latino businesses, philanthropy, and governance. HACR is now attempting to strengthen its ties with Coca-Cola.

“Organizations understand that unless they deal with issues that confront our nation’s Hispanic youth, you’re going to have an enormous problem,” she said. “There’s no way to circumvent that, because not enough kids will go to college and too many will drop out of school.”

Much of the grassroots work is performed by the 100 Coca-Cola bottlers across the nation. The Coca-Cola Bottling Company of New York, Inc., has dispatched volunteers to graffiti-plagued neighborhoods in New York City to clean up buildings. It has created Little League tournaments; donated computers to students to assist...
them in college, and even arranged a neighborhood Halloween party.

“We try to get involved in outreach as much as possible,” said Ed Diaz, sales manager for community marketing for the New York company. “When it comes to helping kids and being involved with kids, we’re more than likely will entertain those opportunities.”

Last year, the company spent $14,000 to award laptop computers, printers, and leather cases to five needy students who received either scholarships or tuition assistance but couldn’t afford the necessary equipment to thrive.

“We selected students with very high potential who were looking to move back into the community once they finish college,” Diaz said. Many of the students who were reviewed by the committee are Hispanic. This year, he hopes to double the number of recipients to 10.

Diaz noted that officials surveyed parents at a Halloween roller-skating party, a Coca-Cola-sponsored event that drew about 1,900 kids from 20 community centers in the Bronx, Washington Heights, and East Harlem.

“We asked them what was the most important thing they wanted us to be involved in, and the No. 1 thing that was dear to their hearts was to give to education,” Diaz said. He then added, “I’m seeing this computer thing being contagious from one bother to another.”

“We do value urban kids reaching their potential. We want to do anything to make sure that they are on the right track,” Diaz said.

He also dismisses criticism that such involvement could be viewed as a marketing ploy designed to boost sales, but he admits that that is a benefit. The move comes at a time when Coca-Cola and PepsiCo have lobbied school districts across the nation to be a district’s soft drink of choice (New York City, for instance, recently rejected offers from both).

“It’s more than just selling sodas,” Diaz said. “There’s a huge company, one of the number one companies in the world, the No. 1 recognized trademark, and they’re taking a very grassroots approach, especially the independent bottlers, to help kids. We are doing things that are very relevant to each neighborhood.”

In the Bronx neighborhoods of Hunts Point, Soundview, and Southern Boulevard, the Hispanic population has exploded in recent years, and so has Coca-Cola’s involvement. “We didn’t have to solicit them,” said 75th District Assemblyman Ruben Diaz Jr.

“We have to be pragmatic about this,” he said. “I’m sure Coca-Cola does this to boost their sales, but there is a genuine concern and interest in the community. We as the Latino community have tremendous purchasing power, and we make up about a third of Coca-Cola’s sales. But it’s good to see that they say thank you and give back to the people who have helped them become successful.”

He is especially pleased with Coca-Cola’s efforts to support local Little League baseball teams in the area. The company supplies players with equipment and posts food carts at games, with most of the proceeds given to the teams.

“I would like to see other corporations make this kind of contribution. I hope they look at Coca-Cola and follow suit,” he said.

Mark Davis of the Scholars Foundation said that the bottlers are responsible for initially fueling the Foundation, for getting it on its feet. The program has evolved to encompass more winners, and Coca-Cola is reaching out more to Hispanic youth to attract their applications.

Recently, posters in Spanish have been distributed in New York City, New Jersey, and Florida. Staff have been dispatched to schools to talk with students about the program. And this year, previous winners have been encouraged to return to their schools to talk about life after graduation.

That life includes monitoring by Coca-Cola to check up on winners’ career paths.

“When a student receives a scholarship, it’s not really about giving him or her a check saying ‘Good luck with your education. It’s about creating a relationship and tracking them through the rest of their lives, when they Assume leadership in their communities,” Davis said.

Adrian Contreras-Rosenfeld originally wanted to become an international corporate attorney when he enrolled at the University of Texas at Austin. His dreams shifted during his studies, as he came to appreciate art. His mother is an accomplished Mexican painter.

“This scholarship allowed me to travel, to get out of the city and see as much of the world I could, and not settling for a typical job working for corporations. America. It really let me explore my options,” he said. “The scholarship made me realize I could attain things I were off the beaten path.”

He is moved by Coca-Cola’s outreach officials have contacted him several times a year since graduation, and have even informed him of other scholars’ moves to other areas.

“Lots of people give money away, but to actually do follow-up and stay with us takes more of an effort,” he said. “They see it as more of an investment than a donation.”
Several studies conducted by the securities industry last year revealed that only nine percent of English-speaking Hispanics owned stock, bonds, or mutual funds compared to 49 percent of non-Hispanics in the U.S.

Having ignored the Hispanic market for years, Wall Street is finally paying attention to Latino/Latina investors.

A combination of factors, including the rising Hispanic population, the increased affluence of many Hispanics, and an increasingly competitive marketplace, is encouraging firms to reach out to Hispanics.

"The affluence of Hispanics has grown to the point where it can no longer be ignored. The economics have caught up with the recognition that Hispanics are an important market," said Tom Acosta, one of the highest-ranking Hispanics at Salomon Smith Barney and its director of U.S.-Hartley Marketing. Acosta was the introductory speaker at the Los Angeles symposium.

"The seminar was only one part of a much larger initiative to reach out to the Hispanic/Latino community throughout the U.S. and increase their awareness of financial services and opportunities in the financial sector," explains Ivon Silva, managing director of the Hispanic/Latino business at Salomon Smith Barney, in New York. Silva is bilingual and was born in Ecuador and raised in New York. She has a degree in economics from Brooklyn College. Hiring Hispanic employees is an increased opportunity for Wall Street.

Merrill Lynch, the largest brokerage firm in the U.S., followed by Salomon, is also targeting Hispanic investors through its more than 300 local financial counselors in the states, explains Juliane Parker, vice president of Word Minority Marketing at Merrill Lynch, based in New Jersey. The firm already produces a series of bilingual brochures on investing. Encouraging the Hispanics to invest in stocks "is an educational process," Parker says, "as they discuss return versus risk, and how stocks have a higher yield than cash equivalents," she added.

"In the past," Silva candidly admits, "Hispanics haven't been a key player. Increasingly, Hispanics are becoming an important community." Various studies indicate that only three to five Hispanics invest in the stock market, and most keep their savings in income, risk-free investments, said Silva. "Hispanic are losing gro..."
continued. “If you’re earning three percent in a savings account, fees and cost of living will negate that savings.”

What Hispanics need is access to more information. “Without information, Hispanics won’t develop the habit of keeping money in stocks and bonds. It’s a learning process,” Silva said. It’s her opinion, too, that since Hispanics don’t have a long history of relationships with financial counselors, “there’s less trust. Trust must be earned over time so Hispanics feel more comfortable” with financial services advisors and investment companies.

But some people are skeptical about the long-term commitment that financial companies will make to Latinos and other ethnic groups. “My experience has been that targeting Hispanics can easily become a flavor of the month,” said Charles Gonzalez, who spoke at the Hispanic symposium in Los Angeles and is the author of *Yes You Can! Every Latino’s Guide to Building Family Wealth* (Chandler House Press, 1998) and president of the Mileso Financial Services Group in the Bronx, New York. “I’d like to see in a year or two if the commitment is there,” he said. As of now, Ricky Martin and Christina Aguilera are at the top of the music charts, and the Latino explosion has begun, but Gonzalez wonders whether financial services companies will sustain their targeting of Hispanics when the publicity and hoopla fade.

Companies are targeting Hispanics because “asset-gathering is hugely competitive. The low-hanging fruit is no longer there,” said author Gonzalez. But why were Hispanics in the past content to keep their savings in safe investments like money market accounts? “Hispanics have had lower incomes. Fifty percent of Hispanics [in the U.S.] [is] born elsewhere, so you have language issues and culture disconnection. Many Hispanics hail from countries where stock markets weren’t mature and where they had no trust in the banking system,” Gonzalez noted. Immigrants wanted to protect their savings and hence took few risks. Furthermore, financial institutions ignored them, targeting only professionals and entrepreneurs with six-figure incomes—“high net worth individuals.”

“Hispanics,” Gonzalez said, “offer an untapped market.” He points to a couple that he recently advised who are both school principals, with a joint income of $90,000 but were ignored by major financial analysts. More than 1.4 million Hispanics own businesses, and one-quarter of a million Hispanics own businesses in Los Angeles alone, Gonzalez said. Many of them have not invested in IRAs, so the market is waiting to be discovered.

One way to overcome this penchant for conservative investing is to establish a relationship with a financial counselor or advisor. Silva advised that Hispanics interested in finding a financial advisor seek out recommendations through word-of-mouth of family or friends. “Ask about the advisor’s track record, see a record of what stocks or mutual funds they advise and what their rate of return was in the previous few years, ask their philosophies on investment (risky high-tech stocks versus large cap mutual funds), and see how their goals coalesce with yours.”

Experts agree that you don’t have to be earning six figures to start investing. Hispanics need to realize, Silva suggests, “that you don’t need large amounts of money to invest. You can start with a smaller nest egg.” Hispanics who invest in IRAs (Individual Retirement Accounts), for example, “are putting their money back to work for them,” she said. Instead of paying higher taxes, their investments will grow, and their taxes are reduced. Investing depends on each individual’s particular circumstances, including age, earnings, and retirement goals. Silva noted that younger Hispanics, reared at a time of a stock market boom, would likely be more receptive to more aggressive investing. “If you’re closer to retirement, you’re likely to be more cautious,” she added.

But critics suggest that financial services companies like Salomon Smith Barney, Merrill Lynch, and others promote certain stocks that the company has underwritten and often fail to look out for an individual investor’s interests. Rejecting that notion, Silva replied that “all financial counselors are trained that the client’s goals and needs have to be met first. Financial counselors are trained to see what benefits the client and not simply to suggest a buy.” But Gonzalez added that “individuals need to take responsibility for educating themselves.” Ask if the company has financial information and brochures of their products in Spanish. He noted that most companies do not, and he knows only two that have distributed bilingual financial information, State Street Research and Aetna. “Many counselors find it frustrating dealing with Hispanics because of the education that is required and overcoming that conservative nature,” he said. But Gonzalez said that most financial service companies offer mutual funds with solid credentials and are not out to exploit their clients.

Will financial services companies target middle-class earners not ju-
affluent professionals? Gonzalez felt that even the recent symposium was aimed at high-net individuals and ignored middle-class earners. "Wirehouse brokers target the most highly affluent professionals, business owners, managers, and executives," said the author. Indeed, even a Salomon Smith Barney representative explains. "Generally investors come to us when they've reached a certain level in their assets. Our average client has assets of $300,000, but we also have clients with less than that and more than that," noted Mary Connolly of its public relations staff. But will its investment brokers be empathetic to teachers, firefighters, social workers, and administrative assistants who can invest only a limited amount each year? That question remains critical for middle-class Hispanic and middle-class investors in general.

Merrill Lynch appeals not only to high-net-worth individuals but is known for bringing "Wall Street to Main Street," Parker noted. Any client can purchase a stock online for $30, and investors can enroll in automatic savings plans for as little as $30 a month. Parker said that investors can open a Merrill Lynch cash management account with $20,000.

Asked what special programs Merrill Lynch has designed for Hispanic investors, who aren't used to forming relationships with financial counselors, Parker again mentions the role of its 300 local financial counselors. Clearly there aren't any special programs, other than bilingual brochures.

Merrill Lynch is leaving reach an untapped Hispanic market, the resources of its broker network. Nonetheless, experts see the growth of Hispanics by financial services companies as a positive step. "When a powerful resource-rich organization taps Hispanics, it can have a dramatic positive impact on the ability of Hispanic families to create financial independence," said Gonzalez: predicted that a "ripple effect would lead one Hispanic family had a successful investing experience to recommend a financial plan to another...." One Spanish investor with 20 family members and friends generate myriad recommendations to a financial counselor. "But the issue is the need for Hispanics to have access to information and knowledge, not only at the top 10 percent of earners, but for the huge middle class," Gonzalez asserted.

---

**UNIVERSITY OF NEW HAMPSHIRE**

**Forest D. McKeary Professorship**

**Health Services Research**

The University of New Hampshire invites nominations and letters of application for the inaugural appointment of the Forrest D. McKeary Professorship in an appropriate department of the School of Health and Human Services with the opportunity for a joint appointment (e.g., Economics in the Whitemore School of Business and Economics or Sociology in the College of Liberal Arts) and participation in doctoral programs. The responsibilities of the position include teaching, graduate and/or undergraduate courses, conducting applied research in health policy analysis relevant to the State of New Hampshire, and providing leadership in the development and implementation of health services research at the University of New Hampshire. The candidate is expected to have an earned doctorate in an appropriate discipline, e.g., health economics, policy, public health, epidemiology, or sociology. Candidates must have a strong record appropriate to their rank in teaching, scholarship, and health policy grants. This position is expected to work closely with the School of Health and Human Services Institute for Health Policy and Practice, a newly created cooperative effort of the State of New Hampshire, Dartmouth Medical School and UNH.

Letters of application should include curriculum vitae and name, address, telephone number and e-mail address of five references. The Committee will begin reviewing applications immediately and will continue until the position is filled.

McKeary Professorship Search Committee

School of Health and Human Services

217 Hewitt Hall, 4 Library Way

University of New Hampshire

Durham, NH 03824-3563

UNH is committed to enhancing the diversity of its faculty and staff and encourages applications from women, persons of color, persons with disabilities and veterans.

**THE UNIVERSITY OF UTAH**

**ASSISTANT DEAN FOR DIVERSITY**

The Graduate School at the University of Utah is seeking nominations for the Assistant Dean for Diversity: a 12-month professional position reporting to the dean of the Graduate School. Candidates must demonstrate writing ability and excellent interpersonal communication skills. Experience with a diverse student population for recruiting and retention is preferred, and a masters degree in a related area is required. Primarily responsibilities are recruitment and retention for groups historically underrepresented in graduate education, administration of graduate summer research opportunities, development of externally funded grant proposals, graduate education, and other related duties.

Founded in 1850, the University of Utah is the flagship institution in the U system of higher education. It is accredited by the Northwest Association of Schools and Colleges with a graduate enrollment of over 900 students in 16 colleges. The University is located in Salt Lake City, a metropolitan area with a population almost a million citizens in the greater Salt Lake Valley. The University of Utah is affirmative action/equal opportunity employer and encourages applications from women and minorities and provides reasonable accommodation to known disabilities of applicants and employees. Nomination letters and letters from applicants with copies of a curriculum vitae plus names, addresses, e-mail, phone, and fax number three referees should be sent to: David S. Chapman, Dean of the Graduate School 310 Park Building, University of Utah, 201 South President's Circle, Salt Lake City, UT 84112-9016; 801/581-7642. This position will remain open until filled.
Lucent Foundation Targets Education

From Universal Preschool to Grad School Access for Minorities

BY AMALIA DUARTE

You might know Lucent Technologies as a premier high-tech company, as home of the renowned Bell Laboratories, or as the people who "make the things that make communications work." But did you know that there's another side of Lucent that last year gave away nearly $40 million around the world to programs benefiting young people?

In less than four years since spinning off from AT&T, Lucent has become one of the largest givers of corporate philanthropy in the country. In fact, just in the past two years, its giving has increased nearly fivefold, from $106 million in its fiscal year 1998 to an anticipated $500 million this year (Lucent's fiscal year runs from Oct. 1 to Sept. 30).

Barely off the ground in 1998, Lucent's Foundation already was ranked by the Foundation Center as No. 47 in dollars donated among U.S. companies and will probably improve its ranking on future lists. "We will probably jump up that list even higher," said David Ford, president of the Lucent Foundation, "now that our programs are really getting off the ground."

The Foundation's quick growth mirrors the fortunes of the company itself. The Foundation was created after Lucent officially split from AT&T to become an independent company. At the time, Lucent was viewed as a stodgy manufacturer, but now Lucent is focused on high-growth areas such as optical and wireless networks, Internet infrastructure, semiconductors, and fiber optics. Today its stock is among the most widely held in the country, and it posted $39 billion in revenues in 1999, growing 20 percent over the previous year.

Lucent's CEO and Chairman Rich McGinn also chairs the Foundation's board of trustees, which is comprised of Lucent corporate officers. And the company earmarks 1.2 percent of its pretax income for the Foundation.

The Foundation started off on a strong footing with some seed money from AT&T and a legacy of decades of charitable giving. In its debut week as a new company,
some 6,000 Lucent employees volunteered during a Global Day of Caring at more than 100 community service projects worldwide. But Lucent took a decidedly different tactic to giving than did AT&T. While AT&T funds everything from the arts to community groups to the environment, Lucent decided to take a more focused approach and concentrate on young people and education. As a business-to-business company, the Foundation had the freedom to follow a narrower path.

"If you think about it, education is key. If you can solve the problems in education, then you can solve a lot of societal issues," said Phyllis McGrath, vice president of the Lucent Foundation. "And that's been the focus and commitment right from the beginning."

Its mission statement and six priorities underscore the Foundation's focus on youth. "Our mission is to help young people prepare to meet the challenges of our changing global society. Education is the key." And its priorities underscore that message. The six priorities are: improving public schools; developing and supporting teachers; preparing youth for a diverse world; inspiring excellence in science, math, and engineering; engaging Lucent employees; and supporting Lucent's communities.

Based in Murray Hill, N.J., the Foundation casts a wide net in its giving activities, reflecting its influence around the world. Nearly one quarter of its 15,900 employees are located in countries other than the United States. It supports hundreds of organizations through its grantmaking and has been announcing new efforts at a head pace.

One of its flagship efforts, the Global Scholars Program, now awards more scholarships to young people outside the United States than to U.S. students. Last year's crop of 80 students included three from Argentina, five from Brazil, and five from Mexico. And this year the Foundation will award even more scholarships—107 in total—including 34 to first- and second-year students at technical universities in 19 countries and regions outside the United States. "When we decided to start this program, I said, 'Let's make it global. And we've been under pressure ever since from our colleagues around the world to add more countries and regions to the program,'" said Ford.

The Foundation has committed $20 million over 10 years for the Scholars Program, which is designed to encourage the world's youth to pursue careers in communications technology. Scholarship recipients spend a week in the summer at the Lucent Global Science Scholars Summit, meeting with Bell Labs scientists and learning about exciting new technologies. In addition, scholars get a one-time award of $5,000 and opportunities for internships at Bell Labs locations around the globe. "We are not trying to build a future pool of employees," said Ford. "Although... if they regard us with affection, that would be great."

As a result of the Foundation's focus on preparing youth for a diverse world, many of its initiatives touch the lives of minority and Hispanic students here in the U.S. "Most of our educational programs are aimed at those who are needy," said Ford. "So a very significant portion of our efforts address Hispanics."

One of its most recently announced programs hopes to improve the educational prospects for disadvantaged children by reaching out to them before they are on foot in a real classroom. Starting in January, the Lucent Universal Preschool Initiative is designed to encourage universal access to quality early childhood education. Its first year, the initiative is giving million in grants to 13 programs that provide early childhood education and care to preschool children.

The Foundation also will sponsor a national conference on universal preschool this year to share with national audiences the knowledge and experience of these programs. To implement this program, the Foundation has partnered with Child Care Action Campaign and Families and Work Institute, two nonprofit organizations based in New York City.

During the past few years, the Foundation has been building for univer...
University students from Mexico met with Lucent researcher Horst Stormer, a recipient of the 1998 Nobel Prize in Physics, to discuss his experiences in the field of research.

The Lucent Foundation got on board. Brain research has proven that children are like sponges during those first few years of life and will fail to expand intellectually if left in an unstimulating environment. And some studies have concluded that most pre-school and day care settings are not of good quality.

"We know that too many children are starting school already behind in their development," said Ford. "We've got to get children away from sitting in front of the television and being neglected in warehouse day-care settings."

The Foundation's effort helps build support and keeps the spotlight on universal preschool. "We're extremely excited about Lucent's involvement. To have a major foundation and major corporation aligned in the goal to provide universal, quality pre-school is powerful," said Faith Wohl, president of the Child Care Action Campaign.

"You don't often get a partner with that kind of clout and credibility."

On the other end of the educational pipeline, last fall, the Foundation gave grants to 11 universities in support of initiatives aimed at improving K-12 education. Recipients include Hunter College of The City University of New York (CUNY), McGill University (in Montreal), Montclair State University (N.J.), North Carolina State University, the University of California at Los Angeles, and the University of Texas at El Paso. At most Foundation efforts are not specifically targeted at Hispanics or minorities, but two important exceptions are the legacy programs based at Bell Labs. Each year, the Bell Labs Cooperative Research Fellowship Program (CRFP) for minorities and women selects six students majoring in science, math, and engineering to receive four-year doctoral fellowships. Students

**Students get college tuition, an annual living stipend of $17,000, a book allowance, university fees, related travel expenses, and summer employment at Bell Labs.**

UTEP, the money will support a project called Literacy in Action that allows all children in grades six to nine to complete a high-level course in reading and writing. Get college tuition, an annual living stipend of $17,000, a book allowance, university fees, related travel expenses, and summer employment at Bell Labs. A parallel program called the Graduate Research Program for Women (GRPF) offers the same benefits to six female students each year.

Both initiatives are designed to provide encouragement and financial support to students who have demonstrated high potential for pursuing a career in technology. "You can count the number of minorities who get Ph.D.s each year on one hand. So this program really has a tremendous impact," said McGrath. "And it's a natural for Bell Labs, where there is a real, deep-rooted interest in pulling the next generation along."

As Lucent continues to grow as a business, its Foundation will undoubtedly expand its reach even further. "We're in it for the long term and for what we can do for the community," said Ford. "We're not in it for the publicity or the self-aggrandizement. We're in for a simple reason: to help young people."

Amalia Durante is an editor in public relations at Lucent Technologies.
First, let's give the MSU Spartans their due as the reigning NCAA Division I Men's Basketball Champions, a title that the team recently won, defeating Florida in the high-profile, prime-time nationally televised event. Congratulations are in order for this distinction, and for many proud achievements in the arena of higher education. President Peter McPherson reports, "We are a comprehensive, internationally recognized center for learning, research, and service. Our work has a tremendous impact on today's global needs: K-12 education, agribusiness, human and animal health, food safety, biotechnology, and international connections." He adds, "Nearly a century and a half after its founding, Michigan State University continues to build its success on the land-grant tradition of public service, teaching, and research. Yet, we're doing so in new and innovative ways, using technology to meet the diverse needs of our students, for example, and offering more cost-effective options for students to study abroad."

"Michigan State," he says, "has embarked on the new century with academic strength, fiscal stability, and tuition restraint. The University remains committed to an affordable education for the next generation of students, extending its innovative Tuition Guarantee, for the sixth year, in 1999. In fact, MSU's average tuition increase for those years is 2.7 percent, far below the national average." The president notes that today's MSU students participate in an "active learning environment with a large spectrum of academic opportunities." He notes that undergraduates can engage with world-class faculty in their classrooms, in special living and learning programs, and in the University's growing undergraduate research program. Through MSU's Technology Guarantee, he adds "undergraduate students can access the latest educational technologies as they prepare for careers in the digital age."

Founded in 1855 as the nation's pioneer land-grant institution, Michigan State University is a dynamic community of 33,800 undergraduates and 9,000 professional students. Twelve baccalaureate degree-granting colleges offer more than 150 programs of study. Two residential options, Lyman Briggs School and James Madison

Peter McPherson, Michigan State University president

College offer a small-college atmosphere within a large, world-class university. Undergraduate education is a primary mission of the institution. MSU’s campus is a unique blend of the traditional and the innovative within a park-like landscape. The Red Cedar River flows through the campus and makes a great backdrop for springtime walks and summer concerts. North of the river’s tree-lined banks and grassy slopes is the older, more traditional heart of the campus. The ivy-covered brick buildings house academic offices and include the MSU Union and ten residence hall complexes. Spartan Stadium, the world’s most powerful superconducting cyclotron, the medical complex, and sophisticated scientific research laboratories. The University’s newest facilities are also found on this side of the river, including Jack Breslin Student Events Center, the Wharton Center for Performing Arts, the Pavilion for Agriculture and Livestock Education, the MSU Detroit College of Law, and two intramural buildings devoted to student sports activities.

Undergraduate students come from every county in Michigan, every state in the U.S., and more than 120 countries. These students represent many ethnic, racial, political, economic, and religious backgrounds. Approximately 6,500 undergraduates are members of ethnic minority groups (15.3 percent), and international students make up nine percent of the school’s enrollment, which totaled 50,288 for 2000-2001. Total Hispanic enrollment is 1,073. Black non-Hispanics number 1,350; Asian Pacific Islanders, 1,33; and Native Americans, 257. There are 4,244 faculty and academic staff, including 2.6% ranked faculty and 73 executive management employees. More than 600 faculty members are minorities.

Many MSU colleges and departments offer special programs for minority students, including Minority Students in Engineering Minority Business Program, Vetward Bound, the Charles E. W. Science Enrichment Program, the McNair Program, the M Phyaical Education Program, the S and the University Student Program-Excellence Required (USPER) MSU is a national leader in the study of diversity. With more than 140 programs in 52 countries, The
grams are offered every session, including winter break, and in many instances do not exceed the costs of a semester's study on campus.

As part of its mission to increase diversity and global learning, the University has created study abroad experiences for all students, with a goal that by 2006-07 percent of its graduating seniors will be taking part. The senior advisor to the president for diversity has been working with the study abroad program to ensure that students of color are actively recruited.

Undergraduates can also participate in one-of-a-kind research projects, mentored by MSU professors from many disciplines. Students are currently working on areas ranging from wearable computers to microbiology, from Holocaust memorial designs to breast cancer.

MSU has championed the creation of a strong academic and social environment for all students, particularly for minorities, by creating support/educational groups within each residence hall. Shin hokai had the first such caucus on campus, and it now sponsors scholarships for female students of color. There are also strong Greek and social organizations for minority students, such as the Cultura de las Raza's Unidas, Men and Women of Color, and the Coalition for Multicultural Education.

Early this year, three major corporate contributions to MSU were announced within a two-week period. The gifts enhanced research and teaching initiatives for students and faculty. The gifts—one of cash, one in-kind, and one of property—show the diversity of corporate support to the University, according to Chuck Webb, vice president for University development, and are significant in providing leadership for MSU's capital campaign. These gifts illustrate the great value that our corporate spon- sors place on MSU's educational and research activities, Webb observes. "This recognition and support from our corporate partners clearly enhances MSU's ability to maintain its standing as a world-class institution."

The in-kind gift, valued at more than $36 million, is from General Motors, Unigraphics Solutions, Sun Microsystems, and EDS. Part of the Partners for the Advancement of CAD/CAM/CAM Education (PACE) initiative, the gift ensures that MSU students will have "the most relevant leading-edge technology available in the engineering curriculum." A cash gift of $5 million over five years from Ford Motor Co. will support construction of two new laboratories. The first will be located inside the Biomedical and Physical Sciences Building, currently under construction, and the second, in a new structure to be housed in the Automotive Research Experiment Station of the College of Engineering, Ford, which annually supports a variety of scholarship and fellowship programs with MSU, notes that the two labs will contribute toward essential improvements in the auto industry, as well as enhance the University's educational goals. The third gift, property from the Kalamazoo-based Pharmacia & Upjohn, is in process. A preliminary agreement between the company and the University paved the way for a donation of the 80-acre Brook Lodge property and 85 acres of land surrounding the lodge, to be used as an environmental and conference resource. The land is located just south of MSU's Kellogg Biological Station.

"When state-based industries step forward in leadership roles such as these, it can't but help have a positive impact on those industries in return," says President McPherson. "We're grateful for their faith in our faculty and our students, and for their willingness to show that faith in the form of such important contributions."

Government, corporation, and foundation support for MSU's international development projects exceeded $20 million in 1998-99. MSU now has ongoing projects in 100 nations on six continents and formal links with 150 overseas institutions. In 1998, MSU broke ground for the new $93 million Biomedical and Physical Sciences Building, one of the largest academic buildings on campus. It joins such facilities as the National Superconducting Cyclotron and the National Center for Food Safety and Toxicology as focal points for exciting new collaborative and interdisciplinary research initiatives. MSU research awards increased 22 percent this past year. Funding from federal grants amounted to 25 percent.

President McPherson says that MSU is proud. 900, of its international strengths, including its African Studies Center, and of its being named by the Institute of International Education as the nation's leader in study abroad. "It is our belief," says McPherson, "that an international experience is an important part of a 21st-century education."
Kellogg Grant to Build Safety Net for Latino Youth

IDRA the Managing Partner

BY INÉS PINTO ALICEA

Eighteen Hispanic-Serving Institutions have been given grants by the W.K. Kellogg Foundation to get more Latino students into and through college.

“The Foundation believes this project is important because it joins a growing number of efforts to address the disparities in educational attainment being experienced by Hispanic young people, and the impact that these disparities have on communities and the larger society,” said Betty Overton-Adkins, the Foundation’s director of higher education programming.

The Foundation, based in Battle Creek Michigan, is providing a $28.7 million grant over six years to projects that link colleges, K-12 schools, community groups, businesses, and other organizations in a collaborative effort to improve opportunities for Hispanic students. By working together, these partners will give Hispanic students the support they need to succeed from kindergarten through high school and beyond.

“Partnerships are crucial—because no one institution or community can succeed in this effort alone,” said Overton-Adkins. “We have come to understand that effective education is not the sole responsibility of educators. We know that for colleges to do a good job of educating a broader and more diverse group of students, our K-12 systems must do a better job of preparing those students. In order for K-12 systems to be more effective families and communities must be more involved with the education of young people.”

Kellogg officials say that they want the program Engaging Latino Communities for Education (ENLACE) to help communities weave together elements of existing programs and introduce new ones to create much stronger safety nets for Latino students.

“We understand that this program alone will not solve the educational issues within Latino communities,” said Overton-Adkins. “We are hoping this small effort will be a catalyst for other programs and will serve as linkage and leverage to other K-16 efforts.”

The term enlace is from the Spanish word enlazar, which means to link or weave together or connect in such a way that the new entity is stronger than its parts.

ENLACE will strengthen the
educational pipeline so that more Hispanic youth will enter and complete college," said Overton-Adkins.

"And, it can improve the performance of students who are already attending Hispanic-serving institutions [HSIs]."

Antonio Flores, president of the San Antonio-based Hispanic Association of Colleges and Universities (HACU), praised the initiative. "By engaging HSIs as lead and anchoring institutions to work in collaboration with community-based organizations and K-12 schools, the bulk of the Latinos in the project areas will be served by innovative and effective ways," said Flores. "It is an excellent initiative that HACU intends to continue supporting fully and to leverage for greater funding and involvement by other prospective funders. We also plan to use the data generated by ENLACE to prepare policy briefings and articles that could influence education policy at the local and national levels."

The Kellogg program will have three phases. In the first, 10 to 15 colleges will win one-year planning grants of up to $100,000 to create coalitions that include schools and other organizations. Eight to 10 of those coalitions will be selected for four-year grants of up to $2 million to carry out their plans during the second phase. Those grants are scheduled to be awarded in December.

"Partnerships selected for Phase II funding will be based on strong designs to create systemic change for improving access and success of Latino youth in higher education," said a pamphlet on the program.

In the third phase, participants will examine the work of the coalitions and share information about successful programs with other educators and policymakers. The third phase will begin in January 2005.

"One of ENLACE's greatest impacts will come in the last impact, lessons learned, and best practices may be widely disseminated to inform institutional and public policy, and where the models can be institutionalized and sustained through innovative strategies and activities," said the program's brochure.

"We're very enthusiastic about the efforts to date," said Dr. Rosar G. Rodriguez, IDRA's director of community engagement, who helped develop the ENLACE program while she worked at the Kellogg Foundation. "While the focus is on Hispanic students, we hope that the lessons learned and the models created will benefit the broader community as well and have a positive effect on policy-makers."

Participating HSIs had to be two-year or four-year institutions, and large proportions of Latino student and have at least 2,500 students enrolled. The HSIs also had to have documented history and commitment to the education of Hispanic students and outreach to Hispanic communities.

HSIs are colleges and universities with 25 percent or more Hispanic enrollment. The program was concentrated in states with large Hispanic populations such as Arizona, California, Colorado, Florida, Illinois, Michigan, New Mexico, and Texas.

"The initiative, which was approved by the Foundation's board in 1998, targets these [HSIs] as co-resources for stimulating community efforts to strengthen the educational pipeline for Latino young people," noted the application packet.

ENLACE's five objectives are:

- to strengthen selected HSIs and other institutions to serve as catalysts and models for educational change;
- to support higher educational/community coalitions and partnerships that increase educational success and community involvement for Latino and other students;
- to support the creation and development of educational models based on best practices that improve enrollment, academic performance, and graduation of Latin high school and college students;
- to facilitate sustainable impl-

"There is not a great track record in the country of communities, K-12, and colleges working together to design programs."

BETTY OVERTON-ADKINS, W.K. KELLOGG FOUNDATION DIRECTOR OF HIGHER EDUCATION PROGRAMMING

The San Antonio-based Intercultural Development Research Association (IDRA) is the managing partner for the ENLACE initiative and The Council will determine whether the overall objectives and goals of the initiative have been achieved, what lessons have been learned, and what

The San Antonio-based Intercultural Development Research Association (IDRA) is the managing partner for the ENLACE initiative and
programs through strategic planning, networking, leadership development, and policy efforts; and
- to infuse into key stakeholder groups information and models that stimulate changes in policies and practices related to the education of Latinos.

"Leadership is an important cross-cutting theme throughout the ENLACE effort," said Rodriguez.

The educational level of Latinos in the United States is the lowest of any group, according to the Kellogg Foundation.

"Because Latinos/Hispanics remain the most undereducated population in America, we need to increase this success rate dramatically and rapidly or have a national crisis due to the scarcity of well-prepared workers, technicians, and professionals needed by the U.S. economy," said Flores.

Latinos have the highest dropout rates of any student groups—as high as 30 percent at some levels. Barely half of Latinos ages 25 and older have earned high school diplomas. Only two percent of all doctorates are awarded to Latinos. Hispanics earn only 39 percent of all graduate degrees.

"The educational gap is serious and growing," said Rodriguez, adding that a community-wide effort is needed to address the issue.

"Kellogg has always recognized the importance of community," Rodriguez said. "The community has much to offer."

The program faces a number of challenges. Overton-Adkins said that program officials will have to choose among current recipients for the next phases of funding and that picking the best programs that will have the most impact will be challenging.

"There is not a great track record in the country of communities, K-12, and colleges working together to design programs," said the challenge of effective leadership that can keep the process moving, keep people excited about the goals and potential of the work, broker the differences between the partners, and keep an eye on the end product—better education for Latino youth. No small task."

Rodriguez said one of the challenges that lies ahead is the need to get others to help fund the projects so that they can be sustained over time and so others can be created based on the models developed by the Kellogg project.

The Kellogg Foundation was established in 1930 to "help people help themselves through the practical application of knowledge and resources to improve their quality of life and that of future generations." The Foundation targets its grants toward specific areas, including health, food systems and rural development, youth and education, and philanthropy and volunteerism.

There were 112 applicants for the initial grants, and 18 applicants were nominated to receive those initial grants. Those 18 recipients are eligible to compete for the second phase of ENLACE. The recipients for the initial grants are: Arizona State University, University of Southern Colorado, The University of New Mexico, Santa Fe Community College (N.M.), New Mexico State University, Santa Ana College (Calif.), California State University-Los Angeles, University of California-Santa Barbara, California State University-Fresno, University of South Florida, Florida International University, Miami-Dade Community College-North, Northeastern Illinois University, CUNY-Lehman College (New York, N.Y.), CUNY-Hostos Community College (Bronx, N.Y.), Saint Edward's University (Austin, Texas), Southwest Texas State University, University of Texas-Brownsville/Texas Southmost College.

\[\text{Kellogg officials want the program, ENLACE, to help communities weave together elements of existing programs and introduce new ones to create much stronger safety nets for Latino students.}\]
years ago, the National Society of Hispanic MBAs added a new category of honoree to its Brillante Awards, which are given “in recognition of exceptional contributions to the Hispanic community.” That new category was “educational institution,” and the very first award therein went to the Anderson School at UCLA.

The selection of Anderson is especially significant in that NSHMBAs came into being, back in the 1980s, to address the lack of Hispanics in corporate boardrooms. And the official mission of NSHMBAs is “to foster Hispanic leadership through graduate management education and society.” Members of NSHMBAs, and there are more than 1500 of them in more than a dozen chapters, do the nominating, with final selections by the Society’s national board of directors.

In lauding the school, NSHMBAs specifically cited Anderson for increasing the Hispanic community’s awareness of and opportunities for earning an MBA.

This year, the Anderson School took further steps vis-a-vis Hispanics by conducting its first Latino Leadership Institute, under the aegis of its Executive Education Programs, and in collaboration with NSHMBAs and the California Hispanic Corporate Council.

UCLA’s Executive Education Programs told the Institute is part of what they call the Leadership Suite. “The African American Leadership Institute has been offered since Spring 1998, the Women’s Leadership Institute, since Fall 1999, and the Latino Leadership Institute was offered for the first time in Spring 2000.”

Research-based

The Leadership programs, she said, “are based on the research of Professor William Ouchi. Professor Ouchi conducted research in the early 1980s on the state of Asian American in management.”
corporations, Professor Ouchi found that when minorities and women managers reached a certain management level, they had extremely high rates of voluntary termination.” His research identified several underlying reasons: “They did not have the tools to navigate their way around the organization nor the peer or support system to help them advance through the corporation.”

“Professor Ouchi,” said Materman, “launched a program called LEAP—Leadership Education for Asian Pacifics, which has since been spun off from UCLA to its own nonprofit organization. The LEAP program has been running since 1982.”

Dr. Ouchi is vice dean and faculty director of Executive Education Programs, and the Sanford and Betty Sigoloff Professor in Corporate Renewal at the Anderson School, which has twelve endowed chairs. He also chairs Anderson’s Riordan Programs, which serve minority high school and college students in Southern California, and chairs LEARN, the Los Angeles school reform organization. Ouchi was once chief of staff to Los Angeles Mayor Richard Riordan, the first person to receive the NSHMBA Brillante Award in the category of “individual.”

Co-chairing the Latino Leadership Institute with Dr. Ouchi is Dr. David Hayes-Bautista, a professor of medicine, director of the Center for the Study of Latino Health, UCLA School of Medicine, and a previous director of LEAP.

Studies Research at UCLA. He recently published the first directory of California Latino/Hispanic physicians and has written a book on culturally effective healing. Healing Latinos: Realidad y Fantasia.

Who Attends?

Asks us to be the typical Institute attendee, Materman said that the average age is about 35. “Most are mid- to senior-level managers and executives who are considered ‘high potential’ managers in their organizations.”

“Participants come from all across the country... There is good representation of both male and female—perhaps slightly skewed toward male for a few reasons. First, there are more male executives in corporate America. And second, some Latinas would prefer to attend our Women’s Leadership Institute.

“The program is designed for and attracts executives from many different Latino/Hispanic cultures and ethnicities, and finding one word to describe them all is nearly impossible. The program deals with the Latino community as a whole and the diverse groups that comprise it.”

Asked who’s the competition, Materman said, “The Anderson School at UCLA is the only business school in the country conducting a suite of programs aimed specifically at these three groups of executives."

HO asked, “Are there any industries left where someone could start young and unskilled and hope to ascend?” Materman answered, “There are many organizations that have corporate universities—Sun Microsystems, GE, Motorola, among them."

But, as noted in The Anderson School history posted on its website, it’s been a while since American executives and business owners could rely on intuition and experience alone in grappling with complex problems.

It is the mission of her office, says Materman, “to elevate the corporate community.” The Institute, she said, provide attendees with the skills and tools they require to “bring more value to their organizations and advance their careers.”

The Office of Executive Education Programs, she continued, is in the business of conducting open-enrollment, i.e., public, programs. One being the Latino Leadership Institute, and in the business of offering custom programs for organizations based on their specific needs.

The leadership programs have been so customized. Typically, several senior-level executives, such as CEOs, will be involved with the program also. We can conduct these custom programs at UCLA or at a location of the organization’s choice.”

“For the first time,” said Materman, “next summer we will offer the African American Leadership Institute in Washington, D.C., in conjunction with Howard University. We haven’t identified another university partner or other geographic location for the Latino Leadership Institute at this point, but that is entirely probable in the longer term.”

First Impressions

Isis B. Peralta, program manager of the Latino Leadership Institute, or LLI, is a relative newcomer, a management consultant who joined UCLA Executive Education early in January. Latina, she is originally from Guatemala and graduated from San Diego State University.

HO asked Peralta for a brief assessment of
the April Institute.

"I am very pleased," she said, "with the outcome from our first LLI. The curriculum was very strong to begin with, and we had some powerful speakers."

"But all the planning in the world couldn’t have prepared us for the intangible energy that was present during the program. Our participants bonded in a way they never could before."

"Very few of them had ever been in a room full of business professionals who also happened to be Latinos," she said. "It gave them the opportunity to discuss topics that before they had never been able to broach because their groups were just Latinos or just business groups."

"We graduated 23 participants from the program and have already surpassed that in our enrollments for November." A second LLI is scheduled for November 13 to 17. Like the first, held April 3 to 7, it will take place at The Anderson School on the UCLA campus.

"We had a nationwide recruitment and, therefore, enrollment," said Peralta. "We even had a participant from Puerto Rico. We were able to have very diverse points of view."

Asked about feedback, Peralta said, "Our participants are currently staying in touch almost daily. They have created an e-mail forum where they go to bounce ideas off each other."

Peralta said that LLI alums would be invited to an evening reception "at all of our Latino leadership Institutes." And she said that follow-up would be an integral part of the program.

Program Content

"In all of the leadership institutes, we address common themes and unique topics. All programs address such topics as leadership, power, mentoring, career development," said Materman, adding that the programs also offer tools for navigation and for increasing the individuals’ impact on their organizations.

"One of the major themes of the Latino Leadership Institute is the discussion of the growing power of the Latino population and exploring ways to harness this power," said lawyer Gerald Lopez, who earned the distinction "Professor of the Year" both at UCLA and at Stanford; visiting assistant professor Robin Johnson, whose research includes issues of multiculturalism and U.S. corporations; and Robert Spich, visiting associate professor, a Fulbright Scholar in Chile in 1996 and co-author of Management: An International Perspective.

Faculty

UCLA faculty at the April LLI included co-chairs Ouchi and Hayes-Bautista; civil rights

Hispanic Corporate Council.

Strength through Diversity

Asked to comment on the ratio
tion of today, which seems so d
ent from the gold-watch-giving
long employer of a few decades
Materman said that now "orga
ations know that a diverse workf
a source of competitive advant
reflective of the consumers the
ning to reach."

"It is critical," she said, "that or
izations provide the atmosphere
skills required for women and m
ites to move up the corporate ladder so th
management team becomes more reflect
society and is able to represent the diverse ne
organizational stakeholders—employees,
sumers, and shareholders."

Anderson’s Leadership Suite works to
that end, and so do other of the 40 or sc
grams of its executive education office.
USC’s Latino Alums Fund 4,600 Scholarships

$7.1 Million Raised and More to Come

BY INÉS PINTO ALICEA

In 1974, Raul Vargas and seven friends from the University of Southern California (USC) decided to host a dinner to raise some money for scholarships to attract Latinos to the private university in Los Angeles.

“We weren’t development officers, but we figured other places have a dinner when they want to raise money, so we decided to have a dinner,” said Vargas, executive director of USC’s Office of Mexican American Programs.

Their efforts were rewarded. They raised $5,000 for scholarships. The University gave an additional $32,000, after promising to match whatever they raised two-to-one. Initially, the group offered $1,000 to each recipient. Now the group, officially known as MAAA, the USC Mexican American Alumni Association, offers scholarships ranging from $400 to $6,000, and it awards about 200 each year.

“We didn’t know what we were doing, but it seemed to go well, so we just kept doing it,” Vargas said. “We are a financial aid program. The Latino students who get these scholarships have what it takes to be here. They just didn’t know how they were going to pay for it.”

Yasmin Davidds-Garrido, a 1995 graduate of USC and a MAAA board member, said she would not have been able to finish her studies in business entrepreneurship without MAAA help.

“I was really stuck in a situation,” she said, and went to see Raul Vargas about what might be possible. “He said that MAAA could help, and he wrote me a check. It saved me and allowed me to stay at USC.”

Today, Davidds-Garrido is working on a book about empowering Latinas, which she expects to publish this summer, and she keeps busy too serving on the alumni association’s board. She is a strong advocate for the organization and for Vargas, whom she said is the core of MAAA and the key figure in its success. She said she is amazed at how much he raises by himself, often without asking directly for money.

“Many alumni feel a loyalty,” she said. “He is someone everyone can go to.” MAAA, she said, “is like a family. I want to do everything I can to raise money to help students like myself.” Vargas, she said, “will say we need to raise $10,000 and we need to find 10 alumni who are willing to give $1,000 each—and you automatically want to start writing a check to help.”

The organization’s success has been phenomenal. The group has offered scholarships to 4,600 Latinos and raised more than $7.1 million over the years—much of it through the annual dinners each February but also through an annual golf tournament in June. This year, it added a Latina Golf Classic to its fundraising events.

“Frank Cruz, a founding MAAA board member, founder of Telamundo, the Spanish-language network, and the current chair of the board of the Corporation for Public Broadcasting, the largest funder of 790 public radio stations and 363 public television stations, said that the original fundraising events were held at the campus and were small functions.

“Now, they are big functions at big hotels,” said Cruz, who got his undergraduate degree from USC in 1966 and a master’s there in 1969.
its main campus and several satellite campuses. Some 3,033 are Latino, Vargas said. The Latino student population has grown to nearly 11 percent of the total student population, from six percent in 1990. Tuition at the school is about $20,400 annually.

MAAA initially offered scholarships to undergraduates only but has since expanded to medical, master's degree, and law students.

"When you get a MAAA scholarship, we fund you until you complete your degree," Vargas said. "We are firm believers in re-funding our recipients."

Vargas and some of the other alumni said that the secret to their success in fundraising is the people involved in the effort.

"In our alumni group, we have some very prominent people," Vargas said. "We have a judge, a neurosurgeon, a CPA, and other very prominent people."

Davidz-Garrido added that the alumni are very united and that those who received scholarships feel very indebted to MAAA for helping them finish their degree. "The people who got scholarships really want to raise money for other students," she said.

"There also is a lot of unity among the board members. I know I can call any board member at any time. We are all there for the same purpose—to raise money for the MAAA."

Cruz added that the alumni value education and want to "foster the educational perspective. The graduates are highly motivated and entrepreneurial in their areas of expertise."

But Cruz added that the University itself plays a vital role in the program's success, primarily for two reasons. It matches every dollar that MAAA raises with $2 of University funds. And the University pays for the salaries of Vargas, his staff, and their offices so that none of the money raised is used for expenses.

"If you have somebody at the top who actively encourages it and pushes it, that helps a lot," said Cruz, speaking of the USC administration. "If someone from the top values it, then it trickles down."

Cruz said the University's financial commitment was key. Many universities have left fundraising to part-time alumni volunteers and have not "I tell donors, "You give me a donation, and it goes straight to scholarships," he said. "There is no overhead. Other universities use volunteers, and that doesn't work often. USC plays a big role in the support system because they pay my salary, my office staff's salaries, and so on."

Applications for scholarships are available March of each year, and the deadline to submit the application is in June. For information, contact Raul Vargz, director of the Mexican American Programs, at (213) 740-4735.
Latino Education Programs Receive Boost from Nellie Mae Foundation

The Nellie Mae Foundation has funded 18 New England-based nonprofit programs that promote educational access and quality for Latinos and other minorities. The grant recipients, located in Massachusetts, Connecticut, and Rhode Island, provide educational services that range from encouraging parental participation in schools to better preparing students for college.

"Despite the country's strong economy and job growth, many Latinos are not prepared to enter the workforce," said Sylvia Salas, Nellie Mae Foundation director of grants and programs. "These programs are preparing young students and adults to pursue higher education and ultimately have the ability to fill these jobs."

The Nellie Mae Foundation supports innovative programs for underserved New England students, many of whom face economic and social adversity that interferes with their ability to attend college and benefit from the resulting economic gains. The foundation strives to break that cycle by supporting alternative, creative solutions committed to educating deserving students and adults.

"What we are trying to do is serve the needs of a population often 'resource poor' but trying to improve its future and its communities," said Salas. For example, last year, Nellie Mae funded the Hyde Square Task Force in Jamaica Plain, a Boston-area neighborhood with a significant Latino population troubled by high crime rates and gang violence. The task force, originally formed by merchants and parents who were concerned about unsafe conditions for the neighborhood's young people, hoped to establish a "drop-in" center where students could go after school.

Nellie Mae advised the task force to think in broader terms and develop long-range goals, such as providing counseling and educational programming for students. Subsequently, task force members created a learning center, dubbed the "Hyde Square College Program," which offers support to help middle and high school students successfully prepare for a college education. Latino students serve as mentors in the program, offering tutoring and SAT preparation, among other services.

A similar project in Roxbury, labeled "Mission Safe," originally began as a safe place for children to "hang out" after school. But eventually, the site went beyond its original purpose and added a computer center and an arts center. This concept further expanded to become the "Explorer Academy," which provides academic support and leadership training for middle and high school youth. It is a community partnership involving local college students who work as tutors and mentors and also serve as role models for those who hope to enter college.

The evolution and success of the Hyde Park and Roxbury projects are examples of Nellie Mae's philosophy of working very closely with local organizations to build an effective program. Rather than awarding...
grants based on corporate largesse, Nellie Mae delves deeply into the educational needs of the community and ensures that there is solid commitment to the project.

“...You may have a strong desire to help someone, but if they don’t want to be helped, you can’t make a difference,” said Salas.

For this reason, Nellie Mae’s grant process begins at the grassroots level. The Nellie Mae staff visits communities in every state in New England to identify those that might benefit from grant support. Salas and her staff not only attend local meetings but they also hold public information sessions where they learn more about the educational needs of the community.

“These sessions are very helpful,” said Salas. “We get as much information as we give. As a matter of fact, the information sessions helped us establish our vision for the foundation.”

Nellie Mae staff members also attend seminars and workshops sponsored by organizations that support public education. As a potential funder for these organizations, Nellie Mae helps members think through the process of applying for grants and getting assistance for projects.

When an organization decides to apply for a Nellie Mae grant, the proposal is examined to make sure it fits into the foundation’s funding priorities. There are two primary categories that NMF funds, says Salas.

“We are basically looking to fund projects that deal with what we call ‘5-H,’ that is, students from fifth grade level to the first two years of college. Our second priority is adult education programs, especially those addressing literacy and workforce development.”

Once an application has been deemed appropriate, it is then evaluated on the basis of five criteria: opportunities created, student progression, community linkages, sustainability, and organizational effectiveness.

Nellie Mae staff will often interview the project director and will even make a site visit, if necessary. After a grant has been awarded and approved by the Foundation Board, Nellie Mae staff will also provide assistance in helping the results of the funded projects, which requires examining the work being done and measuring the outcomes.

The Nellie Mae Foundation, located in Braintree, Mass., has managed to encourage and maintain a great many projects, even though it is relatively new. The Foundation was launched on July 1, 1998, becoming one of New England’s largest independent charitable organizations focused exclusively on education. Created from the assets of its predecessor—The New England Education Loan Marketing Corporation $250+ million nonprofit Nellie Foundation (NMF) carries or expands the work done previously by Nellie Mae Fund for Education. Its mission is to promote access to higher education to all ages (preschool through postsecondary), especially for underserved populations.

Last year, the Foundation marked $5 million for grants; this year, it has targeted $8 million for worthwhile projects.

Sylvia Salas says that projects funded by Nellie Mae are all have a common denominator. “If you at the portfolio of what we funded, every single program helps to create access to education,” she said. “Even our programs are geared toward the possibility of earning a college degree.”

Adult education is becoming increasingly important in parts of New England that are experiencing high concentrations of immigrants who lack literacy and the technical skills needed to enter the workforce.

“We are seeing this trend everywhere—from Portland, Maine, to there are a large number of grants from the Middle East—Burlington, Vermont, where there has been an influx from Southeast said Salas. “Our surveys show that 2022, 25 percent of the population of New England will be minority.”

But the push for educational, especially critical for the Latino population, which has the lowest level of academic attainment of any minority group, according to research by the Nellie Mae Foundation.

Accordingly, the Foundation aims its efforts not just at underserved students but also at parents, who are coming from cultures that do not necessarily understand the value of higher education. This was the case in the Boston’s Latino Parents Association's known as "La Escuela de Pio (The Parent's Institute);" the goal is for this organization is to improve.
quality of education for Latino youth in the Boston public schools by increasing parents’ awareness of the importance of knowing about and being involved with their children’s education.

“Many Latino parents are from Central American countries, and they are not familiar with the democratic process, especially when it comes to their child’s education,” said Salas. “We have to teach them to go to school and participate in their child’s education.”

Salas says that the goal is to make parents understand that it’s all right to meet with teachers and make demands of the school system. But most of all, project leaders encourage parents to understand that their children must be sent to school and that parents should also participate in the process.

“The right to an education is an accepted middle-class value here in the United States,” said Salas. “But many of these people are coming from countries where this is not so. We are trying to help the parents and the children succeed in the system.”

In the past few years, Nellie Mae has funded a tremendous variety of projects, including the following:

**New England Board of Higher Education**

“Project Reach” selects middle school students with disabilities to participate in an after-school reading program and a seven-week academic enrichment summer program. The programs reinforce reading and comprehension skills and provide students with math and science curricula that include pre-biology, pre-algebra, and study skills.

**Consilio Hispano, Cambridge**

The AHORA program for Latino youth fosters academic achievement, develops leadership, and strengthens cultural awareness by helping students develop long-term educational and career plans.

**Brandeis University, Massachusetts**

The Transition Year Mentor Component is a tuition-free one-year course of study that prepares educationally disadvantaged high school students for college-level work. Brandeis students who work in the program receive practical experience and contribute to the community while the mentees receive training and guidance to help them succeed in higher education.

**Bridgeport Public Education Fund**

“MAACS” (Motivation for Academic Achievement and College Study) is a one-on-one mentoring program that pairs college student tutors with high school students who possess college potential to focus on the college selection, admissions, and financial aid processes.

**Boston Schoolyard Initiative**

The “Experiential Education Curriculum Development” program supports the organized efforts of 48 Boston neighborhoods to plan, design, and construct safe, attractive play spaces for approximately 70 Boston public schools. These improvements go well beyond simple beautification projects to creating playgrounds that are also learning centers. Teachers use the spaces as outdoor classrooms to teach several disciplines. For example, a class might plant a garden and then learn literacy skills by keeping a garden journal. By counting seeds and measuring the harvest, the students use math skills.

The Nellie Mae Foundation is still growing, both in net assets and in its efforts to provide accessibility of education at all levels. Its work holds great promise for New England and especially for the Latino population. “We are targeting communities with a high number of Latinos,” said Salas. “We want to cement our relationship with leaders in that community and ensure that Latinos get access to postsecondary education.”
In addition to taking college courses on the weekends, students participate in three five-week summer entrepreneurial institutes at South Mountain Community College.

Once an at-risk kid raised in a tough part of Phoenix, Gary Trujillo admits, "I was always looking for trouble; it was the typical thing you do when you're growing up. Only in my neighborhood, it was easier to find."

Today, this fifth-generation, 38-year-old Arizona native is chairman and CEO of quepasa.com, an Internet portal and online community for U.S. Hispanics, and is founder and president of Southwest Harvard Group. Now a venture capital firm, the Southwest Harvard Group at one time had revenues of more than $400 million and employed more than 400 persons in seven states.

So, how did a guy with such a childhood progress so far? Trujillo credits his success largely to a mentor in high school who helped him harness his energy and talents in a positive direction.

Hoping to help other young people, Trujillo became an adviser and mentor for the South Mountain Community College ACE (Achieving a College Education) Entrepreneurs Program. The pilot program recruits high school sophomores of diverse backgrounds in the Phoenix and Tempe Union High School districts who have expressed an interest in owning their own businesses. Most are at risk of dropping out of high school. The average age is 17, and 15 students are currently enrolled in the program.

Entrepreneurs Are Advisers

Meanwhile, 12 successful entrepreneurs from around metropolitan Phoenix, two South Mountain Community College faculty members, and a representative of Junior Achievement make up the ACE Entrepreneurs Program Advisory Committee. Several of these members also serve as mentors to students and/or have recruited fellow businesspersons to serve as mentors. Students gain hands-on experience in a variety of entrepreneurial environments through the area business owners and mentors.

Launched through The Maricopa Community Colleges Foundation in Summer 1996, the ACE Entrepreneurs Program provides scholarships to cover tuition expenses. Funding is provided by The Fleischer Foundation and the Franchise Finance Corporation of America (FFCA).

"The ACE Entrepreneurs Program offers a wonderful opportunity for young people to begin to understand entrepreneurship and its relationship to democracy in a capitalistic system," says Morton H. Fleischer, chairman, president, and CEO of the FFCA. "From this base, the students have the opportunity to discover the joys and benefits of beginning and operating one's own business—and the hard work involved. The program offers students a chance to succeed. That success might result in a long-term career or enterprise that helps individuals, families, communities, and the economy. I am pleased to be a part of this effort."

In addition to taking college courses on the weekends, students participate in three five-week summer entrepreneurial institutes South Mountain Community College, learning skills essential for successful careers as independent businesspersons. Participants improve basic academic skills, and they earn college credits while still in high school.

Training Young Minds

It's never too early to think about entrepreneurial possibilities. Children learn at every age and will be driven by the environment around them, the adults around them, the people they work with, the teachers they have. Children will always want to do what they see others doing. Children are dynamic beings who will always want to imitate what they see. They are always seeking ways to be like the adults around them. Children thrive on support, on encouragement, on praise, on attention, on understanding, on role models. Children need to know they can be anything they want to be, that they can do anything if they believe in themselves. Children must be taught to dream. Children must be taught to believe in themselves. Children must be taught to believe in others.

At the age of 26, after work on Wall Street as an investment banker, Trujillo returned to school and soon earned an MBA from Harvard University. "I started thinking, if I'm going to work 80 hours a week, I might as well work for myself."

The ACE Entrepreneur Program helps at-risk students recognize opportunities. "Many lack direction, and that's what this program is so powerful. It helps them focus on leveraging skills to do something product. Trujillo notes.

A quote on the wall of Trujillo's office summarizes the philosophy: "Entrepreneurs are those with ability to seize opportunities that others have not yet imagined." He adds, "If I had had the opportunity to attend a program like this during my high school days, I would have had the chance.
a much younger age to understand my abilities and put them into a framework for productivity.

Learning about Realities

However, everyone must understand the demands of becoming a self-starting entrepreneur—and they must know their limits, he says. "Harvard Business School taught me about myself—both my strengths and weaknesses. Entrepreneurs—aspiring and otherwise—should employ or seek advice from others whose abilities complement their own."

Overall, the program supports and motivates at-risk students who have shown an interest in entrepreneurship. "These two aspects go hand in hand," says Barbara Khalsa, ACE Entrepreneurs Program director. "Students who are at risk of dropping out of school often find the enthusiasm and momentum to finish when presented with other opportunities that interest and motivate them."

Students in the program quickly learn to evaluate opportunities. "We encourage students to identify someone they admire and then to develop such qualities in themselves," Khalsa adds. Those qualities include the courage to take a stand.

"We encourage students to identify someone they admire and then to develop such qualities in themselves."

BARBARA KHALSA, ACE DIRECTOR

business sense, the ability to think critically and creatively, and the ability to follow through on projects.

Personal Freedom. Achievement

Meanwhile, surveys indicate that increasingly youth are thinking about careers as entrepreneurs.

One ACE Entrepreneur has launched his own business: Snip, Snip, Mow and Clip Already. Michael Lynd, a senior from North High School, is seeing how he can expand his yard-service business. He hopes to sell ponds for backyards. Eventually, Lynd wants to do all of this on his off-duty time when he becomes a firefighter.

"I'm learning to recognize opportunities and seeing that some things will work better than others," he says. The teen looks forward to learning how to develop a business and marketing plan, understand legal aspects of a business, and even how to invest profits.

Sonny Acevedo and Mark Mullins, seniors at South Mountain High School and friends since second grade, say the ACE Entrepreneurs Program has given them a boost into the future. They also credit their mentor, John Chavez Corella, president and CEO of Corella Companies (maker of telecom wire for cable manufacturing).

"He was one of our first speakers. He told us his life story and about his business and about looking at things from different angles. We visited his plant, and he showed us the business," Mullins explains.

Following high school, Mark plans to study graphic design and multimedia production. The ACE Entrepreneurs Program "conditions me for business, I get insight about what people are really doing. From books you can get the numbers together, but it's the small things, the philosophy—like never giving up on yourself, like turning around a bad situation by seeing it from the right angle. Also, I have learned that networking—making the right contacts—helps you to succeed."

Acevedo plans to attend a community college after high school and then go on to a university. He hopes to begin his own record label, promoting and selling music. Through the program and Corella, "I've learned a lot about legal documents, accounting, and taxes. I learned about the stress accountants go through and about how John Corella runs his business and how other businesses are run."

For more information about the ACE Entrepreneurs Program, please call Barbara Khalsa at (602) 243-8508.
Conference Honors Texas A&M-Kingsville Achievers

Stephanie Salinas, graduate student, and Joe Valenzuela, academic coordinator/ supervisor of the Ronald McNair program at Texas A&M-Kingsville, received TRIO Achiever awards at the Texas Association of Student Special Services Programs annual conference.

Salinas, who has enjoyed the benefits of Student Support Services, tutored students in history and English and was an educational and personal academic needs mentor in college. Valenzuela, introduced to the Upward Bound program while a high school sophomore, worked as a counselor in college, advising other Upward Bound students. Both Salinas and Valenzuela have a bachelor’s degree from Texas A&M-Kingsville.

Texas-Austin to Preserve Rare Mexican Newspapers

The National Endowment for the Humanities awarded The General Libraries at The University of Texas-Austin $191,436 to support a two-year project, the microfilming of 551 rare Mexican newspapers published between 1900 and 1929. These materials, held in the Nettie Lee Benson Latin American Collection, include some issues that are the only surviving copies. Many are too brittle for researchers to handle.

Most of these newspapers were published in the Federal District of Mexico, but a significant number were published in Mexican cities, in 24 different states. Of particular interest are the titles published during the pivotal decade of the Mexican Revolution, 1910-1919, many from cities other than Mexico City.

Suárez Speaks at Chicano Awareness Events in Nebraska

Dr. Omoro Suárez, chancellor of California’s Grossmont-Cuyamaca Community College District, was a keynote speaker at two University of Nebraska events celebrating the 30th anniversary of the University’s Mexican American Student Association, part of Chicano Awareness Week.

Suárez grew up in a migrant worker family in Nebraska, one of 15 children. Typical of many farm labor families, no English was spoken at home, and there was no history of pursuing higher education. At an early age, however, Suárez recognized the value of education and was the first in his family to go to college. He earned a master’s degree from the University of Nebraska and a doctorate from the University of Oklahoma.

After graduation, Suárez, a strong role model, helped his younger siblings with their education. He went on to become a schoolteacher, a dean, a college president, and a chancellor.

Central Michigan Minority Journalists Receive Funding

Central Michigan University (CMU) President Leonard Plachta solidified the University’s support of its Dow Jones Newspaper Fund high school journalism workshop by committing $15,000 annually to help with operational costs.

Each summer, about 30 students of color with a passion for writing and a nose for news stay at CMU for a two-week workshop that teaches basic writing, interviewing, and photography skills. The program introduces students to the college environment and exposes them to everything from college residence halls and classrooms to professors and university professionals.

The financial commitment means that the journalism workshop will have at least one permanent partial-funding source throughout its life span. It costs about $70,000 to run the program each year.

Allan Hancock Counselor Encourages Students to Consider College

Adriana Perez reached a turning point in her life after graduating from high school in California. “I realized that there weren’t many jobs available without a college education, and I didn’t want to end up as a field worker like my parents,” said Perez. So she decided to attend Hartnell College (Calif.), where a counselor pushed her to transfer to a four-year university.

Today, with an associate’s degree from Hartnell, a bachelor’s from the University of California-Santa Barbara, and a master’s from the University of California-Pepperdine, Perez is a new school outreach and unive transfer counselor with Allan Hancock College in California.

Many students view college as inac cessible, are confused about how to apply, and simply overwhelmed. “My job is to simp for them,” Perez said.

Abraham Baldwin Receives College Board Grant

Abraham Baldwin Agricultural College (ABAC) in Georgia received $60,000 College Board grant to support Hispanic students at Tift County High School.

In a joint effort of ABAC’s Educational Outreach and Youth Connection office, members of the Center for Bicultural Awareness, the money was used to create the Hispanic Outreach Program, designed to provide support for and give encouragement to Hispanic students attending Tift County High.

The ultimate goal is to encour Hispanic students to pursue post secondary education.

Cal State-San Marcos Spanish Book Center Receives Gift

A California State University Marcos center will be named the $100,000 gift from the family of Gaby and Richard Sulphio center will be named the Barahona Center the Book of Books in Spanish for Children and Adolescents, in honor of Gaby Sulphio parents; Flor Barahona, who lives in José, Costa Rica, and her late husband, Francisco. The gift enhances an endowment
fund for the Center, which has a fund-raising goal of $1 million.

"Because of this wonderful gift, the Center will be able to continue its efforts in the scholars-in-residence program, the reading partners program, and other activities to promote literacy and understanding among all children," said Dr. Isabel Schon, Center director.

**Texas-Austin Graduate Students Win Mellon Fellowships**

Catherine A.J. Molineux and Victor J. Rodriguez were awarded Andrew W. Mellon Fellowships in Humanistic Studies. The fellowships, awarded to first-year doctoral students, are aimed at helping exceptionally promising students prepare for careers in teaching and scholarship. All tuition and fees plus a $14,750 stipend are paid. Molineux graduated from The University of Texas (UT)-Austin with a degree in microbiology and history. Rodriguez, a UT-Austin English major, earned his first degree in international studies at Florida State University.

**MALDEF Attorney Speaks at Texas-San Antonio**

Al Kauffman, regional counsel of the San Antonio Mexican American Legal Defense and Education Fund (MALDEF) office, presented a lecture, "The Urban University and Civil Rights Advocacy — Working Together?" at The University of Texas-San Antonio. Appearing as part of the Communities and Institutions of Higher Education "Partners of the New Millennium" Downtown Campus Lecture Series, Kauffman gave his presentation during an ethnic politics class.

Kauffman is a graduate of The University of Texas School of Law in Austin. His career in civil rights litigation spans 23 years. He was the lead counsel for the successful statewide challenge to the Texas School Finance System and a challenge to Texas' high school exit test.

**La Verne Program Supports First-Generation Students**

A three-year study by the University of La Verne in California of students from minority groups found that the obligations of college life often collide with family expectations and that the impact is negative.

As a potential solution, in 1996, La Verne began the First-Generation Student Success Program, which has served 166 La Verne students, many of them Hispanic, particularly women.

"Student success depends upon how much the family is supportive," said Derek Vergara, program director. "We teach them how to do it. They learn why college is important and what it takes to be a student."

**Western Association Re-Accredits Cal State-Bakersfield**

The Western Association of Schools and Colleges (WASC) notified California State University-Bakersfield President Tomas Arzinciega that the University has been re-accredited for 10 years.

The re-accreditation was the culmination of an innovative two-year self-study that Cal State-Bakersfield conducted, as well as a visit by an accrediting team. WASC commended the University for its development of the self-study, which enabled it to reflect on the ways in which it is using assessment and technology to enhance student learning.

WASC also recognized the University's commitment to diversity, and encouraged it to "expand its efforts on diversity and assessment to ensure that the learning environment is supportive of all student populations."

**Texas-Austin Hosts Día de los Libros 2000**

Hundreds of children and their families shared in the wonder of literacy at Día de los niños/día de los libros 2000, hosted by The University of Texas-Austin's Texas Family Literacy Center.

Dr. Lorie Ochoa (pictured L), co-director of the Texas Family Literacy Center, described the event as part of a growing national effort to celebrate books, reading, and family learning. Lillie Elizondo-Limass (pictured R), the Center's research associate, advised residents on how to earn GED high school diplomas and solicit English- and Spanish-language children's books, to be distributed to needy children and families. Elizondo-Limass teaches English as a Second Language classes locally to help immigrants obtain certificates via a special Mexican Consul's program, the Instituto Nacional Educación para Adultos.

**Fresno State to Establish Journalism Mentor Program**

FRESNO STATE The Mass Communication and Journalism Department at California State University-Fresno has received funding to create a journalism mentor program beginning in the fall.

The three-year program is designed to create one-on-one mentoring relationships between journalism students and local media professionals. Program participants will spend one hour, once a week, with a trained professional journalist to discuss writing, reporting, photography, and career advising. The program targets minorities and other budding journalists.

San Francisco State University is working together with Fresno State and four other colleges to strengthen the pipeline of journalism students of color entering the nation's newsrooms by developing mentor and coaching programs.

**Texas-Austin's Galvan Awarded Truman Scholarship**

University of Texas-Austin student Sara Cecilia Galvan received a $30,000 award that might help her realize her dream of making cities more livable. Galvan, a Plan II Honors Program and architecture major, was chosen from among 600 students nationwide to receive one of 60 Harry S. Truman Scholarships. Recipients are selected for their commitment to public service and leadership potential.

Galvan believes that the architecture and infrastructure of cities can change people's attitudes. After a visit to St. Petersburg, Russia, last year, she noted how the citizenry alleviated its problems—terrible economic conditions and a harsh political climate—by interacting with one another "in the context of the city." She also thinks that the development of suburbs in America is problematic, causing people to become separate and insular.

**Gonzalez Gives Multimedia Presentation at Rockland**

State University of New York Community College and the Rockland Center for Holocaust Studies presented "Double-Crossed: The Saga of the St. Louis," a thought-provoking multimedia presentation by Dr.
David Gonzalez, a nationally renowned performance artist.

Gonzalez was commissioned by the Discovery Theater of the Smithsonian Institution in Washington, D.C., to create “Double Crossed,” which tells the story of the St. Louis, a luxury liner carrying 930 Jewish refugees who escaped from Nazi Germany and traveled to Cuba, only to be denied entry. Using archival video clips, movement, poetry, and narration, Gonzalez explores themes of intolerance, racism, and hope.

Having earned critical acclaim as the writer, composer, and performer of the popular Broadway musical “¡Sofrito!” Gonzalez also enjoys success as a master storyteller, educator, and musical therapist.

Bustos Flores Enhances Bilingual Education

With nearly half of the nation’s school districts enrolling limited-English-proficient students, Dr. Belinda Bustos Flores knows that her award-winning doctoral research at the University of Texas (UT)-Austin’s College of Education will be put to good use.

A former bilingual program coordinator at UT-San Antonio (UTSA), Bustos Flores earned her doctorate at UT-Austin last year, having studied how 15 San Antonio teachers related to bilingual education students, as part of her dissertation research. Her work subsequently won the Outstanding Dissertation Award when the National Association for Bilingual Education met for its annual convention in San Antonio, just months after she returned to UTSA as a newly minted assistant professor.

Mexican Educator Visits Grossmont

Mexican educator Higinio Ordoñez Suarez spent six weeks learning the community college system at Grossmont College (Calif.), part of the first Fulbright Administrators Exchange between the U.S. and Mexico. Earlier, Ordoñez hosted a Grossmont College vice president for six weeks at his college in Atlacomulco, about 5 miles from Mexico City.

This exchange provided a foundation, benefiting students and faculty through new understanding and cooperation between the colleges, said Dr. Ted Martinez, Jr., Grossmont College president.

Ordoñez is subdirector académico Normal de Atlacomulco. He has a bachelor’s degree from the State of Mexico University, a master’s from the State of Mexico Superior Teachers Training College, and a secondary degree from the State of Mexico University.

Barry Wins $120,000 Grant from Microsoft

Microsoft Corporation awarded a three-year $120,000 grant to Barry University in Florida. The grant provides cash awards of $40,000 per year and also makes available more than $748,000 worth of Microsoft software, allowing the Microsoft Exchange environment to reach Barry’s nearly 8,200 students, both on the main campus and at 13 satellite sites throughout Florida. Barry is one of five Hispanic Serving Institutions in the nation to win such a grant, won with the help of HACU, the Hispanic Association of Colleges and Universities.

Barry’s 10 schools offer bachelor’s, master’s, and doctoral degrees. The Dominican Sisters of Adrian, Mich., founded the University in 1940, and it became coeducational in 1975. Barry and its subsidiaries employ more than 1,700 full- and part-time faculty and staff, and operate on an annual budget of more than $100 million. Sister Jeanne O’Laughlin is in her 9th year as president.

President of Pentecostal Pastors Visits Erie Community

In an effort to reach out to the Hispanic community, Erie Community College (N.Y.) President William Mariani (picture 1) met with the Rev. Casimiro Rodriguez (r.), president of the Hispanic Pentecostal Pastors of Western New York.

A talk by Rodriguez, one of a series of events attended by Mariani with Hispanic community leaders, advised on how to model programs to reach area Hispanics. Topics included new approaches to education, bringing programs into the community, creative course scheduling, and the need to offer information in Spanish. Plans for a forum of Hispanic community leaders, organizations, employers, and educators highlighted the meeting.

Other college participants included Dan Penfold, executive vice president of student affairs, John Sullivan, director of recruitment and Dr. Eleanor Paterson, director of bilingual program.

Ramos Receives Prestigious Network Award

The Latina Leadership Network (LLN) presented Dr. Enriqueta Ramos, vice president of the Rancho Santiago Community College District (Calif.) board of trustees, with the Madrina Award at the Network’s annual conference in Oakland. Each year, the award is given to individuals who contribute time and energy to promote the interests of Latinas within California’s 107 community colleges.

Ramos has worked as a Spanish language and literature instructor, social activist, and community leader for more than 30 years at the University of California-Irvine, she developed the first Chicana studies curriculum incorporating history, culture, and anthropology, and helped develop a community center, hosted by Santa Ana College, that integrates college learning to young students.

Ramos is the first Latina to receive a doctorate in comparative culture from California. She also is the first person to receive Madrina, LLN’s most prestigious award, twice.

Texas A&M-Kingsville Engineer Wins Prize

Andy Narango, senior civil engineer major from Texas A&M University-Kingsville won first prize in the student technical paper competition at the Texas conference of the American Society of Civil Engineers.

Narango’s award-winning paper, “Alkaline-Silica Reaction in Pre-Stress Concrete” explains a deterioration reaction
concrete bridge structures. Dr. Mohammed Faruqi, assistant professor of civil engineering, helped his student with the paper.

Approximately 34 Texas A&M-Kingsville students attended the conference. As a group, they won a “best spirit” award.

Trinity Hosts Congress of Latin American Students

Nearly 300 college and high school students attended the 11th annual conference of the Congress of Latin American Students of Connecticut, held at Trinity College.

The Congress was established in 1989 by Latino college student organizations, Latino higher education professionals, and community leaders to engage college and high school Latino students in programs and activities that foster leadership, higher educational attainment, career awareness, self-esteem, civic-mindedness, and peer support.

The conference, with the theme “Continuing Our Latino Legacy,” featured workshops led by college students, Latino professionals, educators, and community leaders.

Temple Student Wins Truman Scholarship

Stephen Smith, the son of grassroots activists, is the second Temple University (Penn.) student in the last three years to win the prestigious Harry S Truman Scholarship.

The Truman Scholarship Foundation identifies college juniors with exceptional leadership potential who are committed to careers in government, the nonprofit or advocacy sector, education, or other types of public service. A standout in the classroom, with a 4.0 GPA, Smith is interested in the relationship between U.S. security policies and underdevelopment, particularly in Latin America. He hopes to pursue a graduate degree and eventually work with the State Department in Washington, or with a Latin American advocacy organization.

Smith was born in Chile, where his parents worked for the American Friends Service Committee. His mother became the coordinator of the organization’s Latin American Development Program.

Rhode Island Presents Spanish Drama

Spanish Theatre of Rhode Island College presented its 20th annual spring Spanish drama, Rosaura a las diez (Rosaura at Ten O’clock). Argentine writer Marco Devei wrote the play, which is set in Buenos Aires and has plots and subplots of intrigue, love, and fantasy.

MCI WorldCom Promotes Minorities in Workforce

MCI WorldCom Minority students will be able to enter the high technology workforce more easily under a package of initiatives announced by MCI WorldCom. The programs—which include MCI WorldCom has committed $10 million over the next 10 years—are designed to promote excellence in the skills most in demand by 21st-century employers.

"We will be encouraging minority participation in America's rapidly expanding technology sector while helping to ensure that there will be more qualified American workers in areas most critical to our operations," said Bernard J. Ebbers, MCI WorldCom president and chief executive officer.

MCI WorldCom is in partnership with the National Action Council for Minorities in Engineering (NACME).

Rodriguez Assumes New Position at Scranton

Dr. Reuben Rodriguez recently became the dean of student life at The University of Scranton (Penn.), a new position in the division of student affairs. He is responsible for the administration and supervision of programs for residential, commuter, off-campus, and international students.

Rodriguez was director of student activities at the University of Central Florida, assistant dean of students and director of student activities at Whitmer College, and assistant director of student activities at Emory University. He has a bachelor's degree from Emory, a master's from Georgia State University, and a doctorate from the University of Central Florida.

Telemundo CEO Visits Yale

Roland Hernandez, chair and chief executive officer of Telemundo Inc., the nation’s largest Spanish-speaking television company, visited Yale University (Conn.) as a Gordon Grand Fellow. At the School of Management, he presented a lecture, "Traditional Media and the Internet: Transition, Convergence, and Best Guesses about the Future."

Hernandez sets the strategic direction and vision for Telemundo Group, Inc., a company committed to broadcasting bicultural programming that reflects the lives of Latinos living in the U.S. He has a bachelor's and law degrees from Harvard and served on the board of advisors of its Rockefeller Center for Latin American Studies and Law School. He is the director of the Annenberg School of Communication at the University of Southern California.

The Gordon Grand Fellowship at Yale promotes dialogue between business leaders and students at Yale.

Escalante Speaks at New Mexico Highlands

Jaime Escalante, the high school teacher who was the model for the movie Stand and Deliver, was the speaker at New Mexico Highlands University's Spring 2000 commencement.

Escalante, who has a bachelor's degree in mathematics and many honorary doctorates, is known for his work at Garfield High School in California, where his efforts in teaching math led the inner-city school to become ranked 7th in the country in calculus. He was inducted into the Teachers Hall of Fame in 1999. "I do not believe in the gifted," said Escalante. "If they have the game, I can make them do it."
A math teacher in Bolivia for 11 years, Escalante emigrated to the United States in 1964 and began teaching at Garfield High in 1974.

**Manhattan College Student in Hispanic Caucus Internship**

Daisy Rodriguez, a junior at Manhattan College (N.Y.), is participating in the Congressional Hispanic Caucus Summer Internship (CHCI) program.

Established in 1986, the CHCI program is designed to heighten Hispanic students' awareness of the U.S. political system and enhance their leadership skills by giving them the opportunity to work in congressional offices and by providing them with a forum in which to strengthen their leadership abilities through workshops and presentations.

Rodriguez is president and co-founder of the Latino Support Group at Manhattan College, which provides mutual support, empowerment, and cultural self-identity in order for Latino students to reach their full leadership potential. She also works for the Brotherhood/Sister Sol Liberation Program at Teachers College, Columbia University.

**Hernandez Chairs Council on International Intercultural Education**

Dr. Edward Hernandez, chancellor of the Rancho Santiago Community College District (Calif.), is new chair of the American Council on International Intercultural Education. The Council's mission centers on infusing global information into the curriculum of all academic disciplines. Its membership includes educational leaders from throughout the U.S., Canada, and Mexico, with connections to the Middle East, Africa, and Asia.

Hernandez is on the board of several national organizations, including the American Council on Education, International Consortium for Education and Economic Development, and Community Colleges for International Development. At the state level, he is a member of California Community Colleges' committee for economic development.

**Santa Ana Newspaper Receives Gold Medal**

The Santa Ana College (Calif.) newspaper *el Don* earned its 11th consecutive Gold Medallion Award from the Columbia Scholastic Press Association. The staff received 20 individual awards, making Santa Ana the only community college in California so honored by Columbia's Graduate School of Journalism.

*el Don* scored 949 points out of a possible 1,000. The judges lauded the newspaper as one of the best collegiate publications they had seen in years and praised the staff for its quality use of writing, headlines, color usage, and editorial comment.

Theresa Salinas and Ismael Arellano shared a first-place prize for sports page design of two or more pages. Salinas also won in the news page design and magazine humor categories, while Arellano placed third for an illustration. Numerous other awards went to Rick Ho, Bonnie Darocha, Robert Resendez, Mike Lopez, Alice Kerr, and Sandra Robbie.

**Dumas Discusses Ethnic Leadership at North Carolina-Chapel Hill**

A nationally recognized nurse-scholar, a member of President Clinton's National Bioethics Advisory Commission as well as former deputy director of the National Institute of Mental Health, lectured on ethnic diversity and leadership within academia at the University of North Carolina-Chapel Hill (UNC-CH). "Unraveling the Complexities of Leadership" was the title of the talk given by Dr. Rhetaugh Dumas, vice provost emerita, dean emerita, and Lucile Cole professor of nursing at the University of Michigan.

Dumas' talk highlighted a week-long visit to the UNC-CH School of Nursing. It was the first in a planned series of visits by ethnic minority nurse-scholars. Dumas met with faculty, students, and staff and discussed creating a culture of acceptance for ethnic minorities within academia.

**Long Island-Brooklyn Students Perform Blood Wedding**

The play, translated by Langston Hughes, explores the tragic intensity of lived, instinctual passion. "This is a tragedy with a range of emotions that provides opportunity for incredible growth in the training of our acting students," said Professor John Sannino, who directed the play. The production included flamenco guitarist Marija Temo and flamenco dancer Joaquin Encinas.

**Multicultural Student Admissions Rise at Washington State**

Washington State University (WSU) is experiencing a small rebound in its numbers of multicultural students applying to the University compared to a year ago, according to statistics from the WSU Office of Institutional Research.

The number of applications from first-year multicultural students as of April 24, 1,235 compared to 1,054 last year at the same time. 1,141 in 1998, and 939 in 1997. Of these, total of 888 students have been offered admission, compared to 811 last year, 921 in 1998, and 772 in 1997.

WSU student recruiters have been developing and implementing strategies to establish new community contacts, identify and prospective students, and build trust within multicultural communities.

**Gephardt Tours Houston School**

Pictured (l. to r.): Thelma Garza, ar superintendent for the Houston Independent School District in Texas; U.S. Minority Lead Dick Gephardt; and Roy Zermeno, an office with Southwestern Bell. Telephone visit Tijerina Elementary School in Houston. Gephardt was in the area to tour the school which had received computers that were donated by Southwestern Bell.
Multicultural Resources on the Internet: The United States and Canada

By Vicki L. Gregory, Marilyn H. Karrenbrock Stauffer, and Thomas W. Keene, Jr.

This is a timesaving guide for those seeking information about diverse populations in the United States and Canada. Designed as a research aid for educators and students in high school or college, the book gathers and organizes valuable information about Internet and Web sources that deal with multicultural issues.

Critical Passions: Selected Essays

By Jean Franco

Recognized for her feminist critique of Latin American writing, Jean Franco participated in major debates in Latin American studies—beginning with the "boom" period of the 1960s and continuing through debates on ideology and discourse, Marxism, mass culture, and postmodernism. These essays demonstrate Francois ability to reflect on and judge with equal seriousness all spheres of expression.

Sofia: Poems

By Joan Logue

Among the Spanish people who settled New Mexico four centuries ago were Jews forced into exile during the Inquisition. This series of 30 poems reveals the life of one of these "crypto" Jews, a Hispanic woman with a Sephardic background. These poems, written in English and translated into Spanish, are presented bi-lingually. Translations by Claire Joysmith and Arturo Salinas.

Fascism in Spain, 1923-1977

By Stanley G. Payne

A comprehensive history of Spanish Fascism, this authoritative study offers treatment of all of the major doctrines, personalities, and defining features of the Spanish fascist movement, from its beginnings until the death of General Francisco Franco in 1977.

Memoirs of a Militia Sergeant

By Manuel António de Almeida

Recognized as a turning point in Brazilian literature, this entertaining novel of urban manners follows the ne'er-do-well Leonardo through romantic liaisons and frequent scrapes with the law. The book comprises a series of humorous vignettes, held together by the adventures and misfortunes of this young rogue and his father, also named Leonardo. Translated from Portuguese by Ronald W. Sousa.

Iracema

By José de Alencar

First published in 1865, this classic of Brazilian literature is perhaps the most widely known piece of fiction within Brazil, and the most widely read of José de Alencar's many works. Set in the 16th century, it is a passionate tale of doomed love between a beautiful young Tabajara Indian woman, Iracema, and a Portuguese soldier, Martim, who together undertake an odyssey that will determine the future of a newborn nation. Translated from Portuguese by Clifford E. Landers.

Insurgent Cuba: Race, Nation, and Revolution, 1868-1898

By Ada Ferrer

In the late 19th century, in an age of ascendant racism and imperial expansion, there emerged in Cuba a movement that unified black, mulatto, and white men in an attack on Europe's oldest empire, with the goal of creating a nation explicitly defined as antiracist. This book tells the story of the 30-year unfolding and undoing of that movement.

In the Shadow of the State: Intellectuals and the Quest for National Identity in Twentieth-Century Spanish America

By Nicola Miller

This book explores the roles played by intellectuals in the creation of popular national identities in 20th-century Spanish America. Spanning the intellectual centers of Argentina, Chile, Cuba, Mexico, and Peru, it
In the Shadow of the State

Inequity and Intervention: The Federal Budget and Central America
By Joshua Cohen and Joel Rogers

This pamphlet explores the relationship between President Ronald Reagan's domestic and foreign policy initiatives, with special reference to the Reagan administration's policies in Central America.

1986. 66 pgs. ISBN 0-89608-325-X. $5.00
paper. South End Press. (800) 533-8478.

Charcoal and Cinnamon: The Politics of Color in Spanish Caribbean Literature
By Claudette M. Williams

This book explores the continuing redifinition of women of African descent in the Caribbean, focusing on the manner in which literature has influenced their treatment and contributed to the formation of their shifting identities. Claudette Williams bases her analyses on poetry and prose from Cuba, Puerto Rico, and the Dominican Republic and compares the writings to the literature of the English- and French-speaking Caribbean territories.

Stories in Red and Black: Pictorial Histories of the Aztecs and Mixtecs
By Elizabeth Hill Boone

The Aztecs and Mixtecs of Ancient Mexico recorded their histories pictorially in images painted on hide, paper, and cloth. The tradition of painting history continued even after the Spanish Conquest, as the Spaniards accepted the pictorial histories as records of the past. This copiously illus- 
ted book offers the first comprehensive ar of the Mexican painted history.

cloth. University of Texas Press. (800) 252-

The College Board Centennial Forum
October 28-November 1

Networking and professional development opportunities: sessions on cutting-edge, field-specific research and development; keynote addresses by world-renowned speakers. At the Marriott Marquis Hotel, New York City.
Contact: (212) 713-8050; website, www.collegeboard.com.

HACU 14th Annual Conference
November 4-7

This year's theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

Letter to the Editor:

The following is an excerpt of a letter from Daniel Segura, assistant director of admissions, Alma College, Alma, MI, expressing his concern regarding our Top 100 issue.

Dear Editor:

Your ranking of the "Top 100 Colleges for Hispanics (May 5, 2000)" brings up some points to consider. In that issue, colleges and universities were ranked solely by the number of degrees that they award. Numbers do not always tell the whole story. In many cases listing the number of students graduating from a particular university gives no indication of the rates of retention, graduation, programs or support systems in place.

The May 5 [issue] was also distributed to High School Guidance Counselors who will pass the results of your ranking on to their students. The problem, as I foresee it, that arises is that many of the students who receive this information will not question it at all. When I go our school in the fall to tell them about the many opportunities available for them at a small private institution like Alma College, they will likely cross-reference our name with those on the Hispanic Outlook ranking and immediately write us off their list.

[Many] Hispanic students are used to having someone who is always available to talk about both personal and academic issues. That kind of relationship is one of the cornerstones of the liberal arts education. It is a shame that students may now miss out on the chance for that kind of opportunity because of your one-sided reporting.

I will continue to read your magazine and to recommend it to colleagues, so that they can see that there are others out there that are fighting and winning some of the same battles that we are. Your magazine is a credit to our ethnicity.

Dear Mr. Segura:

Thank you for your letter. We appreciate feedback from our readers. As we indicated in our Top 100 issue, these data were compiled by the U.S. Department of Education. As the Hispanic population continues to grow, it is important to reflect quantitative data to gauge how this group fares, in this case, in education. This compilation, while by no means presented as final, does enable us to pinpoint those schools with the most Hispanic graduates at the bachelor's, master's and doctoral levels.

Like with the subject of admissions where that decision should be based on a variety of criteria, not just GPA, we realize that there are a plethora of institutions of higher education serving the Latino community. Throughout the years our pages (such as in our regular spotlight the Honor Roll or in featured articles) have showcased large research institutions, private and public universities as well as small independent colleges. Most recently, we highlighted Haverford, Swarthmore and Bryn Mawr Colleges, three small institutions, for their innovative programs aimed at students of color. Am it is our mission to continue to do so. We would be remiss not to.

How do we find these schools? Our office regularly receives fax and emails from universities informing us about their programs or campus events. We also developed relationships in the last decade through our attendance at and coverage of education conferences; or school are brought to our attention by readers like yourself.

Again, thank you for considering us a "credit to our ethnicity" on your continued readership. Stay in touch.
By Cecilia Rodríguez Milanés

This book narrates the author’s journey from her origins in an upper-middle-class New York Orthodox Jewish family to becoming a radical educator at the forefront of the culture wars of the early ’90s. Paula Rothenberg is a professor of philosophy and women’s studies at William Paterson University and the director of the New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching.

I read Invisible Privilege enthusiastically, especially the early chapters dedicated to her childhood, adolescence, and education in New York, because I grew up working-class [in a small New Jersey city], believing that New York was the center of the universe. I was impressed by Rothenberg’s narrative shifts in points of view from naïve to coming-to-consciousness to mature and intellectual. She admits deliberately using a “prideful, insensitive, cruel—even racist…” voice at times to underscore that “it is necessary to hear, see, touch, taste, and smell the way the world looks to people who are blind to their own privilege…” Because we “mean well,” it never occurs to us that the choices we make may have devastating consequences for others.”

She discovers the flaws in the system of privilege when her schooling is relegated to less than first-rate because she is a female. It was intriguing to note how someone with so much going for her could fail. But her gender betrayed her at the university, where even entitled white women are thwarted. Her story affirmed for me, once again, how remarkable it is that even six percent of higher education faculty are people of color—there are so many more strikes against us.

Rothenberg illustrates how higher education often upholds race, class, and gender bias. While many scholars of color have known about, discussed, and even personally experienced this bias for years, it is always more impressive for an insider like Rothenberg (though a female, she’s white) to critique the system.

The chapter entitled “Getting It Right” chronicles her experience as a beginning teacher. As a woman in higher education, she expresses the familiar doubt—“lurking somewhere in the back, and occasionally at the front, of my mind… the belief that I was somehow a fake and the fear that I would one day be found out.” Teachers of color will likely smile in recognition of how a well-meaning white teacher such as Rothenberg can’t seem to engage working-class students of color. She discovers that “part of the job of teaching working-class students is finding ways to empower them enough so that they have the confidence required to be able to understand, but I disagree…” Rothenberg describes her students’ discomfort with Descartes as a “turning point” in her intellectual life. She re-adopted her colleagues’ assumption that the students’ difficulties with sign of their inadequacy: “I decided to operate from the premise that discomfort was a sign of Descartes’ inadequacy.” How rewarding to Rothenberg’s engaged struggle to develop the pedagogy and praxis transformed curriculum and worldview.

Rothenberg’s fifteen minutes of fame came when her edited book, Racism and Sexism in a Changing America (1987) was cited for a new writing course at UT-Austin to increase students’ awareness of difference and then rejected, along with the course, because reviewers considered it to be “thought control… sparking what can only be known as the culture wars.” Rothenberg appears on TV and radio shows to explain and defend the new curriculum imperatives.

I was impressed by the African American student who said that she took Rothenberg’s course in hopes of understanding white people: “She said she had a, wondered how it was possible for whites to carry on atrocities committed against Black people during slavery and speculated that there might be something, client in their moral sensibilities that allowed the commit such unspeakable acts.” It is satisfying to know how much teachers can learn from their students the classroom climate is democratic.

Maybe what I like best about Rothenberg is her tenacity: she won’t let well-meaning progressives off the hook: “Because they are committing terrible things.” They believe they do so…[T]hey have never taught the difference between simple prejudice and the more complicated intermittent forms of oppression signified by the words racism and sexism.” They do not understand that racism and sexism are perpetuated by people who are carrying on business as usual.” An interesting note is that Rothenberg never benefited from Rothenberg’s business.

Rothenberg’s life story shows how deeply personal the interpersonal is. Teachers of color will leave the book with the knowledge that they are an ally in academia who does “get it” and whose struggle on behalf of those less privileged is marked by wisdom, passion, and integrity.

Cecilia Rodríguez Milanés, associate professor of Latino/a literature, writing, and women’s studies at the University of Central Florida, is co-chair of the National Council of Teachers of English’s Latino Caucus and editor of its newsletter. Capriola.

CALL FOR PAPERS
Fifth National Conference
On Family and Community Violence Prevention
THEME: Families Building Bridges: Strategies To Prevent Violence
DATES: April 5-7, 2001
PLACE: Marriott-Los Angeles Airport, Los Angeles, California

The Family and Community Violence Prevention (FCVP) Program at Central State University, Williamsport, Ohio, in conjunction with the Office of Minority Health of the U.S. Department of Health and Human Services, will present the Fifth National Conference on Family and Community Violence Prevention - April 5-7, 2001 - at Los Angeles, California. Students, educators, social service providers, community members, and community participants are invited to submit papers for presentation.

Papers must be appropriate to the theme and apply to one of the following categories:
1. ongoing research
2. previously unpublished research or evaluation of demonstration programs.

Submission Guidelines:
1. Provide one copy of a cover sheet listing the title of the paper, the category into which the presentation is submitted; the name (s) of the author(s); and a mailing address, phone and fax number, one e-mail address for the primary submitter.
2. Provide three copies of a typed, one-page abstract of your paper or poster. If possible, include a brief abstract on a Post-it Note or WordPerfect. The abstract should contain the title, name(s) of the author(s), name(s) of the institution(s), and affiliation(s).
3. Submissions may be made electronically via e-mail to: fcvpinfo@csu.edu or on the FCVP World Wide Web at: fcvp.org.

Please send submissions to:
Dr. Linda Reynolds
Program Director, FCVP Program
Central State University
Williamsport, OH 43093
Phone: (740) 376-6667 or (800) 455-7367
Fax: (860) 376-0100
E-mail: lrenson@csu.edu
Website: www.fcvp.org

Abstracts and letters are due by August 31, 2000.

Abstracts will be evaluated for the following:
1. Originality
2. Relevance to the theme
3. Quality of presentation

The abstracts will be the basis for evaluating all papers. The abstracts will be returned to the authors.

Papers and Abstracts should be submitted to:
Dr. Linda Reynolds
Program Director, FCVP Program
Central State University
Williamsport, OH 43093
Phone: (740) 376-6667 or (800) 455-7367
Fax: (860) 376-0100
E-mail: lrenson@csu.edu
Website: www.fcvp.org

The deadline for submission is August 31, 2000.
STUDENT DEVELOPMENT SPECIALIST - Educational Opportunity Fund (EOF)

One of the nation’s premier community colleges, Brookdale Community College is an innovative and comprehensive open admissions two year college, proud of its dedication to the highest standards and to the community. We seek colleagues who share our commitment to quality instruction, collaborative relationships, and who value service, diversity, innovation, and technological literacy. We invite applications for the following position for September 2020. This is a full-time, tenure track entry level position.

Master’s degree in Counseling or closely related field required. Related work experience with at-risk populations preferred. Counselors employ a variety of individual/group counseling methods to provide a full range of professional counseling and advisement services. There is an increasing emphasis on planning and implementing innovative programmatic strategies and interventions to support student growth and development, and facilitate academic success in today’s highly transitional and diverse educational environment. A highly flexible team orientation, faculty with current technology applications in counseling, a collaborative organizational approach, and an understanding of the diversity of today’s student population are essential. Some evening work and travel within Monmouth County (NJ) will be required. Position may require participation in community-based activities. Salary range for Instructor level is $33,923-$39,011. Position is entry level and salary is commensurate with qualifications and experience within the identified range. Counselors working in the summer receive additional compensation.

APPLICATION PROCESS: Applicants interested should submit a letter of application, curriculum vitae, copies of graduate transcripts and three letters of recommendation to Human Resources via fax at (732) 224-2970, or by mail to the address as noted below. You may also apply in person at the Human Resources Office, 8:30AM to 5:00PM, Monday through Friday. Our Email address is hrdept@brookdale.cc.nj.us, and our Job Hotline telephone number is (732) 224-2821.

APPLICATION DEADLINE: Materials must be received no later than July 5, 2020.
EXECUTIVE DIRECTOR

The National Council of Teachers of English (NCTE) seeks applications for the position of Executive Director.

RESPONSIBILITIES INCLUDE:

- Enacting policies of a 17-member Executive Committee;
- general administration and operational management of the 100-member headquarters staff in Urbana, Illinois;
- internal liaisons with volunteer officers, editors, governing bodies, and 80,000 members and subscribers;
- sponsorship of 120 regional, state, provincial, local and student affiliates;
- external liaisons with related organizations, governmental units, funding agencies, and the media that require some periods of travel.

APPLICANTS MUST HAVE THE FOLLOWING:

- Graduate degree(s) in an appropriate area;
- demonstrated competence in administration and budget management skills;
- commitment to the work of professional organizations to strengthen teaching, learning, and research;
- commitment to cultural diversity;
- some familiarity with information technology;
- and superior skills in speaking, writing, and listening.

A three-year renewable contract is offered, effective October 1, 2000 to September 2003. Salary is negotiable, fully competitive including a benefits program.

Qualified individuals should submit a letter of application expressing interest and qualifications; a list of five references, preferably including those from voluntary leadership; a resume; and a one-page statement of the applicant’s vision for NCTE to the following:

Leila Christenbury, Chair
NCTE Search Committee
214 Old Orchard Lane
Richmond, VA 23226

The selection process will begin August 15; however, applications will be accepted until the position is filled.

The National Council of Teachers of English is an equal opportunity/affirmative action employer by choice.

STETSON UNIVERSITY
Florida's First Private University

Stetson University
DeLand, Florida
Vice President for Enrollment Management

Stetson University seeks nominations for and expressions of interest in the position of Vice President for Enrollment Management.

The first private university in Florida, Stetson University is an independent comprehensive institution of about 2,500 students in DeLand, Florida, a small city located between Orlando and Daytona Beach. The university offers highly personalized undergraduate study in liberal arts, music, and business, as well as in selected graduate programs.

The University seeks a Vice President who will have broad-based responsibility for implementing student recruitment, admission, financial aid and retention programs. The new Vice President will oversee a staff of 24, manage a combined admissions and financial aid budget of $24 million, and supervise the Directors of Admissions and Student Financial Planning. As an officer of the University, the Vice President will report to the President and serve as a member of the President’s Staff and the Council of Vice Presidents.

The successful candidate will demonstrate knowledge of current and strategic enrollment management theory and practice, the ability to develop and implement marketing and recruiting plans, strategies, leadership and supervisory skills that foster collaboration, experience in and commitment to private higher education, and excellent interpersonal and communication skills. An undergraduate degree is required; an advanced degree preferred.

Review of credentials begins immediately and will continue until the position is filled. Letters of nomination or application, including curriculum vitae, may be submitted, in confidence, to:

Vice President for Enrollment Management
Stetson University
98 Old South Road
Nantucket, MA 02554-6000

Stetson University, an equal opportunity employer, affirms the values and goals of diversity and strongly encourages the applications of women and candidates from historically underrepresented groups.

Educational Management Network, a division of Witt/Kieffer is supporting Stetson University with this search. Requests for a copy of the Position Specification or questions may be directed to Lucy Lesk via e-mail at stetson@wittkieffer.com. Additional information about Stetson is available at the University's Web site, www.stetson.edu.

ENGINEERING CENTER DIRECTOR

The College of Engineering of the University of Maryland invites applications for the position of Director of the newly formed Small Smart Systems (S3) Center. The College of Engineering ranks among the top public universities in the nation with a faculty that has an international reputation in education and research. This center has been formed with long-term institutional funding. Construction of a new Engineering and Applied Sciences Building, which will house much of the activity of the Center, is expected to begin soon. The new facility will have extensive fabrication, characterization and integration facilities, including a large clean room. Faculty in several engineering departments, including Aerospace, Chemical, Electrical and Computer, Materials, and Mechanical, participate in the S3 Center, and the Director will have a faculty appointment in one of these departments. The Director will also participate in hiring new faculty and will work to build a cohesive interdisciplinary team with new and existing faculty. The mission of the Center is to develop the sciences, technology and educational infrastructure (both hardware and software) for small, highly integrated and/or hybrid smart systems. We seek a highly motivated individual with an established track record of outstanding research and the ability to stimulate and foster new projects. The Director's responsibilities will include: advancing, articulating and implementing the vision for the center, coordinating research activities, and obtaining external funding. The credentials of the candidate must be commensurate with a senior faculty position and include an earned doctorate degree in one of the engineering disciplines. Experience in managing a research center is desirable. For best consideration, applications should be received by August 15, 2000. Please send resume, list of publications, and the names of at least four references to:

Dr. D.F. Babie, Associate Dean
College of Engineering and Chair of Search Committee
Froebel Building
University of Maryland
College Park, MD 20742

The University of Maryland is an equal opportunity, affirmative action employer with a strong commitment to the principle of diversity. In that spirit, applications from minority groups and women are especially invited.

FERRIS STATE UNIVERSITY

College of Education and Human Services

The School of Education is seeking candidates for the following tenure-track faculty (9-month) positions:

Elementary Education (JOB CODE HO-108010): The successful candidate will assume primary responsibility for the implementation of an innovative new Elementary Education Program beginning Fall 2000. Ph.D. or Ed.D. in Education or related field (A.B.D.s will be considered) and a minimum of three years successful K-8 public school teaching experience required. Academic preparation and experience teaching courses in the areas of language/literacy and/or special education preferred. Experience incorporating instructional technology and collaborating with Arts & Sciences faculty and public school teachers in the delivery of methods courses highly desirable.

Early Childhood Education (JOB CODE HO-25): Future plans for this expanding program include a Bachelor's degree and collaboration with the new Elementary Education program. Candidates who are excited about making decisions that will enhance our innovative offerings are encouraged to apply. Ph.D. or Ed.D. with expertise in Early Childhood Education, experience teaching in early childhood settings, and the ability to work collaboratively as a team member are required. Additional expertise in elementary education, special education, or teaching reading is preferred. Experience teaching adults at the college level desirable.

Salary is commensurate with qualifications. Screening of applications will begin June 16, 2000, and continue until positions are filled. Interested individuals should submit a letter of application, resume, three current letters of recommendation, and copies of college transcripts (finalists will be required to submit official transcripts). Please send materials to: JOB CODE HO-108010, Human Resource Development, Ferris State University, 620 Oak Street, PRK 150, Big Rapids, MI 49307. For more information about Ferris State University, visit our web site at www.ferris.edu.

An Equal Opportunity/Affirmative Action Employer
CHANCELLOR
UNIVERSITY OF WISCONSIN-MADISON

The University of Wisconsin System invites applications and nominations for the position of chancellor of the University of Wisconsin-Madison. UW-Madison is one of the world's outstanding public research universities. It is one of two doctoral universities in a public higher education system that also includes eleven comprehensive institutions, a system of freshman-sophomore transfer colleges, and a statewide extension. The chancellor of each institution reports directly to the president or the UW System.

The university is located in south central Wisconsin. Madison has been consistently ranked as one of the top mid-west cities in the United States, and is one of the top 10 in the nation.

Founded in 1848, UW-Madison one of the premier land-grant universities in the United States, has the largest concentration of graduate, professional, and research programs, as well as the broadest array of undergraduate majors in the UW System. Academic programs offered include 146 majors, 150 master's, and 152 doctoral programs. The enrollment of 40,100 includes 27,000 undergraduates, 8,500 graduate students, 2,100 professional students, and 1,700 special students. The graduate and 3,000 graduate and 6,800 professional degrees are awarded annually. UW-Madison ranks second nationally in the U.S. News & World Report.

The university employs 17,110 people, including 7,076 faculty, 5,567 academic staff, and 4,857 classified staff. It has an annual operating budget of $1.4 billion, with $14.5 million coming from funding for research and development and $236.4 million from annual gifts and trust fund revenue. Among public universities, UW-Madison ranks third in funding for research and development and first in revenues from annual gifts and trust fund revenues.

UW-Madison seeks a chancellor with the capacity to lead an energetic Research 1 land-grant institution within a large and dynamic public higher education system. Candidates will be evaluated on the following professional and personal characteristics:

- A commitment to scholarly values and an understanding of the diverse missions of a major public research university, including undergraduate and graduate instruction, research, public service, and outreach.
- Academic and administrative professional accomplishments, including:
  - Academic scholarship and teaching credentials and accomplishments, or equivalent professional credentials and accomplishments, which will command the respect of the academic community and be tenable at the level of full professor or associate professor.
  - A successful record of leadership, including experience in higher education, or equivalent professional administration.
- Commitment to promoting continued success in securing funding for the university through:
  - Federal, state, and other grants and contracts;
  - Alumni development and fund raising;
  - Ongoing renewal of revenues derived from research patents and licenses.
- Outstanding leadership qualities, including:
  - Personal integrity, intellectual curiosity, compassion, resilience, and energy.
  - A collaborative leadership style that emphasizes openness and fairness.
  - A commitment to Wisconsin's strong tradition of shared governance, which includes active participation in policy-making by faculty, academic staff, and students.
  - Desire and ability to advance the university's mission in undergraduate and graduate programs; to provide leadership and support to the faculty in teaching, scholarship, public service, and curriculum development for the people of Wisconsin, and to extend the school's research and community service.
  - Ability to provide leadership to faculty, staff, students, administrators, and other constituents in implementing the current and future strategic plans.
  - Demonstrated leadership in national higher educational organizations.
- Talent and energy to build and support an institution at local, state, national, and international levels, including:
  - The ability to represent the institution effectively and professionally to a variety of constituencies, including the Board of Regents and administration of the University of Wisconsin System, community and business leaders, other educational institutions and the second- and post-secondary levels, alumni, media, and legislative and other governmental bodies.
  - The ability to work collaboratively with the other UW System campuses.
  - A commitment to continuously improve the university experience for students, faculty, and staff, including:
    - Enhancing the quality of student life and strengthening the delivery of services to students.
    - Enhancing educational opportunities through appropriate use of new technologies.
  - Ensuring the diversity of students, faculty, and staff as detailed in the University of Wisconsin System's diversity plan.
  - A commitment to the university's responsibility for public service through dissemination of the results of scholarly and creative inquiry, including:
    - Support of the faculty mission of public service that benefits the state, nation, and the larger society.
    - Ability and interest in promoting the state of Wisconsin's economic development, through educational programs and knowledge and technology transfer.
  - Support of the Wisconsin idea.
- Understanding of and an interest in implementing appropriate use of new technologies to improve continuing education and outreach.

Compensation will be competitive and commensurate with qualifications and experience. The position is available January 1, 2001.

Candidacy materials should include a letter of interest which addresses how the candidate's strengths and experience match the qualifications for the position, and what she sees as challenges and opportunities, and a current and complete curriculum vitae. Upon request, candidates will be asked to provide the names, addresses, e-mails, and telephone numbers of at least five references. These may include trustees, administrators, faculty, students, and community leaders.

Applications and nominations must be received by July 31, 2000, to ensure consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations from women and persons of underrepresented groups.

In accordance with Wisconsin's open records law, written requests for confidentiality by nominees and applicants may be honored, except that names and titles of the analysts must be disclosed if so requested.

Further information about the search and UW-Madison is available at: www.wisc.edu/search/chancellorsearch

Requests for information and written nominations and applications should be directed to: Professor Verne Durand, Chair; Chancellor Search and Screen Committee; 133 Bascom Hall, 500 Lincoln Drive, Madison, WI 53706-1300.

Email: chancellorsearch@wisc.edu; www.wisc.edu; 608 265-3277. Confidential Fax: 608 265-7895

Confidential inquiries may also be directed to the search consultant retained by the committee: R. William Funk; Horn/Funk International; 3222 Lincoln Plaza; Dallas, TX 75201. email: bill.funk@hornfunk.com

The University of Wisconsin is an affirmative action/equal opportunity employer.

Ms. Belinda Cagnacci
Department of Human Resources

ROCKLAND COMMUNITY COLLEGE

145 College Road
Suffern, NY 10901

Rockland Community College is an equal opportunity employer.
Vice President of Academic Affairs

The College of Aeronautics, an independent college offering bachelor and associate degrees in aviation, computerized design and engineering technology, seeks candidates for the position of vice president of academic affairs. With the main campus at LaGuardia Airport in New York City and an extension site at Stewart International Airport in Newburgh, New York, the vice president will provide leadership for the institution's six academic departments, the library, the Academic Resource Center and distance education programs. As the chief academic officer for the institution, the vice president will report directly to the president and serve as a member of the College's senior staff.

The College will look to the vice president to provide direction in the areas of:
- strategic planning (process in progress)
- academic program development both on campus and via new technologies
- faculty recruitment, development, retention and evaluation
- creating an environment dedicated to student learning and teaching effectiveness

Qualifications: The successful candidate will preferably have an earned doctorate from a regionally accredited institution, a minimum of five years of administrative experience (including budgeting and planning), a background in aviation, technology or engineering, demonstrate achievements in teaching and scholarship to merit appointment as a professor and demonstrated experience in quality distance education programs. ABD doctoral candidates with extensive administrative experience will be considered. A detailed job description is available on the College's website at www.aero.edu.

To apply: Applications will be accepted until an appointment is made. Please send letters of application with a curriculum vitae and salary history to:

Director of Human Resources
College of Aeronautics, LaGuardia Airport
86-01 23rd Avenue, Flushing, NY 11369
or fax to 718.651.2553.

An EEO/AA Employer

The University of Connecticut Libraries seek a forward-thinking, energetic individual to build upon an already strong existing program and to help lead the Libraries into an increasingly electronic future. Working in a team environment and under the general direction of the Area Head of Archives and Special Collections, the Digital Collections Librarian is responsible for:
- planning, developing, and implementing an infrastructure that enhances access to the intellectual resources of the University Libraries through local digitization projects
- collaborating with appropriate digitization efforts at other institutions
- integrating digital content and access tools into a coherent set of library services.

As leader of the University Libraries' digital initiative, the Digital Collections Librarian provides vision that moves the University Libraries toward a content-rich and coherent suite of electronic products and services that complement traditional library print services. She/he identifies potential digital collections and potential partners on campus and off campus and coordinates with subject Librarians and Library teams responsible for acquiring and organizing digital content. The Digital Collections Librarian works closely with system and server administrators and cataloging staff to select technical solutions that integrate digital collections with appropriate access tools and with other digital resources already supported by the Libraries. The Digital Collections Librarian also seeks an integrated approach that involves all Library areas in the digital effort resulting in programs and projects that meet the widest needs of the academic community.

The complete job description is available at: http://www.lib.uconn.edu/jobopp/
For information on the University of Connecticut see http://www.uconn.edu

Required Qualifications: MLS with a minimum of two years pre- or post-MLS experience using technology for the delivery of digital information; knowledge of and experience with standards and practices for organizing information; an understanding of the scholarly use and development of library collections and services and laws governing intellectual property in the digital environment; excellent oral/written communication skills; ability to prepare reports and procedural documentation; ability to work in a team environment with diverse groups of library staff and faculty to build consensus on new programs, ability to plan, coordinate, implement and evaluate projects; and to communicate effectively and openly with colleagues and customers in a variety of settings and presentation modes.

Desirable Qualifications: Experience with different computer operating systems, digital imaging, differing file formats and Internet protocols, and a variety of software applications; knowledge of SGML, HTML, PERL scripting, database programming, and the ability to learn new mark-up languages such as XML; ability to initiate and adapt to change, analyze/solve problems and work collaboratively.

Compensation: Anticipated hiring salary, $36,500 to $49,488 depending upon experience. University benefits include 22 paid vacation days/year, 12 paid state holidays, excellent health and retirement plans, and tuition waivers.

Application Procedures: Submit a letter of application that addresses how previous experience and personal qualities meet the requirements for the position; a resume; and the names, addresses, and telephone numbers of three professional references to Deborah Stanbury Sunday, Administrative Librarian, University of Connecticut Libraries, Box U-1005A, 369 Fairfield Road, Storrs, CT 06269-1005. Screening will begin immediately and continue until the position is filled.

The University of Connecticut has a strong commitment to diversity. We actively encourage minority and people with disabilities to apply.
State University at Stony Brook
Director of the Academic Advising Center

The Center: Stony Brook is a leading national research university with a current student population of approximately 19,000, of whom some 12,000 are undergraduates. The Center provides undergraduate academic counseling for the University’s non-declared major, pre-health, and pre-law student populations, counseling on University graduation requirements for students in the College of Arts and Sciences (CAS), and mandatory academic counseling for students in CAS who are not in good academic standing. The Center has a staff of 12 professional advisors, 6 part-time faculty advisors, undergraduate peer advisors, and 2 office staff.

The Position: The Director is responsible for planning and administering the daily activities of the Center, implementing new services and programs, identifying and implementing innovative models based on national trends, and developing and maintaining collaborative working relationships with faculty advisors and academic departments. The Director will utilize technology to effectively provide advising services and information to students, track and analyze academic trends, and partner with other student services offices in meeting the comprehensive needs of Stony Brook undergraduates.

Qualifications: Master’s degree with considerable undergraduate interaction, either teaching or advising, and preferably both; at least 5 years’ advising experience in a college or university; and administrative experience which includes the supervision of a sizeable advising staff. Important selection criteria include demonstrated initiative and leadership skills, professional involvement, excellent written and oral communication skills, and comfort with information technology and its application to advising services.

Application: Include a resume, cover letter, and the names, addresses, and phone numbers of three professional references, and send application materials to:
Ms. Diane West
Office of Undergraduate Academic Affairs
E-2360 Ward Melville Library
University at Stony Brook
Stony Brook, NY 11794-3351

GOVERNORS STATE UNIVERSITY

Governors State University, chartered in 1969, is an upper division public university annually serving over 9,000 predominately non-traditional students. Located 35 miles south of Chicago, GSU is one of the fastest-growing universities in the State of Illinois, offering junior and senior level courses leading to a bachelor's degree and graduate level courses leading to a master's degree. GSU is proud of its strong commitment to cultural diversity, which is evident in every facet of university life.

NETWORK ADMINISTRATOR

The successful candidate will serve as the senior resource responsible for the planning, design, installation, maintenance, training, support, security, and implementation of all network operating system software (NT, Novell, UNX), application software, hardware, telecommunications, and databases. This position requires developing software standards, capacity planning, and allocation of in-house system resources. **Qualifications:** Bachelor's degree or degree-seeking; five to seven years' demonstrated experience with network operating systems; appropriate technical certifications; strong interpersonal and communication skills; the ability to program in an administrative language; experience configuring and maintaining Cisco routers, switches, and firewalls; solid understanding of networking/distributed computing environment concepts and TCP/IP networking protocols.

COORDINATOR OF WEB DEVELOPMENT AND MAINTENANCE

This position is divided equally into hands-on technical expertise and project management. The Coordinator is responsible for site redesign and management. The position requires demonstrated management excellence and the ability to problem-solve. The Coordinator works closely with administrative, academic and IT professionals. **Qualifications:** Bachelor's degree or degree-seeking; minimum three years' professional Web development and maintenance experience; demonstrated knowledge of UNIX and current Web development tools; demonstrated knowledge of Web-based development that is database driven; demonstrated project management experience; team-oriented, with strong communication and interpersonal skills; excellent technical research and analytical skills.

HELP DESK MANAGER

This position requires the management of technical personnel who resolve end-user problems. The qualified candidate will have experience with successful design/installation/implementation of a state-of-the-art help desk system. The candidate must be proficient with data analysis and management reporting. **Qualifications:** Bachelor's degree or degree-seeking; one to two years' management experience; demonstrated experience in an information technology environment; strong troubleshooting for customer service; excellent oral and written communication skills; demonstrated knowledge of networks, microcomputers, and peripherals from both a hardware and software standpoint; experience with a high-level reporting package.

Review of applications is ongoing until the positions are filled. Applicants should send a letter of interest addressing qualifications and specifying position desired, a current resume, and the names, addresses, and telephone numbers of three professional references to: Erin Reed, ITS, OTS Building, Governors State University, University Park, IL 60466 or e-reed@govst.edu.

If you would like more information about the University, please visit our Web site at: www.govst.edu

ASSOCIATE VICE PRESIDENT FOR ACADEMIC AFFAIRS

THE RICHARD STOCKTON COLLEGE OF NEW JERSEY is an innovative, residential, undergraduate liberal arts and sciences college along with six graduate programs, with a student body of 3500 and a recognized record of recruiting a diverse student body, faculty, and staff. The College is located on a 1600-acre wooded campus in the Pinelands of New Jersey, 15 miles from the Atlantic Ocean, 1 hour from Philadelphia, and 2-1/2 hours from New York City. One of only six public colleges classified by the Carnegie Foundation as a Liberal Arts Institution, Richard Stockton College is nationally recognized for its record of academic innovation and excellence. To continue this tradition of innovation and excellence, Stockton College seeks nominations and applications for the position of Associate Vice President for Academic Affairs.

As part of the leadership for Academic Affairs, the Associate Vice President has the following responsibilities: 1) Under the guidance of the Vice President for Academic Affairs, to prepare, manage, and monitor budgets within Academic Affairs including budgetary review of all grants and contracts; 2) Primary responsibility for instructional planning and program development. In this capacity, the Associate Vice President conducts analyses to guide decision making, as well as assess the Vice President for Academic Affairs with initiatives in program and faculty development; 3) Monitor all major policy and programmatic initiatives; 4) Maintain all articulation agreements with graduate and professional schools, including oversight of the activities of the pre-med, pre-law, and pre-engineering coordinators. In collaboration with academic programs develop additional agreements with graduate and professional schools; 5) Oversight of the College’s grants and contracts activity; 6) Have primary responsibility for coordinating all assessment activities within academic affairs; 7) Manage the 5-year program review cycle, program proposals, and individual grant proposals.

QUALIFICATIONS

• An earned doctorate
• Evidence of successful teaching and scholarship
• Experience in managing a budget spanning multiple units
• Evidence of significant administrative experience in the areas of faculty, and program development
• Evidence of the capacity to oversee multiple tasks and bring them to successful conclusion
• Ability to use technology effectively
• Familiarity with recent trends in assessment
• Familiarity with a collective bargaining environment
• A commitment to diversity and
• Excellent interpersonal and communications skills.

This is a non-tenured management position. Salary is commensurate with qualifications and experience. Screening will begin immediately. Position is available July 1, 2000. Applicants must include a letter of interest and curriculum vitae. Nominations, applications and three letters of reference should be sent to Dean William Jannes, Chair, Associate Vice President Search Committee, Office of Academic Affairs, The Richard Stockton College of New Jersey, AAS1, PO Box 195, Pomona, NJ 08240.

Stockton College is an AFFEOE. Women and minorities are encouraged to apply.

ASSISTANT DEAN
College of Humanities and Social Sciences (CHSS)

Works with the dean to develop, manage and improve college activities and functions that include academic support, faculty issues, budget, external funding, staffing, enrollment enhancement, curriculum and facilities. Supports faculty and staff in obtaining and managing externally-funded grants and contracts. Works closely with department chairs and program directors on routine administrative projects as well as innovative projects requiring support of the Dean’s Office. Provides input and support as needed to other staff professionals in the dean’s office. Works with other University officers and offices to support the mission of CHSS and Montclair State University.

Qualifications: Master’s degree (or professional equivalent), Ph.D. preferred. A minimum of four years’ experience working in a college/university as a member of the faculty or staff. Demonstrated ability to work cooperatively and effectively with faculty, staff and students. Demonstration of knowledge of current computer hardware and software. Evidence of being well-organized, efficient and timely in completing work.

The assistant dean position is a renewable, 12-month staff appointment.

Salary Range: $50,000 - $62,500 depending upon experience and qualifications.

Starting Date: August 1, 2000 or as soon thereafter as possible.

Send letter and resume (include V#) to: Richard J Giguetti, Dean, College of Humanities and Social Sciences, Montclair State University, Box C316-V/#4/HOME, Upper Montclair, NJ 07043

Apply by: Screening of applications will begin July 3, 2000 and continue until the position is filled.

An Equal Opportunity/Affirmative Action Institution

WILLIAMS COLLEGE

Director of the Budget/ Assistant Provost
Williams College

Williams College seeks experienced candidates for the position of Director of the Budget for the College. The position reports directly to the Provost and functions as a member of the Provost’s staff charged with the financial management and planning of the College. Responsibilities include planning and coordinating preparation of the operating budget; maintaining spending controls; preparing recommendations for departmental allocations and funding; participating in the Provost in planning and policy sessions; representing the Provost on College committees; and serving a key role in the financial management of the College’s new administrative software system (PeopleSoft).

The position requires a minimum of a Master’s degree in an allied field and at least three years of progressive experience in a budget office or similar function at a college or university or an equivalent combination of experience and education. Applicants should be able to demonstrate strong analytical skills, significant experience with budget planning and financial management, and the ability to work as both the leader and member of a team. Previous experience with PeopleSoft is required, as is a strong background in budgeting and planning. The anticipated starting date for the position is September 1, 2000 or as soon as possible.

Williams College is a privately endowed liberal arts college located in the Berkshire Hills of western Massachusetts. The College’s operating budget is approximately $17 million with an enrollment of slightly more than 2,000 students. Williams consistently ranks among the top liberal arts colleges in the nation.

Questions regarding the position may be directed to Catherine Hill, Provost, Williams College, P O Box 666, Williamstown, MA 01267. Email: Catherine.Hill@williams.edu. Resume review for the position will begin on July 10, 2000.

Please send a letter of interest with job number, a resume and the names, addresses and telephone numbers of three professional references to:

Employment Manager
15 Park Street
Williamstown, MA 01267
Phone: (413) 597-2681; Fax: (413) 597-4060

An Equal Opportunity/Affirmative Action Institution
ASSOCIATE DIRECTOR OF GRADUATE ADMISSIONS

The California Institute of Technology is seeking an individual to further develop the Institute's program to identify and admit outstanding graduate students. Will be responsible for developing and implementing strategies for recruitment and matriculation of graduate students, with particular emphasis and responsibility for underrepresented student populations with an interest in the fields of Math, Science and Engineering. Duties include assisting in developing strategies, supporting material and publications and effective approaches for recruiting students for each option; representing Caltech in graduate student recruitment activities and related conferences; assisting in developing graduate admission publications, including Web-based materials; building and maintaining relationships with high-quality undergraduate institutions; evaluating and tracking graduate applications through the admission's process; assisting with the planning and implementation of retention activities for current graduate students; participating in developing and implementing the goals and objectives of the Office of the Dean of Graduate Studies, overseeing the flow of application materials and records; contributing to and assisting with generating admission-related reports and studies; assisting with programs for entering graduate students; working in close collaboration with other Student Affairs departments in programming and performing additional assigned duties.

Requires a master's degree in a related field; minimum 6 years of successful experience working in admission-related areas or equivalent; excellent communication (verbal/written), interpersonal and organizational skills; experience working effectively with individuals of diverse ethnic, socioeconomic, linguistic and cultural backgrounds in an academic setting; and a demonstrated record of development of recruiting and retention activities at an American university as an in-depth knowledge of cultural and gender issues that face students at research universities. Position will require extensive travel.

Please send a letter of application, a resume and name and contact information of three professional references by Friday, July 14 to: Admissions Search Committee, Office of the Dean of Graduate Studies, 02-31, California Institute of Technology, 559 S. Holliston, Pasadena, CA 91125. Caltech is an AA/EOE. Women, minorities, veterans and disabled persons are encouraged to apply.

ANNOUNCEMENT OF FACULTY POSITIONS

PETER F. DRUCKER GRADUATE SCHOOL OF MANAGEMENT

The Peter F. Drucker Graduate School of Management at Claremont Graduate University is dedicated to advancing the theory and practice of management. It offers MBA, Executive MBA, Financial Engineering and Ph.D. programs as well as non-degree Executive Education programs. To accommodate future growth, nominations and applications are sought for two faculty positions from among the following areas:

- Financial Accounting and Cost Management, with particular emphasis on financial accounting and/or cost management, and the strategic challenges faced by chief financial officers
- Marketing, with special emphasis on consumer behavior, innovation, and research methodology as they relate to marketing strategy formulation
- Finance, with a focus on financial management, the interface between strategy and finance, the use of derivatives in a managerial context, or real options

Candidates must have a doctoral degree; a strong record of scholarship; an interest in diverse approaches, students and populations; and a demonstrated ability to make their intellectual contributions accessible to experienced managers through teaching and published work. Executive level management or consulting experience is desirable. Appointment at all ranks will be considered, but preference will be given to candidates with the requisite experience.

These positions will remain open until filled. Review of nominations and applications, however, will commence on October 1, 2000. Please direct nominations, applications and inquiries to:

Office of the Dean
Peter F. Drucker Graduate School of Management
Claremont Graduate University
1021 North Dartmouth Avenue
Claremont, CA 91711

Claremont Graduate University is an Affirmative Action and Equal Opportunity Employer and actively seeks applications from women and members of minority groups.

Did you know that...

Outlook is now fully indexed and available for research and reference in electronic format on Ethnic NewsWatch, a full text general reference database of the publications of the ethnic, minority and native press, dating back to 1990.

Outlook is one of more than 150 newspapers, magazines and journals reflecting the ethnic and minority press (African American, Caribbean, Arab and Middle Eastern, Asian American, Hispanic, Jewish, Native American and Multi-Racial) that are now part of the Ethnic NewsWatch database.

For the first time...

Ethnic NewsWatch gives you fast and easy electronic access to more than 270,000 complete articles, editorials, columns, book, movie, and theater reviews (and more) reflecting the ethnic diversity of America. And, with Ethnic NewsWatch you have news, culture and history with the other side of the stories.

Now Ethnic NewsWatch is available in academic, public, school and government libraries nationwide.

Ask for Outlook and Ethnic NewsWatch on display at your public library as well as local high school and public libraries.

TRANSLATOR: A MEANINGFUL CAREER FOR HISPANICS

The ancient healer Hippocrates taught that the focus of medical treatment should be the patient, not the disease. This remains true today. Although modern health care professionals must possess the latest scientific and technical knowledge, the healer-patient bond cannot be underestimated. Caring, compassion, and communication also foster good health care.

The best diagnostic tool is often a good bedside manner, characterized by touching, listening, and understanding. This is especially true among Latinos. According to cross-cultural medical specialist Renaldo Maduro, Ph.D., the successful treatment of Latinos requires an open and personal approach by which the healer takes an active role in communicating and interacting with the patient. This approach is a fundamental element of curanderismo, a set of cultural values commonly accepted among Latin Americans regarding wellness.

Lamentably, the healer-patient relationship has suffered under the prevailing models of health care delivery in the United States. Many Hispanics face an even greater challenge in accessing quality medical attention. There is a growing need for professionally trained translators in hospitals, clinics, and other health care settings. This is especially true in areas such as New York, Florida, Texas, New Mexico, Arizona, and California, where many health professionals can reasonably expect that nearly one in three of their patients will speak Spanish at a primary language.

This isn’t a sudden, rapidly emerging trend, but a gradually escalating problem that has presented many advance warnings.

In 1991, Linda Haffner warned in The Western Journal of Medicine that the success or failure of the health care system is often dependent upon a properly trained professional medical interpreter. She cited the dangers of placing the responsibility of translation upon health care professionals who happen to speak Spanish. This approach creates numerous problems, including the distraction of staff from their assigned responsibilities. It also falsely assumes that casual linguistic comprehension equates with cultural understanding gained through educational training.

In her article, Haffner noted the case of a health care professional asking a Hispanic woman how many previous pregnancies she had had. The woman answered two, yet when Haffner, a professional medical translator, spoke with the patient, she discerned that the woman had had two full-term pregnancies and one miscarriage. “For many Hispanic women, having a miscarriage or a stillborn child does not equate with a pregnancy,” Haffner wrote.

Another shortcoming illuminated by Haffner is the reliance upon relatives of Spanish-speaking patients to communicate with English-speaking caregivers.

This can create an undue burden on family members. Haffner cited a tragic example in which a seven-year-old was asked to inform her mother that an unborn child was dead.

Every year, my university hosts high school students from the predominantly Hispanic communities surrounding Pomona, California, and encourages them to pursue an education in the health professions. Too often I find reluctance among otherwise bright students, who are intimidated by the rigorous demands for technical aptitude and scientific acumen. Too many compassionate, caring young Latinos—the kind of people most needed in the health professions—are backing away because their skills lie in language and the humanities.

The solution to better-qualified Spanish medical translators rests in large part, with those of us in higher education. I am encouraging my colleagues to consider a master’s level program in which certified professional translators could study alongside doctors, pharmacists, physical therapists, nurses, and physical therapists. Let them learn about the basic sciences while teaching health care professionals about the need for compassion, care, and intimacy—not just among Latinos but among all patients.

There must also be a grassroots political component in the successful push for quality translators. Latinos must demand better access to health care.

By petitioning translators, we create professional opportunities for our students while securing better medical treatment for ourselves and others.

As we celebrate the nation’s independence this month, one’s personal independence comes to mind. For many, retirement offers that promise.

Retiring at 65

Most people retire at 65. But where did that figure come from? How was it selected? In the 1880s, Germany’s Chancellor Otto Von Bismarck was the Kaiser’s major advisor. Clever, adroit, and totally committed to the greatness of Germany, Bismarck was involved in all aspects of German life. In an attempt to get rid of aged government employees who were not supportive of his new programs, he created a national retirement system to push them out. Germans would now retire at the age of 65. That was a very progressive step for that day and age. Neither other European countries nor the United States were anywhere near as progressive. What is usually not mentioned is that most Germans did not live to the age of 65. A full 80 percent died before they reached 65.

America’s Experience

In the 1930s, President Franklin Roosevelt introduced Social Security, and age 65 was selected as the operative retirement age. Once again, it was a safe bet financially since only 30 percent of Americans lived to be 65. In the 1970s, a very colorful Congressman from Florida, Claude Pepper, a man who served in Congress until his nineties, would change the nation’s retirement laws. Since he was such a vigorous person and still working in his 80s, he logically led the movement to have the established retirement age of 65 eliminated.

Before Pepper’s legislation, most college professors had to retire at 65, although for a few, yearly exceptions existed, especially at private colleges. The law as passed excluded college professors for a few years, but by 1985, college professors joined the rest of Americans when all age restrictions were lifted. Today, professors can work as long as they want to.

Social Security Penalties

But an unusual Depression-age restriction penalized Social Security recipients who retired and worked beyond the age of 65. A few months ago, President Clinton finally signed a bill that repealed the Social Security earnings penalty. The new law passed both houses of Congress with virtually no opposition. It had previously been passed by the Republicans but had been opposed by the Democrats and vetoed by President Clinton.

The new law removes the Social Security retirement earnings limit, allowing hundreds of thousands of older Americans to work without losing any of their Social Security benefits. The new law means that seniors aged 65 to 69 will no longer lose $1 of Social Security benefits for every $3 they earn above the earnings limit, which is $17,000 per person for the year 2000.

The repeal, retroactive to January 1, 2000, directly affects 806,000 Social Security recipients who are working this year and another 100,000 who haven’t sought benefits because they have jobs. With the earnings test eliminated, these people could receive an average of $6,700 in additional Social Security benefits this year.

Because the repeal is retroactive to January 1, about 450,000 working seniors or dependents will get refunds for the money already deducted this year from their Social Security checks—a total of $1.4 billion, or an average of $3,500 per person. Removing this limit will cost approximately $24 billion over 10 years.

The National Center for Policy Analysis (NCPA) told The Hispanic Outlook that eliminating the earnings limit would increase the number of elderly workers with some wage income to 26 million from 19 million—a 38 percent rise. The average income of all elderly workers would go up by $103 billion. While the government would have to pay an extra $4.8 billion in Social Security benefits, it would also receive an additional $4.94 billion in income and Social Security taxes. For a net increase in federal revenue of $100 million.

Keep Working

If one is 65 or older and wishes to continue working, one can do so and can also postpone receiving Social Security benefits until one is 70. Later, when one begins receiving benefits, one will receive special credit for each full month in which one was eligible for, but did not receive, benefits—before one reached age 70. This credit will increase the amount of retirement benefit one will receive each year. The special credit could also increase the benefit amount one’s spouse would receive if one were to die. The amount of credit one could earn varies according to one’s year of birth.

The following chart shows the amount of the credit that would apply for each full year that one chose not to receive benefits. If one chose not to receive benefits for a part year, partial credit will be awarded.

<table>
<thead>
<tr>
<th>Year of Birth</th>

Those interested in earning these extra credits instead of receiving current benefits should call 1-800-772-1213 for more details.

Younger Faculty

What about younger faculty members? How can they earn what their future Social Security benefits might be? The government has established an Internet site for younger Americans who want an online estimate of future retirement benefits. The Internet site at www.ass.gov/estimates the amount of Social Security benefits that they expect in retirement.

The service offers three key benefit estimates that require increasing level of detail. The first, a quick calculator, requires only knowledge of a person’s and current-year earnings. The advanced application requires download software onto home computers and allows users to explore various retirement scenarios.

Dr. Mellander is a professor at George Mason University.
Hispanics "Holding Firm" at
Latinos at CSU-Stanislaus Nearly One-Quarter of Students and Growing

BY INÉS PINTO ALICEA

More than 30 years ago, two young Latinos formed a group called the Minority Student Alliance to combat the institutionalized racism that existed at California State University-Stanislaus.

"During the 1968-69 academic year, there were no courses in ethnic studies, no African American professors, only one Latino tenure-track professor, and just a handful of minority students at Stanislaus," said a publication about the development of CSU's Ethnic and Women's Studies Department. Several confrontations took place between the students and the administration. Eight Mexican Americans were hired the following year to join the faculty, administration, and staff.

"We've kept moving forward," said Richard Luevano, chair of the Ethnic and Women's Studies Department.

Today, the campus has a Latino student population of 23 percent, a Latino faculty population of eight percent, and an Ethnic Studies Department headed by one of the two young men who fought so valiantly to establish the department at the campus, to increase the recruitment of minority students and faculty, and to make the curriculum more inclusive.

Luevano said he never imagined that the campus would be where it is today and that he still has one major goal that he would like to achieve before he retires in two years—the development of an ethnic studies major. The department "was only a dream," says Luevano. "I've lived a dream to be able to start something, come back, and watch it grow.”

The department struggled on and off for years due to budget cuts and a student to faculty ratio of 17 to 1, the classes in Luevano's department have a 40 to 1 ratio.

"Our classes are large and well attended," said Luevano, who graduated in 1970 with a bachelor's degree in sociology and earned his master's degree in Chicano Studies at San José State University before returning to CSU to teach. He became chair of the department in the '92/93 school year.

"Because our classes are so large, the dean gave us extra money." The department has grown to where it now offers five Chicano, three Asian American, and three African American Studies classes.

"Thirty years after the Minority Student Alliance literally forced ethnic studies upon the University, ethnic studies has become an important component of the University's overall mission to appreciate and contribute to the enrichment of our diverse community and to develop a passion for lifelong learning," reads a departmental brochure.
Moreover, over the past ten years, the program has doubled the teaching faculty while more than tripling its enrollments, and it has formed a partnership with the University of the Pacific on an Ethnic Studies Minor.

The campus, located about 20 minutes from Modesto, has come a long way, in part because of Luevano’s students. Hispanic enrollment has tripled in the last decade. Latino students comprise 25.2 percent or 1,505 of the campus’s 6,489 students. There are 400 full-time and part-time instructors. Nearly 90 percent of full-time faculty members have attained the highest degree possible in their fields: Caucasians are 78.6 percent; Hispanics, 8.63 percent; Asians, 8.43 percent; African Americans, 2.81 percent; and Native Americans, 8.1 percent.

“The campus had made a decision to diversify,” said Dr. Marvalene Hughes, the University’s sixth president. “My values are known on the campus. The campus had accepted leadership. I came in and reinforced that, and that gave them the power and authority. Under my watch, I’m going to continue to be aggressive.”

CSU-Stanislaus was established in 1957 as the 15th campus of the 23-campus California State University. Under the California Master Plan for higher education, CSU is mandated to serve the top one-third of California’s high school graduates, to focus primarily on undergraduate instruction, and to prepare teachers.

The Stanislaus campus was moved to its current 220-acre location in Turlock in 1965 and received university status in 1965. The University offers 34 baccalaureate degrees, 17 master’s degrees, and ten credential programs. It serves an area of more than 10,000 square miles that encompasses three counties of the San Joaquin Valley and three counties of the central foothills. The University offers several degree programs at the multi-campus regional center in Stockton and transmits courses over three television channels to remote reception sites throughout the region. Average expenses for students—including housing, meals, transportation, books and University fees—total about $10,500.

CSU-Stanislaus is in a unique position among California institutions of higher education. While other campuses have seen minority enrollments drop because of anti-affirmative action measures passed in California, CSU-Stanislaus continues to expand its minority enrollment and improve its hiring of Latino faculty.

“We’re holding firm,” said Irma Guzman Wagner, dean of CSU-Stanislaus School of Education since 1995. Wagner has a broad background in education that includes early years as an elementary school teacher followed by a professorship in education administration at the University of LaVerne and at San José State, where she also spent four years as associate dean of the College of Education before joining CSU. Wagner said that her school is trying to boost the number of Latinos in elementary and secondary education through a variety of methods, including encouraging teaching paraprofessionals to pursue four-year degrees at the campus and offering classes in many locations and under flexible schedules to accommodate students with many different needs.

“This campus, like many CSU campuses, attracts many students who are the first to go to college,” Wagner said. “For Latino parents afraid of their bijos or bijas going away, we’re here. We’re accessible, affordable, and convenient.”

Latino Standouts on Campus

Hughes is credited with expanding the diversity efforts on the campus. She selected two of the Hispanics in leadership positions—Wagner, dean of the school of education, and Enrique Lopez-Conteras, chair of the modern languages department.

“I could give praises about all of these people,” said Hughes of the Latino faculty on campus.

Lopez-Conteras, a professor of Spanish and an expert on bilingual and multicultural issues, joined the campus in the fall of 1997. He said that one of the major projects he plans to undertake at the campus is the development and building of a state-of-the-art language laboratory.

“Those who speak other languages will be the leaders of the future,” he said.

At Simon Bolívar University in Venezuela for 25 years, Lopez-Conteras was president of the Coastal Campus for four years. A native of
Venezuela, he comes from a distinguished family that served in the public arena and sought to establish democracy and cultural understanding. His grandfather, Eleazar Lopez-Contreras, initiated a push toward democracy after succeeding a long run of dictators as democratically elected president of Venezuela from 1936-41. His father was named counsel general in San Francisco from 1957-67. Lopez-Contreras earned his master's from Virginia Tech and a doctorate at Simon Bolivar and has published several books on language and bilingual issues. He first went to CSU in 1989 on a sabbatical as a visiting lecturer of Spanish in the Department of Modern Languages, and since has initiated what has become a decade of ongoing cultural exchanges between Turlock instructors and others from the Coastal Campus. "He brought stability, focus, and creativity to that department," said Hughes. "He also brings leadership to the campus and the community."

Lopez-Contreras said that he has been very interested in diversity issues in the United States and on campus—which is vital to assure that campuses across the country have the role models in faculty and administration that Latinos need to help them succeed in college. "We need to emphasize to young Latinos that the biggest investment one makes in life is education," he said. "If we educate ourselves, we will be leaders."

Hobart Hamilton, of Mexican American descent, a professor of chemistry and chair of the chemistry department, has been teaching at CSU-Stanislaus for 32 years. His wife and two daughters graduated from the University, so the ties to the campus have been a family affair. Hamilton is the University's newly named Outstanding Professor, a designation made by his colleagues, and was recently named Turlock Educator of the Year. "I enjoy what I do, and I hope that it comes across," said Hamilton, who was one of the first Latino faculty on campus. "I am proud to be associated with the chemistry department and Cal State-Stanislaus. I try to turn people on to science. I don't want students to grow up fearful of science, particularly young girls."

Hamilton grew up in El Paso, Texas, and got his undergraduate degree from what is today known as the University of Texas El Paso. He pursued a master's degree at New Mexico State University and also completed his doctorate in chemistry there.

He said that he ended up at CSU-Stanislaus because he wanted to move west and because the campus seemed like a "place where you could have an impact."

Hamilton said that one of the challenges that lies ahead for him at the campus is developing a food science program, since the surrounding region is considered the breadbasket of the country.

Samuel Regalado, professor of history at CSU since 1987, has studied the role of Latinos in American professional baseball. Named a Smithsonian Faculty Fellow in 1994, he has also researched athletic activities of the Japanese-American Nisei generation and baseball competition during the World War II internment of Japanese American citizens. The author of many articles in both research areas, he also wrote a very well-received book, *Viva Baseball: Latin Major Leaguers and Their Special Hunger.*

"AS I have tried to do in Viva Baseball, we, as Latino scholars, are in a position to incorporate the Latino contributions into the American saga so that future generations will understand and appreciate our role in the history of this country," he said. "Latino history is highlighted through my scholarly work. This work is then incorporated into the lectures. Hence, most, if not all, of my U.S. history courses have a distinct multicultural take to them."

Beginning in 1871 and tracing the saga into the 1990s, *Viva Baseball* describes encounters with racial segregation, struggles with language barriers, experiences with acculturation, and the trauma of being isolated from families and environment. The significance of the Latino athletes' achievements is described within the context of America's racial and cultural history.

"Writing about Latin baseball players allowed me both to pursue a labor of love and to highlight the development of Hispanic society in the U.S.," said Regalado, an expert on Mexican American history, American ethnic and immigration history, Latin America and other international topics, as well as contemporary America.
Award Winning Broadcaster Full-time at Mt. San Antonio College
Trains Students for Realities of Radio Career

BY MIKE TAYLOR

After 20 years on the radio, Tammy Trujillo, new full-time radio broadcasting professor at Mt. San Antonio College, has been a familiar voice in Southern California. But now, to broadcasting students at Mt. SAC, she is an invaluable instructional resource on what life in radio broadcasting is really all about.

"I want my students to have a realistic view of the industry so they can make an intelligent decision on whether they want to become a part of it," said Trujillo, who currently is a news anchor for KFWB, Los Angeles, from 3 to 8 p.m.

Many students, she said, see only the glamour, fame, and riches of radio broadcasting. They think broadcasting, whether it’s radio or television, is easy. The reality, however, is quite different. "They think they’re going to come in after college and get a job, make a lot of money, and work four hours a day," she said. "What you see and hear on radio and TV is just the tip of the iceberg."

Instead, what they find is an industry that is competitive, operates at a hectic pace, and has long hours. There is a great deal of planning and coordination before any live on-air broadcast, and notions that the majority of broadcasting is spontaneous ad lib commentary, she said, prove unfounded. Everyone sees the anchors on television or hears the anchors on radio, but there is a lot of work behind the scenes, and there are a lot of people trying to break into the industry. "It’s an extremely competitive business," she said. Danger, too, can sometimes be a part of the job, she said, remembering when she covered the 1992 Los Angeles riots and was confronted by looters and shot at.

But at the same time, Trujillo acknowledges good aspects of the business with the not-so-good. She keeps her students encouraged about career choices that can be truly rewarding. And after 2 years in the business, she says, she knows. She has worked as a new anchor, producer, sportscaster, director, and reporter at a host of radio stations including KFWB, KNX, KFI, KMPC, and KEZY. She worked as a reporter for KTVL Channel 4, currently is the owner of Sportswatch Radio Network, and is doing Saturday/Sunday sports program for Arrow 93 FM.

Her radio career has also brought her recognition by her peers. Trujillo won four Golden Mic Awards at the Radio and TV News Association of Southern California’s awards banquet held January 22 at the Universal Hilton, Universal City. She won Golden Mics in the categories of best light feature reporting at best newscast 1999, and two team awards for coverage of the North Hollywood Jewish Community Center shooting last August. She received the award in best light feature for her Pet Project episode, "Dan the Singing Dog."

The Golden Mic in radio broadcasting is similar to the Grammy or Oscars. Recently she was a finalist for California’s Associated Press Television (Radio Association) best newscast award. And her talents and efforts have not gone unnoticed in the larger community.

Last November, Trujillo received the Los Angeles SPCA (Society for the Prevention of Cruelty to Animals) 1999 Outstanding Professional award for her work as a radio professional on behalf of the SPCA. Her Pet Proj...
broadcast, a regular feature on her program, deals with issues related to the organization's work. She also co-hosted the SPCA telephone in April 1999.

Yet with all she has done in broadcasting, her teaching career has been equally impressive. With a total of 15 years as an educator, she has taught for Los Angeles Broadcasters, Cal State-Northridge, Long Beach City College, Orange Coast College, and, for the last two years on a part-time basis, Mt. SAC.

So why after earning prominence in an industry in which the rewards are great would she take on the demands of a full-time teaching position? "This is an industry that needs to be taught by people in the field, but I teach because I really enjoy doing it," she said. "My thrill is when students get it and when the myths and fallacies are removed and it becomes real."

She remembers that when she was a broadcasting student at Long Beach City College and later at Cal State-Fullerton, many of those teaching broadcast had little or no experience working in the field. "What I was learning was strictly out of textbooks," said Trujillo, who went on to earn her associate's degree and bachelor's degree.

Still, she said, the hands-on experience that students gain by working at a school radio station or on an internship is invaluable to their education in the broadcasting field.

Tammy got her start at one of the smaller radio stations in Southern California, KWOW radio in Pomona, where she did news and sports and served as the Public Service Director. And once students land a job or an internship at a radio station, one of the things they learn—i.e., they work on the other side of a microphone—is to listen to themselves and to hear themselves as they really are.

"All your life—when you speak, you have been hearing yourself internally. But everyone else has had to listen to you externally," she said.

As a reporter-anchor-director-producer position has held, she also has extensive credits doing voice-overs for a variety of businesses and agencies, among them, Met-RX on national radio and television, GTE Main Street Interactive television, American Sports Network, and narration for such companies as Department of Transportation, Cal Trans, and the Yellow Pages.

While she imparts a lifetime of knowledge and experience to students, Trujillo, a resident of Glendale, also admits that she benefits from the interaction with students as well. "Teaching really helps me to appreciate the field after 20 years of being in it and helps me to see things that I might have taken for granted."

Another plus that she finds in teaching, particularly at a community college, is the caliber of students. One of them, Dawn Kattzin, recently accomplished as a newcomer something that even seasoned veterans in broadcasting seldom come close to. Kattzin herself received a Golden Mic Award at the Radio and TV News Association of Southern California's awards banquet in January. "People in their first year in the business don't usually win this award. It just doesn't happen," said Kattzin.

The award was for her work as an editor's assistant and for coordinating the live shots of KFWB's broadcast of the North Hollywood Jewish Community Center shooting last August. She won the Golden Mic as part of the team effort of reporters, writers, editors, and anchors in the category of Best Live News Coverage.

"It let me know that I have what it takes to do my job," said Kattzin.

Kattzin, a 28-year-old Pomona resident, began a year ago as an editor's assistant at KFWB, Los Angeles, while she was a first-year student at Mt. SAC, and while she has always had an interest in broadcasting, she didn't quite expect a Golden Mic.

This is something people go their whole careers wanting to win," said Kattzin of her student. "It's a heck of a launching pad for a career."

Kattzin, who still has a year to go at Mt. SAC, said that she eventually wants to become a broadcast copywriter, and with the current economy and her talent, that idea does not seem far-fetched.

Broadcasting, Trujillo says, is a vast industry with many specialties, and the job market today is booming. Needed are assistants, writers, on-air personalities and people with talent in areas such as traffic news and sports broadcasting.

"There are a lot of jobs in sports," she said. And since she knows these are some of the areas in demand, Trujillo wants to incorporate new classes into the radio broadcasting program at Mt. SAC—classes that cover specialized areas such as sports, interviewing techniques, traffic techniques, and on-air personality development.

As the teacher, Tammy wants her students to come out of either the certificate or associate's degree broadcasting programs with a solid understanding of what the industry demands. "We need to prepare our students to get out into the real world," she said.

As a professional, Trujillo knows the importance of ethics and responsibility in broadcasting. With the trend of "shock-jock" radio in recent years, the importance of responsibility is as timely as ever. Issues such as truth in broadcasting how broadcasting influences people, "clear and present danger" principles, and of course Federal Communication Commission (FCC) regulations, all apply.

"I try to make the impression upon students of the power they have when they go on the radio," she said. "Just because we can doesn't mean we should."

Yet while she has taught at several other colleges and has been courted by institutions such as USC (University of Southern California), Trujillo believes she has found a home at Mt. SAC. One big selling point for Mt. SAC, where she started full-time last fall semester, is the support that the college has given the radio program.

"At Mt. SAC, I found it remarkable that a community college has a commitment like this school has shown to its radio broadcasting program," she said.

Meanwhile, Tammy continues her busy schedule, somehow managing to teach full-time, anchor a daily program at KFWB, own a business, do nine features a week, and donate time for organizations such as the SPCA. But whether it's working in the broadcast field or teaching it, whether it's news or sports or students, Tammy Trujillo does it all as a labor of love.

"I have fun at what I do so the day doesn't seem as long as it actually is."
Goodbye, Columbus: A Taino Perspective

New Yorker Shares His Boricuan Heritage

BY

JEFF SIMMONS

Bobby Gonzalez settles into a chair in a study room at the American Museum of Natural History in midtown. A few people sit in a semi-circle before him; others are peering into the room and then disappearing outside.

"You never know how many people are going to come," he says, neither nervous nor uncomfortable. "I adjust what I say depending on the group."

Fifteen minutes later, when his session begins, there are about 20 people in the room—a good-sized crowd. Five others arrive late.

Gonzalez then begins his talk, as he has done so many times before, with a story about heritage and culture and with occasional light humor designed to warm the group. "I like to say the Taino people discovered Columbus," he says. For the next hour, he engages those before him—teenagers, parents, a couple of well-dressed men—in a talk about conflict resolution and about how the native Indians had mediated disputes with what these days would be branded "conflict-resolution techniques."

The soft-spoken Gonzalez is often captivating as he spins yarns about different tribes striking a peace treaty to prevent tumult. As the group filters out later, he is modest in his assessment. "It went well," he says. "Well, to him, means that everyone seemed to participate and to share their thoughts."

Gonzalez is often summoned to museums, libraries, and college campuses across the states—simply to tell stories. The recent visit to the museum on Manhattan's Upper West Side was orchestrated to stress the importance of maintaining peaceful relations. But more often, he delivers candid reflections on history from the Taino perspective.

Gonzalez, who lives in the borough of The Bronx in New York City, is of Taino heritage. Growing up, his parents taught him to respect his heritage, but it is through his own research and exploration that he learned so much about identity and about the Taino people.

Much of the history is in debt: While schools have often taught about Christopher Columbus' discovery of America in 1492, Gonzalez and other Taino experts strive to portray encounters as the beginning of 500 years of genocide initiated by Spanish colonists.

The Taino tribe of Puerto Rico was the indigenous group that explored Christopher Columbus encountered on Oct. 12, 1492, in the Western Hemisphere. They are indigenous to the Caribbean Islands, Puerto Rico, Curaçao, the Dominican Republic, Barbados, the Bahamas. Gonzalez maintains that 90 percent of Native Americans in Latin America, not United States.

Chief Peter Guánito Torres, a Taino elder, is the founder of the Jersey Taino band of Jatiboní, recently wrote an essay about the "story of the Taino holocaust of six million years." The Spaniards wrote, took the free Taino Indian people into bondage and raped the women.

The clash between the two cultures led to the decimation of Taino population, but not its ex...
tion. Columbus's 'discovery' eventually led to the Taino-Boricua homeland's being renamed Puerto Rico. But, he wrote, "We Taino Native Americans never stopped calling it Boricua.'"

He continued, "The Taino people are neither of Puerto Rican, Dominican, Jamaican, Cuban—not of the present Florida nationality. We are a separate Native American nationality that has existed for centuries among the Caribbean nations, subject to Spanish, English, and French domination."

The casting of American history to diminish the role and influence and even existence of the Taino greatly troubles Gonzalez.

"Christopher Columbus, for many Native Americans, was America's first serial killer," he says. "For some of us, we view him as a Hitler type of figure. He began the genocide that killed tens of millions of natives."

"European Americans and African Americans and Asian Americans are here to stay, and we have to learn to live together. But before we can live together, we have to look at history honestly, and that includes Columbus and the consequences of 1492."

When Gonzalez, who sports a ponytail and earring, steps into a room—be it a classroom, auditorium, or lecture hall—he wants to share more than stories. His resume brims him a writer, poet, American Indian storyteller, and Taino/Puerto Rican historian. He does not like to be called a lecturer; instead, he prefers storyteller.

He aims to raise awareness and hopes that listeners will inevitably question their education, possibly even study the Taino culture.

Jorge Estevez, a program participant at the National Museum of the American Indian, brought Gonzalez to the Museum last September to read some of his poems. "He's very much into research, so he knows what he's talking about," says Estevez. "He likes to share information, and I appreciate that."

"He's a natural storyteller. He is telling stories to everyone he meets," says Estevez, who is of Taino descent and from the Dominican Republic. "He's very inquisitive, very curious. He seems to know a little about everything, and he reads a lot, so when just about any topic comes up, he'll have something to say about it, and he'll surprise you with something you don't know."

He savorsCourt spirited discussion whenever he speaks. Consider the titles of some of his seminars: "Columbus Day: Reflection on the Tragic Consequences of 1492," "The Real Story behind Columbus," "Tales from the American Holocaust," and "Thanksgiving: A Bittersweet Holiday for Native Americans."

When he visited the University of Michigan in Flint last fall, close to 300 students, faculty, and staff members attended a session entitled "The Legacy of Columbus: 500 Years of Racism and Resistance." The audience remained hushed while Gonzalez spoke.

"People didn't expect to listen to an indigenous person with a strong New York accent," says Catherine Davids, the cultural and diversity specialist at the 6,500-student college. "That was the first misconception about indigenous people he blew out of the water."

Davids calls Gonzalez an "impeccable researcher" who "doesn't try to sugar coat to be polite."

"At first I thought people were quiet because they were interested, but then I realized they were sort of shocked. They had not heard these truths before—the fact that Columbus was not an invited vistor or a guest but a serial killer," Davids says. "One of our Mexican American community members stood up and said that for the first time in his life, he felt he could admit to being an indigenous person instead of Spanish."

Gonzalez, reflecting on that visit, says, "I like to impress upon people that we should look upon the past, but we have to look forward as well."

Gonzalez grew up in a traditional Taino household. Born in Manhattan, his parents shuttled him and his two brothers to the Bronx, where he spent his formative years. He credits his parents with instilling in him a deep appreciation of his heritage. They often recounted stories about their Indian ancestry.
Thanksgiving was a time, he says, to read and reflect, not to watch football on television. "They told us what happened in 1492, and the encounter with the Spaniards," says Gonzalez, "and they told me that many of our people, in order to survive, denied that they were Indian, and after several generations, many of our people forgot that they were Indian. That was a common experience throughout the Americas."

It was a different, often puzzling, experience in the classroom. Teachers, all of whom were white and none of whom were Native American, would portray Columbus in heroic terms. "I was very confused," he says, and eventually "very angry." Yet, he didn't challenge authority.

That is, until he attended Manhattan College in the Bronx, where Gonzalez says he met teachers of color and heard a variety of perspectives on history. A friend invited Gonzalez to a powwow, and there he met Native American Indians from North and South America. Their stories dazzled him—and triggered an awareness.

"Many people my family knew, friends, were Native Americans but did not have a consciousness of being so. They called themselves Mexican or Cuban or Bolivian, but they either weren't very conscious or possibly suppressed their Taino identities," he says.

Concerned more about future financial security, Gonzalez had attended college as a marketing major. That soon changed once he began to delve into his history and culture. "I realized how empty the history of the Taino people was. The pursuit of the so-called American dream had nothing to do with me," he says.

So he opted to discover himself and dropped out of college. He attended pow-wows as often as possible, traveled the country with Native Americans, took odd jobs to survive. His family didn't question his direction, and instead, was proudly supportive. "I began to see that the accumulation of money didn't mean happiness. I realized that it's a contradiction to be Indian and to be rich. In the old days, you didn't have wealthy Indian people because everyone shared. You didn't have homelessness, and you didn't have poverty, and no one starved."

Instead of listening to instructors in the classroom, Gonzalez it's an event saturated in traditional dance, arts and crafts, music, and food. In his sessions, he spins folktales that relate the value system of the Native Americans from North and South America.

"I want to dispel stereotypes of Native Americans," he says. "You may have seen Dances With Wolves or Last of the Mohicans, but you very rarely see films or books about natives of Latin America."

He doesn't target any specific group in his sessions. In fact, the visit to the Museum involved listeners both young and old. In any given week, he is meeting with a civic group, a collection of middle grade students, and even younger children. Recently, he spoke to kids aged 18 months old to four years.

"I used hand puppets and stuffed animals," he says. "When I speak to young students, I don't dwell on the genocide or the Holocaust of Native Americans. I focus on the positive aspects of the culture and the contributions of Native Americans."

He tells students not to believe everything they read, to conduct their own research, and to reach their own conclusions. That tact reflects heritage because the Taino perished everyone's beliefs and not try to convert anyone, he says.

"I know they are not aware of an indigenous level of the seeds that planted in their heads about our culture," he says. "I hope they remember a man telling them about Native Americans. They are a story, enjoying themselves, a good time, but they are also learning about the native peoples."

There are messages infused each program. The relation between Mother Earth and Taino. The spiritual beliefs at respect and peace, that violent counterproductive. That to words—1000 of them, such as hibiscus, canoe, tobacco, iguana barbecue—are common today are Taino foods such as pineapples, peanuts, and sweet potatoes.

The reactions to his words often are strong. Occasionally, he is heated exchanges as list of challenges his way of thinking. Gonzalez says he has never lost cool.

"Tell people to listen. The for me may not be the truth for We've had different cultural and historical experiences, and we respect that. I don't try to impose a perspective on anyone, and it's important that we listen to one another."

His calendar these days is b than ever. The visit to the Museum comes just before he returns to campus in Flint, Michigan, to meet with students. There are speaking engagements already this year, and he doesn't desire a return even a brief one.

"For me, it's an adventure," he says. "It's like reading a book on a beach, new never know what the next page contains. I never plan anything where the page takes me."
Located in Greenwich Village, New School University is one of the nation's leading institutions for education in the arts and social sciences, continuing education, and policy and urban studies. Recently the board of trustees completed two very important searches, one for chancellor and one for a new president. Both searches were successful.

First came the news last September that Phillip Scaturro, executive vice president and managing director of Allen and Company, a member of the New School board since 1989 and an officer for five years, had been named chancellor, a newly created position. Scaturro is also on the board of governors of Mannes College of Music, one of seven academic divisions of New School University. Mr. Scaturro's firm, Allen and Company, is an investment bank with a staff of 175.

Jonathan F. Fanton, president of New School University for years, stepped down to become president of the MacArthur Foundation in Chicago. Capping a year-long nationwide search came the news last February that Senator Robert Kerrey will soon become the University president. Kerrey was governor of his home state of Nebraska from 1983 to 1987 and is now in the final year of his second term as U.S. senator. A man whose vision, candor, and eagerness to tackle big challenges have earned him a national reputation, Kerrey was awarded the Congressional Medal of Honor in 1970 for valor in combat as a U.S. Navy SEAL in Vietnam. He will take office as the seventh president of New School University at the end of his current term, January 2001.

John L. Tishman, chair of the University's board of trustees, was very happy with the selections of Scaturro and Kerrey. "Philip Scaturro is dedicated to the mission and the values of our institution," remarks Tishman. "His broad experience during a distinguished career as a managing director at Allen and Company will provide a valuable complement to the senior management team at the University." As to Kerrey's imminent presidency, Tishman says, "The board of trustees is delighted that our university has attracted a person of such high caliber as Senator Kerrey, whose values, dedication to education, energy level, and passion for gathering the best minds to solve problems will now be at the service of our institution. Bob's record in public life advocating universal health care for all Americans, Medicare reform, and the reform of the national entitlement system and the IRS are well known. Less well known is his record on education. While governor of Nebraska and then as a U.S. senator, he has consistently championed education at all levels. We are confident that the University will be in good hands with Bob as our teacher and leader."
States senator, he worked tirelessly to transform Nebraska's schools into leaders in American education. He was well ahead of most educators in seeing the potential benefits of new technology in all levels of education. A national innovator, Bob organized partnerships between state and private institutions to launch a Web-based distance learning curriculum to benefit students across Nebraska."

New Chancellor Scururro adds, "New School University is poised to offer even greater service to our nation and to freedom in the pursuit of knowledge, and Bob Kerrey will lead us there. Among the many constants in Bob's life story, one in particular stands out for me: his ability to inspire those with whom he works." Senator Kerrey responds, "I am excited to begin my association with New School University, I love education. I recognize that education is the basis of our prosperity and our ability to govern ourselves, and I recognize that educators, more than anyone else, are the true shapers of the future. But what appeals to me about the New School is its dedication to freedom: freedom in the consideration of ideas, freedom in developing and imparting new knowledge, and protection for those whose freedom is threatened. Freedom is the most highly prized quality of life on the Great Plains from which I come, and it is no accident that the New School was founded by a Nebraskan, Alvin Johnson. I am deeply impressed by the excellence I find at this institution, and I look forward to nurturing it and extending its benefits to many more people."

New School University was founded as The New School in 1919 by some of the period's most influential thinkers, including philosopher

Honor Roll Facts in Brief

INSTITUTION
New School University

LOCATION
66 West 12th Street
New York, NY 10011
(212) 229-5600

ESTABLISHED
1919

ENROLLMENT
7,000 degree students, 20,000 continuing education students
24 percent students of color; 1,648 international students

DEGREE OFFERINGS
Bachelor's
Master's
Doctorate

TUITION AND FEES
$9,810 tuition per semester at Eugene Lang College

FACULTY
162 full-time and 1,175 part-time

SEVERAL DEGREE PROGRAMS
Architecture
Business Administration
Fashion Design
Jazz and Contemporary Music
Public and Urban Policy

continuing education programs. Located in rented brownstones at 436 West 23rd Street, the school opened with 200 students attending the first lectures and seminars. In addition to the founders, the faculty included Harold Laski and Ordeway Tead. Soon Lewis Mumford, Franz Boas, Harry Elmer Barnes, John Maynard Keynes, Bertrand Russell, and W E B DuBois were among the notable teaching courses or delivering lectures there. Alvin Johnson was named director of the New School in 1921. As an economist, New Republic assistant editor, and associate editor of the Encyclopedia of the Social Sciences, he provided the vision and leadership that over the next 25 years brought the New School distinction as a pioneering center of adult education. Under his directorship and presidency, he helped extend the school's programs beyond the social sciences and public policy into the humanities and the arts.

In 1930, the New School built a new home in Greenwich Village when Alvin Johnson persuaded student Daniel Cranford Smith, a retired businessman, to donate land on W13th Street as the site for a new building. Smith agreed, with the proviso that the school would provide him with a penthouse in the new structure and free courses for the rest of his life. The New School established the University-in-Exile in 1933 (conceived by Alvin Johnson and supported by philanthropist Hiram Halle of the Rockefeller Foundation) and became a center for scholars who were dismissed from their teaching positions in Europe. These intellectuals transformed social and political thought in postwar America and provided the foundation for New School University's Graduate Faculty of Political and Social Science.

New School University has more than 150 full-time and 1,050 part-time faculty members teaching 7,000 students in baccalaureate and graduate degree programs offered by seven academic divisions—the New School (established in 1909), Graduate Faculty of Political and Social Science (1934), Parsons School of Design (1970), Eugene Lang College (1985), Mannes College of Music (1989), Actors Studio Dramatic School (1995), and the Robert J. Milano Graduate School of Management and Urban Policy (1975). Additional programs include the Jazz and Contemporary Music Program, The Joffrey Ballet/New School University B.F.A. Program in Dance, and the DIAL CyberSpace Campus.

Another 20,000 adults pursue continuing education courses each semester at The New School. Parsons School of Design and Mannes College of Music. Students of color make up 24 percent of the enrollment, and international students number 1,648. There are 5,000 degree and certificate-holding alumni throughout the U.S. and around the world. New School University owns or leases 1 million square feet primarily in Greenwich Village. The University has an annual budget of $155 million and an endowment of more than $86 million.

New School University has grown in other ways as well. A divers initiative underscores its commitment to be "the most diverse private university of excellence in the country." According to Chancer Scaturro, "The diversity initiative adopted by the New School in 1990 was intended to be a long-term effort, and it born significant fruit. In the past years, the number of U.S. student color has increased 90 percent, from percent of the student body to 24 cent. The University Scholars program which provides supplemental finans to close the gap for studen color, has been a vital instrument for promoting diversity, all the way to admission and the first semester to graduation."

The University Commission on Diversity works to encourage and with all aspects of the University's withm to creating a diverse and plistic environment. Student represents is important to the work of Committee Co-curricular programs supports multiculturalism in the curm. There is a "bridge advisor" serves to "connect" students of color to the resources both at the New Schoo in the greater New York City community to meet their individual needs. Univ Scholar awards are available to talk Hispanic, African American, and Asian American students in all the demic divisions, to help close the gap between educational costs other forms of financial aid. Diamond Graduate Fellowships Hispanic and African American students with exceptional academic records for pursuing master's and doctoral degrees at the Grad Faculty of Political and Social Science.

Langueros evolved in the 1992/1993 academic year out of a for increased diversity at Lang College. Its main focus is to create pathway and voice for the empowerment of the Hispanic and population at New School University. This includes the building atmosphere where members will feel free to celebrate their culture through creating events that will further the awareness of History. In April, this included the presentation of Latinos Aloud annual celebration showcasing the creativity and talent of student dance, music, poetry, acting, and fine art. It was a cross-cultural experience exploring Latin American, Afro-Caribbean, Afri American, Asian Pacific, and Latino perspectives.

The Hispanic Outlook heartily welcomes New School Univ to The Honor Roll.
The Passionate, Prolific Professor

Magdalena Maiz-Peña

BY

BILL GUIDZ

Magdalena Maiz-Peña receives congratulations from student Tasha High on winning the College's ODK Teaching Award.

Because the world around us is the laboratory for humanities studies, Magdalena Maiz-Peña enacts “service learning” as her classroom pedagogy. This associate professor in the Spanish department at Davidson College has spent her career “crossing borders” through service—and leading others to do likewise. An optimist to all she touches, her belief is that border crossing fosters her hopes for better human understanding. Her vita reads holistically, and grows longer at an ambitious rate. And she asks students, too, to become involved in the local Hispanic community to gain a more thorough understanding of the language and culture they study.

Mecklenburg County, N.C., site of the College since its founding in 1837, has become much more fertile ground for Hispanic studies in the past decade as thousands of Spanish-speaking immigrants have flooded into the area to participate in its boom-town economy. Maiz-Peña’s students now tutor Hispanic school children and translate for Hispanic patients in a local health clinic. One is writing a thesis on the semiotic meaning of a new Latino food market, and another is writing a thesis on the importance of correct translation in emergency rooms and hospitals. “They come to know this community of people, and the classroom experience is extended into an emotional, personal, existential experience,” she said.

Her approach has flourished part because of her enormous popularity among students. She is vigorous in the extreme, and can contain her enthusiasm for subject or her need to share and learning with others. Students find comfort in the gaze of large brown eyes as she accepts their confidences, or find a mate as they sparkle in an explosion of joy or intellectual discourse.

She received Davidson's Theta Jefferson Teaching Award in 1995: "a magnificent teacher and pro scholar who is admired by..."
The current president of the student body, Dane Erickson, commented that Magdalena is so effective in the classroom because she "spreads love." He said, "She is a fabulous Spanish teacher and brings in so much more about culture and people. But it's because she cares so deeply about her students' well-being that I leave her class every time feeling glad to be alive."

Another student praised her connections in the surrounding Hispanic community. "She's always trying to help students get involved in the community," said senior Anna Judy. "The focus of a Spanish major isn't the everyday life of Hispanics, so she's always pushing service learning. It's her mission to make students aware of marginalized people. She talks about los marginados a lot in class, and tries to make students aware of that."

It is obvious that fire burns brightly in her, affording her little sleep and driving her involvement in an impressive list of service projects, scholarly endeavors, and professional activities. She is faculty advisor for the Organization of Latin American Students, dines regularly at the Spanish table at the college commons, and volunteers teaching Spanish to third and fifth graders each week at the local elementary school. She has been very active on the board of the local Centro de Recursos Hispanicos, and chaired the merit scholarship program of the Latin American Women's Association.

During her tenure in 1997 as president of the state chapter of the Association of Teachers of Spanish and Portuguese, she received the group's national award for highest membership recruitment.

Her 10-year involvement with the Asociación de Literatura Femenina Hispanica is now culminating in service as president for 1998-2000. She and her husband, Luis, hosted the 1994 annual meeting of the association at Davidson and co-organized its most recent meeting in Queretaro, Mexico.

Her scholarly interests focus on Hispanic women's literature and frequently involve joint research and writing with Luis. She has published two books on autobiographical works. One centers on the discourse of the Mexican nation, and the other, which she edited with Luis, concerns Latin American women. She has also written scores of articles and papers for journals and conferences.

She insists that all her activities focus on crossing borders, an interest she traces back to her childhood in Monterrey, Mexico. She grew up in a bilingual household where her mother made her acutely aware of the importance of insights into another culture. Her mother, Antonia Garcia de Maiz, grew up in Texas and made sure that Magdalena and her 11 siblings spoke English as well as Spanish. "I always had this ingrained curiosity about crossing borders," she said.

Magdalena enjoyed a carefree childhood until age 11, when her mother's death occurred as a sobering lesson in the precious nature of life. But her mother and her father had made sure that their children took education seriously and had provided opportunities for learning outside the classroom. Magdalena lived in Dublin, Ireland, at age 16, and then spent another year abroad in Paris. During those years she realized how broad a world she inhabited—and how profoundly she wanted to be a teacher.

The classroom has become for her not a temporary gathering of teacher and students thrust together of necessity like shoppers and merchant, but a magical, unique space of mutual intellectual adventure—a place where many borders are crossed. She explained, "In my literature class last semester, the final book we discussed was The House on Mango Street by the Chicana writer Sandra Cisneros. I won’t ever forget the way we were swept into the barrios and heard the voices of the female characters there. We were able to understand not only the borders between us but the way in which literature allows us to erase those borders and enjoy a personal experience in another world. My students raised fascinating questions about a world that was so foreign to them at the beginning of the semester, questions that will stick with them way beyond their years on this campus."

She and Luis were married in Monterrey and immigrated to America when Luis received a scholarship to pursue his Ph.D. at Arizona State University. At the
time, she was 29 and hadn't finished her bachelor's degree at the University of Monterrey. Times were financially tight for the young couple. To try to save enough money for Magdalena to continue her education, they lived on a budget of $20 per week. Their frugality paid off, and she eventually was able to enroll at Arizona State. She completed her bachelor's degree and a master's, then received a full scholarship for a year's work toward her Ph.D. It allowed her to remain in Tempe to finish her coursework and prepare a doctoral proposal while Luis moved to Atlanta to take a temporary teaching position at Agnes Scott College. Magdalena joined him a year later and worked part-time in the college library. Then the couple pulled up stakes again when Luis accepted another job at the University of Minnesota. Magdalena took a secretarial job in the composition department, which turned into a fantastic opportunity to become acquainted with professors involved in women's studies. She joked, "I was a failure as a secretary, but I learned a tremendous amount about the academic system, combining disciplines, and different theoretical perspectives."

Luis accepted a job at Davidson in 1988. Magdalena was working on her dissertation and initially taught Spanish in a local elementary school system. Within a year, she got a job as an adjunct professor at Davidson College to teach language classes, and after completing her dissertation in 1992, she was offered a tenure-track position.

Her academic interests embrace the issue of gender, of how Hispanic culture is reflected in the literature of Hispanic women writers. At a reunion 10 years ago at Arizona State University, she learned about the Asociación de Literatura Femenina Hispánica from a former professor, Teresa Valdivieso, who had helped found it in 1974. Her embrace of its mission and participants led members to elect her to its presidency.

Her major initiative has been a commitment to help the association become truly bicultural by organizing its first-ever convention outside the United States. She co-organized its meeting last September in Santiago de Querétaro, Mexico, which attracted 280 participants from Mexico, the U.S., Argentina, Spain, Uruguay, Australia, El Salvador, and several other countries.

A highlight of the meeting was the Saturday evening celebration at the Teatro de la Ciudad de Querétaro in honor of writer Elena Poniatowska. The undersecretary of cultural affairs of Querétaro paid tribute to this distinguished Latin American author of more than 18 novels and nonfiction prose, who is also rumored to be a Nobel Prize contender. Her fictional biography, Tita Modotti, was a fascinating political, cultural, and gender-related account of its heroine's life. "It was a true multicultural dialogue," Magdalena ventured. "We're now continuing the exchange across borders via the Internet, and with our next annual conference scheduled for Toronto, we'll cross another border then."

Magdalena revels in works by many authors who speak for the trials of women and the underclass in Latin American society. Luisa Valenzuela strips bare the excesses of the Argentinian dictatorship. Poet Marjorie Agosín can write about the wonders of everyday life or the cruel realities of human rights violations. The young Chilean writer Andrea Mansur creates and woven skillful short stories about contemporary cultural issues. Elena Garro's fundamental novel about the Mexican revolution, Remembrance of Things Past, stands as an extremely innovative work of its time. Another trailblazer was Rosario Castellanos, whose work in the 1950s broke the silence about the social condition of women in Mexico. Mexican painter Frida Kahlo also revealed so much about the pain of womanhood in her autobiographical images created during the first half of this century.

Magdalena has written about many of these women to try to raise awareness of their skill among a wider audience. Her latest effort is a paper on Uruguay's Delmira Agustini, an icon of Latin American literature whose own life story became more important than her poetry because of its challenges to the contemporary ideology. "It is important to study some of these women who were writing in a very daring way ahead of their times," she said. "Agustini was killed by her husband, but the newspaper accounts of the incident focused on the revolutionary nature of her writing, as if she was the criminal rather than her husband. The culture of the time creates for her a different place in history because of her gender."

It is critical to study these women in the context of their times, Magdalena says. "In that way, their literature becomes a social text that raises many questions and implications. You study literature as a tool for reflecting, analyzing, and understanding women in the context of their society. You learn so much more this way. I have come to realize that gender isn't an isolated element, either. To understand the place of women in a society, you also must look at other components of their lives, such as religion, class, and ethnicity."

So the study of Hispanic women's literature has been a focus of an attempt to understand her life, and to explore with others their understanding as well. "I love the flow through the generations," she said, drifting back to memories of her mother. "I think of her as one of 13 brothers and sisters. I love to see myself as a continuation of her. I love to think of my Paula, my little one, building her ambitions and dreams. What I want most to reflect upon is being a product of others, just a little stone in the path, a learner in process."
All Latin Music—
Pop to Jazz to Classical—Getting Attention

Butler, Tufts, and Passaic CCC Heeding the Call

BY ADRIANA MEUCCI

It has landed: the Latin Pop music explosion. Artists such as Enrique Iglesias, Ricky Martin, and Jennifer Lopez top the music charts, while other Latino artists are rising in the ranks, many debutting crossover albums. These artists combine the traditional sounds of Latin music with American pop. Critics, however, say that the popularity of the Latin sound is just a fad. Others believe it is here to stay. Latin music has always been around, but now it is being embraced.

All cultures have elements expressed in such things as food, dance, and music. And many of the Latino pop singers point to early influences of cultural traditions as a major influence on their music. Singer Jennifer Lopez, who mixes Latin sounds with hip-hop music, points to her cultural heritage as the guide to her style. She recalls being exposed to the sounds of merengue and salsas during holiday celebrations with her family. In a recent television interview, Lopez said that she was heavily influenced by hip-hop music while growing up in the Bronx, but it is the Latin traditions and heritage instilled within her soul that continue to influence her sound.

Singer Ricky Martin, who dominated the Latino/ Spanish charts before bringing his stimulating sound to the U.S. and other countries, shares this sentiment. Martin, who was born in San Juan, Puerto Rico, in 1971, first began his career as a member of a famous Latin group called Menudo. But Martin, who is currently a solo artist, has managed to sell more than 25 million albums before the age of 26, making him the biggest selling Latino artist in America. The singer's early smash hits include songs such as "Maria" and "Livin la Vida Loca."

In a recent interview, Martin said that although he has made a crossover album, he will never stop singing in Spanish because he must stay close to his roots. This, he says, is his "medicine." Martin, who calls Latin music "soul music," believes that no matter where you are from or what language you speak, it is very easy to catch the rhythms of his music.

Latin sounds have always influenced music and dance. But the recent explosion has piqued curiosity, especially among teenage and college age students. So how are colleges and universities reacting and adapting to this craze? What kinds of curriculum changes and new programs are being offered as a response to the Latin Music phenomenon or other types of cultural music?

Bruce Bennet, assistant professor and director of the music program at Passaic County Community College in New Jersey, says that, generally speaking, college and university music programs have been slow to recognize cultures and music outside of the traditional European classical styles. However, Bennet, a writer and performer who holds a master's degree from the New England Conservatory of Music, is enthusiastic about the current Latin wave of sound and points out that it is not so new.

"I think that Latin music has and will always be an important part of music in the United States," says Bennet. "Ricky Martin and Santana are not new to music. They've been working for a long time. Also, Latin rhythms are not new to American music. Latin music has been an influence on American jazz and pop for decades. This overnight acceptance of Latin pop music is simply the industry's reaction to Martin's performance at last year's Grammy Awards. He blew
everyone’s mind with his brilliant performance and the record execs saw dollar signs. And all of the other artists, like Anthony, spent money on the latest trend.

At Butler University, Nuestra Musica is a bilingual Latin music video program broadcast on the school’s WTIU-TV. The show is the only weekly Latin music video program in central Indiana, and it features the latest video and concerts encompassing sounds such as salsa, merengue, Mexican, and international music with a Hispanic flavor.

Dominguez, who produces the program and also teaches telecommunications at the university, is especially proud of his students’ involvement in the program.

“They direct, shoot, run audio, run TVRs, edit, etc...” he says. “They are the heart of the show, and they understand another culture and another way of living. It’s like they can live in another country without leaving their homes.”

Performances by Tito Puente, whose unexpected death in June was a blow to the music industry, and Poncho Sanchez were recently taped and aired by the students on the University’s campus. And students also taped live Fiesta Indianapolis, which draws crowds to celebrate Hispanic Heritage Month.

Dominguez likes to remind his students about the influence of music on television shows because it creates a mood and prepares you for a response. “Music is the international language,” he says. “Music is love and sadness and happiness. Music is everything you want it to be. In my classes, I love to tell that to my students.”

Dominguez’s passion has certainly caught the attention of the community. The show, which is aired by six different cable companies, receives phone calls every day, and people frequently stop Dominguez and his crew on the streets asking if they are from Nuestra Musica. In fact, the governor of Indiana declared Feb. 14 as “Nuestra Musica Day.”

At Passaic County Community College, Bennett is busy shifting the college music program from one that focused upon a traditional and classical music curriculum to a program that reflects the students’ feelings and aspirations.

“It is my responsibility, as a musician and an educator, to provide an environment that will give students opportunities to create, perform, and listen to music that is relevant to their lives.” This includes Latin music, as well as reggae, traditions of many different music styles. Then he teaches as his students faces light up especially when they hear the music representative of their culture and experiences.

Besides giving students an appreciation of different cultural styles of music, many college today offer degrees in music ranging from commercial music performance to music therapy to technology and recording. Bennett says that colleges are training ground for the musicians today, as compared to bygone days when musicians learned alongside the masters during jam sessions or through frequent exposure to their performances. Now the masters are in class rooms teaching the next generation of musicians.

But do any of the current trends have a real effect on the teaching and learning of music Bennett is not sure. “Generally, music programs stress traditional European classical music explains Bennett. “American styles, like jazz and rock, are slowly finding a place in curriculums but academics, especially music programs, do not welcome change easily. You see, there is a whole generation of traditional classical music teachers who are resistant to change.”

Bennett points out that even jazz, “American own music,” has been slow in gaining acceptance into curriculums. But, he says, with the help of schools such as Berklee College Music, The New England Conservatory, and others, nontraditional music programs are rising numbers. “Now, at the beginning of the 21st century, students have many choices...”

Pamela Vera, a classical pianist and orchestra conductor, and music teacher, shares Bennett’s sentiments about the concentration on European classical composers in music curricula. Vera points out that few people realize that many of the Latin American composers in classical music, and tend to think of salsa, merengue, a popular dance music. Vera is hopeful that as Latin American music increases, especially in the arts. Latin American composers will gain recognition.

Although Latin American music existed both sacred and secular music in the colon period, says Vera. “It is only in the 20th century that our music has been recognized at the national level, and academically explored.”

“Without losing these roots, Latin American music is following the road of European clas-
This also includes courses about "music culture."

Gabriela Gomes De Cruz, assistant professor of music at the University, says, "I believe the common tenet linking these courses is a methodological belief that music—be it composition, performance, or listening—is a cultural phenomenon that is meaningful only when considered within the specific social, ideological, political, medical, etc. contexts from which it arises. Put bluntly, there is no music without culture—or, all music is cultural. I also believe that the broad spectrum of courses offered in our music department and their cultural focus does reflect recent trends in musical education and scholarship."

Gomes De Cruz says that the class on Music of Spain, Portugal and Latin America focuses on the historical and anthropological perspectives of music cultures in Latin America. The course traces the history of colonial pressures and traditions of resistance that helped shape musical thinking and musical practices throughout the colonial and post-colonial New World. This includes the role of music in the 16th-century mass conversion to Catholicism, as well as the significance of music and political propaganda in Mexico and Spain.

Despite being trained in the traditional approach to music, academicians such as Gomes De Cruz recognize that courses and curricula do have to change to remain relevant and inclusive.

"In my opinion, the Latin pop music explosion is fundamentally a U.S. phenomenon..." she says. I am sorry to say that so far our course at Tufts has not featured this topic, but I consider it a worthy subject of reflection and have been thinking about including it in a future syllabus."

---

**VICE PRESIDENT**

**FOR STUDENT AFFAIRS**

**UNIVERSITY OF MARYLAND**

**COLLEGE PARK**

The University of Maryland, College Park invites applications and nominations for the position of Vice President for Student Affairs.

The University is a major research institution and the flagship of a statewide system of higher education in Maryland, offering a comprehensive undergraduate and graduate program organized in 13 colleges and schools. The University is a Research 1 Institution enrolling approximately 25,000 undergraduates and 8,000 graduate students annually. The campus is located inside the Washington, D.C. beltway, and 30 miles from Baltimore, Maryland, on 1,500 rolling acres in a suburban environment. For more information about the University of Maryland and the Division of Student Affairs, please consult the Web site at www.maryland.edu.

The Vice President for Student Affairs provides vision, leadership, and strategic direction to the Division of Student Affairs, which includes a wide array of departments responsible for services that promote the well-being of students. These include: Residential Life, Dining Services, Commuter Affairs and Community Service, Student Conduct, Union and Campus Programs, Health Services, Counseling Center, Career Services, Judicial Programs, and Student Life.

The Vice President is also responsible for collaborating closely with colleagues in Academic Affairs, Administrative Affairs, and University Relations. The Vice President is expected to develop a strong student affairs team, be a committed student advocate, exercise a visible presence in the resolution of conflicts, and maintain connections to the University's many constituencies.

The Vice President is responsible for a staff of 750 employees and a budget of about $100 million. The Vice President reports to the President and serves a member of the President's Cabinet and the campus leadership team.

Requirements for the position include at least a master's degree in a relevant discipline (doctorate preferred), evidence of successful administrative achievement, and a member of a leadership team, preferably at a large research university; commitment to the education, development, and empowerment of all students; and a record of fostering academic excellence and achieving diversity goals. Candidates must demonstrate an understanding of current student issues, the broader network of family and social frameworks in which students develop, the legal issues affecting students, and the management of student affairs programs.

Salary will be commensurate with qualifications and experience. Women and minority applicants are especially encouraged to apply. Review of applications and nominations will begin on September 15, 2000 and will continue until the position is filled.

Nominations and applications, including a letter, a curriculum vitae, and a list of four professional references, including the name, address, and telephone number, should be addressed to:

VIVA JAPON: Impressions of a Gaijin

Hispanic Professor Teaches ESL

BY REGINALDO CORNEJO

The thermometer reads a pleasant 88 degrees, but the humidity, which is around 80 percent, makes it feel more like a Roman steam bath than a center court in the Japanese city of Shinjuku, a suburb of Tokyo. I’ve been in this heat for a little over an hour, waiting for a meeting that just won’t start. The humidity is doing strange things to my hair, making it curl up around my collar and to my mind, slowing my thoughts to the point where I fail to see the beauty of Shinjuku’s high tower district.

“Make a note,” I tell myself. So I pick up one of the two notebooks I have decided to carry with me while I am in the Land of the Rising Sun, and I start to write. I’ve been in Japan for about a month, and every person, place, building, train, object, and food dish still catches my attention. I’m not your typical alien white-collar worker, or Gaijin, in Japan. As a matter a fact, I am not your typical English instructor in this country.

“Explain it to them,” my little voice urges me. But all I can think of are the quick notes I’m writing in my notebook, and this full slice of life I’m enjoying that would be fit for a king.

I’m enjoying the flavors of Disneyland, the Mad Hatter’s tea party, and Pixiots of San Francisco all at once. I look up and find that I’m still sitting in front of the Century Southern Tower Hotel located in the Keio Plaza. I’m facing or looking at a fancy bar/restauran called Hiroshima. From what I can see, the customers are not couples but businessmen who drink beer after beer and act as though they are eating a light dinner. You could say they are testing the amount of alcohol their livers will process before they drink themselves into a funk (did I say that?). I know this drinking ritual happens every day because I see these hard-working Japanese men going home day after day drunk as well (as we say it America), skunks.

Although these businessmen...
have captured my attention, I should admit that the small group of couples and young ladies also amazes me. They seem (or appear) to be social butterflies. To paraphrase one of my favorite writers/authors: "They come and go like moths in the night, who are drawn to the light." One can only wonder how many hours of work these people have put in, why they are still up at 9:30 p.m., and where they are going in the dark of the night. Before I move on, I should add that most Japanese employees work from 9 A.M. to 9 or 10 P.M. at night. With the sounds of trains and cars coming and going, the people continue to parade for my pleasure. They are unaware they are being documented and frozen in time for my personal pleasure in these notes.

Ah yes, the Japanese people. So stressed, so caught up in the act of adopting Western ways—yea, scared to death that a Gaijin (foreigner) will come near them, look at them, or, worse yet, talk to them in English. Although most Japanese citizens can read and write in simple English, they have few skills in speaking English, which is the reason I am in Japan.

As a native English-speaking teacher, I am a prized English Instructor. My job is not only to teach ESL/ESL English but to make myself available to the students for "free talk" during the time I'm on my employer's college campus. I never speak Japanese to my students (not my job). But this rule of my contract does not apply to people I meet after work.

At the Cafeteria
It's a Friday afternoon, and I am sitting at Shibaura Institute of Technology's cafeteria. Friday is a good day to eat at our school's cafeteria because it serves a good dinner for under ¥1000 (yen) or $10 (warning: if you come to Japan to teach, things are very expensive). I've lost 17 pounds, if not 20. I am probably going to go home a little lighter than I arrived. Japanese food seems to have that effect on most foreigners—I do not know why. "Get back to the people of Japan and teaching English," my voice tells me. I have never seen a people so scared and/or shy of foreigners, but at the same time (in my opinion), so in a hurry to lose, destroy, and forget their heritage—because they want to adopt Western ways to become a World Power. The Japanese public seems bent on doing everything it can to look and act Western. This quest can be seen in the changes being made to the culture, morals, clothes, physical appearances, television ads (Kevin Costner and Meg Ryan are hot in Japan) and the ken and Barbie-type teachers that many Japanese K-12 schools, colleges, universities, and corporations hire to teach English in Japan.

To paint a clearer picture of this trend, all I have to do is look across Shibaura's campus and describe the majority of my students. My college students dye their hair blond and use sunless tanning products to get fake tans. The young women (especially the high school girls) use blue eye shadow and purple lipstick in an attempt to look like Barbie for the young men who try to look like Ken, or pass for a reasonable facsimile of a Caucasian. These students are dead set on looking white to the best of their abilities (the richer ones even wear blue contact lenses), which makes no sense to me. Because, as a man of color with Hispanic and Native American Indian roots, I know that for the past 400 years, Native Americans and Hispanics have been fighting to keep their cultural heritage alive in America, the melting pot of the world.

Traditions Eroding
Before this trip, when I thought of Japan, I thought of three-generation families in which children, parents, and grandparents live together. I thought of traditional Japanese homes with floors lined with woven mats called tatami, and acres of rice fields. I also thought of a country and people who believe education is very important, that students should be seen and not heard, and that bowing is essential.

But tradition isn't selling well in Japan anymore. I observed that most families in Japan have only one or two children in their households and that extended family households are not so common. Traditional housing has given way to apartment blocks or "danchi." These high-rise apartment complexes have polished wooden floors, carpeting, and modern restroom facilities. My apartment has 29 floors and looks like any apartment complex in the United States.

But the biggest change in Japan appears to be coming from the young people. Looking at some of Japan's junior high, high school, and college students, you would think they grew up in one of America's ghettos. That is, they have
little respect for authority, don't want an education, and dress in whatever fashion statement they want to make. On school days, you can find junior high- and high school-age students out shopping in the big cities or hanging around train stations with friends at 11 or 12 p.m. at night. Some high school students and college students don't even go home. They play all night and ditch school the next day.

Before I continue, I should add that many of the students just described are exceptions to the rule. Not all of Japan's students are going crazy with their new-found freedom. For every free-spirited student who is fighting the system, there are at least 10 or 15 (my observation) who are growing up with respect and honor for their country's traditions. I was lucky enough to meet and teach both types at Shibaura University.

The Teaching Experience
So what was it like to teach Japanese students in Japan? Well, after overcoming resistance from some students who had a problem learning English from an American who did not look like anyone on Beverly Hills 90210. I can honestly say it was rewarding and the time of my life. My students turned out to be hard workers who were not only interested in learning English from me but also interested in learning about my Native American and Hispanic cultures.

As a multicultural person, teaching my students that America isn't the land of Ken and Barbie turned out to be the best part of my job. With each lesson, my students not only learned English but

Caucasian. Through me, they learned that America was more than McDonald's, blond-haired and women, stock markets, Che Blazer, and hot apple pie.

During my tenure at Shibaura University, my students learned about Cin de Mayo, pow wows, empanadas, Indian fry bread, and what its li to live in the U.S. as a man of color. They even learned a little about Mexican and Native American traditions, or tall tales, if you like. The talks included discussions about the Native American Church, shaq shifting, Christmas, Christ and Hispanic languages (Yo soy tu amigo/I'm your friend), and Apache (Tah in-hoc/ I am a friend). I felt it an honor to teach these students about the other cultures in America.

I would like to give some advice to anyone who is considering teaching English in Japan. The adventure is not for the faint-hearted. Be ready for a life-changing experience. My employers recommended that I read Culture Shock by Rex Shelly (1996) or A Japanese Mirror by Ian Buruma (1975). These books will help prepare you for experience of a lifetime.

Teaching my students that America isn't the land of Ken and Barbie turned out to be the best part of my job.

Professor Cornejo

learned about America's other citizens. Each day, after their English lesson, they would ask me questions about Native American or Hispanic traditions. My best reward was watching them drop their resistance to being taught English by a non-
Texas-San Antonio to Study Gang-Affiliated Drug Use

The University of Texas-San Antonio received a $1,491,377 grant from the Department of Health and Human Services Public Health Service to address drug treatment for at-risk, gang-affiliated Mexican American youths and their families. A three-year study will be conducted through the University’s newly established Drug and Social Policy Research Center, directed by Professor Angel Valdez, social and policy sciences.

With the numbers of Hispanic adolescents growing rapidly nationwide, Valdez said, a “culturally and linguistically responsive” prevention and intervention approach needs to be taken.

Bell & Howell Promotes ProQuest Academic Edition

Bell & Howell’s Information and Learning business unit recently promoted ProQuest Academic Edition, an online student academic research resource for papers and research projects. Students were able to access it through www.textbooks.com, one of the leading websites for college textbooks.

Academic Edition, a research engine for college students, allows quick access to up-to-date information from scholarly materials for term papers, reports, projects, and other assignments.

Bell & Howell Information and Learning is a global leader in collecting, organizing, and distributing value-added information to faculty, researchers, and students in universities. Textbooks.com is a major online college bookseller, offering both new and used college textbooks.

Martinez Preserving Chicana History

Elizabeth “Betita” Martinez, a scholar in residence with the Applied Research Center in California, is attempting to document 300 years of Chicana history.

“The goal is to tell the story of grassroots women and their collective struggles for social justice,” said Martinez. “The book I am working on will be accessible to middle school youth and younger readers. I hope it will inspire them to join that struggle.”

Martinez worked with the civil rights movement in the 1960s, and later with the Chicano movement in New Mexico. She founded the bilingual movement El Grito del Norte (1968-73) and co-founded the Chicano Communications Center. After moving to the Bay Area in 1976, she involved herself in Latino community issues, taught women’s studies, conducted anti-racist training workshops, and ran for governor of California on the Peace and Freedom Party ticket in 1982.

Today, she is founder and chair of the Institute for Multiracial Justice. Most recently, the National Association of Chicana and Chicano Studies named her Scholar of the Year 2000.

EPA Official Speaks at Texas A&M-Corpus Christi

Romulo L. Diaz, assistant administrator with the office of administration and resources management for the Environmental Protection Agency (EPA), shared his thoughts on the environment with Texas A&M University-Corpus Christi chemistry students. Diaz’s visit coincided with the 30th anniversary of Earth Day.

Diaz discussed a range of environmental topics—from career choices for students to endangered species and their protection, to the EPA’s efforts to stem pollution. He cited overpopulation and unregulated industry as major factors of poor air, water, and soil quality. The expanding population—it is expected to double to 12 billion people by the year 2050—will become a strain on the planet, said Diaz.

New York Public Library Bell-lg Discusses Dario and Inés

The New York Public Library’s Humanities and Social Sciences Library hosted a presentation by Paul Berman, a member of the Center for Scholars and Writers’ class of fellows. Berman, a cultural and political critic, journalist, and intellectual historian, discussed certain cosmological and amorous aspects of two of the most renowned poets in the history of the Americas, Nicaraguan writer Rubén Darío and Sor Juana Inés de la Cruz, the 17th-century Mexican nun.

Berman is the author of A Tale of Two Utopias: The Political Journey of the Generation of 1968 and the editor of two widely read readers, Blacks and Jews and Debating P.C. During his fellowship at the library, he has been working on a study of Nicaragua’s literary traditions and how they helped produce the political movements that led to the Sandinista revolution of 1979.

Texas-Arlington Graduate Wins Scholarship

UTA The Sarah T. Hughes Diversity Scholarship was awarded to University of Texas-Arlington alumnus Rogelio Valdez, who last year earned a bachelor’s degree in political science. Valdez was awarded the scholarship—to the Southern Methodist University (SMU) School of Law—by the Dallas Bar Foundation, a group within the Dallas Bar Association.

“This is an extremely competitive scholarship, given only to one student each year,” said Assistant Political Science Professor Rebecca Dean.

Since 1981, the Dallas Bar Foundation has sponsored full-tuition scholarships for a first-year, second-year, and third-year minority law student at SMU. The Dallas Bar Association’s “Bar None Production” musical variety show raises more than $50,000 annually for the Hughes Scholarships. To date, more than $27,000 has been awarded to the scholarship fund.
Grand Rapids Community Trustees — Applaud Olivarez

The Grand Rapids Community College (Mich.) board of trustees praised President Juan Olivarez for his hard work and enthusiasm in leading the college during its revitalization.

The board stated that Dr. Olivarez “successfully accomplished” all the goals he set for the year, noting that he is “a visionary, a charismatic educator who possesses excellent organizational skills.” He was commended for his efforts to establish visibility with students on campus and to listen to their needs.

“He has set the stage to ensure that the college is student friendly,” said the board. “We encourage him to assure that students see evidence of actions in response to their expressed needs.”

Jimenez Assists International Students at Sacramento City

Mayra Jimenez, an alumna of Sacramento City College (SCC) in California, is one of two people working in her alma mater’s International Student Center (ISC) office. Jimenez has been assisting students from overseas as an information provider since becoming a clerk there in 1995. By monitoring students’ progress, Jimenez and ISC coordinator/advisor Susan Fong can help them meet requirements to study in the United States.

“I enjoy helping students from all over the globe and learning about their cultures,” said Jimenez, a native of Nicaragua. “I also admire and thank everyone who is patient with ESL speakers because, thanks to them, foreign speakers are able to integrate into American society.”

Jimenez continues her studies at California State University-Sacramento.

Fresno State Banquet Honors Tomorrow’s Leaders

California Lt. Gov. Cruz M. Bustamante was the keynote speaker at the 22nd Annual Scholarship/Awards Banquet sponsored by the Hispanic Business Student Association of California State University-Fresno.

With the theme “Empowering the Leaders of Tomorrow,” the banquet recognized outstanding students in the presence of their parents, faculty, staff, and community leaders and allowed many companies to create contacts with future business graduates.

Bustamante spoke about the role that young Hispanics can perform in building a successful community as well as the impact that they can have on the governmental process and in the upcoming elections.

New Mexico Presents International Excellence Awards

The University of New Mexico (UNM) office of international programs and studies honored faculty, staff, and students at the International Excellence Awards. Honorees included Ramiro Jordan (L), associate professor of electrical and computer engineering and executive director of the Latin-American Science and Technology Educational Consortium, and Laura Martinez (R), associate professor of nursing, UNM Health Sciences Center. Coordinator of a program that provides graduate nursing education for faculty members from nursing schools in Mexico.

Ramirez Named Queen of Long Beach City Grand Prix

Julie Ramirez was crowned the 2000 Mini Grand Prix Queen at Long Beach City College in California. Along with princesses Mandy DuMong, Rachel Kurian, Megan Stidham, and Sarah Wolkom, Ramirez reigned over two weeks of activities at the College’s 26th Annual Mini Grand Prix.

Ramirez is treasurer of the associated student body; chairperson of Kassai, an honorary women’s club; and a member of Aksa, a women’s social service club. She was also a member of the women’s soccer team that advanced to the second round of the Southern California Regionals last fall.

The Associated Men Students Associated Women Students, and the Pacific Coast Campus’ office of student life organized the Mini Grand Prix activities.

IUPUI Program Aims to Keep Hispanics in School

According to the National Center of Education Statistics of the U.S. Department of Education, Hispanic students drop out of school at an earlier age and have a much higher drop-out rate than non-Hispanic students.

A professor at the Indiana University School of Education at Indiana University-Purdue University Indianapolis (IUPUI) is working to keep Indianapolis Hispanic students in school by showing them the world.

Through e-mail and videoconferences, Jos Rosario, who himself grew up in a poor inner city neighborhood, has introduced students a Arsenal Technical High School to comparable inner-city students in Granada, Spain. He hopes by fall of 2001 that some of the student will meet in person through an overseas exchange focusing on service learning.

Rosario is director of the Center for Urban and Multicultural Education at IUPUI.

Moscoco and Fajardo-Velez Receive Degrees at Dowling

Mireya Moscoco, president of the Republic of Panama, received an honorary doctorate at Dowling College (N.Y) during its May commencement. The daughter of a schoolteacher who grew up in rural poverty was sworn in as Panama’s president in October 1999. Moscoco is not only the first woman to lead the nation but the only woman head of state in the Western Hemisphere. “She is a humanitarian and world leader committed to eliminating poverty and improving the quality of life for the Panamanian people,” said Dr. Albert E. Don Dowling’s president.
Puerto Rican educator Victor Fajardo-Velez was among the first eight people to receive a doctorate of education degree at Dowling. Fajardo-Velez, who has served as director of the Department of Education, has a bachelor's degree and a master's from the University of Puerto Rico and a professional diploma from Dowling.

Military Engineers Endow Scholarship at Texas-San Antonio

The San Antonio post of the Society of American Military Engineers (SAME) has endowed a scholarship benefiting students at The University of Texas at San Antonio (UTSA). SAME President Michael Thuss presented the $40,000 scholarship gift to UTSA.

The group gave Alejandro Ruiz, a UTSA sophomore computer science major, a $2,500 renewable scholarship. Four other students received $500 scholarships for 1999-2000.

St. John's Hosts Bolivian Literature Conference

St. John's University's (N.Y.) Committee on Latin American and Caribbean Studies, in conjunction with the Consulate General of Bolivia in New York and the Bolivian Cultural Institute, held an International Conference on Contemporary Bolivian Literature.

The event featured some of Bolivia's most renowned authors, including: Homero Carvalho Oliva, journalist and author of *Memoria de los Espejos y Ajuste de Cuentos*; Gonzalo Lema Vargas, lawyer and president of the Department Electoral Court. Eduardo Mire, poet, literary critic, and member of the Bolivian Academy of Language; Paz Padilla Osinaga, author of *Nel LImbral, Los Hijos del tiempo, El Ogro Miopie, and Paredes de los Perdidos*; and Edmund Paz Soldán, assistant professor of Latin American literature at Cornell University and author of *Rio fugitivo* and *Dias de papel*.

Fresno City EOPS Reaching Out and Growing

Fresno City College's (Calif.) Extended Opportunities Programs and Services (EOPS) was commended at an accreditation exit report meeting.

For Frank Quintana (pictured), director of the student service program, the commendation recognizes decades of effort. Since 1970—when the program was introduced at Fresno City College—EOPS has been expanding its reach both in services offered and in the number of students served.

"The main purpose of EOPS is to help underprepared students succeed," said Quintana, a Fresno City College graduate. "One of our missions is to do outreach, identify these students, and bring them into college." Cardona Receives Florida Southern's Highest Honor

Diana Marcella Cardona, biology major, was named the 2000 Honor Walk Student at Florida Southern College.

A graduating senior is selected each year for the College's highest honor, based upon exceptional involvement on campus and on academic achievements.

Cardona was a president's scholar for four semesters; made the dean's list for two semesters; was named to *Who's Who Among Students in American Colleges and Universities*; and was vice president of the World Friendship Society, among many other accomplishments.

South Florida Dean Heads International Educators

JoAnn McCarthy, dean of international affairs at the University of South Florida, was named president-elect of the Association of International Education Administrators, which has members from 200 universities across the United States, Latin America, Canada, Europe, Australia, and Asia. McCarthy's appointment is for two years, beginning in 2001.

McCarthy also has been appointed to a three-year term as a member of the American Council on Education's (ACE) International Commission, which serves as its advisor and strategic planning body in the field of international and global education. The Commission also develops national policy positions on international education and statements of good practice to help colleges and universities internationalize.

Cuban Women's Club Presents Scholarships at Miami-Dade

Gisselle Martin (l.) and Marta Seoane (r.), students at the Inter-American Campus of Miami-Dade Community College (M-DCC) in Florida, each received a $1,000 scholarship from the Cuban Women's Club for the year 2000. Martin is a business major; Seoane is studying computer science.

The Belén Sabuordio Scholarship was created in 1998 to honor the late Cuban philanthropist. The Cuban Women's Club Scholarship comes from a $20,000 endowment created by the club at M-DCC last year.

Both scholarships are awarded annually to female students of Cuban descent, based on academic performances and financial need.

NASDAQ and NCEE Present Awards

The NASDAQ Educational Foundation and the National Council on Economic Education (NCEE) presented the First Annual NASDAQ National Teaching Awards for Excellence in Economic Education.

More than 400 friends of economic education attended the dinner and award ceremonies at The Plaza Hotel in New York, N.Y. The Grand National Winner received a total cash award of $25,000, in addition to other prizes. The evening's proceeds benefited NCEE.

Website Looks at Lack of Women in Graduate Business Schools

The website www.womencon.net has launched a package of articles on women in graduate business schools.

While women seem to be dominating undergraduate colleges and universities, they continue to be outnumbered in graduate business schools by a ratio of 3:2 and an
even larger 2:1 ratio in the top 20 schools. While they make up 40 percent of the graduate school population nationwide, women frequently attend such schools as the University of Chicago (19 percent) and Harvard University (30 percent).

The website illustrates how the approach that women take toward graduate schools differs from that of their male professional and academic colleagues, and why many graduate schools have initiated marketing and orientation activities geared toward women students. Offered weekly is a profile of books about business, career, finance, and life management that were written by and geared toward professional women and women business owners.

**Pima Chancellor Elected to AACC Board**

The American Association of Community Colleges elected the chancellor of the Pima Community College District (Ariz.) to its board of directors.

Dr. Robert D. Jensen is currently on the boards of the Governor’s Task Force on Higher Education and the Community Colleges for International Development. Locally, he is on the boards of the Tucson Airport Authority, Tucson United Way, and the Greater Tucson Economic Council.

He has been named one of the top 50 community college leaders in the nation and Educator of the Year by the League of United Latin American Citizens (LULAC) Council in Orange County, and has received the Harry Buttimer award from his peers for community college leadership contributions.

**Texas-San Antonio Holds Campus Enrichment Day**

Two TRIO programs at The University of Texas-San Antonio (UTSA), Educational Talent Search (ETS) and Upward Bound, hosted a Campus Enrichment Day in May, one of its largest events of the year, with more than 500 middle school and high school students from Del Rio, Uvalde, Eagle Pass, Crystal City, Carrizo Springs, and San Antonio in attendance. Rep. Mike Villarreal was the keynote speaker. UTSA President Ricardo Romo (pictured) also addressed the students.

Both ETS and Upward Bound, two U.S. Department of Education grant-funded programs, provide low-income, first-generation students with information and preparation leading to a postsecondary education.

**LaGuardia Receives Valued Library of America Volumes**

The Bill and Melinda Gates Foundation donated 41 volumes by some of the nation’s most significant writers to the Fiorello H. LaGuardia Community College (NY) Library. Some 120 colleges throughout the country also will be receiving recently published volumes from The Library of America series.

The Library of America is an award-winning, nonprofit program dedicated to publishing America’s best and most significant writing in high-quality volumes featuring authoritative texts. Some of the authors include Eudora Welty, Henry James, John Muir, John Dos Passos, Zora Neale Hurston, James Thurber, James Baldwin, W.E.B. Du Bois, Robert Frost, John Steinbeck, and other important American writers of the 18th, 19th, and 20th centuries.

**McDonald's Noche de Carnaval Features Carlos Ponce**

McDonald's Noche de Carnaval, a star-studded three-hour concert celebrating Hispanic musical heritage, featured internationally renowned artist Carlos Ponce (pictured, center) with Alex Mestas, national Hispanic franchisees president) as the 2000 King of Carnaval. The show took place before a sold-out audience of more than 10,000 at the American Airlines Arena in Miami, Fla.

“I feel honored to be chosen as King of Carnaval 2000, especially because I am part of an event that honors and features the best talent of our Hispanic music,” said Ponce.

The event featured popular international recording artists Jon Secada, Pablo Montero, Jaci Velazquez, Paula Rubio, Ilegales, Intocable, Gisselle, Los Angeles Azules, Charlie Zaa, and Los Hermanos Rosario, among others.

**Perez First Hispanic President at Cañada**

Rosa Perez is the new president at Cañada College in California. Formerly the interim president, Perez is the first Hispanic president of any of the three colleges in the San Mateo County Community College District and one of four Hispanic women administrators at the Redwood City College.

Perez was vice president of Chabot College before joining Cañada and has an impressive background in community college counseling and administration. She was vice chancellor for educational services for the San Francisco Community College District, an administrator at Santiago Canyon College, and dean counseling, advising, and matriculation at Skyline College.

After starting her education at the College of San Francisco, Perez earned a bachelor's degree at Stanford University and master's at the University of San Francisco.

**Houston-Downtown Celebrates Rose Ball**

University of Houston-Downtown (Tex.) President Dr. Max Castillo and his wife, Rosario Castillo, attended the 25th Anniversary Red Rose Scholarship Ball, honoring 25 Red Rose Scholars.

Students were selected based on academic achievements, leadership potential, community activism, and commitment to higher education. They are among the first in their family to attend college and, while working, supporting a family, attending evening and weekend classes. Each received a $2,000 scholarship.

Larry Jones of Deloitte and Touche conducted the ball, which raised more than $130,000. Local news anchor Minerva Perez served as emcee.

**Eastern Washington Honors Iniguez Family**

Eastern Washington University (EWU) sent five children through Eastern Washington University (EWU).
honored at the 2nd Annual EWU Chicanx Education Program Annual Alumni and Scholarship Reception.

The EWU Chicanx Alumni Association recognized Guadalupe Rodriguez and Santiago Iniguez for their commitment to education. A farmworker family, they sent five children—Uriel, Pedro, Martina, Erinda Suarez, and Maria Elena—through Eastern, and represent many other Chicanx/Latino families who have worked hard to provide educational opportunities for their children, said Carlos Maldonado, director of the EWU Chicanx Education Program.

Chicanx Education Program awards totaling $20,250 were given to 16 students.

**Pima Celebrates Latino Student Achievements**

Pima Community College (Ariz.) recently celebrated the academic achievements of more than 400 Mexican American/Latino graduates.

Dr. Carlos E. Cortes keynoted a convocation on the school’s West Campus. An award-winning international lecturer who speaks on such topics as ethnicity, multiculturalism, and Hispanic culture, Cortes is a consultant to many school systems, government agencies, and other organizations. He also presented a professional development workshop entitled “Reframing Diversity: Six Prisms for Thinking about Multiculturalism in Higher Education.”

Cortes earned a doctorate from the University of New Mexico.

**New Mexico’s Padilla-Gutiérrez Receives Award**

The New Mexico Association of Student Financial Aid presented an award for outstanding service to Rita Padilla-Gutiérrez, director of the Scholarship Office at The University of New Mexico. Padilla-Gutiérrez was honored for prominent service while administrating financial aid to students. She also was honored for her 25 years of service at a UNM staff recognition reception.

Padilla-Gutiérrez has a bachelor’s degree from New Mexico Highlands and a master’s from UNM.

**Southern Methodist Honors Cortés and Gutiérrez**

Ernesto Cortés Jr. and Gustavo Gutiérrez received honorary doctorates at Southern Methodist University’s (Texas) 85th annual commencement.

The University awarded Cortés—a civic activist dedicated to public service and the common good who works to make government more responsive to the poor and politically disenfranchised—an honorary Doctor of Laws degree and hosted “Speaking Truth to Power: A Symposium on the Achievements of Ernesto Cortés.”

**University of the Incarnate Word Teams with Sony**

Sony Music Publishing and the University of the Incarnate Word’s (Texas) foreign language department recently sponsored auditions for Spanish songwriters of the new millennium.

Sony Music Publishing/Sony ATV, based in Miami, Fla., is affiliated with one of the preeminent Latin music labels in the United States. SonyDiscos. Established in 1979, SonyDiscos artist roster includes Gloria Estefan, Ricky Martin, Chayanne, and Julio Iglesias.

Jose Rosario, vice president/general manager for the Texas Music Division of the SonyDiscos label, announced the joint venture in May.

**“Tools for Success” Scholarships Awarded at St. Philip’s**

A group of 21 occupational/technical graduates from St. Philip’s College, a college of the Alamo Community College District (ACCD) in Texas, was awarded Miller Brewing Company’s “Tools for Success” scholarships. Sen. Frank Madla and Rep. Carlos Uresti addressed the recipients. ACCD Executive Vice Chancellor Dr. Ernest A. Martinez, St. Philip’s College President Dr. Angie Stokes Runnels, ACCD Foundation Board Chair Jackie Van De Walle, and Elizabeth Lopez-Jones of Miller presented the awards.

The “Tools for Success” program awards tools to select graduates to help them obtain jobs in their chosen profession. It helps fill the need for skilled workers and increases public awareness of occupational/technical college programs. Paul Castillo, Steve Cortez, Carlos Cruz, Esteban Cruz, Arien L. De Guzman, Larry Hidalgo, Arturo S. Lopez, Jr., Raymond J. Rios, and Leo Torres were among the winners.

**Ruiz Addresses Students at Northern Arizona**

Dr. Hector de J. Ruiz, president and chief operating officer of Advanced Micro Devices, encouraged graduates of Northern Arizona University’s College of Engineering and Technology (CET) to ask themselves what kind of contribution they are making to society in their working careers as engineers.

The College had invited Ruiz to be the featured speaker at its CET Recognition Ceremony.

Ruiz is currently on the Foundation Advisory Council of the College of Engineering at the University of Texas (UT). He was named 1999 Hispanic Engineer of the Year at the Hispanic Engineer National Achievement Awards Conference and is on the board of directors of the Society of Hispanic Professional Engineers. Ruiz earned a bachelor’s degree and a master’s from UT-Austin and a doctorate from Rice University.
Cal State-L.A. Honors Negrete and Torres

California State University-Los Angeles honored those who have brought distinction and service to the community and the University at the 27th Annual Alumni Awards Gala. Dr. Louis R. Negrete (pinned) received the Distinguished Faculty Alumni Award. Dr. Marie S. Torres received a Distinguished Alumni Award.

Negrete began at Cal State-L.A. as a part-time faculty member in 1969 and helped shape the University’s department of Chicano studies, the first in the nation. Now a tenured professor, he is a popular teacher and department advisor, considered by students to be among the University’s most creative faculty.

Torres, a graduate of the School of Health and Human Services, is senior vice president of long-term care and governmental relations at AltaMed Health Services. Since joining AltaMed Health Services Corporation in 1991, Torres has directed the expansion of senior health services by implementing Southern California’s first program of all-inclusive care for the elderly.

Youths are Center Stage at NJN Showcase

Thirty-nine contestants from New Jersey, New York, Pennsylvania, and Connecticut took to the stage as finalists in the 14th Annual NJN Hispanic Youth Showcase at the New Jersey Performing Arts Center in Newark. The categories included junior and teen divisions in dance, instrumentation, and vocals. The winners received $500 scholarships and tickets to Six Flags Great Adventure amusement park.

1999 Showcase winner Tanya Niever has been performing in the Broadway musical Footloose, while 1999 winner Christian Velez appeared in the film The Bone Collector with Denzel Washington.

NJN Public Television and Radio is New Jersey’s public television and radio network.

America, from tango to telenovelas, and the discipline that studies them. The question of how a country views itself on the global stage and how it is regarded by other nations is worth sustained attention in the field of cultural studies.

Cultures of Politics/Politics of Cultures: Re-Visioning Latin American Social Movements

Sonja E. Alvarez, Evelina Dagnino, Arturo Escobar, eds.

Centered on the cultural politics enacted by social movements as they struggle for new visions and practices of citizenship, democracy, social relations, and development, this volume explores the potential for fostering alternative political cultures and social transformation.

Indigenous Peoples in Latin America: The Quest for Self-Determination

By Héctor Díaz Polanco

This work examines a sociopolitical policy that in various national contexts has proved the most appropriate way of resolving the conflicts and ameliorating the conditions of oppression, discrimination, and inequality that go hand in hand ethnic-national heterogeneity in Latin Amer social life. The author calls this policy regional. Translated by Lucia Rayas.

PUBLICATIONS

Martin Rivas
By Alberto Bles Gana

Martin Rivas is an impoverished but ambitious young man who bears witness to the wide range of social and moral strata within Chilean society. Widely acknowledged as the first Chilean novel, Martin Rivas is at once a passionate love story and a keenly observed portrait of the manners and customs of 19th-century Chile. It is rich with unerring social portraits, animated dialogue, and sharply drawn characters. Translated from Spanish by Tess O'Dwyer.

Mexico’s Cinema: A Century of Film and Filmmakers

Joanne Hershfield and David R. Maciel, eds.

Mexico has the most advanced movie industry in the Spanish-speaking world in terms of economic resources, technical production, number of films produced annually, and distribution. This intelligently presented history is ideal for those interested in film and Mexican history and culture. Hershfield teaches media studies at the University of North Carolina-Chapel Hill. Maciel is professor of history and chair of the department of Chicano/Chicana studies at California State University-Dominguez Hills.

Imagination Beyond Nation: Latin American Popular Culture

Eva P. Bueno and Terry Caesar, eds.

This innovative collection explores both the practices of popular culture in Latin
Hombres y Machos: Masculinity and Latino Culture
By Alfredo Miranda

Although patriarchy, machismo, and excessive masculine displays are assumed to be prevalent among Latinos in general and Mexicans in particular, little is known about Latino men or macho masculinity. This book fills an important void by providing an integrated view of Latino men, masculinity, and fatherhood—reflecting many common myths and misconceptions.

The Untimely Present: Postdictatorial Latin American Fiction and the Task of Mourning
By Idelber Avelar

Examining the fiction produced in the aftermath of recent Latin American dictatorships, particularly those in Argentina, Brazil, and Chile, Idelber Avelar argues that through their legacy of social trauma and their obliteration of history, these military regimes gave rise to the unique and revealing practices of mourning that pervade the literature of the region.

By James M. Hillard, with Bethany J. Easter

The purpose of this book is to help locate useful subject sources in the local library quickly and accurately. It is written for experienced librarians who are unfamiliar with good titles in a particular subject, novice librarians who are beginning to explore the reference collection, and library users who want to search on their own.

Distributive Justice and Economic Development: The Case of Chile and Developing Countries
Andrés Solimano, Eduardo Aninat, and Nancy Birdsall, eds.

Targeting issues of distributive justice and economic development, this book deals with the quest for policies that foster growth, prosperity, and material welfare and are at the same time compatible with the ideals of social justice.

Diversity and Distrust: Civic Education in a Multicultural Democracy
By Stephen Macedo

There is a great deal of thought and anxiety about the quality of civic life in modern democracies. There is much uncertainty in America and abroad about the abilities of modern liberal democracies to muster the will and the authority to formulate a shared educational agenda. This book illustrates that we can respond to those uncertainties and anxieties without compromising the great project of extending modern liberal democratic principles.

Narrativas de la Guerra Sucia en Argentina: Piglia, Saer, Valenzuela, Puig
(Spanish)
By Jorgelia Corbatta

Wayne State University (Mich.) Associate Professor of Romance Languages and Literatures Jorgelia Corbatta takes a look at Argentine military dictatorship from 1976 to 1983. She features the writing of four authors, three of whom fled the country and one who stayed during the war—Ricardo Piglia, Juan José Saer, Luisa Valenzuela, and Manuel Puig.

Away Games: The Life and Times of a Latin Baseball Player
By Marcos Bretón and José Luis Villegas

Just as African American players electrified baseball in the 1950s, Latin ballplayers are transforming America's pastime today. They are baseball's future, and they come from places most Americans have never heard of and from lives most Americans could never imagine. This is the story of Latin baseball as seen through the eyes of Miguel Tejada, a young Dominican shortstop and one of many promising Latin prospects in the Oakland A's organization.

El Salvador: The Face of Revolution
By Robert Armstrong and Janet Shenk

Two U.S. experts on Central America provide a definitive study of the history and reality of the situation in El Salvador through the early 1980s.

Haiti: Dangerous Crossroads
Deidre McFadden and Pierre LaRamee, with Mark, Fried and Fred Rosen, eds.
In gathering together reliable information, this book provides a comprehensive analysis of Haiti, offered up by the U.S. Left.

paper. South End Press. (800) 533-8478.

Index to Twentieth-Century Spanish Plays: In Collections, Anthologies, and Periodicals

By Tony A. Harvell

This volume directs readers to plays written by authors from (or closely associated with) Spain in the 20th century. Galician, Catalan, and Basque writers are included, as well as those writing in Castilian Spanish. The author includes translations into English, wherever they might be available.

cloth. Scarecrow Press. (800) 462-6120.

Many publications featured in this section are available through amazon.com.

CONFERENCES

Books in Spanish for Young Readers Summer Workshops 2000

July 31-August 2

Dr. Isabel Schon, director of the Center for the Study of Books in Spanish for Children and Adolescents at CSL-San Marcos, announces the final (of three) three-day summer workshops: "Literature in Spanish for Children and Adolescents/La Literatura en Español Dirigida a los Lectores Infantiles y Juveniles" (conducted in Spanish).

Contact: e-mail: ischon@mailhost1.csms.edu.

2000 Summer Institute for Intercultural Communication

July 1-21, 24-28

Now in its 24th year, the Intercultural Communication Institute is again offering a range of workshops and seminars designed to meet the needs of professionals in the areas of intercultural and multicultural education, training, business, counseling, and consulting.

Contact: (503) 287-4622; e-mail: isi@intercultural.org; website: www.intercultural.org.

20th International Conference on Critical Thinking and Educational Reform

July 22-25

For its 20th International Conference, Sonoma State University presents "Teaching Students to Think Deeply Within and Across the Disciplines." At SSU in Rohnert Park, Calif.

Contact: (800) 833-3645 or (707) 878-9100; e-mail cctc@criticalthinking.org; website: www.criticalthinking.org.

CSUSB International Congress

August 30-September 1

California State University at San Bernardino and others are sponsoring "Challenges to Education: Balancing Unity and Diversity in a Changing World." In Mexico City.

Contact: (909) 880-9777 ext. 210; e-mail: dwalker@csusb.edu.

Riva's Mexico 2000 Education Tour

September 19-20, Guadalajara

September 22-23, Mexico City

September 25-26, Monterrey

Riva Expeditions, Inc., is committed to building partnerships through key introductions among international exhibitors, Mexican schools representatives, and local business leaders. This year's tour, "Building Partnerships in Mexico," will focus on student recruitment through public fairs and school visits.

Contact: Anne Marie Wright, (303) 970-3063; e-mail: rivaexpo@mindspring.com.

International Society for Luso-Hispanic Humor Studies International Conference

September 28-30

At Delta Hotel, Montreal.

Contact: K.M. Sibbald, Department of Hispanic Studies, McGill University, (514) 398-6683; e-mail ksibbald@leacock.lan.mcgill.ca.

18th Annual U.S. Hispanic Leadership Conference

September 28-October 1

The USHII has as its conference theme this year: "Latinos in the New Millennium: Building on the Past to Provide Promise for the Future." At the Hyatt Regency, McCormick Place, Chicago.

Contact: (312) 427-8683; website: www.ushii.com.

Hispanic Women's Corporation 15th Annual Conference

October 5-6

The 15th Annual Hispanic Women's Conference, presented by the Hispanic Women's Corporation, at the Phoenix Civic Plaza in Phoenix, Ariz.

Contact: (602) 954-7995; e-mail: hwc@netmail.att.net.

New Jersey Project Fall 2000 Conference

October 13

The New Jersey Project for Inclusive Scholarship, Curriculum, and Teaching has as its Fall 2000 conference theme "Now You See It, Now You Don't Class in America." Speakers include Barbara Ehrenreich, Manning Marable, Holly Sklar Mark Ellis, Lise Vogel, and Leonard Vogt. At Essex County College in Newark, New Jersey.

Contact: (973) 720-2296; e-mail njp@wpuni.edu.

AAC&U's 3rd Bi-Annual Diversity and Learning Conference

October 26-29

"Diversity and Learning: Identity, Community, and Intellectual Development" was designed both for working teams of faculty and administrators and for individuals interested in improving classroom teaching changing their curriculum, fostering systemic change in their institutions, and investing more in local and global communities. At the Westin William Penn Hotel in Pittsburgh, Pa.

Contact: (202) 387-3760; e-mail: meeting@acu.edu; website: www.acu.edu/Meetings/divlearn00.html.
Book Review

By Alberto Huerta

A friend told me about a beekeeper who harvests honey in several states. I recommended he read Thomas Sanchez’s Day of the Bees. Once he’d read it, I suggested, he would never see the beekeeper in the same “lavender light.”

Literature becomes world class by an author’s genius, when the ordinary is transformed into a powerful symbol of something larger. To readers of Don Quixote, the windmill is never just a windmill. Fans converted into dragons: the stuff of our shadows. forces we fight against. Like Don Quixote, we put on armor to take on the world and its dark perceptions. When Tolstoy’s Anna Karenina stands on the platform, that platform assumes a transcendent evocative power. When García Márquez’s protagonists in Love in the Time of Cholera come full circle on the riverboat in what seemed an impossible love, that paddle steamer becomes the symbol of our deepest longings; much like Hesse’s river in Siddhartha, it becomes the flow of our lives.

To the extent that an author brings originality to ordinary things, events, and persons, they are praised. And if by some sort of self-propelled energy they assume a symbolic life of their own by evoking in the reader memories and relationships to their world, the writing is a masterpiece.

In Day of the Bees, objects, persons, and moods have a power of their own: knitting baskets, a correspondence between lovers, the beekeeper and bees themselves, honeymoons and honey, lavender fields and the cherry orchard, cacao and monasteries, vultures circling, the light and landscape of southern France in contrast to the light and landscape of Mallorca—these connect us to the memory of our histories, to life and death, love and separation, even war.

An important consideration is voice. When an author devises ways to give characters voice, the novel becomes real. Sanchez gives Louise Collard a clear first-person voice. Moreover, Louise expresses emotional states through an orchestration of voices. We know her through unaired letters to her Spanish lover, through her reveries and dreams and nightmares, through her deliriums and hallucinations, and through her interaction with other characters.

Louise Collard escapes Sanchez’s creative control. She takes on an identity beyond the author’s imagination. Unamuno speculated about this literary phenomenon, intimating the idea of a muse as creator. This novel is dedicated, “For the Three Muses...” Sanchez frames the protagonist’s identity. But Louise, through some mysterious seminal source, flies through that window: determines and appropriates her own voice.

This achievement is evident in Sanchez’s other novels. In Raíz Boss (1973), Hallelujah Bob’s voice is expressed through fever, deliriums, dreams, and hallucinations. In Zoot Suit Murders (1979), secretive voices are echoed through dark moods of fear and suspicion that overwhelm the protagonists on the streets of Los Angeles. In Mile Zero (1989), two strong voices from the incunabula of the dead and the bad voodoo, are juxtaposed as dialectical forces: conscience. In Day of the Bees, Sanchez plunges deeper into turbulent currents of his soul, to tell us a story of passion and love.

Sanchez’s works revolve around a large mandala, like a placenta floating in the sea with an inverse vortex, whose ripples extend outward. His father, Thomas Louis Sanchez, disappeared in action at age 21, when the U.S.S. Liscombe Bay was sunk in the South Pacific in November 1943, the author then stuffing in his moth-womb. Rabbit Boss is gleaned from Sanchez’s adolescent experiences with Washio Indians in board schools. Zoot Suit Murders returns to the time w his father was at sea defending America while b home discrimination and racism reigned. Mile 2 gathers Vietnam Veterans in Key West as they explain their uncertain spiritual and historical state. 21 marks the 25th anniversary of the end of the war divided America, that proved the futurity of war. Days of the Bees, the French resist the evil and hate dark forces of Nazi imperialism in a world of conflicting loyalties and betrayals.

Sanchez’s passion and rage are against war. He knows its terrible consequences, its pathologies. War is not only the greatest abomination; it is an abhor something unspeakable and ugly. War denies entire populaces the innate right to live fully as God’s children. Sanchez is not charitable. Day of the Bees is a moral challenge.

We live in a technological and functional world. Every day we are human values and relationships reduced to mechanical components and chemical reactions. Love is displaced by the language needs, and tactile communication, by virtual reality in cyberspace. Hope is diminished by this philosophical trend, and belief in transcendent, rendered illusory. This is a novel of great hope and optimism. It is the promise of love. Sanchez writes elegantly about a romantic love, convinced we will survive as a race if we do not destroy this ideal. Cynics trapped in the matrix of disillusionment might not comprehend the moral imperative and relevancy of Sanchez’s Day of the Bees.

Alberto Huerta is an associate professor in the Department of Modern & Classical Languages, University of San Francisco.

WESTERN CONNECTICUT STATE UNIVERSITY

ASSISTANT TO THE DIRECTOR/CONFERENCE COORDINATOR

ANTICIPATED OPENING-FALL 2000

W.C.S.U. is seeking an individual to coordinate activities associated with the use of conference facilities in residence halls, as well as assisting with other housing facilities. Coordinates conference room set-up, promotes and schedules the use of all Housing conference facilities, and trains student personnel. This position will reside on-campus in order to provide necessary residential hall coverage, including participation in weekend/duty rotation. In addition, this position will assist two resident directors by serving as a support and back-up person, as well as assisting with judicial hearings. Requirements: Two years of relevant housing experience and the ability to relate effectively to resident college students and staff. Excellent written and verbal skills. Must have valid driver's license and vehicle available for job-related duties and meetings. Bachelor's degree is required. Master's degree preferred. Salary: $23,722 annual with a comprehensive benefit package. Send letter of application, resume, names and phone numbers of three professional references to: Maribeth Griffin, Associate Director of Housing, Newbury Hall, Western Connecticut State University, 181 White St., Danbury, CT 06810 by July 31, 2000.

E.O.E./AA Employer.

Wanted: minorities are encouraged to apply.

FIRST YEAR EXPERIENCE COORDINATOR/RESIDENT DIRECTOR

Manhattanville College is an independent coeducational liberal arts college of approximately 1,370 students located 28 miles north of New York City in Westchester County. We are currently seeking full-time First Year Experience Coordinator/Resident Director to begin in mid-July.

This is a 12-month, full-time position responsible for the direct supervision and training of 6 Resident Advisors. Must also manage, budget and developmental issues and advising of Hall Council for one- and two-year residence hall housing approximately 300 students. This position will also work with the entire campus community to organize and implement ongoing programs specifically geared toward the first-year student population.

Required qualifications include: a Bachelor's Degree (Master's Degree preferred), experience as a Resident Director with management of disciplinary issues, and excellent written and verbal communication skills. Experience working with first-year population a plus.

Remuneration: for full-time employment will include a salary commensurate with experience and a generous benefits package, as well as tuition remission and a furnished apartment. For consideration, submit a cover letter and resume to: Director of Human Resources, Manhattanville College, 2900 Purchase Street, Purchase, NY 10577. Fax: (914) 323-5322. E-mail: hr@mvcollege.edu

We are an equal opportunity employer in an environment encouraging applications from candidates with diverse backgrounds.

Capella UNIVERSITY

SCHOOL OF PSYCHOLOGY

ADJUNCT FACULTY

Capella University’s School of Psychology is hiring adjunct faculty in the following areas of specialization: Addiction Psychology, Clinical Psychology, Educational Psychology, Family Psychology, Health Psychology, Organizational Psychology, and Sport Psychology.

Contact: Capella University is a regionally accredited institution of higher education which offers undergraduate and graduate degree programs, certificates, and continuing education to adult learners who seek to integrate advanced study with their professional lives.

Responsibilities: Adjunct faculty are part-time faculty who serve as independent contractors. Adjunct faculty teach graduate courses in the core and specialty curriculums, mentor graduate students in their specialty area, and serve as residency faculty at academic externships. They serve on School and program committees and share full voting privileges in academic matters. With members of the full-time core faculty, adjunct faculty are responsible for ensuring that all student educational experiences are consistent with the prevailing national standards for the education of professional psychologists.

Qualifications: 1) Earned doctorate, 2) Interest in and commitment to teaching in an online environment, 3) Proficient in the use of Internet tools. 4) Have prior graduate teaching experience.

Salary: Commensurate with experience and qualifications.

Application Procedures: Send letter of application, vita, three letters of recommendation and transcripts to:

TWO TENURE TRACK POSITIONS IN SOCIOLOGY

The Department of Sociology at the University of St. Thomas is seeking to fill two tenure-track positions starting September 1, 2001, pending final administrative approval in October 2000. For the first position, the department seeks a sociologist at the Assistant Professor rank or higher, with teaching specialization and experience in research methods and statistics. This individual would be responsible for teaching 3-4 methods/statistics courses, in addition to 2-3 other courses in a 6-course annual load. Other teaching specializations are open, but include introductory sociology and/or social problems, as well as aging & the life course, anthropology, deviance, race & ethnicity, work & occupations, and area studies or a comparative focus. Minimum qualifications include an earned doctorate in sociology and experience teaching research methods and statistics at the undergraduate level, preferably in a liberal arts college setting. In addition, this individual should have a vision for developing and the skills for leading the methods/statistics curriculum in a department with both applied sociology and criminal justice majors.

For the second position, the department seeks to hire a sociologist at the rank of Assistant Professor, with teaching specialization in race and ethnicity and social problems. Other teaching specializations are open, but include the courses listed for the position above. Minimum qualifications include an earned doctorate in sociology and experience teaching social problems, and race and ethnicity at the undergraduate level, preferably in a liberal arts college setting.

The University of St. Thomas is a Catholic liberal arts university dedicated to the education of the student as a whole person. The university is located in the heart of the Twin Cities of St. Paul and Minneapolis.

Applicants for both positions should provide evidence of effective teaching, commitment to academic advising, a commitment to sociological scholarship, and desire for professional service. Please send a cover letter indicating the position for which you are applying, your interest and qualifications for this position, and three letters of reference to:

University of St. Thomas
Search Committee, Department of Sociology, Mail #5021
2115 Summit Avenue
St. Paul, MN 55105

Applications received by October 1, 2000 will receive full consideration, but all applications will be considered until the positions are filled.

The University of St. Thomas is an equal opportunity employer: Women and people of color are especially encouraged to apply.

NIAGARA UNIVERSITY
Assistant Professor of Education

Niagara University has a tenure-track teacher education position open for Assistant Professor of Education beginning September 2001. The position requires a concentration in one or both of the following:

Teacher Education: elementary curriculum and methods, learning and instruction
Teacher Education: special education, transition services

Requirements for the tenure-track Assistant Professor position include: (a) a doctorate degree from an accredited institution by 9/1/2001, (b) evidence of teaching excellence in K-12 and college settings, eligibility for NYS certification in teaching level and subject area, ability to perform in a collaborative instructional and scholarly institutional culture, and potential for scholarly activity. Desirable additional qualifications include any of the following: special knowledge or abilities in Ontario education policies, early childhood education, secondary education, special education, application of technology, knowledge and experience working with students from culturally diverse backgrounds, knowledge and experience in reducing performance gaps among children and youth from urban areas.

Niagara University is located on the northern limits of the city of Niagara Falls, New York. The campus overlooks the Niagara River Gorge just four miles north of the famous falls.

Review of applications will begin July 10, and will continue until the position is filled.

Send letter of application, names, addresses and e-mail addresses of three references, and curriculum vitae to:

Dr. Robin Erwin, Chair
Department of Education
Niagara University
P. O. Box 2542
Niagara University, NY 14109-2042

Niagara University is an affirmative action/equal opportunity employer with a strong commitment to enhancing the diversity of its faculty and staff. Women and minorities are encouraged to apply. The successful candidate need not be a Catholic, but must be prepared to support Niagara's Catholic and Vincentian mission.

Washtenaw Community College

DIRECTOR OF WEB SERVICES

The Director of Web Services is responsible for managing and maintaining the College's web presence, from consulting and planning to site design and organization. He/she works collaboratively with other College faculty and staff to use Internet tools and resources to promote the College, facilitate instructional use of networked resources, and maintain consistency, accuracy and comprehensiveness of the web-based information resources.

The successful candidate must possess a Bachelors degree in a technology related field, two years of management experience, two years' experience in web browser functions and in organizing information, developing an information structure of related links, two years' experience in use of image and web editing software and sending edited work to the server, mastery of HTML, and two years' experience using web image, and scanning hardware and software. Samples of online work-preferable through URL examples-must be submitted.

Initial annual salary range is $50,800-$55,800 on a twelve month basis with numerous fringe benefits. Applications will be accepted until the position is filled.

Interested persons should send completed WCC application form and transcripts to the Office of Human Resource Management, Washtenaw Community College, 4800 E. Huron River Dr., Box D-1, First Floor, Business Education Building, Room 120, Ann Arbor, MI 48105. (734) 973-3497. Job Hotline (734) 973-3510. For job postings and application materials see our web site at http://www.wccnet.org/jobs. AA/EO/AADA employer
The University of Texas Houston Health Science Center
MPH Program at Brownsville

The University of Texas-Houston Health Science Center School of Public Health is seeking qualified applicants for tenure-track positions at the Assistant, Associate, or Full Professor level for its new satellite MPH program in Brownsville, TX. The satellite program, a component of the new Lower Rio Grande Regional Academic Health Center and an integral part of the UT-Houston Health Science Center School of Public Health, will be located in a new, 26,000 square foot, School of Public Health building on the University of Texas-Brownsville/Texas Southmost College campus. A resident group of 10-12, UT-H SPH faculty will be hired in the core disciplines of Behavioral Sciences, Biometry, Environmental Sciences, Epidemiology, and Management and Policy Sciences. Rank will be determined by qualifications and background of successful applicants. Classes are scheduled to start in January 2001, pending final approval of the program, which is anticipated in September 2000.

Ideal candidates would have a solid foundation in the academic principles of public health and familiarity with public health practice. The candidate’s research interests should include factors affecting human health in multicultural communities along the Texas-Mexico border. Fluency in Spanish is desirable. A doctoral degree in a core discipline or a medical degree combined with graduate-level academic training in public health is required. Responsibilities will be to teach, perform community service, and develop funded research efforts that generate publications in the professional literature.

The University of Texas-Houston School of Public Health has satellite MPH programs in San Antonio, El Paso, and Dallas with a core group of residents. The new campus in Brownsville will have the opportunity to collaborate with faculty and public health professionals on both sides of the border and with the faculty in Houston and the other satellite campuses.

Review of applications is underway and will continue until the positions are filled. Candidates should send a letter describing their qualifications and interests along with their curriculum vitae to:

Gene D. Schröder
Search Committee Chair
and Associate Dean of Outreach Programs
UT-Houston School of Public Health
P.O. Box 20186
Houston, TX 77225

Additional information about the UT-H SPH Division of the Lower Rio Grande Regional Academic Health Center can be found at:
http://www.sph.uth.tmc.edu/
The University of Texas is an Equal Opportunity, Affirmative Action Employer. Minorities and women are strongly encouraged to apply.
COLBY

Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following positions:

ASSOCIATE DEAN/DIRECTOR OF ADMISSIONS AND FINANCIAL AID

This is a senior position, involving the full range of college admissions work. The Associate Dean/Director will interview prospective students; counsel families; travel for recruitment purposes; read and evaluate folders, as well as additional responsibilities based on experience and interests. This position will also require public speaking and knowledge of financial aid. Qualifications include: a strong background in education and at least ten years of experience either in selective colleges or secondary schools, demonstrating a commitment to a liberal arts education and a multi-cultural learning environment. Proven qualitative, oral and written communication skills are a must, and the ability to work independently on multiple projects and tasks simultaneously. A Bachelor’s degree is required, preferably from a liberal arts college and an advanced degree is highly desirable. Knowledge of and experience with students attending highly selective liberal arts colleges is important. A penchant for teamwork and a strong sense of humor are essential.

ASSISTANT DIRECTOR OF STUDENT ACTIVITIES

The Assistant Director will assist the Director in the operation and supervision of the Student Union and all clubs and organizations; assist and advise the Student Programming Board and the Student Government Association on cultural, social and recreational activities; advise Coffeehouse and Spa programming; plan and implement COOT program (Colby Outdoor Orientation Trips/Colby On-Campus Orientation Teams) including COOT leader selection and training, as well as residential life responsibilities. On campus housing provided. Qualifications include: A Bachelor’s degree is required, Master’s preferred. A minimum of one year of experience in a student personnel field required. Excellent organizational and interpersonal skills are a must.

Interested candidates please specify the position you are applying for and send two copies of a letter of application and two copies of a resume, including the names and telephone numbers of three references to: Douglas C. Terp, Director of Personnel Services, Colby College, 5800 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and will continue until the positions are filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby web site: www.colby.edu

South Dakota State University

DEAN OF THE COLLEGE OF ENGINEERING

POSITION: South Dakota State University, a land-grant institution, invites nominations and applications for the position of Dean and Professor of the College of Engineering. SDSU has an enrollment of approximately 8,500 students. Start date negotiable but preferably July 1, 2001.

COMMUNITY: SDSU is located in Brookings, a community of approximately 17,500 in eastern South Dakota, 50 miles north of Sioux Falls, a metropolitan area of 120,000.

THE COLLEGE OF ENGINEERING: Has an enrollment of 1,100 students and 115 faculty and staff, and offers bachelor’s, master’s, and doctoral degrees. Basic programs are ABET accredited. College includes the Departments of Agricultural and Biosystems Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, General Engineering and Technology, Mathematics and Statistics, Mechanical Engineering, and Physics; the Environmental Resource Center; the Northern Great Plains Water Resources Research Center, and the Polytechnic Center of Excellence.

RESPONSIBILITIES: Dean provides leadership in all areas of the College, participates in university goal and policy setting, and is an advocate for Higher Education and the College of Engineering. Dean reports to the Vice President for Academic Affairs and serves on the Academic Affairs Council and the Graduate Faculty.

QUALIFICATIONS: Required: earned doctorate in engineering or a related field; sufficient teaching, scholarship, and service to qualify as a full professor (ten years professional experience); Desirable: effective interpersonal, leadership, and written and verbal communication skills; ability to obtain external funding; ability to form and maintain liaisons with external groups; commitment to Affirmative Action; commitment to shared decision making and collegially experience in budget preparation and management; knowledge of higher education and technology issues; and commitment to active program of faculty/staff development, and experience with the accreditation process.

SALARY: Negotiable and commensurate with qualifications.

NOMINATION/APPLICATION PROCEDURE: Send letter of interest, current vita and the names, addresses and telephone numbers of five professional references. Transcripts for highest degree will be required of finalists interviewed. Address communications to:

AA/EEO

DISTINGUISHED VISITING PROFESSOR IN ETHICS

AT U.S. NAVAL ACADEMY

The United States Naval Academy solicits inquiries and nominations regarding the position of Distinguished Visiting Professor in Ethics. Established in 1984, the Academy is the undergraduate college for the Navy that prepares men and women to become professional officers in the U.S. Navy and Marine Corps. The position of Distinguished Visiting Professor in Ethics is a one-year full-time position with the possibility for renewal to a maximum of three years. It will be available beginning June 1, 2001. We also invite applications for subsequent appointments to this endowed chair, e.g., 2003 or 2005. The Academy is looking for a senior scholar holding a Ph.D. or the equivalent who is recognized nationally for achievements in teaching and research in applied ethics and philosophy. The Visiting Professor lectures in a required core ethics course, participates in the discussion of ethical issues at the Naval Academy, advises the senior Academy leadership regarding the effectiveness of the Academy’s ethics programs. The applicant should have strong teaching and research skills in one or more of the following areas: military ethics, international ethics, professional ethics, and business ethics. The Academy seeks an applicant who can contribute to the intellectual climate of the Academy.

Salary and benefits will be commensurate with experience. Consideration of applications will be ongoing, but preference will be given to those received prior to 15 October 2000.

Please forward letters of nomination or application, curriculum vitae, a references to: Dr. David E. Johnson, Search Committee Chair, Program in Ethics, & Law, United States Naval Academy, 50222, 112 Cooper Road, Annapolis, MD 21402-50.

For additional information call: (410) 293-6015. U.S. citizenship required.

An Equal Opportunity Employer
ASSOCIATE DIRECTOR
BUDGET AND PLANNING
Office of the Vice President
Budget, Planning and
Information Technology

Works proactively and collaboratively with various constituent groups to link budgeting and strategic planning. Assists in all aspects of operational and capital budget planning, as well as strategic planning. Responsible for assigning and supervising projects of full and part-time analysts. Other duties include conducting research, interpreting data, and creating routine and unique reports that are useful for strategic planning, as well as financial management and decision-making.

Qualifications: MBA, or equivalent, and 5 years of professional experience, preferably in higher education. Superior analytical and quantitative skills are required. Experience with strategic planning and its relationship to college/university budgeting is preferred. Knowledge and experience in information technology and management information reporting desirable. Experience in use of database applications. Ability to clearly and effectively communicate, both orally and in writing, with all University constituents in a collegial manner is a must. Ability to effectively present quantitative and graphical information is critical. Salary is commensurate with experience.

E-mail: MPP9@princeton.edu
Web site: http://www.wws.princeton.edu/degree/mpp.html

Applications must be received by January 3, 2001.

The Woodrow Wilson School also offers a two-year Master's degree in Public Affairs (M.P.A.) and a Ph.D. degree program.

POSITIONS OPENINGS
DEPARTMENT OF MANAGEMENT
TEXAS A&M UNIVERSITY

Position and Qualifications. The Department of Management at Texas A&M University is seeking to hire up to six new faculty colleagues for the Fall of 2001. All six searches are at open rank, but we would not be able to fill all openings at the senior level. Up to three positions are in the area of Strategic Management, and one of these positions (at the senior level) would involve directing the Center for New Ventures and Entrepreneurship. One position will be in the area of Business and Government, Industrial and Labor Relations or International Business. Up to three positions will be in the area of Human Resource Management and Organizational Behavior. One of these positions (at the senior level) would involve directing the Center for Human Resource Management, while, for another position, preference will be given to candidates with interest and expertise to teach negotiations and conflict management. Candidates must (1) possess an earned doctorate or demonstrate a strong likelihood of obtaining the doctorate by the Fall of 2001, and (3) demonstrate interest and abilities to conduct and publish research in top quality journals. Teaching opportunities exist at the undergraduate, graduate, and executive levels.

Applications. An applicant should provide a cover letter and resume that includes: (1) educational achievement, (2) research/publication record, (3) indicators of teaching effectiveness or potential, (4) work and other experience, (5) statement of the applicant's expectations and professional goals, (6) other data deemed relevant by the applicant, and (7) a list of three references with addresses and phone numbers. Writing samples and recent article reports are welcomed. Applications, nominations, and other requests for additional information should be directed to:

Angelo S. DeNisi
Department of Management
4221 TAMU
Texas A&M University
College Station, TX 77843-4221
979-845-4861
E-mail: adenis@tamu.edu

Texas A&M University is an equal opportunity affirmative action employer.
Founded in 1877 as a privately endowed coeducational institution, Rhode Island School of Design (RISD) offers 20 degree programs in the fine arts and architecture, design, and engineering. RISD enrolls approximately 2,000 undergraduate and graduate students from 50 states and 50 countries, and also includes a division of Continuing Education offering a variety of programs to more than 4,000 part-time students.

Associate Vice President
For Human Resources

The Associate Vice President for Human Resources will be responsible for directing the overall operations of the Human Resources Department including programs for positive employee relations; cost-effective and competitive compensation and benefits; recruitment and staffing support for all positions; employee training, development, and assistance; and an integrated HRIS. The successful candidate will act as resource and counselor to the President, Provost, Vice Presidents, Deans, Directors, Department Chairs, and others in the implementation of Human Resources administration policy and practice. Responsibilities will include recommending HR-related actions to Senior Staff, developing employee recruitment and retention strategies, and implementing compensation programs consistent with RISD priorities and goals. Using professional networks and resources, play a key role in keeping RISD up to date regarding regulations and “best practices” while preserving the qualities that distinguish RISD’s HR vision and strategy. Mentor and develop departmental staff, lead, or participate in College initiatives to provide a workplace free of discriminatory practices, and be an active member of RISD’s Diversity Committee. Develop and implement new or revised HR policies, to ensure compliance with federal, state, and local laws and applicable regulations. Work with managers to determine appropriate corrective actions relating to employee conduct and performance, assist employees in use of in-house grievance procedures, oversee development of effective employee communication tools, and work with staff to promote employee awareness of key events. Serve as a member of the administration’s collective bargaining team and ensure consistent application of the bargaining agreement in coordination with Academic Affairs. Will also provide long-term strategic thinking for all aspects of College staff and faculty development, education, management, and motivation.

QUALIFICATIONS: Qualified candidates should possess the following:

- A Bachelor’s degree in Human Resources Management, Business Administration or related field
- A Master’s degree in Business or related field strongly preferred
- A minimum of 7 to 10 years of progressively responsible experience in Human Resources
- Prior experience as a Chief Human Resources Officer strongly preferred
- Previous experience in the not-for-profit environment preferred

To apply, please send resume and letter describing relevant experience to: Associate VP for Human Resources, c/o Rhode Island School of Design, Human Resources Dept., 20 Washington Place, Providence, RI 02903; Fax: (401) 454-6655.

Coordinator of Student Activities

Acts as primary advisor to the assigned Student Alliance clubs and organizations, coordinating and supervising a full complement of extracurricular programs, activities and services including all campus and cultural performing arts events, local travel program and film series. Will also coordinate assigned athletic opportunities including club sports activities opportunities offered through Brown University and RISD farm programs, and coordinate marketing effort for all programs including campus activities calendar, mailings, posters and other promotional efforts. Requires Bachelor’s degree in Student Personnel, Counseling, related field or equivalent combination of education and experience (Master’s degree preferred); at least 3 years’ relevant college experience; ease in working in a busy office with staff and young adults; knowledge of Macintosh computers/software; and strong written/verbal communication skills.

To apply, please send resume to: Rhode Island School of Design, Human Resources Dept., 20 Washington Place, Providence, RI 02903; Fax: (401) 454-6655.

RISD is an equal opportunity employer who encourages inquiries and applications from female and minority candidates. RISD does not discriminate on the basis of race, color, age, sex, religion, national origin, ethnic origin, sexual orientation or disability.

DARTON COLLEGE
Albany, Georgia
EDUCATIONAL TECHNOLOGIST (Assistant Director I)

The Educational Technologist (Assistant Director I) is responsible for assisting and supporting faculty in transforming courses from a face-to-face to a web format. This will include working with faculty on an individual basis as well as developing and conducting workshops for groups of faculty. The successful candidate will have technical expertise as well as an understanding of the pedagogical applications of technology to the development and support of information technology in teaching and learning. Essential skills include the ability to use an HTML editor to develop web pages and the facility to impact those skills to others. Experience with an online learning platform, particularly WebCT, is a plus. Excellent interpersonal and communication skills are required. The candidate should be able to work well in a collegial relationship with both faculty and students. The successful candidate will be well versed in emerging technologies affecting distance learning and higher education. A minimum of a Bachelor's Degree, preferably in Instructional Technology, is required.

Salary range is $45,555 - $58,342.

Applicants should send a letter of application, resume, and the names, addresses and telephone numbers of three (3) references to:

Larry G. Carter, Ph.D.
Vice President for Academic Affairs
New Jersey City University
2039 Kennedy Boulevard
Jersey City, NJ 07305

An affirmative action equal opportunity employer, the University especially welcomes and encourages applications from women and minority candidates.

NATURE AND PURPOSE: Organize, promote, market, and evaluate an expanded educational program through teaching and applied research with primary emphasis on production agriculture, consumer oriented agri-marketing for a diverse agricultural business community, management operations and marketing for nursery, floriculture and horticulture industries. Additional responsibilities include educational programming and research in marketing agronomy, general science and horticultural science and management appropriate to the needs of the clientele in Cape May County. Supervise and initiate an agricultural education program in consumer education, agriculture, horticulture and environmental stewardship. Develop and implement educational programs for commercial and home-oriented clientele including field visits, workshops, newsletters, and other means of information delivery. Educational programs should lead to local, state, regional, and national recognition. Implementation and design of programs to benefit clientele through development of marketing and research opportunities.

SALARY AND BENEFITS:

Academic Rank: County Agent III (Assistant Professor) tenure track, 12 month, 100% Extension
Salary: Commensurate with education and experience
Benefits: Travel expenses, 22 days annual leave, health and life insurance, retirement program, and professional improvement opportunities.

EDUCATION AND EXPERIENCE: Bachelor's degree in science and master's degree in a related field. Minimum of 3 years of relevant professional experience required for appointment to the rank of County Agent III. Preference given to candidates with experience in agricultural education, consumer oriented agriculture, and marketing.

SPECIAL OPPORTUNITY EMPLOYER: Rutgers Cooperative Extension, N.J.H.I.S. Rutgers Cooperative Extension is an equal opportunity employer and seeks to employ the best qualified individual without regard to race, religion, color, national origin, ancestry, age, sex, sexual orientation, marital status or disability. Individuals covered by Section 469 of the Vocational Rehabilitation Act of 1973. Section 503 of the Rehabilitation Act of 1973 may still identify that they wish to be covered under Section 1482 of the Vocational Rehabilitation Act of 1973. All other individuals must voluntarily identify if they wish to be considered people with disabilities.

Applications will be accepted until August 30, 2000 or until suitable application is received. Submit a letter of application, curriculum vitae and names and addresses of three professional references.

WESLEY THEOLOGICAL SEMINARY

ANNOUNCEMENT OF A POSITION

AS JAMES CECIL LOGAN

PROFESSOR OF EVANGELISM

Wesley Theological Seminary announces an opening in a tenure-track position beginning with the academic year of 2001-2002. Candidate should hold a Ph.D. degree in one of the theological disciplines and be able to communicate commitment to the Evangelistic ministry of the church with spiritual supervision and intellectual integrity. Experience with a variety of church settings and connectional and ecumenical relationships is expected. In addition, candidates must possess the ability to assist seminarians in the formation of their personal lives for authentic ministry in and to the contemporary world. Candidate will be expected to teach in such areas as theology of evangelism, new congregational development and reformation of existing congregations, cross-cultural communication of the gospel, evangelism in a multi-cultural society, and the interface between Christian faith and a culturally and religiously pluralistic society. Knowledge of the global dimensions of evangelism, including mission, would be an asset. Candidates must possess a sound knowledge of the Wesleyan tradition. Applicants should demonstrate scholarship in evangelism studies and the broader missional outreach of the Church. Ordination and active participation in the life of a congregation are expected. Rank and compensation will be commensurate with experience. Persons interested in applying should send a resume with a cover letter describing their suitability for the position and direct letters of reference to:

Dr. Bruce C. Bird, Dean
Wesley Theological Seminary
4500 Massachusetts Avenue, NW
Washington, DC 20016

(send e-mail to: bcbird@wesleysem.edu)

The seminary is an equal opportunity employer.

COLUMBIA LAW SCHOOL

CENTER FOR PUBLIC INTEREST LAW

INTERNSHIP AND FELLOWSHIP COORDINATOR

The Internship and Fellowship Coordinator bears primary responsibility for administering, supporting, and coordinating the Center's internship and fellowship programs including its Human Rights Internship Program and other student and postgraduate fellowship programs. Reporting to the Dean of the Center for Public Interest Law, the incumbent counsels students, communicates with public interest organizations, Columbia Law School students, and other interested parties. In addition, the incumbent counsels students and advises them about the development of their curricula for the Human Rights Internship Program. The position requires excellent oral and written communication skills, strong interpersonal and organizational skills, and the ability to work independently and to develop and complete projects. Strong background in foreign languages is an asset.

Applications will be accepted until August 30, 2000 or until a suitable applicant is identified. Submit a letter of application, curriculum vitae, and names and addresses of three letters of professional reference to:

Department of Human Resources
Columbia Law School
435 W. 116th Street
New York, New York 10027

No e-mail applications will be accepted. Applications will be reviewed on a rolling basis.
Executive Director of the Arts and Sciences Foundation and Senior Associate Dean for Program Development
College of Arts and Sciences
UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

The University of North Carolina at Chapel Hill seeks a creative individual to serve as Executive Director of the Arts and Sciences Foundation and Senior Associate Dean for Program Development for the College of Arts and Sciences. The University of North Carolina at Chapel Hill was the first state university in the nation to open its doors to students (1775). Its College of Arts and Sciences is among the best in the nation. It comprises 730 faculty in 60 departments and programs in the performing arts, the humanities, the social sciences, and the natural and applied sciences, 15,000 students, and 96,000 alumni/alae.

The Executive Director of the Arts and Sciences Foundation reports jointly to the Chairmen of the Board of Directors of the Foundation and to the Dean of the College of Arts and Sciences. The Executive Director works collaboratively with administrators and faculty to manage the private resources of the College and define its top fund-raising priorities. The individual who holds this position will be expected to lead and expand a staff of fourteen. As a senior member of a coordinated University Development program, the Executive Director will be responsible for raising $300 million, the largest constituent goal of a $1.5 billion campaign.

The Executive Director must be an experienced and expert fund-raiser whose intellectual interests and breadth enable him or her to persuasively describe the nature and importance of public higher education, particularly the central role of the liberal arts and sciences. The successful candidate will also possess the following qualifications: ten years of fund-raising experience, a distinguished record of achievement in major gift fund raising; experience in capital campaign planning and development; the ability to work effectively with a broad range of constituents; exceptional communication skills; the ability to lead, manage, and motivate staff in a complex environment; and a bachelor's degree, although an advanced degree is preferred.

Letters of nomination or application should be submitted in writing to the consultants supporting the University in this search. Please contact Lucy A. Leske at

University of Wisconsin Oshkosh
Student Recruitment Specialist

The University of Wisconsin Oshkosh, a campus of 11,200 undergraduate and graduate students, seeks a Student Recruitment Specialist to administer and lead its efforts to further diversify the student body (www.uwosh.edu). Required: Bachelor's degree; 2-3 years of experience working with multicultural students; strong oral, written, organizational, interpersonal and basic computer skills. Knowledge of multicultural student recruitment techniques and practices, extensive travel and the ability to work well with multicultural communities are necessary. Preferred: Master's degree, admissions and multicultural student recruitment experience and bilingual ability (English/Spanish or English/Chinese). The minimum starting salary for this position is $35,000.

Application Deadline: August 14, 2000. Starting Date: ASAP. Submit a letter of interest, a separate one page statement describing your multicultural student work experience, a current resume, transcripts and contact information for three references to: Norris Batts, Chair, Search Committee, 800 Algoma Boulevard, UW Oshkosh, Oshkosh, WI 54901-8602. E-mail: batts@uwosh.edu. Fax: 920-234-1207

Wisconsin law requires release, upon request, of the names of all finalists as well as those applicants who do not file a written request that their identity not be revealed.

The University of Wisconsin Oshkosh is an equal opportunity, affirmative action employer.

Northeastern University, nationally recognized for its cooperative education program, is a private, nonsectarian university located in the heart of historic Boston. An integral part of the city's thriving educational and cultural life, it is dedicated to excellence in research and scholarship, and to high-quality, personalized service to individual and community needs. Northeastern is dedicated in fostering gender equity, cultural and ethnic diversity among its faculty and staff, and is proud of its diverse student body population.

Associate Director for Residential Life

Provide direction and support to 10 professional and over 400 nonprofessional staff serving a diverse population of approximately 5000 residents in four residential communities. Direct supervision of three Assistant Directors of Residential Life who supervise Master's degree professionals and an Assistant Director responsible for security system and staffing. Provide leadership to program development and recruitment for student development and community life. A Master's degree (doctorate preferred) in College Student Development or related field. Six to eight years in residential life administration with progressively greater responsibility. Experience supervising full-time professional residential staff and must have comprehensive understanding of student development theory, residence hall management, and security. Salary commensurate with experience. Priority review of applications given to applications received by July 31, 2000.

Please send resume to H. Langille, 6 Spence Hall 360 Huntington Avenue, Boston, MA 02115.

Northeastern University is an Equal Opportunity, Affirmative Action Title IX Employer committed to cultural, ethnic and racial diversity.
William Paterson University

Continuing Education and Distance Learning

Dean

The University invites applications and nominations for an innovative and visionary leader who can help in fulfilling the institution's role as a regional university with commitment to providing programs for citizens in northern New Jersey through continuing education and distance learning initiatives: ability to create and manage a self-supporting operation through income-generating programs; knowledge of and successful experience in program and fiscal management; and the proven ability to implement competitive admissions strategies, particularly for a public comprehensive university setting.

The Director of Admissions manages all aspects of the recruitment and admissions process, and directs the Admissions Office staff. The Director works closely with guidance counselors, principals, and other student counselors throughout the region to develop and expand pre-admissions activities and programs. The Director works with University colleagues, particularly those in Financial Aid, Bursar's Office, Registrar's Office, Admissions, Residence Life, and Freshman Life, to enhance the retention of students. The Director also assists in the development of various brochures, viewbooks, and other means of marketing the University with prospective students, parents, and the public.

Qualifications include a Master's degree and at least five years of successful admissions experience in a four-year institution; demonstrated successful use of enrollment strategies, including the application of technology in the admissions process; administrative and organizational skills in strategic planning, budget management, and staff supervision and development; and commitment to ensuring access to the University for diverse populations. Excellent interpersonal and communication skills are required.

Both of these positions are twelve month administrative appointments. Salary is negotiable and commensurate with experience and qualifications. Letters of application accompanied by a recent curriculum vitae and the names and addresses of three references should be sent to: Dr. Robert S. Katz, Executive Assistant to the Provost, 100 Reubinger Hall, Drawer HO, William Paterson University, 200 Pompton Road, Wayne, NJ 07470. Additional information about the University can be found at http://www.wpu.edu. The review of applications will begin immediately upon receipt and continue until the positions are filled.

William Paterson University
Wayne, New Jersey

An Equal Opportunity Institution Committed to Diversity.

University of Wisconsin

Whitewater

Chair Position
Department of Health, Physical Education Recreation and Coaching

The College of Education is seeking an experienced senior faculty member to chair the Department of Health, Physical Education, Recreation and Coaching (HPRC). The successful candidate will meet all criteria in teaching, research and service for tenure and qualify for rank as associate or full professor in the Department of HPRC at the time of appointment. The date of appointment is negotiable. The successful candidate will chair the Department of HPRC for a three-year term with the possibility for renewal and full teaching and scholarly obligations, as well as work in collaboration with intercollegiate athletics. The Administrative work consists of 25 percent of the position and 75 percent is allocated to instruction. The Department has 18 full-time faculty, over 200 students in the major and over 250 students in health, recreation and coaching minors. A full array of new and remodeled facilities include a $4 million facility house built in January 2000. The new field house will house four multi-purpose courts, a running track, and indoor practice space. The Williams Center, which houses the department, is under renovation. A new weight room/fitness center, four racquetball courts; a training room; new offices and classrooms; and a computer lab will occupy the Williams Center.

Qualifications for this position include an earned doctorate in one of the following: physical education, health education, recreation, administration or a related area. A qualified candidate must have experience teaching in higher education in one or more of the areas of physical education, health, recreation or coaching and document excellence in teaching and scholarly activity. The candidate should demonstrate strong leadership skills, document administrative experience and present evidence of having worked with diverse populations. The candidate must be able to create, facilitate and support; collaborative endeavors, development of research agendas, programmatic development, student recruitment, and an enthusiastic cadre of teacher/researchers in their own specialties. Grant writing and public school teaching experience are preferred.

To apply, send a letter of application noting position title, vita, unofficial transcripts (official transcripts must be furnished prior to contract), a copy of one of your refereed journal articles, and the name, address and telephone number of five references to:

Dr. Larry Kenney, Search Chair
College of Education
University of Wisconsin-Whitewater
800 W. Main Street
Whitewater, Wisconsin 53190
Fax: 262-472-5716

Review of applicants will begin on August 4 and continue until the position is filled. A scholarly record, including publications, is required for tenure.

Founded in 1806, the University of Wisconsin-Whitewater is a public comprehensive university with an enrollment of 10,500 students in 42 undergraduate and 16 graduate degree programs. Located in southeastern Wisconsin, with easy access to Madison, Milwaukee, and Chicago, UW-Whitewater is part of the 26-campus University of Wisconsin System.

Since 1963, the College of Education has held NCATE accreditation and has recently joined the Professional Development Group. The College faculty numbers 100 and serves 2,200 undergraduate and 450 graduate students. The College supports an integrated technology in all courses, international study opportunities for interested students and faculty, a Diversity Study Group on equity and multiculturalism, a faculty mentoring program, and several new initiatives in curriculum.

UW-Whitewater is an AA/EEO employer.

Women, minorities, Vietnam-era veterans and persons with disabilities are encouraged to apply. Nominees and applicants who have not been selected as finalists are not required to make written reference to their status, nor will they be revealed upon request.

For additional information contact the UW-Whitewater Web Page at...
EASTERN MICHIGAN UNIVERSITY  
YPSILANTI

Dean of the College of Technology

Eastern Michigan University invites applications and nominations for the position of Dean of the College of Technology. The Dean reports directly to Provost and Vice President for Academic Affairs and provides academic, intellectual, and administrative leadership to the College. The Dean will be responsible for improving and promoting the quality and effectiveness of the College’s instructional, research, and service programs, external affairs and fund raising. The successful candidate will have:

- Relevant knowledge and experience in program planning and development, budgeting, and administration typically acquired through earned doctorate in or related to one of the College’s disciplines.
- Exemplary research, teaching, and service credentials appropriate to the rank of full professor in one of the departments in the College.
- Committed to the expansion of off-campus academic programming and distance learning.
- Demonstrated and sustained faculty recruitment, program involvement, and leadership of faculty, and a strong commitment to diversity and community.
- Ability to generate external resources for the College in the form of gifts, grants and contracts.
- Experience in managing doctoral programs and supervising doctoral students.
- Understanding of, and commitment to, strong relations with industrial partners and the importance of technology transfer.

Eastern Michigan University is a public institution located in Ypsilanti, Michigan, seven miles east of Ann Arbor and 35 miles west of Detroit. The University enrolls approximately 24,000 students and employs 700 tenured-track faculty represented by the American Association of University Professors (AAUP). The College of Technology is housed primarily in Bill Hall, a new or renovated building is currently second on the list of capital improvements. The College includes four departments: Business and Technology Education, Industrial Technology, Interdisciplinary Technology, and Military Technology. Its 34 tenured-track faculty serve more than 1060 undergraduate and 360 graduate students. The College offers 31 degree programs—26 undergraduate and 5 graduate—and all accreditations are current. Among its centers of excellence are the Coatings Research Institute and its affiliated National Science Foundation Coatings Research Center. In Fall 2002 the College will offer its first, and the University’s third, doctoral degree, a Ph.D. in Technology. Review of applications will begin immediately and continue until the position is filled. The anticipated starting date for the Dean is January 1, 2001, but is negotiable.

Applications from women and members of minority groups are encouraged. EMTU is an affirmative action employer.
ROOSEVELT UNIVERSITY
Chicago • Schaumburg

Roosevelt University
Chicago, Illinois
PRESIDENT

Roosevelt seeks a President to lead the University into a new era of stature and prosperity. The next President will build on the successful, 12-year tenure of Dr. Theodore L. Griss, who will retire in August 2001. The President will continue to build partnerships with the City of Chicago, municipalities throughout the metropolitan region, corporations, and other institutions in support of the University’s mission and its commitment to students of all ages and backgrounds.

The University seeks a leader of integrity, intellect, creativity, and energy who has the capacity, experience, and commitment to advance the University’s mission, to support a community of nearly unparalleled diversity, to build on the institution’s momentum, and to create an environment for lively discourse, scholarly inquiry, and innovation. The President will have a progressive view of higher education, including the impact of technology on the educational marketplace.

The ideal candidate will have a record of outstanding achievement in higher education or another professional field. A terminal degree or its equivalent is desired, as is proven intellectual leadership, talent for fund raising and image building, and demonstrated success in strategic planning and fiscal management. The President will be committed to student success and to excellence in teaching, will advocate diversity in its broadest context, will embrace the challenges facing higher education, and will possess courage, resiliency, humor, and compassion.

Founded in 1945 by faculty, students, and staff dedicated to fundamental access to education, to excellence in teaching, and to social justice issues, Roosevelt University is a growing, private, non-sectarian, metropolitan university serving a complex urban/suburban community. More than 7,000 students are enrolled at campuses in downtown Chicago and in northwest suburban Schaumburg, at a Chicago neighborhood extension center, and at more than 30 corporate and other sites. Roosevelt’s five colleges offer bachelor’s degrees in approximately 100 majors and master’s degrees in more than 60 majors. Doctoral degrees are offered in Educational Administration and Clinical Psychology.

Review of credentials will commence on August 15 and will continue until the position is filled. Credentials review is currently underway and will continue until the search is complete. Nominations, expressions of interest, and inquiries should be forwarded to:

CONFERENCES

- Conference

Yo soy una Latina wannabe. Not an easy task when your family came from Scotland and England. However, I was fortunate that my parents were fascinated and engaged by Latin American cultures and Latin Americans and that, therefore, I was able to spend time in Colombia, Mexico, and Spain. There I gained an appreciation of the great richness and diversity of those lifeways shaped by the intersections of Old World Spain, New World indigenous cultures, and diasporan Africa—my love of which has never diminished.

What have I learned from this—other than to enjoy the merengue and the cumbia, pan de yuca and pico de gallo, Borges and Amado? I have learned to value the power of complexity and diversity to strengthen cultures, to recognize that human groups share basic responses to common needs, and that cultural change is constant. This recognition of the sharedness and distinctiveness of human groups, and the study of those responses, led me into anthropology. I am an anthropologist because I loved living in Latin America, was fascinated working in the lower Rio Grande Valley of the U.S., feel at home in Spain, Colombia, and Ecuador, and get homesick if I am too long without arroz con pollo, frijoles, or café con leche.

As an anthropologist, I spend my professional life studying people and their cultures, how people are changed by new events, and how those changes are integrated into cultural systems. Some changes occur more rapidly than others: incorporation of computers and computer technology such as e-mail has spread throughout Latin America very quickly. Other changes, such as those affecting gender roles and family life, might move at a slower pace; however, all cultural systems are ever in the process of change. The study of these systems is increasingly attracting young Latina/Latino scholars.

Since the 1960s, there have been well-identified and defined groups of scholars in area studies programs and cultural studies programs such as Latino, Black, African, Mexican/Mexican American, and Latin American and Caribbean Studies, to name but a few. But, increasingly, Latina/Latino young scholars are turning to anthropology as a way to combine the study of ethnicity with comparative analyses of cultural systems. This allows students to research their own area of interest in depth, and simultaneously integrate that study into a broader context.

In the Applied Anthropology Program at USF, which emphasizes both applied research and Latin America and the Caribbean, more Latina/Latino students than ever before have applied to and been accepted into M.A. and Ph.D. programs. They are working with anthropology faculty in many areas of specialized research: medical anthropology, community development, ethnicity and identity, and museum studies, to name a few.

Through their increased numbers, Latina/Latino students are changing what research is being conducted and how it is conducted, as well as enhancing the visibility of Latinos/Latinas on campus, within the graduate programs, and providing unique and valuable connections with the local community. Faculty research projects that incorporate students into research activities have increasingly focused on Latin America and the Latino communities in the local area. Latina/Latino students are actively researching local Latin American and Caribbean mutual aid societies, community nutrition and education programs, and AIDS prevention programs aimed at Latinos. Students are working with faculty on international research projects that take them overseas. In May, three students joined me in Ecuador to investigate the effects on children's health of living with the threat of active volcanoes. In June and July, students worked in the Dominican Republic and Cuba, comparing health systems and health outcomes in those two countries. These projects would have been impossible without students whose skills and knowledge included Spanish and an interest in Latin American cultures. Moreover, the projects are greatly enriched by the students' first-hand knowledge of Latino cultures.

Latina/Latino graduate students in our program are changing the cultural system of graduate education, making it more inclusive, better able to recognize heterogeneity within groups, and more inclined to reward the kind of intellectual and cultural diversity that creates strength based on skills, experience, and abilities.

Globalization and Higher Education

BY GUSTAVO A. MELLANDER

We hear a lot about globalization here in Washington. Supporters say that it brings enormous economic and social benefits to developing countries because it creates jobs that would not otherwise exist. On the downside, some believe that it just perpetuates class division: a world of the wealthy and privileged and a world of exploited, downtrodden masses. Further, they argue, the environment has been pillaged, and indigenous peoples have been pushed off their historic lands.

Many college students nationwide have been energized by the negative consequences of globalization. Some observers believe that their opposition will spawn the first mass student movement of the 21st century. They have already flexed their muscles in both Seattle and Washington, D.C. A.T. Kearney recently released The Globalization Ledger in Washington, DC. It purports that rapidly globalization has enjoyed economic growth that was, on average, 30 to 50 percent higher than those of their more slowly globalizing neighbors, but they agree that rising income inequality has developed.

Fewer below the Poverty Line
Paul A. Laudicina, managing director of A.T. Kearney’s Global Business Policy Council, told Hispanic Outlook, “Although the wealthy in rapidly globalizing countries may enjoy a larger slice of the pie, the pie has grown so large that the poor are now realizing more economic benefits as well.” Globalization from 1980 to 1990 led to a significant drop in the percentage of the world’s population living in poverty. The number of people earning less than U.S. $2 per day in inflation-adjusted purchasing power terms—the World Bank’s standard for absolute poverty—decreased by more than 40 percent, to 727 million in 1990 from 1.3 billion in 1980. The number of people earning more than $2 a day grew by well over one billion over the same period.

In percentage terms, the study found that the world’s population earning less than $2 a day fell to 33 percent in 1990 from 79 percent in 1980. Those earning more than $2 a day rose to 63.4 percent in 1990 from 65.6 percent, and the portion earning more than $3 a day rose to 60 percent from 48 percent.

Given the deterioration of income distribution during the 1980s, these results could not have been achieved without the robust growth associated with globalization. Absent economic growth, levels of absolute poverty would have risen dramatically—by 344 percent of world population in 1980 to 424 percent by 1990, The Globalization Ledger reports. Instead, the study indicates a dramatic drop between 1980 and 1990 in the number of people living in absolute poverty—down to 17 percent of the world’s population. In concrete terms, this means that 1.4 billion people have escaped abject poverty as a result of globalization.

“What results show the net impact of two opposing forces on poverty—the positive effect of overall economic growth, which boosts incomes throughout as economy, and the negative impact of the more inequitable income distribution that has accompanied globalization,” Laudicina noted. “Dissecting the impact of these two forces shows clearly how the economic impact of worsening income distribution has been more than offset by the positive impact of economic growth.”

What about Higher Education?
Continuing my childlike belief in the value and power of education, I wondered how globalization might be impacting higher education, particularly in Latin America.

Jay W. Scheer from A.T. Kearney told Hispanic Outlook, “The data suggests rapidly globalizing countries spend considerably more on secondary and tertiary education than more slowly globalizing countries.” Countries ranked in the top tier as “aggressively globalizing” countries spent 16.7 times more on secondary education and 9.7 times more on secondary education than they did on primary education.

In contrast, countries at the opposite end of the globalization spectrum spent only 2.5 times as much on tertiary education and 15 times as much on secondary education. This pattern appears to reflect the fact that rapid globalizers, which experienced higher average rates of economic growth over the course of the study period, have more money to spend on social concerns. But it also reflects the importance of education as a social investment, without which countries would not likely have sufficient human capital to make the transition to international competitiveness.

The report also suggests that rapidly globalizing countries have witnessed higher growth in enrollment rates in both secondary and tertiary education. For the top tier of “aggressively globalizing” countries, university enrollment rose by 1.3 percent after 1993, the first year in which complete data was available for comparison.

In contrast, university enrollment rose by only one-third that amount for countries at the opposite end of the globalization spectrum. These data are said to reflect the spending priorities of rapidly globalizing countries but also give evidence of the rising demand for highly educated workers and the increasing perception that education broadens the scope of economic opportunity in developing countries that are undergoing the economic transformation associated with globalization.

Unfortunately, the complicated methodology makes it difficult to disaggregate data by individual countries, so it is not possible to provide much more clarity on the Hispanic countries in the study, which included Mexico, Colombia, Venezuela, Chile, and Argentina.

Summary
Globalization has produced sharply higher rates of economic growth and helped lift millions of people above the World Bank’s poverty line while at the same time promoting substantial improvements in social welfare.

But the countries moving most quickly to join the world economy, which have enjoyed these benefits most, also have seen the gap between rich and poor widen dramatically. Environmental issues are the consequence of indigenous peoples raise serious questions as well.

One can only hope that investments in education will continue for their payoff is certain, beneficial, and permanent.

Dr. Mellander is a professor at George Mason University.
The battle had been brewing for quite some time. Last year, the U.S. Department of Education’s Office of Civil Rights issued a thick document entitled “The Use of Tests when Making High-Stakes Decisions for Students: A Resource Guide for Educators and Policymakers.” The result: a clamor from many corners that the government was tilting toward mandating federal testing standards. Even though the title indicated the guide was just that, critics worried that it suggested stronger across-the-board requirements.

Test-makers and test opponents alike rallied for revisions. Many argued that the guide imposed an extremely high and thus unattainable bar that few could reach. The first draft was subsequently revised, and a second version was released last December. Again, the outcry was considerable, and the architects of the Guide eventually settled down to work on a third and–it is hoped–final draft.

“There is more government oversight and control over the food we feed our pets than over the tests that we give our children.”

Bob Schaeffer, Public Education Director, FairTest

Fay-Bustillos, vice president of Los Programs for the Mexican American Legal Defense and Educational Fund, wrote a recent version.

MALDEF, a Latino civil rights group, fired off a letter early this year with hopes of influencing the final version of the document. “This guide should not simply regurgitate the education measurement experts’ views, but offer a unique perspective of a civil rights agency on these important questions,” she wrote.

In creating this first-ever document of its kind, the Department of Education is carefully navigating a minefield: it’s attempting to map a framework for schools and test-makers of testing issues—what is allowed by law, and what is not—which balancing concerns of test proponents and opponents.

OCR elicited input from more than 40 Kindergarten to 12th grade education agencies and groups, higher education groups and business. At press time, OCR was rewriting an expected final version of the document without straying from its original mission to address the heightened emphasis on su
dards and accountability nationwide. It was awaiting further recommendations from the National Academy of Sciences Board on Testing and Assessment, which already had organized a hearing to discuss the guide.

Officials are planning to encourage more input from the public, and to have published a final version by the start of the 2000-2001 academic year. Scott Palmer, OCR's deputy assistant secretary for civil rights, says that the document will be a "practical tool for educators and policymakers." The guide will "assist in the planning and implementation of policies regarding the use of tests when making high-stakes decisions for students." It is not, OCR has insisted, a step toward mandating federal standards, only a step toward explaining what has been upheld—or toppled—in the court of law.

"This can be a very important document to help decision-makers understand more about the choices they face and some of the effects of the strategies they might be considering," says Michael Feuer, the National Academy of Sciences' executive director of the Center for Education and director of its Board of Testing and Assessment.

"One of the functions of the academy is to provide independent, objective, science-based advice to the federal government," he adds, "and this is an issue for which we were asked to provide that kind of service."

The second, 8-page version is a menu of professional standards, relevant federal laws that apply to testing, and references that can aid schools and districts in crafting testing practices.

It contains more than 30 federal court opinions and more than 30 test-measurement standards.

The timing of the report is crucial to OCR. Its release comes as more states require tests so students can graduate. By 2003, it's expected that 26 states will make testing conditional for graduation, and six states now use tests as conditions for grade promotion. The stepped-up use of testing has elicited a torrent of requests to OCR for advice and technical assistance regarding standards. At the same time, the agency has been encountering a steep rise in the number of testing-discrimination complaints.

Yet, according to the National Research Council Board on Testing and Assessment, many policy-makers and educators are ill-informed about test measurement standards that shape testing policies and practices. That has led to vague and often improper decision-making.

HO obtained a copy of the most recent draft. The Guide expresses the authors' desires to inform decisions about tests when those tests are used to affect how students are promoted from one grade to the next, are graduated from high school, or are considered for acceptance into the higher education arena.

"Just as we believe that good test use practices can advance high standards for learning and equal opportunity, we know that educationally inappropriate uses of tests do not," the document reads.

"If we want this generation of test-taking students and their teachers and schools to meet high standards, then we should insist that the tests they take meet high standards. As foundations for judgments that profoundly shape the lives of students, these tests must be used in ways that actually reflect educational standards and that do not inappropriately deny opportunities to students based on their race, national origin, sex or disability."

The document maps out federal non-discrimination laws that support large-scale standardized testing when used in "educationally appropriate ways." It attempts to address discrimination complaints by insisting that federal law guarantees equal opportunity, but not equal test results.

Results that show groups of students performing better than others should warrant examination, it reads.

"The goal of the federal legal standards is to help promote accurate and fair decisions that have real consequences for students—in the context of standards established by educators—not to water down the standards or deter educators from establishing and applying sensible and rigorous standards," it reads.

In a recent interview, Fay-Bustillos said that the document could eventually turn out to be "a useful guide," once it addresses the concerns of civil rights groups. "The benefit of it is that there are a lot of institutions that are focused on the effects of tests but don't always focus on language issues, issues facing Latino students, issues of using a test to make certain decisions."

The image shows a chart titled "SAT Scores by Family Income." The chart displays data on average SAT scores for different income brackets. The chart includes bars for average scores of different income categories. The source of the data is cited as "College Board Report No. 04.5."
"They don't really focus on all of these issues within the context of civil rights enforcement. This document really makes people focus on that and look at it from a civil rights perspective. I think it is positive and will really help institutions and schools to do that."

The second version already assembles a list of applicable laws and sources that schools and districts should consider. Among those cited:
- Title VI of the Civil Rights Act of 1964, which prohibits race and national origin discrimination in programs and activities that receive federal financial assistance. But Title VI regulations don't address the use of tests and assessment procedures; instead, they bar discrimination based on race, color, or national origin in any service, financial aid, or other benefit provided to the recipient.
- Title IX of the Education Amendments of 1972, which prohibits sex discrimination in education programs receiving federal financial assistance. When it comes to testing, the Guide indicates that Title IX's regulations specifically prohibits the discriminatory use of tests/assessment procedures in admissions.
- Individual court cases such as Lau vs. Nichols, in which magistrates found the San Francisco Unified School District violated Title VI by failing to take affirmative steps to meet the instructional needs of some limited-English-proficient students.

"There is a lot of legal coverage in the document," says Wayne Camara, the executive director of research for The College Board. "It is a resource guide from OCR, so there is a heavy dose of legal guidance and legal interpretations of how different court decisions can be interpreted and court rulings where tests have been an issue.

"OCR says this is a resource guide as opposed to formal federal guidelines, but on the other hand, because it's issued by OCR and everyone realizes this is an agency that legally enforces any type of investigation about due process and adverse impact on underrepresented groups, if OCR is advising you to do certain things, there's a strong implication that this is what they want.

"It's like guidance coming out of the IRS. One would ignore it at one's own peril."

The College Board had expressed significant reduction or elimination of tests in its instances," Camara says.

"Our position is that what the Department of Education should worry about is not just fairness in tests but fairness in anything used in high-stakes decisions."

The Guide addresses tests throughout academia, from the lowest grades to the highest level, spells out what the profession recognizes as standards of sounding practices are, and it raises questions that districts should consider such as: What are the objectives of the tests? What are the intermediate goals? Are they clear?

It also broaches concerns about disparities among groups based on gender and race. "All the entire guide is devoted to differences among minority groups," Camara observes. "That's an example: where two groups differ in terms of performance on a test, it's 'Here's what you should do.'

That is a key concern because years of complaints about the parity among results and about often disproportionate numbers of African Americans and Latinos versus white students have fared poorly on exams. The result is a skew of promotions, graduation rates, college acceptance ratios.

But federal law goes only so far in addressing this. The Guide clearly states that "under federal law, a statistical significant difference in outcomes suggests the need for further examination of the educational practices in question that have caused the disparities...but disparate impact is not sufficient to prove a violation of federal civil rights laws."

Courts have examined the questions when determine whether those practices are discriminatory: Does the practice result in substantial differences in the award of benefits or services based on race, national origin, or sex? Is the practice educationally justified? And is there an alternative valid alternative?

The Guide, additionally discusses accurate testing limited-English-proficient students.
students with disabilities. It addresses accommodations that could be made in the administration of tests, measures such as alterations to the length of test-taking time or size of the testing group.

The Guide has greater potential than in its current form, says Bob Schaeffer, public education director for FairTest, a 15-year-old group that supports government regulation of the test.

"Tests have risen to such a prominent gatekeeping position in our society," Schaeffer says, and unchecked practices have fostered misuse and, therefore, tipped the scales of educational favoritism away from Latino and African American students.

Most of the civil rights community has favored stronger standards, ones that could bring tests in line and eventually ensure more balance, fairness, and reliability, he says.

"There is a huge impact on minorities from the use of cutoff scores and passing scores on tests, for a variety of reasons. Many score lower on average on standardized tests than do whites, and when you use cutoff scores, there is a huge, disparate impact."

FairTest has maintained that the Guide is weak and that there is no enforceability.

"It does say all of the right things from our perspective, but it does not mandate anything," he says. "There is more government oversight and control over the food we feed our pets than over the tests that we give our children. There is no test you have to take to be a test-maker. You can hang out a shingle and become a test-maker. If a school district accepts your bid for a contract, you'd be making a test."

"There is a need to assure that these devices at least meet the minimum standards of quality, which include accuracy, relevance, fairness, and openness."

FairTest maintains that the increased reliance on tests, especially when tests are used as the sole or top criteria for promotion or retention, is woefully misguided. "No test should be used as the single factor for making a life-altering decision," Schaeffer says.

He echoes OCR's wording that it is improper for anyone to use test scores as the single factor to determine high school graduation or college admissions. The College Board's Camara agrees on that note, saying that test scores should never be the single deciding factor.

The eventual release of the Guide will likely spark even more debate. How will policy-makers and educators use it? As a guidebook or as a rulebook? Will this inevitably lead to its content being mandated—so that all testing falls under the same structure?

"It will have its biggest impact on state testing programs," says Camara. "Once this comes out, it will probably improve the practice of testing. Over time, many policy-makers and educators will be more aware of the appropriate use of tests and how they can be misused."

"There should be a lot more education about use and misuse of tests. I don't think mandating standards would work because local school districts have a great deal of autonomy in education and they use different tests different ways. I don't think you can federalize the use of tests."

Schaeffer disagrees. He says that the better solution is for the guide to become the letter of the law and for the government to step in to monitor tests, standards, and test-makers.

"We don't believe that industry self-regulation is realistic, and we are concerned that the consumer-report type of model, where the independent expert comments on and rates test quality, is too weak. Governments need to regulate test quality and use."

"There has been substantial discussion about what is the best way to regulate tests and test use, and some people have argued that we need a government agency like the Food and Drug Administration. In this country, before a manufacturer can sell a drug, he must prove it's safe and effective. This was done to drive snake oil out of the marketplace."

"Some people would argue we need something similar to drive educational snake oil out of the marketplace."

Extra Mile Award to University of Connecticut's Jim Henkel

by Inés Pinto Alicea

Jim Henkel, associate dean of the University of Connecticut graduate school, is modest about his efforts to diversify his campus, but he is considered a star for his work in New England.

Henkel said that in the mid-1980s, he looked at his university's diversity efforts and saw a dismal situation. Henkel said that the numbers of students of color were low and funding to improve the situation was scant. At the time, only about $6,000 in graduate fellowships was available for students of color.

"I looked at our numbers, and we were bleaker than bleak," said Henkel, associate provost for research and graduate education and a faculty member in the university's school of pharmacy. "I compared us to other universities, and we were way behind. It was complete neglect."

Henkel helped his campus raise nearly $1 million to provide fellowship money for graduate-level minority students. He also was instrumental in increasing the numbers of minorities at the campus, based in Storrs, particularly at the doctoral level. He says that diversifying the campus not only was socially right but also necessary to make the campus more competitive and to expose students to a variety of people.

His work has not gone unnoticed. The New England Board of Higher Education (NEBHE) bestowed upon Henkel one of its highest honors, the Extra Mile Award, for his outstanding service and leadership in the organization's New England Doctoral and Dissertation Scholars Program underrepresented minorities. NEBHE works intensively with more than a dozen science, engineering, and math doctoral departments to help improve their recruitment and retention of U.S. minorities. The program provides support to selected scholars in a number of ways, including tuition forgiveness in all years of graduate work. As of winter 2000, the program serves 60 doctoral scholars and boasts a 90 percent retention rate. NEBHE also helps graduating scholars with their academic job search.

"I was completely shocked, thrilled, and honored," said Henkel of the award. "I was blown away. I am not looking for awards. Our rewards are getting people into the program and seeing them graduate."

JoAnn Moody, NEBHE vice president and director of Excellence through Diversity, said that Henkel has served as a key adviser to her since NEBHE program was launched. Nominations for the award come from student NEBHE staff or advisers, and the final selection of the awardee is made by the NEBHE staff. Recipients of the Extra Mile Award receive a plaque expressing deep gratitude.
Moody said that Henkel was instrumental in getting the program off to a great start, adding that he has helped recruit more than a dozen minorities to the program at the University of Connecticut and several more to programs at other participating universities. "He's worked hard for his university and helped the program throughout the region."

Henkel, the third person to receive the prestigious award, "has a broad vision, and he wants the minority students to succeed in science," Moody said. "That sometimes means that his university doesn't always win in recruiting students. What is important to him is that the student is going to be a scientist. He always takes the high road, and it's always what is in the best interest of the student."

Moody said that Henkel serves as a mentor-at-large for the program. He is not assigned to serve as a dissertation advisor to the students nor as an adviser in general to any specific student but works on behalf of all of the students in the program.

"Because he's in the top administration, he can point out the educational benefits of diversity to key power-holders at his university," said Moody. He not only talks the talk— he walks the walk.

Henkel said that his interest in diversity issues was inspired by his work with his Ph.D. advisor in organic chemistry, Dr. Langley Spurlock, at Brown University. Spurlock, an African American, dealt with numerous racial snubs from many people with dignity and grace, which further sensitized Henkel to barriers that minorities face in the sciences.

"I was comfortable going in and working with him," said Henkel. "When I started working with him, I would see the reactions to him that he shrugged off. I'd say, 'How can you let them do that?'"

Henkel said that the experience made him explore further the difficulties that minorities encountered in graduate programs. He found that more work needed to be done in improving the mentoring process that students undergo. Many faculty members are not natural mentors, nor are they trained in how to be good mentors, he said, so they tend to repeat what they learned from their own mentors. Often that meant that the students were left alone for long stretches without guidance.

Some of the faculty said Henkel "would say, 'I did it the old way, so why shouldn't they?'"

"Graduate education is not conducive to learning mentoring skills. What we needed was a different model. We needed to help the student acquire the skills that would make them successful. Were trying to change the culture of faculty. We start with a few departments and have those departments serve as models for others." He noted that his university's molecular and cell biology department has been extremely successful in recruiting and retaining minority doctoral students.

Henkel said that the process of increasing the numbers of minority faculty is slow since it takes 10 years to fully prepare students, that is, to get them through their doctorates. "We have to be in it for the long haul," he said.

Moody said that Henkel helped develop clustering an important component of the program that has improved its success rate. Minority doctoral students are enrolled in a participating doctoral department in a cluster, that is, four to six scholars are sent to one department at the same time. Before, minority students were sent alone to a department and often found a chilly climate, he said. That hurt the student because there was no support system, he said.

When several students enroll at the same time, then they are a presence, and the environment tends to be improved, Henkel said. The student and faculty members of the designated department also undergo extensive training on mentoring, multiculturalism, and other issues.

"Since 1990, we have found UConn to be a trendsetter and you to be the prime mover," said Mooe in a letter to Henkel announcing the award. The University of Connecticut has some 20,000 students. About 1,000 are in graduate programs.

NEBHE's Moody is not the only one impressed with Henkel's work. "From what I hear from a few UConn students, Jim is a great guy who appears to be committed to creating opportunities for minority grad students at UConn," said Catalina Martinez, one of the doctoral students receiving support through the program and one of the students who presented Henkel with his award. Martinez is a third-year doctoral candidate in oceanography at the Graduate School of Oceanography at the University of Rhode Island in Narragansett. Martinez recently won a National Science foundation award—the Rhode Island Marine and Environment
Graduate Teaching Fellowship in K-12—that will enable her to help teach inner-city youth for one full year.

NEBHE is a nonprofit, congressionally authorized interstate agency whose mission is to encourage cooperation and the efficient use of resources among New England's schools. There are 282 schools in the six-state region encompassing Maine, New Hampshire, Connecticut, Massachusetts, Rhode Island, and Vermont. The schools in the region confer about seven percent of all bachelor's degrees granted by U.S. colleges and universities, nine percent of master's degrees, eight percent of doctorates, and seven percent of first professional degrees in fields such as law and medicine.

In 1996, New England's schools conferred nearly 154,000 degrees. Hispanics earned just under 3,900 or 2.5 percent. New England's share of degrees conferred on Hispanics in the U.S. had dropped by nearly two percentage points in master's, first professional, and doctoral degrees between 1990-1996. Hispanic enrollment grew by 46 percent in the region in the same time period. Yet of the nearly 800,000 students enrolled in New England's schools in 1996, the most recent data available, only 30,998, or 3.8 percent, were Hispanic.

NEBHE is not the only regional higher education board to confer honor bestowed on Henkel, the Extra Mile award. Annually, each of the three regional boards of higher education offers an award to someone who has gone beyond the call of duty for the Compact for Faculty Diversity, the unit program designed to bolster the number of minorities getting doctorates. The three regional boards are New England Board of Higher Education, the Southern Regional Education Board, and the Western Interstate Commission for Higher Education. Each carries out work in its region similar to NEBHE's.

Extra Mile awardees for 1999-2000 school year for Southern Regional Education Board's Doctoral Scholars Prog are Dr. Donald R. Cole, associate dean of the graduate school; McNair Program director at University of Mississippi, and Sherron Jackson, director of equal opportunity and facilities at the Kentucky Council on Postsecondary Education. Western Interstate Commission for Higher Education gave its Extra award to the New Mexico Commission of Higher Education.
Last December, speaking at the Florida State Democratic Convention, President Clinton noted that affirmative action "actually began under a Republican administration, back when both parties were really committed to civil rights." He mentioned his own "mend it, don't end it" policy, and efforts over the last seven years to develop economic, political, and social policies that included and benefited "everybody."

"But you cannot look at the record..." he said, "and make a case that we'd be better off by walking away from one of the tools that has helped to bring us together as a nation."

"Don't give up on affirmative action," urged Clinton. "Go out there and defend it."

A month earlier, Governor Jeb Bush had announced his "One Florida Initiative," a plan that ended race-based undergraduate admissions and minority set-asides but guaranteed acceptance in Florida's public colleges of the top 20 percent of students who've completed a prescribed curriculum—that isn't available at some of the state's poorest schools.

As reported in HO April 7, some suggested that One Florida was launched to keep a Proposition 209 at bay. Others damned the initiative as anti-minority. In March, as Jeb Bush gave his state address, claiming that the One Florida Initiative was the will of the majority, thousands protested in Tallahassee. Whether 11,000 attended, as reported by the Tallahassee police, or 50,000, as reported by the NAACP, it was one of the largest civil rights rallies in Florida history. And it was to no apparent avail. The Board of Regents of Florida's public university system, and other relevant bodies approved the Bush plan.

Heeding the Handwriting

At least one savvy Floridian read the handwriting on the wall: California, Texas, and Washington State and taken action before Florida made its debut. That person was the Tallahassee-born Sa D'Alemberte, president of the Florida State University the last six years, earlier dean of its College of Law.

D'Alemberte's own education took place largely below the Mason-Dixon line—a B.A. in political science from the University of the South, summer studies at FSU and UV, a fellowship at the London School of Economics and Political Science, a J.D. with honors from the University of Florida. He's won awards from the Anti-Defamation League, associations of trial lawyers, and criminal defense lawyers, the National Coalition of Jewish Women in Florida, and the Florida Civil Liberties Union, the A.B.A.—plus an Emmy for his work in open government.

To some, he is a "flaming liberal," a label he says he earned or lost over issues of civil rights, opposition to the death penalty, the Vietnam War, support of education, and safety...
social programs," "Otherwise," he said, "I am not so liberal, but I do not mind the label."

D'Alemberte spent six years as Dade County's representative in the Florida House, and later chaired the state's Constitution Revision Commission and Commission on Ethics. He seems uniquely positioned to assess a risk to civil rights in Florida. And he came out in support of One Florida. Indeed, he told "HO" that he believes that "the Bush plan, if properly funded and implemented at the high school level, will increase opportunities for the disadvantaged."

After the first public hearing was held on the plan, a hearing that some felt should have taken place far earlier, D'Alemberte wrote an opinion piece "to explain why I do not have a problem with the proposal as it relates to undergraduate education." Printed in the Tallahassee Democrat February 2, his article stated that "Florida State University is using affirmative action, but we have abandoned race-based admissions."

"The plan calls for the end of race as the sole criteria for admission," wrote D'Alemberte, "but rather than ending affirmative action, Gov. Jeb Bush's plan calls for increased initiatives in bringing about diversity."

And "increase initiatives" is what Florida State University did—in advance of One Florida and in response to California's 209 and Hopwood.

"The position is something that we were moving toward well before the governor announced his plan," D'Alemberte told "HO," "and that is why we were fully prepared to implement it right away... We had already spent the time to analyze the possible consequences of a constitutional amendment or adverse court action...."

FSU Admissions

"It is true," said John Barnhill. FSU's director of admissions, "that we were looking at the issue of race in admissions prior to the governor's One Florida Initiative. Florida colleges had initially factored in race to compensate for the state's historically segregated higher education system. They were essentially required to do so by federal mandate."

But more recently, said Barnhill, "the use of race in admissions was being questioned at the national level by court decisions and at the state level in ballot initiatives. In following these various events, our admissions committee began to analyze our policies to see if we could effectively maintain our ethnic diversity if we adopted a race-blind process."

"We started slowly by adding additional factors such as first-generation status and socioeconomic considerations to our race-conscious policies. We did not eliminate the use of race, but we broadened it... At the same time, we felt it was necessary to increase our applicant pool of prospective students. We put a lot of money and new programs into place to attract more students. Publications were revamped, communication plans were adopted, and more students were contacted. All of these efforts have paid off—we have increased our applications this year by 15 percent for the fall—2,859, and by 49 percent for the summer—1,709."

"I wish I could tell you that the city of Tallahassee had a strong Hispanic presence that we could call upon to increase our applicant pool of Hispanic students, but the truth is that it does not," said Barnhill. "Our increases have been from students outside the Tallahassee area who have been attracted to what I think is a welcoming community that embraces diversity."

"One trend I have noticed in Hispanic prospective students is the willingness to consider leaving home to go to school. When I started at FSU 22 years ago as an admissions recruiter, I was amazed at the reluctance of some parents to allow their sons and daughters (mostly daughters) to consider FSU because of its distance from home. While I still see that today, it is definitely not as severe as it used to be."

Staff writer Melanie Yeager. Tallahassee Democrat, interviewed a high school guidance counselor in Orlando who said that FSU "is just head and shoulders above everybody else with its personal contact." Yeager reported that FSU's recruiting budget had gone from $200,000 a year to $1.2 million. But at an average of $340 spent on recruitment per student, it is still spending $60 less than the national average, which is $400. FSU's current population includes close to 2,400 Hispanics and more than 4,100 African Americans. According to D'Alemberte, minorities at FSU have grown over the past ten years from 15 percent to 25 percent of its population, as increased enrollment continues.

"The most recent increase is decided due to FSU's phonebank, a program in which 32 student employees made nearly 30,000 calls to prospective students or to their parents last fall talking about FSU programs and answering questions—most of them about life on campus. Information about the students becomes part of a database that's used in subsequent calls.

Barnhill told "HO" that schools in larger metropolitan areas are seeing big increases in part-time students and in students beyond their twenties, but not FSU. "While it is true that nontraditional students are flocking to college campuses, most of ours are coming to us straight from high school."

FSU's students are "traditional" in another way too. "Our admissions process puts a lot of weight on academic performance," Barnhill told "HO," "so if a student has not performed well in high school, chances are we will not admit." When Barnhill spoke with Melanie Yeager in January, he said that of 190 Black and 12 Hispanic students recently accepted, only eight had GPA's below 3.0. But under FSU's new admissions process..."
students get a plus not only for good grades in high school, taking honors classes, and taking calculus but also for being first-generation, for being in a low-income family, and for taking advanced foreign language courses—which could give an edge to the bilingual student. Minuses are accrued, too, however—for low-ranking in class, weak academic schedule, poor grades, lacking college prep courses, and needing remedial work in reading, writing, or math.

HO asked Barnhill what is done to give a "second chance" to someone who perhaps performed poorly in high school but now seems to demonstrate academic potential and maturity. "The state of Florida," he said, "has a strong community college system, and second chance students can gain admission to FSU after completing a two-year program at a community college." Will FSU be able to maintain its gains in minority recruitment as other institutions beef up their own efforts? And will the state of Florida provide the money to adequately prepare all its youths for a college education?

Asked by HO where the state of Florida would fall on the liberal/conservative spectrum, D’Alemberte responded that Florida is "now quite a conservative state." Having noticed mostly African Americans cited by mainstream media in accounts of the fight for affirmative action in Florida, HO asked him too where he thought Florida’s immigrant population fell within that same spectrum. This he called a "very complex question." "There are many different immigrant populations," said D’Alemberte, "but on the issue of affirmative action, I believe that the majority of each will support affirmative action."

"By the way," he added, "I believe that the Bush plan does not abolish affirmative action and, indeed, requires our affirmative efforts to recruit and retain students."

Asked what he sees as the chief legal issues facing higher education today, he had this to say: "I will give only one at this time and that is the issue addressed by the One Florida plan. As I read the cases and watch the initiative movements, I fear that the power to run affirmative action programs—those that do not use race as a factor for admission decisions—will be diminished unless we take positive steps. I view One Florida as a positive step."

Other Voices
The NAACP announced in mid-May that it had effectively stopped Black conservative Ward Connerly's plan to place on the November ballot in Florida the same kind of anti-affirmative action measure he helped pass in California an Washington State. Connerly was unable to collect the 400,000 signatures needed but, reported the NAACP "vowed to renew his bid to dismantle affirmative action by returning to Florida in 2002."

NAACP President and CEO Kweisi Mfume said, "We must use this victory to educate Floridians as well as the rest of the nation about the merits of affirmative action and equal opportunity. We stopped him in Florida once. We must certainly stop him there again or anywhere else I attempt to block the hard-earned civil rights gains provided to women and minorities through affirmative action," he added. Mfume also said that if the NAACP would continue its fight against Governor Jeb Bush’s One Florida plan, which "requires constant scrutiny because it is essentially the same as equally as harmful as Connerly’s campaign."

Publisher Earl G. Graves, in the May issue Black Enterprise, said of One Florida: "It’s truly Trojan horse—perhaps offered with good intention but with the potential to be as destructive to equal opportunity for African Americans as California Proposition 209 and Texas’s Hopwood decision."
Because of its very diverse student population, California State University has been described as "one of the most interesting and unique in the world" and also referred to as a "little United Nations." More than half of all students are Hispanic, nearly one-quarter are Asian American, and almost one in ten is African American. Three of every five students are female. The institution takes pride in this diversity and has used this special attribute to provide students with a more realistic, global education.

Cal State-L.A. scholars range in age from their teens to their eighties and come from all over California, most of the 50 states, and 120 other nations. In ethnic, cultural, economic, and social background, and in religious preference, Cal State-L.A. students "resemble the world at large." In recent years, these diverse Cal State-L.A. students have received top national and regional awards in areas from chemistry to journalism, business, and history. For example, since 1990, engineering and technology students have designed, built, and raced three national award-winning solar cars, with the latest kudos earned for placing first nationally in 1997. That year, the student-built and driven flaming-yellow Solar Eagle III won First Place in the North American Sunrayce solar car competition, besting 35 prestigious U.S. and Canadian universities, including UC-Berkeley, Stanford, and MIT (Massachusetts Institute of Technology).

This stellar win came as no surprise to University President James M. Rosser, who has served Cal State University-Los Angeles in that office for just over twenty years. He is its sixth president. Dr. Rosser says that "for over half a century, Cal State-L.A. has been providing an educational foundation of critical thinking and problem-solving skills that has enabled our students to become today's leaders. Cal State-L.A. continues to provide unlimited learning opportunities in a setting of academic excellence so that our students are current and fluent in many languages, whether it is the art and language of another people, the terminology of global politics and economics, or the vocabulary of the new technology."

"Throughout these decades, our students' education has been
enriched by a campus community with a wide range of interests, ages, and cultures that mirrors the real world and produces graduates like math teacher Jaime Escalante, novelist Joseph Wambaugh, business leader Donald Sterling, U.S. Congresswoman Maxine Waters, and astronaut Sam Durrance."

President Rosser believes that "There is no asset more important to the process of learning than great teachers." The educator reports that "since its founding in 1947, Cal State-L.A. has recruited a faculty of nationally and internationally honored experts, and continues to develop each student's potential with an excellent student-teacher ratio, individual attention in small classes, research opportunities, and team-building."

Another professorial jewel enhanced the academic crown when CSU-Los Angeles Chemistry Professor Carlos G. Gutierrez was named one of four faculty selected this year for the $20000 system-wide CSU Wang Family Excellence Award. Gutierrez won in the category of Natural Sciences, Mathematics, Computer Science, and Engineering. When the awards were presented last May at a formal ceremony in Long Beach, President Rosser praised Gutierrez for "devoting his entire academic life to enhancing the educational success of those students who, in particular, are underrepresented in the sciences. "Often," observed Rosser, "in the Chemistry and Biochemistry Department, throughout the campus, in local high schools and community colleges, he is regarded as the first choice for advisement from among department faculty. His sincere interest in students' welfare and his enthusiastic encouragement of their participation in the chemical sciences have inspired many of them to select these fields as careers."

Gloria Romero, California State Assembly member for the 49th District and majority whip, sent congratulations to Gutierrez and the University community for receiving the CSU Wang Family Excellence Award. Romero is on leave from her post as a professor of psychology at Cal State-L.A. She said, "I had the opportunity to work with Dr. Gutierrez and witnessed firsthand his extraordinary efforts to enhance access to the sciences for underrepresented students in Los Angeles County. He has consistently demonstrated his commitment and dedication as a teacher and scholar. In this era of higher expectations, as proclaimed by Governor Davis and the California State Legislature, he is a stellar example of just how high we should set the bar for excellence and achievement."

The institution has a corps of 633 full-time and 439 part-time faculty. Of these, 67 full-timers and 64 part-timers are Hispanic. A wide range of ethnically diverse students is being served as well. Cal State-
LA. enrolled 19,783 students in the fall of 1999. The headcount by race/ethnic group shows that 8,886 or 51.5 percent are Hispanic; 1,560 or 9.5 percent are African American; 3,940 or 22.7 percent, Asian American; and 81 or 0.5 percent, Native American. By gender, the headcount shows 12,032 females, or 60.8 percent.

Since 1948, more than 140,000 students have earned degrees at Cal State-L.A. Alumni/ae have distinguished themselves "locally and globally." Graduates hold seats in the California State Legislature, on local governing boards, and in the U.S. House of Representatives. Cal State-L.A. is proud to claim a former lieutenant governor of California and two superintendents of the Los Angeles Unified School District. In 1995, physics alumnus and astronaut Sam Durrance took the University beyond the borders of the known world when he carried the Cal State-L.A. President's Medallion into space as a tribute to his alma mater.

The cost of attending Cal State-L.A. is very modest. Legal residents of California pay fees that total about $595 per quarter. They are not charged tuition. Then there is about $200 or so per quarter for books and supplies. A Free Summer Quarter + Program (FSQ+) really makes it possible for undergraduates to gain an affordable and accelerated education. Cal State-L.A. participates in a variety of federal and state financial aid programs. Students are told that they should not hesitate to seek admission because of financial reasons, that more than 45 percent of its first-year students and 30 percent of its undergraduates receive some form of assistance.

The FSQ+ program is designed to save time and money. The participating student receives a full complement of courses during the first summer quarter absolutely free. All usual tuition and registration fees are waived. Students who stay in the program can continue to take courses free in future summer quarters—potentially saving one-fourth to one-third of the college tuition and fees. The FSQ+ student also receives priority registration for courses and an academic advisor. There are Special Learning Communities (course clusters) for incoming first-year and transfer students. Participants are eligible for all financial aid and scholarships and for the General Education (GE) Honors program. With this program, it is possible to earn a bachelor's degree in as few as three years, depending on the number of courses taken per quarter and whether a student attends three or four quarters per year.

California State University-Los Angeles was founded in 1947 by action of the California State Legislature. It is a comprehensive institution offering programs in more than 50 academic and professional fields. The University is organized into six schools that house more than 50 academic departments and divisions. The campus is located at the eastern edge of Los Angeles and adjacent to the western San Gabriel Valley cities of Alhambra and Monrovia. It occupies 135 acres on a hilltop that affords views of the mountains to the north, the San Gabriel Valley to the east, metropolitan Los Angeles to the west, and the Palos Verdes Peninsula and Catalina Island to the south. Popular mountain and desert resorts are within a two-hour drive, and beaches are less than an hour away by car. The campus is nestled among the rolling hills on a site that once housed one of California's 36 original adobes, built in 1796 by Franciscan missionaries and destroyed by fire in 1890. The lands once were part of a Spanish land grant known as Rancho Rosa Castilla, created by the family of Juan Batista Batz, a Basque rancher from northern Spain who settled here in the 1850s. The inspiration for the name of the ranch, according to local historians, was the wild rose that once grew near the ranch home. The main roadway through the campus is known as Paseo Rancho Castilla to acknowledge its historic heritage.

From 1947 to 1955, Cal State-L.A. was situated on the campus of Los Angeles City College and shared its facilities. In 1956, construction began on the present site, and in 1958, ten newly constructed permanent buildings were first occupied. In recent years, the University went through another major phase of master plan development. This included a new administration building, major additions to several classroom buildings, construction of two new classroom buildings with underground parking structures, relocation and expansion of the Student Health Center, and the addition of a modern University Student Union.

Other recently completed projects include parking facilities for more than 2,700 cars and an attractively landscaped road access system. Also new is a major remodeling of the south wing of the Fine Arts Building, and completion of the Anna Bing Arnold Child Care Center and of garden style apartments that provide on-campus housing for more than 1,000 students. In 1994, the Harriet and Charles Luckman Fine Arts Complex was opened. It includes a large theater and visual arts gallery. Major remodeling of more than 14,000 square feet of interior space in Salazar Hall now provides a home for the federally funded Rosalyn Center of Applied Gerontology. A total of 14 permanent buildings represent a financial investment by the state of more than $115 million stand on a plateau that serves as a refreshing oasis in the center of the Los Angeles region.
Chávez Legacy Alive in Yakima Valley

By Marilyn Gilroy

Richard García has seen firsthand how Yakima Valley Community College has changed in the last 30 years.

"In 1966, there were only three Chicano students enrolled at YVCC," he said. "I was one of those three."

Today, García is a member of the YVCC board of trustees and the College is made up of .0 percent Hispanic students—the largest percentage of Hispanics enrolled in any community or technical college in Washington State.

YVCC is Washington's third oldest community college, founded in 1928. It has 7,000 students and several campuses and learning centers throughout the Yakima Valley in south central Washington.

García says that the Chicano farmworker movement of the 1960s and 1970s was the catalyst for social and educational change in the area. The College has strong ties to many of the organizations that serve Yakima Valley farmworkers and over the years has developed many programs for this population.

Now the challenge continues to recruit and enrollment of the many more valley workers and residents who are eligible and could benefit from a community college education. García says that the College leadership is committed to meeting that challenge. He mentions Dr. Bernal Baca as one of those who has ensured the involvement and success of Chicanos on campus.

Baca, a faculty member and president of the Association of Multicultural Counseling and Development, has been called a mentor and role model for students. He was hired in 1977 when YVCC had started to become a more diverse and inclusive campus.

"By that time, the hiring committee had several representatives of the Chicano community as well as Chicano students," said Baca.

After he was appointed, Baca became active with student organizations. There were some clubs in place back then that provided social and academic support for Chicanos, but Baca said that the students wanted to press for more changes. This led to the formation of the College's MECHA (Movimiento Estudiantil Chicano de Aztlán) chapter, a more proactive and political group.

"In the late '70s and early '80s, MECHA students felt the need for more political activism," explained Baca. "Sometimes they held public demonstrations and even 'takeovers' of offices to get the College to respond to the needs of Chicano students." Since then, MECHA has developed into an association with respect for the presence on campus of those that have been involved in college governance.

In his 23 years on campus, Baca is credited with being at the forefront of student involvement in conferences, seminars, and workshops to improve their skills. He was instrumental in bringing legendary leaders César Chávez to speak on campus.

"He taught me humility, leadership, and nonviolence," said Baca, who first met Chávez when he was student leader for the United Farmworkers at the University of Colorado. Baca was part of this year's first "peace march" to celebrate Chávez's birthday, a march sponsored by YVCC, United Farmworker of America, and others.

Inspired by Chávez, Baca has tried to instill pride in his MECh.
student leaders and encourages them to obtain degrees and prepare to lead in their communities. Currently, many YVCC MECAl alumni serve on school boards and city councils and as directors or administrators in local organizations.

One such alum is Victor Rodriguez, a full-time staff member and program assistant of the Upward Bound Program at YVCC. When Rodriguez graduated from high school, he was the first in his family ever to receive a diploma. He went directly into the workforce, accepting a job at the local McDonald’s.

But Rodriguez received a “wake up call” one day when his fifth grade band teacher, Dennis Claus, came to the restaurant requesting an order. “He asked me, ‘What are you going to do—work here your whole life?’” said Rodriguez.

Claus continued to press his former student until finally Rodriguez talked to someone at YVCC about attending college. He received a scholarship and also tapped into support services offered.

Last May, Rodriguez was hired as a staff member for the federally funded Upward Bound program, working with low-income, at-risk students in local middle and high schools to help them realize what education can mean to their future. The students, who are 75 percent Hispanic, are mentored, tutored and informed about careers, and even get a chance to live during the summer in YVCC dorms as they take classes and participate in a variety of activities.

“The goal of the program is to encourage these students to go on to postsecondary education,” said Rodriguez. Statistics show that at least two-thirds of the participants end up enrolling at Yakima Valley.

Veronica Venegas, who attended the program last year, exemplifies how dramatically a life can be changed with support and direction. Venegas had a poor track record in junior high and high school, which included drug and alcohol use and gang involvement. Many of her friends dropped out of school or had babies. Luckily, she became involved with YVCC’s Upward Bound and gained the skills and credits that she needed to graduate from high school (she earned a 35 GPA in the program) and continue in higher education. She looks forward to college and possibly becoming a lawyer or majoring in another interest, that of music education.

Upward Bound has compiled an impressive record of success in the more than two decades that YVCC has been a sponsor. It offers a second chance for many and is an opportunity that Rodriguez says he wishes he had had when he was younger.

“If only I had known about this program when I was in high school, I would have been much better off,” he said.

Rodriguez was born in Guadalajara, Mexico, but moved north when his family came to the valley to work. He feels that his experience at YVCC has had an impact on his entire family and has helped bring them in from work in the fields. His father now works in a dairy, and his mother is employed by a nonprofit agency providing support for Hispanic families in Yakima Valley.

“I understand the fears and anxieties that can be associated with getting an education because so many Hispanic families in this valley rely on agriculture as their livelihood,” said Rodriguez. “But I want to show students that there’s a lot more available to them.”

Diversity and the Curriculum

The stories of Garcia, Rodriguez, and Baca are just three of many that have emerged as YVCC has adjusted its focus to serve nontraditional populations, especially Chicano farmworkers, in the last 30 years. The shifts in enrollment have also “snowballed” to virtually all areas of the College, and the impact is reflected in the academic departments.

For example, YVCC’s ESL program goes far beyond conventional offerings. Though geared around the usual speaking and writing, it has a family literacy component that focuses on life skills, especially family management and employment. Teachers structure classes to deliver both content and skills needed to obtain a GED, job training, or college entrance. Many of the students enrolled are proficient in oral English skills but lack the written communication skills that progress in school or on the job.

There is also the YVCC Famil. That Work Program, a welfare reform project that operates or family literacy model of combining adult education, parent education and employment-related activities. Classes often include a large number of Hispanic women.

Curricula have also been affected, most notably by the creation of the Chicano Studies degree, first to be offered by a common college in the U.S. It is an ambitious program with interdisciplinary aspects. For example, Chicano Studies 220, titled Common Studies, is linked with Secolíc 193, a cooperative field experience course, supervised by a member of YVCC’s Partnership for Rui Improvement Program.

Students enrolled in the course learn how to do research with bi-minority and non-minority populations. The major goal is to construct a history of Crew Camp Washington, the remnant of a fort.
mer farm labor camp. Students interview many of the Mexican immigrant families while also collecting data and doing archival research, and hope to produce an oral history of the area, including a manuscript of their findings, a video documentary photo essay, and a web page that will contain the oral histories of the persons interviewed.

Throughout the year, the Chicano Studies department hosts cultural events such as the poet Inés Hernández-Villa. The head of Chicano Studies, Mario Compas, is active in the Morelia Sister City Association, a nonprofit community group instrumental in having Yakima, Washington, formally become a sister city with Morelia, Michoacán, Mexico. A delegation from Morelia visited Yakima in May, touring YVCC’s Campus Technology and ESL programs.

To reach as many Yakima Valley residents as possible, YVCC knows that it must start at an early age to significantly change the attitudes that disadvantaged students have toward higher education.

For this reason, YVCC also participates in the Yakima Valley Gear Up Program, a federal grant program that gives students in grades six through ten an opportunity to plan for additional education at high school. The program is in the first of a five-year cycle that offers students the chance to work with tutors to improve academic performance. Gear Up students have access to computer and educational software to help them complete assignments. In addition, Gear Up staff reach out to parents to make sure they are informed about higher education opportunities available for their children. The thinking behind the project is that at-risk students need help from many sources—their schools, family, and community—in order to successfully plan and prepare for college. Last year, 1,200 sixth grade students participated in the program, which also included partnerships with the University of Washington, Microsoft, Yakima Valley Farmworkers Clinic, and local business and community groups.

**Fighting Affirmative Action Backlash**

The YVCC faculty, staff, and administration’s commitment to diversity continues in spite of a negative political environment. Last year, the voters in Washington State passed Initiative 200, eliminating affirmative action in state institutions and prohibiting institutions such as YVCC from showing preferences to minorities in hiring or admissions.

At the time, Dr. Linda Kaminski, president of YVCC, reaffirmed the College’s position when she announced, “We have not changed at all our commitment to affirmative action. The only thing that Initiative 200 has done is remove some of the tools we have to do that.”

Kaminski, president for five years, continues to press for hiring procedures that will increase the chances that minority candidates will be part of the interview pool.

“We must challenge ourselves to find and retain faculty and staff of color,” she said. “To do this, we have scaled up our recruitment efforts and have even adopted the ‘growing our own’ model where we pursue our graduates who have received advanced degrees.”

“Diversity is the most important reason that I came to YVCC,” she said, “I wanted to be in a community college where I could make a difference.” And at YVCC, she said, “we see that difference every day. We deal with some of the most disadvantaged segments of the population, and sometimes we are their only opportunity for a better life. The whole climate of this institution is enriched by the diversity they bring to us.”

Kaminski is referring to students such as Jerica Zesati, who has been a part-time student for the last five years. She works a full-time job at the Washington State Migrant Council office and is a single mother of four sons, so finding the time for college has not been easy, but she says she will “never give up.”

“I’m hungry to complete my education,” said Zesati, who will obtain an associate’s degree in human development and plans to transfer to a four-year college. “Getting an education keeps me going,” Zesati says. “It opens the mind to everything.”

Zesati says she loves attending YVCC. “When I enrolled at YVCC, was worried that I would be the oldest student in class, and some times I have been. But I have felt a lot of support from my fellow students and the counseling staff.”

Zesati was born in Mexico and raised in a rural area in Washington, where as a young girl she and her family “chased the crops.” Now as she is raising her own family, she feels it is especially important to be a role model for her sons and for other women.

“I want to tell people that it is never too late to learn and that you can do it if you set your mind to it.”

Student Union Building on the YVCC campus
Reparations: Vieques, Puerto Rico as a Microcosm of the Latino Experience

by Roberto Clemente

Reparation: it is not a matter of IF but WHEN. The European Jewish community managed to receive reparation benefits at the individual level and at the state level (Israel) as a result of the brutality and horrors inflicted during the Holocaust by Nazi Germany during World War II. Also, Native Americans were compensated with land, nation status, and tax exemptions after being on the verge of annihilation. President Clinton signed an executive order apologizing and offering monetary compensation to Japanese Americans who had been detained during World War II. Correspondingly, individuals of African descent in the United States of America, led by Randall Robinson (president of TransAfrica), are claiming monetary compensations after being brutally enslaved over a period of 246 years. The consequences of abuse and the long-term psychological damage suffered by these racial/ethnic groups are still vividly reflected in the lives of the survivors and their descendants.

There is a striking similarity between these groups and the Hispanic-Latino sector in North America. There is a resounding question that ought to be posed beyond the philosophical and frivolous analysis of economic and socioeducational statistics. Should Hispanics/Latinos be compensated for the massive wrongs and social injuries inflicted upon them by the U.S. government before, during, and after territorial occupation? Again, reparation is not a matter of IF but WHEN.

An in-depth analysis of Hispanic-Latino territories occupied by the United States government and the consequences of this occupation on their population would be an insurmountable “ask beyond the scope of this article. However, an examination of one territory could serve to establish comparative conclusions. Puerto Rico is a Caribbean island of nearly four million inhabitants located in the northern Caribbean, 1,050 miles off Miami. Encompassing 3,492 square miles, it is similar in size to Connecticut.

In 1898, after signing an autonomy treaty with the government of Spain as the first step to inde-

for the president, and electing representatives to Congress. However, they are mandated to register for the U.S. armed forces and fight and shed blood for a nation that does not allow them to select a president. In fact, they have fought bravely in WWI, WWII, Korea, Vietnam, and the Persian Gulf. In the United Nations, Puerto Rico is cataloged as a commonwealth territory and not as a state (which is unlike the treatment of Hawaii, for instance).

After 100 years of North American influence, Puerto Ricans take pride in their Hispanic culture and language. Different from Hawaii, with its culture and language being absorbed and asphyxiated by the imposition of a foreign culture, Puerto Rico has shown a high level of resiliency and pride by keeping a prosperous and healthy Spanish language and culture.

Vieques is a small island considered a municipality of Puerto Rico. It has been used by the Navy as a military field of training operations for 50 years. Three-fourths of the island has been “owned” by the Navy since 1940, after Law 247 approved the expropriation of more than 12,000 acres. According to Juan Amedee Bonnet in Vieques en la Historia de Puerto Rico, inhabitants of the island for the most part lacked formal education and therefore were easily persuaded to give up their belongings and land for a few dollars. As a result of military operations that involve bombing and myriad exercises, civilians have died on different occasions throughout the 50 years of occupation. Compared to all the other municipalities of Puerto Rico, Vieques has the highest index of illiteracy, cancer, and respiratory conditions. Also, its unemployment rate is alarmingly higher than that of any other municipality.

Professor Jose Seguinot Barbosa, director of the geography department of the University of Puerto Rico at Rio Piedras, in his 1989 study
“Vieques, The Ecology of an Island under Siege,” maintains that “the eastern tip of the island constitutes a region with more craters per kilometer than the moon.” In the same document, Seguinot stated, “the destruction of the natural and human resource of Vieques violates the basic norms of international law and human rights.”

For more than 50 years, the residents of this island have been living under constant conditions of war—24 hours a day. On April 19, 1999, David Sánchez Rodriguez, a civilian security guard, was standing outside the observation post when two bombs struck 50 feet away. He was killed instantly. Four others were injured. The Navy indicated that errors by a fighter pilot and a ground control officer were responsible for the unfortunate bombing accident. As a reaction to the incident and clear demonstration of disgust toward the repeated patterns of abuse, a diverse group of Puerto Rican intellectuals, citizens, scholars, religious leaders, and politicians has been calling on the occupied lands to prevent more deaths and damage. Although historically Puerto Rican farmers ceased and followed faithfully the laws and standards of the US constitution, they have been engaged in acts of defiance, especially in the past, these voices have often been suppressed and silenced in the political and legal sphere.

Utilizing poor arguments that assault the logic and insult the intelligence of thousands of Puerto Ricans, the Navy has reiterated that there are no alternative sites that could provide the training opportunities present in Vieques.

In a message sent to the people of Puerto Rico concerning Navy training on Vieques, President Clinton stated, “Today I am announcing a course of action that will give the people of Vieques themselves the right to determine the future of the island while, at the same time, assuring that between later this year and early 2002, the people of Vieques will vote. In that vote, the people of Vieques will be asked to choose between two alternatives. If they choose the first alternative, the Navy will cease all training on Vieques and leave the island by May 1, 2003. If they choose the other alternative, training will continue on Vieques on terms that will be presented in detail at least three months before the vote.”

According to President Clinton, a package of compensation benefits will be provided to the inhabitants of Vieques. These compensations will include a job-training program for young people who lack technical and educational skills to compete in the market, a comprehensive public health service study, nature preservation programs, and financial packets for people who make their living in fishing, and special projects to develop the island’s infrastructure. A compensation packet of $90 million in aid—nearly $10,000 for each of the 9,500 people who live in the island—has been proposed as a persuasive mechanism to let the Navy resume military training.

Although substantial from a mathematical point of view, $90 million could be catalogued as pennies when systematic and long-term damage is considered. However, dialogues revolving around reparations benefit to amend the harms against this population of Puerto Ricans constitute a foundation for other Latino groups who have suffered similar injustices for decades. These conversations set a legal precedent that must not be ignored. Like the people of Vieques, Puerto Rico’s many Latinos have endured the psychological damage resulting from the “expropriation” of land, culture, and language. This multidimensional “expropriation” has placed people with Latino heritage in the so-called minority status.

Vieques is proposing the creation of a Latino Trust Fund to be developed by states/territories in conjunction with the federal government. This Latino Trust Fund would compensate individuals who were born and raised in areas such as Arizona, California, New Mexico, Puerto Rico, etc., of Hispanic/Latino descent who have suffered the injustices of territorial and psychological occupation. It is not a secret that poverty is associated with a multitude of social cancers. Therefore, financial reparations would allow these individuals lacking an economic base to redirect their lives. Also, the idea of receiving monetary reparations should not be conceptualized as a random distribution of checks to all individuals of Latino descent who meet the ethnic criteria. There are Latinos who have managed to thrive in a European American society. These individuals must be used as a source of consultation and information to properly find the mechanism to best use these monetary resources. In general, we are simply reclaiming a position of honor and respect in a society that has seen the Latino population as an invisible mass of individuals without social, educational, and political influence.

Mathematical formulas to determine the damage and, therefore, the reparations benefits must be developed on a state-by-state basis. It is essential that this monetary compensation incorporate a strong educational component. The need to place Latinos in academic institutions and positions of power in our society will determine their healthy development and competitiveness in a highly specialized world

In sum, throughout the history of the U.S., groups of Americans have sought to exercise their constitutional right to petition their government for the redress of grievances. These Americans were not considered unpatriotic. In fact, many have been honored for reshaping the social map and for instituting new standards based on civil rights. Puerto Ricans and Latino Americans residing in the U.S. should not be labeled unpatriotic, but conscious of a different reality not experienced by others. Latinos are committed to the democratic ideals embodied in the U.S. constitution. Therefore, we want to embrace all the benefits that other ethnic/racial groups have enjoyed for decades.

White House Sponsors Latino Education Conference

The White House Initiative on Educational Excellence for Hispanic Americans sponsored the spring seminar "Starting Smart: Latinos in Early Childhood Education."

Early education encompasses programs for children up to age 5 and may provide related services to meet their psychological and health needs. This policy seminar focused on Latino participation and implications for school preparation. Panelists addressed outreach and how community-based organizations can work with Health and Human Services and other federal agencies to expand Head Start programs and create new school-family partnerships.

North Park Awards Outstanding Latino Students

North Park The Center for Latino Studies at North Park University (Ill.) presented four students with Adelante Awards at its sixth annual awards dinner. The ceremony recognized Latino students as well as students involved with Latino issues at North Park in academics, athletics, campus activities, and community service.

Honorees were Araceli Navar (athletics), Mike Lundberg (athletics, community service), Mehida Perez (campus involvement, academics), and Ricardo Leiva (academics).

Established in 1994 to foster the appreciation and study of Latino cultural traditions in the U.S., the Center for Latino Studies engages in research of Latino culture in this country. It also sponsors special events on campus and encourages the development of new courses in the college curriculum.

Corzo New President at University of the Arts

Miguel Angel Corzo is the new president and CEO of The University of the Arts in Philadelphia, Pa.

Corzo recently directed the Getty Conservation Institute, a program of the J. Paul Getty Trust in Los Angeles, Calif. During his tenure, the Institute achieved a significant presence in the world through its scientific research, conferences, publications, training programs, and field projects. Under his leadership as president and CEO of the Friends of the Arts of Mexico, a U.S.-based foundation dedicated to the promotion of knowledge of the art and culture of Mexico, he organized, along with The Metropolitan Museum of Art in New York, the successful exhibition "Mexico: Splendors of Thirty Centuries," which traveled to Los Angeles and San Antonio.

Corzo is a graduate of the University of California-Los Angeles and was a Fulbright Scholar at Harvard University.

Latino Admissions Increase 29 Percent at San Diego State

Minority admissions for first-time first-year students are up at San Diego State University (SDSU) in California.

Fall 2000 admissions for Latinos (not including Mexican Americans) and Asian Americans were among the highest increases. 29 percent and 24 percent respectively, compared to Fall 1999. About 640 Latino students have been admitted, up from 497 last year. Admissions for Asian Americans increased from 1760 to 2190 African American admissions increased by 21 percent—from 570 to 689. American Indian admissions increased by 21 percent—from 78 to 94. Mexican American admissions increased by 15 percent—from 1688 to 1945.

More than 45 percent of SDSU's students come from underserved ethnic, cultural, or linguistic populations.

Merino Receives Alumni Scholarship at U.S. International

Jorge Merino received a $1,000 Alumni Association Scholarship at United States International University (USIU) in California.

An undergraduate pursuing a degree in history with a minor in teaching English to speakers of other languages, Merino—originally from Mexico—had to learn English before pursuing his educational goals in the country. He has worked with at-risk youth a number of agencies. For six years, he has been employed by the Project of Excellencia Empowering Reading Clinic as a teacher assistant and job readiness counselor. He also has been involved with the San Diego Dragons Wrestling Club and the Court School Scholarship Foundation.

Texas A&M-Corpus Christi Research Published

"Latinos, At-Large Elections, and Politic Change: Evidence from the Transition Zone, a collaborative paper written by Texas A&M University-Corpus Christi political science faculty members Dr. Juan Carlos Huerta (pictured), Dr. Robert Bezdek, and Dr. David Bileaux, appeared in the March 2000 issue of Social Science Quarterly.

Between 1983 and 1995, no Latino candidate had ever won an at-large election for county council in the city of Corpus Christi. A according to the authors, there has been a definite and traditional pattern of polarized voting in Corpus Christi—Latinos voting for Latinos and Anglos voting for Anglos.

But the researchers found that polarized voting is common to the U.S. in general and not all unique to Corpus Christi. There was strong evidence that polarized voting exists in "tran- tion zones," where minority populati
are increasing and the candidates are becoming more competitive in at-large elections.

Betances' Work Exhibited at Queensborough

The Queensborough Community College (N.Y.) Art Gallery debuted the work of Luis Betances (l.), an employee of the college's building and grounds office.

The Betances collection "Mi Tierra" featured some 25 oil-on-canvas paintings and charcoal and pencil drawings, many of them landscape images inspired by the artist's homeland, the Dominican Republic. It was the first such show for Betances, who was surprised by the gallery's interest in his creations.

"I did not expect this," Betances said. "This came as a surprise to me. I have been painting and drawing since I was a child but never went to school for art."

Betances is a graduate of the Universidad Católica Madre Maestra de Santiago, where he studied agricultural engineering. He worked for the Agriculture Department in Santiago as chief of the Soil Conservation Department before immigrating to the U.S. in 1985.

Pictured (r.) is Betances' work "Claudia."

Eastern Washington Newsmakers

Recent high school graduate Ana Azizaran received a $2,250 Chicano Education Teachers Scholarship for the 2000-2001 school year at Eastern Washington University. Azizaran has been a student mentor and a member of the Future Business Leaders of America, the National Honor Society, the Safety Club, and MECHA.

For her involvement in Eastern Washington's Chicano Education Program, Maria Montes received a $500 Avista Scholarship. A business administration major, Montes is involved in a mentoring program and in MECHA and RAICES, two organizations for students interested in Chicano/Latino issues and activities.

Dowling's Ochoa Honored at Puerto Rican Day Parade

David Ochoa, vice president of development at Dowling College in New York, was honored by Adelante of Suffolk County at its 34th Puerto Rican/Hispanic Day Parade. Adelante is a non-profit civic and cultural organization that provides health, education, and youth services to the Hispanic/Latino community.

Twice named one of the 100 most influential Hispanics in America by Hispanic Business Magazine, Ochoa has an impressive career in education, law, and media. After working for the office of general counsel for General Electric in Mexico City and as a legal aid in California, Ochoa found a way to combine his passion for education and his pride in his culture. He was a co-founder and producer of Villa Alegre, a Spanish/English version of Sesame Street that ran for six years on PBS television. He then became executive producer of programming for NBC and won two Emmy Awards.

"These are exciting times for Spanish-speaking people," said Ochoa. "The world is beginning to appreciate what we've already known, that we are a people with rich traditions and great accomplishments."

Fullerton's MECHA Club Holds Cinco de Mayo Celebration

Fullerton College's (Calif.) MECHA club coordinated a Cinco de Mayo celebration with a day-long festival of workshops, entertainment, speakers, and food.

The day's events included an exhibit showcasing Mexican artists; an enactment of a 19th-century woman living during the Rancho Period; Aztec dancers; a Ballet Folklorico performance; and workshops with Gerry Balcantar from Latino Health Access in Santa Ana and ABC television talent Al Reyes.

The Fullerton College MECHA (Movimiento Estudiantil Chicano de Aztlán) club was formed on campus to inspire Chicano fellowship and leadership and to establish an educational network relative to Chicanos.

Sisterhood Groups Clean up New You

The Sigma Lambda PEARLIS team up w the Hermanas of Sigma Lambda.

Sigma Lambda Promoting Education, t Arts, our Roots, Leadership and Service is mentoring program designed for girls ages to 14, with the intention of instilling a sense of sisterhood, cultural pride, academic excellence, and community service, through tea building activities and projects.

"Giving back to one's own community an essential lesson that every child should learn in life," said Hermana Alina Ocas Sigma Lambda vice president of expansion.

Vilar Addresses Iona Graduates

Iona College alumnus Alberto W. Villan, founder and president of Amerindo Investment Advisors, Inc., addressed 800 Iona students receiving bachelor's degrees at the school's 56th annual commencement exercises.

Vilar received an honorary doctorate. After earning a master's degree from Iona in 1971, he began working on Wall Street, where he became one of the first financial analysts to recognize the importance of a device known as the semiconductor. In 1977, Vilar served as Amerindo Investment Adviser Inc., and invested heavily in companies if they were then unknown—companies such as Microsoft, Yahoo, Compaq, and Intel.

Elizabeth Ann Olivieri and Natalie Ho Santillana also participated in the graduation ceremonies, presenting the student welcor and the response.
Melendez Receives Grant From Concordia

Dr. Pedro Melendez was one of eight faculty members at Concordia College-Moorhead (Minn.) to receive a grant from the College's 2000-01 Centennial Scholars program. Melendez, assistant professor of Spanish, will study La Bella Durmiente, a feminist retelling of Sleeping Beauty by Puerto Rican novelist Rosario Ferre.

Dr. Monica Mori, assistant professor of psychology and recipient of one of five Centennial Research Scholarships, will design a testing instrument to research whether ego integrity, or how well a person accepts his or her own situation later in life, comes about through a generative process.

Tucson's LULAC Youth Conference Wins Award

The Tucson, Ariz.-based League of United Latin American Citizens' (LULAC) Youth Leadership Conference was among 21 programs nationwide to win this year's La Promesa de un Futuro Brillante Award by the National Latino Children's Institute (NLIC).

Richard G. Fimbres, president of LULAC Council 1057; his wife Mary, state deputy director; and Anna Estrada, LULAC's national vice president for women and a Pima Community College employee, led a 16-member Tucson contingent—including youths and young adults—to Florida to accept the award.

According to NLIC, the winners are among the nation's most innovative and outstanding programs for Latino children and youth.

St. Mary's Hosts High School Leadership Conference

Dropout rates, violence, and knowledge as power were the topics when more than 200 high school students from around South Texas met at St. Mary's University for a high school leadership conference, "Liberation through Education."

Among the panelists were St. Mary's alumna Justice Alma Lopez (pictured), who is with the Fourth Circuit Court of Appeals; community professionals; and faculty members from St. Mary's and other local universities. Reps. Robert Puente, also an alumna, and Mike Villarreal presented "Knowledge Is Power."

Screening of Luminarias at Cal Poly-Pomona

California State Polytechnic University-Pomona hosted a free screening of the motion picture Luminarias. Sal Lopez, cast member and producer of the film, provided insight on the making of the film.

Luminarias is a romantic comedy about four women friends looking for love in contemporary Los Angeles, where people of all walks of life, cultures, religions, and sexual preferences converge and try to survive. It examines the contemporary Latinas's struggle with identity, independence, sexuality, and prejudices in an entertaining way. Cast members include Scott Bakula, Cheech Marin, Robert Beltran, Marta DuBois, Evelina Fernandez, Fidel Gomez, Sal Lopez, Seidy Lopez, Angela Moya, Lupe Ontiveros, and Dyanne Ortei.

Olmor Presents Latino Book and Family Festival

The Latino Book and Family Festival is coming to Los Angeles, Calif., Chicago, Ill., and San Bernardino, Calif.

Co-produced by actor-director-producer Edward James Olmos, the two-day festival is a celebration of books, careers, culture, education, health, the home, recreation, travel, and more. Held for three years in Los Angeles, it has become the largest Latino consumer trade show in the United States. Attendees enjoy hundreds of booths and activities, including book signings, author discussions, storytelling, poetry readings, arts and crafts, food, entertainment, educational workshops, and special appearances by Olmos.

The festival will be at the Los Angeles Convention Center Aug. 26-27; Sportsman's Park in Chicago Nov. 11-12; and the National Orange Show in San Bernardino Dec. 2-3.

San Antonio College Alum Wins Pulitzer

Former San Antonio College (Texas) student Rodolfo Gonzalez was among the Rock

Mountain News (Colo.) photographers who won a Pulitzer Prize for breaking news photography, covering the Columbine High School massacre.

Gonzalez worked for The Ranger student newspaper when he attended San Antonio College (SAC) from 1987-1989 and served photo editor during his last semester.

Since leaving SAC, Gonzalez has won numerous awards in Colorado and has covered Waco-Branch Davidian events, the Oklahoma City bombing trials, the World Cup, and Super Bowl. His Columbine photos appeared in Newsweek and Life magazines.

Gonzalez was the featured speaker at the 23rd Annual Edith Fox King Jornal Lectured at SAC.

Solís Receives JFK Profile in Courage Award

A California state senator who overcomes the strong opposition of a former governor and the California business community to win environmental protections for minority communities is the winner of the 2000 John F. Kennedy Profile in Courage Award.

In May, Hilda Solis, the first Latina elected to the California Senate, received the prestigious award for political courage from the Kenn family members at the John F. Kennedy Lib and Museum in Massachusetts.

Solís took on entrenched economic interests as she sought relief for minority communities suffering the ill effects of hazardous enforcement of environmental laws. Her legislation on environmental justice sought a range of efforts to counter what Solís believes to be a disproportionate number of waste sites and polluting factories in poor neighborhoods, many with large numbers of Latinos or African Americans.

Loislaw.com Announces Scholarships for Arkansas Law Students

Loislaw.com Inc., which provides law mats, judges, law students, paralegal departments, and...
sumers with legal research materials via a Web browser, announced the establishment of the Loislaw.com Scholarship for minority students at the University of Arkansas School of Law. Loislaw.com Inc. provides comprehensive, cost-effective, and easy-to-use legal and related information over the Internet and on CD-ROM. It offers more than 1,850 databases estimated to contain more than 8.8 million documents of federal and state law, continuing legal education materials, and other legal information. Its databases provide more than 100,000 news articles a month from more than 45 domestic and international news feeds.

**New Mexico Tech President Earns Public Service Award**

Daniel H. Lopez, president of the New Mexico Institute of Mining and Technology, received the 31st Annual New Mexico Distinguished Public Service Award. Gov. Gary Johnson lauded Lopez and 11 other New Mexicans for “making a difference in the quality of life in the state.”

Lopez, a native of Puerto de Luna, a village near Santa Rosa, has presided over the state-supported research university since 1995 and was recognized for providing more than a quarter century of public service. Recently, he was credited with “dramatically improving faculty, staff, and student relationships at New Mexico Tech.”

**News from California-Santa Barbara**

UCSB Dr. Fernando Pérez Correa, advisor to Mexico’s secretary of exterior relations, faced a panel of University of California Santa Barbara (UCSB) scholars to discuss Mexican political reform and relations between Mexico and its Chicano cousins. UCSB faculty members Maria Herrera-Sobek, Luis Leal, Francisco Lomeli, Juan-Vicente Palerm, and Denise Segura joined him.

UCSB emeritus professor Luis Leal received an honorary doctorate from the University of Illinois at Urbana-Champaign for his many decades of work studying Mexican and Chicano literature. University of Illinois Professor Rolando Romero noted: “At the time he started, the field of Mexican literature was not taken very seriously.”

* Antonio Cortijo Ocaña, a UCSB assistant professor in the department of Spanish and Portuguese, won the Premio de la Diputación Provincial de Sevilla 2000 for his latest book, *Teoría de la historia y teoría política en el siglo XVII* (University of Alcalá de Henares Press).

**Cal State-Northridge Initiates Central American Studies**

The first Central American Studies Program (CAS) in the United States has been developed for California State University-Northridge. Offered through the University’s College of Humanities, CAS is a groundbreaking project that will develop courses, conduct research, and develop pertinent conferences covering a broad range of topics.

The program will focus on the strong economic, cultural, and political relationships between the large Central American population in the United States—projected to number 2.5 million by the year 2010—and Central America. More than 5 percent of the gross national product of some Central American countries comes from remittances sent by Central Americans living in the U.S.

**DePaul Holds Operation Pedro Pan Discussion**

DePaul University in Illinois presented *The Flight of Pedro Pan*, a 90-minute documentary about the airlifting of children from Cuba.

Maria de los Angeles Torres, DePaul associate professor of political science and one of the 4,000 children brought to the U.S. from Cuba in the 1960s, led a discussion on Operation Peter Pan. Panelists, who focused on the social construction of childhood, included Joseph Cardona, director of the documentary; Alfredo Lanier, *Chicago Tribune* editorial board; Jacqueline Bhabha, director of the human rights program at the University of Chicago; and Pepe Vargas, executive director of the International Latino Cultural Center of Chicago, and moderator of the event.

**CUNY’s Chang-Rodríguez Named Distinguished Professor**

Dr. Raquel Chang-Rodríguez, chair of the department of foreign languages and literatures at The City College of New York and professor of Spanish-American literature and culture at both City College and the Graduate Center of The City University of New York (CUNY), was named a Distinguished Professor by the CUNY board of trustees for her outstanding scholarship and teaching. The title is the highest recognition CUNY confers on its faculty. Chang-Rodríguez is the first Latina to receive the honor and one of only 106 Distinguished Professors in a universe with more than 5,000 faculty members.

Born in Cárdenas, Cuba, Chang-Rodríguez received a bachelor’s degree from Montana State University, a master’s from Ohio University, and a doctorate from New York University.

**Caldera Keynotes St. Mary’s Graduation**

Secretary of the Army Louis Caldera will be the keynote speaker for St. Mary’s University (Texas)’s 148th commencement exercises.

A West Point graduate, Caldera started as a commissioned officer, rose to the rank of captain, received the Meritorious Service Medal, and later served in the U.S. Army Reserve. After leaving active duty, he earned a law degree from Harvard and a master’s from Harvard Business School. He became a lawyer, represented Los Angeles County (Calif.) as a deputy counsel, and served in the California Legislature.

Nomination by President Clinton and confirmed by the U.S. Senate, Caldera became 17th Army secretary, with statutory responsibility for “Army manpower, personnel, re-education, installations, environmental issues, weapons systems, equipment, communications, and financial management.”

**San Antonio College Honors Rodríguez and Basaldúa**

U.S. Rep. Ciro D. Rodríguez and Dr. Maui Basaldúa were selected as the 1999-2000 Outstanding Former Students of San Antonio College (SAC) in Texas.
with Music and Dance," at the CUNY Graduate Center. Spanish masters, preceded by an introductory discussion in both English and Spanish, performed flamenco dance, music, and song. Guests included dancer Milagros Mengíbar, singer Calixto Sánchez, guitarist Manolo Franco, and author/historian Fernando Iwasaki.

Flamenco is rooted in the ancient folk traditions of Andalusia, but shaped in Spain's cultural cauldron, incorporating gypsy and Moorish influences. Dedicated masters have enabled the art form to survive in its traditional form, retaining the ancient, profound, and mysterious qualities that make flamenco unique.

**Texas A&M-Kingsville Professor Speaks at Capitol Forum**

Dr. Delmy Calderón-Salín, assistant professor of agribusiness at Texas A&M University-Kingsville, led the discussion "Where Are the Hispanics in the Food and Agribusiness Industry and How Well Are They Compensated?" at the National Capitol Forum on Hispanic Higher Education held in Washington, D.C.

Calderón-Salín found that although Hispanics are represented in the food and agribusiness industry, they are compensated between 25 and 40 percent below the national average for comparable occupations. She also found that nearly 60 percent of Hispanics in the industry have not completed high school. "The data point to the need for enhancing higher education in the Hispanic community. Although many in the audience had a feeling Hispanics were not compensated at all that well in the work place, they never really had a grasp of the numbers to quantify and substantiate their positions," she said.

**Northern Colorado Gives Gonzalez Top Faculty Honor**

Ester Gimbernat González, professor of Spanish at the University of Northern Colorado, won the M. Lucile Harrison Award for Professional Excellence, the University's top faculty honor.

González, who joined the faculty in 1983, specializes in 20th-century Spanish American literature, women's writing, and Baroque Spanish literature. She edits Confluencia, a journal of Spanish literature, and has more than 60 publications to her credit, including four books.
Nazareth Awards to Outstanding Spanish Majors

Nazareth College (N.Y.) recently honored two of its Spanish majors.

 Kimberley Messina (l.), a senior majoring in Spanish and international studies, is this year's recipient of the Lucy Jones Memorial Book Award. Lucy, a 1979 Nazareth graduate who majored in Spanish, was deeply involved in the many academic and cultural activities of the College's Spanish Club Cervantes, both on and off campus.

 Alison Stoller (r.), a junior majoring in Spanish and business administration with a concentration in international business, is this year's recipient of the Thomas J. Masolotti Spanish Scholarship. Thomas passed away in the winter of 1988 during his sophomore year at Nazareth, where he was majoring in Spanish.

St. Mary's Provides First-Year Students with Notebook Computers

St. Mary's University in Texas has taken a leadership role in educational technology in San Antonio and the Southwest as one of the first universities that will provide all full-time incoming first-year students, an estimated 575, with notebook computers, beginning in Fall 2000.

The initiative involves equal access to information technology and flexibility in communication among faculty and students as St. Mary's fully integrates computer-enhanced instruction into the classroom over the next four years. The overall goal is to provide students with an optimal learning experience and excellent educational technology skills.

Adames New Dean of Liberal Arts at Kea

Dr. Jose Adames is the new dean of the Kea University (N.J.) School of Liberal Arts.

"This liberal arts school is among the very best, and I look forward to the associated challenges that lie ahead," he said.

A 14-year veteran of Kea's Adames has been interim and associate dean of the School of Liberal Arts and director of the University's ESL program. He has a bachelor's degree and a master's from Seton Hall University and an M.Ed. and an Ed.D. from Columbia University.

Miami-Dade Opens Technologically Advanced Facility

Miami-Dade Community College's (M-DCC's) fastest growing campus—the Interamerican Campus in Little Havana, with four different schools and more than 7,500 students annually—dedicated Phase II, a new building that is one of the most technologically sophisticated classroom/education facilities of the country's more than 1,200 community colleges.

Designed by architect Ivan Bibas of Rodriguez Quiroga Architects Chartered, the building is the first at M-DCC to be built completely equipped with an infrastructure for high technology. It houses cutting-edge technology and learning-centered services.

Live Better South of the Border in Mexico: Practical Advice for Living and Working

By México Mike Nelson

"México" Mike Nelson has spent 25 years living and traveling in Mexico and teaches classes on living there. Humorous and readable, this book offers realistic advice about what to expect in Mexico, what you will find, and how to navigate Mexico's rules and regulations.

Life, Death, and In-Between on the U.S.-Mexico Border: Así es la vida

Martha Oehmke Loustaunau and Ma Sánchez-Bane, eds.

"Así es la vida" ("that's life") need not indicate a fatalistic acceptance that poverty, sickness, misery, and misfortune must be taken in stride. Exploring specific problems of employment, education, drug addiction, violence, healthcare, and women's issues, the book encourages greater understanding of the U.S.-Mexico border.

Poverty, Social Assistance, and the Employability of Mothers: Restructuring Welfare States

By Maureen Baker and David Tippin

Alberta, Canada, considers a mother to be "employable" when her youngest child is six months old. In Australia, the comparable age is 16 years. Yet both countries have "restructured" their social programs in the past few years along liberal lines. This book discusses why cr
national differences and similarities exist in the
current restructuring of social programs for low-
income mothers in Canada, Australia, New
Zealand, and the United Kingdom.

University of Toronto Press. (800) 559-9523

Issues in Education Research:
Problems and Possibilities
Ellen Condiffe Lagemann and Lee S.
Shulman, eds.

This comprehensive
volume, sponsored by the
National Academy of
Education, provides an
overview of the tensions,
dilemmas, issues, and
possibilities that currently
characterize education research. More than
20 prominent scholars examine the state of
education research and discuss how it is
changing and where it needs to go.

Mi querido Rafa
(Spanish)
by Rolando Hinojosa

Mi querido Rafa representa la aportación novela-
lística más reciente de la serie de obras sobre la
vida de los mexico-americanos en un pueblo del
Valle Río Grande. En esta
Hinojosa elige nuevas perspectivas, la de novela epistolar y testimonial y
la de narración bilingüe, y demuestra más una
vez por qué ha merecido la distinción de ser
el primer escritor chicoano de recibir el presti-
gioso premio Casa de las Américas.

Longing
By María Espinosa

This is a psychological
novel about a young
woman's dependence on her
husband and her attempts
to escape their unhealthy
relationship and forge an
independent life for herself.

cloth. Arte Público Press. (800) 633-ARTE.

Learning That Lasts: Integrating
Learning, Development, and
Performance in College and Beyond
By Marcia Mentkowski and Associates

This book explores
what it means for learners
to transform themselves
and for educators to foster
essential skills for learning,
leading, teamwork, and adapting with integrity
in college and beyond.

Baseball: America's Diamond
Mind, 1919-1941
By Richard C. Crepeau

This book was written from a project that
became Richard Crepeau's doctoral disserta-
tion. It was conceived as a study of American
cultural values in the inter-
war period when Americans were entering
the urban-industrial world
and attempting to adjust to
their largely small-town
and rural values and to their
own. Crepeau finds that
the national pastime illustrates the history of the
American people.

cloth. University of Nebraska Press. (800) 755-1105.

Madres del verbo/Mothers of the
Word: Early Spanish American
Women Writers, a Bilingual
Anthology
Nina M. Scott, ed. and trnas.

These representative
works by early Spanish
American women writers are
the first to be made available in
a bilingual edition. The
texts provide an overview of
writers from the Colonial
Period to the 19th century and include an
exploration account, the vida of a mystic, an
autobiography of a transvestite, poetry by Sor
Juanita Inés de la Cruz, essays, and two novelas.

2000. 395 pgs. ISBN 0-8263-244-5. $24.95
cloth. University of New Mexico Press. (800) 749-7757.

The Freshman Year Experience:
Helping Students Survive and
Succeed in College
By M. Lee Upcraft, John N. Gardner, and
Associates

This book provides
comprehensive guidelines for
developing strategies,
programs, and services
that will foster students' educational progress and
adjustment during the pivotal
first year of college.

Gender and Society in Contemporary Brazilian Cinema
By David William Foster

“Gender is an absolute ground zero for most human societies,” writes David William Foster, “an absolute horizon of social subjectivity.” In this book, he examines gender issues in 13 Brazilian films made (with one exception) after the 1985 return to constitutional democracy and elimination of censorship to show how these issues arise from and comment on the sociohistorical reality of contemporary Brazilian society.

Mexican Coal Mining Labor in Texas and Coahuila, 1880-1930
By Roberto R. Calderón

The author presents a transnational comparative framework for understanding the complex matrix of mining, investment capital, labor markets, railroad construction, and racial ideology in Texas and Coahuila, Mexico, during a period of economic growth and social disruption on both sides of the border.

Mestizo
By Ricardo Feierstein

First published in Argentina in 1994, this novel is a detective story in which the police try to solve an assassination and a lost man tries to reconstruct his identity—two searches set against the story of four generations of a Jewish family. Translated from the Spanish by Stephen A. Sadow. Introduction by Ilian Stavans.

In Search of Bernabé
(English)

En busca de Bernabé
(Spanish)
By Graciela Limón

Against incredible odds, Luz Delcanto is determined to find her son Bernabé, from whom she was separated in the chaos that followed the assassination of Archbishop Romero. Her odyssey takes her through Mexico and into Southern California, then down to El Salvador for the breathtaking final scenes that pit brother against brother. This is a family saga that has repercussions of biblical dimension and resonates with international intrigue. Translated into Spanish by Miguel Angel Aparicio.

By Mark Saad Saka, Ph.D.

Decades before Henry Cisneros or Federico Peña achieved national prominence as politicians, Raymond Telles broke through tremendous barriers and institutional resistance to become the first American of Mexican descent to be elected mayor of a major American city. His election represented the triumph of the Mexican American generations struggle for electoral recognition and social mobility and paved the way for Mexican American political activism, voter registration, and greater participation in community and civic affairs. Based upon personal interviews with Telles, his family, and associates, Mario García provides a highly readable biography of an important and underestimated politician and by so doing weaves a larger picture of the Mexican American struggle for recognition as first-class citizens in the U.S.

Telles epitomized the emergent Mexican American generation that formed between the 1930s and the early 1960s. The goals of its members resulted from their socialization in American democratic principles that convinced many that through participation in the political process they could abolish public discrimination that called attention to their race and ethnicity, and thus eliminate barriers to full equality. Reformist by nature, the generation rejected radical class-based politics and instead sought full integration into American society through electoral means. García interprets the Mexican Americans of El Paso and elsewhere as seeking "status goals" as opposed to "welfare goals." Largely middle- and lower-middle-class, and including a large number of World War II veterans, the Mexican American generation waged a protracted struggle for civil rights long before the term was coined.

García begins this biography with the influence of Telles' family—its strong religious beliefs and values, emphasis on hard work and discipline, and firm dedication to education as a means of upward mobility. Raymond's parents instilled in him sobriety, honesty, the need for a good command of English, athletic prowess as a boxer, and a strong identification with the Mexican American economic and political condition.

Raymond's mother died of pneumonia while helping feed poverty-stricken Mexican Americans during the Great Depression. In our class discussion, a student remarked, "Republicans like to talk family values, but we Mexicans actually live them."

During World War II, Telles was a commissioned officer in the U.S. army and later served during the Korean War. On returning from the war, Telles and other veterans began pushing for democracy at home. In 1948, he successfully ran for county clerk of El Paso. Reelected four times, Telles built a coalition and avoided divisive politics. Honest, efficient, and diligent, Telles proved to many that Mexican American politicians could effectively manage city affairs. While this sounded strange to many of my younger Chicano students, I explained that during the '50s, this was actually quite revolutionary. Telles' election encouraged other Mexican Americans, who began being elected to lesser county positions. This new "and younger generation played politics on its own terms and not simply, as in the past, as an ethnic group manipulated by Anglo power brokers.

In 1958, Telles won El Paso's highest position on a "people's ticket" platform that forged a coalition of Mexican Americans, liberal Anglos, and sympathetic journalists. During the next four years, Telles ran a highly efficient and honest government—probably the city's most efficient government to date. Somewhat cautious of divisive politics, Telles nonetheless pushed through progressive reforms, including abolishing convict labor, creating a more socially responsible police force, extension of urban renewal, and the establishment of additional parks and recreation centers.

In 1960, Telles supported the Viva Kennedy campaign and began drawing the attention of national politicians, including fellow Texan Lyndon Johnson. In 1961, Kennedy appointed Raymond Telles to the U.S. ambassador to Costa Rica, the first American of Mexican ancestry to fill such a position. He was ambassador until 1967. Telles later was the Democratic representative to the bipartisan Equal Opportunity Commission and headed the Inter-American Development Bank for the Carter administration.

Telles' triumphs and the generation's "politics of status" did not, however, translate into socioeconomic justice for the broader base of Mexican Americans in the Southwest, and these shortcomings laid the basis for the Chicano movement's radical critique of the more moderate and reformist politics of such figures as Telles. Unfortunately, the emergent Chicanoos failed to acknowledge that the work and struggles of such Mexican Americans as Telles and his generation made possible the expansion of democratic politics and mass mobilization. While the more radical critique of the Chicano movement might have been accurate, the movement owed a great deal to such figures as Raymond L. Telles.

Last fall, I used García's book in my Chicano politics class and found that many of the students responded positively to Telles' struggles and triumphs. While they had heard of and were familiar with the Chicano movement's pantheon of heroes such as Cisneros and Peña, few knew major figures of the Mexican American generation. García, by bringing to life the most important Mexican American politician of that generation, has made an important contribution to our knowledge and understanding of that crucial period.

Dr. Saka is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, he has taught at Sul Ross State University, Alpine, Texas since 1995.

EAAE Institution

COMMUNITY DEVELOPMENT
of Campus Life invites applications for
Assistant Director of Community Development (Residential Living)

Community Development is committed to providing a residential experience of the highest quality for each of our residents. Part of our mission is the advocacy of academic inquiry, student development, respect for the individual, and the development and promotion of just communities within our residence halls. We strive to provide a safe, comfortable, residential experience designed to educate, challenge and develop our students so they may be able to achieve an examined life.

We offer the opportunity to work with several unique and cutting-edge programs. These department programs create a dynamic work environment resulting in professional development through valuable experiences. Our Community Development program includes:

- Faculty Fellow and Faculty in Residence program
- Program houses promoting themes of ethnicity, culture, arts, music, ecology, etc.
- Community centers serving as area hubs for programming, services, and dining

A new and highly motivated Residence Hall Association

A campus-wide residential initiative, housing all First Year Students on North Campus

Two new residence halls being designed and constructed for opening in 2001

A new community center being designed for opening in 2001

RESPONSIBILITIES: Supervises 7 professional Residence Hall Directors who provide staff training, student counseling and discipline, program development, and integration of the Faculty Program. Implements procedures related to all aspects of the residence life program for an area of 2,000 students. Provide leadership to 1-3 committees within Campus Life/Community Development. Advise and act as liaison with the Residence Hall Association (RHA) and member of the Community Development Coordinating Group providing overall leadership and direction for residential life on campus.

QUALIFICATIONS: Must have a degree in student development/higher education and 4-6 years experience in residence life with increasing levels of responsibility required. Experience in supervision, administration, counseling, hall staff selection, training, and development required. Experience supervising full-time professional staff preferred. Position is a full-time, live-in, 12-month appointment.

BENEFITS: Competitive salary and all Cornell University endowed benefits such as TIAA-CREF, Medical insurance, pension plans, health care, professional development opportunities and a partial meal plan are provided.

If you are interested in exploring an opportunity to work in Community Development and meet the above qualifications, submit letter of interest, resume, and names and telephone numbers of three references to:
Regina Duffy, Human Resources Manager, Cornell University, 2177 N. Balch Hall, Ithaca, NY 14853-1401. Closing date: July 31, 2001 or until position is filled.

Visit the department's website at www.compasslife.cornell.edu

Extended and Continuing Education Department
JOB#000-003

The Division of Extended and Continuing Education Department of California State University, Hayward is seeking two highly motivated and entrepreneurial program specialists to expand the university's continuing education programs serving the public and private sectors in Alameda and Contra Costa Counties.

The responsibilities of the position include assessment of market potential for programs in a wide variety of subject matter areas; identification of instructors and development of curriculum, for new programs; development and management of program budgets so as to ensure sufficient income to meet all expenses; formulating marketing strategies; development of cooperative/collaborative programs within departments within CSUH; evaluation of course materials and assessment of appropriate delivery technologies; management of support staff to assure smooth delivery of programs; participation in the Division's academic and strategic planning process; development of professional networks and relationships with regional professional groups and academic departments on campus.

Requires extensive experience in continuing education program development and delivery. Also requires excellent oral, written, and interpersonal communication skills, and the ability to work independently to analyze markets, work with potential clients, develop course curriculum and establish budgets. An earned Masters Degree or Doctorate is desirable.

The positions are renewable annual appointments. Salary and benefits are competitive and commensurate with experience and qualifications.

Interested applicants should submit, on or before August 18, 2000, a detailed resume, letter of application with specific qualifications including recent salary history and the names, addresses and telephone numbers of three referees to:

Personnel Office
CSU Hayward Foundation, Inc.
25976 Carlos Bee Blvd.
Hayward, CA 94544-1699
(510) 885-3501

Deadline for the submission of applications is August 18, 2000.

CSU Hayward Foundation, Inc. is an equal opportunity employer.

BROOKDALE COMMUNITY COLLEGE

DIVERSITY MANAGEMENT OFFICER

Brookdale Community College announces a full time professional position for a Diversity Management Officer to be responsible for leading and coordinating institutional efforts toward maintaining a campus environment that is inclusive, pluralistic and free of discrimination. Responsibilities will include development and recommendation of policies, procedures, and practices; ensuring that applicants, employees and students are treated without regard to their race, color, religion, national origin, age, gender, sexual orientation or disability in accordance with all applicable federal and state laws, regulations and executive orders, as well as Board of Trustees' policies. Will also be responsible for recruitment and retention efforts.

Candidates must have: Bachelors' Degree along with a minimum of three years of relevant experience, preferably in higher education, required (advanced degree preferred): leadership ability and knowledge of laws, regulations and compliance procedures regarding AA/EOE, experience in conflict resolution and the ability to resolve complaints, in an objective, confidential and impartial manner. A high degree of diplomacy, sound judgment, exceptional communications and interpersonal skills and the ability to work effectively with faculty, staff, students and administrators are essential.

Annual salary $32,504.

The application deadline is August 18, 2000. Send resume and list of at least three references to Human Resources Office, Brookdale Community College, at the address listed below. Our fax number is (732) 224-2070. For more information about Brookdale Community College, please refer to our website at www.brookdale.edu.

CERRITOS COMMUNITY COLLEGE DISTRICT

President-Superintendent
Cerritos College
Norwalk, California

The Board of Trustees of Cerritos College invites applications and nominations for the position of President-Superintendent.

Cerritos College, a comprehensive community college, is a one-college district enrolling nearly 23,000 students on a 140-acre campus. Located in southeast Los Angeles County, bordering both the city of Long Beach and Orange County, the college district encompasses eight cities. Cerritos College has more than 1600 full- and part-time employees, and an annual budget in excess of $80 million. The college prides itself on being one of the most ethnically diverse community colleges in the nation and on being the most technologically advanced community college in the state for teaching and learning. A model of effective shared governance and collegiality, Cerritos College is one of only three California community colleges without a unionized faculty.

The presidency of Cerritos College offers an attractive opportunity to guide a dynamic college that is well positioned to continue as one of the flagship community colleges in California. The successful candidate will embrace this ethic and provide the leadership that guides the college in its quest for excellence.

The successful candidate need not be Catholic, but must be prepared to support Niagara's Catholic and Vincentian mission.
Wright State University invites you to share our spirit of innovation and excellence.

Dean
College of Business and Administration

Wright State University is seeking a leader for the AACSB accredited College of Business and Administration. The Dean is the chief academic officer of the College of Business and Administration and reports to the Provost. The Dean will provide leadership for the departments of Accountancy, Economics, Finance and Financial Services, International Business, Management, Management Information Systems, and Operations Management and Marketing as well as the Master of Business Administration and other masters' degree programs. In addition, the college has an active outreach program including the Small Business Center, the Center for Economic Education, and a number of international programs. There are 1,700 faculty and over 1,700 undergraduate and graduate students in the College.

The successful candidate must possess the following qualifications:

- Visionary leadership in the execution and strategy development to meet the future challenges of business education
- Demonstrated record of accomplishment in academia or business
- Demonstrated administration skills including planning, supervision, and budgeting
- The ability to forge and maintain relationships with external constituencies including alumni, corporations, institutional partners and governmental agencies for the purpose of expanding resources to maintain and enhance a high-quality learning environment
- The ability to effectively recruit, select, and develop faculty and staff
- The ability to recruit and retain qualified students who represent a multicultural society

Wright State University is located in suburban Dayton, Ohio, a region of governments and industrial innovation in services and technology. The University enrolls about 11,200 students, including nearly 4,200 in graduate and professional programs. There are approximately 100 undergraduate, over 90 masters', and five doctoral programs in the School of Medicine. For more information about WSU, please visit our Web site at www.wsu.edu. Salary for the position is competitive; some dates are expected to be no later than July 1, 2001. Minimum qualifications are an earned terminal degree or significant experience as an executive level officer of a major business or other organization. Review of applications will begin October 15, 2000, but applications will be considered until the position is filled. Interested applicants should send a letter of interest, curriculum vita, and names, addresses, phone numbers and e-mail addresses of at least three references to Prof. Mary Ellen Murray, Chair, Business Dean Search Committee, Wright State University, 3600 Colubumbia Mall, Dayton, OH 45435. Wright State University is an Affirmative Action/Equal Opportunity Employer.

I PUNTO FINAL!

"STEP OFF THE SIDEWALK"

Reginald Cornejo, a graduate of the CSI system, has taught at College of the Sequoias in Visalia, Calif., at Oxard College, Calif.; and at the Porterville Unified School District. He has been published in the San Francisco Examiner, the Visalia Times-Delta, The Nation, The Aliso Journal, the Porterville Recorder, and other publications. Mr. Cornejo is happy to claim North American Indian (Apache/Navajo), Mexican aboriginal (Tlatupilte), and Portuguese roots.

It seems like yesterday that my father and I were walking down that street in the New Mexico Texas area of America and came upon several white men and a white woman on the same side of the sidewalk as we were. The event had occurred many times before, but this day was different, for it taught me a lesson about racial equality.

The men confronted my father and, using several profane words, ordered us to get off the sidewalk and, "...let a white woman pass." My father didn't move at first. So one man added, "Get off the sidewalk, Injun. Don't you understand English?" My father looked at me, smiled, and did as he was told. I now know that my father could have started a fight. He stood over six feet tall and was a big man (250 lbs.), but I think he avoided a fight because of me.

I never forgot that day. Since my father had shown so much intelligence, I decided to take his example and use my brain instead of my fist to survive in a white man's world. I promised him I would go to college and get an education, and I did. Unfortunately, my education caused me a new problem in the politically correct '90s.

Having earned a double B.A. in 1983, and after working in journalism for more than six years, I found myself teaching adult education, a job I enjoyed so much that I decided to return to college, earn an M.A., and become a junior college teacher. During and after my graduate studies, I taught at private colleges, adult ESL (Spanish), K-12 substituted, and worked as an adjunct and associate professor.

And after two years of applying for full-time tenure-track positions, I have learned that, like my father, I am being asked to step off the sidewalk to let America's white women pass. The reason I have to step aside, I've been told, is that men have suppressed women in America for so long that women should be hired over all men immediately.

This country is still predominantly Caucasian and controlled by "white men." They hold all the powerful positions in corporate America, and we have only had white men as Presidents. Historically, men of color were considered second-class citizens when compared to white women. So, I ask you, when or how have "men of color" ever suppressed or oppressed white women in America?

The answer is—never. Yet, in 1999, I find men of color, myse included, being ignored and passed over to fill teaching positions with white women—because America's white brothers and white sisters have decided they are going to correct gender inequalities in America's hiring practices of the past.

I am currently doing a college-by-college study of California junior college faculties and, so far, have found that the majority of the schools are running 90 to 95 percent Caucasian.

I'm not angry—just sad that America has not grown out of its racial/biased and/or protectionist ways. The fact that we do not have affirmative action departments in some schools, like Cuesta College and some of California's junior college faculties are becoming nearly all white (Porterville College and Cuesta College), only serve to expose the real agenda behind the killing of affirmative action; America's fear of losing control of the best jobs in America and making sure that the high-paying jobs are protected for future white college graduates.

America's minority males have become casualties of political correctness—an imaginative and successful game of political semantics that appears to have been created to control and suppress them. The message we get is that if minorities want to work in education, they have to take the jobs that are made available to them by those in control. If they don't want these jobs, these powers say minority men can work in other fields.

Some may find my statements bold. I feel they pale in boldness compared to Francis Fox Piven's statement about the plight of the "low to low middle-class minority males (and, to a point, whites) and their fight against those in power in 1970's America: "...the specter of ending on the welfare' or in the 'poorhouse' makes any job at any wage preferable alternative. And so the issue is not the relative merit work itself; it is rather how some men are made to do the hard work for the least reward."

If interested in submitting a Punto Final! "think piece," please e-mail us at slountalk@aol.com for guidelines.

GLOBALIZATION

The Department of Sociology at the University of San Francisco invites applications for a tenure-track position in Sociology at the Assistant Professor level anticipated to begin Fall 2001. We are interested in candidates who specialize in globalization, for example, environmental issues, international migration, development, and social development, multinationals, and the international division of labor, and women in development. Additional expertise in qualitative or quantitative methods would be an advantage.

Teaching responsibilities may include courses in globalization as well as general sociology courses such as Introduction to Sociology, Theory, and Research Methods. Normal teaching is three courses per semester. The Department contributes to the Women's Studies, American Studies, Ethnic Studies, Peace and Justice, and Legal Studies curricula.

Qualifications: Candidates must have a Ph.D. in Sociology, a strong commitment to research, evidence of scholarly productivity, and a commitment to supporting the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Applications should be submitted to: Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080. Applications must be received by October 15, 2000, in order to ensure full consideration.

SYSTEMATIC THEOLOGY

The Department of Theology at the University of San Francisco invites applications for a tenure-track position in Systematic Theology at the Assistant Professor level, anticipated to begin Fall 2001.

Teaching responsibilities may include courses in core curriculum and Masters level courses in Christian Tradition and specialty courses in Systematic Theology, including ecumenics, interreligious dimensions, familiarity with Hispanic/Latino, African American, or theology other ethnic minority groups, is an advantage.

Qualifications: Candidates must have a Ph.D. in Theology, evidence of a strong commitment to research, evidence of scholarly productivity, and a commitment to supporting the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Applications should be submitted to: Theology Search Committee, Department of Theology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080. Applications must be received by October 15, 2000, in order to ensure full consideration.

The Arts—Who Needs Them?

BY GUSTAVO A. MELLANDER

When college budgets are to be cut, the arts always seem to be the most likely targets. Why is that? Why are they considered frills and not part of an institution’s academic core?

Individually, virtually every faculty member or administrator pledges support for the arts in private. But in mass meetings, far too many either remain silent or tacitly agree not to fund the arts. Yet most of us know from personal experiences that an introduction to and exposure to the arts widened our world and our learning experiences. When people are involved in the arts, their lives are changed for the better. The interaction is a liberating experience and launches a journey of self-discovery.

When properly presented, the arts provide us with authentic learning experiences that engage our minds and hearts and help us develop our innermost dreams. The learning experiences are meaningful and transformational.

Two Reports

“Champions of Change,” a report by the Arts Education Partnership, and “Gaining the Arts Advantage,” prepared by the President’s Committee on the Arts and the Humanities, are but two recent Washington-based think-tank-style studies. They address reasons why the arts should be prominently included in our education programs.

In many disciplines, teaching often centers on the honing of a single skill or talent. But these reports note that when we study the arts, we invariably engage multiple skills and abilities. Engagement in the arts—whether the visual arts, dance, music, theater, or other disciplines—nurture the development of a variety of cognitive, social, and personal competencies.

How It Works

I have gleaned seven examples of how the arts influence and broaden those introduced to them:

• The arts reach students who are not otherwise engaged.

Students who are not engaged with their college or studies are at the greatest risk of failure. Researchers have found that those students drift aimlessly and, in some cases, in a destructive fashion. But once they connect to the arts, many secure their moorings. The connection provides them a reason, sometimes the only reason, to remain in college and ultimately succeed in other courses.

• The arts reach students in ways in which they are not otherwise being reached.

Learning styles differ. Many students who “fall” in traditional lecture classes might blossom once they are introduced to and succeed in the arts. They might have “acted out” in their other classes but find themselves high achievers in the arts. A bridge is then built to their other studies.

• The arts connect students to themselves and one another.

Creating artwork is a personal experience. Students will draw upon their personal resources to create a highly personal result. By engaging their whole person, students feel invested in ways that are deeper than “knowing the answer.” Their attitudes towards one another are transformed through their arts learning experiences.

• The arts transform the environment for learning.

When colleges transform themselves so that the arts are central in their learning environment, they become places of discovery. The very culture of an institution is changed, and the conditions for learning are changed. Divisions between disciplines melt away, and both teachers and students feel rejuvenated.

• The arts provide learning opportunities for adults involved in the lives of students.

Those held responsible for educating college students—teachers, parents, and other adults—are rarely provided sufficient or significant opportunities for their own continuing education. When those adults participate in the arts, they become active role models. Not only do they grow, but they model the benefits of a life that includes the arts. Students learn that education is a never-ending process.

• The arts provide new challenges for those students already considered successful.

Many talented and focused students drift into boredom and complacency. They begin to not want to go to their classes. For those students who outgrow their established learning environment, the arts can offer a chance for unlimited challenge. The research highlights examples in which older students mentor and teach younger students. Other examples note that students gain from being associated with and working with professional artists.

• The arts connect learning experiences to the world of real work.

The world of adult work is ever-changing, and the learning experiences attained through the arts show remarkable consistency with the evolving workplace. Ideas, fresh interpretations, or understanding—old interpretations influence the way we think, and there is a definite spill-over into our work places. Learning theory in a classroom or acquiring “hands-on” experiences in a studio provides students skills and knowledge and behavior adaptable to future workplaces. Working together in a class to produce a play, for example, provides skills and understandings that are transferable to life after college.

Hard to Imagine

in ways hard to imagine and at times impossible to measure, the arts enrich us and expand us beyond ourselves, involvement in the arts provides our students unparalleled opportunities for learning, enabling young people to reach for and attain higher levels of achievement.

These two serious and well-documented studies provide myriad examples and factual evidence of why the arts should be more widely recognized for their current value and their potential contributions to the improvement of education.

The Hispanic Reading Room: Two Million Resources

BY GARY M. STERN

Thousands of people every day conduct research at the New York Public Library. Open to the general public, the library attracts academics, interested readers, students, bibliophiles, the gamut.

Unlike the N.Y. Public Library, the Library of Congress' Hispanic Reading Room specializes in serving scholars, academics, and interested researchers who are over 18. Scholars don't have to prove their academic affiliation or prove that they are writing a book, but the Library of Congress and its 21 reading rooms are for reference only and do not lend books.

Decidedly low-key and apparently unknown to only a small number of academics, its Hispanic Reading Room is waiting to be discovered.

"The Hispanic Reading Room is the reference and reading room for people to conduct studies related to anything with regard to the Hispanic community in the United States, and for Luso (Portuguese)-Hispanic influence. Any studies related to Hispanic influence covering Latin America and the Caribbean can be researched here," explains Everett Larson, head of the reference section of the library's Hispanic division, and with the library for 30 years. But the Hispanic Reading Room can accommodate only a limited number of people.

"We have space for about 20 people," he added, but, if an overflow occurs, more people can be accommodated. The HRR is now working to expand its capacity to 40.

The jewel of the Hispanic Reading Room is its collection of more than two million items related to the Hispanic world, says Larson. Its specialties are "humanities and social sciences, as well as languages, linguistics, and bibliographies," he says.

For the most part, the Hispanic Reading Room has drawn scholars researching graduate school papers writing dissertations, or turning those dissertations into book 75 percent, says Georgette Dorn, chief of the division, with the library for 35 years. But hopes for a wider audience.

"We've encouraged the gene public to use the Hispanic Read Room. If you're learning a language you can do research here. Journal can do research here on a variety of subjects," Dorn says. She'd like to see the library used by more school teachers. It's perfect, she says, for researching Spanish and history lessons. And even someone untrained in Spanish can ask permission to use the library for a research paper.

Its venerable history dates back more than 60 years, when Arcl Huntington, an American philanthropist who also started the Hispanic Society of New York, established it on October 12, 1939. The Hispanic Reading Room originally centered on Spanish and Portuguese culture but now covers Latin America, the Caribbean, the Philippines, and Angola, once owned by Portugal.

"What makes the Hispanic Reading Room special," Dorn says, is that it has books on Brazil or Spain that are published in countries all over the world. We'll have books written in Japanese, Chinese, or Spanish on Brazil or Spain. The inclusion of so many books in foreign languages helps explain one-third of the people who use the library are from outside the US.

The HRR consists of three rooms. The main reading room, 130 feet long, is imposing and majestic, measuring 130 feet in length. It was designed in Spanish renaissance style, complete with oak doors and surrounded by rows of reference materials. Located on the second level are eleven libri.
who specialize in Hispanic culture. On the upper mezzanine are the offices of the people who produce the Handbook of Latin American Studies.

Lines of carrels are provided for the use of researchers. Computers are all over, having replaced the card catalogs in 1980.

The Hispanic Reading Room is open weekdays from 8:30 a.m. to 5 p.m. No appointments are necessary. Other parts of the Library of Congress are open on weekends, so it is not impossible to research Hispanic books at those times. But the Hispanic Reading Room is shuttered.

The Hispanic Reading Room is one of 21 such rooms connected to the Library of Congress, which is located in the nation’s capital, at 1st Street and Independence Avenue.

A scholar researching maps of Latin America will be directed to the map division, a scientific researcher to the science division, and someone researching Texas will be sent to the main reading room. “We work with the librarians in special collections, manuscripts, motion picture, prints, and photographs,” Dorn says. Most of the research done in HRR is historical in nature, followed by literature. But an issue such as the invasion of Grenada a decade ago will cause a flurry of interest.

Cuba is the country researched the most, followed by Brazil, Mexico, and Spain.

Jorge Chinea, an assistant professor of Latin American Studies at Wayne State University in Detroit, could not have found all the material necessary to write his book on slaves leaving Jamaica for Cuba were it not for the Hispanic Reading Room. He found ample background material therein on Cuba, the Dominican Republic, and Jamaica.

“The Hispanic Reading Room is a goldmine,” Chinea says. When he searched for British documents on Jamaica, he found them at the HRR. Looking for documents about enslaved Africans who wound up in Cuba, he found them at the HRR. Using the Library of Congress’ map division, he uncovered extensive map collections from the 17th and 18th century on the Caribbean.

“The Hispanic Reading Room,” declares Chinea, “is not just for scholars either. The average person can learn about Latin American culture there.” Since Chinea was doing research here over several months, librarians became quite familiar with him and would often recommend documents that he didn’t know existed. He also considers the rare book depositary an excellent research tool. “It possesses 17th- and 18th-century chronicles, travel accounts, and early history documents,” he says.

The Hispanic Reading Room has a wealth of material on just about any Hispanic-related topic that can be researched. If you want information on Gabriela Mistral, the Chilean poet and first woman to win the Nobel Prize for Literature, HRR is the place to do research. A scholar from mainland China recently visited the library to research Chinese communities in Northern Mexico. A Nicaraguan man reviewed a map of his country from 100 years ago and found the home of his great-grandfather, which is still intact, noted on the map.

The library also has become a favorite resource of diplomats. The ambassador of the Dominican Republic, a scholar himself, used the library to research a paper, and the Uruguayan ambassador to the Organization of American States was another frequent visitor.

HRR’s rare book section contains books and documents printed before 1801. The HRR even possesses a first edition of Don Quixote, written in 1605. Scholars must request permission to read the rare book material, but can even get access to reading that 17th-century Cervantes novel. Larson is quick to add, however, that most of the time, facsimiles of Don Quixote are given out, rather than risk damaging the original.

Larson recalls a professor who wanted to review a book by Chilean poet Pablo Neruda. Republican army members whipped and threatened the book. The HRR had only one "copy," which was an exact facsimile, thus difficult or impossible to read. The professor asked to read it. The reading room director and staff met to discuss whether to cut the shirt so the book would be readable. Their decision was yes and the book was cut, because, says Larson, “We’re a library, and we’re here to help people.”

Larson remembers, too, an incident when a Marine who was on the verge of being sent to El Salvador came to the HRR asking for as much material, novels, and poetry of El Salvadorian writers as possible, so that he could “converse with the people about literature, not just machine guns.”

Over the last few years, the Hispanic Reading Room has enabled readers to reach the library via computer. Anyone can send a question about the Hispanic Reading Room’s collection to rrrhispanie@loc.gov and receive a personal response. Do not write to have a librarian do your homework or research your term paper. Larson says, only half-kidding, Information on the

The Hispanic Reading Room can also be accessed at lcweb.loc.gov/rr/hispanic/. “Though our books aren’t digitized, you can come in and find one of the two million available reference books,” Larson says.

The Hispanic Reading Room has a tradition of publishing a bibliography. Information for the Handbook of Latin American Studies, though funded by the University of Texas, is supplied by the HRR. It is a cumulative bibliography of the works of Latin American authors and is available online as well. The bibliography is so popular that it drew more than 20,000 hits last year in Spanish on the Internet and an additional 10,000 in English.

If the Hispanic Reading Room is such a wonderful resource for Hispanic research, why doesn’t the Library of Congress publicize it more? “Scholars find out about us mostly through word of mouth,” says Dorn. “But we’d like to reach out more to the community,” she acknowledges. What the Hispanic Reading Room needs is a pro-bono publicist to create a buzz.

“If anyone is deeply interested in the wealth of Hispanic culture, you have all your information under one roof at the Library of Congress,” says Larson. “It brings together historical, legal material, maps, and motion pictures in one location.”
La Vida Loca

Life and Art in Cuba, Part One

BY EDWARD RUBIN

Long having held an interest, at least peripherally, in Cuba—it was my father's playground during the '40s and '50s, and during the early '60s, as a reporter, he covered Castro's trials of Batista henchmen—it wasn't until the last few years, with the American press overflowing with strategically placed articles on Cuba, that my desire to visit the island surfaced. I could almost swear that, despite travel to Cuba by ordinary American citizens being verboten for some forty years, roughly the same number of years the U.S. trade embargo has been in place, someone somewhere wanted me to go.

Though I had heard numerous stories of illegal travel to Cuba via Canada, Mexico City, Cancun, or any number of Caribbean islands, for whatever it was worth, I wanted my government's fullest protection. As a freelance journalist, one of the few categories legally allowed to travel to Cuba, I had narrowed my choices to covering the Havana Film Festival or the burgeoning Cuban art scene. Not wanting to spend two weeks sitting in the dark, silently watching movies in languages I could barely understand, I came to my senses and opted for the art scene. Here, at least, I could have a dialogue with the people.

As I was to discover, deciding to go to Cuba was the easiest step in what turned out to be a rather arduous process. Not knowing one Cuban, little about Cuba, and even less about the Cuban art scene, except that it was hot and happening, I plunged right in with a call to the U.S. Treasury Department, the government agency responsible for issuing licenses for travel to Cuba. Eight months later, after reading a good number of books and catalogues on Cuban art, history, and for my life, numerous stories of travel spied upon, and warnings not to talk about politics or even mention the name Castro Americans who had been to Cuba—the reas ranged from, "that would be in lage " to "it would be too dangrous"—only once, when it was s suggested that I read Castro on TV: a book detailing the jailing, tortu and execution of countless Cuban citizens, did I have serious misgivings about traveling to Cuba. By negative travel experience I had returned doubly magnifie had to remind myself that man governments made of man, by the very nature, are killers and that right to choose the countries to v by those that did not bomb, k jail, or oppress the so-called inc cent, I'll never leave my apartme It was that easy. It was that hard.

Aside from a couple of hosp stays, during which I was forced contemplate my own infirmity, have never had a more rigorous two weeks. From the moment landed on Cuban soil in late an oppressively hot and often ra non-tourist season, deliberat selected to comply with U.S. g erment spending limits of c hundred dollars a day, hotel incl ed. I was trenchantly aware, o moment-to-moment basis, t nothing in Cuba comes easy: everythin is political. From its overlap economies—socialist, capitalist, and und ground, the latter on which many Cubans ret meet even their most basic needs—to the isla beautiful but deteriorating architecture. Cub a country in transition, if not controlled turn
Lacking hundreds of consumer goods and services, which clamor for 24-hour attention, the State, its leader, and his philosophy are the only products consistently available to everyone.

To quote Fidel Castro, "For some, history is good fortune; for others, it is a process ruled by laws." For Cuba, more than most countries, certainly ours, history, with its centuries of colonization and turbulent revolution, has always rested most heavily upon its peoples' heads. One only need refer to our respective national anthems to get a flavor of our differing historical perspectives, if not belief systems. "The Star Spangled Banner" tours, "Then conquer we must, when our cause is just" while "La bayamesa," Cuba's national anthem reads, "To submit to the bondage of aliens is to suffer a life of degradation."

To understand Cuba today, and in no small way, the workings of its contemporary art scene, a whirlwind, thumbnail sketch of the island's history, much simplified, is in order. For those given to fuller study, Hugh Thomas's lively Cuba or the Pursuit of Freedom is the authority. For history of Cuban contemporary art, Luis Camnitzer's New Art of Cuba, though slightly dated vis a vis today's art scene, is a good jumping-off point.

Like our own history, that written, the history of Cuba started with Columbus. Apocryphal or not, upon seeing the coast of Cuba, the explorer, during his first voyage to the New World, is said to have pronounced the island, "the most beautiful land human eyes have ever seen." Foreign intervention and domination, four centuries worth, were to follow. First came Velázquez to claim the island for the Spanish crown. Then bloodshed. The history is familiar.

Stripped of what little gold it had, Cuba was reduced to the status of supply post for the more lucrative plundering of South and Central America. Its indigenous people, the Taínos, were enslaved under the pretext of receiving religious instruction. European diseases decimated those who didn't die "on the job." Next came slaves imported from Africa. They worked the cattle ranches, the mainstay of the Cuban economy, until the early 18th Century, when tobacco became Cuba's cash cow. "Spain in the Tropics" was being established. For a brief period, 11 months during the Seven Year's War, the British occupied Havana. In what could be termed a coming of age, after the British forces left, with its trading links vastly expanded, Cuba (in the late 18th century) shed its role as service colony to become the world's premier sugar producer. Again, tens of thousands of imported slaves, bringing their African religion with them, were to follow.

If one accepts that modern art begins with Manet's "Luncheon on the Grass" (H.W. Janson cites the "revolutionary" 1863 painting as "a visual manifest of artistic freedom that asserts the painter's privilege to combine whatever elements he pleases for aesthetic effect alone."), then the political history of modern Cuba can be said to start, at least for purposes of this article, with the 1868 revolution. Cuba's first try, led by Creole planter Carlos Manuel de Céspedes, to and gave the U.S. veto power over all Cuban trade agreements.

Suddenly a foster child of the United States, Cuba hadn't exactly won her freedom; she simply changed owners. A resentment would last until Castro, converting popular discontent into active enthusiasm for his revolution, eventually forced Batista, who ruled Cuba for nearly three decades, to flee on New Year's Eve, 1959. The later Batista years are often referred to, with their political corruption, gambling, prostitution, and drug dealing, as the Age of Decadence. Interestingly enough, the image of the martyred José Martí, who believed that Cuba must maintain an identity separate from that of the U.S. and could not be totally free without racial and sexual equality, appears in statuary and portraiture all over the island. Along with other Cuban revolutionary heroes, chief among them the ubiquitous Che Guevara, whose image has also been reduced to popular kitsch, the type that tourists take home, Martí's image, representing both the promise of the Revolution and its betrayal, occasionally appears as an icon in the work of contemporary artists.

When Castro took over Cuba, for all intents and purposes, the ownership of Cuba was essentially in foreign hands, as it had been for centuries. With the U.S. at the top of the list, and Spain a distant second, foreign investors owned some 75 percent of rural real estate and farmland. Americans owned more than 165 major companies, including 90 percent of public services. We also controlled the refining industries and owned outright, and through joint ventures, an estimated 40-50 percent of Cuba's sugar mills. In addition, 90 percent of Cuban imports, funneled almost entirely through Havana, came from the U.S.

Castro's reforms were swift. In short order, much to the good of Cuba, at least initially, he nationalized most industries and the banking system, and confiscated most foreign- and many Cuban-owned properties. All existing leases and mortgages were cancelled; rents were reduced to 10 percent of tenants' income. Under these new laws (still in effect), rent was paid directly to the State, but tenants were responsible for all upkeep, effectively choking off rental revenues—and a major source of investment for the Cuban middle class, primarily from new rental construction and

Achieving Utopia

Though no official guidelines were established, the Cuban revolution affected art enormously. For the first time in island history, the distinct possibility of achieving Utopia, another subject dealt with extensively in both Cuban art and art criticism, existed, and all the arts flourished. What’s more, the State established a system of free art education. Taking it even a step further, the government guaranteed art students upon graduation, work in an art-related field. Surprisingly, unlike Russia or other Eastern Bloc countries, Cuba aligned and comfortable with Western art traditions, did not adopt the social realist mode.

But Castro did instill a kind of imprimatur in his famous Speech to the Intellectuals (1961), in which he imported all artists, “Within the Revolution: everything; outside the Revolution, nothing.” This simple phrase, casually dismissed by artists and critics as rhetoric, appears to inform (if not consciously, certainly unconsciously) the work of many Cuban artists today. So much so that the most influential art I saw on the island, powerful statements that attacked zero in on the powers that be, like ammunition hoarded for future use, was hidden away in the artists’ personal collections. Moreover, everyone was aware of why it remains hidden.

From the beginning of Modern Art in Cuba during the ’20s, artists rejected the Academy and turned to Europe. Mexico, and New York for inspiration. In no ideas. Both Carlos Enríquez and Amelia Peláez, early Cuban modernists, studied in Europe. Always aware of international currents, the Cuban artist, perhaps in self-defense, has long vaged battle to define, construct, maintain, and, more recently, to promote, without ever abandoning nationalistic concerns, the Cuban identity, what Cuban art critic Gerardo Mosquera terms “the Latin American Obsession.”

Amazingly, no matter what school of art came down the pike, be it Cubism, Expressionism, Surrealism, Abstract, Photorealism, or Pop, successive generations of artists have been facile enough to digest and adapt these movements to their own needs. Without losing the local color and touch of exorcism that Cuban artist/artist critic Tonel calls “the hallmarks of authentic Cubanity.” I would add, also in evidence, a certain folkloric and Afro-Cuban religiosity, often with sensual and sexual overtones, whose essences seem to permeate much of the island’s life and art. Wilfredo Lam (1902–1982), Cuba’s most famous artist, the son of a Chinese father and mulatto mother, explored these avenues with much success.

During the last 40 Post-Revolution years—the entire reign of Castro—Cuban people, and artists by extension, have experienced continual change, very often in the form of cataclysmic happenings and acrobatic reversals. Again, perhaps oversimplifying, following the Revolution, the Bay of Pigs led to the U.S. Trade Embargo, which drove Cuba into the arms of Russia. Next came the Missile Crisis, which brought the world to the brink of the unthinkable. Greater Russian support was to follow. On the heels of Cuban troops in Angola, the Mariel Boatlift (1980), in which the Cuban government, to quiet inner turmoil, allowed 125,000 Cubans to leave for the U.S., reawakened our interest in the island. A number of Cuba’s leading artists and writers were among the defectors.

With the fall of the wall, the collapse of the Eastern Bloc, and the withdrawal of Russian technical and financial support in the early ’90s (an estimated four to seven billion dollars a year), Cuba’s economy was more than halved. This in turn created severe shortages and tightened the preexisting rationing of foods, goods, and services. To counteract these setbacks, the government continually initiates economic and political purification programs, not to mention draconian laws, to keep the island both independent, aloof, and under the sure hand of Castro. Among the more visible, The Rectification Process (1986), instituted to avoid the political transformation of glasnost and perestroika sweeping Russia and to find “new solutions to old problems,” The Special Period in Peacetime (1990), which introduced austerity measures, still in effect today.

Subjected to the turbulent tides of political change, the artists, ever adaptive, went with the flow. The early ’60s gave the artists support. The latter ’60s took it away. The ’70s, with Cuba fully under the influence of the Soviet Union—money does talk—brought the heavy hand of authority. Under the slogan, “Art: An Arm of the Revolution,” all stripes of artists were marginalized for ideological (not being a Marxist) and so-called moral issues, such as homosexuality. Many were deprived of their livelihood. Ironically, which is often the Cuban way, at the end of the ’70s, the Ministry of Culture, the censorious arm of Cuban art, was created. At the same time, “New Art of Cuba,” which was to surface during the ’80s and focus artistic concern on the social and political, was given its first
breath with the creation of Havana’s ISA, Inistituto Superior de Arte.

**Instituto Superior de Arte**

Modeled after an MFA program in New York, to provide art students (most of whom start their art education at age 12) with the best studio and theoretical visual arts training, ISA houses the island’s elite producers of culture. The mid-’80s also saw the establishment of the most formidable agency of Third World and Cuban art promotion, the Havana Bienal.

Out of ISA came the first generation of visual artists, fully trained by the Cuban Revolution. Known as the generation of the ’80s, these artists changed the direction of art significantly, so that the art of the ’90s, with good reason, is still referred to as "The New Art of Cuba." Less concerned with identity (for them it was an inner, not outer, question), and tired of slogans and political dogma, artists turned their energy toward the realities of everyday life. Poverty, shortage of goods, and racism took the brunt of the criticism. Conceptualism and outdoor performance were the main weapons in their arsenal.

During the second half of the ’80s, with a strong presence of the grotesque, the scatological, and sexual impudence, double ironies, and triple meanings, coupled one too many times with an image of Che or Castro, the art turned too political for the authorities and the Rectification Process was begun. With little money for materials, reduced government support, and the beginnings of an international interest in Cuban art, many of the island’s foremost artists, who were also teachers at ISA, migrated in masse from Havana to Mexico City, eventually settling in cities as disparate as Monterey, Miami, and New York, further expanding Cuba’s 'out of country' art presence.

In the wake of these tumultuous events, despite numerous losses and setbacks for freedom of expression, Cuban artists continued, like weeds under a rock, whether publicly exhibiting or not, to produce work of the highest quality. In fact, one could say that the artists, now battle-scarred and hardened, like Cuba’s soldiers and athletes, were being well trained for both survival and competition. This quality would stand them in good stead as Cuba entered the international art market of the ’90s.

Given the history of Post-Revolutionary Cuba, the decades of the ’90s were to bring astounding change. With the withdrawal of Russian economic support, which virtually kept the island afloat for decades and the Cuban people subject to the most extreme hardships, the government, aside from instituting austerity measures, began a series of changes that were to affect the entire population. Over a period of years, in what could be termed “reversal of strategies,” for the first time since the Revolution, people were allowed to become small-business owners. Tourism was encouraged, foreign investment courted, hotels built, and use of the U.S. dollar and tipping, each of which had been against the law, were legalized. To announce these seemingly democratizing changes worldwide, the Pope was invited to Cuba. To many Cubans, the government is forsaking everything the Revolution stood for. Today Cuba’s primary source of income is tourism. It 1984, Cuba had fewer than 200,000 visitors. Two million are expected this year. Pretty staggering when you consider most will go to Havana whose population is three million. No wonder it’s called “Return to Capitalism,” and all that it entails, is a major theme in the work of man of today’s younger artists. This is more or less, the Cuba I encountered when I first arrived.

Edward Rubin is a senior editor for Manhattan Art International and a regular contributor to the New Art Examiner. His essays, criticism, and photographs have appeared in such publications as Artnews, Winc City Times (Chicago), Backstage, the Philadelphia Inquirer, the Indianapolis News, the Village, and, prior to their close of publication, Arts Magazine, Theater Week and American Film. During the ’80s, he produced and directed over 50 plays, concerts and readings in New York City. During this same decade, his play, Mother of the Year and His Oman show, At the Sound of 1 Beep, opened to successful Off-C Broadway runs. Rubin is a founding member of AICA (International Association of Art Critics), the Outer Critics Circle, the Drama Desk, and the Marketing Research Association. Based in New York City, Rubin is the National Field Director for Audits & Surveys Worldwide, an international research company. His slide lecture: La Vida Loca: The Life of an Artist in Cuba, is currently available for booking. For more information, he can be reached at erubin5000@aol.com.

The conclusion of this article, Part Two, will appear in the August 25 issue.
Artist, Activist, Educator

Carmen Lomas Garza in Profile

BY JEFF SIMMONS

Carmen Lomas Garza bristles when I asked about her favorite work.

“You can’t ask an artist for a favorite painting,” she insists. “They’re all my favorites.” The distinguished artist pauses, and then adds, “I am very much involved in whichever painting I am working on.”

Each of her watercolors, cutouts, home altars, and oil paintings is a part of her history and her culture. Garza has spent three decades vividly illustrating the scenes of her life, works that initially captivated Mexican Americans but now have garnered acclaim from a much broader audience.

Garza has produced four children’s books and more than 60 paintings, and recently completed a sculpture that will be unveiled in a new airport wing in San Francisco. Her work has explored cultural traditions and Chicano struggles alike, and she was the first Chicana to be the subject of a substantial traveling retrospective.

“People love her artwork,” says Luis Torres, chair of the Department of Chicana and Chicano Studies at the Metropolitan State College of Denver. “They really identify with her artwork, and it really helps kids appreciate art and appreciate the Mexican and Chicano traditions and people.”

Much of her work reflects childhood memories, growing up in the small town of Kingsville, Texas—bright, colorful images of tamale-making parties and young girls fixing their hair. Garza says these images depict her most cherished memories of time spent with far and friends.

Her exhibit, A Piece of Heart/Pedazo de mi corazon, which traveled to several galleries and museums, triggered a catalogue in 1994 by The New Press in New York City. The catalog explores her work and her life, includes 57 reproductions.

In the foreword, Daniel Stet writes that Garza’s reflect “strikes a familiar bell of understanding standing within each of us.”

Each of these paintings, paper cutouts, and altars is a from the artist of a world view proffers understanding. Sharp memory, so empowered, transf the everyday into potent narrati he writes.

Her works speak of sibling care-taking healing traditions, and reflect the beaut Chican0 culture. This year, one print can be s at post offices and libraries across the nation is featured in a Census 2000 poster in hope reaching out to the Hispanic community, w1 was severely undercounted in the 1990 censu Last year, Metropolitan State College awar
her its third annual Chicana/Chicano Latina/Latino Distinguished Visiting Professor award. Over five days, she met with hundreds of teachers, staff, and students.

“She was extremely generous with her time,” Torres recalls. “She was anxious to give presentations to K-12 teachers. Head Start teachers, anybody who works with kids, which is very much where her heart is: to improve education as much as possible.

“She even gave workshops to parents so they could teach their kids how to do paper cutouts. Maybe her devotion to this is because she doesn’t want the same thing to happen to children now that happened to her and her generation of Chicano kids back then growing up.”

Garza agrees, and says that while she was growing up, there was not much encouragement for budding Chicana artists, let alone classroom lessons that reflected her culture and heritage.

In recent years, she has had one-person shows at the Hirshhorn Museum and Sculpture Garden at the Smithsonian Institution in Washington, D.C., the Whitney Museum of American Art in Manhattan, and the Mexican Museum in San Francisco.

She now is fielding so many offers to speak and lecture that she’s had to turn many down. Instead, she is focusing on her future works, which she creates in a rented studio in a deactivated shipyard with a panoramic view of the East Bay. “I don’t have a regular schedule, but there are so many things going on,” she says. She is now working on a solo traveling show that will unfold at the San Jose Museum of Art in California in February and then move to other venues.

Hispanic Outlook recently talked with Garza about her work, what the future holds, and about why she chose to pursue a career in art.

**Early Influences**

“Most teenagers are having to consider what they will do as an adult, but I already had been doing artwork in my life. I was inspired by my mother to do watercolor and pen and ink drawings. It was something my parents told me to think about, think what I like to do, and that would be something I could do as an adult.

hometown university (which is now called Texas A&M University in Kingsville, Texas) has an art-in-education program, so I went.

“[My paintings are based on memories of my childhood. I wanted to celebrate my culture by depicting the everyday life that I grew up in the everyday things that we did as a family and as a community.”

**Overcoming Obstacles**

“As a Mexican American there were the obstacles of discrimination and racism in my public school education and college education. As a woman, there were also obstacles in the general community, though I felt a lot of support from other Chicana and Chicano artists. They were very supportive.

“In our town, the school district was divided, so most of the kids who were Mexican American and African American went to one junior high school, and the white kids went to another junior high school. When I was in junior high in the 1960s, my parents fought the kind of gerrymandering that made the school district change its sections.

“I didn’t really know politically speaking the words for discrimination and racism until I got to junior high school. In my elementary school, we were all Mexican Americans, and when I got to junior high school, I had my first encounter with students from other races, and there was a lot of tension in school between the white kids and the Mexican American and African American kids. But there wasn’t much tension between the Africa American and Mexican American kids.

“At that time, there wasn’t a lot taught in the public school system about my history as Mexican American. There were large gaps in knowledge, and many Mexican Americans felt we should have learned about the Chicano mov...
ment. Education in our public school system and in higher education was lacking in history, what was relevant to us since as Mexican Americans we were so close to Mexico and South America.

“There were no art classes in my junior high school, so I did it on my own. I do remember the segregation between the boys and girls. Girls were told to go into home economics, and boys went to biology. I protested that and got my mother to support me and insist on allowing me into a biology class that was strictly for boys. The way we made a case for me was that I already knew a lot about home economics—I knew how to sew and cook—and my mother said she’d been teaching me those things.

“So they listened to us and did let me take it. I was the only girl in the class, and I loved it. I was one week late in class, but I still did well.”

Becoming an Artist/Activist

“I finally got a chance to take an art class in my high school. By then I had taught myself to draw, and I had a collection of sketchbooks. I would draw everything that was in front of me. I would practice drawing whatever was in front of my hands, objects on the table, my sister watching television. That’s how I developed my skills. I always carried sketchbooks with me and a pencil.

“By the time I got to high school, my art teacher saw that I was quite serious about art work and in my senior year encouraged me to apply for a tuition scholarship to attend the university. I received a summer school scholarship and then a tuition scholarship.

“I was loosely tied to the Mexican American youth organization on campus. We did a lot of organizing of students to make demands on the administration for programs, and we organized local junior and high school students to make demands on their school districts to have more relevant education for them and to get more Mexican American teachers in the school district.

“I started working for a migrant education program. I was a graphic designer for two years. Then I went to various places. I did teach one year in a public school in Austin, Texas. By that time, there were more of my peers who were starting to get teaching positions. We were a part of the baby boom generation.”

The Business of Art

“I moved to San Francisco in 1976. I started work at Galeria de la Raza/Studio 21, a nonprofit community art gallery of Latino artists. The gallery exhibits work by Mexican American and Latino artists. It was the first exhibition for a lot of us, the first opportunity to exhibit.

“I came there to help them run their store and do administrative work. I wound up doing a little bit of everything. I worked there for five years, and had one solo show there.

“This was more of an education because it’s still very difficult to be an artist. For one thing, though artists may be getting an education about their culture, they are still not being taught about the business of art.”

Advice for Would-Be Artists

“They definitely must study the business of art and learn how to survive as an artist. You have to be confident in your artwork. If you have a good body of artwork. First off, you must wear the business hat. You must be able to trumpet yourself, because nobody else is going to do it for you—unless you have an incredibly devoted spouse. It is almost like a full-time job to handle the business side of art.”

The First Sale

“It was an etching print that another student bought from me in my freshman year. It was a print of trees that had human figures visible in the shape of the branches. It was the trunk of the tree. I sold it for five dollars. Basically, I just wanted enough money to buy some paper.

“I was really honored that another student who probably was on a very tight budget, they was willing to spend money to collect one of my prints.

“I received support mostly from other Mexican Americans and Chicano students. They were very politically aware of the importance of fine art in our community. They were supportive and encouraging. For the longest time, they have been my collectors and my supporters.”

Chicano Artists

“Chicano artists are considered too political, too radical. The museums were not interested in our work. We did our own cultural centers, our own galleries. My peers were the ones who organized the exhibitions in university art galleries.

“There were several big misconceptions. Latinos were seen as one entity, when we were quite diverse, even within the Mexican American community. We still are quite diverse. The other perception is that we all came from Mexico, but many of us have roots that go back to the
Indians of the Southwest.

"In my artwork, I try to focus on everyday life. I want Mexican Americans to see and recognize themselves in my artwork and feel proud of our culture. This also serves as a good tool for giving a glimpse, a window into our culture, for others who are not in our culture.

"I cannot tell you how many times people have come up to me from the Mexican American community to thank me for doing my artwork. The goal I had for my artwork has been to communicate with the community. That's the most gratifying reward in my career as an artist.

"Sometimes the responses are very emotional. I get fan mail from kids who tell me that they like the artwork. And they ask a lot of questions. Adults generally tell me similarities in their experiences in the artwork, and they tell me their stories.

"I had already been showing my work before I graduated. I had organized exhibitions and youth conferences for Chicanos. I became known among other Chicanos and I was doing a lot of printmaking and selling and trading."

Milestones

"There were some milestones. The most important exhibitions were here in San Francisco in 1977 and 1987. The first one introduced me to the loyal Mexican American community, and the second one introduced me to many more Mexican Americans. By then, the community was much more well known. The museum patrons printed a color catalogue of my work, and that catalogue was very instrumental in helping me disseminate my work.

"After my first show at the museum, the editor from Children's Book Press invited me to come down and illustrate somebody else's story for a children's book. I didn't do it because I was too busy preparing for an exhibition. And I really didn't want to do it because I was busy doing my own artwork. So I convinced her to do a book about my paintings with my stories for each painting, and it became a series of short stories.

"I just finished a large commission for the San Francisco International Airport. It's a metal cutout based on one of my paper cutouts. It's 16 by 24 feet, and in Gate Room 693, which will open in the fall of this year. The image of that design is in the book Magic Window, and it depicts dancers dancing to mariachi music from the waist down and the hands of artists painting the skirt of the dancer.

"I was trained as an art teacher, and that was my goal since I was 13. I decided that if I was to be an artist, it was going to be difficult to be a parent. I saw that because I am the oldest daughter and I had to help to take care of my brothers and sisters. I saw the amount of work it takes to take care of children. I also felt that I would spend a lot of time doing artwork and that it was be very expensive to be an artist, and figured I couldn't do both."

Being an Artist

"It means a lot of sacrifice on many levels. But it also means that for me, the success that I have achieved is very gratifying. The recognition from the Mexican American community and from other Chicanos is especially the most inspiring."
The locations of its campuses and outreach centers speak volumes—Miami-Dade Community College could not be better placed geographically to serve South Florida’s minority community. With 63 percent Hispanic and 21 percent African American enrollment, Miami-Dade has more than fulfilled the great promise that is the best contract that higher education can make with students—access and opportunity for those who apply themselves, for those who reach for a dream. This community college is a remarkable success story, one of rapid growth for the 40-year-old institution that has been honored for achievement in so many areas of academics, the arts, and community service.

Miami-Dade has consistently ranked No.1 in the nation throughout the past decade for enrolling and graduating the most minorities. A multi-campus, two-year, state-supported community college, Miami-Dade is nationally recognized as one of the largest and most distinguished in the country. The institution’s operating budget is in excess of $213 million. There are six campuses and numerous outreach centers with more than 2,100 faculty serving more than 128,000 students.

Approximately one-third of students are between the ages of 21 and 25. More than two-thirds attend on a part-time basis. Nearly 63 percent of the students are Hispanic; 21 percent, Black non-Hispanic; and 13 percent, white non-Hispanic. 59 percent are female. There are 682 full-time and 1,427 part-time faculty. Of these, 165 Hispanics teach full-time, and 564 Hispanics are part-time instructors.

Dr. Eduardo J. Padrón, fourth president of M-DCC, states, “As a community college, we particularly reflect the extraordinary diversity of our South Florida community, and we are all enriched by those students who graduate to achieve their goals.” Last year, Padrón was elected chair of the Florida Board of Community Colleges’ Council of Presidents. He also was presented with the Florida Community College System Award. He has a special association with the school, as well as being the most visible of the institution’s role models.

A graduate of Miami Senior High School, Padrón attended Miami-Dade in the mid-60s, majoring in business administration. He went on to earn his bachelor’s degree in economics from Florida Atlantic University, and later a master’s and doctorate in economics from the University of Florida. Before becoming M-DCC’s president, Padrón held many positions at the college, including the presidency of the Wolfson Campus for 15

Miami-Dade is one of the 28 colleges in the Florida System of Community Colleges. Dade County Junior College began operations in 1959 under the direction of the Dade County Board of Public Instruction. It commenced instruction on September 6, 1960, using temporary facilities, and was governed by that board for its first eight years. By action of the Florida Legislature, effective July 1, 1968, community college districts were created as independent, separate legal entities for the operation of community college colleges. Under the new organizational format, Miami-Dade's Advisory Committee

years. In addition, Padrón served President Jimmy Carter and Secretaries of State Edmond Muskie and Cyrus Vance. President Clinton publicly acclaimed Dr. Padrón "one of America's outstanding educators."

Dr. Padrón points out that the reason for the institution's great success is "obvious." "We are a community college. Make no mistake, in the obvious there is great richness. First and foremost, our door is open, and there is no more defining characteristic of this college than what is signified by that simple statement. We offer opportunity and hope to anyone who seeks to improve the quality of his or her life."

In many cases, suggests Padrón, Miami-Dade is the only avenue some individuals have to move forward. "To those who would say that college is not for everyone, I say to them, from a very personal point of view, that opportunity is--must be--for everyone who is willing to learn."

Padrón reports that the College has the largest enrollment in the nation of African American students as well as the largest number of Hispanics, and awards the most degrees to minorities of any college or university in the country. More than half of Miami-Dade's students, he notes, are first-generation college students, "just like their president." "Our ultimate goal at Miami-Dade," reports Padrón, "is both simple and unimaginably ambitious: to cultivate learners and cultivate learners. The goal is as necessary as it is ambitious, for any society that does not foster new learning in its people undermines its own foundation. To learn and to grow in understanding is intrinsically human, and Miami-Dade has made a conscious choice to be responsive to that need." He adds, "Learning humanizes our environment."
became the District Board of Trustees, working directly with the College president in all matters pertaining to the governance and operation of the College. Since its founding, the Community College has functioned as a public two-year college supported by the State of Florida. The institution was named Miami-Dade Junior College in 1968 and Miami-Dade Community College ten years later.

The original class included 1,100 students. Now the school enrolls more than 128,000 credit and non-credit students throughout the county. The North Campus, a beautifully landscaped 245-acre site, originally part of a World War II Naval Air Station, was the first campus, and opened in 1960. The Kendall Campus, situated on a lush 185-acre tract of trees and lakes, opened in 1967. The Wolfson Campus, located in the heart of the county's business and governmental center, opened in 1973. The campus offers a full range of academic and occupational programs, as well as customized workforce training. Fair International and the Cultura del Lobo Series enrich community life, while multimedia classrooms, a computer courtyard, and a conference center support academic programs.

The Medical Center Campus opened in 1977, in Miami's medical/civic center complex. With its special focus on nursing and allied health, it offers state-of-the-art technology and the opportunity for high-paying jobs in a wide range of medical careers.

The Homestead Campus opened in 1990 in Homestead's historic downtown business district. The InterAmerican Campus is the newest, located in the heart of Little Havana, one of South Florida's most colorful and ethnically diverse communities. InterAmerican is the nation's largest higher educational bilingual and bicultural academic setting. With a major expansion under way, the InterAmerican Campus will offer a new satellite link, multimedia classrooms, computer courtyard, and distance learning.

Miami-Dade Community College has distinguished itself in the arts, too, and this has brought the institution even closer to connecting with the diverse people in South Florida. M-DCC will host the biennial International Conference of Latino Arts and Culture (NALAC) for the group's year 2000 International Conference September 6-10. NALAC is a nonprofit organization dedicated to providing assistance to and advocating on behalf of community-based Latino arts and culture organizations. Founded ten years ago, NALAC serves more than 300 arts groups from all over the U.S., from predominantly Cuban, Mexican American, Puerto Rican, Dominican, and Central and South American communities. This year's theme is "One People, Many Cultures: Un Pueblo, Muchas Culturas."

"The main focus of NALAC is to mentor Hispanic arts organizations and individuals in the arts," reports President Padrón. "This conference will offer learning opportunities for our students and networking opportunities for emerging grassroots organizations to connect with more established groups and develop plans for growth. It also will be an extraordinary opportunity for arts administrators, artists, and scholars to meet their counterparts from around the world." Major sponsors for the event include The National Endowment for the Arts, The Rockefeller Foundation, and the Ford Foundation, with participation by the City of Miami, Metro-Dade Cultural Affairs Council, and Miami-Dade County Public Schools. Other events, such as the annual Miami Book Fair International, bring the world's most distinguished authors annually to the Wolfson Campus, and hundreds of thousands of people to the College to learn and participate in the event.

The school is making an impact in other areas as well. Last year, it was announced that the Medical Center Campus of M-DCC received two national rankings for awarding the most associate degrees in the country; No. 1 in nursing and in the health professions and related sciences. This was reported in Community College Week magazine's annual ranking of the "100 Top Associate Degree Producers"—based on U.S. Department of Education 1996-97 data, as well as in The Hispanic Outlook's June 2, 2000, issue devoted to the health careers.

The Medical Center Campus has an enrollment of 3,000 students and offers nearly 20 associate's degree and vocational certificate programs, including an associate's degree in nursing with three tracks that lead to becoming a registered nurse, with a variety of continuing education courses. Students gain practical experience at the on-campus dental hygiene and vision care clinics, and through the campus's affiliation with more than 100 health care agencies in Miami-Dade County.

Last April, the graduating Class of 2000 numbered approximately 5,000 students. The procession, led by a bagpiper, featured ROTC flag bearers who carried 71 flags representing the home countries of the students. Each student walked across the stage to personally receive a diploma and a handshake from the campus president and the College President.

"The history of Miami-Dade Community College is a history of achievement—the achievements of our students and our graduates," said Dr. Padrón. "For the past 40 years, we have provided an open door to education for all those who thought, due to their economic circumstances, their language, or other obstacles, that they could never have the experience of attending college."
A Curatorial Perspective

Marysol Nieves, Bronx Museum of the Arts

The Bronx, like the other four boroughs of New York City, is not exactly a melting pot but more of a rich stew of diverse cultures. Artists of these cultures—African American, Asian American, and Latin American—are the special focus of the Bronx Museum of the Arts.

Founded nearly 30 years ago, the Museum's first home was the rotunda of the Bronx County Courthouse building, a small space where it stayed about a decade before moving to its current site, a former synagogue just four blocks away, bought by the city of New York. Six years of renovation and expansion, given a boost by a large challenge grant from the National Endowment for the Humanities, resulted in 30,900 square feet of space, including climate-controlled galleries and fine art storage, education classrooms, administrative offices, and a three-story glass atrium lobby, all wheelchair accessible.

HO spoke at length with the senior curator of the museum, Marysol Nieves, about its programs and collections, and about the nature of her work and her career path to the post as curator. Following are highlights of that interview.

Getting Started

I was always interested in visual arts. My mother was very creative and really instilled those kinds of interests at home. I never thought I was making craft projects at home or in art class school. I don't think as a kid I ever had any concept that it was possible to make a living at it. Much of any idea of what a curator was.

As a sophomore at the University of Puerto Rico, in 1968, I decided to study business administration. I needed to take an appreciation course, part of...
core requirements—and ended up taking a course in contemporary art. I really enjoyed it, and that was what led me to a major in art history and, ultimately, to choose the career that I did.

I was born and raised in New Jersey, and when I was in my early teens, my parents decided to go back to Puerto Rico, so I went there for high school and then college. In my senior year of college, I was beginning to think of career avenues. There weren’t too many options in Puerto Rico with regard to the museum field. There are few museums. They are underfunded. There aren’t many jobs available, and there are even fewer art galleries.

I hadn’t decided whether I wanted to work in the profit or the nonprofit field. But I was clear that I wanted to go on to graduate school, and I was hoping that would allow me a better sense of what I wanted to do. I ended up going to Stonybrook for the program there, which focused on 20th-century and contemporary art history and included a minor in critical theory. [Nieves earned a master’s in art history and criticism at SUNY-Stonybrook.]

Influences

There was one professor who specialized in sort of postwar art. His name was Stephen Polcari. He was particularly interested in looking at the New York School, the abstract expressionists, and finding new ways of approaching their work. Thinking about the social history of that period and how that had an influence on their work, and looking at some of the sources in their work—nontraditional sources, whether it was Jungian theory or Freudian theory, or looking at cross-disciplinary sources that have been influential to some of these artists—the work of Martha Graham, the dancer, for example.

This was one of the first art history classes where I sat in a room and a professor openly discussed the possibility that, opposed to artists of color being influenced by the world of European American master’s programs at Stonybrook, I actually interned here at the Bronx Museum for a summer. And the experience here was not only wonderful, but it helped me secure an internship the following year at the Met in the 20th-Century department.

Both were extremely important because one was working for a small community-based museum, a museum that has a very strong connection to its local surroundings and that really wants to have a voice and a presence within its community, versus a museum like the Met, which has a very different mandate.

Every aspect of the two museums—the organizational structure, the staffing, the funding situation—is really quite different because ultimately their missions are extremely different and the focus of their collections. The Met is encyclopedic whereas the Bronx Museum has a very small and specific collection that focuses on work of artists of African American and Latin American and Asian ancestry.

The two experiences were a big break because internships like that give you the entry-level experience you need to get other positions. And because they were two such incredibly different institutions, an incredible opportunity for insight. Examining their inner workings gave me the information I needed to choose which path I wanted to follow.

Did I want to work for a large institution like the Met or commit myself to a smaller museum where oftentimes you wear many different hats and you have fewer resources in terms of financial resources and staffing resources, but you balance that with the other benefits—the learning experience it is to work in a small institution, especially when you are a young professional entering the field.

Curator as Apprentice

It’s not been until recently that universities and schools have developed what are primarily graduate-
level programs in curatorial studies. The vast majority of professionals in our field have backgrounds in art history or perhaps fine art, and I think internships consequently have historically been very important—much more practical experience for entering the job market.

In the first internship, I worked with Phillip Verre, who at the time was the chief curator and is now the executive director at the Hudson Museum in Yonkers. And I also worked here with curator Laura Hoppman, who has since gone on and is now the assistant curator in the Department of Drawing at the Museum of Modern Art. They were extremely helpful and just really wonderful mentors.

And then at the Met. I worked under Lowry Sims, associate curator in the 20th-Century Department, who just this year was made executive director of the Studio Museum of Harlem. Again, she was extraordinary as a mentor and very helpful. All of the people I worked with were helpful, and even over the years, as I’ve needed to call on them, they’ve continued to be extremely helpful.

Using the Galleries

We have two main galleries that are used for special exhibitions—changing or temporary exhibitions, usually thematic. In terms of gallery space, we probably have around 12,000 square feet. These two main ones are quite generous—wonderful height, about eighteen feet. And we have two additional galleries—one for the permanent collection, and the small project space.

The project space is where we do solo exhibitions of younger or underrecognized artists—artists who are perhaps at a critical juncture where they are not quite mid-career but beyond the point of being “emerging.” And they have developed a significant body of work.

We usually present a few bodies of work in that space, a work that has not been seen previously in New York. It has not been exhibited anywhere else—often very experimental in nature, a new direction in their work, a space where the artists try out new ideas. Classic example, a new piece by Ernesto Pujol, at a point in his career where

Class Picture, 1999 by Anthony Gicolea

The first year I started working here, in 1991, Ernesto Pujol was one of the first artists I interviewed for the program, which is essentially a career development and exhibition program. We select a total of 36 artists each year. They’re divided into two groups, and they go through a 12-week series of semi-

We’re currently celebrating the 20th anniversary of AIM. We selected 20 artists who had been through the program and gone on to a certain level of critical as well as commercial success. He is among the artists selected. (Through September 10 “Good Business for the Best Art” 20 Years of The Arts in the Marketplace Program. InfoZone a media/resource area featuring materials on arts opportunities, such as residencies, fellowships, and funding sources.

AIM is important. It fills a void because most young artists graduating from colleges essentially get very short studio experience. The programs are very much geared toward the theoretical issues or the hands-on practical matter of making the art, but they don’t get the tools necessary to market themselves and approach the artwork as a business, which it is. This program is greatly interested in giving artists some entrepreneurial skills that can be used in their careers. We basically try to give them information and the necessary tools so that they are not in the dark, so they can go on and be more proactive.

Trends

If one looks at much of the work done in the 80s and early 90s, all the artists of color were very interested in dealing with issues of identity, and the physical concept of multiculturalism became very important during that period. I think that by the late 90s artists were looking for other strategies—other ways of approaching issues of identity and difference. The shift has been to work that is less literal and a bit more poetic. Many of the concerns continue to be the same. They’re s
examining aspects of their own personal or collective identities, whether from the point of view of gender or sexuality—whether it's looking at ethnicity, race, culture. But I think they are approaching it in a way that is more indirect.

Esthetics have come into play a bit more, whereas in the '80s and '90s, in an effort to be part of a larger cultural discourse, often times working within a grassroots level, the work at times would sacrifice esthetics in order to be accessible to a much larger audience. Work being done now is much more subdued and that goes back to concepts of esthetics, beauty, poetry, but at the same time, is very rich in its content, dealing with similar cultural issues in a less overt way. Strategies have changed. It's very exciting to see that.

Curatorial Dream Assignment

I think today, for curators who wear so many hats, the opportunity to curate and to deal more creatively with the job—to actually be a curator—is getting harder and harder to do. There are so many other things we're called upon to do: to be fundraisers, to cultivate collectors and individual donors, to be educators, to be administrators. There is so much going on that we need to be a part of that perhaps the dream assignment would be to just have an opportunity to focus on doing research and developing an exhibition concept and taking it to its fruition—without having these ten million other distractions that we have to deal with on a daily basis.

Requisite Traits

I think it's important to maintain a sense of curiosity and to really develop your visual skills. It's very much about having an eye, and really taking that time to look at the work that's out there, particularly if you're working with contemporary art. It can become easy to rely on the small group of artists who are exhibiting everywhere else. It takes an extra effort to get out there and visit studios and explore and find new artists who have been and are making valuable contributions.

Women as Curators

My experience has been that the field is very open to women—but I

works with found materials and who creates wonderful large grid-like constructions or mixed media installations that deal with issues of memory and issues pertinent to the urban environment. It's a traveling exhibition from the Madison Art Center in Wisconsin.

Running concurrently is work of the Havana-based artist Carlos Garaicoa, coming from the Biblioteca Luis Angel Arango, in Colombia [Oct. 12, 2000 through March 4, 2001]. This is an artist who works in many different ways—photographs, drawings, installations, public interventions, video work. Carlos is of the '90s generation of Cuban artists. He started out doing a lot of public interventions in Havana that commented on or reflected the changes that have taken place in the urban landscape over the years, primarily during the Castro regime—looking at the process of deterioration of many of the architectural sites throughout the city—and from that he has continued to develop a body of work in which he often creates these sort of fictional architectural proposals or renderings in which he proposes possible projects to revitalize the city of Havana. He's recently been doing a lot of installations, as well as sculptures and videos, that deal with the constant dichotomy in Cuban contemporary culture and life between, on the one hand, the utopian, and on the other, the sense of loss in which Cuba lives today.

at the Smithsonian

Hispanic Influence on the Rise

by Nelly Mellander

The Center's Festival of American Folklife, based on extensive field research, has become one of the largest annual cultural events in Washington.

Washington, D.C., is one of the world's most popular destinations. Its many monuments, historic buildings, and stimulating environment attract millions of visitors every year. An enduring magnet for those visitors time and time again is the Smithsonian Institution, the world's largest museum complex.

James Smithson

Named in honor of its founding benefactor, James Smithson, its very establishment and early history could easily be considered fiction. Smithson, born in 1765, never visited the United States but admired the new experiment greatly. A successful scientist with a life-long passion for research, he amassed a sizable fortune.

When Smithson died in 1829 he left his fortune to his 16-year-old nephew with the proviso that if the nephew died heirless, the fortune would go to the United States—specifically, "to found, at Washington, under the name the Smithsonian Institution, an establishment for the increase and diffusion of knowledge." Since his nephew was only sixteen, who would suspect that he would die heirless—which indeed he did six years later.

Today the Smithsonian is composed of 18 museums and galleries and the National Zoological Park. Fourteen museums and nine National Zoos are in Washington, D.C., and two museums are in New York City. With facilities in eight states and the Republic of Panama, the Institution is also a leading international scho
Diversity

Dedicated to public education, national service, and scholarship in the arts, sciences, and history, the Smithsonian carries out its founding mission. And it has fulfilled that goal with vengeance. All told, the Smithsonian has 240 million objects. Of that number, 150 million are in the museum collections. But, amazingly, at any one time, less than two percent of these objects are on exhibition.

As diversity continues to increase in the U.S., the Smithsonian's founding mission takes on new meaning. To meet the new challenges, it is committed to enhancing its public programs, exhibitions, and collections to provide a comprehensive interpretation of the many facets of America's changing social and cultural environment.

Those of us who live in the Washington, D.C., area are lucky to have at hand its unending cornucopia of programs. Its website at http://www.si.edu/activity/events/start.htm, entitled Smithsonian Programs in Washington, D.C., lists a month or so of daily activities. Recent programs with Latino/Hispanic themes included:

- Latin Music on the Plaza, featuring the 15-member Brazilian folk group "Raízes de um Povo" performing dances and songs that mixed indigenous rainforest traditions with African and European influences;
- Encuentros, part of a continuing series of community-specific works exploring the effects of history, culture, and ethnicity on individual lives;
- classical pianist Ruben Pelayo performing on some of the pianos of a related exhibition;
- readings of contemporary East Los Angeles Chicana poetry;
- a film on research that might show that the Pueblo Indians used astronomy to align buildings and roads and designed them with an appreciation of the impact of light and shadows on the mind;
- Música de las Americas 2000, featuring Cuban composer and bandleader Chucho Valdes and highlighting his four-decade career;
- a lecture analyzing original documents and cultural artifacts of Hispanic settlements in early California;
- and varied concerts by Hispanic musicians performing Latin music—some held on the Mall itself.

Growing Presence

There has been a revitalized and sharpened interest at the Smithsonian in Latin content the last few years. The Smithsonian Center for Latino Initiatives was established in 1998, pursuant to a directive from the Board of Regents which stated, "The Latino presence in the Americas is centuries old, culturally rich and demographically vast and growing. The Center is dedicated to the generation of new knowledge to the end that American history and culture may be understood and displayed in all its diversity."

Headed by Dr. Refugio Rochin, the Center's commitment to Hispanic/Latino influences is firm, current, and as varied as the many human achievements it honors. Mindful that Salvadorans are by far the largest Hispanic cohort in the Washington, D.C., region, the Center will sponsor a conference on Salvadoran literature and writers this fall. Concerned that a high percent of young Salvadorans are dropping out of school, the program will feature the thoughts and writings of Salvadoran teenagers, both to encourage these youngsters and to motivate their less committed friends to finish high school.

Fall will also bring a Latino film festival and exhibits throughout Hispanic Heritage Month. Important as that month is, the Center's staff is determined to bring Hispanic contributions to the forefront all year long.

Among other endeavors, scholars and graduate students are offered a variety of opportunities to pursue research in Washington. For more details, consult http://latino.si.edu/about.htm.

Eight Outstanding Hispanic Sites

The Smithsonian offers many other programs that highlight Hispanic contributions to the U.S. Space limits me to mention only eight.

The Center for Folklife Programs and Cultural Studies promotes the understanding and continuity of contemporary grassroots cultures.

The Center's Festival of American Folklife has become one of the largest annual cultural events in Washington. Based on extensive field research, the Festival has featured programs on culture and development in Latin America; the U.S.-Mexico borderlands; Hispanic traditions in New Mexico; Chicano folk arts in California; Hispanic culture in Washington, D.C.; Puerto Rican music in New York, Hawaii, and Puerto Rico; and folk traditions of the Caribbean, Latin America, and Spain.

The Center's archives include audio recordings made in Mexico, Ecuador, and the Caribbean,
and the Paredon Records collection of political song material and speeches, much of it from Latin America, especially Cuba and Puerto Rico.

Smithsonian Folkways Recordings is the best-known commercial record publisher of folk and tribal music in the U.S. and also publishes historically significant spoken-word recordings. Its catalog includes more than 2,200 recordings. Among the Folkways albums are 68 Caribbean, 34 of Mexico and Central America, 50 South American, and 21 of Spain and Portugal.

The Smithsonian's Hirshhorn Museum and Sculpture Garden, its showcase for modern and contemporary art, presents an international perspective of 20th-century innovation in the visual arts. Hispanic artists working in the U.S. and artists from Latin America, Spain, and Portugal figure prominently within this collection.

The evolution of 20th-century modernism can be traced in works by pioneering Spanish artists Pablo Picasso, Joan Miró, and Salvador Dalí. Later developments include expressionist canvases by Antonio Saura of Spain, mixed media works by Catalan artist Antoni Tàpies, color abstractions by María Elena Vieira de Silva of Portugal, and the incisive realism of Spanish painter Isabel Quintanilla.

The Latin American contribution is richly represented. Paintings by Rufino Tamayo of Mexico, Wifredo Lam of Cuba, Joaquín Torres-García of Uruguay, and Chilean-born Roberto Matta reflect the influences that pre-Columbian history and art, Afro-Caribbean religions, and other Latin American traditions have had on modern art.

Works by nearly 40 Latin American painters and sculptors—from Claudio Bravo (Chile) to Francisco Zuniga (Mexico, born in Costa Rica)—are in the Hirshhorn collection.

This past spring, the Museum hosted "Dalí's Optical Illusions," a very well-attended exhibit of more than 65 works that showed how Dalí created "his disturbing visionary illusions."

The National Museum of American Art is devoted to the collection, conservation, study, and presentation of painting, sculpture, photography, crafts, and graphic arts.

Luis Jiménez's 17-foot fiberglas sculpture "Vaquero," prominently displayed at the museum entrance since 1990, has come to be regarded as a symbol of the museum.

Other holdings in the permanent collection survey two centuries of Hispanic art in the U.S., dating from the late 18th century to 1994.

Smithsonian Institution
SPANISH ESPAÑOL

The National Museum of American History illuminates, through collections, exhibitions, research, publications, and educational programs, the history of the U.S., including the influences that helped shape America's national character.

That history spans the last 5 years, from the time when the Spanish Americans explored and settled parts of what is now the United States. The museum collects research materials and presents Hispanic artifacts for exhibition.

A series of public programs exploring the rich diversity of Hispanic American cultural identity includes lectures, films, symposia, seminars, workshops, and performances of music and dance. Recent programs have concentrated on the interplay between varying cultural groups with Mexican influence, in conjunction with American Encounters exhibit.

The Archives of American Art is the nation's largest repository of documentary materials relating to history of the visual arts. Its primary purpose is to acquire and preserve the documents needed by historians and other scholars for research into American art and culture.

The West Coast Region Center houses the California Chicano Mural Archive, a collection of 350 color slides documents 741 murals created by Chicano artists in southern and northern California between 1969 and 1984. The Center also collects associated papers and oral histories on Chicano art activity.

The National Portrait Gallery was established to exhibit and study images of American women who have made significant contributions to the history, development, and culture of the U.S. Most media, including paintings, sculptures...
drawings, photographs, and prints are represented.

Among the Hispanic portraits on view are those of activist César Chávez, Mexican American dancer and choreographer José Limón, and Puerto Rican baseball great Roberto Clemente.

Through a network of 18 branches, the Smithsonian Institution Libraries support the Institution's research and exhibition activities. Access is provided to Smithsonian scientists, scholars, curators, and others with research needs. The Libraries offer exhibitions, internships, publications, lectures, and user instruction.

Hispanic-related components of the collections include materials on Brazil and the Caribbean at the African Art Branch; books on Latin American aviation at the Air and Space Branch; and materials about indigenous peoples of the Americas at the Anthropology Branch.

The Center for Museum Studies helps museums fulfill their public service mission through courses and seminars, fellowships and internships, information services, and professional support.

The Center sponsors ongoing initiatives designed to foster excellence and diversity in the museum profession. In 1994, the office began a pilot training program for Latino graduate students titled "Interpreting Latino Cultures: Research and Museums" in collaboration with the Inter-University Program for Latino Research.

As The Hispanic Outlook celebrates the Arts in this issue, it is encouraging to note that the revered Smithsonian Institution is making an effort to highlight Hispanic contributions. Secondly, given the Smithsonian's website at http://www.si.edu/ and its multiplicity of concise and useful links, one need not be in Washington to be informed, entertained, and even dazzled.

Nelly Mellander teaches Spanish at George Mason University.
Eyes of Texas on Latin American Art

BY ADALYN HIXSON

The Jack S. Blanton Museum of Art at UT-Austin has researched, taught, exhibited, and acquired art and artists of Latin America since it was founded in the early 1960s. Important works by Fernando Botero, Jorge de la Vega, Armando Morales, and Joaquin Torres-Garcia are among the more than 1,600 works in its permanent collection of Latin American art, the core being the Barbara Duncan Collection. The holdings represent the most significant artists and movements emerging in Mexico, South and Central America, and the Caribbean in the last 80 years—more than 500 artists from 17 countries. The Blanton, formerly the Archer M. Huntington Art Gallery, also houses a small but growing collection of contemporary Latino art—works by American artists such as Luis Jimenez, Carmen Lomas-Garza, and John Valadez.

The Cisneros Connection

Last year, the University entered into an important agreement with the Patricia Phelps de Cisneros Collection that calls for a 10-year, three-phase collaboration in the form of exhibitions, educational programming, and graduate seminars. The aim of the agreement is to showcase Latin American artists in a major U.S. teaching and research museum, and to promote research about 20th-century Latin American art. The stated purpose of the exhibitions is to forge new methods of inquiry into the artists' development, the cultural context in which each work was produced, and the relationships of these works to major currents in 20th-century art and to other works in the Blanton's collection.

Patricia Phelps de Cisneros and her husband, Gustavo Cisneros, have amassed a body of work known for its impressive scope and focus—nearly 3,000 works by primarily modern and contemporary artists from Latin America, the U.S., and Europe—a broad array of modern art movements and deepened holdings of specific areas—the Argentinean Arte Madi, Arte Concreto, and Brazilian Concreto and Neo-Concreto movements.

A founding member of the Blanton's Latin American Art Advisory Group, Patricia Phelps de Cisneros is a trustee of the Museum of Modern Art in New York and has worked with other museums of international renown—the Metropolitan and the Tate, for instance—and with Harvard's Rockefeller Center for Latin American Studies.

The new collaboration was kicked off last fall with Phase One—a presentation of 50 Venezuelan kinetic artworks, Dynamic Oppositions, which continues through December and can be previewed at www.utexas.edu/cofa/bma/cisneros. Mindful that abstract three-dimensional does not often translate optimal to the two-dimensional Web, a UT Austin graduate student, for his thesis, is now developing "Wel based methods for preparing teachers to visit and present the Collection to their students." Use this exhibit as her test case.

Also launched last fall was the Cisneros Reading Seminar, developed with UT Art and Art History Department's Center for the Study of Modernism. The seminar brought together for the first time a cross-section of students of art and art history and faculty who specialize in U.S. Latin American and European modern art. Guest speakers from Euro and the U.S. were featured, and two curators from the Cisneros Collection in Caracas are the Latin American Art curator at the Phoenix Museum traveled to Austin to be part of the discussions.

Papers resulting from the Cisneros connection are to be made available online. The agreement also calls for informal educational workshops and gallery tours for non-specialized audience. Phase Two, which centers on Argentinean constructivism, is set to begin next January.
Art and Its Politics

Two of the Blanton's summer exhibitions, on view through August 13, center on Latino artists in the U.S. Just Another Poster?, said to be the first major exhibition about Chicano graphic production in California, offers more than 100 original works from the mid-'60s to the present, mostly silk screens produced within four Chicano collectives: Galería de La Raza of California, Royal Chicano Air Force of Sacramento, Self Help Graphics of Los Angeles, and Centro Cultural de La Raza of San Diego. This exhibition of posters, "a vigorous and richly elaborate art form," takes a specific look at how Chicano posters function to "stimulate political action, build community, oppose U.S. immigration policies, and promote solidarity with international liberation movements." The show was curated by an interdisciplinary team and organized by the University Art Museum, University of California-Santa Barbara, in collaboration with the California Ethnic and Multicultural Archives, a special collection within UCSB's Davidson Library.

The second exhibition, Pressing the Point: Parallel Expressions in the Graphic Arts of the Chicano and Puerto Rican Movements, presents prints and posters created by social activist artists of the '60s and '70s, as well as archival materials—more than 70 in all. Included are prints made in the early 1900s by "Mexico's revered popular printer Jose Guadalupe Posada," prints from the '40s and '50s by members of Mexico's Taller de Grafica Popular, and '50s works from Puerto Rico's El Centro de Arte Puertorriqueño and El Taller de Grafica del Instituto de Cultura Puertorriqueño. Organized by El Museo del Barrio in New York, it draws on El Museo's collection and on works from the Gilberto Cardenas Collection, on long-term loan to the Blanton.

"By pressing their points of view on paper," reads a release, "Chicano and Puerto Rican artists of the 1960s and 1970s supplied a wealth of ideas on issues related to Latino cultural survival in the United States that are still relevant today."

Award-Winning Curator

"One important aspect of our department," says Nicole Chism Griffin, Blanton's public affairs officer, "is its role in the training of museum professionals in Latin American Art—a field that has not received enough attention in the past."

The permanent collection and the temporary exhibitions, she says, are of great benefit to all students and faculty in a number of University departments. But one lucky student in UT-Austin's art history program gets an added benefit—a post as curatorial assistant for Latin American Art. The assistant, she says, receives valuable hands-on experience in planning and staging exhibitions, publication of catalogues, and more. And these days, that assistant will be learning from a curator recently honored by two Latin American art institutions.

Mari Carmen Ramirez, curator of the Latin American Art Department, was this summer chosen Latin American Art Critic of the Year by the Argentinean Association of Art Critics. And her recent publication, Destinos del yo: Cinco décadas en Domingo García, was named book of the year, "Libro de Arte-1999," by the Puerto Rican Association of Art Critics.

Ramirez has been curator and an adjunct lecturer in the UT-Austin Department of Art and Art History since 1989, the year she earned her Ph.D. in art history from the University of Chicago, from which she also earned an M.A., magna cum laude. Her B.A. in humanities was from the University of Puerto Rico-Rio Piedras, where she received a tuition scholarship, followed over the years by four fellowships, a research grant, and a foundation award.

In announcing her recent honors, she was cited as having "shaped the direction in which the Museum's renowned Latin American art department has grown."

Another Latina curator who got a bachelor's at UPF-Rio Piedras, Maryse Nieves, heavily concurred, calling Ramirez an incredible art historian who has been very important in leading new research in the field.

"She did this incredible exhibition in the early '90s—School of the South and Its Legacy. It was an historic survey of the Uruapan artist Joaquín Torres García in the early part of the 20th century. It looked at the influence he had upon the work of other artists, both artists from his generation and from the following generation, all the way up to the present," said Nieves.

"It was an extremely important exhibition." Nieves continued, "important in terms of documenting the work of artists who really have not had major retrospectives or monographs of their work. She was instrumental in providing a context for the work of a lot of these artists, bringing their work to the forefront in the U.S."

The 16 ex. "tions for which she was curator or co-curator appeared in many countries and venues, starting with the Squibb Gallery in Princeton, N.J., back in 1987 through the show now in preparation for Madrid's Museo Nacional Centro de Arte Reina Sofia. And in between, Little Rock, Phoenix, Queens, Bogota, Buenos Aires, Sao Paulo, Caracas, Monterrey, Miami,
The Bronx, Mexico City, Río Piedras, and, of course, Austin.

She is the author, editor, or co-editor of dozens of publications—books, catalogues, and journal articles. And she is in demand as a lecturer, panelist, grants reviewer, and conference chair, having traveled thus far to Brazil, Italy, Puerto Rico, Venezuela, Spain, Mexico, and major cities throughout the U.S. in those capacities.

Ramirez curated the current Dynamic Oppositions and before that Cantos Paralelos: Visual Parody in Contemporary Argentinean Art, which over the last year appeared in Austin and Phoenix before traveling to Bogota and Buenos Aires.

Latin American Art Catalogue Project

In place since 1992 is another collaborative project—one in which many of the Blanton's Latin American holdings will be thoroughly documented for scholarly and teaching purposes, with results published by UT Press. Art historians and curators have been recruited from leading historical research centers and research-oriented museums in Latin America as essayists for the Blanton catalogue. The Museum is also commissioning essays from independent scholars in Latin America and the U.S.

Participating institutions include Centro Nacional de Investigación en Artes Plásticas and CURARE, Mexico; Centro Argentino de Investigadores de Arte and Fundacion Espigas, Buenos Aires; Pontifica Universidad Católica, Santiago de Chile; Museo Nacional de Arte Moderno, Lima, Peru; Museo da Arte Contemporânea, Universidade de São Paulo, Brazil; Patricia Phelps de Cisneros Collection: Museo de Bellas Artes, Caracas, Venezuela; Biblioteca-Centro de Arte Luis Ange Arango, Bogota, Colombia; and Teo/RETIKA, San Jose de Costa Rica.

If all goes as planned, all participants will meet in Austin next spring.

Also on View

Latin American Art is one feature of the Blanton. Another highlight is its Mari and James A. Michener Collection, tracing the history of American painting from 1900 to the present and including works of the Ashcan School, Early American Modernism, Social Realism, Abstract Expressionism, Pop, and Minimalist movements. Luis Cruz Azaceta, Thomas Hart Benton, Arthur Dove, Arshile Gorky are but a few artists therein.

There are Old Masters in the Suida-Manning Collection—Rubens, Tiepolo—four centuries of European drawings and paintings. And the G.R. Smith Collection of Art of the American West offers important landscapes and Western genre scenes by Albert Bierstadt, Willia Ranney, and more. Holdings also include works by Thomas Eakins, Frederic Remington, and others of their caliber.

Raising the Roof

Currently housed in two buildings, the Blanton's present gallery space totals roughly 28,000 square feet. But a major new facility planned that would unite all collections, exhibitions, and program under one roof, for the first time Blanton's history. As of May 1st University had raised more than $25 million in gifts and pledges for the building and endowment campaign. Among the campaign donors of last year is one who like its artwork is known well beyond the Texas borders—Mrs. Lady Bird Johnson.

UT-Austin offers a multitude programs related to Latin America and to our own Hispanic populations. Its potential for an enrich interaction of art and education seems limitless.
Manhattan School of Music Orchestra Captivated by Venezuelan Youth

BY

ADALYN HIXSON

My first impression was of a sea of heads and instruments. From when the first chords came out, I was in complete shock. I am a boy - I should not say these things, but when they started to play, I just started crying. I felt that again I am eight, nine years old, walking with my small violin to the school. And I just want to take my violin and play with them." The speaker is violinist Mateusz Wolski from Poland, not a boy in U.S. parlance, but a graduate student at the Manhattan School of Music (MSM) in New York and one of 101 MSM students who visited Caracas last May to interact with the National Children's Symphony Orchestra of Venezuela.

He and some colleagues have gathered to discuss what was for all a life-changing experience. When Marta Istomin, MSM president, first announced the tour, she predicted that it would provide "exceptional, long-lasting artistic and educational experiences for all the student musicians." But the reality surpassed the rhetoric. Those five days in May shook their world.

"Since our arrival back in the U.S., my colleagues and I have not been able to stop expressing our amazement at all the great things we have learned from the children of Venezuela," says Caracas-born violinist Itael Eduardo Marchena Leon, who is pursuing a bachelor's at MSM after a lifetime of violin study that started at a conservatory, when he was four, and who at age 12 became the first Latin American student accepted at the Yehudi Menuhin School in England, following an audition with the grand master.

The trip was the MSM orchestra's first international tour in the school's 81-year history, and came at the invitation of Maestro Antonio Abreu, founder of the State Foundation for the National System of Youth and Children's Orchestras to be reasonable. They have chosen to forget about their differences and emphasize their affinities."

Maestro Abreu's curriculum vita is replete with honors awarded at home and abroad for his music endeavors. It notes too that Abreu studied petroleum economy at Pena State in the early '60s, and taught economics at two universities before devoting himself to music and, in '75, founding the youth orchestra.

Abreu's young musicians, ages nine to 16, performed on May 18th to honor the visit of Manhattan School of Music Symphony Orchestra and President Marta Istomin, whom he describes as "one of the most eminent personalities of the Americas," and an "exemplary woman of the continent." And indeed she is. Istomin trained as a cellist.

Married for 17 years to Pablo Casals, the two worked together in Puerto Rico, founding a symphony orchestra, a conservatory, and the Festival Casals. She is now married to pianist Eugene Istomin.

Interviewed in Caracas by el nacional, Istomin noted that MSM teaches students from age five through the doctoral level, but that her mission, and that of Dr. Abreu, "is not a matter of helping a chosen few to become excellent musicians. We are talking about fomenting the culture and sensibility of a whole country."

My goal, she continued, "is that as many people as possible will be able to witness this encounter between two orchestras..."
and see with their own eyes the beautiful things that can be achieved.**”** “What about the responsibility of the state in this whole issue?” Isomín said the state and the private sector have “an equal share of responsibility. We must all get together and decide that this is a very important issue.”

The original idea of the tour was that the MSM orchestra, led by Glen Barton Cortese, MSM’s principal conductor, would perform a public concert, give master classes, and play in side-by-side rehearsals with the Venezuelan students musicians.

**The First Master Class**

MSM was to lead off with a reading of a Tchaikovsky serenade. “Before we did the reading, they played, and for me it was just explosive,” says Wolski. “It was unbelievable the sound they produced, and this energy! It was so great to hear young people play like that. Very unusual.”

“People say that music is a language...what these children had to say through the music meant everything to us. It was an awakening, and not only that, these children had nothing to lose and everything to gain from us, and we felt the same way. Once we joined them...the work of both orchestras integrated so well, there was no chance of anything going wrong...”

Marchena speaks of violinist Joel, calling him magnificent, incredibly talented and gifted. “Even knowing the kind of preparation we have received over the years, he had no hesitation showing us what his music was about, what he had to say. He stood up on that podium and wanted to show us how beautiful the music was. All of us were amazed by what this kid could do on the violin.”

Joel began to play, his own improvisation on a piece of Venezuelan music, and the next minute, there was a little orchestra playing behind him, accompanying him. Everything was integrated...” recounts Marchena.

“A string came down. I offered mine to him, and this kid—he was so happy to be able to express who he was to us.” “Actually, I think Joel and most of the others showed us that playing is really about fun,” says graduate student Chan. “That the music has become something not from the heart. Phrasing, refinements. We tend to forget that this is about fun.”

They are very accurate technically, she says, but “all their music is from the heart; a very inspiring thing, the freedom. They were playing with no inhibitions whatsoever.”

**The Concerts**

The welcoming concert on May 18th opens with the MSM Symphony Orchestra performing Brahms’ Academic Festival Overture, Opus 80. The youth orchestra plays next. Violinist Chala Yancy of Houston, who earned a master’s in May, was “deeply impressed. I literally had to step back two feet from the first chord of that piece.”

“They were ready to die for it—playing like the last day of their lives,” adds Wolski.

“One of the reasons I was moved was that I didn’t really know them as people, because we all come from very different backgrounds and cultures, but once they play the understanding was right there says Chan. “I understood their emotions, and what they were trying to express. That was so overwhelming.”

“I’ve seen some Gypsy musicians play without music in son cafes, and what they can do with the instruments. Those children have the same capability, but then received some excellent training,” says Wolski.

“They kind of blend into the nature of playing for fun, and the folk tunes are difficult. I must say when it blends with the classic music, this is giving such an electrifying effect on the audience that was completely taken by it.”

“I wanted to scream,” says Wolski. “I wanted to jump. I want to take my violin out right there. The choreography they did with the encores—when they were playing encores, they were doing incredibly stage arrangements. I have not seen a wave like that before.”

“You always get a sense of electricity in the air. I greater the performance, the more energy. When it reaches maximum level, people just get crazy.”

For the big Saturday night concert, the Youth Orchestra opens with Beethoven’s Egmont Overture, Opus 84. MSM’s orchestra plays music from Bernstein’s West Side Story, showcasing two graduates—soprano Joliet Vare from San Juan, Puerto Rico, and tenor Mauricio Tejo from Mexico. For the MSN encore, a mambo gets the entire audience moving.

The Venezuelan youth orchestra receives a standing ovation. The MSM orchestra is also received warmly, like nothing they’ve ever seen.

“They were cheering us. I mad. Shouting ‘bravo, bravo!’ On
the violinists from Venezuela, this guy was yelling, and crying so hard," says Chan.

The Conductor

The Youth Orchestra’s dashing conductor and composer, Gustavo Dudamel, born in 1981, began his music studies at age seven. Renowned in Venezuela and beyond, he has performed in South America, Mexico, Europe, and the U.S.

MSM’s Wolski calls him “one of the few geniuses that I have met in my life.” He notes, “Orchestras usually have adult conductors. This kid is 18 years old, and the passion that he gives them, the control that he has over them, the energy that he spreads throughout the orchestra and that later spreads to the audience—not to mention that he conducts everything from Tchaikovsky to Mahler, from memory! This was unbelievable, Gustavo. Congratulations.” These kudos are accompanied by a bow toward a video camera that is recording the MSM students’ commentary.

HO is privileged to see and hear Dudamel and the Youth Orchestra via a tape of an audition for MSM in March. He looks so slim and young, despite his glasses, wearing a white collared shirt and the medallion that signifies orchestra membership. Serious at first, he breaks into a few smiles as the audition progresses.

The students on that occasion are not laughing but wholly attentive. Each wears a medallion and colorful jackets and pants. Their sound shifts effortlessly from savage to sweet. They play the Star-Spangled Banner so tenderly, it is impossible not to cry. They move into their own national anthem, singing loud and clear as they play. As the audition draws to a close, their smiles and dimples appear. Bravo!

Lessons Learned

“Since I got to New York,” says Wolski, “I was being surrounded by professional atmosphere and incredible knowledge. And I was thinking, well, we are going to Venezuela. What can I expect from this country? I thought that all the students were going to meet with the young people and share the knowledge that we acquired here, and that we are going to act as teachers there.

“But when we arrived and when we listened to children playing for us, I suddenly realized that we didn’t get there to teach them anything. We went there to study, to find out what is our purpose of existence as musicians. I suddenly realized that what we do, we are supposed to move people. We are supposed to make them laugh, make them cry. And suddenly I have been exposed to such incredible energy and passion for music in this country, which had so many natural disasters recently, and which is going through a crisis. And I felt I am coming back to the roots of what I am supposed to be doing as a musician. It definitely changed my life.

“I realized how privileged we are by being here [in N.Y., at MSM] and being taken care of, and such incredible teachers, and everybody who takes care of us,” says Wolski. And those children—just touch them a little bit and they think it is the most incredible thing in the world. Wow. Suddenly you start to see yourself, your school in a completely different light—with their eyes. It is so fantastic.

“In the business class, we always talk about how it’s very hard to get a new audience, a young audience,” says Chan. “Classical music is supposed to be boring.” But in Venezuela, on this occasion, it’s not like that at all. In the rehearsals, they would sit there watching entranced for three hours.

“That should teach everybody that music can be such a strong means of communication. The reason why we find classical music to be boring is that we are really not communicating with it. It’s NOT classical music; it is just music, and it speaks to people.”

A basic premise of the Venezuelan system is to approach music “as a whole and not to make categorical differences between concert music and other manifestations of a rather folkloric nature.” Its literature notes that “all teaching within the system leads to orchestral practice.” And it shows.

Cellist Robin Snyder from Santa Monica, California, who earned a bachelor’s at MSM in May, called the tour an extraordinary experience, “being surrounded by musicians who had so much love for what they were doing, and so much heart.”

“Over the course of my years of study, you get so bogged down in the technique of your playing that you sort of lose that passion for your music—because you are criticizing yourself so much, and you don’t have the freedom that you once had. These children played with that freedom—with absolutely no inhibitions. They were very expressive.

“I was very impressed with the way music thrived there, being from
America and seeing music programs get kicked out of the schools because there's not enough money for them.

Amelia Chan said the Venezuelans "brought out the best in us. They brought out the real musicians in us, not just how we played, but what we are supposed to be as musicians. And on the personal level, they are just incredible human beings."

"I have never been asked such intelligent, well thought-out questions," says Yancy. "We've never pitched in so much before as a group." Chan continued. "Every one of us got together. We started doing sectionals..."

"We actually felt very much challenged by their performance," said Wolski. "When we start in the school, everyone is very much focused on himself. When we play within the orchestra, we usually know a few people around us, but we don't really know everybody. But when you teach the Venezuelan youth, he said, "you can tell that everybody knows everybody. And when we went up to play solo, they wanted to show—he is one of us. And we just felt, we HAVE to unify, we HAVE to get together. I learned that there is a joint effort, like playing chamber music, but on a larger scale.

"After the concert, we were weeping, kind of all speechless. Later everyone is giving opinions. We are rapping. We are talking. We really came together as a group.

"These kids reminded us that it doesn't mean anything if you don't put your whole heart into it. To see these children who come from very very simple families, from very humble places—it is such an enormous struggle to make it happen."

Marchena speaks of one in particular, from an extremely poor family. "And when he arrived first in that institution, his shoes had holes and this kid was in a really poor state. They offered him the opportunity to have a life as a musician, as a person to integrate in a society as friends, to be part of a group of children. They taught us what it means to be a team, but to have a very good sense of equality. These children are not looking down on each other. They look at each other.

"As a Venezuelan, I am extremely proud of my people for what they have taught us, not only the teachers but the staff.

"Every one of us is changed for the rest of his life, somewhere deep inside," said Wolski. Everyone wanted to do their best, played their hearts—something you don't see a lot in New York."

"Sometimes an attitude, ambition, competition, gets in the way. You forget why you're doing things. They gave that back to us."

Saying Goodbye

"I believe that after such an incredible spiritual experience, the hardest thing for all of us was to say goodbye. I cannot even begin to describe the emotions that were on both sides. We must not let this experience die. We must keep it alive. We must make it happen again."

"My old bow I had when I was 10 or 11," said Lori Simpson. "I don't use it. So I gave it to the principal violist to maybe use it, and resi to the other girl. Because that is another thing—the fact that we are very privileged, and if I need a bow, new resin, new strings... It opened my eyes when I looked at those instruments. So I have this bow and I'm not using it. They just touched my heart so much, that was the least I could do."

On parting, many of the young Venezuelans offer their caps and their medallions to the MSM students.

"Their medallions are kind of part of their working suit, and one of the most important things they have in their life, because they are very carefully selected throughout the country," says Snyder. "And the fact that they wanted to give one of the most precious things to us, I didn't know what to say when it was offered," added Wolski.

Mauryce looks into the camera and sends "my deepest, warmest, heartfelt greetings to John, Daniela, Carmen, Norma, Maria, Fernando, Diego—all the kids. I love you. You are the best."

"I had to really watch Mauryce so he doesn't put in the visa application."

"When they gave us the medals... they were so sincere. Everything is genuine. From the heart. Those children are such great people."

Since returning from Venezuela, there have been e-mails, and for Mauryce, a phone call. All are eager to keep up the connection. The best news is that the Youth Orchestra will be coming to New York, probably in early October.

Wolski is excited at the prospect. "I can't wait. I don't know where they are going to play, but I think they deserve the best."

Mauryce's looks into the camera and sends "my deepest, warmest, heartfelt greetings to John, Daniela, Carmen, Norma, Maria, Fernando, Diego—all the kids. I love you. You are the best."

Pictured at the Ambassador's residence are cellist Robin Snyder, Dr. Jose Antonio Abreu, and string bassist Saskia Lane.
Villains Honored and Heroes Unsung

California State University Historian on the Vallejos of California

BY RUBEN G. MENDOZA

A February conference of the California Mission Studies Association, I attended a presentation by a direct descendant of early California pioneer Mariano Guadalupe Vallejo (1808-1890) of Sonoma, California. Martha A. McGettigan, Mariano Guadalupe Vallejo’s great great granddaughter, presented a paper titled “Epifania de Guadalupe Vallejo: California’s 1st Woman Daguerreotypist” (McGettigan, 2000). McGettigan’s study, and Epifania’s story, bear particular relevance to those of us concerned with the accurate and unbiased representation and reappraisal of visual anthropology and the history of science, technology, and medicine in early California and North America more generally.

Mariano Guadalupe Vallejo, a direct descendant of the earliest Hispanic colonists of the Puerto and Presidio de Monterey of the late 1700s, forged the path to the earliest Hispanic settlement of the northern Mexican province of upper Alta California. In fact, Mariano Guadalupe Vallejo and his family, essentially founded the town of Sonoma, where later the Bear Flag revolt by a group of trappers and outlaws would serve to underwrite the subsequent conquest of California by the American military of 1847. Today, the home and ranching properties, as well as the old Hispanic and Mexican civic core of the Sonoma community, pay tribute to Mariano Guadalupe Vallejo’s contributions to the founding and planning of that community.

Having visited the Vallejo home and estate, now a museum in the town of Sonoma, I was taken by the culture, sophistication, and early contributions of Mariano Guadalupe Vallejo and his family. I was similarly struck by the family’s access to contemporary literature and to early technological innovations such as photography. Prior to settling the area, only the old Hispanic mission of San Francisco de Solano, established July 4, 1823, stood on the site. In 1833, Mariano Guadalupe Vallejo undertook the secularization of the old mission of San Francisco de Solano, and founded the town of Sonoma in 1834. During his watch, former mission lands were dispersed, under the mandate of the Secularization Decree of 1833, and the quarter or barracks and related administrative buildings and many of the remaining early adobe structures of the civic core of the community took shape. These same structures seemingly now proclaim and honor the industrious, ordered, and cultured sophistication that the Vallejo’s introduced to this otherwise neglected frontier province of the
times. Moreover, it should be noted that this characterization stands in stark contrast to those presented by early American and later historians who seemingly went to great lengths to document the “rudimentary” and “uncultured” nature of the pioneer Spanish- and Mexican-era settlers of the Hispanic southwest.

The American Occupation

Both before and after the American invasion of upper Alta California in 1846 and 1847, the Vallejo family was renowned for its civility and generosity toward the earliest American and other foreign visitors to the region. Given the neglect of this province by the Mexican government, even “General” Mariano Guadalupe Vallejo, the appointed Mexican military commander of the region, was said to have pondered the prospects of declaring the region independent of Mexico. Sadly, as the result of the early American incursions and subsequent conquest of California, Mariano Vallejo and his family were subjected to the depredations and hostilities of Colonel John C. Fremont and his band of rebels. The American military had originally assigned Fremont to do no more than conduct a mapping survey of the region west of the Mississippi. But as soon as he arrived in the territory, he became embroiled in the effort to seize Alta California. In June of 1846, the so-called “Bear Flaggers,” under the prompting of Fremont, took Mariano Guadalupe Vallejo prisoner at his ranch in Sonoma. Soon thereafter, both Native American and Mexican residents and colonists of Sonoma were subjected to the brutality and outlaw actions of Fremont and his men. Even those Mexican settlers and merchants who were sympathetic to the idea of liberating the region from Mexico were soon subjected to robbery, theft, extortion, rape, and the murder of innocent civilians. In one such case, Kit Carson and the “Bear Flaggers” executed three members of the unarmed Berreyesa family, including the elderly Jose de los Reyes Berreyesa, and his twin nephews, Francisco and Ramon de Haro.

Little was ever made of the executions of the three unarmed men, or of, for that matter, related murders and the rape and pillage of the civilian sector of Sonoma. And from historical accounts by the perpetrators themselves, it is clear that Sonoma and the Vallejo family in particular were subjected to an intense period of hostility and brutality. According to one of my immediate colleagues, social historian Dr. Gerald Shenk of the California State University, Monterey Bay, early military diaries written by soldiers under the “command” of Fremont further document specific atrocities and other morally unconscionable actions by Fremont and the Americans against early California families such as the Vallejos of Sonoma.

According to Dr. Shenk (1998), those military diaries document Fremont’s orchestration of the rape of a number of the women of the Vallejo family, having his soldiers select their victims after he himself had had first pick of his intended victims. Ironically, despite such behavior by Fremont, who was court-martialed and jailed by the U.S. Congress of that time, many of the old adobes constructed by Hispanic- and Mexican-period families throughout California and the West now bear the name of Colonel Fremont. Such is the case with the “Fremont house,” an historic adobe in Monterey. Oddly enough, the historical marker just outside the home indicates that Fremont had no direct connection to the building, but since he, Fremont, once set up camp in Monterey, the adobe was named in his honor. Local historians of the Monterey community have conveniently forgotten the Mexican family that built and lived within this structure. In my mind, this would be akin to naming the California state capital building, or other very public landmarks, after the most notorious rapists and pedophiles of our own time. Clearly, those who seek to honor Fremont do so with utter disregard for his reprehensible character and actions and those of his men.

While the names of the likes of Fremont continue to grace the hallowed halls and signage of many public buildings and city streets in California and the American West, the names and contributions of early California pioneers like Epifanía de Guadalupe Vallejo have been lost to the historians’ blue pencil and the cutting-room floor of the academy.

This is her story in brief.

Epifanía de Guadalupe Vallejo

Epifanía de Guadalupe Vallejo was the daughter of Mariano Guadalupe Vallejo, of whose story has so often been the case with early Hispanic/Latina contributions to the settlement and development of early towns and communities in North America. Epifanía’s name and legacy have been lost to history and the historian. Whether by virtue of the politics of personal and cultural destruction that left most “American” histories bereft of any but those contributions by Anglos or others of direct European descent, the case of Epifanía and many of her Latina contemporaries cries out for serious study and a much deeper level of inquiry into the politics and polemics of the history of science, technology, and medicine in the United States.

Epifanía’s story would have gone unnoticed and undocumented had it not been for March McGlashan’s inheritance of a ring left to her...
upon her father’s death. The ring, which held a small container and was hinged in much the same way as a “poison ring” or locket, contained an early photograph of a Vallejo family member. Concerned about the origins of the ring, Martha McGgettigan inquired at the Bancroft Library in Berkeley and was told that despite the contents, the ring could not possibly date any earlier than the 1850’s. After all, they noted, the “Americans had not yet settled the region.”

With the Bancroft’s commentary fully in mind, Martha proceeded to investigate the ring’s origins and identified an early photograph that showed the ring on the hand of Mariano Guadalupe Vallejo himself. Soon, Martha recovered early family documents and personal correspondence pre-dating the American occupation period of California history. The documents and correspondence revealed that Epifania de Guadalupe Vallejo was an aspiring photographer who owned daguerreotype cameras and equipment and was fully proficient in their use...as made clear by the technical merits of photographs that she produced in 1840 Alta California.

Epifania’s Contribution

As a photographer and as a specialist in the study of Hispanic material culture and traditional technologies, I am well aware of the complexities of the early daguerreotype photographic process (originally developed in France by Daguerre himself). In the course of collecting Latina and Latino social histories, I have had the opportunity to examine and reproduce many a family photograph from the collections of Mexican American and Hispanic families of the southwestern United States.

Over the past twenty years, I have sought to reproduce and document and thereby preserve the abundantly rich visual histories and photographs that serve to document the Hispanic legacy and contributions to our collective “American” history. In addition to documenting the early social clubs, family and community gatherings, laborers and miners, women and children, and a broad array of social history and culture, these early family photos collectively represent the largely “undocumented” heritage of a community that has been given short shrift in the historical literature of early American contributions.

I was moved and moved by those early letters and photographs by Epifania and her contemporaries exhibited by Martha McGgettigan at the conference I attended. Significantly enough, it was made patent clear by Martha McGgettigan’s conference presentation regarding Epifania de Guadalupe Vallejo that Epifania had in fact mastered the art of photography and the daguerreotype process in the period prior to 1847, and years before the American occupation and settlement of Alta California.

To this day, many American historians and other “culture brokers” generally assume that the contested territory of history itself arrived on these shores with the landfill and settlement of the region by the earliest Americans.

Postscript: Life after Photography

After leaving her mark on the “history” of photography in early California, Epifania went on to bear a dozen children with her “American” husband. In turn, she was a special guest at the inaugural celebration for President Abraham Lincoln, and she is further documented to have had the President and First Lady of Mexico (mid-1800s) as godparents to her children. Clearly, the life and times of this most fascinating woman have yet to be rendered beyond the pale of historical and political obscurity. The challenge now is to assure that such early Latina and Latino contributions in North America do not continue to represent the growing body of “undocumented” heritage and history that so speaks to the political and cultural economy of history and its rendering.

Ruben G. Mendoza, Ph.D., is associate director and founding faculty member, Institute of Archaeological Science, Technology, and Visualization, at the Center for Social and Behavioral Sciences, California State University-Monterey Bay.

Gutiérrez Addresses Cal State-Northridge College of Arts

Felix Gutiérrez, senior vice president and executive director of the Freedom Forum, gave the commencement speech address to graduates of the California State University-Northridge (CSUN) College of Arts, Media, and Communication.

Gutiérrez was an Associated Press reporter, a journalism professor, and a college dean, having worked at CSUN and the University of Southern California before joining the San Francisco-based Freedom Forum, a nonpartisan international foundation dedicated to a free press and free speech. He has written four books and more than 45 scholarly articles or book chapters, mostly on racial and technological diversity and the media.

Featured speakers at other graduation ceremonies were: Rep. Xavier Becerra, CSUN College of Humanities; CSI trustee Debra S. Farar, Channel Islands campus; Jon V. Ferrara, co-founder of Goldmine Software Corp., College of Engineering and Computer Science; and Michael E. Spagna, associate professor of special education at CSUN, College of Education.

Record Number of HSF Scholars at Laredo

A record number of Laredo Community College (Texas) students were named Hispanic Scholarship Fund (HSF) Scholars in 1999-2000 by the San Francisco-based organization. HSF awarded more than $25,000 to 25 Laredo students, nearly triple the number of just two years ago.

According to Sara Martinez Tucker, HSF president and CEO, the national organization awarded more than $33 million in scholarships to 4,200 Hispanic college students representing all 50 states and Puerto Rico. Both the number of winners and the cumulative amount disbursed are organizational records.

WorldCom and Brown Announce Grants to Underserved Communities

Brown University (R.I.) and WorldCom announced grants to 20 programs nationwide that link public schools or community organizations with local colleges or universities to develop educational technology projects for youth in underserved areas.

One grant recipient is the University Partnership for Learning the Internet with Families Together (UPLIFT), a joint venture between California State University-Northridge and the nearby Community Charter Middle School. UPLIFT will establish a community computer laboratory where minority students from the University's computer science department will teach sixth and seventh graders and their families basic computer and Internet skills.

Another recipient is Bridging the Digital Divide, a partnership between Houston Community College-Southeast (Texas) and the Advancement of Mexican Americans—community-based organization servicing low-income, underrepresented populations through the George L. Sanchez High School. This program will initiate a new dual-credit high school/community computer technician and network certification curriculum as an investment in youth and their families in one of Houston's oldest neighborhoods.

Saint Peter's Sophomore Attends Congressional Institute

Steven Llanes, a sophomore at Saint Peter's College in New Jersey, was one of approximately 30 students nationwide to attend the Congressional Hispanic Caucus Institute's (CHCI's) summer undergraduate internship program in Washington, D.C.

Llanes was exposed to a rigorous leadership development curriculum that emphasized work experience, community service, and academic study. The Institute required him to work 20 hours a week in a congressional office, attend weekly seminars and workshops, conduct a community service project, and submit a research paper. During this summer, Llanes has been interning with U.S. Rep. Robert Menendez, St Peter's class of 1976; in July, Menendez transferred Llanes to the Democratic Leadership Office, where Menendez serves as the chair.

A double major in journalism and political science, Llanes has maintained a 3.98 GPA and is the new editor-in-chief of the Pauw Woe, Saint Peter's student newspaper.

Michigan Studies Latinos as Criminals on TV News

A new University of Michigan study corroborates prior research that African Americans are more likely than whites to be portrayed as criminals on television news, and also reveals that Latino are less likely to be so depicted—when compared with actual crime statistics. Although both Blacks and Latinos are more likely than whites to be shown as lawbreakers than a law defenders in television news report: Latinos—like whites—are underrepresented as criminals while Blacks are overrepresented.

Travis L. Dixon, University of Michigan assistant professor of communication studies and Daniel Linn, professor of communication law, and society at the University of California Santa Barbara, conducted a content analysis of 116 "breaking" news programs on five commercial television stations covering Los Angeles and Orange Counties (Calif.) during an eight-month period in 1995-96.

According to the study, which appeared in the spring issue of the Journal of Communication, African-Americans are near "3 percent lower and Latinos 8 percent more likely than whites to be portrayed in television news as criminals. White whites—according to California Crimin..."
Justice data—commit 28 percent of crimes in the Los Angeles and Orange Counties area, they are portrayed as criminals only 21 percent of the time for Blacks, the percentages are 21 (real) and 5 (TV); for Latinos, 47 (real) and 39 (TV); for Other, 37 (real) and 13 (TV).

Although an ethnic blame discourse based on stereotypes about minority groups may affect what is aired on television news, structural limitations or institutional biases may also shape mass media depiction of race and crime, said Dixon.

Texas—El Paso President Says Abraham Chavez’s Legacy “Will Play On”

“Abraham Chavez, who embodied the powerful force of music, was one of El Paso’s most beloved citizens,” said University of Texas—El Paso (UTEP) President Diana Natalicio in a statement following the announcement of his death. (Natalicio is shown congratulating Chavez at an April 2000 convocation).

Chavez, a native of El Paso and a graduate of Texas Western College, gained a national reputation as a violinist and conductor. At the age of 13, he was accepted to the El Paso Symphony Orchestra, becoming its concertmaster after only five years. He then left to become director of music at the University of Colorado. Chavez later returned to El Paso and served as musical director/conductor of the El Paso Symphony Orchestra until 1992. A distinguished faculty member at UTEP, he won many awards, including the Hispanic Heritage Award for Education, given in Washington, D.C.

“El Paso and UTEP have lost a dear friend, but his maestro’s legacy will play on,” said Natalicio

Cal State L.A. Presents Golden Apple Awards

The Charter School of Education at California State University Los Angeles recognized 10 outstanding student teachers during its annual “Day of the Teacher” reception. Special guest speaker was Maria Casillas, president, Los Angeles Annenberg Metropolitan Project (LAMP). LAMP is the Los Angeles chapter of the Annenberg Challenge, a public private partnership improving education for 1.5 million urban and rural public school students.

Jose L. Artilles, Nelly Guillen, and Helia Ramirez were among the awardees. All rated in the top 10 percent among their peers and provided exemplary work in the following: instruction that encourages students to think; inclusion of students’ cultural values and cultural knowledge in lesson context and activities; development of learning opportunities responsive to language diversity and to the needs of special education children; knowledge of and exposure to the cultures that characterize the school community; development of culturally relevant materials; and completion of all the student teaching competencies at an exemplary level.

Cal State—Bakersfield Students Win at Research Meet

Two California State University—Bakersfield (CSUB) students earned plaudits at the 14th annual statewide student research competition sponsored by CSU at California State Polytechnic University—Pomona.

Dustine Rojas-Kraft won first place in the graduate division, behavioral and social sciences; and Ruth Veniot earned second place in the undergraduate division, biological and agricultural sciences.

Rojas-Kraft investigated the acculturation pressures that Mexican American women face from Mexican culture and American society. Luis Vega was faculty mentor. Veniot presented her research into a key enzyme activity of common horehound: Roy LaFeve was faculty mentor.

Irma Morales Waugh was among several other CSUB students who presented original research.

California—San Francisco Researches Latina Maternal and Infant Health

New research by a University of California—San Francisco team looks at the behavioral, medical, and nutritional characteristics of Latinas and how they affect the risk of infant mortality.

The study, conducted by Dr. Elena Fuentes-Aflick and Nancy Hessol, was prompted by the observation of an “epidemiological paradox” of infant mortality in Latinas that has been documented for nearly 30 years. While Latinas born in Mexico have many risk factors associated with infant mortality, they have unexpectedly low rates of infant death. The researchers found that Latinas born in Mexico were 25 percent less likely to have an infant death than were U.S.-born white women.

In a related study, also one with surprising results, Fuentes-Aflick and Hessol found that the increased risk of low birth-weight infants is linked to older Latinas but not to adolescents. The study showed that while maternal age influenced the risk of having a low birth-weight infant, only Latinas who were 25 years of age or older had an increased risk.

Jesus Salas Graduates from St. Mary’s

Jesus Salas, the first village from the small town of Cozacoalcos, Mexico, to come to the U.S. to attend college, recently graduated from St. Mary’s University (Texas) with a bachelor’s degree in mathematics.

Salas strove hard to bring home the skills he learned in college and put them to work. As he worked erly within Desarrollo del Campo, a nonprofit organization developed by Marxists to serve rural development in southern Mexico. He says that his goal is to shed light on the impoverished conditions in which many in Mexico live.

While at St. Mary’s, Salas maintained a high level of academic achievement and was involved in many campus activities and service opportunities.

In the News at Cal Poly Pomona

Katie Estrada is one of 36 California State Polytechnic University-Pomona 2000 students to receive a 2000 Kellogg Scholarship. Awarded to high school students who demonstrate academic excellence and named for W. K. Kellogg, a founder of Cal Poly Pomona. The scholarship is renewable over four years and carries an annual $8,600 over that period. Estrada, who will enter as a math major in the fall, was a member of the high school marching band, water polo team, and unity club.

Marcella Arias, Arturo Carmona, Esperanza De La Torre, Pedro Cabrera, and Oscar Villarreal received $1,750 in scholar-
ships from the Latino Faculty, Staff, and Student Association. The awards luncheon: “Empowerment Through Unity” featured guest speaker Gus Frias, program manager with the Los Angeles County Office of Education, where he helps develop violence prevention programs at local K-12 schools.

NCLR Praises Leadership Conference Report

The National Council of La Raza (NCLR) congratulated the Leadership Conference on Civil Rights/Leadership Conference Education Fund on the issuance of the report “Justice on Trial: Racial Disparities in the Criminal Justice System.” In the future, says NCLR, this report will be seen as the beginning of a major campaign that replaced late 20th-century politicians’ single-minded focus on being “tough on crime” with an emphasis on being “smart and fair,” as well as tough on crime in the new century.

The report shows the following: “racial profiling” against Latinos is endemic in many states; federal agencies, including the INS, DEA, and Customs Service, almost routinely single out Hispanics for enforcement actions; in the exercise of “prosecutorial discretion” Latinos are typically charged with more serious crimes than are comparable white defendants; once convicted, Hispanics receive longer sentences than do those of similarly situated white offenders; the juvenile justice system treats Latino youth more harshly than white youth; and the cumulative impact of this inequality is such that Hispanic incarceration rates are more than doubled in recent years.

Fresno State Honors Migrant Students

The CSU-Fresno College Assistant Migrant Program (CAMP) honored 85 first-year students at its Student Recognition Program. Teresa Plascencia, field representative for Sen. Diane Feinstein, was the featured guest speaker. The students received commendation certificates from Lt. Gov. Cruz Bustamante.

Director Odelia Gamo said that four students received special recognition for earning a 4.0 GPA. Additionally, 48 CAMP students were honored for earning a GPA above a 3.0. Other students were recognized for the “Outstanding Coursework Award” and the “Farmworker Service Award.”

CAMP is a federally funded program begun at Fresno State in 1981 that helps migrant students to enter the university.

Illinois Wesleyan Student Researches Latinos and U.S. Politics

Hennessy examines the reasons why Hispanics have a low participation rate in U.S. politics. He developed three models—citizenship, registration, and voting—to identify the demographic factors that might promote citizenship. He hypothesized that Latinos fluent in English—those with higher levels of education, employment, and income—and Latino men will be more likely to seek U.S. citizenship. As hypothesized, Hennessy found that lower income and education levels, combined with English language difficulties, prevent many Latinos from registering and voting.

Although the Hispanic population numbers 31 million, more than seven million adults are ineligible to vote because they aren’t citizens. Therefore, Hennessy concludes it is necessary to increase the citizenship status of Latinos to augment their voting potential.

Eastern New Mexico Graduates Former Levi Employees

In November 1997, Levi Strauss and Company announced that its Roswell, New Mexico, plant would be closing, putting 560 people out of work. By the end of 1998, many of those Levi employees enrolled in classes at Eastern New Mexico University-Roswell hoping to find a new career. Many likened it to “mission impossible”. But now it is mission accomplished.

The class of 2000 included about a dozen from Levi who graduated with honors. Jane Barreto and Phyllis Gutierrez used the buddy system to get through the transition. “I thought I was too old to start over,” said Gutierrez. “Now I understand a new language and will be looking for a new job.”

Juanita Suarez had been with Levi for 20 years. She said, “I have a new outlook, a new future, new friends, and a new life.” Mar Bencomo and Connie R. Salinas were part of the graduating class.

Gonzalez Takes Job at Georgetown

Juan Gonzalez, California Polytechnic State University-San Luis Obispo vice president for student affairs since 1994, left in July for the same position at Georgetown University in Washington, D.C.

As head of student affairs, Gonzalez played a key role in helping to develop university policy. He oversaw all aspects of Student Personnel Services, student activities, health and psychological services, residential life and education, campus safety, relations and judicial affairs, and career services.

“Dr. Gonzalez has been an extraordinary vice president for Cal Poly, and I am confident he will be a wonderful addition to Georgetown, one of the nation’s great universities,” said Cal Poly-San Luis Obispo President Dr. Warren J. Baker.

Contreras-Sweet Addresses Mt. Antonio Grads

Maria Contreras-Sweet, California’s secretary of the Business, Transportation, Housing, and Energy Agency, gave the commencement address at Mt. San Antonio College’s (SAC’s) Class of 2000 graduation.

As Agency secretary, Contreras-Sweet, a Mt. SAC alumna, oversees 13 departments with more than 4,300 employees and a billion budget. The departments include Caltrans; the Departments of Motor Vehicles, Corporations of Financial Institutions, Real Estate; the California Highway Patrol; and the California Housing Finance Agency.

She chairs the California Complete Committee and the Governor’s Task Force on Diversity and Outreach and co-chairs a newly created Commission on Building the 21st Century.
Brewer Outstanding Senior at Bowling Green

Jason Brewer, biology major, received Bowling Green State University's (Ohio) President's Award for Distinguished Service. The award recognizes a graduating senior who has demonstrated academic excellence as well as provided outstanding leadership and service to both the campus and the community.

A four-year member of La Union de Estudiantes Latinos, Brewer was its treasurer for three years and received its Executive Cabinet Award all three years and its Building Community Award in 1998. As an officer, he helped organize many educational programs for Latino students, including the U.S. States Hispanic Leadership Conference.

Gonzales Named Alamo Community Trustee

Jesse Gonzales was elected to the Alamo Community College District board of trustees in Texas.

Gonzales, a small-business owner and military retiree, has a bachelor's degree from San Antonio College and a master's from Our Lady of the Lake University. He was an accounting instructor at St. Philip's College and a middle school teacher. A San Antonio resident for 50 years, and a licensed pilot, Gonzales has served on many committees in the Northside Independent School District (NISD) and as vice president of its PTA Council.

Belafonte, Blades, and Rangel Address Graduates

Prominent entertainers and civil rights activists Harry Belafonte and Ruben Blades were among the distinguished speakers at City University of New York's college commencements.

Belafonte received the President's Medal at Baruch College's undergraduate commencement. Blades addressed graduating students at Lehman College, where he received an honorary Doctor of Laws degree.

U.S. Rep. Charles Rangel was the featured speaker at the Medgar Evers College commencement.

Two Outstanding Grads at Maricopa

Karla Gonzalez and Nayeli Guzman are two successes among the many Maricopa County Community College District (Ariz.) graduates.

Gonzalez, a Phoenix College sophomore with a 4.0 GPA, was recognized in a ceremony in Washington, D.C. as a first team selection to the 2000 All-USA Academic Team. One of 20 scholars across America to receive the honor, she might attend Stanford University to study international business with an emphasis on marketing and then work for an international marketing organization.

Guzman (r.), who graduated from South Mountain Community College (SMCC) with honors and now attends Grand Canyon University, was student body vice president at SMCC and initiated a campus relief project to help Hondurans affected by Hurricane Mitch. When Guzman was five, she was slapped illegally into the U.S. by relatives in Mexico. At her mother's death in Mexico when Guzman was age nine, Guzman moved from relative to relative and attended six schools in 10 years. At 15, looking for financial aid, she walked into the office of SMCC faculty member Laurita Moore (l.), who herself had left Mexico City, penniless, at age 15. Moore, after taking Guzman to an immigration attorney, adopted the model teenager.

Cain Gift of $3.9 Million to Houston-Downtown

In Texas, the Gordon and Mary Cain Foundation recently granted $3.9 million to the University of Houston-Downtown (UHD) for students pursuing a degree in urban education, the largest grant for scholarships ever received by the institution and one that will enhance UHD's success in providing quality educators for inner-city schools.

Dr. Max Castillo, UHD president, said, "Because of our own diversity, we can provide a pool of qualified, culturally sensitive teachers who, due to their training in the classroom and their multicultural experiences, are well-prepared to teach in an urban setting."

Financial difficulty is the main reason UHD students drop out and don't return. Many must choose between supporting themselves and their families or earning a college degree.

Pictured is Gordon Cain during a May 2000 visit to the campus.

New York State and Syracuse Recognize Student Achievement

Syracuse University hosted more than 300 students from 33 colleges and universities across the state at the eighth annual Collegiate Science and Technology Entry Program (CSTEP) conference. CSTEP is a state-funded program to increase the number of historically underrepresented and economically disadvantaged undergraduate and graduate students who complete programs leading to careers in scientific, technical, health-related, or licensure programs.

Carlos Garcia, associate at the N.Y. State Education Department, said, "In the scope of the state budget, CSTEP is small. But considering the benefits reaped by New York State, in terms of ensuring that we have a highly skilled work force, it is immense."

Among those receiving awards for research were (pictured, clockwise from top left) Andrea Montaño, Antonio Gonzalez, and Elanis Pérez.

News from the White House

The staff of The White House Initiative on Educational Excellence for Hispanic Americans has developed one-page fact sheets that provide data on the conditions of Latinos in the educational pipeline from early childhood...
through graduate and professional education. To obtain free fact sheets, call the White House Initiative at (202) 401-1411 or log on to www.ed.gov/offices/OIIA/Hispanic.

At the start of the year, Guillermo Linares replaced Ana "Cha" Guzman as chair of the President's Advisory Commission. Linares has been a member of the Commission since its inception in 1994. He co-chairs the commission's Committee on Children, Families, and Communities. He is a member of the New York City Council and the first Dominican American elected to office in the United States. Guzman is a senior advisor in the Department of Education.

**News from The Getty**

Mexico: From Empire to Revolution. An upcoming exhibition at The J. Paul Getty Museum (Calif.), explores the historical importance of photography in documenting places, events, and people. Drawn from photographs in The Getty Research Institute collection, the exhibit—divided into two parts—shows how photographs serve as documents offering knowledge and insight into Mexican history and culture between the 1860s and 1910s. Part I, from Oct. 21 to Jan. 21, 2001, includes "Empire and Intervention" and "Ruins of Pre-Hispanic Empires." Part II, from Feb. 24 to May 20, 2001, includes "Building the Nation" and "From Celebration to Revolution."

A Getty grant of $120,000 will enable the Centro de Documentación de Bienes Patrimoniales, in Santiago, Chile, to complete a Spanish translation of the Art and Architecture Thesaurus, a comprehensive vocabulary of nearly 120,000 terms for describing objects, images, architecture, and material culture from antiquity to the present.

**San Antonio Center Encourages Health Awareness in Women**

Recognizing that women have multiple demands on their time and energy, a new nationwide, community-based education campaign was launched proposing simple and time-sensitive steps to help improve women's health. Dubbed "Pick Your Path to Health," the campaign from the U.S. Department of Health and Human Services Office on Women's Health encourages health awareness among all women, but primarily targets Hispanic, African American, Alaska Native, American Indian, and Asian American/Pacific Islander women.

The Hispanic Center of Excellence at The UT Health Science Center at San Antonio has partnered with a number of organizations via a local advisory board to help plan year-long activities and distribute materials to women in the community.

"Women are the heart of the Hispanic family. If they are healthy, so are their families," said Dr. Martha Medrano, director of the Hispanic Center of Excellence.

**Western Oregon Hosts Conference on Latino Awareness**

**Western Oregon** The Multicultural University Student Union at Western Oregon University held "Comunidades Latinos Haciendo Diferencias (Latino Communities Making a Difference)," its fourth annual Latino Awareness Conference.

Established to provide awareness and to address relevant issues, the conference featured keynote speaker Ramona Ramirez and workshop presenters who included Jim Garcia, Jose Romero, Dovie Trevino, representatives from Movimiento Estudiantil Chicoano de Aztlán, and more. Workshops discussed community involvement, Latinos of today, Latinos in the 21st century, and remembrance of Latino history.

**Crofton Hills President Retires**

Dr. Luis S. Gomez, 60, retired as president of Crofton Hills College (CHR) in California after a 25-year career in education.

It was during a high school Career Day project in 1959 that Gomez, a high school junior, first experienced being a teacher. Based on his interest, he was assigned to instruct a seventh grade math class for a day. "It was a fabulous day," Gomez reminisced. "The students responded well, and I knew at the time that this was the career I wanted to pursue.

Since that beginning, Gomez has had an enduring impact on the lives of many students. "When you see former students who have succeeded in realizing their dreams, it is very significant."

Before becoming CIC president, Gomez was a high school instructor, high school counselor, college professor, college counselor, and college dean. He attended California Polytechnic University-Pomona; he has a bachelor's degree and a master's in CSU-San Bernardino; and the University of Southern California, where he earned a doctorate, named him a Hispanic Education Leadership Fellow.

**In the News at Miami-Dade**

A four-member student team from Miami Dade Community College (M-DCC) took honors at the Mathematics Olympiad 2 competition held at the University of North Florida. Beating out more than 20 other Florida community college teams, Albo Condori, Romel Franco, and Louis Pesqu of M-DCC's Wolfson Campus and Racial V of the Kendall Campus won first place in a three-part competition. M-DCC math instructors Candido Sanchez (L) and Al Saleh coached the students.

Of the 5,000 or so students in M-D graduating class of 2000, Carlos A. Amezeta 21, is one who can inspire others. Born in Puerto Rico, his birth was premature weighed only three pounds, and was diagnosed as having cerebral palsy. Although he has been in a wheelchair his entire life does not think of himself as disabled. Writing an associates degree at M-DCC, S was a senator for the student government reporter for the student newspaper, and intern at a nearby television station. He participated in weightlifting competitively while lifting weights in the gym, and played basketball, and volunteer the community, regularly speaking to school groups and parents of disabled children. He will attend the University of Florida.

**California-Los Angeles Health Association Honors Bonita**

The University of California-Los Angeles (UCLA) Health Policy and Management Association honored the distinguished career of Dr. Diana M. Bonita, director of California Department of Health Services.

Bonita, who received her doctorate and master's degrees from the UCLA School of Public Health, took her present post in June 1999.
nearly 11 years as director of the Long Beach Department of Health and Human Services. She also was deputy executive director of the Los Angeles Regional Family Planning Council, regional administrator of the California Rural Health Programs, and clinical instructor and head nurse of medical and pediatric units at hospitals in Los Angeles, Buffalo, and New York City.

As the state health services director, Bona oversees a budget of more than $24 billion and 5,600 employees.

Canisius Students Study in Mexico

A group of Canisius College (N.Y.) students majoring in Spanish, business, and international relations spent the summer studying in and near Morelia, Mexico, interning at Canisius' sister institution, the Universidad Michoacana de San Nicolas de Hidalgo. The internship, Mexico 2000, was made possible through an Osheli grant awarded to Drs. Coral Snodgrass and Julia Wescott for the study of international business and modern languages. Miguel Garcia Silva of the Universidad Michoacana de San Nicolas de Hidalgo was the on-site director of the trip.

Spanish majors were offered an intensive course in the language. Students also were required to earn their room and board by teaching conversational English to university professors.

California-Santa Barbara Student Receives Coveted Award

Imelda Minerva Loza, a first-generation Hispanic American and a college re-entry student, won the Thomas More Storke Medal for Excellence, the highest and most coveted honor at the University of California-Santa Barbara (UCSB). The Storke award is presented annually to one graduating senior who has demonstrated outstanding scholarship and extraordinary service to the university, its students, and the community.

Loza grew up as a child laborer in a farm-working family, speaking only Spanish during her childhood. While at UCSB, she raised three small children, worked 20 hours a week, and maintained a full academic course load. Active in the local community, Loza has held highly visible positions with the Santa Barbara Hispanic Chamber of Commerce and the local Spanish language television program Por Todo el Pueblo, and she has volunteered much of her time to other community and UCSB functions. Loza received degrees in communication and Chicano studies and intends to continue her education by seeking a law degree.

New York Times Selects Bravo Group for Hispanic Market

The Bravo Group, a Young and Rubicam company, was selected by The New York Times as its advertising agency of record for the Hispanic market. The Bravo Group will be developing integrated Hispanic communications including advertising, direct mail, and media planning/buying in an effort to reach bilingual Latinos in the New York area.

"The New York Times is committed to building strong relationships with diverse groups in our home market, where multicultural consumers comprise 65 percent of the city's population," said Alby Myers, vice president, marketing services of The New York Times. "Our current integrated Hispanic marketing effort in New York represents the continuation of our efforts to reach ethnic segments, both within New York as well as in our national markets."

Pictured here is Daisy Espósito, president and chief creative officer of Bravo, who has, among other awards, been recognized by Crains New York Business as one of New York's "100 Top Minority Executives" and by Hispanic Magazine as one of the "100 Outstanding Hispanic Women in Communications."

News from Rio Hondo College

President Dr. Jesus Castrejon was elected to the American Association of Community Colleges board of directors.

Honor student Martha Sanchez earned one of the highest academic honors within California's community colleges, All-California Academic Team membership for 2000.

Professor Lenore Navarro Dowling was awarded the California Teacher's Association 2000 Human Rights Award at the Human Rights Conference in San Diego.

Women's basketball player Darlene Nunez was named Most Valuable Player of the Foothill Conference. Nunez also was selected in the All-State Basketball Second Team. Corina De La Cruz, Nicole Codd, and Caroline Thompson won All-Conference awards. Led by Foothill Conference Coach of the Year Kathy Pardillo, the team won the conference championship.

Laredo Child Development Students Receive Boost

In Texas, three Laredo Community College (LCC) child development students are getting a significant boost toward their life goals with the Berta Z. Galvan Scholarship. Dr. Galvan attended a special banquet to present the scholarships to the gifted students.

Pictured (l. to r.): Galvan, Francisca Fernandez, Ana Laura Gonzalez, and Francisco Martinez Jr., dean for workforce education. Not shown is scholarship honoree Mary Garcia.

LCC's Child Care and Education Club launched the scholarship in 1999 to celebrate the admirable career of Galvan, who retired last year after 22 years at LCC as founder, instructor, and department chair of the child development program.

Garcia Promotes Safety at Western Washington

As a community services officer at Western Washington University, David Garcia is a key part of the University police department's community-oriented policing program, designed to enhance safety and security at Western by working together with the public.
Garcia works with University residence hall advisers and student residents to provide personal safety training and to discuss sexual assault and violence prevention. He maintains and coordinates crime prevention education programs, issues community advisories and other crime information, and works with many University departments on safety and security-related issues.

**Latino Literary Hall of Fame Honors New Mexico Press**

The Latino Literary Hall of Fame announced winners of its Second Annual Latino Book Awards. Three books published by the University of New Mexico Press were awarded first place, and two books were awarded second place during the Latino Book Summit, held in June at BookExpo America 2000 in Chicago, Ill.

The first place winners were: Best Poetry Book, *CrashBoomLove: A Novel in Verse*, by Juan Felipe Herrera; Best Biography, *Capirrotada: A Nogales Memoir*, by Alberto Alvaro Rios; and Best Historical Fiction Novel, *Sor Juana’s Second Dream: A Novel*, by Alicia Gaspar de Alba.

The second place winners were: Best Arts Book, *Chimayo Weaving*, by Helen Lucero and Suzanne Baizerman; and Best Biography, *A Patriot After All: The Story of a Chicano Vietnam Vet*, by Juan Ramirez.

**Union County Athletes Named All Stars**

Adalberto Acevedo and Anthony Rotola, student athletes on the Union County College (N.J.) 2000 men’s baseball team, were honored recently.

Acevedo was named to the first team All Region XIX, Division III of the National Junior College Athletic Association (NJCAA) and to the second team of the All-Garden State Athletic Conference Division III-North as an infielder. Rotola was named to the second team All Region XIX, Division III of the NJCAA and the second team of the All-Garden State Athletic Conference Division III-North as an outfielder.

**PUBLICATIONS**

**“Pueblos Enfermos”: The Discourse of Illness in the Turn-of-the-Century Spanish and Latin American Essay**

By Michael Aronna

This book investigates *ideartum español*, by Ángel Ganivet, *Ariel*, by José Enrique Rodó, and *Pueblo enfermo*, by Alcides Arguedas—three essays that share a view of the nation as an organism threatened by “social pathogens.”

**Contemporary Argentinean Women Writers: A Critical Anthology**

Gustavo Fares and Eliana C. Hermann, eds.

This collection includes short stories, novel segments, interviews, and bibliographies of works of 16 major Argentinean women writers.

**Agrarian Reform and Class Consciousness in Nicaragua**

By Laura J. Enriquez

Laura J. Enriquez analyzes the political impact of agrarian reform by comparing the effects of several reform strategies employed in Nicaragua between 1958 and 1994. She shows that the impact is often paradoxical: socioeconomic reforms that clearly benefit the peasants do not necessarily result in political support for the reform movement that brought them about.

**The Invisible Faculty: Improving the Status of Part-Timers in Higher Education**

By Judith M. Gappa and David V. Lesli

Part-time faculty are treated largely as the second-class citizens of academia—denied status, benefits, collegial support, and the respect and attention that full-time faculty take for granted. Exposing myths and false assumptions, this book shows how institutions can strengthen academic programs through the use of part-timers.

**Afro-Cuban Voices: On Race and Identity in Contemporary Cuba**

By Pedro Pérez Sarduy and Jean Stubl

Based on the vivid firsthand testimonies of prominent Afro-Cubans who live in Cuba, this book of interviews looks at how race affects daily life on the island. While celebrating their racial and national identity, the collected voices express an urgent need to end the silts and distortions of history in both pre- and post-revolutionary Cuba.

**Cactus Blood**

By Lucha Corpi

This is Lucha Corpi’s second mystery novel featuring Chicana detective Gloria Damian. During the 1970s, a young Mexican woman is raped.
then exposed to pesticide contamination. Five men and two women save her and help her put her life back together. Sixteen years later, one of the men who helped her is dead, and two others have disappeared. Historic settings, California panoramas, and Hispanic culture texture this suspenseful search for a ritualistic assassin.

Song of the Hummingbird
By Graciela Limón

From Aztec princess to slave and concubine, Hummingbird—or Huixitzilin—in her native Nahua—recounts her life during the Spanish conquest of Mexico. Expressing a confidence and freedom that women have striven for centuries to attain, Huixitzilin passionately relates her tale to Father Benito the priest who seeks to lead her to confess and convert, and who offers her an absolution she neither needs nor wants. Instead, she forces him to see the conquest, for the first time, through the eyes of the conquered.

Coming into Her Own: Educational Success in Girls and Women
Sara N. Davis, Mary Crawford, Jadwiga Sebrechts, eds.

Written by experts in education, psychology, and women's studies, this book offers innovative strategies and a range of approaches and models for optimizing the educational experiences of girls and women.

Legislative Entrepreneurship in the U.S. House of Representatives
By Gregory Wawro

Just as entrepreneurs build businesses in the marketplace, members of Congress build legislative programs and use their records to establish reputations in the institution. This book shows how entrepreneurial actions relate to members' goals of reelection, enacting good public policy, and obtaining influence in the House.

Tales of Two Cities: Race and Economic Culture in Early Republican North and South America
By Camilla Townsend

Europeans colonized all the United States and the countries of Latin America, yet in terms of economic development, the U.S. far outstripped Latin America, beginning in the 19th century. Townsend contends that North Americans prospered relative to South Americans because of differences in attitudes towards workers that evolved in the colonial era. She focuses on two similar port cities—Guayaquil, Ecuador, and Baltimore, Maryland.

Reflexiones 1999: New Directions in Mexican American Studies
Richard R. Flores, ed.

Established in 1970, the Center for Mexican American Studies at the University of Texas-Austin is a national leader in teaching, research, and publications in Chicano studies. Reflexiones, its annual review, highlights new work by scholars affiliated with the Center. Reflexiones 1999 invites us to consider the complex relationship between cultural identity, racial and ethnic politics, and the production of knowledge.

Alive at the Core: Exemplary Approaches to General Education in the Humanities
By Michael Nelson and Associates

Written for faculty and administrators, this book reveals the fundamental importance of general education in the humanities. It lays the groundwork for meaningful learning in college, and offers different approaches to changing the core curriculum into a powerful tool for lifelong learning.

Crossing Borders, Reinforcing Borders: Social Categories, Metaphors, and Narrative Identities on the U.S.-Mexico Frontier
By Pablo Vila

This path-finding ethnography charts the social categories, metaphors, and narrative stories that inhabitants of El Paso and Ciudad Juárez use to define their group identity and distinguish themselves from "others." It describes how Mexican nationals, Mexican immigrants, Mexican Americans, African Americans, and Anglos make sense of themselves and perceive their differences from others.

Race, Place, and Medicine: The Idea of the Tropics in Nineteenth-Century Brazilian Medicine
By Julian G. Peckard
This book examines the impact of a group of 19th-century Brazilian physicians who became known posthumously as the Bahian Tropicalista School of Medicine. Julian G. Peard explores how this group of obscure clinicians became participants in an international debate as they helped change the scientific framework and practices of doctors in Brazil.

Al partir
(Spanish)
By Omar Torres

Al partir, novela histórica y testimonial, nos presenta a una de las verdaderas heroínas de la lucha del siglo XIX por la independencia de Cuba.

Many publications featured in this section are available through amazon.com.

CONFERENCES

CSUSB International Congress
August 30-September 1

California State University at San Bernardino and others are sponsoring "Challenges to Education: Balancing Unity and Diversity in a Changing World." In Mexico City.
Contact: (909) 880-9777 ext. 210. e-mail dwalker@csusb.edu.

Kiva's Mexico 2000 Education Tour
September 19-20, Guadalajara
September 22-23, Mexico City
September 25-26, Montevideo

Kiva Expeditions, Inc., is committed to building partnerships through key introductions among international exhibitors, Mexican schools representatives, and local business leaders. This year's tour, "Building Partnerships in Mexico," will focus on student recruitment through public fairs and school visits.
Contact: Annette Wright, (303) 770-3063; e-mail, kivaexpo@mindspring.com.

International Society for Luso-Hispanic Humor Studies International Conference
September 28-30

At Delta Hotel, Montreal.
Contact: K.M. Sibbald, Department of Hispanic Studies, McGill University, 3541 398-6683; e-mail ksibbalk@leacock. lan.mcgill.ca.

18th Annual U.S. Hispanic Leadership Conference
September 28-October 1

The USHLI has as its conference theme this year: "Latinos in the New Millennium: Building on the Past to Promise Promise for the Future." At the Hyatt Regency, McCormick Place, Chicago.

Hispanic Women's Corporation 15th Annual Conference
October 5-6

The 15th Annual Hispanic Women's Conference, presented by the Hispanic Women's Corporation. At the Phoenix Civic Plaza in Phoenix, Ariz.
Contact: (888) 388-4HWC or (602) 954-7095; e-mail, hwc@netmail.att.net

Latin American and Caribbean Studies Symposium
October 6-7

St. John's University's Committee on Latin American and Caribbean Studies (CLACS) will hold an international symposium, "Immigrants from Latin America and the Caribbean: Coping in New York City," to "evaluate the social, educational, legal, economic, political, and psychological adaptation of immigrants from Latin America and the Caribbean to the New York City area." At St. John's University.
Contact: (718) 990-1932. e-mail clacs@stjohns.edu.

Forum 2000 & NACME Career Fair
October 25-26

"Affirming Diversity: Real Commitment, Real Results." Among the confirmed speakers are Dr. Ana Margarita "Cha" Guzman, W. House Commission on Educational Excellence for Hispanic Americans, and Dr. Elsa Mac senior research associate, Tomás Rivera Po Institute. At the Westin Hotel, Long Beach, CA.
Contact: NACME, (212) 23-2626; web: www.nacme.org/events.

AACU's 3rd Biennial Diversity and Learning Conference
October 26-29

"Diversity and Learning: Identifying Community, and Intellectual Development designed both for working teams of faculty and administrators for individuals interested in improving classroom teaching and changing their curriculum, fostering systemic change in their institutions, and investing in local and global communities. At Westin William Penn Hotel in Pittsburgh, PA.
Contact: (202) 388-3760; e-mail, mnings@aacu.nw.net; website, www.aacu.edu/Meetings/divlearn00.html.

The College Board Centennial Forum
October 28-November 1

Networking and professional development opportunities: sessions on cutting-edge specific research and development. Key addresses by well-known speakers. At Marriott Marquis Hotel, New York City.
Contact: (212) 13-8050; website www.collegeboard.com.

HACU 14th Annual Conference
November 4-7

This year's theme: "Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, NM.

One does not have to agree with Richard Rorty to acknowledge that he is a wonderful writer—able to offer apothegms of wisdom crystallized into a few sentences, winks of mischievous perspicacity. One of my favorites: "We pragmatists think that the reality-appearance distinction is an awkward and misleading tool of analysis, one that needs to be replaced with a distinction between the oppressor's descriptions of what is going on and the oppressed's descriptions, unsupplemented by the claim that the oppressed are on the side of the really real." This sentence comes from Rorty's review of Cornel West's The American Evacuation of Philosophy: A Genealogy of Pragmatism. Many would argue that this is what many thinkers and intellectuals in the former colonies of Europe and Euro-America have been doing at least since the project of decolonization got underway in the 50s and 60s.

Others, and this is where Walter Mignolo steps in, have argued that we can't even begin this process because the oppressed's descriptions are always suspect, without legitimacy, authority, or credibility—precisely because of the way descriptions are supposed to be arbitrated and imprinted with the stamp of credibility and reliability granted by the epistemic machines and knowledge factories on which the power and hegemony of the West, and the oppressor in general, are sedimented.

No matter how much we advocate for the marginalized, oppressed, excluded, and subalternized, their descriptions—in the view of the doctors of knowledge—will remain contaminated, impregnated, partisan, perhaps even blinded, by immediacy and political expediency.

This analysis leads us to a critique of how knowledge is produced—for whom, why, under what conditions, where, in what languages, and under what genres is it peddled. An encyclopedic and daunting task. A simple sociology of knowledge will not do. Nor will a political sociology of either the university or the public spheres of critical thinkers.

A world-systems analysis begins to get close, but only if it eschews narrow Marxist economism. A science of the sciences—how the natural and social (or human) sciences came to be configured around particular fields of study, structures of human organizing, gerrymandering of cultural epochs, and so on—is the kind of science that would be needed to get even a glimmer of why the descriptions of the oppressed have remained hidden and suppressed, marginal and suspect.

This science must also be aware of its historicity—how its own categories came to be available only at certain junctures. This science, thus, must think the history of other sciences: or disciplines and its very own standpoint of analysis. Does an eye see itself in its horizon of vision? The science that could think simultaneously the normativity of all sciences and its abjected alterity (that which it excludes as error or non-scientific, i.e., myth, superstition) is like an eye trying to give an account of its point of view without seeing itself. A tall order, an exorbitant expectation, and, many would claim, paradoxically unachievable.

But it is such a science of the sciences that Mignolo has set out to profile. He does not call it that. He calls it by several extremely evocative names: a critique of knowledges, a border geosemology, border thinking, border epistemology, post-Occidental reason. The goal of this geosemology (from gnosia, which is more than epistemology, alluding to a theory of knowledge related to human praxis), or post-Occidental reason, is to think the production, parceling, distribution and, yes, packaging and marketing of knowledges in terms of how they look from the other side of the line of subalternism, coloniality, and subjugated knowledges.

Walter Mignolo focuses on four main areas of genealogical excavation: history (the way narratives about salvation became narratives about civilization, and then about modernization, and, more recently, about globalization), the social sciences (the way sociology, economy, politics, and sociology, in turn with anthropology and oriental studies, parcel out and parcel the past and present, allocating the present to Western societies, and the past to non-Western societies'), philosophy (how it institutionalized within the university, thus absorbing and being guided by the imperatives of nation and empire building), and languages (languages of the disciplines, i.e., authorized knowledges, are the languages of the colonizer and empires that parcelled the world over the last 500 years).

This book is one of the most fascinating and challenging texts of the borderlands of critical thinking in a new age. Mignolo's text demonstrates why Latin Americans, Latinos, and Hispanics are the theoretical ghosts, as well as subalternized bodies and languages, that haunt the U.S. cultures of Empire. This is one of the most eloquent, thorough, and persuasive defenses and explications of the theoretical import and relevance that the works of many Chicanas/os, Hispanics/Latinos, etc. have for a reconfiguring of human knowledges. It is a major contribution to the project of mental decolonization begun by the children of Caliban in the Americas, but also in the whole colonial world-system that has developed over the last 500 years.

Eduardo Mendieta is assistant professor of philosophy at the University of San Francisco.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers' Guidelines.
FULL TIME POSITIONS

TEACHING

COMPUTER INFORMATION SYSTEMS - (3 Positions)

Multimedia
Teach a full range of courses in multimedia programming and design. Experience with authoring systems, programming, graphics software, and web development tools. Knowledge of networking, industry certifications, and teaching experience desirable. Vac. #533. Closing Date: 6/25/00.

Computer Scientist
Teach a range of computer science courses including object-oriented programming, machine architecture, and participate in grant writing and software development activities. Vac. #537. Closing Date: 6/25/00.

Telecommunications
Teach a range of computer courses including operating systems, programming, telecommunications, and network-related topics in networking, coordination, and communication. Vac. #520. Closing Date: 6/25/00.

NON TEACHING

BUSINESS MANAGER & CPMETROLLER
(Higher Education Officer)

Reporting to the Vice President and Dean for Administration & Planning, this position will have responsibility for the day-to-day business affairs of the College, including consolidated financial statements and reports; administering and ensuring compliance with College and University policies; revenue management and projecting revenue targets; developing, maintaining and ensuring a comprehensive accounting system; overseeing budget preparation, and maintenance, modifications and adjustments; representing the Vice President and the College externally; and handling all related matters. Bachelor's degree and eight (8) years of professional experience in financial affairs, accounting and related work in a large, educational or government agency. The successful candidate will have a minimum of an undergraduate degree in Accounting or Finance. CMA and/or CPA preferred. The candidate must be proficient in the use of Excel, Financial modeling and database management systems. Salary: $28,000/yr - $31,250/year. Vac. #556. Closing Date: 6/18/00.

TUTORIAL COORDINATOR
(Asst. to Higher Education Officer)

Coordinating and administering the tutoring center program, responsibilities include: recruiting, hiring, training, scheduling, and evaluating tutors; maintaining appropriate student and tutor records; designing and conducting student study skills workshops; coordinating student recruitment and utilization of program; and coordinating on- and off-campus tutoring activities with academic departments and other school related to LRC operation. Bachelor's degree in computer science, or related field required. Two years' related experience required. Prior knowledge of computers, web page creation and maintenance is necessary. Preferred: software knowledge includes: Dreamweaver, HTML, Microsoft Office, and other graphic packages such as Adobe Photoshop. Experience in a cross-platform environment is also preferred. Knowledge of CGI protocol, Javascript, VBScript and a plus. Must possess the ability to work effectively with non-technical users. Requires good judgment, communication skills, and the ability to work with a diverse college population in an urban environment. Salary: $26,312/yr - $44,284/yr. Vac. #539. Closing Date: 6/25/00.

The University of Vermont is seeking applications for the position of Controller.

Founded in 1791, the University of Vermont is a comprehensive public research university of approximately 10,000 students and 3,000 faculty and staff. The University enrolls students in six undergraduate colleges: a graduate college, a medical college, and a division continuing education. The University's annual budget is in excess of $310 million. The University is located in Burlington, the State largest city with a population of 50,000. Burlington is consistent ranked as one of the nation's most livable cities (e.g., A+E Television US Conference of Mayors, National Geographic Traveler, and Lati Horse Journal).

The Controller will both oversee the financial management and accounting functions of the University and serve as a key member of the team responsible for the overall financial affairs, procedures, and policies of the University.

As chief accounting officer for the University, the Controller is responsible for all financial policies and procedures, monitoring regulatory issues, establishing internal controls, producing financial reports, coordinating external audits, and developing and implementing best acceptable business practices. The successful candidate must also provide strategic direction and leadership for the nine-departmental units, with 50 employees, which report to the Controller. The Controller is responsible for: Accounting Information Service, Accounts Payable, Cashier's Office, Grant and Contract Accountant General Accounting; Student Accounting; Student Loan Services; and Organizational and Treasury operations.

A Master's degree in Accounting, Business, Finance or related field is required; CPA license highly desirable. At least six years progressively responsible experience in financial management and public accounting in a complex organization are required; high education experience is preferred. Other minimum qualifications include: supervisory experience; strong interpersonal communications and presentation skills; ability to work in a collaborative environment; and familiarity with higher education financial software, systems, and technology.

Please send letter of application, a current resume, and the names of three professional references to:

Chair, Controller Search Committee
358 Waterman Building
85 So. Prospect St.
Burlington, VT 05405

Deadline for Applications: Until position is filled. Priority will be given to resumes received before September 8, 2000.

The University of Vermont is an Equal Opportunity/Affirmative Action Employer. Applications from women and individuals of diverse racial and ethnic and cultural backgrounds are encouraged.

For further information about the University of Vermont, please visit us at:

www.uvm.edu
Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position:

ASSISTANT DIRECTOR OF RESIDENTIAL LIFE

In an increasingly diverse environment, Colby seeks an individual well versed in the challenges that face undergraduates from a variety of racial, ethnic, geographic, sexual orientation, religious, socio-economic, and other backgrounds. Reporting to the Associate Dean/Director of Residential Life, the Assistant Director will assist in the overall development of the residential life program. Responsibilities will include assisting in the selection, training, and evaluation of hall staff; advising; administration of the College’s policies and discipline process; programming; and on-call duties as necessary. Position requires on-campus residence, housekeeping provided. Qualifications: A Bachelor’s degree is required; a Master’s degree in college student personnel or related field is preferred or two years of professional residential life experience; experience in staff development, discipline procedures, and programming preferred; computer proficiency required.

Interested candidates please submit two copies of a cover letter and two copies of a resume, including the names and telephone numbers of three references, to: Douglas C. Terp, Director of Personnel Services, Colby College, 5800 Mayflower Hill, Waterville, ME 04901-9855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby website: www.colby.edu

DIVISION CHAIR FOR ARTS, HUMANITIES, AND SOCIAL SCIENCES (POSITION FA034)

J. Sargeant Reynolds Community College is Virginia’s third largest community college, serving more than 15,000 credit and 32,000 non-credit students annually. The College provides education and training at three campuses, at 35 satellite locations, and through distance learning programs. J. Sargeant Reynolds plays a pivotal role in economic development in the metro Richmond area, training, and retraining the workforce. The College is seeking applicants for the position of Division Chair for Arts, Humanities, and Social Sciences. TYPE OF APPOINTMENT: Full-time, twelve-month, faculty rank appointment. Salary commensurate with the education and experience of the applicant. QUALIFICATIONS REQUIRED: Advanced degree in the arts, humanities, and/or social sciences, or related area. Considerable knowledge of higher education or community college administration practices and principles; curriculum design and instructional methods and technology; course development, scheduling, and monitoring; budget and resource management; and personnel administration. Demonstrated ability to develop academic programs, conduct course assessments and evaluations; and make faculty assignments and teaching loads. Demonstrated ability to supervise and manage large numbers of full-time and adjunct faculty, staff, and college employees; conduct employee evaluations; determine and recommend appointments; and make classification and hiring decisions. Demonstrated ability to perform administrative functions of the division office including strategic planning, student enrollment reporting, student advising, managing equipment, usage and replacement, monitoring instructional technology, and assessing needs. Demonstrated ability to develop and manage division budget and to develop community relations to promote the academic offerings of the college. Demonstrated ability to communicate effectively, orally and in writing. QUALIFICATIONS PREFERRED: Previous teaching experience strongly preferred. Doctorate degree and progressive experience in college administration at the community college level also desired. POSITION RESPONSIBILITIES: The academic division chair provides college-wide strategic planning, leadership, supervision, and management for the division and its faculty, staff, and students to ensure consistency in the delivery of academic services. The Chair is responsible for the Provost for the academic, administrative, and fiscal operations of the division, and acts as the spokesperson for the division and its programs and coordinates with other academic and administrative units of the college to plan, implement, and assess quality educational courses and programs. APPLICATION PROCESS: Application inquiries must be received, if hand-delivered, or postmarked by OCTOBER 31, 2000. A completed application folder contains a completed State application and resume, three letters of recommendation relevant to this position and all official academic transcripts. All correspondence should be sent to the Human Resources Department, J. Sargeant Reynolds Community College, P. O. Box 85622, Richmond, VA 23285-5622. Phone: (804) 371-3249.

Claremont GRADUATE UNIVERSITY DEAN

School of Politics and Economics

Claremont Graduate University (CGU) seeks a senior academic leader to serve as the Dean for the School of Politics and Economics (SPE).

The School of Politics and Economics is composed of two departments with a core faculty of 16 and a student enrollment of about 250. Three Ph.D. degrees are offered: Politics, Economics, and a joint degree in Political Economy. Besides traditional M.A. programs in both economics and political science, the school also offers several professional degree programs in Public Policy, International Political Economy and a multidisciplinary Politics, Economics, and Business degree. Many Master programs draw on the combined course offerings of the two departments. The School cooperates with the five undergraduate Claremont Colleges and places high value on these relationships.

The Dean has primary responsibility for administering the School’s daily affairs, fundraising and program development and should be able to demonstrate a level of scholarly achievement that would warrant appointment with tenure at the rank of professor. The successful candidate should have extensive academic experience as a faculty member and academic leader in the Social Sciences. Because CGU is a graduate-only university, candidates should demonstrate achievement in scholarship, teaching, and the supervision and mentoring of graduate students.

Salary and benefits are competitive and dependent upon qualifications and experience. The review of candidates will begin on October 2nd but will continue until the position is filled, with the final decision made as early as the fall semester of 2000.

In addition to meeting fully its obligations under federal and state law, CGU is committed to creating a community in which a diverse population can live and work in an atmosphere of tolerance, civility, and respect for the rights and sensibilities of each individual, without regard to economic status, ethnic background, political views, sexual orientation, or other personal characteristics or beliefs.

For a full description of this position or other positions which are open, please see the CGU web page at www.cgu.edu. Please send inquiries, applications, and nominations to: Associate Provost Phillip H. Dreyer, Harper Hall, Rm 123, 150 E. Tenth Street, Claremont Graduate University, Claremont, CA 91711. For further inquiries please call (909) 607-1239.
St. John's University

FACILITIES AND CONSTRUCTION OPPORTUNITIES

St. John's University, one of the nation's largest Catholic universities with three campuses covering nearly 300 acres in the New York metropolitan area, has embarked on a $300 million Master Plan. This ambitious construction plan, which affects virtually every aspect of University life, has created the following opportunities for motivated professionals who are seeking challenges in a dynamic intellectual environment.

VICE PRESIDENT FOR FACILITIES AND CONSTRUCTION

We seek a high caliber executive, a leader with vision, to oversee design and construction, plant operations, and public safety. Responsibilities include overall management of the planning design and construction of the University's Master Plan, as well as capital renewal and deferred maintenance projects. Position will also serve as liaison with architectural and construction firms, oversee all technical and administrative activities relating to the University's physical plant and grounds as well as the University's uniformed security force. We require at least 15 years of experience managing multiple construction projects of over $10 million. Degree in engineering, architecture preferred. Strong planning, problem solving and communications skills also required.

The Vice President for Facilities and Construction will report to the Executive Vice President and Treasurer and will serve as advisor to the President and other University officials on all matters relating to University facilities. Additionally, the Vice President will serve on various committees and will be a key liaison with community groups.

PROJECT MANAGER/DIRECTOR

We seek a hands-on, highly qualified Project Manager/Director to coordinate all phases of the University's capital projects for new construction and/or alteration. Ideal candidate will be involved in all aspects of architecture and engineering design as well as the preconstruction planning and management of contracts and CM. A minimum of 8 years experience in construction is required, as well as experience in managing, project managing and scheduling. We also require a degree in engineering, architecture or construction management, and excellent communication, interpersonal and computer skills.

Salary for each position is competitive and commensurate with qualifications and experience. The University offers an excellent, all-inclusive benefits package. Please forward cover letter, resume and salary requirements to:

Mary Harper
Vice President, Human Resources
St. John's University
8000 Utopia Parkway
Jamaica, N.Y. 11439

St. John's is an equal opportunity employer and encourages applications from women and minorities.

Smithsonian Institution

The Smithsonian Institution's National Museum of American History is seeking a Manager of Offsite Collections. Salary range is $51,204 to $66,854. Promotion potential to $79,155. Applications must be received by 8/31/00.

We are an EEO/AA employer

For complete package
E-mail Dan Weinwurm at Weinwurm@nmah.si.edu.

USF University South Florid

The University of South Florida is our recruiting for various faculty and/or staff positions. For more information about the University's positions, please visit our Web site at http://usfweb.usf.edu/usfjobs/vacancies, or call our Job Line for staff positions at 974-2875.

USF is an equal opportunity/equal to affirmative action institution, commits to excellence through diversity, education and employment.
UNIVERSITY OF CALIFORNIA, DAVIS

Environmental Engineering
Faculty Position Available

The Department of Civil and Environmental Engineering at UC Davis invites applications and nominations for a tenure-track position in environmental engineering with specialization in biological systems and treatment. The position is open at Assistant and Associate Professor levels. Requirements include a doctorate in engineering and a demonstrated record of success in, or evidence of outstanding potential for, both teaching and building a vigorous independent research program. The successful candidate will have a strong background and interest in water and wastewater quality and applying advances in the biological sciences to process design.

Areas of special interest include, but are not limited to, microbial ecology, application of molecular tools, public health, and non-point source pollution. Experience with municipal wastewater or water treatment plants and formal training in computational methods is desirable. She/he will join departmental colleagues in teaching undergraduate courses in environmental engineering and graduate courses related to water and wastewater treatment as well as biological systems.

To be assured of consideration, applications must be submitted by October 2, 2000. Applicants should submit a complete resume, including a statement of teaching and research interests, transcripts, a list of relevant professional experience and publications, and the name, mailing address, telephone number, and e-mail address of three references to:

Jeanne L. Darby, Professor
Department of Civil and Environmental Engineering
University of California
One Shields Avenue
Davis, CA 95616-5294

E-mail inquiries may be addressed to jdarby@ecodavis.edu

Information about the department can be found at http://cee.engr.ucdavis.edu/

UC Davis and the Department of Civil and Environmental Engineering are committed to building a diverse faculty, staff, and student body in response to the changing population and educational needs of California and the nation. The University of California is an affirmative action/equal opportunity employer.

THE UNIVERSITY OF UTAH

CHAIR, DEPARTMENT OF NEUROSURGERY
UNIVERSITY OF UTAH SCHOOL OF MEDICINE

The University is seeking a physician to lead the Department of Neurosurgery at the University of Utah. The Department has a well established and strong program of clinical activities, teaching and research, and is an integral part of the active clinical and scholarly community of the University of Utah School of Medicine. In addition, there are excellent ties with the community physicians. Candidates should have a distinguished record of accomplishment in the areas of education, research and clinical expertise.

The University of Utah is an equal opportunity employer and qualified men, women and members of minority groups are encouraged to apply.

Interested individuals should submit a letter and curriculum vitae to Gayle Pipes, Director of Faculty Administration, University of Utah School of Medicine, AC109, 50 North Medical Dr., Salt Lake City, Utah 84132. Applications may also be submitted by e-mail to:pipes.gayle@utah.edu

MSCU

Minnesota State Colleges & Universities

CHANCELLOR

The Minnesota State Colleges and Universities (MSCU) invites applications and nominations for the position of Chancellor of the system. MSCU is made up of 35+ universities, and community, technical and comprehensive colleges. The system serves approximately 230,000 students a year and employs 5,000 faculty and 9,500 staff on campuses. The strengths and promise of the system is its size, geographic distribution, and importantly, the opportunities presented by having such diverse colleges and universities led by the Chancellor and governed by one board.

The Chancellor plays a critical leadership role in articulating a compelling vision of a more highly educated and competitive Minnesota. As the Chief Executive Officer, the Chancellor reports directly to the Board of Trustees of MSCU and leads the campus presidents in strengthening the state’s public colleges and universities. The Chancellor must vision, lead, manage, communicate, advocate, steward and champion the dreams, aspirations and expectations of the campus presidents, faculty, staff, students and system office staff of MSCU.

The Chancellor will lead the effort to strengthen our statewide, high-quality, accessible, full-service higher education system, and community service initiatives for citizens of Minnesota. The Chancellor will articulate the core values and strengths of the MSCU system to the citizens of Minnesota, Governor, legislature, business, professional community, and media. The Chancellor will raise awareness of the unique and diverse MSCU colleges and programs and the system. Under the Chancellor’s leadership, MSCU will continue to be the most accessible, highest quality, innovative and transformative higher education provider in the region.

Chancellor Profile

- Visionary
- Leader
- Manager
- Communicator
- Advocate
- Steward

For a detailed description of profile, contact A.T. Kearney.

Qualifications

- Advanced degree required, earned doctorate or terminal degree preferred
- At least 10 years of successful executive leadership experience and management of diverse, complex organization
- Demonstrated academic competencies focused on the educational and training needs of the educated person in the 21st century

Appointment

Salary, benefits, contract details and other terms of employment are negotiable and competitive and are subject to agreement between the MnSCU Board of Trustees and successful candidate.

Applications and Nominations

Applicants should submit a letter of interest addressing each of the profile items, a current resume, and the names, addresses, and telephone numbers of references. Individuals wishing to nominate candidates for the position should submit nominations, including the name, position, address and telephone number of nominee. Review of applications will begin August 15 and will continue until appointment is made.

Applications and nominations should be sent to:

Dr. Jan Greenwood, Vice President
A.T. Kearney, Inc.
MnSCU Chancellor Search
330 John Carlyle Street
Alexandria, VA 22314
**Dean of Business Administration**

**Position Description** The University of Wisconsin-La Crosse invites applications and nominations for the position of Dean of the College of Business Administration (COBA). The college's undergraduate and MBA program are accredited by AACSB. The college is comprised of seven departments: Accounting, Business Development, Center for Economics, Finance, Information Systems, Management, and Marketing with a combined total of approximately seventy-five faculty and staff.

The Dean will act as a vital link between the college, the university, and the local business and civic community. The Dean will take the lead in generating ongoing institutional support among the broader business and local community and college alumni. The Dean, within a shared governance context, will provide intellectual and creative leadership and coordination of academic programs and will work with the respective department and programs in ongoing planning activities. Primary responsibilities include general administration of all college programs and the oversight of curricular, budgetary, program, and faculty development. For further information, go to: [http://portal.wisc.edu/vacancies](http://portal.wisc.edu/vacancies)

**Minimum Qualifications:**
- Earned doctorate or other acceptable professional qualification (as determined by the search committee)
- Demonstrated excellence in teaching and/or research and a successful record of service that warrants tenure in the College of Business Administration
- A minimum of 5 years administrative experience in higher education (Chair level or above), including accreditation experience
- Demonstrated ability to interact with the business community
- Demonstrated ability to generate institutional support from external sources
- Demonstrated ability to interact with local and broader communities
- Commitment to Equal Opportunity and Affirmative Action and to working with a diverse university community

**Preferred Qualifications:**
- AACSB accreditation experience
- International experience/exposure
- Understanding of the role of information/technology in business and education
- Demonstrated leadership in program and institutional development

**Values and Honor:**
- A passion for learning and education and a commitment to:
  - Intellectual inquiry
  - Freely and open exchange of ideas
  - Student learning and development
- A sense of history and context for both business and academe
- An understanding of the issues facing higher education as a comprehensive university
- An ability to foster cooperation and community within the CBA
- A commitment to forging partnerships within and among:
  - CBA alumni
  - The university
  - The business community
  - The local and broader community
- Unwavering integrity and the courage to make difficult decisions
- A clear sense of self, a generous spirit, and a keen sense of humor

**Appointment:** Full-time, 12-month appointment starting July 1, 2021. Salary competitive among comparable comprehensive, AACSB-accredited universities. Excellent benefits and insurance programs.

**Applicant Information:** Refer to Recruitment Number "B2CD6" when applying for and inquiring about this position. A complete applicant file must include letter of application, statement of philosophy and experience, curriculum vitae, and the names, addresses, e-mail addresses, telephone numbers, and fax numbers of five references. To assure full consideration, all material must be postmarked by Monday, October 31, 2000. Email and fax applications received before the deadline will be considered but must be followed by original paper copies.

These copies must be postmarked by Monday, November 6, 2000.

**Send applications to:** Attn: Susan Rutkowski, CBA Dean Search and Screening Committee
Prow's Office, University of Wisconsin - La Crosse
145 Grafe Hall
La Crosse, WI 54601
Fax application to 608/785-6054. E-mail: Susi@uwla.edu

For further information about the position, please direct inquiries to
Dr. Stephen Brokaw, Chair, Dean Search and Screening Committee University of Wisconsin-La Crosse 1725 State Street La Crosse WI 54601 Phone (608) 785-6721. E-mail sbrokaw@uwla.edu

Under Wisconsin Statutes, we are required to provide, upon request, a list of nominees and applicants. Written requests can be addressed to

**MICHIGAN STATE UNIVERSITY**

**DEAN**

**COLLEGE OF AGRICULTURE AND NATURAL RESOURCES**

Michigan State University invites applications and nominations for the position of Dean of the College of Agriculture and Natural Resources.

We offer competitive salaries and benefits as well as a dynamic and collaborative environment.

1. **Provide strategic and visionary leadership** for programs planning the coordination of teaching, research, extension, and graduate programs of the College.
2. **Maintain College accountability** by providing strong strategic planning, leadership, and support for the College.
3. **Provide leadership** in collaboration with other colleges to set university-wide teaching, research, and outreach missions.
4. **Advise and recommend** the strengths and weaknesses of the College to the University President and to the Board of Trustees.
5. **Provide leadership** to the College and the University in the development of new opportunities, affirmative action, and diversity programs in the student body, faculty, and staff of the College.

We hope to fill the position as soon as possible.

**Dr. Kirk L. Hiscox, Chairperson**

Hiscox, Chairperson,Search and Screening Committee, College of Agriculture and Natural Resources, MSU, 450 Administration Building, East Lansing, MI 48824-1021.
**Rhode Island School of Design**

**Vice President for Institutional Advancement**

Rhode Island School of Design (RISD) seeks to recruit a seasoned advancement professional to direct an aggressive institutional advancement program involving both the University and the RISD Museum. Responsibilities include managing a comprehensive fund-raising program, including a major capital campaign, program funding and annual fund initiatives as well as alumni alumni and public relations. The position involves the President on advancement issues and strategic planning initiatives; supervises, manages, and coordinates the work of the advancement staff; provides direction in areas of research, identification, and cultivation of prospects; and solicits prospects with the President, members of the Board, and other key volunteers.

The Rhode Island School of Design in Providence is internationally recognized as the pre-eminent college of visual arts in the United States. Founded in 1877, the school has a long and proud tradition of providing students with a creative and inspirational environment for achievement in Architecture, Design, and the Fine Arts. RISD has been celebrated as one of the top undergraduate and graduate visual arts colleges in U.S. News & World Report and has been included in Peterson's "Top Colleges for Top Students." 2000 students from 55 states and 50 nations have 22 undergraduate majors and 15 Master's degrees from which to choose. RISD's strong relationship with nearby Brown University enhances students' experience, allowing them to enroll in courses at Brown and have access to its extensive athletic and cultural facilities. A truly outstanding feature of the RISD campus is the RISD Museum. Described by The New York Times as "an eloquent teaching museum," it is widely acknowledged as one of the country's finest museums of its size. This Museum's location at the heart of the RISD campus makes it a vital part of every student's education and provides a welcome resource for the people of Providence and southern New England.

The successful member of the President's team will have 15 years of comprehensive fund-raising experience in all aspects of advancement, a proven and demonstrable record of leadership, with experience in supervision and management of professional staff in a college, university or in a comparable field. The position requires superior oral and written communication skills, and intellectual depth, moral integrity, creativity, and a sense of humor.

Qualifications: Applicants should submit a resume and a letter of interest to Steven A. or Katie White, Assistant/Associate Professor of Information Systems to teach information systems courses at the undergraduate & MBA levels. Standard teaching load four courses per academic year. The SOM is attractive to scholars with an interest in interdisciplinary research & teaching. The B.S. in Global Business provides students an opportunity to concentrate in information systems, marketing, financial, management, human resource management or international studies. A Bachelor's in Accounting and /or Postbaccalaureate Certificate in Accounting are also available. MBA programs include on-campus evening, as well as off-campus programs such as the Scottsdale MBA, those offered at local corporations, the ConnectMBA, a dual degree MBA with Thunderbird. Baccalaureate & MBA programs accredited by AACSB. Accountancy Program has separate AACSB accounting accreditation. Required qualifications: Doctorate in information systems or related field; evidence of teaching effectiveness in information systems commensurate with level of appointment; evidence of achievement in scholarship commensurate with level of appointment.

Bring your management expertise to Bentley College, the Business School for the Information Age. Located just west of Boston, we prepare undergraduate, graduate, and continuing education students for technically strong business careers in a global economy.

Assistant Professors
- Strategic Management
- Operations Management

For these tenure-track positions beginning September, 2001, candidates should have completed or be near completion of a doctorate degree, and be dedicated to both teaching excellence and scholarly research. Candidates must also be computer-literate, and able to use information technology in teaching and research.

Move to the forefront of business education with Bentley College. Please send your letter of application and resume to:

Aaron Nutrack, Management Department, Bentley College, 175 Forest Street, Waltham, MA 02452-4705; Fax (781) 891-2896. Or email to: ANUTRACK@bentley.edu

www.bentley.edu
University of Kentucky

PRESIDENT

The University of Kentucky invites nominations and applications for the position of President commencing July 1, 2001. The University of Kentucky is embarking on an ambitious campaign to advance its place among the nation’s top-tier comprehensive research universities through several programs supported by the General Assembly of the Commonwealth of Kentucky, the University, and the people of the Commonwealth. In support of the University’s efforts, in 1988 the Commonwealth created a Research Challenge Trust Fund with $66.7 million that was matched by institutional fundraising efforts for the permanent endowment. As a result, endowed professorships rose in number from 2 to 126. Again in 2000, the Commonwealth appropriated an additional $66.7 million to be matched in a similar fashion.

The University of Kentucky, established in 1865, has a statewide mission and is the Commonwealth of Kentucky’s principal doctoral degree-granting institution. A land-grant institution, classified as a Comprehensive Research I University, offers undergraduate, graduate, and professional programs in agriculture, allied health professions, architecture, arts and sciences, business and economics, communications and information studies, dentistry, education, engineering, fine arts, human environmental sciences, law, medicine, nursing, pharmacy, social work, and multidisciplinary studies. The University has an on-campus academic health center as well as specialized research centers.

Approximately 30,500 students, including 6,000 graduate students and 6,000 community college students, are currently enrolled on the campus located in Lexington. During FY-1999, research awards totaled $118 million in grants and contracts, of which $72 million were from federal sources. The University’s total operating budget during 1999-2000 is in excess of $1.1 billion.

The President is appointed by the Board of Trustees and has authority and responsibility over the administration of the academic and financial operations of the University and for fostering excellence in instruction, research, and service. Candidates should have a record of outstanding achievement in teaching, research, and service; superior leadership skills in management, institutional development, team building, and fundraising; demonstrated commitment to a diverse faculty, staff, and student body. They should be able to provide energetic leadership of the University, to articulate its mission and goals, and to communicate effectively with internal and external constituencies.

Application materials should include a letter of application addressing the attributes noted above, curriculum vitae, and the names, addresses, e-mails, and telephone numbers of at least four references. Review of applications will begin immediately, and will continue until a new president is selected. Names of potential candidates will be confidential.

Nominations, applications, inquiries and expressions of interest should be forwarded, in confidence, to:

New Rochelle, New York 10801
www.iona.edu

Applications will be accepted until December 1, 2000.
HEAD, DIVISION OF SOCIAL SCIENCE

Truman State University invites applications and nominations for the position of the Head of Division of Social Science. The Division has 79 full-time faculty and 4 staff serving about 1100 undergraduate majors in economics, history, justice systems, philosophy, and religion, political science, psychology, and sociology/anthropology degree programs. The Division also serves Truman’s 6000 undergraduate students by providing courses in various modes of inquiry for the Liberal Studies Program (LSP). The Division also offers graduate programs in history and counseling.

The Division Head is the academic leader and administrator, whose duties are all-encompassing and include responsibilities similar to a dean and a department chair in more traditional university administrative models. Academic Affairs at Truman consists of 11 academic divisions, 8 of which grant degrees in 43 undergraduate and 9 graduate programs. A Division Head leads each division, reporting directly to the Vice President for Academic Affairs. Truman’s unique administrative structure emphasizes interaction among faculty, students, and administrators. The Division Head must have an institutional perspective and support the University’s mission as a public liberal arts and sciences institution. The salary is commensurate with the responsibilities required.

RESPONSIBILITIES INCLUDE:

- Supporting and promoting student learning and high achievement in the context of a public liberal arts and sciences university
- Providing leadership for the Division and serving as an advocate of Division needs and programs
- Ensuring Division support for LSP
- Ensuring academic rigor and high standards in the Division’s degree programs
- Supporting University and Division assessment by disseminating and using data in decision-making by faculty, staff, and students
- Supporting faculty in research, professional development, intellectual contributions, and their collaboration with students
- Administering the Division budget
- Recruiting, hiring, and evaluating recommendations for tenure, promotion, and reappointment of Division faculty
- Supporting the recruiting and retention of high ability students
- Establishing and maintaining relationships with external constituencies

QUALIFICATIONS:

- Ph.D. in a field represented in the Division and an overall academic record that reflects a strong liberal arts background
- Substantial experience as a classroom teacher
- Significant contributions to scholarship
- Excellent interpersonal skills and the ability to work cooperatively, building consensus in decision-making
- Administrative experience and potential to lead and work with faculty
- Understanding of and commitment to issues of diversity

Truman State University is Missouri’s statewide, highly selective, public liberal arts and sciences university. Truman is located in Kirksville, a community of over 17,000, a 3-hour drive from Kansas City, St. Louis, and Des Moines. The University is consistently recognized as one of the nation’s best educational values. Truman was recognized by U.S. News & World Report as the number one public university in the Midwest. It was recently selected as one of the top 100 best college buys by America’s Best College Buys 2000. The New York Times in its January 1, 2000, special millennium edition listed Truman as one of five institutions “that higher education experts expect to be on the cutting edge.” Truman’s 1999 entering freshmen class had an average ACT of 27 and a 3.7 GPA. In addition, 46 percent of the freshmen were in the top 10 percent of their high school classes and 99 percent of the class had some high school leadership experience. Truman has received national recognition for its institutional assessment program, nationally competitive student body, excellent undergraduate programs, and overall effectiveness as an institution.

Interested candidates should submit a letter of application, current vita, a statement of educational and administrative philosophy, and complete undergraduate and graduate transcripts. Candidates should provide a list of names, addresses (including e-mail), and phone numbers of no fewer than four people who may be asked to forward three confidential letters of reference directly to the University.

Application materials should be sent to:

Gary L. Gordon
Vice President for Academic Affairs
Truman State University
McCown Hall, 203
100 East Normal Street
Kirkville, MO 65301

Screening of complete applications will begin October 2, 2000 and continue until a candidate is hired.

The anticipated appointment date is July 1, 2001.

ASSOCIATE DEAN OF ACADEMIC AFFAIRS

Academic Support Services and Faculty Development

DEAN

The Lally School of Management and Technology
Rensselaer Polytechnic Institute - Troy, New York

Applications and nominations are invited for the position of Dean of the Lally School of Management & Technology at Rensselaer Polytechnic Institute www.rpi.edu.

This position offers an opportunity for significant impact. The Lally School offers a strong intellectual foundation in Innovation and Technological Entrepreneurship on which to build and has aggressive objectives for growth in terms of size, stature and prominence in the global community of business schools. The Lally School is well positioned to leverage technical strengths throughout Rensselaer.

The Dean will join a broad new leadership team at Rensselaer, which has adopted a bold new strategic vision with the overall goal of being a world-class technological research university with global reach and global impact. The Dean will play a major role in developing this vision, including participating in the upcoming capital campaign and in exploring growth opportunities that build on the Lally School's core strengths in management and technology.

Rensselaer is a private, coeducational, technological university consisting of five schools with approximately 4,500 students. There are 4,500 undergraduates and 2,200 graduate students at the main campus in Troy, NY, and an additional 2,200 graduate students in Hartford, CT and another 1,000 working pre-service students participating through distance education.

Review of applications will begin August 25. Materials and inquiries should be directed to William C. Jennings, Chair, Lally Dean Search Committee, Rensselaer Polytechnic Institute Center for Industrial Innovation, Room 4011, 110 8th Street, Troy, NY 12180-3590; Phone: 518-276-4925; Fax: 518-276-4002; Email: wjennings@rpi.edu http://www.rpi.edu/lally/management/academics/dean/ld.html

Heidrick & Struggles, Inc. is assisting in the search. Inquiries may also be made in confidence to William J. Bowen, Vice Chairman, Heidrick & Struggles, Inc., 233 S. Wacker Drive, Suite 7000, Chicago, IL 60606-6402; Phone (312) 496-1794; Fax (312) 496-1846; e-mail: wjb@hs.com

Rensselaer Polytechnic Institute is an Equal Opportunity/Affirmative Action Employer.

LOYOLA MARYMOUNT UNIVERSITY
Openings for 2001-02

Loyola Marymount University is currently seeking applicants for the following faculty positions within the College of Liberal Arts, which will be available in the Fall 2001. All positions listed are tenure track and at the Assistant Professor level. Salaries are competitive and commensurate with background and experience.

HISTORY. Two positions available. (1) Medieval History, 500-1500. Emphasis is on Medieval continental Europe (excluding England). Desired topics of specialization include one or more of the following areas: Germanic, French, the Low Countries, Northern and Eastern Europe. All fields in the recommended areas of medieval history are welcome, including cultural, political, religious, social, gender, and economic studies. Teaching responsibilities include survey courses in Western Civilization. Teaching load is nine hours per semester; Ph.D. is required. Send letter of application, curriculum vita (including e-mail address), academic transcripts, three letters of recommendation and evidence of teaching ability and research/publication potential to Dr. Lawrence A. Tritle, Search Committee Chair, History Department, MC-8415. Application deadline is November 8, 2000. (2) Modern Asia. Emphasis is on modern Asia (19th and/or 20th centuries); preferred areas of specialization are China and Japan. Teaching responsibilities include survey courses in Modern Asian and, recommended but not required, Western Civilization after 1400 or the Asian Diaspora. Teaching load is nine hours per semester; Ph.D. is required. Send letter of application, curriculum vita (including e-mail address), academic transcripts, three letters of recommendation and evidence of teaching ability and research/publication potential to Dr. John H. Grever, Search Committee Chair, History Department, MC-8415. Application deadline is November 8, 2000.

THEOLOGICAL STUDIES. Position available in Pastoral Theology; Faith and Culture, with practical experience in multicultural ministry, particularly Hispanic ministry. Position involves commitment to both graduate and undergraduate teaching as well as educational pastoral leaders in the largest Catholic Archdiocese in the U.S. The department, in addition to undergraduate majors and minor programs, also offers Master of Arts degrees in pastoral studies and systematic theology. Ph.D. is equivalent is required. Send three letters of recommendation to the Department of Theological Studies, Loyola Marymount University, 7900 U.S. 101, Los Angeles, CA 90045-8316 (MC-8000 as indicated).

Special emphasis is placed on teaching effectiveness, scholarly achievements, and service to the University for purposes of reappointment, tenure and promotion consideration. LMU offers faculty-housing assistance. Women and Minorities are strongly encouraged to apply.

Loyola Marymount University, located in Los Angeles, California, is an Equal Opportunity/Affirmative Action Employer.

LOYOLA MARYMOUNT UNIVERSITY
George Mason University

SPONSORED PROGRAMS

Director

George Mason University has an immediate opening for a Director, Office of Sponsored Programs (OSP). The current director has accepted a new assignment in the University. The Director administers a rapidly growing sponsored program portfolio of more than $40 million annually. With a staff of 25 organized in multifunctional teams in support of clusters of academic units, the Director, OSP manages all aspects of both pre- and post-award grants and contracts administration, including management of cash and accounts receivable. The Director reports to the Vice Provost for Research, and is accountable for financial matters to the Senior Vice President. In addition to OSP administration, the Director develops and recommends GMU policies affecting the growth and operations of sponsored programs, assists and encourages faculty in the pursuit of funding opportunities, negotiates and executes contracts and grants for the University, ensures University accountability for the expenditures of funds in compliance with pertinent policies and regulations, and participates actively in related professional associations.

This position is a 12-month administrative faculty position. It requires a minimum of an accredited undergraduate degree and five to ten years experience in grants administration in a college or university, or equivalent experience in other settings.

GMU is a public university of the Commonwealth of Virginia, located in Fairfax, Va., the center of the burgeoning high-technology Northern Virginia community, fifteen miles directly west of Washington, DC. Its enrollment is approximately 20,000 students, of whom 45 percent are enrolled in graduate, professional and other post-baccalaureate programs. GMU awards more than 125 doctoral degrees annually in a dozen disciplinary and interdisciplinary fields. Bread area with special emphasis in sponsored activities include information technology, computational sciences, public policy and law, applied social sciences, nursing and health sciences, and educational research.

Review of applications will begin September 1, 2000 and continue until the position is filled. Please send nominations or letters of application (include vita and names of three references) to:

Chancellor,
Bloomington Campus
and Vice President for
Academic Affairs

Indiana University invites applications and nominations for the Chancellor of the Bloomington Campus and Vice President for Academic Affairs. Indiana University, Bloomington, Indiana University, founded in 1820, has a total enrollment of 93,000 students. The Bloomington campus is the largest of the campuses, enrolls 27,000 undergraduates and 7,500 graduate students. Indiana University Bloomington is committed to creating a Research 1 University and a member of the Association of American Universities.

This individual reports directly to the President. The position carries dual responsibilities as the Chancellor of Bloomington campus and the Vice President for Academic Affairs in the system-wide university. Qualifications of the Campus Chancellor

Bloomington Chancellor

The Chancellor is the chief operating officer of the Bloomington campus of Indiana University and oversees planning for the campus and its programs. The position has direct responsibility for campus academic and non-academic programs. The Chancellor has responsibility for recommending decisions about campus tenure and promotion to the President; recommends to the President the appointment of campus deans and directors and supervises regular reviews of their performance; and administers budget allocations for academic and non-degree-granting units of the campus. The Chancellor is responsible for many service operations and is expected to maintain a close working relationship with campus deans, faculty staff members, and their respective organizations. By interacting with members of the surrounding community as well as with local and state officials, the Chancellor helps to build the institution into a part of the community.

Vice President for Academic Affairs

The Vice President for Academic Affairs is responsible for providing direction and guidance on academic matters to campus chancellors and vice chancellors, for coordinating the conduct of academic program reviews, for reviewing new proposals for academic programs and for acting as liaison to the Board of Trustees and the Higher Education Commission on academic matters. He/she reviews promotion and tenure dossiers from all campuses and makes recommendations about them to the President.

Qualifications

The successful candidate will have a well-established record of administrative excellence, excellent administrative experience at a major research university, a deep commitment to faculty governance, and ability to communicate effectively with faculty, staff, and students. He/she must have a strong understanding of the importance of promoting a diverse university community. He/she must be experienced in budget preparation and management issues. Qualifications include a PhD and a background in the liberal arts; experience in the academic setting is essential.

Applications and nominations will be accepted until the position is filled. To assure optimal consideration, interested individuals are encouraged to submit their materials by the end of September. Please address all correspondence to:

R. William (Mills) Fink
National Managing Director
Kearney-Ferry International Education Partnership
500 N. Akard
5252 Lincolnn Plaza
Dallas, Texas 75267

Indiana University is an equal opportunity/
ASSOCIATE DEAN AND DIRECTOR OF ADMISSIONS

An exciting opportunity exists for a chief admissions officer to join Northeastern University School of Law. The successful candidate will develop and implement a strategic enrollment plan for the School of Law; create marketing strategies; manage admissions office staff and process; develop, implement and assess systems for data collection and record-keeping; develop admissions protocols; regularly assess efforts to meet enrollment goals; and represent the law school in various external forums. Qualifications: J.D., M.B.A. or other appropriate advanced degree required. Six to eight years of progressively more responsible experience in either a higher education administrative setting (preferably an admissions or law school setting) or the same number of years' administrative and marketing experience transferable to a law school admissions setting; strong leadership, organizational and managerial skills; proven marketing track record, well-developed computer database experience; ability to analyze large volume of quantitative data; high energy and ability to market the school to diverse audiences; demonstrated commitment to and experience in a diverse work environment. Northeastern University School of Law has a unique and innovative program. We are the only co-operative legal education program in the country, and we graduate students who have had a full year of legal practice. We are non-competitive in that we do not have grades, class rank or law review. We value and embrace diversity in our student body and in our curricular offerings, and we have a strong commitment to social justice and public interest law. We are located near Boston's South End, adjacent to the Museum of Fine Arts. Send letter of interest, resume and three references to Diane L. Tsoulas, Associate Dean, Northeastern University School of Law, 400 Huntington Avenue, Boston, MA 02115. Applications received by September 5, 2000 will be given full consideration. Northeastern is an Equal Opportunity/Affirmative Action Title IX Employer. Minorities and women are strongly encouraged to apply.
ABE/GED INSTRUCTORS
INSTITUTE FOR EXTENDED LEARNING
AIRWAY HEIGHTS CORRECTION CENTER

President-Superintendent
Cerritos College
Norwalk, California

The Board of Trustees of Cerritos College invites applications and nominations for the position of President-Superintendent.

Cerritos College, a comprehensive community college, is a one-college district enrolling nearly 23,000 students on a 140-acre campus. Located in southeast Los Angeles County, bordering both the city of Long Beach and Orange County, the college district encompasses eight cities. Cerritos College has more than 1600 full- and part-time employees, and an annual budget in excess of $10 million. The college prides itself on being one of the most ethnically diverse community colleges in the nation and on being the most technologically advanced community college in the state for teaching and learning. A model of effective shared governance and collegiality, Cerritos College is one of only three California community colleges without a unionized faculty.

The presidency of Cerritos College offers an attractive opportunity to guide a dynamic college that is well positioned to continue as one of the flagship community colleges in California. The successful candidate will embrace this ethic and provide the leadership that guides the college in its quest for excellence.

Applications Deadline: 10/15/06
Assistant Dean of the College/Director of Academic Advising

Agnes Scott College invites applications for the position of Assistant Dean of the College/Director of Academic Advising. This position monitors academic procedures and policies in academic standards, and develops and supervises academic advising. Primary responsibilities include assisting the Dean of the College in the supervision and further development of the academic advising system, working with students and faculty to ensure that policies and procedures in academic standards are followed, monitoring students on academic probation, coordinating cross-registration program, analyzing transfer credit for all incoming students, and advising joint enrollment students, and administering applications for special topic courses, independent studies and internships, and disseminating information concerning graduate scholarships, fellowships and graduate studies.

Requirements include: Graduate degree in an appropriate field required, minimum of five years experience, considerable knowledge of graduate fellowships, scholarships, and studies, academic standards, and student concerns and values, proficiency in managing a diverse group of projects, interacting with a variety of personalities and working with students, mastery of public speaking, ability to manage multiple tasks simultaneously, excellent interpersonal communication skills, both written and verbal, and demonstrated ability to work independently and to maintain confidentiality.

Send letter of interest, resume, and the names of three professional references and salary requirement to Office of Human Resources, Agnes Scott College, 141 East College Avenue, Atlanta/Decatur, GA, 30036-3797. Review of submitted materials will begin immediately.

Agnes Scott College is a highly selective, independent liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott's curriculum encourages students to become fluent across disciplines, across continents and across centuries. Founded in 1889 by Presbyterians, Agnes Scott is a diverse and growing residential community of scholars with one of the largest endowments per student of any U.S. college or university.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age, sexual orientation or disability in its employment. An Equal Opportunity Employer.

SUNY EMPIRE STATE COLLEGE
VICE PRESIDENT FOR ACADEMIC AFFAIRS

SUNY Empire State College invites nominations and applications for the position of Vice President for Academic Affairs. Founded in 1971 with a mandate to serve all of New York State, ESC is recognized as a world leader in designing and delivering programs that meet the academic, personal and professional goals of more than 10,000 students each year. These students, mostly working adults, enroll in associate, baccalaureate, and master’s programs through 46 locations across New York State, several international sites and at a distance.

ESC provides degree programs in business, human services and the arts and sciences that begin with the educational goals and interests of individual students. Degrees are earned through individual and group study, distance learning, tutorials, evaluated experiential learning and the transfer of credit from prior college experience. Offering the latest in learning technologies as well as faculty mentors and students working-together one-to-one, Empire State College remains a true innovator in delivering high-quality education to its diverse students. ESC has 600 full and part-time faculty and staff.

The Vice President for Academic Affairs reports directly to the President, and is responsible for the academic program, including ensuring its high quality; the development of new program initiatives; the formulation and implementation of academic policies and procedures; the development, support, and evaluation of faculty; and effective leadership within an educational community that values shared governance. With the President, the VPAA and three other vice presidents (administration, educational technology, and external affairs) are responsible for collegewide leadership and integrated planning.

Candidates should have a background of significant college-level teaching, senior administrative and program development experience, and appropriate credentials including an earned doctorate or its academic equivalent.

For additional information, please visit the College's web site (www.esc.edu). Further material on this search can be found at (www.esc.edu/vpaaesearch).

The Search Committee will begin consideration of applications after August 15, 2000. Please send letter of application and résumé to:

VPAA Search Committee
Office of the President
SUNY Empire State College
1 Union Avenue
Saratoga Springs, NY 12866

Empire State College is an equal opportunity employer and encourages the nomination and candidacy of women and persons of color.

2001/02 Tenure Track Position in Spanish
California State University, Sacramento, CA 95819-6087
Department of Foreign Languages
Assistant Professor of Spanish, Fall 2001

Assistant Professor of Spanish, tenure track, appropriate doctoral degree required. Successful candidate will have a broad training in Spanish, including the ability to teach Spanish linguistics and composition/grammar classes. Ability and willingness to work with a diverse student body; ability to teach a language other than Spanish, while not required, will be considered positively; native or near-native fluency in Spanish and English.

Salary Range: $44,000 to $58,000. Review of applications will begin on February 1, 2001 and continue until the position is filled. Applications received after March 15 will not be considered for this hiring cycle. Send application letter, CV and names and telephone numbers of three references to Prof. Lewis Robinson.
AGNES SCOTT COLLEGE

THE WORLD FOR WOMEN

DIRECTOR OF INTERNATIONAL EDUCATION

Agnes Scott College is seeking a highly qualified, experienced candidate for the position of Director of International Education to develop, implement, and direct academic international programs. Primary responsibilities include: coordinating Global Awareness, Global Connection, study abroad, international student and faculty exchange programs, and coordinating the appointment of foreign language teaching assistants, and advising international and domestic students.

Qualifications: A master's degree required, additional degree preferred; minimum of three years' managerial experience in international programs (study abroad and international student advising), considerable knowledge of international study programs and regulations; proficiency in modern office procedures and software; mastery of managing a diverse population, and working with a variety of people and personalities; strong written and verbal communication skills, international/intercultural experience and organizational skills, demonstrated ability to speak a minimum of one foreign language, work well with students and faculty, manage multiple tasks simultaneously, and maintain confidentiality, and college-level teaching/scholarship record.

Agnes Scott College offers competitive salaries and a comprehensive benefits package.

Application Process: Send a letter of application, resume, and the names of three professional references to: Office of Human Resources, 141 E. College Avenue, Atlanta/Decatur, Georgia 30040-3799. Review of submitted materials will begin immediately.

Agnes Scott College is a highly selective, independent liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott's curriculum encourages students to become fluent across disciplines, across countries, and across centuries. Founded in 1889 by Presbyterians, Agnes Scott College is a diverse and growing residential community of scholars with one of the largest endowments per student of any college in the country.

DIRECTOR OF MARKETING

SUNY Empire State College, a national leader in nontraditional adult higher education, seeks a highly organized, creative and energetic individual to join our advancement team as director of marketing.

The director of marketing is responsible for the design and implementation of a comprehensive marketing program for the College. The director will: (1) develop an image awareness campaign to position the College as a "brand"; (2) undertake market research, including environmental scanning and applications of geodemographic clustering; (3) be responsible for advertising placements and all other marketing initiatives throughout the state; and (4) implement strategies to present the College effectively on the WWW. The director works closely with the dean's and outreach and recruitment professionals at regional centers and reports to the Director of College Relations.

Qualified applicants will have a minimum of five years of marketing experience; a bachelor's degree in marketing or related field; strong organizational skills; advertising placement experience; superior writing and editing skills; strong interpersonal abilities; and experience using databases and spreadsheets.

The position is based at the College's Coordinating Center in Saratoga Springs. Salary is dependent on experience (probable range of $37,450.00). Applications will be accepted until the position is filled, with the search committee beginning its review on August 1. Letter and resume to: Kirk Starczewski, Director of College Relations, SUNY Empire State College, One Union Avenue, Saratoga Springs, NY 12866. E-mail: kirk.starczewski@esc.edu.

CONFERENCES
Hispanic Association of Colleges and Universities 59
I PUNTO FINAL!

CELEBRATING BILINGUALISM

Higher education institutions in the United States have always had difficulty recruiting minority faculty; academic libraries are no exception. But efforts are underway. The American Library Association, for example, annually provides Spectrum Scholarships to 50 minority graduate students to ease the cost of a master’s degree in Library/Information Science. Many state library organizations offer similar scholarships to minorities.

In March 1999, Hispanics were about 11.7 percent of the U.S. population. And in 1998, only 1.8 percent of academic librarians were Hispanic, according to an ALA survey. This is an appallingly low number.

Not only are there few Hispanic librarians; there are fewer who speak Spanish. As the Spanish-speaking population grows, the need for bilingual librarians grows. Academic libraries are in the business of serving the information needs of the patrons who access the library, physically or virtually. Many are open to the public. Must that service always be in English?

Usually, only U.S. librarians attend the ALA conference. Last January, in San Antonio, the conference theme was “Building International Library Communities.” Librarians attended from ten Latin American countries. We were able to meet them and compare how our library issues were similar or different. My nametag read, “Yo hablo español.” Many people were afraid to approach me, not realizing that I speak English. Once they noticed from my nametag that I am from the U.S., or once I spoke to them in English, they relaxed and smiled.

Since we are a Euro-based culture, many U.S. citizens think that all people speak English as a “universal language,” including all immigrants. The reality is that most come to this country unable to speak this “universal language,” or with limited fluency. Given the proximity of Latin America to the U.S., many immigrants speak Spanish as their first, or even second, language. Speaking a foreign language is intimidating, and, to most of the world, English is a foreign language. After learning Spanish and German in school, I was terrified to speak either for fear of making a mistake or appearing foolish. I have learned, however, that most people are thrilled when at least I try.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.

Endowed Professorship in Families and Communities

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for the Verna Houck Motto Professor in Families and Communities. The position involves primary responsibility for providing research leadership to the School's program on Community Initiatives for Families and Young Children, with secondary responsibility for teaching and service in the master and doctoral programs. The community initiative is a collaborative effort to promote and improve effective parenting, healthy children, and quality of child care in order to assure the well-being of all children from birth to 5 years of age in Cuyahoga County, of which the City of Cleveland is part. This community initiative will provide the Motto Professor with an urban community laboratory from which to conduct research and develop scholarship.

Requirements include a Ph.D. in social work, or a related social science or public policy field. A Master's degree in Social Work is preferred. Candidates should possess a record of scholarship, teaching, and service for appointment at the Senior level. The ideal candidate must also have demonstrated leadership abilities in the development and management of research programs, capacity to integrate qualitative and quantitative skills, ability to present evidence to local and national audiences inside and outside the academic community, and experience supervising dissertations.

Applicants must submit a curriculum vita and five references. Please send applications or nominations to:

John Yankey, Ph. D., Professor
Verna Houck Motto Professorship Search Committee
Mandel School of Applied Social Sciences
Case Western Reserve University
10900 Euclid Avenue
Cleveland, Ohio 44106-7164
E-mail: jay@p.css.edu

Applications will be accepted until the position is filled.

Faculty Position

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for a tenure track faculty position at the Assistant or Associate level. The emphasis of this position is qualitative methods and applied social science research. The position involves primary responsibility for teaching the doctoral program, teaching courses in both quantitative and qualitative methods and statistics and serving on dissertation committees, and secondary responsibility for research and service in the Master's program. The position also requires a Ph.D. in social work, or a related social science or public policy field. We are interested in individuals who are committed to the field of applied social science research and have demonstrated skills in research and teaching in the social sciences. Candidates should have the ability to develop, maintain, and fund a program of applied research. The ideal candidate should have a solid understanding of the funding community and be able to identify opportunities for new partnerships.

Applicants must submit a curriculum vita and five references. Please send applications to:

Vlad K. Groza, Ph.D., Professor
Associate Dean for Research and Training
Mandel School of Applied Social Sciences
Case Western Reserve University
10900 Euclid Avenue
Cleveland, Ohio 44106-7164
E-mail: vkg2@p.css.edu

Applications will be accepted until the position is filled.

Endowed Professorship in Anti-Violence

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for the Dr. Semj J. and Ruth W. Begun Professor in Anti-Violence. The position involves primary responsibility for leading the newly established Begun Center for Anti-Violence Research and Education, with secondary responsibility for teaching and service in the Master's and Doctoral programs. The goals of the Center include: (1) building interdisciplinary academic partnerships to research and address the causes and effects of violent behavior; (2) continuing advanced research in state-of-the-art technology to create a system of identifying "at-risk" populations; establishing active networks among parents, educators, and key community constituencies to effectively intervene in the cycle of violence; and (4) building on existing curricula that address the persistent and emerging social issues associated with youth violence. The Professorship will be co-terminus with a Director of the new Center.

Requirements include a Ph.D. in social work, or a related social science or public policy field. The Director will lead and manage all Center activities, including grant writing, advocacy, and technical assistance. The Director must be considered an expert in the field of violence prevention and have made significant contributions to the literature. As such, candidates should possess a record of scholarship, teaching, and service for appointment at the Senior level. The Director will be responsible for soliciting ongoing funding for the Center's programs and initiatives. The ideal candidate should have a solid understanding of the funding community and be able to identify opportunities for new partnerships.

Applicants must submit a curriculum vita and five references. Please send applications or nominations to:

Darlene Bailey, Ph.D., Professor and Dean
Dr. Semj J. and Ruth W. Begun Search Committee
Mandel School of Applied Social Sciences
Case Western Reserve University
10900 Euclid Avenue
Cleveland, Ohio 44106-7164
E-mail: msassdirector@p.css.edu

Applications will be accepted until the position is filled.

Faculty Position

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for a tenure track faculty position in community clinical practice. The position focuses on teaching in the mental health, aging, and community clinical practice. The position involves primary responsibility for teaching the Master's degree in Social Work with two years, or more, post-master's practice experience. The candidate should have a background and experience in community-based practice, development theory, and the application of theory to practice and research. The candidate should also have the capacity to develop, maintain, and fund a program of research.

Applicants must submit a curriculum vita and five references. Please send applications to:

Paul Adams, Ph.D., Professor
Associate Dean of Academic Affairs
Mandel School of Applied Social Sciences
Case Western Reserve University
10900 Euclid Avenue
Cleveland, Ohio 44106-7164
E-mail: pia@p.css.edu

Applications will be accepted until the position is filled.

The Mandel School of Applied Social Sciences currently offers Master's and Doctoral degrees to over 300 students. We offer joint degrees in Social Work and Law, Social Work and Business, Social Work and Nonprofit Management, and Social Work and Economics. Our faculty is multidisciplinary, representing various disciplines such as social work, psychology, sociology, public health, economics, and education. We have secondary appointments with other departments and have collaborative projects with other departments. The School has a long history of community-based research, and we have major roles in these initiatives, such as the Center on Urban Poverty and Social Change in the Cuyahoga County Community Mental Health Institute.

MSASS is a non-profit organization that integrates professional social work education, research, and service to promote social justice and empowerment in communities through social work practice, social policy, research, and internationalization.
Websites Help for Classroom Teachers

BY GUSTAVO A. MELLANDER

As we look forward to a new
year, it is good to be able to
identify a few more
Washington-based websites that can
help the classroom teacher. In our
ever-expanding information-laden
electronic age, there are websites ad
infinity with useful suggestions
and communication links so we can
all learn from one another, regard-
less of how many miles separate us.

Sometimes it appears there is too
much information about and on the
Internet. Nonetheless, one has to
remain open to new learning possi-
bilities. I have selected a few new fed-
ernally funded ones. They have a
particular emphasis on civic education
and how Congress operates, but in
reality, they provide more than that.

CongressLink

The CongressLink Communicator,
http://www.congresslink.org, pro-
vides educators with news about
CongressLink and ideas for using the
site to enhance civic education and
improve understanding of Congress.

The Dirksen Congressional
Center, http://www.pekin.net/dirksen,
provides similar data plus useful
information for classroom
teachers, including lesson plans
and suggestions on how to incorporate
technology in the classroom.

CongressLink's Message Board

The Message Board provides oppor-
tunities to communicate with col-
leagues nationwide, indeed worldwide.

CongressLink's Message Board is
free and open to faculty and students
to share their questions, ideas, and
work. Educators are welcome to post
lesson plans or to brainstorm about
how to use CongressLink in their
classrooms. Further, if a student in
your class creates a project with
CongressLink, you can give her visual
recognition by posting her work
on the Board. Your class can also use
the Message Board to communicate
with CongressLink's Experts Online
for advice and guidance.

To reach the Message Board, go
http://www.congresslink.org/com-
 munications.html and follow the
instructions.

Further instructions are available
through the "Communications" page
by clicking on "CongressLink Message
Board Orientation." Once you have
signed on to the Message Board, the
"Help" option is also very useful.

Online Scavenger Hunts

If you are looking for a differ-
ent way to introduce students to
Congress, the Constitution, or the
CongressLink site, try the
CongressLink Student Scaveren
org/scavengerstudents1.html.

This activity consists of 20 ques-
tions from "How many articles are
there in the Constitution?" to "Which
body of Congress impeached
President Clinton?" All answers
can be found on CongressLink or one of
its related websites. By completing
the Scavenger Hunt, students learn
content basics and are taken on a
tour of CongressLink.

CongressLink has a scavenger
hunt for faculty members too—at
http://www.congresslink.org/scav-
engerteachers1.html. The object of
the activity is not just to find the
right answers but to explain how
you found them as well. If you are a
new CongressLink user, or if you
would like to learn more about the
site, the faculty version of the Hunt
will lead you through numerous
resources and will show you many of
CongressLink's highlights.

The Robert H. Michel Civic
Education Grants

This is the second year of a new
grants program designed to help
teachers, curriculum developers,
and others improve the quality of
civics instruction. Its priority is the
role of government in our federal
government. Areas of interest include
designing lesson plans, creating
student activities, and applying instruc-
tional technology in the classroom.

A total of $40,000 is available
annually. The emphasis is on prac-
tical classroom applications that can
be replicated at other institutions.

Community college faculty and
college and university faculty are
eligible to apply, as are teacher-led
student teams and individuals who
develop curricula. Institutions and
organizations are not eligible.

Types of projects that qualify
for consideration are: lesson plans
or student activities based on civic
education websites; projects that
incorporate historical materials
about Congress and instructional
technology; activities that identify
additional resources for the teaching
of civics, multidisciplinary
strategies, simulation exercises,
curricular reform efforts, and uni-
versity-level methods curriculum.

The Center's website at http://
www.pekin.net/dirksen/micheled-
grants.html lists all grants made in
1999, providing insight into the types
of projects likely to be funded.

To apply, submit a preliminary
proposal in the form of a letter or e-
mail message. Visit the Center's
site for complete information on
proposals. Preliminary proposals
may be submitted at any time; final
awards will be made in March;
but not more often than quarterly.

Expanding the Lesson Plan
Library

CongressLink currently offers
free library of twelve lesson plans,
videos, and teaching ideas. The
Center occasionally will add new
plans for the site, but prefers to
include those written by teachers.
You are encouraged to send in best
ideas. CongressLink hopes to help
expand the list. The following guidelines are suggested:

1. Incorporate CongressLink
   your lesson to the greatest degree
   possible.

2. Follow the CongressLink
   lesson plan template, using Blue
   Taxonomy http://www.congress
   link.org/lessontemplate.html.

3. If possible, make a basic
   resource that can be modified
   and shared with others.
   Your project should not be
   created

4. E-mail questions, lesson
   ideas, and completed lesson
   plans to femackaman@pekin.net.

It might not be a Braver
World, but it is certainly a diffi-
cult world from the one when
we started teaching.

G. Mellander is a professor,
George Mason University.
Internet Roundup

Apartment Rentals near Campus to Free Videos—via the Web

BY MARILYN GILROY

With its endless websites, the Internet now offers the Hispanic community an array of dot-com addresses dedicated to providing news, information, goods and services, and entertainment.

Educators, too, will find a wealth of information and tools for enhancing instruction that have sprouted on the Web this year.

Some of these sites are advertiser-supported; others have special services that are subscription-based but still contain a lot of accessible information through introductory homemades and links.

Since even the most knowledgeable Web surfers can miss the latest developments, The Hispanic Outlook offers this alphabetical roundup of sites worth checking out.

Applauso.com

A Latin music and entertainment site in English, Spanish, and Portuguese featuring new bands and artists, industry news, information and reviews, artist sites, celebrity chats, and the ability to download music, create custom compilations, and purchase CDs and DVDs online. Two of its founders are Julio Iglesias and Don Francisco. The site provides options from rock en Español to tropical and from telenovelas to movies.

Blackboard.com

A site for creating and taking online courses. By using the site's platform software, instructors can add an online component to their classes or develop an entire course online.

The software is very user-friendly and includes components that enable institutions to integrate all of the academic and administrative functions that are necessary in online learning environments.

EVCinc.com

Offers courses and degree programs via two-way video and audio on the Internet. This technology allows professors to see and hear students at different locations—live, interactively, and in real-time. Working accredited universities such as St. John's and Adelphi, EVC offers...
undergraduate and graduate degree programs and 1,000 courses, ranging from liberal arts to engineering. It also offers test preparation courses, licensing and certificate programs, and executive training seminars.

**FreeWorksheets.com**

The goal of this website is to improve children's learning, increase their knowledge, and reinforce skills by offering thousands of free educational worksheets to print or download and save. Worksheets are categorized by subject, including science, phonics, math, social studies, language arts, reading, history, animal subjects, and more. Primarily used by teachers, parents and homeschooling families.

**hispanicvista.com**

Primarily a news and information service, Hispanicvista provides original editorial content, full news stories, and online breaking news. Its slogan is "Tu punto de vista" (your point of view), and its focus is just that—to present the Hispanic point of view on all issues. It recently launched Mexicovista.com, which is dedicated to the coverage of Mexico and the border.

**¡HolaMujer!®**

Established this year as a bilingual online network for English-speaking Latinas. Its magazine-like format includes content related to beauty, health, career, education, fashion, travel, and shopping.

**KnowledgeFirst**

KnowledgeFirst.com is a site for students and parents that helps members of its online community obtain educational funding information.

Users can comparison shop with different lenders and find out how to apply for, manage, and repay loans online. KnowledgeFirst facilitates the processing of loan applications by linking lenders, schools, and grant agencies, thus accelerating the processing cycle time and hastening the availability of loan funds to schools and students.

**LatinoLink**

Launched in 1995, LatinoLink was the first news magazine for Latino on the World Wide Web. The current site, featuring original staff articles supplemented by information culled from national dailies and wire services, contains sections on news, arts and entertainment, sports, business and finance. It also offers links to various e-commerce sites and offers free e-mail, bulletin boards, and a members-only service for meeting Hispanic professionals online.

**LatinVenture**

LatinVenture.com is a New York-based company founded by Latin entrepreneurs for Latin entrepreneurs and the international venture capital community with the intention of promoting the formation of new high-tech enterprises focusing on the Spanish- and Portuguese-speaking world. Helps new media businesses find funding by matching them with potential investors.
An education technology company that provides K-12 schools with a comprehensive menu of Internet-based tools for use by students, parents, and teachers. Tools include an interactive calendaring system, online registration for school activities, school related e-commerce, access to homework and progress reports, individualized assignments, and lines to real-time Webcams at school events. Learning Pays supplies schools with application software, system analysis and installation services, hardware, customer service and support, and training and assistance in securing funding via grants.

A site for learning language through the immersion methods, Parlo.com offers interactive and conversational courses that can be used by students on their own or as a supplement to classroom instruction. The founders believe that the best way to achieve language fluency is to surround a student with language experiences and the sites and sounds of a new culture. On this site, students can converse with others at their same level and also have access to magazines, newspapers, music, and games to help them learn. Languages offered include English, French, and Spanish.

An online credit and personal finance company providing information and interactive content in both English and Spanish. Through the credio.com link, it provides resources to help Hispanics build and manage their credit needs and provides a variety of credit products and services including access to mortgage loans, credit cards, auto loans, home equity loans, and student loans. Founded in 1998, it also includes a search engine, free-mail, news feeds, worldwide weather message boards, games, and maps.

This site is dedicated to promoting diversity in the workplace through the employment and promotion of Hispanics. It offers free resume posting for job seekers, recruiting activities such as online job fairs, and profiles of Latin role models who serve on boards of Fortune 500 companies and in other prestigious positions. It is the companion website to Saludos Latinos, a bilingual magazine that has been published since 1997.

A virtual learning assistance center where students can get additional support via tutors and academic resources. Students can participate in drop-in study sessions, pre-scheduled tutoring, and an online virtual classroom. They can be connected to independent study resources, such as text books and online textbooks. Piloted in the Spring 2000 semester, two- and four-year colleges, this site plans to offer 24-hour access to most basic undergraduate courses.

For K-12 teachers, this site offers an opportunity to network with classroom challenges. Teachers from around the world share their network to discuss classroom management and new approaches to lessons. The Lesson Bank link features 1,500 lessons on Teachers.Net Gazette link is a multimedia magazine with news articles. The site includes a link to educatorsmarket.com, which offers educational supplies at discount prices.

VPW.com provides free educational videos for public, private, and parochial school teachers. The videos are produced by corporations, and government agencies and cover topics such as consumer science, social studies, business, health, and science. Magazines include teachers' guides, posters, and activity worksheets. Those who register receive a regular newsletter from VPW and are notified when they are available.

This is the most popular Web course platform in higher education. It offers teaching and learning resources to community of students across courses and institutional boundaries. Used by 40,000 instructors at more than 1,300 colleges and universities, more than 60 million students. Through agreements with others, WebCT also offers teachers and students up-to-date information and scholarly materials for term papers, projects, and other assignments.
Financial Aid: What's Needed? What's Feasible?

The Election-Year Debate over Pell Grants

BY JEFF SIMMC

Noel Garcia knew that he wasn't on solid financial footing. College was an attractive endeavor, but the Bay Ridge, Brooklyn, man realized that entering higher education generated higher bills as well.

"Tuition is going up all of the time," the 27-year-old lamented. "My income was low, and I worried about the economic burden I would carry later on if I went to graduate school."

He also set his sights high, on New York University, where tuition was considerably steeper than in his own backyard at any of the city's public institutions. What helped him get his foot in the door, he says, was federal assistance.

"It was standard procedure: you apply for financial aid, and a Pell grant goes along with the whole ball of wax."

That federal financial aid allowed him access, but he says it was not enough to keep him enrolled when reality set in: his family needed him to work full time to make ends meet, and so Garcia dropped out.

But Garcia enjoyed his taste of school, and later enrolled at uptown Hunter College, one of the city's public universities. The political science major graduated earlier this year, and awaits his first semester at Fordham University's law school.

Garcia says that he had to pull his weight and work arduously to save enough for college, but that every little bit of assistance helps. The federal government, he reasons, should be poised to assist needy students, especially those from low-income households who might have been forced to attend marginal high schools.

"I think that government has the responsibility to make aid accessible to all citizens to get a good education. Now, this doesn't mean that the government should be paying all college expenses," Garcia says.

"The problem is that without that help, you get stuck between getting a lesser education or really having to borrow a whole lot of money to go to a really prestigious institution. You are stuck between a rock and a hard place."

How much of a financial boost should the government provide is under debate in federal quarters. Pell grant program, designed originally to help the neediest students under review, and awaiting millions of dollars for larger increases, Pell grants are awarded to nearly four million students annually.

The debate lies in the doll: the maximum Pell grant is currently at $3,300. While President Clinton and the House want to inject a maximum $200-a-per increase, some senators are looking for $350, and education advocates are seeking $400 per person.

Garcia is a proponent of the more-is-better argument: the more federal aid, the better for students who need it most.

"The Pell needs to be increased dramatically to well over $5,000 for a student to be able to buy what needs to be bought in college education today."

JAMIE MIRISOTIS, PRESIDENT, INSTITUTE FOR HIGHER EDUCATION POLICY
money, the better the opportunity. He is backed by groups like the national Student Aid Alliance and the Washington-based American Council on Education, which maintains that presidential election-year politicking has raised the level of discourse over the funding boost. That could prove a boon to the program.

"Pell is one of those programs that Democrats and Republicans like for different reasons," says Terry Hartle, ACE's senior vice president for government and public affairs. "Republicans like the program because it is a voucher: it puts money in the hands of individuals and lets the individual decide where to purchase the service."

"Democrats like the program because it clearly and unambiguously puts money in the hands of low- and lower-middle-income families. So this is one of those happy occasions where the program clearly meets the needs of both political parties," says Hartle, whose group represents 1,600 college and universities.

Over the last few years, Republicans have proposed larger increases than have Democrats. But both parties have attempted to demonstrate a commitment to Pell by calling for what each considers a "generous" increase.

Still, ACE maintains that both sides still are lowballing. "We would like to see funded the maximum authorized level," Hartle says. "ACE and the Student Aid Alliance have called for a $400 increase in the maximum Pell grant." He points to the need, saying that 87 percent of grant recipients have a family income of below $30,000 annually.

That debate continues at press time. This wasn't the first season that the Pell grants have sparked fiery rhetoric over their purpose and their amounts. There have been seasons of debate over whether the grants inevitably cause colleges and universities to elevate tuition costs.

One study by the Education Resources Institute found that in 1976 and 1977, the average Pell grant covered nearly 40 percent of the tuition to attend a four-year public university. But 20 years later, it covered only 22 percent.

There was much more disturbing news when it came to four-year private institutions. In 1976 and 1977, Pell grants covered 19 percent of their tuition costs, but in the mid-'90s, they covered only nine percent.

When it came to the maximum part of a sweeping education plan unveiled earlier this year. He aimed to boost spending on federal grant and loan programs to more than $54 billion. That would represent a 55 percent hike from the 1999-2000 spending plan, and it would increase the number of recipients by 277,000 to 8.6 million.

For the 1998-1999 academic year, Clinton said, "When we open the doors to college, we open the opportunity."

Pell grants were established a way to set up a foundation for needy students. They are as only to undergraduate and who haven't earned a bachelor's professional degree, and the don't have to be paid back.

Eligibility is determined on income as well. The Department of Education has been professional for deciding whether a student can a grant. And the grant level slowly, and moderately, inc. For the 1998-99 school year, maximum award was $2,761. Awards are based additionally on tuition costs and whether a student attends school on a full- or part-time basis, and whether the student attends for an entire academic year.

Do Grants Matter?

A survey titled "Do Grants Matter" and "Low-Income Student Grant Aid and Affordability" noted a disparity between the treatment of low- and high-income students. It's a chasm that has largely because while tuition has skyrocketed, federal grants only improved slightly.

The survey called Pell "important and broadly a form of grant support." I that in the 1995-96 school percent of all undergraduates received Pell grants.

Even a few hundred pumped into each award can make a significant difference in the lives of many students. The Institute for Higher Education Policy in Washington, D.C., says that the proposed increase is not sufficient to meet the needs of higher education.

"We still have a very big gap in the purchasing power of Pell grant that hasn't been since the early 1980s, and needs to be increased dramatically to well over $5000 for able to buy what nee..."
“The President’s proposed increases are necessary but not sufficient to meet the increased costs of college,” he says.

Founded in 1993, the nonprofit, nonpartisan Institute promotes educational equality. Merisots says that too much focus has for years been placed on tax support for higher education and tax credits, programs that support middle-income students, while support for Pell, which benefits low-income students, has “lagged.”

“It’s not to say that middle-income students don’t have legitimate needs and concerns,” Merisots says. “But the needs of low-income students continue to lag behind as college costs continue to increase. As Hispanics, African Americans, and American Indians all fall below the median income level, so does a disproportionate share of resources from programs like Pell to support the college attendance of students in those groups.”

“Changes in the Pell grant disproportionately affect low-income and minority students,” he says, “so that’s why this gap is a very serious concern. If we continue to underinvest in Pell grants, what we’re doing is further disadvantaging the disadvantaged populations of low-income, minority students.”

Many of the recipients come from low-income families in urban areas. Education experts estimated that a majority of the recipients were African American and Latino, though they did not have any figures to back that up.

Antonio R. Flores, president and CEO of HACU, the Hispanic Association of Colleges and Universities, recommends that Congress raise the maximum Pell Grant student award to $4,500.

“We are pleased about President Clinton’s proposition to raise it by $200,” he says. “It is a step in the right direction. However, Hispanics, and all students in general, have an increased demand for more gift-aid because of rising college costs. The Pell Grant, since it is not repayable, is critical in assisting Hispanics cover college expenses.”

Addo Harle: “The sad fact is that a large number of Hispanic and African American college students come from families with low incomes. They are the Pell grant, the greater the opportunities they will have to choose where they want to pursue postsecondary education.

“The role of higher education has always been to expand access to low-income and minority students. The Pell grant program is the very foundation of that effort.”

Garcia says that Hispanic students often need that extra push, and every little bit counts. “Students really have to think beyond college, to law school and medical school and graduate school,” he says. “So when you are considering graduate school and you’re facing $60,000 in debt, that’s a whole lot of money you’re talking about. Anything the government can do to help those who are deserving school should be done.”

More than a thousand students recently attended the 10th annual Latino College Expo at Pace University in Manhattan. Antonio Aponte, who has orchestrated the expo to open up doors to Hispanic students in the region, says that often finances prove the main obstacle to access.

Aponte, who set up a website, www.latinogettoeuropexpo.org, to provide resources to students, says that they crave any information on scholarships and grants, and that Pell grants often give them an extra lift.

“Anything that can increase aid for a student can only expand their choices.” Aponte says. “Because being realistic, once they’re in college, then they have at their financial package the determining factor.”

Money is always the issue often the obstacle, he says. Announcement that there has a increase in Pell grants can on kids more optimistic and more interested, especially the in low-income families.” Aponte.

In New York City, in African American and Latino students stand to benefit a lot by any increases. “Even on level that $200 dollars can big difference,” he says. But Garcia disagrees.

“Two hundred dollars is nothing,” Garcia says. “It’s just a bucket and doesn’t make much of a difference.”
Bringing in the Harvest

Grossmont’s New President, Dr. Ted Martínez, Jr.

BY DAN LANDY

As president of Grossmont College in San Diego, Dr. Ted Martínez, Jr., rides high every day. The beautiful 138-acre campus is on a butte, surrounded by canyons; as his car winds slowly up the campus drive, he passes steep drop-offs. But the drive is worth it. The balmy climate and a team of groundkeepers work together to produce wide greenswards, trees, and banks of colorful flowers.

The surroundings are enjoyed by more students each year, and the Martínez style adds new possibilities and excitement to the campus for its young students. This is the educational harvest to which Dr. Ted Martínez, Jr., now devotes his time. It is quite different from the first harvests that he knew.

The story of Ted Martínez starts like that of many Americans from small towns in the Southwest; it sounds like the opening of a television drama. The old Ford pickup truck bumps across the country roads, almost as if it is driving itself. But those who look closely can see the head of a twelve-year-old boy just above door level, with his eyes just high enough to see the road through the steering wheel. The boy is Ted Martínez, Jr., one of the members of the Martínez family who headed north to hoe sugarcane in Michigan. Ted Jr. is tall because his father’s eyes have failed, and he is the one who can do it.

The year was 1929. Martínez family was not rich; the sons and the money they earned by the hard work in the fields. They grew lettuce, onions, and other crops. The residents of Asherton, Texas, a town of 1,000 people, were offering to pay for gas and meals in return for picking the crops. The family lived in a small house on the outskirts of town.

Since Martínez became president in February 1999, new fiber optic cable runs beneath the campus lawns, and long-delayed plans for a $17 million Learning Resource Center and a $5.2 million technology mall are clearly moving ahead.
and Indiana, to join the other migrant families who picked America’s fruits and vegetables.

Twelve-year-old Ted Martínez, Jr., was the driver on this journey of two thousand miles, covered in three days and two nights. Once there, they moved into the camp set up by the company that had sponsored them, and worked from sunrise to sundown in the fields. They would listen for word of the next crop, whether it was strawberries and plums in California, sugar beets in North Dakota, or cucumbers in Colorado. But his parents would plan their picking trips with more than the harvest in mind. After survival, their priority was education. So each year, the children would be back in Asherton on the day before school opened, ready to resume their education. The family goal was to get all seven kids through high school. And they did.

That early life and that goal set the direction for Ted Martínez, Jr. Familiar with hard, highly focused work, he excelled in school. He was such a good student, bright and motivated, that in eighth grade, a history teacher told him that he should consider going to college. Until then, the idea had never occurred to him; until then, he had no idea what college was. The decisive point came in high school, while he was taking a business class. The business teacher, Thomas Vinalera, was excellent, very friendly, highly supportive of students. He had beautiful handwriting, Martínez knew that he wanted to be like this man, both in his manner and in the way he presented himself: crisply dressed in a tie and suit. Martínez decided to become a teacher. But where would he go for college? “I had no idea there was a Stanford, or a Harvard, or even a University of Texas at Austin,” he recalls. He talked with a counselor and went to the college she had attended, Sul Ross State University, in Alpine, Texas. There, while taking economics, Martínez heard about community colleges; his goals became earning an M.A., teaching in a community college, and earning a Ph.D. by the age of thirty. He achieved all three.

Between 1975 and 1992, Dr. Martínez held several positions at El Paso Community College, finally as a vice president in the Dallas County Community College District. While his duties varied, they consistently called upon his skills at community outreach and coordination of services and planning, and upon his strengths as a fair, decisive leader.

Martínez in Chicago

In 1992, Dr. Martínez came to the City Colleges of Chicago as associate vice chancellor for basic and continuing education. This was a major challenge. With a budget of $2 million and a staff of 80 full- and part-time faculty, he took on the Adult Learning Skills Program with a budget of $24 million and a staff of 1,100. This program served tens of thousands of students each year and included GED preparation, both in English and Spanish.

The problem he faced was as enormous as the budget. Scattered at hundreds of sites throughout Chicago, the program posed a classic management dilemma. The Adult Learning Skills Program was highly popular: an educational service provided by the college district to community organizations in every neighborhood. While this was a comfortable arrangement for the organizations, Martínez saw the problem immediately: too many locations and too little academic supervision. There had been no thought of efficiency, and sometimes the program was offered at two locations on a single city block. The classes were popular and convenient, so the organizations hosting the classes could see no reason to change the status quo.

But Dr. Martínez knew that action was needed. An obvious step was creation of a common curriculum, which he initiated. But what about the nearly 400 sites? The state regulatory agency was concerned too, noting that supervision of so enormous a program was virtually impossible. How could the number of sites be reduced without cutting back services, angering the community, and seriously affecting enrollment?

The solution was planning. Working with community organizations, Martínez developed standards for the sites. They included standards for space, for facilities, for security, for equipment, and for enrollment. To continue receiving services, organizations would have to propose a timetable for meeting these standards, and stick to it. He urged and supported coordination between organizations, and was liberal in granting extensions to organizations that made progress. To everyone’s amazement, in eight months, the number of sites that had been reduced from close to 400 to about 100—yet because consolidation, enrollment had dipped only slightly. The remaining sites were the best of those operated by the large, well-run community organizations that also provided a range of other services. Both the organizations and the relocation students benefited by the consolidation. Enrollments again began to rise.

In 1994, when Dr. Ted Martínez, Jr., became president of Richard J. Daley College, he was the first Hispanic college president in the City Colleges of Chicago district. While an academically strong institution, the college had no strong identity. Located in an industrial park, the campus was bounded by light industry, warehouses, and one of the city’s first shopping malls. The neighborhood, which had long been mid-class Caucasian, originally populated with immigrants from Ireland and Eastern Europe, now changing with the influx of African Americans. The college was isolated, and lacked the facilities, resources, and support to compete with the other colleges in the district. Martínez set out to change this. He worked to improve facilities, increase resources, and establish a strong identity for the college. He worked to increase enrollment and improve academic programs. He also worked to improve community relations and partnerships. Martínez was successful in all of these goals, and Daley College became a respected and well-funded institution.
Americans and a majority of Hispanics. Moving quickly, Martínez had the institution recognized as an Hispanic-Serving Institution. He began bringing in grant funds, technology, and projects. When he left five years later, Daley College had fifteen state-of-the-art computer labs, a diverse administration, an influx of new faculty, and a new science/mathematics/engineering technology emphasis. He had opened a long-delayed satellite campus, enrolling 1,800 students, and moved in a major union apprenticeship program with accountability measures for diversity. Under his leadership, the college had won a Program of the Year award for a bridge program to the Illinois Institute of Technology; won a coveted state award for Excellence in Learner-Centered Instruction; and received a foundation grant for developing a program that subsequently won a national “Exemplary Initiative” award shortly after he left in 1999.

Martínez is now president of one of the two colleges in the Grossmont Community College district, reporting to Chancellor Omar Martinez, another excellent Hispanic administrator who had served the City Colleges of Chicago. Joining Martinez as head of the Grossmont campus, Martinez found an extraordinary educational environment for his management skills. With 17,000 students, a beautiful location, successful athletic programs, and a strong academic reputation, the college was already thriving. Excellent programs in both the arts and the sciences produced a term after term of enrollment increases. But the quality of the institution is not reflected in the facilities. Working with Martinez, Dr. Martinez's initial task is to build on the traditional quality of the campus with additional facilities and resources. There has been no new construction on the campus for 35 years, the library is too small, and science programs have far outstripped the available space. Parking is a constant headache, with illegally parked cars an ongoing challenge for campus security.

Since Martinez became president in February 1999, the changes on campus have become evident. New fiber optic cable runs beneath the campus lawns, and long-delayed plans for a $17 million Learning Resource Center and a $5.2 million technology mall are clearly moving ahead, as are longer-range plans for a $13 million science building. Even the parking problem complicated by lack of open space, has been a focus for action, with new options being explored. “Our first priority is building Grossmont's educational excellence,” he noted, “and addressing our facilities issues is an absolute critical aspect of that priority.”

During his presidency in Chicago, Martinez wrote, “The best progress report is the one ten accomplishments.” By that measure, achievements of Dr. Ted Martinez, Jr., are most evident in the experience of the thousands of students served by institutions that he has managed through his 25 years in American higher education—through improved facilities, the newest technology, and through his responsiveness to the social and cultural changes in American society. His record in all areas is outstanding.

For the thousands of other families who followed the crops and hoped for better lives for their children, few role models are as inspiring as Dr. Ted Martinez, Jr.
Washington State University

Endowments, Scholarships, and Diversity Growing

BY ROGER DEITZ

Washington State University President Samuel H. Smith recently retired. He took this as an opportunity to look back at his tenure as an "era of accomplishment, a time of transition" for WSU. President Smith stepped down last July after leading the institution for fifteen years, turning the helm over to his successor, Lane Rawlins, chosen as WSU's ninth president by the Board of Regents. Board President Peter Goldmark said of Smith, "His leadership has made a great difference to this university and the state of Washington," then noted that Rawlins has unique capabilities and vast experience and will move WSU in new directions.

"Government and business leaders, community and education leaders, and our loyal alumni, donors, and friends have supported our transformation work," said Smith. "WSU is positioned for the new century and for meeting the demands our global society will be making on all of its educational and research institutions. Thanks to our talented faculty and staff, WSU is a national leader in many of the innovations changing the face of higher education. Whether in new approaches to teaching and learning, the delivery of education to place-bound and job-bound students, the use of technology, or in new fields of research and scholarship, WSU is providing models for the new era."

New president V. Lane Rawlins comes to WSU from a post as president of the University of Memphis, an office he has held since 1991. "This is like coming home," said Rawlins, who spent 18 years as a faculty member and administrator at WSU. "It is very exciting to return to the institution that has meant so much to me in my professional life. I'm especially thankful for the opportunity to contribute to the success of WSU in a leadership role."

Washington State University is an internationally known research university. The institution was founded in 1890 as the state's land-grant university, with responsibilities statewide for undergraduate and graduate education, research, and public service. On January 13, 1892, the college opened its doors to 29 students, 63 preparatory students, and a faculty of five under the name Washington Agricultural College and School of Science. The first class of seven graduated in 1897. In 1905, the name was changed to State College...
of Washington, and in 1919, the Cougar officially became the school mascot. The first Ph.D. degree was awarded in 1929, and in 1939, the name was changed to Washington State University. In 1962, WSU joined the Western Athletic Association, now known as the Pacific-10 Conference. The Performing Arts Center opened in 1973. In 1983, the 100,000th student was graduated.

WSU’s main campus is in Pullman, in the heart of the fertile Palouse country of southeast Washington. The 600-acre campus near the Idaho border features modern classrooms and laboratories, libraries, museums, student residences recreational and athletic facilities, student union, performing arts coliseum, and a community hospital. A new addition has doubled the capacity of WSU’s Holland Library. WSU is also home to the nation’s newest veterinary teaching hospital, opened in 1996. The University has 10 colleges. Its Honors College is one of the oldest and most respected all-university programs for academically talented students in the U.S.

Money Magazine has called WSU a “public ivy” and rated the college as one of the best eight in the nation in 1995, while the institution was also in the “top half of America’s finest universities” as noted by U.S. News and World Report in “America’s Best Colleges” in 1998. WSU was also rated the No. 1 state university and No. 7 of all universities among America’s “100 Most Wired Colleges;” as ranked by Yahoo! Internet Life magazine in 1999. One of 29 research institutions in the U.S. designated as Internet members by President

Clinton, WSU is also on the top 20 list of cyber-universities in America for use of the latest technology for distance education, according to Forbes magazine. The school was ranked 30th in the country for quality and value by Kiplinger’s Personal Finance Magazine in 1998. In addition to Pullman, students may earn a wide range of degrees at: WSU-Spokane, WSU-Tri-Cities, and WSU- Vancouver. Partnerships bring targeted WSU degree programs to locations throughout the state, including Boeing locations, community colleges, and the Northwest Indian College in Bellingham.
Washington's only statewide university, WSU has cooperative extension offices in all 39 counties, eight regional learning centers, seven research and extension facilities in various locations, and 26 small business development centers.

Enrollment for the 1999-2000 school year was 20,799 students statewide. That included 678 Hispanic students along with 1,032 Asian American, 486 African American, 338 Native American, and 1,128 International students. A full-time instructional faculty of 1,230 includes 24 Hispanics, 101 Asian Americans, 16 African Americans, and six Native Americans. Residents pay $3,233 for tuition and $429 for fees annually. This past May, The Hispanic Outlook ranked WSU on the Top 100 list for granting eight doctoral degrees to Hispanics. Steve Burkett, WSU Graduate School associate dean says, "For the past several years, WSU has aggressively recruited outstanding Chicoano/Latino and other students of color across all disciplines. It is extremely satisfying to see positive results from the efforts that began some time ago and to provide concrete evidence supporting statements regarding our commitment to diversity."

Burkett noted that, according to WSU Institutional Research, in the 1999 fall semester, there were 235 graduate students of color at WSU, including 89 Hispanic students. The 89 students were 97 percent of WSU's total graduate students of color population that semester. By contrast, in the 1994 fall semester—including students at WSU-Vancouver, WSU- Spokane, and WSU-Tri-Cities—there were 128 graduate students of color at WSU of whom were Hispanic. The University is "increasing access through scholarships and fellowships."

WSU's scholarship endowment has grown by more than 400 percent in the last decade—from $14.9 million to $64.5 million. Last year the University awarded scholarships to 5,200 students, up from 2,000 students just five years earlier. This progress is due to the great generosity of alumni and friends and to the positive growth of WSU's invested funds. While much of the growth of the scholarship endowment occurred during Campaign WSU, which ended in 1997, many new gifts continue, including a gift of $1 million to create the Ruth Allen "Pass It On" scholarship. Running from 1990 to 1997, Campaign WSU— the first comprehensive effort, raised $275.4 million. Endowment funds to provide fellowships for graduate students have doubled during the past five years, jumping from $2.5 million in 1994-95 to $5.2 million in 1998-99. WSU now has 97 permanently endowed graduate fellowships.

WSU believes that in education, a global perspective is essential. At WSU, 1,300 international students representing 90 countries introduce an international atmosphere in which dialogue leads to understanding. On-campus activities include cross-cultural social events, dinners, talks, and readings. Students may reside at the International House, where half the residents are from other nations. Each year about 350 WSU students enter education abroad programs at more than 100 study centers worldwide. The staff of International Programs offers students from abroad and students traveling abroad a wide range of support services to enhance their cultural and academic experience.

On the home front, Javier A. Lopez is an undergraduate studying agricultural economics. He was pretty "independent minded," so he says that college wasn't a huge change for him, but he has had to learn how to manage his time for study and how to best manage his money. His biggest surprise was how approachable and personal the WSU professors are, how they want to see him do well in their classes. Lopez reflects, "I knew I would study some kind of agriculture, and in my sophomore year settled on agricultural economics. I want to have a management career in an agricultural firm or do financial consulting with farmers. Besides my ag classes, a favorite has been Introduction to Chicano Studies. Even with my Hispanic background, it's opened my eyes to many current issues." He adds, "I like to be busy, and there is plenty to do at WSU. I go to concerts and to the gym to work out. With classes, work-study, student clubs, and being with friends, that's plenty!"
La Vida Loca

Meeting the Artist, Part Two

BY EDWARD RUBIN

There is a saying in Cuba, first told me by Roberto Fernández Retamar, director of the Casa de las Americas, a Cuban arts organization, "to have a friend in Cuba is to have a sugar mill." As I was to learn, in my attempts to get around the city, place a call, or find a restaurant, this is no idle talk. The Cuban people that I met (aside from some of the hotel employees, who had little conception of service—tourist school lasts six weeks), even those fearful of the authorities, were warm, friendly and eager to be helpful.

As I was to notice, the police frequently stop Cubans to check ID, especially if they are in the company of tourists. Like racial profiling in this country, the majority of those stopped are Black. There are no high-ranking Blacks in the Cuban government.

In selecting my "ulls," which were many, I varied my translators, so as to include as many points of view as possible. Being an outsider, to lessen my chances of misunderstanding and misrepresentation, I questioned everything and everybody, before, during, and after my trip. Repeatedly asking the same question from different angles was a necessity, as certain types of information, even if common knowledge, are not bandied about, and the simplest questions elicited extremely varied responses. It seems nobody has the entire story. Even published information is unreliable, if not the methods of data collection, due to Cuba's secrecy.

Despite Castro's long speeches and media appearances, he keeps the lowest profile in the country. While Americans know exactly where Clinton goes, where and when, nobody I asked knew for sure even where Castro lived. Again, due to fear of authorities, talk, especially on the telephone, is self-censored.

The success of my fact-finding rested heavily on the good will of independent critic/curator Wendy Navarro (then working at the Center of Development of Visual Arts, now working in Spain), who acted as primary translator, and Gustavo "Cuti" Echevarria, a self-taught artist whose erotic paintings, examining intimate moments of people in the bathroom, underscored his freewheeling manner and genial nature. It was his Moscowich, a 1988 Russian jalopy, that drove us around from morning to night. As we crisscrossed the city, traversing the many potholes, Cuti had this delightfully fun habit of leaning out when we passed the rubble of decaying buildings, and yelling, "Beep! Laughter kept us going.

It was Cuti's "forceful" suggestive and he had many, that we visit a Santa Priestess, a Pio Monte baldacino (the priest), and Taller de Manera, a little known government art school, with professors, that is open to non-professionals of all ages. He felt that the experiences would deepen my understanding, if not feeling, for Cuban culture. We also visited ISA [Instituto Superior de Arte], housed on the grounds of a former country club to which the graduate art students doing since most of today's young artists, at least those that I met, had studied at ISA and a number of them still teach there, it was not to be missed.

I was fairly amazed at how advanced and savvy to the art scene students were. Unlike most American artists, they are equally adept at work in duos, trios, and groups, in all here and can draw. Though much work is conceptual and tinged with the political use of metaphor and ambiguity abound, there seems to be a resurgence of the painterly and narrative. Everyone I spoke to (Russian Tor Alain Pino, Luis Enrique Canejo, to name a few following in the footsteps of their still yeaters, were already being booked for local and international exhibitions and asking American prices for their work. While the average salary for most workers ranges between $11-15 a month (government pensions are half that), a single painting for $2,000 places the artist an Cuba's elite. Only musicians, assorted performers who like artists are allowed to travel interna
ally, and the owners of some paladares (in-home restaurants that by law can seat no more than 12 people), are able to shield actual income, and of course those well connected belong to this class. Government workers, these of low echelon, have many perks, like buses that take them to and from work, but little money.

As luck would have it, very early in my trip, I attended René Francisco's opening at the Galería Habana. In one fell swoop, not unlike a trendy Soho Gallery opening, I was to meet many of Havana's young, traveling, art elite, a virtual Who's Who on the international circuit. Cuba's most respected critic/curator, elder statesman Gerardo Mosquera (who is also a curator at The New Museum in New York) was in attendance. Performance artist Tania Bruguera, currently working in Chicago, just flew in from Spain. Later I was to attend her lecture at the Centro Wifredo Lam. About to leave the country, Los Carpinteros, Cuba's famous male art trio, were holding court. Their work addresses the lingering effects of colonialism, the promises of utopia, and the shortfalls in realizing it. The only star that seemed to be missing was Kcho, an artist whose better-known works refer to voyage, navigation, uppers, and exile.

Given that some of the artists I wanted to visit do not have telephones, few have e-mail, and fewer Internet (access is limited by cost, low tech, and stringent government control), I couldn't have planned a better networking party. Later, I visited with many of these artists and critics at my hotel and at their homes and studios, most often one and the same. In this exhibition, titled Tubusaru (a hybrid of Tube and Kamasutra), Francisco, a popular teacher at ISA, used silver tubes of Perla toothpaste that he collected from friends and family. He then twisted them into human forms, to represent various rituals, the sexual act among them, of the Cuban people. In analyzing this work, it helps to know that toothpaste is rationed, one tube to a family of four per month. True to form, as critic Eugenio Valdés Figueroa observed of contemporary Cuban art in general, Francisco's work, with its many interpretations of reality, oscillated between speculation and metaphor. The surprise perk—later on, we were, in a sense, were the appearance of Holly Block, director of New York's Art in General, an early sponsor of Cuban art and artists. Holly observed that during the last few years, the Cuban population seems to have been gaining weight—visual evidence of recent growth in foreign investments and tourist spending.

Though I had heard stories of recent censorship in which a government official, before the opening of an exhibition, forbade certain works to be shown, international eyes on the Cuban art scene, overt government censorship is at low ebb. What does exist and what is practiced by all arts organizations and artists is self-censorship. With years of experience under their belts, everybody knows exactly how to play the game and just at an opening in Europe. It is a perfect example of tweaking the censors. With radio, they sat at a table and listened to Castro's four-hour speeches. While they faithfully listening to Fidel was unimpressed by their wearing of flashy and ridiculous, outlandish suits, the height of incongruity, and there was the entire scene.

Tania Bruguera is Cuba's 'Que Metaphor.' Her performances, reminiscent of those of U.S. artist Karen Finlay, are mesmerizing. In one, which Mosquera called "perhaps the most powerful political statement ever done in the island," Bruguera, reenacting the his Cuba's Taino Indians, many of committed suicide by eating dirt than submit to slavery, did the same forty-five minutes. In another, she cut a bloody sarcasm of a dead horse strapped to the front of her body, in the roles of passivity and submission as strategies for survival.

When it comes to the products, presentation, and distribution of a the Ministry of Culture that wields the most power. It manages, controls has the last say over culture in Though the art world in general is complicated, in Cuba—with music, dance, photography, and the arts each overseen by its own organization, sometimes two—it is Machian "Always on watch" to avoid trouble. The function of each of these institutions to keep the Ministry happy. As one imagined, challenges to whatever means of survival are few.

The institution that covers ascribes to Consejo Nacional de las Artes Plasticas. This organizes conferences, shows, and rations around the work that is "allowed." This bit more freedom in what is exhibited, especially internationally.

Many artists of all media belong to 1 (Union of Cuban writers and artists). This association arranges conferences, shows, and exhibitions outside of New York. It also arranges national travel for artists and in some
defends their rights. Juries of specialists evaluate applicants annually.

The Fondo Cubano de Bienes Culturales, which also falls under the umbrella of the Ministry, oversees all art sales. Every month, each organization submits a detailed list of what it has sold. As a rule, artists get to keep 50 percent of the sale price; supposedly the rest goes for gallery support, exhibitions, and travel to various biennales. As to be expected, given the economy of the country, there is no discernible domestic art market. Though art dealers in Havana are more than scarce, I did visit the RM Project, run by Milagros Borges and Roberto Fernández. Anticipating further growth in the art market, this husband and wife team is turning one of the floors of their home into a full-fledged gallery. Right now they handle about a dozen artists, taking only 15 percent of the sale price. Most of their sales are foreign, with most paintings going to Spain.

The big money is in international sales and sales made in-home, from visits, by foreign art collectors, critics, and curators. Marilyn Zeitlin, director of the Arizona State University Art Museum (her exhibition, Contemporary Art from Cuba: Irony and Survival on the Utopian Island, will be traveling around the U.S. through 2001), purchased a large percentage of her exhibition directly from the artists. Another coup for artists, though they pay low prices, is when the Museo Nacional de Bellas Artes, Cuba’s National Gallery (under renovation, it has been closed to the public for a few years) buys a painting. Given the lack of market, this is one way to keep their art in Cuba.

The living arrangements of the artists whom I visited vary dramatically. Some live with their parents (housing shortages in Havana acute) some with families and friends. Not that I visited alone. Still others doing financially, have extended, renovated, and some cases, built an entire new residence or of an existing building, a common practice Cuba. One had his own studio, which he for $40 a month. Many of the artists study ISA. A number of those that didn’t were so what resentful. They didn’t have what termed “the protection of the officials.”

Art supplies are bought, depending on finances of the artist, locally or from foreign sources during travel. More often than not, rations are donated or given to the artist by foreign institutions and galleries that want to show work found on the street, acquired via the market or the barter system. Artists are information-hungry: in each household, across stacks of old and newer issues American and European art magazines, likely brought into the country by visitors or chased during foreign travel. Each artist has a well-chosen library. Titles of books: authors jotted around names like Beuys, W, Duchamp, Yoko Ono, Monorysky. On the other side, I found Derrida, Foucault, Baudrillard, Lacan, all artists and writers whose challeging methods dispense with expected elements.

The first artist I visited, René Peña, a taught, Black photographer, lives on the skirts of Havana with his parents. Similar to my artist visits, I was served sweetened espress coffee, a Cuban custom. René’s work, po and erotic, focuses on the human form of his own. In one photograph, he pierce knife, in another, a can of fruit punch, directed from the front of his genitals, leaving the many possible interpretations up to the viewer. Peña is concerned with the individual, especially the role of institutions, identity, societal role and relation. His close-ups, self-portraits with the skin of the skin, resemble a piece of the most foreign landscape. We forget that we looking at a human body, which is precise point. Very early in the Revolution, the father, in a fit of zeal, gave the government two houses he owned (one at the beach) used for the rest and relaxation of weavers. In exchange, the family was given a three-room apartment, not the house the government promised. Holding their tongues for the pain they elicit in the father, they are never brought up by the family. I was many such sad and touching stories.
Another artist, a quite jovial one whom I particularly enjoyed meeting, was Aisar Jalil. He lives with his wife, Yana Elga Brugal, editor of Revista Tablas, a theatre magazine. They live on a crowded and noisy street in central Havana. He says, "the noise keeps me working." Jalil studied in Leningrad during the early ‘80s. Very often using himself as the central character, a kind of an Everyman, Jalil’s paintings deal with humanity in all its awesome fullness. Sometimes painting in series, his works are filled with grotesque, half man, half animal creatures. If not found participating in some bacchanalian orgy, they are cavorting at carnivals. The fact that Jalil with his beard resembles Castro adds yet another dimension to his work. In one painting titled "Yugoslavia," these creatures can be seen sitting around a table. Stretched out in front of them is a shrouded body. In their senselessness, they are arguing not what to do with the body, whether to bury it or not, but whether or not it is even a body.

Abel Barros is another artist who has spent time (courtesy of Art in General) in the U.S. His work is extremely inventive. Using the tools of a woodcarver and carpenter, Barros creates original works out of cedarwood panels. These works become both a matrix for his prints and three-dimensional objects exhibited solo or as part of an installation. His subject is "exploitation," by tourists as well as by foreign investors. The day I visited, he was working on a large floor puzzle titled "Nobody Can Assemble This." It resembled a Monopoly board. On this "canvas" is carved the island of Cuba. Stretched across the island is a Hollywood-like starlet. Movie cameras, computers, telephones, stockbrokers, and real estate agents, all very busy trying to make a buck, surround her. For Barros, dollars might offer economic renewal, but at what cost? Once again, Cuba is being invaded. Adapt at playing the game, Barros priced this work at $10,000.

Alexis Esquivel, a Black artist, minimizes the risks of his political paintings by dressing them up in historical disguise. He believes that "memory and history are manipulated processes and that our realities change depending on how the power structure of society wants you to remember." He remembers, very well, his school textbooks. His work often refers to past influences of U.S. culture and memories of the USSR. In "Picnic Natural" (1996), based on Manet, he depicts a Black policeman asking José Martí for his ID. "Portrait of Gorbatchov in Romantic Position" features the Russian leader engaging in Cuba’s national pastime, baseball. At bat, he is wearing a red uniform with a sickle. As to be expected, as a foreigner to baseball, and more importantly to Cuban culture, the placement of his hands on the bat (and country) is entirely wrong. He’s all mixed up when it comes to the left and the right, terms that are essential in party politics. While I was intrigued, sometimes held captive, by Cuban political art (Zeitlin calls the context of the art "riveting"), I soon thirsted for the merely aesthetic. I was tired of messages. To satisfy this craving, I scheduled a visit with Rocio García, a professor of art at the San Alejandro School of Art in Havana. Like Jalil, she too studied in Russia during the ‘80s. Of course, I was fooling myself, for to escape politics in Cuba is an impossibility, a dream. Still, García’s paintings, colorful and erotic, were a breath of fresh air. With a bow to Pasolini, her recent work, more personal than political, embraces the "forbidden" in Cuba—homosexuality, sadomasochism, and bisexuality. In "Little Pieces of Me for Sale," exhibited at the University of Michigan (1997), the artist uses the Japanese symbol of geisha—the masked woman—as a mirror through which to reflect on the meaning of sexuality in today’s Havana. In these paintings, coexisting in uneasy balance, we find pleasure and danger, wrenching material need and intense spiritual longing.

One of the more intriguing artists on the island, marching with steps all his own, is architect-turned-artist Eduardo Rubén. Using architectural structures as symbols, e.g., windows, stairs, and passageways that often lead nowhere (at least on canvas), the artist examines the spaces that humans are apt to encounter on a daily basis. Though one is tempted to label...
Rubén’s meticulously rendered work Photorealistic, which in ways it is his paintings, redolent of Precisionists Scheeler and Crawford in their use of flat planes of color and austerity of subject matter, and Escher in their complexity, are far too imaginative to be crippled with such a label. Each painting, a close-up view of architectural settings, very often with a blue sky or a shimmering sea in the background, sometimes presented head-on, sometimes dramatically cropped, always without people or nature, places us in a dream-like world. Like a kaleidoscope, the elements of the painting pulling us in play havoc with our mind’s eye. Drawn into the action of what is essentially a static picture, following these same paths we contemplate the generations that have passed this way before and the generations that will follow.

Though ISA is brimming with students, and more and more Cuban artists are receiving international grants, participating in foreign residency programs, and appearing in international exhibitions, there remains the question of whether or not the art of Cuba, so very popular at the moment, hasn’t exhausted its possibilities. More to the point, how long can the “New Art of Cuba,” nearly 20 years old, stay new? Negative criticism is already surfacing. Most notably, Cuban art critics are claiming that their artists are “going soft” and, knowing what is selling, they are selling out. Forsaking a direct frontal attack, they are making art about politics instead of making political art.

Even the Havana Bienal, which once stood for anti-commercialism and solidarity among Third World artists, is taking a high-culture approach and has professionalized its discourse to fit in with other biennials. The Bienal now serves a “Tropical Market” geared solely for what Arthur Danto calls the “curatoriate,” those visiting curators, dealers, and collectors who descend on the island looking for the new, the latest, and the most affordable.

If Cuba continues its gradual shift from a socialist to more of a free-market economy, with global changes in communication and horizons of tourists invading the island, further liberalization and economic improvement are likely. Whether these benefits will be passed on to the people or remain in the hands of the few, which is now the case, remains to be seen. For as Castro said in 1954, even before he took power, “For some, history is good fortune, for others, it is a process ruled by laws.”

How all of this will affect the Cuban artist, whose life and subject matter are so tightly woven into the country’s political and economic fabric, is open to question. Whatever the case, what currently appears to be a movement will probably settle back into Cuban history as another chapter until the next wave of new art hits the beach.

Edward Rubin is a senior editor at Manhattan Arts International and a contributor to the New Art Examinet essays, criticism, and photographs appeared in such publications as A Windy City Times (Chicago), Backs: Philadelphia Inquirer, the Indianapolis the Villager, and prior to their close, the Indianapolis, Arts Magazine, Theatre West, American Film. During the ‘80s, he p and/or directed over 50 plays, once readings in New York City. During th decade, his play Mother of the Year won a one-man show. At the Sounds of the opened to successful Off-Off Broadway Rubin is a long-standing member of A International Association of Art Critics the Drama Desk, the Critics Circle, the Drama Desk, Outer Critics Circle, Marketing Research Association, and others. Rubin is the National Field for Audits & Surveys Worldwide, an itional research company. His slide le Vida Loca: The Life of the Artist in Cuba recently available for booking For mo nation he can be reach enubin5000@aol.com.

One Million from NASA for Proyecto Access

UTSA Program Doing Well Nationwide

By Inés Pinto Alicea

"This generous gift from the world's best-known space agency represents the fourth $1 million grant in four years from NASA to HACU in support of a model program that is dedicated to reversing the severe shortage of minorities..." said HACU President Antonio Flores.

NASA awarded $1 million to HACU, the Hispanic Association of Colleges and Universities, to continue an innovative project steering hundreds of minority students each year toward college. The $1 million will be used to support Proyecto Access, a summer program designed to provide logic and problem-solving skills to selected minority middle school and high school students interested in pursuing a college degree in the engineering, science, information technology, and mathematics fields.

"This generous gift from the world's best-known space agency represents the fourth $1 million grant in four years from NASA to HACU in support of a model program that is dedicated to reversing the severe shortage of minorities..." said HACU President Antonio Flores.

"Between 1988 and 1997, for example, Mexican Americans were awarded less than one-half of one percent of all Ph.D.s in technology and sciences," Flores said, citing a recent National Science Foundation report. "NASA's partnership with HACU in this endeavor will benefit all of us..."

Proyecto Access, which is in place at nine college campuses in eight states, graduated 749 middle and high school students from its eight-week program in the summer of 1993. It is the national replication of the successful TexPREP program started in 1979 by Manuel Berriozabal, a professor of mathematics at the Univ. of Texas at San Antonio - a HACU-member campus. Berriozabal started the program in San Antonio, now sending their children. In 80 percent of the participants, the Texas program have been women, more than 50 percent of the participants come from low-income families defined by the Texas School for Science and Mathematics, Engineering Mentoring.

Berriozabal said that when launched the program in 1979, a project did not believe he would be successful. "One person told me, 'We need people from, out of, Berriozabal. "We've high expectations of students, the students meet them."

Berriozabal said that the program has been successful because it students get over fears or misconceptions they have about college. "After eight weeks on a college campus, they discover they can successfully pursue science and engineering degrees on a college campus," said Berriozabal. "College becomes a viable option."

Berriozabal said that the big
challenges the program faces overall is getting the financial support to run the summer sessions. Berrioszabal said that he has discovered when he turns to some companies for financial support for the program, they are unwilling to turn some of their rhetoric into reality.

"Even though they talk big, they don’t put their money where their mouth is," he said. During the summer of 1999, Berrioszabal’s program sent out a survey to all former participants in the San Antonio program, and 2,113 of the 3,477 college-age former participants responded. According to the survey results, their high school graduation rate is 99 percent, 92 percent are college students or college graduates, 55 percent of the college graduates are engineering or science majors, 76 percent of the college graduates are minority, and 70 percent of the engineering and science graduates are minority.

“We plan to have that success nationwide,” said Greg Cortez, HACU director of information systems, Cortez was involved in Proyecto Access for eight years in Texas and then joined HACU to expand the program nationwide after NASA became interested in the program.

While NASA is the largest contributor to Proyecto Access, Cortez said that officials hope others will soon provide money as well so the program can serve more youngsters. NASA also funds an annual meeting for all instructors and directors of the program, and it pays for some students to visit the NASA facilities in Orlando, Fla.

"It’s important because minorities are not duly represented in science and math," said Cortez. "We should service more students if we had funding. We’re getting more applications than we can handle."

Rene A. Gonzalez, HACU Director of Program Collaboratives, said Proyecto Access began as a program for 350 students at seven campuses.

More than 800 middle and high school students in Arizona, California, Colorado, Florida, Illinois, New Mexico, New Jersey, and New York were expected to graduate from this year's summer program.

And science," Gonzalez said. "The importance of receiving an adequate preparation in logic, critical thinking, math, science, and problem solving cannot be over emphasized."

"The program has been successful because it helps students get over fears or misunderstandings they have about college."  

MANUEL P. BERRIOSZABAL, PH.D., PRINCIPAL INVESTIGATOR AT THE UNIVERSITY OF TEXAS AT SAN ANTONIO

“This funding from NASA for Proyecto Access allows us to continue expanding the educational opportunities for young students in our community in the area of math and science," Gonzalez said. "The importance of receiving an adequate preparation in logic, critical thinking, math, science, and problem solving cannot be over emphasized."

The schools participating TexPREP program are: Am College, Amarillo; the University of Texas at Arlington, Arlington; Huston-Tillotson College in / the University of Texas at Brownsville, Brownsville; El Centro Community College, El Centro Community College, and University of Texas at Dallas, Dallas; the University of Texas at Austin; University of Edinburg; University of Texas at El Paso; Texas Wesleyan University; Fort Worth; Texas State Technical College in Harlingen; the University of Houston-Downtown in Houston; and Texas A&M University in Lubbock.

"This year we will look to improve the program by updating the materials, improving communication, and the program's co-principal investigators," said Gonzalez.

Cortez, whose primary role is to follow students and their progress throughout the challenges of the program.

"[Berrioszabal] believes all students have the ability to handle these topics, and he is very open to expand the educational opportunities for young students in the area of math and science," Gonzalez said. "The importance of receiving an adequate preparation in logic, critical thinking, math, science, and problem solving cannot be over emphasized."

Students apply for the program and if they are accepted, Proyecto Access first year, will be invited to return for a second year. All students in high school are eligible. More than 50 percent of the participants are female. 7 percent are minority. All interested in participating have a grade point average of 3.5 or better. The cost of oper
or better, provide two letters of recommendation from instructors, and submit a transcript.

Participants receive the courses free of charge. Students who participate in the program also are eligible for scholarships through associations affiliated with the program, said Cortez.

The program generally lasts eight weeks, and the typical day lasts about six hours. Successful scientists, mathematicians, and engineers speak to the students in daily sessions throughout the program. Students also take a number of courses in science, engineering, math, technical writing, problem solving, probability and statistics, computer science, and logic.

College students serve as mentors to the middle and high school students, guiding them through their coursework.

Cortez said that Proyecto Access hopes to be able soon to provide students with high school credit for participating in the program, which is what the TexPREP program currently offers to its participants.

All of the colleges and universities offering Proyecto Access are Hispanic Serving Institutions, meaning they have student populations that are more than 25 percent Latino. Schools participating in Proyecto Access and providing math, science, and engineering classes to middle and high school students are: Hostos Community College in The Bronx, New York; New Jersey City University, Jersey City, New Jersey; Florida International University, Miami, Florida; New Mexico State University, Las Cruces, New Mexico; Community College of Denver, Denver, Colorado; Pima Community College, Tucson, Arizona; Richard Daley College, Chicago, Illinois; Los Angeles City College, Los Angeles, California; and Oxnard College, Oxnard, California.

HACU represents more than 235 colleges and universities with high Hispanic enrollment rates in the United States, Puerto Rico, and abroad.

---

SUL ROSS STATE UNIVERSITY
VICE PRESIDENT, RIO GRANDE COLLEGE

Sul Ross State University invites applications for Vice President, Rio Grande College. The Position is 12-month, negotiable, 12-month contracts with qualifications. Excellent benefits. Required: Effective leadership to manage an upper level college in a multi-campus teaching university; experience in senior managerial positions (three years dean level or above) and high interest in regional development and innovations; prior experience in higher education administration with responsibility for personnel, programs, and/or resources; excellent interpersonal skills and experience in creating, building, and maintaining collaborative relationships. Individuals desiring an academic appointment must have a terminal degree in a field taught at Sul Ross State University and have significant academic experience with credentials appropriate for a tenure-track appointment. Preferred: Program development, including grant writing and fund-raising experience; experience with new educational technologies related to on-line and distance learning; minimum of ten years combined teaching, educational administration, business, and technical experience. Serves as the chief operating officer and administrative leader of the College and reports directly to the President of the University; responsible for all phases of administrative, student affairs, and academic services, the quality of programs in teaching, research, and service; strategic planning; budgeting; fund-raising; alumni relations and outreach; management of the college's facilities and day-to-day operations. Position is Security Sensitive: Submit a letter of application, resume, and three references to Jeanne S. Burton, Director of Business Operations, Sul Ross State University, Rio Grande College, 205 Wildcat Dr., Del Rio, TX 78840.

Written requests for information and nominations may also be sent to this address. Review of applications will begin July 1, 2000 and continue until the position is filled. EEO/AEE. Sul Ross is a member of the Texas State University System. Visit our website (http://www.sulross.edu).
Sampling the Realities of Campus Teaching

200 Institutions Join Faculty Project

INNOVATIONS

BY GARY M. STERN

"Only five percent of doctoral students who move into faculty positions accept jobs where they obtain their Ph.D.s," explained Ronald Lee, professor of communication studies at the University of Nebraska-Lincoln and director of the Preparing Future Faculty project. Most doctoral students attend Research I universities, the elite, prestigious universities, and then proceed to teach at small liberal arts colleges, private colleges, religious institutions, and community colleges, whose diverse populations often differ greatly from those of their alma maters.

That explains the genesis of the Preparing Future Faculty Program, which is sponsored by the Association of American Colleges and Universities (AACU) and the Council of Graduate Schools and funded by Pew Charitable Trust. Launched in the early '90s, it involves more than 200 universities and colleges.

Preparing Future Faculty links doctoral students at a graduate school with an undergraduate college. For example, the University of Nebraska-Lincoln, whose white population is 94 percent, is partnered with New Mexico Highlands University, located in Las Vegas, New Mexico, whose population is 72 percent Hispanic. More than 60 percent Hispanic Native American students are trying to open the doctorates' eyes to different experiences and the environment in which they are teaching at a private liberal arts college, but their students may be interested in learning and growing, but their students may be interested in learning and growing, but their students may be interested in learning and growing, but their students may be interested in learning and growing, but their students may be interested in learning and growing, but the entire experience might take place at the University of Nebraska-Lincoln. Lee said. If the student hasn't been exposed to a diverse environment, he or she might have problems adjusting to a new environment and cultural environment.

In some partnerships, students at Research I universities pay, but in other partnerships, master's-level students comprehensive colleges are also involved.

The Research I doctoral students and the master's students participating in the Preparing Future Faculty Program both gain. "This program enables both students to think critically and compare both universities," said Davidson, provost at New Mexico Highlands University. They both think beyond the content to consider how best to convey their intellectual discipline to a different kind of student body.

Preparing Future Faculty enables New Mexico Highlands Unive
find those faculty who are going to be the most effective for our student body before they come off the production line," said Davidson. As a comprehensive university, New Mexico Highlands offers undergraduate and master's degrees, but not doctorates. "We have to recruit faculty from Research I universities," he offered.

How does the program prepare students? During their three days on campus at New Mexico Highlands, the doctoral students become intensely engaged. "They directly observe classes," said Davidson. They'll work closely with a bilingual teacher. Doctoral students see how another culture operates, learn what it takes to reach students who are economically deprived, understand what it takes to reach someone whose native language is not English. Prior to this program, future faculty members "had not received any kind of pedagogical background as to how to present their discipline to undergraduates," Davidson said. Math and science faculty in the past were particularly out of touch with lower-level students.

At New Mexico Highlands, this program can raise students' aspirations. "When we send them to the University of Nebraska, we're working with them at the baccalaureate level to encourage them to pursue higher education," Davidson said.

"It's very important for our majority students to have a broader sense of regional differences in educational culture and learning style of students," explained Suzanne Ortega, associate dean of graduate studies at the University of Nebraska-Lincoln. Many doctoral students will wind up teaching in urban universities with a diverse student body and, without this program, would be unprepared. Even the largely homogeneous state of Nebraska is experiencing cultural changes.

A rising number of immigrants enters the state to work in certain trades, so learning how to teach a diverse student body can benefit all doctoral students.

Preparing Future Faculty operates in two ways—intra and long-distance. In addition to the distance learning that takes place at New Mexico Highlands over a concentrated three-day period, the University of Nebraska-Lincoln students are assigned a mentor at a local Nebraska college, including religious, private liberal arts, and community colleges. "Every two weeks, students attend a colloquium at a local college focusing on different issues, including assessment, faculty governance, diversity," said Lee. Students visit the local Nebraska college four to six times a semester for several days. With the more distant universities, New Mexico Highlands University, Grambling University in Louisiana, and Alcorn State University, an historic Black college located in Mississippi, doctoral students attend videoconferences that introduce them to the university and to such issues as recruiting, teaching, and standards. Usually doctoral students spend three days on campus at the more distant partnered school. "They learn with a different kind of institution that is more diverse," Lee said. "They learn how to be acculturated in a different environment," he added.

The mentors at the partnered college play a major role in the doctoral students' success. The mentors "guide the students, help them unders[and] the institution, and will teach them about the different disciplines, learning about grant writing in the chemistry department or the intricacies of lessons and instruments in the music curriculum," Lee said.

Doctoral students might be teaching in a more diverse universe but have little knowledge of what it means to teach there, what exceptional issues arise, how to handle different student styles. They'll have a broader perspective on teaching academic disciplines. "The broader preparation, the broader involvement of the student will like different at the partnered college," Lee said. "Students learn what questions to ask. They'll be more prepared to handle different student styles. They'll have a broader vision of the students' career expectations." Ortega added. Realistic.

Preparing Future Faculty is crucial for the success of a doctoral student become teacher and pedagogue. "The overwhelming emphasis on writing the dissertation and scholarly research, not on teaching. In this program, was introduced, doctoral students were not exposed to different facets of academic life," Lee said.

Indeed, service to a college is rarely discussed.

"What we at AACU and Co of Graduates Studies were trying to do is to change the work for doctoral students who aspire to be university faculty members. The traditional term has been research extensive and research exclusive," said Rit Weibl, director of programs at AACU's Office of Education and Institutional Renewal, based in Washington, D.C. AACU "advocates full immersion" in partnered universities in the two to three days spent on campus, Weibl, which can create a "powerful moment."

The Pew Charitable Trust funded the initial Preparing Future Faculty program in 1993-1996 with a $1.85 million grant, then renewed the program in 1997-2000 with a $1.19 million grant. The Trust noted that future college faculty were not being prepared at the colleges where most doctoral students eventually got jobs, "liberal arts, comprehensive colleges, and community colleges," said Ellen Welt, program officer in education at the Pew Charitable Trust, in Philadelphia, Pennsylvania. Future faculty "didn't understand
range of institutions where they might make their home. The research institution, where graduating new faculty intended to teach, was not where they were ending up. The Preparing Future Faculty program makes people "more intentional and deliberate about graduate experience," she said.

Feedback from doctoral students to the Council of Graduate Students suggested that Ph.D. candidates had many questions about teaching a different demographic student mix and fitting in at a different kind of college, said Anne Pruit Logan, scholar in residence at the Council, a Washington, D.C.-based organization that establishes policies regarding master's and doctoral degrees. Most doctoral students have driven past community colleges, and that's it," she said. "Rather than having them learn on the job, there should be some professional help to prepare them for the job," she added.

This program provides actual experience and fieldwork at colleges, albeit for a limited time when compared, for example, to internships and fieldwork that medical students perform at hospitals. Despite the enthusiasm of the students involved, the program has its limitations. Wert said she hoped but could not guarantee that most doctoral students were receiving feedback and guidance on teaching. "We've asked universities to be thoughtful of where doctoral students are assigned, and what experiences they are offered," she said. All Preparing Future Faculty students observe classes, but providing feedback on their teaching has not been a major requirement of the program. Observing is beneficial, but future faculty learn from teaching and receiving feedback, not merely observing. While future secondary school teachers student-teach under the watchful eyes of their cooperating, licensed teacher, no comparable program operates at a college or university. Until future faculty learn the mechanics of teaching as well as mastering content, the program won't be fully beneficial. What are the major benefits of Preparing Future Faculty? Pruit-Logan replied that doctoral students learn "about the diversity of higher education, all colleges are alike. It serves as a career planning device. They'll what a professor has to do involving research, teaching, and ser Future professors become aware of the potentially different learning of adults, single parents, students with disabilities, and minority stud Lee sees the major benefit as "academic socialization. Students are sized in learning about different academic cultures. They even do interviews to learn how to get a job." The program "presents a structured program for our students and a win for the University of Nebraska in sity," offered Davidson. Further, it boosts the confidence of New M Highlands students, encouraging them to pursue doctorates. In an survey of graduate students participating in the program, 97 percent satisfied with it and thought it prepared them to teach at a campus from their research university. Preparing Future Faculty "is try alter the equation of preparing a doctoral student to teach without mizing the value of research," Welbl noted. "It exposes the student outside of research," Lee said. Doctoral students will have a "better c of teaching students if they can relate to their ethnic and cultural ences." Pruit-Logan declared. "We've asked students what will make an effective faculty member and provided opportunities that are con with the needs of the school," said Ortega.

Preparing Future Faculty "isn't about research versus teaching; Wert. "It's about balancing research, teaching, and academic citizen.
An Untiring Professor at St. John University and the Committee That Never Sleep

BY ADALYN HIXSON

Last March, in a nod to Women’s History Month, Newsday put a spotlight on 20 women who are “Making Their Mark” in New York’s five boroughs and beyond. Joining honorees Doris Kearns Goodwin, Rosie O’Donnell, Patti Lupone, Mariah Carey, and 15 other talented women, was educator, writer, and literary critic Alina Camacho-Gingerich, an associate professor of Spanish at St. John’s University in New York, which named her a Woman of Distinction the same month. Two months later, it was a Faculty Outstanding Achievement medal.

Dr. Camacho-Gingerich has garnered many other honors at home and abroad. They cite her extraordinary leadership, her support of the Latin American community, her outstanding research and publications. No doubt she will earn even more through her stewardship of St. John’s very active Committee on Latin American and Caribbean Studies, the CLACS.

“Every single school of the university is represented on our committee,” she said, “political science, law school, school of education. In addition, all the deans are honorary members of our committee.” And CLACS, she added, is under the provost who also is a member.

“We wanted the committee to be completely multidisciplinary and interdisciplinary, so we have scholars, professors, and administrators who are committed in their scholarship to Latin American and the Caribbean. We included Caribbean in the name to make it very clear that it represents all of Latin America, including the French, English, and Dutch.”

“We are a fairly young committee yet are moving very fast.” That just might be an understatement.

Getting Started

“Since I arrived at St. John’s in 1985, I had a vision of helping create a center for Latin American Studies.” It remained just a vision for several years, “and then we got a new president, Father Harrington.”

Reverend Donald J. Harrington, she said, came in with a more global perspective, and the provost at the time, Tony Bonaparte, was sympathetic to an international focus, “so I populace and Latino influence could earn a distinction. She credited his professors.

“Right from the beginning, several scholars in Latin American studies helped us, in addition to those who established the institute.”

Lectures, Conferences, Symposia

When HO spoke with the chair in April, she was just a breath from St. International Conference on Contemporary Bolivian Literature organized by CLACS in conjunction with the Consulate of Bolivia in New York and the Bolivian Institute. The last of the week was to be the previous Sunday’s confer La Paz, Santa Cruz, Cochabamba. American Airlines had provided round-trip tickets for some of the best Bolivian writers today,” she said.

“We have had symposiums on Mexican and Argentinean literature, and we are sure that we don’t miss the small countries that have very good authors but do not have the opportunity to have their work published.”

In order to meet the expenses of its operation and maintain the level of excellence that is expected, CLACS often solicits sponsorship from the University, at some of the diplomatic
sions and from other universities, especially when it involves bringing speakers from Latin America. CLACS looks at home and beyond, too, for expert speakers.

Last September, renowned anthropologist Dr. David Pendergast, former vice president of Collection and Research at the Royal Ontario Museum, presented “From the Bottom of the Sea: Ancient Taino Life at Los Buchillones, Cuba,” sponsored by CLACS and St. John’s Department of Sociology of Anthropology. The following month, Ambassador Guillermo J. McCloud, Consul General, spoke on contemporary Argentina. In April, Jorge Quiroga Ramirez, president of the Bolivian Congress, presented “Bolivia Today.”

These lectures, open to all, begin to address the giant gaps in North American awareness of Latin America’s past and present, as well as forging relationships with significant figures in the international sphere.

CLACS Publications

CLACS is editing and soon will publish two books linked to recent symposia. *Mexico in the 21st Century: A Selection of Scholarly Articles*, published in conjunction with the Mexican Cultural Institute of New York and the Consulate General of Mexico in N.Y., includes contributions by some of Mexico’s foremost scholars and authors, as well as U.S. scholars on Mexico. Symposium speakers Miguel Leon Portilla, Homero Aridjis, Friedrich Katz, and Enrique Florescano Maget are represented, plus a few others selected since then. Portilla, says the CLACS chair, is an internationally known expert on Mesoamerican cultures, and the author of more than 20 related books. Aridjis, president of PEN International, is a distinguished poet and novelist.

In the morning, at that same symposium, we invited some people from Wall Street who are specialists in investing in Mexico—economists so you have a nut. The investors and the business people in the morning, and the historians, anthropologists, writers, and literary people in the afternoon.” Altogether, she said, they provided a very complete overview.

Coping in America: Caribbean East Indians in the United States, published in conjunction with the Guyanese East Indian Civic Association (GEICA), is also the result of a major symposium organized by CLACS and held at St. John’s. Presenter Dr. Mahin Gosine told the audience, “When I came to this country 30 years ago, you walked 20 blocks and saw one [Caribbean East] Indian. Today you walk one block and see 20 Indians.”

Also in the works is a publication based on the Committee’s symposium on Argentina. The CLACS newsletter, edited by Camacho-Gingerich and issued twice a year, highlights professional activities of its members and relevant events, past and upcoming. It routinely includes a guest column by visiting scholars and diplomats, typically from outside the U.S., that whets the appetite for more information.

A Foundation Knocks

When the directors of nonprofits have pleasant dreams instead of the usual nightmares, one of them probably goes like this: a foundation calls and says it wants to give you money. The dream came true for CLACS.

“A person from Bell Atlantic” said the chair, “called me and said, ‘Bell Atlantic supports academic and cultural organizations your committee has caught our attention, and we would like you to apply was competitive—many other cultural and academic organizations apply. Fortunately, we did get the grant.’ A year after it was awarded, Bell said, ‘I expect this to be continuous—not just one-year partnership’.”

With $10,000 from the Bell Atlantic Foundation, St. John’s will present an international and interdisciplinary symposium, Immigration from Latin America and the Caribbean: Coping in New York City on October 6 and 7 and publish the results of a related study, in book and digital form, later in the year.

David Quintas-Peque, director of government affairs in New York for Bell Atlantic, & The Daily News last year. “We have very little benchmark data on underrepresented populations, such as Latinos, African Americans, Asian Americans, and the whole issue of immigration. This will be a public policy document circulated among key leaders and elected officials to move the agenda forward.”

Camacho-Gingerich received additional good news from the philanthropic front this summer when she learned that Evelyn Veras, a student she nominated, had been selected for a Ga Milemillenium Scholarship. Veras was one of seven...
"Outstanding" Latino/a students who've worked in the CLACS office, from undergrads to graduate research assistants, and are, in turn, mentored by Camacho-Gingerich, who also has been a thesis advisor to some.

In addition to the conferences and symposia organized by CLACS, the Committee also created the Advanced Interdisciplinary Certificate on Latin American and Caribbean Studies. Quickly approved by New York State, it started in 1998, and, says Camacho-Gingerich, is "very popular with our Latino students."

"We have the first truly interdisciplinary program—truly interdisciplinary in the sense that it is housed in the Committee and equally represents all schools of the university—not given by the history department or the department of modern and foreign languages."

The 15-credit graduate certificate is, she says, equivalent to a minor on the undergraduate level. Students must be fluent in Spanish or Portuguese or French, in addition to speaking English, and must take the credits in at least three different fields. A student seeking an M.A. or doctorate in history, for example, could apply three credits, but no more, of the history of Latin America. The other twelve credits must be in at least two other disciplines—political science, education, modern foreign languages, psychology. There is a list of courses from which to choose.

The most popular combination so far, she says, has been history, politics, science, and literature in Spanish, and some business courses.

At an information night held in February about the certificate, the guest speaker was the Honorable Reinaldo E. Rivera, justice of the supreme court of the state of New York. Rivera is one of what seems a steady stream of informed, influential, and often renowned people recruited by CLACS—Carlos Fuentes, for example—who drew a large and enthusiastic crowd.

One of last year's speakers, New York City Comptroller Alan Hevesi, claimed "There has never been a city that is more ethnically diverse than NYC. As we speak, 40 percent of the people who live in N.Y. were born elsewhere. We are the immigrant city; there are 134 languages spoken in our public schools by kids who do not speak English first."

**Latino Students on the Rise**

"The Latino percentage of our student body is increasing very fast," says Camacho-Gingerich, "and reflects the diversity of the city of New York and of the U.S."

"There's a great deal of interest by first, second, and third generation Latino students. The first generation, of course, wants to continue with what they have known and to pursue more advanced studies. The second and third generations are very interested in Latin American studies for professional reasons, as they realize it is the wave of the future, and also for personal identity issues."

The certificate students who are not from a Latino background, she says, realize that they will be facing a Latin population as future clients, and thus are interested for career-related reasons. So would like to work for international companies with branches in Latin America and Caribbean.

**The Chair as Professor**

Camacho-Gingerich told HO that she gets credits off her administration duties for chair CLACS, and teaches two courses each semester on undergraduate, one graduate-level.

"Graduate courses are always Latin American literature, but at the undergraduate level, I teach a contemporary Latin American civilization course." The latter, she explains, explores the future and history of Latin America, and includes both the Latin American and the U.S. perspectives.

When HO last spoke with the CLACS chair she'd just returned from Costa Rica, where she spoke at a conference on globalization.

"There were contradictory thoughts among economists themselves, different points of view," she said. "I gave what I believe it should be, point of view based on several studies that read… Nobody has a final word."

"It is the people who have the technology who will go farthest and fastest, and we have to make sure that technology is shared. I definitely believe very much that there are many, many advantages. Secondly, as we go about it, we have to always see that it is done correctly—that sn
business can exist together with big business—that big companies don’t take over completely the small companies of some nations—that everybody can participate more equally. And again, technology is key. Not every group of citizens has equal access to that technology, and to equal knowledge.

St. John’s Abroad

As HO goes to print, Camacho-Gingerich is in Argentina for St. John’s first-ever study program to be held abroad in a Spanish-speaking country. Students could register for six credits to be earned there, and need letters of recommendation from two language professors.

The University has academic exchange agreements with universities in Argentina, Bolivia, Brazil, Chile, Puerto Rico, Uruguay. The list of schools and countries is always growing, a situation that CLACS no doubt feeds into and is fed by.

Fortunately for Alina Camacho-Gingerich, the Committee activities “are very closely linked to my scholarship, so I see it as a continuation and as a very important contribution.”

Still, she said, “sometimes I wish I had 48 hours in one day.”

CLACS, THE COMMITTEE THAT NEVER SLEEPS

MANY VOICES, MANY VIEWS

Following are excerpts from the CI newsletter’s Guest Column.

“The State of Chiapas has always been a battleground for conflicts: Guatemalan guerrillas, drug trafficking, immigrants from Central America and newcomers from other parts of Mexico, fights among mestizos, peasants and native Indians over land possession, between Catholics and Evangelists over religion. In the midst of all this are timber and other natural resources, all too vulnerable for exploitation.”

“I am convinced that the 21st century will be a century of Noah’s, when human beings will be compelled to save dying ecosystems and species, in biological arks. The moral dilemma reside in which and whom to choose, and what knowledge, or wisdom, we should have.” – Ambassador Homero Aridjis, President, PEN International

“All the creators of significant reforms, dramatically reformed the lives of the classes of society, all the great revolutions of this century, have militarized society in one way or another: some by making the army the arbiter of the revolution, others by giving secret police authority. Mexico, allocated by one single party, has never been a militarized society. In addition, Mexico never had to export its revolution to other countries.”

Friedrich Katz, Department of History, University of Chicago

“Our challenge is to recover our identity, order to do it, we need time. We need time to change the primates of impatience, indifference towards the and the lack of human reflection: we need time, a healing pause; time to transform information into knowledge; time to repair the dream that ambition disdained. The usage of power is sheer mindlessness has inflicted upon our.”

Carlos Ruenes, Mexican novelist and state historian

“The cultural and linguistic diversity of Mexico has a very long history. There are terms as the starting point: Native People Globalization... Globalization leads to the identity, beliefs, global vision of the native and their descendants. In short they run the risk of ceasing to be what they were.” – Dr. Miguel Portilla, Instituto de Historia, UNAM

Minority Scientists, Engineers, and Mathematicians in the Making

MIE a Joint NASA/NSF Endeavor

BY E. LYLE HENDERSON AND GILLIAN FOSTER

Kathy Jiménez, a native of the Dominican Republic, is the first in her family to attend college. The 22-year-old junior from the Universidad Metropolitana in Río Piedras, Puerto Rico, studies biology with a minor in mathematics, and boasts a 3.96 GPA.

Jiménez, who got married last year, is considered one of the shining stars in a program called the Model Institutions for Excellence (MIE), designed to increase the numbers of Hispanic, African American and Native American undergraduate students in science, engineering, and mathematics (SEM).

As President Clinton affirmed in his last State of the Union Address, innovation in science and technology is key not only to the health of the environment but to miraculous improvements in the quality of our lives and advances in the economy.

More than ever, building awareness and interest in science, engineering, and mathematics (SEM) as a degree and long-term career options is paramount. At colleges and universities serving underrepresented populations, improving recruitment and retention rates among students of color remains a concern.

Under an 11-year initiative developed by a collaboration between the National Aeronautics and Space Administration (NASA) and the National Science Foundation (NSF), the MIE program is integrated into the science and technology departments of six higher education institutions. Now in its fifth year, MIE enables the academic units at each institution to provide faculty and staff enhancement programs, support undergraduate scientific research, bolster science curriculum, foster continued learning through internships and mentoring opportunities, and procure modern equipment and facilities. Some schools even offer grants and fellowships to students. The end goal is to encourage these bright and promising students to reach higher, ideally attaining advanced degrees, especially doctorates.

In addition to Universidad Metropolitana, other institutions include Bowie State University, in Bowie, Md.; Ogala Lakota College in Kyle, S.D.; Spelman College in Atlanta, Ga.; the University of Texas at El Paso; and Xavier College at Louisiana, in New Orleans. The six institutions were chosen from a pool of more than 60 colleges and universities for their proven track record in graduating students of color in the sciences.

For Jiménez, the opportunity to study diverse science avenues was a dream come true. Although she is torn between studying medicine and mathematics, she hopes to find a doctoral program that combines both disciplines.

"MIE has helped me tremendously," says Jiménez. "Economically, with books and tuition. Because my tuition is paid for, my only focus is to study. They help me culturally. We go to conferences, and in 1999, I worked at the Biosphere II Center in Arizona. Then they help you scientifically, because when you enter into a program, you can be anything you want to be."

The MIE program addresses President Clinton’s concerns for scientific preparedness for competitiveness in the 21st c. In 1993, only 10 percent of less than 32,000 Americans earned graduate science and engineering programs were students of color. Our nation is to compete in the global marketplace, secure the necessary commitment from industry leaders to that today's students are scientifically and mathematically literate. We recognize the need for a diverse, highly skilled workforce to shepherd pioneering scientific research well into the mills and beyond. It is only fitting that the scientific and technological community invest now in programs like MIE to inspire the brightest minds for future long-term success.

Brisa Sánchez is a senior majoring in mathematics at the University of Texas at El Paso. Originally from Mexico, she
the first generation in her family to attend college. She wants to continue with her education—and eventually get her doctorate in statistics. Her interest, she says, is how statistics is applied to biomedical sciences. MIE helped her discover this interest.

"Last year, I went to the summer research program at Cornell University," says Sánchez. "We researched prostate cancer, and analyzed data sets using statistics to discover what the probability was of a person getting cancer."

"I want to be able to help people in some way," Sánchez says. "I feel I have received a lot—like the parable of the talents in the Bible...I feel as if I have received my talents."

Gustavo Martínez, who also attends UTEP, is a senior majoring in electrical engineering. He also hails from Mexico and is the first of his family to attend college. He attended the MIE's 5th Annual Conference, where his oral presentation, "Design and Implementation of Cooperative Mobile Robots," was well received. His immediate plan is to continue with his cooperative education internship through the MIE program at Adelphi Automobile and then look into getting his master's degree. The most valuable part of the program, Martínez says, was the mentoring. His mentor taught him how to do research and represent his projects.

Mentoring has always been an important component of the MIE program and viewed as a critical ingredient in encouraging the students to continue their education. The MIE program has instituted the Pathfinder Program, offering students mentoring from professionals in the field of their interest. The purpose is to encourage students to seek advanced SEM degrees. The ideal Pathfinder is a person with a master's degree or a doctorate who has been in his or her field for fewer than 10 years. While the program is not limited to non-white professionals, students have expressed a collective desire to meet and speak with professionals from underrepresented populations who can discuss how race and culture affected their school experience, and combating racism in the workplace.

Gabriel Bujazda, a second-generation Mexican American and a senior at UTEP majoring in metallurgy, agreed that mentoring is definitely the most important aspect of the program. The young man, whom friends dub "el profesor," says that his positive experience with his mentor in the MIE program is one of the things that convinced him to go into teaching. Although he plans to pursue a doctorate in material sciences, his lifelong dream is to teach, possibly physics or calculus in high school.

"I want to do something that can effect social change," Bujazda says. "The experience that I have had through the MIE program will enable me to help people a lot more.

All of the students speak in reverent tones about the hands-on experience they receive through the program. Lyamaris Delgado and Waleska Rivera-Ríos are on full scholarship at the Universidad Metropolitana. Both are environmental science majors who have spent their summers conducting research at world-renowned state-side laboratories.

Last summer, Delgado attended the Biosphere II Center in Arizona, and this year she's been accepted to the University of Minnesota, where she will work specifically with environmental chemistry, water, soil. Rivera-Ríos attended National Center for ATMOSP Research in Colorado and ex to do so for the next three semesters. A veteran of the MIE at conferences, she is enthusiastic about the opportunities the conference has provided. "If I hadn't seen UMET, I wouldn't have been able to go to Colorado last summer," National Center for ATMOSP Research," she says.

Each MIE annual conference hosted by a member institution, enabling faculty, staff, and students to visit one another and see the programs adjust to each institution's unique culture and local. The Oglala Lakota College, 4th Annual Conference next April, the 6th Annual Conference will be held at a University of Texas at El Paso.

All of the students agree these conferences are one of the most important benefits of being an MIE institution. Students meet, display poster presenters of their research, and conduct presentations. For many, the not only representing themselves but their schools and their culture. It is that sense of obligation to give back that carries many of them through their academic career.

In determined English, Ji describes the freedom of acceptance on her own terms. Universidad Metropolitana says that she has allegiance to gender and nationality. "I am proud," she said. "I am a Christian...and a woman. They don't discriminate."

"If I were to return to the Dominican Republic, I want to help the people who need me. I want to serve the world needs me."
Professor and Students Tour in Selena Forever

Coming Home to Southwest Community College

by José A. Álvarez

His first national play might never make it to Broadway, but the experience that Latino theatre director William “Bill” Virchis gained directing Selena Forever, a musical based on the life of slain Tejano singer Selena Quintanilla Pérez, is bound to go further.

“I am the David of theatre. I killed a lot of birds with one stone,” said Virchis, referring to being able to direct the musical and get eight of his students to be interns in the play. He’ll also use his experience directing Selena Forever when he returns to the classroom next fall. “When you have that chance, why not take advantage of it,” added Virchis.

Virchis, who’s been teaching theatre at Southwestern Community College in Chula Vista, California, for more than 25 years, agreed to direct Selena Forever only if he was allowed to write a prompt book and an academic paper highlighting the differences between education and professional theatre. In his contract, he also stipulated that some of his students would be hired to work as interns in different areas of the production.

“Impressive experience”

“Education is about experience, and what better way to be educated than to be there. This is an impressive experience to bring to the classroom,” explained Virchis. “My students had to learn from this.”

Directing Selena Forever has been an educational experience for Virchis as well. He had to learn how to handle the pressures and stresses of working with producers, designers, technicians, and actors, all with different artistic points of view and each one with a personal agenda.

“I had to keep the oceans calmed, earn their trust. That was the biggest pressure,” said Virchis.

Another challenge was working in a production with a multimillion-dollar budget and counting on non-professional actors. The two leading actresses—two had to be hired because each presentation included at least 14 musical numbers and the voice of the actresses had to be protected—and the secondary had little if any acting experience.

“They’re all beginners, don’t have a lot of acting experience. That was a challenge,” explained Virchis, adding that “sometimes it’s more” and that if the girls are there, it will last you forever.”

“Pure accident”

That same mentality has the college professor the late Latino theatre director in the Diego area. Born in Mexico, Virchis, 55, became interes
acting at age seven, watching his mother read poetry at parties and family gatherings.

"I loved to see the influence she had over people," said Vorchis, who arrived in San Diego by "pure accident." The family, en route to Los Angeles from Mexico City, decided to stay in Chula Vista, 10 miles south of San Diego, after his mother saw a house on the way and fell in love with it. Vorchis has not left Chula Vista since then.

"I love the power of drama because it allows you to communicate other people's flaws," added Vorchis, explaining that even though he fell in love with theatre at an early age, "I never thought I'd become a professional director or actor." As a matter of fact, Vorchis, the second of three brothers and father of two, wanted to be a psychiatrist to "solve other people's problems." However, acting and Spanish classes always accompanied his psychology and psychiatry courses. His goal was to major in psychiatry, theatre, and Spanish. He did not want to lose his native tongue.

"I was losing my Spanish," explained the professor, adding that it was "another accident" that his three goals fused into one.

That accident happened in 1971, when his high school drama teacher had a heart attack and he was asked to replace her. He taught theatre for one year at his alma mater but left one year later because "I was not allowed to do what I wanted."

He also had plans to move to New York to continue studying theatre, but he never made it. In 1973, he was offered a teaching position at Southwestern College, and he's been there ever since.

Vorchis has directed and acted in many plays that have resulted in innumerable awards and other recognitions. He's been artistic director and mentor to a number of local theatre groups. At the moment, he is artistic director of Teatro Macara Mágica, one of the leading Latino theatre troupes in San Diego. And he is president of Virco Enterprises, a local company that coordinates special events for television.

At the beginning, due to the lack of Latino material, Vorchis acted in and directed plays of all kinds. However, in the last few years, he's made the transition and now only directs Latino productions, whether it's from his stage in Maya Hall at Southwestern College or at other venues throughout San Diego.

Vorchis has gone back to his roots, just as Selena did before she became famous.

"She had to go back to Mexico, had to learn Spanish. Her first hits were in Spanish," said Vorchis, who admits he listened to Selena's music but did not consider himself a "true" fan. But entering Selena's world, he said, brought "an amazing awareness" that has made him a great admirer.

"How could you not become a fan if you are completely immersed in her world?" asked the director, adding that while taking a closer look at Selena's life, he discovered they had several things in common. Both entered the entertainment world as children, both were greatly influenced by their parents, and the two of them had to go back to their roots to achieve success. "She had to come home. That is exactly what I am doing."
We're going to the movies," assured Virchis. "We had discussions every day about how we were going to reach this market. Producers thought that everybody knew Selena, that people would come out just because of name recognition."

They did not listen, insisted the director, who strongly believes that in order for a Latino play to be successful and reach its desired audience, it needs to be produced by people who understand the Hispanic culture.

"We need our own producers, our own directors, our own people to produce our plays," said Virchis, convinced that "if we Latinos don't support our own products, producers won't put up the money."

Another Lesson Learned

When Virchis agreed to take a sabbatical from Southwestern College to direct Selena forever, he felt confident that the play would have an impact.

It definitely has had an impact on him. "Now I know why it's called show business. The bottom line is the bottom line. Profit is what they are interested in," stated Virchis. "It makes me mad that another Latino show that had the potential to cross over is now dead."

But despite all the problems, Virchis said that he is proud to have been involved in a play that promoted the Latino pride and culture. "It's the greatest educational experience I've ever had," said the director, adding, "My students did a great job they rose to the occasion."

Now Virchis is back in the classroom with another lesson to teach his students. And even though Selena forever is no longer, the director has vowed that audiences in Los Angeles and San Diego will get to see the play. It won't be the $2 million dollar production, but they'll get to see it. He'll make sure they do.

"I know I'll do this play someday," assured the professor, who is now preparing for his world college premiere of Cappeman, the play by Paul Simon. "I like this kind of shows. The risks are high, but the rewards are high."

After all, the Selena Quintanilla Pérez-William "Bill" Virchis union seemed to be fading. Before the producers approached him to direct the national musical, he was already experimenting with some Selena scripts of his own, particularly one written by one of his students.

"The play is really good. I love it because it's a woman in this macho culture that says, 'I can do it,'" said Virchis. "It's a play that people, especially kids, should get to see because it's about family and dreams."

Selena Forever, like the singer herself, saw a premature death, but for Virchis, "life goes on." He still dreams about making it to Broadway, but for the director, the future is now.

"Making it to Broadway is every director's and actor's dream," Virchis said. But for him, there are other priorities at the moment: college, his local productions, most important, his students.

He says he will continue activism by bringing more Latins to the stage. He acknowledges that as world moves on to a Latino major, he will continue to move with it.

"I am very fortunate that professional trajectory always been upward bound," said Virchis vowing to continue presenting Latino culture to a wider audience. He'll also continue to give his students any opportunity that comes his way. "My focus has always been to speak of my culture. As a Latín, it's my responsibility because if don't do it, who is going to?"

**UNIVERSITY OF CALIFORNIA, DAVIS**

**Environmental Engineering**

**Faculty Position Available**

The Department of Civil and Environmental Engineering at UC Davis invites applications and nominations for a tenure-track position in environmental engineering with specialization in biological systems and treatment. The position is open at Assistant and Associate Professor levels. Requirements include a doctorate in engineering and a demonstrated record of success in, or evidence of outstanding potential for, both teaching and building a vigorous independent research program. The successful candidate will have a strong background in and interest in water and wastewater quality and applying advances in the biological sciences to process design.

Areas of special interest include, but are not limited to, microbial ecology, application of molecular tools, public health, and non-point source pollution. Experience with municipal wastewater or water treatment plants and formal training in computational methods is desirable. She/he will join departmental colleagues in teaching undergraduate courses in environmental engineering and graduate courses related to water and wastewater treatment as well as biological systems.

To be assured of consideration, applications must be submitted by October 2, 2000. Applicants should submit a complete resume, including a statement of teaching and research interests, transcripts, a list of relevant professional experience and publications, and the name, mailing address, telephone number, and e-mail address of three references to

**Jannie L. Darby, Professor**

**Department of Civil and Environmental Engineering**

**University of California**

**One Shields Avenue**

**Davis, CA 95616-5294**

E-mail inquiries may be addressed to jdarby@ucdavis.edu

Information about the department can be found at [http://cee.engr.ucdavis.edu/](http://cee.engr.ucdavis.edu/)

---

**Nebraska**

**UNIVERSITY OF NEBRASKA - LINCOLN**

**DEAN**

**College of Law**

The University of Nebraska-Lincoln invites applications and nominations for the position of Dean of the College of Law. Established in 1891, the College of Law has 29 faculty members and serves more than 400 students.

The Dean is the chief academic and administrative officer of the College of Law. Candidates should have an outstanding academic record, a strong commitment to excellence in professional education and research, the ability to deal effectively with a broad range of constituencies, and the skills necessary to lead a complex and dynamic academic institution.

The position is available on or before July 1, 2001. Additional information about the College can be found at [www.unl.edu/lawcol/](http://www.unl.edu/lawcol/). Applications should be received by October 15, 2000 to ensure full consideration and should include letter of interest, curriculum vitae, and information on references. Contact Professor Robert C. Denicola, Chair, Dean Search Committee, College of Law, University of Nebraska-Lincoln, Lincoln, NE 68583-0902; Telephone (402) 472-1253; Fax: (402) 472-5185; E-mail: rdenicola@unl.edu.

The University of Nebraska is committed to a pluralistic campus community through affirmative action and equal opportunity and is responsive to the needs of dual career couples. We assure reasonable accommodation under the America with Disabilities Act. Contact Professor Robert C. Denicola at (402) 472-1253 for assistance.
Macías Harrison New Crafton Hills President

The San Bernardino Community College District (Calif.) board of trustees, in a unanimous vote, appointed Gloria Macías Harrison president of Crafton Hills College (CHC). Former CHC vice president of instruction, she replaces Dr. Luis Gomez, who retired June 30 after 10 years as president.

Macías Harrison worked at San Bernardino Valley College (SBVC) for 25 years, as a Spanish instructor, department chair in foreign languages, and humanities chair. She is the founder of El Chicano newspaper, and with her family—husband Bill and children Diana and William—publishes nine other weeklies in San Bernardino and San Diego counties.

Macías Harrison holds an associate’s degree from SBVC and a bachelor’s and master’s from the University of California-Riverside.

Cal State-Northridge Honors Top Graduates

Gina García and Julio Ortiz were among eight CSU-Northridge graduates who received special recognition at the 18th annual Honors Convocation.

García received an Outstanding Graduating Senior Award from the Karen, Leon, and Rita Goldstein-Sauter Memorial for excelling in academia, contributions to school and community, and exceptional achievements. An honors student, García, who earned a bachelor’s degree, was president of the Latino Business Association and interned for Mattel, Inc.

The Alumni Association gave the Outstanding Graduating Senior Award to Ortiz, who graduated with two majors. He founded the journalism department’s Spanish Valley View News, which allows bilingual journalism students to expand their experiences and prepares them for the working world.

Penn State Researcher Envisions Democracy in Cuba

A democratic government and political freedom could be authentic possibilities for post-Castro Cuba, if pre-Castro history is any guide, a Pennsylvania State University researcher says.

“Casual observers of Cuban history might see only two choices after Castro—the rule of entrenched wealth and military dictatorship à la Batista, or a continuation of Castro’s socialist revolution,” says Dr. Charles D. Ameringer, professor emeritus of Latin American history at Penn State. “However, a third option could be real democracy, which had a little-remembered trial run in Cuba between 1944 and 1952.”

Ameringer wrote The Cuban Democratic Experience: The Autonomic Years, 1944-1952, published recently by the University Press of Florida.

“The Cuban Revolutionary Party-Autonomic administrations of Ramon Grau San Martin and Carlos Prio Socarras, though marred by serious flaws, together represented a unique era in Cuban history,” Ameringer notes. “In two free elections (1944 and 1948), Cubans had their first chance to vote for a government committed to protecting civil liberties, promoting Cuban culture, and achieving economic independence.”

Classical Guitarist in Concert at Grand Valley State

In Michigan, classical guitarist and former faculty member Guillermo Fierens appeared in concert at Grand Valley State University’s Performing Arts Center.

Celebrated as one of the world’s foremost classical guitarists and acclaimed for his technique and interpretations, Fierens’ appearance was the centerpiece of a reunion of the Thomas Jefferson Coll of the GVS colleges from 1968 to 1st Argentina-born artist, who perform wide, was a protégé of the legendary Segovia, who guided him to his pro debut in Spain in 1963.

Colorado State Substance Abuse Program Recognized Nationally

DARE To Be You, a program deve Colorado State University Coop Extension, received the Exemplary Substance Abuse Prevention Program Award in Washington, D.C.

The award, given by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’S) Center for Substance Abuse Prevents recognizes programs that excelling effective prevention strategies to diverse needs of youth, parents, family communities. DARE To Be You at Color Cooperative Extension is among 31 pro 26 states to receive the award this year.

The award-winning programs “tales of what thousands of commun and must do if we, as a nation, are to reduce levels of substance abuse, e among young people,” said Nebda (picturing), SAMHSA administrator.

Honorary Degree to Sepulveda from Hunter

Hunter College of The City Univ New York (CUNY) conferred an h degree on John U. Sepulveda, deputy of the U.S. Office of Personnel Manag
Sepulveda, valedictorian of the Hunter College Class of 1977, received a Doctor of Humane Letters.

A New York native of Puerto Rican descent, Sepulveda entered Hunter through the SEEK program for disadvantaged students. He later earned two master's degrees in political science at Yale University and taught at both Yale and Hunter. Sepulveda became the highest-ranking CNY graduate in the executive branch after President Clinton nominated him for his present position.

Hunter President David A. Caputo (shown r.) presented the award to Sepulveda (l.).

**Rancho Santiago Hosts Border Trade Conference**

Trade between Mexico and California was the topic of a two-day conference hosted by California's Rancho Santiago Community College District. Members of the International Consortium for Education and Economic Development and of the California Mexico Trade Assistance Centers convened in Santa Ana to explore collaboration among educational institutions.

"Rancho Santiago Community College District has a strong commitment to helping educational and commercial institutions collaborate. Bringing these parties together in this region that is so influenced by its neighbor to the south is bound to reap economic rewards," said Francisco Bertot, director of the college district's Center for International Trade Development.

**ESPN/ESPN2 Add Accent Marks to Hispanic Names**

ESPN and ESPN2 are the first national networks to incorporate Spanish accent marks and the Spanish alphabet when graphically presenting the names of Hispanic Major League Baseball players. ESPN and ESPN2 have been using these marks since the beginning of the 2000 season. SportsCenter, Baseball Tonight, and Baseball 2Day were the first programs to adopt the marks.

Tim Scanlan, ESPN coordinating producer for Major League Baseball, reviewed a letter from a viewer wondering why Hispanic names were not spelled with their related accent marks. ESPN took action.

"It is a very simple addition which shows our dedication to detail and our respect for the Hispanic players and their heritage," said Scanlan.

**ACE/AAUP Studies Validate Benefits of Diversity**

Proponents have long argued that diversity benefits students and faculty. A new publication by the American Council on Education (ACE) and the American Association of University Professors (AAUP) provides empirical evidence. The report "Does Diversity Make a Difference? Three Research Studies on Diversity in College Classrooms" compiles data on the ways in which racial and ethnic diversity advance the robust exchange of ideas on campus.

"The evidence presented in this report demonstrates that campus diversity provides educational benefits for all students—minority and white alike—and that these benefits cannot be duplicated in a racially and ethnically homogenous academic setting," said ACE President Stanley O. Ikenberry.

**Conference on Music of the West Held in Boulder**

A conference and music festival celebrating the cultural diversity of the American West was offered by the Center of the American West at the University of Colorado-Boulder.

"Listening to the West: Music in the Soul of a Region" featured free music performances on the lawn of Boulder's historic Chautauqua Park by Tish Hinojosa, Antonia Apodaca, Ramblin' Jack Elliot, Calvin Standing Bear, the Hot Club of Cow Town, and many others.

Discussions included Patricia Nelson Limerick, acclaimed American West historian at Colorado-Boulder; musicologists Thomas Riis and Brenda Romero of the Colorado-Boulder College of Music; David Wrobel, an expert in American pop music; and José Limón, professor of English, Mexican-American studies, and anthropology at the University of Texas-Austin.

**Fullerton Honors Top Scholars**

Fullerton College (Calif.) named Steven Ortiz Man of the Year for his outstanding academic achievement and community service.

Ortiz, a chemistry major, was named a First Team member of the All-California Academic Team and was nominated to the All-USA Academic Team. As recruitment chair of the Capital Campaign Fund, he helps more than $1.5 million for earthquake projects and volunteered more than 100 hours at Los Angeles County Hospital plans to attend the University of Cal. Irvine and then pursue a medical degree to become a family practice doctor.

Fullerton also named sociology Senshine Lawson Woman of the Year as a top scholar of 2000 Men and Women of Distinction.

**Texas-San Antonio Students Ti and Learn in Mexico**

Five University of Tex Antonio (UTSA) students spent a week in bilingual education ed their world during a visit to Saltillo, Coahuila, Mexico.

On a teach-and-learn mission, the students visited elementary classrooms in rural mountain areas. They met with 10 students, and teachers and heard lecturing the Mexican educational system at the Normal School. Later in the week, the students taught a lesson to a group of children. When they returned to UTSA, the students gave presentations to their peers.

The Alcalde Initiative, which made possible, is a five-year project admin by the UTSA Division of Bicultural-Bi Studies and funded by the Kellogg Foundation through the Intercultural Development Research Association, in cooperation with the Mexican American Solidarity Foundation.

**Heritage Scholars Enjoy Presidential Fellowship**

Eight students spent the 199 academic year as the Heritage College (Wash.) Presidential program. Alexandra Fuentes, Maria Alicia Campos, Laura Salinas, Susie I Melissa Grenz, Sarah Lemlie, and Walters received valuable leadership tory shadowing Heritage College Pr Kathleen Ross and other college and community leaders.

The Presidential Fellows program gives students the chance to work with high-ranking administrators and community leaders — gaining insight into leadership styles in various settings. Students see firsthand how leaders act within a range of professional settings.
Texas-Austin Hispanic Leaders Hold Conference

The University of Texas (UT)-Austin Hispanic Faculty/Staff Association held its second annual leadership conference, which is designed to promote communication and networking among Hispanics and serve as a voice for professional issues. The conference also strives to promote career growth development and initial employment of Hispanics at UT-Austin and expand opportunities for cultural and social interaction for Hispanic professionals, said association co-chair Rebecca Treviño.

A.R. "Tony" Sanchez Jr., a member of the UT System's board of regents, was the keynote speaker. Sanchez is a member of many committees, including the Special Committee on Minorities and Women.

Two UT-Austin employees—Dr. Juan Sanchez, vice president for research, and Dr. Margarita Arellano, associate dean of students—were honored during the conference.

San Diego State Latinas Excel and Achieve

In California, the following three San Diego State University (SDSU) students provide profiles of excellence and determination:

 INFORMATION DECISION SYSTEMS MAJOR Marybelle Melcher, crossed the U.S.-Mexico border alone as a teenager, driven by a desire to achieve a better life. Melcher lived in shelters but refused handouts, took on menial jobs, obtained a green card, gained citizenship, and graduated SDSU in the spring.

INTERNATIONAL BUSINESS MAJOR Juanita Rodriguez (pictured) is the first in her family of six siblings to attend college. Rodriguez and her family—her parents are both lifelong minimum-wage farmworkers—worked extra hours so she could afford college and study abroad in Chile, Mexico, and Quebec. Thanks to her poise and outstanding academic record, Rodriguez became SDSU's first Coca-Cola International Scholar.

Psychology and sociology double-major Linda Jasso is the only daughter of 11 children and the first in her family to pursue an advanced degree. Participating in the McNair Scholars Program—which assists low-income, first-generation and/or underrepresented university students—she overcame many obstacles and is relocating to Harvard University, where she has been admitted to the graduate program in education.

Pensacola Honors Ward for Excellence

Pensacola Junior College (Fla.) gave Zeida Ward a Teaching Excellence Award. The College's Academy of Teaching Excellence was established in 1996 to recognize outstanding faculty. Four to six full-time faculty and one adjunct are inducted into the academy annually.

A native of Havana, Cuba, Ward came to the United States at the age of 12. She has a bachelor's degree and a master's from the University of West Florida and another master's from the University of California-Berkeley, where she completed her doctoral coursework in Hispanic languages and literature. Recently, she has been researching and developing Spanish language software.

Pantoja Given Honorary Degree by The New School

New School University (N.Y.) awarded an honorary degree to Dr. Antonia Pantoja, who has dedicated her life to community development.

Pantoja designed, organized, and directed ASPIRA, which serves Puerto Rican youth in New Jersey, New York, Illinois, Pennsylvania, and Puerto Rico. Her philosophy, symbolized by ASPIRA, involves the assumption and belief that people are capable of creating the resources they need through their intelligence and their work. Other organizations with which she has been active include the Puerto Rican Association for Community Affairs (founded as the Hispanic Youth Association) and the Puerto Rican Forum.

Eastern Washington Students Receive Scholarships

At Eastern Washington University, $2,000 Chic Education Presidential Scholarships were given to Delia Hernandez, Dolores Cervantes, Jaime Sanchez, $1,500 Wittenbach Scholarships went to Wendy Lopez and Miranda. Cindy Garcia was given a $1,000 Luco Scholarship. Isabel Sanchez Zamarra and Brenda Rubio each won a $1,000 Ethnic Studies Scholarship. Evangelina Ravelo received a $500 Avila Scholarship and I Romero was given a $500 Jansen Scholarship.

Michigan-Flint Creates Internemic Student Organization

Students from abroad who are attending the University of Michigan (UM)-Flint have a group they can call their own—the International Student Organization (ISO).

Most student organizations meet monthly. ISO often meets weekly because members enjoy sharing ideas about adjusting to life in a new country. ISO President Isabella Laszlo, who is from Colombia, says of the students from Japan and the Bahamas, "time to talk to them, I learn something new.

Dr. Ricardo Alfaro (pictured), co-director of international studies, believes a group like this nurture benefits everyone. "This opportunity to meet students from other countries will help us all to open our minds to cultures," said Alfaro.

Cal State-Northridge Students Battle Odds to Graduate

Carmen Patricia Tovar, a native of Mexico, immigrated to East Los Angeles in 1994 at age 15. "My first whole immersion into the English language and into the culture was when I got to CSUN in 1995," said Tovar, 25. "My family and all of my friends were Spanish-speaking, so I never had to speak English other than in the classroom." Tovar left home at 5:45 a.m. for an hour bus ride to and from CSUN. Once
in campus activities, she would return home at 11 p.m. A top student in many of her classes, Tovar now wants to get her doctorate and become a professor of American literature.

Kent Tablada, 43, came with his wife to America from Belize in 1981, seeking a better life. He first struggled in low-level jobs; then became a machinist, working freelance sales on the side. All the while he supported a succession of friends and family members who also moved from Belize to California. He began attending CSUN in 1992 and, despite a few setbacks, has been admitted to a master's program in psychology. He hopes to eventually earn a doctorate and "play a greater role in society."

Johnnie García-Chávez, 28, first attended CSUN in 1990. The mother of two daughters, one disabled, García-Chávez started full-time a few years ago in the hope of graduating and getting a job teaching physical education to disabled students. "Even if it took me a while, I knew I would graduate," she said.

Edinboro Hosts Latino Leadership Program

Edinboro University of Pennsylvania, along with GE Transportation Systems, GE Lighting, and the GE Hispanic Forum chapters of Erie and Cleveland, hosted and sponsored the third annual Latino Leadership Development Program. More than 70 Latino high school students from Erie, Pittsburgh, Cleveland, and Philadelphia participated in the weeklong, residential program geared toward increasing the number of Latinos attending college. The program was an official event of TOGETHER 2000, Erie's celebration of the new millennium.

Pictured (l, to r): Dr. Denise Ohter, Edinboro's associate dean of enrollment management and director of career services; Wilfredo Velez, case manager at Erie's Perseus House; Dr. Frank Pogue, Edinboro president; Dr. Jerry Kiel, associate vice president for enrollment management and retention; and Kristine Jackson, IMPACT Program coordinator at Esperanza in Cleveland.

Urange Elected a Trustee of Long Beach CCD

Long Beach, Calif., city personnel recruiter Roberto Urange was sworn in as a member of the board of trustees of the Long Beach Community College District (LBCCD).

A graduate of CSU-Long Beach, Urange is the first Latino to serve on the LBCCD board. He worked at CSULB from 1978-85, before joining the city staff. He has been president and state deputy director of the League of United Latin American Citizens, president of the Long Beach Unified School District Advisory Committee, president of the Hispanic Business Association, and founder and president of the Latino Leadership Council.

Miami-Dade Newsmakers

Gina Cortés-Suárez (l), dean of academic affairs at Miami-Dade Community College's (M-DCCs) Kendall Campus in Florida, was one of thirty-three community college leaders nationwide who attended the 2000 Executive Leadership Institute in California, created to give potential community college presidents a chance to review their abilities and interests, refine their skills, and discuss leadership with their peers throughout North America.

Max Rodriguez (r.), special program coordinator for M-DCCs Kendall Campus, received a National Hurricane Conference Outstanding Achievement Award. The conference is the leading national forum for the education and training of experts from meteorological fields and disaster response organizations. Rodriguez was cited for "outstanding educational activities on preparedness and response." He also designed mazes hurricane damage map.

Oregon State Honored for Cross-Cultural Class

The Oregon Department of Education honored Oregon State University for a unique undergraduate course in which students worked directly with farmers, migrant workers, educators, and others to learn about multicultural issues surrounding a cultural labor in Oregon.

The class, Cross-cultural Perspectives in Agricultural Labor: Learning Through Listen, explored the learning process through action research.

Dwaine Plaza, assistant professor of sociology (l), with the department of ethnic studies; Geoffrey Habron, a graduate student who worked as course facilitator and is now assistant professor at Michigan State University, were recognized as Oregen Innovators in Education.

University of Texas-San Antonio Newsmakers

The University of Texas-San Antonio (UTSA) named Georg Morales director of facilities services. He will oversee plant operations for UTSA's 1604 and Insti of Texan Cultures campuses and a resource for the Downtown Campus. A professional engineer, Morales has managed plant operations at Angelo State University, UT-Brownsville, and Texas A&M Technical College-Harlingen. His 20-
career includes experience in maintenance, design, and construction in the health care, petrochemical, and manufacturing industries.

Sonia Campos, a May master's graduate, is one of two UTSA alumnae to recently receive a Fulbright teaching fellowship. One of eight children, Campos grew up in San Antonio speaking Spanish and English. Having traveled much of the world, she applied for Turkey as her Fulbright destination, and is due there in September to teach alongside Turkish professors. Holly Hansen-Thomas, a 1999 master's graduate, also received a Fulbright fellowship. She will teach in Hungary.

LIU-Brooklyn Holds “Ethnicity, Health, and Aging” Conference

Long Island University-Brooklyn (N.Y.) held a wide-ranging, one-day conference for professionals on “Ethnicity, Health, and Aging.” Professor Beverly P. Lyons, director of the Institute on Aging, was conference coordinator.

The Institute is part of an initiative to make Brooklyn a leading center for graduate and postgraduate study in ethnogerontology—the study of the role of culture and ethnicity in human development.

The conference aimed to increase awareness of the cultural values and health care beliefs and practices of older ethnic and immigrant groups; to examine the barriers blocking use of and delivery of services to this population; and to share useful strategies for working with diverse peoples in the later stages of life. José Ortiz Ortiz (picted), associate executive director of the Spanish Speaking Elderly Council-RAICES, was a keynote speaker.

ETS Projects Growth in Minority Enrollment

The number of undergraduates qualified to attend colleges and universities across the United States will swell by 19 percent—or 26 million students—between 1995 and 2015, with minority students making up 80 percent of the increase, according to a report released by the Educational Testing Service (ETS). The study, “Crossing the Great Divide: Can We Achieve Equity When Generation Y Goes to College,” projects that minority student enrollment will rise both in absolute number of students, up about 2 million, and in percentage terms, growing from 25.1 percent of overall undergraduate enrollment in 1995 to 37.2 percent in 2015.

A press conference in Washington, D.C., was held to discuss the report. Speakers included Anthony P. Carnevale, vice president for public leadership, ETS; Rep. Ruben Hinojosa, chair, Education Task Force, Congressional Hispanic Caucus; Dr. Sonia Hernández, deputy superintendent for curriculum and instruction, California Department of Education, and commissioner, White House Initiative on Educational Excellence for Hispanic Americans; and Art Ruiz, federal affairs director, State Farm Insurance.

Crafton Hills College Newsmakers

Noemi Espinoza and Mayda Gómez (picted 1. to r.) received Crafton Hills College (Calif.) MEChA (Movimiento Estudiantil Chicano de Aztlán) scholarships at the College’s Honors Celebration. Gómez also was awarded a Redlands Sunrise Rotary Scholarship, a Re-Entering Student Scholarship, the Roger C. Anton Memorial Scholarship, and a Medal of Distinction. Both students are majoring in liberal studies and are interested in becoming teachers.

María Arechiga (picted with her father, Guadalupe Martínez) received the Crafton Hills College Latino Faculty Scholarship. A liberal studies major, she received the scholarship at the Honors Celebration, which recognized outstanding students.

Citrus College Holds 11th Annul Latino Youth Conference

With a Latino student population of more than 35 percent and classification by the Office of Education as a Hispanic-serving institution, the Citrus College (Calif.) Latino Recruitment Committee established the annual Latino Youth Conference as a way to enlighten, motivate, and eliminate the barriers facing young Latinos and their pursuit of a postsecondary education.

A highlight was the presentation of a scholarship by the Latino-owned P Corporation, key conference sponsor. Citrus student Leticia Guerrero, a second child development major, Guerrero is pictured here (l.) with José Navarro (r.), a archway winner attending UCLA.

García in New Post at Arizona State

Mildred García, author and national activity on administration, faculty developer diversity in higher education, recently became the vice provost for academic personnel at Arizona State University (ASU)-West. García joined ASU-West in 1997 as associate vice provost for academic affairs. She also has been associate director of ASU’s His Research Center.

Prior to joining ASU-West, Garcia was assistant VP for academic affairs at Mount State University (N.J.). She is a board member of the American Association of Higher Education, serves on several editorial boards, and a trustee of Berkeley Colleges. Her books, Affirmative Action’s Testament: Hope and To Form a Perfect Union, are nationally. Another, Succeeding in Academic Career: A Guide for Faculty, is now in press.

Garza Elected AAUW-Texas President

Dr. Nora R. Garza, dean of general education at Laredo Community College (LCC), was elected president of the American Association of University Women (AAUW)-Texas for the next biennium.
Garza’s appointment was announced during an AAUW-Texas convention. Delegates from 52 Texas branches met for leadership development and to vote on important issues. Nearly 4,000 women and men belong to AAUW-Texas, which promotes education and equity for all women and girls, lifelong learning, and positive societal change.

Prior to her state appointment, Garza was president of the local branch of AAUW for 1999-2000. An employee of LCC since 1977, Garza is a graduate of Our Lady of the Lake College and UT-Austin.

Puerto Rican Writers Visit New York University

Six major writers of Puerto Rican ancestry—acclaimed poets Willie Perdomo, Sandra Maria Esteves, and José Luis Vega; playwright Carmen Rivera; novelist Edgardo Vega Yunqué; and Nuyorican Poets Café founder Miguel Algarín—read from their works and discussed the current and future state of Puerto Rican writing at New York University (NYU)

Esteves is one of the founding poets of the Nuyorican poetry movement; Perdomo is an acclaimed poet who joined the Nuyorican Poets Café in 1990; Rivera, an NYU alumna, co-founded the Latino Experimental Fantastic Theater as a writer and actress; Vega Yunqué founded the Clemente Soto Vélez Community Center; Vega is a professor of literature and dean of humanities at the University of Puerto Rico; and Algarín, who was the evening’s emcee, is associate professor of English at Rutgers University (N.J.).

Dallas District Promotes Gardea

In Texas, Dr. Corina Gardea, who spearheaded the community outreach initiatives for Dallas County Community College District’s (DCCCD’s) Rising Star Scholarship program, was promoted to executive director of Educational Partnerships. In addition to overseeing Rising Star, Gardea is now responsible for community development, educational partnerships with business and industry, and alliances with K-12 and university systems.

Gardea aims to strengthen current partnerships and create new ones that will open doors for individuals seeking educational and employment opportunities.

The Rising Star Scholarship program is funded by a $32 million endowment. “There are many examples of scholarships that go to waste because no one applies for them,” said Betheny Reid, executive director of the DCCCD Foundation. “Because of the work Dr. Gardea did in the Southern Dallas County High Schools, lack of applicants is not going to be a problem for us.”

NH holds Youth Session at New Mexico

The National Hispanic Institute (NHI) hosted more than 150 Hispanic students from New Mexico and surrounding states at the University of New Mexico for the 12th consecutive program of the Lorenzo de Zavala (LDZ) Youth Legislative Session.

Ernesto Nieto, president and founder of NHI, says the session is a crucial learning experience for Latino youth. “The best gift parents can give their children,” he states, “is the self-confidence and self-esteem that comes from experiences like the LDZ. As 15- and 16-year-olds, children start learning to see themselves as having important roles to play in the larger community as future leaders.”

Since 1981, NHI has worked with academic-achieving Hispanic youth from across the country to try to increase the number of students who attend and finish college. To date, more than 35,000 youth have participated in its programs.

Eastern New Mexico-Roswell Receives Federal Grant

Eastern New Mexico University (ENMU)-Roswell will receive a $1.8 million Title V Developing Hispanic-Serving Institutions grant, $377,250 a year for the next five years. The University will use the funds to improve access and success of ENMU’s large percentage of Hispanic and low-income students who previously have been underserved and underrepresented in higher education.

ENMU-Roswell proposes to increase the percentage of students who transition from adult basic education and English-as-a-second language programs into college and reduce student attrition from college programs from fall to fall.

Getty Trust Names New Museum Director

Barry Munitz, president of the Getty Trust, announces Deborah Gribbin, current director and curator of the J. Paul Getty Museum, will become the museum di and vice president of the Getty Trust effective October 1. John Walsh, who currently holds those positions, will retire September 30.

“Deborah Gribbin is an extraordinary leader who is overwhelmingly qualified lead the museum and to serve as vice president of the trust,” said Munitz.

Gribbin graduated from Wellesley College and was elected to Phi Beta Kappa. She doctorate in fine arts from Harvard.

Grand Valley State Seeks Endow for Latin Institute

Grand Valley State University (GVSU) in Michigan launched a campaign to bolster its Latin American Studies Institute (L/ building a $1 million endowment.

“This endowment campaign will build the Institute into an academic and collaboration between the universities all its different units, and with the nation and international Latin American community,” said Professor and LAS D. Cliff Welch. The increased funding to endow would provide enough to expand the collaborations with V: GVSU units, including the Seidman School of Business, the Padnos International Center and the Van Andel Global Trade Center.

Welch and civic leader Francisco V have worked for the past two years on help LAS reach out to the West Michigan Latino community.

Nursing Association Collaborates with Hispanic Organizations

In a new collaborative agreement, the American Association of Colleges of Nursing (AACN) has joined with two major associations to provide Hispanic scholars with expanded access to nursing education opportunities.

Under the agreement of intent sign: HACU (the Hispanic Association of Colleges and Universities) and NAH (the N-
Association of Hispanic Nurses), AACN will establish a relationship with the two groups to increase participation of Hispanics in nursing, the nation's largest health care profession.

AACN President Dr. Carolyn A. Williams, HCCU President Dr. Antonio R. Flores, and NAHN President Dr. Carmen J. Portillo (pictured) all have high hopes for the new union. "NAHN appreciates the opportunity to be involved in this synergy of events, particularly with organizations that value the importance of Hispanics in higher education and in nursing, at the same time building on our respective strengths," said Dr. Portillo.

Palo Alto Awards Tejeda Scholarships

Palo Alto College (Texas) awarded 10 Frank M. Tejeda/Palo Alto College Scholarships. Each winner receives up to $1,000 for the academic year 2000-01. Selections were based on overall academic achievement, demonstration of leadership qualities, and involvement in extracurricular activities and community service. The scholarship fund was established in 1996 in honor of U.S. Congressman Frank M. Tejeda, who died of brain cancer in January 1997, at which time his family asked that all memorial donations be sent to the scholarship fund.

Scholarship winners are Jeanette Colunga, Jesse Contreras, Mariann Durbin, Jennifer Gómez, Nicole Annette Lyssy, Tabbitha M. Queeney, Melissa M. Gatica, Carl Ormann II, Crystal Pfeif, and Olaya Valadez.

This is the story of Puerto Rico’s extraordinary climb from poverty to economic success. Operation Bootstrap, a program conceived, promoted, and imple-
Affirmative Action and the University: Race, Ethnicity, and Gender in Higher Education Employment
By Kul B. Rai and John W. Crizer

Drawing on data provided by the Equal Employment Opportunity Commission and the U.S. Department of Education's National Center for Education Statistics, the authors summarize, track, and evaluate changes in the gender and ethnic makeup of academic and nonacademic employees at private and public colleges and universities from the late 1970s through the mid-1990s.

Tragedy in Havana: November 27, 1871
by Fermin Valdes Dominguez

Editor Consuelo E. Stebbins documents a crucial event in the history of Cuba's independence movement. The execution of eight medical students and imprisonment of 31 of their colleagues for defacing the tomb of loyalist general Gonzalez Castaño inflamed anti-colonial sentiment and rallied popular support to the first armed Cuban resistance to colonial rule. Fermin Valdes Dominguez's text is an eyewitness account.

Wise Women: Reflections of Teachers at Midlife
Phyllis R. Freeman and Jan Zlotnik Schmidt, eds.

This collection includes deeply personal and groundbreaking autobiographical accounts of women who came of age during the second wave of the women's movement and are now the wise women on campus. The essays provide powerful accounts of the psychological, physical, and social changes brought on by menopause and detail the ways in which the aging process affects their lives.

A University for the 21st Century
by James J. Duderstadt

Dr. James J. Duderstadt, president emeritus and university professor of science and engineering at the University of Michigan, discusses the array of powerful economic, social, and technological forces that are driving the rapid and profound change in American social institutions and universities in particular.

Against Race: Imagining Political Culture beyond the Color Line
by Paul Gilroy

Throughout the second half of the 20th century, we have made great progress in the way we think about and define race. Why then, do we still insist on dividing humanity into different identity groups based on skin color? Did the Civil Rights Movement and the decolonization of the Third World have such little lasting effect? This book offers a new political language and a fresh moral vision.

On the Plaza: The Politics of Public Space and Culture
By Setha M. Low

In this wide-ranging, multidisciplinary study, Setha M. Low explores the interplay of space and culture in the plaza, showing how culture acts to shape public spaces and how the physical form of the plaza encodes the social, political, and economic relations within the city. Low centers her study on two plazas in San José, Costa Rica.

Music of the Warao of Venezuela: Song People of the Rain Forest
by Dale A. Olsen

Cultural tragedy often accompanies the death of biological species in the South American rain forests. As fragile as the ecosystem is, however, the culture of the Warao Native Americans uses to thrive. In this lively blend of mgg, anthropology, and environmentalism, Olsen shows that music is a tool much of their existence.

Sixteenth-Century St. Augustine: The People and Their Homes
By Albert Manucy

The author goes back in time to detail the first years of St. Augustine's settlement, from 1565 to 1700. Manucy describes the buildings and backyards of the early settlers, the first Spanish colonists, and illustrates how the architecture of Timucuan Indians of Florida influenced Spanish colonial culture.

Cuando cantan los lagartos
(Spanish)
by Miguel Santana

Set amid the background of the Mexican-American border, this book tells of Ada a Tarahumara Indian who...
a Fort Bliss soldier, falls in love with him, and waits 50 years for his promised return. The novel portrays the encounter of multiple cultures forced upon one another. Yarumara Indian, Mexican, and American idiosyncrasies interact and merge.

The college is accredited by the Commission on Higher Education and is a member of the American Association of Community Colleges. The college has a strong focus on community engagement and works closely with local businesses, non-profits, and government agencies to provide programs and services that meet the needs of the community.
Book Review

By Martha Garcia

Chicano Poems: for the barrio, by Angela de Hoyos, condenses in its pages the pain of Mexicans who have come to the United States searching for a better future. Unfortunately, Mexican immigrants find ethnic barriers, social and political, that place them in a status inferior to that of the American citizen. The first poem describes the crude reality of Chicanos as second-generation immigrants. Though born in America, Chicanos continue to be regarded as intruders within their own country. The author code-switches between English and Spanish within the most relevant verses with the objective of giving more intensity to each strophe. Moreover, the descriptions and images of Cecilio Garcia-Camarillo illustrate in an allegorical form the problems that Mexican immigrants confront relating to assimilation.

Chicano Poems offers a text filled with literary symbolism, linguistic color, and artistic designs in which the author pictures the cruel reality experienced by Chicanos. De Hoyos presents an honest and explicit lyric that penetrates the fiber of the human conscience in a radical way to bring out the feelings that remain in its interior.

In the first poem, "IT'S THE SQUEAKY WHEEL THAT GETS THE OIL," the writer comments on the abyss between the lives of Americans accustomed to functioning in an enterprise environment and the working-class lives of the new "Spanish 'Chic' trying to translate progress in my own way..." In this poem, de Hoyos opens the first strophes in Spanish and confronts the impermissibility of a phonetic scream symbolized in capital letters when she describes the American businessman as "MR. CAPITALIST." The rest of the poem continues in English and allegorizes the process of assimilation and its painful manifestations.

In "CHICANO," the poet explores the hybrid nature of Chicanos and their two different worlds—wor: elaborated artistically in stanzas that symbolize the movement of the topic:

— a sadness,
porque te llamas JUAN y no JOHN
as the laws
of assimilation dictate

In this way, she states that the ethnic identity remains even while the laws of assimilation force the adoption of Angloized names. Chicanos are in a position where they are obligated to swim in two waters: theirs and the others.

"HERMANO," begins, "Remember the Alamo / and my Spanish ancestor / who had the sense to build it." These words are an eloquent protest, almost a flashback, of the poem's topic. De Hoyos expresses her pain and concern for the Mexican past. The Alamo represents the history of land stolen from its true owners, who converted themselves into simple dwellers. She spotlights the real origin of those who call themselves owners of the land: "They belong to a pilgrim / who arrived here only yesterday," To de Hoyos, everyone but the Native Indians is an immigrant—Chicanos and non-Chicanos alike.

Humor is the basic ingredient in "CAFE CON LECHE," which shows in a colloquial way the process of "Homogenization" when two races and two different cultures interlace. The result of this interlacing is a new local product: "What's wrong / with a beautiful race / cafe con leche?" The fusion of the Anglo and the Mexican is the end of the war between two races and cultures. It is a reunion "to dissolve differences" and creates a new inner self that will become the union of both opponents.

The last poem, "MINVERA," is the epilogue of this work and is where two deities confront each other: Minerva and Huiztilopochtli. The two ancestral powers are face to face to show their attributes. On one side, the reader sees Minerva and her thirst for revenge: "—your eyes twin-fires of justice / your arms whirlwinds of vengeance..." In the other arena, one sees Huiztilopochtli, an Aztec military god who, according to history, was born to wage war and also was sun of the galaxys, "brandishing his sword of lightning." The last lines establish the victory of the immigrant. The triumph of the Chicano is heard when a potent voice declares, "now I stand up / an entity / courting attention beside you..." The dark-skinned individual has prevailed, has been established, and has survived in a foreign territory.

Angela de Hoyos pronounces in each poem her love and solidarity for all those Chicanos who have fought and won the battle of assimilation. Because of its allegoric, linguistic, and artistic value, Chicano Poems: for the barrio represents a useful teaching tool for courses in Chicano literature and in bilingualism. This book will bring the history of Texas nearer to the student of Chicano literature. And it will reflect the hybrid essence of the Chicano. Due to its linguistic content and the appropriate use of code-switching, this book facilitates analysis of linguistic clauses and the social aspects of bilingualism in the United States. De Hoyos has provided, too, a social and cultural manual of significant academic value.

Martha Garcia, now a Ph.D. candidate at Vanderbilt University, is a coordinator assistant with the Spanish Master Program at University of Central Florida in Orlando, and teaches Spanish courses.

Vice President
for Enrollment Management

Northeastern University, a major private research university founded in 1898 and known for its professional education, liberal arts and sciences and cooperative education program, invites nominations and applications for the position of Vice President for Enrollment Management. Located in Boston, the University enrolls approximately 13,000 full-time undergraduates and 4,500 graduate and professional students in seven schools, as well as 8,500 part-time and adult students in University College.

The Position: Reporting to the Provost and serving as a member of the President’s Cabinet and Deans’ Council, the Vice President for Enrollment Management will be responsible for the enrollment management program for the University. The Vice President will:

- provide leadership for the continued successful enrollment management program, working collaboratively to develop and implement a strategic plan for the enrollment and retention of a diverse student body.
- oversee the Offices of Enrollment Management, Admissions, Financial Aid and the Registrar and the directors of those offices reporting to the position.
- work closely with the Provost, President, Senior Vice Presidents, Vice Presidents, deans, faculty, and campus community in developing recruitment and financial aid strategy and policy.
- manage and analyze research data related to admissions and financial aid modeling.
- work with the Provost to develop and implement an aggressive graduate marketing and recruitment plan.

Requirements: Candidates must have demonstrated effective leadership experience in college or university enrollment, admissions, and financial aid and a sophisticated understanding of enrollment strategies, market research, admissions, recruitment, financial aid, and student information systems. The position requires strong supervisory experience, analytical abilities, superb written and oral and interpersonal communication skills, and the ability to work collaboratively with faculty and staff at all levels in a complex, diverse environment.

Applications are currently being reviewed. Materials received by September 3, 2000 will receive full consideration. Send materials to: Office of the Provost, 112 Hayden Hall, Northeastern University, Boston, MA 02115, Attn: VPEM Search.

For further information contact Margot Lansing at Lansing & Associates at (781) 237-1754 or Lansing@medacon.net.

Northeastern University is an Equal Opportunity/Affirmative Action, Title IX Employer.

EEO/AAE.

A SPECIAL OPPORTUNITY
The Maricopa Community College District
Vice Chancellor Human Resources

The Maricopa Community College District is one of the largest educational systems in the country, located in one of the fastest growing counties with three million residents. The ten Maricopa Community Colleges and Centers offer 2,600 academic courses and 5,100 occupational courses in partnership with 1,000 corporations, government agencies and non-profit organizations.

The Maricopa Community Colleges serve nearly a quarter million culturally diverse students annually. MCCCD is dedicated to serving the needs of a diverse, growing population which, within a decade, will comprise more than 50% Hispanic and non-Anglo residents.

The Vice Chancellor Human Resources reports to the Chancellor and is responsible for creating the vision and providing leadership for 7,000 full and part-time faculty and staff.

The Vice Chancellor Human Resources is responsible for the administration of an enrollment and management program including employee recruitment, affirmative action, compensation, employee benefits, payroll, diversity, training, organization development, legal services, collaborative policy development, employee relations, related technology systems and resources. The Vice Chancellor works with a variety of groups including Governing Board members, senior level college administrators, employee groups and governmental representatives.

Training and experience required includes any combination of education, training, and experience that meets the position requirements, which may include a college degree, preferably a teaching degree, or an equivalent combination of education and experience. The Vice Chancellor Human Resources must be able to work under stressful conditions and in a team-oriented environment.

This position will close September 29, 2000. Direct inquiries to Josh Mackey, Maricopa Community Colleges 2411 West 14th St., Tempe, AZ 85281. An EEO/AA employer.

California State University, Bakersfield

FOUNDING DEAN

SCHOOL OF HUMANITIES AND SOCIAL SCIENCES
CALIFORNIA STATE UNIVERSITY, BAKERSFIELD

Description: As part of an academic reorganization, California State University, Bakersfield (CSUB) is initiating a search for the Founding Dean of the School of Humanities and Social Sciences. We seek an academic leader with a record of excellence and a commitment to innovation who will work collaboratively with this Liberal Arts faculty who, over the past 30 years, has compiled a distinguished record in teaching, research, and service. Humanities and Social Sciences offers baccalaureate and masters degrees in disciplines of the visual and performing arts, the humanities, and the social sciences, and in professional programs of criminal justice, environmental resource management, and social work. This position will also participate in a diversifying baccalaureate degree liberal arts curriculum for students interested in elementary school teaching. In addition, Humanities and Social Sciences has established baccalaureate degree programs at the University’s off-campus centers in Antelope Valley.

CSUB enrolled its first students in 1970 and is one of the 23 campuses in the California State University (CSU) system. In the Fall of 1999, CSUB enrolled 6,000 students (or 5,250 full-time equivalent students [FTE]). The majority of these students (2,000) were majors in the departments that now form the School of Humanities and Social Sciences, with 165 full-time faculty members. The University’s diverse student body is reflected in the Fall 2000 admissions which included students of the following groups: African American 127, Asian 172, Latino 568, Native American 34, and White 828, including undergraduate and graduate students. For additional information, please refer to the CSUB Home Page at http://www.csusb.edu.

The service region for CSUB is larger than West Virginia and includes the Southern San Joaquin Valley, the eastern Southern Sierra Nevada, and the western Mojave Desert. Bakersfield, the largest city in the region and among the fastest growing in the state, has a population of 221,000; the service region exceeds 700,000. Bakersfield offers the amenities of modern city life and a relaxed life style for families. Los Angeles and the Pacific Ocean beaches are only two hours away. New housing is the best in the State for value and availability. Light industries and service businesses have expanded on the traditional economic base of oil and agriculture.

Responsibilities: The Founding Dean of the School of Humanities and Social Sciences (SHSS) is expected to provide leadership within the context of the CSU system and CSUB’s service region. The Dean is responsible for ensuring excellence in teaching, in research and scholarship, and in community service; recruiting, hiring, and evaluating HSS faculty, academic planning, budgeting, and personnel management. The Dean is expected to work collaboratively with faculty and other academic administrators. The Dean will have major responsibilities in acquiring grants and contracts and engaging community leaders to establish partnerships that will enhance the CSUB’s programs. The Dean represents the School within the University and to external constituencies.

Qualifications:
1. An earned doctorate and a record of teaching excellence, scholarly achievement, and other qualifications sufficient to merit appointment as a Professor in one of the disciplines in the School of Humanities and Social Sciences;
2. Appropriate academic administrative experience preparing the candidate to perform the level and range of responsibilities described above;
3. Demonstrated success in the acquisition of external funding and the development of community partnerships;
4. A record of effective engagement with faculty, students, staff, university administrators, and members of the greater community;
5. A demonstrated commitment to serving the University’s ethically and culturally diverse population.

Applications and Nominations: Review of applications will begin on October 2, 2000 and will be accepted until this position is filled with a view toward holding on-campus interviews early in 2001. Completed applications must include the following:
1. Letter of application addressing the responsibilities and qualifications described above;
2. Current vita that includes the names, addresses, telephone numbers, and e-mail addresses of at least four references;
3. At least three letters of reference addressing the candidate’s qualifications for this position;

Nominations and applications should be sent to:

Dr. Robert Provencio,
Chair, Search Committee, HSS Dean
California State University, Bakersfield
Stockdale Highway
Bakersfield, CA 93311-1990

Salary and benefits are competitive and commensurate with experience and qualifications.

Please see the opening immediately and continue until the position is filled. Please send applications to:

Dr. Rebecca Bushnell, Associate Dean for Arts and Letters
School of Arts and Sciences
University of Pennsylvania
116 College Hall
Philadelphia, PA 19104-6377

DEVELOPMENT COORDINATOR 01-95

This position is responsible for supporting the activities of the Development Office. The individual is responsible for the annual giving program. Duties will include conducting prospect and donor research, managing constituent management database information, managing the scholarship program, and working on development of special events.

Bachelor’s degree from an accredited college or university is required. Master’s degree is preferred. Excellent oral and written communication skills; excellent organizational skills; attention to detail; ability to establish and maintain effective working relationships with college personnel, students, and others. Knowledge of database software programs. Must be willing to build a program and be an outstanding team player.

Salary: $25,000-27,000 (commensurate with education and experience) with excellent benefits. Start date: ASAP. Application Deadline: 9/10/00.

ASSISTANT DEAN/SPECIAL EFFECTIVENESS 01-105

The position is responsible for planning, developing, coordinating, and monitoring a systematic program of institutional effectiveness, evaluation, and assessment that addresses the educational goals of the College. The Assistant Director will report the evaluation and assessment findings to the College visiting committee and other appropriate constituencies in order to enhance student learning and the College’s self-study process.

Master’s degree in Social Sciences required; doctorate preferred. Knowledge and experience in statistical analysis and empirical research design; ability to work on multiple projects; effective presentational skills; working knowledge and experience with a major accreditation agency (i.e. SACS) strongly desired. Knowledge of policies and procedures of the University System of Georgia desired.

Minimum three years experience in educational evaluation and assessment in higher education (related equally) or four years of administrative experience preferred.

Salary: $44,500-$49,500 (commensurate with education and experience) with excellent benefits. Start date: ASAP. Application Deadline: 9/15/00.

Applicants should reference the appropriate position number and send the following: a cover letter, a resume, three professional references (names, addresses, email addresses, and telephone numbers), and (3) list of three professional references (names, addresses, email addresses, and telephone numbers) to:

Judy Chastony, Department of Human Resources
Georgia Perimeter College
2851 Panhallow Road
Decatur, GA 30034

GA IS AN OPEN RECORDS STATE

PENN

Director, Penn Language Center

Penn’s School of Arts and Sciences seeks a Director to coordinate the language program of the Penn Language Center (PLC). The PLC offers instruction in approximately forty less-commonly taught languages, coordinating language programs and training for language teachers. The PLC also provides leadership and training to the use of new technologies in language instruction for all language teachers in the School. With the leadership of a faculty director research, the PLC is a center for externally-funded programs in language-related research projects.

Responsibilities: Hire, train, and evaluate PLC teachers; plan curricula; consult with departments and other schools within the University; and conduct workshops for language teachers. Design programs in language pedagogy and second language acquisition using new technologies for teachers in the PLC and other language department. Co-direct seminars. Oversee the PLC staff and budget.

Qualifications: Ph.D. in Applied Linguistics, Second Language Acquisition, or a related field. Experience as a language faculty, second language coordinator. Experience in the development and implementation of a language teaching technology. Minimum one year of administrative or supervisory experience. Review of applications will begin immediately and continue until the position is filled. Please send applications to:

Dr. Rebecca Bushnell, Associate Dean for Arts and Letters
School of Arts and Sciences
University of Pennsylvania
116 College Hall
Philadelphia, PA 19104-6377
Located on an attractive campus in the heart of Boston, Northeastern University is a premier research university that is student-centered, practice-oriented and urban. Founded in 1898 and the world leader in cooperative education, Northeastern offers Bachelor's, Master's and Doctoral degrees to approximately 24,000 full-time and part-time students in seven colleges. Applications are invited for the following faculty positions. Candidates must have a strong commitment to excellence in teaching and research.

**College of Arts & Sciences**

- **Department of Art and Architecture** - Tenure track Assistant Professor in the area of Architecture. Creative work in design, scholarship, or professional practice or a combination thereof. Should include strong promise of creative achievement in the field. Qualifications include an M.Arch degree or equivalent.
- **Department of Biology** - Tenure track Assistant Professor in the area of Microbiology. Candidates expected to develop an externally funded research program that complements and supplements the department's current research strengths in virology, genomics, and functional genomics. Qualifications include an M.S. or Ph.D. and post-doctoral experience is desirable.
- **Department of Chemistry** - Tenure track Assistant Professor in the area of bioanalytical or biophysical chemistry. Candidates are expected to develop a nationally recognized, well-funded research program. Qualifications include a Ph.D. and post-doctoral experience is desirable.
- **Department of Communication Studies** - Tenure track Assistant Professor in the area of Media Studies. Desirable research areas include media and cultural studies, new media, media convergence, international communication, industry analysis, media and gender. Practical experience in the media is a plus. Qualifications include an earned doctorate.
- **Department of Modern Languages** - Tenure track Assistant Professor in the area of Spanish. Native/near native fluency in Spanish and English. Experience and strong commitment to Spanish language instruction. Qualifications include a Ph.D.

**Bowen College of Health Sciences**

- **Associate Chair, Physical Therapy** - May have the rank of Assistant or Associate Professor or Clinical Specialist depending on the qualifications of the applicant. Tenure may be granted upon entry. For the level of professor, an earned doctorate is required while the clinical specialist requirement is advanced MS degree and preferably APTA clinical specialization. All candidates must demonstrate evidence of administrative ability. A record of teaching professional/clinical activities and research is preferred. The successful candidate would contribute to the administration of the Physical Therapy Department. Provide leadership and support the expansion and integration of academic research, and clinical aspects of the program.

**College of Business Administration**

- **Assistant/Associate Professor, Accounting** - Must possess the doctoral degree and have a strong commitment to excellence in teaching and scholarly research. Candidates with an established publication record, teaching experience, and some business background are preferred.
- **Assistant Professor, Marketing** - Tenure track position effective September 2001. Must possess the doctoral degree and have a strong commitment to teaching and research. Teach required marketing courses, especially introduction to Marketing, and from among various marketing electives.

**College of Criminal Justice**

- **Full, Associate or Assistant Professor** - The College of Criminal Justice seeks to hire in all ranks with an emphasis at the full and associate professor level beginning fall 2001. Candidates must have a broad grasp of the field of criminal justice and criminology with specialties in one of the following areas: Courts/Law; Corrections/ Treatment, Community and Crime. Candidates should have a doctorate in criminology or related field, and have demonstrated high quality teaching and research.

**College of Engineering**

- **Chair, Chemical Engineering** - Energetic, innovative leader is sought. Doctorate in chemical engineering or related field required. Experience in chemical engineering, strong administrative skills, and commitment to higher education.
- **William Lincoln Smith Professor of Electrical and Computer Engineering** - A renowned scholar is sought for this endowed professorship. Candidates should have achieved international distinction in computer engineering, an established record of scholarship, effective teaching, and a record of external research awards.
- **Assistant/Associate Professors** - Sought in the following fields. All are expected to hold a doctorate in the appropriate discipline and have a strong potential or record of research commensurate with the faculty rank desired. Areas of particular teaching and research focus of interest are indicated for each department.

- **Chemical Engineering** - Advanced materials, biotechnology, and/or environmental protection: background to teach core chemical and physical equilibria, heat, mass, and momentum transfer; chemical reaction engineering, continuous and stage-wise separation operations; chemical process dynamics and control; and chemical process design.
- **Civil & Environmental Engineering** - Environmental Engineering.

Mailing and women are strongly encouraged to apply. Northeastern is an Equal Opportunity/Affirmative Action, Title IX Employer.
PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

SUNY College at Potsdam seeks an experienced and dedicated academic to lead the institution toward national prominence as a small, selective, public college.

The college's educational values include a deep and abiding commitment to the liberal arts as the foundation for effective citizenship. As a four-year comprehensive college, SUNY Potsdam's educational programs include traditional liberal arts offerings with a strong interdisciplinary general education program and selected professional programs including teacher preparation in elementary, secondary, and music education, computer and information sciences, business administration, criminal justice, community health, and the business of music.

SUNY Potsdam is comprised of three schools: The School of Arts and Sciences, The School of Education and Graduate Studies, and The Crane School of Music. Distinctive initiatives include a strategic partnership with the music industry to support the music business and music production programs; interdisciplinary learning communities; and a first-year experience program; Center for Rural Education; Merwin Rural Services Institute; and a technology-focused teaching and learning center.

Responsibilities: The Provost and Vice President for Academic Affairs reports directly to the President and serves as the chief academic officer of the College. The Provost provides leadership for all academic programs as well as the areas of Information Services, Continuing Education, Research and Sponsored Programs, and Assessment and Institutional Research. The Provost is responsible for integrating all college programs in support of the academic mission of the college. In addition, the Provost works closely with College Administration to ensure that academic priorities are in alignment with the college's development plan and to enhance external relationships in support of those priorities. SUNY Potsdam has recently embarked on a ten million dollar capital campaign which is part of a larger ten year strategic plan. The Provost will facilitate the implementation of this plan and will shape academic policy and program development.

Qualifications: The Provost will have an earned doctorate and a distinguished record as a teacher and scholar. The successful candidate will demonstrate the following:

- An ability to foster excellence in teaching and research, advocate for the academic mission of the college, build consensus, and work collaboratively with the faculty;
- A coherent and consistent administrative philosophy which embraces a collaborative and leadership style;
- A record of academic administrative experience that includes evidence of the responsible management of fiscal and human resources and informed timely decision making;
- A commitment to diversity;
- Innovative leadership in promoting the use of educational technologies and an understanding of how emerging information technologies will shape the future of liberal arts colleges;
- Excellent interpersonal, written and oral communication, and problem solving skills.

Applications must include a cover letter, statement of administrative philosophy, curriculum vitae, and the names, addresses and phone numbers of five references. Letters of nomination are encouraged. All materials should be addressed to:

Provost's Search Committee
c/o Human Resources Office, SUNY Potsdam, Potsdam, NY 13676

Additional information on the college is available through our website at www.potsdam.edu. For full consideration, applications should be received by November 1, 2000.

SUNY Potsdam is an equal opportunity, affirmative action employer committed to excellence through diversity.

Assistant Professor

New Jersey City University is a culturally diverse, public, urban institution located in the greater New York Metropolitan area. The University offers undergraduate and graduate programs in three colleges: Arts & Sciences, Education and Professional Studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250.

The College of Education at New Jersey City University invites applications and nominations for the tenure-track faculty position at the Assistant Professor level.

Requirements: Ph.D. or Ed.D. in Educational Technology or related field. Thorough knowledge of relevant educational software, including Web browsers and Web authoring, presentation software, multimedia development, and related applications. Broad knowledge of pedagogical theory and current curricular practices and experience with assessment of on-line distance learning. Strong technology skills in web-enhanced and web-based course material production. College-level teaching and/or faculty training experience and excellent written and oral communication skills. Strong technology skills in constructing distance education and in Audio/Video production as well as online course development are preferred.

Responsibilities: To teach courses in Educational Technology, to provide faculty training and support, to advise students who includes thesis supervision, and to provide services including committee work.

This position is expected to begin with the Spring 2001 Semester.

Applicants should send a letter of interest, resume, a copy of graduate transcript and the names, telephone numbers and E-mail addresses of three (3) references to:

Dr. Yiping Wan, Dean
College of Education
New Jersey City University
2039 Kennedy Boulevard
Jersey City, NJ 07305
Executive Assistant to the President
Purdue University invites nominations and applications for the position of Executive Assistant to the President.

One of only 34 public AAU universities, Purdue University is a comprehensive educational and research institution with its main campus in West Lafayette, Indiana—a community of 100,000 people known for its exceptional quality of life—and three regional campuses in Fort Wayne, Hammond, and Westville. Programs in Science, Engineering, and Technology are offered in Indianapolis, and Technology programs are offered at nine other sites around Indiana. Purdue has 67,000 students; 15,000 employees statewide, including 2,200 faculty; and a budget in excess of $1.1 billion. The University offers undergraduate, graduate, and professional degrees through its ten schools. Visit Purdue’s Web site at www.purdue.edu for more about the University.

The Executive Assistant to the President coordinates the operations of the President's Office, serves as Secretary to the Cabinet, and oversees correspondence and responses to inquiries, supervises staff, and assists in a variety of activities as directed by the President. Continued academic responsibilities can be facilitated for those holding faculty appointments.

Requirements include: five years' employment in a university environment with advanced, responsible administrative experience, including some supervisory experience, and superior oral and written communication skills. Academic experience is desirable. A master’s degree is required and a Ph.D. is preferred. Salary and benefits will be competitive. It is intended that the position be filled before the end of the calendar year.

Applicants should submit a letter of application, a resume, and the names, addresses, and telephone numbers of at least three references. The deadline for applications will be September 29, 2000. Screening of applicants will begin October 2, 2000, and will continue until the position is filled.

Purdue University is an equal opportunity/equal access/affirmative action employer fully committed to achieving a diverse workforce.
Dean of Education

Millersville University of Pennsylvania invites applications and nominations for the position of the Dean of the School of Education.

Millersville University, founded in 1855, is one of 14 institutions of the PA State System of Higher Education. As a student-centered institution, the University is highly regarded for offering quality instruction and its strong commitment to the principles of client services and diversity. Nationally ranked as one of the top regional public institutions of higher learning by U.S. News and World Report, Millersville is also listed among Kiplinger’s 100 “best-value universities” in the nation. The University has an honored history of providing excellent teacher education and a strong liberal arts curriculum in the arts, sciences, and humanities. The University enrolls 7,500 undergraduate and graduate students, and employs 550 staff and 350 full-time faculty. Millersville’s and the School’s programs are approved by the appropriate accrediting bodies including but not limited to the Pennsylvania Department of Education and NCATE. Millersville is a charter member of the Renaissance Group and the Project 30 Alliance. The School of Education enrolls 26% of Millersville’s undergraduate students and 56% of its graduate students. Located in historic Lancaster County, the campus is within three hours’ drive of numerous cultural and recreation opportunities in the cities of Baltimore, Philadelphia, Washington, New York, the Pocono Mountains, and the Atlantic Ocean beaches. Because of its economic diversity, Lancaster County is among one of the most prosperous counties in the country. For more information, contact Millersville University’s Web page at www.millersville.edu.

RESPONSIBILITIES: The Dean is the chief academic officer of the School and reports directly to the Provost and Vice President for Academic Affairs. The Dean provides academic and administrative leadership, direction, and support for instructional, research, and professional activities to the faculty in the departments of:

- Educational Foundations
- Elementary and Early Childhood Education
- Industry and Technology
- Psychology
- Special Education
- Wellness and Sport Sciences

The Dean must be able to assume a University-wide perspective and work and communicate effectively with students, faculty, administrators, external organizations and institutions, and a diverse community. The Dean must encourage and promote the recognition, understanding, and respect of cultural and human diversity in the School’s faculty, staff, students, and curricula, and must be committed to increasing diversity within the School and on campus. A capacity and willingness to listen, create consensus, solve problems, and assume responsibility are essential.

QUALIFICATIONS: Candidates must demonstrate the capacity to be an innovative and visionary leader committed to excellence in teaching and learning and partnership with community and schools. Applicants must possess an earned doctorate in one of the disciplines in the School of Education. Also essential is a record of quality scholarship; teaching and service in higher education; a commitment to student development, the liberal arts, and academic freedom; and evidence of success in building an inclusive community. Applicants must demonstrate knowledge of critical issues and best practices in teacher education, experience with accreditation procedures, and an understanding of state licensing and certification procedures. Candidates need to present a record of progressive administrative experience which demonstrates likely success in activities such as planning, program development, fund-raising, grant writing, advocacy for all the School’s disciplines, evaluation of teaching effectiveness, assessment of programmatic outcomes, and personnel and budget management in a public university setting. Candidates must demonstrate an appreciation of the role of technology in an educational institution. The ability to function effectively in a team-oriented collective bargaining environment and a successful interview are crucial.

NOMINATIONS AND APPLICATIONS: Applicants should include a letter detailing their experiences relating to the qualifications for the position; a vitae; and the names, addresses, and telephone numbers of at least three professional references. Full consideration will be given to complete applications received by September 22, 2000. Electronic submissions will not be accepted. Nominations and applications should be sent to: Search Chair, Dean of Education Search/HiO825, Millersville University, P.O. Box 1002, Millersville, PA 17551-0302. An affirmative action/equal opportunity institution.

University of Virginia

The Darden Graduate School Of Business Administration

The Darden School Foundation at the University of Virginia’s Darden Graduate School of Business Administration, one of the nation’s premier business schools, seeks an experienced fundraising professional for the position of Associate Director of Major Gifts. Darden, located in Charlottesville, Virginia, is currently engaged in a $250 million capital campaign, part of the University’s $1 billion campaign.

Reporting to the Director of Major Gifts, the selected candidate will be responsible for the identification, cultivation, and solicitation of Major Gifts prospects. Candidates should be goal oriented and should possess a proven track record in cultivation and solicitation of donors and familiarity with regional campaigns. Demonstrated experience in managing complex volunteer groups essential. The successful candidate will work with a motivated team of professionals who are committed to continuing excellence. Strong written, verbal and human relations skills are required.

A bachelor’s degree with five years of progressive development experience or equivalent is required. An advanced degree is preferred.

Ellen Wayman-Carden
Director of Public Relations
New Jersey City University
2030 Kennedy Boulevard
Jersey City, NJ 07305
F

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota/Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

But USF is much more than just a large, state-assisted institution. Its growing reputation as a dynamic research university is spreading around the country, attracting more and more of the nation’s best and brightest scholars to the Tampa Bay Area. USF offers degree programs in 79 undergraduate disciplines, 9 master’s and specialist programs, and 28 doctoral programs, including the MD. A record number 1525 international students enrolled at USF the 1999-2000 academic year. Students from Latin America and the Caribbean totaled 445. USF-AHEC’s Health Education Training Center is a sponsor of the Rural Youth Soccer Association, which serves over 300 migrant children in South Hillsborough County.

The university is currently recruiting for the following positions:

Position #0247-Ast/Assoc Professor-Electrical Engineering-deadline: OPEN
Position #4200-Ast Professor/Instructor-Computer Science & Engineering-deadline: OPEN

USF is an equal opportunity/affirmative action institution, committed to excellence through diversity in education and employment.

MANCHESTER COMMUNITY COLLEGE

Work in a creative, innovative environment with caring, enthusiastic colleagues. MCC is seeking enthusiastic candidates with excellent interpersonal skills to provide academic and support services to special student populations for the position of:

Coordinator of Transitional Programs

For a copy of the vacancy announcement, including minimum qualifications and salary, please visit our website at www.mcc.commnet.edu/ps/ or call (860)647-6153. Send letter of intent, resume, transcripts, and the names of three references to: Deborah A. Wison, Director of Personnel and Contract Administration, Manchester Community College, P.O. Box 1046, Manchester, CT 06045-1046. Must be postmarked no later than September 15, 2000.

Chancellor

Nominations and applications are invited for the Chancellor of the University of Illinois at Springfield.

The Chancellor is the chief executive officer of the University of Illinois at Springfield and reports to the President of the University. The Chancellor seeks a proven leader who will further the University's mission of preparing the next generation of leaders in the Illinois region.

Founded in 1965 as Sangamon State University, the University of Illinois at Springfield became the newest and smallest campus of the University on July 1, 1995. Emphasis is placed on instruction and research and service carried on community partnerships.

The campus offers bachelor’s and master’s degrees in Doctoral Programs in Public Administration. UIS current enrollment is 2,000 students, with 1,000 attending the University of Illinois Springfield at Springfield. UIS is the only state university located in the Illinois region. UIS's enrollment is 4,100 with 188 faculty and 199 PhD and 265 support staff.

The Chancellor must have either an earned university level teaching experience and a substantial record of scholarly achievement or comparable professional achievement and distinction.

The Chancellor must have significant expertise:

- at senior level leadership at an institution of higher learning or comparable scope and complexity;
- in strategic planning, budget management and fundraising and the ability to manage the public funding;

The Chancellor must have a record of:

- consultative leadership style;
- inclusive, diverse and sensitive to multicultural organization;
- exemplary personal character and integrity;
- commitment to teaching and learning, school public affairs.

The Chancellor must be able to:

- define and defend academic values, traditions, and procedures;

- represent the campus to diverse external constituencies including alumni, community and governmental bodies;
- enhance the quality of student life.

The Chancellor Search Committee will begin reviewing applications immediately and continue to accept applications until a new chancellor is selected. To assure full consideration, however, materials should be submitted by October 15.

University of Illinois
Office of the President
504 Heritage Administration Building, 114 Urbana, Illinois 61801

The University of Illinois is an affirmative action/equal opportunity employer.
University of Maryland,
Office of Continuing and Extended Education,
Manager, Distributed Learning

The Office of Continuing and Extended Education, an integral part of one of the nation's premier research institutions, provides leadership in linking the University of Maryland's knowledge resources to external audiences. OCEE seeks a team-oriented professional with the management and technological expertise to excel in this newly created position of Senior Project Manager, Distributed Learning. Under the general direction of the Associate Dean, the Senior Project Manager, Distributed Learning, will provide day-to-day management and oversight of distributed learning projects developed and promoted in partnership between the Office of Continuing and Extended Education and various participating Colleges/Schools. The Senior Project Manager will be involved with all aspects of project management, including financial management, program development and design, coordination with internal and external partners, marketing and promotion, program roll-out, and program assessment.

Duties: The manager will monitor and track the start-up, development, course conversion and management of credit and non-credit programs offered through various media but with an emphasis on web-based delivery systems. Responsibilities include nurturing and maintaining partnerships that increase electronically mediated programs and courses; coordinating and monitoring web-based curriculum development and delivery throughout the campus.

Qualifications: A master's degree is required; a terminal degree preferred. Five years of progressively responsible experience in higher education administration is required. Knowledge of issues facing adult learners and non-traditional students; familiarity with the teaching/learning process and demonstrated interest in learning outcomes; superior organizational, interpersonal, analytical, planning, and written and oral communication skills is required. Success in obtaining external funding through grant proposals is highly desirable.

Commissions: Salary is commensurate with qualifications and includes full benefits package.

To Apply: Send resume and list of reference, with names of three professional references to Ms. Marianne Wagner, Office of Continuing and Extended Education, UMCPR, 2103 Redford Armory, College Park, MD 20742. For best consideration, application should be postmarked by August 25, 2000.

The University of Maryland is an EEO/AA employer.

THE FLORIDA STATE UNIVERSITY
Invites applications and nominations for the position of
DEAN
COLLEGE OF EDUCATION
The Florida State University, a Carnegie Research I Institution, is located in Florida's capital city and serves over 33,000 students. The College of Education has a long and honored history as one of the original colleges of the University. It enrolls over 3,000 students and numbers 100 faculty members in eight departments and two research centers.
Graduate education and research are central to the mission of the College, as is undergraduate education. In its commitment to education, the College has entered into a unique partnership among departments, research centers, local school districts and community agencies to improve public education.
The College has hired one-third of its faculty within the last five years and is vigorously pursuing academic excellence in 17 fields of study that include 21 doctoral degree programs.
The College of Education seeks a dynamic leader with a distinguished record of scholarship and academic administration and a strong commitment to broad conceptions of education, human development and learning. Successful candidates will have:
- A demonstrated record of innovative leadership in a collegial environment;
- Strong written oral and interpersonal skills that reflect the ability to communicate the College's position effectively and with various constituencies, to include the University administration, state and federal agencies and leaders in the larger community;
- Experience in and a commitment to fund raising, grant generation and resource development; and
- Qualifications necessary to hold a tenure academic appointment in an appropriate department in the College of Education.
The Dean serves as the chief academic and administrative officer of the College, and reports directly to the Provost/Vice President for Academic Affairs. The Dean serves as ex-officio chair of the University Council of Teacher Education, the body which coordinates teacher education programs in eight schools and colleges across the University.
Salary will be competitive, commensurate with experience and qualifications.
Interested candidates should forward a letter addressing their qualifications and a current curriculum vitae listing name, addresses and telephone numbers of five references by September 29, 2000. Address applications to:

University of West Florida
11000 University Park Way
Pensacola, FL 32514
E-mail rsbaker@uwf.edu
An Equal Opportunity/Affirmative Action employer.
Cleveland State University invites nominations and applications for the position of Provost and Senior Vice President for Academic and Student Affairs. Cleveland State University is a comprehensive, urban university committed to providing an education of high quality to students, primarily from the metropolitan area, with diverse backgrounds, experiences, interests, and educational needs.

With 4,162 full-time faculty, the University serves more than 16,000 students in seven colleges, offering a broad array of baccalaureate, master’s, doctoral and professional degree programs. Established in 1882, the University has an enrollment of approximately 25,000 students. The annual educational and general budget of the University is $135 million. For further information about the University, see its homepage at: http://www.csuohio.edu.

The Provost and Senior Vice President is the University’s chief academic officer, reporting directly to President Claire Van Aultenhofer and serving in her absence as the chief administrative officer. The Provost has broad responsibilities for the planning, development, and administration of the full array of the University’s academic programs and student services.

Candidates for the position of Provost and Senior Vice President will have: an earned doctorate or other terminal degree; a distinguished record of leadership or scholarship sufficient to warrant appointment in an academic unit at the rank of full professor; and at least five years of successful leadership in a line position at a university of comparable rank.

Leading candidates should possess evidence of at least ten years of experience in higher education. Candidates with equivalent experience in other fields also will be considered. Strong candidates will have a track record of success in the following areas: leadership in developing and articulating an academic vision within a complex institution; strong financial management skills with the ability to make strategic budget decisions within limited resources; demonstrated skills in fostering excellence in teaching, scholarship, community service, and public and professional service; commitment to serving the needs of a diverse student body, including adult learners; a commitment to affirmative action and equal opportunity in education and employment; and ability to engage all constituencies of the institution in collegial discourse in support of its academic mission.

Review of candidates will begin on September 30 and continue until the position is filled. The new Provost may commence duties as soon as January, but no later than July 1.

Application materials should be submitted to: Dr. Charles C. Hollar, Director, Provost Search Committee, Cleveland State University, Rhodes Tower 1201, Cleveland, OH 44115. The Search Committee is being assisted in this search by Charles J. Hollar, Director, A.T.Kearney Executive Search. Questions also may be directed to him at: (216) 687-3140 (phone), 216-687-9333 (fax), or email: charles.hollar@atkearney.com; or telephone: 216-687-9333 (atkearney.com); or web: www.csuohio.edu; or address: 33 John Carlyle Street, Alexandria, Virginia 22314.

Cleveland State University is an Affirmative Action/Equal Opportunity Employer. Women and minorities are encouraged to apply. CSU provides reasonable accommodation for individuals with disabilities.
SPokane FALLS COMMUNITY COLLEGE
Vice President of Student Success

Develop and administer the annual budget to address college programs and goals; supervise classified staff, professional exempt and administrators in student services; responsible for the counseling department including selection, tenure review, contract, evaluation, and supervision. A master’s degree and three years of successful, relevant administrative experience in higher education, including fiscal management. Doctorate; successful experience working in multi-campus districts; and three years of successful teaching in an institution of higher education desirable. $87,000 annually. Anticipated date of employment is January 2, 2001. Closes September 29, 2000.

DEAN OF BUSINESS, COMPUTING, MATHEMATICS, AND SCIENCE

Administer, supervise, and provide leadership for faculty and staff in accounting, economics, fashion merchandising, business management, computing software applications, real estate, small business management, offices technology, engineering, physics, chemistry, astronomy, geology, biology, ecology, anatomy and physiology, aviation, mathematics, computer science, and information systems. Successful candidate will manage the annual budget of approximately $2.6 million for the division; provide leadership to approximately 100 full- and part-time faculty and staff; provide direction and advise on program and curriculum development. A master’s degree in one area of the supervised instructional areas; three years of successful teaching experience in a community college; and current or recent community college leadership or management experience. Demonstrated abilities in the following areas: working with people of various ethnic backgrounds; providing creative leadership; working effectively by consensus; processing effective human relations/interpersonal skills; developing student learning outcomes and assessment for courses, programs, and degrees; developing and/or using interdisciplinary studies in the college curriculum; and developing and using technology for teaching and learning; and knowledge of and experience with Carl Perkins and TECC Prep desirable. $72,100 annually. Anticipated date of employment is January 2, 2001. Closes September 22, 2000

For position details, qualification requirements, and official application, contact Human Resources Office, Community Colleges of Spokane, 2000 N. Greene Street, Spokane, WA 99217-5499 at (509) 533-7429, TDD (509) 533-7466 or access our website at http://ccs.spokane.cc.wa.us

AAEEO

COLUMBIA UNIVERSITY
MAILMAN SCHOOL OF PUBLIC HEALTH

DIRECTOR OF ADMISSIONS AND FINANCIAL AID

Reporting to the Dean of Students and as a member of her senior staff, the Director will provide leadership and supervision for the admissions and financial aid functions for the Mailman School of Public Health (MSPH), at Columbia University. The MSPH is one of five top schools of public health in the country and is located at the Health Sciences Campus of Columbia University in New York City. Currently, the school has 650 enrolled masters and doctoral students, and admits 325 new students each year.

The Director will work with each of 6 academic divisions covering 19 academic tracks and 11 dual degree programs, and the faculty Admissions Committee to plan, develop, and implement a national recruitment plan that results in diverse and intellectually rich applicant pools for the MPH, MS, DrPH and PhD degree programs as well as several certificate programs for public health professionals that are being developed. It is anticipated that the Director will develop admissions publications and other recruitment materials and hire a recruiter to facilitate outreach/marketing. The Director will supervise two professional staff, the Assistant Director of Admissions and the Assistant Director of Financial Aid and their staffs, to manage an efficient and effective need-blind admissions process and a complex need-based financial aid award process, which result in the enrollment of talented and diverse student body. Finally, the Director is expected to make policy recommendations for recruitment, admissions, and financial aid.

The ideal candidate will have: a master’s degree or higher; 3 to 5 years of progressive experience in and technical knowledge of admissions and financial aid in a selective environment; familiarity with admissions/financial aid computer applications; a record of achievement that includes evidence of successful planning, creative problem solving, superb interpersonal skills, and effective senior level management; and be bilingual (Spanish).

The position is available immediately; the Search Committee will start to review applications on September 19. Salary and benefits, including a generous tuition benefit, are commensurate with experience. Inquiries, nominations, letters of intent and resumes may be sent to:

Nina Lythcott, Dr.P.H.
Dean of Students
Mailman School of Public Health
Columbia University
NYC, NY 10032

Advisor/Coordinator of Support Services for Students of Color for Office of Multicultural Services

Indiana University-Purdue University Fort Wayne (IPFW) invites applications for the position of Advisor/Coordinator of Support Services for Students of Color for the Office of Multicultural Services. The Advisor/Coordinator is responsible for providing support services and programs for students of color at IPFW, including the evaluation of such efforts, tracking of student engagement, and coordination of support programs for students of color in area high schools and urban community centers. Candidates must have a minimum of a bachelor’s degree in behavioral sciences, education, or a related field (master’s degree preferred), and two years of related work experience, preferably in an educational setting. fluency in Spanish is required.

Complete applications must include a letter of interest, resume, and names, addresses, and telephone numbers of three references. All communications should be sent to: Ms. Danielle Pilkul, IPFW, Wab Memorial Student Union, Room 118, Fort Wayne, IN 46805-1499. Screening of applicants will begin immediately and will continue until the position is filled.

IPFW IS AN AFFIRMATIVE ACTION/EQUAL OPPORTUNITY UNIVERSITY.

The Department of Religion at Syracuse University invites applications for a tenure-track position as Assistant Professor beginning in Fall 2001, with a specialization in Christianity. (e.g., history, thought, culture; time period: 15th-19th centuries; geographical area: open). Ability to teach a large undergraduate course in Christianity is required. Candidates are expected to have knowledge of methodological and theoretical approaches to the study of religion and a willingness to engage in the interdisciplinary and comparative commitments of the department, whose focus is on the interdependence of religion and culture broadly conceived. Candidates should have a Ph.D. or be planning to complete before September 2001. Send letter of application, cv, graduate transcripts, and three letters of recommendation to:

Prof. Patricia Cox Miller
Chair of the Search Committee
Department of Religion
501 Hall of Languages, Syracuse University
Syracuse, NY 13244-1170

Applications reviewed starting November 1, 2000 and will continue until appointment is made.

Announcement of Position Opening

CCP18 (Program Liaison Specialist, Collegiate Education for the Deaf &
Hard of Hearing Program) — 12 month Tenure Track

ANTICIPATED STARTING DATE: September 22, 2000

MINIMUM QUALIFICATIONS: Master’s degree and one year of experience
in student recruitment at post-secondary level; good writing, interpersonal,
organizational and computer skills; fluent in American Sign Language;
demonstrated ability to respond to and work with multiple constituencies.

Applicants who do not meet the minimum qualifications as stated are
encouraged to write in precisely how their experience has prepared
them for the responsibilities of this position and by providing appropriate
references. Exceptions to the degree requirements may be made for
compelling reasons.

RESPONSIBILITIES: Under the supervision of the Director, the Program
Liaison Specialist works closely with deaf and hard of hearing students to
Northwestern; visits high schools and other off-campus sites; meets
students, teachers and parents interested in college program; acts as liaison
between college and agencies serving deaf and hard of hearing individuals.

MINIMUM SALARY: $43,662 approximate annual salary, subject to
collective bargaining increase; excellent health benefits.

TO APPLY: Interested persons may apply by sending a cover letter
and resume, including the names of at least three (3) references, to:
Margot G. Kimmel, Director of Personnel Administration, Northwestern
CT Community College, Park Place East, Winsted, CT 06098.

APPLICATION DEADLINE: Application to be on file by September 8, 2000.

Northwestern Connecticut Community College, a Connecticut Community
College, is an Affirmative Action/Equal Opportunity Employer. M/F. Protected
group members are strongly encouraged to apply.

Announcement of Position Opening

Director of Annual Giving

The successful candidate will direct a comprehensive Annual Fund
program to generate gifts from alumni and friends of the University.
The Annual Fund includes phonathons, reunion campaigns,
management of class agents and other volunteer activities, senior
class giving program and direct mail initiatives.

The position demands strong organizational abilities, excellent
writing skills, extensive computer skills (working knowledge of
Raiser's Edge for Windows preferred), and the ability to work with
individuals of diverse backgrounds.

The successful candidate must demonstrate creativity, flexibility and
the drive to exceed yearly goals. Experience in marketing, strategic
planning, goal setting and creating new fundraising programs is
highly desirable.

Reporting to the Vice President for Advancement, the Director will
work closely with University faculty and staff, especially the
Directors of Alumni Affairs and Development.

A Bachelor’s Degree and a minimum of three (3) years experience
with Annual Fund programs in a higher education setting
is required.

Competitive salary and excellent benefits.

Applicants should send a letter of application and resume to:

Ronald Bogusz

A D V E R T I S I N G  I N D E X
I PUNTO FINAL!

THE LATINO STRUGGLE CONTINUES

University of California earlier this year announced an increase in applications by students of color. The report touted the numbers as proof positive that campus diversity has not been harmed by Proposition 209 or the official UC policy barring race or gender as factors in admissions decisions. The University of Texas likewise has been trumpeting a slight increase in Latino admissions since the end of affirmative action in Texas. In Florida, Governor Jeb Bush successfully rammed through the proposal to eliminate affirmative action in that state's university system, no doubt pointing to the success of his brother's state university in surviving its demise.

These developments are contributing to the false message that all is well and that Latinos and African Americans in particular will not have any trouble getting equal opportunity for access to higher education. This is an incredibly misleading message.

An honest look at the real numbers shows that the UC system is rapidly becoming a bastion of middle-class and upper-class whites in both the student body and the faculty—with serious social repercussions. (The glaring exception is the Berkeley campus, where I teach, which now has more Asian students than white.)

In 1993, only two African American students were among the class of nearly 300 at UCLA School of Law. In the fall of 1993, Blacks, Latinos, and American Indians made up 13.6 percent of freshman enrollment at Berkeley; in 1997, prior to Prop. 209 or UC’s “race-blind” policy going into effect, that number was 21.5 percent. Overall, more than 82 percent of UC’s tenured faculty is white, although nearly 13 percent of doctorates awarded in 1996–3,542 out of 27,741—went to minorities.

These numbers are not a result of a limited pool of qualified applicants of color. More and more students and professors of color are asking: Why should I come to a place that does not want me?

The vanishing diversity on campus is a direct consequence of the attack on affirmative action. But the harm has not ended there. Students of color aren’t the only ones feeling unwelcome and stigmatized. As a professor in an Ethnic Studies Department, the results of anti-affirmative action attacks are palpable to me. The validity and legitimacy of the discipline have been undermined by the same thinking, the same rhetoric, even the same individuals who spearheaded the anti-affirmative action movement.

Last year, my department staggered from a $300,000 budget cut that threatened to eliminate nearly 60 percent of the department’s academic offerings. This crisis was simply another piece of a pattern of insidious neglect; with no new hiring or replacement of faculty. Student demonstrations were important in temporarily halting the attacks on the department. But those attacks created the unwelcoming environment that has led to the loss of several professors and made the students who choose to major in ethnic studies feel as though their academic achievements are not viewed by the University as legitimate scholarly accomplishment.

It’s difficult to feel otherwise when members of the Board of Regents show public contempt for these studies.

UC Regent Ward Connerly wrote in a 1997 letter to President Clinton: “It is the academicians who have been using race in an obscene manner that’s now coming to light....It is the academicians who gave birth to...the proliferation of ethnic studies programs which sometime amount to segregated curricula.” What Connerly ignores is that student who enroll in ethnic studies courses are a diverse group. One of my own courses, Ethnic Studies 41, has had enrollment ranging from 400 to 700 over the years. The majority of students have been white and Asian.

People of color make up 52 percent of California’s population. Nationwide, 30 percent. By the middle of the 21st century, they will be 67 percent in California and up to 46 percent nationwide. By then Latinos are destined to become the majority people of color in the nation. If we continue to segregate our public educational institution continue to fail to educate the next generations of teachers, doctors, lawyers, and engineers in how to function in an increasingly diverse society, we risk creating a culture in which racial misunderstanding and conflict flourish. Devouring hard-won advances of all people of color and undermining the emergence of an authentic multicultural democracy.

At Last: Higher Education Opportunities for Washingtonians

Washington, D.C., is a highly charged, action-oriented city. Part of that vitality comes from the variety of world-famous colleges and universities located within the District of Columbia. Students and scholars flock to them from all over the world.

All but one of those institutions is a private/independent one. Given the precarious financial realities of private higher education, and being the magnets they are for top-rated faculty, they are also very expensive. One result is that many local high school graduates can not afford to go to college in the city where they graduated.

No community colleges exist here either. The University of the District of Columbia has a rather limited curriculum, and ongoing financial difficulties for many years have not made it the first place high school graduates aspire to attend. If they go to the University of Maryland or George Mason University, both within commuting distance from D.C., they have to pay very high out-of-state tuition rates. Some public colleges in other states charge non-resident students four times the tuition paid by their state residents.

In short, D.C. residents have far less affordable higher education opportunities than do their counterparts in any other city in the U.S. Those are among the unique realities in “taxation without representation” Washington not shared by citizens in any of the fifty states. But that is now changing.

The District of Columbia College Access Act of 1999

This new law attempts to level the playing field for the young people of the District. It will help many a D.C. youngster to dare to dream, including a large and growing Hispanic population.

Henceforth, high school graduates will have an opportunity to attend a variety of affordable public colleges and universities, just as residents of the 50 states now have. Lack of financial resources can be a significant roadblock to entering and completing college. This program is a boon for D.C.'s poorest residents.

Residents who graduated from high school on or after January 1, 1998, and are enrolled at least half time in an undergraduate program, are eligible for tuition assistance. The awarding of the first tuition subsidies began in the summer; it is bound to grow in the years ahead.

This act not only improves access to higher education for D.C. students nationwide, it also authorizes federal financial support for the University of the District of Columbia.

Bipartisan support for this initiative included such leaders as the Secretary of Education Richard Riley, Mayor Anthony Williams, Delegate Eleanor Holmes-Norton, and Republican Congressman Tom Davis.

Scholarships for Local Private Universities. Washington residents who attend private colleges in the D.C. area and private Historically Black Colleges and Universities throughout Maryland and Virginia can receive scholarships of up to $2,500 per year or $12,500 over a lifetime.

Support for the University of the District of Columbia. This act provides federal funding to the city's only public institution of higher education, which should ensure that D.C. residents who choose to attend UDC will receive a solid education.

Material Benefits

Thousands of economically disadvantaged students will be able to go to college. They will learn more than they will realize for many a year. But there are also material benefits of going to college.

Recent government figures estimate that an investment in college earns a 12 percent return, nearly twice the historical average of the stock market. College graduates can expect to earn $600,000 more over a lifetime than high school graduates. Young men with a bachelor's degree earn 150 percent the salary of their peers with no more than a high school diploma in 1998. Women with a college degree earned twice as much as female high school graduates.

Truman and Clinton

Since the days of President Harry S Truman and his unflinching support for the G.I. Bill of Rights and for establishing community colleges nationwide, there has been a growing federal investment in education. Every president, each in his own fashion, has supported and expanded that effort.

Clinton believes in education for all. He has displayed a commitment to opening the doors of college to Americans. Financial aid (including tax relief for college) has more than doubled, from $25 billion in FY1999 to nearly $60 billion in FY2000. This is the largest investment in higher education since the G.I. Bill.

The Hope Scholarship and Lifetime Learning Tax credits provide more than $7 billion in higher education tax relief to 10 million families this year. Student loan reforms, including Direct Student Loans, have saved students $9 billion and taxpayers $6 billion. Large Pell grants, new opportunities to earn money for college through work-study and national service, and new and expanded efforts to help at risk youth prepare for college, through TRIO and GEAR-UP, are also broadening access to college.

The Future

It might be fanciful and feel hardy, but it is pleasant to imagine that the day will come when the fields of higher education will really be level for all. The day when students can attend any college they accept without having to pay out-of-state tuition. The day when what or where to study is predicated not on students' economic resources but on their ability to succeed.

Dr. Mellander is a professor at George Mason University.
Experts in the world of magazine publishing say that to be successful in this field, you must find an untapped market niche where the demographics are increasing and give readers information that they can't find anywhere else. Easier said than done, as the axiom goes. The truth is, there is no simple formula for finding the right mix of editorial content, subscribers, and advertising revenue that makes a new publication survive and thrive. In fact, very few magazines last more than five years because they simply run out of money before they can turn a profit. Some fall victim to competition; for example, five years ago, there were at least 20 major publications focusing on computers. That number has dwindled to four or five that dominate the industry's readership.

Which is exactly why the tenth anniversary of *The Hispanic Outlook* is so remarkable. Its story began in 1990, when José López-Ilsa, then president of Bergen Community College in Paramus, New Jersey, decided that the voice of Hispanics in higher education needed to grow stronger and to have its own forum for providing thoughtful commentary on higher education issues.

The introduction of the magazine could not have been timelier. Hispanics were experiencing unprecedented population growth, and affirmative action was still the law of the land.

"The introduction of the magazine could not have been timelier. Hispanics were experiencing unprecedented population growth, and affirmative action was still the law of the land."

Marilyn Gilroy
Professor of Communication Arts at Bergen Community College and a regular contributor to *HO*.

José López-Ilsa
was still a struggle to find editorial and production staff as well as the advertiser support it takes to start a magazine and keep it on its feet. There were several years of experimenting with features, layout, and marketing strategies.

However, this story has a happy ending. It is with pride and pleasure that we note that Outlook has been enthusiastically embraced by the higher education community and has become a phenomenon of its own. Its success can be attributed to finding the right balance between covering and analyzing issues of importance to Hispanics while trying to accent positive achievements made by individuals at campuses across the country.

Some of the magazine’s early features still appear on a regular basis. The “Outlook on Washington” column has provided timely information on national education initiatives and reports on progress in the legislative and administrative branches of government. “People, Places and Publications,” one of the most popular features in the ’80s and now, has been greatly expanded, in part through the efforts of news editor Jason Paneque. Other segments, like the “Punto Final” “think pieces,” have been added in the last few years. Of course, there is the always popular and controversial ranking of colleges and universities that represent the Best Colleges for Hispanics, a feature inspired by the annual academic rankings in U.S. News & World Report.

Another indication of the magazine’s success is that the audience has increased measurably and includes a broader readership that transcends any one group. In addition, education officials and even politicians often quote HO as a source in policy speeches. As a compliment from its peers, our articles are reprinted with permission in other journals.

Although I have not been editor for several years now, I am a regular contributor, and I have kept a watchful eye on the magazine’s direction. Having been associated with The Hispanic Outlook family nation’s future by helping minorities succeed and getting them through the undergraduate and graduate pipeline. In 1996.

Outlook has been enthusiastically embraced by the higher education community and has become a phenomenon of its own.

1. Contributing to the critical national dialogue on how to ensure opportunities for Hispanics.
2. Providing a forum for those who have newsworthy stories to tell.
3. Working with the publishers and other contacts to the image and success of Hispanics in higher education when they asked me to consider assuming the role of editor, I was hesitant because I wasn’t Hispanic but he said he needed a journalist and someone who knew about education, so I accepted. I am so glad that I did because I wrote an editor who can reach the deeper understanding of some of the most critical educational issues of our time.
4. Watching a talented group of people and the staff shape the artistic direction and tone of the magazine.

Let’s face it—the magazine’s concept was sound, but it had to do well, and it had to succeed financially. Sometimes the staff worked long, hard hours at times when colleges were reluctant to commit precious advertising dollars to a new magazine. HO’s production budget did not have all the money for elaborate and color graphics—so only a two-color format. Eventually, all of the hard work and faith paid off, with the help...
some creativity from Suzanne López-Ilsa in public relations and the steady hand of Orlando López-Ilsa in accounting.

5. Providing opportunities for talented writers and journalists of all ages and backgrounds.

HO worked with both "seasoned" and younger writers from all over the country. Since we are based in the New York City area, we have found knowledgeable journalists who provided lively coverage of the CUNY debate on remedial education, for example, and the controversies involving the public schools. HO also sponsored paid internships in every phase of the magazine's editorial and production functions for local college students. Some of these students became full-time employees at the magazine.

6. Working with dynamic editors, who include Amalis Duarte, Adalyn Hixon, and Mari Carmen Sarracino. Each editor faced the challenge of balancing students' unique ideas to the magazine by keeping it growing and vital while maintaining a fresh perspective. All of them took the content forward in terms of quality, breadth of coverage, and layout. Senior Editor Mia Anderson, who has been with the magazine since the beginning, has used her unparalleled editing skills to make sure our punctuation and grammar are correct and that our language is non-sexist and non-racist.

7. Staying on to write for the magazine after my stewardship as editor. Even though I have worked for newspapers and am a professor of journalism, there is nothing like practicing the craft of writing to keep skills up to date. I have had lots of help from public relations directors at colleges and universities who respond enthusiastically to our requests for information.

8. Watching the readership broaden.

HO started with a readership concentrated on the East and West Coasts and in Florida. We now have subscribers in every state, and we get letters and feedback from college presidents, faculty members, and many heads of nonprofit organizations who are reading the magazine for ideas and coverage of important issues.

9. Interviewing wonderful, dedicated, and talented individuals who are passionate about the need to help minorities reach their potential and find opportunities.

Happy Anniversary to Hispanic Outlook.

---

UNIVERSITY OF CALIFORNIA, DAVIS
Environmental Engineering
Faculty Position Available

The Department of Civil and Environmental Engineering at UC Davis invites applications and nominations for a tenure-track position in environmental engineering with specialization in biological systems and treatment. The position is open at Assistant and Associate Professor levels. Requirements include a doctorate in engineering and a demonstrated record of success in, or evidence of outstanding potential for, both teaching and building a vigorous independent research program. The successful candidate will have a strong background and interest in water and wastewater quality and applying advances in the biological sciences to process design.

Areas of special interest include, but are not limited to, microbial ecology, application of molecular tools, public health, and non-point source pollution. Experience with municipal wastewater or water treatment plants and formal training in computational methods is desirable. She/he will join departmental colleagues in teaching undergraduate courses in environmental engineering and graduate courses related to water and wastewater treatment as well as biological systems.

To be assured of consideration, applications must be submitted by October 2, 2000. Applicants should submit a complete resume, including a statement of teaching and research interests, transcripts, a list of relevant professional experience and publications, and the names, mailing addresses, telephone numbers, and e-mail addresses of three references to:

Jeanie L. Darby, Professor
Department of Civil and Environmental Engineering
University of California
One Shields Avenue
Davis, CA 95616-5294

Information about the department can be found at http://ccee.Eng.ucdavis.edu/

UC Davis and the Department of Civil and Environmental Engineering are committed to building a diverse faculty, staff, and student body in response to the changing population and educational needs of California and the nation. The University of California is an affirmative action/equal opportunity employer.

---

Director,
Office of Campus Relations
STANFORD UNIVERSITY

Stanford University is committed to principles of equal opportunity, affirmative action celebrating the diversity of its faculty (4640), students (14,000) and staff (8000). University seeks in the Director of the Office of Campus Relations for focused leadership in planning, implementing, and evaluating the campus concerning these principles support diversity recruitment, development awareness. A new environment: from discrimination, work-life integration, employee assistance and a sense of community. Stanford is responsible for monitoring and developing programs for campus designated areas such as affirmative action and the ADA. The office consists of 5 units for Multicultural Development, Ombudsperson/Coordinator, Sexual Harassment Office, Stanford Help Center, WorkLife Office with a total of 25 employees.

Qualifications: Broad knowledge of affirmative action laws, programs and policies; success in implementation in large, complex organizations. Ability to interpret and analyze federal, state, and local policies and experience with governmental involvement with affirmative action and discrimination in higher education. Recent experience in all functional components of OCR. Strong leadership and communication skills with experience in directing, counseling, and communicating with professionals in support staff. Experience working in a large decentralized organization and in complex, higher education setting. Ability to work effectively with external customers and public and Regards community groups as Bachelors degree is required. Graduates must be eligible for equal employment opportunities.

Stanford University is an Equal Employment Opportunity through Affirmative Action Employer.

Addressee correspondence to Lori Kobara, Assistant to the Executive Director of Human Resources, 651 Serra Street, Stanford CA 94305-6210. Applications be received by December 15, 2000. No Thurs. This not an academic position and application is conditional to the academic year.
"A Small Investment, A Lot of Courage and a Great Effort"

A Founding Partner Steps up to the Microphone

By Adalyn Hixson

This being the 10th anniversary, one largely unsung founder of the magazine, Orlando López-Ilsa, has agreed to talk for the record, about The Hispanic Outlook in Higher Education.

"It was very difficult. The magazine was very small—only a few pages, a few articles, and very few ads. But we decided that we are going to keep the magazine alive." Orlando López-Ilsa, chief operating officer and VP of The Hispanic Outlook in Higher Education, is talking to me about the early days of the magazine.

The very first issue, January 1990, kicked off with renowned science fiction author and futurist Isaac Asimov writing on the emergence of Latin America and the importance of bilingualism, sociologist Marta Tienda on immigration trends and educational opportunities for Hispanics, and José López-Ilsa on the future of community colleges.

Now, ten years later, HO averages 70 pages, more like 100 many months, comes out every two weeks, and is read from coast to coast.

I ask Orlando what generated his interest in higher education. He tells me it’s a family thing. His mother, Blanca, worked very hard at many jobs “all her life” to be sure that her three sons, Orlando, José, and Héctor, got a good education. And in the early days of HO, when she was in her 80s, “she would come in to stuff envelopes. She was very happy, working with the family.”

“My father was Secretary of Education in Cuba. My brother José, an educator all his life, and we understand the importance of education as it comes naturally that our children went to college and I wish that all children always dream of going to college and go to college.”

The Conception

A decade ago, José López-Ilsa, then president of BCC Community College, in Orlando and some colleagues in his office, not citing the reference. He tells them he has an idea to publish a magazine. There are existing magazines about higher education, but nothing to reflect the Hispanic concern wants to start such a magazine.

“I had no prior inkling,” says Orlando. Did he know anything about publishing? "thought it was a very good idea. I liked it the beginning.”

And my brother José said, ‘Maybe you can get involved in this venture on a part-time basis.”

Getting Started

"Step number one was like starting any business," says Orlando. "Where is the money coming from? How can we get it?"
to come from? And what kind of staffing would get us started?

"We decided that maybe with a small investment, a lot of courage, and a great effort, we could start a magazine.

"My brother asked me to prepare a budget. Of course, I knew how to prepare a budget." Orlando was, after all, comptroller of a shipping business, with a master's degree in business administration. "But I didn't know much about the magazine business."

They ran out of money very quickly, and said "Now what?"

"We had to either invest more money or get credit," says Orlando. But there was no either/or about it. They had to do both—dig deeper into their personal pockets AND go to the bank.

"It was not easy; it was impossible!" says Orlando. "The credit we got from the bank was on personal guarantees—because it was a business that was starting, we had no experience of any kind, and the banks will never extend credit to a business in that situation."

"At that point I realized that this could not be done on a part-time basis."

"I decided to quit my job and dedicate myself full-time to the magazine. I took the chance, working very hard with my brother José and other people who helped us at the beginning—Castor Maldonado, a longtime friend of José's—he did not have much experience in the business, but also liked the idea."

José, as a college president, was busy with college business all day while Orlando worked on launching the magazine. After five, the two would meet, sometimes with others, to discuss what was happening. "And that almost always extended to eight or nine at night."

Month to Month

"We were living month to month. At the end of every month, we evaluated the situation and decided...well...things are beginning to turn around, people are beginning to know us. They know that it is a magazine for real."

"What was it like, I ask, to go home and tell your spouse you are quitting your job to launch a magazine?"

"At the beginning," he says, "Suzanne was not too happy. But then she realized that I really liked what I was doing."

"Thank God my wife was working!" And earning a good living, he says, and that was of great help. It was "a few years," probably an understatement, I'm thinking, before he got a payment of..." I strain to imagine him throwing amid chaos that surely prevailed at the magazine beginnings. Perhaps his innate sense of or reassured and sustained those around him. Whatever his state of mind, his willingness: leap into such a venture is a tribute to the love and loyalty shared by these brothers, and to their incredible, admirable sense of mission.

His willingness to leap into such a venture is a tribute to the trust and loyalty shared by these brothers, and to their incredible, admirable sense of mission.

Expenses

"In the early 90s," says Orlando, "we were projecting that it would take maybe two to three years to establish the magazine and to break even. Reality, it took longer. Until early 1990 to 1991, Orlando ran the magazine. We were not breaking even."

"With that in mind, the first year we thought we were going to break even, maybe we should think about expanding the magazine, adding new sections—too small."

"As you expand the magazine, every part becomes more expensive, and as the magazine grows, and the subscribers increase, you can probably break even with that in mind."

"I'm not aware of anyone who created the idea of leasing equipment because you need a magazine for a magazine."

"When we started the magazine, there were issues a year. And for years now, every two weeks..."

"It was 1991 when they finally said...I think it was 1991 when they finally said...I think we can have a magazine that looks like a magazine."

A New Member

"You asked me if it was tough on Suzanne, that I spent many, many hours with the magazine. [EX: for no pay]." And the fact is that she got so enthusiastic about the magazine that she started helping us on a part-time basis. I realized that she was a writer, and she liked the idea of the magazine. She thought that she could be good for the m
'I asked her if she wanted to join the magazine on a permanent basis. And she has been a tremendous force—probably one of the main reasons for the success of the magazine. She started just helping out, and all of a sudden, she was doing everything.'

'She got involved in the layout, and in choosing ideas for articles. The opinion feature—Punto Final—was her idea, and she made it happen. A colleague at the University of South Florida, commented on how well the magazine was doing, and how nice it looked, and congratulated Suzanne on the good job she was doing. I was very happy and proud.'

'Suzanne works here now harder than I do. And she is managing the editorial part and is doing a wonderful job.'

'Today, she is the heart of The Hispanic Outlook magazine.'

Reaching Out

'From the beginning, we attended different conferences, the American Council on Education, HACU, American Association of Higher Ed. We set up a booth, and gave away the magazines. That helped us a lot. We met a lot of people, we made many good friends, and in the long run, it helped us get H0 established. People we met were willing to help us by writing for the magazine, and trying to get their institutions to subscribe.'

'It was expensive, but it was very helpful; we met a lot of people. In the long run, it helped us to get H0 established. So it was good.'

'I have enjoyed so much attending all these conferences—meeting presidents and administrators and professors. It really touches me, the tremendous effort that they put into their careers, their professions, how dedicated they are.'

'I have met many friends, and it is very rewarding when they offer their support. They are happy to see you, and always offer a word of encouragement.'

Advertisers

'From the beginning, we got great support from the college presidents in the state of NJ.'

The first ad, he recalls, came from what is now New Jersey City University, in Jersey City, one of the most diversely peopled areas of densely populated northern N.J., and a city with a long-standing Hispanic population. Other early advertisers included N.J.'s William Paterson and Kean colleges, both now universities.

'Pretty soon,' says Orlando, 'schools in California and Texas and Arizona. And almost from the beginning, we received great support from universities in New England. I don't know why. Maybe because they have liberal ideas, and they do believe in affirmative action.'

The Highs, the Lows

The joyful part, says Orlando, is when you finally see the magazine get to the level you want to bring it to, with all the sections you want, and the look you want.

'We have not fulfilled the dream yet.'

And the lows, he asks? An answer is not long coming.

'We have good writers. We have very good editors. And prior to every printing, I sit down and read the magazine. Then when it is printed, I open the first page, and I see a mistake! And I get very upset. But then I look at all the other publications, and I see that mistakes, and I think it is unavoidable.'

This side of Orlando I already knew. And knew too the great relief I felt when "closing the issue"—making sure that all corrections had been made, that we had not put the wrong president's picture in the Honor Roll feature, spelled "professor" with three esses—fell on me, not my shoulders other than mine. For to disappoint man as innately gracious and kind as Orlando Lopes-Lisa weighs very heavy on conscience. And given his post-publication eagle eye, dispointing him at least once a month was pre much a given.

Ancestors and Heirs

Orlando graduated from the University Havana—'that was in 1955'—and got a maste business there too.

'Unfortunately, I could not work in my care in Cuba for a long time because of the changes 1959, when Fidel Castro took over. Very shorty, decided to leave and come to this country.'

'Things have been very good for me in this country, which is my country. I was 27 years old when I arrived here. With only $100. I ha lived here a lot longer than I lived in Cuba consider myself to be an American.' He became a U.S. citizen in 1967.

'When I first came, I was living in New York uptown Manhattan, and then moved to the Bronx, then to New Jersey. I have fond memories although they were very, very hard times, the first few years in this country.'
had to work, the struggle with the English language, the cold weather.” We laugh about the cold weather. “When I look back and see what I have accomplished, I have no regrets.

“Working hard, always on the job, trying, failing, getting up again, trying again… I am happy that it was hard and now we can see the fruits of the hard work. I don’t think that you enjoy things as much if they come easier.”

So, I ask, your son Tony didn’t get a new car when he graduated?

“No. He got my old car, a Chevy Blazer, eight years old.”

Tony, a TV journalist, graduated from the Boston University School of Communications. “I tried to convince him to go into print media,” specifically, the magazine, but Tony chose television, and is now a producer at WTVJ, the NBC-owned and operated station in Miami.

Orlando, Jr., an architect in Tampa, earned a master’s at the University of Florida-Gainesville. Daughter Marla, a graduate of the University of Hartford School of Engineering, living in Scottsdale, Ariz., “is the holder of several patents for medical instruments, and for computer chips.”

José López-Isla graduated from the University of Havana with an LL.D. and a Ph.D. in philosophy. His daughter Lourdes, a Yale graduate, received a law degree at Harvard and is now general counsel for a group of affiliated investment advisor firms in the Washington, D.C. area. His daughter Marlene, a Cornell graduate, has a pediatric practice in Manhattan.

Hispanic Advances

“The landscape is changing, but very, very slowly. Hispanics are very soon going to be the largest minority, but from there to become a force in higher education is going to take a lot longer.”

And if Hispanic teens continue to drop out of high school in such large numbers, “it is going to be even longer. Yes, we are making improvements, but it is still very slow. The number of Hispanic faculty and administrators is very, very small. I hope that in the near future, those numbers improve, but…”

There were some times, he says, when he felt that the magazine wasn’t going to make it. “But I thought, this is such a good idea, there is such a need for a magazine like this in higher education, that we have to make it work.”

“I am very glad that we didn’t quit, because now I can look back and say, we did the right thing. Now we have a magazine that can help Hispanics in higher education and that can the people of this country what Hispanic doing in higher education.”

Down the Road

I ask, are you ever going to retire? “Why answers. “When you enjoy what you are doing, why should you retire?”

“When you get a lot of satisfaction in work—especially a magazine, where you always see the fruits of your effort. I have read section of the magazines, from the first and I like to look at them and see how v through all the years. When you have all the satisfaction, you’re not thinking of retiring. I point out that he did retire from us on Sundays, a move forced by a local Blax that can get you arrested for working office on the Sabbath.

“Yes,” he says. “I changed my work schedule six days a week.”

New ventures down the road? “Depends, he laughs, on whether his body has any ideas.”
A Decade of Disaster for Affirmative Action

Last Rites or Wake-up Call?

By Amalia Duarte

Over the past decade, there has been a clear trend when it comes to affirmative action. In a wave of court decisions, voter referenda, and pieces of legislation, affirmative action has been successfully rolled back. In fact, some would argue it's been virtually drowned in a tsunami of anti-affirmative action sentiment.

The Hispanic Outlook in Higher Education has covered the trend with hand posed the question, "Is Affirmative Action Dead?"

Some affirmative action advocates believe that it is now fighting for "In the '90s, the most significant development in affirmative action been the all-out efforts to strike it down," said Janell Byrd, senior c with the NAACP Legal Defense and Education Fund. "The challenge affirmative action stand out to me the most."
where last year Governor Jeb Bush signed an anti-affirmative action order
called the One Florida Plan.

But perhaps the decade’s regression on this issue should not come as a
surprise. After all, affirmative action has never been on solid ground.

Some History

Its roots date to the 1930s, as a Black and white issue, with the creation
of the Committee on Fair Employment Practices and the National Labor
Relations Board. The term first was used in the Wagner Act of 1935,
authorizing the NLRB to redress unfair labor practices. It wasn’t until the 1960s
that the phrase “affirmative action” became linked in a broader sense with
civil rights. The term was reintroduced in 1961 when President John F.
Kennedy signed an executive order stating that federal contractors should
take “affirmative action” so that job applicants and employees alike were
treated without regard to their race, creed, color, or national origin.

Affirmative action gained a legal foundation with the 1964 Civil Rights
Act, which outlawed discrimination
in public accommodations and
employment. In the 1970s, President
Richard Nixon was the first to
implement federal policies
designed to guarantee minority hiring.

Institutions of higher education
were following suit, but a major
challenge arose almost immediately.
In the 1978 landmark Bakke
case, a white man sued the
University of California board of
regents after being rejected by a UC
medical school. He contended that
separate admissions standards for
minority applicants were illegal. But
the U.S. Supreme Court ruled that
race could be used as a factor in
admissions and supported the
University’s affirmative action program.

With the Bakke decision as a guidepost, colleges and universities con-
tinued to implement affirmative action efforts that opened the doors of
higher education to thousands of minorities and women.

The changes produced by affirmative action were dramatic. In 1984, for
example, the student body at the University of California system was 70
percent white, 16 percent Asian, 7 percent Hispanic, and 4 percent
African American. A decade later, in 1994, the percentage of Hispanic students
had doubled to 14 percent, and Asians now comprised 29 percent of
the student body. Enrollment of African American students remained
steady at four percent. And whites in 1994 were a minority, making up just
40 percent of the student population.

But everything was about to shift. During the Reagan and Bush adminis-
trations, the Supreme Court changed dramatically. Five justices were
appointed during that time, and they turned the court in a much more conser-

Only two on the current court were appointed by Democrats, Justice
Bader Ginsburg and Stephen Bryer.

And this more conservative Supreme Court began voting agains
affirmative action. In 1989, the court struck down a Richmond, Va., pr
that reserved 30 percent of city contracts for minorities. By a 5-3 vote
justices said the U.S. Constitution does not tolerate such blatant rac
preferences except in “extreme” instances where they are clearly need
remedy proven past discrimination.

“We were faced with a hostile court, and the public paradigm
from massive resistance to civil rights to challenges to affirmative a
said the NAACP’s Byrd. “This country has always had a problem wi
and ethnicity and been uncomfortable with efforts to level the

Subsequently, several of the Court’s decisions narrowed the stances under which race-based affirmative action program
allowed. In 1995, the Court let stand a lower-court ruling that found
based promotions in a Pitt
fire department discrim
against white males. That saw
it declined to hear a case in a
scholarship program for
Americans at the Univer
Maryland was deemed unac
allowing a lower-court to
prevail.

Without question, today’s
views affirmative action in
different light than does th

that race "should almost ne
consideration in such matte
concurring opinion in one
wrote, "In my view, govern
never have a compelling int
discriminating on the basis of
race in order to ‘make up for pa
discrimination in the opposite direction.”

And conservatives decided to keep whittling away at affirmative
through this much more sympathetic Court. In 1989, an organizat
the Center for Individual Rights (CIR) was formed and began ta
cases involving civil rights. CIR states that its “purpose is the de
individual rights, with particular emphasis on civil rights, free
speech, the free exercise of religion, and sexual harassment law.”

Representation to deserving clients who cannot otherwise obtain legal counsel and whose individual rights are threatened.

One major victory for this group involved a lawsuit against the U
of Texas at Austin brought by Cheryl Hopwood. This young white wo

The Fifth Circuit Court of Appeals found that societal discrimination did not justifi
rate admissions tracks for minorities, and in 1996 the Supreme Court
ruling stand, effectively outlawing affirmative action programs in
suits against the University of Washington's School of Law and the University of Michigan. (Most recently, CIR claimed victory for the Boy Scouts in successfully defending the group's exclusion of a gay scoutmaster.)

And as the Supreme Court turned against affirmative action, so did the court of public opinion. Some would argue that the first volley in this battle began in 1994 with passage of Proposition 187, which denied undocumented immigrants access to public health facilities and schools. It was followed in the summer of 1995 with a University of California board of regents vote to drop affirmative action in admissions and hiring. At the time, the measure's keyponent Regent Ward Connerly, who is African American, said, "Affirmative action is dead. We are negotiating the burial rites."

And the efforts to kill civil rights programs continued. In 1996, California voters went even further than the regents by passing Proposition 209, which outlawed affirmative action among all state institutions. In 1998, Proposition 227, an anti-bilingual education question, was easily adopted in California.

Some argue these referenda take hold in California because its white residents feel overwhelmed by the exploding immigration from both Latin America and Asia. "Here in California, you have a white population that will soon be a minority," said Maria Blanco, regional counsel for the Mexican American Legal Defense and Education Fund (MALDEF). "The feeling among whites is that they're losing this state." These referenda, she said, "play into that fear, whereas in other states, such a huge demographic shift will never be a reality."

But California wasn't alone in its referendum fever. In November 1998, Washington State voters passed Initiative 200, which, like Prop. 209, outlawed affirmative action programs at state institutions.

The fallout at colleges and universities was disturbing. Top UC schools like UCLA and Berkeley began to admit fewer minority students, in effect creating a segregated, two-tiered public university system. UC-Austin saw fewer minorities admitted as well, a trend especially visible at the law school. Immediately after the Hopwood decision, there were just four African American and 26 Hispanic students at the law school, compared with 31 African Americans and 42 Hispanics the prior academic year.

Reflecting on Hopwood recently, UT-Austin law school Dean Michael Sharlot said that the impact was "terrible." "We no longer have the support network for minorities that we used to have because their overall numbers are down. They are choosing to go to other schools," he said. Huge numbers help reject an anti-affirmative action measure. If California and Texas act this year, it will be a counter to the referenda. California's board of regents voted to guarantee admission to the UC system for the top 4 percent of high school seniors. The Legislature went further by passing a law guaranteeing admission state's flagship public schools to the top 10 percent of high school graduates.

So far, the results in Texas have been good. UT-Austin saw its enrollment go up as a result. In the fall of 1999, there were subs increases in the number and percentage of African American, Hispanic and Asian American students compared to the fall 1998 class.

"I am delighted with the direction this year's entering class," said UT-Austin President Dr. D. Paulson. "The plan elevates affirmative action yet guaranties state university admissions to 2 percent of their class, without reducing SAT or ACT scores. However, we worry that minorities will have the 19 pre-college paper required to enter a Florida university.

The attacks on affirmative action and the One Florida platform prompted a strong statement from the U.S. Commission on Civil Rights, which voted 6-2 to endorse the statement this past spring. The commissioners wrote, "I should keep affirmative action unless forced to abandon it.'''

The commissioners concluded that the percentage plans we need to keep the nation's campuses diverse. "The percentage plans are an experimental response to the attacks on affirmative action," a U.S. Commissioner wrote. "But they are not a substitute for strong race-conscious affirmative action in higher education. What is required is a Supreme Court reaffirming Bakke and making affirmative action an imperative in higher education.

With another Bush running for the White House, some are about future Supreme Court appointments. But others point to trends. The onslaught of referenda had a silver lining in that it galvanized minorities to vote. And Corporate America, in large part, supports the efforts. "I am optimistic," said MALDEF's Blanco. "Academics, the private sector, and others who work on these issues have not gone away and are beginning to think creatively about how to address affirmative action in ways that don't rush these hot buttons. I see public opinion
Ten Years In the Making

Magazine Said to Broaden,Enhance, Enlighen

by Mari Carmen Sarracent

“W e've come a long way, baby,” says Alfredo de los Santos, veteran educator, administrator, renowned leader in higher education, who has witnessed the evolution of The Hispanic Outlook in Higher Education from its earliest days.

"Initially, it had little coverage, limited circulation. Over the years, HO has broadened the scope, become a very powerful instrument in education. It touches on issues of universal interest." He too the magazine’s utility for both advertisers and for people exploring new career paths.

The Outlook has indeed covered topics relevant to Latinos in its lifetime, from the ongoing issues of affirmative action, campus diversity, financial aid, admissions testing, the “best” colleges for Hispanics, and bilingual education, to emerging themes such as the Internet, a phenomenon that brings new possibilities, new opportunities.

The vision behind the once-upon-a-time single-digit folio has been clear since its inception—to edit an academic community about Hispanics in higher education and provide a forum for issues pertaining to the progress of Latinos nationwide. This is the unwavering mission shared by the brothers behsing the scene—José and Orlando López-Isla.

HO has introduced programs offering educational and social services to Hispanic populations; lauded the accomplishments and contributions of many Hispanics and higher ed institutions, and presented statistical data refi expressing progress and growth. At the same time, it has tackled its share of controversial issues—the death of tenured minority faculty members, bilingual education, race relations on campus, the glass ceiling, distance education at forprofit universities.

Florida’s Palm Beach Community College Provost María Vallejo, like Alfredo de los Santos, has observed The Outlook over many years. “It has blossomed,” she says. “It’s like seeing a child grow: The vision has not changed—to provide the most information in a timely manner to us in the trenches. However, it has become more national in scope, even international. The quality has improved, and it’s more sophisticated; the magazine not only helps us to do our work, but we see a solution to our colleagues and constituents see that we have an outlook and exposure. HO enhances our working and the respect that we can get from our colleagues. It’s an avenue for our voices to be heard.”

HO represents many different things to its readership. To some, it is not only an information resource but also an educational aid. De los Santos teaches a graduate-level course at Arizona State University that’s specific to students interested in teaching careers at community colleges. He uses The Outlook as well as The Chronicle, Black Issues, and others. "Those are the peer publications," he says. "While there is some overlap, which is good, among the magazines HO has its own niche. It helps because it focuses on those things that are important to the Latino community to a larger degree than any other magazine does. That was one of the things that was needed in this field.”

Stanley O. Ikenberry, president of the American Council on Education, Washington, D.C., notes, “It has been a superb form of communication that has been helpful not just to ACE but to all of American education in focusing on concerns and issues related to underserved students, and to institutions that are reaching out to meet the needs of Hispanic students and others.”

Ikenberry cites some of the topics about which HO has offered readers a comprehensive look at: The stand out are related to access, equality of opportunity, cost, and student aid.

A must-read for many institutions of higher learning and organizations, David L. Warren, president of the National Association of Independent Colleges and Universities (NAICU), Washington, D.C., notes, “The issues of affirmative action, enrollment and graduation, and emerging demographic trends—the utmost concern to NAICU and the independent sector. Anyone who follows and cares about the development of Latino higher education in the United States turns to The Hispanic Outlook for its coverage of government developments, broad national trends, and institutional news. In particular, it has been a valuable source of information about Latino education at the campus level, including its coverage of new policies and practices that are designed and implemented by the students who are ultimately affected.”
"The Hispanic Outlook is perhaps the one publication covering higher education that has best analyzed the efforts of private institutions to reach out to Latino students and improve their success rates. And it has always made certain to recognize the positive results of those activities."

Things Change; Things Remain the Same

Among the cornucopia of topics that HO has featured, a decade ago, HO discussed the need to narrow the gap in the health professions. While we can account for improvements, 10 years later, we are still tackling the same issue. Project 3000 by 2000, a campaign of the Association of American Medical Colleges, was launched in fall 1991 to substantially increase the number of underrepresented minority matriculants to U.S. medical schools. And Latinos are getting there. U.S. DOE data for academic year '97-'98 show progress—Latinos receiving degrees in medicine numbered 766 (colleges granting the most first-professional degrees to Hispanics).

In 1990, only 602 of roughly 18,500 nursing graduates were Latino. A 1988 Department of Health and Human Services study reported that of 1.6 million employed registered nurses, fewer than 139,000 were minorities, of which Hispanics accounted for under two percent. In 1997-98, according to the DOE's list of colleges granting the most degrees to Hispanics, 1,096 Latinos earned a bachelor's degree in nursing.

Latino representation in a variety of careers is not where we'd like it to be; however, we cannot ignore the distance that Latinos have traveled.

The dearth of Hispanic applicants and students in the country's law schools also has been a topic of much discussion. The long-term effect is reflected in the shortage of people of color as judges, attorneys, and law school professors. In '89-90, according to the National Center for Education Statistics, 1,275 out of 364,357 law degrees granted were earned by Hispanics. Whites accounted for 32,187. DOE figures comparing '94-95 and '95-96 reveal an upward trend from 1,974 to 2,852 law degrees awarded to Hispanics. And whereas in the past, Latinos running for various legal appointments did not receive adequate exposure or perhaps were not deemed contenders, more recently, we have well-recognized Hispanic judges, counsel, and even candidates for the Supreme Court.

Women still face challenges, but their accomplishments have not gone unnoticed. Latinas are increasingly visible among faculty and in leadership positions—as college presidents, heads of organizations, in government, and as entrepreneurs. A 1992, EEOC-Higher Education Staff Information Survey reflected 15,553 women full professors nationwide, 14,009 of them white and 259 Hispanic. The total number of male full professors equaled 117,660—more than 90 percent white and one percent Hispanic.

Says de los Santos, "Despite our growth, proportionally we are not represented in terms of students, faculty, and administrators. However, Hispanics will become the largest minority in higher education. In 1997, the number of Hispanics in community colleges exceeded African-Americans, for example. In some states, we will be the dominant minority. This brings strong implications for the journal. The issues will continue, and HO will be a more prominent voice of our community to us and to the larger community."

The color of faculty and tenure are two issues that HO has been continuously examining. De los Santos adds, "The faculty members that were hired in the '60s are going to retire in the next five years—we need to be vigilant that many of us get opportunities so that Latinos can teach our students."

It used to be that Latinos—men and women—were concentrated in what was referred to as the "barrio of education"—Spanish, bilingual education, and Chicano studies departments. While that has not entirely changed, perception of these departments has. Culture-and gender-related areas of study have gradually gained their due respect in academia, and have inspired and initiated the development and accreditation of other departments in universities across the country. Latinos have a presence among the faculty ranks in a number of academic fields—engineering, physics, law, medicine, psychology, business, and technology.

Piquing Interest

Readers have grown to depend on The Outlook not only for its coverage of controversial issues of the day but for its theme issues and regular columns. Through the "Outlook on Washington" column, first published in 1994, HO features commentary and news on a spectrum of topics from the Department of Education initiatives, the importance of bilingualism, parental involvement in education, scholarship information, Internet sites, and more.

Despite increases in students of color applying to and enrolling in colleges, universities still must deal with the issue of student ethnic disparity on campus. Tuition increases and Proposition 209 are among the contributing factors. HO continues to monitor and report on developments, and most recently, we are watching how Governor George Bush's One Florida proposition unfolds.

Carlos Hernández, president of NJ City University and long-time supporter of the magazine, follows our coverage of
Every writer knows the importance of that first clip—the first by-lined article that earns one license for future assignments. HO published one of my firsts a decade ago. Our parallel evolution has been an exciting one. It’s an honor to have contributed then and to be a part of this dynamic, model publication, which continues to challenge, enlighten, and serve as a representative voice of Latinos in higher education.

MARI CARMEN SARRACENT, EXECUTIVE EDITOR,
THE HISPANIC OUTLOOK IN HIGHER EDUCATION MAGAZINE

I can talk about what other institutions are doing, what type of programs they offer.

"The Hispanic Outlook" showcases institutions that care about Latinos and also provides role models for students," she adds. "It’s nice to tell that of an individual who has overcome significant odds.

Carlos Hernández, president of New Jersey City University, "We should all be proud of this magazine. It is a wonderfully high-quality publication that provides opportunity to learn about the issue and the importance of higher education. I distribute it pretty widely, especially to my chief administrators. It has been a practical, useful, and, to some extent, how-to manual. It shows us how institutions—no matter where—are addressing similar issues. The Hispanic Outlook acts as a bridge on many significant issues.

Hernández, whose academic career spans 27 years, remembers the "Outlook" well. "I remember the first issues from the beginning. It has covered the major issues. In the future, I'm sure it will take a much greater look at how institutions are addressing issues on campus and how curriculum should reflect that diversity. Despite the numbers and some progress, progress has not been steady. In the past, it has been sporadic, pure in the need to keep the issue alive.

NAICU's Warren adds, "Through its comprehensive coverage, "The Hispanic Outlook" has helped to raise national awareness of the concerns across the Latino higher education community. By providing a forum for national and campus leaders, it has worked to strengthen bonds among all of us in Washington and others across the country who have been striving for many years to make the dream of a college degree true for every aspiring Latino student.

Hernández remarks, "The publication has given us a voice, a face, and a real presence in higher ed. My involvement has been largely as a direct contact of the magazine. And here we are 10 years later."
Ever since he became president at the University of Houston-Downtown, Dr. Max Castillo has been preparing the institution for a very exciting future and making an impact on the lives of so many urban and disadvantaged youths with his bold leadership. Dr. Castillo was named president in 1992. One year later, the school was designated a Hispanic-Serving Institution by the Hispanic Association of Colleges and Universities.

Castillo’s first priority was correcting the most severe shortage of student space ever encountered by a public university in the state of Texas. In 1997, UH-Downtown opened its $23 million Academic Building, extending the University’s presence beyond its historic building at One Main Street for a full block along Buffalo Bayou.

Answering the call to expand, UHD also opened the Jesse H. Jones Student Life Center, the University’s first fitness and recreational facility. There have been other initiatives as well. Under Castillo’s guidance, UHD launched the Weekend College and the Urban Teacher Education Program, and began offering television, cassette, and online courses. There is another jewel in the crown. During the state’s 75th legislative session, under Dr. Castillo’s leadership, the University enjoyed an important success—the lifting of a statutory prohibition against graduate programs.

Another positive event was the receipt of $75 million in tuition revenue bonds for the completion of UH-Downtown’s campus urban design project. Last May, UHD announced receiving a $39 million grant, a gift from the Gordon and Mary Cain Foundation—the largest grant for scholarships in its history and one that will further UHD’s campaign to provide quality educators for inner-city schools.

“This gift reflects the Cains’ confidence in UHD as a leader in teacher preparation and their belief in educating the community’s workforce,” says Castillo. “The university will continue to demonstrate its gratitude by carrying out this shared vision.” The grant helps lay the foundation for a proposed Master of Arts degree in teaching at UHD, a program designed to improve the skills of urban schoolteachers. Scholarships will be distributed over a ten-year period, helping students in financial need, students who might otherwise have to choose between getting an education and supporting their families.
"Because of our own diversity," says Castillo, "we can provide a pool of qualified, culturally sensitive teachers who, due to their training in the classroom and their multicultural experiences, are well prepared to teach in an urban setting." Castillo notes that students in UHD's Department of Urban Education continue to score high marks in ExCET, the state's teacher certification exam. He says that because of this high level of achievement, the demand for UHD graduates is quite high, with many contracts signed by seniors well before graduation.

The University embodies diversity—with an assortment of class schedules, many relevant degree programs, a multicultural population, and several outstanding community programs. Dr. Castillo says that the face of Houston-Downtown is the face of the future. UHD's student body reflects the makeup of the city of Houston. The class at UHD is 32 percent Hispanic, 29 percent African American, 12 percent Asian American, and 14 percent Anglo. U.S. News and World Report has ranked UHD as the "regional liberal arts college with the most ethnically diverse student body in the western United States."

The University of Houston-Downtown came a long way in a very short time. Recently celebrating its official 25th anniversary, the school first offered courses in 1942, at the Downtown School on Fannin Street, in the central business district. That commitment to urban higher education crystallized in 1974 when the University received the assets of South Texas State Junior College, located in the Merchants and Manufacturers Building at One Main Street, on the
building, which is listed on the National Register of Historic Places and by the Texas Historical Commission, also houses the administrative offices of the University.

Two new buildings have opened to meet the growing need for space. The Academic/Student Services Building, a five-story structure, offers 40 classrooms, two lecture halls, a 460-seat auditorium, an interactive technology center, and a food service area. The building, funded by state revenue bonds authorized by the Texas Legislature in 1993, was completed in 1997. The Jesse H. Jones Student Life Center, on the north side of the campus, was made possible by a gift from the Houston Endowment. The building contains two basketball courts, volleyball courts, dance studios, and a fitness center.

For so many very fortunate residents of this urban area, UHD means opportunity as well as quality education. UHD now offers more than 30 degree programs and boasts an enrollment of about 8,700 full- and part-time students. Course classes are small and taught by qualified professors, rather than by teaching assistants. One thing the university does extremely well is put a college diploma within reach for someone with just about any schedule. Many UHD classes are available on evenings and weekends, in shortened "Minisemesters," through live or pre-recorded telecourses, and at locations in Fort Bend and Montgomery counties.

The Minisemester is one of UHD's newest study options. Introduced in 1998, it is an abbreviated semester within a semester. A Minisemester allows busy students to complete courses in fewer weeks by taking time-intensive classes in several academic areas. The telecourses have been around since the spring of 1995. Some are broadcast live to off-campus classrooms in Ft. Bend and Montgomery counties. Others are pre-recorded and may be checked out of the UHD library. Telecourses consist of a series of video segments accompanied by specially prepared academic materials. The Weekend College, inaugurated in 1994, allows students to complete certain degrees by taking courses on Friday evenings and Saturdays. This option is particularly helpful to those already in the workforce who find it hard to attend regular evening classes.

UHD enters the lives of learners early, nurturing the younger student with outreach into the public school system from elementary through senior high school levels. UHD makes higher education more accessible to learners at many levels. That is a vital part of its mission. Joint admissions agreements with area community colleges and graduates. Programs such as the Jesse H. Jones Academic Institute, Talent Search, Upward Bound, and HoustonPREP create new opportunities for inner-city public school students. In addition, UHD offers programs that allow high school students to earn college credits during their senior year.

Richard W. Riley, U.S. Secretary of Education, said of UHD, "By preparing Americans to meet the demands of the future, schools like the University of Houston-Downtown not only help individuals build successful lives, but also help America build a successful future."

"As our world becomes more complicated and our economy more competitive," Riley continued, "the excellent education that schools like the University of Houston-Downtown provide becomes increasingly important. The constantly changing demands of new technologies and of the world economy make the knowledge and learning skills that students develop in today's universities more important than ever before."

UHD is very proud of its growth and proud of launching its first graduate degree program this fall, a master's in criminal justice. The University's Criminal Justice Center provides quality adult education to people hoping to enter public and private-sector criminal justice professions and continuing education to criminal justice practitioners. The Center has conducted more than 100 police academy classes, trained more than 15,000 students for the criminal justice professions, and won regional and national awards for excellence. Last March, in an article about the University of Houston-Downtown, Allan Turner of the Houston Chronicle wrote, "...the university arguably has become the state's finest university catering to the nontraditional student." Turner cited its open-enrollment policy, dedication to undergraduate studies, innovative curriculum and flexible class schedules.

Of open enrollment, Castillo reflects, "Open admission seems to carry the public perception that an institution doesn't maintain the academic rigor and quality of more selective institutions. The point I want to make is that open admission doesn't mean open graduation." He goes on to say, "At UH-Downtown, we're not selecting winners; we're in the business of creating winners. That's our challenge. We are very ethnically diverse. In my judgment, that is one of the most distinctive aspects of the university. Without diversity, you can't have excellence."
Communications Patterns in the Classroom: Gender Differences, Part One

Women Wrongly Perceived as More Talkative

By Angela Provitera McGlynn

Small-group work, of a collaborative nature, is one strategy that pulls more students into the conversation, enhancing their participation level.

A rule, who do you think talks more in mixed-gender groups, men or women? If you buy into our culture's stereotypes, you probably would guess that women do. However, research has shown that in mixed-gender conversations and in classes from grade school through graduate school, males tend to talk more than do females.

Deborah Tannen (1992) and a host of other researchers report experimental findings that contradict the popular myth that women talk more than men do. What has been found is that males speak more often than do females, and more of the time, in mixed-gender interactions.

The myth of greater female conversation is so strong, however, that the actual findings often contradict people's perceptions of reality. After observers counted and recorded the numbers of times males and females spoke in class, faculty members were often surprised to learn that males dominated the conversation. They thought males and females were participating equally.

Typically, in mixed-gender classrooms from grade school through graduate school, females participate less, even though teachers believe that participation has been equal.

Controlled studies have shown women usually speak about a third of the time that men do; in classes where there is equal participation, females often perceived as dominating class. Here is an excerpt from Newborn's: a professor at N Law School: "I actually kept track of how long women and men spoke...and at the end of the class women had spoken about 80 percent of the time....When the men, they said the class was dominated by women so completely unfair. They think women were speaking 80 percent of the time."
In Sandler, Silveberg, and Hal's (1996) discussion of gender communication style differences, they suggest that it is the power difference between men and women that gives value to (or devalues) whatever differences exist. These authors say that a group's power or lack of power, which can be based on gender, race, age, class, or sexual orientation, affects the classroom environment by replicating our society's power relationships.

In most of my psychology classes that have roughly equal numbers of women and men, I believe that participation by gender has been equal. Yet I am beginning to be suspicious of my own perceptions. What has prompted me to revisit this question of participation by gender is a unique class structure I had this past semester. I taught The Psychology of Men course. In past semesters, if any men signed up for this course, they were a small minority. However, with new college general education requirements, my course now fulfills a diversity requirement. Although the males in my course are still a minority, they are now a sizeable minority.

About the sixth or seventh week of the semester, I started noticing that many women in the class had not participated in our discussions. It seemed to me that the same people were responding to my questions, or asking their own questions, or making their own comments much of the time. I also had a sense that the most active participants were males. Deborah Tannen (1992, p.2) said, "In your opinion, how does the instructor influence the class participation? Is there a way she can get more people into our discussions? What is your assessment of the way she encourages or discourages participation, and the way she fields questions?"

The results were quite dramatic. Seven of the eleven men in my class (63 percent) said that they themselves participated "frequently or often," 3 men (27 percent) said "sometimes." Spoken. This one student added he chose not to speak.

Of my 72 female students, one said that she participated frequently. Twelve women (50 percent) said they had never spoken. One female student said she had never spoken once. This was the only one. The one who signed her name to a course evaluation form; she is Hispanic and said she spoke in class because English is not so good. Ten other women (40 percent) said they spoke "sometimes occasionally."

Of the women, had never spoken, she said that they did not feel comfortable speaking in class. One or two of the ten who spoke in class, others often called on them what they had. Tannen (1992) say that they had not usually been in the majority. Although I have created a form to notice that some students, particular male students, challenge what the instructor says.

Other factors might contribute to lesser participation of women include the finding that men interrupt women more often than men interrupt men, and it is far more likely to control the flow of conversation. Additionally, from a sociological anthropology perspective, psychologists have demonstrated that in early play, boys tend to play in groups, which is a role for girls to play, and boys tend to be hierarchically oriented. Tannen says that these early
tions for classroom interaction. Boys are expected to use language to seize center stage: by exhibiting their skill, displaying their knowledge, and challenging and resisting challenges... Speaking in a classroom is more congenial to boys' language experience than to girls', since it entails putting oneself forward in front of a large group of people, many of whom are strangers and at least one of whom is sure to judge speakers' knowledge and intelligence by their verbal display (Tannen, 1992, p. 2).

Tannen argues further that men might feel more comfortable speaking in class than women do because the class is a "public" setting. Women typically (of course, not all women) are more comfortable speaking in private, with one other person, or in small groups where they know people well. This idea supports one of the findings from my assessment form. Several of the women who had never spoken, or who had spoken only occasionally, suggested that our class engage in more small-group activities. Tannen is convinced that small-group interaction is a classroom strategy that has the potential to level the playing field. She believes that part of small-group interaction should include students becoming observers of their own interaction patterns.

In the class following the assessment, I decided to try an experimental collaborative learning strategy. I put topics from the chapter we were studying across the blackboard. I then asked students to self-select their partners to work in four-person groups, resulting in the formation of nine groups.

I assigned multiple questions from each topic to each group. I asked students to write responses to everyone within each group spoke rather than having a single spokesperson when we would come back together as a large group, but that pulls more students into the conversation, enhancing participation level. And, my students reported that the collaborative learning led to greater learning.

In Part Two of this article, I will focus on the dynamics that lead to the lesser participation of some students, offer some suggestions for strategies that can employ equal opportunity in the classroom.

GEAR UP—the Middle School to College Connection

In its 1st Year, Program Launched in 21 States

BY JEFF SIMMONS

Intermediate School 183 in the South Bronx was a school in trouble. For years, it ranked among the lowest-performing within New York City's network of 1,100 public schools. In the early part of the last decade, test scores inched upward enough that it avoided even the threat of state takeover.

Salvador Fernández was recruited three years ago to fuel progress at the school, which has an enrollment of 60 percent Hispanic and 40 percent Black. Ninety-eight percent of its students qualify for reduced-price or free lunches.

Fernández says the 836-student school suffered from a lack of resources, significant parental involvement, and programs that encouraged kids to succeed.

"You don't turn a school around in a year," he concedes. "It takes at least five years to see a major change."

The comment makes it seem all the more remarkable that he claims he's witnessed a sudden turnaround, a noteworthy improvement in student performance. Fernández attributes this surge to a year-old federal program, GEAR UP.

"The bottom line is that we have seen the largest number of sixth graders ever to come to this school do extremely well: 82 percent of them met our promotional criteria," he boasts, adding that 204 of 248 fared well on the system's reading test and the remaining 44 were enrolled in summer school.

"When you start showing them different opportunities, they will succeed." Part of the reason for the program, which started in 1999, is to make college possible for students normally too far from college."

According to the DOE, of the 19 million adolescents ages 10 through 18 in the U.S., an estimated 20 percent live below the poverty line, and 30 percent are minorities.

Education officials say that students from low-income families are five more likely not to attend college than those from high-income families. Point to a 1998 Gallup poll noting that 70 percent of parents said they had little information about what courses their kids needed to prepare for college.

During the pilot year, the government distributed about $75 million (would then have to be matched) to 164 GEAR UP "partners" and $42 million to urban districts.
award 75 new partnership grants and about a half dozen new state grants.

The government awards the competitive grants to states and partners who meet basic criteria, though they are given flexibility in how they address students' needs. States must reserve at least half of their federal grant funds for scholarships.

The basic tenets: they must inform parents and students about college options and financial aid; promote rigorous academic coursework; accommodate an entire grade level of students; and start with sixth or seventh graders and continue through their high school graduation.

Schools that received the initial grants also must employ a full- or part-time coordinator to handle GEAR UP and must collaborate with other GEAR UP partners in their school district or state. The program requires that GEAR UP begin with students in either sixth or seventh grade, though it can begin with fifth graders.

"The main mission is to have many more low-income students prepared to enter college and be ready to succeed in college," says Rafael Ramírez, the education department's acting director of GEAR UP. "What we want to do is to have no low-income student taking remedial classes in college once they've graduated from a GEAR UP program. They shouldn't have to if we're doing a good job in education."

The program urges students to take algebra by the seventh grade so they can take tougher college-level courses before graduating from high school. One study found that only 15 percent of low-income students enroll in algebra by the eighth grade, even though those who take algebra and geometry early are three times more likely to attend college.

Funding for the program varies based on the size of the school and ability to raise matching funds from non-federal resources. The multi-year grants go to partnerships between colleges and low-income middle schools. They require at least one partner: community, business, religious, nonprofit, or parent group.

What's been done over the last year points to the ability of each grant recipient to shape the program based on the needs of its school and community. Some schools have started after-school activities; some offer extra help to students who have limited English proficiency. Others attach tuition bonuses to academic milestones.

The program will be particularly helpful to Hispanic students. Ramirez points out that Hispanics have the highest dropout rates and fall behind African Americans in terms of performance.

"We are attempting to change all of that," he says. "Often these kids are put on a low track and nobody cares about them and they are just ignore."

In New York City, the Bronx Education Alliance used its $7.8 million grant to offer a menu of possibilities to its chosen schools. The 10th largest of its kind in the nation—helped establish "cookers" between seven middle schools, six high schools, and four colleges.

The program involves about 1,670 students, attending intermediate middle and junior high schools, who have struggled to succeed.

Marietta Saravia Shore, director of the alliance of 20 different groups, says the consistent message delivered to parents is that there are scholarships and other supports available for students to attend college. One way she does this is to translate that: by providing computers to families to link them to the Internet. Funding isn't all there, "but she doesn't seem worried."

"We've five years of fun, under the grant, and the government gave us more than $7 million," she says. "So over five years of the $7 million and then up the remaining two years to about a million and 300 thousand.

Many of the students at the targeted schools in the Bronx are Hispanic and low-income families that could be the first to attend college. Some parents did not even go to high school, and, says Sara Shore, "the kids don't often have models in their homes."

"We tell them that it doesn't mean if your parents went or not, but can go if you work hard and about financial aid. You don't have to feel that because you are poor you can't go to college. If you don't hope, you aren't going to try.""}

Joseph de Jesus, the GEAR UP project director for the BEA, that the program differs from college-preparatory programs in that it's the first time one has started so early.

"You could go into a middle school now and talk with kids about college All of them raised their hands and say they want to go. But then to have people actually there talking and not talking about college, and people from colleges, that are in a greater understanding of accommodations."

Students visit different campuses, such as Lehman College and Fordham University. They take part in science laboratory exercise or visit with a college librarian, even drop by the greenhouse at Lehman work on a botany project.

"There are many things that the colleges do, and one is involving students in tutoring the kids," he says. Some have set up "help days" for students and their parents. "The family is much more aware than the college is about, and they're ready for it."

The Bronx Educational Alliance also uses college students to men
youth, provides the middle school students with personal computers and trains parents on how to use the technology. That points to a GEAR UP necessity: that parents must be brought more into the fold of their children's school life.

Other grant recipients offer career mentoring, academic counseling, even help for students in finding summer jobs. Though it is early on, it's expected that some will orchestrate summer programs to send high school sophomores and juniors to local colleges and pay for books and supplies.

Schools such as IS 183 say that even in the sixth grade, GEAR UP insists that students consider college the best option. Students are told about different colleges in regular assemblies, and later will be informed about admissions policies and achievement tests, even how to fill out applications.

New York University's Virginia Hardy is the project director for one of New York State's 11 GEAR UP programs. The school received $90,000 to serve the Choir Academy of Harlem, a school of national renown for its Harlem Boys Choir.

Hardy's program works with 34 students in sixth and seventh grades. GEAR UP provides tutoring and professional development for staffers. One of its partners, The New York Times, provides its newspaper for teachers to use as a guide.

"We work with these students to get them into college," she says. "They have to understand that there is enough money out there to go to college if they want to."

She pauses, then adds, "We have them starting on a college portfolio, a notebook full of their report cards." In regular assemblies, students are encouraged to have high expectations, to study hard, and to take the right courses.

Those affiliated with GEAR UP say that it's too soon to gauge success, though they maintain that they will track student progress. Biennial evaluations are required, but determining whether stressing college at such an early age will breed steeper enrollment will have to wait for at least six years.

"We won't wait until the end," Hardy says. "We want to see whether the number of accelerated courses increases or the number of remedial courses decreases over time."

The Choir Academy of Harlem is one where it will be easier than others to monitor students and track their accomplishments and failures because it runs from fourth until 12th grade.

"If you bring the bottom up, then everything else can rise as well," Hardy says. "What works with children who are struggling works with everyone."

GEAR UP weathered some criticism, mainly as the regulations that govern it were scheduled for revision earlier this year. The government received comments from 57 people or organizations, most of them supporting the program. But there were concerns about several areas.

One key concern was that it will be extremely difficult and costly to follow individual students each year as they head from middle to high schools and, in some cases, to districts in different states. Education officials, though, countered that they would continue to follow those who attend school with majority of students who are participating in GEAR UP in their grade.

Grant recipients also aren't required to follow students to other states. Other concerns include that some of the students who would receive help might not be as needy as others. And that funds could be taken away from needy students.

But by far the component that received the most criticism involved how much information colleges would eventually have to disclose about financial aid awards to GEAR UP students. The regulation was needed so that GEAR UP scholarships would supplement—not supplant—other monies.

"It's the first time the Department of Education is imposing its views on student packaging," says Terry Bock, senior vice president for government and public affairs for the American Council on Education. "We still think it's a precedent-setting step: federal higher education policy.

"They're telling colleges and private charities how to spend money that belongs to you college and private charities." Hardy says that the regulations could diminish the willingness of colleges to increase aid available to students.

"We have made it clear that we are unhappy with the regulations," he says. But I notes that the government has said it will reopen the regulation process to "find a way to make the program acceptable to both sides."

The GEAR UP website indicates that it seeks "final regulations...eliminate the burden th concerned so many commenters." Ramin points out that that component also affects a "very small number of students," that it won't kick in for another six years, the scholarship become available.

Nevertheless, ACE supports the reason behind the program. "It's a fundamental principle of social policy that earlier is better," Hardy says. "We believe the key to increasing enrollment of low-income and minority students in postsecondary education is to make sure they have the academic backgrounds and awareness of opportunities available to them at a very early age, so we like programs like this a lot."

At Fernández's school, students are walked into an assembly each week and talked to about college life and the doors it will open for them. Parents, I says, are coming to understand more deeply the need to start planning early. "With the GEAR UP program, we are looking to really transform the perception of our school," Fernández says. "We have a group of high motivated students, and this population of students is really going to make this school shine."

"I've noticed that their self-esteem is being built up," he says. "They a understanding the importance of a college education, because that's who being drilled into them every month."
SUPER Teacher in Any Language
All at Colorado Mountain Praise Adjunct

BY NICK ISENBERG

If you're at Colorado Mountain College and take ESL from adjunct instructor Magdalena Falconi-Emslie, you not only learn English as people speak it where she teaches in Salida and Buena Vista, but you learn Texas English, Minnesota English, and maybe even "valley girl" English. And if you are in one of her Spanish classes, you'll learn to understand Spanish spoken by people from as many different Spanish-speaking countries as she can get her hands on.

"I go to Monarch ski area and get Texan tourists and bring them to my ESL class," said Falconi-Emslie. But she doesn't stop at Monarch as a source of people with different dialects.

"I have friends in Salida who own motels, and if people are in town for three or four days, I invite them to my classes.

"I found a family from Mexico in a restaurant and brought them to a Spanish class. They're shocked, but they like it. They ask if they can come back and teach my class again."

But exposing English and Spanish students to as many dialects as possible is only one of the many creative ways that Falconi-Emslie, an outstanding teacher, makes her classes interesting.

Falconi-Emslie is considered so outstanding she was selected CMC's 2000 Adjunct Faculty Member of the Year—an honor bestowed upon only one of the more than 1,400 part-time instructors spread out over CMC's 13 centers in nine counties and 1,200 square miles of turf.

"She epitomizes what Colorado Mountain College faculty should be and are," said Dr. Marie-Paule Truitt, CMC assistant dean for commuter operations for Buena Vista and Salida, and the person who nominated her for the honor. "She is extremely knowledgeable in the subjects she teaches. She brings dedication, enthusiasm, and fun to the classroom.

"She uses every minute as a teaching moment, whether during breaks, in the classroom, in stores—wherever she encounters students. She uses that moment to emphasize learning. If she runs into an English-speaking student on the street or in a store—she'll talk in Spanish. If it's an ESL student, she'll talk in English. And she does it all the time with a smile. Her students aren't afraid of running into her; they look forward to it. They love it.

"She takes her students to restaurants, to stores to practice Spanish in the real world. It's not only in the classroom where she teaches Spanish or English as a Second Language. She's a teacher who really cares and who wants to share her love for both cultures and languages."

Magdalena invites nearly everyone from all walks of life to speak to her classes—in English in ESL classes and in Spanish for her Spanish classes.

"I particularly invite judges and lawyers to my English as a Second Language classes so people can learn about laws, which may be very different from where they came," said Falconi-Emslie. I recently had a man from Salvador who got the route number mixed up with the speed limit and was caught doing 66 in a 25 MPH zone.

"He was so naive, the judge let him off easy when I went to court to interpret for him. But while I was helping him, I realized how important it is to teach about the laws and other 'real' things that are very important to people in addition to just speaking the language.

"One night a week, I mix my English as a Second Language class with my Spanish II class. It has turned out to be beneficial. This is an additional evening of both groups that isn't officially part of the curriculum. However, everybody shows up. As people learn conversational Spanish much faster but we still need to work on the grammar."

Falconi-Emslie is CMC's 2000 Adjunct Faculty Member of the Year—an honor bestowed upon only one of 1,400 part-time instructors.
Falconi-Emslie said that she has found that in elementary and middle school, interpreting helps kids learn English faster than teaching them English as a Second Language. "I do this in study halls as opposed to translating in a classroom. I sit in the class and listen to what is going on, just like the students, to get the information I will be interpreting. I even have my own desk, just like the kids in the class."

The part of the state where Falconi-Emslie teaches is unusual for Colorado and for the CMC college district. Even though at one time it was part of Mexico, very few people speak Spanish at home, even those with Spanish names. This has created two interesting challenges for the award-winning teacher. The first is that there are only about 10 families in Salida who don't speak English at home and none in Buena Vista. As a result, there is no support system, except for Falconi-Emslie, to help them adapt to their new country.

The second challenge is the students from the long-established Mexican families who have little Hispanic identity and are taking Spanish because they need a language. "To some families, it's almost new because they've been born and raised here. There are families who take their kids to Mexico. But there are kids here who really don't care about their culture. I spend a lot of time giving people permission to be proud of being Hispanic."

"It's really obvious when she interprets for people that she has a real interest in helping them," said Chaffee County Judge Bill Alderson.

Nick Isern is a freelance reporter.

Dreams and Spirits Soar at Guadalupe Center

Town, Tribe, and South Mountain Working Together

By Marilyn Gilroy

The concept of "town-grown" partnerships—collaborative efforts between colleges and the communities in which they are located—is certainly not a new idea. But the Town of Guadalupe, Arizona, and South Mountain Community College (SMCC) have just completed a joint project that is unique by any standards of cooperation between local organizations and academic institutions.

Its name is the South Mountain Community College Guadalupe Center; completed this year and up and running for fall semester classes. What makes the new facility unique is that it is the result of an intergovernmental agreement between the Maricopa Community College District (of which SMCC is a part), the town council of Guadalupe, and the Boys & Girls Club of Guadalupe. But the process of building also required a close working relationship with the area's Yaqui Indian Tribe.

Along the road to completion, there were complex political negotiations, challenges to find adequate funding, and resolution of sensitive issues related to Native Indian lands and traditions.

Even though it took six years to work out the details, everyone seems to be pleased with the results.

"It is a phenomenal project," said Kate Lynch, director of public relations for SMCC. "For a town this size and with mostly modest and low-income levels, the development of this project is amazing."

Lynch is referring to the fact that Guadalupe has only 6,400 residents, yet it is now home to a new multipurpose Center that houses 47,000 square feet on a 10-acre site. There are three buildings: the SMCC Guadalupe Center, The Town of Guadalupe Multipurpose Center, and The Boys & Girls Club of the East Valley. The College Center includes classrooms, a computer lab, science lab, and offices. The Town facility has a library, museum, police station, and daycare center.

Last fall's groundbreaking for the new complex was hailed by town and community college leaders as a wish fulfilled.

SMCC President John Córdova recalls conversations years ago with the Guadalupe town council and Town Manager Luis González about what might happen "if we thought outside of the box. We talked about this for so many years that this day is a dream come true," said Córdova.

The fulfillment of that dream means that residents of Guadalupe now have access to municipal facilities that were once out of reach.

The town of Guadalupe is approximately one mile south of Tempe, Ariz., and borders Phoenix. Lynch said that the town is "the most isolated of the Yaqui Indian reservations. The Yaquis have lived the town since the early 1800s, coming early on development of the River Valley. Guadalupe has retained its unique atmosphere despite the growth in population around it.

Lynch says that the visitors through the town say they feel as though they are walking in old Mexico. "It is a blast of a little town," said Lynch. "The area is a blend of Chicano and American culture where I have blurred into a rich heritage that is a part of and community life," said Córdova.

With the addition of the complex, which has been described as a "thrive" Guadalupe stands ready to embrace an exciting new era.
educational future:"

The Center is building on a
decade of caring and providing a
meeting place for hungry minds.

For the past 10 years, residents
have been able to take a mix of
courses offered in the limited class-
room area of the old center. En-
rollment has grown to about 150
students in various offerings of trans-
ferrable college credit in English,
computer information, reading, lan-
guage, business management, reli-
gion, and Yaqui history. The Center
attracts students from Guadalupe, but
also from the surrounding areas of
Ahwatukee, Tempe, Chandler, Mesa,
and Casa Grande.

The Center’s director, Raúl
Monreal, attributes this to the fac-
ulty and the Center’s unusual col-
legiate atmosphere. “Caring and
friendly instructors tailor the class-
es to students, and the students like
the individual and professional
attention,” he says.

María Drury of Guadalupe is
among those who have benefited.
Working toward an Associate of
Arts degree in elementary educa-
tion, she took 12 credits at the
Center and two credits at SMCC.

Small classes and an under-
standing of her Mexican American
culture were a huge draw for Drury,
who lives nearby. “There are usually
only about 15 students in my class-
es, so we get personal attention,”
she said. “The teachers understand
the importance of our history, festi-
vals, and celebrations—our culture
and heritage.”

That atmosphere is unlikely to
change as the new academic Center
continues to bridge the Towns spe-
cial cultural past with a future
largely influenced by information
technology. Fortune 500 technology
companies surround the communi-
ty, adding input and service.

Looking ahead, Monreal wants
to run as many classes as possible.
Enrollment and offerings have been
steadily increasing. As the Center
broader opportunity for students to
take full loads and complete cer-
tificate programs.

According to Kate Lynch, resi-
dents will be able to complete the
full complement of courses that
comprise the first year of college
and then transfer to the main cam-
pus of SMCC.

The Center’s main intention is to
help students adjust to college life
and eventually finish their degrees.
Academic support services, such as
study groups, are readily available.
Transportation is also arranged
because for many students, getting to
school is a major challenge. The
Center organizes carpools, and SMCC
runs shuttle bus service between the
Center and the main campus.

Apparently, these efforts have
paid off as Monreal proudly points
out that 11 graduates of SMCC from
the Guadalupe Center are now
attending Arizona State University.
“We want to see that number
increase, and the new space will
help us to educate even more stu-
dents who will eventually continue
their education,” he said.

Monreal also hopes that the
Center will become a focal point
for teaching and study of the area’s
cultural life, especially that of
the Yaqui Indians.

The Yaqui Tribe’s blend of tradi-
tion and Catholicism exerts a pow-
eful presence in town, especially
during their ceremonial rituals,
which are a part of most religious
holidays. For example, during Lent,
tribal members dance and re-enact
events that led to the crucifixion of
Christ, using the broad earthen
plaza in front of the Yaqui Temple at
the center of town. Just north of the
Temple, on the plaza, is Our Lady of
Guadalupe Church, an historic site
dating back to 1910.

Dr. Octaviana Valenzuela
Trujillo, director of the Center for
Indian Education at Arizona State
University, teaches a popular class
on Yaqui culture and history at the
first time last fall, and it was amaz-
ing how many people were interest-
ed in it,” says this Yaqui Indian and
lifelong Guadalupe resident.

“There were 30 students, some
from ASU and Tempe, who wanted to
know more about their Guadalupe
neighbors. It was wonderful when
we talked about the dispersion of
Yamis in the late 1800s and early
immigration and issues of iden-
tity and cultural values.”

Dr. Trujillo, the first woman
elected vice chair and later chair
the Pascua Yaqui Tribe, added
she looks forward to expanding
Yaqui studies “to reflect the com-
munity as a whole, including the
México-American heritage.”

Yaqui history museum, located
Center, should support new opportunities for teaching and learning.

The day-to-day operations and leadership of the SMCC Guadalupe Center will be guided by Raúl Monreal, a "home town kid" who is familiar with the town's cultural and political history. He has deep ties to Guadalupe and understands the importance of its heritage.

Monreal taught many of the town's residents at Frank Elementary School and also taught at nearby Gilliland Junior High in Tempe. He was instrumental in helping the Town of Guadalupe to incorporate in 1975. Before becoming director of the Center, Monreal served as director of student development at Paradise Valley College, part of the Maricopa district.

SMCC President Córdova has high praise for Monreal. "With confidence, I entrust the leadership of the Guadalupe Center to Raúl Monreal," he said. "He knows the community, the culture, has a heart for the people, and values education." The new director is well known for his original poetry—"works that reveal a great sensitivity," according to Dr. Córdova.

Indeed, for 34 years, Monreal has been writing poetry—about education, culture, community, family, injustice, and leadership. Some of his poems have been set to music.

The challenges of the Guadalupe Center seem well suited to a man unafraid to challenge his students and himself in order to set an example. He emphasizes to his students that they need to be moral, ethical, and practical in life and work. He is fond of saying "Don't destroy dreams," and he has proved the essence of that saying through his own life. Monreal hopes to make the South Mountain Guadalupe Center a space for dreams and spirits to soar.

Parts of this article were excerpted from Ed Cefera, the Maricopa Community College District newsletter.

College and Community Join in Guadalupe Cemetery Project

The partnership to build the new Guadalupe Center is just one of many examples of how South Mountain Community College has forged ties with local groups to complete worthwhile projects.

In recent years, SMCC has worked with more than 100 volunteers to paint murals on the walls of Guadalupe Cemetery.

Located in the middle of a residential Tempe neighborhood, the cemetery is a collection of handmade crosses, granite monuments, and concrete markers, decorated with family mementos and candles. A tall block wall surrounds the cemetery with many of the sections painted with murals of patron saints, angels, and Biblical scenes.

The volunteers have painted additional scenes that depict the history of the Town of Guadalupe, Yaqui legends, and Mexican and Yaqui customs. Some have cleaned up broken glass and debris from the cemetery, which is maintained solely by Guadalupe families. There is no custodial or security staff for the five-acre site.

The designs for the murals were created by artist Manuel Acuña who has conducted art class community to involve area and adults. Some scene deer dancers while skeleton figures come during Día de los Muertos Mexican festival held during the Halloween season. Our Lady of Guadalupe, the townsite of Guadalupe, located where the cemeter.

The SMCC Guadalupe Center has paid for suppl instruction. English students by SMCC instructor Pam E have done research and associations with the museum.

The stories have been part English, Spanish, and Yaqui.

Volunteers from South Community College Guadalupe learning center been joined by volunteers Boys & Girls Clubs of Amistad and the Town of
Recruiting Hispanics, Swarthmore Style

**Personal Touch the Key to Success**

BY

Inés Pinto Alicea

Not only are they intimidated by the language differences but also about class...that they're not the type of people who go to Swarthmore,” said Pérez.

Yansi Pérez isn't your typical college recruiter. If parents are scared about sending their children far away to college, Pérez invites them out, picks them up in her car, and takes them out for a heart-to-heart, many times in Spanish, about the wonders of her tiny college on the East Coast.

“My parents didn’t want me to go away to college, so I know the issues,” said Pérez, assistant dean of admissions at Swarthmore College in Pennsylvania, less than a half hour west of Philadelphia. “To do this kind of work requires a lot of personal involvement. By meeting individually with the parents, it helps relieve the parents so they understand the process.”

Pérez and others at the campus seem to have found a successful formula for recruiting Latinos to the campus. Latino enrollment has grown steadily over the last decade at Swarthmore. In the 1990-91 school year, only 42, or 3.1 percent, of the 1,329 students at the campus were Latino. Today that figure is 135, or 9.2 percent, of 1,467 students. The 1999-2000 first-year-student class of 572 students was 14 percent Latino. This year, the school graduated its largest class of Latinos—40 students.

“To do this requires a lot of commitment and effort from the institution, and Swarthmore has that commitment,” said Pérez, who added that throughout the administration, including President Alfred H. Bloom, there is a great deal of financial and moral support for efforts to diversify the campus. “If you have help from all levels, it makes it easier.”

Applications to the 330 campus must include SAT Ic scores, scores in three S Subject tests, one of which must be the writing test; a high school transcript; a brief personal essay; a meaningful interest or activity; and a longer essay on a topic specified by the college.

For 1999-2000, fees are $23,550, which includes tuition of $21,800...
important element in her success as a college recruiter is her personal touch. A major aspect of that is her ability to speak to parents in Spanish.

"Not only are they intimidated by the language differences but also about class...that they're not the type of people who go to Swarthmore," said Pérez, adding that her meeting with parents, particularly in states outside of the East Coast, helps comfort parents nervous about sending their children to school far away.

"I understand that Swarthmore is not at the top of the list for people in California because it's small, it's far away, and it doesn't roll off your tongue like Harvard," said Pérez.

"Although many state schools are wonderful, the world is wider than state schools. These students should apply to schools they think are reaches for them."

Alicia Muñoz, an 18-year-old rising sophomore of Mexican American descent at Swarthmore, said she liked the small size of Swarthmore. The school says there are just nine students per professor. Muñoz also said she felt welcome as a student and as a Latina. Shortly after she was accepted by the school, she got the usual paperwork but also a welcome letter from HOLA (Hispanic Organization for Latino Awareness), a Latino cultural support group at the school. She has since become active in the group herself, volunteering as a tutor in the community.

"I've had a really nice experience here," said Muñoz, adding that she knew she would receive more personal attention at Swarthmore than at her other college choices.

"We have a nice Latino population. They are very encouraging. Not really all of the people here. When you bring out what Swarthmore is and give it that sense of community."

Anna María Cobo is in agreement about that sense of community. Cobo is assistant dean and director of the school's Intercultural Center (IC), a facility on campus that provides support to students of Asian or Latino background, gay, lesbian, bisexual, and transgender students through activities and support groups. "We've opened our doors and willing to work with all students, with a broad range of students," said Cobo. "It's a great effort to get everyone involved. The chemistry between the students and the administration describes a great team. "We work together to get all kinds of students. We believe in this campus having Latino students here."

Cobo said that the IC plays an important role in establishing a welcoming climate on campus seeks to educate both its students and the larger community about cultural, ethnic, class, gender and sexual orientation and diversity. The IC sponsors lectures, movie nights, poetry readings, roundtable discussions, and a speaker series.

Cobo said that the school is successful too at retaining Latino students through support efforts of the summer orientation college (Tri-College Institute for Latinos) designed to prepare for the rigors of college mentoring done by Latino faculty, mentoring done by alumni with current Latino students; several courses offer Latino studies, including a history; the networking of alumni; a Latino database; help students get jobs and internships; and the work of HOL.

"It's a little thing. Latino students," said Cobo. "We have students come here, they want to show them what it's like to be a student, and we're graduating them and we're graduating them." Cobo said that often Latino students want to go to bigger and universities where..."
learn more about their Latino roots.

"The challenge is to show them that they can learn about their identity here," said Cobo.

Vanessa Askot, an 18-year-old political science major from Pennsylvania, just finishing her first year, said that Swarthmore has helped her get more in touch with her Latino heritage. She had few Hispanic families in her hometown to relate to, and the campus has provided her numerous opportunities to explore what it is to be a Latina. "We speak Spanish at home, eat empanadas and dulce de batata at meals and enjoy Telemundo more than most families, but being bilingual and eating cultural foods hardly rooted me in the Hispanic community," said Askot, who is of Argentinean background. "I truly believe that I walked onto the most open-minded, supportive, tolerant campus in the country. While the differences among students here are valued, they do not become their defining characteristics. Is there a place for minority students here? This IS the place for minority students."

Miguel Díaz Barriga, an associate professor in the department of sociology and anthropology, said that in his time teaching on the campus since 1989, there has been an enormous growth in the number of courses, campus events, and volunteer activities that focus on Latino/a and Latin American issues.

"This growth has been the result of a close collaboration between Latino/a faculty, staff, and students and reflects the support of the College administration," said Barriga.

Barriga himself has been instrumental in fueling this growth and interest in Latino activities. He has taught courses on the Chicano/Latino experience, and he incorporates service learning in his innovative courses. Students in his classes often can be found working with migrant workers in Pennsylvania on a variety of issues.

Students not only read about farmworker politics, educational dynamics, and Chicano/a culture but also work with organizations that are dedicated to union organizing and developing cultural programs for Latino/a youth," Barriga said. "A group of students from the seminar are now organizing a student-led course, Educating for Migrants' Rights, that will involve teaching migrant rights issues to Mexican/Mexican American youth at a local high school."

Cobo said that while the campus has been successful recruiting Latino students, work still needs to be done to increase Latino faculty. When she arrived on campus, she sought out all Latinos on the faculty, staff, and within administration and formed a Latino committee, which has been warmly received by the administration, she said. Its eight members include two tenured faculty.

The Latino committee has had its share of accomplishments. The group has garnered funding in intern positions, which will information on the different organizations available to prospective Latino faculty members. The group also is at jobs for several postdoctoral students in some of the departments. The campus an honorary degree to a Law year. The committee and worked together to get alumni from Swarthmore become active mentors for students on the campus.

"We've come a long way," Cobo.

Braulio Muñoz, professor of sociology and chair of that is attracting Latinos to teach on small campus is that Swarthmore competing with better-known larger Ivy League schools.

"We're also trying to appeal to an area where the group is weak," said Muñoz. "It is best interest as an elite in to keep up with the devil around us. If we are going leader in academic matters, uly members have to ref composition of the society u. I tell everyone here the not doing charity or con work and that the recruit Latino faculty is not just for ef of the Latino faculty. We do this to maintain our po leaders in the educational s
Miami-Dade Students Win Goldwater Scholarships

Raciel Valle is one of two M-DCC (Fla.) students to win prestigious Barry M. Goldwater Scholarships. Valued at up to $15,000, this year’s scholarships were awarded to 309 students from the 50 states and Puerto Rico.

Scholarship recipients, who are math, science, and engineering students from colleges and universities across the country, were selected based on research work and academic merit. Each student receives $7,500 for the 2001-2002 academic year and is eligible for another $7,500 for an additional year of study, based on continued academic performance.

Valle, a math major, was on M-DCC’s team that placed first at Mathematics Olympics 2000, a Florida state competition for community colleges.

Biology major Gianni Franklin is M-DCC’s other scholarship winner.

U.S. International Announces Online Master’s

United States International University (USIU)—with campuses in California, Kenya, and Mexico—introduced an online M.A. in education, with a concentration in technology and learning.

USIU president Garry Hays said that the program will involve a range of instructors and guest experts, and that the inclusion of international students will enhance the learning experience for all students. The online campus is at http://usiuonline.net/.

Texas-Pan American/Baylor Medical Program Sees Results

A partnership, formed in 1994, between the University of Texas-Pan American (UTPA) and the Baylor College of Medicine has significantly increased the number of South Texas students accepted to medical school.

In 1996, only four of 30,000 students enrolled in the five undergraduate universities in South Texas were accepted to medical schools. In 1998, when the first group of UTPA Premedical Honors College students received their bachelor’s degrees from UTPA, the number jumped to 14—all but three from Pan Am.

Last year, 16 UTPA students were accepted to medical schools. The class of 2000 features 25 future physicians. And there are more than 69 students in the pipeline.

Marissa Gómez (pictured r., with Dr. Michelle Barocio), honors college graduate now at Baylor, said, “At UTPA, you attend your classes together, you study together, you are given opportunities that most pre-med students don’t get as undergrads, and you go into the program knowing that you will be accepted to Baylor if you meet all the requirements.”

LIU-Brooklyn Graduate Overcomes Disability

Joseph Osie, a public safety officer at Long Island University (LIU)-Brooklyn in New York, completed his paralegal studies despite living with a neurological disorder that impairs a person’s ability to write. Osie, 37, who earned an associate degree in the spring, is the first in his family to earn a degree.

As a youngster, Osie’s learning went undiagnosed, and he had to struggle at school. Frustrated at age 14, he dropped out of school to support his family, becoming a dockworker. But realizing he wanted something intellectually fulfilling, Osie earned his GED and briefly entered York’s Kingsborough Community College where his disability was first identified—dysgraphia—different from, but related more well-known dyslexia, which his person’s reading disability.

Osie now hopes to further his career and study business law. “I am euphoric,” said Osie. “I have a great accomplishment in earning my degree.”

Pacheco Takes Top Scholarships

Western Nevada

Olga Pacheco was one of two students awarded a $12,000 scholarship at the Nevada Community College (WNCC). The Hites Family Scholarships, from the Hites Scholarship Foundation, were the largest ever given out at WNCC.

Pacheco, third in a family of seven children, grew up in the village of Huejotitlan in Jalisco. She became fluent in English 10 years ago, self-studying at WNCC; she is an A student, one of the 14 who graduated this year, and she will transfer to UC—Reno in the fall. Full-time student and mother, she was the other Hites Scholarship recipient.

Lesley Program Aims to Improve Minority Teachers

In Massachusetts, the Lesley College will increase the number of minority public school teachers in Boston thanks to a three-year grant of $500,000 from the Lloyd G. Balfour Foundation.
The scholarship program, which will enable the students of color to complete master's degrees, obtain teaching certification, and build leadership skills, answers a call to increase the diversity of local teachers. Superintendents of regional public school systems have repeatedly voiced their concern that the pool of teacher candidates lacks diversity.

The Massachusetts Department of Education estimates that 18.6 percent of K-12 students in Massachusetts public schools are Black or Hispanic, and 56 percent of teachers. Only 4.8 percent of those seeking teacher certification are Black or Hispanic.

**USF Finds Whites and Various Ethnic Groups Equally Generous**

A new study by the University of San Francisco's (USF) Institute for Nonprofit Organization Management, examining charitable contributions and volunteering throughout California, finds little difference in the giving patterns of whites and various ethnic groups.

"Although national studies report that whites give more than do non-whites, our study found that whites, African Americans, and Asian/Pacific Islanders give and volunteer at comparable levels," said Michael O'Neill, professor at the USF Institute for Nonprofit Organization Management. "Latinos generally report lower levels of giving and volunteering, but when the effects of income, educational level, and immigration status are statistically removed, differences among all ethnic/racial groups virtually disappear."

**Pima Community Presents Diversity Awards**

In Arizona, Dr. Robert D. Jensen, Pima Community College (PCC) chancellor, presented the Chancellor's Equity and Diversity Awards for 2000. The awards program, instituted in 1995 recognizes leadership and advocacy for inclusiveness and civil rights principles in education and employment.

The recipients were Duff Galda, ESL faculty, Downtown Campus; Patricia Houston, acting division dean, mathematics and communication arts, Downtown Campus; Edward Lorenzo, lieutenant, department of public safety, District Support Service Center; and Nick Lucero, student, East Campus.

**Navarro on California Learning Commission**

Richard A. Navarro, dean of California State Polytechnic University-Pomona's College of Education and Integrative Studies, was appointed to the 12-member state Commission on Technology in Learning.

The commission makes policy recommendations to the state Board of Education in such areas as statewide planning for educational technology and ongoing evaluation of all technology, telecommunications, and distance learning programs that affect K-12.

Navarro is on the board of directors of the National Board for Professional Teaching Standards and the Pomona Valley Education Foundation and co-chairs the East San Gabriel Valley Education Consortium. He has a bachelor's degree from San Francisco's New College of California, a master's from Harvard, and a master's and doctorate from Stanford.

**Gonzales to Direct UNM Women's Center**

Sandra Gonzales was named director of the University of New Mexico (UNM) Women's Resource Center. Gonzales has been with the Center for 10 years as assistant director, counselor, and program services coordinator.

The Center's staff has been examining the results of an informal needs assessment survey, which drew more than 600 responses. New initiatives will be introduced based on the responses, said Gonzales, including reestablishing evening and weekend hours for the Center's "family friendly" computer pod and updating its equipment. Gonzales has been developing guidelines and paving the way for professional women to serve as mentors to students. "The Center is a point of entry for a lot of women, and retention and recruitment are important parts of our mission," said Gonzales.

Gonzales has a bachelor's degree and a master's from UNM.

**Westchester Honors Reyes**

In New York, SUNY (State University of York)/Westchester Community College (WCC) honored outstanding student Adalina Reyes, a former welfare recipient, with a chemical dependency counseling program award. Reyes, who was recognized at WCC's Honors Convocation, will be going on to Lehman College.

**Baca to Apply Her Summer Stud to Classes at Heritage**

Dr. Inelda Baca, assistant professor of Heritage College (Wash.), recently returned from a summer of study in Spain. Baca, along with 17 other teachers of bilingual education and Spanish as a foreign language, was in Spain on scholarship, exploring different pronunciations of Spanish and the lexical, semantic, morphological, syntactic, pragmatic differences in spoken and written Spanish.

"What I am trying to do at Heritage is to share my personal experience, develop cognitive, academic language proficiency by having students know various dialects and grammars of Spanish, and what they are from Mexico, Cuba, Spain, or Spanish-speaking countries," said Baca.

**Jersey City Welcomes Candido Camero**

Percussion greats and friends gather with famed Cuban jazz percussionist Candido Camero (pictured) at the "Slide Force Meets Percussion" concert at New Jersey City University (NJCU). Among those sharing the occasion with Camero were Lillian Hernandez, wife of NJCU President Dr. Carlos Hernandez; "The Trombone Man," Pablo Torres; Robert Romero, director of NJCU's percussion ensemble; and entertai...
program announcer for the concert; guest artist Chango, Cuban percussion star; and Hugo Morales, chair of the NCUS council on Hispanic affairs, which co-sponsored the concert with the University's department of music, dance, and theatre.

**California Lutheran Honors Former NFL Player**

Daniel "Danny" Villanueva, former professional football player and radio newscaster, received an honorary doctorate from California Lutheran University.

Villanueva, a field goal kicker for the National Football League's Los Angeles Rams and Dallas Cowboys in the '60s, has distinguished himself as an entrepreneur in broadcasting and as a leader in the Latino community. He began as a newscaster for KNBC and ultimately became president of KMEX, the largest Spanish-speaking station in Southern California. In 1987, he created Villanueva Media, which held the license for KMSM-TV. He is currently chairman of the board of Balsam Capital Corporation and serves on many nonprofit boards.

**DaimlerChrysler Gives to HACU**

The DaimlerChrysler Corporation Fund contributed $25,000 to the Hispanic Association of Colleges and Universities (HACU). The unrestricted gift will be used to strengthen and increase HACU's reach to its more than 240 member colleges and universities with high Hispanic enrollment rates in the United States, Puerto Rico, and abroad.

"Our support of institutions such as HACU helps improve Hispanic access to higher educational opportunities," said W. Frank Fountain, senior vice president, government affairs, DaimlerChrysler Corporation, and fund president.

**Texas Student Recognized for Contributions in Microbiology**

Daniele Provenzano, doctoral candidate at the University of Texas Health Science Center-San Antonio, received a 2000 Raymond W. Sarber Award from the American Society for Microbiology. The Sarber Awards recognize academic achievement and reward outstanding research and potential among students in microbiology.

Provenzano has done important work on *Vibrio cholerae*, the microorganism associated with sometimes deadly diarrheal diseases caused by contaminated water. He has made significant contributions to the understanding of cholera pathogenesis and enteric pathogen survival. His promise as a scientist and educator is also apparent in his work as an instructor and teaching assistant.

Provenzano has been noted for his volunteer work with a Saturday Morning Science Camp for K-12 students and his involvement with the Society for the Advancement of Native Americans and Hispanics in Science.

**Virginia Commonwealth Spanish Course Targets Healthcare**

"As the Latino population continues to increase, it is becoming more and more important for medical professionals in the nation's hospitals to learn to speak Spanish to communicate with their patients," says Dr. Consuelo Navarro, assistant professor of foreign languages at Virginia Commonwealth University (VCU). A course at VCU is helping medical professionals do just that.

Spanish for Medical Professionals, created three years ago by Navarro, is a year-long three-credit course offered to physicians, nurses, physical therapists, and administrators of VCU's Medical College of Virginia Hospitals. It offers instruction in conversational medical Spanish and Latin American cultural aspects that have an impact on medicine, such as issues related to adjustment after immigration, family structure, and cultural concepts on illness and death.

**California-Santa Barbara Professor Studying Mexican Immigration**

Jonathan Inda, assistant professor in the University of California-Santa Barbara department of Chicano studies, won a prestigious Rockefeller Fellowship.

Inda's work involves observations of Mexican immigrants in Orange County, Calif., and how their transnationalism sometimes generates a backlash of strict and exclusively defined American nationalism in other Americans.

The $33,000 grant will enable Inda to finish the work, which began as his doctoral dissertation and will be completed under the auspices of the Center for the Study of Race and Ethnicity at UC-San Diego.

**North Florida Names VP of Student Affairs**

An educator with extensive experience with students from diverse backgrounds was named vice president of student affairs at the University of North Florida (UNF).

UNF President Anne H. Hopkins announced that Dr. Mauricio González, associate VP for student life at the University of Cincinnati, will assume on Oct. 1. He will oversee student health, intramural sports, student unions, student governance, multicultural affairs, career services, and more.

González has a bachelor's degree from the University of Texas, a master's from the University of the Americas in Puebla, and a doctorate from Florida State U. In 1991, he was a Senior Fulbright Scholar at Universidad de San Carlos in Guatemala.

**Rao Becomes Central Michigan President**

Michael Rao, former chancellor of Montana State University-Northern, became the 12th president of Central Michigan University (CMU).

The 51-year-old Rao is described as dynamic, intense, and a major achiever who has moved up rapidly through the professional education ranks. He earned a bachelor's degree and doctorate within six years, an accomplishment that most scholars more than nine.

He wi...
of a large, public, two-year college, and the head of a four-year public university.

He brings to CMU a broad range of experiences in education, having been a chemistry researcher, college dean, assistant to a university president, college president, university chancellor, president of a management and education consulting firm, and gubernatorial appointee to a state student aid commission.

**Southern Methodist Presents “Sacred Space” Exhibition**

The Institute for the Study of Earth and Man at Southern Methodist University (SMU) in Dallas will present an exhibition of about 150 mural-sized color photographs of sacred landscapes and architecture spanning 4,000 years in Mexico, Guatemala, Honduras, and Southwestern United States.

At the Hall of State at Fair Park in Dallas from Sept. 11 to Oct. 27, the exhibition, “Sacred Space: Man and the Divine in Mexico, Central America, and the Southwestern United States,” will feature photographs by Dallas photographer Carolyn Brown. It is intended to transport visitors into sacred landscapes and structures, express the majesty and richness of sacred traditions of these cultures, and provide insights into their engineering, architectural, and artistic achievements as well as their political and religious dimensions.

**Nazareth Students Inducted into Spanish Honor Society**

Nine undergraduate students at Nazareth College in New York were inducted into Mu Delta Pi, the National Spanish Honor Society.

Olga Rivera, Ericka López, Josephine Rosado, Jessica Colón, Andy Desouza, Alison Stoller, Julie Schum, Laura Barnard, and Sara Strickland all maintained their eligibility based on grade point average and high academic achievement in the study of Spanish.

Dr. Tina Pereda, professor of Spanish, called their work exceptional. “We are very proud to have this long-standing tradition at Nazareth College of such a highly esteemed Spanish honor society, to recognize students for their outstanding academic achievement in Spanish studies and for their extraordinary dedication to the many Hispanic cultural activities of Club Cervantes,” said Pereda.

**Poyo Conducts Latino Research at Smithsonian**

Gerald Poyo, Latino studies scholar at St. Mary’s University in Texas, conducted Latino cultural research at the Smithsonian’s National Museum of American History, where he was a Rockefeller Humanities Fellow. Under the Smithsonian Center for Latino Initiatives doctoral fellowship program in Washington, D.C., the extensive collections are accessible to researchers studying Latino art, history, and culture relative to the U.S.

Poyo’s areas of scholarship are Latino history and Spanish colonial history of Texas, the Southwest, Cuba, and the Caribbean. His project is titled “Interpreting and Exhibiting U.S. Latino History.”

An associate professor of history at St. Mary’s, Poyo has a doctorate in Latin American history from the University of Florida.

**Stetson Hosts International Forum**

**STETSON:** Thirteen local government officials from Spain and Latin America took part in a seven-day fellowship program on local government, Central Florida style. Hosted by Stetson University, the visitors were all members of the Iberoamerican Union of Municipalities (UIU: Unión Iberoamericana de Municipios), an internationally recognized organization of 600 mayors, city council members, public servants, and academics from Spanish-speaking countries.

This year’s seminar, the third organized by Stetson since 1998, brought delegates from Argentina, Spain, Mexico, Venezuela, Panama, Brazil, Ecuador, Guatemala, and El Salvador. Stetson and UIU signed an agreement in 1996 to facilitate exchange of students and professionals. Stetson has also funded student travel to internships in UIU-affiliated cities in Uruguay, Mexico, Guatemala, Ecuador, and Argentina.

**New Mexico Highlands Administrator Named ACE Fellow**

Patricia Manzanares-Gonzales, director of New Mexico Highlands University’s (NMHU’s) Educational Outreach Services, was named a 2000-2001 American Council on Education (ACE) Fellow, one of 34 selected this year in a national competition, the first from Highlands to be selected and the eighth New Mexican to be awarded the honor.

As an ACE fellow, Manzanares-Gonzales will focus on an issue of concern to NMHU while spending a portion of the academic year working with top administrators at the institution. She also will attend three long ACE seminars on higher education issues.

The ACE Fellows Program, established in 1965, is designed to strengthen institution leadership in American higher educatic recognizing and preparing promising faculty and senior administrators for responsible positions in college and university administration.

**Texas Association of Chicanos in Higher Education Newsmakers**

Dr. Rosario Torres Raine: TACHE set up academic and student services for the new University Center at Palo Alto College. The center allows students to continue their educ after receiving an associate’s degree and their bachelor’s degree while remaining on campus. Torres Raine was named exec director of the Center in February.

Dr. Ricardo Rodríguez, professor of cistry, received Texas Wesleyan Univer McCann endowed professorship for a t-year term because of his community service and excellence in teaching. Rodríguez developed a “magic show” to promote cistry in local schools.

In commemoration of the College’s anniversary, former San Antonio College dentist and renowned artist Jesse Treviño of designed a mural of hard-cut ceramic that would decorate, top to bottom, all exterior faces of the Moody Learning Center.

**Northwest Vista Student Named Outstanding Youth Tutor**

The Northside Independent School District (NISD) named Jennifer Ramos, a student at Northwest Vista College (NVC) in Texas, Outstanding Youth Tutor. Ramos was recognized at NISD’s annual school-business-community partnerships awards ceremony.
Last year, Ramos took the initiative and contacted Zachary Middle School Principal Javier Martinez and NVC Associate Director of Student Success Debi Gaitan about a mentoring program. As a result, Ramos and 25 fellow NVC students have mentored weekly at Zachary Middle School.

Cleveland State Professor Studies Latinos in Higher Education

Dr. Rose Quinones-DeValle, Cleveland State University professor in the College of Education, designed a research study investigating the prevalence of Latinos and Latinas in public and private colleges and universities in Ohio. She is collecting data on enrollment, retention programs, and graduation rates of Hispanic students, who are born either inside or outside the United States and who are either U.S. citizens or non-U.S. citizens. Quinones-DeValle says that the Latino high school dropout rate stands at 25.3 percent nationally but that in Ohio, the rate is 58 percent.

Born in Puerto Rico and raised in Youngstown, Ohio, Quinones-DeValle has a doctorate from Kent State University and is a gubernatorial appointee to the Ohio Counselor and Social Work Board.

San Antonio Students Compete in Film Festival

Time and Error, a video produced by San Antonio College (Texas) students Pitaya “Pete” Tunsiricharlenglui and Brian Sánchez, placed as a semifinalist and was screened in the second annual National Student Festival for Film, Video, and New Media at New York City’s Hunter College.

Sánchez has worked full-time for KABB-TV on its camera floor crew. He also freelanced for a few years shooting weddings and concerts, and worked as an editor and in production before enrolling in the radio-TV program at San Antonio in 1998.

The four-minute video—a dream sequence about a mother dropping her child off at school—competed against entries from NYU, Stanford University, UT-Austin, Columbia, and other institutions with strong national reputations.

Colorado-Boulder Helps Minority Students

In Colorado, nearly 100 underrepresented rural and minority high school students got the chance to be engineering students at the University of Colorado-Boulder through an expansion of the popular Success Institute.

A hands-on engineering outreach program of the UC-Boulder’s College of Engineering and Applied Science, the Success Institute was piloted in 1998 and 1999 with the goal of expanding the number of underrepresented students who successfully study engineering and computer science. The program has doubled in size this year due to a high level of interest and support from a variety of donors and government organizations.

David Aragon, director of the Success in Engineering through Excellence and Diversity program, said he hopes that helping young students to understand what engineering is all about will get them excited about it as a career choice.

New College Grads Not Too Keen on “Dot-Coms”

NACE Despite the hype about job opportunities with new “dot-com” organizations, most new college graduates would rather work elsewhere, given a choice.

In a new survey conducted by the National Association of Colleges and Employers (NACE), only 13 percent of new graduates said they would like to work for a dot-com while 42 percent picked a Fortune 500 firm as their employer of choice. In fact, of the four choices offered, dot-coms placed last, trailing behind small companies, which earned nearly a quarter of all responses, and working for oneself, chosen by 20 percent of respondents.

NACE is a leading source of information about the college market and the leading information provider for human resources professionals who recruit and hire college graduates and for career services practitioners on college campuses who advise students and graduates.

Palo Alto Receives $2 Million

Palo Alto College southside commuters college in San Antonio, Texas, received year $2 million grant aimed at strengthening and improving services.

The Title V federal grant is earmarked at developing Hispanic-serving institution Alto's current student body is 65 percent Hispanic and 30 percent white/non-Hispanic.

"This grant will enhance Palo Alto's ability to serve students more effectively and to increase our level of service a traditionally underserved population," Dean Enrique Solis, Palo Alto College president.

The grant period begins Oct. 1. Michael Flores, Palo Alto's director of institutional research, planning, and effect increases the grant director.

Cristina Supports Sight for Student

Some children can't see the blackboard. Other trouble making out the words in the books. One in four school-aged child is some kind of vision problem. And poor performance can lead to poor performance.

The plight of these students and the adequate eye care has touched C Saralegui, host of Univision Network's notable program, The Cristina Show. 1 year veteran journalist, known for her commitment to health-related issues, is team with Vision Service Plan (VSP) to bring clarity to their lives. Cristina is on her time to help create awareness of VSI for Students program, which provide students across the country with vision care:

New programs include Vision Service Plan (VSP) a not-for-profit entity that is one of the nation's providers of eye care benefits. Launched in 1997 as part of its AmeriCorps Promise: Alliance for Youth Commitment.

Saint Mary’s Professor Monitors Mexican Presidential Election

Marc Belanger, political science professor at Saint Mary’s in Indiana, went to Mexico as a member of an international delegation charged with observing and monitoring Mexican presidential election that too in July, San Francisco-based human rights watch group Global Exchange, at the invitation of “Alianza Civica,” a Mexican human rights organization, established the dele
Delegation members included academics, religious missionaries, students, and others.

Belanger and company visited Mexican communities and met with representatives of civic labor, and human rights organizations prior to the vote.

In the News at the University of South Florida

USF

• The University of South Florida (USF) welcomes its first students into its new master's program in Latin American, Caribbean, and Latino studies this semester. Unlike many others, USF's will incorporate the study of Latino communities in the U.S. According to Paul Dosal, professor of history, the Tampa area's Hispanic heritage and history offer a fertile entry into an understanding of similar immigrant experiences in other regions of the country.

• USF is the third U.S. university to become a member of the Ibero-American Science and Technology Education Consortium (ISTEC), joining the Massachusetts Institute of Technology and the University of New Mexico. The mission of ISTEC is to foster joint international scientific, technological, and engineering collaborations to further progress in Ibero-American countries.

• A panel of four Cuban women—Norma Valsallo, Marta Nuñez, and Sonia Catusus from the University of Havana and historian and author Gladys Marel García—presented the symposium "Cuban Women Today: Interdisciplinary Perspectives." hosted by USF's women's studies department.

• The USF College of Public Health hosted the 10th annual seminar in epidemiology and biostatistics for health practitioners from Latin America.

• Dr. José E. Hernández, who has 14 years of experience in higher education, is the new program coordinator with the USF McNair Scholars office.

• The Sant'Yago Education Foundation Board made the final payment of its $100,000 pledge to the USF Foundation to create the Krewe of Sant'Yago Endowed Scholarship.

PUBLICATIONS

Hall of Fame Presents Latino Book Awards

To honor the many positive contributions made to the world of Latino literature by publishers and writers in 1999, the Latino Literary Hall of Fame announced the winners of its second annual book awards at the BookExpo America 2000. A multitude of publications were honored. Most of the books can be found at http://www.latinoobookfestival.com.

In the Nonfiction—English-language category: "Capirotada: A Nogales Memoir," by Alberto Alvaro Rios (University of New Mexico Press); "Journey to Machu Picchu," by Carol Cumes and Rómulo Lizarraza Valencia (Llewellyn Publications); and "Through the Eyes of the Soul, Day of the Dead in Mexico-Nicobocan," by Mary L. Andrade (La Oferta Review, Inc.).

In the Nonfiction—Spanish-language or Bilingual category: "Through the Eyes of the Soul, Day of the Dead in Mexico-Oaxaca," by Andrade (La Oferta Review); "El Santuario Del Alma: Como orar para obtener la respuesta divina," put together by the Self-Realization Fellowship; and "El Teque de Amor," by María Cecilia (Llewellyn Publications).

In the Fiction—English-language category: "Bor Juares' Second Dream," by Alicia Gaspar de Alba (University of New Mexico Press); "Black Widows Wardrobe," by Lucha Corpi (Arte Publico Press); "CrashBoomLove: A Novel in Verse," by Juan Felipe Herrera (University of New Mexico Press); and "Miami Heat," by Berta Platas Fuller (Encanto Kensington Publishing).

Also, "El secreto de Cristina," by Rebeca Aguilar (Encanto Kensington Publishing), won an award, and "East Side Dream," by Art Rodriguez (Dream House Press), won two awards.

Dulcinea in the Factory: Myths, Morals, Men, and Women in Colombia's Industrial Experiment, 1905-1960

By Ann Farnsworth Alvear

Before it became the center of Latin American drug trafficking, the Colombian city of Medellín was famous as a success story of industrialization, a place where protectionist tariffs had created a "capitalist paradise." This book investigates workers' strategies of conformity and resistance and traces the disciplinary practices of managers during the period from 1905 to the reorganization of the textile mills in the late 1950s.

Underrepresentation and the Question of Diversity: Women in Minorities in the Community College

By Rosemary Gillett-Karam, Susan Roueche, and John E. Roueche

This scholarly work documents the history of discrimination in America and shows that women and minorities remain underrepresented in the seats of power. It examines the promise and problems that community colleges face in the struggle to create a society in which women and minorities are more equally represented in leadership positions.

Imposing Decency: The Politics of Sexuality and Race in Puerto Rico, 1870-1920

By Eileen J. Suárez Findlay

By analyzing Puerto Rican anti-prostitution campaigns, attempts at reforming marriage, and working-class ideas about free love, Eileen J. Suárez Findlay exposes the race-related double standards of sexual norms and practices in Puerto Rico between 1870 and 1920, the period when...
nessed Puerto Rico's shift from Spanish to U.S. colonialism.

The Academic Achievement Challenge: What Really Works in the Classroom?
By Jeanne S. Chall

This book reviews and evaluates the many educational reforms and innovations that have been proposed and employed over the past century. The author compares achievement rates that result from traditional, teacher-centered approaches with those resulting from progressive, student-centered methods.

Honorable Exiles: A Chilean Woman in the Twentieth Century
By Lillian Lorca de Tague

Lillian Lorca de Tague is living proof of women's progress in the 20th century. Born into a privileged yet circumscribed world in 1914 as the daughter of a wealthy Chilean diplomat, she became a translator and journalist at a time when few women of her class held jobs. Edited by Joy Billington and Chris Lucas.

Reinaldo Arenas: Una apreciación política
(Spanish)
By Adolfo Cachero

Las novelas de Reinaldo Arenas se han interpretado como vuelos de fantasía que proveen de escape para sus protagonistas de la aspereza de una existencia opresiva. Estos textos se han considerado como artefactos no referenciales y no como signos de una realidad histórica en términos de un desarrollo que empieza en el confinamiento y acaba en la utopía.

Urban Voices: Contemporary Short Stories from Brazil
Cristina Ferreira-Pinto, ed.

All the selected stories have an urban thematic focus, as they portray different aspects of life in the city—be it the metropolis or a provincial capital—and the many conflicts faced by the contemporary urban inhabitant: the lack of communication among neighbors; the vicarious lives many lead; violence; political repression; and the recurrent theme of isolation and loneliness.

By Nancy T. Baden

When the military coup of 1964 suddenly suppressed the democratically elected government, Brazil was plunged into 21 years of authoritarian rule. This study deals with the struggles of the writers of imaginative literature who opposed the dictatorship as they contended the censorship and other means of control that the government sought to impose upon them.

Crowding Out Latinos: Mexican Americans in the Public Consciousness
By Marco Portales

Marco Portales believes that most Latinos have not been and are still not being educated and encouraged to succeed in America. Education and the media have historically deprecated and negatively misrepresented American citizens whose first language is Spanish, and such practices have shaped a gross social injustice that wide attention and correction as the 21st century dawns on the United States.

By Tracy Bachrach Ehlers

An update of a classic study of the effects of economic development on the women weavers of San Pedro Sacatepéquez. Revising her earlier hopeful assessment of women's entrepreneurial opportunities, Ehlers convincingly demonstrates that development commercial growth in the region has fitted men at the expense of women.

The Academic Achievement of Minority Students: Perspective, Practices, and Prescriptions
Sheila T. Gregory, ed.

Throughout the world, students of color experience failure in school for a variety of reasons. This comprehensive work provides fresh insights and practical strategies for addressing these problems...
in order to enhance minority student performance in school.

El Laúd del Desterrado
(Spanish)
By Matías Montes-Huidobro

El Laúd del Desterrado
es antología de combate, un
compendio lírico que sirvió
y seguirá sirviendo de modelo
para todo escritor hispanoamericano en el exilio.

Criminal and Citizen in Modern Mexico
By Robert M. Buffington

This book explores elite notions of crime and criminality from the late 18th to the early 20th century. In Mexico, these notions represented contested areas of the social terrain, places where generalized ideas about criminality transcended the individual criminal act to intersect with larger issues of class, race, gender, and sexuality.

By Laurie L. Levenson

Attorneys now have an authoritative new resource for insight into the Federal Criminal Code and Rules. This book provides the full text of the Federal Criminal Rules with rule-by-rule analysis, expert commentary, and cross-references to additional resources.

La Revolución: Mexico's Great Revolution as Memory, Myth, and History
By Thomas Benjamin

The 1910 Revolution is still tangibly present in Mexico, yet there has never been general agreement on what the revolution meant, what its objectives were, and whether it has been accomplished. This pathfinding book shows how Mexicans from 1910 through the 1950s interpreted the revolution, tried to make sense of it and, through collective memory, myth-making, and history-writing, invented an idea called "la Revolución."

CORNELL UNIVERSITY

The Department of Agricultural, Resource, and
Managerial Economics at Cornell University seeks
candidates for the position of Assistant Professor of
management with interests in dynamic management,
technology and innovation, and e-Commerce. This is a
9-month, tenure track appointment, with initial
appointment for a three-year period. The person in this
position is expected to establish a distinguished program
of scholarship in the area of business management, with
an emphasis on how new technologies and innovation
impact management practices and the structure
and conduct of businesses. With a 50/50 split between
research and teaching responsibilities, the individual is
expected to teach at least two to three courses annually
and to advise undergraduate and graduate students. A
more complete description of the job can be found at:
http://www.cae.cornell.edu/dept/arme/staff/AstProf.htm

Qualifications: A Ph.D. in business, economics or
other related discipline is required.
Application: A letter of application, vita, transcript,
a list of publications, any evidence of teaching experience,
and names of three to five references may be sent to
Dr. Andrew Novakovic, Chair

The College encourages applications from women, members of ethnic minorities, group
people with disabilities, and other protected class members.
Book Review

By Dr. Mark Saad Saba

Pobre Raza reveals the resistance that Mexican immigrants took towards Anglo-American prejudice and violence during the first three decades of the 20th century. It provides the modern student of Latino affairs a longitudinal approach to such current issues as police profiling of peoples of color, nativist hysteria to the alleged threat that immigrants create towards our "culturally homogeneous" society (white middle class), and the high number of incarcerations and state executions of Latinos and other peoples of color in our criminal "justice" system.

F. Arturo Rosales provides concrete historical examples that demonstrate how collective action reversed discriminatory court decisions, provided legal counsel and defense for alleged criminals, and challenged police brutality, which unfairly targeted Mexican immigrants. Based on extensive archival and manuscript collections, newspapers, personal interviews, and court records, Rosales provides a well-documented thematic study of the dark side of mass prejudice and the American judicial system.

This book has wide applicability to the fields of political science, sociology, criminalology, history, and Mexican American studies and is best suited for an upper-level undergraduate or graduate course.

At the heart of Pobre Raza lies the concept of Mexico Lindo (Beautiful Mexico), which served as a means of individual and collective empowerment. Mexico Lindo provided immigrants with a sense of cultural, linguistic, and political identity. It incorporated a sense of ideological nostalgia for the Spanish language; a reverence for Mexican national fiestas, heroes, and history; a spiritual devotion to Our Lady of Guadalupe; and an ambivalent form of anti-Americanism rooted in the collective turmoil of Mexico's history and revolutionary upheaval. Mexico Lindo served to bind the fragmentary and multiple migrations that characterized Mexican immigration over three decades and allowed for a deep-rooted sense of unity and community action in defense of La Raza.

The early decades of the 20th century witnessed a huge surge in Mexican immigration to the U.S. related in large measure to the political upheaval associated with the Mexican Revolution. Rosales wisely centers much of the Anglo nativist backlash on what he terms "brown scare." He interprets the brown scare as mass hysteria rooted in the alleged violent nature of the revolutionary Mexican bandido and the supposed sympathies that Mexicans held toward the German government during America's involvement in the First World War.

In addition to geopolitical prejudices, many Anglos perceived Mexican immigrants as a threat to organized labor and American wage standards. Rosales successfully places much of the Anglo civilian violence towards Mexicans as resulting from this fusion of historical racial antipathy, economic anxieties, and the brown scare.

At the core of Anglo-American civilian prejudices and violence lay deeply entrenched institutional exploitation and systemic injustice. A central component to maintaining this structurally racist economic and political order was the judicial system, and this serves as an important focal point for much of Rosales' work. The role of police repression and brutality is squelching labor organizing, the targeting of immigrant communities by law enforcement for harassment and mass roundup, the lack of adequate defense for immigrants in a bewildering English-speaking courtroom, and a segregated and inferior educational base left immigrants vulnerable to an exploitative legal and political structure.

But rather than simply viewing the immigrant as a victim, Rosales stresses the collective responses that immigrants made to remedy these institutional biases, including the formation of middle-class civil rights groups, which protested racist literature and popular media; an active attempt by the Mexican consulate to defend the rights of Mexican immigrants; progressive defense lawyers who served as advocates for immigrants; and mass mobilization to protest state executions of Mexicans, who formed a larger percentage of those executed than did Anglo-Americans.

Unfortunately then and now, Texas was the state with the highest number of executions of Latinos and other peoples of color; a fact that did not go unnoticed by my class of Tepano/Chicanos. Texas also ranked as the worst state for the number of Mexicans shot dead by police and the infamous Texas Rangers. The continuing struggles against police brutality and capital punishment in Texas are built upon a hundred years of collective struggle.

What came out of our graduate seminar's discussions was the surprise expressed by my Chicano students that decades before the Mexican American generation's post-war organizing or the Chicano movement's renaissance, Mexican immigrants agitated, protested, and defended their rights in the face of an overwhelmingly hostile judicial system that relegated the immigrant to third-rate status. In this manner, Rosales has provided a means with which to measure Mexican American community struggles within a longitudinal framework and allows the young Chicano/o historical role models with which to conceptualize the current struggles in defense of economic and political equality.

Dr. Saba is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, he has taught at Sul Ross State University, Alpine, Texas, since 1995.

WE WERE A UNIVERSITY IN EVERY WAY BUT ONE

For many years now, Dominican College has been a small university. Today, its name matches our reality. Dominican College of San Rafael is now Dominican University of California.

Many things about Dominican will never change: the Dominican values, the respect for the individual, the love of truth, the beauty, and the life of the mind. What has changed is this: the size and diversity of the student body, the depth and breadth of offerings, and global outreach.

Dominican University of California is an independent, Catholic, international learning-centered university. Finally, the name fits.

Congratulations
Hispanic Outlook for 10 years of Excellence!

Five College Fellowship Program for Minority Scholars

Located in western Massachusetts, Amherst, Hampshire, Mount Holyoke and Smith colleges and the University of Massachusetts Amherst are members of the Five College consortium.

The Fellowship provides a year in residence at one of the five colleges for minority graduate students who have completed all requirements for the Ph.D. except the dissertation. (At Smith, recipients hold a Mendenhall Fellowship.)

The Fellowship includes a stipend of $25,000, office space, housing assistance, and library privileges at the five colleges. Emphasis is on completion of the dissertation. Most Fellows are asked to do a limited amount of teaching, but no more than a single one-semester course at the hosting institution.

Date of Fellowship: Sept 1, 2001 to May 31, 2002 non-renewable

Stipend: $25,000

Review of applications begins Jan. 17, 2001

Awards announced by May 1, 2001

LEGAL SERVICES
BILINGUAL HOUSING ATTORNEY

Nonprofit corporation serving low income families in Barnstable, Plymouth, Dukes, and Nantucket Counties

Seeks attorney fluent in either Portuguese or Spanish and English to work full-time representing clients in housing law matters, to act as a translator for non-English speaking clients and other staff advocates, to translate legal materials written in English to either Portuguese or Spanish, and to collaborate with other human service agencies and the private bar to promote the provision of legal services to non-English speaking clients. Oral and written fluency in either Portuguese or Spanish is required as is admittance to the Massachusetts bar. A sensitivity to the needs of the low-income and homeless populations is desired. Send resume and cover letter by September 22, 2000, to Raymond A. Yox, Executive Director, LSCLT, 460 West Main Street, Hyannis, MA 02601.

AA/EEO employer.

University of California, Los Angeles

The Department of Psychology (PSY) seeks to fill two tenure-track assistant professorships in our Learning and/or Behavioral Neuroscience area (in special cases individuals at the Associate level could be considered). Research specialties of particular interest to us are: (1) electrophysiology of learning in awake behaving animals; (2) animal cognition; (3) primate and primate-like animal models of mental illness; (4) psychopharmacology of motivation and emotion. Applicants will be expected to teach both graduate and undergraduate courses in animal learning or behavioral neuroscience. Along with a CV (at least 3 letters of recommendation and a few representative reprints), two open positions. Applicants must submit a brief statement of research and teaching interests indicating their appropriateness for this position. Please send all materials to BNS/LB Search Committee, Department of Psychology, Box 951563, UCLA, Los Angeles, CA 90095-1563. Review of applications will begin December 1, 2000.

- Eleanor Roosevelt

Rochester University, a Jesuit institution, invites applicants for a tenure-track assistant professorship in 19th century U.S. history beginning August 2023. Applicants will teach 18th-century and Western Civilization courses. Ph.D. must be completed by August 1, 2023. Teaching load is 21 hours (7 courses) over two semesters. Please send a letter of application, which includes a statement of your teaching philosophy, a CV, and the names, addresses, and telephone numbers of three references to Dr. Genevieve Robinson, Chair, Dept. of History, Rochester University, 2486 University Ave., Rochester, NY 14620, 585-424-5000, x222, genevieve.robinson@rochester.edu. Review of applications begins December 1, 2022, and continues until the position is filled. Rochester University is an Equal Opportunity/Affirmative Action Employer. Women, minorities, and people with disabilities are encouraged to apply.

Rochester University

New York State University

The University of California, Santa Barbara

Department of Psychology

Invites applications for a tenure-track position effective July 1, 2022.

All materials are due by December 1, 2022. Full details regarding the position can be found at:

http://www.pysch.ucsb.edu/positions/20220126.html
SARAH LAWRENCE COLLEGE

Sarah Lawrence College, a small Liberal Arts College close to New York City, invites applications for a tenure track position in African History, beginning in August 2001. We seek an innovative teacher-scholar whose teaching will complement our current offerings in Anthropology, Art History, Literature and Political Science. The successful candidate will teach survey courses in African History, as well as more specialized courses in his or her own area of interest. The topic and region of specialization are open, but we welcome comparative approaches that might include attention to migration and African diaspora, to histories of space and place, and to questions of gender. Teaching experience, and a PhD in hand by August 2001 are highly desirable.

Applicants should submit a letter addressing their approach to teaching and their scholarly interests; a curriculum vitae; three letters of recommendation; a writing sample, and two course descriptions (one for a survey course, and one for an advanced undergraduate seminar on a topic of their choice) by October 15th, 2000 to Ms. Barbara Hickey, Att: HOHE, Coordinator of Faculty Support, Sarah Lawrence College, Bronxville, NY 10708.

Some interviews will be conducted at the African Studies Association meetings in Nashville, November 16th - 19th, 2000. An Equal Opportunity Employer, Sarah Lawrence College encourages applications from minorities and women. For more information about Sarah Lawrence College’s distinctive approach to teaching, which stresses small seminars and individual tutorials, please go to http://www.slc.edu.

DEAN WHITTIER LAW SCHOOL

Whittier College announces a national search to recruit the next leader of the Law School. Whittier Law School is accredited by the American Bar Association (ABA) and is a member of the Association of American Law Schools (AALS). The Law School is located on a beautiful, relatively new 150-acre campus in Costa Mesa, California, in the central coastal area of Orange County. The Law School offers both Day and Evening Division programs leading to the Juris Doctor (J.D.) degree, as well as Certificate Programs in Intellectual Property and Children’s Rights, and an L.L.M. in International Studies. Whittier has a student population of 650. There are thirty-two full time faculty members plus deans, professional librarians and more than forty adjunct faculty members. The annual operating budget is fourteen million dollars.

The Dean is a Vice President of Whittier College and reports directly to the President as a member of her cabinet. The Search Committee is seeking candidates who can provide visionary leadership to an ascending law school located in one of the most attractive areas of the country. The best candidates will be visible and energetic leaders who will stimulate the School to seize the many opportunities available in the 2.7 million population metropolitan area which it serves. The selected candidate will continue to emphasize academic excellence, build relationships with the legal and corporate communities, and enhance communications with all of the School’s constituencies.

While applications and nominations will be accepted until a new Dean is selected, interested individuals are encouraged to submit their materials by September 30 to assure optimal consideration. Please submit expressions of personal interest, resumes, and nominations to:

ASU ARIZONA STATE UNIVERSITY

MAIN COLLEGE OF LIBERAL ARTS AND SCIENCES

FACULTY POSITIONS

The College of Liberal Arts and Sciences at Arizona State University seeks to fill tenure and tenure-track faculty positions, starting in August 2001. Appointments will be made at all advertised ranks appropriate for the credentials of the successful candidates.

Candidates should have a terminal degree in an appropriate discipline and have a strong commitment to research and teaching at both graduate and undergraduate levels. The College encourages interdisciplinary collaboration in all areas. Candidates with expertise in cross-cutting areas can be appointed in an appropriate department but may have an excellent opportunity to interact with colleagues throughout the College and the University.

OUR DEPARTMENTS ARE:

- African American Studies
- Languages & Literature
- Anthropology
- Mathematics
- Biology
- Microbiology
- Chemistry & Biochemistry
- Philosophy
- English
- Physics & Astronomy
- Chicana & Chicano Studies
- Plant Biology
- Family Resources & Human Development
- Religious Studies
- Geography
- Sociology
- Geologic Sciences
- Speech & Hearing Science
- History
- Women's Studies
- Interdisciplinary Humanities

Arizona State University enrolls more than 49,000 students, 14.5% of them within the College of Liberal Arts and Sciences. Located within the thriving Phoenix metropolitan area, the College includes programs in the traditional disciplines of the humanities, social sciences, natural and physical sciences, as well as interdisciplinary programs such as women's studies, ethnic studies, and biology and sociological studies.

Positions may not be available for all areas. Please consult the College's web site (http://www.asu.edu/colab) for links to the appropriate department offices before applying for any positions.

Arizona State University is an Equal Opportunity/Affirmative Action Employer Institution.
PROVOST/VICE PRESIDENT
FOR ACADEMIC AFFAIRS

University of La Verne
in Southern California

The University of La Verne, a 110-year-old university in Southern California, offering bachelors, masters and doctoral degrees in liberal arts and professional programs invites applications and nominations for the position of Provost/VPA. The Provost/VPA is the chief academic officer of the university and reports directly to the President.

AREAS OF RESPONSIBILITY
The Provost/VPA works with the university community to develop and implement a unified academic vision to lead all academic programs to higher levels of excellence and prominence. The Provost/VPA has responsibility for the academic budget and works closely with the President and Executive Vice President in the budget process.

Offices reporting to the Provost/VPA include the academic deans, the Dean of the School of Continuing Education, the Dean of Academic Support and Retention Services, the Registrar, the University Librarian and Academic Computing.

The Provost oversees the faculty personnel processes and supports faculty enrichment in research, teaching, and solicitation of grants. He or she directs the university’s efforts in the use of innovative technologies to deliver academic curriculum and services.

The Provost provides leadership in establishing and implementing policies and procedures for academic quality control. The Provost also serves as liaison with accrediting agencies and other institutions of higher learning and assumes responsibility for university accreditations.

QUALIFICATIONS
Earned doctorate from an accredited institution required. Eligible to receive the rank of full professor at the University of La Verne. Record of successful teaching in higher education and a distinguished record of scholarship and publication. Understanding of the legal environment of higher education and experience with human resources and budget management. A strong record of commitment to shared faculty governance. Experience in the delivery of off-campus programs. A record of creative planning and problem solving.

THE UNIVERSITY OF LA VERNE

The university has 3000 students on-campus, and a total of 8100 worldwide in numerous locations, including California, Alaska and Athens, Greece. The main campus is located 30 miles east of the vibrant cultural center of Los Angeles, within an hour’s drive of mountains, beaches and deserts. The university consists of the College of Arts and Sciences, the School of Business and Global Studies, the College of Law, the School of Education and Organizational Leadership, the School of Organizational Management, and the School of Continuing Education.

SUBMISSION OF MATERIALS
Applicants are encouraged to submit materials immediately, including a vita, names of five references, and a statement of their vision of the future of higher education and the role of the Provost in accomplishing that vision. Please mail all materials to:

President
University of La Verne
1950 3rd Street
La Verne, CA 91750
University Website: www.luv.edu

The University of La Verne is an equal opportunity employer.
Dean—Division of Biological Sciences
University of California, Davis

The University of California, Davis, invites applications and nominations for the position of Dean—Division of Biological Sciences. The Division is an intercollegiate unit with 110 faculty and 126 staff that administers academic units in basic biology for the College of Agricultural and Environmental Sciences and the College of Letters and Science. The Division administers 9 undergraduate majors in biology involving approximately 3,500 students and provides administrative support for 11 graduate groups involving about 500 students. The Division also plays a leading role in coordinating and planning campuswide programs in basic biology that involve the Division as well as the colleges and professional schools on campus. The Division is organized into five sections that represent major themes of modern biology: Evolution and Ecology; Microbiology; Molecular and Cellular Biology; Neurobiology; Physiology, and Behavior; and Plant Biology.

The Dean is the chief academic and administrative officer of the Division responsible for academic planning, budgetary operations, and academic and staff personnel administration for all five sections. The Dean participates in campuswide policy development through membership on the Council of Deans and Vice Chancellors and chairs the Administrative Coordinating Council for Biological Sciences, which comprises deans and other senior administrators who share responsibility for the development and coordination of campuswide programs and activities in biological sciences.

We seek candidates with a deep commitment to academic excellence who can lead the Division in its continuing development. Qualifications include a distinguished record of research, teaching, and professional service appropriate for appointment as Professor in the Division; demonstrated ability for creative leadership and management; and the energy and vigor to translate ideas into action. The University of California, Davis, has a strong institutional commitment to the achievement of diversity among its faculty, staff, and students and seeks an individual who shares that commitment.

Salary will be commensurate with experience and qualifications. The starting date is July 1, 2001, or as negotiated.

Applications and nominations should be received by November 3, 2000 to ensure full consideration. The position will remain open until filled. Nominations, applications, and requests for additional information should be addressed to:
Larry N. Vanderhoef, Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616-8938

UCDAVIS
The University of California, Davis, is an equal opportunity employer committed to excellence through diversity.

ETS
Educational Testing Service

Educational Testing Service, the world's premier educational testing institution, and leader in educational research, has immediately a full-time position for a junior to senior-level Scientist in our research division's Center for Research and Development. The Scientist will be responsible for conducting research projects in the area of educational measurement and development.

The successful candidates will have a Ph.D. in educational psychology or a related field. They will be expected to develop and conduct research that will contribute to the development of new educational measurement and evaluation tools. The Scientist will be expected to publish in peer-reviewed journals and present at conferences.

Application materials should be submitted to:
ETS, Attn: Human Resources
Department 203
Princeton, NJ 08541
Fax: 609-497-6032

www.ets.org

Director of Multicultural Affairs

Rhode Island School of Design (RISD)'s seeks an energetic, creative individual to join its diverse faculty. The successful candidate will have a strong commitment to multicultural education and be able to contribute to the ongoing efforts to create a supportive learning environment. The position involves teaching, curriculum development, and administration. Applicants should have a Ph.D. in education, psychology, or a related field.

Salary is commensurate with experience. Applications should be submitted by March 1, 2001. Interviews will be held on campus. For more information, please contact the search committee at multiculturalaffairs@risd.edu

Visit our website at www.risd.edu

RISD is an equal opportunity employer and strongly encourages applications from women and underrepresented minorities in education.
A SPECIAL OPPORTUNITY
The Maricopa Community Colleges District
Vice Chancellor Human Resources

The Maricopa Community College District is one of the largest educational systems in the country, located in one of the fastest growing counties with three million residents. The ten Maricopa Community Colleges and Centers offer 2,600 academic courses and 5,100 occupational courses in partnership with 1,000 corporations, government agencies and non-profit organizations.

The Maricopa Community Colleges serve nearly a quarter million culturally diverse students annually. MCCCD is dedicated to serving the needs of a diverse, growing population which, within a decade, will comprise more than 50% Hispanic and non-Anglo residents.

The Vice Chancellor Human Resources reports to the Chancellor and is responsible for creating the vision and providing leadership for 7,000 full and part-time faculty and staff.

The Vice Chancellor heads a comprehensive human resource program including employee recruitment, affirmative action, compensation, employee benefits, payroll, diversity, training, organizational development, legal services, collaborative policy development, employee relations, related technology systems and records.

The Vice Chancellor works with a variety of groups including Governing Board members, senior level college administrators, employee groups and governmental representatives.

Training and experience required includes any combination of education, training and experience that meets the position requirements, which may include a college degree, preferably an earned doctorate, or extensive executive-level experience, preferably in higher education or other large public employers.

For complete information and details visit www.maricopa.edu/hrweb/vettesal/etjob-descriptions/grade25/index.htm

This position will close September 29, 2000. Direct inquiries to Josh Mackey, Maricopa Community Colleges, 2411 West 14th St., Tempe, AZ 85281

An EEO/AA employer

ANTHROPOLOGY FACULTY

The Graduate Faculty of Political and Social Science, a division of New School University, invites applications for two full-time positions beginning Fall 2001 and pending budgetary approval for its Department of Anthropology. The department has longstanding interests in building historical and critical approaches in our graduate and undergraduate curricula. Graduate teaching and advising is a principal commitment of all faculty members. Hence, we seek applicants with established research, publication and writing records. Priority will be given to applicants with expertise in one or both of the following areas: gender, biomedicine, and/or science; and political/legal anthropology. Rank and geographical area are open. Please send letter of interest, c.v., a writing sample, and the names of three references to Chair, Anthropology Department, New School University, 65 Fifth Avenue, New York, NY 10003 or e-mail resumes to: NSUpubs@newschool.edu Write Search #20156 in the subject line to ensure proper distribution of resumes. The Graduate Faculty of Political and Social Science is an equal opportunity employer and strongly encourages applications from individuals who belong to groups historically under-represented in the academy.

New School University

COMMUNICATION AND THEATRE
PUBLIC RELATIONS GENERALIST
Assistant/Associate Professor

Full-time, tenure-track, beginning August 2001. Teach range of public relations courses, including introduction, PR writing, crisis studies or issues management, campaigns. All department faculty teach public speaking. Opportunity may exist to teach communication theory or communication research methods, or another area that complements department needs. Both quantitative or qualitative approaches to public relations are welcomed. The Department has over 350 majors in four options. This position was created to accommodate a growing public relations option. In 1999, the department moved into state-of-the-art facilities with Macintosh computers that facilitate multimedia teaching needs. The University, located in historic Lancaster Co., PA, approximately 1-1/2 hours from both Philadelphia and Baltimore, boasts competitive salary and benefits. Required: ABD. In advanced stages in public relations, issues management, communication, mass communication or other communication-related discipline; evidence of successful college teaching and ability to teach writing in a multimedia lab; evidence of a research agenda and professional involvement in the field; a successful interview and teaching demonstration. Preferred: Doctorate; experience teaching public relations courses; ability to demonstrate ability to teach students to create messages across multiple media. For further information, see the University Web site at: www.millersville.edu. To apply: Full consideration will be given to applications received by 11/2/00 and continue until the position is filled. Representatives of the department will be available at the PRSA Educators' Academy in Chicago, and at NCA in Seattle. Send letter of application, curriculum vitae, evidence of teaching ability, copies of graduate and undergraduate transcripts, and three current letters of recommendation to Dr. Theresa Russell-Lorett, Search Committee/H10908, Communication and Theatre Dept., Millersville University, PO Box 1002, Millersville, PA 17551-0002.

An EEO/AA Institution

DIDCTOR OF THE OFFICE OF DIVERSITY AND AFFIRMATIVE ACTION

Upstate Medical University, a component of the State University of New York (SUNY), invites applications for the position of Director of the Office of Diversity and Affirmative Action. SUNY Upstate Medical University is comprised of four professional colleges (Medicine, Nursing, Health Professions, and Graduate Studies), University Hospital, and the Clinic Campus in Binghamton, NY. With over 5000 employees, Upstate is the area's largest employer.

The Director of the Office of Diversity and Affirmative Action reports to the President of Upstate Medical University. The Director is responsible for overseeing the planning and implementation of diversity and affirmative action programs at Upstate and for compliance with SUNY, state and federal requirements.

The Director must be able to work constructively with faculty, staff students, administrators, representatives of organized labor, and outside agencies and individuals to achieve the institutional goals in diversity and affirmative action.

Candidates should have at least a baccalaureate degree, although an advanced degree is preferred, and five years or more of experience related to diversity and affirmative action, preferably in higher education, health care, and/or the public sector.

Deadline for submission of resumes is October 13, 2000. Please send nominations and letters of interest to:

Ronald R. Young
Vice President for Public and Governmental Affairs
Chair, Search Committee for
Director of the Office of Diversity and Affirmative Action
SUNY Upstate Medical University
750 East Adams Street, Syracuse, NY 13210
or fax: 315-464-5275

SUNY Upstate is an AA/EEO/ADA employer committed to excellence through diversity.
Vice Chancellor—Research
University of California, Davis

The University of California, Davis, invites nominations and applications for the position of Vice Chancellor—Research. This position reports directly to the Chancellor.

The Vice Chancellor—Research has responsibility for facilitating, promoting, and overseeing research and scholarship within all of the campus's colleges, schools, hospital, and clinics; increasing extramural financial support including support for large, long-term, and interdisciplinary projects; furthering relationships with government and industry; and accelerating the campus's technology transfer program.

The Vice Chancellor—Research must understand the culture of a major research university; have the ability to deal effectively with public and private agencies that support scholarly research; be familiar with university patents and licensing; and have a full understanding of the contributions and requirements of scholars from all fields, including the sciences, arts, social sciences, humanities, and professions. The successful candidate must have a strong record of personal, ongoing accomplishments as a research scholar appropriate for appointment as Professor and, secondarily, as an academic administrator. The Vice Chancellor—Research requires the ability, energy, creativity, and insight to respond quickly and appropriately to help guide university growth and change and the skills to work congenially and effectively with diverse constituencies. The campus has a strong institutional commitment to the achievement of diversity among its faculty, staff, and students and seeks an individual who shares that commitment.

The University of California, Davis, is an expanding, highly diverse research university with 2,100 faculty, more than 20,000 undergraduate students, and 5,500 graduate and professional students. The campus has three colleges (Letters and Science, Engineering, and Agricultural and Environmental Sciences), two divisions (Biological Sciences and Education), four professional schools (Law, Management, Medicine, and Veterinary Medicine), and a major medical center in Sacramento.

Salary will be commensurate with experience and qualifications. The starting date is July 1, 2001, or as negotiated.

Applications and nominations should be received by November 3, 2000 to ensure full consideration. The position will remain open until filled. Nominations, applications, and requests for additional information should be addressed to:

Larry N. Vanderhoof, Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616-8536

UNIVERSITY OF MISSOURI-ROLLA
MICROELECTROMECHANICAL SYSTEM

The University of Missouri-Rolla invites applications for two tenure faculty positions specializing in Microelectromechnical Systems (MEMS). One position will be in the Department of Electrical and Computer Engineering (R52950) and one in the Department of Aerospace Engineering and Engineering Mechanics (R53150). Appointments are anticipated to be at the assistant professor level; however, qualified candidates at all levels will be considered. More information about the campus and departments can be found at www.emu.edu/umrjobs/mems.html.

Qualifications include an earned doctorate degree in Electrical Engineering, Computer Engineering, Mechanical Engineering, Aerospace Engineering, or Engineering Mechanics, and strong commitment to teaching and research. Successful candidates will be expected to teach courses in MEMS and related areas, advise students, and build a funded research program. Screen applicants will begin immediately, and continue until the positions are filled.

Please submit a curriculum vitae and a list of three references to:

Northeastern UNIVERSITY
BEST COPY AVAIL
IOWA STATE UNIVERSITY
OF SCIENCE AND TECHNOLOGY

President
The Board of Regents, State of Iowa, is accepting nominations and applications for the position of President of Iowa State University.

Iowa State University is ranked as one of the top 50 public universities in the nation by U.S. News and World Report, and its campus has been recognized as one of the 25 most beautiful in the nation. The university is one of only 34 public institutions members of AAU and ranks sixth in the nation National Merit Scholars enrolled at public universities in the United States.

Located in Ames, Iowa, a community ranked among the most livable small cities in the nation, the university comprises the colleges of agriculture, business, design, education, engineering, fine and consumer sciences, liberal arts and sciences, veterinary medicine, and the graduate college. With more than 26,000 students, 6,000 faculty and staff, and an operating budget in excess of $1 billion, Iowa State University aspires to become the premier land-grant university in the nation.

Iowa State University, a Carnegie Foundation Research University with more than $211 million in sponsored funding last year, ranks second among universities in the United States for the number of new technologies receiving R&D 100 Awards from the R&D Magazine. Iowa State University has an exceptional alumni base and ranks seventh among public universities for alumni giving. The university has just completed its most successful five-year fundraising campaign with donations exceeding $458 million.

For more information about Iowa State University, visit www.iastate.edu.

The Board of Regents is an equal opportunity/affirmative action employer and encourages the nomination of applications from women and minority candidates.
WILLAMETTE UNIVERSITY SEeks an exceptional individual to serve as Dean of the College of Liberal Arts. Willamette University is the first university in the West, and provides a liberal arts education with graduate programs in law, management, and education. Located in Salem, Ore., Willamette is committed to providing a superior education where teaching and learning are strengthened by ongoing scholarship and research. Willamette's reputation as a lively and challenging university is built on over 150 years of experience preparing students for successful professional and personal lives.

CONTACT INFORMATION:
Send a letter of application, vita and three current references to President Lee Pelton, College of Liberal Arts Dean Search Committee, CLA Dean's Office, Willamette University, 900 State St., Salem, Oregon 97301. For additional information, see: www.willamette.edu/dept/hr

THE DEAN IS RESPONSIBLE FOR improving and promoting the quality and effectiveness of the College Liberal Arts, teaching, research, and service mission. The Dean directs and coordinates activities of the faculty, developing academic policy and programs for the College. The Dean oversees the personnel, budget, and curriculum for the College's faculty and academic programs, including approximately 140 full-time faculty members, 28 undergraduate schools, the School of Education, the Hallie Ford Museum of Art, the Hatfield Library, the Humanities Center, the Language Learning Center, the Minority Graduate Fellowship, the Campus and International Education Program, the Public Policy Research Center, the University Registrar's Center. The Dean is responsible for an annual budget in excess of $15 million, the College long-range and accreditation efforts, and serves as Chair of the University Deans Council, as well as coordinating all College of Liberal Arts public affairs and resource development with the Office of Development and Alumni Affairs. The Dean teaches classes in the CLA as time permits.

THE POSITION REQUIREs an extensive record of personnel and administrative experience, a strong commitment to the liberal arts. Minimum qualifications include a doctorate or terminal degree in a discipline. Candidates should have a record of successful teaching and scholarship, and be qualified for a faculty position in a relevant department. Candidates must have exceptional oral and written communication and management skills, function effectively in a collaborative environment, and be able to demonstrate leadership for the College as we seek to enhance our national reputation.

APPLICATIONS RECEIVED BY November 1 will receive preference. However, applications will be accepted at any time. Willamette University is an equal opportunity employer and embraces excellence in diversity. Women and minorities are particularly encouraged to apply. Willamette offers employment benefits, domestic partners or employees and prohibits discrimination on the basis of sexual orientation.

Miami University does not discriminate on the basis of gender, race, color, religion, national origin, sex, age, handicap, class, sexual orientation, political affiliation or non-disability. We especially encourage applications from members of minority groups, women, and persons with disabilities.
Primost and Vice President for Academic Affairs
THE UNIVERSITY OF TEXAS AT TYLER

The University of Texas at Tyler invites nominations and applications for the position of Provost and Vice President for Academic Affairs. The University seeks dynamic and creative leadership from a chief academic officer as it develops new academic programs and expands others to pursue growth and its vision of excellence in the new millennium.

THE UNIVERSITY

U.T. Tyler offers both graduate and undergraduate degrees and is located in the beautiful East Texas lake country on the I-20 corridor, 90 miles east of Dallas. The University serves a region with a population of close to one million by offering academic programs in 48 undergraduate and 24 graduate areas. The University contributes significantly to the economic growth and cultural enrichment of the region.

RESPONSIBILITIES

Reporting to the President, the Provost and Vice President for Academic Affairs has broad responsibility for the development, administration, growth and quality of all academic programs including leadership in academic planning and resource allocation, the administration of academic budgets, academic policy development and implementation, and all matters directly affecting the faculty. He/She encourages, supervises and evaluates the deans of six colleges and directors of associated academic divisions. The six colleges are: Business Administration, Education and Psychology, Engineering, Liberal Arts, Nursing, and Science and Mathematics. Also reporting to the Provost are the Library, Academic Computing Center, Graduate Studies, Audio-Visual and Interactive Television, Institutional and Sponsored Research, and the Longview and Palestine campuses.

QUALIFICATIONS

Qualifications include academic and professional accomplishment at the dean or director level sufficient to command the broad respect of the academic and local community and to provide educational leadership for U.T. Tyler and its extension programs. Substantial experience in the areas of budgeting, financial planning and policy development and a record of progressively responsible administrative experience in higher education is preferred. Experience with university distance education programs and the attendant technology is also preferred. The successful candidate must demonstrate strong interpersonal and communication skills. A demonstrated commitment to the goals and principles of equal opportunity and educational diversity is essential. Doctoral degree required.

APPOINTMENT AND APPLICATION INFORMATION

This position has a starting date of June 1, 2001, or a date as soon thereafter as practicable. Salary is competitive and commensurate with academic qualifications and experience. Review of candidates will begin on September 20, 2000. The University will accept and review applications and nominations received after this initial deadline until the position is filled. Qualified candidates should forward a letter of interest that contains a brief statement of educational philosophy, and includes a resume and the names, addresses and telephone numbers of at least four references to the following:

Tulane
SENIOR VICE PRESIDENT FOR ACADEMIC AFFAIRS AND PROVOST
TULANE UNIVERSITY
New Orleans, Louisiana

Tulane University seeks nominations and applications for the Senior Vice President for Academic Affairs and Provost. The SVP and Provost is the chief academic officer for the non-health related colleges and schools and has overall responsibility for academic leadership, enrollment management, student affairs, institutional programs and students, academic technology and the Upson Library system, and major interdisciplinary centers and institutes.

Tulane is a member of the A.A.U and is recognized nationally and internationally as one of the leading research universities in the United States. Founded in 1834, the University has a student body of 11,545. There are 888 faculty members and 1,600 staff on the Uptown Campus and 650 faculty members and 1,500 staff at the Downtown Campus. The Uptown Campus includes the schools, colleges, and divisions of Architecture, Engineering, Business, Liberal Arts and Sciences, Law, Social Work, Newcomb College, Tulane College, University College, and the Graduate School. The Downtown Campus includes the School of Medicine and of Public Health and Tropical Medicine.

Qualifications include the following: tenured at the rank of full professor in any of the Uptown schools or colleges; demonstrated ability to lead a large complex academic enterprise effectively; excellent interpersonal and communication skills; balanced commitment to academic excellence both in the liberal arts and sciences and in graduate and professional education; demonstrated commitment to a multi-cultural environment and an understanding that modern universities must develop an international dimension; the flexibility to incorporate technological advances into the university culture without compromising the traditional values of the educational mission; sensitivity in developing and maintaining a responsive and caring learning environment for all students; demonstrated ability to attract, develop, and retain outstanding faculty and staff; ability to work effectively and collaboratively with the many constituencies of an urban university; the ability to fund raise, particularly with national foundations; strong advocacy skills coupled with an institutional perspective; and financial acumen.

Dr. Graeme Forbes, Celia Scott Weatherhead Distinguished Professor of Philosophy and Chair of the Search Committee, requests that inquiries, nominations, and applications be directed to the University's consultant:

Paula Carabelli • EMW/Win/Kleffner
1920 Main Street, Suite 310 • Irvine, California 92614
949-797-3536 • 949-851-2412 (FAX)

Applications should include a current curriculum vitae and a letter of interest which also describes the candidate’s relevant experience. Screening will begin immediately and continue through mid-October. The search committee anticipates interviewing semi-finals on November 10 and 11, 2000. All communications will be treated confidentially.

Tulane is an AA/EOE.

Dickinson College
Gettysburg College
Franklin & Marshall College

Three highly selective Pennsylvania liberal arts colleges, Dickinson, Franklin & Marshall and Gettysburg, invite applications for the following full time tenure track positions. Because of the relative proximity of the three colleges, these positions may be of particular interest to academic couples. All positions require Ph.D. or appropriate terminal degree in hand or near completion. For further information and search schedules, interested candidates may consult institutional web pages, appropriate department chairs, or ads in relevant professional journals.

DICKINSON COLLEGE, Carlisle, PA 17013
Archeology: Old World/Classical, Chinese: Language and Culture, Computer Science, Education: Curriculum and Instruction, Secondary, Molecular Biology: Bioinformatics/Genomics

FRANKLIN & MARSHALL COLLEGE, Lancaster, PA 17604

GETTYSBURG COLLEGE, Gettysburg, PA 17325
THE STATE UNIVERSITY OF NEW JERSEY
RUTGERS

Executive Dean of Agriculture and Natural Resources
Executive Director of the New Jersey Agricultural Experiment Station
and Dean of Cook College

Rutgers, The State University of New Jersey, seeks candidates for Executive Dean of Agriculture and Natural Resources with responsibilities for George H. Cook College and the New Jersey Agricultural Experiment Station (NJAES). Cook College serves approximately 4,000 students, offering undergraduate and graduate professional programs through 13 academic departments. Cook/NJAES has a faculty of approximately 350 and a staff of approximately 550. The Agricultural Experiment Station includes 17 research centers and field stations and maintains an extensive network of outreach, including Rutgers Cooperative Extension (RCE), which has agents in each of the state's 21 counties. Cook/NJAES has an annual appropriated budget of approximately $40 million.

New Jersey's dynamic and diverse economic and cultural environment demands that Cook/NJAES be pluralistic and adaptive in serving an increasingly broad and diverse constituency. Cook/NJAES's vision is to make its name synonymous with solutions: integrating research, teaching, and extension to respond to issues and challenges in food systems, environment and natural resources, and human and community development. Cook's academic programs are designed to promote the study of these challenges by integrating the natural and physical sciences with the social sciences and humanities, and by using conceptual frameworks that explore human interactions with the earth's system. Rutgers Cooperative Extension maintains a strong connection to the agricultural base of Cook/NJAES, while also emphasizing programs of human and community development in rural, suburban, and urban areas of the state. The successful candidate will work with faculty, staff, students, and external constituents to further build, strengthen, and focus these programs.

Rutgers University is a member of the American Association of Universities (AAU) and eight of its graduate programs are ranked in the top twenty by the National Research Council. The University has over 49,000 undergraduate and graduate students on three campuses - Camden, New Brunswick, and Newark - and last year had over $185 million in research awards and contracts.

The Executive Dean reports to the University Vice President for Academic Affairs. The successful candidate must be able to balance the demands of leadership of Cook College and the NJAES with the need to maintain and nourish a learning atmosphere that is centered on the Cook/NJAES community of students, faculty, and staff, and must be an established scholar of international stature in the scientific community, with demonstrated excellence in teaching and research. In addition, candidates are expected to provide evidence of administrative achievements: experience in outreach, extension, and service, and demonstrated leadership abilities at both the state and university level.

Nominations and applications should be sent to:

Chair, Search Committee
Executive Dean of Agriculture and Natural Resources
Rutgers, The State University of New Jersey
Office of the University Vice President for Academic Affairs
Old Queens Building Room 302
83 Somerset Street
New Brunswick, New Jersey 08901-1281

CERRITOS COMMUNITY COLLEGE DISTRICT

President-Superintendent
Cerritos College
Norwalk, California

The Board of Trustees of Cerritos College invites applications and nominations for the position of President-Superintendent.

Cerritos College, a comprehensive community college, is a one-college district enrolling nearly 23,000 students on a 140-acre campus. Located in southeast Los Angeles County, bordering both the city of Long Beach and Orange County, the college district encompasses eight cities. Cerritos College has more than 160 full- and part-time employees, and an annual budget in excess of $80 million. The college prides itself on being one of the most ethnically diverse community colleges in the nation and on being the most technologically advanced community college in the state for teaching and learning. A model of effective shared governance and collegiality, Cerritos College is one of only three California community colleges without a unionized faculty.

The presidency of Cerritos College offers an attractive opportunity to guide a dynamic college that is well positioned to continue as one of the flagship community colleges in California. The successful candidate will embrace this ethic and provide the leadership that guides the college in its quest for excellence.

Review of applications will begin after October 20, 2000.

Bank Street College of Education

GRADUATE SCHOOL DEAL

Bank Street College of Education is an independent, nationally recognized leader in progressive education. Founded in 1925 and located in New York City, Bank Street is a unique institution with a history of commitment to improving education for children and families through inquiry, innovation, and influence on public policy.

The College is composed of: a Graduate School of Education, with over 5 students; a demonstration School for Children, and an on-site Family Center for infants and toddlers serving 500 children; a Division of Continu Education, reaching over 3,000 individuals across the country and abroad; and a Publications and Media Group. Bank Street employs 370 staff and a total budget of approximately $33 million.

The Graduate School enrolls students from diverse backgrounds: Its 100 faculty members are engaged in preparing teachers, leaders in the fields of Teacher Education, Special Education, Bilingual Education, and Educational Leadership. Other distinctive programs include Museum Education and Leadership, Early Adolescence, Infant and Preschool Development, and The Principals Institute. Faculty are also involved in extensive staff development in schools throughout the country.

The Dean of the Graduate School is the Chief Academic Officer and provo intellectual, professional, and administrative leadership to the Graduate School faculty, staff, and students. Reporting directly to the President, Dean works collaboratively with senior administrators from other divisions to further Bank Street’s mission. Graduate School Associate Deans, Department Chairs, and Special Project Directors report to the Dean.

The successful candidate will have a distinguished record of accomplishments in teaching, administration, and research. In addition, the candidate will have knowledge and vision to lead, facilitate, and support the diverse community of the Graduate School in affirming and articulating the values and objectives of a college of education dedicated to quality teaching and learning. The successful candidate will demonstrate excellent communication and interpersonal skills and be a creative problem-solver. A minimum of an earned doctorate or its equivalent is required, as well as a proven record of working collaboratively with faculty, other colleagues, and external institutions and organizations.

Since the Search Committee will begin its formal screening in late October, nominations and expressions of interest are encouraged as soon as possible. The search will remain open until the position is filled.

Nominations and expressions of interest should be submitted to:

AA/EO Institution
PROFESSOR OF MILITARY STRATEGY
NATIONAL DEFENSE UNIVERSITY
INDUSTRIAL COLLEGE OF THE ARMED FORCES

The National Defense University invites interested persons to apply for the position of Professor of Military Strategy and War and Strategic Logistics on the civilian faculty of the Industrial College of the Armed Forces (ICAF). The incumbent will lecture in the Military Strategy and War and Strategic Logistics core curriculum courses, regional security studies, industry studies program and electives program; develop curriculum and advanced study course materials; prepare material, lecture and conduct graduate level seminar instruction in the fields of national and military strategy; strategic logistics and mobilization; and joint, interagency, and multinational operations. Conduct direct research or research related to defense, military strategy and/or strategic logistics policies and procedures; serve as primary faculty advisor to students; and provide professional and personal counseling, evaluation and feedback to students concerning their achievements and progress at the Industrial College of the Armed Forces.

The closing date for receipt of applications is September 25. Applications should have progressive professional experience in a relevant area; evidence of security as a scholar, including substantial record of continuing research and service contributions within a given field of academic study; extensive publication of books, monographs, and articles in professional journals; and full-time professional teaching experience at the university level at the rank of associate professor or professor is preferred. Applicants will be rated on the basis of the following highly qualifying criteria: 1. Knowledge of national and military strategic theory and application; interagency national security process, joint and multinational doctrine and planning; DoD force planning, strategies policy analysis; strategic logistics, including acquisition and mobilization; national security strategy; and military strategy; the defense industrial base; and methods for attaining unified action in joint, interagency, and multinational applications. The capacity to draw on the strategic and logistic issues of the past and to develop strategies to address the future. 2. Demonstrated ability to teach at the graduate college level, to include seminar based education, lecture, use of contemporary education technology, and ability to relate the study of military strategy to the development of national strategic military strategy, and defense policy. 3. Ability to supervise student research and in mentoring/interaction with students in academic and non-academic settings. 4. Ability to develop courses on military strategy and war, strategic logistics (including acquisition and mobilization), defense industry studies, and national security-related elective studies; ability to conduct research for course development and publication. 5. Possession of a doctoral degree in a discipline related to military science is preferred. Masters degree mandatory.

You may apply with an OF 612 (Optional Application for: Federal Employment), an SF-171 (Application for Federal Employment) OR any of the following alternative formats: a Resume/Curriculum Vitae or any other written format you provided, a includes sufficient information to support your qualifications for this position. HEAD OF REFERENCE AND INSTRUCTIONAL SERVICES DEPARTMENT
WICHITA STATE UNIVERSITY LIBRARIES

The Wichita State University Libraries seeks an experienced, flexible, and dynamic professional to lead its Reference and Instructional Services Department. We are one of the largest research institutions in the state university system of Kansas. Supporting some 40 undergraduate, 56 graduate degree programs, 10 doctoral programs, and the National Institute for Aviation Research (NIAR), WSU plays a key role in educating, training, and preparing the leadership of tomorrow's workforce. The University is located in the largest metropolitan area of Kansas, which serves a diverse and affluent population of over 500,000. The City of Wichita hosts a booming economy, major components of the aviation industry, a variety of international and national companies, and multinational businesses.

Responsibilities: Under the general direction of the Associate Dean for Public Services and Information Systems, the successful candidate will assume the following key responsibilities: building and planning for the development of reference/information services and resources to meet the needs of the university in the rapidly changing information environment; leading and managing technology enhancement in the department; developing current and future digitization of the information services in the library; and building the library's collection and public services and instruction. The candidate will be a key member of the Department of Instructional Services and works effectively with faculty and students in the college.

Required Qualifications: MLS or information science degree from an ALA accredited program; 5 years of relevant and varied reference and instruction experience in a medium to large academic or research library; demonstrated knowledge of reference theory, research and instructional management, and current trends in the development of information services; knowledge of collection development; documented evidence of significant research in a field of reference; success in developing and teaching the reference coursework; ability to work effectively with diverse populations; and additional qualifications related to library instruction or other public services.

Salary and Benefits: $65,000 minimum salary and generous benefits, including: health, dental, vision, life, and AD&D insurance; retirement plan; tuition discounts and reimbursement; relocation assistance, and more. Ten-month faculty position. Excellent choice of benefits. Requirements and qualifications: Application materials, including a current résumé, cover letter, and three letters of reference, should be submitted electronically to Michael Kelly, Chair, Search Committee, Wichita State University Libraries, 1845 Fairmount, Wichita, KS 67260-0068. Applicants are encouraged to review the library's website for additional information.
UNIVERSITY OF NEW HAMPSHIRE
DEAN
School of Health and Human Services

The School offers undergraduate instruction leading to baccalaureate degrees in Communication Disorders, Family Studies, Health Management and Policy, Kinesiology, Medical Laboratory Science, Nursing, Occupational Therapy, Recreation Management and Policy and in Social Work. Graduate degrees are offered in Communication Disorders, Social Work, Family Studies, Health Management and Policy, Kinesiology, Nursing and Occupational Therapy. Each program enables students to acquire the basic knowledge and skills needed to practice their chosen professions and to obtain a broad cultural background in the humanities and social sciences.

The Dean: The successful candidate will have a demonstrated record of administrative experience, including personnel and program management, program evaluation, program development, budget development and management, as well as a significant record of accomplishment in teaching and research. The Dean is expected to act as an advocate for the College's programs; consult with faculty, facilitate undergraduate and graduate education, research and outreach; have a successful record in building external relationships and in fundraising; guide and promote faculty development in teaching and scholarship; and advance the College's affirmative action goals. The candidate's qualifications must include an earned doctorate and a record of teaching and scholarship appropriate to an appointment as a tenured professor in one of the College's departments. Above all, the Dean must possess the leadership skills to work effectively with faculty, students, and administrators within the University as well as with diverse constituencies outside the University.

Applications: Nominations and letters of application should include the name, address, phone and e-mail address of five references, and should be submitted to:

SHEEHY SEARCH COMMITTEE
Office of the Provost and VP for Academic Affairs
Thompson Hall 207
UNIVERSITY OF NEW HAMPSHIRE
Durham, NH 03824

The Committee will begin review of applications immediately and will continue until the position is filled.

UNH is committed to achieving excellence through diversity among its faculty and strongly encourages women and minorities to apply.

CALIFORNIA STATE UNIVERSITY, MONTEREY BAY

New York University
FACULTY POSITION
Center for the Study of Gender and Sexuality
FACULTY OF ARTS AND SCIENCE

The Faculty of Arts and Science invites applications for an advanced assistant or beginning associate professorship in transnational feminism beginning Fall 2001, pending budgetary and administrative approval. This is a joint appointment between the Women's Studies Center for the Study of Gender and Sexuality and an appropriate humanities or social sciences home department. Candidates must demonstrate an engagement with current scholarship; fields of specialization may include geography, gender, women's studies, sociological theory, political science, or comparative literature. Topics of expertise may include nationalism, human rights, religion, immigration, diaspora, postcolonialism, race, and gender, AIDS, cultural studies, and political economy, labor, or globalization. Applicants with a demonstrated commitment to interdisciplinary teaching and/or program development are especially encouraged to apply. Please send a letter of application, curriculum vitae, names of four references, and a 20-25 page writing sample to: Professor Carolyn Dinetohn, Director, CSSGS, 285 Mercer Street, 3rd Floor, New York University, New York, NY 10003-6021. Deadline for applications is October 16, 2000.
PRESIDENT
Lane Community College
Eugene, Oregon

The Board of Education of Lane Community College invites applications for the position of President of Lane Community College. The President is the Chief executive officer of the College District and is directly responsible to the Board of Directors. The President's duties include planning, administration, and budgeting. The President is also responsible for the development and implementation of the College's educational programs, student services, and institutional services.

The College is a public, two-year, comprehensive community college serving a population of nearly 300,000 people in a 5,000-square-mile area stretching from the Pacific Ocean on the west to the Cascade Mountains on the east. Lane annually enrolls 15,000 credit students and 24,000 community education students.

Applications will be accepted until 5 p.m. on October 6, 2000.

For more information, contact Susan A. Colvin by e-mail (colvin@lanecc.edu) or telephone (541-726-2211, ext. 2303).

An affirmative action, equal opportunity institution

Faculty Positions in Bioinformatics and Molecular Biology
Department of Biochemistry and Biophysics
Texas A&M University

The Department of Biochemistry and Biophysics at Texas A&M University invites applications for three tenure-track positions. Bioinformatics (1 position) - Research with a substantial component involving application of computational methods to modern molecular life sciences. Applications should be sent to Chair, Bioinformatics Search Committee. Molecular Biology (2 positions) - Research that addresses fundamental problems in any area of Molecular Biology. Applications should be sent to Chair, Molecular Biology Search Committee. Candidates whose expertise fits into both of these areas may be considered by both search committees.

Applications are encouraged to be at the Assistant Professor level, but assistantships are available to more senior candidates. Successful candidates will be expected to establish an active research program and participate in the teaching programs of the department. These positions are available in an energetic and interdisciplinary environment, and ample opportunities for collaborative research with enthusiastic colleagues in this and other departments. With a student population of over 40,000, Texas A&M is an outstanding university located between Dallas, Austin, and Houston. For more information about the Department, see https://www.tamu.edu/bio/.

Applicants should send a curriculum vitae, names of appropriate references, and three to five letters of reference sent to:

Dept. of Biochemistry and Biophysics
Texas A&M University
2128 TAMU
College Station TX 77843-2128

Review of applications will begin October 15, 2000, and continue until the positions are filled.

Texas A&M University is an Affirmative Action/Equal Opportunity Employer committed to diversity.
New York University

Please fax cover letter and resume to: Theresa Morgan, (914) 674-7378, or for consideration Equal Opportunity Employer.

Syracuse University
DEAN
College of Arts and Sciences

The College of Arts and Sciences at Syracuse University invites applications and nominations for the position of Dean.

The College of Arts and Sciences was one of the first institutions of higher education to offer a broad range of undergraduate and graduate programs in the arts, sciences, and humanities. The College is committed to excellence in teaching, research, and public service.

The College is currently engaged in a major strategic planning process to enhance its visibility and contributions to the university and the community.

The Dean will lead and guide the College in all its activities, including academic, administrative, and fund-raising responsibilities.

The Dean will also serve as a member of the Provost's cabinet and as a member of the Academic Council.

Applications should be submitted by January 1, 2000.
Dean, College of Arts and Sciences
Florida Gulf Coast University
Ft. Myers, Florida

Florida Gulf Coast University (FGCU) seeks a dynamic, collaborative; creative dean to lead its largest academic unit through an extraordinary planned period of growth, expansion, and innovative developments at the state's newest university.

FGCU is a comprehensive public university offering a broad range of undergraduate and graduate degree programs. Located in the Florida Bureau of Regents to employ innovative ideas and technologies in the development and delivery of programs and services. FGCU opened for classes in August 1997 and received accreditation by the Southern Association of Colleges and Schools in June 1999. The 760-acre campus located in one of the fastest growing regions of the United States, complements the natural beauty and ecology of Florida. Beginning its fourth year of formal operation, FGCU boasts a student body of 3,300 students, a full-time faculty of 170 and an annual operating budget of $58.5 million. A capital expansion program will provide two additional academic buildings, a fine arts complex, a student activity center, and athletic facilities to support the expected enrollment growth to 6,000 students by 2003.

The Dean will be responsible for building on a foundation of innovative interdisciplinary undergraduate education that supports all academic disciplines. As a member of the University’s management team, the Dean will represent the College on University-wide committees, work closely with the community, and will be responsible for the budget, programs, personnel, and facilities of the College. The Dean will also be actively involved in community, state, and national level in outreach, fund raising, and the promotion of higher education issues. The Dean reports to the Provost and Vice President for Academic Affairs.

The university seeks candidates who possess an earned doctorate from an accredited institution in an appropriate discipline, a strong background in higher education, and demonstrated successful administrative experience as an academic leader. The candidate must have faculty rank in one of the disciplines in the College of Arts & Sciences, demonstrated capability for creative leadership and committee experience, and a positive, constructive attitude. The ideal candidate will possess at least 5 years of administrative experience, preferably at the Associate or Assistant level. The ideal candidate must also possess a willingness to be part of creating a university culture that embraces the unique aspects of FGCU's multidisciplinary approach; distance learning, service learning, the environment as a major learning theme, and community/university partnerships. The candidate must be a leader who can inspire faculty to maintain a competitive edge in numerous academic disciplines and in new program development and evaluation of faculty and personnel resources and the changing community and student needs; proven ability is demonstrated through experience in developing a student centered learning environment is preferred.

Screening of applications will begin on or after November 15, 2000 and continue until the position is filled. Applications should be submitted to: Assistant to the Dean, Human Resources Division, Florida Gulf Coast University, Ft. Myers, Florida 33908-6565. Applications must include a letter of application, curriculum vitae, and have a list of at least five professional references.

Dean Search Committee

USF University of South Florida

Founded in 1956 as the first University to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich multicultural atmosphere of the University is evident not only on the main Tampa campus, but its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs, and activities that reflect the diversity of South Florida.

But USF is much more than just a large, state-assisted institution. Its growing reputation as a dynamic research university is spreading around the country, attracting more and more of the nation's best and brightest scholars to the Tampa Bay Area. USF offers degree programs in 7 undergraduate disciplines, 89 masters and specialist programs, and 28 doctoral programs including the MD. A record number 1525 international students enrolled at USF the 1999-2000 academic year. Students from Latin America and the Caribbean totaled 445. USF/AHEC's Health Education Training Center is a sponsor of the Rural Youth Soccer Association, which serves on 300 migrant children in south Hillsborough County.

The University is currently recruiting for the following positions:

Position #0247-Assistant Professor-Electrical Engineering-deadline: OPEN
Position #0200-Assistant Professor/Instructor-Computer Science & Engineering-deadline: OPEN
Position #0579-Associate Professor-Computer Science & Engineering-deadline: OPEN

Deborah A. Wilson, Director of Personnel and Contract Administration
Manchester Community College
Great Path
P.O. Box 1046
Manchester, CT 06045-1046

Must be postmarked no later than October 10, 2000
RESIDENCE HALL MANAGER
NEW YORK UNIVERSITY

New York University provides residential living in 26 facilities located throughout Manhattan. By the fall of 2000, NYU will house approximately 10,500 undergraduate and graduate students. The Department of Housing and Residence Life strives to provide students not only with an academically supportive environment, but with a community that enhances their development within the unique context of the urban campus.

Residence Hall Managers are responsible for the overall operation of the hall. Their responsibilities include: development of a positive living learning environment which in turn will strengthen the educational experiences of its residents; involvement in the selection, training, supervision and evaluation of Resident Assistants and other student staff; supervision of building administrative staff; advancement of the residence hall council; coordination of administrative services and operations; central housing responsibilities and campus duty rotation.

Qualifications:
Successful applicants must have a completed Master's degree in higher education, counseling, student personnel or a related field and 1-2 years residence life experience (full-time or graduate). Qualities of an effective manager include high energy, creativity, organizational and supervisory skills. Experience with a multicultural environment and supervision of a support and student staff is highly desirable.

This is a twelve month, live-on position. Remuneration for this position includes a salary of $27,950, a furnished apartment, University Meal Plan, family tuition remission and excellent University benefits.

Applicants should mail or fax a cover letter, resume, and the names and phone numbers of three references to:

**CAMPUS PROGRAMS DIRECTOR**

**University Campus Unions**

UIC seeks a Campus Programs Director for University Campus Unions. Duties include administrative supervision and budget development for student organizations/programming committees. Essential qualifications include leadership experience and strong financial management background. Send letter of application, resume, and three references to:

Shane Sissac
Programs Director Search
Room 703 CCC
750 S. Halsted Street
Chicago, Illinois 60607

For fullest consideration apply by October 4.
A “New Wave” of Latino College Students

I am Cuban,” she says in Spanish, with a heritage-speaker accent but a definite Cuban flavor—gestures and all. She is the 9th Cuban American of 18 high school seniors I have interviewed for a Latino scholarship. The number strikes me.

I didn’t run into many compatriots while attending college. I do remember having Cuban friends in school when I arrived in Tampa in 1980—school-age children who, like me, had come from Cuba that year. It was different in college. We all went in different directions after high school. Many joined the workforce to help their families. Some went to community college. Not many could afford a university or knew the process to gain entry. Some of us managed to finish our degree at a four-year institution. Many others could not afford to go on. There were few of us at the graduate level.

It interested me that half of those students I interviewed are Cuban Americans. And I remembered something else they each had in common. “My parents came in a boat. ¡El Mariel!” says one of the students. She doesn’t know exactly what all that means, only that her parents were from Cuba and sometimes they talk about El Mariel. It suddenly dawned on me. They are all the sons and daughters of the Mariel Generation. Born here—American citizens. They are the children of 125,000 Cubans, ages 19-30, the “Marielitos” who came in 1980. Exactly 20 years after the exodus, these youngsters are college age, coming up quietly in our school systems throughout the country. They are smart, bilingual, determined, spontaneous, eloquent, and very refreshing.

This is the “new wave” of Cuban Americans—children whose experiences in the U.S. are very different from those of their parents. These children tell everyone they are Cuban and are not embarrassed to say that their parents came during El Mariel. Unsuspecting, perhaps, of the stigma their parents survived, they volunteer how their families arrived in the U.S. from Cuba.

Their parents have a different story. Many now confess they avoided disclosing when and how they arrived here. Some tell how they took on fake nationalities and adopted new Spanish accents to try to escape from the cruel jokes and verbal abuse from other children they encountered in school and in their neighborhoods. Being a marielito was not something you told everyone.

Marielitos were blamed for the social stresses felt in Miami in 1980—a time in Miami when drug lords from Latin America openly fought wars on the streets and African Americans protested police brutality and outbreaks of violence that spread throughout Dade’s African American communities. Undoubtedly, Castro was to blame for the increase in violence that followed the boatlift. His massive and well-orchestrated effort to destabilize Florida by sending criminals across the border to disrupt the newcomers in the eyes of Americans made Miami community in Miami. But the majority of those who came were decent people who saw El Mariel as their only chance to escape. Many families who could not otherwise come together and who thought of coming separately took this opportunity. Doctors, teachers, other professionals declared themselves homosexuals or prostite on the list of the unwanted and therefore be allowed to come who came were hardworking men and women seeking freedom.

Twenty years later, the Mariel Generation is nearly invisible. Those who have adapted, integrated, joined the workforce, and flourished among the highest levels of employment and the lowest reliance on government assistance of any refugee group. The Mariel Generation has redefined.

Today, an even newer generation is emerging: the children of those who came during the Mariel exodus. The first wave of marielitos who were born in the U.S. are now college age. They are on some of the negative trends associated with Latino students, trying out of high school to help support their families, an English proficiency. They are graduating from high school full for admission to universities. They aspire to attend four-year in the country are familiar with standardized testing, college admissions, college applications, financial aid, scholarships, and future generations will even turn to their parents for informal guidance about college in the U.S. They are taking advantage of opportunities this country has to offer. They will achieve high than the generation before them.

To all of them, congratulations and welcome.

Hispanic Education Initiative Sets Five Tough Goals

President Clinton’s interest in education is very clear. He has also worked very hard to secure Hispanic support. He recently hosted a meeting in the White House replete with Hispanic politicians as well as Hispanic educators from around the nation.

In prepared remarks, Clinton provided insight into his views about Hispanics and the education afforded them in this country. Clinton opened by stating that “intelligence is equally distributed throughout the world, but opportunity is not; the same is true within our own country.”

In August 1999, the White House hosted a Conference on Hispanic Children and Youth. Now, less than a year later, Clinton called together a gathering of Hispanics interested in education to take the next step. He took the opportunity to tout his Hispanic Education Action Plan, which included a $436 million increase for programs to improve Hispanic/Latino student outcomes this year. “And I want to double that investment,” he announced.

Clinton noted that his programs have made it possible for more than 90 percent of schools in every low-income area to have at least one Internet connection. Since many Hispanics live in low-income areas, any early intervention via the Internet is thought to be one important step in the reform movement.

Council of Economic Advisors

The same day, the White House released a study by the Council of Economic Advisors that indicated that the average educational level of native-born Hispanics has increased substantially over the last several decades and that the gap between Hispanics and whites has declined.

Compared to 1993, Hispanic students are scoring higher on math tests; greater percentages are completing high school, graduating from college, and getting advanced degrees. But there’s bad news as well. The need for education and continuing education is growing even faster.

Since 1993, the percentage of Hispanics with four or more years of college has increased, but only by about two percent. Over the next decade, the number of jobs requiring at least four years of college will more than double.

Hispanics, who represent 11 percent of our workforce, hold just four percent of the high-tech jobs—jobs that pay much more than average in the area where jobs are growing most rapidly. When the fastest-growing demographic group in America is underrepresented in the fastest-growing employment sector, it means fewer options for Hispanics. It also means that sooner or later, the nation’s economy will have a shortage of highly skilled workers where they are really needed.

The problem is not that Hispanics don’t choose careers in key industries. According to the report, Hispanics who graduate from college enter the information technology industry at about the same rate as do non-Hispanics and earn about as much.

The problem, quite simply, is that not enough Hispanics are finishing college. Once again, too many Hispanics, up to 60 percent in some neighborhoods, never finish high school. Many have suggested that raising the educational achievements of Hispanic students in schools, beginning in pre-school years, continuing into adulthood, and making sure that no person is ever denied access to college because of cost are the logical path to follow.

Making College Accessible

More programs exist than ever before to make college accessible—HOPE scholarships, work-study arrangements, Direct Student Loans Program, Lifetime Learning tax credits, together with institutional financial aid programs. Earlier this year, Clinton proposed an annual tuition tax-deductible program of up to $10,000. Those in the 28 percent and even in the 15 percent income tax rate bracket would be eligible. That would be a significant benefit, especially for lower-middle-class families. Ideally, more youngsters would go to college since more families could afford it.

Five Specific Goals

Clinton urged the conferees to adopt five specific goals to close the Hispanic student achievement gap over the next 10 years. They are:

- Within 10 years, all young Hispanic/Latino children should be enrolled in quality early childhood programs at the same rate as are other Americans.
- Within 10 years, every Hispanic student graduating from high school will have demonstrated English proficiency.
- Within 10 years, there is no gap in test scores and other assessments between Hispanic students and their peers.
- Within 10 years, 90 percent of Latino students complete high school.
- Within 10 years, the percentage of Hispanic students earning college degrees is double what it is today.

The 2010 Alliance

Clinton said his administration committed to those goals. That morning, the secretary of education released the first of what will be annual reports measuring prog of Hispanic student achievement.

Clinton also said that the mission needed an entity outside federal politics to keep a national spotlight on these goals because if these are not met, then they should be the nation’s goal without regard to party.” And announced the creation of such entity, the 2010 Alliance—a part ship among Hispanic organizations including La Raza and the National Association for Bilingual Education and corporate and nonprofit groups from the Ford, Irvine, Kellogg, Hazen Foundations to AT&T, Ger Motors, Unilux, and State Farm.

The Alliance is designed to reeat the nation of these goals, and to commitments-specific ones—e.g., level of government and the private sector to help meet them.

In this month, Discovery Channel will publicize goals in public service announcements to run on its Discovery Spanish networks. The educat software firm Lightspring will put special software and Internet access for computers in Hispanic communities. Many other organizations, from the American Lib Association to the Hispanic Network, also are contributing.

Dr. Mellander is a professor George Mason University.
As an academic, I know the value of a good index! We've worked hard to identify—and then, in some cases, split and/or refine—our index subject categories so that you will find it easier to locate those articles of particular interest. I recommend that you begin by familiarizing yourself with the categories and then peruse the article titles (listed chronologically within categories) to locate the articles that you wish to read.

Regular readers of *The Hispanic Outlook*—faculty, administrators, students, and those outside—but interested in higher education matters—will already know the wealth of information and opinion that is available within our pages. Newcomers will discover this rich content on an article-by-article or issue-by-issue basis: articles relating to issues of diversity, affirmative action curriculae, theme issues relating to the arts, law, medicine, sports, articles covering specific colleges and universities, organizations, reports and studies; commentary from a Washington, D.C. insider and from faculty and administrators from around the country; and much more.

Communication Patterns in the Classroom: Gender Differences, Part Two

Leveling the Playing Field

BY ANGELA PROVITERA McGlynn

When men, women, and children are asked to respond to generic terms such as he, him, his, man, and mankind, they are much more apt to visualize males.

In the September 8, 2000, issue of The Hispanic Outlook, I discussed gender differences in communication styles and how classroom dynamics can be affected. I referred to the research of Sandler, Silverberg, and Hall (1996), who talk about power differences in the classroom. These authors suggest that a group's power or lack of power, which can be based on gender, race/ethnicity, age, class, or sexual orientation, can affect the classroom environment by replicating our society's power relationships.

One way to explore how power might be reflected in the classroom is to observe which students do most of the talking in class. Study after study examining grade school through graduate school classroom interactions demonstrates that white males do most of the speaking in class. With all the research showing the correlation between active participation in class and the learning process, those of us invested in equal opportunity for classroom learning must address the inequality of the playing field.

In addition to the gender differences in communication styles discussed in Part One, there are other dynamics that influence unequal class participation. Women often have different attitudes toward speaking in class, and they might typically believe it is their job to think of content and command the floor to express their ideas. A student responded to my question, "How would you assess your participation?" (in my As of Classroom Atmosph Dynamics described in Part One) "I speak often, sometimes too much, but I know that I may be doing it because I have been asked to do it."

Angela Provitera McGlynn
Students' beliefs and attitudes about their role in a classroom are probably learned over years of conditioning. This conditioning might be gender-related, culture-related, class-related, or age-related, and it might be firmly ingrained; changes are possible with motivation and effort on the students part and with participation of females and other students who might be considered members of "outsider" groups. What the Hall and Sandler research found in 1982 on the chilly classroom climate applies not only to females but to members of other groups, based on culture, race/ethnicity, social class, age, and sexual orientation, who might also be reticent to speak in class. Here are some suggestions:

- Avoid the use of the generic *he* in your presentations.
- In addressing the class, use terminology that includes both males and females.
- When referring to students, use the terms *men* and *women* rather than *kids*, *boys*, *girls*, or *gals*.
- Avoid the use of language or examples in class that assume everyone is heterosexual.

Philosophers have believed, and now cognitive psychologists have demonstrated, that language shapes our thoughts. Study after study has shown that when men, women, children are asked to respond to questions in gender-related terms such as *he*, *him*, *his*, *man*, and *men*, they are much more apt to see males. They do not conjure images of both males and females, as is true for the written word a spoken word.

This finding profound implications for how and boys in early education and men and women in college respond to what they expect the classroom to be. We even know that in kindergarten and grade school girls much less likely to engage in a classroom task if they recognize themselves as the stereotypical females can engage in the task in which character engagement is important.

Pamela Cooper (1993), on the Hall and Sandler classroom communication research, the following suggestions to manufacturers of class to classroom participation.

- Pay particular attention to classroom interaction patterns in the semester since these patterns are likely to continue through the year. During this early period...
a special effort to draw men, women, and other students who seem reticent to speak, into the discussions.

- Intervene in communication patterns among students that might shut out certain students. For example, if male students pick up on each other's points, but ignore an appropriate comment offered by a female, slow the discussion and pick up on the comment that has been overlooked.

- Respond to female and male students in similar ways when they make comparable contributions to class discussion by crediting comments to their author; "coaching" for additional information; [among other strategies].

- Note patterns of interruption to determine if some students are interrupted more often. (One communication pattern that is well established in the literature is that males tend to interrupt females more than they interrupt males, and much more often than females interrupt males.) Make a special effort to ensure that all students have the opportunity to finish their comments.

- Ask male and female students qualitatively similar questions, that is, ask students of both sexes critical thinking questions as well as factual questions.

- Give female and male students an equal amount of time to respond after asking a question.

- Make eye contact with all the students in your class after asking a question to invite a response, particularly with those you have identified as reticent to speak

- Watch for and respond to nonverbal cues that indicate a student's readiness to participate in class, such as the student's leaning forward or making eye contact.

Some additional strategies that might prove useful:

- Increase the wait time when

- In large classes, I have found that dividing the room in two, having a large space down the middle where I can walk, and having students tilt their chairs towards the center of the room facilitates greater participation. With my ability to walk down the center aisle, I can establish eye contact with learning strategies. [Editors' Note: No more discussion on collaborative learning strategies, see earlier articles by McGlynn: Teaching Strategies That Promote Equal Opportunity One: Collaborative Learning Communities, December 0, 1999 Part Two: Constructive Controversies Jigsaw Technique, and Focus G December 17, 1999]

Research shows that lan; usage and commun.; patterns in the room greatly affect room atmosphere. Teachers at all levels have the opportunity to create a hospitable atmosphere for all students.

$42 Million to Hispanic Serving Institutions

76 New and 39 Continuing Federal Grants Awarded

BY GUSTAVO A. MELLANDER

For years, those colleges and universities that serve a high percentage of Hispanic students felt out of the loop when it came to federal funding. Although they were eligible for most grants, a discrete amount of funding was not specifically designated for their needs. Those institutions were, a few years ago, designated as Hispanic Serving Institutions (HSI) and in 1998 were formally recognized in legislation as distinct entities and provided specific funding.

In this year’s round of funding, money was designated to help colleges both to plan and to actually implement long-range enrichment programs specifically geared to Hispanic students.

In June, U.S. Secretary of Education Richard W. Riley announced this year’s awards. They totaled more than $4.2 million and will assist 115 colleges and universities. Community colleges are included in this program in recognition of the fact that more Hispanics begin their college careers at community colleges than at any other type of higher education institution.

Of the total, $2.58 million was awarded to fund 76 new grants to Hispanic Serving Institutions (HSIs). They are designated “to improve their facilities, academic programs, and student services.” Another $16.3 million will support continuation awards to 39 additional HSIs.

“The goal is to increase the college graduation rates of Hispanics,” Riley said. “These grants will enable colleges that serve large numbers of Hispanic and disadvantaged students to offer an enriched academic experience that will go a long way toward making that goal a reality.”

Later, addressing a White House National Discussion on Hispanic Education, Vice President Al Gore said, “This program is part of a larger, overall effort to increase the achievement of Hispanic students at all levels of education from preschool through college. Education can open a new world of opportunity for Hispanics and other minorities, and this administration is committed through this program and others like it to help those dreams become a reality. We must reduce the Hispanic dropout rate in America. And I will not rest until we do.”

HSIs are colleges or universities in which Hispanics represent at least 25 percent of the student population, and at least half of those students are low-income. Some 195 two- and four-year schools have been designated as HSIs. About 40 percent of Hispanic undergraduate students are enrolled in these schools.

HSIs confer more than 45 percent of associate degrees and 50 percent of bachelor’s degrees awarded to Hispanics and provide access for a large number of other disadvantaged students. Hispanic enrollment in higher education has increased nearly 50 percent in six years—from 782,000 in 1990 to about 1.3 million in 1996—and Riley said the role of HSIs will become increasingly important as the trend continues.

Amendments of 1998, the program aims to enhance the academic offerings, program qua and institutional stability of the institutions educating a significant percentage of Hispanic students. Of the 76 new grants, seven are one-year planning grants to give institutions an opportunity to analyze their strengths and weaknesses and take steps to prepare a Title V development grant application for the following year.

The other 69 are five-year development grants to implement specific activities such as establishing community outreach programs, local elementary and secondary schools, offering special programs to improve students’ academic success, purchasing books, telecommunications materials, and/or scientific or labora equipment; and supporting exchanges, fellowships and other faculty development programs.

For example, New Mexico Highlands University in Las Vegas will use a $583,000 grant to increase online academic course offerings via distance learning. The funds will enable rural, homebound and economically disadvantaged students who might otherwise not have access to the university’s on-campus experience to tap into the national system. New Mexico Highlands was established in 1893 and is the oldest HSI in the U.S.

Los Angeles Southwest College will use a $377,741 grant to strengthen a variety of student support services that are vital to student success including orientation, financial aid counseling, academic counseling, Part of the grant will also be used to set up a computer-assisted instruction system to support classroom instruction and pre-Latin students with greater access to technology.

In fiscal year 2001, the administration require $625 million for Title V to serve a greater number of Hispanic students attending HSIs.

For more information on how your institution can apply for the next round of grants, Stephanie Babjak at (202) 701-2311 or for college grants, clickman at (202) 701-1307.

</table>
President Richard M. Freeland has made urban engagement a top priority for Northeastern University. Freeland tells The Hispanic Outlook, "Ultimately, what we seek to accomplish is to show how a university that was once a city school can transform itself into a leading national institution and at the same time strengthen its commitment to diversity and its constructive impact upon the urban community of which it is a part." Under Freeland's leadership, Northeastern has launched a four-pronged initiative to improve the quality of life in Boston in four key areas: health, economic development, public education, and employment/training.

The list of accomplishments to date is impressive. Prominent among them is Northeastern's purchase and redevelopment of a failed economic development project in Lower Roxbury, formerly called Parcel 18, and the fully rented Renaissance Park, a for-profit enterprise, with a goal of stimulating economic activity in Boston's Crosstown area.

Phase two is the recently announced construction of a 980-car parking garage that will make additional development on the parcel possible. Proposals include a hotel and conference center and another office tower or research and development center.

Northeastern's involvement began with the Parcel 18 Task Force in 1995. The University acquired Renaissance Park, formerly the Ruggles Center, for $1 million in November of 1997 from BankBoston in a foreclosure sale. The existing office building is fully rented. It fits the master plan perfectly because tenants include the Whittier Street Neighborhood Health Center. Under a community benefits package negotiated during the sale, the Center gets free rent for 30 years. The center has a value of $9 million. Other tenants include Beth Israel Deaconess Hospital, Harvard Medical International, Partners Health Care, the Center for Collaborative Education, Deruko Pharmacy, and the Gorbachev Foundation of North America. These entities are kept in the neighborhood for the good of the community, for health and economic strength.

Davenport Commons is the latest component of NU's $120 million housing initiative that will create new housing for 1,700 students, drawing them out of Boston's rental market. The initiative has three parts: West Village A, West Village B & C, and Davenport West A opened last September. West B & C are...
half complete. Both are on University land near Ruggles and Parker Streets. An innovative model for creating affordable housing in the United States. Davenport Commons and Shawmut Estates were conceived and designed by Northeastern University and a development team made up of Trinity Financial, Inc., Madison Park Development Corporation, and Housing Investments, Inc. The project will create 25 new townhouses to be sold at affordable rates to income-eligible families. 125 apartments for rent to Northeastern students, and 2,500 square feet of commercial space. Sixty homes will be located on Tremont Street at the Davenport site; fifteen will be built nearby on Shawmut Avenue. Figuring four students to an apartment, that frees up 475 apartments for use by the community.

During groundbreaking last November for the Davenport, the first in-nation combined student and affordable family housing development, President Freeland and Mayor Thomas M. Menino were present. Along with many state, city, and community dignitaries. Mayor Menino said, "This project represents a first for Boston and the nation. Boston, like all major cities, is facing an affordable housing crisis. Northeastern University is helping the City of Boston create affordable homes for Boston families and at the same time create much-needed student housing. We need more partnerships like this one."

Freeland is no stranger to urban higher education and bold tenured planning. He is former vice chancellor for academic affairs at the City University of New York (CUNY), the country's largest urban system of higher education, with more than 200,000 students pursuing associates to doctoral degrees. In his four years there, Freeland coordinated a system-wide strategic planning effort to assure the CUNY's 21 campuses, which had lost $1.28 million in public support over three years, were using available resources in the most effective way to meet New York City's needs.

At the close of the 19th century, more than half the population of the city of Boston was composed of either immigrants or first-generation Americans. Prominent among the organizations helping these people achieve their dreams was the Boston YMCA. Founded in 1841 in London, the Young Men's Christian Association chose Boston as the
location of its first American branch in 1851. In its articles of incorporation, the Boston YMCA promised to have "a committee of teachers and lecturers for any private classes that may be formed by the members." These lectures proved to be immediately popular, drawing large numbers of young men seeking self-improvement.

Building on this success, the directors of the YMCA took a bold step in May 1896, when they organized the "Evening Institute for Young Men." Frank Palmer Speare, a well-known teacher and principal with considerable experience in the public schools, was hired as the institute director. Two years later, the YMCA advertised the creation of the "Department of Law of the Boston YMCA." The program became an immediate success and marked the birth of Northeastern University.

In 1904, the Department of Law was incorporated and chartered to grant degrees in law, and in 1909, the Cooperative Education Engineering School was established. In 1910, Northeastern College of the Boston YMCA was established. By 1922, that became Northeastern University of the Boston YMCA (the year the College of Business was founded). Finally, in 1935, Northeastern University was formed as a corporation with a board of trustees, as a College of Liberal Arts was established.

Women were first admitted to day classes in 1943. Other highlights include the merger of New England College of Pharmacy with Northeastern to form the College of Pharmacy and Allied Health Professions in 1942, the establishment of a College of Nursing in 1942, and the merger of Tufts University's University-Southern University with Northeastern to form Boston-Southern University in 1964. The merger of Boston State College of Human Development Professions in 1992 with its College of Pharmacy and Allied Health Professions formed the new College of Pharmacy and Health Sciences. Last year, this school merged with the College of Nursing to create the Bouve College of Health Sciences.

Northeastern University is a private research university (Carnegie Classification Research II) offering a comprehensive range of undergraduate and graduate programs leading to degrees through the doctoral level. A world leader in "practice-oriented education," Northeastern emphasizes educational programs that link classroom learning with workplace experience and integrate professional preparation with study in the liberal arts and sciences. The main campus is located on 60 acres in Boston's newly designated cultural district, the Avenue of the Arts between the Museum of Fine Arts and Symphony Hall. The institution consists of 37 academic and administrative buildings and 19 dormitory and residential buildings. Annual first-year student tuition is $19,395, with the average tuition for upper-class students at around $21,530. For 1999-2000, total degree enrollment was 17,542; full-time undergraduate enrollment, 11,836. Part-time under-

Graduate enrollment was 6,249, and graduate enrollment, 2,809.

Full-time undergraduate minority students include 584 African Americans, 469 Hispanics, and 998 Asians. Overall, full-time degree-seeking Hispanics number 858, again, 4.0 percent of the total. There are 2,150 international students overall pursuing degrees, for 9.1 percent.

Full-time faculty number 311 with part-time in day programs at 290. There are 16,002 alumni. Northeastern has four library facilities: Stetson Library and the Law Library; both on campus and libraries that support programs at the Burlington, Mass., campus and the Marine Science and Maritime Study Center in Nahant, Mass. The University has a full-service Intra-net with approximately 6,500 live network connections to all offices, classrooms, labs, and 4,200 student residences.

On April 29, 1999, Northeastern broke ground for its Latino/a Student Cultural Center, the most comprehensive of its kind in the region. Linda Delgado, Latino/a Center director, called it "the only center in the entire area that has both an academic program and a social component under one roof." Delgado says the Center's mission "is very clear."

"The Center exists," she says, "to bring together the social, cultural, and academic aspects of the Northeastern University's Latino/a students' lives. The Center provides a non-threatening environment where this integration can occur. Recently I've been asked, 'Why do Latinos need a center?' Even more frequently-- 'Doesn't this kind of center promote segregation and exclusion?' The answer is that the Latino/a Student Cultural Center is not a private club for Latinos only; nor is it just for members of LASO (the Latin American Student Organization). Rather it is a welcoming place for anyone interested in and sensitive to Latino/a concerns. To understand the implications of the changing U.S. demography and the international political and economic picture, it is critical that the general public learn more about Latino culture in America.' Another important goal of the Center is to help guide Northeastern's Hispanic students as they navigate through the University's system. The Center offers programs in Financial Aid Workshops and Career Services Workshops as well as a Graduate School Preparation Program and Student Leadership Training. Also academic and personal advising; financial aid, housing and judicial affairs support; assistance with financial and academic difficulties; a website to keep students informed of on-campus state-wide, and national events and scholarship and fellowship information. Information is available for on job opportunities and internships, and there is a collection of Hispanic-interest books, magazines, community events, and other literature. Many cultural and social activities revolve around the Center-- lectures, visiting speakers, an Awards and Recognition Dinner, and Northeastern University Latino/a Alumni Weekend.
Wanted: 2 Million Teachers Especially Minorities

By Amalia Duarte

When the baby boomers do something, they do it in a big way. They can't help it; it's a matter of their sheer numbers.

The latest move they're making is from the busy world of work to the relaxed world of leisure. They are starting to retire, and this bulge of retiring baby boomers is having an enormous impact on America's elementary and secondary school classrooms.

"It's a huge problem," said Mildred Hudson, CEO of Recruiting New Teachers, Inc., a Massachusetts-based nonprofit formed in 1986 to raise esteem for teaching, expand the pool of prospective teachers and improve the nation's teacher recruitment and development policies and practices.

"We'll need 2.2 million teachers in classrooms from K-12 over the next 10 years to fill this gap. It's a problem we've known about and have been talking about for the past 10 to 15 years. And it's going to get worse." Retiring boomer teachers are thinning ranks of experienced educators, and, obviously, with them ye accumulated knowledge and experience. It's a huge problem that is only getting worse in the coming decade.

The wave of booms just starting their early 50s will simply add to the pool of needed teachers. Older boomers are more likely to retire.

And the recruiting problem is compounded by what's happening at the other end of the pipeline. The new teachers are few and far between. Meanwhie, the number of minority and Hispanic students is rising, but the teaching pool remains relatively small. The result is that schools in districts like Los Angeles are having trouble finding teachers and are increasingly resorting to temporary substitutes. unwilling to teach.\\n
1. The High Cost of Teaching

The earnings between teachers and other college graduates grew substantially during the late 1990s. By 1993, older teachers with graduate degrees earned an average of about $25,000 less than their peers.

NOTE. All figures are reported in 1998 dollars to control for inflation.

taught by novices and are very unlikely to see people of color leading a class.

"Clearly, urban districts face particular challenges, and a lot of them have been striving mightily but are at a real disadvantage in trying to compete with the surrounding suburban districts in terms of salary and working conditions," said Lynn Olson, senior editor at Education Week and project editor for "Quality Counts 2000," an annual look at the nation's schools. "Urban districts tend to have higher teacher turnover and larger numbers of new and inexperienced teachers."

"Quality Counts 2000" uncovered a number of unsettling trends about the pool of new teachers. First and foremost, new teachers are leaving the field almost as fast as they come in. Nearly one in five teachers who started in the public schools in the 1993-94 school year had left the classroom within three years, according to "Quality Counts 2000."

Even more disturbing, the young teachers who left the classroom were often the best and brightest candidates. Those who had scored in the top quartile on college entrance exams were nearly twice as likely to leave the field as those who scored in the bottom quartile. The report concluded that "those who enter and remain in teaching typically have lower test scores than their peers."

This booming economy, in which Corporate America is fighting over talent, certainly isn't making teacher recruitment any easier. "It's an incredibly hot job market, and for bright, talented young people, there are lots of opportunities, and the same is true for minorities," said Olson.

And it's no secret that, in general, elementary and secondary school teachers don't earn as much as professionals with similar educational backgrounds. Education Week's study also delved into this salary gap, and the findings were startling. In 1998, teachers aged 22 to 28 made an average of almost $8,000 less than did other college graduates of the same age. And the gap is even worse for older, more experienced teachers. Teachers aged 44 to 50 were paid $3,655 less than their peers in other professions.

This dot-com world, teaching wouldn't seem to hold a very good long-term earnings outlook. Gender is yet another factor contributing to this teacher shortage. Most teachers are women, and it used to be one of the few professions where good teachers and stability prevailed the most. Discipline problems, lack of and a lower pay scale are all exacerbated districts. And class size tends to be large; these are the factors that drive new teachers.

On top of all this, there is the growing disparity between the demographics of those that of the nation's students. Teachers a whirlingly white and female, but the three K-12 are becoming increasingly minor populations. In 1996, 36 percent of students enrolled in elementary and secondary schools were part of a minority group, an increase from 1976, according to the recently published report from the National Center for Education Statistics.

Yet, only about 10 percent of teaching members in groups. This is the minority population was due to the great increase in the percent Hispanic students.

In 1996, at out of every public school students who lived in central city attended public was Hispanic, approximately of every ten students. At the school, the percent African American students in central public schools very slightly in percent in 1972. The report said that this was due to an increase in the percentage of Hispanic students.

In 1972, African American students made up 11 percent of K-12 students, up from 14 percent in 1972. Meanwhile, there was a small uptick in the overall percentage of African American students. In 1996, African American students made up 17 percent of K-12 students, up from 14 percent in 1972.

This explosion in the Hispanic school population reflects increased immigration to the United States, particularly from Latin American countries. The report also noted that the number of Hispanic students in U.S. schools had increased dramatically since the 1970s, when the percentage of Hispanic students was much lower.

America during those years and higher-than-average birth rates among Hispanics as compared to those among the general U.S. population. And, again, those numbers are set to go even higher. Many expect this year’s U.S. Census to place Hispanics as the dominant minority group in the U.S. with projections for the Latinoization of the United States to continue if both immigration and births stay at the current pace.

But minorities aren’t entering teaching in anywhere near the numbers needed to make a dent in these demographics. Part of the problem is, again, the pipeline. The high dropout rate, especially among Hispanics, means too many minority youngsters never make it out of high school, let alone into college teaching programs. And those minorities who do reach college and are better prepared get heavily wooed by other fields and by corporations. And there’s another factor: the home front.

“Oftentimes, middle-class minority parents discourage their children from going into teaching because they don’t think it will provide them with any upward mobility,” said Ana Maria Villegas, a professor of curriculum and education at Montclair State University. “The fact is that teaching is not perceived as a prestigious profession, so that takes away from people wanting to become teachers.”

But what is the impact on young minority children? Common sense would conclude that white females who might not have much experience interacting with minorities will not be up to the task of teaching African American and Hispanic youth. “We don’t know if the African American child necessarily gets better grades in a classroom with an African American teacher,” said Hudson, “but we know that it can be devastating for minority children if the teacher lacks cultural sensitivity.”

The research is not entirely conclusive, but some studies have found a connection between race and educational results. “Learning requires that the teacher be able to help students build connections with what they know and are familiar with,” said Villegas. “Kids bring something into the classroom, and you’ve got to make the links. When teachers don’t know the life experience and cultural background of their students, it makes it harder for them to build the kinds of bridges that are necessary to learning.”

And, obviously, the lack of minority teachers sends a not-too-subtle message to minority youth. “For a child, a teacher is a major authority figure outside of the home,” said Villegas. “Yet, you have children who go through education with almost no exposure to people of color in authority positions. It reinforces the stereotypes that people of color are not worthy of holding such positions. There are no role models.”

But there is some good news to report. Faced with this growing crisis, school districts and states are starting to become more aggressive in teacher recruitment and are creating alternative programs that often attract a significant number of minorities. Massachusetts, for example, now offers hiring bonuses to teachers, something that is commonplace in corporations. Other states have implemented loan-forgiveness programs that kick into effect after a teacher has spent a set amount of time in the district.

Another major trend is alternative routes into teaching that offer mid-career professionals or young people who didn’t major in education a quicker way to get a teaching certificate. California, New Jersey, and Texas, all states with large Hispanic populations, have successfully used these routes to recruit minorities into teaching. Another group being lured through these programs are paraprofessionals, who already have experience in the classroom but lack teaching credentials. Other groups, such as returning Peace Corps volunteers and U.S. Army troops, are being targeted for recruitment. The former group has cross-cultural training, while the latter includes large numbers of minorities. And both groups are used to tackling tough problems.

In 1996, Florida started an initiative called the Florida Fund for Minority Teachers, which provides scholarships to minorities in 29 colleges and universities throughout the state. Special consideration is given graduates of community colleges since many minorities attend them. Recipients get $4,000 per year and return must teach full-time within the state public schools for an equal amount of time. One-year scholarship recipient, for instance, must teach for one year; a two-year award winner must teach for two years. The program includes an annual conference that brings together students, scholars, and institution contacts. Part of the purpose is to help minority students to learn more about the advantages entering the teaching profession. This year, scholarships have been awarded, and the goal is to reach 1,000.

“We are excited about our program,” said Assistant Director Iana Baker of the Florida Fund for Minority Teachers. “First, we are getting minorities into teaching, which is a huge concern in Florida because of our large Hispanic and African American population. And we are getting people who would not have gone into teaching otherwise. These are math and science majors who may not have considered teaching.”

It’s just this type of program that will have to proliferate in order to ease this crisis in the classroom.

“There is awareness around this issue,” said Hudson. “Schools are attempting to become more creative in their recruitment.” But a more needs to be done.”
New Survey Shows Hispanic Parents VERY PRO EDUCATION

Conventional Wisdom "Off the Table"

BY JEFF SIMMONS

"Since they were babies, I said. After you finish college, then you can start thinking about what you want to do. It served me well. It did open doors."

Those words, spoken by the patriarch of a Hispanic family in El Paso, Texas, dispel the notion that immigrants are unfamiliar with the importance of a college education. The man was part of a focus group of Hispanic parents who sat down to talk about the emphasis on college.

The comment is quoted in a recent report that counters what once appeared to be conventional wisdom: that low college attendance rates among Hispanics and African Americans equaled low interest in higher education. Instead, the authors note, conventional wisdom was wrong.

"The values are very strong, so this suggests that the obstacles to participation must be elsewhere," says John Immerwahr, author of Great Expectations: How the Public and Parents - White, African American and

Hispanic - View Higher Edu

"Typically in public schools values change very slowly."

The report, by the National City-based group Public Agenda, found a staggering 87 percent of American parents believe college diploma today is as necessary as a high school diploma was. The study was touted as the most extensive public opinion survey ever of Americans' views on higher education.

"One of the things I found surprising is the way in which people have changed their attitude toward education," Immerwahr says. "When I started looking at higher education like myself who had gone to a four-year college and all of college is a life-changing experience. Most people who had not gone to college said this was a piece of paper you really needed in credentialist jobs. Now what everybody says is that it's not just a piece of paper you need the experience. Indeed, people say you can get a pretty good job without going to college, but not the kind of job you want for your career."

Deborah Wadsworth, Public Agenda's president.
dren. It's the kind of job where you won't have the skills to change jobs over the next 30 years."

The report found a sharp contrast along racial ethnic lines when it came to the desire to attend college and enrollment. Those parents polled were asked to select one thing that would most help a young person succeed in the world today:

Thirty-three percent of white high school parents chose a college diploma, while 47 percent of African Americans did so, and 65 percent of Hispanic parents. The Hispanic response is nearly double that of high school parents overall, which was at 35 percent.

Twenty-nine percent of white parents cited "knowing how to get along with people," while 37 percent of Black parents and 19 percent of Hispanic ones did so.

The reverse level of importance was stressed when it came to a good work ethic. Ten percent of Hispanic and African American parents cited that, while 29 percent of white parents did so. All three groups gave similar, low levels of importance to work skills learned on the job.

"From time to time you hear stereotypes thrown around that racial or ethnic minorities with whom the system is not doing very well have low aspirations. My survey takes that issue off the table," says Patrick Callan, president of the National Center for Public Policy and Higher Education in San José, Calif.

"There was a certain 'blame the victim' mentality in this country, and this does a lot to take that stereotype and demolish it," he says. "Those groups understand and have very high aspirations. They are the most unequivocal about how essential college is."

The report notes that a host of explanations have been provided to explain why Hispanic and African American college participation rates are significantly lower than the overall population. Some have cited higher rates of poverty that curtail access. Others suggest that predominantly Black or Hispanic schools are less successful at preparing students for postsecondary school studies. And it's been suggested that families feel higher education is a priority.

But the author notes that "The findings from this study seem to suggest that what is really important to African American and Hispanic parents, who are more likely to emphasize education either with their children or as an investment in their own future."

Another question asks whether a college education is necessary for a person to succeed in the work world. Whether the other ways parents answer questions is whether those without a college edu-

"There was a certain 'blame the victim' mentality in this country, and this does a lot to take that stereotype and demolish it."

PATRICK CALLAN, PRESIDENT, NATIONAL CENTER FOR PUBLIC POLICY AND HIGHER EDUCATION

American and 20 percent were Hispanic.

The attainment of Bachelor of Arts degrees showed a similar decline. Twenty-five percent of those 25 years old and older who attained such
were white, while 15 percent were Black and 11 percent were Hispanic. “Significantly, the value placed on college education is highest among those who have the lowest rates of participation,” the author cites. That is one of the most striking findings,” Immerwahr says. “There is clearly a gap between participation rates and values.”

Public Agenda’s president, Deborah Wadsworth, says the study challenges a number of assumptions. “Parents acknowledge that paying for college is difficult, but they believe they will find a way to pay for it,” she says. “The importance of a college education as absolutely essential to a good life is a change from just a few years ago. A few years ago, people thought too many people were going to college.”

Public Agenda is a nonprofit, nonpartisan group founded 25 years ago by U.S. Secretary of State Cyrus Vance and social scientist Daniel Yankelovich. Funded by corporations and private foundations, Public Agenda strives to tap into the public mindset on a wide range of issues ranging from health care to education to the environment.

“We were created to fill a distinctive niche—to help American leaders better understand the public’s values and concerns on public policy issues that the country struggles with, and to translate complex and arcane policies,” Courtland Lee, dean of the School of Education at Hunter College in New York City, says that the findings expose the value that Hispanic and African Americans have placed on higher education for generations.

“The problem is that understanding the dynamics of what it takes to get into college coupled with socioeconomic limitations often got in the way so there might have been a college goal, but participation often fell short,” Lee says. “We certainly see a rise in those attending college, but there’s still a number who could and don’t attend because they lack the resources and understanding of the process.”

Immerwahr agrees that access isn’t limited only by funds. “If you look at what parents are saying, they say, ‘College is expensive and we worry about it, but somehow we are going to work this out.’ Even minority parents say, ‘We will work this out.’ Right now people are all doing this,” he says. noting one observation: “People think college is easy but they don’t think it should be free.”

Other Findings

The study looked at expectations toward higher education institution parents were asked how imp different criteria were for different administrators to address—such as costs, diversity, counseling, standards, and teaching quality.

Overall, white, Black, Hispanic parents gave the same weights of priority to such issues as costs, career counseling, standards, and tuition. But in nearly 90 percent of Hispanic parents felt the areas were absolutely essential.

“People feel great about higher education now, but they won’t feel great if they see problem access, because that’s their value,” Immerwahr says. “They feel higher education is the entry to a middle-class lifestyle.”

One major disparity arose the level of importance and prioritization of students population: 29 percent of white parents, 17 percent of Hispanic parents, and 20 percent of Black parents maintained absolutely essential.

Another significant gap in the importance of admission offices’ lowering the numbers of students who drop out or take long to graduate. Thirty-nine percent of Hispanic and 24 percent of white parents deemed it essential.

More white parents felt qualified Black and Latino students had more opportunity to get college education than did either percent. Only 17 percent Hispanic parents agreed.

Moreover, 7 percent Hispanic parents maintained qualified Blacks and Latinos less opportunity, and 28 percent white parents felt that way. Overall, 28 percent of high school graduates agreed and 29 percent of the general public agreed. Parents were asked what their children should gain from a
If you had to choose the one thing that must help a young person succeed in the world today, what would it be?

n=1,015 general public, 200 parents of high school students, 201 white parents of high school students, 202 African American parents of high school students, 202 Hispanic parents of high school students

Note: Percentages in table may not equal 100% due to rounding or missing answer categories

Overwhelmingly, white, Black, and Hispanic parents agreed on what was essential: important, and not too important. However, there were some differences.

For instance, a greater percentage of white parents felt that students should gain a sense of maturity, acquire the ability to get alone with others, and attain the ability to solve problems quickly.

A greater percentage of Hispanic parents felt it absolutely essential that students acquire top-notch writing and speaking skills; learn the responsibilities of citizenship, such as voting and volunteering; and receive increased exposure to great writers and thinkers in subjects such as literature and history.

The “Great Expectations” study was prepared after a telephone survey of 1,015 adults ages 18 and older in December of last year. Besides interviews with the general public, surveyors talked with 202 African American, 202 Hispanic, and 201 white parents of children in high school. And then, they sat down with a group of 200 randomly selected parents.

“There is a notion that in higher education,” notes Immerwahr, “success or failure is primarily the responsibility of the student, whereas in kindergarten through 12th grades, success or failure is the responsibility to a greater degree of the school.

“Higher education is a time when students acquire more responsibility, and people are supposed to be more self-motivated and self-directed. If you tell someone the person’s dropping out of high school, then they are upset and say it’s the school’s fault. But if you tell someone the person’s dropping out of college, there is a radically different attitude.”

Public Agenda is hopeful that the findings will spur dialogue, not change. Its goal with this report, as with others, has been to raise consciousness to find, according to its brochure, “workable solutions—solutions that will assure a more prosperous and secure future for every citizen.”

Immerwahr says the report “suggests to people that there is possibly another way to work out the problem of different participation rates.

“ar a wake-up call to people in higher education that while the situation is very positive now as far as public opinion, that positive is predicated on a number of factors that won’t always be there.”
Renewed Debate Rages over President of Teacher’s College at Columbia Calls for Change

BY MARILYN GILROY

Diversity. It is a word that pervades most corners and facets of life at U.S. colleges and universities. The academic rhetoric speaks of a “diverse student body,” “diversifying the faculty,” and “diversifying the curriculum.” These phrases might sound impressive, but a new report issued recently by Arthur E. Levine, president of Teachers College, Columbia University, poses questions about how successful the higher education community has been in confronting issues concerning campus diversity.

Are campuses really coming to grips with the many issues raised by diversity, or are they adrift in myriad diversity programs where, as math experts would say, the whole is NOT equal to the sum of the parts?

Levine concludes that higher education “has not been an effective factor in the social policy debate on diversity.” He expressed his views in a New York Times Op-Ed piece this past summer entitled “The Campus Divided, and Divided Again,” pointing out that the academy really does not agree on what diversity means or how it should be achieved. In many cases, colleges have what he calls a “grab bag of unplanned diversity initiatives” that lack comprehensive and systematic planning for achieving goals. That, he says, has led to a fragmenting of the student population, especially in co-curricular activities in which separation and self-segregation of students occurs based on their differences.

For example, one school that Levine visited had a business club divided into a dozen different groups—a women’s business club, a Latino business club, a disabled student business club.

“Colleges must be able to explain publicly and defend the practices in which they are engaged.” One of several recommendations.
a gay student business club, and so on. He uses this example to conclude that students are making finer and finer distinctions between themselves and others.

The Op-Ed piece and Levine's expanded report entitled "Diversity on Campus" did not go unnoticed. While many individuals were intrigued with the ideas set forth in the piece, some protested vigorously that Levine had overlooked the larger societal context. After all, society is still grappling with diversity issues, and the campuses are merely mirrors of that struggle. Other critics contend that the degree to which students self-segregate is more of a myth than fact, and they point out that Levine's report ignores data that supports this.

"Actually, we were quite dismayed by his column," said Debra Humphreys, director of programs at the Office of Education and Diversity Initiatives of the Association of American Colleges and Universities (AAC&U). "We feel he only tells part of the story and ignores recent research that shows that student self-segregation on campus is more of a perception instead of a reality."

Humphreys wrote and researched a report issued last year by the AAC&U and funded by the Ford Foundation Campus Diversity Initiative. Her report indicated that contrary to claims such as Levine's, self-segregation does not appear to be widespread, and in those cases where it does exist, "it may be an essential ingredient in many students' persistence and success in college."

The report relies in part on the research of Anthony Annonio, assistant professor of education at Stanford University, who examined the extent to which students perceive racial balkanization at UCLA and whether their perceptions reflect the reality of actual close friendship patterns. Annonio reported that more than 90 percent of students in his survey agreed that students predominantly cluster by race and ethnicity on campus. This would seem to support Levine's contention that if you "walk into almost any college cafeteria, you find that students are sitting at tables with people of the same ethnicity, race, or difference they find important."

However, when Antonio moved beyond perceptions and measured friendship groups, he found that only one in six students (17 percent) reported having friendship groups that were racially and ethnically homogeneous. In fact, the most common friendship group on campus (46 percent) was racially and ethnically mixed, with no racial or ethnic group constituting a majority.

But Arthur Levine's criticism of diversity in higher education centered on more than just student self-segregation. His expanded report paints a broader picture of the academic community, which, in general, is uncomfortable and uncertain about the concept of diversity and therefore has floundered on the issue.

"Diversity is a subject that we are unable to discuss on most campuses. In fact, I can think of no more painful issue in all of higher education today one that mirrors the angst in the larger society says Levine.

"We live in an age in which the dirty word on college campuses is no longer four letter; they are at least six letters—racist, sexist, an homophobic."

He cites polarization on campus, saying that two groups dominate the discourse—one yells that diversity has eclipsed all aspects of college life and the other shouting that colleges remain impervious to diversity.

And, he asks, if we are unashamed to deal with diversity successfully, what hope is there for our students and graduates to live and work in a diverse society?

Levine's national reputation has lent clout to his assertions that academia has provided weak leadership in this area. He presides over one of the nation's finest and most prestigious institutions, Teachers College at Columbia University, which was founded in 1887 to provide a new kind of schooling for teachers of poor, immigrant children in New York City. It has educated nearly 100,000 individuals from around the world, but it also conducts research on critical issues related to equity, teaching of science and math, and the role of the family in the educational process.

Levine's last book, When Hope Fear Collide, gained widespread attention for capturing the nature of students in the middle '90s. Whi noting that students still express optimism and believe in the America dream, he also chronicled their anxieties about success and was one of the first to describe the binge drinking phenomenon, grade inflation and new patterns of socialization between sexes and among races on campus.

This time, Levine's assertions have struck some of those who say his conclusions are inaccurate and are even somewhat short-sighted.

Dr. Carol Geary Schneider, AAC&U president
the desegregation efforts of the past, and minorities, such as Latinos, seem to have become steadily more segregated, not less. So, it is not the colleges that are balkanizing students, society is.”

Geary is referring to Gary Orfield’s research entitled “Resegregation in American Schools,” which studied national trends in K-12 public school enrollment. Published last year by the Civil Rights Project, Harvard University, the report shows that there is serious segregation, particularly in the nation’s large metropolitan areas, despite two and half decades of civil rights law and integration measures.

But even though a great many white college students come from public schools that are largely segregated, Schneider says studies have found that students actively want to meet individuals from other backgrounds and that the majority of minority students frequently socialize with people outside their ethnic groups.

Her colleague, Debra Humphreys, agrees. “What we have is perception vs. reality. Many buy into the perception of segregated student life, but the research shows that this clustering isn’t widespread, that in fact students do interact across racial lines.”

And sometimes where racial/ethnic clustering does exist, it might be an important component contributing to the psychological health and educational success of many students, according to Humphreys. In actuality, she says, the availability of these groups helps individuals become more involved in college, which actually leads to higher persistence rates. Furthermore, because they are more involved, they eventually have more interaction than those who do not participate in extra curricular activities.

Adds Carol Schneider, “Again the research shows that college students make friends in affinity groups of various kinds as a way of dealing with the stress of college and especially with the stress of being minority, whether based on religion, ethnicity, or sexual orientation.”

What about faculty?

But what about the other core groups on campus, such as faculty? Levine is very concerned about the low level of faculty involvement in the diversity agenda and their reluctance to engage in substantial curriculum reform. He cites widespread complacency and lack of incentives for faculty involvement. The situation is compounded because students are also not eager to tackle the subject. Levine found that in many cases, students do not want to talk about diversity, and most faculty say that the topic is greeted with silence or painful discussions when it is raised in the classroom. Levine says that quite frankly, students seem more willing to talk about the intimate details of their sex lives than to discuss race relations on campus.

Humphreys acknowledges that there might be faculty who have difficulty when attempting to deal with diversity. “Some faculty might be afraid to introduce diversity topics because they have not been trained to handle the classroom dynamics that occur during sensitive discussions,” said Humphreys.

Recently, ETS reported that 80 percent of the projected growth on campuses in the next 15 years will come from expanded enrollment of minority students.

However, both Humphreys and Schneider contend that sweeping generalizations such as Levine’s ignore the progress that faculty and institutions have made in focusing on diversity and integrating it into the mission of higher education. They believe strongly that the higher education community has been a significant contributor to helping students understand and cope with multicultural America.

We feel that faculty and institutions have made tremendous progress focusing on diversity,” says Schneider. “They have made it part of their mission and part of the curriculum, and they are beginning to see results that are resulting in long-term change.

“Diversity on campus and in the curriculum is producing new knowledge, new respect, and new commitment to intergroup community.

Faculty and administrators are making a perceptible difference and have achieved significant results in the last five years.”

Levine’s Recommendations

Whether the situation on today’s campus one that calls for alarm or one that calls for gratulations, all agree that diversity in college continue to increase. Recently, ETS reported 80 percent of the projected growth on campus in the next 15 years will come from expanded enrollment of minority students. For this reason, Arthur Levine’s concerns will continue to be cussed. He has offered the following seven recommendations as an agenda for higher education:

1. Presidents need to provide leadership on this issue.

2. The entire campus community needs to be engaged in the issue: faculty, staff, and students.

3. The campus needs to develop mechanisms for safe, open, and college-wide discussion regarding diversity.

4. Colleges need to clearly define the operating definition of diversity on campus and the goals for achieving it.

5. Institutions should develop a comprehensive, long-range plan for diversity—detailing timel, responsible parties, complete dates, and resources allocated.

6. Colleges must be able to explain publicly and defend the priorities in which they are engaged.

7. Institutions should carry out research and evaluation on the effectiveness of the methods employed to achieve diversity and the consequences of achieving diversity on campus.

Latino Caucus Working Well with NCORE

Southwest Center Seeks New Director and New Directions

BY Inés Pinto Alicea

This year's conference attracted about 300 Latinos of some 1,600 participants. Latinos sponsored nearly 25 presentations, and actor Edward James Olmos was the keynote speaker.

In 1961, at the height of social unrest, seven academically based facilities were created to deal with issues of race, segregation, equity, and civil rights. The University of Oklahoma (OU) in Norman took on the task of creating the only center west of the Mississippi—the Southwest Center for Human Relations Studies—to help resolve the issues since, and in 2001, the Center celebrates 40 years of existence. The Center itself is at a crossroads. Long-time Executive Director Dr. Maggie Abudu recently retired. Its executive committee, which determines policy issues of the Center, is undertaking a nationwide search for a new executive director as well as undergoing some soul searching to return to some of its more historic approaches or take new paths and if so, what they should be.

The largest and best-known activity of the Center and the one that keeps it financially afloat is the National Conference on Race and Ethnicity in American Higher Education (NCORE). The idea of NCORE, as part of the Center, w:
leadership of the Center in 1985 and launched NCORE three years later as a "national forum for higher education institutions to improve racial and ethnic relations."

She said that she decided something needed to be done to address the resurgence in the early 1980s of racial problems.

"The racial and ethnic climate on campuses is fundamental to ensuring access to higher education," said Abudu. "I wanted to provide a forum where people of all aspects of higher education can come together to share ideas and positive models about what can be done."

This year, the conference, held in June in Santa Fe, New Mexico, attracted some 1,600 participants, representing a variety of academics—provosts, professors, assistant deans, and multicultural directors. Abudu said that the cross section is instrumental in advancing discussions and debate on civil rights and integral part of the conference. The Walt Disney Co. provides scholarships that allow about 40 interested students to attend through its Disney Scholars program. The company pays the $395 annual conference fee for the students and sponsors many activities, meals, and events just for students.

The presentations at the conference included counselor training, treatment of women faculty throughout the world, managing emotion in race relations training, and more. Abudu said, however, that NCORE is not just a forum to share information about racial issues. "You get to be around people who are committed to the same purposes."

"It is a place for nourishment and rejuvenation after a year of struggles in their own institution to promote the cause of racial understanding," she said.

Dr. William Carnack, the Center's first executive director and current interim director, said the Center faced significant opposition initially when it opened in 1961. "It was pretty hairy at the time," said Carnack, a retired OU professor. "I got asked to leave town by the county attorney and mayor. I got a lot of hate mail. The University stood behind us though. The president said, 'if you're doing the right thing, then keep doing it.'"

At the time, the Center dedicated its activities to community interventions, providing training to state and local government officials, police, school boards, and minorities on a variety of issues. For people were allowed to demonstrate and that there were ways to handle crowd control without violating civil rights. The Center also trained newspaper editors to include pictures in their pages of minority brides and not to gratuitously disclose the race of people arrested for crimes. The Center also wrote the desegregation plan for Oklahoma schools.

"We tried to be the voice for the disadvantaged," said Carnack. "The Center has accomplished some good, but it has fallen short of our dreams."

Carnack said that NCORE has become extremely popular and has been the focus of the Center's work in recent years. He said that the Center's three major tasks are to maintain NCORE, look for a new executive director, and investigate new avenues for the Center. Carnack said he hopes that some of the Center's new programming will take it back to its roots of community outreach and advocacy.

"NCORE fills a void, but I don't see why that is all we have to do with the new needs emerging and the American dream unrealized," Carnack said. "NCORE is a great thing. It just grew so quickly. It preempted other things. So many people say they
NCORE'S Latino Caucus

The Latino Caucus of the National Conference on Race and Ethnicity in American Higher Education (NCORE) wanted to support the plight of migrant farm-workers fighting the use of dangerous pesticides on grapes, so the group asked that the hotel where the conference was being held not serve grapes.

"It did happen immediately," said Caucus member Rosa Cintron. "This is now a policy issue: hotels where the conference is housed are not to serve grapes." While the grape issue might not seem significant to many, it is telling of the growing importance of a group within the conference that struggled to find ways to have its voice heard.

In 1995, Latinos represented only about 50 of the more than 1,000 participants at the annual conference, yet they were eager to see Latino keynote speakers, more scholarly papers and presentations about Latinos, more Latino-related vendors, and more of a Latino presence in the overall agenda, said Caucus co-chair Ana Maria Cobo, assistant dean and director of the Intercultural Center at Swarthmore College, near Philadelphia.

This year's conference attracted about 300 Latinos of some 1,600 participants, Latinos sponsored nearly 25 presentations, and actor Edward James Olmos was the keynote speaker.

"Now the Native American and Asian groups are holding up the Latino Caucus as a model," said Larry Medina. "The Latino educators have gone from expressing concerns about their lack of representation to saying, 'We can do this on our own.' There was a lot of complaining that NCORE was focused on African American issues, but the Latinos decided to make it something positive."

Medina said that when he joined the Southwest Center's executive committee, the Latino members turned to him to address all of their concerns and resolve the problems, as he was at the time the committee's sole Latino.

"In 1996, we began to organize ourselves, and in 1997, we realized part of the problem was us," said Medina. "We weren't submitting a lot of proposals. We got better in 1998 and even better in 1999."

Dr. Maggie Abu-Du is credited with helping launch NCORE's Latino Caucus by providing guidance, assistance, and much-needed funding. But she is modest about her role. "It really is a partnership," said Abu-Du. "They brought their concerns to me. I would not have been able to reflect those concerns on my own. They've done a masterful job at developing sessions, at bringing critical issues facing Latinos. They are very well organized. I respect them very deeply."

"We've grown tremendously," said Cobo. "We've established a more visible caucus. We are dealing with national issues affecting Latinos. No other national caucus deals with higher education issues affecting Latinos at predominantly white institutions."

Cintron agrees, saying, "I am a member of many other higher education organizations that claim to be "in touch" with the changing demographics and the needs of our Latino students, and none offers this number of academic presentations."

Cobo said that the Caucus also has been a wonderful resource to find Latino mentors and to create a network among themselves to expand professional opportunities and address professional challenges. Cobo said the Caucus is developing a list server, a database of all Latino members, to assist them with networking and mentoring.

"It's a place where I feel safe talking about issues," said Cobo. "There is this sense of community within the Caucus. As young professionals, we don't get much guidance, so having mentors helping us succeed has been great. My role models are part of this Caucus."

At the June conference, the Latino Caucus decided to divide the group regionally so they can possibly meet and carry out activities throughout the year rather than wait for their annual meeting at the next conference in June 2001 in Seattle. The group also decided to focus its efforts in the coming year on the following issues: access to education of Latinos; recruitment/retention of Latino students, staff, and faculty; mentoring and outreach programs for Latino students; K-12 preparation; and the inclusion of more Latino history in curricula.

"We have really committed people who have a passion for this and who really want to make it work," said Cobo.

Cobo said that the future for the Latino Caucus is even brighter. The group is developing a website. She would like to see presentations and scholarly papers by and about Latinos published. She also hopes to develop a newsletter to keep Caucus members informed about activities throughout the year. She said the Caucus is working with NCORE to expand its budget.

"We're trying to do more research for Latinos in higher education, research that will be instrumental to administrators dealing with the recruitment and retention of Latino students," Cobo said.

Cobo also has taken on the of working with the Latino study group so it will be able to more workshops at the confer and develop leadership skills.

That's going to be a vital pi said Cobo of her work with Latino students. Whom she said have a hard time adjusting to li predominantly white institutions.

Cobo said she also hopes th the future, the group will be able to develop a relationship with Hispanic Association of Colleges and Universities (HACU), which represents primarily Hispanic Serving Institutions, colleges and universities with Latinos comprising more than 25 percent of total student enrollment.

"Right now, we have to w with the body of our own ca she said. "We need a stronger voice."

Medina said that he is convinced the Caucus will continue to expand its presence. "I've seen the evolution of the Latino Caucus," said Medina. "This has become a go to of people empowering them. It's been real satisfying to watch."

K
Getting Foster Youth into College

"Aged Out" SJSU Grad Helps Improve Options

BY
Sylvia Hutchinson and
Nancy L. Stake

San José State
University

"Some say
that I beat
the odds,
others say
that I am
resilient, and
some even
say that I'm
simply lucky."

Alfred Pérez.
SJSU '98

For most young people, it would be a proud day to be invited to speak at a White House ceremony, to sit beside the president and to be introduced by the First Lady. But it was especially meaningful for former San José State University student Alfred Pérez because he had come such a long way.

Pérez was one of the 50,000 U.S. children who are in foster care on any given day. He spent 11 bleak and lonely years moving between California group homes, foster homes, and children’s shelters. And he was one of the more than 20,000 teens who “age out” of the foster care system annually without returning to the homes of their birth parents.

A White House ceremony

Last December, Pérez took part in a bill-signing ceremony at the White House for the Foster Care Independence Act, a law that greatly strengthens the support for young people who leave foster care at age 18 to make the transition to adulthood and self-sufficiency.

"Now, for many Americans, the 18th birthday is an important one," said Mrs. Clinton in her remarks. "Turning 18 means you can vote... get a job or go to school. But it should never mean that you're left on your own. For too many young people, turning 18 has been just the beginning of a lonely and sometimes harrowing journey toward adulthood. Just half of all young people who have aged out of foster care complete high school. Fewer than one in three have health care coverage. One in four have been homeless."

"The Foster Care Independence Act recognizes one fundamental principle: all of us must take responsibility for helping these young people build lives worthy of their spirit and potential," she said. "Added President Clinton, "The bill also gives states more resources and flexibility to help former foster children finish high school and move on to college, to help young people get jobs and vocational training and to provide counseling for those learning to live on their own. At all, to make sure young adults leaving foster care know that they not out there alone."

Pérez was one of two students who spoke that day. He emphasizes that it is a myth that people can make it alone. "The Foster Care Independence Act of 1999 is at ensuring that foster youth, I myself, will have to do less on own to make it in the adult world."

This legislation adds important..."
safeguards that will help states care better for people like me and prepare them for the world they face,” he said.

The Turning Point

Looking back on his journey to the White House, Pérez recalls that the turning point in his life—after “aging out” at 18—was his participation in the Independent Living Skills Program, a program that is strengthened by the new law. Says Pérez, “The program connected me with my peers, and I felt less alone. It was the first time in my life that I recognized that we were all struggling with how to become productive citizens in a world that seemed, sometimes, to work against us.”

As part of this program, he met Timothy Hamp, a caring adult who became his mentor. Although no one in foster care had ever talked to Pérez about further education, Hamp took the young man’s goal of getting into college seriously. He helped him to identify schools and complete applications, then drove him the 250 miles to the Humboldt State University campus to settle into a dorm. “He did what any parent would do for his own child,” Pérez says. Later, Pérez transferred to San José State University because he liked its urban setting and it offered the major he wanted—social work.

A Meeting with Hillary

Pérez also joined a group called California Youth Connection (CYC), a San Francisco-based advocacy program made up of former and current foster care youth. The CYC empowers and trains these youth (ages 14 to 24) for advocacy and leadership. Through CYC, in November 1997, Pérez and six other foster youth met First Lady Hillary Clinton when she visited UC Berkeley to give a major speech on the Adoption and Safe Families Act. These young people opened up a new perspective for the First Lady when they talked about the pain of aging out of the foster care system, with no family, home, or financial support. Later, when she gave her speech, she referred to the stories she had just heard.

In helping Pérez prepare for that meeting, SJSU social work professor Joan Mardinger said, “Read her book. It Takes a Village.” Pérez did, and then he thought of a book that he wanted to bring to Mrs. Clinton’s attention, a book entitled The Heart Kn Something Different: Teenage W of the Foster Care System.

This collection of essays by ter children details the obstacles encountered when they leave the system: few caring adults, resources, few skills, few in-tives. Pérez gave Mrs. Clinton a copy of the book, and she promised to read it.

Two years later, when Pérez gathered at the White House ceremony, Mrs. Clinton acknowledged Pérez with a hug and said, “because of you that we’re here.” also acknowledged the many members of Congress, child advocates, organizations, and individuals who worked tirelessly to support landmark legislation to strengthen the foster care system.

Helping at the Local Level

Pérez has done more than in once national politics. While at SJSU he had heard of a state law that would direct the California State University (CSU) and community colleges to help former foster youth get into college and graduate. However, the (new part of Education Code: 89240) had no provision for funding, and administrators he spoke with at San José State and other
schools had not heard of it.

Working with Janet Knipe of CIC, and with Sylvia Rodriguez Andrew, SJSU's dean of social work, Pérez put together a public forum in April of 1998 with a panel of seven students who had been through the foster care system. The impact of the panel was powerful. As the young people spoke, Pérez recalls that pockets of tissues were passed from hand to hand in the audience. Afterwards, the University created a task force to address the concerns raised: housing, financial aid, medical care, and mutual support.

The response was overwhelming. "We had so many people wanting to help," recalls Stacey Morgan-Foster, associate vice president for student affairs. But identifying students who needed and qualified for assistance was not easy. Counselors say that former foster care students often want to move on from past experiences, and do not want to ask for help or be seen as objects of pity.

To Work Continues

Merdinger and her SJSU social work colleague Alice Hines obtained small grants from a CSU research fund and from state lottery funds to study how young people make it from foster care to college, and to assess their needs once they get there. Based on the survey results, they helped produce a brochure with information about services that these students most need, such as housing and health care. Meanwhile, Merdinger and Hines have recently received a much larger grant from the California Social Work Education Center at UC-Berkeley to extend their survey to other CSU campuses. Morgan-Foster says that community support remains high and there are plans to develop a scholarship program. In addition, SJSU now has a support group for students, Former Foster Youth Organization, established through the commitment of a graduate student.

Pérez is of course proud of his role in bringing much-needed support to former foster youth who want to become responsible and productive adults. He has come a long way, but in another sense, he is just getting started. After graduating from SJSU in 1998, he enrolled in the master's program at the University of Michigan School of Social Work, and plans to work in the area of public policy. "I want a job where I can shape child welfare policy and make the foster care system more responsive," he says.

"Some say that I beat the odds, others say that I am resilient, and some even say that I'm simply lucky. All of that is probably true. However, in my heart, I know that I am more than lucky and it's more than being resilient. I survived a system that can be cruel—only because of the deep caring and hard work of many people."

SJUS College of Social Work: Meeting the Challenge

Sylvia Hutchinson, interim director of communications and pub affairs at San José State Universi has a 20-year career in university advancement. Hutchinson is editor of SJUS's alumni publication Washington Square. Prior to SJUS she worked at Trenton State College in New Jersey. [now The College New Jersey]

Nancy L. Stake, public affairs specialist at San José State University, is editor of OnCampus, the faculty/staff newsletter, and contributes articles to the University alumni publication. Prior to SJUS Stake held a 15-year career in high-tech public relations. She has a master's degree in mass communications from San José State University.
Brazilians Try ESL Teacher Training at Rhode Island College

Courtesy of the Fulbright Teacher Exchange

By Joe Beck

Both Brazilian professors are finding the teaching at Rhode Island College to be of very high quality and the students motivated.

"Educational exchange can turn nations into people, contributing as no other form of communication can to the humanizing of international relations. Man's capacity for decent behavior seems to vary directly with his perception of others as individual humans with human motives and feelings, whereas his capacity for barbarism seems related to his perception of an adversary in abstract terms, as the embodiment, that is, of some evil design or ideology."

-Senator J. William Fulbright

The need for well-trained English-as-a-Second-Language teachers has brought educators from as far as Brazil to Rhode Island College. The visiting educators are here as part of a Fulbright Teacher Exchange Program.

"Rhode Island College is one of the few institutions in New England to have a teacher training program in ESL, and the Fulbright people chose Rhode Island College (RIC) because they are interested in getting RIC's program involved in the exchange program," explained Gale Goodwin Gómez, who holds a joint appointment as associate professor in anthropology and educational studies at RIC.

The two Brazilian faculty members are pleased with the experience they've received at RIC. "We didn't really choose the site. We applied for the program, and the Fulbright Teacher Exchange placed us," explained Wladia Borges, who teaches at the Federal University in Goiania as an assistant professor of English. Her colleague, Glúci Mendes, holds a similar position at the State University of Feira de Santana.

Both of the Brazilian educators arrived on March 18 and stayed until May 4. They were kept busy and introduced to how teachers are trained at RIC, according to Goodwin Gómez. "They were able to observe our teaching methods in some of our ESL classes, and scheduled presentations and activities with our faculty as well as visits to nearby public schools."

Although this is their first visit to RIC and to the state of Rhode Island, they are veteran travelers to the United States. Borges came to Arkansas in the 70s as a high school exchange student. Mendes spent time in Mississippi as part of a Rotary Cultural Exchange program.

Both Brazilian professors are finding the teaching at RIC to be of very high quality and the students motivated. They have especially enjoyed the camaraderie of their American colleagues. "The professors and others here are very friendly," said Mendes. "We feel very welcome and comfortable with the living arrangements."

"Rhode Island is very beautiful," says Borges, who notes that Ocean State was one of the American colonies and is full of history. The primary reason for their visit was never far away.

Particularly noted were the graduate students in the ESL teaching program, who seemed to be involved. This observation was to her heart, according to Mendes, who really expect to exchange good ideas," she noted.

Exchange is the key word added to the success of the program. Gale Goodwin Gómez: Willis E. Poole, assistant professor of educational studies, participated in turn in the Fulbright Teacher Exchange, traveling to Uruguay in July. They are among the American educators who exchange with Brazilian faculties in the U.S.

Brazilian faculty are also visiting institutions of higher learning in Boston, Chicago, and Washington D.C. "Although the program has been in place for a while, this first time the Fulbright Teacher Exchange has taken place at the University of Rhode Island," according to Goodwin Gómez.

While there, both Brazilian educators toured the WaterFire display in Providence and some of the fabled mansions of Newport.
and Montreal.

As a culminating activity, they joined all the other Fulbright teachers for a two-day session in Washington, D.C., at which the 24 scholars rendered progress reports to the Fulbright Commission, which is comprised of members of Congress, and began a research project.

All the educators participating in the exchange program helped live out the purpose of the Fulbright Teacher Exchange; they helped promote mutual understanding between the people of the United States and the people of other countries through educational exchange. The teachers seized the opportunity to live and work abroad by exchanging positions with educators from more than 20 countries.

By living and working in the cultures of their host countries, they gained an understanding and appreciation of the similarities and differences between nations. Visiting teachers were able to share new perceptions with their students, and returning Fulbright Exchange Teachers transmitted an awareness of what is happening in the part of the world they visited.

Benefits

The Fulbright Teacher Exchange literature lists benefits to several constituencies—teachers, administrators, schools, and communities alike. For all, the potential for increased awareness of another language, country, or culture, and a chance to see how Americans are viewed in another sector. For faculty and administrators, exposure to new perspectives, new teaching methods or new managerial styles, and the potential for new friendships and professional relationships in the international community. Students then benefit from what their teachers learned.

For the schools, development of a professional relationship between the participating institutions, which can lead to privately arranged teacher exchanges, student linkages, and future student exchanges.

Eligibility

Elementary through four-year college teachers and school administrators are eligible to apply for positions abroad. However, not all categories of applicants are eligible for all countries.

An applicant must meet all of the following seven requirements: the time of application, a candidate must be a U.S. citizen, be fluent in English, hold at least a bachelor’s degree, have a current full-time teaching or administrative assignment in the U.S. or one of its territories, be in at least the third year of teaching or administration (teachers applying for the seminar need only be in the second full year), have the approval of the school administration, and have participated in a Fulbright Teacher Exchange longer than eight weeks in the last two years.

After interviews, a process begins in which the U.S. Department of State works with binational Fulbright Commissions, embassies, and other cooperating agencies at matching teachers of similar subjects and levels. The Fulbright Teacher and Administrator Exchange Program is based on binational agreements. All participants must be acceptable to cooperating agencies and educational authorities in both countries.

Teachers selected for the program must attend an orientation workshop, usually scheduled in August, prior to the start of the school year. The workshop is considered an essential part of the exchange. Selection presumes the teachers’ participation in all the activities.

Conditions regarding school leaves of absence are also considered. In general, exchange teachers are granted a leave of absence with pay and use their regular salary to cover daily expenses while abroad. Foreign teachers are also generally paid by their home schools, and replace their U.S. counterparts at no additional cost to the hosting school.

In the case of one-way assignments, teachers are required to obtain a leave of absence without pay, and a stipend is provided by the U.S. Department of State to cover living expenses while abroad.

Fulbright History

The history of the Fulbright Program is important in its continued influence and primary role in enhancing international understanding. It was established in 1946, at the end of World War II, to promote mutual understanding between people of the U.S. and other countries, through the exchange of persons, knowledge, and skills. Initially, funding was allocated from the U.S. government.

Participating governments host institutions also contribute financial support through cost-sharing and through waivers, university housing, and other benefits.

Grants are made to U.S. citizens participating in countries, primarily for university teaching, advanced research, graduate study, teaching in elementary and secondary schools. The Department of State is the principal agency administering the Fulbright Program and funds the program directly. It is supported by the U.S. Congress on matters of funding and recruitment and retention policies.

In addition, there are other opportunities at work for the recruitment and placement of teachers for the program, sponsored by the U.S. Department of Education, Graduate School, and International Programs, in cooperation with the Department of State in administering the Fulbright Program. The Department of State works with binational Fulbright Commissions, embassies, and other cooperating agencies at matching teachers of similar subjects and levels. The Fulbright Teacher and Administrator Exchange Program is based on binational agreements. All participants must be acceptable to cooperating agencies and educational authorities in both countries.

Since 1946, the program has helped nearly 200,000 teachers and administrators contribute to understanding between the United States and countries around the world.

Super Onda Honors New Mexico Student

University of New Mexico (UNM) business student Paul D. Garcia (pictured) was named to Super Onda magazine’s top 100 list of Hispanic students.

Garcia is a peer mentor for the Amistades peer mentoring program at UNM’s El Centro de la Raza. Student program advisor Andrew Gonzalez nominated him for the honor, citing his excellent communication skills, positive attitude, and sincere desire to assist others. Garcia said he enjoys helping students with their transition from high school to college.

Super Onda is published by Hispanic Business Inc., the publisher of Hispanic Business Magazine. Super Onda (a Spanish slang term meaning “the wave” or “the latest”) is geared toward young adults and includes stories about education, survival skills, current events and issues, and young people in general.

Bilingual Grant Offered at Texas-Permian Basin

The Career Advancement, Retraining and Education (CARE) grant—a Title VII Career Ladder Grant funded through the U.S. Department of Education—has been available at The University of Texas of the Permian Basin (UTPB) for students and teachers who want to upgrade their education and are interested in bilingual education.

As more and more teachers reach retirement age and school districts expand, the demand will increase for bilingual and ESL teachers in and around the University and across the state of Texas.

The CARE program is funded for five years at $300,000 per year. Through it, undergraduate students are able to attend UTPB or area junior colleges for the first two years of instruction in order to give them more flexibility in scheduling and services. Those who qualify receive tuition and book scholarships.

Urbina Receives ALMA Award

The Adult Literacy Media Alliance (ALMA), a national television- and video-based multimedia service developed with the support of the Ford Foundation and the Lila Wallace Reader’s Digest Fund, gave a Community Innovation Award to Jose Urbina, an educator in the workforce development department at El Paso Community College in Texas.

Urbina was awarded for using TV411 to instruct his class of 15 displaced workers from local work sites in basic skills, employment skills, and life skills. TV411 is ALMA’s groundbreaking literacy series that uses real-life topics to teach pre-GED-level basic skills.

Rocha Becomes President of Santiago Canyon

Dr. Mark Rocha recently became president of Santiago Canyon College, one of California’s newest community colleges. He will guide its development as a comprehensive college offering a full range of academic and student services. Reporting to the community college district chancellor, his responsibilities include planning, organizing, and implementing educational policy and procedures to develop curricula and student support services. He also is in charge of budget management and the institution’s fund-developing efforts.

A former provost at Seton Hall University (N.J.), Rocha has a bachelor’s degree from Villanova University, a master’s from CSU-Fullerton, and a doctorate from the University of Southern California.

Badillo Renamed to CUNY Board

The New York Senate unanimously approved Gov. George A. Pataki’s reappointment of Herman Badillo as chair of the City University of New York board of trustees. Badillo, who has been a trustee for more than a decade, including two years as vice chair, will serve a seven-year term.

Badillo was the first Hispanic commissioner in the history of New York City, the first Hispanic elected borough president, the first person of Puerto Rican origin elected to the U.S. Congress, and the first Hispanic deputy mayor in New York City’s history. He has a bachelor’s degree from City College of New York, was class valedictorian of Brooklyn Law School, was admitted to the New York Bar in 1955, and became a CPA in 1956.

Texas Foundations Contribute $350,000 to UTSA

Two well-known philanthropic groups from Texas made grants totaling $500,000 to enhance ongoing University of Texas-San Antonio (UTSA) research aimed at isolating the genes associated with memory formation. The research might have relevance in understanding catastrophic memory impairment caused by conditions such as Alzheimer’s disease.

The Ewing Halsell Foundation and the Rob and Helen C. Kleberg Foundation each gave $250,000 to support Professor Joe Martinez, Jr. and his research team in efforts to better understand the process of the brain stores and retrieves information at most basic levels. Martinez, director of life sciences at UTSA, holds the University’s endowed Ewing Halsell chair in biology.

Rey Feo Committee Presents $25,000 to ACCD

In Texas, Rey Feo Mike de la Garza and Johnny Gabriel, president of the LULAC (League of United Latin American Citizens) Rey Feo Scholarship Committee, Inc., and T. Sandoval, organization treasurer, presented $25,000 check to Alamo Community Coll...
Rancho Santiago Chancellor Receives Honors

In California, Dr. Eddie Hernández, Jr., Rancho Santiago CCD Chancellor, was recognized by two groups for his commitment to quality higher education. Hernández received the Education Service Award from Union Hispánica, one of Southern California's leading Spanish-language newspapers, and the Aaron/Elijah Lovejoy Award from the Black Chamber of Commerce of Orange County.

Both organizations praised Hernández for his educational and economic empowerment of ethnic minority students. He has been instrumental in pushing for a number of programs that offer help via counseling, tutoring, and transfer opportunities.

Latina Names Ruiz “Latina of the Year”

Latina magazine named historian Vicki Ruiz (pictured), chair of the Chicana and Chicano studies department at Arizona State University, “Latina of the Year” in the field of education for her contributions to Latina history. Ruiz was to be profiled this month in Latina along with celebrities and businesswomen in other fields.

Ruiz learned about her Mexican American heritage at the kitchen table, hearing tales of the past from her mother and grandmother. She heard about coal-mining struggles, labor activism, strikes, farm workers, and politics. Her writing centers on the women at the core of these stories—often unheralded Mexican American women of the 20th century who kept their families together through personal strength.

Ruiz will share the award with Virginia Sánchez Korrol, head of Brooklyn College’s (N.Y.) Puerto Rican and Latino studies department. Korrol and Ruiz are jointly producing a new reference work, Latinas in the United States: An Historical Encyclopedia, for which they received $150,000 from the Ford Foundation. It is slated for publication in 2003 by Indiana University Press.

Public Broadcasters Foresee Latino Voting Influence

This year’s U.S. presidential candidates have been putting more effort into reaching the nation’s estimated 31.3 million Latinos, a recent survey indicates that this effort is well warranted. A public broadcasters representative indicates that U.S. Hispanics strongly believe they have a stake in this year’s presidential election—and that more than 5.8 million Latinos are preparing to vote.

The Public Broadcasting Latino Poli Partnership between six national public television organizations, polled Latinos in the heavily Hispanic states of New York, Illinois, California, and Florida.

While most polls have excluded unregistered Latinos, this poll sought the views of all those who crossed into “We understand that the nation’s expanding Latino population is due largely to immigration and believe that those immigrating may eventually be active in the political process,” said Dr. Edward Rincón, president of Rincón & Associates, a market research firm specializing in ethnic consumers.

MDDC Staffer a HACUETS Policy Fellow

Magda Castañeda, assistant to the president of the Medical Center Campus of Miami Dade Community College (Fla.), was one of 99 young professionals nationwide chosen for the 2000 HACUETS (Hispanic Association of Colleges and Universities/Educational Testing Services) policy fellows program, created to develop and expand the pool of Hispanic leaders in higher education. Fellows will enhance their professional knowledge and leadership skills in the policy arena by learning to use data to support policy positions and network with peers and others involved in Hispanic education issues.

Castañeda has a master’s degree in Harvard.

Calvin Runs Minority Scholars Program for 10th Year

Since its inception in 1991, Ca College’s (Mich.) Entrada scholars program has been designed to

District (ACCD) Chancellor Robert W. Ramsey (r.) to renew the LULAC Roy Feo Parent-Child Scholarship program for a fourth year.

The donation will provide $1,000 scholarships to an ACCD college for 25 kids, all under the age of 6 and most of them children of single mothers. The scholarship funds will be placed in a trust for the children until they graduate from high school and attend an ACCD college. As part of the program, the children's mothers, many of them first-generation college-goers, will get help securing financial aid and other types of support to ensure their success in college.

Minnesota Mentoring Swings Student

When Illinois native Christine Schmidt, a Chicana, was deciding where to go to college, she was leaning toward attending an in-state university. But after learning about the university’s distinguished faculty mentor program at the University of Minnesota, she changed her mind.

“Jessica really helped me decide to come to the University of Minnesota,” said Schmidt, a junior majoring in Spanish. “It’s nice to have faculty who will be there to help and support you.” Schmidt (l.) was matched with American studies and history professor Elaine Tyler May (r.). The two meet regularly to talk about schoolwork and also spend time lunching and attending musicals.

Introduced in 1998, the faculty mentor program has served more than 800 students, many of whom have gone on to attend graduate and professional schools.
plore ethnic minority high school students for life after high school.

At the heart of Entrada is a three-week Calvin College summer school course, which Entrada students take with other Calvin students. Entrada students also live in the residence hall, eat in the dining hall, study in the library, shoot hoops in the gym, order late night pizzas, do a service project, get a heavy dose of computer skills—a typical college experience. Trained educators, serving as academic coaches, help the students.

Calvin's Rhae Ann Booker is the Entrada director.

**Grand Rapids Establishes Program in Mexico**

Students of Grand Rapids Community College in Michigan and citizens of St. Vicente de Paul in Merida, Mexico, set up a program in which college students will connect with people in poverty-stricken areas of Yucatan. Students will gain cultural experiences and engage with doctors treating AIDS patients from the entire state.

Twelve students of Spanish and two advisors travel to Mexico during spring break with the goal of practicing and improving their Spanish and earning college credit. The mission will provide a spark of hope to people who often do not receive medical treatment until it is too late, due to lack of funds.

**Loyola Awards Scholarships at Latino Art Competition**

Loyola University-Chicago (II.) was among several Chicago institutions that collectively provided more than $38,000 to winners of Latino Art Beat’s Third Annual Art Competition. The event was part of a festival with the theme “Hispanic Heritage and Culture and What It Means to Me.” Between 10,000-15,000 people attended the festivities, which received major TV coverage. The art contest winners included Xochitl Rivera, Nazareth Avila, Evelyn Sanford, Sam Espinosa, Marisela Rodriguez, Anthony Davila, and Jose Diaz.

Latino Art Beat is a not-for-profit organization that encourages the artistic talents of high school students. D. Rossi Nuccio, its president (pictured with Daniel O. Cisneros, vice president), said, “Latino Art Beat is delighted to have formed, in 1998, this scholarship partnership with Loyola, which obviously stands for service commitment to the community and supports cultural diversity among its students.”

**Tardeada Raises $5,000 for Pima Scholarships**

Co-hosted by Pima Community College in Arizona and the League of United Latin American Citizens (LULAC), the third annual Tardeada, or afternoon dance, raised $5,000 for the Hispanic Student Endowment Fund of the POC Foundation.

Cele Peterson and Armando de Leon were honorary chairs at the dance, which featured the music of Los Changuitos Feos and the Miguel Diaz Band.

The Hispanic Endowment Fund was created to promote bilingual skills of students who will use them for vocational, professional, or personal advancement. Pima offers more than 120 bilingual courses for students who elect this approach.

**North Florida Student Honored for Volunteer Efforts**

Ruth Lopez, who graduated from the University of North Florida (UNF) in the spring with a dual major in international studies and Spanish, knows that volunteering can be hard work.

In addition to directing the UNF Volunteer Center, Lopez developed the Alternative Spring Break Away program and volunteered at the Clara White Mission, the I.M. Sulzbacher Center for the Homeless, and the Second Harvest Food Bank.

For her efforts, Lopez received this year's Albert D. Ernest Jr. Caring Award. She was given a bronze sculpture created by nationally known sculptor Frank Eliscu, designer of the Heisman Trophy, and she also received a cash award for the charity of her choice.

"Ruth Lopez is genuinely committed to improving the lives of those around her," said Tom Robertson, assistant vice president for student affairs.

**CCNY Grad Earns Medical School Scholarship**

The City University of New York awarded Dominican immigrant Cristian Castro the prestigious Jonas E. Salk Scholarship for medical school.

Growing up in a remote village in the Dominican Republic, Castro experienced the consequence of not having a physician nearby when his father had a stroke and died on the way to the hospital.

Inspired to become a physician, Castro moved to New York, enrolled in City College of New York (CCNY), and maintained a high academic standing while working more than 40 hours a week. He was on the Dean's List five times at CCNY, was elected to the Golden Key National Honor Society, and received a Volunteer Service Award from the United Hospital Fund.

He graduated with honors in biochemistry and will attend the New York College of Osteopathic Medicine.

**Cal State L.A. Director Appointed to Commission on Aging**

Jorge J. Lambrinos, director of the Edward R. Roybal Institute for Applied Gerontology at CSU-Los Angeles, was one of nine appointed by Gov. Gray Davis to the California Commission on Aging.

A veteran of Operation Desert Storm and a lieutenant colonel in the U.S. Army Reserve, Lambrinos has been in the field of aging for more than 30 years in different capacities at the local, state, and federal levels. He has directed the Roybal Institute since 1993 and is active on many boards, including the Pasadena Senior Center, Leadership Council of L.A. County Aging Organizations, and the University of Southern California Alzheimer's Disease Research Center advisory board.
North Texas Center Hosts Education Conference

The University of North Texas (UNT) System Center at Dallas hosted the 4th Student Access to Higher Education conference, a result of a partnership between the Texas A&M University System, the Dallas County Community College District, and the UNT System. Gloria Bahamón (pictured), multicultural affairs administrator with UNT's office of equity and diversity, helped coordinate this year's event and moderated the discussions.

Both university systems and the district have been trying to increase rates of access, retention, and graduation of underserved populations. The initial mission of the conference—created by Daniel Hernández, Texas A&M associate vice chancellor of community development—has been to find solutions to the problem of low matriculation of students of color in higher education.

Governor Signs Florida International College of Law Bill

The option of a quality, affordable, legal education for South Floridians materialized when Florida Gov. Jeb Bush signed into law a bill establishing the College of Law at Florida International University (FIU).

FIU's new branch, which will open in 2003, will be housed at University Park in West Miami-Dade County.

"Finally there will be a viable way for South Floridians, including many minorities, to obtain a quality, affordable legal education without uprooting their lives," said FIU President Medesto A. Maidique.

The College of Law at FIU is the result of lobbying efforts by community and business leaders, many of them Black and Hispanic, who maintained that Florida needed public law schools at universities with high minority student enrollment—schools such as FIU and Florida A&M University.

NJ Mayor Obtains Funding for Dominican Health Clinic

Woodridge Mayor James E. McGreevey (pictured), a candidate for governor, obtained a commitment from the Dominican Republic government to provide two million pesos to finance the expansion of a health clinic in the township's sister city of Paraiso in the province of Barahona.

Paraiso, on the southwestern coast of the Dominican Republic, is a rural, impoverished community of 22,000. Only one in five residents has a steady source of income. Most live substantially below the poverty level.

While in the Dominican Republic, McGreevey met with the nation's president-elect, Hipólito Mejía; the senate president, Ramón Alburquerque; the House of Representatives General Assembly president, Dr. Rafael O. Alburquerque; and Frank J. Morales, director of the Dominican Institute at Seton Hall University (N.J.).

Westminster Offers Special Study-Travel Class

Westminster College in Pennsylvania is offering its students a new class, The Ecology and History of Latin America. It links a biology class and a history class into a cluster course taught by two faculty members. The tropical ecology portion is taught by Dr. Ann Throckmorton, associate professor of biology; and the history portion is taught by Dr. Eugene G. Sharkey, professor of history.

After a seven-week classroom experience, 24 students will travel for 20 days to Belize, Central America, to study the culture, natural history, ecology, and agriculture.

Phillips Petroleum Supports Oklahoma for 34th Year

Continuing its major 34-year commitment to the University of Oklahoma (OU), Phillips Petroleum Co. presented $25,000 to OU for scholarships, professional development, and other support, including $50,000 for the Phillips scholars program.

Begun in 1960 and underwritten by Phillips, the program serves talented Hispanic, Native American, and African American students who have demonstrated high academic achievement, community leadership, and involvement, and who are in areas of study in which Phillips Petroleum typically recruits.

Citrus Students Elect New Board

Citrus College (Calif.) students elected Associated Students of Citrus College (AS) executive board members for the fall 2000 semester: president, Aaron Valdez (pictured); vice president, Jesús Lozano; senators, Michelle Bart, Maria Ruiz, and Kudia Garza. ASCC officers represent the Citrus College student body on issues regarding academic standards, co-curricular activities, and campus life.

Valdez is an economics major who plans to transfer to UCLA; Lozano is an administration major who plans to transfer to CSU-B Fullerton; Ruiz is a behavioral science major who plans to transfer to UC Dominguez Hills; and Garza is studying psychology and communications and plans to transfer to San Diego State University.

Mt. Hood Student Government Honors

In Oregon, the Mt. Hood Community College (MHCC) Student Government named Gayle Parker (pictured) Outstanding Student of the Year, for the second consecutive year. Parker is the college's Hispanic programs coordinator and an advisor to the campus Latino club.

Mary Kowalsky, dean of the MH Westside Campus, was named Honorary Member of the student association.

Archbishop González Addresses Siena Graduates

Archbishop Roberto O. González was a guest speaker at Siena College's (N.Y.) 60th commencement, and received an honorary degree.

A member of the Siena Class of 1972, González has been described in the New York Times as "the kind of leader whom New York's Catholics would..."
spontaneously embrace. He is a listener, a man who seems to want not only to teach his people, but also to hear what they have to say."

The modest, fully bilingual friar was named auxiliary bishop of Boston, Mass., at age 38 and was later assigned to Corpus Christi, Texas. In March 1990, he was appointed archbishop of San Juan, Puerto Rico, and became a prominent voice against U.S. military activities in Vieques, which have caused the deaths of local civilians.

**Texas-Pan American Benefits from Hispanic Scholarship Fund**

The University of Texas-Pan American (UTPA) was awarded $245,000 by the South Texas Hispanic Scholarship Fund (HTSF)—the most funding provided by the program to any U.S. university and more than a third of the total allocated to the South Texas region. Awards ranging from $500 to $1,750 were distributed to 131 UTPA students.

Since 1975, UTPA students have received $500,000 from HTSF, said Krisan Reza, HTSF development officer. UTPA ranks 11th out of the top 25 colleges and universities nationwide in receiving funds and is fourth in Texas, behind Texas A&M, UT-Austin, and UT-El Paso.

The South Texas HTSF has nearly doubled its awards to UTPA every year since 1975-96, when 26 students were given $26,000.

**Cal State L.A. Students Develop Rehab Solutions**

California State University-Los Angeles engineering and technology first-year students from H.E.R.E. (Hands-on Experiences in Rehabilitation Engineering)—a two-year-old Cal State L.A. program that engages students in the MESA engineering program—developed hockey wheelchairs with improved bumper systems.

During a presentation of the students' projects, participants in the wheelchair sports program at the Rancho Los Amigos National Rehabilitation Center (pictured) worked as a teacher in inner-city Chicago and volunteered with the Peace Corps, helping Latinas young and old.

**CSU-Hayward Grad Awarded Spain Fellowship**

Recent CSU-Hayward graduate Luis Ojeda was given a Fulbright Fellowship for nine months of graduate work in Spain, where he will study the impact of the new European currency, the Euro, on the national banking system. Nationwide, about 1,000 fellowships are awarded annually to students and faculty.

Ojeda earned bachelor's degrees from CSU-Hayward in three subjects—economics, history, and international studies. He captained a championship California Pacifi League men's varsity soccer team, was on the board of directors of the Associated Student and the Family Support Services of the Area, chaired the University union board, was a student mentor, and more.

Ojeda's goal is to work at a management consultant firm, preferably with international projects.

**Manuel Gamio Endowment at Texas-Arlington**

A $25,000 endowment for Mexican American and Latino studies was established at the University of Texas-Arlington (UTA). The Manuel Gamio Endowment is named in honor of Dr. Manuel Gamio, a Mexican anthropologist who studied Mexican migration to and from the United States in the 1920s and 1930s. His publications, in English and Spanish, were influential in both countries. Gamio also advised the Mexican government on immigration policy during the 1940s.

The endowment is funded in part by $12,000 gift from six law firms and a matching gift of $13,000 from UTA. Manuel Garcia Griego (pictured), director of UTAs Center for Mexican American Studies, said the Center will use part of the funds to support one $50 scholarship each year for the next three years for a UTA student engaged in a program...
study that includes Mexican American or Latino studies. García y Griego is a recognized scholar on Mexican immigration and has testified as an expert witness in immigration-related legal cases.

Girón Excels at Cal State L.A.

With a 4.0 GPA, Glenda Girón finished ahead of all 89 students in this year's CSU-Los Angeles child and family studies department graduating class.

Girón attributes much of her knowledge and skills, specifically in teaching, to Cal State L.A. Professors Kaveri Subrahmanyan, Rico Gnudioli, and Jennifer Terris. Ferris provided a compelling portrait of the National Honors Society Golden Key and Phi Kappa Phi member: "It hasn't been an easy road for Glenda. She didn't speak any English when she moved here from Guatemala in 1992. She took night classes to learn English at the same time she was working with her mother sewing clothes. Yet, she received her high school diploma in less than six months. Glenda has achieved extraordinary distinction."

Girón plans to continue her studies at Cal State L.A., pursuing a multiple-subject teaching credential and a master's degree in educational foundation and interdisciplinary studies.

Hillsborough Community President Named to Minority Commission

Gwendolyn W. Stephenson, president of Hillsborough Community College (HCC) in Florida, was appointed to a three-year term on the American Association of Community College's (AACC) commission on minority resources, which will advise the AACC staff and board on public policy issues, professional development, and program initiatives regarding greater access to higher education for minorities.

Stephenson has been president of HCC—a comprehensive, two-year college—since 1997.

Cuellar Speaks at Texas-Pan American

State Rep. Henry Cuellar addressed higher education funding, the Texas Grant Scholarship Program, and other items during a visit to the University of Texas (UT)-Pan American.

According to Cuellar, three factors are influencing the growth of South Texas and the entire state: demographics, technology, and diversification. The Hispanic population continues to grow, technology is rapidly changing, and the economy is moving from agricultural to service-oriented. To handle this transition, Cuellar said, universities like UT-Pan American must partner with local school districts to give children every opportunity to learn and be productive.

Both UT-Pan American and Cuellar hope to see the university develop into a Tier II doctoral-research institution within The University of Texas System.

Texas Wesleyan and Mexican Students Collaborate

Students and faculty from Texas Wesleyan University and the Instituto Tecnológico de Estudios Superiores de Monterrey in Saltillo, Mexico, collectively acted as consultants for companies interested in importing from or exporting products to the Dallas/Fort Worth metroplex. The project was part of the International Business Practicum, a two-course series taught at Wesleyan for students planning to enter the international business field.

Students worked with two companies, Coronado's Fashion Tailoring and MCA Events, investigating the feasibility and costs of bringing clothing and jewelry in from Mexico for the two Coronado family-owned businesses.

Pico Addresses Grossmont Graduates

When Chairman Anthony R. Pico—today an acclaimed leader of Native Americans—came to Grossmont College (Calif.) in 1965, he brought with him the values of the Kumeyaay Indians, a culture that cherishes learning, he told Grossmont graduates at commencement.

His experience at Grossmont reflects that of many who choose to attend the community college. Demands of his professors helped build confidence, he said, and showed him how he could accomplish his goals through focused efforts. "Today, I look at a learning starving person approaching a buffet filled with foods of all kind. I know th hungry as I am. I will never be able to dining at the table of knowledge," said Pi

Pico has spent the past 18 years as Band Chairman improving the lives of his people.

Texas Minority Students Improve

Minority students in Texascc to close the gap with Anglo students, but minorities have made marked improvement, according to a released by The Educational Excellence Project. Pass rates for Latinos, it says, we from 46.1 percent in 1995 to 61.9 percent in 1999. African American pass rates increased from 33.6 percent in 1995 to 64.0 percent in 1999 and Anglo pass rates were 74.8 percent in 1999.

The Texas Educational Excellence Project program of the George Bush Schm Public Service and the department of political science at Texas A&M University, focuses on the quality and equity education in Texas. TEEP makes recommendations based on data, but districts/schools decide whether they will implement change.

Cortés Joins San Francisco Institute

Michael E. Cortés is the new director of University of San Francisco's (USF) Nonprofit Organization Management, in CA. Cortés has more than 20 years experience in research and the study of public policy, organization theory, and nonprofit organizations, and is an expert on the Latino nonprofit sector in the United States. Before joining USF, he was an assistant research professor at the University of Colorado-Denver's Graduate School of Public Affairs.
Cortés has written many articles and book chapters on public policy, “nonprofits,” and philanthropy in the Latino community. He has a bachelor’s degree, master’s, and doctorate from the University of California-Berkeley and also a master’s from the University of Michigan-Ann Arbor.

**PUBLICATIONS**

**Real Life in Castro's Cuba**  
By Catherine Moses

Catherine Moses lived and worked in Cuba in press and cultural affairs at the United States Interest Section from 1995 to 1996. This book documents her experiences and perceptions of Cuba during her two years there.

**Language Policy and Identity Politics in the United States**  
By Ronald Schmidt, Sr.

What language should U.S. citizens speak? Should bilingual education be offered in public schools? Do non-English-speaking U.S. citizens deserve equal rights? These and other heated questions are the subject of this book, a compelling study of the politics, policies, and problems associated with this important debate.

**Michoacán and Eden: Vasco de Quiroga and the Evangelization of Western Mexico**  
By Bernardino Verástique

Don Vasco de Quiroga was the first bishop of Michoacán in Western Mexico. Driven by his profound respect for Spanish jurisprudence and the desire to convert the native Purépecha-Chichimec peoples to a purified form of Christianity, he sought to establish New World Edens in Michoacán by congregating the people into pueblo-hospitals (newly formed Amerindian communities), where clerics could more easily teach them the fundamental beliefs of Christianity and the values of Spanish culture.

**Barrio-Logos: Space and Place in Urban Chicano Literature and Culture**  
By Raúl Homero Villa

Struggles over space and resistance to geographic displacement gave rise to much of Chicano history and culture. In this book, Raúl Villa explores how California Chicano/a writers, journalists, artists, activists, and musicians have used expressive culture to oppose the community-destroying forces of urban renewal programs and massive freeway development and to create and defend a sense of Chicano place-identity.

**Advancing Foreign Language Education at Community Colleges**  
Diane U. Eisenberg, Nadya Labib, and James R. Mahoney, eds.

This booklet presents case histories of 21 colleges that participated in the second year of the American Association of Community Colleges' Improving Foreign Language Education at Community Colleges project. The case histories demonstrate model approaches to strengthening and enhancing foreign language education.

**The Politics of Antipolitics: The Military in Latin America**  
By Brian Loveman and Thomas M. Davies, Jr., eds.

Latin America is moving toward democracy. The region's countries hold elections, choose leaders, and form new governments. But is the civilian government firmly in power? Or is the military still influencing policy and holding the elected politicians in check under the guise of guarding against corruption, instability, economic uncertainty, and other "excesses" of democracy?

Revised and updated.

**A Place Called Milagro de la Paz**  
By Manlio Argüeta

This book tells the story of the courage and strength of a single mother and her daughters, who persevere in the face of loss. Filled with magical, lyrical moments of love and compassion, strangely illuminated by the figure of a young girl with butterflies in her hair who suddenly appears and adopts the family, this tale exemplifies magical realism.

**The Blood of Guatemala: A History of Race and Nation**  
By Greg Grandin

In Guatemala, a vibrant pan-Mayan movement has emerged, one that is challenging Ladino (non-indigenous) notions of citizen-
Everyday Life and Politics in Nineteenth Century Mexico: Men, Women, and War
By Mark Wasserman

Mark Wasserman shows the links between ordinary Mexican men and women and the events that shaped their lives and that of their country, from Independence to the Revolution. Combining lively explanations of social history, political and economic change, and gender relations, Wasserman offers an original history of Mexico’s 19th century.

Latina Self-Portraits: Interviews with Contemporary Women Writers
Bridget Kevane and Juanita Heredia, eds.

Latina literature is one of the fastest growing and most exciting fields in fiction. Comprising Chicana, Cuban, Dominican, and Puerto Rican writers and writers descended from a combined U.S. and Latin American heritage, this literature is characterized by revisionist views of recent history, stories about exile and borders, a blending of genres, and a complex understanding of the term “feminist.”

Anxious Intellectuals: Academic Professionals, Public Intellectuals, and Enlightenment Values
By John Michael

John Michael discusses how critics from the right and the left have perceived the intellectual’s role in a pluralized society, weighing intellectual authority against public democracy, universal against particularistic standards, and criticism against the respect of popular movements. Michael asserts that the Enlightenment-born issues are the very grounds from which real intellectual work must proceed.

Impressions of Cuba in the Nineteenth Century: The Travel Diary of Joseph J. Dimock
Louis A. Pérez, ed.

This book describes the social, economic, and political conditions in the 1850s. Dimock’s entries of his travels and his observations as an American reveal details of Cuban agriculture, plant life, and natural resources. The diary gives elaborate accounts of the sugar industry as well as an extensive commentary on the daily life of slaves, Spaniards and Cubans.

Architectural Heritage of the Caribbean: An A-Z of Historic Buildings
By Andrew Gravette

Better known for its sand and sea, the Caribbean is also home to a wealth of historic buildings. As a region colonized by Spanish, French, British, and Dutch settlers, its architecture reflects a unparalleled variety of colonial influence. Featuring more than 1,000 architectural sites across the region, this comprehensive guide describes churches, plantation houses, forts, and ordinary homes.

Many publications featured in this section are available through amazon.com.
CONFERENCES

"The Assessment Institute"
September 28-30 - Santa Clara, Calif.
November 9-11 - Philadelphia, Pa.

Sponsored by the National Center on Postsecondary Teaching Learning, and Assessment and by ACT.

Contact: (814) 865-5917; e-mail: nctla@psu.edu; website: www.ed.psu.edu/csbe/nctla.htm.

18th Annual U.S. Hispanic Leadership Conference
September 28-October 1

The USHLI has as its conference theme this year: "Latinos in the New Millennium: Building on the Past to Provide Promise for the Future." At the Hyatt Regency, McCormick Place, Chicago.

Contact: (312) 427-8083; website: www.ushl.com.

Hispanic Women’s Corporation 15th Annual Conference
October 5-6

The 15th Annual Hispanic Women’s Conference, presented by the Hispanic Women’s Corporation, at the Phoenix Civic Plaza in Phoenix, Ariz.

Contact: (602) 388-9995; e-mail: hwc@inetmail.att.net.

Two-Year College English Association
October 5-7

"Diverse Teaching, Diverse Students, Diverse Ways of Thinking" is the theme for this year’s regional conference of the TYCEA of the National Council of Teachers of English In Detroit.

Contact: Ella Davis or Mary Mahoney. (313) 922-3311.

Latin American and Caribbean Studies Symposium
October 6-7

St. John’s University’s Committee on Latin American and Caribbean Studies (CLACS) will hold an international symposium, "Immigrants from Latin America and the Caribbean: Coping in New York City," to "evaluate the social, educational, legal, economic, political, and psychological adaptation of immigrants from Latin America and the Caribbean to the New York City area." At St. John’s University.

Contact: (718) 990-1932; e-mail: CLACS@stjohns.edu.

Management Institute for Women in Higher Education Administration
October 12-14
November 17-18

Contact: Susan Knowles, (781) 283-2529; e-mail: sknowles@wellesley.edu.

New Mexico Counseling Association Annual Conference
October 23-25

"Counseling 2000: Honoring Diversity, Working Together." At Old Town Sheraton Inn, Albuquerque, N.M.

Contact: Diane Wilhoite, (505) 771-5384.

Forum 2000 & NACME Career Fair
October 25-28

"Affirming Diversity: Real Commitment, Real Results." Among the confirmed speakers are Dr. Ana Margarita “Cha” Guzmán, White House Commission on Educational Excellence for Hispanic Americans, and Dr. Elsa Macias, senior research associate, Tomás Rivera Policy Institute, at the Westin Hotel, Long Beach, Calif.

Contact: NACME, (212) 279-2626; website: www.nacme.org/events.

AAC&U’s 3rd Biannual Diversity and Learning Conference
October 20-29

"Diversity and Learning: Identity, Commitment, Intellectual Development" is designed for working teams of faculty and administrators and for individuals interested in improving classroom teaching, changing their curricula, fo ding systemic change in their institutions, investing more in local and global commun. At the Westin William Penn Hotel in Pittsburgh.

Contact: (202) 387-3760; e-mail: mail@aacu.nw.edu; website: www.aacu.org/meetings/divlearn.html.

The College Board Centennial Forum
October 28-November 1

Networking and professional development opportunities, sessions on cutting-edge fi specific research and development, key addresses by world-renowned speakers. At Marriott Marquis Hotel, New York City.

Contact: (212) 713-8050; website: www.collegeboard.com.

HACU 14th Annual Conference
November 4-7

This year’s theme: “Championing Hispanic Success in Higher Education." At the Albuquerque Convention Center, Albuquerque, N.M.

Contact: website: www.hacu.org

Research Centers in Minority Institutions International Symposium
November 12-15

International symposium on health disparities. In San Juan, Puerto Rico.

Contact: Beatrice Raiford or Walter Sulli (464) 752-1634; e-mail: raiford@msn.com; website: www.rcmi.3000.upr.edu.

AAHE Conference on Faculty Roll & Rewards
February 1-4, 2001

This year’s event is dedicated to the changing professoriate and the two developments most salient in driving change—new technologies and the gene tal shift now taking place in the faculty. At the Tampa Marriott Waterside in Tampa, F.

Book Review

By Eduardo Mendieta

This is an incredibly erudite book. Once you pick it up, you will be hooked, and what a high awaits you! Limón knows how to weave a story with suspense and rewarding denouements, and how to translate obtuse theoretical constructs into illuminating insights about social reality. He writes out of profound respect for the plight of Mexican Americans, but does so with critical tenderness, even a tinge of fatherly admonition.

Limón begins in the early 19th century, when Texas declared its independence, the U.S. waged war on Mexico, and the Guadalupe Hidalgo Treaty of 1848 was signed, sealing the fate of Mexico and inaugurating the creation of what Limón calls greater Mexico. The book ends in 1995, with the shooting of Selena, and an analysis of Cormac McCarthy’s All the Pretty Horses. And in between, judicious and clear analyses of the writing of Katherine Anne Porter, Samuel Ramos, Octavio Paz, and deconstructions of movies like Stanley Kramer’s High Noon, John Sayles’ Lone Star, and Gregory Nava’s Selena. We also get analyses of the lyrics of many corridos and cowboy ballads. Even a sputter of bardic politics when Limón discusses the fall of Henry Cisneros in tandem and contrapunto with the rise and fall of Ann Richards and the fiction of Sandra Cisneros. We are treated to brief but informative discussions of the work of Marcuse, Fromm, Giddens, Orner, Appadurai, and others.

This is truly cultural studies at its best: irreverence, eclecticism, critical finesse, Caudian constructions (which here means creative exuberance and seductive pastiche and hybridity), social reality is not here grist for some theoretical machine. The roles are reversed. Theory makes sense because reality is much more complicated, more evocative, and more convoluted. Theory pales in comparison to the richness of people’s experience, and this is why this book is so erudite. Limón has reached out and grabbed what will help him make sense of the incredible over-determined culture and life of Mexican Americans on the borderlands of greater Mexico.

What holds together such a rich book? Why will you say “Yah!” and not “What was that about?” when you finish reading it? This book is about the erotics of culture, about how culture is lived, how culture circulates through our bodies. The sexual and seductive body is the conduit of culture, just as it is its detritus. This is why culture is suffused with desire. Culture is the birth of desire: the blush on the fair skin of sexual warning, what Limón has done superbly is to illustrate and demonstrate how the erotics of culture has informed the encounter between the U.S. and greater Mexico. He shows how the Anglo-American has sexually marked Mexican corporeality, and how such a branding has turned the Mexican body into a locus of sedition and abjection, desire and abhorrence, concupiscence and self-flagellation. Mexican corporeality in turn, has not suffered patiently the imperial and lascivious gaze. This body has contested it, deflected it, even looked back, in defiance, without shame, even with pride an arrogance. And this is why Selena is the heroine of this book, the heart-throb of many carnal, and a diva to many hermanas.

Limón writes, “At a moment of absolute perceived political failure within this community... Selena offered hope and presence. She combined sheer musical and dancing talent, energized by a sexuality that served to ameliorate repression. She joined these to smile of sheer innocence and a background of well-known and quite real organic ties to family and community.”

But it is precisely at this point where my encomium must give way to critique. Erotics of culture is but a benign name for the erotics of power. Power is wielded not just by quarantining the poor and delinquent, but also through regimentation of the body. Power deployed and relayed through the domesticated body. The contestation of such power therefore also takes the forms of counter-hegemonic and seductive erotics: the flaunting of curvaceous body parts, piercing, shavin scarring, and so on. But to what extent is such an erotics “bread and circuses” masking powerlessness, real and suffered. To tar bien quiero... (fill in the blank), but I also want more of our kids going to college, running for mayor or governor, getting the high-paying jobs, going on to become CEOs, earning Ph.D.s so that they can assign José Limón’s books in classes about “American Culture.” Is it queer, este deseo, different from what Limón wants? No, for what enamored him to Selena is precisely the failure of our political culture. So I think Limón would agree that the project of a Mexican American erotics of culture is the obverse side of a culture of political a culture of civic engagement, democratic creativity, constitutional faithfulness. The body politic desires, but only in and through active and committed citizens.

Eduardo Mendieta is assistant professor of philosophy at the University of San Francisco and a devotee of both Selena and Jennifer Lopez.

NCORE 2001

14th Annual National Conference on Race & Ethnicity in American Higher Education
May 30 through June 3, 2001
Seattle, Washington

The Leading and Most Comprehensive National Forum on Issues of Race and Ethnicity in American Higher Education

- Assisting higher education institutions to:
  - Create inclusive higher education environments,
  - Improve campus racial and ethnic relations, and
  - Expand opportunities for educational access and success by culturally diverse, traditionally underrepresented populations.

- Facilitating the exchange of important insights, points of view, skills, tools, and/or strategies.
- Stressing practical application and highlighting exemplary programs, approaches, and models.
- Attended annually by more than 1,000 administrators, faculty, professional staff, and student leaders representing higher education institutions in virtually every state.

For Detailed Conference Information Contact:
SOUTHWEST CENTER FOR HUMAN RELATIONS STUDIES
College of Continuing Education, The University of Oklahoma
Phone (405) 292-4172 / FAX (405) 292-4177

Qualified applicants will be reviewed without regard to race, color, age, sex or national origin.

Taubman College of Architecture + Urban Planning
University of Michigan

CHAIR OF ARCHITECTURE
The Chair is responsible for providing leadership, representation, program to the University, professional, and public
and coordinating instruction; advising research and scholarship
in the field; recruiting faculty and students; defining new
program initiatives in consultation with faculty, managing the
program budget; and teaching courses in architecture.
Tenure will be a tenure faculty member with a 12-month
administrative appointment. Chairs are appointed for three
years terms with opportunities for renewal.
Candidates must have a distinguished record of research, scholarship, creative achievement, as well as an interest in the integration
of professional and theoretical issues in architecture

TENURED or TENURE-TRACK FACULTY
The Architecture Program is seeking to appoint one or two
tenured or tenure-track faculty in design and one or two in Structures.
Applicants should have a professional degree (B. Arch.
M.Arch., or its equivalent) and experience in practice or a
record of research and scholarship. The ability to contribute
to doctoral studies is also desirable.

PROFESSOR OF PRACTICE
The Architecture Program is seeking to appoint one or two
part-time or full-time Professors of Practice, at a rank
equivalent to Assistant, Associate or Full Professor to teach
design studio and related courses. Appointments are for two
to five year, renewable terms. Applicants should have
exceptional professional qualifications, with evidence of an
exemplary practice commensurate with rank.

FELLOWSHIPS
The Architecture Program also offers three one-year teaching
fellowships: the William Mushenheim Fellowship for
individuals wishing to begin an academic career; the Walter B.
Sanders Fellowship for experienced practitioners, and the
Willard A. Oberdick Fellowship for individuals interested in
building science and design. Fellowships are expected to
support one academic year in residence.

IOWA STATE UNIVERSITY
Where you can become your best.

Associate Director of Governmental Relations
Iowa State University invites applications and nominations for the position of associate director of
governmental relations which reports to the director of governmental relations. This position will
be based in Washington, D.C.

Iowa State University is a comprehensive, land-grant university located in Ames, a community of 50,000
people known for its exceptional quality of life. Iowa State has 26,000 students, 1,500 faculty members,
and an annual budget of approximately $850 million. The university offers undergraduate, graduate, and
professional degrees through nine colleges. Iowa State is a Carnegie Foundation Research 1 university
and one of only 45 public members of the Association of American Universities. Iowa State is nationally
ranked for its financial support from alumni and friends and just completed a very successful $458
million capital campaign. For more information about Iowa State, visit www.iastate.edu.

The successful candidate will represent the Board of Regents, State of Iowa, and Iowa State University as
a legislative liaison to the Iowa congressional delegation and various federal agencies; communicate
information concerning the mission, programs, strengths, needs, and goals of Iowa State University to
targeted audiences; and represent the Board of Regents, closely monitor legislative activity and
inform members of the university community about matters of legislative concern, work with college administrators in planning presentations of their legislation requests, work closely with the assistant director of federal relations to coordinate areas of federal
funding; and execute other special assignments as delegated by the director.

The successful applicant will have excellent communication skills, a bachelor's degree and two years'
experience that provides extensive knowledge of federal and state legislative and policy formulation
and processes. An advanced degree and direct lobbying experience on the federal level for a public sector
client is preferred. Salary will be commensurate with education and experience.

Applications will be accepted until the position is filled. The search committee will
begin its review on October 1, 2000. Send letter of application, resume, and names, addresses, and
telephone numbers of three references to Ronald Maning, Chair, Associate Director of Governmental
Relations Search Committee, Office of the President, Iowa State University, 117 Beardshear Hall, Ames,
Iowa 50011-2055.

Iowa State University is an equal opportunity/affirmative action employer and encourages nominations of and
applications from women and minority candidates.

URBAN AND REGIONAL PLANNING PROGRAM
The Urban and Regional Planning Program intends to appoint
a faculty member at any rank for fall 2001. We seek expertise in
graphic information systems (GIS). Applicants should be
qualified to teach an introductory course in GIS and an
intermediate course in GIS and spatial analysis. Applicants
should have strength in another subject area in urban planning
as well; we offer specialization in transportation planning,
land use, and other fields, and are open to
a PhD in planning or a related field is highly
welcomed. Applicants should have interest in educating both
Master's and PhD. Students. Faculty at the University of
Michigan are expected to be widely recognized for their
scholarly and creative work. Our program expects to make
several faculty appointments over the next few years.

Applicants should send a letter explaining their interest in
the position, a current vitae, and names of three
test references. Chair applicants should include a statement
outlining their view of architectural education. Preference
for this position is given to individuals with a
portfolio of their professional work. Fellowship applicants should include a
portfolio and research proposal. Review of applications will
begin November 1, 2000 with interviews planned for
January through March 2001.

Send materials and address inquiries to :

University of Nebraska at Omaha

DEAN OF LIBRARY SERVICES

The University of Nebraska at Omaha, a comprehensive metropolitan university, invites applications and nominations for the position of Dean of Library Services. The Dean of Library Services reports to the Vice Chancellor for Academic Affairs and serves on the Chancellor’s Council and the Deans Forum. The University Library has a staff of 15 faculty, 38 staff, and 50 student assistants. The Learning Commons, a new facility, has been opened and is expected to be completed by the fall of 2000. The library has a strong commitment to achieving diversity within faculty and staff. We are particularly interested in receiving applications from members of under-represented groups. The University Library has an operating budget of $4 million of which $1.8 million is allocated for acquisitions. Its collections number over 800,000 volumes, and include extensive government documents and microform collections. There are more than 3,000 current periodical subscriptions and a diverse array of electronic databases. Additional information can be found on the library’s web site: http://library.unomaha.edu and at http://www.unomaha.edu/au/faculty.html.

Review of applications will begin November 3, 2000, and continue until the position is filled. Applications should be a letter of application, curriculum vitae, and names, addresses, telephone numbers and e-mail addresses of at least three professional references. Applications, nominations, and all other correspondence should be sent to:

Dean John Flocken

PRINCETON UNIVERSITY

Woodrow Wilson School of Public and International Affairs

Master’s Degree in Public Policy: A One-Year Program For Midcareer Professionals

The Woodrow Wilson School of Public and International Affairs at Princeton University offers a Master’s Degree in Public Policy (M.P.P.), providing rising leaders in the international and domestic policy worlds an opportunity to expand their organizational skills and intellectual breadth to compete in an increasingly complex global environment.

Qualifications. Applicants must possess a minimum of 7 years of professional experience in domestic or international government agencies, and/or experience in the nonprofit sector. Successful candidates must demonstrate creativity, leadership skills, a commitment to public service, and the intellectual capacity to thrive in a demanding academic setting.

Financial Assistance. The School’s generous policy meets the full demonstrated needs of all admitted students. More than three-quarters of graduate students at the School receive financial aid, which for most includes full tuition and a stipend for living expenses.

To Apply. For an application and further information, contact:

Woodrow Wilson School of Public and International Affairs
Master’s Degree in Public Policy
Princeton University
Princeton, NJ 08544-1013
Telephone: 609-258-4836
E-mail: MPP9@princeton.edu
Website: http://www.wws.princeton.edu/degree/mpp.html

Applications must be received by January 3, 2001.

The Woodrow Wilson School also offers a two-year Master’s degree in Public Affairs (M.P.A.) and a Ph.D. degree program.
DEAN OF ST. JOHN'S COLLEGE

St. John's University, Jamaica, New York, invites nominations and applications for the position of Dean of St. John's College of Liberal Arts and Sciences. St. John's University is Catholic, Vincentian, and metropolitan. As a university, St. John's is committed to academic excellence and the pursuit of wisdom which flows from the inquiry, religious values, and human experience. Founded in 1870 to provide the youth of New York City with an intellectual and moral education, St. John's is inspired by compassion and a zeal for service. Distinguished by its strong core liberal arts curriculum, scholarly research and academic excellence, St. John's is one of the nation's largest Catholic universities with a culturally, religiously, and ethically diverse student body of more than 18,000 men and women. Comprised of seven schools with campuses in Queens and Staten Island and a Graduate Center in Rome, Italy, the University benefits from the cultural diversity and the intellectual and artistic resources offered by metropolitan New York.

The Dean serves as the academic leader and strategic planner for St. John's College. Reporting to the Provost, the Dean is responsible for graduate and undergraduate programs, implementing an enhanced core curriculum, recruiting new faculty, working with faculty to develop a balance between teaching, research and service, and administrating a sizable staff located on two campuses. In addition, the Dean will provide strong leadership to implement programs designed to increase enrollment and retention within the College, to establish and nurture improved inter-college relationships within the University, and to foster an academic culture rich in scholarly research and innovative teaching methodologies by motivating and energizing the faculty.

The successful candidate must have an earned doctorate in one of the disciplines in the College, and a distinguished record of academic achievement commensurate with a tenured professor. He or she must have a proven track record as an executive level administrator with exceptional experience in the areas of budgeting and planning, as well as outstanding communication skills. In addition, he or she must be a consensus builder with demonstrated commitment to team-based management. The Dean must embrace the values of Catholic higher education. Experience in a college or university environment is desirable.

Review of credentials will begin immediately and continue until the position is filled. Please submit nominations and expressions of interest, in confidence, to:

St. John's University
Dean of St. John's College Search
100 South 40th Street
Norristown, PA 19401

Inquiries should be directed to the University's search consultants, Nancy A. Martin or Jane E. Grayson at 610-222-3000 or via email at sjobenard@stjohns.edu. For additional information about the University please visit our website at http://www.stjohns.edu

St. John's University is an Affirmative Action, Equal Opportunity Employer. Women and minorities are encouraged to apply.

Prevost and Vice President for Academic Affairs
THE UNIVERSITY OF TEXAS AT TYLER

The University of Texas at Tyler invites nominations and applications for the position of Provost and Vice President for Academic Affairs. The University seeks a dynamic and creative leader from a chief academic officer as it develops new academic programs and expands others to pursue growth and its vision of excellence in the new millennium.

THE UNIVERSITY
U.T. Tyler offers both graduate and undergraduate degrees and is located in the beautiful East Texas lake country on the 1-20 corridor, 90 miles east of Dallas. The University serves a region with a population of close to one million by offering academic programs in its undergraduate and graduate areas. The University contributes significantly to the economic growth and cultural enrichment of the region.

RESPONSIBILITIES
Reporting to the President, the Provost and Vice President for Academic Affairs has broad responsibility for the development, administration, growth, and quality of all academic programs including leadership in academic planning and resource allocation, the administration of academic budgets, academic policy development and implementation, and all matters directly affecting the faculty. He/she encourages, supervises, and evaluates the deans of the six colleges, and directors of all academic divisions. The six colleges are Business Administration, Education and Psychology, Engineering, Liberal Arts, Nursing, and Science and Mathematics. Also reporting to the Provost are the Library, Academic Computing Center, Graduate Studies, Audio-Visual and Interactive Television, Institutional and Sponsored Research, and the Longview and Palestine campuses.

QUALIFICATIONS
Qualifications include academic and professional accomplishment at the dean or director level sufficient to command the broad respect of the academic and local community and to provide educational leadership for U.T. Tyler and its extension programs. Substantial experience in the areas of budgeting, financial planning and policy development and a record of progressively responsible administrative experience in higher education is preferred. Experience with university distance education programs and the attendant technology is also preferred. The successful candidate must demonstrate strong interpersonal and communication skills and a demonstrated commitment to the goals and principles of equal opportunity and educational diversity is essential. Doctoral degree required.

APPOINTMENT AND APPLICATION INFORMATION
This position has a starting date of June 1, 2001, or a date as soon thereafter as practical. Salary is competitive and commensurate with qualifications and experience. Review of candidates will begin on September 20, 2000. The University will accept and review applications and nominations received after this initial deadline until the position is filled. Qualified candidates should forward a letter of interest that contains a brief statement of educational philosophy, and includes a resume and the names, addresses, and telephone number of at least four references to the following:

Dr. Linda Klotz, Chair
VPAA Screening Committee
Office of the President
The University of Texas at Tyler
3900 University Blvd.
Tyler, TX 75701-6699
e-mail: klotz@mail.uttyler.edu
website: http://www.uttyler.edu

The University of Texas at Tyler is an EEO/AA Employer
Women and Minorities are Strongly Encouraged to Apply

DIRECTOR
Center for Teaching and Learning

Research will involve a wide range of factors related to teaching, including student development and background, educational and social resources, teacher preparation and professional development. Also included are licensing and certification systems, state policies and requirements, including standards for students and teachers; technology implementation, and the role of assessment in instruction and accountability system. Qualifications for the Center Director include a Ph.D. in psychology, education, or economics, a strong record of original research in educational evaluation or policy, and management experience in an academic and/or research setting. The Director should have a deep understanding of policy issues related to teaching, teacher education reform and/ or assessment policy, and have a proven track record in data research funding, a strong publication record, and an appreciation for both quantitative and qualitative approaches to addressing relevant problems. Candidates should have excellent writing skills and be able to represent the Center and its Research Division with distinction. The position offers a significant national presence in the educational policy arena. ETS provides outstanding benefits, competitive salary, generous relocation, and flexible working arrangements. Please send a letter of interest and a curriculum vitae to Mike Smith, 321-O, Rosedale Rd., Princeton, NJ 08540, or fax to 609-497-6222 or e-mail msmith@ets.org. ETS is an equal opportunity affirmative action employer. M/F/V.

UNIVERSITY OF CALIFORNIA, DA
Environmental Engineerir
Faculty Position Available

The Department of Civil and Environmental Engineering at UC Davis is seeking applicants and nominations for a tenured-track position in environmental engineering specializing in biogas, systems, and treatment. The position is open at Assistant Professor level. Requirements include a doctorate in engineering demonstrated record of success in, or evidence of outstanding potential for, both in teaching and building a vigorous, independent research program. The successful candidate will have a strong background and interest in water and wastewater quality and related problems in the biological sciences and process design.

Areas of interest include, but are not limited to: microbial ecology, anaerobic molecular tools, public health, and non-point source pollution. Experience with wastewater treatment plants and training in computational methods is desirable. The candidate will join a departmental effort in teaching undergraduate and graduate courses in wastewater and water treatment as well as biological systems.

To be a candidate at Assistant Professor level, applicants must submit by October 20.

Applicants should submit a completed application, including a statement of teaching and research interests, two letters of recommendation, and a curriculum vitae and publication list, a non-refundable application fee, and a complete transcript to:

Jeanne L. Darby, Professor
Department of Civil and Environmental Engineering
University of California
One Shields Avenue
Davis, CA 95616-4929

Electronic mail inquiries may be addressed to jdarby@ucdavis.edu.
Information about the department can be found at http://ece.ucdavis.edu.

UC Davis and the Departments of Civil and Environmental Engineering are committed to diversity and equal opportunity in employment and education at all levels. They are committed to provide a learning and working environment free of discrimination and harassment for all employees and students. The University encourages applications from members of underrepresented groups.
RICE
DEPARTMENT OF ART & ART HISTORY

Rice University is seeking applications for a tenure- track position, assistant professor rank, in the history of modern and contemporary American art, to begin August 2001. Field of research is open. It is desirable that the candidate is also qualified to teach theory and criticism and one or more of the following areas: the history and criticism of museums, architecture, film, photography, or animated cinema. Opportunities for collaboration with other disciplines and local museums. Teaching is to include studio surveys, specialized courses, theory and criticism, and perhaps participation in a general survey of American art. Ph.D., some teaching experience, and publications preferred. Application deadline is January 5, 2001.

Send letter of application, curriculum vitae, examples of scholarly publications, and at least three letters of recommendation to Professor William Camfield, Chair, Search Committee, Department of Art & Art History, MS-21, P.O. Box 1892, Rice University, Houston, Texas 77251.

Rice University is an Equal Opportunity Employer non-discriminates in education and employment.

CARLETON COLLEGE
Tenure-Track Positions Open for Fall 2001

Art and Art History
Photography and Digital Processing: We seek a person to teach intro and advanced BW photo and color photo, digital photography and digital imaging. Possibility of advanced seminars in Studio Art. MFA with teaching experience required. Send letter of application, c.v., 20 slides of own work, 10-20 slides of student work, list of references and SASE to Fred Hagstrom, Chair, Department of Art and Art History. Application deadline is December 1, 2000.

Asian Languages and Literature
Chinese: We seek applicants for a position in Chinese language and literature who have a strong commitment to teaching Chinese language to undergraduates. Qualifications include native or near-native competence in Chinese and English, training in and experience teaching Chinese language at college level. Ph.D. in Chinese language and literature. Send letter of application, c.v. and three letters of recommendation to Mai Hansen, Chair, Department of Asian Languages and Literatures. We will be interviewing at the AAS in Chicago in March. Application deadline is February 5, 2001.

Japanese: We seek applicants for a position in Japanese language and literature who have a strong commitment to teaching Japanese language to undergraduates. Qualifications include native or near-native competence in Japanese and English, training in and experience teaching Japanese language at college level. Ph.D. in Japanese language and literature, and ability to teach pre-modern literature. Send letter of application, c.v. and three letters of recommendation to Mark Hansell, Chair, Department of Asian Languages and Literatures. We will be interviewing at the AAS in Chicago in March. Application deadline is February 5, 2001.

Chemistry
We seek a person with teaching strengths in introductory chemistry, thermodynamics, kinetics and an upper-division course in one’s field of expertise. Research areas that will most complement our department are those in materials science, computational chemistry, physical chemistry or computational chemistry. Facilities and start-up funds will be provided. Submit c.v., graduate and undergraduate transcripts, three letters of reference, a statement of teaching philosophy (including areas of teaching interest) and a statement of proposal research in Marion Cars, Chair, Department of Chemistry. Carleton is engaged in efforts to attract, retain, and nurture underrepresented students in the sciences. We seek candidates with particular interest and strength in this area. Application deadline is October 15, 2000.

Philosophy
Social & Political & Continental: We seek a person with specific interest in social and political philosophy and Continental philosophy. Ph.D. and significant teaching experience is important. Send letter of application and placement file (including c.v., three recommendations, and a writing sample) to Gary Remington, Chair, Department of Philosophy. Preference given to complete applications submitted by December 8, 2000.

Physics and Astronomy
Theoretical Physics: We seek a person in theoretical physics and computational physics with a strong commitment to teaching undergraduates in a linear arts environment and, in particular, the ability to contribute magnificently to our physics curriculum. We also seek the ability to maintain an active research program in which students can be involved, facilities and start-up funds will be provided. Apply, send a letter describing your suitability for the position, c.v. and three supporting letters to Bill Titus, Chair, Search Committee, Department of Physics and Astronomy. Carleton is engaged in efforts to attract, retain, and nurture underrepresented students in the sciences. We seek candidates with particular interest and strength in this area. Full consideration will be given to applications received by December 1, 2000.

Political Science
Comparative Politics: We seek candidates with expertise in the politics of comparative and international environmental movements, regimes, public policy, democratization, and parties. A regional specialty in Eastern Europe, the post-Soviet Republics, or Southern Asia is preferred but candidates with other regional interests including Latin America, China, and Eastern Asia are also invited to apply. Candidates should be prepared to teach courses in comparative environmental politics and public policy or international environmental law and politics in addition to the introduction to comparative politics and thematic course(s) consistent with the candidate’s breadth of expertise. Send cover letter describing teaching and research interests, c.v., writing samples, and a reference letter to S. Schier, Chair, Department of Political Science. Application deadline is November 8, 2000.

Religion
Islam: We seek a specialist in Islam who is committed to excellence in teaching and research. Islam has primary standing in Islamic religion and culture and, ideally, secondary standing in one or other Asian or Near Eastern religious tradition. (s)he is skilled at relating the mainstream of Islam to its various historical and cultural settings, and (s)he has a strong interest in methodological and comparative issues in the field of religious studies, and (s)he is willing to relate the study of Islam to other programs, e.g., Asian Studies, Political Science, African Studies, African-American Studies, American Studies, and Women’s Studies. Send a cover letter, c.v., three letters of reference to Anne E. Patrick, Chair, Department of Religion. Preliminary interviews will be held at the AAR annual meeting in Nashville. Application deadline is October 31, 2000.

Romance Languages and Literatures
Spanish: This department has two position openings - one in Peninsular Literature with specialization in 20th Century Contemporary Spanish Literature, the other in Latin American Literature. We are open to the possibilities of joint applications in the Spanish language sequence as well as literature courses in the specialty and participation in our off-campus study programs. Native or near-native fluency in Spanish required. The candidates should show a commitment to teaching excellence, course service and research/scholarship. Submit a letter of application, c.v., three letters of recommendation, and a writing sample to Bill Titus, Chair, Department of Languages and Literatures. Preliminary interviews will be held at MLA in Washington, D.C. Application deadline is November 10, 2000.

GENERAL INFORMATION FOR ALL OPENINGS:
All resistors at Associate Professor level (with Ph.D. or terminal degree by time of appointment). In extraordinary cases higher rank will be considered. Carleton is a highly selective liberal arts college with 1950 undergraduate students located 15 miles south of Minneapolis and St. Paul. The Carleton calendar includes three 10-week terms and the standard teaching load is six courses. Although in the 51-year faculty teach five. Carleton College is an affirmative action/equal opportunity employer. Women and minorities strongly encouraged to apply.

Carleton College, One North College Street, Northfield, MN 55057

The University of Massachusetts is an Affirmative Action/Equal Opportunity Employer.

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

But USF is much more than just a large, state-assisted institution. Its growing reputation as a dynamic research university is spreading around the country, attracting more and more of the nation’s best and brightest scholars to the Tampa Bay Area. USF offers degree programs in 79 undergraduate disciplines, 89 master’s and specialist programs, and 28 doctoral programs, including the M.D. A record number 1525 international students enrolled at USF the 1999-2000 academic year. Students from Latin America and the Caribbean totaled 445. USF-AHEC’s Health Education Training Center is a sponsor of the Rural Youth Soccer Association, which serves over 300 migrant children in south Hillsborough County.

The University is currently recruiting for the following positions:

THE LOS ANGELES COMMUNITY COLLEGE DISTRICT
invites applications and nominations for the following position:

• VICE PRESIDENT OF STUDENT SERVICES

Los Angeles Harbor College

WOMEN, MINORITIES AND THE DISABLED ARE ENCOURAGED TO APPLY

The Los Angeles Community College District is seeking a Vice President of Student Services to serve at Los Angeles Harbor College. Interested individuals who possess the required training and experience are invited to submit applications. Reporting to the College President, the Vice President of Student Services provides administrative leadership and operational supervision for a comprehensive student services program.

REQUIREMENTS: Applicants must have earned a master's degree or an advanced degree of at least comparable standard from an accredited college or university. Applicants must have three years of successful full-time experience as an academic administrator, with one year of experience as a vice president. The candidate must possess knowledge in student support services, academic affairs, student development, and residence life. An earned doctorate is desirable.

COMPENSATION: The current salary range is $89,997 to $115,931 annually. New employees to the District will be placed within the salary range according to previous salary. Employees are entitled to 13 paid holidays annually, 94 days paid vacation annually, medical, hospital, dental, and vision care plans, and a $4,000 group life insurance policy.

APPLICATION: All applicants must file a letter of intent which relates to the responsibilities and desirable qualifications detailed in the position announcement. That letter of intent is available from the district. Applicants whose qualifications meet the minimum requirements will be notified of an interview date, time, and location.

The position will begin on or about February 1, 2001.

The Los Angeles Community College District is an equal opportunity employer.

Elmhurst College

Elmhurst College, a four-year liberal arts college in the western suburbs of Chicago, seeks applicants for Assistant Professor of Spanish, beginning Fall Term, 2001. The tenure-track position specializes in American literature and culture. A Ph.D. is required. Both part-time and full-time positions are available. Submit letter of application and three letters of recommendation by December 15 to:

Earl Thompson, Chair, Department of Foreign Languages and Literatures
Elmhurst College, 190 Prospect Avenue
Elmhurst, IL 60126

Saint Joseph College

Associate Dear

Saint Joseph College provides a rigorous liberal arts education in a variety of programs, while maintaining a strong commitment to developing the potential of women. The College invites applications for the position of Associate Dean. The Associate Dean will be responsible for advising all areas of academic and professional programs of the College. The position is open to both men and women. Applicants must have a Ph.D. in a relevant field and a minimum of five years of experience in higher education. A strong commitment to promoting understanding and appreciation of diversity is essential. Contact Mary Pulley, Assistant to the Dean of Students, 400 Main Street, West Hartford, CT 06117.

For more information, visit the College's website at www.sjca.edu.
Blue Ridge Community College invites applications for the position of Dean of Instruction and Student Services. The Dean will provide visionary and vigorous leadership to a dynamic faculty committed to student-centered and innovative instruction. The Dean reports to the President and joins an administrative team in guiding and directing the College in its challenge of preparing its students for the 21st Century.

The Dean of Instruction and Student Services is the Chief Academic Officer of the College and is responsible for:

- Planning, developing, implementing, and evaluating all college academic programs, including an AAS/AA degree, several AAS Occupational/Technical degrees, diploma certificate, and career studies certificate programs, and a vibrant distance learning program.
- Providing leadership, with area administration, for two Academic Divisions, Learning Resources, Admissions, and Records, Counseling Services, and the Center for Training and Development. The Dean also supervises the Tech-Prep Coordinator on behalf of the Blue Ridge Tech-Prep Consortium.

Qualifications:

- A combination of at least seven years of successful experience in teaching and administration in a postsecondary institution. Community college experience is preferred.
- A commitment to achieving academic excellence and a knowledge of how technology can be used to improve instruction.
- A demonstrated understanding of occupational/technical and distance learning programs.
- Effective communication skills (oral, written, and listening).
- Commitment to a participative leadership style.
- Knowledge of, and commitment to, student support services that contribute to the total education of the student.
- A clear understanding of, and commitment to, the philosophy of the comprehensive community college.
- An earned doctorate from an accredited institution.

Blue Ridge Community College, a member of the Virginia Community College System, is located in the Central Shenandoah Valley between the cities of Harrisonburg and Staunton. The College’s 1999-2000 unduplicated enrollments were 4,096 students enrolled in credit courses (1,625 FTEs) and 5,596 unduplicated enrollments in non-credit courses, workshops, and seminars. Learn more about the college's vision, values, strategic directions, and community at www.bccc.va.us.

The anticipated position start date is January 2, 2001. Salary range is $76,363 - $87,181 contingent upon credentials and experience.

To Apply:

A completed Commonwealth of Virginia Application for Employment Form, (available at the college website: click IRCC Community, then employment), vita, and letter of interest must be received no later than 5:00 p.m., October 15, 2000; by Ms. June Brown, Human Resources Office, Blue Ridge Community College, P.O. Box 80, Weyers Cave, VA 24486, telephone (540) 234-9261, ext. 213, FAX 234-0448.

Blue Ridge Community College is an Equal Employment Opportunity/Expulsive Employer. Minorities are strongly encouraged to apply.
University of Nebraska Lincoln

FAMILY LIFE SPECIALIST/ASSISTANT PROFESSOR
to establish program in the area of Building Strong Families/Building Human Capital - Individual and Family Development. Seeking candidates for tenure-track, 12-month position with 100% Cooperative Extension responsibilities in the Department of Family and Consumer Sciences. Position located at the Panhandle Research and Extension Center, Scottsbluff, NE. Successful candidate will work with Extension Educators/Specialists on a distinct and statewide basis, community service organizations, and appropriate state agencies to develop, implement and evaluate educational programs to address critical family life issues such as building strong family structures, the effects of inter-generational family structures, parenting issues in traditional and non-traditional units. Requires a Ph.D. in human development and family studies, or related field, as well as research, teaching, communication, and grant writing skills.

Submit letter of application, vitae, graduate transcripts, sample publications and three letters of reference to Dr. Linda Eekhout, Co-Chair, Search Advisory Committee, c/o Mary Kleeb, University of Nebraska-Lincoln, Department of Family and Consumer Sciences, 123 Home Ec Bldg., Lincoln, NE 68583-0801. Review of applications will begin on Monday, October 16, 2000, and continue until a suitable candidate is identified. The University of Nebraska is committed to a pluralistic campus community through affirmative action and equal opportunity. Applications are invited from all qualified individuals, regardless of race, color, religion, sex, national origin, marital status, disability, age, veteran status or sexual orientation. Women and minorities are particularly encouraged to apply.

COLUMBIA BUSINESS SCHOOL

The Management Division of the Graduate School of Business of Columbia University has three openings for faculty positions in organization theory, strategy, or a combination of the two, beginning in the fall of 2001. We will consider candidates at all ranks ranging from assistant to full tenured professor. Positions require strong research and teaching experience with a Ph.D. in a relevant or related field. Candidates should begin their application by visiting our job search web site at http://www.gsb.columbia.edu/divisions/management/search, where they will be asked to complete an online application form and electronically upload their curriculum vitae. A letter of interest, three letters of recommendation and samples of current research (including a dissertation proposal) summary for doctoral candidates) should be mailed to:

Barbara Valentini, Search Coordinator
Columbia Business School, Uris Hall
3022 Broadway, Room 7N
New York, NY 10027
email: bvalentin@clavin.gsb.columbia.edu

The deadline for completing applications is November 1, 2000.

Sarah Lawrence College

Art Historian

African Art

Full time tenure track position beginning August 2001 at small liberal arts college 20 miles from NYC nationally renowned for its unique collegial and pedagogical system, emphasizing small seminars and independent student research projects. We are seeking qualified candidate to teach the arts and architecture of Sub-Saharan Africa. Candidates should also have 1) a second interest either in modern ethnic art of the African Diaspora, particularly in the Americas, or in artistic traditions considered outside the canon of Western European and North American art (i.e., Tribal and Ethnic arts of Asia and the Pacific, etc.), 2) methodological flexibility, 3) teaching experience, and 4) publications. This appointment can be made at a senior level. Tenured candidates will be offered a two-year residency and an early decision either to remain with tenure or to return to their home institution. This appointment - the third in two years - is part of an expansion of the department of Visual Culture that will include a comprehensive curriculum, formal interactions with colleagues and students in other disciplines, and a new faculty in the next five years. Interested candidates please send cover letter, CV, three letters of recommendation, and a publication to: Naudia Forbes, Faculty Secretary, Arts, Hohe, Sarah Lawrence College, 1 Meadway, Bronxville, NY, 10708. Deadline: November 1, 2000.

EOE. Women and minorities are particularly encouraged to apply.

IILLINOIS

The Department of Sociology, University of Illinois at Urbana-Champaign (UIUC), expects to fill one or more senior positions in the coming year, preferably at the level of full professor, though we will also consider candidates for associate professor. A Ph.D. is required by appointment date. The area of specialization is open, but our major strengths are in (1) science, technology and the environment, (2) transnational studies, (3) race and ethnicity and (4) population, health and the life course, and for one position preference will be given to candidates working in areas (1) and (2)/(3). Applicants should have a national and international reputation in research, and demonstrated teaching abilities. Willingness to undertake a leadership role within the department is also a consideration. Appointments will begin 11 August 2002, or by mutual arrangement. Salary is commensurate with experience. Please send a cover letter, CV and contact information for three references to:

Andrew Pickering
Acting Head
Department of Sociology
University of Illinois at Urbana-Champaign
326 Lincoln Hall
702 S. Wright St.
Urbana, IL 61801
(Telephone 217-333-9333; fax 217-333-3225)
To be sure of full consideration, applications must be received by 15 December 2000.

The University of Illinois is an Affirmative Action, Equal Opportunity Employer.

NCTEACH

North Carolina Teachers of Excellence for All Children

We invite Professionals With a College Degree,
Desiring To Teach in Secondary and Middle Schools in North Carolina, To Participate in the Rigorous, High Quality Lateral Entry Teacher Licensure Program

We are looking for applicants who wish to teach secondary math or science; middle grades math, science, language arts, or social studies; K-12 special education; or K-12 second language (Spanish, French or ESL).

PROGRAM COMPONENTS: Full-time, intensive, six week Summer Institute June-July, 2001, Fall and Spring semester courses and mentoring support during first year of teaching. PRAAXIS Examination assistance. Mentoring and coaching during the second year of teaching. NC TEACH is offered at six host sites across the state.

QUALIFICATIONS: Minimum of a Bachelor's degree from an accredited institution with a major appropriate to the proposed area of teacher licensure. Recommended undergraduate grade point average of at least a 2.0 on a 4.0 scale in the major and a 2.5 on a 4.0 scale in cumulative GPA. Applicants must take either the Graduate Record Examination (GRE) general test (math and verbal) or the Miller Analogies Test (MAT). Texas Tech University
Vice President Positions
Texas Tech University, under the leadership of its new President, is recruiting cm and talented individuals to serve as Vice Presidents and be part of a dynamic leadership team. The University invites nominations and applications for the following positions: Vice President for Fiscal Affairs; Vice President for Student Affairs; Vice President for Research, Graduate Studies and Technology Transfer; Vice President Information Technology; and Vice President for Institutional Advancement. All positions report directly to the President.

Texas Tech, founded in 1923, is one of the four leading research universities in Texas and is part of the Texas Tech University System. The Texas Tech campus in Lubbock (population 200,000) has a student population of approximately 35,000 students —including 21,000 undergraduate and 4,000 graduate and professional students. University is comprised of 10 colleges and school and offers 112 undergraduate majors, 70 masters and 50 doctoral degrees. The Lubbock area is the West Texas center of education, agriculture, healthcare, banking and business.

The Vice President for Fiscal Affairs acts as the Chief Fiscal Officer for the University and is responsible for managing, directing and controlling the University’s financial affairs. This Vice President has direct responsibility for all fiscal matters affecting University including strategic planning and budgeting. This Vice President will also be responsible for providing strategic financial oversight and oversight of the University’s financial operations including operating and capital budgets, financial planning and project investment management and accounting operations.

The Vice President for Student Affairs serves as the Senior Student Affairs Officer for the administration, coordination, development, management, planning, and operation of the University’s policies, programs and services related to campus life. This position is responsible for direct responsibility for all fiscal matters affecting University including strategic planning and budgeting. This Vice President will also be responsible for providing strategic financial oversight and oversight of the University’s financial operations including operating and capital budgets, financial planning and project investment management and accounting operations.

The Vice President for Research, Graduate Studies and Technology Transfer is responsible for advancing the research mission of the University and represents the institutional’s research interests to federal and state governments, industry, and national and international constituencies. This Vice President oversees all policies and procedures relating to research, technology transfer, and economic development, works closely with the faculty to encourage and support research and scholarly activity. This Vice President will also support and strengthen graduate education at the University serving as Dean of the Graduate School.

The Vice President for Information Technology acts as the Chief Information Officer for the University. The Vice President is responsible for developing and managing University’s technology services and information services to take advantage of opportunities and meet future technological challenges. Areas of responsibility include operations, telecommunications, technology customer services, technology assessment and support, information systems and development, and information management. The Vice President will be responsible for strategic planning and Information Technology, and for creating and maintaining a culture of communication and collaboration.

The Vice President of Institutional Advancement is responsible for the plan and develop, and coordinate the overall identification, cultivation, solicitation, stewardship of major gifts from target constituencies (individual donors, as well as foundations and corporations) in support of the academic colleges and schools of Texas Tech University. The Vice President will also coordinate the strategies to reinforce the University’s image and its recognition.

Interested applicants should possess extensive professional and administrative experience within their respective areas as well as a proven record of success and leadership skills. They must value open communication and understand the importance of promoting diverse university community.

Review of applications will begin October 15, 2000 and continue until the position is filled. Applications may be directed to the Office of the Texas Tech University, P.O. Box 40305, Lubbock, Texas 79409.

For more information about these positions, including the minimum acceptable qualifications and primary leadership duties and responsibilities, please visit:
http://www.vpo.sfaadmin.itu.edu/personnel/home.htm

Texas Tech University is an Equal Opportunity Employer and encourages nominations and applications from minority and female applicants.
MILLSAP PROFESSORSHIP
OF FAMILY DIVERSITY
AND MULTICULTURAL STUDIES

The Department of Human Development and Family Studies at the University of Missouri-Columbia is recruiting for the endowed Millsap Professorship of Family Diversity and Multicultural Studies. The department has identified multiculturalism and diversity as its foci and seeks an individual with expertise in race and ethnic issues in human development and/or family studies. The starting date for the 9-month position is Aug., 2001. Preferred rank is Associate or Full Professor. Duties include teaching undergraduate and graduate courses; advising undergraduates, masters and doctoral students; conducting an active program of research, participating in the department's new Center for Family Policy and Research; and engaging in university and community service. Women and minorities are especially encouraged to apply. The Department of Human Development and Family Studies at the University of Missouri-Columbia does not discriminate on the basis of race, color, religion, national origin, sex, age, disability, status as a disabled veteran or veteran of the Vietnam era, or sexual orientation. Review of applications will begin immediately and will continue until the position is filled. Send cover letter addressing qualifications and interests, vita, and three letters of reference to: Dr. Drew Fine, Ph.D., Search Committee Chair, Dept. of Human Development and Family Studies, 314 Gentry Hall; University of Missouri-Columbia, Columbia, MO 65211. Email or phone questions to: finem@missouri.edu; 573-884-6301.

The successful candidate will have a strong background in experimental physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include quantum mechanics, statistical mechanics, and condensed matter physics.

PHYSICS
Non-linear physics. The Department is seeking a position in non-linear physics. The successful candidate will have a strong background in non-linear physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include dynamical systems, chaos theory, and fractals.

PHYSICS
Computational physics. The Department is seeking a position in computational physics. The successful candidate will have a strong background in computational physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include computer simulation, statistical mechanics, and condensed matter physics.

PHYSICS
Nuclear physics. The Department is seeking a position in nuclear physics. The successful candidate will have a strong background in nuclear physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include nuclear astrophysics, nuclear structure, and nuclear reactions.

PHYSICS
Particle physics. The Department is seeking a position in particle physics. The successful candidate will have a strong background in particle physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include high-energy physics, quantum field theory, and particle detectors.

PHYSICS
Quantum optics. The Department is seeking a position in quantum optics. The successful candidate will have a strong background in quantum optics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include quantum information, quantum communication, and quantum cryptography.

PHYSICS
Solid state physics. The Department is seeking a position in solid state physics. The successful candidate will have a strong background in solid state physics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include solid state physics, band theory, and semiconductor physics.

PHYSICS
Thermodynamics. The Department is seeking a position in thermodynamics. The successful candidate will have a strong background in thermodynamics and be able to contribute to the teaching of introductory and advanced courses in this area. Teaching and research interests include statistical mechanics, thermodynamic properties, and phase transitions.
PRESIDENT

Kankakee Community College invites applications and nominations for the position of President.

The college, located on a 177-acre campus 50 miles south of Chicago, enrolls more than 5,000 students annually and serves more than 8,000 additional residents through corporate and continuing education programs. KCC provides high quality transfer and career programs, plus adult education and literacy programs at multiple sites throughout its 1,600-square-mile district. The college enjoys a sound financial status, with one of the lowest student tuition and property tax rates in Illinois. It is accredited by the Commission on Institutions of Higher Education of the North Central Association of Colleges and Schools.

The President reports to a seven-member, elected Board of Trustees. The Board seeks a President who will continue the college’s tradition of strong, positive leadership while responding to the district’s future educational challenges.

For a presidential profile brochure which describes the position and qualifications and explains the application process, or to nominate a candidate, contact:
Carol Webber, Search Liaison
Kankakee Community College
P.O. Box 888
Kankakee, IL 60901-0888
815-955-0216
cwebber@kcc.cc.il.us

The profile brochure also is on the KCC web site at www.kcc.cc.il.us in the “About KCC” section.

Nominations and applications will be accepted until the position is filled. The Search Committee will determine who will be interviewed by late November 2000. Preferred starting date is April 1, 2001. Candidates who cannot make themselves available until a later date will be considered, but they are asked to indicate their date of availability. Salary and benefits are competitive with institutions of comparable size.

An Affirmative Action, Equal Opportunity Employer

Florida Community College
at Jacksonville

District Director
of Enrollment Services and Registrar

Florida Community College at Jacksonville seeks a student-focused director to lead the College’s district-level enrollment services, registration and records operation within a multi-campus environment.

The successful candidate for this management position will play a leadership role in the creation and implementation of both enrollment services and student success goals and initiatives. The position provides direct supervision over all district-level staff in the areas of admissions, registration and records. Additionally, the successful candidate will be expected to provide collaborative, college-wide leadership to campus and center personnel engaged in enrollment services and student success functions with the goals of achieving higher levels of customer service, enrollment, retention, and student success.

QUALIFICATIONS

Master’s degree in Educational Leadership, Foundations in Education, Administration, Public Administration, or related; supplemented by three years of managerial/supervisory experience in registration, records management and admissions procedures for an educational institution, preferably in higher education.

Additionally the successful candidate will possess the following preferred characteristics:

• A burning desire to continually improve student access to educational services and to continually improve student success.
• A passion for providing the highest possible level of service to our students and a track record which demonstrates the successful application of process improvement skills.
• The proven ability to manage integrated, relational student information systems.
• A vision for the application of current and emerging technologies and student services functions.
• Ability to master federal, state, and institutional rules, regulations, and policies and to learn and lead in inter-institutional initiatives such as the Florida Academic Counseling and Tracking for Students and electronic transcript communications programs.
• A demonstrated ability to interact professionally, collaboratively and creatively with all levels of the organization, administration, faculty and staff.

This progressive College serves seven campuses at multiple locations and programs, with an enrollment of more than 30,000 students. The Jacksonville Community College District serves a five-county area in the growing city of Jacksonville, a metropolitan area with a population of more than one million residents.

SALARY: $56,280-$78,168 (Dependent)

HOW TO APPLY

Interested candidates must submit a Florida Community College at Jacksonville completed application form and an official copy of transcripts in order to be considered for this position. An application can be downloaded from our website at www.FCCJ.org/HumanResources, obtained at the Human Resources Department at 501 W. State Street, Jacksonville, FL 32202, or by calling (904) 335-3210. A résumé may be attached, but will not be accepted in lieu of an application. Submit the application with cover letter, résumé and official transcripts to:

Florida Community College at Jacksonville, Martin Center for College Services, 501 W. State St., Jacksonville, FL 32202, ATTN: Human Resources
THE UNIVERSITY OF OKLAHOMA

DIRECTOR
Southwest Center for Human Relations Studies

The Southwest Center for Human Relations Studies was founded in 1951 in the College of Continuing Education to coordinate the resources of the University in training, public awareness, conferences, intervention, and support for communities and organizations involved in issues based on race, ethnicity, gender, age, or other arbitrary classifications. The Center conducts the nation's largest annual conference on race and ethnicity in higher education (NCORE), and has sponsored numerous conferences in areas such as school integration, law enforcement and minorities, civil rights, women's issues, diversity in the workplace, multicultural leadership development, and other topics associated with human rights and intergroup relations.

The Director supervises a small staff of program developers and draws on the larger faculty of the University and appropriate outside experts for special needs. Depending upon the applicant's credentials, an adjunct appointment in the University would be acceptable to the Center and would facilitate positioning the Center to access all faculty resources.

The Director should have the following qualifications:

- Familiarity with trends and issues in the general area of human relations
- Demonstrated ability to work with persons of various ethnic, racial, and social backgrounds
- Commitment to human rights and social diversity
- Terminal degree preferred and Master's degree required
- Experience in organizational management within higher education setting and/or conference planning
- Demonstrated excellent written, oral, and formal presentation skills
- Demonstrated ability to acquire and utilize resources for program support

The Director reports to the Assistant Vice President for Public and Community Services and works with an advisory Executive Committee. The University of Oklahoma is an equal opportunity affirmative action employer and seeks especially women and/or minorities for this position. Salary is negotiable, depending on the candidate's qualifications and experience. Applications will be received until the position is filled. Screening and review of candidates will begin October 6, 2000.

Address inquiries or applications to:
Human Resources

901 Asp Avenue, Room 205
Norman, Oklahoma 73019

PRAIRIE VIEW A&M UNIVERSITY

SCHOOL OF JUVENILE JUSTICE & PSYCHOLOGY

TEXAS JUVENILE CRIME PREVENTION CENTER

Prairie View A&M University was most recently redefined by the people of Texas by an amendment to the constitution in 1984. Through that amendment, Prairie View joined the University of Texas at Austin and Texas A&M University as the state's only constitutionally designated "institutions of the first class." The main campus is approximately 45 miles northwest of Houston, Texas, on U.S. Highway 290.

The School of Juvenile Justice and Psychology is authorized to award the following:

- Doctor of Philosophy degree in Juvenile Justice
- Master of Science degree in Juvenile Justice
- Master of Science degree in Juvenile Forensic Psychology
- Bachelor of Science degree in Criminal Justice
- Bachelor of Science degree in Criminal Justice with specialization in Juvenile Justice
- Bachelor of Science degree in Psychology

Professor of Criminal Justice/Juvenile Justice

Applicants must have a Doctorate degree in Criminal Justice or Criminal Justice and/or related field with experience in graduate teaching and research. Preference will be given to those who have 8 years experience with specialization in juvenile justice and background and interest in the training of Ph.D. students for this newly developed field of Juvenile Justice.

Associate Professor of Criminal Justice with specialization in Juvenile Justice

Applicants must have a Doctorate degree in Criminal Justice, Criminology or related field and experience in graduate teaching and research. Preference will be given to those who have five years experience with specialization in juvenile justice or work related experience in the training of graduate students.

Associate Professor of Psychology

Applicants must have a Doctorate degree in Psychology and 5 years experience in graduate teaching and research. Preference will be given to those who have a specialization in Forensic Psychology and work related experience in the training of graduate students.

******

Candidates must have demonstrated scholarship in teaching, research, publication and grant writing. Successful candidates may be able to negotiate tenure and a highly competitive salary.

Appointment - September 1, 2001. (Tenure-track Academic Year Appointment).

These positions will remain open until filled. Interested applicants must submit an application/resume and three letters of recommendation to:

Prairie View A&M University
Office of Human Resources
P.O. Box 5
Prairie View, Texas 77446

PVAMU IS AN AFFIRMATIVE ACTION/EQUAL OPPORTUNITY EMPLOYER
PRESIDENT
LORAS COLLEGE
Educatlng Principled Thinkers.

Loras College invites inquiries, nominations, and applications for the position of President. Loras is a Catholic, diocesan, coeducational, liberal arts college classified as a "Master's institution. The President is the Chief Executive Officer with authority for the management of academic, business, and administrative operations of the College. In collaboration with the executive management team, the President provides leadership for the College consistent with the direction set by the Board of Regents, the governing body of Loras.

Founded in 1839 by Bishop Mathias Loras, the first Catholic Bishop of Iowa, the College overlooks the Mississippi River in the heart of the upper Midwest. Loras is located in Dubuque, Iowa on a 60-acre campus. The broad cultural and sports activities at the College complement a common experience which includes the Museum of Art, Symphony Orchestra, Grand Opera House, Five Flags Convention Center, 18 golf courses, and 14 scenic nature and recreation parks.

The comprehensive Campus Facility Plan guides the ongoing enhancement of the campus facilities including the initiation of the new $18 million Academic Test Center. The William Memorial Library, the home of one of the largest academic libraries in the state, has 260,000 books, an outstanding rare book collection, and a manuscript collection dating back to the 12th century. The Technology Center offers a variety of computing facilities and services. IBM RS/6000s and Novell NetWare servers provide general interactive and instructional computing for the College. Loras has already completed its infrastructure for the campus-wide utilization of laptops in a "notebook" environment in 2001-2002.

Loras College is in U.S. News & World Report Regional Top Tier, Newsweek Hidden Treasures, Barron's Best Buys in College Education, and Rangeley Recommendations. Loras ranks 17th among the nation's 252 Catholic colleges in the total number of students who have earned a baccalaureate degree. With a commitment to "the total development of the students," the College dedicates its faculty, staff, and facilities primarily to undergraduate programs in a residential setting.

The College offers undergraduate majors in 62 programs and master's degrees in 18 programs. The annual operating budget is $34 million with an endowment of $31 million dollars. The average ACT score for all students was 21.3, with 39% of the students in the top one-fifth of their high school graduating class. The student body is 85% Catholic with students of other faiths warmly welcomed. The College is a member of NCAA Division III, participates in the Iowa Intercollegiate Athletic Conference, and sponsors 31 intercollegiate sports with over 35% of the student body participating. There are now over 30 active Loras alumni clubs made up of 20,000 alumni from around the world who enthusiastically support the College. In 1998, Loras was the recipient of a $10 million gift, one of the largest single contributions to a private Iowa higher education institution in history.

The student body includes over 1700 men and women selected from 25 states and 16 countries. The College has 200 full and part-time staff employees, 160 full and part-time faculty members, of which 96% hold graduate degrees, and 65% are tenured. The student-faculty ratio is 11:1.

Loras is an equal opportunity employer committed to diversity within the workplace.
**DIRECTOR, JOB PLACEMENT CENTER**

Our progressive community college is seeking a Job Placement Center Director who will be responsible for the administration, development, implementation, coordination, and evaluation of job services offered by the college. Master's degree in Counseling, Student Development, Adult Education, or related field and 3-5 years experience or special training in administration of career and/or job placement services/grants administration required. DEAN OF THE COLLEGE OF LIBERAL ARTS

Texas A&M University at College Station is seeking candidates for the Dean of the College of Liberal Arts. Consisting of 12 departments, the College has over 380 tenured-track faculty who serve 5800 students in 40 graduate and undergraduate degree programs, including 9 interdisciplinary programs. The College has 8 Distinguished Professors, 7 endowed Chairs, and 28 named professorships.

In response to the University's strategic plan, Vision 2020 (http://www.tamu.edu/vision2020), the Dean will be asked to develop new initiatives in interdisciplinary studies throughout the University, to build bridges between the liberal arts and sciences, and to increase the standing of the College nationally. The Dean's duties will also include: most notably, facilitating opportunities to obtain extramural funding; aggressively advocating the interests of the humanities, the arts, and the social and behavioral sciences; and advancing the College's efforts in recruiting and retaining multiracial and diverse faculty members and students.

More information about this position is posted on the web at: http://www.tamu.edu/provost. The Search Committee will begin screening applications on November 15, 2000. Nominations and applications should be sent in writing to:

Dr. Richard E. Ewing
Chair Dean of Liberal Arts Search
312 Administration Building
1112 TAMU
Texas A&M University
College Station, TX 77843-1112

DEAN
COLLEGE OF EDUCATION AND
HUMAN SERVICES

Montclair State University invites nominations and applications for the position of dean, the College of Education and Human Services. The dean, who reports to the provost/vice president for Academic Affairs, serves as the chief academic and administrative officer of the College.

The individual selected as dean must have the vision to identify and pursue new opportunities that will allow the College to remain a national leader in the education of educators and renewal of the schools and the intellectual strength to direct its growth and development within the framework of shared academic governance. She/he must be capable of being regarded as an intellectual leader not only within the College, but across the campus and within the community as well. She/he will be responsible for the administrative and fiscal management of the College, with special attention to the recruitment and development of faculty. She/he will be responsible for effectively representing the College to the campus, alumni and external communities and providing leadership in the pursuit of the external resources required to augment State appropriations. The dean will be expected to influence and implement government policy affecting programs within the College at the state and national levels. The dean will be a key member of the University's senior leadership and will be imaginative in finding ways to advance the goals and objectives of both the College and the University and to foster collaborations across the campus.

Further details about the qualifications for this position are available at http://www.montclair.edu.

With a faculty of 85 scholars/teachers and 2,000 students, the College of Education and Human Services offers professional programs leading to the B.S., M.A., M.Ed., M.A.T., and Ed.D. degrees. The College is organized into six departments: Curriculum and Teaching; Counseling, Human Development and Educational Leadership; Educational Foundations: Health, Physical Education, Recreation and Leisure Studies; Human Ecology; and Reading and Educational Media. The College is home to a number of other units including the nation's first Center of Pedagogy, the New Jersey Network for Educational Renewal and the Institute for the Advancement of Philosophy for Children. As one of the original members of the National Network for Educational Renewal founded by John Goodlad, the College's programs for educators and educational renewal have received national and international recognition for strengthening the education of educators and fostering renewal in the schools. The College is a member of the Holmes Partnership, the Teacher Education Council of State Colleges and Universities, the Council of Great City Colleges, and the Association of Colleges and Schools of Education in State Universities and Land Grant Colleges. The College is accredited by the National Council for Accreditation in Teacher Education, and programs are accredited by the American Association for Family and Consumer Science, the American Dietetics Association, and the National Recreation and Parks Association.

Montclair State University is a comprehensive public university offering a rich array of programs to approximately 13,500 undergraduate students and post-baccalaureate students. Founded in 1908, the University is organized into three colleges and three schools: College of Education & Human Services, College of Humanities & Social Sciences, College of Science & Mathematics, School of the Arts, School of Business, and the Graduate School. Characterized by a faculty of 450 teachers-scholars, Montclair offers undergraduate degrees in more than 70 majors and graduate degrees in more than 30 areas of study and seven degrees at the Master's and Doctoral level in 36 areas of study. The University is located 14 miles west of New York City on a beautiful 200-acre suburban New Jersey campus.

Applicants should submit a letter of application, a résumé and the names, addresses and phone numbers of five references to: Montclair State University, C116-V89/RH/E. Upper Montclair, NJ 07042. The review of applications will begin in October, 2000 and will continue until the position is filled. The expected starting date is July, 2001.

An Equal Opportunity/Affirmative Action Institution

COLUMBIA FACULTY

COLUMBIA COLLEGE CHICAGO invites applications for a tenure track faculty position in the Arts, Entertainment & Media Management Department to teach in the area of Fashion/retail Management, beginning in Fall, 2000 or Spring, 2001. The department emphasizes management for the business of the arts, entertainment, media, and fashion. Review will begin immediately and continue until the position is filled.

Responsibilities include teaching Fashion/retail Management and courses in the Management core curriculum; assisting in training professional part-time faculty; participating in new curriculum initiatives; advising undergraduates and possibly graduate students and developing assessment programs and procedures. Teaching and/or work experience in the fashion and retail industry, an advanced degree or equivalent professional experience and working knowledge of current technology in the field is required. A network of local and national contacts in the field is highly desirable.

Columbia College is a diverse, open admissions, urban institution of 8,800 undergraduate and graduate students emphasizing arts and communications in a liberal education setting. We offer a competitive salary and excellent benefits package. Minority and Women applicants are especially encouraged to apply. Submit a letter of application, current vita, salary history and the name, addresses and phone numbers of three references to:

COLUMBIA COLLEGE LEONARD M. CAPELLO FACULTY SEARCH COMMITTEE

MONTCLAIR STATE UNIVERSITY 2000-2001
Assistant/Associate Professor
Puerto Rican Studies in Social Work
University of Connecticut, School of Social Work

The University of Connecticut School of Social Work, a leader in MSW graduate education in Connecticut and throughout the New England region, is an integral part of the State's flagship land and sea grant Research One University. It shares with the other units of the University the pursuit of excellence in teaching, research and scholarship and a commitment to public service that brings the knowledge of the University to the people of the State and the world. The curriculum of the School of Social Work is a two-year, 60-credit master's program that focuses on methods as its primary approach to advanced concentrations. These methods are administered, Casework, Community Organization, Group Work and Policy Planning.

The Puerto Rican Studies project in the UConn School of Social Work was founded by Dr. Julio Morales in 1980, to address the need for culturally appropriate social work practice with Puerto Rican communities in Connecticut and South Western Massachusetts and to recruit, retain and graduate Puerto Rican and other Latino social work students. Five courses in Puerto Rican Studies and social work practice are offered at the school on a regular basis. Puerto Rican Studies is an elective substantive area within the School’s curriculum.

Puerto Rican Studies in Social Work Faculty Position: Applications are being sought for a tenure track assistant/associate position in Puerto Rican studies. This appointee will coordinate and teach courses on Puerto Rican Studies related to social work practice, recruit Latino/a students, advise Latino/a and other students and work with the Organization of Latin American Students. This person must be able to provide training and consultations to social service agencies in the Puerto Rican community. Scholarly contributions to the knowledge base of Puerto Rican Studies are expected.

Qualifications:
- Candidates must be bilingual (English-Spanish)
- Knowledge and expertise in Puerto Rican culture and issues affecting Puerto Rican and other Latino communities in the United States
- Doctorate in social work or a related field; candidates with ABD with completion in near proximity will be considered
- MSW and at least two years relevant social work practice experience
- Experience in teaching and working with students is also desirable
- Ability to contribute to one or more of the method concentrations

Applications will be accepted until the position is filled. Screening will begin immediately with an anticipated date of hiring of September 2001. Please send curriculum vitae, including the names, addresses, telephone numbers and e-mail addresses of five references to: Ms. Delri Cecil Robinson Office of Human Resources: Southeast Missouri State University; Mail Stop 3156; One University Plaza; Cape Girardeau, Missouri 63701.

University of Connecticut
Saint Joseph College
West Hartford, CT

Faculty Position in Special Education
Department of Child Study/Education/Special Education

Saint Joseph College provides a rigorous liberal arts and professional education for a diverse student population while maintaining a strong commitment to developing the potential of women.

The College invites applications for a tenure track assistant/associate professor appointment to begin January 2001. Minorities are encouraged to apply. Responsibilities will include teaching in the teacher certification program at the undergraduate and graduate levels. Teaching responsibilities will include courses in the integrated special education/elementary education program. Additional responsibilities may include supervision of students in field placements and will involve advisement of students and scholarly research.

Qualifications include a doctorate in education or a related field and a minimum of 3 years of experience teaching in or administrating schools. Experience working with diverse student learners is highly desirable. The successful candidate shall understand and support the College's mission.

Send letter of application, curriculum vitae, copies of transcripts, and three letters of reference from people who have supervised your work to Human Resource Department, Education Search, Saint Joseph College, 1678 Asylum Avenue, West Hartford, CT 06117.

Review of applications will begin immediately and continue until the position is filled.

An EOE/AA/VE employer. Women and minorities are encouraged to apply.

UNIVERSITY OF WISCONSIN MILWAUKEE

DEAN OF THE SCHOOL OF EDUCATION and
CHANCELLOR'S DEPUTY FOR EDUCATION PARTNERSHIPS

The University of Wisconsin-Milwaukee (UWM), Wisconsin's premier urban research university, offers baccalaureate, masters, and doctoral degrees across 12 schools and colleges serving 23,000 students. The campus is located in an attractive setting near Lake Michigan, minutes from downtown Milwaukee. The Dean directs the School of Education's mission to prepare professional educators through a strong program of academics, research, and community outreach across five academic departments and through certification programs at the undergraduate, post-baccalaureate and masters levels, as well as an interdisciplinary Doctor of Philosophy Program in Urban Education. As Chancellor's Deputy, the Dean leads education partnerships between UWM schools, colleges and divisions, local school systems, area post-secondary institutions, and community partners.

Candidates must have an earned doctoral degree, experience as a college or university faculty member, and meet the requirements of scholarship, teaching and service for a tenure appointment as full professor in a department in the School.

Applications must include a letter of interest, curriculum vitae, and the names, addresses, and telephone numbers of five references. Review of applications will begin November 1, 2000, and continue until the position is filled. Submit applications to: Professor Anthony Cloonne, Chair, Search andScreen Committee for the Dean of Education and Chancellor's Deputy for Education Partnerships, University of Wisconsin-Milwaukee, P.O. Box 415, Mitchell Hall 225, Milwaukee, WI 53201.

UWM is an AA/EO employer.

The Cooperative Grants Program
NAFSA: Association of International Educators

Do you have an idea to help increase intercultural understanding and appreciation among students in your institution and members of your community? Do you need funding to implement your idea? Kick off the academic year or get a head start for next year with a grant from the Cooperative Grants Program (COOP).

COOP offers Mini-Grants of up to $2,000 and Incentive Grants of up to $6,000 for U.S. campus- and community-based cultural enrichment programming involving international and/or U.S. study abroad students. Mini-Grant proposals are accepted on a continual basis with a review period of five weeks; Incentive Grants have a March 1 proposal submission deadline. Application materials and grant writing resources are available on-line at www.nafsa.org/coop

Reminder: Applicants for COOP’s International Education Week Grant Competition are reminded that proposals are due October 3, 2000. Funding for COOP Grants is made available by the U.S. Department of State’s Bureau of Educational and Cultural Affairs.

Provost and Vice President for Academic Affairs

San José State University is now beginning a national search for a Provost and Vice President for Academic Affairs. The Provost is the chief academic officer of the University; acts as senior executive in the President’s absence; has line responsibility for all academic administrators; and provides leadership in planning, developing, assessing and overseeing all academic programs.

San José State University, the first public institution of higher education on the West Coast, is located in the heart of Silicon Valley and seeks a visionary leader who can direct the University in shaping its curriculum and instruction to meet its future needs. The successful candidate will be a creative, resourceful individual with humanistic values and exceptional organizational and communication skills who can guide the academic development of the campus and further its ties with constituent communities in and around Silicon Valley, the state, and the nation. Located in downtown San Jose, the nation’s eleventh and California’s third largest city, the University provides a cultural, artistic, and technical center for the surrounding community. San José State University is one of the largest of the 23 campuses of the California State University.

A regional, metropolitan university, San José State University excels at teaching in a wide variety of undergraduate and graduate programs in its eight colleges: Applied Sciences and Arts, Business, Education, Engineering, Humanities and the Arts, Science, Social Sciences, and Social Work. Diversity in both culture and curriculum is a central element of the campus. Many ethnic groups are represented, and no single ethnic group predominates among our student body of 26,000. Degrees are awarded in 136 subject areas, including a substantial number of professional majors.

The University has nearly 2000 faculty members. Their focus is on excellence in teaching as well as scholarly and professional achievement. The campus enjoys a tradition of collaborative policy development and decision-making between faculty and administration.

QUALIFICATIONS: Candidates must have an earned doctorate or equivalent; an academic record sufficient to be granted advanced rank and tenure in one of the University’s academic departments; and a record of progressive administrative responsibility, including head of a major academic unit.

Additionally, candidates should demonstrate the following:

- Ability to foster the University’s academic mission and provide curricular and administrative leadership in a rapidly changing multicultural, international, and high technology environment.
- Ability to work collaboratively in an environment of shared governance and collective bargaining.
- Ability to facilitate partnerships among academic programs and other divisions of the university, their faculty and students, and community constituents.
- Ability to exercise leadership in creating a supportive learning environment.
- Skill in creating a campus climate supportive of educational equity, including recruiting, developing and managing a diverse faculty and staff.
- Skill in fiscal planning and resource management.

NOMINATIONS AND APPLICATIONS: should be addressed to:

Dr. Judith Lessow-Hurley, Chair
Search Committee for Provost and
Vice President for Academic Affairs
Office of the President
San José State University
One Washington Square
San José, CA 95192-0002

Jan Greenwood, Ph.D
Vice President, A.T. Kearney, Inc.
SJSU Provost & VPAA Search
333 John Carlyle Street
Alexandria, VA 22314
Phone: 703-739-4619 Fax: 703-519-0391
Email: greenwoodteam@atkearney.com

Applications should include the following: a narrative letter indicating how the individual’s training and experience relate specifically to the listed job qualifications; a current vita, and the names, titles, email and business addresses and business and home phone numbers of at least five professional references. Screening will begin immediately and continue until the position is filled. Applications and nominations will be accepted until the position is filled, but only candidates whose applications are complete and received by October 3, 2000, will be assured of receiving full consideration.

Women, minorities and persons with disabilities are encouraged to apply. SJSU is an equal opportunity employer.
SANGRE DE INDIOS: CHIAPAS REVISITED

British writer Graham Greene once told me that the Catholic Church needed martyrs in order to survive. It came as no surprise, then, when the Vatican Secretariat for declaring Saints announced recently that 28 Mexicans from the Castero movement of 70 years ago would be canonized. It was a time when President Plutarco Elías Calles persecuted the Catholic Church. The only anomaly in this group will be the Indian Juan Dies, who witnessed our Lady of Guadalupe’s miraculous apparitions in the early 16th century—an historic moment that initiated large-scale indigenous conversions to the Catholic Church. But I wonder if this gesture of canonization will appease the Maya Indians in Chiapas, who are without a bishop.

The Vatican removed Auxiliary Bishop Raúl Vera López from the diocese of San Cristóbal de las Casas, in Chiapas, and reassigned him to Saltillo, Coahuila, México. After Bishop Samuel Ruiz resigned last year due to advanced age, it seemed as if Bishop Raúl Vera López, in Chiapas the last five years and a supporter of Ruiz’s policies of Church accommodation to the Indigenous expression of faith and their demands for social justice, would continue. The Vatican’s end-of-year decision seemed calculated to avoid media attention. I think of the final scene in Gregorio López y Fuentes’ award-winning 1935 novel, El Indio. The wounded protagonist hunchers armed on the craggy ground, watches the road, and waits for the gente de razón (euphemism for those of the civilized western world) to come and get him. A friend in San Cristóbal told me, El Indio is “haunted for the moment by the vision of an endless distrust.”

The Vatican decision disconcerted local church leaders, particularly Chiapaneco poet Juan Bañuelos, who had formed part of the now-defunct National Commission for Mediation in the Chiapas conflict between Mexican civil and military authorities and the Indigenous Zapatista insurgents of January 1994. Bañuelos did not mask his bitterness: “I was not mistaken. We had hoped they [the Vatican] would leave Don Raúl. This would have allowed the continuation of Bishop Ruiz’s work. The future of the Indigenous People and the future of Chiapas become more somber. . . . The Vatican is following the savage policies of capitalism that becomes disinterested in anyone who does not produce or consume. If since they (the Maya Indians) do not produce or consume, they have right to live. They do not count and should not be taken into account seems an exaggeration to put it in this way. But this is what is happening in Mexico Church authorities, including Papal Nuncio Justo Mullis, insist that Bishop Vera López’s removal and reassignment was the decision unrelated to pressures from the Mexican government, the military, or any other vested interest groups. The Bishop’s vow of obedience obligated him to accept the new appointment to Saltillo.

Beyond the usual rumors of Vatican intrigue, and hearsay about certain Mexican Bishops having a say in the matter, the fact remains that diocese of San Cristóbal de las Casas is now vacant. What will the Vatican do next?

If it does not immediately name a bishop, it can name a tempor administrator, who will have limited power, able to make few serious decisions. Essentially, a lame duck, holding things together until a bishop is named. People in Chiapas speculate that since a new president is elected in June, current President Ernesto Zedillo has not wanted bloody his hands with the Chiapas conflict. He has deported forelegers and press, and militarized the state with half of México’s National Guard. He seems to want to leave it to his successor to find a way out of this embarrassing political quagmire.

The Catholic Church, on the other hand, is perceived by some as punishing them for unknown causes. One told me he felt the Church had chosen, like Pontius Pilate, to wash its hands of Chiapas. “We are Indians. When has anyone ever cared about us?” Dis: has come full swing. And now the Indians do not know whom they ever trust again. They have been wounded by the Vatican’s decision to remove their bishop.

With no protection from the Catholic Church, this flock of Indians waits patiently for the inevitable slaughter. Ironically, these Indians are subject to canonization one hundred years from now! If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.
