This document consists of all 26 issues of Volume 10 of "The Hispanic Outlook in Higher Education," a bimonthly journal that addresses issues in higher education for Hispanic Americans. Each issue contains several feature articles, a policy update column called "Outlook on Washington," a description of an exemplary program, and a sample student success story. Among topics addressed by feature articles for each issue are: (1) Hispanic Americans and Ivy League colleges; (2) community college opportunities for Hispanic Americans; (3) celebrating Hispanic heritage; (4) law schools, Hispanics, and the Supreme Court; (5) top picks in colleges for Hispanic American students; (6) land grant colleges; (7) Hispanic Americans in collegiate athletics; (8) award winning journalists and their interest in Hispanic American issues; (9) financial aid for Hispanic students; (10) Hispanic college faculty members; (11) Latina success; (12) private colleges and Hispanic Americans; (13) Hispanic administrators of community colleges; (14) campus diversity; (15) graduate school opportunities for Hispanic Americans; (16) top 100 colleges for Hispanics; (17) Latino issues that cross border between the United States and Mexico; (18) Hispanics in the health professions; (19) minority student orientation programs; (20) scholarships for Hispanic Americans; (21) Hispanic students, professors, and heritage; (22) college admissions examinations; (23) Hispanic resources at the Library of Congress; (24) Internet resources and financial aid; (25) 10th anniversary of "Hispanic Outlook for in Higher Education"; and (26) index to volume 10 and minority teachers. Ivy League Pursues Gifted Hispanics
V.P. or Ph.D.?

Some titles last as long as the job... others last a lifetime.

Sure, a corporate career can be fast-paced... exciting. But if you were to obtain your business doctorate, you would not only have a stimulating, lifelong career, you would have a lifelong influence on others, as well.

If you’re an African-American, Hispanic-American, or Native American, The PhD Project is your link to your doctorate... the definitive source for everything you need to know to reach that goal. Think of it as your "Ph.D. guidance counselor."

Then, think about this — obtaining your doctorate and becoming a business school professor will, in turn, encourage greater minority participation in business careers, as well as better prepare all students to work in a diverse environment. It has far more significance than a career move — it is your opportunity to realize a dream, to make a difference, to mentor a generation and, ultimately, to diversify America's business leadership.

The PhD Project was created for those with excellent academic credentials, the commitment and passion needed to enter the field of higher education, and the daring to take a risk. If you feel that you fit that description, call 1-888-2GET-A-PHD or visit us at www.phdproject.com for complete details.

Because you may be "V.P." today, but you could be "Dr." forever.

For more information, call

College Completion Realities

BY GUSTAVO A. MELLANDER

As we begin a new academic year there is enthusiasm and hope on every college campus. And that is good—so it is invigorating and motivating. There are many reasons for Hispanics to be encouraged. Over the past twenty years, many have successfully completed college. It is useful and proper to reflect upon that past and on what has been accomplished.

However, sometimes we are blinded by the successes we have seen on our campuses. There is a larger picture to be considered.

Census Realities
The latest U.S. college completion rates have been released in Washington. They aren't particularly encouraging for Hispanics. Improvement is evident, but percent college completion rates remain proportionally higher for Caucasians/ Anglos and Blacks than for Hispanics.

In its report entitled Educational Attainment in the United States, U.S. Census Bureau data clearly indicate time and time again that Hispanics lag behind, and in third place, among the three largest ethnic groups in the country. For instance, 24.6 percent of Whites had obtained a bachelors' or higher degree by 1997. That contrasts with 13.3 percent for Blacks and 10.3 percent for Hispanics.

It also reports that 1 percent of Whites had achieved some college or other post-secondary education by 1997, compared with 30 percent of Blacks and 28.8 for Hispanics. In short, as a nation, more Americans are attending and finishing college. It is the entry-level requirement for professional jobs. And the "best" jobs nowadays require some graduate work.

Hispanics still come up short in all categories. By contrast, Asians are doing very well. They exceeded all other groups by far. They log in with an admirable 42.2 percent holding at least a bachelor's degree, and 67.7 percent with some college or other post-secondary education in 1997.

Colleges, universities, and think tanks should study the reasons for their success so those formulas can be shared with all Americans. We all know of some anecdotal reasons why Asians succeed in our educational system. It would be helpful to study the issue in greater detail and share the findings.

Young Adults
Taken as a whole, the educational attainment of those groups who have historically been underserved is up. There has also been a dramatic improvement in educational attainment for young adults (ages 25 to 29). Keeping within that age group the Census reports that 32.8 percent of Whites, 20.7 percent of Blacks, and 33.3 of Hispanics had some college education in 1997. Further, 28.9 percent of Whites, 14.4 percent of Blacks, and 17.3 percent of Hispanics held a bachelor's or higher degree.

Within that age cohort, Asians excelled once again. A remarkable 26 percent of Asians in that group completed some college and 50.5 percent had earned degrees. A breakdown of associate's degrees earned is not provided. If it had been, Hispanic achievement would have been higher since most Hispanics begin their higher education journey at a community college.

High School Completion
Another serious problem that Hispanics face is the high attrition of students long before they reach college age. For both Blacks and Whites, high school completion in the 25-year-older group was at record-high levels in 1997, according to the Census.

"The black/white high school attainment gap has narrowed for all adults, as the proportion of students obtaining a high school degree has increased consistently and considerably over the past decade," the report revealed. It said that the Black/White differential in the proportion of high school graduates had narrowed from 136 percentage points in 1987—when completion for Blacks was 53.4 percent and for Whites, 77 percent—to about eight percentage points in 1997.

Other Washington sources indicate that last year, 83 percent of Whites, 74.9 percent of Blacks, and 52.5 percent of Hispanics were high school graduates. This is the first year that more than 50 percent of Hispanics had finished high school.

That is the good news, a trend in the right direction. Yet like all data, it can be misleading. These figures, for instance, hide the fact that in some Hispanic communities more than 50 percent of all students never graduate from high schools. The reasons are well known to all who have cared to study the issue. A system burdened with age-old prejudices and negative assumptions, combined with financial constraints, language barriers, and a continuing flow of immigrants, has led to frustration, dropouts and failure.

That is bad, very bad, and it doesn't even address the psychological scars, feelings of inferiority, and low self-esteem that doom those youngsters not to reach their highest potential.

What to Do?
Hispanics will not graduate from our colleges in their rightful proportions until more of them complete high school. Too few Hispanics survive our high schools. Fewer still go to college. And of those, only 33 percent of all Hispanics who go to college actually receive a degree. This is also misleading because most of the degrees earned by Hispanics are two-year—community college degrees. Few transfer to four-year institutions and graduate.

To continue to the end of the spectrum, Hispanics earn very few doctorates. The latest figures, as collected by the University of Chicago, reflect that 42,070 doctorates were awarded in 1997, the latest year available. Of that number, Hispanics earned the smallest percentage of any ethnic group in this country: 3.8 percent. Black earned 4.8 percent; Asians, 10.3 percent; and Whites, 28 percent.

Many colleges have begun to reach out to high school and middle school students. One has to make that connection early on. Students must be encouraged to think of college while still in grades. They should grow comfortable with colleges and in believing that they are fully worthy an capable of attending. It should be a question of "if I go to college I should be "when I go to college.'

College professors must get involved. Busy as they are, they cannot isolate themselves from the K-12 Hispanic experience. Colleges as not superior or separate. They are part of the continuum, and if the pipeline is clogged, Hispanics will not get to college.

Dr. Mellander is a professor at George Mason University.
Dear Colleagues:

No matter how reluctantly students and faculty bid adios to summer, getting back to school generates an impressive amount of energy.

This semester, the energy field is larger than ever. A record 14.9 million students have enrolled in the nation's colleges and universities. And 53.2 million are entering our public and private K-12 institutions, breaking prior records for the fourth year running.

K-12 increases are projected for each of the next seven years, the largest in the high school grades. Arizona is facing a secondary school population gain of 35 percent.

Our goal, one we share with our subscribers, is to help assure that a healthy number of those graduating from high schools, then entering and persisting in college, are Hispanic. Articles in this Back-to-School issue touch on a number of ways in which this enabling takes place.

Getting off to a solid start is one example. The courageous Intercultural Development Research Association is questioning the wisdom of the politically popular move, in New York and elsewhere, to halt "social promotion." IDRA is pressing for alternatives that offer real help and hope to the children, largely poor and minority, who would be "left back."

Getting into the best possible school is another example. Some hold that we learn as much from fellow students as we do from faculty. Harvard sends recruiters to high schools in part to talk with high school counselors, who have not always recognized, says Harvard, an eligible Hispanic in their midst.

Learning the ropes is an important aspect of any new venture. The first-year-student orientation course and the prescriptions for a civil classroom described herein make for a positive early adjustment to academia and to campus life.

Understanding and seizing political power is basic to all successful quests. Increasingly, Latinos and Latinas are awakening to and even taking over campus politics—great preparation for effective activism and leadership beyond the campus years.

With your participation as guest editors and subscribers, The Hispanic Outlook in Higher Education will continue to present issues of special interest to a community that commands increasing respect and influence. And one of its most popular features, People, Places, and Publications, your guide to career moves, honors, new grants, and more, is now being posted on the internet at www.HispanicOutlook.com.

Welcome back. May the new school year bring all the positive outcomes that you desire.

Sincerely,

Adalyn Hixson
Editor
Ivy League Schools & Latino Students

Harvard, Princeton, & Yale working harder to recruit!

BY
IÑES PINTO ALICEA

Only Harvard doubled the percentage of Latino students it enrolled over the last decade, from four to eight percent of the university's 1,614 students.

Lowdes Gómez, an admissions officer of Cuban descent at Harvard University, knows that the biggest challenge in recruiting a talented Latino student from a different part of the country is getting the parents to agree that the long-distance move to Cambridge, Mass., will benefit the student immensely.

"I've heard parents say, 'I don't want my daughter to go away,'" said Gómez, 26 and a graduate herself of Harvard. "I know my parents didn't want me to come to Harvard. Once they knew the resources you have at your disposal at this school and the experiences you will have, then the parents will want that student here. All parents want what's best for their children."

Harvard is not the only Ivy League school to face this challenge of recruiting gifted Latinos and other minorities from around the country. Officials from Princeton and Yale Universities, who were interviewed for this story, reported that getting students and their families to overcome their concerns about living far apart was one of the biggest challenges in recruiting minorities.

Gómez said that one of the best recruiting tools to help the potential students and their families resolve their fears is sending Ivy League students of similar backgrounds as the recruits to their high schools to meet with them.

"Their visits bring it home in a way that no publication could," said Gómez. "It tells the student personally that there is someone like them there. It really works. Just because no one in their family has been to college or they consider going away to college a foreign concept does not mean that there is no one like them at the campus."

The USA Group Foundation, a higher education research organization based in Indianapolis, Ind., said in its May 1999 publication Top Ten Trends in Enrollment Management that many colleges and universities find that hosting college visits for talented students and telecounseling (calling prospective students regularly) are more effective recruiting tools than visits by campus representatives to high schools. In a recent survey by the organization, 78 percent of private campuses reported that hosting campus visit days for high school students was a "very effective" tool, and 53 percent of the private schools gave equally high marks to telecounseling, up from 50 percent in 1995.

But, Gómez said, the high school visits by Harvard officials and students have proved highly effective because they give them an opportunity not only to meet with parents and students but also with high school counselors, who sometimes might not know that one of their students is a viable candidate for an Ivy League school.

Robert Jackson, Yale University's director of minority recruitment, said that the school also has a number of minority recruiters on its staff as well as minority students who assist in outreach to minority communities. The school not only sends Yale students and recruiters to high school campuses nationwide, but it also routinely calls prospective students, and the dean of admissions sends students of color letters about life at Yale and the merits of going to school there. School officials also visit junior high schools to emphasize "the importance of taking school seriously."

"It makes them know it's a realistic goal to attend Yale or Harvard.
or any other Ivy League school,” Jackson said. That personal attention, however, costs money, and so the recruitment of students, in general, has become a larger part of many universities’ budgets in recent years.

In fact, the budgets for marketing, recruiting, and admissions at private universities have increased significantly in the last few years. According to the USA Group Foundation, these budgets at private universities grew on the average about 19 percent (to $745,583) from 1995 to 1997. That compares to a 45 percent increase (to $965,383) for public universities’ budgets for marketing, recruiting, and admissions.

Yale has slowly increased the numbers of Latino students matriculating at and graduating from the university over the past decade. In the 1988-89 school year, 62 of the 1,275 students or 4.8 percent who matriculated were Latino compared to 63 percent or 82 of 1,299 students in 1998, according to statistics provided by the university. Latinos earned 65 percent of the bachelor’s degrees granted by the university in 1998 (86 out of 1,394) compared to 2.4 percent in 1989 (31 out of 1,268).

Growth in Latino enrollment was similar at Princeton over the same time frame. Latinos represented 3.8 percent of Princeton’s 4,570 students in 1988. By 1998, Latinos comprised 6.3 percent of the university’s 4,600. Over the same time frame, only Harvard doubled the percentage of Latino students that it enrolled. In 1988,

Latinos comprised four percent of the university’s 1,636 students, but by 1998, the Latino student population grew to eight percent of the university’s 1,644 students.

Another challenge that the Ivy League schools face in recruiting is competition—all the nation’s top minority students and try to outdo one another with different offerings to attract, keep, allow exploration of ethnic and racial diversity, and improve the students’ quality of campus life.

Yale University, for example, offers Ethnicity, Race and Migration, an interdisciplinary major that studies the forces that have created a multicultural, multiethnic, and multiracial world, said a Yale brochure entitled “Celebrating Diversity.” The university also offers courses for students interested in learning about different facets of diversity. Moreover, minority students are also assigned to ethnic counselors, who provide advice and support. There is a dean of Mexican American students and a dean of Puerto Rican students should Latinos need assistance with any matter involving campus life. Yale students also can become involved in minority student organizations and participate in cultural centers if they want to explore further the ethnic or racial side of themselves. “You don’t have to get involved in these things,” said Jackson, adding, however, that the university wants to go to certain lengths to increase students’ comfort level.

Princeton tries to incorporate racial, ethnic, and gender differences in many of its regular class offerings rather than just offer classes on ethnic diversity, said Justin Harmon, an alumnus and director of communications at Princeton University, Princeton, N.J. But Princeton does have what’s known as its Third World Center, a gathering place for minority students, which, Harmon said, was named in the 1960s “to celebrate diversity.”

Harvard tries to take a different approach, said Gomez. There are no ethnic-themed houses and no minority student centers. But students are the forces behind many of the changes for more diversity at the campus. Gomez said that students have been advocating an ethnic studies program but the university is reluctant to establish it. The university has been more open to individual class offerings, such as one in Latino music.

Moreover, students have been instrumental in getting minority faculty hired at the university, said Dr. Allen Counter, a professor at the Harvard Medical School and an active participant at the Harvard Foundation, a set up for undergraduate students to improve cultural understanding through guest speakers, activities, and other projects.

Counter said, for example, that students were pivotal in the hiring of the university’s first Puerto Rican full professor, Dr. Walter Frontera, head of the Department of Physical Medicine and Rehabilitation and the Earle P and Ida S. Charlton associate professor of physical medicine and rehabilitation at Spaulding Hospital.

“Those is progress being made, but still more needs to be done,” said Counter of the hiring of minority faculty. “The university needs to make a stronger effort in recruiting Latino faculty.”

There were 458 Latino medical and nonmedical faculty members at Harvard out of 16,579 faculty members during 1998, according
to the Harvard University 1998 Affirmative Action Plan. The current percentage of Latino Faculty—2.3 percent—has not changed significantly since 1988 when Latinos comprised 19.8 percent of all faculty members at Harvard.

The percentage of Latino faculty at Yale University was equally low—2.3 percent—or 4 Latinos out of 3,396 faculty members. Minorities with the best representation at Yale are Asians or Pacific Islanders, with 70 faculty members or nearly 2 percent of the faculty. But the percentage of Latino faculty has increased since 1988 when Latinos comprised only 1.4 percent or 34 of the university's 2,453 faculty members.

The percentage of Latino faculty at Princeton grew to only three percent in 1999 from two percent in 1999. In 1999, 29 out of 936 faculty members were Latino, said Harmon.

**But, Gómez said, the high school visits by Harvard officials and students have proved highly effective because they give them the opportunity to meet not only with parents and students but also with high school counselors, who sometimes might not know that one of their students is a viable candidate for an Ivy League school.**

Officials at all three Ivy League universities expressed concern about the Hopwood ruling in Texas, which ended the use of a person's race as a factor for admission to college in the region, as well as an anti-affirmative action initiative passed by California voters.

"We're thinking a lot about what these rulings might portend for the future of diversity," said Harmon. "We're watching the evolving legal climate nationally."

Harvard President Neil L. Rudenstine expressed his concern in "The President's Report 1993-1995" on diversity about the legal challenges facing diversity and affirmative action in higher education. Rudenstine said that while people in the 1950s could not imagine that "so great a number of talented and dissimilar students would be studying together and learning from one another after so brief a passage of time," more strides need to be made to further diversify campuses.

"This is not a moment for national self-con-
CUNY under Attack: Pass or Fail
But Are the Criticisms Valid?

BY GARY M. STERN

"Looking at whether students graduate within two years is the worst possible way to look at students at an institution like the City University of New York," declares Bernard Sohmer, chair of the University Faculty Senate and a professor of math at the City College of New York.

A report by a mayoral task force on the City University of New York blasts CUNY's six community colleges for various inadequacies, including graduating only one percent of enrolled students in two years and not offering sufficient testing to ensure that remediation has taught basic skills. Though the community colleges have been a launching pad in higher education for Hispanic, minority, and immigrant students, the report, issued by its chair, Benno Schmidt, former Yale University president and chairman of the for-profit Edison Project, criticized community colleges for not having college-level courses, not articulating with four-year schools, and for having inadequate standards. But community colleges have numerous defenders, including Joanne Reitano, who writes in a chapter of Gateways to Democracy: Urban Community Colleges and the American Future (Jossey Bass, 1999) that CUNY's community colleges serve "three sometimes contradictory purposes—acting as a 'buffer' for senior colleges reluctant to admit nontraditional students, providing a 'springboard' for people seeking a second chance, and offering a safety net for those struggling to overcome educational disadvantages."

Schmidt's report recommended sweeping changes at CUNY's 21 two-year and four-year colleges, attended by 200,000 students, including a reorganization, vouchers for taking remedial courses outside of the system, strengthening standards, maintaining open admissions—creating a three-tier system of colleges based on SAT scores, high school class ranking, and Regents diplomas. But critics say that the report ignores the community college's strengths, overlooks students' complex needs and economic poverty, dismisses the failings of New York's high school system, and downplays funding, which has been cut by the current administration.

CUNY community colleges are an entry for minority students into higher education. The 1997 CUNY Data Book revealed its students' ethnic breakdown as 33 percent Hispanic, 33 percent African American, 23 percent White, and 10 percent Asian, amounting to 73 percent minority students. Nearly one-half of CUNY students are immigrants whose native language is not English. More than half hail from families that earn $20,000 or less, putting them at poverty level.

Herman Badillo, newly appointed CUNY chair of the board, told Hispanic Outlook that the Schmidt report's major criticism of community colleges is that they "give students college work for which they are not ready. Given the fact that 87 percent of students require some degree of remediation, students should be prepared for college work first. We should emphasize remediation. Secondly, we have an entrance test to evaluate remediation but no exit test, so we have no way of determining if students have learned what they are supposed to learn." Badillo pointed to Hostos Community College, where students were granted associate's degrees but could not pass a basic reading or writing test.

Badillo also noted that students receive Tuition Assistance Plan money for two years, which is then exhausted before they graduate "Remediation," he said, "should be free and separate from taking college courses." The Schmidt report proposes expanding the College Now program so that remedial work is offered to students in ninth to twelfth grades to better prepare them for college. Badillo also
whether students graduate within two years is the worst possible way to look at students at an institution like the City University of New York,” declares Bernard Sohn, chair of the University Faculty Senate and a professor of math at the City College of New York. “Our students lead very complicated lives;” he says, Most work either full-time or part-time, many take care of their parents and raise children, face immigration issues, and can only attend classes on a part-time basis, so judging them on the basis of a fixed time period is irrelevant.”

The 1997 CUNY Student Data Book reveals that as of 1993, 14.6 percent of students earned their associate’s degree within two years; 8.3 percent earned their associate’s degree within three years; 16.8 percent, within four years; and as of 1994, 36 percent within six years. “If you give students six years, over 30 percent graduate,” noted Ed Sullivan, chair of the Higher Education Committee of the New York State Assembly, “If you give them eight years, over 40 percent graduate. Those numbers are higher than the national average for people getting their associate’s degrees.” He also noted that the report is using a harsh yardstick to measure student performance, and the mayor, who is running for New York senator, is exploiting the findings for his own political interests. Sullivan acknowledged that a student who fails three of the basic assessment tests might require more educational assistance before attending community college.

The report also overlooks the transfer of CUNY students from associates programs to CUNY four-year schools, noted Dean Savage, a sociology professor at Queens College. In fact, 19 percent of students at Kingsborough, 18 percent at Queensborough, 16 percent at LaGuardia, 16 percent at Queensborough, 16 percent at BMCC, and 11 percent at Bronx and Hostos transferred to CUNY’s four-year schools. Those percentages do not include any transfers to other four-year colleges. In addition, many transfer before graduation, enter private colleges, or join the workforce.

“The report is misleading because it gives a false impression of some mysterious failing on the part of either the student, the faculty, or administration,” said Dr. Robert Hollander, former member of the Academic Policy Program and Research Committee of the CUNY board of trustees and an assistant adjunct professor at Hunter College. He cited several reasons for students’ inability to graduate within two years, including their poverty, which forces most of them to work. In fact, 32 percent of CUNY’s (including four-year schools) students work full-time, 27 percent work part-time, and nearly 30 percent take care of children. Hollander also noted the insufficient academic preparation offered at New York City’s public high schools. Further, the report clusters part-time and full-time students and includes students who withdraw for financial reasons, which distorts its accuracy. He proposes that a school should be measured by how it improves a student’s performance, not by “cheap statistics.”
Kleiman said. New York Technical College, which offers both four-year and associate’s degrees, has designed a program with Bell

Schmidt’s CUNY report was not a scathing attack on community colleges, but faulted them for not adapting to its student population.

claim that students take a long time to graduate because most students are poor and work. More than half of community college students nationwide work, but other schools do a much better job of graduating and offering students more marketable skills, she said.

Counters David Lavin, a professor of sociology at the CUNY Graduate School and Lehman College, who researched the effects of a CUNY degree over a 15-year period for the book he co-authored, *Changing the Odds* (Yale University Press). “A degree from a four-year college and community college provided clear benefits beyond a high school diploma.”

The Schmidt report recommended better articulation between four-year CUNY colleges and community colleges. In addition, students should not have to use their financial aid to pay for their own remedial courses. It also criticized community colleges for not offering diagnostic tests, agreeing on remedial standards, or finding ways to improve student skills faster. The major failure of CUNY colleges was “its inability to define itself,” Renfro said, quoting the 11-volume report.

But though he is critical of Schmidt’s report, sociologist David Lavin noted that it pointed out the lack of substantive research on remedial courses. “Thirty years after open admissions began—and we still don’t know what works and doesn’t work about remedial efforts,” he said.

Despite the range of opinions regarding the CUNY report findings, the report leads to further research and problem-solving in that area.

Herman Badillo, chair of the CUNY board

Atlantic to offer its entry-level staff a two-year degree in telecommunication. “Bell Atlantic needed to invest in training to be competitive, increase the skill level of its workforce, to complete a new fleet of super technicians,” he said.

asserted Sally Renfro, director of research at the CUNY Task Force. The system “should offer more career-oriented programs,” she said. Another underlying issue is that more than half of community college students major in liberal

**“Remediation should be free and separate from taking college courses.”**

**HERMAN BADILLO, CHAIR OF CUNY BOARD OF TRUSTEES**

Nonetheless, he recommended that CUNY community colleges establish a more unified approach to skill training, which has been done in North Carolina, California, and Iowa. He estimated that CUNY’s two-year schools train about 4,500 skilled workers annually while other states train upwards of 20,000 students.
Looking Beyond the Rankings
HO checks the climate at some top-ranked schools for Hispanics

BY JEFF SIMMONS

Over the last four years, Alex Schwartzman has immersed himself in the life of ethnic organizations at his campus, the University of Texas in Austin. When he returns to school this fall, he will continue his work with the Latin American Association, the Mexican Students Association, and the European Students Association.

“I chose the University of Texas because it was a very good mix of all the things I needed for college,” says the 24-year-old. And pivotal to that mix are its academic record, its support system, and its proximity to Mexico, where Schwartzman can easily return home to visit his family.

“It is academically very well known and respected,” the senior says. “This university gives so much support and motivates equality and promotes all kinds of activities that make Hispanics, among others, feel more accepted and prepared for the future.” Such praise would likely bring a smile to the face of any administrators on campus. After all, the school has made a concerted effort to create a welcoming environment.

Administrators speak about how a school can thrive if it reaches out and retains a diverse student population in this era. So it wouldn’t seem surprising that the university was among 25 recently selected by Hispanic magazine as the top colleges and universities for Hispanic students across the nation.

The figures are initially obtained by the U.S. Department of Education’s Center for Education Statistics, which compiles numbers supplied by the more than 3,500 colleges and universities across the nation. But numbers say only so much. They might speak volumes about the demographics of a school and its surrounding communities but little about campus life, support systems, ethnic programs, and the curriculum—all aspects that students see to know about when choosing the right college.

“Most kids like to look at the basics: the majors, what the population is in terms of diversity, the size of the student body, the student-faculty ratio, and the proximity to home sometimes is very important,” says Antonio Aponiente, who operates an annual Latino college expo in Manhattan.

To really into knowing that there are other students and organizations that can go to campus for support and that there is programming that interests them.”

In its preface to the article rating the Top 25, Hispanic magazine said that the anointed institu,
“offer an excellent education” and pointed out that “we considered only those colleges and universities with a demonstrated commitment to diversity.”

HO reviewed Hispanic magazine’s list and HO’s own rankings, and then contacted several of the selected “top” schools to dig just a bit deeper to determine whether schools do indeed put a premium on diversity efforts. We asked about diversity programs, campus life, faculty, and the curriculum. By no means is this list the final word. In fact, it is an attempt to go beyond skimming the surface. But it should provide more insight into the schools and help guide students when they select one.

We also spoke to students to determine whether they agreed or disagreed. Generally, many students were like Schwartzman, a strong believer in his school, even while admitting that it needs to pay more attention to some ingrained problems.

University of Texas at Austin is the largest in the state’s university system and in the United States, with more than 49,000 students on its 130 acres. It has seen its enrollment of non-White students escalate for years, up until the mid ‘90s, and has paid more attention to recruitment and retention efforts.

Non-White enrollment rose from 21 percent during the 1990-91 academic year to 30.2 percent during the 1994-95 academic year. Over the last school year, 13.9 percent of undergraduates—5,154 were Hispanic, and 6.8 percent—623 were graduate students. Those numbers are on the upswing, after plummeting briefly. The downturn was due to a 1996 circuit court ruling—known as the Hopwood decision—that dismantled the school’s affirmative action program and stated that the school couldn’t use race and ethnicity in awarding scholarships.

James Hill, the school’s vice president for human resources, estimates that minority enrollment plummeted by half as a result. But he paints a portrait of rebirth, explaining how the decision has forced the university to broaden its outreach and recruitment.

For one, House Bill 388 was enacted in 1996 and provides that the top 10 percent of all Texas high school graduates automatically qualify to attend any institution of higher learning in Texas. The university now dispatches recruiters to schools with high minority concentrations to sell its virtues.

As well, the school recognized that many students of color could not afford the tuition and needed financial aid. So it started a new scholarship fund targeting schools that traditionally have not sent students to the Austin campus. “We checked with the attorney general to make sure it was legal. As long as we go into high schools and don’t just earmark the scholarships for Hispanic or Black students, but earmark them for all students,” it is legal, he says. “It just so happens you don’t have many White students at those schools.”

Professors now travel to high schools in the state to work with teachers and to inform them of the skills that students need to thrive in college. That also has helped with retention, he says, calling it “a breakthrough.” Once they arrive on campus, students will find heavy student involvement in campus life. There are 30 Chicano and Mexican American student organizations, including the Hispanic Business Student Association, Hispanic journalists, Chicano/Hispanic Law Students’ Association, and Minority Engineering Society. Often there are Hispanic speakers on campus as part of a speaker series.

If students require help, there is a Mapping a Plan for Success Program, which provides peer advisers and referrals for tutoring for minority students. Officials also have established a Minority Information Center in its Teaching Center, and there is a Mexican American Studies degree program, which was established in 1970.

Schwartzman says that the school is strongest in “promoting activities for and from Hispanics” in the community. “The Mexican Center and the Institute of Latin American Studies is the biggest in the country. The Benson Latin American Library is one of the most important in the world,” he says.

But he points to some problems. When asked where the school is weakest, he says that the school needs to work harder at “controlling conflicts when they arise,” but he does not elaborate other than to say that there is too much bureaucracy and that this pertains to all students, not only Hispanics.

He also sings a common refrain, one echoed by faculty and administration: there are too few tenured faculty of color. This is an area that the school readily acknowledges and describes as endemic at all institutions of higher learning. “The university has not made a real effort to promote this,” he says. “I would say they need to try harder.”

Adds Hill: “It’s not nearly to the extent that
"MIT is not a very big university as far as undergraduates, but there is a small but active Latino population on campus," says Martinez, who is a member of the school's Mexican American organization, LUCIMA, the Society of Hispanic Professional Engineers, and the Mexican American Engineers in Sciences. "I have never really felt out of place," says Martinez, who is from Brownsville, Texas, and will graduate this December. The number of Latino students has grown dramatically over the last decade, from 353 to 555. (The school's handbook, however, notes that there were 440 Latino undergraduates—out of 4,372—and 95 graduates—out of 5,513—during the 1998-99 school year.)

The school's press office referred questions to two individuals on campus. One, Regina Caines, the Equal Opportunity, Affirmative Action officer, briefly answered questions, saying the school has sponsored "several diversity-oriented programs" and started "intercultural group discussions." The school has an Office of Minority Education to support students. Caines and the school's press office referred our remaining questions to Leo Osgood, the dean of students and director of the Office of Minority Education. Osgood did not respond.

Other schools were readily more accessible and open about their strengths and weaknesses. For example, the Newark campus of Rutgers, New Jersey's state university. Unlike the more daunting Rutgers in New Brunswick, this is a much smaller campus where, it's not so easy to "get lost," as one student put it. In fact, the school—with just under 10,000 students in the heart of the urban city—has strong student organization and a multicultural student affairs office designed to bring communities together. Students hail from more than 75 countries.

"It's friendly and small enough so students don't get lost," says James Crede, assistant dean for multicultural student affairs. He cites the surrounding area as a demographic virtue. "You are coming to a largely minority city."

Echoing the other schools in the Top 25, Rutgers has a Latin American studies program. It also tries to assist economically troubled students by recruiting them to its law school through a Minority Student Program, which provides outreach to area high schools to help minority students gain access to legal education. The school has a handful of groups for Hispanic students, including the Latinos United Network, the Hispanic Society, and the Cuban Cultural Club. On
campus, there are a number of cultural events, including a program for Hispanic Heritage and Puerto Rican Months. And recently, Credle accompanied 32 students to a national conference on race and ethnicity in Memphis, Tenn.

"We all work together here," says Patti Maldonado, president of the Puerto Rican Organization. She readily points out that she is not even Puerto Rican. "It doesn't matter. The rest of my board is also diverse, three Puerto Ricans, a Peruvian, and a Honduran." Maldonado, who is starting her senior year this fall as an economics major, says that the student-sponsored activities display a receptive atmosphere to minority students. There are Spanish authors who visit the campus, salsa workshops, fairs, and an annual Latino Caucus Dinner to thank professors and organizations and business leaders who have supported the student groups. However, when asked whether the groups have received much support from the administration, she admits there have been "little problems" but refuses to elaborate.

Credle acknowledges that the Newark campus does not display the same diversity at the management level as it does in its student body. "We do have middle-level and lower-level people of color who are involved at various supervisory and support positions with students," he says. "But when it comes to faculty who have been there for a long time, you find less of us involved, as well as in upper-level management," Credle says. "It sends a message to me that we have come so far but still have got a ways to go...I think that that is the challenge as far as I'm concerned."

The challenge for San Diego State University in recent years has been to maintain its diversity at the administrative level and at its student level. "I and many others will retire in the next few years, and we're concerned about who will be replacing us, as staff directors, associate directors, as faculty. We don't have the numbers of minorities to begin with," says Gus Chavez, director of the university's Office of Educational Opportunities Program and Ethnic Affairs. Chavez, who is arranging a Sacramento conference on Latinos in higher education to "set an agenda" come January, says the problem is widespread and warrants immediate attention. The school enrolled close to 30,000 undergraduates and graduate students, about a fifth of whom are Latino. It employs more than 4,000 faculty, staff, and administrators. Of the 2,355 faculty members, 48 Latinos were full-time and 19 were part-time, including teaching assistants.

But he also says that faculty is the school's strong point: despite ethnicity, they are very involved in the students' academic performance. They submit midsemester reports on Equal Opportunity Program students. "They might not know the language or be totally familiar with our culture, but they are reaching out to our students," he says. The school's Parent Institute for Quality Education reaches out to parents in the public elementary, middle, and high schools in the county and teaches them—about 90 percent of whom are Latino—how the school system works and how to advocate for better education.

"The university has communicated to the Latino community that San Diego State belongs to them," says Chavez. On campus, there are 18 Latino and Chicano student organizations, ones focusing on business or social activities, and fraternities and sororities. However, there is not a Multicultural Office on campus, although Chavez says there are discussions on starting one.

The second challenge the school now faces is retaining its student diversity: the state recently designated it an "impacted" campus, so it is raising its admissions requirements for grade point averages and test scores. The school requested the change because of the steep number of applications it receives: 20,000 last year, for instance. When only 5,000 first-year students will be enrolled.

"We're concerned that it might have an impact on the non-White student enrollment," Chavez says. The result: the school is now reaching out to seventh, eighth, and ninth grades in the area to better prepare them to attend college.

The school provides a Latin American Studies Program, and a number of bilingual courses in its master's and doctoral programs. It has two cultural organizations and one combination fraternity-sorority, and has a committee on Latin American and Caribbean studies. The business school also has an exchange program with Brazil. Sklarin points out that for many
Latino students, attending a Catholic institution is a main attraction. "There is a link to the Catholic tradition at St. John's. St. John's reaches out to all groups, so for many of these students they may have had some earlier tie to the university through a community activity," says William Gingerich, associate provost for Graduate Studies, Research, and International Programs.

Moses named a cultural diversity task force of students, staff, and administrators to ensure that everything from the curriculum to student affairs addressed the needs of the study body. "The school invites Latino speakers on campus and encourages students to work with the institute. It sends a message that we care about Dominican life and the culture, particularly as it plays out in New York City and the United States," she says.

Hispanics account for the second largest group on campus: 2,804 during the 1998-99 school year, while there were 3,311 African Americans and 871 White students. But of note is the decrease in the total student population. There were 8,863 students on campus this past academic year. While that is just more than 100 more than in the previous year, it is still much less than in every other year since 1989.

There are a number of other concerns on campus. For one, Moses readily admits that the school needs to work on "cross-cultural communication" among students so that they can appreciate each other's heritage. It also is a commuter-campus, so students don't always remain active after class. So the school is considering starting off-campus dorms.

The school has weathered more than two decades of financial cuts. It also has come under fierce attack from a central Board of Trustees and state Department of Education that has faulted it for low achievement, particularly in its teaching school, from which many students have failed the exam to earn a teaching license. Most recently, trustees encouraged Moses to leave, and she tendered her resignation two weeks after the interview with HO. Trustees say that it's time for new leadership at the school, to reverse a downward spiral that has crippled many students' chances at a good education.

Moses blames much of the problem on the tight fiscal times. That is why it has come to rely more heavily on part-timers than in the past. Over the last six years, City has hired 28 new faculty, half of whom are underrepresented minorities. Of the 1,420 full-time, part-time, and tenure faculty, 94 are Latino, while 266 are African-American and 963 are White.

"That still doesn't meet all students' hopes. "When you look to the faculty and you don't see a Dominican, you are concerned," says Ydanis Rodriguez, a graduate student at the school. He adds that the school needs to do a better job recruiting by reaching out to area high schools to attract the "best and brightest."

City College is part of the City University of New York system, which recently moved to end remedial services at its four-year campuses. Instead, students who can't pass basic tests will have to attend two-year colleges first, and critics charge this will slam the door unfairly on many minorities. "We've had 25 years of underfunding, and that has taken its toll," Moses says. "Top students are being wooed by everybody. We have to be competitive with different institutions in New York alone to attract Hispanic students, and we're not quite up to snuff in terms of the latest facilities that we need. If we were able to get additional resources, we'd be the No. 1 college in the country.

"MIT is not a very big university as far as undergraduates, but there is a small but active Latino population on campus," says Martinez, who is a member of the school's Mexican American organization, LUCHA, the Society of Hispanic Professional Engineers, and the Mexican American Engineers in Sciences.
A short time after being named president of Teachers college, Arthur E. Levine received a letter from a "well-known educator" suggesting that the college change its name. Levine relayed that the author of the letter reasoned that Teachers College was, after all, the largest and most comprehensive graduate and professional school of education in the United States. Levine had no problem with the writer's complimentary evaluation of the college.

"Teachers College focuses on education in the broadest sense of the word," reports Levine, "in and out of the classroom and across a lifespan. A third of our students are planning on careers in administration, policy, research, and teaching, in fields ranging across education, health, and psychology." Levine says that the proposal certainly was understandable, but it was at the same time impossible.

"The most valuable possession we have at Teachers College is its name. The name summons a powerful historical legacy," Levine explains that Teachers College began nearly a century ago with the radical mission of preparing "a new breed of professional educators." He notes that in the years since, "Teachers College has been a leader in defining the work of educators and the nature of their field. It has attracted to its faculty the greatest minds in education and hospitals who have led the field." That certainly has been a case. Teachers College has been and will continue to be a leader in education, and a leader in providing innovative educational opportunities for children of many socioeconomic groups. For living up to and beyond its name and for its efforts and impact on the field of education, the name of Teachers College is entire.

The Hispanic Outlook Honor Roll.

Teachers College was founded in 1887 by philanthropist Grace Hoadley Dodge and philosopher Murray Butler to provide "a new of schooling" for teachers of the poor children of New York, "one that combined a humanitarian concern to help others with a scientific approach to human development." The founders recognized the start that professional teachers required knowledge about the conditions under which students learn most effectively. As a result, the college has always included subjects such as educational psychology and education sociology. The founders also insisted that education must be combined with clear ideas about ethics and the nature of a good society. For this reason, programs were developed in subjects such as the theory of education and comparative education.
As the number of school children grew during the 20th century, educators at the college turned their attention to the problems of managing schools as schools became ever more complex. The college rose to the challenge and instituted programs of study in areas of administration, economics, and politics. Other programs were begun in such emerging fields as counseling, curriculum development, and school health care.

More recent issues for the college include the need to contend with the difficult problems of urban education, and with the process of reaffirming the college’s original mission of providing a new kind of education for those left most in need by society or circumstance. Teachers College continues its collaborative research with urban and suburban school systems that strengthen teaching in such fundamental areas as reading, writing, science, mathematics, and the arts. It also prepares leaders to develop and administer psychological and health care programs in schools, hospitals, and community agencies.

On another front, the college advances technology for the classroom, developing new teaching software while keeping teachers abreast of new developments. Teachers College is affiliated with Columbia University but retains its legal and financial independence. The college is the nation’s largest graduate school of education.

Last term there were 5,030 full- and part-time graduate students from all of the United States and more than 80 countries enrolled at the college; 2,565 of these students received financial aid. The college grants approximately $6 million annually in scholarships and fellowships, including International Student Scholarships. In October 2007, Teachers College, Columbia University, established the Arthur Levine Scholars Fund, which, in conjunction with the Arthur J. Levine Endowed Professorship, will provide an opportunity for exceptional students to pursue graduate education at Teachers College. The fund is supported by a generous gift from the Levine family.

Of the total enrollment, 307 students were Hispanic, 543 Africa
American, 422 Asian American, eleven Native American. There were 89 Hispanic master's graduates and 13 Hispanic doctoral graduates during the 1997-1998 school year. Teachers College had 120 full-time faculty in the past academic year, four of whom are Hispanic.

Teachers College is once again in the top rankings of the 1999 *U.S. News and World Report* survey of graduate schools of education. It is a close second in the nation to Harvard University. In specialties ranked by education school deans and senior faculty, Teachers College is first in Curriculum/Instruction; in the top five in Administration/Supervision, Social/Philosophical Foundations, Elementary Teacher, Secondary Teacher, and Higher Education Administration; and in the top ten in Educational Psychology.

The influence on educational policy and practice by Teachers College is greatly felt nationally, but it is also global. Last year, Eduardo Frei, president of Chile, visited Teachers College to help launch a "new era of cooperation." The Chilean Ministry of Education and Teachers College agreed to develop a series of pre-service and in-service training programs for Chilean teachers, and exchange programs with college faculty. At a press conference in Grace Dodge Hall, President Frei said that the agreement with TC could play an important role in education reform in his country. The agreement was the product of negotiations coordinated by Peter Comeau, associate director of the Center for Educational Outreach and Innovation, and representatives of the Chilean Ministry of Education.

Teachers College President Arthur Levine observed, "Chile has been one of the most visionary countries in the world in bringing about reforms."

The quality of education and the subject of access to education have become important in Chile. Since 1990, government spending on social programs, primarily health and education, has doubled. At the same time, the proportion of Chileans living in poverty has declined by almost 50 percent. Under Frei, Chile has lengthened the school year, has linked nearly 3,600 schools to the internet, and has increasingly turned control of schools to local communities.

But the Chilean leader wants to use this partnership with Teachers College to build upon the progress that his country has already made. He remarked, "All the efforts for these reforms take place in the classroom. Now, it is time for those reform efforts to focus on the teachers themselves. Too many teachers lack specialization and suffer from low wages and low morale. That is why we are sending them to centers of excellence in teacher education in North America, South America, Europe, and Asia." President Frei is "especially pleased" that Teachers College will play a key role in this effort, "because of TC's long history with Chile."

There is another effort afoot at Teachers College that should be of interest to Spanish-speaking bilingual educators. Maria Torres-Guzman, associate professor of Bilingual Education, worked with the New York City Board of Education and Spain's Ministry of Education for more than two years to recruit experienced teachers for a pilot program. The program has already begun, sending seven teachers to two school districts in the Bronx to teach Spanish to middle school pupils. The seven Spaniards, all of whom have been teaching for four years, arrived last summer and started their new jobs when school began in the fall of 1998. "Their presence in the system is intended to promote exchanges in educational settings," says Dr. Gomez Decal, who heads the education office at the Spanish Embassy in Washington, D.C. Decal feels that this pilot program will promote better preparation and enhanced foreign language training for teachers in New York City public schools and in Spain. "Moreover," he adds, "this initiative will provide the teachers from Spain with greater fluency in English, which will assist them in their return to Spain. Certainly it will have the added factor of advancing values associated with international relations among students in both countries."

Torres-Guzman observes, "Spain is finding the world changing, and their teachers need to know how to work in multicultural/multilingual settings. So the Ministry is emphasizing that their teachers will learn a lot here, and they are going to go back with these tools." Yet, as the *New York Times* reported of the program: "It may seem odd, in a city with more than a million households in which Spanish is spoken, that the Board of Education has gone all the way to Spain to find people to teach Spanish."

But that's what the program did. And Torres-Guzman points out that New York City children benefit from this seemingly ironic situation. "First of all," Torres-Guzman responds, "the reason why these teachers were brought here is that there is a shortage of teachers who are fluent in Spanish speakers in the New York City Public Schools. These particular teachers are specifically entering school districts where there is a very high need for them, and they are being placed in middle schools to focus on Spanish."

President Arthur E. Levine is proud of his institution's leadership role, a role that has assumed for more than 100 years. Moreover, he points out that this role has become more broadly and universally one of international influence. He assesses, "We live in an age in which our world is changing dramatically and quickly. Our educational institutions and the educators who lead them are being buffeted by demographic, economic, global, and technological change." Levine concludes, "Our work at Teachers College today, as it was yesterday, is to create the programs, carry out the research, and develop the models that will guide educators and the institutions they serve."

What's in a name, indeed! There will be no change to the Teachers-College moniker under Arthur Levine's presidency.
Latino Students Embrace Politics

Students become leaders on campuses across the country

BY

JOSÉ A. ALVAREZ

Piles of paper are scattered throughout her office. Posters and family photos are down and ready to be packed. Finals are over, phone calls returned. Her political career at San Diego State University is over. It’s time for Celinda Vázquez to say goodbye.

“I’m sad about leaving,” said Vázquez, who a year ago made history by becoming the first Latina elected president of the student body at SDSU. “But I am also happy. It’s been a wonderful experience, and I am leaving the students in good hands.”

Vázquez is cheerful because she knows her leadership and example have yielded positive results. Her former vice president, another Latina, is following in her footsteps. Come September, Jena Saldana will assume the reins as president of Associated Students and lead the SDSU student body into the new millennium.

More Latinos in Student Politics

At university campuses across the southern United States, Latino students are becoming more actively involved in student politics. They are raising their voices on issues of importance to them and launching an overall campaign to achieve equal representation.

“We’ve taken the initiative to get involved because we are not being represented adequately,” said Vázquez, a social work senior at SDSU. Her involvement in student politics began her first year in college, when she got elected to Movimiento Estudiantil Chicano de Aztlán (MEChA). MEChA is a Latino student organization founded in California in 1968 to draw attention to the needs and concerns of Latinos; it is the driving force behind Latinos in student politics. “We wanted a Latino voice in student politics because Latino issues were not being brought to the negotiating table,” Vázquez said.

At San Diego State University, Latinos began getting involved in student politics in the early 1980s, when the Greek fraternities and sororities controlled student government. Slowly, Latinos became part of the system and assumed leadership positions. By 1986, a Latina occupied the office of vice president, and by 1994, Associated Students had elected its first Hispanic president. Since then, they have dominated the executive level of student government even though Latinos represent only 21 percent of the more than 29,000 students on the SDSU campus. MEChA was able to elect Latinos to key positions by building coalitions with other ethnic groups on campus. These alliances have given them a stronger power base and allowed them to maintain control of student politics.

“We are fortunate to have a very diverse campus,” said Saldana. SDSU’s newly elected student body president, and an English and women’s studies major. “All the multicultural organizations have banded together, allowing us to reach out to all the students.”

Remedial education, increasing student fees, curriculum changes, more financial support, and recruitment and retention of Hispanic students and faculty are some of the issues of most concern for Latino students today. However, Hispanic candidates have also had to educate themselves on issues that affect the interests of all students, not just Latinos.

“We’re presenting qualified candidates with experience and broad voter appeal,” explained Dr. Isidro D. Ortíz, professor of Chicana and Chicano studies at SDSU. “It is critical for Latinos to have students in positions of power.”

Movement Originated in California

The Latino student movement originated in California in the late 1960s, when students took to the streets demanding the creation of curriculum and related support services to facilitate access for Hispanics into institutions of higher learning. Their involvement continued through the 70s, slowly spreading to other parts of the country, resulting in colleges and universities making post-secondary education available to minorities. This furthered the Latino political activism and activism by this first generation of ethnic students. Armed with new leadership and organizational skills, th
students were able to openly express their views due to the relative openness of the American political system.

Latino students were less vocal during the '80s, when Chicano activists gained access into government, education, and professional institutions. However, their movement was re-energized in the early 1990s in response to the anti-Latino sentiment resonating throughout the country, particularly in California.

"The anti-Latino attacks woke us up," said David Pino, a political science graduate student at SDSU. For his master's thesis, Pino analyzed the mobilization of Latino students against the passage of Proposition 187, a California initiative denying benefits and services to undocumented immigrants. The xenophobic attacks emanating from California affected Latinos all over the country. The Hispanic community, particularly college and high school students, responded by rallying against the measure, fearing that similar initiatives could be brought up in other parts of the country. Despite the opposition, California voters approved the initiative in 1994. Immediately, Latinos challenged the proposition as unconstitutional, and the courts have since blocked some of its most drastic provisions.

"Latinos were not electorally prepared to deal with the challenge," added Pino. "Many Latino Americans vehemently opposed the anti-immigration measure but could not directly prevent it from becoming law." Nevertheless, Latinos channeled their anger and disgust into widespread naturalization and voter registration drives, resulting in increasing Latino voter participation throughout the United States.

"Many students went to the barrio to get their parents and their tíos and tías to register to vote," Pino explained, adding that the anti-immigrant attacks got students to be more proactive. "Latino students are mad. They want to be heard." Their voices are now being heard in colleges and universities across the country as more Latino students are entering the political arena.

"Sleeping Giant" Awakens
SDSU, California State University-Los Angeles, New Mexico State University, University of Texas at El Paso, and Florida International University are a few of the campuses where this "sleeping giant" is now fully awake.

"I got tired of being neglected," said Angel Mendoza, outgoing student body president of the University of Texas at El Paso. "And if there is something that you don't like, you don't just complain about it; you change it."

At UTEP, just as at SDSU, the Greek organizations controlled student politics until the 1990s. Then the university changed its tuition policy and allowed students from across the border to register as if they were residents of the state of Texas. That change allowed Latino students in the primarily Hispanic campus to launch a unified effort and take control of student government. They have not looked back since. UTEP's incoming student body president is a Latina.

"Our political involvement was quite low," added Mendoza, a history and political science graduate, who during his two years in office rallied the students to "take more responsibility." "Education is where we need to concentrate. If we are going to be the majority, we have to educate our people," explained Mendoza, who's just been named town manager of Anthony, Texas, a small city in the southwest part of the state. His political aspirations do not end there. He plans to go on to graduate school to study management and public policy and eventually launch a campaign for a seat in the State Assembly.

Mendoza is not alone. An increasing number of students are continuing their political careers past graduation. Their experience and political involvement, they say, has prepared them to take the next step.

"Being student body president opened a lot of doors," said Guillermo Mayer, former Associated Students president and SDSU political science graduate. "It's great training for future leaders," added the 25-year-old legislative assistant to Los Angeles State Senator Tom Hayden, in his Sacramento office.

"The drill of politics-strategizing, management, and decision-making—is the same," Mayer said. The difference, he explained, is that in "real world" politics the stakes are higher because you're impacting the lives of more people."

No one understands that better than Vázquez. Mayer's friend and former student colleague. Prior to her presidency at SDSU, Vázquez chaired the California State Student Association and lobbied before the California State Assembly on issues affecting the more than 300,000 students the association represents. "It could be intimidating, but you have to put everything aside and do your job," said Vázquez, who just completed an internship in social work and public policy with the Congressional Hispanic Caucus Institute in Washington, D.C.

For the moment, Vázquez has no plans of being an elected official, but she wants to remain involved in the political arena promoting education and social policy. "Students are the future of the Latino community. It would definitely be a healthier future for us if more students got involved," concluded Vázquez. "It's hard to change things, but it can be done."
IDRA Taking a Stand on “In-grade Retention”

Equity and the Public Schools

BY
Marilyn Gilroy

What educational issue do President Clinton, Texas Gov. George W. Bush, California Gov. Pete Wilson, and New York City Mayor Rudolph Giuliani all seem to agree on? Answer: Social promotion—the policy of passing students on to the next grade even if they have failed to master all of the current grade-level curriculum—should be abolished.

In his State of the Union address earlier this year, President Clinton joined a chorus of other politicians when he said that we must “end social promotion.” Governors, mayors, and school administrators around the country have quickly jumped on the bandwagon. In fact, social promotion is a concept that seems to have so few supporters that it has been compared to some of the nation’s most unpopular welfare programs.

But while nobody is advocating that social promotion is educationally sound, the Intercultural Development Research Association (IDRA), a Texas-based organization that researches and reports on educational issues, says that forcing millions of students across the nation to repeat a grade is even more harmful. IDRA contends that the process leads to low self-esteem because “students see it as punishment and a stigma—not a move to help them improve academic performance.” According to the IDRA’s latest research, 50 percent of students who repeat a grade do not do better the second time, and 25 percent actually do worse. Furthermore, retained students are far more likely to drop out of school, particularly if they are held of the pupils in the public school system, will not qualify for promotion and will have to attend summer school in the year 2000. Even after completing summer school, Crew predicted, 88,000 students would be held back. In Texas, as social promotion has been phased out, the numbers of students retained in grade has risen steadily from 125,959 in 1993-94 to 147,202 in 1996-97.

Chicago schools, which eliminated social promotion three years ago, have a mandatory summer program for the approximately 30,000 students who have failed and cannot be advanced to the next grade level. But as the number of failing students continues to grow, there are not much data to support the success of summer school as an antidote to social promotion, according to a recent article in The New York Times.

In its latest policy brief entitled “Failing Our Children—Finding Alternatives to In-Grade Retention,” IDRA contends that current summer school programs are just a “traditional response which gives students a larger dose of what failed to work the first time.” And IDRA, which lobbies for accountability and equity in the public schools, has pointed out that “the majority of students who are
required to attend and pass summer school as a condition for promotion are low-income, minority students."

The end result of this questionable strategy to combat social promotion is that Hispanic and African American students are retained at twice the rate of White students. For example, of the 147,202 students who were retained in grade in the Texas schools in 1997, 70.6 percent were minority, with Hispanics representing 50.3 percent of the total.

IDRA is also concerned that most school districts have adopted the use of a single test score as the means of deciding who will be held back. The tests are usually administered during the latter part of the school year and often include reading, writing, and math components. IDRA believes that schools need to use "multiple criteria for determining whether a student should be retained or promoted to the next grade." It recommends the use of review committees that include teachers, parents, administrators, and counselors. These committees would look at a variety of factors, including assigned grades in several subjects, standardized test scores, emotional and physical development, and teacher observations and evaluations.

Some school officials and politicians are already acknowledging that in-grade retention would be an undesirable result of uniform testing. Chancellor Crew of New York City says that he hopes to use standardized test scores, class work, and attendance to assess which students may be held back. In Texas, the legislature recently passed a bill that contained "satisfactory performance on assessment instruments" in order for a student to move to the next grade. However, the bill also allows a student two additional opportunities to take the test and calls for a program of "accelerated instruction" to be determined by a "grade placement committee" made up of administrators, teachers, and parents.

But what else can and should be done to help students who are falling behind in their work and are potential candidates for failure?

One IDRA recommendation that seems to be gaining favor is a program of intervention, which means putting more resources into identifying at-risk students and offering after-school programs that would help children gain the necessary skills for their grade level. Specifically, recommendations call for an "extended day program" where for up to one hour after the regular school day ends, students get help from teachers, aides, college tutors or community members. Some schools have opted for optional Saturday morning tutoring that begins in January of the school year when students begin to prepare for standardized tests. One school district in Corpus Christi, Texas, which has reduced its in-grade retention rates, tests students every three weeks to make sure they are keeping up and can get extra help as soon as problems arise.

IDRA research points out that these remediation and intervention measures cost far less than the approximately $5,000 per pupil average cost to retain a student for an extra year of school.

IDRA's policy brief also takes aim at what it calls "outdated, ineffective practices" and offers a look at some successful strategies that are working. Some of the ideas challenge the basic social and academic structures of schools. For example, IDRA points out that there might be advantages to abandoning the idea of "moving groups of students through a sequential curriculum correlated to grade." One possible alternative is a model of "cross-grade grouping" where a fourth grade student having trouble with reading attends instruction with third graders, and a more advanced fourth grader joins a fifth grade reading class.

IDRA also supports the idea of "double dosing," the practice of having students who are not doing well in a particular subject take two periods of the class on selected days. Studies show that students benefit from having increased amounts of time to work on material.

Finally, IDRA contends that teachers must receive professional development "to ensure that they have the knowledge and skills to teach a wide range of students to meet standards."

IDRA: 25 Years of Educational Leadership

It is typical that IDRA is on the cutting edge of educational issues such as social promotion. Founded by Dr. Jose Cardenas in 1973 as a nonprofit research and public education organization, IDRA is dedicated to the principle that all students are entitled to an equal opportunity education. It has joined forces with some of the country's most prestigious foundations to achieve that goal. Working with organizations such as AT&T, The Ford Foundation, and the Andrew Mellon Foundation, among others, IDRA staff members have provided professional training for public school teachers and administrators, published research and policy papers, served as expert witnesses in legislative hearings and court cases, and developed school curricular materials.

The driving force behind many of these projects is the current leader of IDRA, executive director Dr. Maria Robledo Montecel. Although she heads an impressive administrative, professional, and technical staff, she is often IDRA's "point person," going out to address legislative bodies, corporate foundations, and school districts personnel.

She is pleased with the progress
that IDRA has made in some areas but is worried that today's educational reforms feature "too much focus on numbers and that officials are not looking at how students are really doing."

She also fears that many educational reforms tend to hurt "primarily poor, primarily Latino children."

Robledo Montecel's prior experience working on the prevention and recovery of school dropouts reinforced her belief that minority youth, who were dropping out of Texas public schools in alarming numbers (one out of two Hispanic and African American students from the 1994-95 class never reached 12th grade), needed advocates in the community and the legislature. She conducted the first statewide study of dropouts in Texas. It was used to shape legislation requiring standard identification and reporting procedures of school dropouts. This led to development of strategies that began to address the dropout issue.

Robledo Montecel continues to hold policy-makers accountable for the role they can and must play in improving education. "We know what needs to be done," she said. "We must find the political will to do it."

In addition to working with political leaders, Robledo Montecel and IDRA continue to forge alliances with corporations and communities. In conjunction with the Coca Cola Foundation, IDRA developed the Valued Youth Program, which helps secondary school students who are at risk of dropping out. Under the slogan of "all students are valuable; none is expendable," the program supports students, teachers, and parents in coordinating strategies to help at-risk students stay in school.

The core of the program is a cross-age tutoring approach in which potential dropouts tutor elementary school students, thus enabling the older students to develop the sense of pride and responsibility that motivates them to do better and stay in school. The program has won recognition from the U.S. Department of Education as well as the Peter F. Drucker Foundation for nonprofit management, and has been featured on ABC and NBC television specials.

IDRA has also issued policy briefs on disciplinary alternative education programs and the use of public money for private schooling, policies that often affect poor, limited-English-proficient students, many of whom are Latinos.

For this reason, IDRA was in the forefront of the battle for equity in the financing of Texas public schools, which was formerly based on the property tax system. They also successfully lobbied against a voucher bill because it would have allowed the use of public funds for private schools. Calling the measure a blow to neighborhood schools and communities in Texas and citing vouchers as "an attempt to avoid the issue of funding high-quality public schools for all children," IDRA circulated research showing that private schools would not serve the interest of the large numbers of special needs students (special education, limited-English-proficient, immigrant, and migrant students).

Robledo Montecel is passionate when she talks about protecting the rights of poor children to a good education. She also believes that misconceptions about the abilities of these children and the attitudes of their families toward education contribute to some of the inequitable policies.

"Latino parents are often portrayed as uncaring or unsupportive of education," said Robledo Montecel. "This is not true... Latino children also suffer when they are pre-judged on the basis of poverty, skin color, or language skills. We need to create ways to tap the abilities of Latino students. They are very capable learners when given opportunities and resources."

That basic proposition recently got a very big boost when IDRA was selected by the Kellogg Foundation to serve as project manager for the $28 million ENLACE (Engaging Latino Communities for Education), which will increase opportunities for Latinos to enter and complete college. Its goal is to create coalitions among higher education institutions, school districts, communities, businesses, and other funders to achieve its objectives. It is, as Robledo Montecel said, one of her biggest challenges but one that she is looking forward to. She is also extremely hopeful about the qualitative and quantitative change this type of project can produce.

"When organizations and people whose frame of reference is quite different form partnerships and become genuine participants in education, they begin to see the assets of ALL of our children," said Robledo Montecel.
Incivility in the College Classroom: Its Causes and Cures

BY ANGELA PROVITERA MCGLYNN

As professors head back to college classrooms, many bring enthusiasm for their subject matter as well as a genuine sense of caring about their students. Students are also eager to start the new semester, but, unfortunately, some will need instruction in decorum along with academics. The reason: the presence of incivility in today's college classrooms.

What do we mean by "incivility" when describing student conduct? The term has been used to include the following behavior:

* lateness to class,
* talking while the instructor is speaking,
* wearing Walkman headphones in class,
* talking on cell phones,
* walking out of class and walking back in while the class is in session, and
* walking in late in front of the teacher.

This list does not include a number of behaviors that would be considered insolent, challenging, and intimidating. There are well-documented cases of faculty members who have been harassed and challenged by students. In some cases, the gender or race of the faculty member might be a factor that contributes to student rudeness. As Alison Schneider says in her article entitled "Insubordination and Intimidation Signal the End of Decorum in Many Classrooms."

"Male students are far more likely to try to run roughshod over female professors--especially those working in male-dominated disciplines like chemistry, physics, and math, scholars say."

Schneider also discusses the story of Chan Kai Lee, an assistant professor of history at Indiana University, who tried to speak to students who had engaged in extremely disruptive behavior (reading newspapers, talking loudly, and passing around a game of tic-tac-toe). While attempting to speak to them after class about their rude behavior, one of the

Faculty members should address, in some way, behavior that is disruptive when it occurs. Approaches that avoid direct confrontation seem to work best.
young men grabbed his genitals and pumped his hand up and down. Ms. Lee believes that her race influenced her students’ rude and contemptuous behavior. Schneider quotes Ms. Lee in her article: "Students could only see me as the permissive mummy, who could be controlled, or the stereotypical sinister black bitch, who needed to be challenged at every turn." 2

Kathy Franklin, an assistant professor of higher education at the University of Arkansas at Little Rock, has been researching the history of undergraduate life for years. She says that students have been making mischief on college campuses from the first days of higher education. She cites as examples 13th-century students at the University of Bologna who beat their professors if they didn’t like their grades. At Yale University in the 1820s, students rebelled against classes that they saw as too demanding by throwing food and plates at professors in the dining hall. Ms. Franklin says that what is happening today on campuses is not unusual, but she does say that students today are different from students ten or more years ago because of demographic changes, consumerism, and their K-to-12 experiences. 3

Many of us who have been teaching for two or three decades believe that problems of incivility are much worse and more widespread these days than in the past. One of the big differences seems to be that professors are not receiving the same level of respect that they enjoyed decades ago. On the other hand, I don’t want to overstate the problem. Most students are respectful and well-behaved. In fact, many of these students are complaining about the disruptive students. The problem is that all it takes is a few students, the disruptive ones, to change the teaching/learning environment for everyone.

If there has been an increase in disruptive classroom behavior, to what can we attribute it? There are many theories attempting to explain the increased prevalence of incivility. Peter Sacks, a journalist and, for a short time, a faculty member, believes that incivility is rooted in the new consumerism attitude among many students. In Sacks’ book, Generation X Goes to College: A Journey into Teaching in Postmodern America, he suggests that many students see themselves as customers. They believe that since they are paying money for a degree, they are running the show. Their attitude is “I am the customer, and I will behave any way I want.” Their behavior reflects their attitude of entitlement. 3

Add to this the crisis of authority in the United States that scholars are writing about. Many students are suspicious in general of the rules set by adults. Their professors are not held in high esteem by the culture at large, and therefore, our current students simply do not hold their teachers in high regard. These students have expectations that teachers ought to “give” them the information they are paying for. Furthermore, they want to be entertained in class. They are studying less, have shorter attention spans, are less well prepared for college, and are less disciplined than students of the past.

Lest we place all the responsibility on students and their life circumstances (these are children of divorce, latchkey children, children of MTV) for this increase in incivility, let’s examine the role of the college and the role of the faculty in encouraging disruptive behavior.

What can be said about the culture of the college in the 1990s? First, there is much greater diversity in our classes than decades ago. While this diversity, of ethnicity/race, age, and social class, makes for a richer classroom environment than decades ago, it might also create a diversity of student expectations for what ought to take place in the class. For example, returning students, our older college population, might bring to class a seriousness of intent to learn; they might have certain expectations about how class will be conducted. Some Asian students might expect a straight lecture format and remain quiet and attentive. After all, they come from a model of education where that was expected of them. To ask questions in class and participate in their educational culture could be interpreted as a sign of disrespect.

Students from American public high schools, on the other hand, might come to college still with their high school mentalities; often their behavior is immature. The diverse backgrounds of students might be a contributing factor to the increases faculty are seeing in disruptive behavior.

Secondly, many colleges are offering courses in a lecture format. Social psychologists have long known that when people feel anonymous, that is, when they lose a sense of self, their behavior might be influenced in negative ways. Research shows that when people lose a sense of self, and thus feel “de-individuated,” they are more likely to behave in aggressive and undesirable ways. Students in large lecture rooms often feel disconnected from the teacher because the size of classes ranges from several hundred students to classes so large that students can only see the instructor on a TV monitor. These feelings of de-individuation are intensified by the fact that so many students have trouble staying tuned in to a lecture that lasts 50 or 55 minutes. The atmosphere is ripe for side conversations, walking in and out of class, and engaging in other forms of disruptive behavior.

What Can Faculty Do?

In the videoconference, “Faculty on the Front Lines: Reclaiming Civility in the Classroom,” 4 there was discussion of the role that faculty possibly play in creating incivility or in exacerbating it, and of what they could do to eliminate or reduce it. Although the panelists were not implying that student incivility is actually caused by faculty, they pointed out the many ways that the behavior of faculty might create a classroom atmosphere that is conducive to the development of disruptive behavior. For example, faculty who are repeatedly late to class themselves are setting an example—a negative one—for students to emulate. Faculty members who show disrespect for their students by being condescending or sarcastic in class can expect students to be hostile towards them and towards the course. And, faculty members who ignore disruptive behavior are tacitly giving a message to their students that they tolerate or condone the behavior. It is possible, then, that some faculty are setting a stage for incivility or inadvertently encouraging it. This being said, even teachers who create a warm and welcoming classroom environment, who seem to be doing everything we would hope teachers do, are complaining about greater incivility in their classes.

What can teachers do to elimate, or at least reduce, the incidence of disruptive classroom behavior? First and foremost, teachers need to put into writing what the course expectations are and what their expectations are about student behavior. This can be part of the syllabus or an addendum to the syllabus: it should be given out and discussed in the first or second class of the semester. It is important that the tone of such a guide lines sheet foster a positive class room climate, the guidelines sheet should reflect that the teacher is in charge of the classroom dynamite without sounding authoritarian. Here is an example of a guideline
of courtesy should be sufficient to have our class run in the best interests of all of us. Thank you in advance for your cooperation.

One of the ways I discourage latecomers from walking into the class and distracting us all is to ask students to leave one row of seats near the entrance to the room empty so that latecomers can simply slip in quietly. Also notice that I have an attendance and late policy that specifies serious grade point reductions. Faculty members should address, in some way, behavior that is disruptive when it occurs. Approaches that avoid direct confrontation seem to work best from their final grades. This seems to have cut down unexcused absences and patterns of tardiness.

For example, if students are carrying on a side conversation, a teacher might simply interrupt conducting the class, look at the disruptive students, and wait for their silence. Walking close to the talkers might also help. Sometimes, it might be necessary to say something, as for example, “May we please have only one person talking at a time?” If talking is persistent, probably the best way to handle it is to ask the students if they would please see you after class. The whole class is now alerted to the fact that side conversations are not tolerated without directly confronting and embarrassing the talkers. After class, you can explain how side conversations are distracting to you and to other students and ask them if they can refrain in the future. In extreme cases, I have asked students to separate for the remaining classes since the temptation to talk to each other appeared to be overwhelming.

To diminish a student’s self-esteem, we have not only reduced the chances of that student’s participating in the future, but we have also reduced the chances that any of the other students will ask or answer a question.

A positive classroom atmosphere can go a long way in reducing disruptive behavior in the college classroom. If teachers are authoritative rather than authoritarian, if they make their expectations clear and firm, and if they treat students with respect, hopefully, student incivility will no longer be a consuming issue on college campuses.

Americans Strongly Support Federal Aid to College Students

September 10 was national Call Congress Day for the Student Aid Alliance (SAA), a coalition of 58 organizations representing colleges, universities, and students.

At issue was, and is, federal funding to help students go to college. The coalition urged presidents, business leaders, students, faculty, parents, and others to tell their representatives and senators to support increased student aid funding.

"Funding for Title IV student financial aid programs, particularly the grant programs, has lagged behind inflation and student need for two decades," said David L. Warren, president of the National Association of Independent Colleges and Universities and co-chair of the Student Aid Alliance.

"That means students' federal grants and loans are worth less today than in 1980. In constant dollars, the Pell Grant has declined 14 percent, and campus-based aid has declined 35 percent between 1989-91 and 1998-99. Congress and the president have increased funding for some key programs in the last four years, but they need to do more," said Warren.

Tony Pals, also of SAA, told HO in early August that "both the House and Senate Labor-HHS-Education Appropriations Subcommittees have delayed the release of their fiscal year spending bills until September—which means that the time between now and the September budget showdown is a critical period for the higher education community to convey its funding priorities to Congress. This is the point where we need the involvement of presidents, students, faculty, and parents to supplement our regular Hill lobbying activities and to reinforce our message," said Pals, who noted that the Hispanic Association of Colleges and Universities is one of the 60 organizations that make up the Student Aid Alliance.

Asked which Hispanics in Congress have been most active on behalf of the proposed legislation, he said, "To date, the key legislators on this issue have all been non-Latinos." Peis continued, "...the programs that the Student Aid Alliance are championing are those that have the greatest impact on the nation's needy students, who, as you know, tend to be disproportionately first-generation and minority students." Some campuses hosted events at the district or state level for their representatives during the August recess.

The poll findings are particularly timely as Congress turns attention to appropriations matters. The Senate, Labor, Health and Human Services, Education Appropriations Subcommittee is expected to write its FY 2000 bill very soon. The Senate, Health, Education, Labor, and Pensions Committee plans to markup shortly S. Con. Res. 28—a resolution calling for an increase of $400 in the maximum Pell Grant award and significant increases in campus-based aid programs. The House approved a similar resolution, H. Con. Res. 88, on May 4.

Other Findings

Eighty-seven percent of respondents said it was "very important" or "somewhat important" to increase financial aid for college students. The funding priority given student aid was almost identical to that for health care (90 percent) and Social Security (89 percent).

A full 90 percent of respondents agreed that "making more financial aid available will make college more accessible to many low- and middle-income families," and 89 percent agreed that "when students meet all the academic requirements for college admissions, they should be able to get financial aid from the government when they need it."

Sixty-one percent of the public said they were "more likely" to "vote for a candidate for Congress who worked to increase financial aid for low- and middle-income families with children in college."

The Student Aid Alliance is calling on Congress to increase the maximum Pell Grant award by $400 to $3,525; raise by $50 million the $75 million funds for the Leveraging Education Assistance Partnership program (formerly the State Student Incentive Grant program); and an increase funding for campus-based programs.

Federal Work-Study, says the coalition should be increased by $64 million, to $92 million. Each year, Federal Work-Study helps 100,000 needy students through jobs on can..."

Source: Student Aid Alliance survey, May 1999

Last month, the House and Senate Appropriations Committees voted to slash $20.7 billion from the House Labor-HHS-Education appropriations bill and $23 billion from the Senate Labor-HHS-Education bill, cuts of 12 and 9.4 percent, respectively. Both plans would almost surely necessitate cuts or freezes for most student aid and higher education programs.

These reductions are the direct result of spending caps contained in the 1997 Balanced Budget Act, which were imposed in an effort to eliminate deficit spending. At the time the budget was approved, however, lawmakers did not expect the federal government to experience dramatic budget surpluses as early as the year 2000. Now that such surpluses are expected in the coming fiscal year and in subsequent years, leaders in Congress from both parties are calling for the caps to be raised, a position endorsed by the higher education community.

American Council on Education President and Co-Chair of the Student Aid Alliance Stanley O. Ikenberry commended selected members of Congress for their leadership and support of student aid funding. In letters to Senators James Jeffords (R-VT) and Edward Kennedy (D-MA) regarding the introduction of S. Con. Res. 28, Ikenberry thanked the senators and their colleagues, Senators Dodd (D-CT), Collins (R-ME), and Reed (D-RI), "for their efforts to make federal funding for student aid a priority for fiscal year 2000 appropriations."

In letters to Representatives Goodling (R-PA), McKeon (R-CA), Clay (D-MI), and Kildee (D-MI), Ikenberry noted that H. Con. Res. 88 "underscores the point that the Pell Grant is the federal government's most important program for helping financially needy families finance post-secondary education. It also makes clear that campus-based aid programs complement the Pell Grant program to provide students with the monetary resources to obtain a post-secondary education."

The SAA survey was conducted by KRC Research & Consulting, Inc., a national polling firm based in New York City. The student aid questions were included in an omnibus survey that included extensive interviews with 1,022 American adults during the month of May 1999. The margin of error for respondents is plus or minus 3.1 percent.

SAA has established a Web site, [http://www.StudentAidAlliance.org](http://www.StudentAidAlliance.org), which contains sample letters to members of Congress that urge increases in federal student aid funding. In addition, the Alliance Hotline, 1-800-574-4243, will help Americans contact their U.S. representatives to express their views on current proposals to fund student aid programs.

Organizing handbooks, which provide campuses with information on SAA funding priorities and with tips on contacting legislators and working with the media, became available upon request to campuses from the Washington higher education associations in mid-August.
Teaching Responsibility: The First-Year-Student Seminar

BY
ELIZABETH COONROD MARTINEZ, PH.D.

Although they might sound close-minded and sometimes prejudiced in early weeks, their personal assessments begin to open them to other perspectives. I strive for an ebb and flow of heavy material and then lighter presentations that give them time to reflect.

What is the meaning of a college education? What is its value?

These and other issues arise in Sonoma State’s two-unit Freshman Seminar, a part of the Educational Mentoring Team (EMT) advising and college orientation program, designed for all incoming first-time students. An EMT consists of a faculty member, a student services professional, and a peer advisor. Each team teaches a Freshman Seminar course and is responsible for the academic advising for assigned students during their first year.

In the Freshman Seminar, students learn how to use campus resources such as the computer network and electronic library services, and the office of career and internship services. Class topics include the meaning, value, and expectations of a college education; problem-solving and decision-making; selection of a college major and career path; navigating the university curriculum; graduating in four years; study skills and success in college; multicultural awareness, interpersonal relations, and related student life-style responsibilities regarding wellness, alcohol and drug use, and sexual harassment.

In my first year of teaching at the university level, I learned to dislike first-year classes. Teaching a class that contained mainly beginning students was not my favorite, as the majority of students seemed more interested in showing themselves as rebels or in joking about illegal substances or sexual innuendo. I always preferred classes in which most of the students had had two or three semesters under their belts and knew what college was about.

When I moved to another university, I saw that a new program was being incorporated to help guide young first-year students. Based on the ideas of Freshmen Seminar guru John Gardner, I was intrigued and signed up. Those of us faculty who became involved were from several disciplines—psychology, biology, political science, English, math, and, in my case, Spanish and Latin American literature. We were teamed with a student services or advising professional who knew the General Education system, career and scholastic advising, EOP, and financial issues. We professors brought our various strengths in academic discipline, curriculum, classroom environment, and student-professor relations. A student peer leader was added to complete the trio of the Educational Mentoring Team. Together, we designed the semester’s classes with the objectives of not only helping students become acquainted with resources, and how to solve possible problems in academic life that they might not otherwise discover for several semesters, but also a subjective lesson: how to cope with problems, stresses, and other issues that surface at college and in early adult life.

Now, after teaching a Freshman Seminar course at Sonoma State University for the past three years. I have come to enjoy guiding and seeing first-year students take responsibility for their new role as adults. Some students struggle openly and voice feelings, while others quietly absorb ideas and opinions that they hear in class. It is the environment and climate of this class that promotes under-
standing. The class format helps students adjust to college, and I think that such a class, outside the specific disciplines, should be required of all students during their first semester.

Faculty colleagues who are not involved often ask the purpose of the Freshmen Seminar, especially since it is a creation of recent years, and while it is difficult to give a specific, well-defined answer, one of our goals includes a number of components that help to reveal our goals.

While there are basics of campus life that the designers of the Freshmen Seminar ask us to cover, such as library, computer technologies, advising for General Education, and some legal premises such as guarding against rape and sexual harassment, and a little advice about drinking, etc. (I like to call this segment "Healthy Lifestyles"), the class is open to how I choose to teach it.

My experience has led me to think of this class as one that teaches beginning students responsibility in a more effective way than their learning it in bits and pieces over several semesters. I seek their own recognitions of and reactions to that responsibility at every venture. We begin with assessments of who we are and what brought each one of us to Sonoma State University. My partner (a student services professional) leads students in the Myers-Briggs test as well as an exercise on values. Students start seeing that they already possess certain values and impressions, and that they view others in a specific way formed by their culture, religion, and environment. Although they might sound close-minded and sometimes prejudiced in early weeks, their personal assessments begin to open them to other perspectives. I strive for an ebb and flow of heavy material and then tighter presentations that give them time to reflect.

A visit to the library and e-mail instruction might seem unnecessary in the current era, but we often find several students who are not sure where the library is or how the computer cataloguing system works, and others who are afraid to admit they do not know how to navigate e-mail. While some express their confidence in what they already know, others feel new empowerment, and the students begin to find more in common with one another.

Then I do a "Healthy Lifestyles" presentation. The students have to read a handout (not only about sex and drugs but also about the importance of stress relief and exercise) prior to the class and generally arrive with the attitude of "Gee, just like in high school." But as I go over each of the sections of the handout, students begin to tell us what they do not know. For example, they are always surprised to discover how long alcohol or drugs stay in the body; an anecdote in the handout reveals the findings of a test done on pilots. They seem shocked to discover the high percentage of students contracting chlamydia. My impression is that they expect me to tell them what not to do, and when that does not happen, they begin discussing the issues like individuals who must take responsibility for their actions.

We bring in guest speakers to talk about activities and careers, but also about rape and sexual harassment. We talk about respect for other individuals and here the students begin talking about what they are hearing. My partner and I are there only to ensure that each gets a turn to speak.

When we discuss diversity, I like to show the HBO film based on the novel by Greg Sarris, *Grand Avenue*. We stop this film at least twice to talk about relationships among family members and about prejudices or perceptions of single parents, gang members, and employers. Often the students will relay examples from their own families and assessments of issues in their lives. Even those who do not speak up readily in class discuss their perceptions in small groups.

Last year, a discussion of perceptions and ethnic groups led to comments on the film *Beloved*, based on Toni Morrison's novel. I told the students that the Beloved film gives us a way to better understand the Mexican "Llorona" image—another woman who gave up her children to save them from a difficult situation. The ensuing conversation included several examples from the families and ethnic groups represented in the class. Students found a comfortable way to share their own experiences in a conversation about culture and society. They were talking about life and their own experiences, something that might not happen for a while in their other classes, and that helped validate their present.

The final project is to assess one of the schools within the university for diversity (we divide the class into five groups, one for each academic school). Each group decides which professor, administrator, or staff to interview and prepares their findings in terms of grades, majors, or career potential. At the end of the semester, students who do not, in their first weeks, understand the difference between high school and college are now telling other students how to design a major, finish a bachelor's degree, and work on a credential or a master's degree. It is always amazing and gratifying to discover this development in such a short period. In their journals, they tell us how they are coping with parents, roommates, and boy or girlfriends. But in the themes we select for our classes, these students learn to assess their own perceptions and discover about adult life, and begin assuming responsibility for being a member of their society.

Elizabeth Coonrod Martinez is an assistant professor in the Foreign Languages and Literatures Department at Sonoma State University.

*Editors’ Note:
The Hispanic Outlook in Higher Education strives to use only unbiased language. In such an instance as this, however, we accede to the official course name, Freshmen Seminar, M.A.
Rocha Becomes Dean of Arts and Humanities at Texas-Pan Am

Dr. Rodolfo Rocha is now dean of the College of Arts and Humanities at the University of Texas-Pan American (UTPA).

"His background, in terms of being a faculty member and department chair and having had additional experience through the American College of Education Fellows program, proved the greatest fit for what we were looking for," said UTPA Vice President for Academic Affairs Rodolfo Arévalo, when announcing Rocha.

Rocha has been a member of the editorial board for the publication of the proceedings of the Mexican-Americans in Texas History Conference since 1992 and is a member of the Southwestern Historical Association and the Texas State Historical Association.

Díaz-Colón Speaks at Central Michigan Commencement

The adjutant general of the Puerto Rico Army National Guard spoke at Central Michigan University’s (CMU’s) commencement in August. Major General Emilio Díaz-Colón is a career military officer and professional engineer with ties to CMU’s College of Extended Learning programs in Puerto Rico.

CMU President Leonard Plachta said, "Major General Díaz-Colón has been a strong supporter of CMU and the degree programs that we have offered to members of the Puerto Rico Army National Guard since 1996."

Thirty master’s degree candidates from the Puerto Rico National Guard participated in the ceremony, and Díaz-Colón himself received an honorary doctor of public service degree.

Palm Beach Community College Recruits Vallejo

Dr. Maria M. Vallejo, vice president for student affairs at Rockland Community College (N.Y.) since 1996, recently became campus provost of Palm Beach Community College, Central Campus, in Lake Worth, Fla. Vallejo is serving as campus CEO at the Central Campus, the largest of the college’s four campuses, with a student population of 13,000.

"State University of New York (SUNY)-Rockland benefited greatly from the service of Dr. Vallejo, and although she will be missed here, we are flattered that one of our senior administrators was recruited for a prominent position in Florida," said Dr. George Hamada, president of SUNY-Rockland.

Vallejo holds a bachelor’s degree from Hampshire College, two master’s degrees from Columbia University, and a doctorate from New York University.

Ferguson Speaks at National Jesuit Conference

Anita Perez Ferguson, president of the National Women’s Political Caucus, was a keynote speaker at the national Jesuit Advancement Administrator conference at the University of San Francisco (Calif.) in June. She offered advancement professionals inspiration for reflection as they returned to their respective institutions.

"Your work and your attitude toward your work could be more important to the future of our country and our world than you can imagine," said Ferguson. "As we begin toward the bottom line, toward getting our numbers up, whether it be numbers of students who come from underrepresented groups or numbers for annual gifts, we cannot lose focus of the value we are working toward."

Flores Named Top Speaker

Garden City High School (Kan.) sophomore Alexandria Flores won a public speaking contest at a three-state, 600-student TRIO Programs Student Leadership Conference in Lincoln, Neb. Flores participated as part of a seven-member delegation of students from the Educational Talent Search Program at Garden City Community College.

Flores spoke before more than 500 listeners at the conclusion of the July gathering. She also won a $100 prize. "Everything begins with dreams," Flores told the crowd. "Each of us has within us the capacity to lead."

Miami-Dade Professors Named to Children’s Cultural Coalition

Dr. Alex Gancedo, associate dean of natural and social sciences at Miami-Dade Community College’s (Fla.) Wolfson Campus, and Gladys Montes, director of the North Campus Center for Early Care and Education, were appointed to the board of the Children’s Cultural Coalition—an alliance of not-for-profit cultural organizations and individuals dedicated to providing and promoting cultural programs and enrichment for children through opportunities to work with professional, practicing artists in dance, music, drama, and visual arts.

Jude Parry, president of the Coalition, said Gancedo and Montes were chosen because of their interest in children, their history of contributing to their communities, and the potential insight they would bring.

Palo Alto Announces Scholarship Winners

Ten winners of the Frank M. Tejeda/Palo Alto College (Texas) Scholarship were selected for 1999-2000, based on demonstration of
leadership qualities, overall academic achievement, and involvement in extracurricular activities and community service.

Winners were: Leticia Del Carmen, Ambriz, Cecilia G. Arreola, Christina Reyes, Gina Loretta Martinez, Juan Antonio Rodriguez, Jennifer De La Garza, Cesar Hernandez, Charles Luis Hernandez, Gloria Jose, and Nicole A. Lysy.

Cal State-L.A. Students Win Film and Video Awards

California State University (CSU)-Los Angeles broadcasting students Edgar Yaney and Matt Gatlin won major awards in the 1999 CSU Film and Video Festival.

Yaney won two honorable mention plaques for his narrative piece, "The Wastebasket," and his music video, "El Desierto." Yaney recently graduated with a bachelor's degree and is working as a film producer at Univision (KMEX-TV).

Gatlin, who has been working in the university's Academic Technology Support office, won both a first place award in music video and the Best in Show award, which recognizes the top film or video of the festival, for his music video "Rhapsody."

Cantú-Weber Named Director of Newspapers Foundation

Josie Cantú-Weber, assistant professor of journalism at Northern Arizona University (NAU), was named director of the Arizona Newspapers Foundation.

The educational foundation, responsible for contests, conventions, and seminars, as well as journalism education grants, has been creating a traveling exhibit that explains the role that Arizona newspapers played in the development of the state.

Cantú-Weber is the director of the NAU High School Journalism Workshop for Minority Students. A professional journalist for 15 years, she was features editor of the El Paso Times and the Corpus Christi Caller-Times before returning to academia.

Padrón Proclaimed "Champion of Students"

In recognition of Miami-Dade Community College (M-DCC) President Eduardo J. Padrón's commitment to students, presidents of the student government associations, representing all six Florida-based M-DCC campuses, presented a resolution commending him for his dedication and work to enhance education and to encourage and provide opportunities for students.

LULAC Honors Smart

J. Graham Smart, former Pima Community College (Ariz.) West Campus president, was honored for his service to minority students and the League of United Latin American Citizens (LULAC). The recognition took place at a luncheon at the 48th Annual State Convention of the Arizona LULAC.

Smart, who began his career at Pima as a biology teacher in 1974 and became West Campus president in 1994, retired in May.

La Raza Council Releases "Mainstreaming of Hate"

The National Council of La Raza has released a report, "The Mainstreaming of Hate: A Report on Latinos and Hate Crimes, Hate Violence, and Law Enforcement Abuse in the '90s."

The report provides exhaustive evidence of an emerging pattern of hate-related activity against Hispanics, including private acts of hate violence, citizen vigilantes and hate groups, and church burnings. In addition, it documents the recent exponential increase in incidences of law enforcement abuse and racial profiling, particularly at the hands of local police and Immigration and Naturalization Service officials, targeting Latinos.

Eastern Washington Promotes Safety through Drama

El Regreso de Miguel, an original Spanish-language play that was developed under a grant to the Eastern Washington University (EWU) Center for Farm Health and Safety from the National Institute for Occupational Safety and Health, was staged at Walla Walla Community College (Wash.). The drama, written by Seattle playwrights Leticia Lopez and Lupita Patterson, was one of four one-act plays containing messages of health
and safety written for farm workers in Walla Walla, Benton-Franklin, and Yakima counties.

"We believe the most meaningful way to get needed health and safety information to non-English-speaking agricultural workers is in fiesta-like settings such as this event," said Kathy Pitts, Hispanic Theatre Project coordinator of the EWC Center for Farm Health and Safety.

New Language and Culture Center at East Tennessee State University

ETSU's Community Partnerships Program offers interdisciplinary learning and service opportunities to ETSU faculty and students in the Colleges of Arts and Sciences, Applied Science and Technology, Business and Education, along with the Center for Appalachian Studies and Services and the Division of Student Affairs.

The center is made possible through the Expanding Community Partnerships Program, which is funded by a grant awarded to ETSU by the WK Kellogg Foundation of Battle Creek, Mich.

Champlain Program Features Alvarez Novel

To develop a sense of community and introduce new students to academic life, Champlain College (Vt.) initiated a new across-the-college summer reading program.

Participating students, faculty, and staff were required to read Julia Alvarez's *Is the Time of Butterflies* by the first day of class. An afternoon was then devoted to discussions and activities related to the novel, which was inspired by the true story of three Dominican sisters who were murdered in 1960 for their part in a plot to overthrow their government.

Alvarez was scheduled to visit Champlain to read from and discuss her novel in mid-September.

**Rio Hondo Students Win at Welding**

Rio Hondo College (RHC) welding instructor George Gavela (pictured) announced that students Armando Robles, Jesus Fernandez, Samuel Vidana, Ramiro Montalvo, and Victor Hernandez won gold, silver, and bronze medals at the Vocational Industrial Clubs of America state competition in California.

RHC student Thomas Lopez, the California State welding champion, went on to compete nationally in Kansas City, Mo.

**Fernandez Twins Succeed at Texas A&M-Kingsville**

Twin sisters Kris (l.) and Rose Fernandez (r.) both graduated with honors in August at Texas A&M University-Kingsville with a major in biology and a minor in chemistry, having taken ten classes together.

Biology Professor Glenn Perrigo said, "The girls are dynamic and always full of energy. It was a pleasure working with them."

Aside from their studies, Kris was president of the student government association (SGA) and has been a lector at St. Martin Catholic Church; and Rose was SGA vice president and has participated in the church choir. Both were mentors to first-year students.

Their mother, Leonor Fernandez, said, "I am so happy that I raised two individuals with strong beliefs and a willingness to help others."

**Law School Association Supports Racial Justice and Diversity**

The Association of American Law Schools (AALS) announced two initiatives relating to President Clinton's summons to the legal profession to take steps to assure racial justice and diversity.

The AALS is developing a comprehensive strategic plan to promote diversity that will help law schools facing attacks on their diversity efforts. Help provide more access to law schools for persons of color and encourage young students to consider professional careers.

Also, the AALS calls upon law schools to provide opportunities for law students to volunteer their legal skills in their communities, enabling students to witness firsthand racial and economic injustice, confront ethnic and economic prejudices and misconceptions, and learn the importance of pro bono legal services.

La Raza Council and Bank of America Announce Initiative

Bank of America and the National Council of La Raza announced the bank's $20 million commitment to a new revolving loan fund that will help build wealth and assets in Hispanic communities across the country.

Bank of America's commitment is one of the single largest capitalizations of a Community Development Financial Institution (CDFI). The HOPE Fund, the only national Latino CDFI certified by the Department of the Treasury, will focus on providing loans to community development projects such as low-income housing, employment training centers, and charter schools.

**Houston Community College Becomes "Hispanic-Serving Institution"**

Houston Community College (HCC), the third largest community college system in the nation, has met the criteria to be designated a Hispanic-Serving Institution.

Analysis showed an increase of 482 students for the Spring 1999 semester compared to the spring semester enrollment in 1998. These numbers enabled HCC to meet the criteria for a Hispanic-Serving Institution by having at least 25 percent or more total Hispanic student enrollment. Hispanics make up 27 percent of the student body and are HCC's fastest growing student population.

The designation makes available additional resources, including grants specifically
geared toward meeting the needs of Hispanic students.

**Education Improvement Foundation Announces Grants**

The National Foundation for the Improvement of Education (NFIE) has made available as many as 50 grants to be awarded to public school teachers, higher education faculty, and educational support personnel nationwide in 1999-2000 through its Leadership Grants Program. The grants will help educators and support personnel deepen the extent of their knowledge, improve their teaching skills, and share their expertise with colleagues.

Successful applicants will receive one-year grants of $1,000 to be used for professional development activities of their choice. For more information, contact: NFIE, (202) 822-7840; Web site, <www.nfie.org>.

**Palo Alto Community Sponsors Fair**

The Palo Alto Community Coalition, including Palo Alto College (Texas), sponsored La Fiesta De Verano 99, a Community Resource Fair showcasing the pride of the Southside in July.

More than 40 service organizations provided information on education, legal, health, and family/youth issues. There was music, family entertainment, free books, special giveaways, and door prizes.

**Texas Confirms Formal System Status for University of North Texas**

The Texas Higher Education Coordinating Board has confirmed formal system status for the University of North Texas (UNT), making UNT one of only six public university systems in the state.

With more than 25,000 students on its main campus in Denton, and a growing Health Science Center in Fort Worth, UNT has been the leading public university in North Texas for years.

For the first time, UNT is offering classes through a System Center at Dallas that gives people living in southern Dallas and northern Ellis counties the first access to bachelor’s or master’s degree programs from a public institution in their area.

**In the News at William Paterson University**

- Four William Paterson University (WPU) students coordinated an all-day conference, "Women, Leadership, and Diversity," at the NJ institution to discuss common problems and issues. Barbara Brzic, Jessica Gonzalez, Leah Harris, and Stephanie Konicki hoped to inspire young women to "be stronger and reach for goals and success no matter what road they take."

- Felix Visseret, a WPU international exchange student, was a two-time winner at the Hunter College National Student Film Festival for Film, Video, and New Media held in New York.

- Sixteen WPU students participated in a Model United Nations Conference held at the University of Pennsylvania. Representing Cuba, the students were briefed on sanctions, human rights, and foreign policy.

**Rhode Island College Upward Bound Grant Renewed**

The Rhode Island College Upward Bound Program, one of the oldest programs of its kind in the country, has received a four-year renewal grant from the U.S. Department of Education. The grant, which will provide about $46,400 in each of the next four years, ensures the program’s continuation through the year 2003.

Upward Bound helps selected high school students improve their academic skills and motivation so that they can complete high school and graduate from college. The program is for students from low-income families who will be the first in their family to attend a four-year college, are U.S. citizens (or permanent residents), and are not over age 19 when accepted to the program.

**Alamo Parent-Child Scholarships Receives Support**

Continuing a unique program intended to establish a new generation of college-goers, the League of United Latin American Citizens Rey Feo Parent-Child Scholarships will provide $1,000 scholarships to 25 children of first-time parents for attending 12-18 years from now, a college of the Alamo Community College District (ACCD) in Texas. The scholarship money will be held in a trust fund until the recipient children graduate from high school.

The program also stresses two other components involving the parents of the recipient children. First, the parents will receive training and education from various local agencies to improve parenting skills. Also, the parents will be required to enroll in an ACCD program now and will receive assistance and counseling in places, resources, and services over high-speed networks. With two supernodes on the National Technology Grid, LVC is at the forefront of the nation’s supercomputing efforts.

Called "Chautauqua," a Seneca Indian word meaning meeting or gathering, the Alliance's meetings captured the spirit of the original Chautauqua movement of the early 20th century, when traveling educational meetings were used to spread information about new technologies and concepts.

**Coca-Cola Foundation Awards Grants**

Following are some of the grants awarded by the Coca-Cola Foundation during the first half of 1999:

- Mexican American Grocer’s Association Foundation (Los Angeles, Calif.)—$25,000 to support a scholarship fund for financially disadvantaged Hispanic students;

- New York University—As part of a multiyear commitment, $200,000 to continue support for programs associated with the King Juan Carlos I Center for Spanish Studies;

- Spoleto Festival, USA (Charleston, S.C.)—$25,000 for "educationSpoleto," to give school children the opportunity to experience this major cultural and arts festival;

- Universities of Denver, Hartford, Pennsylvania, and Washington, and Northeastern University—$100,000 each to continue support for the Keeping Kids in School dropout prevention programs.
securing college financial assistance through the ACCD.

Science Foundation Grants New Mexico $405,000

The National Science Foundation (NSF) approved the University of New Mexico (UNM) Center for Micro-Engineered Materials (CMEM) proposal to form a multi-university center by incorporation of the Rutgers University Center for Ceramics Research. In August, this new NSF Industry/University Cooperative Research Center (CERC), Ceramic and Composite Materials Center, became NSF/UNM/Rutgers UCRC. The NSF awarded UNM, the lead institution, a five-year research grant of $405,000.

The CMEM has been in operation at UNM for the last 10 years. Providing an industry-sponsored, pre-competitive research program, it remains UNM's focal point for materials research.

New Mexico Program for Underrepresented Students Receives Aid

The University of New Mexico (UNM) received a four-year, $800,000 grant to establish the Ronald E. McNair Postbaccalaureate Achievement Program, designed to increase the number of doctorates conferred to traditionally underrepresented, low-income, and first-generation students.

African American, Native American, and Hispanic student populations, where the number of potential graduate students is rising, are targeted for the program. In Fall 1998, students from these populations constituted some 44 percent of UNM's first-year class.

Hispanic Journalists Call for More Hispanic Students

The National Association of Hispanic Journalists (NAHJ) raised more than $135,000 from corporate and individual sponsors at the association's 10th Annual Ruben Salazar Scholarship Banquet.

The goal of the scholarship program, founded in 1986, is to increase the number of Hispanic students pursuing a degree in journalism. Last year, the NAHJ raised $120,000 at its banquet and awarded scholarships to 38 students.

Discussing the lack of diversity in newsrooms, The Miami Herald's publisher, Alberto Ibargüen, said, "In journalism today, the difficulty isn't the glass ceiling. It's the glass door. Too many newsroom doors are still effectively closed to minorities."

New Study Finds Benefits of Diversity

The Civil Rights Project at Harvard University (Mass.) recently released the results of a new Gallup poll survey of two of the nation's leading law schools—Harvard Law School and the University of Michigan Law School—that points to substantial benefits of diversity for all students, with particularly strong positive opportunities for White students.

The survey is important because it is the first to specifically link the impact of diversity with students' ability to develop knowledge and skills critical to their future success in the legal arena. A legal career depends upon the ability to consider complex and abstract concepts, to look at the same issue from a variety of different viewpoints, and to advocate for a variety of sides. This survey draws the connections between diversity and the development of these skills.

Jacksonville Receives Pre-Columbian Mayan Stelae

Jacksonville University's (Fla.) Alexander Brest Museum received a major addition to its holdings of Pre-Columbian art and artifacts this summer. Three Mayan stelae were transferred from the Jacksonville Museum of Contemporary Art to the Brest Museum in July. A generous gift from Dr. Walter Scott, the donor of the major portion of the university's current Pre-Columbian collection, made the transfer of the three pillars possible.

The three pieces, from the Ceibal area in Southwestern Guatemala, are replicas of monumental stone carvings. The Mayan Indians in the jungles of Central America between 840 AD.
Painting on the Page: Interartistic Approaches to Modern Hispanic Texts
by Rosemary Geisdoerfer Peal and Carlos Peal

This book devises critical strategies that combine psychoanalysis, feminism, semiotics, and philosophy to examine late 19th- and 20th-century Spanish and Spanish American literature in relation to painting and to larger questions of art and literary history.

National Higher Education Conference on Students of Color
October 27-31

“The Learning-Centered Environment: Students and Learning in the New Millennium.” Featured guests include Dr. Alfredo G. de los Santos, Jr., The Maricopa Community Colleges (Ariz.) at the Minneapolis Hilton & Towers, Minneapolis, Minn.

Contact: phone, (850) 222-1087/385-1747; e-mail, <cnjford@asl.com>; Web site, <www.collegesurvival@hmco.com>.

ACE: Educating a Nation (VII)
October 28-30

The American Council on Education’s Division of Access and Equity Programs’ Office of Minorities in Higher Education is sponsoring its 7th “Educating a Nation national conference on diversity and improving the participation of students of color in post-secondary education.

Contact: phone, (202) 939-3955; e-mail, <lachone_fuquay@ace.nche.edu>; Web site, <www.acenet.edu>.

NSH MBA–National Conference and Career Expo
October 28-30

The National Society of Hispanic MBAs’ 10th annual event, this year on the theme of “Elevate beyond Excellence: Face the Challenges.” Closing plenary speaker: Ray Suárez, host of Talk of the Nation. At the Adam’s Mark Hotel and Colorado Convention Center, Denver.

Contact: phone, (214) 267-4622; e-mail, <info@nshmba.org>; Web site, <www.nshmba.org>.

HACU–13th Annual Conference
October 30-November 2

CORRECTION

An article entitled “Cultural Diversity and Mental Health Training” published in the August 13, 1999 issue, the graduate degree granted by the Chicago School of Professional Psychology was erroneously identified as the Ph.D. The School grants the Psy.D. degree, which is quite different. We sincerely regret this error and any confusion we may have caused.
Book Review

by Mark Saad Saka

This is the story of Yamielth, one of thousands of Central American immigrants who have recently come to the United States, some legal, and some, like Yamielth, undocumented. The story of Yamielth is told by her friend Dianne Hart, who-chronicles Yamielth's many journeys and the contradictions that make up the life of someone who must decide to leave her or his homeland. In telling Yamielth's story, Hart chronicles the plight of all undocumented workers, such as running the risks of crossing the border, the dangers of city life in the U.S., and the difficulties of adjusting to a strange and highly individualistic culture. In addition to the difficulties of life in the U.S., Yamielth must also deal with the political environment in California, where, in 1994, the citizenry approved of Proposition 187, a law intended to deny to undocumented immigrants education, social services, and health care.

Yamielth's story begins in Esteli, Nicaragua, where, in 1995, she was born into a working-class family. During the 1980s, Yamielth supported the revolutionary Sandinista government in power in Nicaragua and served in the Asociación de Mujeres Nicaraguenses (The Association of Nicaraguan Women) and assisted women's cooperatives in protecting themselves against American-supported Contra attacks. Family and community values held Yamielth's world together as the day-to-day existence of Nicaraguans became increasingly precarious. At one point, her neighbors and extended family members financially assisted her so that she could provide her mother a decent burial. The effects of the wartime stresses on the Nicaraguan economy contributed to a spiraling inflation rate that made life for ordinary Nicaraguans increasingly difficult, and by the late 1980s, Yamielth decided to make the dangerous overland journey to the United States to join her sister Leticia, who was living in Los Angeles.

After days of traveling through Mexico, Yamielth paid a coyote to lead them across the border, and they finally arrived in L.A. Her life in America was more difficult than she could ever have imagined. Expecting a paradise where the streets were paved with gold, Yamielth soon found herself living in a roach-and-rat-infested apartment where the monthly rent exceeded four hundred dollars. Her neighborhood was violent and plagued with drug gangs, and they lived in fear of being robbed or even killed. Ironically, Yamielth left war-torn Nicaragua but found her life in the U.S. more dangerous. In Nicaragua, where community values remained strong, people often left their doors unlocked and walked the streets in comfort and relative freedom. In a much more competitive and individualistic society such as the United States, these community values seemed lacking or even nonexistent. Yamielth's life became more precarious when, during the Los Angeles Riots of 1992, it seemed as if the entire U.S. had erupted into a war of its own.

Contrary to popular media hype that often portrays immigrants as living off public handouts, Yamielth immediately began looking for work. She always maintained her dignity and self-respect. One of her early humiliating experiences came when she arrived at a cantina looking for work as a waitress only to find out that it served as a cover for an escort service. She quickly left and used that experience as a lesson. At another point, Yamielth worked as a housekeeper in Oregon. She eventually opened a bakery, and her sister and family helped in trying to make the business a success. Although the bakery failed, her efforts are a testimony to the resiliency of immigrants and demonstrate their work ethic and contribution to the United States. An interesting part of the book is when Yamielth decides not to obtain false documents because she feels that that would be dishonest. In other words, she did not consider the fact that she was an illegal alien to be a violation of the law, yet she did consider that lying would be dishonest. Azas, America needs more hardworking and honest citizens such as Yamielth!

This book is an excellent choice for use in the classroom, one that I have used many times in my "Hispanics in the United States" history class. Yamielth's experience allows us to appreciate the diversity of the Hispanic experience in the U.S. Hart puts a human face on a group of people whom the media often portray as some large, brown, faceless mass, a people whose very presence somehow threatens our "way of life." By reading Yamielth's story, students come to appreciate the rich contribution that all immigrants make to our country.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, Professor Saka has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

The changing face of America’s business

It’s bright. It’s intelligent. It’s full of hope.
And, it’s definitely different from what it used to be.

Because, as the face of America changes, so changes the face of America’s business

Corporate America thoroughly understands that behind those faces are valuable
minds that reflect unique knowledge and viewpoints. And, it nurtures these minds
through something equally as valuable... the Consortium for Graduate Study in
Management. Through us, America’s most respected corporations provide
funding and support for the brightest and best African, Hispanic and Native
Americans, not just during your two years of study but throughout your career.

Equally as integral a part of the Consortium are the member universities that
our students will be attending — top schools whose generous contributions are
vital to the success of our program.

Yes, the face of American business is changing. And, as a result, so are its perspec-
tives, opinions and valued cultural backgrounds. A broader, wider, more diverse
corporate America is our commitment... and America’s future. Ready to face the
future? Visit our Web site or call the Consortium at (888) 653-4014.

THOMAS EDISON
STATE COLLEGE

Higher Education. For Adults with Higher Expectations.

UNIVERSITY OF FLORIDA

DEAN, COLLEGE OF ENGINEERING

The University of Florida invites nominations and applications for the position of Dean of the College of Engineering. The College, which enrolls about 5,600 (4,000 undergraduate; and 1,600 graduate) of the University's 43,000 students, consists of twelve degree granting departments with 285 faculty and is one of the University's premier colleges. The college ranks 13th among the nation's public engineering programs in the attraction of research support (about $37 million in research expenditures in 1997-98).

The University of Florida, the state's oldest and largest university, is one of the nation's most comprehensive institutions of higher education. The university is a land-grant university and a member of the Association of American Universities. The Dean of Engineering is the chief academic officer of the college and is responsible for all facets of the college's performance. The Dean serves on a variety of university-wide committees and boards and represents the university in many national and international organizations. Also, the Dean will hold a tenured academic appointment in the appropriate department in the College of Engineering, University of Florida.

Candidates must have an earned doctorate, a distinguished record of scholarly accomplishments, and appropriate administrative experience. The salary is nationally competitive.

The deadline for nominations is Friday, October 15, 1999, and the deadline for applications is Friday, October 29, 1999. Interested candidates should forward a letter addressing his or her qualifications, a resume, and the names, addresses and telephone numbers of five references to:

**The Law School**

of the University of Southern California

**POSITION DESCRIPTION - DEAN OF THE SCHOOL**

The University of Southern California is inviting applications and nominations for the position of Dean of the Law School. The University is located in Los Angeles and is one of the nation's premier private research universities. USC Law School was the first law school established in the southwestern United States, and is now a national law school serving a student body drawn from over 100 undergraduate institutions distributed throughout the nation. It is one of the preeminent law schools in California, and is typically rated among the top 15 or 20 in the country.

USC Law School is relatively small, with an average class size of approximately 200 students and a total enrollment of 600. It has approximately 35 full-time faculty, many of whom have advanced degrees in addition to law and are recognized nationally as experts in their respective fields. The Law School's endowment is among the ten largest for private American law schools. The Law School's primary mission is facilitating the production of quality scholarship by its faculty, and training students for the bar, bench and other pursuits to which knowledge about law and the legal system is relevant.

The Dean of the USC Law School is its academic leader and chief administrative officer, and reports directly to the Provost of the University. The responsibilities of the job include: leading the recruitment, development, and retention of talented faculty; promoting excellence in the School's educational and scholarly functions; planning and managing fiscal matters; leading the School's fundraising efforts; and maintaining supportive relationships with alumni and with other members of the local bar and bench.

Nominations and applications should be sent to: Randolph Westerfield, Search Committee Chair, via Office of the Provost, University of Southern California, Bovard Administration Building, Room 202 - MC 4019, Los Angeles, CA 90089-0419. Applications should include: a letter describing the candidate's qualifications for this position; a curriculum vitae; list of names, addresses and telephone numbers of three references. Questions may be directed to Bill Strippoli, Director of Information Resources, Office of the Provost (213-740-0917, 213-740-1782 (fax), strippoli@usc.edu). Review of applications and nominations will begin immediately and will continue until the position is filled.

USC is proudly pluralistic and firmly committed to providing equal opportunity for outstanding men and women. USC actively seeks nominations of and applications from qualified individuals from the broadest possible community.

(AAEBO)

**UNIVERSITY OF DENVER**

**DEPARTMENT OF PSYCHOLOGY**

An open, tenure-track position in Child Clinical Psychology to begin Fall 2000. The primary requirement for this position is excellence in research and teaching. We are particularly encouraged to receive applications from individuals with interests in developmental psychopathology, multicultural research, or pediatric psychology, but will seriously consider candidates with other interests relevant to Child Clinical Psychology. Send a letter of interest, vita, at least three letters of recommendation, and reproductions of all publications to: Child Clinical Search Committee, Department of Psychology, University of Denver, Denver, CO 80208. We will give priority to applications received by December 1, 1999. We will consider applications until the position is filled.

The University of Denver is committed to enhancing the diversity of its faculty and student body and encourages applications particularly from women, minorities, veterans, and people with disabilities.

Walden University
155 Fifth Avenue South
Minneapolis, MN 55401
SOCIOLOGY OF GENDER
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position in Gender at the Assistant Professor level, anticipated to begin in the Fall 2000. Additional expertise in one or more of the following areas would be desirable: family, race and ethnicity, or research methods.

Responsibilities: may include inter alia, Sociology of Gender, Sociology of the Family, Race and Ethnicity, and Research Methods. Normal teaching load is three courses per semester. The Department contributes to the Women's Studies, Latin American Studies, Ethnic Studies, Peace and Justice and Legal Studies certificate programs as well as the social science course offerings in the General Education Curriculum.

Qualifications: Candidates must have university teaching experience, a strong commitment to teaching evidence of scholarship, an earned doctorate in Sociology by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop as independent and ongoing research program.

Send applications to: Michael J. Webber, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

GLOBALIZATION
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position at the Assistant Professor level, anticipated to begin in the Fall 2000. We are interested in candidates who specialize in any aspect of globalization, including global environment, international trade, international migration, development under development, border studies, multinationals and the international division of labor, women in development, cultural globalization, inequality, etc.

Responsibilities: may include inter alia, Globalization, Global Population and Consumption, Environmental Sociology, Global Inequality, Women in Development, Environmental Racism as well as general Sociology courses. Normal teaching load is three courses per semester. The Department contributes to the Women's Studies, Latin American Studies, Ethnic Studies, Peace and Justice and Legal Studies certificate programs as well as the social science course offerings in the General Education Curriculum.

Qualifications: Candidates must have university teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate in Sociology by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Michael J. Webber, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

PUBLIC RELATIONS
Pending approval and funding, the University of San Francisco invites applications for a tenure-track position in Public Relations at the Assistant Professor level, anticipated to begin in the Fall 2000.

Responsibilities: may include inter alia, Public Relations Writing, Public Relations Theory, Public Relations Research and Campaigns, Public Speaking, and other courses according to the candidate's specialty. Competency in related areas, such as advertising and organizational communication is also desirable. The faculty member will assist in building a public relations program, develop and advise the PRSSA chapter, and assist with Public Relations internships. Because the University of San Francisco is a Jesuit institution situated in a culturally diverse region, the new program will emphasize nonprofit and international PR. Professional public relations experience in either of these areas is extremely desirable.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Rhonda Parker, Chair, Public Relations Search Committee, Department of Communication Studies, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

COORDINATOR OF EXPOSITORY WRITING
Pending approval and funding, the Department of Communication Studies at the University of San Francisco invites applications for a full time tenure-track position in Expository Writing at the Assistant or Associate Professor level, anticipated to begin in the Fall, 2000. The Department of Communication Studies incorporates English as a Second Language, Expository Writing, and Speech/Rhetoric.

Responsibilities include: Coordinating the undergraduate Expository Writing program, teaching two to three expository writing courses per year and collaborating with other Communication Studies faculty to advance curriculum development and to integrate speech and writing as communication skills.

Qualifications: University teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, academic program administrative experience, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Stephanie Vandrick, Chair, Expository Writing Search Committee, Department of Communication Studies, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

Established as San Francisco's first institution of higher learning in 1855, the University of San Francisco presently serves 8000 students in the arts and sciences, business, education, nursing, law, and professional studies. The University is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively contribute to such an environment.

INTERNATIONAL MEDIA/VIDEO OR MULTIMEDIA PRODUCTION
Pending approval and funding, the Media Studies Program at the University of San Francisco invites applications for a tenure-track position in International Media with a second specialization in Production, at the Assistant Professor level, anticipated to begin in the Fall 2000.

Responsibilities: may include inter alia, International Media, Media and Globalization, Media and New Technology and/or Video or Multimedia Production, and other courses according to the candidate's specialty. Competency in one or more of the following core courses is also necessary: Media and Society, Media Institutions, Media Law and Policy, Media Theory, Media Audience.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required.

Send applications to: Bernadette Barker-Plummer, Chair, International Media Search Committee, Department of Media Studies, University of San Francisco, 2130 Fulton Street, Harvey 243, San Francisco, CA 94117-1080.

Applicants should submit a letter of application, curriculum vitae, graduate transcripts, brief description of research plans, copies of recent research papers, statement of teaching philosophy, evidence of teaching ability including copies of teaching evaluations, and three letters of recommendation. Applications must be received by October 15, 1999, in order to ensure full consideration.

The University of San Francisco is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively contribute to such an environment.

USF is an Equal Opportunity and Affirmative Action Employer and will provide reasonable accommodations to individuals with disabilities upon request. We particularly encourage minority and women applicants for all positions.
MICHIGAN STATE UNIVERSITY

POSITION: Inviting applications for the position of Chairperson of the Department of Art at Michigan State University. Department includes 27 tenure-stream faculty and 300 majors in BA, BFA, MA, and MFA programs in the History of Art, Studio Art, and Art Education. Resides in the College of Arts and Letters at Michigan State University, a premier land-grant, A4U university enrolling over 40,000 students. A tenure-stream, 12-month basis appointment.

DUTIES: Provide leadership and promote a creative environment for instruction, research, and outreach activities. Oversee faculty, technology, and personnel management. Serve as an advocate for the arts. Be responsible for program planning, budgeting, curriculum, recruitment, student admissions, fund raising, and alumni relations. Cultivate a strong working relationship with the Kress Art Museum, as well as with the Center for Integrative Studies in Arts and Humanities, the MSU Museum, the Fine Arts Library, and other academic units within the college and across the university.

QUALIFICATIONS: Credentials appropriate for a tenured faculty appointment at the rank of Full Professor. Prospectus experience. An understanding of and sensitivity to creative, scholarly, pedagogical, and outreach issues related to history of art, studio art, and art education. A history that includes a commitment and demonstrated accomplishment in creative and scholarly activities appropriate to area of expertise.

APPLICATIONS: Due November 15, 1999. Position to begin July, 2000. Women and minorities are encouraged to apply. Send a letter of application, vita, the names of three references, a statement of administrative philosophy, experiences, and vision, and any evidence of creative and scholarly work appropriate to your area of expertise to:

Kari Wolter, Chair
Chairperson Search Committee
Department of Art
Michigan State University
123 Kress Art Center
East Lansing, MI 48924-1119
Telephone: (517) 355-7610
(References will be contacted only at a later stage in consideration.)

Michigan State University is an Affirmative Action/Equal Opportunity Institution. Persons with disabilities have the right to request and receive reasonable accommodation.

New York University

ASSISTANT DEAN

Gallatin School of Individualized Study

The Gallatin School of Individualized Study of New York University seeks an Assistant Dean to work closely with the Dean and Associate Dean on several aspects of the School’s operations. The Assistant Dean works with the professional staff and faculty to oversee the preparation and administration of the budget (generating enrollment forecasts, organizing the planning of expenditures in various categories, managing the financial procedures and record-keeping) and serves as the School's liaison to the central administration for budget-related matters; oversees the planning, allocation and improvement of space and facilities, including office renovations and capital projects; and oversees the planning and implementation of technology systems in the School, especially computer equipment and networks. The Assistant Dean represents the Gallatin School and the Dean on various University committees and at public functions, maintains cooperative relations with other University units, and performs other general administrative tasks.

Requirements are a Master’s degree, five years in administration and budget management, preferably in higher education or the non-profit sector, and expertise in computer technology. Successful candidates will possess excellent organizational, management, communications and interpersonal skills.

Founded in 1972, Gallatin is a school of 1,100 students within a major research university. Its innovative, nationally recognized B.A. and M.A. programs in individualized study encourage students to develop an integrat ed, multidisciplinary program of study that combines courses in the various schools of NYU with independent studies, internships and Gallatin’s own interdisciplinary seminars and arts workshops. The School emphasizes excellent teaching, intensive student advisement and mentoring, and a unique combination of program flexibility and academic rigor.

The salary for the Assistant Dean is competitive, and the preferred starting date is November 1, 1999. Applications (a letter of interest and a current vita) and nominations should be sent by September 15, 1999 to: David Moore, Associate Dean, Gallatin School of Individualized Study, New York University, 715 Broadway, New York, New York 10003.

NYU encourages applications from women and members of minority groups.

California State University, Bakersfield

DEAN OF THE SCHOOL OF BUSINESS AND PUBLIC ADMINISTRATION

POSITION ANNOUNCEMENT

California State University, Bakersfield

DESCRIPTION: California State University, Bakersfield (CSUB) invites applications and nominations for the position of Dean of the School of Business & Public Administration. CSUB was founded in 1968 and is one of the twenty-two campuses in the California State University System. The campus serves the metropolitan Bakersfield population of 300,000 and a growing and diverse population of 790,000 people who live primarily in the Southern San Joaquin Valley. Oil and agriculture are traditional mainstays of the economy, but recently light industry and service businesses have brought new jobs and people to the area. The relatively low cost of housing and the region's proximity to the major population and recreation areas of the state are attractive features.

The University is composed of three schools: Arts and Sciences, Education, and Business & Public Administration. The School of Business & Public Administration offers undergraduate and master's degrees in business administration and in public administration. Business degrees are accredited by AACSB, and the graduate degree in public administration is accredited by NASPA. The School is organized into the departments of Accounting and Finance, Management, and Marketing, and Public Policy and Administration. A new classroom/office building, including a community financed Leadership Development Center, is being planned for construction during the next two years, which will be a new home for the growing School of Business and Public Administration. CSUB is also significantly engaged in applications of technology to teaching and learning, and in distance education.

The University has a growing enrollment which is presently at about 5,600 for an annual average of 4,800 full-time equivalent students. About twenty percent of CSUB's students major in programs offered by the School of Business and Public Administration. The Dean will enjoy the opportunity to work new facilities, strong community support, and change due to growth and restructuring.

RESPONSIBILITIES: The Dean is expected to provide leadership for the School of Business & Public Administration in the areas of teaching, academic planning, research, and community relations and support. The school plays an important role in the local business community. The Dean is responsible for all budgeting, personnel, and instructional services, and administers all curricular and academic support programs in the School. The Dean is expected to work closely with faculty in curricular matters and to provide significant leadership in the development of strong and innovative academic programs. The Dean reports to the Provost and Vice President for Academic Affairs and represents the School to the University, external professional communities, local, state, and national agencies, and the regional community.

QUALIFICATIONS:

- An earned doctorate and a record of teaching excellence and scholarly achievement or other qualifications sufficient to merit an advanced rank appointment.
- Demonstrated administrative experience leading to the dean's level of responsibility.
- Demonstrated experience in the acquisition of external funding.
- Proven ability to work with faculty, students, other administrators, and members of the community.
- Competence to assume a leadership role in a public institution of higher education.

APPLICATIONS: For maximum consideration, deadline for receipt of application materials is November 1, 1999. The appointment is expected to begin by August 1, 2000. Salary and benefits are competitive and commensurate with experience and qualifications. Nominations, letters of application with resumes, and names of at least four references should be sent to:

Chair, Search Committee
Dean of Business & Public Administration
Office of the Provost and Vice President for Academic Affairs
California State University, Bakersfield
5001 Stockdale Highway
Bakersfield, California 93311-1009

CSUB fosters and appreciates ethnic and cultural diversity among its faculty, students, and administrative staff. Applications from women, ethnic minorities, veterans, and individuals with disabilities are welcome. For additional information about CSUB please refer to CSU Home Page ([http://www.csusb.edu](http://www.csusb.edu)).
Daytona Beach Community College is a public, multi-campus, comprehensive community college which serves approximately 10,000 full-time equivalent and 33,000 headcount students. It is home to the Southeast Museum of Photography.

ADMINISTRATION

DIRECTOR OF ASSESSMENT SERVICES: Master's degree in Education or related field required, Doctorate preferred. Experience with standard assessment Instruments, practices and techniques, demonstrated competence and experience with computer technology required. Responsible for coordination and supervision of all activities related to the delivery of assessment services.

DIRECTOR OF RESOURCE DEVELOPMENT: Master's degree required and a minimum of five years demonstrated successful experience in grants and resource development. The office is responsible for the funding source identification, budget preparation and the proposal process. Proven record of achievement. Excellent proposal writing and communication skills. Ability to work in participatory management framework. Must be able to facilitate teamwork approach to proposal development with faculty and staff. Responsible for the review and research of appropriate publications, literature, and Internet regarding grant opportunities; establishment of personal contacts with state and federal officials representing funding agencies; and work with faculty and staff to develop, incubate, discuss and share ideas for enhancements through grant opportunities.

FACULTY

All Faculty positions are full-time, tenure track, nine-month positions with a comprehensive benefits package. It is anticipated that positions will begin no later than January 2000. Probable appointment at Instructor to Associate Professor level.

ENGLISH: Master's degree in English with emphasis on composition and literature.

ENGLISH LANGUAGE INSTITUTE: Master's degree in TESOL. English or related field, TESOL teaching experience. TESOL certification preferred.

MATHEMATICS: Master's degree in Mathematics or related area with at least eighteen graduate hours in mathematics. Ability to teach developmental math through calculus.

DEADLINE TO APPLY: All positions are open until filled.

SALARY: Competitive salary commensurate with experience.

Interested candidates should forward a letter of interest, current vita, a completed BCC Employment Application, copies of transcripts and the names, address and telephone numbers of at least three professional references to the address below.

DAYTONA BEACH COMMUNITY COLLEGE IS AN EQUAL OPPORTUNITY/ADA EMPLOYER AND MINORITIES STRONGLY ENCOURAGED TO APPLY

THE UNIVERSITY OF MICHIGAN
TAUBMAN COLLEGE OF ARCHITECTURE + URBAN PLANNING

ARCHITECTURE PROGRAM

The Architecture Program is seeking to appoint up to four tenure-track faculty in the following areas: design studio, structural design, design theory, construction technology and/or computer applications. Applicants should have a professional degree (B.Arch., M.Arch. or its equivalent) and experience in practice or a Record of research and scholarly work. Applicants who can teach design studio in addition to one or two areas of expertise are preferred. The ability to contribute to doctoral studies is also desirable.

FELLOWSHIPS

The Architecture Program also offers three one-year teaching fellowships to the William Muschenheim Fellowship for individuals wishing to begin an academic career, the Walter B. Sanders Fellowship for experienced practitioners, and the Willard A. Ombs publication Fellowship for individuals interested in building science and design. Fellows are expected to spend one academic year in residence.

DOCTORS PROGRAM

The Doctoral Program in Architecture is seeking to appoint a Chair for its Doctoral Program in Architecture. One of the first doctoral programs in architecture, it currently has four areas of specialization: History and Theory, Environment and Behavior, Design Process and Methods, and Building and Environmental Technology. The Chair, a tenure faculty member, must have a record of outstanding pedagogy, scholarship and research, and is expected to be an academic leader. A doctoral degree or its equivalent is required. Email: docsarch@umich.edu

URBAN DESIGN PROGRAM

The Taubman College of Architecture is seeking a tenure-track, post-professional Master of Urban Design degree program, scheduled to offer courses in the fall term of 2000. It is envisioned that a related research community center will also be established. Up to two tenure-track faculty members are being recruited, one for a leadership position as Director of the program and/or research community center. Applicants should be experienced in urban design practice and theory and should have at least twelve years of professional experience in the fields of city planning, environmental planning, landscape architecture and urban design.

U.S. REGIONAL PLANNING PROGRAM

The Urban and Regional Planning Program intends to make one or two faculty appointments at any rank to begin in fall 2000. We seek faculty with expertise in community development planning, geographic information systems (GIS), and transportation planning. We welcome applicants who combine research using GIS with specializations in areas of planning. We invite candidates who have either international and domestic interests. A Ph.D. in planning or a related field is highly desirable. The Urban and Regional Planning Program offers a professional master's degree in urban planning as well as an interdisciplinary Ph.D. in Urban, Technological, and Environmental Planning. Applicants should have expertise in educating both professionally-oriented students and future scholars. Faculty at the University of Michigan are expected to be highly recognized for their scholarly and creative work.

The University of Michigan is an affirmative action/ equal opportunity employer.

Assistant Professor
MODERN EUROPEAN HISTORY

DePaul University’s department of history seeks applicants for a tenure track position (assistant level) in eighteenth/nineteenth-century continental western Europe. The successful applicant must have at least two published book-length works and be willing to teach in interdisciplinary programs. The ability to teach European women’s and/or Russian history is highly desirable. Commitment to undergraduate education and publications or strong scholarly potential is required. Ph.D. must be completed by August 2000. Send letter of application, C.V. and three references to Chair, European History Search Committee, History Department, DePaul University, 2222 North Kenmore Avenue, Chicago, IL 60614-3216. Deadline: November 15, 2000. Interviews will be held at the American Historical Association annual meeting, December 1, 1999.

Send materials and address inquiries to Chair, History Department, DePaul University, 2222 North Kenmore Avenue, Chicago, IL 60614-3216. Deadline: November 15, 2000. Interviews will be held at the AHA annual meeting, December 1, 1999.

DePaul University is committed to diversity in education and employment.

LATINO/LATINA POLITICS

The Department of Political Science and the Interdisciplinary Program in Chicano/Latino Studies at the University of California, Irvine invite applications for an experienced Assistant Professor or junior Associate Professor position. This tenure track or tenured position will be a joint appointment between the Department and the Program. Candidates should have strong research and teaching interests in Latin American politics, preferably with substantial experience with empirically grounded research. There is preference for scholars investigating the Latino/Latina experience in California and the southwestern United States. Specific topics are open but include gender, race, democracy, immigration, and public policy issues. A comparative approach to inquiry is highly desirable. The successful applicant will be expected to be actively involved in the research activities of the Center for the Study of Latinos in Global Societies. Ph.D. is required. Applications should be received by October 15, 1999. The University of California is an affirmative action/equal opportunity employer and particularly welcomes applications from minorities and women. Interested applicants should submit a cover letter, vitae, and three letters of reference to: Chair, Chicano/Latino Studies Search Committee, Department of Political Science, 3151 Social Sciences Plaza, University of California, Irvine, CA 92697-5100. E-mail: skirkens@uci.edu

THE UNIVERSITY OF MICHIGAN-DEARBORN

CHANCELLOR

Nominations and applications are invited for the position of chancellor of the University of Michigan-Dearborn, an interactive, student-centered institution committed to excellence in education, research, and service. The University of Michigan-Dearborn is one of three campuses of the University of Michigan, and is located on 196 acres of the former estate of automotive pioneer, Henry Ford. Grounded in the liberal arts and sciences, UM-Dearborn is a thriving educational community that offers high-quality, accessible undergraduate, graduate, professional, and continuing education programs to a diverse and talented student body primarily from southeastern Michigan. The campus comprises four academic units: the College of Arts, Sciences, and Letters; the College of Engineering and Computer Sciences; the School of Education; and the School of Management. One-third of the campus, more than 70 acres, is maintained as one of the largest natural areas in metropolitan Detroit, serving as a research and teaching facility. The campus serves more than 8,000 full-time, part-time, commuting students; 7,000 undergraduates and 1,600 graduate students.

The Chancellor of the University of Michigan-Dearborn, under the general direction of the President of the University of Michigan, serves as the chief administrator for this campus of 829 full-time and part-time faculty and staff. The Chancellor exercises broad delegated powers and is responsible for all aspects of campus administration. We seek a chancellor who is committed to excellence in education and scholarship. Candidates should have outstanding leadership ability; substantial administrative experience in higher education; deep appreciation of academic values; the ability to effectively represent the UM-Dearborn to its constituencies and to the state legislature; experience in working with an urban, multi-cultural community; understanding of the appropriate public service roles of an urban, regional university; and demonstrated ability in fund-raising.

Nominations and applications, including a letter describing qualifications for and interest in the position and a current curriculum vitae should be sent to: Professor Sidney Bolkosky, Chair Search Advisory Committee for the Chancellor University of Michigan-Dearborn 1070 Administration Building 4901 Evergreen Road Dearborn, MI 48128-1491 Fax: 313-593-5204 Phone: 313-593-5500 E-Mail: und_chancellor_search@umich.edu

Candidates are also encouraged to check for more information and for updates at the search website: www.umich.edu/pres/chancellor_search.

The University of Michigan treats inquiries, nominations, and applications for this position and others in a confidential manner. Applicants should confirm in their letters that they wish their applications to be kept confidential.

The University of Michigan is an equal opportunity, affirmative action employer and actively seeks the applications and nominations of qualified women and minorities.
FACULTY POSITIONS

Located on an attractive campus in the heart of Boston, Northeastern University is a premier research University that is student-centered, practice-oriented and urban. Northeastern University is an Equal Opportunity/Affirmative Action, Title IX Employer.

DEAN

College of Education

The University of Florida invites nominations and applications for the position of Dean of the College of Education. The Dean of Education is the chief academic officer of the college and is responsible for all facets of the college's performance. Candidates must have an earned doctorate, a distinguished record of scholarly accomplishments, and appropriate administrative experience. The Dean should have the qualifications necessary to hold a tenured academic appointment in the appropriate department in the College of Education, University of Florida. Salary will be commensurate with experience and other qualifications.

The deadline for nominations is Friday, October 15, 1999, and the deadline for applications is Monday, November 1, 1999. Interested candidates should forward a letter addressing his or her qualifications, a current curriculum vitae and the names, addresses and telephone numbers of five references to:

Will Harrison, Chair
Search and Screen Committee
R.O. Box 117390
University of Florida
Gainesville, FL 32611-0180
DEAN, A. JAMES CLARK
SCHOOL OF ENGINEERING
University of Maryland, College Park

The University of Maryland invites applications and nominations for the position of Dean of the A. James Clark School of Engineering. The School has the fastest rising reputation for excellence among engineering schools as illustrated by rankings in, for example, U.S. News and World Report. The Dean is expected to provide innovative leadership to build upon the outstanding research and educational activities within the School.

The University of Maryland, College Park, is a comprehensive Carnegie I, public university with almost 33,000 students in baccalaureate, master's and doctoral programs. It is located on a 350 acre campus just outside Washington, D.C. The School is composed of the Departments of Aerospace Engineering, Chemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, Fire Protection Engineering, Materials and Nuclear Engineering, Mechanical Engineering, as well as the Institute for Systems Research and the Engineering Research Center. Further information on the School may be found at <http://www. enr.umd.edu>.

The Dean has responsibility for approximately 200 faculty, 2,800 undergraduate students, 1,200 graduate students, and an annual state budget of approximately $37 million. The School has experienced substantial growth in research productivity over the past several years and currently conducts a thriving and diversified $60 million per year program. The School also supports an array of continuing education programs and televised distance learning programs. Through a highly successful Technology Advancement Program (TAP) and a number of other activities, the School maintains an active outreach program with local industry. The primary responsibilities of the Dean's position include academic leadership, fund raising, maintaining and enhancing relations with alumni and government and industrial partners, and administrative oversight and direction. Candidates should have qualifications for a tenured full professorship in one of the School's departments, a distinguished record of scholarly achievement, a strong commitment to excellence in teaching, research, and service, demonstrated administrative ability and excellent interpersonal and communications skills, and a demonstrated commitment to diversity. The Dean reports directly to the Senior Vice President for Academic Affairs and Provost, the chief academic officer for the University.

Applicants and nominees should submit a letter of interest, curriculum vitae, and the names, addresses and telephone numbers of at least four persons who can be contacted by the search committee for references. For best consideration, all materials should be received by November 1, 1999. Nominations are encouraged and will be received at any time. Please send all materials to:

Search Committee for Dean of the
A. James Clark School of Engineering
Attention: Ms. Sheila Mahaffy
1119 Main Administration Building
University of Maryland
College Park, MD 20742

Please feel free to direct inquiries to the chair of the committee, Dr. Jack Minker, via e-mail to <minker@cs.umd.edu>.

The University of Maryland, College Park, actively subscribes to a policy of equal education and employment opportunities. Women and minority candidates are encouraged to apply.

CONTROLLER

Connecticut College invites applications for the position of Controller. Reporting to the Vice President for Finance, the Controller oversees the financial reporting, budget, accounts receivable, accounts payable, endowment accounting, purchasing and cashing functions. The successful candidate will be responsible for modeling, expenditures and other key indicators as they relate to budget and actual results for the past, current and future budget years; developing financial benchmarks for the College as it enters into a new five-year strategic plan; preparing governmental compliance reports; and managing the audit process. As the College implements a new comprehensive software system, the Controller will play a critical role in the review of financial policies and procedures, and the development of a new accounting structure.

Qualifications: Bachelor's degree in Accounting or related field, with a minimum of 5 years' management experience in the not-for-profit sector. Thorough knowledge of accounting standards that affect higher education, budgeting, and computer modeling required. A CPA or MBA is preferred.

Connecticut College is located in the historic seaport of New London now undergoing extensive revitalization. The Southeastern Connecticut area offers a rare combination of affordable living and natural, unspoiled beauty with convenient access to Boston and New York City. The college offers a highly competitive salary and excellent benefits package.

To apply, please send a cover letter, resume and the names, addresses, and phone numbers of three professional references to: Office of Human Resources, Connecticut College, 270 Mohegan Avenue, New London, CT 06320.

Connecticut College is actively seeking to diversify its staff and faculty. Affirmative Action/Equal Opportunity Employer.

AA/EOE
WILLIAMS COLLEGE

PRESIDENT

The Board of Trustees of Williams College announces a search for the 15th President of the College. The new president will be expected to assume office in the summer of 2000.

Williams, founded in 1793 and recognized as one of the preeminent liberal arts colleges in America, seeks a distinguished person capable of providing the visionary leadership required to enhance the College's strong and distinctive academic program. The College is a coeducational institution, which has built its reputation on a long tradition of outstanding teaching and scholarship and on the academic excellence of its 2,000 undergraduate students.

To provide effective leadership, the next president must believe deeply in the value of the residential liberal arts college experience; be an articulate advocate for Williams, on campus and off; possess a keen understanding of the College's unique campus culture and system of governance; continue the advances Williams has made in creating a diverse faculty and student body; and display those personal attributes required to communicate and interact effectively with a broad range of internal and external constituencies.

The Presidential Search Committee will begin to review candidates in September 1999 and continue until the appointment is made. Nominations and expressions of interest, which will be treated in confidence, should be sent to:

Mr. Raymond F. Henze III, Chair
Presidential Search Committee
Williams College
P.O. Box 628
Williamstown, MA 01267

Barbara E. Taylor and Ronald S. Stead of the Academic Search Consultation Service are assisting the search committee. Inquiries may be made to them at 202/332-4049.

An Affirmative Action/Equal Opportunity Employer, Williams College especially welcomes and encourages applications from women and minority candidates.

Position Announcement

DEAN

SCHOOL OF ARTS AND SCIENCES
California State University, Bakersfield

Description: California State University, Bakersfield (CSUB) seeks an academic leader with vision and energy who will work collaboratively to continue building a distinguished School of Arts and Sciences (A&S). A&S offers 23 baccalaureate and 8 masters degrees in the liberal arts disciplines of the fine and performing arts, humanities, behavioral and social sciences, biological and physical sciences, and mathematics, and in professional programs of computer science, criminal justice, environmental resource management, nursing, and social work. A&S also offers a diversified baccalaureate degree in Liberal Studies for students interested in elementary school teaching. In addition, A&S is establishing baccalaureate degree programs at the University's off-campus center in Antelope Valley.

CSUB enrolled its first students in 1970 and is one of the 23 campuses in the California State University (CSU) system. CSUB has a growing enrollment with an annual average of 8,500 students or 4,770 full-time equivalent students (FTES). Approximately 70 percent of the total FTES and is the largest of the University's nine campuses. For additional information, please refer to the CSUB Home Page at http://www.csusbak.edu/.

The service region for CSUB is larger than West Virginia and includes the southern San Joaquin Valley, the eastern Southern Sierra Nevada, and the western Mojave Desert. Bakersfield, the largest city in the region, has a population of 231,000, and the service region exceeds 700,000. Bakersfield offers all the amenities of modern city life and a relaxed life style for families. New housing is the norm in the State for value and availability. New light industries and service businesses have expanded on the traditional economic base of oil and agriculture.

Responsibilities: The Dean for the School of Arts and Sciences is expected to provide leadership within the context of the CSU system and CSUB's service region. He/she is responsible for ensuring teaching excellence, research and scholarship, and community service within the School. He/she must be able to recruit, hire, and evaluate all A&S faculty, and academic planning, budgeting, and personnel management for the School. The Dean is expected to work collaboratively with faculty and other academic administrators in all curricular matters and in the development of strong, innovative, academic programs. He/she will have major responsibilities in acquiring grants and contracts and engaging community leaders to establish partnerships that will enhance the School's programs. The Dean reports to the Provost and represents the School within the University and to external professional constituencies, local, state, and national agencies, and the regional community.

Qualifications:

1. An earned doctorate and a record of teaching excellence and scholarly achievement and other qualifications sufficient to merit appointment as a Professor in one of the disciplines in the School of Arts and Sciences.
2. Appropriate academic administrative experience leading to the level and range of responsibilities described above.
3. Demonstrated success in the acquisition of extramural funding and the development of community partnerships.
4. Effective engagement of faculty, students, staff, other university administrators, and members of the greater community.
5. Commitment to the ethnically and culturally diverse population served by the University.

Applications and Nominations: Review of applications will begin November 1, 1999. Completed applications must include the following:

1. Letter of application addressing the responsibilities and qualifications described above.
2. Current vita, and
3. Names, addresses, telephone numbers, and e-mail addresses for at least four (4) references.

Nominations and applications should be sent to:

Chair, Search Committee
Dean for the School of Arts and Sciences
Office of the Provost
California State University, Bakersfield
9001 Stockdale Highway
Bakersfield, CA 93311-1099

Salary and benefits are competitive and commensurate with experience and qualifications. Appointment is expected to begin August 1, 2000.

CSUB fosters and appreciates ethnic and cultural diversity among its faculty, students, and administrative staff. Applications from women, ethnic minorities, veterans, and individuals with disabilities are welcome.
Master's Degree in Public Policy: A One-Year Program For Midcareer Professionals

The Woodrow Wilson School of Public and International Affairs at Princeton University offers a Master’s Degree in Public Policy (MPP), providing rising leaders in the international and domestic policy worlds an opportunity to expand their organizational skills and intellectual breadth to compete in an increasingly complex global environment.

The Princeton Difference. The dynamic resources of the Woodrow Wilson School and Princeton University provide the ideal setting for this rigorous one-year residential program. The School’s faculty, curriculum, and research facilities are recognized throughout the world for excellence.

Financial Assistance. The School’s generous policy meets the full demonstrated needs of all admitted students. More than three-quarters of graduate students at the School receive financial aid, which for most includes full tuition and a stipend for living expenses.

Qualifications. Applicants must possess a minimum of 7 years of professional experience in domestic or international government agencies, and/or experience in the nonprofit sector. Successful candidates must demonstrate creativity, leadership skills, a commitment to public service, and the intellectual capacity to thrive in a demanding academic setting.

To Apply. For an application and further information, contact:
Woodrow Wilson School of Public and International Affairs
Master’s Degree in Public Policy
Princeton University
Princeton, NJ 08544-1013
Telephone: 609-258-4836
E-mail: MPP9@princeton.edu
Website: http://www.princeton.edu/degree/mpp.html
On-line applications now available.
Applications must be received by January 3, 2000.
FULL-TIME FACULTY

The School of Art and Design at Pratt Institute invites applications for the following tenure-track faculty positions, available Spring, 2000 or thereafter. Responsibilities include teaching, student advisement, curricular development and committee work. We offer a competitive salary and an excellent benefits package. Salary and faculty rank are commensurate with qualifications and experience.

ART HISTORY - DESIGN HISTORIAN

Applicants must have the ability to teach industrial design history, interior design history, and design theory and criticism. Responsibilities include a one-semester survey of Latin American history, upper division courses in the candidate's area of specialization and senior thesis advising. Strong commitment to teaching at the undergraduate level and to research and publication are primary qualifications. Candidates should hold the Ph.D. by the time of employment and have college or university level teaching experience. Review of applications will begin December 1, 1999, and continue until the position is filled. Please send c.v., graduate transcript, three letters of recommendation and cover letter to:

Latin American History Search Chair
Office of Secretarial Services
Bates College
2 Andrews Road, 7 Lane Hall
Lewiston, ME 04240

Bates College values a diverse college community and seeks to assure equal opportunity through a continuing and effective Affirmative Action Program.

WESTERN CONNECTICUT STATE UNIVERSITY

VICE-PRESIDENT FOR STUDENT AFFAIRS

http://www.wcsu.edu

WCSU is located in Danbury, a city in Fairfield County, 60 miles north of New York City. The University is located on two campuses and serves 5,800 undergraduate and graduate students. Western is one of the four comprehensive universities that comprise the Connecticut State system. WCSU is divided into the School of Arts & Sciences, the School of Professional Studies, and the Ancell School of Business. WCSU invites applications for the position of Vice-President for Student Affairs.

Duties: The Vice-President reports to the President, serves as a senior member of the President’s staff, and is actively involved in strategic planning efforts. The Vice President must provide energetic and creative leadership in the development and maintenance of high quality programs in all areas that deal with student life outside the classroom, and will serve as the principal advisor to the President with respect to student matters. The Vice President is responsible for the oversight of student-related operations, that include: Residential Living, Student Activities and the Student Center, Student Health Services, Counseling, and Student Judicial and Disciplinary Matters.

Qualifications: The successful candidate will have at least seven years of demonstrated experience in higher education student services at the senior management level. A Master’s degree in student personnel administration, higher education administration or similar discipline; a doctoral degree is preferred. The Vice President should have experience in student services and program development, budgeting and student information systems. The successful candidate should also provide evidence of demonstrated leadership ability, high ethical values, excellent interpersonal skills, and the ability to communicate effectively both verbally and in writing.

Application Deadline is October 22, 1999. Interested candidates should send a cover letter and current resume along with names and telephone numbers of three professional references to:

Human Resources Department
Western Connecticut State University
181 White Street
Danbury, Connecticut 06810

Western is an Affirmative Action/Equal Opportunity Employer. Women and minorities are encouraged to apply.

RARITAN VALLEY
COMMUNITY COLLEGE

President

The Board of Trustees of Raritan Valley Community College (RVCC) invites nominations for the position of President. The President is the Chief Executive Officer of the College and reports directly to its fourteen-member governing board.

RVCC has garnered six national awards over the past five years for excellence in faculty instruction, innovative new courses, distinctive leadership, integrating technology into instruction and offering international resources to the business community. It has set national precedent by freezing tuition for five consecutive years including the '99-'00 academic year. The College recently opened the Advanced Technology Communication Center, serving as a conduit between the college and the business community, and a new Science and Technology Laboratory Complex is set to open in early 2001.

The College’s 1999 – 2002 strategic plan focuses on establishing RVCC as a Regional Higher Education Center, collaborating with other colleges and universities to offer baccalaureate and graduate degree programs on campus.

RVCC is a bi-county college in New Jersey, supporting both Somerset and Hunterdon counties. Somerset and Hunterdon counties continue to be identified in the top ten for the fastest growing and wealthiest areas in the country. Located in North Branch, New Jersey, the 240-acre suburban/rural campus is sixty minutes from both New York City and Philadelphia. It offers 73 associate degrees and certificates to a student body of over 6,000, and customized training programs and non-credit courses are taken by over 5,000 corporate employees. RVCC can be located on the web at www.raritanval.edu.

The position will remain open to nominations until a select list of candidates is put forth for final consideration by the Board of Trustees; however, the search committee, comprised of students, faculty, staff, community members and trustees, intends to begin its screening of candidate files by the end of October. Nominations should be addressed to:

Dr. John McGuire
Vice Chairman, Board of Trustees
Chair, Presidential Search Committee
C/O College and Community Relations
Raritan Valley Community College
PO Box 3300
Somerville, NJ 08876

Robert Moran and Shelly Weiss Starbeck of the A.T. Kearney Education Practice are assisting the Board and Search Committee in this search, and interested parties are also invited to contact them: A.T. Kearney, Inc., Education Practice, 333 John Carlyle Street, Alexandria, VA 22314. Phone: 703/739-4127, Fax: 703/518-1782.

Raritan Valley Community College is an affirmative action, equal opportunity employer. It actively seeks and encourages nominations from women and members of the underrepresented populations.

Box G, Kingston, RI 02881. The University of Rhode Island is an AA/EEO employer and is committed to increasing the diversity of its faculty, staff and students. Persons from under-represented groups are encouraged to apply.

DIRECTOR OF PLANNING
AND INSTITUTIONAL RESEARCH

Montgomery College, a multi-campus two-year community college located in the Maryland suburbs of Washington, D.C., is seeking a key administrator to lead and direct a comprehensive unit responsible for strategic planning as well as institutional and marketing research. Montgomery College operates three campuses and a Continuing Education division which enroll 40,000 students each year from 170 nations and employ 1,300 full-time faculty and staff. The College places a high priority on planning and research to help guide and support student success, academic planning, budgeting and long-term institutional directions. The College's new president has recently launched a broad planning and visioning process, involving community and college leaders in shaping the College's agenda for the next three to five years. The Director of Planning and Institutional Research will play a key role in this effort.

Reporting directly to the new Vice President for Administrative and Fiscal Services, this position is responsible for:

- leading the College's strategic and annual planning processes, including accreditation efforts
- internal, federal, state, and local reporting
- enrollment forecasting
- conducting surveys
- institutional and marketing research
- institutional assessment functions, including program and discipline review and auditing

The successful candidate will be able to provide vision, leadership, and management for a team of eight talented staff and three faculty associates.

Qualified candidates will possess the following:

- at least an earned master's degree in a relevant area
- at least five years of progressive experience in relevant planning, research, and evaluation in higher education and public administration
- demonstrated excellence in team leadership, management, written and oral communication, human relations and analysis and presenting
- demonstrated ability to bring about constructive change using participatory processes and to work effectively with an ethnically and culturally diverse work force
- knowledge and experience working with appropriate software including SPSS or SAS
- experience in developing and maintaining databases for reporting and decision making
- commitment to the philosophy of a comprehensive community college

The salary range is $64,293 to $99,502 per year. The College offers excellent benefits.

Applications for vacancy #1009 can be obtained by calling our 24-hour job line at 301-279-5274, or by coming to the Office of Human Resources, Montgomery College, 900 Hungerford Drive, Suite 130, Rockville, Maryland 20850.

The deadline for the receipt of applications is Friday, October 8, 1999

Montgomery College is an EO/AFF
Title IX employer.
ASSOCIATE DEAN FOR TEACHER EDUCATION
School of Human Development and Community Service

The School of Human Development and Community Service is accepting applications for the position of Associate Dean for Teacher Education.

The Position: The Associate Dean is a full-time Management Personnel Plan (MPP) position reporting directly to the Dean of the School of Human Development and Community Service. The person selected will provide leadership in developing relationships between the Division and the school districts, promoting and instituting effective responses to the increased emphasis on the professional preparation of teachers and administrators. Critical is the ability to collaborate with the department heads, this individual will coordinate the budget, course scheduling, faculty contracts, student admissions, and other division operations. The individual oversees the Credential Center, supervises the clerical and other staff support in the Division, and represents the Division in accreditation and credentialing agencies. The Associate Dean maintains and promotes necessary campus and community liaisons that pertain to education and assumes additional duties as assigned.

Qualifications: The successful candidate will require a demonstrated record of excellence, a record of working collaboratively, an earned doctorate in a relevant education field from an accredited institution, appropriate evidence of quality scholarship, research, and publications; successful university-level teaching experience in education, experience in academic administration, experience in public K-12 education, and some familiarity with instructional technology. Evidence of strong interpersonal skills and experience in working with diverse populations is essential, as is knowledge of issues and trends in teacher education.

Salary: Commensurate with experience and qualifications.

Application Procedure: Applicants should provide a letter of application listing qualifications and experience for the position, a current vita, a brief statement of administrative philosophy and vision, at least three and not more than five recent letters of reference that directly address this position, and other support materials as appropriate. For further information call 714-278-3357. Review of applications will begin on November 15, 1999, but applications will be accepted until the position is filled. Materials should be submitted to:

Chair, Associate Dean Search Committee
Division of Education, EC-379
School of Human Development and Community Service
P. O. Box 6658
Fullerton, CA 92834-6658

For further information, visit our web site at: hdes.fullerton.edu

CSUF is an Affirmative Action, Equal Opportunity, Title IX, ADA Employer.

DIRECTOR OF INTERNATIONAL EDUCATION

The College of Oenotnia invites applications for the position of Director of International Education. SUNY-Oenotnia, a four-year arts and sciences college with a pre-professional focus, offers liberal arts and professional programs at undergraduate and masters levels. See the Oenotnia homepage for additional information (http://www.oenotnia.edu).

QUALIFICATIONS: Ph.D. in appropriate field required along with ability to teach at the college level fluency in English and competency in one foreign language; studied (or had relevant experience) in a non-English speaking country; proven track record in recruiting foreign students and in the area of developing student and faculty foreign exchange programs, with demonstrated success in the collegial management of those programs; and demonstrated expertise in administering study abroad programs, academic credentialing, immigration laws/regulations and budgetary/financial management required.

TO APPLY: Send letter of application, resume, names, addresses and telephone numbers of three references to: Employment Opportunities, Box H, 208 Netzer Administration Building, SUNY Oenotnia, Oenotnia, NY 13204-4015. Review of applications will begin immediately and continue until the position is filled. SUNY Oenotnia is an Affirmative Action, Equal Opportunity Employer. Women and minorities are encouraged to apply.

Dean of Science and Technology
The College of Staten Island of the City University of New York seeks nominations and applications for the position of Dean of Science and Technology. As head of one of the college's two academic divisions, the Dean of Science and Technology reports to the Vice President for Academic Affairs/Provost and is a member of the President's cabinet. The Dean of Science and Technology has responsibility for the academic standards of the division as a whole and specifically for the personnel, curriculum, and budgets of six academic departments (Biology, Chemistry, Computer Science, Engineering Science and Physics, Mathematics, Nursing). The division offers master's programs in Adult Health Nursing, Computer Science, Environmental Science, and Physical Therapy; and, in conjunction with the CUNY Graduate School, doctoral programs in Computer Science, Neurosciences, Physics, and Polymer Chemistry. The Dean has responsibility also for supervision of faculty recruitment, appointment, reappointment, tenure, and promotion, including the implementation of college affirmative action policies; budget, space, and instruction; and, in coordination with the University Center for Career Development, for direction of full-time and part-time auxiliary instruction programs and for directing the major career development program for the division. The Dean will also be responsible for expanding and strengthening the college's role in community service programs.

Qualifications include an earned doctorate in a discipline represented in the division. A demonstrated record of distinction in college teaching and scholarship is required, as is a successful record of extramural funding. A minimum of three years of higher education leadership at a level of department chair or above is expected. The search committee will be particularly interested in candidates with proven ability to manage fiscal and physical resources, with superior communication and organizational skills, and a personal and professional commitment to equal opportunity and affirmative action goals.

Salary range: $92,004 - $112,602, commensurate with qualifications.

The College of Staten Island is one of 11 senior colleges of the City University of New York system. CSI has an enrollment of 12,000 and awards associate, baccalaureate, and master's degrees; and offers doctoral programs in Computer Science, Neurosciences, Physics, and Polymer Chemistry in conjunction with the University Graduate Center. Modern, state-of-the-art classrooms and facilities provide an outstanding learning environment on a 204-acre campus.

The position is effective September 1, 2000. The review of applications will begin on October 25, 1999 and continue until the position is filled.

Suggestions and nominations by third persons are invited. Applicants should submit a letter of interest that draws attention to the pertinent features of their credentials, a curriculum vitae, the names, addresses, and telephone numbers of three references to: Chairperson, Search Committee for Dean of Science and Technology South Administration (1A), room 505 College of Staten Island/CUNY 2800 Victory Blvd, Staten Island NY 10314 email: ililias@postbox.csi.cuny.edu EEOAA/A/E employer

Please send a letter of application, CV, and three letters of recommendation to Chair, Search Committee in American Women's History, History Department, University of Wisconsin-Madison, 3211 Humanities Building, 455 N. Park Street, Madison, WI 53706-1483.

Unless confidentiality is requested in writing, information regarding the applicants must be released upon request. Finalists cannot be guaranteed confidentiality.

The University of Wisconsin-Madison is an Equal Opportunity/Affirmative Action Employer and encourages applications from women and minorities.
DEAN
COLLEGE OF LIFE SCIENCES

The University of Maryland, College Park invites applications and nominations for the position of Dean of the College of Life Sciences. This is one of the core academic colleges at the University, and in recognition of its growing importance, the University has targeted this college for substantial enhancement with new faculty positions and increased budgetary support. The faculty of the college are organized in four departments: Biology, Cell Biology and Molecular Genetics, Chemistry and Biochemistry, and Entomology. Students may also earn graduate degrees in several inter-college and intercampus interdisciplinary programs. The Dean, who reports directly to the Senior Vice President for Academic Affairs and Provost, provides both academic and administrative leadership for the College.

The University of Maryland, College Park, is a comprehensive research-oriented, public university of Carnegie I category with almost 35,000 students in baccalaureate, master’s and doctoral programs. It is located on a 350-acre campus just outside Washington, D.C. The University has established relationships with major research laboratories in the area such as NIH, NASA, NIST and the Smithsonian Institution, which provide opportunities for partnerships for students, faculty and programs in the life sciences. Most recently, the College joined the Federal Drug Administration in a joint Institute for Food Safety and Applied Nutrition.

The College, which is one of the most popular for undergraduate majors, has approximately 130 tenured and tenure-track faculty. It serves approximately 2300 undergraduate majors and 540 graduate majors, and provides science courses to large numbers of students from across the University. It has a large and growing research base, with nearly $32M in research expenditures in the most recent fiscal year and an annual state-supported budget of $16.7M. Further information on the College can be found at <http://www.life.umd.edu>.

The person selected to fill the position of Dean of the College of Life Sciences should have the scientific distinction, vision and energy to lead a top-ranked science college into the 21st century, and experience in recruiting and retaining faculty of the highest caliber, promoting collaborative research partnerships, and managing a complex academic enterprise. Candidates should possess an earned doctorate, have a record of accomplishment commensurate with appointment as a tenured professor in a department of the College, and possess a demonstrated capacity for creative and effective leadership. The successful candidate must have demonstrated a commitment to fostering diversity.

Salary will be competitive and commensurate with experience. Applicants should submit a letter of interest, curriculum vitae, and the names, addresses, and telephone numbers of at least four persons who can be contacted by the search committee for references. Nominations are encouraged and will be received at any time. Review of nominations and applications for this position will commence on November 1, 1999, and continue until the position is filled. All materials should be sent to:

Search Committee for the Dean of the College of Life Sciences
Attention: Mrs. Sheila Mahaffy
1119 Main Administration Building
University of Maryland
College Park, MD 20742

Telephone inquiries to discuss the position are welcome. Please feel free to call the chair of the committee, Dr. John E. Osborn, Professor of Mathematics, at 301-405-5129 or direct inquiries via e-mail to <joe@math.umd.edu>.

The University of Maryland, College Park, actively subscribes to policies of Affirmative Action and equal education and employment opportunities. Women and ethnic minority candidates are encouraged to apply.

DEAN
SCHOOL OF ART AND DESIGN
Search Reopened

Pratt Institute invites applications and nominations for the position of Dean of the School of Art and Design.

This century-old private college, which is also comprised of the Schools of Architecture, Information and Library Science, Liberal Arts and Sciences and Professional Studies, offers undergraduate and graduate degrees to a student body of 3800 on its Brooklyn and Manhattan campuses. The departments of the School of Art and Design include Arts & Cultural Management, Art & Design Education, Art History, Computer Graphics, Creative Arts Therapy, Communications Design, Design Management, Fashion Design, Fine Arts, Foundation Arts, Graduate Communications/Package Design, Industrial Design, Interior Design and Media Arts.

Reporting to the Provost, the Dean participates in campus strategic planning and development, and is responsible for the School's budget, management, administration, faculty review, and dynamic leadership of professional programs, at a promising moment for the Institute's future.

Candidates should have a terminal degree or its equivalent; a record of academic administrative success and a broad knowledge of, and experience in, art and design. Excellent communication skills and ability to work effectively with diverse constituencies required. Preferred starting date is January, 2000. Salary is commensurate with background and experience. Excellent benefits.

Pratt Institute is an Equal Opportunity Employer (M/F).

Director Multicultural Opportunities for Developing Excellence in Leadership

(MODEL)

The University of San Francisco welcomes all to participate in a rich educational opportunity where the commitment to diversity is demonstrated in its longstanding Jesuit, Catholic tradition.

We seek applicants for this position who can lead students in furthering the university's mission to "prepare men and women to shape a multicultural world."

If you are energetic, have imagination and the interest and ability to work within a diverse, multicultural, urban environment, this is the job for you.

The Director is responsible for initiating programs and services that support the development of a multicultural community, overseeing services related to the unique needs of international students and supervising community service and service learning programs. The ideal candidate will have a Master's degree in college student personnel, higher education administration, or related field required; three to five years of related administrative experience in student affairs; significant experience in working with students of broad cultural backgrounds, coordinating community service opportunities, and designing educational leadership programs; specific experience with providing direct services to international students and students of color in a urban, multicultural inclusive environment, particularly within the context of a Catholic, Jesuit institution; the ability to incorporate academic/educational components into co-curricular programs and services; strong supervisory and problem-solving skills in the context of interpersonal, group relations, and campus-wide collaboration; demonstrated written and oral communication skills appropriate for the job requirements; general knowledge of INS regulations applicable to international students and visiting scholars; and the ability to use a personal computer for e-mail, word-processing, databases, and editing publications.

For the "essential job duties" visit our web page at: http://jobs.usfca.edu. To apply, please submit a letter of interest and resume to: University of San Francisco, Human Resources - HO-350317, 2130 Fulton Street, San Francisco, CA 94117 or e-mail to: resumes@usfca.edu.

Established as San Francisco's first institution of higher learning in 1855, the University of San Francisco presently serves 8,000 students in the schools of Arts and Sciences, Business, Education, Nursing, Law, and Professional Studies. The University is a private, Catholic and Jesuit institution. We particularly welcome candidates who will positively contribute to such an environment.

USF is an equal opportunity employer dedicated to affirmative action and work force diversity. The University provides reasonable accommodations to qualified individuals with disabilities upon request.

DEAN
COLLEGE OF EDUCATION

Texas Tech University invites applications and nominations for the position of Dean of the College of Education (COE). Texas Tech University is located in Lubbock, a city of approximately 197,000 situated in the High Plains of West Texas, and is the only university in Texas housing a School of Medicine, School of Law, and a comprehensive university on the same campus. The University holds the Carnegie Foundation Research II classification with expenditures in excess of $27 million in sponsored projects annually. Enrollment of approximately 25,000 includes almost 4,000 graduate students, and degrees are offered in more than 150 undergraduate, 100 master's, and 60 doctoral fields of study.

The TTU College of Education (www.educ.ttu.edu) is accredited by the State Board for Educator Certification, the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. The College has approximately 67 full-time equivalent faculty (60 graduate faculty) members. The COE has an annual budget of approximately $5.6 million and a committed endowed fund of $3.17 million. Bachelor's, master's, and doctoral degrees are offered through the divisions of Curriculum and Instruction and Educational Psychology and Leadership. Fall 1998 undergraduate enrollment included 780 upper division undergraduates, 292 master's students, and 173 doctoral students.

We seek a dynamic leader with a strong commitment to academic excellence in teaching, research, and outreach. Reporting to the Provost, the Dean represents the College to the University and its many constituencies. The position requires:

- distinguished scholarly achievements (teaching and research) meriting tenure full professor appointment;
- record of effective leadership and administrative experience in higher education;
- emphasis to expand cultural diversity;
- capacity to articulate (add-develop consensus) and implement the College and University visions and goals;
- exhibit excellent interpersonal and communication skills including advocacy, community building, shared governance, and collaboration;
- ability to communicate effectively with students, faculty, university administrators, K-12 educators, government and foundation officials and alumni;
- capacity to secure funds to support programs and ability to maximize internal and external resources;
- capacity to establish and maintain high University/school relationships;
- broad understanding of national trends and issues in K-12 education, teacher preparation in the contemporary social context, and technological innovations;
- experience with development of strong teacher preparation programs;
- leadership for compliance with state mandates, regulations, teacher certification, and accreditation; and
- a terminal degree.

Applicants should submit a curriculum vita, a personal statement on the role and future of Colleges of Education in comprehensive universities; and names, addresses, and telephone numbers of three references. Anticipated beginning date is Summer 2000. Nominations and applications being accepted immediately and should be received by November 15, 1999, or until the position is filled. Women and members of minority groups are encouraged to apply. Applications and nominations should be submitted to:

Texas Tech University is an EEO/Affirmative Action Institution.
The Fashion Institute of Technology is a comprehensive community college accredited by the Middle States Association of College and Schools, NASAD, and FIDER, with an enrollment of 5,750 full-time and 6,000 part-time students and 1,500 full-time and part-time faculty and staff.

The Fashion Institute of Technology invites applications for the following positions:

### Assistant Vice President for Academic Affairs

F.I.T. seeks an energetic visionary to assist the Vice President for Academic Affairs in a variety of administrative responsibilities relating to all direct reports. Duties are all encompassing and include: development and the implementation of policies, oversee academic programs, and management of a strategic plan. Assist with the development of annual operations budget, managing the primary financial operations including budget, accounting and finance.

Successful candidates will possess a Master's degree, Doctorate preferred, 5 years of recognized professional achievement as well as demonstrated effectiveness as an administrator of a college or university. Thorough knowledge of academic policies and processes. Evidence of administrative, analytical, computer and organizational skills required.

### Dean for Curriculum and Instruction

F.I.T. seeks a Dean who can lead the faculty in strengthening existing academic programs and in exploring and developing new opportunities in undergraduate and graduate education. The Dean will be charged with integrating technology into curriculum and with developing distance learning programs.

Successful candidates will possess a Doctoral degree and be both an experienced practitioner and a distinguished educational leader. Demonstrated excellence in undergraduate teaching, high energy, excellent interpersonal skills; a minimum of 5 years in the Academic Affairs area as well as demonstrated success in development and implementation of changes in curriculum. Experience in contemporary methods of instructional delivery, program planning, a vision for the use of technology in the classroom, and principles of general education in a college or university environment.

Qualified candidates who are interested must submit a letter of interest that details experience and accomplishments relevant to the above qualifications, a current resume and the names, addresses and phone numbers of five references to: Employment Manager, Fashion Institute of Technology, Seventh Avenue at 27th Street, New York City 10001-5992, fax to 212-217-5616 or send e-mail to hanrahm@fitnys.edu.

Review of applications will begin immediately and the search will remain open until a successful candidate is identified for each position.

F.I.T. is an Equal Opportunity and Affirmative Action Employer.
Alfred University

PRESIDENT

Alfred University invites inquiries, nominations and applications for the position of president. The position is available in June 2000 upon the retirement of President Edward G. Coll, Jr., who is completing an 18-year term.

Alfred offers degrees ranging from bachelor's to doctorate to approximately 1,900 undergraduate and 400 graduate students, and combines the feel and ethos of a small college with the resources and dynamism of a university. The University has received wide recognition for its accomplishments, and has been ranked among the top 15 regional universities in the North by U.S. News and World Report for the past 12 years. External funding for research and new programs recently reached $6 million, including extensive support from private industry.

The president will be expected to provide visionary leadership for this diverse University, to develop an articulated academic vision, to build resources and institutional visibility, and to bring the management skills necessary to lead a complex University with both public and private institution issues. Compensation is highly competitive. Additional information about the University and the position is available on the web at www.alfred.edu/president.

We are being assisted in this search by Dr. Jean Dowdall and her associate, Elizabeth Currie, A.T. Kearney Executive Search, 333 John Carlyle Street, Alexandria VA 22314. You may contact them at (703) 739-4725, jean.dowdall@atkearney.com, or elizabeth.currie@atkearney.com for additional information or to offer a nomination. Candidates should provide a resume, the names and phone numbers of five references, and a cover letter describing their interest in the position and the experience that they would bring to address the issues described above.

Candidate materials should be sent to:

Dr. Gene Bernstein, Chair
Presidential Search Committee
Office of the President
Alfred University
Saxon Drive
Alfred NY 14802

E-mail submission is encouraged; documents with Word attachments should be sent to drak@alfred.edu. Review of candidates will begin on October 15, for fullest consideration, materials should be received by that date.

Alfred University is an equal opportunity employer and does not discriminate on the basis of gender, sexual orientation, age, race, color, national or ethnic origin, religion, or disability.

Southern Connecticut State University

ASSISTANT PROFESSORS OF COMPOSITION

SIX TENURE TRACK POSITIONS, FALL 2000

The English Department of Southern Connecticut State University invites applications for a maximum of six (6) tenure-track faculty lines to teach first-year composition as part of a new university writing initiative.

A terminal degree is preferred, with particular preference for specialization in Composition/Rhetoric. Excellence in teaching and demonstrated research interests in composition are required. The teaching load is four first-year composition courses per semester.

Please send letter of interest, curriculum vita, 3 letters of recommendation (teaching letters preferred), brief statement of teaching philosophy (about 500 words), sample course syllabus, and samples of evaluated student papers to: Prof. Jim Rhodes, Chair, Personnel Committee, English Department, Southern Connecticut State University, New Haven, CT 06555

All materials must be received by November 13, 1999. SCSU is an EEO/AA employer. Minorities and women are strongly encouraged to apply. Any applicants hired with a non-terminal degree will be appointed at the level of instructor.

The Minnesota State Colleges and Universities invites applications and nominations for President of Metropolitan State University. Metropolitan State is a comprehensive urban university committed to meeting the higher education needs of those who live and work in the Twin Cities metropolitan region. Founded in 1971, the university has a strong tradition of individualized educational programs, offering more than 60 undergraduate majors and minors and four graduate programs. Metropolitan State is committed to providing high-quality, accessible education for working students. The university serves more than 8,000 full- and part-time, traditional and returning students at two campuses and four centers in St. Paul and Minneapolis, with an annual budget of $29 million. A core of 90 full-time faculty is supported by 450 part-time practitioners who bring state-of-the-art knowledge to the classroom. The university reflects the diversity of its urban environment in its students, faculty, and community partners. Metropolitan State enjoys a healthy relationship with surrounding community organizations, area two-year colleges, and local businesses, and seeks a leader who can promote growth and development from internal and external constituency groups.

Metropolitan State University is part of the Minnesota State Colleges and Universities (MnSCU) system, with 36 colleges and universities located in 46 communities. Metropolitan State offers occupational, associate, baccalaureate, and graduate education. The system enrolls more than 145,000 students, with approximately 17,000 employees and an annual budget of nearly $1 billion. Further information can be found at Metropolitan State’s website www.metrostate.edu or www.mnscu.edu.

Metropolitan State is located in the heart of the Minneapolis/St. Paul Twin Cities area (population 2.5 million). The metropolitan region is known for the quality of its theaters, music, parks, art, educational resources and successful international business community. There are numerous opportunities for social, recreational and cultural growth.

Responsibilities: The President serves as chief executive officer responsible for leading the university's faculty, staff and students in accomplishing the mission. Educational policies are jointly determined through participation of faculty, students, and administration. The President reports to the MnSCU Board of Trustees. The President is the university's chief executive officer.

Qualifications:
- An earned doctorate or other appropriate preparation. Evidence of successful college/university teaching and research experience is expected.
- Evidence of a strong commitment to and support of academic excellence.
- Demonstrated ability to create and maintain a climate that supports the highest quality education.
- Commitment to an accessible, respectful university community which fosters and celebrates diversity among its students, faculty, staff, and administration.
- Understanding of and demonstrated commitment to working in partnership with community groups, employers, legislators, other academic institutions, and faculty, staff, and students.
- Excellent administrative skills, including planning and managing complex budgets, to meet short and long-term needs. Ability to devise creative solutions to issues confronting higher education.
- Effectiveness in securing and developing significant resources from public and private sources.
- Demonstrated commitment to open communication and consensus building among all constituencies. Ability to work effectively with collective bargaining units. Ability to advocate effectively for the university with public and private entities.
- Evidence of high personal and professional integrity, and the ability to exercise strong leadership skills in a rapidly changing environment.

Applications and nominations should be received as soon as possible. Review will begin in early November, 1999 with an anticipated appointment of July, 2000. Application materials should include a letter of application, resume, and the names, addresses, telephone numbers, and e-mail addresses of at least five references which include faculty, student leadership, and community leaders. Applications, nominations and requests for information should mention the Metropolitan State University Presidency. Send materials to:

Linda Skillman, Associate Vice Chancellor for Personnel
Minnesota State Colleges and Universities
500 World Trade Center, 30 East Seventh Street, St. Paul, MN 55101
Telephone: (651) 296-5157 FAX: (651) 297-3145

Women and people of color are encouraged to apply.

EQUAL OPPORTUNITY EDUCATOR AND EMPLOYER

Montgomery College, a growing two-year community college with three campuses located in suburban Washington, DC, with a credit student enrollment of over 20,000 and more than 7,000 continuing education enrollments, 1,500 regular employees, and an operating budget of $100 million, is seeking applications and nominations for the position of Director of Enrollment Management. Reporting to the President for Academic and Student Services, the Director of Enrollment Management is responsible for directing the development and implementation of the enrollment management plan of the College. This position integrates the student recruitment, admissions, registration, financial aid and records efforts of the College into an efficient and effective operation to ensure the highest quality of service to students.

The Director of Enrollment Management develops and implements annual and long-range comprehensive recruitment plans which include well-defined communications and tracking, high school visits and open house components. The Director provides a broad leadership in addressing enrollment variables, recommending enrollment management policies and procedures, and developing information to increase awareness of the College's program and services. The Director of Enrollment Management is responsible for supervising and providing leadership to the Offices of Admissions, Records, and Registration, the College Response Center, and the College Recruiters.

Candidates must have a Master's degree and completed coursework in marketing and forecasting. 5 years of documented administration experience which includes marketing and forecasting experience in supervising leadership and developing diverse teams; experience in management and PC applications and integrated systems related to student services. In addition, candidates must have documented experience in strategic and operational planning, trend analysis, budget development, and management. Qualified candidates must possess excellent written and oral communication and interpersonal skills.

The salary range is $63,291 - 95,000 with a starting salary generally falling within the first half of the range. The College offers excellent benefits. Applications for vacancies should be obtained by calling our 24-hour job line at (301) 729-5734 or by coming to the Office of Human Resources, Montgomery College, 901 Hagerstown Drive, Suite 130, Rockville, Maryland 20850. Applications must be received by 5:00 p.m. on October 1, 1999.

Montgomery College is an EOE/AA/Title IX Employer.

UNIVERSITY OF NEW HAMPSHIRE

DEAN

WHITTEMORE SCHOOL OF BUSINESS AND ECONOMICS

The University of New Hampshire invites applications and nominations for the position of Dean of the Whittemore School of Business and Economics. This search is directed by the Whittemore School’s Board of Trustees. The University seeks an individual who will assume leadership of the school as a new dean.

The Whittemore School of Business and Economics is the University’s largest school both in terms of student enrollment and faculty size. The school is one of New England’s premier business schools with an enrollment of over 6,000 students served by 230 faculty members. The school has a strong tradition of excellence in teaching, research, and service to the community and the State of New Hampshire.

The Whittemore School of Business and Economics includes the following programs: Business Administration, Accounting, and Hospitality Management. The school offers graduate programs including an MBA. The school also offers undergraduate programs at the bachelor’s, master’s and Ph.D. levels.

Applications and nominations should be received as soon as possible. Review will begin in early November, 1999. Applications must be received by December 15, 2000. The search will continue until the position is filled.

Applications and nominations should include the name and address, telephone number and e-mail address for at least five references, and should be submitted to:

Heidi Biever
Office of the Provost and VP for Academic Affairs
Thompson Hall
University of New Hampshire
Durham, NH 03824

The Committee will begin review of applications on October 15, 1999. Date of appointment will be no later than July 1, 2001.

UNH is an affirmative action/equal opportunity employer.

UNH is strongly committed to achieving excellence through diversity. The University actively encourages applications and nominations of women, minority persons, disabled and minorities of other underrepresented groups.

COLLEGE OF LIBRARY AND INFORMATION SERVICES

ASSISTANT ASSOCIATE, OR FULL PROFESSOR IN INFORMATION POLICY

Position Description

The College is developing a new area in information policy and is seeking a full-time, tenure-track faculty member. Information policy deals with the roles, structures, guidelines, and regulations that guide the creation, management, and use of information by institutions and the public. The position will focus on the theories, issues and processes involved in the development and implementation of information policy, particularly in a digita, networked environment, in government, business, education, libraries, and other settings in the US.

A doctorate in library/information science, government, public policy, business, or other field related to information policy, or a J.D. is required. Exceptional potential for research is required at the Assistant Professor level, for appointments at a higher level, a distinguished record of research and contribution to policy analysis is expected. The appointee will be expected to develop and teach courses in information policy and related areas, develop and maintain a strong research program, carry out professional service and advise and work closely with students.

The appointment covers 9/12 months each year with the opportunity for summer teaching. Rank and salary at appointment will be commensurate with qualifications and experience.

University of Maryland/College of Library and Information Services

The University of Maryland is a distinguished Research One university. Its setting close to Washington, D.C. provides an unusually rich environment for access to information and for information policy studies. The University has a policy of being responsive to the needs of dual-career couples. It is an affirmative action and equal opportunity employer. CLIS offers a wide range of courses and degrees at the Masters' and Doctoral levels. Additional information about the College is available at its web site. http://www.clis.umd.edu

More information and application submission

Applications will be accepted until appropriate candidates have been identified. Inquiries and applications should be sent to the Search Committee Chair, Dr. Bruce W. DeCatalyst, Associate Professor, College of Library and Information Services, 4105 Hornbeck Library Building, University of Maryland, College Park, MD 20742-3145 Phone: 301-405-2001 E-mail: bds8@umd.edu
Re-Visioning Machismo in the Service of Transformation

It is our challenge as members of la comunidad Latina in the United States to subvert aspects of la cultura Latina so that we can turn it towards transformation, that is, toward our participation in the creation of fundamentally more loving and just alternatives. We are the living members and carriers of la cultura; it belongs to us. Therefore it is up to us to decide which stories wound us and which ones deepen our humanity. This means that we can take the archetype of the macho in our heritage and remove it from the service of destructive stories such as possessive love, patriarchal domination, and physical abuse in the service of deformation, and redefine and rediscover it in the service of transformation. The answer is not to blame and punish men; the problem is not men, nor the masculine role, machismo, but rather the distortion of the masculine. Where men become arrested in destructive forms of machismo that give us as Latinos permission to dominate women, children, and one another in order to prove our manhood. This cripples us as men and forces us to assert our masculinity primarily through the control of others.

We can and need together as a culture and community to empty ourselves and to liberate men and women from the patriarchal machismo, the abuse of masculinity, without destroying machismo itself, which has its roots in masculine energy. This means that we can vigorously condemn and end the misuse of machismo as a force to maintain the dying story of patriarchy through the use of violence against women and children and to struggle against those forces in the wider society that hurt Latino men so that they feel that the only place where they can assert themselves is at home. What is to be done? Let us consider strategies for growing our own Latino manhood through the subversion of machismo, that is, turning machismo from the destructive and reorienting it to the service of transformation:

- reject the sickness inherent in the notion that there is nothing that we can do to change our lives,
- turn our anger, our rage, into the necessary courage to bring about a better life,
- reject the pornography of the male organs as a weapon and substitute for intimacy,
- empty ourselves of the masturbatory sex of the patriarchal world in exchange for a serious, erotic love of giving and receiving in wholeness,
- rediscover the body, nature, emotions, feelings, the feminine, and/i/estas as the search for community,
- de-educate ourselves so as to throw out the lies regarding our maleness by re-educating ourselves to celebrate our emotional and affectionate nature,
- rediscover the sacredness of the self by going home to the deepest source within our own self,
- become a masculine and feminine male, that is, a whole person,
- create relationships of mutuality with women.

Now I am ready to redefine machismo not as the use of brute strength to dominate women but as the energy of a Latino man who steps forward urgently to love and nurture others and who uses his male energy together with women as mutual allies to protect and defend their humanity and that of the community by organizing a rent strike, setting up a co-op, establishing a scholarship fund, tutoring, spending time with the sick and senior citizens, and nurturing children. There is no time to what can be done when Latino men and Latina women rediscover each other in these kinds of personal, political, historical, and sacred tasks.

But since I also believe that masculine energy belongs to women in the very nature of their being human, then women also can and need to express their masculine strength as Martinmachi, Chicanas, and Latina women active in the fight for civil rights in the service of transformation. Just as Dorothy on her journey in The Wizard of Oz discovers that her companions, the lion, the tin man, and the scarecrow, were dimensions of her own undeveloped masculine self, so in like manner Latina women and Latino men can find their feminine and masculine wholesomeness through action in the community.

What we need as a community are Latina women who are strong within themselves and who, because they know who they are as full selves, are willing to struggle with their fathers, their husbands, their sons, their lovers, their brothers and uncles and male colleagues to daily choose to challenge a Latino male whom they care about to let him in such a way that you demand that he be a different and better kind of man. I am not looking for Latina women to save us or to make us their project but rather to struggle with those of us who are trying to re-create ourselves as Latino males in the service of transformation. Together we can refuse to continue the story of patriarchy and create new and more loving kind of family.

Opponents of Preference Ratchet Up

BY GUSTAVO A. MELLANDER

Many Hispanics have benefited from college and university goals when those colleges and universities sought to diversify their student body. Clearly it worked. Government data note that minority college enrollment was 253 percent in 1995, a healthy increase from 165 percent in 1980.

New battle lines

But as we all know, new battle lines have been drawn. There is a backlash. Legal challenges and changing political realities now challenge hard-fought gains.

Those who are livid over the remnants of affirmative action in college admissions have launched a new campaign. Claiming that U.S. colleges are illegally using racial preferences in admissions, they have expanded their attack. They have decided to try to influence students and faculty at their very colleges nationwide.

Their latest tactic has been to place advertisements in college newspapers. They are funded by the Center for Individual Rights (CIR), a conservative Washington, D.C., law firm representing students suing universities. Sensationally headlined “Guilty by Admission,” these ads claim that virtually every elite college in the United States violates the law.

On the other side of the spectrum, many educators contend that the law firm is wrong. Further, that it has misrepresented 20 years of court rulings by virtually ignoring them. It has also overstated colleges’ efforts to bring diversity to their campuses. Lastly, educators point out that colleges seek a lot more than just racial and ethnic diversity in their student body.

But the CIR is serious and determined. Aside from its college newspaper ads, it has issued two 30-page handbooks that it says are intended to help students identify discrimination and to help institutions keep from getting sued. But critics say that the handbooks are inflammatory and designed to incite lawsuits. The ads are controversial, and some newspapers have refused to accept them.

These ads and handbooks are part of a national initiative. They wish to highlight the use of racial preferences in admissions. They characterize college diversity programs “an antithesis of the civil rights movement.” As of yet, no civil rights organization has agreed.

“Colleges very clearly understand they may not use quotas,” said Norma Cantú, the assistant secretary for the Department of Education’s Office of Civil Rights. “There’s no need for these handbooks.”

At a news conference recently held in Washington D.C., the CIR cited anecdotes and a handful of state-specific studies as evidence that race preference is without merit and that it is widespread.

Another group supporting the campaign, The Center for Equal Opportunity, released a study concluding that the odds of a White candidate being admitted to the University of Virginia instead of an equally qualified Black candidate are 45 to one. As usual, Hispanics weren’t even mentioned.

The data, based on 1996 applications for 10 public Virginia universities, include the race, sex, SAT scores, class rank, and high school grade point averages of 72,000 applicants. The group studied the records of all who applied, whether they were admitted or not.

“We’ve found use of racial/ethnic preference in all of the states. The more selective schools tend to use preferences the most,” said Roger Clegg, general council for the group.

Other voices

Rene Redwood, executive director of Americans for Fair Chance, a group that advises colleges and community groups on affirmative action, contends that preference programs still are needed. Generations are yet to be served. And the “old boy network,” the way it used to be—a preference system of the first order—was too restrictive. “We have studies that show that there are communities that are healthier because women and minorities who become doctors often return to those communities,” Redwood said. So beneficial societal ramifications go far beyond the individual student involved. Both sides in the affirmative action battle cite the 1978 Bakke case, in which a White student denied admission to medical school claimed that specific slots reserved for minority students were unconstitutional.

Ultimately, the Supreme Court decided that colleges could not have separate admissions criteria for minority students, but could consider race a “plus” factor (Bakke was admitted and is now practicing physician.)

In 1996, a federal appeals court in Texas decided the Hopwood case and barred the consideration race in admissions and financial aid decisions. It cited other high court rulings involving such issues as government contracting.

The Supreme Court has refused to hear Hopwood, thus the appeal court’s decision is binding only in its region of Texas, Louisiana, and Mississippi. But its influence is pervasive and in reality goes beyond those three states. It has encouraged the enemies of affirmative action to sally forth.

Bottom line

Hispanics must remain vigilant. Vigilant about those who distort the record, about state ballot measures such as California’s Proposition 209 that ban any racial preferences, and about shifting public opinion. But it will take more than vigilance; it’ll take concerted action.

Dr. Mellander is a professor at George Mason University.
Community Colleges Aren’t What They Used to Be

They’re Taking the Lead, Says Miami-Dade

When they first opened their doors in the early '60s, community colleges were perceived as the educational equivalent of fast food—able to satisfy an immediate need, but without the “finer” qualities traditionally associated with higher education. But over the years, community colleges have transformed themselves, and all indications are that they might well become the premier educational institution for the new millennium.

While a number of external pressures have contributed to this transformation—including the skyrocketing costs of traditional four-year colleges, overcrowded university classrooms, and nationwide economic initiatives such as the Welfare to Work program—the driving force behind the advance to quality has come from within the institutions themselves.

There has been an intensive commitment to recruiting the best faculty, building state-of-the-art facilities, offering cutting-edge programs in emerging technologies, establishing relationships with local businesses to provide employment and training opportunities for students and graduates, offering direct-entry job training, and enhancing general education classes so that they are on a par with similar classes at four-year institutions.

For example, Bellevue Community College in Washington State carved out a niche for itself by providing some of the best computer-technology instruction anywhere, along with state-of-the-art computer facilities, including a $15 million Center for Emerging Technologies. Cuyahoga Community College in Ohio established one of the best music programs in the nation, offering music history, sound engineering, and production, in connection with the nearby Rock & Roll Hall of Fame. The college even has its own record label.

The other surprising contributor to the evolution of community colleges is—the students themselves. Back in the early '60s, community college students were perceived as low-achievers, those who couldn't or wouldn't succeed at a traditional college. But today, community colleges enroll some of the nation's most outstanding high school graduates, reversing the trend of community colleges as a “last chance” choice to that of students' first choice in education.

These students are breaking new ground in achievement levels across the board. For example, Miami-Dade Community College's student team in the National Model United Nations was the first team from a community college to take first place at this national event. And in the college's aviation program, its student pilots have consistently taken first place at national flying...
competitions--again, the first community college team to hold that honor.

In addition, community college alumni are proving themselves at some of the finest four-year institutions in the nation. Several recent studies indicate that, in almost all instances, in nearly every area of study, community college transfers to four-year institutions perform academically as well as (and sometimes better than) students who begin their studies at the same university. This increasingly common academic success has improved the prestige of community colleges nationwide, to the point that some Ivy League universities even give enrollment preference to outstanding students from community colleges.

Miami-Dade Community College (M-DCC) is a good example of these achievements. Recognized as the largest, most diverse, and one of the best community colleges in the nation, M-DCC offers more than 200 academic programs on six major campuses, two centers, and numerous outreach locations throughout South Florida. Its students include some of the region's top high school graduates as well as some of the poorest refugees from the Caribbean and Eastern Europe--emphasizing its mission to serve the needs of the community while offering the best possible education. For example, M-DCC's vocational graduates have one of the highest employment rates in the country, while its academically motivated students have gone on to such prestigious institutions as Smith and Cornell.

Meet the following students who have benefited from a community college education:

- Lester Sanchez, 21, a former sales clerk in an electronics store, who realized that he could never support a family on $7 an hour, so he enrolled in M-DCC to take the first steps toward pursuing his master's degree in electronics.
- Marcel Martinez, 19, the youngest-ever U.S. Junior Master Chess Champion, who will enroll in M-DCC this fall to earn his associate in arts degree.
- Antonio Cuadra, 22, (pictured below) who enrolled in M-DCC two years before he finished high school and attended both simultaneously in a special accelerated program. He graduated from M-DCC one month before his high school graduation, and went on to win a scholarship to study engineering at Cornell University, where he is at the top of his class.
- Dolores Gonzalez, 43, a hearing-impaired mother whose son is permanently connected to a respirator. After years of struggling with poverty, she enrolled in M-DCC to pursue studies in respiratory therapy. She graduated last May with two degrees--an associate's in arts and an associate's in science in respiratory therapy.
- Aquiles Mas, 21, (pictured below) the youngest ever to graduate from M-DCC's Medical Campus Dental Hygienist program. He also graduated from high school a year early, at the age of 17, and will follow in the footsteps of his father, who is a dentist, and his mother, who is a dental hygienist.
- Norma Cruz, 45, a former banking executive who switched careers mid-strike. She graduated from M-DCC's Translation and Interpretation program where she learned to speak four languages--enabling her to become a professional interpreter/translator for the county's judicial system.
- Carmen Rosa, 41, (pictured below) a single mother and a former victim of domestic abuse whose dedication to her education earned her more than $6,000 in scholarships and a new career as a medical records administrator.
- Lissette Garcia, 28, (pictured below) a Cuban refugee from the Guantanamo refugee camp, who earned her associate's degree in journalism and is now employed as a reporter with South Florida's leading newspaper.
- Cristina Diaz, 20, who works 45 or more hours a week at an accounting firm while also attending M-DCC full time.
- Carlos DoMato, 24, a former pilot with the Uruguay Air Force who moved to Miami without knowing more than a few words of English. He enrolled in the ESL program and went on to graduate with an associate's degree in engineering with the highest honors in his class. He also received a full scholarship to Georgia Tech University.

Part of the reason for these success stories is that M-DCC fields many programs that support students throughout their academic careers. There is an active honors program, an eco-urban resident-studies program, English as a Second Language, a variety of service learning programs, refuge assistance programs, and articulation agreements with some of the nation's leading universities as well as regional and state colleges.

The college also has developed strong relationships with major corporations to provide the best equipment and training and offer the best opportunities for employment after graduation. A recent example is the college's partnerships with Novatel Networks at Cisco--two of the nation's leading network providers--to train students for the high demand for computer networking professionals in the 21st century.

M-DCC also offers exception educational and training opportunities in nursing and health care and has earned an excellent reputation that most of the firefighters, police, nurses, and allied health professionals in Miami-Dade County are graduates of M-DCC.

But in addition to its goal of "putting students first," M-DCC also boasts a high-quality faculty--not by accident. M-DCC was the first community college in the country to create endowed chairs for its faculty based on the excellence of their teaching rather th
on their research.

"The Endowed Teaching Chair represents our institution's highest recognition of our faculty," says Dr. Eduardo J. Padrón, M-DCC president. "The recipients of this award have demonstrated to their peers the definition of excellence in every aspect of teaching. Further, they have made student learning their top priority, and, in so doing, have fulfilled the central mission of the college."

Some past award recipients:

- Mercedes Sandoval is a Cuban exile who received many honors for her studies in pre-Columbian art and Cuban history at the University of Havana, and who went on to earn her doctorate in the history and culture of the Americas from the University of Madrid, Spain. She joined Miami-Dade Community College in 1967 as a professor of anthropology, and developed and taught the first college-level course in Cuban history.

- Teresa María Rojas is a native of Cuba, with a degree in drama from Havana University, who has used her talents to bring multicultural, multilingual performance to

audiences throughout South Florida as the founder of the distinguished Prometeo Community Theatre. Rojas is an alumna of Havana's Sala Prometeo—a "poor and small theatre kingdom" located in La Calle Prado—who, once a fledgling actor, represented Cuba at the first Iberoamerican Theatre Festival in Mexico City. She is also a veteran radio and television performer. In 1972, she became a teacher. To her professor of chemistry and a rare third-time recipient of an endowed teaching chair. She is also a highly respected author who co-wrote Exploring Chemistry and Exploring Chemistry Laboratory Manual, the standard texts in college-level allied health chemistry courses, and the author of two National Academy of Science publications.

- Ana Cruz is a professor of accounting who spent more than a decade working for the IRS as well as in private practice before moving into the academic environment. She has earned quite a reputation for making the study of accounting both interesting and relevant.

- Alberto Meza is an artist, poet, author, innovator, and teacher who not only introduces his students to the arts, but also tries to "inflame" them with the passion to

Cayaboga Community College in Ohio established one of the best music programs in the nation, offering music history, sound engineering, and production, in connection with the nearby Rock & Roll Hall of Fame. The college even has its own record label.

Camaguey, Cuba, was the former consul and trade commissioner of Costa Rica in Miami at the Costa Rican Ministry of Foreign Affairs (1980-84), and has served as finance vice president for Aldo International Corporation, and as junior auditor for Price Waterhouse & Company in San Jose, Costa Rica.

"As evidenced by M-DCC, community colleges are ensuring that students are provided with state-of-the-art education and technology along with the most talented and qualified faculty," said Padrón. "We are extending our distance learning programs and broadening our options to be able to reach even more students....Community colleges will enter the new millennium as the nation's first choice for education."
Presidents of Color Support New Minority Alliance

BY MARILYN GILROY

“Prisons and welfare reform have gone ahead of higher education on the national agenda. We have to find the political will to change that.”

Tomas Arciniega, President, CSU-BAKERSFIELD

Hoping to build “unity, community, and influence,” the first Summit for Presidents of Color uniting African American, Hispanic, and American Indian college and university presidents was held in August in Florida. Fifty presidents from around the country gathered to address what one summit organizer called “a tough agenda” focusing on the challenges and opportunities facing leaders of color in their academic presidencies.

The summit was organized under the umbrella of the American Council on Education (ACE) and funded by the W.K. Kellogg Foundation. Participants listened to presentations and discussed sensitive issues dealing with politics of race and gender in the presidency. Several sessions focused on the importance of consolidating resources and creating inter-institutional partnerships to gain federal support.

Hector Garza, vice president for ACE’s Division of Access and Equity programs, explained that the summit goal was to begin a dialogue on how to build unity within the various ethnic groups and how to expand the spheres of influence of presidents of color and minority-serving institutions.

Attendance at the summit included Hispanic, African American, and American Indian presidents. Some, like Ricardo Romo, from the University of Texas at San Antonio, were new to their positions, but there were also seasoned veterans such as Tomas Arciniega, president at California State University-Bakersfield for 16 years.

Summit roundtables produced some frank discussions. One centered on how to increase the numbers of presidents of color and women who serve the academy. The search process, said several participants, is full of subtle racism. “Minority applicants have to worry...because they are under a microscope,” said Garza. “Interviews and dinners become a test where candidates worry about protocol and the need to do everything right.”

During the search process, committee members might ask minority and female candidates questions that reveal prejudicial attitudes such as whether or not the candidate will be able to bring in large donors. Will candidates’ spouses be able to entertain appropriately?

Sometimes minority candidates inadvertently hurt themselves, said presenters. Keynote speaker Vera King Ferris, president of The Richard Stockton College of New Jersey, noted that when two minority candidates surfaced on a short list for the presidency, they often end up competing with one another and canceling each other out. Or, she explained, times, minority search committee members will be biased advocates for the candidate of their community without accountability to the other candidates. Instead, Ferris said, we need to see all candidates as exemplary and worthy consideration.

Once in the presidency, minorities and women need to find a support network for dealing with forces and factors that influence their effectiveness, including the predominantly White male governing boards that exist at most colleges.

“White presidents have their own network, which provides them with strategies for handling difficult problems,” said Garza. “These networks are often not available to presidents of color, so we have to find ways providing more support for them so how can presidents of color begin to deal with interracial tensions more constructively and foster an alliance?”

“The reason these tensions exist is because of scarce resources,” said Garza. “Competition and co-optiveness are bound to surface when there are scarce resources. Rather than fight over how to divvy up the existing small pie, we talk...
about the need to unify and expand the pie.”

But participants agreed that creating strength in numbers would not occur without some operating principles for supporting instead of undermining one another.

Garza explained one of the principles of agreement that came out of the summit roundtables: “If we can’t say something good, then maybe we should be silent. When we can’t say support an issue brought forth by another racial group, we will try to be silent,” he said. “This will prevent the divide-and-conquer model from succeeding and will also ease the divisiveness among minority communities.”

The presidents of color also acknowledged that the various ethnic groups have a lot to learn about one another. One exchange of views tackled the whole notion of language that each community uses and how that language is interpreted. For example, on the third day of the summit, there was a meeting agenda item listed as “Understanding the Role That Nationalism Plays in Building Community.”

“When African Americans talk about nationalism, it is a positive concept, one about building community and family,” Garza said. “But when applied to Hispanics, nationalism has a negative connotation because we think of it as reductionist and narrow. It seems to apply only to a U.S. model and excludes a global dimension and international perspective on issues and therefore doesn’t resonate well with us. Our two communities need to understand such differences and appreciate why there might be some misunderstandings when this term is used.”

These barriers will have to be overcome in order for minority presidents and the institutions they lead to form inter-institutional partnerships, a process vital to remaining competitive in vying for large federal grants.

Fortunately, the Presidents of Color Summit came on the heels of an announcement that three higher education associations—The American Indian Higher Education Consortium, the Hispanic Association of Colleges and Universities, and the National Association for Equal Opportunity in Higher Education—representing 321 institutions, have joined to form The Alliance for Equity in Higher Education, a group that will lobby on behalf of colleges that serve the United States’ growing minority population.

The goal of the alliance, says Garza, is to help institutions that serve students of color to speak with unity on public policy issues, rather than pursue their agendas separately. They hope to secure more federal funding for a variety of projects but especially to increase financial aid packages for their students, who often come from poor families and limited public schools. These students generally need large financial packages, remedial courses, and mentoring, all of which are expensive, said Ricardo R. Fernandez, president of CUNY’s Herbert H. Lehman College, in a recent interview. Lehman’s enrollment is 41 percent Hispanic and 30 percent African American.

The creation of the alliance was welcome news at the Presidents of Color Summit. Many of the presidents strongly support this and other efforts to encourage collaboration among their institutions. Tomás Arceñiega, president of California State University-Bakersfield, who delivered an address to one of the summit’s plenary sessions, stated that it was absolutely critical to find resources that will increase the number of minorities earning baccalaureate degrees. (Data compiled by the Mortenson Research Seminar on Postsecondary Opportunity shows that in the 25-years-and-over age group, approximately 13.3 percent of Blacks and 10.3 percent of Hispanics have attained a bachelor’s degree.)

“Ethnic minorities are the critical pool of human resources for the future,” said Arceñiega. “Yet they are disproportionately represented by low-income status and educational achievement. ‘We have to carve out a bigger and better place for minorities and bring them into the economic mainstream.”

Arceñiega says that the only way to deal with the enormity of the problem is through national efforts. “We need a major initiative, something equivalent to the push for civil rights in the ‘60s. The federal government must become involved in improving public education. It will take a coalition of educational leaders, politicians, and other officials to move beyond an expression of concern to positive action.”

Arceñiega’s address was especially forceful and hopeful because he comes from a state that has been through some “troublesome times,” as he called them. He indicated that the dark clouds of the anti-affirmative action, anti-immigration movements that culminated in California voter propositions are lifting and that the current sociopolitical climate provides a major opportunity for change.

But although he sees a turn for the better, Arceñiega cautions that it will take a united effort to ensure that improving educational opportunity comes to the forefront of the political agenda.
Texas A&M Vision 2020
Doubling Faculty, Quadrupling Endowment in the Plans

BY PATSY J. ALBRIGHT

More than 250 of Texas A&M's best thinkers were thinking billion-dollar bold when mapping strategies for propelling the state's first public university into the ranks of the top 10 flagship institutions nationally, according to their recently released report. The bold thinking transpired over the past year as faculty, staff, students, alumni, and other supporters of Texas A&M formed a taskforce and held brainstorming sessions as part of the institution's vision 2020 project. Vision 2020 is intended to result in Texas A&M's attaining top-tier status by the year 2020, not merely for its own benefit, but for the benefit of the state and all its citizens.

"The destiny of Texas is inex- tricably linked to the level of quality of its premier institutions of higher education," notes the Vision 2020 report, entitled Creating a Culture of Excellence.

Another Vision 2020 goal is to continue the university's academic evolution while retaining, or even enhancing, many of the unique features that have differentiated Texas A&M in the past. No specific dollar value has been placed on implementation of the report's nearly 100 recommendations, but one of the stated Vision 2020 goals is to increase the university's private endowment to a level of $3 billion. Texas A&M's endowment currently totals about $700 million.

Perhaps the most costly recommendation is to increase the size of the present 2,400-member faculty by as much as 50 percent while also enhancing its quality. Other big-ticket recommendations include authored an introduction to the report that is separate. "We believe [the report] represents a recon- gence of some of the best thinking on higher education in many years. "It is bold in its recognition of the progress required to continue to move Texas A&M forward, a process that will add value to the degree of every former, current and future student.

"It is sensitiv in that it recogni- nizes our heritage as a land grant university, as place where students are center and as a place that inspires leadership. It is visiona- in that it sugges- many changes to the culture of Texas A&M that are challenging, par- ticularly when you regard the institution so highly."

The imper-
ate an environment that increases the probability of a Nobel Prize or Pulitzer Prize being awarded for work done at Texas A&M.

Strengthen graduate programs: have 20 percent of the students enrolled in master’s programs; double the number of post-doctoral fellows; increase to 50 percent the proportion of the master’s population enrolled in distance learning and nontraditional master’s offerings.

Enhance the undergraduate academic experience: ensure that the core of the university must be a residential, learner-centered community; attain a 95 percent first-year-student retention rate and 85 percent six-year graduate rate—levels consistent with the best institutions; have 75 percent of lower-division courses taught by tenured or tenure-track faculty; establish specialized dormitories for 25 percent of undergraduates; grow the Corps of Cadets to 2,800 members; and build a student leadership center.

Build on tradition of professional education: create a “university within a university”—a component funded entirely from non-state sources that would allow the entity to attempt new forms of educational opportunity to serve Texas business and industry at both the corporate and individual levels.

Build the letters, arts, and sciences core: establish an “honors college,” establish doctoral-level faculties in all arts, humanities, and social sciences disciplines; expand co-curricular art experiences available to students.

Diversify and globalize the Texas community: achieve student diversity that reflects college-bound Texas high school graduates; have 100 percent participation in international study opportunities for undergraduates.

Increase access to intellectual resources: have library expenditures per student equivalent to that of the best institutions; establish a digital library; have state-of-the-art information and computing systems available for anyone anywhere and anytime.

Enrich the campus: provide for all undergraduates to have the opportunity to live on campus at some point in their student experience; provide new residence halls equipped for the technological climate of the 21st century.

Build community and metropolitan connections: nurture connections with the local community; establish a strong partnership with Blinn College for the benefit of citizens of the Brazos Valley; establish a significant transportation, cultural, and economic linkage between Houston and other metropolitan areas and the Brazos Valley.

Dwelt and enlightened government and leadership: create and implement a comprehensive pay, benefit, and recognition plan for all faculty and staff that encourages informed risk-taking; maintain the lowest ratio of administrative costs to general educational costs when compared to peer institutions.

Attain resource parity with the best public universities: achieve resource allocation from state sources on a per-student basis, equal to the average for the best public flagship universities; acquire the ability to charge differential tuition based on market value, and offset the impact of the increase with access to appropriate financial aid; double the number of strategic alliances with corporate, public, and nonprofit partners; document the role of Texas A&M in attracting new industries to Texas; mount two successful capital campaigns that will increase the university’s private endowment to $3 billion, from its current level of $700 millions; increase financial support by alumni to 55 percent of the graduates.

Meet commitment to Texas: gain a significantly enhanced level of public and legislative support for the university’s flagship role as evidenced by tripling per-student appropriations; incorporate a required service experience into the undergraduate curriculum; quadruple the number of spin-off industries associated with the university; establish an “access center”: a large window through which requests for assistance or partnerships would flow.

Vision 2020 sets a direction and a context for future strategic planning at Texas A&M, the project’s leaders note in their closing statement in the report. Strategic plans from each unit on campus will be reviewed and updated annually, they add. These plans will include goals and strategies that are responsive to the imperatives and goals of Vision 2020. These cycles, as well as the day-to-day activities and decisions at every level of the university, will be guided by the general principles articulated in the report.

“This structure—our ongoing planning processes kept on target by a university planning council and an external review council—will help guide us,” Vision 2020 leaders explain. “But what chaperones this university into the first part of the next century is a commitment to be better than we have been before—to add value to the degrees of our students. Our commitment to excellence is the bedrock on which the future of the university will be built. Our responsibility to be better than ever is the ‘13th imperative’—and the most important of all.”
Diversity

as practically a byword in Texas A&M's Vision 2020 report. One of the report's 12 "imperatives" specifically addresses diversity goals, and one of the university's six "core values" reflects a commitment to provide even more opportunities for women and underrepresented minorities.

The report, "Creating a Culture of Excellence," includes an "imperative" entitled "Diversify and Globalize the A&M Community." Vision 2020 taskforce members emphatically state that Texas A&M must be a leader in promoting diversity in its student body, faculty, staff, and intellectual viewpoints.

"Affording opportunity to all racial and ethnic groups is critical to the future of Texas," Vision 2020 participants state in the report. "Our vision of diversity as a wellspring of academic energy goes beyond race and ethnicity to all manner of thought and action."

Specific Vision 2020 goals related to diversity:

- Achieve student diversity that reflects college-bound Texas high school graduates through appropriate recruitment and retention activities.
- Recruit outstanding minority students and provide the educational opportunities and leadership development experiences that will prepare them as future leaders of Texas.
- Reduce to zero the number of students, faculty, or staff who leave because of a perception of a less-than-welcoming environment.

In the university's statement outlining the core values that will drive all of its decision-making, the fourth provision states: "We will welcome all people and do our best to prepare them for purposeful and productive lives. We will attract a richly diverse student body, faculty, and staff. We will value and build character and leadership in our faculty, students, and graduates. We will treat all members of our community with respect and civility. We will foster an atmosphere of community among our faculty, students, staff, former students, and parents. We will increase opportunities for women and underrepresented minorities on our faculty, staff, and administration."

In addition to examining key issues and initiatives on the university level, the institution's academic units also went through similar processes and made their own assessments. Those assessments will figure prominently in their future perspectives and operations.

The College of Education, for example, included the following observation as part of its Vision 2020 planning in a section entitled "The University's Future Is Abt Diversity": "The pluralism of nation in terms of ethnic herit and economic status will conti to challenge the skills of educa and other professionals to estab and maintain high-quality, rigor schooling/educational experiences. Linguistic diversity and rap changing knowledge bases com with the pervasive effects of gen tional poverty on children and f amilies create a context in which College of Education commu must focus on the preservation enhancement of democracy."
The Politics of Caring

By Rosie Carbo

What Valenzuela found was that these students suffered from a host of problems with identity and lack of self-esteem due mainly to the school system.

Angela Valenzuela wasn't trying to indict the U.S. public school system when she began research at a Houston school made up primarily of Mexican immigrant and Mexican American children. But that's what emerged after years of research that culminated in dozens of personal interviews with teenagers representing the fastest-growing ethnic minority in the country.

The first Mexican American female professor ever hired at the prestigious Rice University, Valenzuela recently published her findings in a book titled Subtractive Schooling: U.S. Mexican Youth and the Politics of Caring.

"It was very emotional for me. I felt a lot of frustration. I felt like I walked away with a stronger sense of how the cards are really stacked against us."

Valenzuela knows firsthand about facing institutional opposition. She recently left Rice after having served as assistant professor of sociology since 1990. But the professor did not want to dwell on disputes concerning matters of tenure. Instead, Valenzuela preferred to point out that she had just published her first official book last month through State University of New York (SUNY).

"I was mainly interested in the general idea of assimilation. And the school, which has the fictitious name of Juan Seguin High School, was a natural laboratory for my research," said Valenzuela, who earned her doctorate in sociology from Stanford University in 1990."
“English-only forces....I hope it’s given the attention it deserves,” writes Jonathan Kozol, author of *Savage Inequalities: Children in America’s Schools.*

Lack of attention, which translated into lack of caring on the part of teachers, administrators, and the American school system in general, is why the word “caring” became part of the final draft. “A lot of people I talked to used the word ‘caring.’ The teachers said the students didn’t care. The parents said the teachers didn’t care, and the students said their teachers didn’t care. So the word ‘caring’ had to be in the title,” said Valenzuela.

Harriett Romo, a former colleague from Stanford, read the book at the request of Rice University officials prior to its recent publication. “I think it’s an excellent book that will be useful in schools around the country. I think it will also wake up some people and change attitudes and perspectives about Hispanic students,” said Romo, professor of education and sociology at the University of Texas at San Antonio. “Angela’s particular study focused on the school. She says caring and relationships are essential to keeping students in school. That’s her main theory.”

But while she agreed with Valenzuela’s theory, she didn’t think it was enough to bring about dramatic and necessary changes in curbing the high dropout rate among Hispanic students nationwide. “Angela is a very talented scholar who researched the book very thoroughly. But positive relationships are not enough. You need the structural academics,” said Romo, co-author of a soon-to-be released book about Latino youths.

Valenzuela would agree, since strong academics played a major role in guiding and shaping her own life from the time she was a child, one of three children in the family. Her father was a Baptist minister. “Growing up, my mother always said that she wanted to go back to school. So in my senior year in college, she did go back. It was such a pleasure going to school with my mom,” said Valenzuela.

“Mom went back when my younger sister graduated from high school. I relished being able to have these intellectual conversations with her. She graduated summa cum laude, higher honors than me,” she said.

The book evolved after Valenzuela graduated cum laude from Angelo State University in her native San Angelo, Texas, in 1981.

“I thought I wanted to teach accepted into Stanford University’s doctoral program, which included the need to earn a second master’s degree as a prerequisite to her doctorate.

“Actually, my dissertation, which focused on extended families, is what attracted me to the whole idea of cultural assimilation,” said Valenzuela, who earned a master of arts in sociology from Stanford in 1985. “I was concerned about the idea that our strong allegiance to our families was a hindrance to our achievement, and I wanted to test that hypothesis.” The result was a dissertation titled “Familism and Academic Achievement Among Mexican-Origin High School Adolescents,” the study that laid the groundwork for *Subtractive Schooling.*

“I found that strong allegiance to family was not a hindrance. And that if parents had a high school education, it was actually a help,” said Valenzuela, who recently accepted a position at the University of Texas in Austin as an associate professor of curriculum, instruction, and Mexican American Studies.

“In Subtractive Schooling I wanted to understand the experience of Mexican immigrant children and Mexican American children at the most general level. I wanted to know how the school play into the process of assimilation,” said Valenzuela.

“It’s a very well-done study that speaks truthfully about the problems of undereducating our youth which I know is a subject very close to her heart,” said Emili Zamora, Valenzuela’s husband, a professor of U.S. labor and Mexico history at the University of Houston.

But the differences between public school experience of Mexican immigrant students an those of first-generation Mexican American students were decided revealing. “Even though my study found that immigrant students did better, in part because they came into the system already know who they are, that doesn’t mean they remain positive through their school experience,” said Valenzuela. “Immigrant student haven’t internalized what it means to be a minority. So at first, they see school as a positive experience. But Limited English Proficient children are transitioning as rapidly as possible into an all-English curriculum. That’s when things change.”

“One immigrant student told me, ‘I used to know math; I used to be smarter.’ This is the result of tracking. That’s why I feel that schools need to stop the subtracing and respect the culture,” she said.

In summing up her lifelong research, Valenzuela said that while she graduated from San Angelo Central High School in 1976, she never envisioned advocating for social justice. “I’m an Affirmative Action baby. My parents live through the Jim Crow era and segregation. That and the Civil Rights Movement and Women’s Movement motivated me -- and deepened concern for social issues,” said Valenzuela.

"The strong, beautiful writing in this book should be a potent antidote to the enormous tide of shallow propaganda coming from the ‘English-only’ forces...."

Jonathan Kozol
Sometimes you can learn a great deal about a university from the little things it does to serve students. One case in point is the innovative Textbook Rental program at Southeast Missouri State University (SMSU) that, in effect, results in a $3,000 scholarship for every student. The concept of the program is elegant. The institution notes that no matter what a student's ACT score, or how high the grades are, or how many activities that student participates in, a student can get textbooks for free (almost) at Southeast.

It is a long-standing policy at the university that students can rent their coursework on campus. Since the policy was instituted on campus in the early part of the century, students have benefited from the philosophy of "providing the best education for the least amount of money." The textbook rental system actually got its start in 1915 and has remained virtually unchanged since its inception.

Here's how it works. Students are charged $1 (plus tax) per course, per semester. After that, if a student enrolls in an average of 15 credit hours per semester, that student would spend only about $150 on books a year. It has been estimated that students from other universities spend between $400 to $800 a year on textbooks. It all adds up. That means that over the span of four years, a student at Southeast could save about $3,000 on this piece of higher education costs.

"The system runs very smoothly," the university says; "due to the combination of a specialized computer system and the friendly staff. The process itself is very easy to follow and can take as little as a few minutes." The first step is for students to bring their ID and a copy of their semester schedule to the University Center that houses the Southeast Bookstore Textbook Rental. The students walk through the alphabetized stacks and collect the corresponding books. After signing a copy of the regulations, the books are scanned on to their university accounts, and the books are theirs...at least for a few months!

A university spokesperson estimates that starting such a system from scratch would be quite expensive. Reporting, "Our system at Southeast began long enough ago that the financial implications of beginning such a system have faded through the years. The cost of starting something similar is estimated at $3 million. and although many other universities envy our system, it is just too difficult to get that kind of money together. We are just lucky that ours started so long ago that rental was only $2 a term." The spokesperson notes that, after the start of such a system, upkeep is not overly expensive. Students generally take care of the books, and the system doesn't really require a lot of maintenance. The highest costs exist in updat-

ing the books, but obviously, after more than 80 years, administrators at Southeast think that it’s worth the cost.

For holding down the costs of higher education, and for building innovation into even the most accepted cost points, we welcome Southeast Missouri State University to The Hispanic Outlook Honor Roll...and that’s not a temporary invitation; it need not be turned in at the end of the semester.

Southeast Missouri State University is a four-year, comprehensive public university that specializes in a student-centered education and "focuses on the professional development of its students." The university was established in 1873 as the Southeast Missouri Normal School. By legislative enactment in 1919, the institution became Southeast Missouri State Teachers College and was authorized to grant degrees. The name Southeast Missouri State College was adopted on September 21, 1946, by permission of the Missouri General Assembly. The changing curricula and educational mission of the school were reflected in a modification on August 27, 1972, when the Board of Regents approved the name Southeast Missouri State University.

Cape Girardeau, the home of Southeast Missouri State University, overlooks the Mississippi River and is one of the oldest cities in Missouri. The city on the west bank of the Mississippi offers a variety of cultural, recreational, educational, and health facilities to its nearly 40,000 residents. The campus consists of more than 200 acres situated on a hill overlooking the city and the river. St. Louis is two hours to

the north by Interstate 55, and Memphis, only three hours to the south.

Since 1873, Southeast has evolved into a university consisting of five colleges, two schools, and a Polytechnic Institute. The institution offers more than 150 academic programs.

Southeast is proud of its personalized attention to students. Dr. Kenneth W. Dobbins, its 17th president, says, "Southeast strives continually to be, both literally and figuratively, a student-centered university, and welcomes students of diverse backgrounds and experiences. At Southeast, students are the most important resource of all.
Southeast has approximately 8,500 students who come from all 50 states and 51 countries around the world. Southeast is "committed to expanding diversity both in its academic programs and in the types of students who enroll at the university." The school has more than 1,000 faculty members who are "focused on student success." Nearly 400 are full-time faculty. Full-time faculty members instruct 95 percent of the courses offered by the school. Graduate teaching assistants are used to teach only a small number of introductory courses and labs. All faculty members hold weekly office hours and serve as faculty advisors for undergraduate students in their academic areas of study.

Approximately 85 percent of the faculty have terminal degrees. The commitment to controlling class size is upheld by an average enrollment of 25 to 30 students per class and an overall student-to-faculty ratio of 18:1. Progress toward what the institution terms "Student Mix Goals" showed that at the start of the diversity plan in the fall of 1995 (when goals were set), the percentage of the student body that was made up by minority students was 5 percent. As of last year, that group had risen to 6 percent, international students, represented 2.1 percent last term.

Southeast believes that residential campus living is a major part of the college experience. 1,736 students live in residence halls. Students who live in one of Southwest's seven living areas govern their residence halls and study in the lounges and computer labs. Residence halls range from simple and affordable to "nearly luxurious" and "slightly less affordable." Students usually have a double room—many with private baths and walk-in closets. There are ice machines, kitchen facilities for late night snacks, and laundry facilities. Students have access to voice mail, telephone service, and computer labs, which feature links to the campus mainframe computer and to e-mail.

Athletics are a great option for students. Southeast competes in NCAA Division I athletics in the Ohio Valley Conference. Since moving to Division I in 1991, the program has had great success. Last year, Southeast claimed four OVC regular-season titles, two post-season titles, two OVC players of the year, four OVC coach of the year awards, an OVC scholar athlete, the OVC female athlete of the year, and, for the fourth straight year, claimed the OVC women's sports trophy.

Southeast is recognized as a leader in undergraduate education. The progressive science and medical programs have top placement rates and excellent laboratory facilities. An average of more than 70 percent of students who graduate from the pre-medical program are accepted into medical school. That's an amazing statistic. The national average is 40 percent. Southeast's Donald L. Harrison College of Business is housed in the new $1.8 million Dempster Hall of Business and carries the elite accreditation of the AACSB: The International Association for Management Education. The university was selected as the site for Missouri's new Polytechnic Institute and continues to be recognized as having some of the top teacher education programs in the nation. Southeast also offers such programs as historic preservation and corporate video, plus new fields of study for students interested in sports management and environmental science.
Unmasking Language Loss in the Hispanic Community

by Frank Carrasco Espinoza, Ed.D.

Language loss has traditionally been considered a loss to individuals who at one time spoke the primary language; yet, many people who have never learned to speak that language are also casualties due to the encroachment of external societal forces. This loss has a significant impact on their ability to communicate with family members as well as a negative effect on their self-concept. The causes of language loss create insurmountable obstacles and infringe on the rights of anyone who chooses to speak and maintain a primary language.

Throughout the United States, families whose primary language is other than English are attempting to dismantle the stumbling blocks that hinder them from acquiring the level of proficiency in English that is needed to further their economic condition. The reality is that in the U.S., English is a high priority for individuals who desire acceptance and success. At what cost? At whose expense? Language loss infringes on the rights of Hispanics in their communities and affects their family, relationships, cultural values, and ability to communicate with one another.

Language loss within the family circle first attracted my attention while visiting with my abuelita (grandmother), who spoke only Spanish and constantly reprimanded us for not speaking to her in Spanish. During my visits, I observed my younger relatives visiting and greeting her with a hug and "Hi, Grandma" as they darted off. I also noticed that this initial contact was the only direct communication to take place during their visit. Why? My younger relatives did not speak Spanish to her because they never acquired our family's primary language, Spanish.

Educational institutions strategically promote English as the valued language. Spanish-speaking students who are not fluent English speakers are often conditioned to accept the belief that their language has little or no value. In the United States, the Spanish language is attributed to people who are considered either impoverished, low-achieving, or from low-economic-status communities. This fallacy has compelled some Hispanics to deny that they speak Spanish when in fact they are fluent in it. Hispanics whose primary language is Spanish and who enter education institutions in the United States have often been viewed as having sub-standard language. Neither a nor education background serve to shield them from experiencing and eventually developing a more self-concept as a direct result of language loss. Many succumb to extrinsic pressures and have either not acquired the ability to speak Spanish or have dropped their primary language a embraced the English language in order to be accepted by education institutions and the mainstream culture.

Language plays an integral role in the maintenance of culture and is the mode of communication, thoughts, ideas, feelings, and love. Once this avenue no longer exists, a separation between communities and families is inevitable. Spanish-speaking communities have the right to maintain the use of their primary language and maintain cultural values through the sharing of information and knowledge with family members, and to continue to function as contributing members of the community and society.

Effective communication will only occur if the ability to speak the language of the respective group is valued. In an article published in the Los Angeles Times (May 18, 1999) titled, "A Language is a Terrible Thing to Lose..."
Augustine Gurza talks about the feelings of “humiliation, embarrassment, and pain” among Latino legislators from California who were to join the governor for a visit to Mexico. The problem was that some of the Latino legislators of Mexican ancestry were unable to speak enough Spanish to effectively communicate with Mexican officials. Families have traditionally been eager to have their children acquire English for various reasons. Parents recall receiving corporal punishment and being sent home from school for speaking Spanish. The degrading treatment they experienced during their early years in education institutions for having the audacity to speak Spanish served as the impetus for members of Spanish-speaking communities to advocate that in their home only English was to be spoken. They were determined that their children would not speak Spanish and would not experience the same fate. Educational institutions have established a climate that encourages students to speak only English while attending school if they are to be successful. This, coupled with Hispanic parents who are convinced that success is possible if only English is promoted in the home, has resulted in first- and second-generation Hispanics in the United States experiencing language loss.

Alma Flor Ada, a professor at the University of San Francisco, believes that we should “look at language loss, reflect and unmask the causes of it, and free ourselves of a guilt that should not be personal.” I have engaged in numerous conversations with monolingual English-speaking Hispanic students who are pursuing higher education. These intensive discussions provided insightful information on their personal experiences based on their inability to communicate in Spanish. As these students began to reflect on their experience, they felt that they had been cheated and stripped of the key essence of their culture, language. They expressed feelings of resentment, anger, shame, and inferiority and believed that their inability to speak Spanish was the basis for their demeaning experiences. The fact that they are non-Spanish-speaking Hispanic students attending institutions of higher education has broader implications in the area of academic success. Like those California legislators who shared feelings of “humiliation, embarrassment, and pain,” on occasion these students have experienced the same feelings, and for the same reason.

The harm is most evident within the circle of the family. These students shared feelings of frustration and isolation due to their inability to communicate with their grandparents, uncles, aunts, and other relatives. The systematic erosion of the Spanish language among Hispanics in the United States continues to encroach upon the Spanish-speaking community.

The systematic erosion of the Spanish language among Hispanics in the United States continues to encroach upon the Spanish-speaking community.

Another student said, “There are a whole bunch of people out there that I can’t communicate with that are my family, I kind of feel ignorant. Like something is wrong with me.”

Whenever we have a need to communicate directly with people in the community, (spoken) language is the key ingredient in establishing a meaningful dialogue. The changes in national, state, and local policies negate linguistic diversity and continue to establish procedures that impede the manner in which Spanish-speaking communities are able to maintain their culture. It is unfortunate that segments of society institutionalize structures that dictate which languages are deemed to have value and merit while other languages are deemed unworthy and to be disregarded.

Entering a Spanish-speaking community can intimidate Hispanics who are non-Spanish-speaking. A monolingual English-speaking Hispanic student described her experience among Spanish speakers as “really humiliating.”

“Sometimes I’d rather experience the hostility than the pity,” she said. “People look at you and feel sorry for you. It is easier on my ego if I stay away from those situations. It’s not a good feeling, that is for sure.”

Speaking Spanish is essential for Hispanics in order to communicate effectively and to be accepted within the Spanish-speaking communities. And to maintain their family relationships. It is time to challenge the paradigm that continues to promote the external pressures, which result in language loss. Structures, organizations, and practices which result in language loss and negatively impact the self-concept of non-Spanish-speaking Hispanics need to be examined, analyzed, unmasked, and then dismantled.

Dr. Espinoza is an assistant professor at California State University-Bakersfield.
Overcoming Fear and Succeeding in Math

Lessons from a Distinguished Teacher at Mercer

BY

ARTHUR E. SCHWARTZ

"Most parents I talk to want to help their children but feel woefully inadequate because they have no guidelines or support materials."

ARTHUR E. SCHWARTZ

Why do so many people have trouble with mathematics? What propels countless individuals to shrug their shoulders and say “I’m no good at math” when they are asked to divide up a restaurant check, make change, or handle their own finances?

For many, fear of mathematics starts well before adulthood. By the time significant numbers of students reach junior high, they are already losing interest in math and can’t wait to get their math requirements “out of the way” in high school and college.

As a teacher of mathematics for more than 30 years, I have encountered several thousand cases of math anxiety, probably brought on by a number of educational and societal factors that can be compounded even further for women and minorities.

I know that many students think of math as a male-dominated world and can recall going through school encountering what they characterize as “tough, insensitive, boring math teachers.” Although the number of women and minorities teaching mathematics is increasing, the majority of today’s students are not encountering role models or teaching styles that ease their fears. They often enter their math classes tentatively and with a lack of confidence.

Some students are so intimidated that they don’t even make a sincere attempt at math, and profess not to care. After all, if they don’t care and don’t try, they can automatically justify failing.

We must begin to change the way our students feel about math and, in some cases, rethink our approach to teaching the subject matter. As several recent studies point out, students in the United States are falling way behind other nations in math and science achievement. And with today’s diverse student population, we must find ways to ensure that all students have an equal opportunity to succeed in math.

Parents and educators, by encouraging students to gain the mathematical skills they need to be successful, are key to reversing this downward trend in math achievement. A good math background is an invaluable skill in life. Additionally, it can help high school students get into better college and for college students, it can mean more job opportunities.

Succeeding in math is certain not a function of gender or ethnic background. It is, however, a function of attitude and perseverance,
In the award-winning film *Stand and Deliver*, Jaime Escalante gives up a promising career in computers to teach in an inner-city high school. His students have poor academic records, and the school can barely provide basic resources such as textbooks, let alone calculators and computers. Even the teachers have resigned themselves to the idea that the students have limited abilities.

Yet Escalante inspires and motivates his students to do well in math. He tells his students to forget past performance and expectations. "Math is the great equalizer," he says, and asks them to cultivate *ganas* for math.

The film is a powerful lesson in how even disenfranchised students can become engaged in mathematics. It is not an easy task, and it requires many of us in mathematics education to constantly revise our approaches in the classroom.

Even the government has begun to realize that the teaching of mathematics needs attention. Recently, officials in Washington announced the formation of the National Commission on Mathematics and Science Teaching for the 21st Century. Membership will include business and academic leaders who will join astronaut John Glenn and Senators Edward Kennedy (D-Mass.) and James Jeffords (R-Vt.) to develop a strategy to improve the quality of math and science teaching. As the July 16th *H.O.*'s "Outlook on Washington" column pointed out, there is growing concern that middle and high school students are not being taught by teachers who are trained to teach math and therefore our students are not getting the foundation they need in critical-thinking and problem-solving skills.

**Teaching Strategies**

What can be done to help students become confident about learning math and to ensure their success in class and on standardized tests, which remain the benchmark for assessing learning? Some of the following suggestions might be helpful in the teaching of any discipline, but they are critical in the teaching of mathematics.

Students might have been taught to memorize various functions and formulas but don't really understand... because they are not taught the underlying concepts and basic structure....They have not been taught critical thinking.

- **Working on attitudes**
  Both the teacher and the student need to consider their frame of mind as they approach mathematics. For the teacher, it is important to put himself or herself in the students' place... to try to remember how intimidated some individuals might feel about learning mathematics. In many cases, instructors have to realize that their students don't know how to study and learn math. Students might have been taught to memorize various functions and formulas but don't really understand what they are doing because they are not taught the underlying concepts and basic structure on which to build a foundation for mathematical reasoning. Essentially, they have not been taught critical thinking. Students need to see specific examples with clear verbal explanations that detail a logical sequence in the process. Applications are essential to both reinforce and justify mathematical concepts that have been introduced.

- **Going back to basics**
  Instructors should consider reviewing some basics that are often taken as a given, such as how should we read and effectively use a mathematics textbook. As every college student knows, math books are expensive, but students need to own the text in order to underline, highlight, and write examples and explanations in the margins based on notes taken from the instructor's lecture. We need to make sure that students understand that pencil, paper, and calculator are also essential as they proceed through the text. Students should be prepared to go through each example or proof by writing it out; they should not be lulled into thinking they can do problems in their heads. By the time they progress to the second or third example, they should be able to predict and justify each step in the solution process.

  In my first few classes, I explain this basic methodology of approaching math to students and show them how to use the book's index and glossary as a helpful follow-up to class instruction.

  Going over the basics helps the students to see learning math as a "building block" process, which must be approached in increments. In algebra, calculus, or low-level math, I start with problems and examples they can see and understand and try to build to more sophisticated ones. It is impossible to start with complex problems and work backwards; it must progress from the simple and concrete to the complex. Only then do students gain the confidence and knowledge that will enable them to tackle more rigorous mathematics.

  By using this approach from day one and continuing it throughout the semester, teachers can help their students develop a more positive attitude about learning math. It can take away some of the anxiety as students see that they are not going to be in over their head and lost as the semester progresses.

- **Learning the language of math**
  Mathematics is often referred to as the universal language. This truism is one of the "good news, bad news" aspects in the teaching and learning of mathematics. The good news is that the symbolization and notation, such as "π", is reasonably standard and universal throughout the world. The bad news is that stu-
Students must learn this language that not only involves definitions and vocabulary but also the very symbols and notations that are an essential part of mathematics. The instructor must be a facilitator in this process by finding a way to present and articulate mathematics terminology in the language of the student.

For these reasons, language is an important consideration in the teaching and learning of mathematics because eventually, students must be able to verbalize what is going on in the mathematical process. If they can't explain the procedure in their own words, they probably will not be able to apply the necessary techniques for problem-solving using the various formulas in math.

For students whose native language is not English, the math classroom can be especially bewildering because math instructors often give rapid explanations of complicated procedures. It is crucial that the language of the instructor and the grade level of the text be consistent with that of the students.

- Taking tests

An additional complication and anxiety producing ritual associated with fear of mathematics is test-taking. I have worked with many students who understand math and do the problems and get the right answer but fail to transfer those skills when taking a test.

Some test anxiety might be created early in the students' career when they are tested on what they know but they don't score very well on the exam. They become frustrated because they are trying as hard as they can but are still getting Cs. This unfortunately reinforces the belief that they are not good at math.

Test-taking, whether it be teacher-made or standardized instruments, should be addressed as part of any math course. Indeed, there are many national services coaching students on how to take tests because it is a skill that can be learned. One question to ask: Is the test trying to measure the student's mathematical problem-solving ability or is it measuring their skills at taking a test?

- "Math is the great equalizer," he says, and asks them to cultivate "ganas for math."

Students need to be counseled that tests are a mind game--or, I should say, "time game" because there never seems to be enough time to work on the problems. On most standardized tests (multiple choice in particular), students should treat each question with equal respect because each problem is of equal weight or point value. They need to assess from the beginning approximately how much time should be allotted for each problem.

Test problems can be classified as easy, intermediate, and hard. When I tutor students on test-taking, I suggest that they carefully attempt the easy and intermediate problems and avoid getting hung up on the hard problems. If time permits, they should come back to these more difficult problems. It might be possible by carefully reading the problem to eliminate two or three of the choices and increase the chances of selecting the correct answer.

These are just a few small pointers that can make a big difference in a student's test-taking confidence.

- Support systems

My last observation about teaching and learning math is related to what goes on long after math class is over. Even students who have a good grasp of math and have been taught effectively can struggle as they attempt to do homework eight to 24 hours after a class presentation. This is especially true of middle and high school students who often turn to their parents for help with homework.

Unfortunately, today's parents are not well equipped to deal with a discipline that has become extremely broad in content and has been enhanced by technology such as the graphics calculator and computer. In many cases, math is taught differently than when they were young.

I have seen eighth-grade homework that would challenge college professors. Younger students are dealing with problems involving elementary statistics and probability. I strongly support this expansion of coverage, which enables problem-solving and critical thinking to be much more relevant.

However, it is vital that students and parents are given assistance through well-chosen textbooks and study sheets that show them sample problems with step-by-step solutions and detailed explanations. Most parents I talk to want to help their children but feel woefully inadequate because they have no guidelines or support materials.

These suggestions are only the beginning of a strong foundation for the teaching and learning of math. Jaime Escalante told his students that good grades in math were "a ticket out of the barrio" because he knew that mathematical skills were critical to their futures. His example is a lesson for all of us as we face the challenge of helping our students succeed.

The author is a professor of mathematics at Mercer County Community College (NJ), where he received its Distinguished Teaching Award.
Self-Discovery and Success at 

Thoughtful faculty, staff, and services endorse and support

by Patrick Fite

Twenty-nine-year-old Mayda Gómez, married and with two children, was self-conscious about her age and apprehensive about her ability to succeed at the college level when she first signed up two years ago for some basic classes at Crafton Hills College (CHC), a small community college in Yucaipa, California.

Gómez proved to herself and to others that it is never too late to go to college, graduating recently with honors. She earned four scholarships, was listed in the Who's Who Among Students in American Junior Colleges, served as the CHC 1998-99 MEChA (Movimiento Estudiantil Chicano de Aztlan) president and will be transferring to the University of Riverside—California in education this fall.

Gómez was one of 368 students graduating at CHC this year. “I had wanted to go back to school for years,” said Gómez, a resident of Redlands, California. “I always instilled in my children the importance of getting a college education, but how could I encourage them unless I made the effort myself?”

Prior to attending CHC, Gómez took a Redlands Adult School sign language class, a subject that always interested her because she has a cousin who is deaf. Gómez’s success in the sign language class motivated her to take the next step, enrolling at Crafton Hills College. CHC is one of 106 colleges in the California Community College System—the largest college system in the world.

As a California community college, the purpose of CHC is to make a college education accessible to anyone who is interested in pursuing a higher education and is willing to put in the time and effort necessary to succeed. The in-state tuition is low, and there are a number of student services available to help students get started. The philosophy of California’s community colleges is that education is the key to better jobs, a better economy, and a better quality of life.

“Going to college is a process of self-discovery,” said CHC President Dr. Luiz Gómez. “Mayda got involved in the educational process and various activities at the college and discovered that she has a lot of ability that’s never been tapped.”

Dr. Gómez also recognized the value of the many student services available to help community college students succeed.

(Extended Opportunity Programs and Services) Office. EOPS is a state-funded program designed to assist disadvantaged, low-income students succeed in college. The support provided includes tutoring, academic counseling, and financial aid assistance.

“I felt kind of embarrassed going to college because, at the age of 27, I thought I was too old, Gómez said. “I always thought you were supposed to go to college right after high school.”

“I found out that you’re never too old to go to college,” she said. “Once I got started, everyone was like family.”

It was at the EOPS office that Gómez met CHC student Rick Vargas, who was working as a volunteer peer counselor and was himself receiving aid from EOPS. Vargas has since graduated from CHC in administration of justice, and he is attending the University of California—Riverside majoring in law and society.

“Rick’s help opened a lot of doors for me,” she said. “He explained about the services available to students on campus, including the library, nurse’s office, learning resource center, EOPS, and financial aid. If it were not for EOPS and financial aid, I couldn’t have afforded school. These two programs made all the difference.”

In addition to EOPS and the Financial Aid Office, which provides eligible students access to various types of funding to pay for college, the college also offers the California Work Opportunities and Responsibilities to Kids (CalWORKS) program. The purpose of CalWORKS is to help the students receiving cash aid from the local county to find employment and become independent. The program assists these students in successfully completing an approved certificate/occupational program and provides employment experience.

CHC also has a two-year-old Child Development Center to provide child care and education services for children of CHC students who need child care services while attending school. Operated by Child Care America, a California corporation that spe-
citizens in managing child care centers at college sites, the CHC Child Development Center is open to the public and serves children who are six weeks old through five years of age.

"There are people who have the drive and want to learn, but they need to be given that chance," Gómez added. "There are doctors, teachers, and many others who got their start in such programs as EOPS."

Gómez acknowledged that when she began college, English was her greatest fear. Her first English class was a beginning class focusing on such fundamental topics as sentence structure. Gradually, as she began to understand and build confidence, Gómez signed up for more advanced English classes.

"Daniel Bahner [assistant professor of English] was awesome," Gómez said. "He was always so enthusiastic, and he was always there to encourage you and congratulate you."

Bahner noted, "You have people coming back to college and working towards a second chance. There are people who are going through struggles with these incredible pasts. To see them progress and succeed is just a tremendously satisfying experience."

Gómez also recognized the accessibility of CHC counselors, who assisted her with her educational plan. She was particularly appreciative of the help she received from CHC Counselor Gloria Molino.

"Younger people can sometimes doubt themselves and think that their dreams might not be valid," said Molino, who has been a counselor at CHC for nine years and was selected by CHC faculty as one of the college's 1998 Professors of the Year. "It's important for these students to learn to believe in themselves and follow through with their own inner feelings."

Regarding Molino, Gómez said, "Gloria was like a mom to me. She guided me through college, and she was always there if you just needed to talk."

Gómez recounts how she began studying at home with her kids, five-year-old Janee and 12-year-old Armando Jr., at the kitchen table. She would also bring them to the library to do research.

"Now, I can actually help my kids with their English papers," she smiled. "There was a time I couldn't do that."

Because Gómez is a strong proponent of parents being involved with their children's education, she serves as a volunteer class mom and as a volunteer in the Book Bridges Program, a reading program for young kids. In the Book Bridges Program, Gómez visits a daughter's kindergarten class one day per week and reads a different book with each student.

"We read with them and coach them through it," she said. "During the course of a year, you can see them grow and how much they learn. It's fun."

She also takes her son and daughter to t-ball practices, and her children have been involved with the Yucaipa Little Theatre, a community theatre for children. As a sideline, she volunteers to perform as a clown for kids in local hospitals.

"Between school, family, and everything else, it gets hectic, but you have to find a way to balance everything," Gómez said. "It's important for the children to see that their mom and dad care enough to see what their world is all about, who teaches them, who their friends are, and what they're learning."

"If there's time to sit down and watch TV, then there's time to go to a baseball game," she said. "I want my kids to try as much as they can. I never had any of that. I just want them to have what I didn't."

Gómez acknowledges the strong support of her husband, who works as a crew chief of a shipping department for a furniture manufacturer.

"Sometimes it's hard, but he sees how excited I am," she said. "I've taken a lot of night classes, and when he gets home from work, he'll feed the kids and watch them. He says that I'll be the one to get things for the family that he never could do with his job."

As president of CHC's MECBA, an organization dedicated to the betterment of Latinos in college and high school, she believes she and the other members of the organization serve as role models for young people. Gómez believes that many Latinos do not see a future for themselves.

"Even if they think about a better future, it's just a dream to them," she said. "If no one else in their neighborhood can make it, they don't think they can make it either. MECBA offers opportunities to the community and local schools and shows people that opportunities are available. We show that going to college is not just a dream, that you can actually do it. We set examples for the children. They need it."

According to Gómez, she never had any goal prior to going to college and "always made excuses." "There's so many people out there who are scared and in situations like me," she said. "Tell everybody to take the time to go to school. It's so important."

Gómez's goal is to become an elementary school teacher. "I'll never stop going to school," she added. "Even when I become a teacher, I will go to school. I enjoy learning, even when I get frustrated. There is so much out there to know, and I want to know it."

"I can't believe I've been going to college two years now," Gómez said. "Everything has turned out so great. Since starting college, I have matured so much. I know what I want to do, and I have the confidence to do it."

Gómez recalled a quote passed along to her by a CHC instructor: "You can tell but never teach—unless you practice what you preach."
All in the Family

All Persist at San Diego State University and a local community college

BY

JOSÉ ALVAREZ

"When I was in elementary school, I remember seeing my father at each parent conference and after-school activity. That left an impression in me and was one of the key factors that helped me decide to go into education."

ESTELLA OLIVO
AN ELEMENTARY SCHOOL TEACHER IN SAN DIEGO

It’s a late Tuesday afternoon. The hot California sun is going down, but its heat is still strong. The Olivo family has gathered in one of the daughter’s Chula Vista home in southern California. Sitting on the pool deck, the Olivos rearrange their chairs to avoid the sun’s blinding rays. Four of the five grandchildren play with the swing or playfully run back and forth. For the Olivos, getting together is nothing new. Family reunions are something they do on a regular basis. What is new is that for the first time, the family has come together to share its life story—to talk about its successes, about the importance of getting an education, about the importance of family.

The story begins

It’s been more than 15 years, but Librado and Vicenta Olivo still remember the look on their children’s faces when they took them to their place of employment, Vicenta to the agriculture fields and Librado to the construction sites where he worked. Their goal was not to teach their children to do the work they did but to show them how difficult life can be and how hard it is to earn a living when you don’t have a college education.

“I took them to show them what I did and what my boss did,” recalled Librado, now retired from the construction industry and still living in San Jacinto, California. “I wanted them to see how I dressed and how my boss always wore a shirt and tie. I would tell them I want to be him, the one with a college education.”

According to Librado, this was the only way he knew how to teach his children, three males and three females, the importance of going to college and becoming a professional.

His six children—Iracema, Edalia, Estella, René, Rolando, and Ricardo, in that order—learned the lesson well. Four graduated from San Diego State University, one decided to stay home and go to the local community college, and the youngest is still studying at SDSU.

“Getting an education was the main thing that was pushed at home. We always knew we were going to go to college,” said Edalia Olivo-Gómez, who in 1982 left home in search of a better future. Along for the ride came Iracema, her older sister, who attended a local college for two years while Edalia graduated from high school. Given the closeness of the Olivo family and the fact that the two sisters would be the first to go away to college, their parents thought it best that they leave home together.

“Our parents felt that if we were together, the chances for success were better,” stated Edalia.

Adjusting to college life was not easy. They would call their parents often and would go home almost every weekend.

“We went from a community where we knew everybody to a place where all you were was a Social Security number. That was difficult,” assured Edalia.

“In our entire lives, we had only spent one night away from home at a sleepover,” remembered Iracema, indicating that life got easier once they started to get involved in campus extracurricular activities.

“It was hard letting them go, but I wanted them to be able to accomplish a lot more than their parents had,” stated Librado.
“It was difficult for them because they were not used to being away from home,” said Vicenta. “But at least we knew that once they graduated, bigger and better things would be waiting for them. We did not have that opportunity,” stated the mother, explaining that she and her husband only had a third grade education.

Humble beginnings
Born in Masas, Texas, near Corpus Christi, one-year-old Librado went to live with distant relatives after his mother died and his father could not care for him. It was with his foster family that Librado learned the importance of getting an education and was able to complete the third grade. At age 10, he went back to live with his father, who and two years later, Librado found himself moving from family to family and not able to continue his education. By 16, he had left home for Los Angeles, and in early 1960, after a number of restaurant jobs in L.A., Librado moved east to San Jacinto, a farming community where he met Vicenta, a 20-year-old migrant farm worker who had swum across the border three years earlier. Librado and Vicenta were married four and a half months later.

“She really liked me,” remembered Librado. A couple of years later, the first child arrived, followed by five others. The couple supported their family by picking grapes, potatoes, and other fruits and vegetables until Librado found a steady job doing construction.

“I always wanted my children to have what we could not,” said Vicenta, third in a line of 12 children. “We’re very proud that we were able to give them an education.”

Paving the way
Iracema and Edalia’s decision to go to college paved the way for their two older sisters at San Diego State University.

“I wanted to follow the example that my sisters had set for us,” explained René, who arrived at SDSU attracted by its civil engineering program.

“My years at SDSU were the best time of my life,” added René. It was there that he met the woman he would later marry. Iracema and Edalia also met their future husbands at SDSU.

In 1992, René graduated with a degree in civil engineering, she now works for Rudolph & Sletten, a general contracting firm in the San Francisco area, with satellite offices in San Diego.

Estella, who had graduated the year before, obtained a degree in San Diego.

Four years after René’s graduation, at San Diego State University arrived Ricardo, the youngest of the Olivo siblings. Ricardo is a junior at SDSU studying pre-medicine in hopes of becoming a doctor.

“I always inspired them to better themselves. Making sure that all of them went to college was the biggest and most important job I ever had,” said Librado, rewarded his children with $25 for every A they got on report cards. Bs were worth $10 and were not rewarded. Besides, everyone tried not to get them. In said Edalia, “I cried if I got a C.”

For Librado, it was impolite for his children receive not emotional support but also academic. All of the siblings came to SDSU through the Equal Opportunity Program designed to provide financial assistance to low-income educationally disadvantaged students. A number of grants scholarships also helped finance their college education.

“One of the first things we did upon arriving at San Diego was look for jobs,” rememts Edalia, explaining that all brothers and sisters worked to help their parents pay for their education. They worked during the summer and during winter and spring breaks. Given their financial situation, it was imperative for the Olivos to keep expenses down. At one point, the eldest lived alone.

“Our parents taught us always work together, to make the family unit, help one another and not be afraid to try,” Edalia, adding that even though they came from a low socio-economic status, “we never felt pc.”

“Parents are the most influential teachers, and our parents always there for us,” said Rolando, his next oldest brother, who always watched over his children’s education and community events.
"When I was in elementary school, I remember seeing my father at each parent conference and after-school activity," recalled Estella. "That left an impression in me and was one of the key factors that helped me decide to go into education."

"Bittersweet" experience

Watching his children grow, educate themselves, and become young professionals made this Mexican American father very proud. But with this new-found freedom came difficult decisions. Once the first Olivo sisters graduated from college, they opted not to go back home and instead decided to stay in the San Diego area about two hours south of San Jacinto. Their decision, Edalia believes, was a "bittersweet" experience for her parents.

"They are happy because we all went to college and have careers. But we all—except Rolando—left home," stated Edalia who, like her sister Iracema, received a master's degree in public administration from SDSU. Now, they both work in Chula Vista. Edalia for the city's planning department and Iracema for the police department. All five Olivo siblings live in Chula Vista.

Librado admits that his children's leaving has been somewhat difficult for him and his wife since "we were always such a close fami-

ly," but says they are "proud of them" and happy with the path they have followed.

"Our children have been really good. They all followed our example. We're very proud of them and of what they've accomplished," said Vicenta, adding that her wish now is to see her youngest son Ricardo realize his dream of becoming a doctor.

"Since they were little, I understood that the only thing I could give them was my support so that they could go on and better themselves," said Librado, asking his children to continue his legacy by instilling in their children the importance of getting an education. "I always tried to teach my children that what comes easy, easy goes. In life, everything of value takes a lot of work and effort. But once you achieve it, it's worth it."

CALL FOR PAPERS

National Association of Hispanic and Latino Studies

National Conference
February 21-26, 2000
Houston, Texas

Abstracts, not to exceed two pages, should be submitted which relate to any aspect of the Hispanic and Latino experience. Subjects may include but are not limited to literature, demographics, history, politics, economics, education, health care, fine arts, religion, social sciences, business and many other subjects. Please indicate the time required for presentation of your paper (25 minutes/45 minutes).

Abstracts must be postmarked by:
November 23, 1999

Send Abstracts To:
Dr. Lemuel Berry, Jr.
Executive Director, NANAS
Morehead State University
212 Rader Hall
Morehead, KY 40351
Telephone: (606) 783-2650
Fax: (606) 783-5046

The Colorado College

SEARCH RE-OPENED

DIRECTOR OF CHORAL ACTIVITIES

Colorado College again invites applications for a previously unfilled tenure-track appointment as Director of Choral Activities at the Assistant Professor level beginning in August, 2000. Primary professional responsibilities include directing and conducting the Colorado College Choir in major performances, directing and conducting the Chamber Choir, whose repertoire includes various kinds of music such as classical, popular, jazz and gospel, and contemporary; teaching a course in conducting; and teaching one or two additional courses such as Introduction to Music, American Music, Interdisciplinary Topics, African American Music, Popular Music, Gender Studies in Music, or an area of the candidate's interest. Further responsibilities include conducting for official College convocations, coordinating departmental vocal activities, and serving on various committees. Qualification: doctorate in music and choral conducting experience; some classroom experience is also desirable. Colorado College, founded in 1874, is a selective, private, liberal arts college with an enrollment of 1,900. The College is committed to increasing the diversity of the college community and the curriculum. Candidates who can contribute to that goal are encouraged to apply and to identify their strengths or experiences in this area.

Please send a cover letter with curriculum vitae, undergraduate and graduate transcripts, three letters of reference, and the names, addresses, and phone numbers of two additional references to Chair, Choral Music Search Committee, Music Department, Colorado College, 14 E. Cache la Poudre, Colorado Springs, CO 80903. The deadline for receipt of complete applications is Wednesday, 1 December, 1999.

EOE—Colorado College is an equal opportunity employer that does not discriminate on the basis of race, color, age, religion, sex, national origin, sexual orientation, or disability in its educational programs, activities, or employment policies.
PEOPLE

Soza Receives Accolades

William Soza, founder of Soza & Company, Ltd., was honored by the Commonwealth of Virginia for bettering the lives of Virginia's citizens; and by Hispanic Magazine and NationsBank for outstanding achievement by a Hispanic man in the United States.

Soza's company, which has spanned 30 years, provides a wide range of management consulting services to national and international, private and public sector clients, including financial consulting for mergers and acquisitions, information resource management and operations, solutions design and implementation, and program analysis and support. The company has earned a place on such lists as "The 500 Largest Hispanic-Owned Companies," "Fastest Growing 100," and the "Fastest Growing Private Companies in America."

Soza has a bachelor's degree from the University of Texas-Austin. He served in the U.S. Army for two years.

International Scholar Joining Illinois-Chicago

Christopher Maurer, professor of Spanish and authority on Spanish poetry, will be joining the University of Illinois-Chicago (UIC) in January to head its Department of Spanish, Italian, French, and Portuguese.

Maurer said his top priorities will be to make language instruction "as engaging as possible" and to develop and strengthen the graduate programs in literature, linguistics, and teacher education. His areas of expertise are Spanish poetry, textual criticism, and translation.

For Maurer, the role of the Hispanist-scholar of Spanish literature and culture—goes beyond classroom teaching and scholarly writing. He says a Hispanist also could translate and write about Spanish and Latin American authors, for "as wide and as general an audience as possible."

Rodriguez Receives Research Grant

Rosita J. Rodriguez, assistant professor of pharmaceutics and toxicology at Oregon State University, received a 1999 Research Starter Grant, sponsored by the Pharmaceutical Research and Manufacturers of America Foundation Inc. She is one of 26 featured scientists in the Oregon Museum of Science and Industry (OMSI) exhibit "Faces of Science," which opened in May as a permanent addition to the museum. It is the first exhibit at OMSI to focus on the people rather than the processes behind the principles.

Rodriguez, who currently is teaching undergraduate and graduate students while maintaining an active research program, received a doctorate in 1996 at the University of Texas-Austin, which is an associate member of HACU.

Perez Named Interim President at Cañada College

Rosa Perez, vice president for Chabot College in Hayward, Calif., was named interim president of Cañada College, part of the San Mateo County Community College District.

Perez previously was vice chancellor for educational services for the San Francisco Community College District, an administrator at Santiago Canyon College in Orange, Calif., and dean of counseling, advising, and matriculation at Skyline College. She has a bachelor's degree from Stanford University and a master's from the University of San Francisco.

Gonzalez Becomes Dietetic Association Spokesperson

Registered dietitian Claudie Gonzalez was named a spokesperson for the American Dietetic Association (ADA), the nation's largest organization of food and nutrition professionals.

Gonzalez joins ADA's national volunteer network of 20 experts who communicate the importance of sound nutrition to the public. She will serve her three-year term as spokesperson on issues of particular concern to Latino consumers, and will provide commentary for print and broadcast stories on health and nutrition topics, official positions, educational campaigns and public policy initiatives.

Gonzalez is an expert in the nutritional treatment of immunology, HIV/AIDS, as well as weight management, cardiac disease, diabetes, and pregnancy nutrition. She holds a bachelor's degree and a master's from Florida International University.

College Presidents Call for Civic Responsibility

Dr. Eduardo J. Padrón, president of Miami Dade Community College (Fla.), along with other college presidents, in a special conference on Independence Day, issued a nation-wide call for increased civic responsibility among college students. The presidents said they were responding to a growing cynicism about government on their campuses.

The presidents collectively sign a report, "Presidents' Fourth of July Declaration on the Civic Responsibility of Higher Education," which challenges higher education to "re-examine its public purposes and its commitments to the democratic ideal to become engaged, through actions teaching with its communities."
Veteran Educator de los Santos Retires

Dr. Alfredo G. de los Santos Jr., veteran educator and administrator, is retiring from the Maricopa Community College District (Ariz.), where he has served for 21 years.

De los Santos has spent more than half of his education career serving the 10-college district as vice chancellor for student and educational development. He significantly strengthened the district's ties with Arizona universities, high schools, and the business and industry community through a variety of educational and business partnerships. He serves on the board of trustees of the Tomás Rivera Policy Institute, the Carnegie Foundation for the Advancement of Teaching, the Council for Higher Education Accreditation, and Multicultural Education Training and Advocacy, Inc.

Nazareth Alumnus Earns Fulbright Grant

Nazareth College (N.Y.) alumnus Edward J. "E.J." Monster, class of 1999, has been awarded a prestigious Fulbright grant. He will spend a year at the University of Ghent in Flanders, Belgium, teaching first-and second-year students English as a foreign language.

Monster, while a sophomore at Nazareth, spent two semesters studying in Rennes, France, and Valencia, Spain.

"When you come from a small, rural community, you desire to travel the world, to meet different people, and to learn about other cultures," said Monster.

Corona Directing Online Operations at National University

National University (Calif.), known for its innovative and future-focused educational programs, in July launched National University Online, a new infrastructure to support its distance education programs. Ramon Corona was appointed director of online operation and student services. His responsibilities include the as well as managing the provision of student services in cooperation with National's virtual counselors.

Corona has a master's degree from National University and is earning his doctorate in education, with an emphasis on distance learning, from Ibero University in Mexico.

Ramos Becomes Academic Advising Association President

The National Academic Advising Association (NACADA) announced that Manuel "Buddy" Ramos will become its president at the conclusion of its annual conference this month. Ramos was elected to the two-year term after serving as vice president for commissions and in other leadership capacities.

NACADA is an educational association with more than 5,200 members working to ensure the educational development of students in higher education.

A higher education consultant with IBM, Ramos has a bachelor's degree and a master's from Central Missouri State University and a doctorate from the University of Kansas.

Alvarez Honored by College Mentorship Group

News anchor and reporter Linda Alvarez was the keynote speaker at a fund-raising dinner at the University of California-Los Angeles (UCLA) hosted by Women and Youth Supporting Each Other (W.Y.S.E.), a college mentorship program aimed at empowering young women to take control of their lives. Alvarez received the W.Y.S.E. Role Model of the Year award for her contributions in advancing the role of women in law, advocacy, and politics.

"A big part of W.Y.S.E. is bringing together women from all races and ethnicities who have overcome barriers to succeed but are UCLA alumna and W.Y.S.E. founder Sara Jayaraman.

Alvarez, also an alumna of UCLA, has been an anchor and special-assignment reporter for KCBS since 1993.

Mohammad Attends Latino Issues Conference

Sofia Mohammad, a student member of Western Illinois University's (WIU) Learning Lab, attended the Latino Issues Conference to lead: Leadership Development Institute represented WIU at a Latino issues conference in Washington, D.C.

Participating in the conference on the recommendation of Dr. Juan Andrade, president of the U.S. Hispanic Leadership Institute, Mohammad took part in a roundtable discussion of issues in the U.S. Latino community with Vice President Al Gore and influential Latino leaders. Speaking of Latino youths, Mohammad said, "It is crucial to increase Latino college student preparation, recruitment, and retention." She also expressed her passion for serving the needs of the Latino community and "our America."

Salinas New San Antonio College Dean of Student Services

Luciano Salinas Jr., former director of special projects at North Harris College (Texas), has become dean of student services at San Antonio College (SAC).

SAC President Vern Tolland said, "With his extensive background working with students, I am confident Mr. Salinas will provide important leadership for our college."

At North Harris, Salinas designed a comprehensive outreach program with high schools to recruit prospective students, reinvigorated the district's career placement cen-
Salinas has a bachelor's degree from the University of Houston and a master's from Pan American University.

**Santiago Reads at Westchester Community Writers Series**

Novelist Esmeralda Santiago, who was born in Puerto Rico, arrived in the U.S. when she was 13, and now lives in Westchester, N.Y., gave a reading at State University of New York-Westchester Community Colleges Fall Poets and Writers Series.

Santiago's memoir, *When I Was Puerto Rican*, its sequel, *Almost a Woman*, and her novel, *America's Dream*, include her observations on cultural identity and her efforts to function in two languages.

**Dominguez First New Mexico Vice Provost of Extended University**

Dr. Jeronimo Dominguez became vice provost of the University of New Mexico's (UNM's) Extended University, a newly formed administrative structure for UNM's off-campus educational services.

Dominguez, since 1995 dean of the UNM Division of Continuing Education and Community Services, is responsible for supervising and coordinating all of UNM's graduate centers, branch campuses, continuing education and community service programs, television, radio and internet courses, and distant education learning.

Dominguez has a bachelor's degree from Eastern New Mexico University and a master's and doctorate from UNM.

**PLACES**

**University of Dallas Preparing Students for GMAT**

The University of Dallas Graduate School of Management (Texas) together with the Dallas-Fort Worth Chapter of the National Society of Hispanic MBAs is offering students a Graduate Management Admissions Test (GMAT) Preparatory Course. The program goal is to improve test-taking skills and provide an overview of the types of questions the students will face on the exam.

The Dallas-Fort Worth Chapter is funding scholarships for Hispanic students to attend the five-week course, which is conducted by the graduate school's Center for Professional Development. The university substantially discounted the enrollment fee for the course so that 30 scholarships could be awarded.

**Lesley Receives Bilingual Teacher Training Grant**

**Lesley University**

With a $1.2 million grant from the U.S. Department of Education, Lesley College (Mass.) will prepare teachers to meet the needs of young children, those who speak limited English, during their most critical years of language development.

About one-third of Boston, Mass., children speak a first language other than English. As the population of Boston grows increasingly diverse, the need for qualified bilingual early childhood educators is becoming critical.

Lesley College's new program, the Boston Collaborative Bilingual Project, is part of an effort to improve the academic performance of limited-English-proficient students, who tend to score lower on standardized exams and have higher dropout rates than the rest of the population.

**Latino Web Site Launches**

**YAVAS.COM**

The first independently Latino-owned book and music Web site, <www.YAVAS.COM>, was launched this summer.

YAVAS.COM claims that it offers the largest Latino book and music catalog in the world, with many English and Spanish titles not found in traditional internet venues. Synercomm & Marketing, a small Hispanic public relations and marketing agency, created YAVAS.COM, "The Latino book and music store," to give the world a place for Latino products and to attract more Latinos to the internet.

**Smithsonian Selects Latino Fellows**

The Smithsonian Center for Latino Initiatives (Washington, D.C.) made its selections for two of its fellowship programs: the Humanities Fellowships in Latino Cultural Research in a National Museum Cor "Issues of Representation and Interpretation and the Graduate Student Fellowships in Latino Studies.

The Humanities doctoral fellows are: George Sanchez, Gerald Poyo (pictoried), Arlene Torres, and Maria Lorena Chambers.

The graduate student fellows are: Darshan Elena Can, Melissa Carrillo, Melinda Gandara, Michelle "Miki" Garcia, and O Macchioni.

Both fellowship programs are co-sponsored by the University Program Latino Research, a national consortium university research centers, with headquarters at Notre Dame University.

**Hispanic Heritage Month Event: SUNY-Rockland**

State University of New York-Rockland Community College is celebrating His
**Latino Education Programs Receive Aid**

The Nellie Mae Foundation (Mass.) granted a total of $451,800 to nine middle and high school New England-based college preparation programs that aim to increase access to higher education and encourage high school and college graduation for Latinos/Latinas and other minorities. Grant recipients help students develop study skills, prepare for college and career opportunities, and form leadership qualities.

Grantees are: the Emmanuel Gospel Center, Boston Urban Youth Foundation, Westfield State College, Dorchester House Multi-Service Center, Mary McLeod Bethune Institute for Young Women, and Project RISE, in Massachusetts; ASPIRA and The Drop-in Learning Center, in Connecticut; and Roger Williams University, in Rhode Island.

**University of North Texas to Open System Center at Dallas**

The University of North Texas (UNT) will open the UNT System Center at Dallas in January 2000. The building will be a state-of-the-art facility housing classrooms, computer labs, a library, general meeting and study spaces for students, and offices for instructional, student, and administrative support.

"Opening this facility for the center is just the first step in establishing what we hope will eventually be a full UNT campus in Dallas," said Chancellor Alfred F. Hurley.

**League of United Latin American Citizens Holds 70th Convention**

Richard Riley (pictured l.), secretary of the Department of Education, visited with Enrique Dovalina (r.), national president of the League of United Latin American Citizens (LULAC) at LULAC's 70th annual convention in Corpus Christi, Texas, in July.

**Teachers from Mexico Attend Texas-Kingsville Workshop**

Texas A&M University-Kingsville's bilingual education department hosted the Teaching from Mexico attended the institute, including teachers from the Universidad Autónoma de Nuevo León in Monterrey, Universidad Autónoma de Coahuila in Torreón, Universidad Autónoma Agraria Antonio Narro in Saltillo, Secretaria de Educación in Nuevo León, and the Escuela Normal Pablo Livas in Sabinas, Nuevo León.

The four-week program was designed for professionals teaching language arts or content area in English to second language learners.

**St. Francis Hosts Hispanic Festival 1999**

Throughout October, Fleet Bank and St. Francis College (N.Y.) are sponsoring events for Hispanic students, including a high school writing contest for Hispanic students, a Hispanic food festival, business seminars, a film festival, a family salsa concert, a photography exhibit, and a Latin dance party.

During the salsa festival, musicians from some of America's most renowned Latin bands will trace the history of salsa music from its Afro-Cuban origins right up to its tremendous impact on contemporary American pop. Families will be introduced to basic techniques, the role of each instrument, and the concept of the clave rhythm, the unifying element of salsa music.

**Fullerton Library “Under the Big Top”**

The Fullerton College (Calif.) library is currently "camping out"—literally—in a temporary 8,000-square foot tent located in the southwest corner of the campus quad area. The $250,000 tent, which took one month to construct, sports an aluminum frame with a vinyl covering, measures three stories tall at its highest point, is outfitted with six inches of insulation throughout, and is fully air-conditioned. The temporary facility will serve the campus library while the original library building undergoes a $15 million renovation project.

The library is expected to remain "under the big top" throughout the fall semester and is projected to move into its renovated facility in January 2000.

**Alberto Meza Exhibition at Miami-Dade**

The Kendall Campus Art Gallery at Miami-Dade Community College (Fla.) recently hosted "Alberto Meza: Edgar Allan Poe's Room," an exhibition of prints, textiles, paper casts, sounds, and other literographics.
Rare Spanish Drawings at Getty Museum

The J. Paul Getty Museum in California currently is presenting "Juanes to Goya: Spanish Drawings 1560-1825," a rare look at the variety and vibrancy of Spanish draftsmanship. Spanning over 250 years, the exhibition—which ends November 28—includes drawings by Francisco de Goya and numerous recent acquisitions, most of which have never been exhibited.

Among the highlights are "Saint John the Evangelist" and "An Angel," by El Greco, as well as works by Juan de Juanes, Jesus de Ribera, and Bartolomé Esteban Murillo, one of Seville's most influential artists in the 1600s.

The installation's 29 drawings are grouped geographically to illustrate how Spanish artists responded to various influences and incorporated them to produce distinctive regional styles.

Palomar College, Local Schools, Teach English as Second Language

More than 600 parents are learning English as a second language this fall thanks to trendsetting agreements between Palomar College (Calif.) and two local school districts.

With funding from Proposition 227, the Escondido Union School District and the San Marcos Unified School District have contracted with the Worksite Education and Training Office at Palomar College to provide instruction for after-school and evening classes.

Along with other materials, the teachers in both programs use children's literature books in English to teach the parents, who then take the books home and read them with their children.

Conference on Cuban Economy at University of Miami

Leading economists, Cuba scholars, and policy analysts from throughout the world examined the latest developments in the Cuban economy during the ninth annual meeting of the Association for the Study of the Cuban Economy (ASCE), co-hosted this year by the University of Miami (UM) in Florida.

The three-day conference brought together experts from the International Monetary Fund, the U.S. Department of Labor, the U.S. Interest Section in Havana, universities from the United States and Latin America, and representatives from several Latin American embassies and consulates.

"The ASCE conference has become the world's most important gathering of Cuba scholars," said Juan Carlos Espinosa, assistant director of the UM Institute for Cuban and Cuban-American Studies.

Texas A&M-Corpus Christi Sponsors Language Immersion Program

To develop more ties to Mexico and the Mexican culture, Texas A&M University-Corpus Christi sponsored an intensive five-week Spanish language program in Orizaba, Mexico.

Seven students participated, immersing themselves in all aspects of Mexican culture. They studied beginning Spanish I and II, and experienced daily life with a Mexican family.

Associate Professor of Spanish and trip sponsor Dr. Jesus Rosales said, "This was an enriching cultural experience. Students not only experienced living within the Mexican environment and culture but were also able to break stereotypes."

Cleveland State Wins $800,000 Grant

Cleveland State University (Ohio) was awarded an $800,000 grant from the U.S. Department of Education to initiate an Upward Bound program on campus. The Office of Minority Affairs and Community Relations will receive $200,000 per year for four years.

Upward Bound helps high school students develop the skills and motivation necessary for success in postsecondary education. The program will enable the university to establish mentoring relationships with Cleveland public school students, help them build a solid academic foundation for college, and prepare them for the challenges of college life.

Cleveland State was selected for the Upward Bound program through a national competitive grant process.

McGraw-Hill Sponsoring Minor MBA Organization

The McGraw-Hill Companies has listed Fortune 1000 companies sponsoring The Consortium Graduate Study in Management, a unique initiative that helps minority students get their McGraw-Hill's $20,000 donation to the core. It will aid the nonprofit organization in its efforts to bring more diversity to the nation's business classrooms, and ultimately to corporate America.

The consortium is a national no-fee program of 11 graduate business schools providing management education opportunities to African Americans, Hispanic Americans, and Native Americans in business careers.

The McGraw-Hill Companies, Chrysler, Citibank, KPMG Peat Marwick, Ford Motor Company, as consortia sponsor.

Hispanic Association of Colleges and Universities Joins Minority Alliance

The Hispanic Association of Colleges and Universities (HACU), the National Association of Hispanic Consortium in Higher Education, and the American Indian Higher Education Consortium have combined to form the Alliance for Equity in Higher Education, which, officials say, will promote "greater collaboration and cooperation among colleges and universities that serve large numbers of students in order to enhance the nation's economic competitiveness, social stability and cultural richness."

In an article in Community College, Dr. Gumercindo Salas, HACU's vice president for government relations, said the alliance will benefit HACU by trying to move legislation from a broader perspective.

Log on to the Alliance for Equity in Education's Website, located at www.thehp.com/Alliance.

(Northern Essex Graduates Win National Awards For Work on Welfare Reform)

Twenty-six Spanish-speaking recipients whose benefits were at risk as a result of welfare reform...
ed from Northern Essex Community College's (Mass.) New Beginnings Program.

Funded through a $40,000 grant from the Regional Employment Board, the 12-week program trained participants for early-level health care jobs. In addition to training, the program offers support and career services as well as follow-up for one year after participants are placed in jobs.

A recent graduate of the program, Kathy Rodriguez (pictured here with her mother, Anna), the single parent of a toddler, gained confidence in the program and was to enroll in Northern Essex's Dental Assistant Program this fall.

**PUBLICATIONS**

**Castro's Daughter: An Exile's Memoir of Cuba**
by Alina Fernández

This book is a remarkable and intimate look at Communist Cuba and the man who created it, Alina Fernández provides a vivid and personal view of how she saw Cuba crumble and decay under her father's regime. In a shocking revelation, she asserts that her father's regime allowed Che Guevara to die in order to create the "Necessary Hero." Translated by Dolores Koch.

Biculturalism and Acculturation Among Latinos

This program examines the question of which part of their culture Latinos feel they should keep and leave behind while assimilating into American culture. It explores some commonly held beliefs and misperceptions about who Latinos are today in the United States, and probes the relationship between ethnic identity and entrepreneurial success in the changing mosaic of the U.S. marketplace.

Item #FFH 3202

"Remember the Maine" The Roots of the Spanish-American War

Using archival footage, newspaper excerpts, and historical documents, this program traces the roots of the Spanish-American War to Spain's quest to preserve its flagging empire, American imperialism, and the genuine desire on the part of Cubans to shake off the yoke of Spanish domination.

CONFERENCES

University of Nebraska—Beyond Diversity 101
October 15-16
"People of Color in Predominantly White Institutions—Beyond Diversity 101: Accountability, Implementation, Responsibility, and Action." At the University of Nebraska, Lincoln, Nebraska.

Contact: (402) 472-2844; e-mail, <acpl@unl.edu>, Web site, <http://unl.edu/content/acpp/people99/).

Online Learning '99 International Conference and Performance Support '99 Exposition
October 17-20
The most innovative ways to develop and deliver online learning will be presented and demonstrated at this companion event sponsored by Lakewood Publications. At the Los Angeles Convention Center.

National Multicultural Institute—Annual National Conference
October 21-24
The 4th annual national conference of the National Multicultural Institute: "Embracing an Inclusive Society: The Challenge for the New Millennium." Given the increasing diversity in the U.S., new skills and knowledge are required in such fields as workforce diversity, human resource management, education, and conflict resolution. At the Hyatt Regency Washington on Capitol Hill, Washington, D.C.

Contact: Institute, (202) 483-0700; e-mail, <nmci@nmci.org>, Web site, <www.nmci.org>.

National Higher Education Conference on Students of Color
October 27-31
"The Learning-Centered Environment: Students and Learning in the New Millennium." Featured guests include Dr. Alfredo G. de los Santos, Jr., The Maricopa Community Colleges (Ariz.). At the Minneapolis Hilton & Towers, Minneapolis, Minn.

Contact: phone, (612) 222-1067; e-mail, <cfnford@aol.com>, Web site, <www.collegesurvival.hmco.com>.

El Paso Community College—Great Teaching
October 28-30
"Southwest Seminar for Great Teaching Education as Liberation." At the Sage Brus Inn, Taos, N.M.

Contact: (915) 831-2201; e-mail, <canec@epcc.edu>.

ACE: Educating a Nation (VII)
October 28-30
The American Council on Education Division of Access and Equity Programs Office of Minorities in Higher Education is sponsoring its seventh "Educating a Nation" national conference on diversity and improving the participation of students of color in postsecondary education.

Contact: phone, (202) 939-9395; e-mail, <lachone_fuguy@ace.nche.edu>, Web site, <www.acenet.edu>.

NSH MBA—National Conference and Career Expo
October 28-30
The National Society of Hispanic MBAs' 10th annual event, this year on the theme of "Elevating Excellence: Face the Challenges. Closing plenary speaker: Ray Suárez, host of "Talk of the Nation." At the Adam's Mark Hotel and Colorado Convention Center, Denver.

Contact: phone, (212) 267-1622; e-mail, <info@nshmba.org>, Web site, <www.nshmba.org>.

HACU—13th Annual Conference
October 30-November 2

NAWE, Advancing Women in Higher Education
November 6-10
"Institute for Emerging Women Leaders in Higher Education." At University of Maryland Inn and Conference Center, College Park, Md.

Book Review

by Craig Castro

The United States, like most other countries and societies around the globe, has a long history of racial conflict and antagonisms born of and reproduced by cultural differences, cultural misunderstanding, and stereotyping by the dominant culture. The recent racist attacks by Benjamin Nathaniel Smith in the Chicago area, stacked on a long, ugly history of hate-based crimes, including the brutal assault on Abner Louima, illustrate the need for developing ways and approaches to promote a better understanding of and appreciation for cultural differences. Racial stereotyping developed and refined by the dominant culture does not increase cultural pride and racial harmony. A lot needs to be done to overcome positive and negative stereotypes of Latinos in North American society. From Speedy González, fast, ratón in the West, to the Taco Bell Chihuahua and Ricky Martin, the mainstream media does little to make the task easier, locally or nationally.

"I didn't know there were Latinos in Wisconsin," poems and short stories written by Latinos from Wisconsin and other parts of the U.S., provides insight into Latino culture and values. Edited by Oscar Mireles and to be published soon by Focus Communications, it could be used in high schools, literary groups, or universities to provoke discussions on Latino culture and pride and its interaction with the dominant culture in North American society. The stories and poems explore issues of race, cultural differences, and discrimination from the lived experiences of the contributing writers and also presents themes that constitute similarities that Latino culture shares with others as human beings. These human elements, including love and friendship, gender relations/conflict, and the special relationship between parents and children will help remind readers of how much we have in common.

"Elvis Presley Was Chicoano" uses both negative and positive stereotypes to demonstrate the importance that Latino culture places on family. The negative stereotypes ("his black hair you know with the little curl in the front," "those tight black pants," and "son of migrant parents") are presented as clear proof that Elvis was Chicoano, which the writer only dismisses at the end using what the dominant culture raises up as the defining valuable characteristic of Latino culture, the importance of family: "if Elvis really was a Chicoano he wouldn't have settled to die alone/in an empty mansion/with no familia around who cared enough to cry."

Two of my favorites look into the effects that a more "subtle racism" exerts on Latino children, who often stand between their parents and the dominant culture as translators, both literally and figurative. In "Whatchoo Call Me?" the author reflects on her experience growing up in "the only Mexican family in the whole town" in a small rural Wisconsin town in the early 1970s. "Paranoar," describing a visit by an Avon lady to the home of a Latin family, provides another reflection on an encounter with everyday racism. "Younger daughter finds herself in the position of translating the sales pitch of a gringo Avon lady to her mother and a group of Latina women. The reader will feel the Avon lady's squirm as the Latinas see through her attempt to politely say that their skin color — piel de oliva — is not appropriate for some of the products. The Avon encounter is very humorous, but the humor does not hide the pride that the women feel in their culture.

This theme of cultural pride is demonstrated in a number of poems and other works—"The Color Brown," "Self Portrait," "I Look in the Mirror," and "Rafael Marquez," a poem that provides a stinging critique of the dominant culture's relentless desire for expansion. "Where are you from?" and "Wee Con Sonho?" demonstrate cultural pride through the frustration that Latinos often have in their interaction with close-minded people in the United States, while "Before Horze Gleeley" illustrates the struggle of a Latin torn between the world of the conquered and the conqueror. "Wee Con Sonho?" provides a good modern analogy that can be used to understand the "Discovery of the Americas" and the view of the "discovered."

"Oscuro Spiek," "The Cockfight Bust," "The Day I Threw Thereau off the Roof," "Applying for Citizenship," "Ritos," "Take the South Out of South Africa," "Democracy," "Mexican Roulette," and several other works provide social critiques of North American society and politics shared by Latinos and non-Latinos alike. "My father was a macho and I loved him" and "Frijoles and a Macho Sandwich with Papitas on the side!" show contrasting sides of the issue of Latino machismo. They are beautifully written and should be an interesting read for all, regardless of their cultural background.

"I didn't know there were Latinos in Wisconsin" provides reflection on a number of issues including race, discrimination, love, friendship, cultural differences, and pride. The works will generate different emotions throughout, and the reader will experience sadness, horror, laughter, compassion, passion, and surprise as he/she is educated about Latino culture and the experiences of Latinos living and thriving in a dominant culture. This collection offers a window through which Latinos and non-Latinos alike can view from a critical perspective the cultural values and beliefs that contribute to what it means to be Latino. By provoking reflection on Latino culture and beliefs, this book could make a contribution to a more racially harmonious society. The question is, will anyone be listening?

Craig Castro is completing a doctoral degree in Development Education at the University of Wisconsin-Madison and is an instructor at Omega School, Inc., in Madison, Wisconsin.
BOSTON COLLEGE
Faculty Positions for 2000-2001

ECONOMICS - Applications are invited for senior and junior faculty positions in all areas of economics. Candidates should have a Ph.D. and demonstrate research and teaching excellence. Applicants must have a distinguished research record and a strong interest in both graduate and upper division teaching. Please send letter of application and three letters of recommendation to: search committee, Department of Economics, Boston College, Chestnut Hill, MA 02467.

ENGLISH - We seek an Assistant Professor (tenure-track) in American literature. Candidates should have a Ph.D. and a strong research and teaching record. Please send a letter of application, curriculum vitae, and three letters of recommendation to: search committee, Department of English, Boston College, Chestnut Hill, MA 02467.

POLITICAL SCIENCE - We seek a tenured associate professor in International Relations. The position is open at the rank of Associate Professor. Candidates should have a Ph.D. in Political Science and demonstrate a strong research and teaching record. Please send a letter of application, curriculum vitae, and three letters of recommendation to: search committee, Department of Political Science, Boston College, Chestnut Hill, MA 02467.

PSYCHOLOGY - We seek a tenure-track position in social psychology. The candidate should have a Ph.D. in Psychology and demonstrate a strong research and teaching record. Please send a letter of application, curriculum vitae, and three letters of recommendation to: search committee, Department of Psychology, Boston College, Chestnut Hill, MA 02467.

ROMANCE LANGUAGES AND LITERATURES - We seek a tenure-track position in Romance Languages and Literatures. The candidate should have a Ph.D. and demonstrate a strong research and teaching record. Please send a letter of application, curriculum vitae, and three letters of recommendation to: search committee, Department of Romance Languages and Literatures, Boston College, Chestnut Hill, MA 02467.

CARROLL SCHOOL OF MANAGEMENT
FINANCE - The Carroll School of Management seeks a faculty position at the rank of Assistant Professor or Associate Professor. Applicants must have a Ph.D. in Finance and demonstrate a strong research and teaching record. Please send a letter of application, curriculum vitae, and three letters of recommendation to: search committee, Department of Finance, Boston College, Chestnut Hill, MA 02467.

See website for detailed information and instructions.
FINANCE • Assistant Professor untenured Associate Professor Candidate will have demonstrated interest in and capacity to do publishable scholarly research and a strong interest in both graduate and undergraduate teaching. Compensation is competitive. Candidates should send a curriculum vitae and a research paper to George Aragon, Chair, Department of Finance. Deadline date or dates of receipt of applications: December 1, 1999. E-mail: george.aragon@bc.edu or christine.buscemi@bc.edu (Department Secretary). Website: http://www.bc.edu/bc_org/avp/com/departments/finance.

MARKETING • Tenure-track opening. Candidates should hold a Ph.D. or D.B.A. in Marketing and have demonstrated excellence in research, teaching and academic service. Rank for the position is open. Applications for fellowship will be accepted until the position is filled. Applicants should send information to Prof. Victoria Crittenden, Fulton 450. Website: http://www.bc.edu/bc_org/avp/com/departments/marketing.

OPERATIONS AND STRATEGIC MANAGEMENT INFORMATION TECHNOLOGY MANAGEMENT • Tenure-track position open at all ranks. Candidates qualified for appointment at a senior level or an advanced Assistant Professor level are encouraged to apply. The position offers an opportunity to join and contribute to a successful and expanding Information Technology Group within the Wallace E. Carroll School of Management at Boston College. The IT Group is committed to quality research and teaching, with existing strengths in Electronic Commerce, Internet, IT Adoption and Diffusion of IT innovations. Decision Support Systems, and Financial Information Systems. The group also pursues secondary interests in Operations Management Strategy, and Decision Sciences. Individuals who can complement and strengthen the research focus of our group, while adding to the atmosphere of collegiality and openness to collaboration, are sought. Qualifications include: Ph.D. in Information Systems and/or related area with demonstrated abilities as an outstanding researcher and effective teacher. Teaching interests should include at least one of the following: databases, information systems development, or telecommunications. For a senior position, an opportunity exists to be a leader in continuing to develop the IT programs at both the graduate and undergraduate levels. This individual would be a nationally recognized researcher. Such an individual should also be a "builder" and have a strong desire to contribute to the direction and execution of high-profile IT-related initiatives e.g., course and curriculum development, faculty research programs, etc. For a junior position, the applicant should have a demonstrated clear potential to become a senior person as just described. Direct Inquiries to: Prof. Mary Cronin, IT Group@bc.edu. Please include a cover letter in the body of the e-mail and a vita as a Microsoft Word attachment. Website: http://www.bc.edu/bc_org/avp/com/departments/itmgmt.

STRATEGIC MANAGEMENT • Assistant Professor candidates who possess a strong record of (or significant promise for) excellence in research and teaching and who will have an earned doctorate by July 1, 2000, are encouraged to apply. Interested in individuals whose research and teaching interests link strategy with one or more of the following areas: technology and innovation, decision making and information systems, international management, or entrepreneurship. Candidates may be particularly interested to note that Boston College is the home of the Chief Executives Club, an organization of chairmen, presidents, and managing partners of major corporations. The organization is nationally recognized as a premier forum for the exchange of ideas related to contemporary business and management challenges. Recent meetings have been attended by the chairman and CEOs of companies including AT&T, Time Warner, Motorola, Sun Microsystems, and Intel. With a substantial endowment at hand, Boston College is able to extend many benefits, including significant resources designed to support research and teaching development. The Wallace E. Carroll School of Management is located on the university's main campus in Chestnut Hill, six miles from downtown Boston. It offers both MBA and undergraduate programs, and new faculty will be expected to teach in both. Salary will be competitive. Those interested in the position should send before November 1, 1999, a current vitae, sample publications, a statement of research and teaching interests, and 3 letters of reference to Prof. Martin Szulanski, Carroll School of Management, Fulton Hall 335, Website: http://www.bc.edu/bc_org/avp/com/departments/smgmt.

OPERATIONS MANAGEMENT • Assistant Professor applications are invited for a tenure-track, Assistant Professor position. Qualifications include a completed doctorate in Operations Management, and demonstrated or potential excellence in research and teaching. Preference will be given to applicants with interest in service operations, supply chain management, or operations strategy. Contact: Prof. Michael Moshe, Safadi, Department of Operations and Strategic Management, Website: http://www.bc.edu/bc_org/avp/com/departments/opsmgmt.

SCHOOL OF EDUCATION

Peter S. and Carolyn A. Lynch School of Education prepares undergraduate and graduate students to serve diverse populations in education, professional psychology and human services. The faculty is committed to research and professional preparation that is based on reflective practice and the scientist-practitioner model. Applications are especially encouraged from persons who would enhance the ethnical, linguistic and cultural diversity of the Lynch School of Education. Applicants should possess an earned doctorate, scholarly experience strengthening the educational and administrative experience in schools, teaching at the college level, and successful grant-writing experiences are desirable. Applicants should send a letter of interest, curriculum vitae, 3 letters of recommendation, and 3 samples of their scholarship to the search committee (see below), School of Education, Campion Hall, Chestnut Hill. Deadline for applications is January 1, 2000.

THE DEPARTMENT OF COUNSELING, DEVELOPMENTAL AND EDUCATIONAL PSYCHOLOGY announces two tenure-track positions. We prepare professionals to conduct research, teach, and develop educational and community programs, and engage public policies to enhance the development of individuals across the life span. We also provide psychological foundations for students in teacher education. We seek a Developmental/Educational Psychologist with interests in the educational applications of psychology associated with processes of learning among developmentally, socially, and culturally diverse students. Candidates may have interests in best practices as they pertain to achievement of children and youth in schools, cognitive development and learning, and social and educational policy, and resiliency in school achievement. Contact: Dr. Maureen Kennedy, Search Committee Chair, Website: http://www.bc.edu/bc_org/avp/com/educpsy.

We seek a Psychology/Educator with expertise in comprehensive health as it pertains to enhancing human development, learning and psychological well-being of children and youth in urban contexts. Candidates may have special interests in resilience research, comprehensive child care and education reform efforts, and experience in establishing school-linked services and resources for urban communities and families. Contact: Dr. Mary Walsh, Search Committee Chair, Website: http://www.bc.edu/bc_org/avp/com/educpsy.

SCHOOL OF NURSING

CARROLL CHAIR • An endowed, full-time faculty position. Candidates must be Associate or Full Professors with a record of external funding for their scholarship. Candidates must have a doctorate degree in Nursing or a related field; a Master's degree in Nursing; and an established record of achievement in practice, teaching, and research.

MATER NAL-CHILD HEALTH NURSING • Full-time, tenure-track positions. One position for a doctorally prepared, certified, Pediatric Nurse Practitioner; primary responsibility would be teaching in the Master's program. One position for a Specialist in Pediatric Nursing (primary responsibility would be teaching in the undergraduate program). Candidates must have a doctorate degree in Nursing or a related field; a Master's degree in Nursing; and an established record of achievement in practice, teaching, and research.

ADULT HEALTH NURSING • Full-time, tenure-track position. A major responsibility of this position is coordinating the SCU nursing laboratories. Candidates must have experience in adult health, physical assessment, and management of learning resources. Candidates must have a doctorate degree in Nursing or a related field; a Master's degree in Nursing; and an established record of achievement in practice, teaching, and research.

Forward letter of application and resume to: Dr. Rachel E. Specter, Chair, Faculty Search Committee. Deadline: February 15, 2000. Website: http://www.bc.edu/bc_nursing.

GRADUATE SCHOOL OF SOCIAL WORK

CLINICAL/RESEARCH • Candidates for a tenure line Clinical/Research position at the Associate or Assistant level sought. MSW and doctorate required. Experience requirements include considerable practical and teaching experience; ability to teach MSW and doctoral level; a scholarly record of strong research and publication in refereed journals or potential for same; potential for or experience in grantsmanship; experience in evaluating practice outcomes; and considerable substantive knowledge in a field of practice or in special populations. Rank and salary flexible, and competitive, depending on applicant's qualifications. Send curriculum vitae and names of 3 references to Dr. Demetrios Tzanos, Chair, Personnel Committee, (617) 552-4041. Website: http://www.bc.edu/bc_org/avp/com/nssw.html.

Send letters of interest, curriculum vitae, supporting materials (camps of scholarship) and 3 letters of reference to the above chair and department/ School indicated at BOSTON COLLEGE, Chestnut Hill, MA 02167. Boston College is an affirmative action/equal opportunity employer.
THE NATIONAL ACADEMIES
Advisers to the Nation on Science, Engineering, and Medicine

NATIONAL RESEARCH COUNCIL
Postdoctoral and Senior Research Awards
opportunities for research in:

Chemistry • Physics • Life & Medical Sciences
Space & Planetary Sciences • Earth & Atmospheric Sciences
Engineering, Mathematics & Applied Sciences

Also teaching/research opportunities at the US Military Academy in
Mathematics, Physics & Mechanical Engineering

• 350 awards for independent research at over 120 laboratories
  representing nearly all US Government agencies with research facilities
• 12-month awards renewable for up to 3 years maximum
• Annual stipend for recent PhD or MD graduates $30,000 to $52,000 depending
  upon sponsoring laboratory; stipend appropriately higher for senior researchers
• Support for relocation and professional travel; health insurance program offered
• 3 annual award competitions for most participating laboratories

Applications are accepted on a continuous basis throughout the year.
Postmark deadlines are January 15, April 15 and August 15 for reviews
in February, June and October respectively.

Further information and application materials may be obtained from our
web site at http://national-academies.org/rap or by contacting:

MAIL: Associateship Programs (121144HL)
NATIONAL RESEARCH COUNCIL
2101 Constitution Avenue NW
Washington, DC 20418
FAX: (202) 334-2759
EMAIL: rap@nas.edu

Qualified applicants will be reviewed without regard to race, creed, color, age, sex or national origin.

FACULTY POSITIONS

The Department of Electrical and Computer Engineering at the University of Maryland, College
Park (www.ece.umd.edu) expects to have several
openings for tenure-track and tenured faculty
positions starting August 2009.

The Department is seeking candidates in Information
Technology and Small Smart Systems, two broad
research activities selected for expansion by adding
distinguished faculty under the University of Maryland
Enhancement Initiative. In both areas, we are seeking
faculty who can build links between established research
programs in systems and devices.

"Small Smart Systems" refers to distributed, often
mobile, physical systems of sensors and actuators,
integrated with advanced computational and
communications capability. In this area we are seeking
candidates in (i) sensors/actuators/control systems,
especially MEMS-based; (ii) semiconductor devices and
circuits emphasizing applications to sensors and
actuators, novel devices including quantum effect devices
and nanostructures, RF and low-power devices,
networked circuit and embedded systems.

In Information Technology, we are seeking
candidates in (i) communication networks, emphasizing hardware
implementation, including optical communications and
RF communications; (ii) video processing and
multimedia systems; (iii) wireless communications,
emphasizing the physical layer, including error control
coding, modulation, and signal processing for wireless
systems; (iv) circuit design, especially analog and mixed
mode VLSI, and HF and RF circuits, for applications in
communications and signal processing, controls or
computer systems; and (v) real-time and embedded
computing systems, hardware/software co-design, and
VLSI systems. Specific interests are for applications to
specialized microarchitectures and processors, mobile
computing, communications, and control systems.

There are strong possibilities for joint appointments
between the Department and the Institute for Systems
Research, the Institute for Advanced Computer Studies,
and the Department of Computer Science. In addition,
candidates in the area of circuits and semiconductor
technologies may be eligible for a Ward Professorship in
Semiconductor Science and Technology.

Appointments at all ranks will be considered. Prior
experience in industry is desirable. Candidates for the
rank of Assistant Professor should have a high potential
for both teaching and research. Candidates for the ranks
of Associate and Full Professor should have
distinguished records in research and a strong interest in
educational programs.

For best consideration, applications should be
received by December 31, 1999. Please send resume, list of
publications, and the names of at least four references to
Professor Nariman Farvardin, Chairperson,
Department of Electrical and Computer
Engineering, University of Maryland, College
Park, MD 20742. If the resume is available in MS Word or
HTML, please send a copy on a floppy disk as well.

The University of Maryland is an equal opportunity,
affirmative action employer with a strong commitment
to the principles of diversity. In that spirit, applications
from minority groups and women are especially invited.

COLLEGE OF ARTS AND SCIENCES

RELIGIOUS STUDIES

Pending approval and funding, the Department of Theology and Religious Studies at the University of San Francisco invites applications for a
tenure-track position in Religious Studies at the Assistant Professor level, anticipated to begin in the Fall 2000. Preference will be given to
candidates who specialize in East Asian Religions and Culture.

Teaching responsibilities may include inter alia at the undergraduate level, Introduction to World Religions, East Asian Religions,
Religious Issues, Religious in Dialogue, and other courses according to the candidate's specialty. At the Master's level, applicants may teach courses
in the MA program in the Theology and in Pacific Rim Studies. Preference will be given to candidates demonstrating a flexible interdisciplinary
approach.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate
by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the
mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Applicants should submit a letter of application, curriculum vita, graduate transcripts, brief description of research plans, copies of recent
research papers, statement of teaching philosophy, evidence of teaching ability including copies of teaching evaluations, and three letters of
recommendation to

Lois Ann Lorentzen, Chair
Religious Studies Search Committee
Department of Theology and Religious Studies
University of San Francisco
2130 Fulton Street
San Francisco, CA 94117-1089

Applications must be received by November 1, 1999, in order to ensure full consideration.

The University of San Francisco is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively
contribute to such an environment. USF is an Equal Opportunity and Affirmative Action Employer and will provide reasonable
accommodations to individuals with disabilities upon request. We particularly encourage minority and women applicants for all positions.
ASSISTANT ASSOCIATE DEAN FOR ADMISSIONS AND FINANCIAL AID

VERMONT LAW SCHOOL

Vermont Law School, the premier environmental law school, located on the White River in rural Vermont, invites applications for the position of Assistant/Associate Dean for Admissions and Financial Aid.

The Assistant/Associate Dean for Admissions and Financial Aid is responsible for administering all aspects of the Admissions and Financial Aid offices including: planning and implementation of recruitment strategy and aid policies; the collection of data to drive and assess a defined marketing strategy; interviewing and counseling prospective students; making decisions on admissions and achieving enrollment targets; supervising the Admissions and Financial Aid staff; and expanding the diversity of the student body.

This position requires a Bachelor's degree with 5+ years of related experience in a selective admissions environment; a Master's degree is preferred and a JD degree or experience in law school admissions is desirable. The successful candidate will have a track record of successful recruitment initiatives; excellent analytical abilities; strong written, oral, and interpersonal communications skills; the ability to motivate and manage change; and a high commitment to quality student service. Individual must be able to work well in a system of shared governance and be aware of and sensitive to the educational goals of a multi-cultural community. Extensive travel is required.

Send resume, cover letter, and three references to: Human Resources, Vermont Law School, 1265 Church Street, South Royalton, VT 05068.

Vermont Law School is an Equal Opportunity Employer and welcomes applications from qualified individuals regardless of sex, minority status, disability, or veteran status.

ASSISTANT SCIENTIST
(WEED SCIENCE)

Full time tenure track, 100% research, Washington State University, Irrigated Agriculture Research and Extension Center, Prosser, WA. Conduct research on weed management and sustainable approaches to agricultural production in support of agronomic/horticultural crop production systems for irrigated agriculture. REQUIRED: Ph.D. degree in Weed Science or related discipline upon hire. DESIRED: demonstrated knowledge of weeds, weed biology, herbicides, and integrated weed management systems in agronomic/horticultural crops; ability to plan, design, implement, interpret research results using scientific methodology; communicate well orally in writing with scientists/producers/clients/electric groups; organizational and leadership skills in a team environment; successful grant writing experience; apply statistical, experimental design, and computer technology to weed research; interpersonal skills with ag. industry and producers; and experience with irrigated agriculture. POSITION AVAILABLE: July 1, 2000 APPLICATION DEADLINE: January 31, 2000 or until position is filled. SEND: letter addressing qualifications, vita, transcripts, three letters of reference to Dr. Thomas A. Lampkin, Dept. Crop and Soil Sciences, P.O. Box 646420, Washington State University, Pullman, WA 99164-6420.

QUESTIONS: Dr. Bob Parker, LAREC, WSU, 24106 North Bunn Road, Prosser, WA 99350-9687, ph. 509-786-9234, fax 509-786-9370, or email rlparker@wsu.edu.

Northeastern University, nationally recognized for its cooperative education program, is a private, non-sectarian university located in the heart of historic Boston. It is an integral part of the city's thriving educational and cultural life, dedicated to excellence in research and scholarship, and highly committed to individual and community needs. Northeastern is dedicated to fostering gender equity, cultural and ethnic diversity among its faculty, staff and is proud of diverse student/resident population.

Residence Director

Manage a residential community-housing complex; administer and pro- gram programs for resident students. Supervise Assistant Residence Directors, Graduate Assistant and Resident Assistants, provide training and evaluation, and maintain a close working relationship with the halls. Primary responsibility is to develop and maintain an environment conducive to students' personal and scholastic growth and academic success. Duties include community development, behavior management, judicial administration, building management, and resident life administration functions. Work collaboratively with University staff to provide a safe and secure environment. Bachelor's degree in a College Student Personnel, Higher Education Administration or related field. Supervisory experience and previous live-in experience as a Resident Assistant or Graduate Assistant strongly preferred. Excellent decision-making and communication skills, effective administrative, organizational skills, and the ability to work in a medium-sized community setting. Send resume and list of references to M. L. Langlie, Director, Residential Life, 6 Speare Hall, Northeastern University, 360 Huntington Avenue, Boston, MA 02115. Applications will be reviewed as they are received. Applications will be accepted until the position is filled.

Northeastern is an Equal Opportunity/Affirmative Action Title IX Employer.

CHAIR

Department of Modern Languages & Literatures

Oswego State University requests applications for the Chair of Modern Languages & Literatures, a department with ten full-time faculty, offering language instruction in Spanish, French, German, and language instruction in Italian, Japanese, Russian, Chinese and American Sign Language. The Department of Modern Languages is also pursuing innovative programs in Language International Trade and Languages Across the Curriculum. We seek a leader who will support these efforts and assist the department in identifying future directions.

The Chair will be a member of the Spanish or the German sections of Modern Languages Department. She or he should have a Ph.D. accomplishments as a teacher and scholar appropriate for appointment at Associate Professor or Professor rank.

The Chair of Modern Languages should also have: (1) demonstrated administrative skills (e.g. as a department chair, program director, governance leader, or success leader in curriculum reform), (2) the ability to work effectively and collegially with others, and (3) knowledge of current issues in foreign language programs in higher education, including experience with the latest educational technologies.

Salary will be commensurate with rank and experience. Applicants should submit a letter of application, resume, official transcripts, and three letters of reference (including telephone numbers of referees), to Dr. Tracy Lewis, Chairperson, Search Committee, Department of Modern Languages and Literatures, 1 Hall, Oswego State University, Oswego, NY 13126. Review of applications begins immediately and will continue until the position is filled.

Oswego State University is an Affirmative Action Employer.
UNIVERSITY OF NEW HAVEN

Notice of Faculty Vacancy in Art

EDUCATION. Assistant or Associate Professor of Graphic Design and Coordinator of Art, tenure-track beginning on January, 2000. Responsibilities include teaching graphic design courses including computer graphics and courses in other applied areas, coordinating an art program, building enrollments in graphic design, supervising and maintaining computer graphics lab, student advising and curriculum development.

Candidates should possess, at minimum, an MFA degree, proven skill in teaching graphic design and computer design proficiency in the latest versions of Adobe Illustrator, Quark Express and Photoshop, strong background in at least one other applied area, demonstrated ability to build enrollments in graphic design, and a background in arts administration. Experience in gallery or museum operation, web design, auto CAD, and K-12 art education is also desirable.

Salary is negotiable based on experience. Application deadline: October 29, 1999. Please submit letter of application, resume, letters of recommendation and any supporting materials to Search #99-27A, Human Resources, University of New Haven, 300 Orange Avenue, West Haven, CT 06516.

The University of New Haven is an Affirmative Action/EQUAL OPPORTUNITY EMPLOYER.
The University has a diverse student body and is seeking to diversify its faculty.

UNIVERSITY OF FLORIDA

DEAN, COLLEGE OF ENGINEERING

The University of Florida invites nominations and applications for the position of Dean of the College of Engineering. The College, which enrolls about 5,600 (4,000 undergraduate; and 1,600 graduate) of the University’s 43,000 students, consists of twelve degree granting departments with 285 faculty and is one of the University’s premier colleges. The college ranks 15th among the nation’s public engineering programs in the attraction of research support (about $57 million in research expenditures in 1997-98).

The University of Florida, the state’s oldest and largest university, is one of the nation’s most comprehensive institutions of higher education. The university is a Land Grant University and a member of the Association of American Universities.

The Dean of Engineering is the chief academic officer of the college and is responsible for all facets of the college’s performance. The Dean serves on a variety of University-wide committees and boards and represents the university in many national and international organizations. The Dean will hold a tenured academic appointment in the appropriate department in the College of Engineering, University of Florida.

Candidates must have earned doctorate, a distinguished record of scholarly accomplishments, and appropriate administrative experience. The salary is nationally competitive.

The deadline for nominations is Friday, October 15, 1999, and the deadline for applications is Friday, October 29, 1999. Interested candidates should forward a letter addressing his or her qualifications, a resume, and the names, addresses and telephone numbers of five references to:

Vice President Michael V. Martin, Chair
Search and Screen Committee
P.O. Box 110180
University of Florida
Gainesville, FL 32611-0180
Email: MVMM@NIFAS.UFL.EDU
Phone: 352-392-1971

The University of Florida is an equal opportunity, equal access, affirmative action employer. The “government in the sunshine” laws of Florida require that all documents relating to the search process, including letters of application/nomination and reference, be available for public inspection.

The Law School of the University of Southern California

POSITION DESCRIPTION - DEAN OF THE SCHOOL

The University of Southern California is inviting applications and nominations for the position of Dean of the Law School. The University is located in Los Angeles and is one of the nation’s premier private research universities. USC Law School was the first law school established in the southwestern United States, and is now a national law school serving a student body drawn from over 100 undergraduate institutions distributed throughout the nation. It is one of the preeminent law schools in California, and is typically ranked among the top 15 or 20 in the country.

USC Law School is relatively small, with an average class size of approximately 200 students and a total enrollment of 600. It has approximately 35 full-time faculty, many of whom have advanced degrees or training in other disciplines in addition to law and are recognized nationally as experts in their respective fields. The Law School’s endowment is among the ten largest for private American law schools. The Law School’s primary mission is facilitating the production of quality scholarship by its faculty, and training students for the bar, bench and other pursuits to which knowledge about law and the legal system is relevant.

The Dean of the USC Law School is its academic leader and chief administrative officer, and reports directly to the Provost of the University. The responsibilities of the job include: leading the recruitment, development and retention of talented faculty; promoting excellence in the School’s educational and scholarly functions; planning and managing fiscal matters, leading the School’s fundraising efforts; and maintaining supportive relationships with alumni and with other members of the local bar and bench.

Nominations and applications should be sent to: Randolph Westerfield, Search Committee Chair, c/o Office of the Provost, University of Southern California, 57864 Administration Building, Room 202 - MC 4019, Los Angeles, CA 90089-0409. Applications should include a letter describing the candidate’s qualifications for this position, a curriculum vitae; and names, addresses and telephone numbers of three references. Questions may be directed to Bill Strippoli, Director of Information Resources, Office of the Provost (213-740-9097, 213-740-1782 (fax), strippoli@usc.edu). Review of applications and nominations will begin immediately and will continue until the position is filled.

USC is proudly poised and firmly committed to providing equal opportunity for outstanding men and women. USC actively seeks nominations of and applications from qualified individuals from the broader possible communities.
Position Announcement

Nebraska
UNIVERSITY OF NEBRASKA – LINCOLN

Associate Director of Housing Residence Life

Minority and women candidates are especially encouraged to apply. Oswego State University is an Affirmative Action Employer.
SOCIOLOGY OF GENDER
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position in Gender at the Assistant Professor level, anticipated to begin in the Fall 2000. Additional expertise in one or more of the following areas would be desirable: family, race and ethnicity, or research methods.

Teaching responsibilities: may include inter alia, Sociology of Gender, Sociology of the Family, Race and Ethnicity, and Research Methods. Normal teaching load is three courses per semester. The Department contributes to the Women’s Studies, Latin American Studies, Ethnic Studies, Peace and Justice and Legal Studies certificate programs as well as the social science course offerings in the General Education Curriculum.

Qualifications: Candidates must have university teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate in Sociology by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Michael J. Weber, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

GLOBALIZATION
Pending approval and funding, the Department of Sociology at the University of San Francisco invites applications for a tenure-track position at the Assistant Professor level, anticipated to begin in the Fall 2000. We are interested in candidates who specialize in any aspect of globalization, including global environmental issues, international migration, development/underdevelopment, border studies, multinational enterprises and the international division of labor; women in development, cultural globalization, inequality, etc.

Teaching responsibilities: may include inter alia, Globalization, Global Population and Consumption, Environmental Sociology, Global Inequality. Women in Development, Environmental Racism as well as general Sociology courses. Normal teaching load is three courses per semester. The Department contributes to the Women’s Studies, Latin American Studies, Ethnic Studies, Peace and Justice and Legal Studies certificate programs as well as the social science course offerings in the General Education Curriculum.

Qualifications: Candidates must have university teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate in Sociology by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Michael J. Weber, Chair, Sociology Search Committee, Department of Sociology, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

PUBLIC RELATIONS
Pending approval and funding, the University of San Francisco invites applications for a tenure-track position in Public Relations at the Assistant Professor level, anticipated to begin in the Fall 2000.

Teaching responsibilities: may include inter alia, Public Relations Writing, Public Relations Theory, Public Relations Research and Campaigns, Public Speaking, and other courses according to the candidate’s specialty. Competency in related areas, such as advertising and organizational communication is also desirable. The faculty member will assist in building a public relations program, develop and advise the PRESSA chapter, and assist with Public Relations internships. Because the University of San Francisco is a Jesuit institution situated in a culturally diverse region, the new program will emphasize nonprofit and international PR; professional public relations experience in either of these areas is extremely desirable.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Rhonda Parker, Chair, Public Relations Search Committee, Department of Communication Studies, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

COORDINATOR OF EXPOSITORY WRITING
Pending approval and funding, the Department of Communication Studies at the University of San Francisco invites applications for a full time tenure-track position in Expository Writing at the Assistant or Associate Professor level, anticipated to begin in the Fall 2000. The Department of Communication Studies incorporates English as a Second Language, Expository Writing, and Speech/Rhetoric.

Responsibilities include: Coordinating the undergraduate Expository Writing program, teaching two to three expository writing courses per year and collaborating with other Communication Studies faculty to advance curriculum development and to integrate speech and writing as communication skills.

Qualifications: University teaching experience, a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, academic program administrative experience, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Send applications to: Stephanie Vandrick, Chair, Expository Writing Search Committee, Department of Communication Studies, University of San Francisco, 2130 Fulton Street, San Francisco, CA 94117-1080.

INTERNATIONAL MEDIA/VIDEO OR MULTIMEDIA PRODUCTION
Pending approval and funding, the Media Studies Program at the University of San Francisco invites applications for a tenure-track position in International Media with a second specialization in Production, at the Assistant Professor level, anticipated to begin in the Fall 2000.

Teaching responsibilities: may include inter alia International Media, Media and Globalization, Media and New Technology and/or Video or Multimedia Production, and other courses according to the candidate’s specialty. Competency in one or more of the following core courses is also necessary: Media and Society, Media Institutions, Media Law and Policy, Media Theory, Media Audience.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required.

Send applications to: Bernadette Barker-Plummer, Chair, International Media Search Committee, Department of Media Studies, University of San Francisco, 2130 Fulton Street, Harney 243, San Francisco, CA 94117-1080.

Applicants should submit a letter of application, curriculum vitae, graduate transcripts, brief description of research plans, copies of recent research papers, statement of teaching philosophy, evidence of teaching ability including copies of teaching evaluations, and three letters of recommendation. Applications must be received by October 15, 1999, in order to ensure full consideration.

The University of San Francisco is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively contribute to such an environment.

USF is an Equal Opportunity and Affirmative Action Employer, and will provide reasonable accommodations to individuals with disabilities upon request.

We particularly encourage minority and women applicants for all positions.

DEADLINE: EA/EO/AA/ADA

HEAD, DIVISION OF BUSINESS AND ACCOUNTING

Truman State University seeks applications and nominations for the position of Head of its Division of Business and Accounting. The Division of Business and Accounting consists of 26 full-time and 6 staff serving 1000 undergraduate majors in accounting and business administration. The Division offers a graduate program in accountancy. The Division has received accreditation from the AACSB - International Association for Management Education for both its business and accounting programs. The Division is housed in a recently renovated structure with state of the art equipment.

The Division Head is an important academic leader and administrator responsible for all matters. The duties of Division Head are far-reaching, incorporating responsibilities similar to both dean and department chair in more traditional administrative models. Academic and administrative programs. A Division Head leads each division, reporting directly to the Vice President for Academic Affairs. Truman's unique administrative structure emphasizes faculty interaction. The Division Head must have an institutional perspective and support the mission as a public liberal arts and sciences institution. The salary is commensurate with responsibilities required.

Responsibilities include:
- Supporting and promoting student learning and high achievement in the context of public liberal arts and sciences universities
- Providing leadership for the division and serving as an advocate for divisional need programs
- Supporting University and Divisional assessment by disseminating data and using decision making and encouraging its use by faculty and staff
- Supporting faculty in teaching, professional development, and research activities in their collaborations with students
- Administrating Division budget
- Recruiting, hiring, and providing recommendations for tenure and promotion for division faculty
- Establishing and maintaining relationships with other external representatives and directing divisional fundraising activities

Qualifications include:
- Ph.D. or other degree appropriate to the division's programs
- Evidence of a strong academic record and excellence in teaching and scholarship
- Excellent interpersonal skills and the ability to work cooperatively, build consensus, and make sound decisions
- Evidence of administrative experience and the potential to lead and work with faculty and staff in a divisional fundraising capacity
- Understanding of, and support for, the liberal arts
- Understanding of, and commitment to, diversity

Truman State University is a Missouri premiere public liberal arts and sciences university. It is consistently recognized as one of the nation's best educational values. Truman was named News & World Report as the number one public regional university in the Midwest and it was selected as one of the top 100 best college buys by America's Best College Buys 2000. With a population of just over 6,000 students, Truman has received national recognition for its admission program, competitive student body, and out-standing undergraduate and graduate programs. Truman seeks candidates with a commitment to diversity and consider candidates who are identified as minority individuals.

Interested candidates should submit a letter of application, a current curriculum vitae, a 1000-word proposal on educational and administrative philosophy, and at least two letters of recommendation. Candidates should provide a list of names, addresses, (including e-mail) and phone numbers of four persons who may be contacted as references. Candidates who are identified for further review will be sent a confidential letter of reference directly to the university.

Application materials should be sent to: Garry Gordon, Vice President for Academic Affairs
Truman State University, McClain Hall 203
100 East Normal Street
Kirkville, MO 65350

Screening of complete applications will begin November 15, 1999 and continue until the position is filled. The anticipated date of appointment is July 1, 2000, but is negotiable.

Truman is an Equal Opportunity Institution committed to cultural diversity and compliance with the Americans with Disabilities Act of 1990.
St. Philip's College, one of four colleges in the Alamо Community College District, invites candidates for this executive position. Located near downtown San Antonio, Texas, St. Philip's College offers strong programs in health, business, and industrial careers and other vocational fields. Through articulation agreements, this community college also offers arts and sciences course work that directly transfers to four-year educational institutions. SPC has established a national reputation in instructional and learning resource technology and is the site of one of ten national Technology Transfer Centers supported by IBM and the League for Innovation in the Community College. For more information, visit our web site at www.accd.edu.

The President is expected to serve as a team leader in concert with the District Chancellor, Executive Vice Chancellor, other college presidents, faculty, and staff. The successful candidate will have the vision and energy to address the educational/technological demands of the 21st century, and will possess at least

- An earned Doctorate degree from an accredited institution
- Three (3) years full-time college teaching experience
- Three to five (3-5) years administrative experience (minimum as department chairperson)
- Some community college experience required

Must submit the following: (1) letter of interest reflecting your views on the role of a president and how your background can serve as a positive influence for a diverse student population, (2) comprehensive resume/vitae, (3) three letters of recommendation, and (4) photocopies of transcripts. Selectee subject to criminal history check. Incomplete packages may not be considered.

Deliver or postmark material by October 15, 1999 to:

As an affirmative action/equal opportunity employer, the University particularly welcomes applications from women and minority candidates.
CHANCELLOR

THE UNIVERSITY OF TEXAS SYSTEM

After 7 years of exemplary service as Chancellor, William H. Cunningham has announced his intention to retire no later than the end of August 2000. The University of Texas System Board of Regents announces a nationwide search to recruit the next Chancellor of the System.

First authorized by the State Constitution in 1876, The University of Texas System is composed of 9 academic institutions (Arlington, Austin, Brownsville, Dallas, El Paso, Pan American, Permian Basin, San Antonio, and Tyler) and 6 health institutions (Dallas, Galveston, Houston, San Antonio, M.D. Anderson Cancer Center in Houston, and Tyler) and includes 4 medical schools, 2 dental schools, and 7 nursing schools. The System enrolls over 145,000 students, employs over 76,000 persons, and has an annual operating budget of over $5.4 billion. The System also manages a $12 billion portfolio.

The University of Texas System faculty are consistently honored by their peers, professional associations, and other organizations for contributions to their academic fields and for their roles as outstanding teachers. Honors and distinctions among the System's internationally distinguished faculty include 7 Nobel laureates, 1 Pritzker Prize recipient, 32 members of the National Academy of Sciences, 45 members of the National Academy of Engineering, 37 members of the American Academy of Arts and Sciences, 21 members of the Law Institute, and 32 members of the American Academy of Nursing.

As the Chief Executive Officer of the System, the Chancellor reports directly to the Board of Regents and is responsible for executing the policies and procedures of the Board. The Chancellor serves as one of the State's senior advocates for higher education and interacts extensively with elected officials: the business, educational, philanthropic, and professional communities; and the general public. Reporting directly to the Chancellor are the Executive Vice Chancellor for Academic Affairs, Executive Vice Chancellor for Business Affairs, Executive Vice Chancellor for Health Affairs, Vice Chancellor and General Counsel, Vice Chancellor for Governmental Relations, Vice Chancellor for Development and External Relations, Vice Chancellor for Information Technology and Distance Education, Vice Chancellor for Federal Relations, Vice Chancellor for Special Engineering Programs, Director of Audits, and Executive Associate.

Applications and nominations should be sent to the address below. Review of candidate files will begin immediately and will continue until the new Chancellor is selected.

NORTHERN ILLINOIS UNIVERSITY

PRESIDENT

After 14 years of dedicated and accomplishment-filled service as President of Northern Illinois University, John La Tourette has announced his intention to retire in early 2000. The Board of Trustees of NIU announces a nationwide search to recruit Dr. La Tourette's successor.

Chartered in 1895, Northern Illinois University is a comprehensive teaching and research institution with a student enrollment of over 22,000 located in one of the most dynamic regions of the country with its main campus in DeKalb. Northern also operates regional sites in Rockford, Hoffman Estates, Oregon, and Naperville (scheduled to open Fall 2000). The University is composed of 5 undergraduate colleges and 12 degrees-granting colleges that together offer 44 undergraduate majors and 70 graduate minors, including 10 Ph.D. programs, doctoral degrees in Education and the Juris Doctorate. Northern is a NCAA Division IA school and the NIU Huskies compete in the Mid-American Conference. For fiscal year 1999, NIU's operating budget was $256.7 million.

Reporting directly to the Board of Trustees, the President is responsible for the effective general management of the University.

Please send applications and nominations to the address below. Review of candidate materials will begin immediately and will continue until a new President is selected.

NEW MEXICO STATE UNIVERSITY

PRESIDENT

The Board of Regents invites nominations and applications for the position of President of New Mexico State University, NMSU, a comprehensive land-grant university, is a Carnegie 1 Research Institution, a Top Tier Minority Institution, and a member of the Hispanic Association of Colleges and Universities. The University serves over 15,000 undergraduate and graduate students on the main campus in Las Cruces, New Mexico, and 8,000 students on four branch campuses. With an operating and plant funds budget exceeding $337 million, including a funded research budget of over $512 million, the University provides a broad range of teaching, research, and extension services. In addition, NMSU and its Board of Regents are responsible for the operation of the New Mexico Department of Agriculture and research and educational programs worldwide.

The successful presidential candidate will exhibit a commitment to excellence in teaching, research, extension education and public service; have demonstrated fundraising abilities; possess the ability to successfully communicate the University's mission to its various constituencies; have the vision to continue leading the institution into national and international prominence; and demonstrate the leadership and administrative skills required to effectively manage a complex university in a multicultural environment.

The Committee will begin reviewing applications in November 1999. Application materials and/or nominations should be addressed to:

EMPLOYER MINORITIES AND FEMALES,
PARTICULARLY ENCOURAGED TO AP

OKLAHOMA STATE UNIVERSITY
Vice President for Student Affairs
Main Campus

The Vice President for Student Affairs provides
vision and leadership for the Division of Student
Affairs on the main campus of Oklahoma State
University in Stillwater, Oklahoma.

Oklahoma State University is a comprehensive
research and land grant university with state, national
and international impact. The Stillwater campus
enrolls over 20,000 students in six undergraduate
colleges, the Graduate College, and the College of
Veterinary Medicine, offering more than 100
degrees. In addition to teaching, research, and
service, leadership development is an OSU
hallmark. Over 300 student organizations offer
co-curricular and pre-professional activities. The
Division of Student Affairs has a staff of almost 450
and an annual operating budget of more than $45
million. Additional information about Oklahoma
State University and the Division of Student Affairs
may be obtained at http://www.okstate.edu or at
http://www2.okstate.edu/studentaffairs.

The Vice President for Student Affairs reports to
the Executive Vice President of the University and
serves as a member of the President's Executive Group. The
Vice President is responsible for the development,
implementation, and oversight of programs and
services to support the educational, social, and
personal development of students, building a spiritual
community on the campus. Major functional areas of
the Division of Student Affairs include Campus Life
and Student Organizations; Student Union
Bookstore, Food Court and Dining Room; Residence
Halls, Suites and Apartments; Campus Recreation;
Student Health and Wellness; Counseling Services;
and Career Services.

Qualifications:
The successful candidate will demonstrate
imagination, leadership and managerial skills,
including fiscal accountability, exemplary
interactions with students, effective communication
skills in both written and verbal form, strong support
for diversity; success in one or more of the major
functional areas of Student Affairs; or comparable
experience in a university setting; and a passion for
student success and academic excellence. An earned
degree is preferred; however, comparable
experience and professional credentials may be given
equal consideration.

To be assured full consideration, completed
applications should be received by December 1,
1999. Screening will begin on that date and
continue until the position is filled. Applications
should include a letter of interest including your view
of the potential contributions of an innovative
Student Affairs organization in a comprehensive
public university, and the names, addresses, and
telephone numbers of at least five professional
references. All nominations and applications (with
supporting materials) should be addressed to:

RHODE ISLAND SCHOOL OF DESIGN

DIRECTOR OF CONTINUING EDUCATION
(Search Reopened)

The Rhode Island School of Design invites applications for the position of Director of Continuing Education.

Reporting to the Provost, the Director of Continuing Education is responsible for advancing the Continuing Education mission to respond to the educational needs of the community and those who seek opportunities for lifelong learning in the arts with open, accessible programs of the highest quality.

The primary responsibilities are to develop, direct, and evaluate all Continuing Education and Special Programs and explore new growth and revenue generating opportunities. The successful candidate should be a leader with experience in the management, development, and marketing of extended and continuing education programs; a consensus-builder with a vision for lifelong learning and continuing education; a seasoned manager with an ability to build an enthusiastic, service-oriented team and an entrepreneur, familiar with the role of computer technology in the field of art and design.

Position requirements include a Master’s degree in the arts, art education, adult education or management. Five or more years of experience in the planning, execution, and management of educational programs, preferably in continuing education. Excellent communication skills.

RISD was founded in 1877 as a privately endowed educational institution. RISD has approximately 2,000 undergraduate and graduate students and offers degree programs in the fine arts, architecture and design disciplines. The Division of Continuing Education offers evening and weekend classes as well as an extensive summer program to more than 5,000 part-time students. Continuing Education has a budget of $6.2 million and 19 full- and part-time staff. For more information about the Division, please consult our website at http://www.risd.edu/

Competitive salary; excellent benefits.

HOW TO APPLY: Submit an application containing your resume, and a cover letter describing how your qualifications and experience relate to the responsibilities of this position. Review of applications will begin October 12, 1999. Mail your application to Ms. Carol Terry, Chair, Director of Continuing Education Search Committee, Rhode Island School of Design, 2 College Street, Providence, RI 02903-2784. RISD is an equal opportunity employer who encourages inquiries and application from female and minority candidates. RISD does not discriminate on the basis of race, color, age, sex, religion, national or ethnic origin, sexual orientation or disability.

Loras College
1450 Alta Vista
Dubuque, Iowa 52004-0778

AMS/EOE
THE AMERICAN UNIVERSITY IN CAIRO

FACULTY POSITIONS

Applications are invited for the following openings at The American University in Cairo (AUC). Founded in 1919, AUC's campus is located in Cairo, Egypt, and its degree programs are accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools. The undergraduate degree programs in Construction and Mechanical Engineering are also accredited by the Accreditation Board for Engineering and Technology (ABET). For more information see our website at www.aucegypt.edu. The Ph.D. is required for every position except where otherwise specified. University teaching experience is required. Two-year appointments begin September 2000. Renewal of an appointment depends upon institutional needs and/or the appointee's performance. The normal teaching load is three courses per semester. Arabic and English is the language of instruction. Salary and rank are according to scale based on qualifications and professional experience. For experience, housing, annual round-trip air travel for appointees and accompanying family, plus schooling for up to two children are included. In view of AUC's protocol agreement with the Egyptian Government which requires specific proportions of Egyptian, U.S., and third-country citizen faculty, at this time preference will be given to qualified applicants who are U.S. citizens. Application instructions are given below.

BIOLOGY. Possible position. Candidates must be able to teach courses in general biology and a core curriculum course in scientific thinking. Job #BIO-1

COMPUTER SCIENCE. Two or more openings to teach upper division undergraduate and M.Sc.-level courses in the following areas: high performance computer architecture and software engineering. Job #CS-1/2

CONSTRUCTION ENGINEERING. Several openings to teach undergraduate and M.Sc.-level courses and to conduct research in the following areas: construction management and technology, hydraulics and environmental sanitation. Job #ENSC/1-2

MECHANICAL ENGINEERING. Several openings to teach undergraduate and M.Sc.-level courses and to conduct research in the following areas: industrial engineering, materials and manufacturing design of mechanical systems and components, and thermofluids processes and systems. Job #ENME/1-2

ENGLISH AS A FOREIGN LANGUAGE. Possible openings for experienced English Language Teachers to teach English as a foreign language in the English Language Institute. A Master's degree in TESL/TEFL is required. Job #ELI-1

METHODS OF TEACHING A FOREIGN LANGUAGE. Possible opening for an experienced faculty member to teach methods in the M.A. in TESL program. Individual with strong background in methodology/teaching foreign language teaching methods and supervise TESL practicum. Additional teaching experience desirable in bilingual education, curriculum and materials development, CALL/interactive technology, second language acquisition, ESL program administration, ESL teaching reading or teaching writing. Familiarity with Arabic and the Middle East is useful, although the language of instruction is English. The position primarily involves teaching in the MA program and supervising MA theses, with the possibility of teaching undergraduate courses. The Ph.D. must be in hand at the time of application. Job #ELI-2

SECOND LANGUAGE ACQUISITION. Possible opening to teach SLA in the M.A. in TESL program. Strong preference will be given to candidates with additional expertise in structure of English/pedagogical grammar. Additional teaching experience desirable in curriculum and materials development, ESL program administration, ESL teaching reading, or teaching writing. Experience in CALL/interactive technology would be a strong asset. Familiarity with Arabic and the Middle East is useful. The position primarily involves teaching in the MA program and supervising MA theses, with the possibility of teaching undergraduate courses. The Ph.D. must be in hand at the time of application. Job #ELI-3

FRESHMAN WRITING PROGRAM. One or more openings for experienced writing and rhetoric teachers to teach writing, rhetoric, and research in the Freshman Writing Program. Experience in writing using computers would be a plus. M.A. in related fields in literature or the humanities is required. Job #FWP-1

LITERATURE. Ability to teach introduction to literature, critical analysis of texts, modern literary criticism, 20th century comparative literature, and European/American or European/Arabic literature. Job #ECL-1

FILM HISTORIAN/THEORIST. Possible positions. Ph.D. required. Candidates should be able to teach introductory film courses and related upper-division courses in film and within their special field of expertise. The position also may require teaching in the core curriculum seminar program. Candidates will be responsible for organizing campus film events, occasionally in conjunction with community organizations. In the past these events have included imaginative and innovative international festivals. An interest in Third World cinema and, above all, basic video production experience are a definite plus. Job #PVT-2

HISTORY: LATE OTTOMAN EMPIRE/MODERN TURKEY. The American University in Cairo invites applications for a position in history of the late Ottoman Empire/Modern Turkey. In addition to introductory and advanced courses in the field, the successful candidate must be prepared to participate in an undergraduate interdisciplinary seminar, and will also be required to teach an undergraduate survey course on Arab history. Job #HIS-1

MATHEMATICS. One or more openings to teach in all areas of undergraduate mathematics. Preference will be given to candidates with research and teaching experience in statistics. Job #MATH-1

PHILOSOPHY. Assistant Professor to teach two sections of philosophical thinking in the university's core curriculum, plus one other course each semester. Preference will be given to someone with in-depth knowledge of the history of philosophy, specialization in continental philosophy, and proven teaching ability. Job #PHI-1

PHYSICS. One or more openings to teach all levels of undergraduate physics including laboratory and electronic courses and to conduct research involving students. Particular consideration will be given to candidates with a proven ability to participate actively in teaching a general core course on scientific thinking. Candidates must have a Ph.D. in physics, electronic engineering, or a closely related area. Job #PHYS-1

POLITICAL SCIENCE: INTERNATIONAL POLITICAL ECONOMY AND THEORY. Possible position for an Associate or Full Professor experienced in teaching international political economy and related courses at the undergraduate and M.A. levels. A background in political theory is expected. Experience with the supervision of M.A. theses in international political economy and related topics in international areas would be an asset. Regional expertise in Middle East and/or Europe is preferred. Other areas of interest could be considered. Special topics courses can be offered from time to time in areas appropriate to departmental specializations. The person appointed will be expected from time to time to teach the introductory course in political science. We would be particularly amenable to a one or two year sabbatical or other leave arrangement for this position. Job #PS-1

POLITICAL SCIENCE: INTERNATIONAL RELATIONS. Two or more positions for persons with strong teaching experience at the undergraduate and graduate levels, including supervision of M.A. theses covering a broad range of IR topics. Successful candidates should complement each other in the following fields: international relations theory, strategic theory, international organization and institutions, international law, strategic studies, international migration, and international conflict management. A background in political theory and philosophy is highly desirable. Regional expertise in Middle East and/or Europe is preferred, including competence in foreign policy issues in these areas. Other areas of expertise could be considered. The Department offers special topics courses at both undergraduate and graduate levels on a variety of subjects. Candidates will be expected to have appropriate areas of competence to enable them to offer specialized courses from time to time. Persons appointed will be expected to teach the introductory course in international relations which is theoretically oriented, and from time to time to teach the introductory course in political science. Job #PS-2

SOCIOLOGY. Ability to teach sociology in a multicultural environment and in the framework of a liberal arts curriculum, along with participation in a multidisciplinary core curriculum seminar. Ability to teach courses on methodology/crime and deviant behavior, criminology and criminal justice, social psychology, and sociology of knowledge. Job #SOC-1

THEATRE: DESIGNER. Possible position. Responsibilities include set design, costume, and light design at beginning and advanced levels and introduction to theatre; supervising professionals and student shop crew, guiding student designers, and serving as designer (sets, costumes, and/or lights) for three mainstage productions each year. Applicant must have at least an M.F.A. in design, successful college-level teaching experience, and appropriate exposure as a theatre professional. Job #PVT-3

APPLICATION INSTRUCTIONS FOR ALL POSITIONS: Mail letter of application specifying Job Number with curriculum vita and names and addresses of three references before November 15, 1999, to:

Northern Arizona University

OFFICE OF THE PRESIDENT

PROVOST

(Chief Academic Officer/Student Affairs Officer)

Northern Arizona University seeks an energetic, imaginative leader for its academic programs and student affairs. The successful candidate must be able to advance the goals of a public university with a complex mission, consisting of undergraduate instruction, strong graduate and research programs in selected areas, and service to Flagstaff and other communities in Arizona.

Minimum qualifications for this position include an earned doctorate, at least five years experience in senior management at a complex institution, professional achievements sufficient to earn the respect of and work collaboratively with the deans, faculty, and student services staff and student leaders. Must have outstanding communication skills and experience working in an increasingly multicultural environment. Salary commensurate with the background and experience of the individual selected. NAU has an excellent benefit package.

One of three public universities in Arizona, Northern Arizona University is a doctoral 1 institution serving a multicultural student body of about 20,000. About two-thirds of NAU's students attend the historic Mountain Campus in Flagstaff; others are served at university centers or sites around the state or are enrolled in electronically delivered programs.

An acknowledged leader in residential undergraduate education and teacher preparation, NAU is also a leader in the use of technology for distance education and in partnerships with community colleges and K-12 schools. Areas of special strength in research and graduate studies include environmentally-oriented science programs, biochemistry, and the health professions. With a Native American student enrollment of about 7 percent of the total, NAU has a strong focus on tribal cultures and a strong commitment to educate the Native American leaders of tomorrow.

NAU's Mountain Campus is located in Flagstaff, a community of 55,000 located about 140 miles north of Phoenix and surrounded by the natural beauty and cultural riches of the Colorado Plateau.

The position will remain open until filled; however, the screening committee will begin reviewing applications on or about October 15. Send letters of application, resume, and names, addresses, phone numbers of five professional references to:

Chair
Provost Search Committee
NAU Office of the President
P.O. Box 4092
Flagstaff, AZ 86011-4092

Northern Arizona University is an equal opportunity/affirmative action institution. Minorities, women, persons with disabilities and veterans are encouraged to apply.

Southern Connecticut State University

LATIN AMERICAN POLITICS/HISPANIC POLITICS IN THE U.S.

The Political Science Department invites applications for a tenure-track position at the rank of assistant professor to teach Latin American Politics and Latin American Political Economy and/or Hispanic Politics in the U.S. A Ph.D. is required. Salary is competitive. Southern Connecticut State University is an EEO/AA employer and particularly encourages minorities and women to apply. Deadline for receiving applications is January 7, 2000. Incomplete applications should include a current vita, a transcript, and three letters of recommendation to:

Professor David F. Walsh
Department Chair
Southern Connecticut State University

UC BERKELEY

DIRECTOR ACADEMIC ACHIEVEMENT DIVISION

Provide programmatic and managerial leadership for two TRIO programs, Student Support Services and McNair Scholars Program, designed to increase academic success and preparation for graduate school for undergraduates who are low income, first-generation college students. AD has 10 FTE and an annual budget of $700,000.

Qualifications Include: Advanced degree required; Ph.D. preferred. U.S. Dept. of Ed grants program administration experience preferred. Proven record of success developing, managing, and evaluating creative programs designed to address student retention, success, and preparation for graduate school.

Salary $51,700-$72,400 midpoint. Workload: 10FTE (50%)

Application Deadline: Submit by October 1, 2000. Applications will be reviewed beginning October 1, 2000. Apply to: Send resume, letter stating qualifications, and supplemental application form available from Karen Burke-Johnston at kburke@berkeley.edu or from the Web at: http://dean.berkeley.edu/aoa/employment.html.
DISTANCE LEARNING FOR EARLY CHILDHOOD TEACHERS

The Center for Children & Families at Education Development Center is seeking personnel to join a team of researchers and curriculum and website developers to help us develop and study an innovative professional development intervention for preschool teachers. EDC is based in Newton, Massachusetts, and is an established international research and development firm.

We are seeking one person to work as a Research Associate who has knowledge of second language learning, cultural influences on children’s development, and research skills. Because these programs serve many families for whom Spanish is a first language, we are especially interested in candidates fluent in Spanish. We also are seeking two Research Assistants with knowledge of usage of technology for educational purposes. Strong knowledge and relevant experience in Web design including HTML, DHTML, CGI Java Script is required. Strong writing, editing and communication skills are important.

We are seeking to fill these positions by mid-November and will begin reviewing applications in early October. Interested candidates should send a cover letter, resume, and names of at least three references to:

Margo Sweet, Center for Children & Families, EDC, 55 Chapel St., Newton, MA 02458.
Fax: 617-969-3440; Email: MSweet@edc.org

Interested candidates may wish to visit our website at www.edc.org for more complete job descriptions. To review the most relevant projects see those that are directed by David Dickinson.

EDC is an affirmative action employer committed to diversity in the workplace.

EXECUTIVE DIRECTOR, ENROLLMENT SERVICES

Colorado State University invites nominations and applications for the position of Executive Director of Enrollment Services. The Executive Director provides overall leadership and direction to this critical department, whose mission is to support the recruitment and retention of students by assisting in the admissions process and delivering core services for the Registrars, Student Financial Services, and Student Accounts Receivable and Loans. For these functions, this position reports to the Vice President for Student Affairs. To ensure the full articulation and implementation of the University’s enrollment plan, this position will coordinate, support, and coordinate with the Office of Admissions, including consultation on the marketing and recruitment of undergraduate students. For these functions, this position reports to the Provost/Academic Vice President.

Qualifications: Master’s degree in student personnel or related area is required, Ph.D. preferred. At least eight years professional student affairs experience required with minimum of five years as a senior administrator, along with strong working knowledge of at least one of the core administrative units (registrars, financial aid services, student accounts/audit). Demonstrated personal and professional commitment to diversity and ability to articulate needs and concerns of diverse individuals. Effective leadership and communication skills, including ability to articulate public university philosophy and work with different constituent groups. Demonstrated successful experience in human resource development and new program development and planning; policy review and analysis; budgeting for large and complex organization. Desired experience in enrollment management and admissions recruitment and marketing. (A complete position description is available from the Search Committee Chair.)

Salary is commensurate with education and experience. Stating date is January 3, 2000. Nominations must be received by 5:00 p.m. MDT October 1, 1999. Applications (letter of interest, resume, and names, addresses, and telephone numbers of three references) must be received by 5:00 p.m. MDT October 22, 1999 by Dr. Grant Sherwood, Chair, Enrollment Services Executive Director Search Committee, Housing and Food Services, Palmer Center, Colorado State University, Fort Collins, Colorado 80523, (970)491-6511. Applications will be accepted until the position is filled; however, for full consideration, completed applications must be on file by 5:00 p.m. MDT October 22, 1999.

Colorado State University is an EEO/affirmative action employer.

MICHIGAN STATE UNIVERSITY
DIRECTOR OF INTERNAL AUDIT

Michigan State University is the nation's premier land-grant university established in 1855. It is among the largest universities in the U.S. with 42,000 students. 450 departments in 12,805 faculty/staff. The University's current funds, revenues and expenditures are approximately $1.1 billion annually.

MSU is seeking a Director of Internal Audit, who will report directly to the President. This senior-level executive is responsible for leading a staff of seven professionals in conducting financial, compliance, operational and information system audits. Responsibilities also include, directing special audits and consulting projects; providing management with independent analysis and evaluations of the adequacy and effectiveness of internal controls; the reliability and integrity of financial information, compliance with policies and procedures and the efficient use of resources.

A Bachelor’s degree in Accounting or Finance is required. CPA certification and an advanced degree in Business Administration or Public Accounting are required. CIA or CISA certification is highly desirable. Candidates should have at least six years experience in progressively more responsible roles in internal auditing, preferably in higher education, health care and/or federally sponsored research. The candidate should possess administrative or managerial experience. Knowledge of audit concepts related to information systems: strong analytical and reporting capabilities, excellent communication and interpersonal skills; and the ability to effectuate change.

Salary is commensurate with qualifications and experience. Fringe benefits are excellent and can be reviewed at www.hr.msu.edu. For a general overview of Michigan State University, please visit the university web site at www.msu.edu. Please send letter of reference and resume outlining qualifications by October 11, 1999 to:

Mary Jane Northrup, Committee Coordinator
Human Resource Services
120 Nisbet Building
Email northrup@hr.msu.edu
Michigan State University
East Lansing, Michigan 48824

VANDERBILT UNIVERSITY
PEABODY COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT
DEPARTMENT OF TEACHING AND LEARNING
DIRECTOR OF STUDENT TEACHING IN EARLY CHILDHOOD/ELEMENTARY EDUCATION

The Department of Teaching and Learning at Peabody College of Vanderbilt University is currently seeking candidates for the position of Director of Student Teaching in Early Childhood/Elementary Education. The Department offers programs leading to teacher licenses in Early Childhood Education, Elementary Education, or a related field with experience in applying pedagogical knowledge in K-12 settings. Duties will include: 1) placing elementary and early childhood majors in their student teaching experiences and coordinating their supervision; 2) organizing and conducting seminars that accompany student teaching; 3) preparing and monitoring graduate students who supervise student teachers; 4) preparing and overseeing graduate curricula in directing practicum experiences one semester each year; and 5) advising master's level and undergraduate students and serving on committees.

The Department of Teaching and Learning has 23 full-time faculty, 15 of whom are tenured or are on tenure track. 2 of whom are in practice faculty roles, and 6 of whom are on annual or multi-year appointments. The Department is known for its faculty’s work in many areas including mathematics and literacy education, teacher education, and educational technology. The Department offers programs leading to teacher licenses (for both undergraduate and graduate students) in early childhood, elementary, and secondary education.

Candidates must demonstrate excellence in scholarship and teaching. Salary and fringe benefits are competitive. Review of applications begins December 1, 1999. Position begins August 1, 2000. Applicants should send a letter of interest and curriculum vitae and request three letters of reference be sent to: Professor Ann M. Neely, Search Committee Chair, Department of Teaching and Learning, Box 330, Peabody College, Vanderbilt University, Nashville, TN 37203. E-mail: ann.m.neely@vanderbilt.edu

FERRIS STATE UNIVERSITY

CRIMINAL JUSTICE FACULTY POSITIONS

Ferris State University, Big Rapids, MI is accepting applications for three Criminal Justice faculty positions. Two vacancies are for Law Enforcement Specialists (JOB CODE HO-005860 & JOB CODE HO-005866) with responsibilities to teach Criminal Justice core courses, along with Michigan Commission on Law Enforcement Standards (MCLES) certified courses. Other duties include student academic advising, new course development, appropriate committee work, research, and maintenance of expertise within the field. REQUIRED QUALIFICATIONS: At least three years of practical experience as a local, state, or federal law enforcement practitioner and be certified to teach by MCLES. Must possess college-level criminal justice teaching experience and/or training experience and demonstrated ability to work with culturally diverse populations. MINIMUM ACADEMIC REQUIREMENTS: Master's degree in Criminal Justice, Criminology, Sociology, or a related discipline from an accredited college/university. PREFERRED QUALIFICATIONS: Substantial criminal investigation experience, a Doctorate degree (or ABD with an estimated date for completion) in Criminal Justice, Criminology, Sociology, or a related discipline. The third vacancy is for a Corrections Specialist (JOB CODE HO-005910) with responsibilities for teaching criminal justice core courses along with other associated courses within the undergraduate and graduate criminal justice programs. Other duties include scholarly research, academic advising of students, new course development, appropriate committee work, and maintenance of expertise within the field. The appointee will specialize in corrections and will be assigned to the Justice Learning Community in the full semester.

REQUIRED QUALIFICATIONS: Doctorate degree or ABD in Criminal Justice, Criminology, Sociology, or a related discipline will be considered. At least two years of work experience in a position directly involved with the custody, care, and control of incarcerated felons or misdemeanants, probationary felons or misdemeanants, paroled felons, and/or incarcerated juvenile offenders. PREFERRED QUALIFICATIONS: Doctorate degree in one of above areas and extensive correction agency experience. Salary and academic rank of these positions are dependent upon qualifications. Salary is competitive with other Michigan state-supported colleges and universities. Woman and minorities are strongly encouraged to apply. Screening of applications will begin in November 1999 and continue until positions are filled. Send a letter of application, resume, transcripts (finalists will be required to submit official transcripts), and names, addresses, and phone numbers of three references to: JOB CODE HO___ Human Resources Development, Ferris State University, 420 Oak Street, PK150, Big Rapids, MI 49307. NEW HAMPSHIRE INSTITUTE FOR HEALTH POLICY & PRACTICE

The State of New Hampshire Department of Health and Human Services has joined with the Dartmouth Medical School and the University of New Hampshire (UNH) to create the New Hampshire Institute for Health Policy and Practice. When fully operational, the Institute will conduct applied research and policy analysis, sponsor educational and training programs, provide technical assistance, and disseminate critical information intended to improve the health or health care of New Hampshire citizens. The Director will oversee a ten-person UNH faculty position in the School of Health and Human Services with rank appropriate to background and experience. The Director will serve as the principal investigator for health policy research and program development. The Director will provide intellectual and administrative leadership, manage projects and staff, develop new initiatives, gain grants and awards, and advance growth and development of this new entity. The successful candidate will be a nationally recognized health services researcher having (a) experience with state and national health policy analysis and implementation; (b) expertise working with professionals and practitioners at all levels of government; (c) a record of external funding; (d) experience in administering large research projects and teams; and (e) expertise and experience in a wide range of research design and (f) presentation and communication skills. The last day to receive materials is October 15, 1999. UNH is committed to excellence through diversity in its faculty and strongly encourages women and minorities to apply.
The Board of Regents welcomes nominations and applications for the position of President of the University of South Florida (USF). Founded in 1956, USF currently serves approximately 35,000 students with nearly 200 programs at the undergraduate, masters, specialist, and doctoral levels, including the M.D. A member of the State University System of Florida, USF is now the largest metropolitan university in the southeastern United States. The University includes eight colleges and a network of regional campuses in St. Petersburg, Sarasota, and Lakeland. New College is a nationally ranked, residential, liberal arts college located on USF’s Sarasota campus. Also on that campus is the University Program that attracts a high percentage of non-traditional students. The search is underway for a new dynamic leader to start in summer 2000.

Located in Tampa, one of the fastest growing metropolitan areas of the nation, the University is one of the top 56 public research universities in the country. USF was recently classified along with the University of Florida and Florida State University as a Research 1 University by the Florida Board of Regents, which will enhance its graduate and professional schools, and its research status. The University is one of ten institutions in the State University System of Florida governed by the 14-member Board of Regents.

Leading candidates will have experience as a distinguished academic leader, most likely as a college/university president or provost. Skills in relationship building and community relations and experience with issues of diversity are important. Participation in a large capital campaign is preferred. Candidates should have the ability to communicate, work cooperatively, and create enthusiasm for USF among corporate, government, and philanthropic communities. The successful candidate shall have senior academic and administrative leadership experience in positions of increasing responsibility in complex organizations. The President should have the capacity to work at the intersection of academic inquiry and best business practices, of shared governance and effective decision-making, and of strategic thinking and tactical, pragmatic implementation. Knowledge of and willingness to foster economic partnerships is important. An earned doctorate or equivalent terminal degree plus a record of scholarly and professional accomplishments are required.

Candidate screening will commence in late September and will continue until a final candidate pool is selected. Send letter of nomination or c/v/resume and cover letter (plus a brief statement expressing educational philosophy and approach to university leadership) to:

Morris & Berger

DEAN OF THE MICHAEL E. PRICE COLLEGE OF BUSINESS AND THE FRED E. BROWN CHAIR IN BUSINESS

COLLEGE OF BUSINESS ADMINISTRATION

THE UNIVERSITY OF OKLAHOMA, NORMAN CAMPUS

The University of Oklahoma invites applications and nominations for the position of Dean of the Michael E. Price College of Business and the Fred E. Brown Chair in Business.

responsibilities: The Dean provides academic, intellectual, and administrative leadership to the College and reports directly to the Academic Senate Vice President and Provost, Norman Campus. The Dean is responsible for improving and promoting the quality and effectiveness of the College's instructional, research, and outreach programs. The basic budget for the College is more than $12 million with a permanent endowment of $60 million.

Qualifications:
- Candidates with an academic background must possess an earned doctorate and quality for appointment as a tenured professor in the College.
- Candidates with a business background must have an outstanding record of leadership and achievement and a demonstrated commitment to and an understanding of higher education.
- In addition, candidates must have demonstrated ability to lead and successfully manage professionals in academic, corporate, or governmental organizations; must have demonstrated success in securing external support and/or leading fund-raising activities; and must possess personal qualities that will facilitate working relationships within the University, its alumni, and among business leaders.
- Candidates must have a commitment to Affirmative Action employment guidelines, practices, and outcomes.

General Information:
- The University of Oklahoma, Oklahoma's flagship public comprehensive university, has its main campus in Norman and Health Sciences Center campuses in Oklahoma City and Tulsa. Norman is a progressive city of 95,000 located in the Oklahoma City metropolitan area and offers diverse cultural activities within a high-quality of life environment. The Norman campus, with thirteen colleges, enrolls more than 20,000 students, which includes approximately 4,000 graduate students. The University is the largest in the state and it is proud of its growth in minority populations, graduate students, and research and total external funding. It is going through a period of unprecedented growth and achievement. One example of this includes the growth in endowments, which have doubled in the last five years, going from $304,000 to $429 million. Another example is the recruiting of an outstanding student body - now first in the number of merit scholars per capita of any public university. During this time, OU sponsored programs expenditures have increased more rapidly than for any other school in the Big 12. Since FY95, external funding across the Norman and Health Sciences campuses have exceeded the $100 million mark and in FY99 reached almost $190 million. The University offers Masters degrees in 67 areas and Doctoral degrees in 66 areas. OU web page address: http://www.ou.edu

- The College of Business Administration offers five baccalaureate degrees, two Master degrees and the Doctor of Philosophy degree in Business Administration. The College consists of approximately 60 full-time faculty who serve approximately 3000 undergraduate and 300 graduate students. It has five academic units, which include the School of Accounting and Division of Management Information Systems, Finance, Management, and Marketing. Also included is the Center for Economic and Management Research. The College's faculty are actively engaged in research and enjoy national recognition in a variety of research specialties. OU College of Business web page address: http://www.ou.edu/business

- Salary: The individual selected as Dean will also be the holder of the Fred E. Brown Chair in Business. The Fred E. Brown Chair has a substantial endowment that will allow a total compensation package that is very competitive with major A&M/PhD Business programs as well as allowing support of college-wide activities of interest to the Dean

- Beginning Date: Preferably Spring or Fall 2000

Applications and Nominations: The Search Committee will begin screening applications November 15, 1999, and continue until an appointment is made. Complete applications must include a letter of application, a curriculum vitae/resume, and a list of five references (including addresses and telephone numbers). Please send nominations and/or applications to:

The University of Oklahoma is an Equal Opportunity Affirmative Action Employer. Women and minorities are encouraged to apply. OU has a policy of being responsive to the needs of dual-career couples.
UNIVERSITY OF TEXAS AT ARLINGTON

ASSISTANT PROFESSOR OF SOCIOLOGY OR ANTHROPOLOGY

The Department of Sociology and Anthropology and the Center for Mexican American Studies at the University of Texas at Arlington invite applications for a tenure-track position as assistant professor of sociology or anthropology to begin September 2000. Applicant should have a Ph.D. or an equivalent of completion by August 2000. Applicants must possess scholarly strengths in some aspect of Latino/Hispanic society and culture in the United States. Ability to teach in a women's studies program is desirable. The preferred specialty for anthropology is linguistic anthropology (e.g., sociolinguistics and/or bilingualism); candidates with research and teaching experience in other areas of sociocultural anthropology will also be considered. Sociology specialists are open. Responsibilities include research and teaching in undergraduate and graduate programs of the Department of Sociology and Anthropology and the Center for Mexican American Studies.

UTA is a comprehensive, diverse, metropolitan university situated in the Dallas-Fort Worth metropolis, enrolling approximately 20,000 students. The University and the larger metropolitan community provide significant resources for scholars committed to Mexican American Studies. Anthropology and Sociology at UTA each offer a separate B.A. and M.A. degree.

Applicants must include: 1) Cover letter describing the applicant's research and providing evidence of teaching experience; 2) current curriculum vitae; 3) samples of written work; and 4) three letters of reference. Review of applications will begin 12-8-99 and continue until position is filled. Send applications to:

Position: VICE PRESIDENT FOR STUDENT AFFAIRS

Description:

Rowan University invites applications and nominations for the newly created position of Vice President for Student Affairs (VP-SA). The VP-SA provides the leadership and administrative oversight for the university's comprehensive academic and student support services division. The VP-SA is one of four vice presidents reporting directly to the university president and serves on the president's cabinet. Rowan is seeking a highly qualified, experienced administrator who will provide the leadership for the recently reorganized administrative division that includes:

- Admissions
- Basic Skills/Tutoring
- Career and Advising Services
- Counseling
- Dean of Students
- Educational Opportunity Fund/Minority Achievement Program
- Financial Aid
- Intercollegiate Athletics
- International Students
- Multicultural Education
- Registrar
- Residence Life
- Specialized Services
- Student Center
- Student Health Services
- Student Recreation Center
- Student Judicial System
- Student Programming

This position is available as early as February but no later than July 1, 2000. Salary is competitive and consistent with a senior level university position with an excellent benefits package.

Qualifications:

- A Master's degree (doctorate preferred)
- A proven record of leadership and accomplishments in student affairs as a senior level administrator
- Demonstrated capacity for working collaboratively with deans and other vice presidents
- Strong interpersonal, organizational, and communication skills
- A record of working well with a diverse student body
- Demonstrated achievement in creating innovative and distinctive student affairs programs, with a particular focus on student learning
- A demonstrated commitment to integrate student life outcomes with academic outcomes
- Experience with enrollment management

Rowan University:

Rowan University (formerly known as Glassboro State College) is a selective, medium-sized, state university located in southern New Jersey close to Atlantic City and Philadelphia. In 1922, Rowan University received a $100 million gift from Henry and Betsy Rowan, one of the largest gifts ever bestowed on a public university. The gift has led to a catalyst for Rowan's transformation into a university of regional prominence. Founded 1922 as a normal school for teachers, the university enrolls over 9,500 students in degree programs ranging from bachelor's through doctorate. The university is divided into six colleges: Business, Communication, Education, Engineering, Fine and Performing Arts, and Liberal Arts and Sciences, and a Graduate School. The 209-acre campus contains 31 buildings, including six residence halls and three apartment complexes. The university is also the site of the historic Summit Conference Between President Johnson and Soviet Premier Khrushchev in 1967. Additional information about Rowan University can be found at http://www.rowan.edu.

Application Process:

Applications and nominations for the position are invited. Applications should include a narrative letter indicating how the individual's experience and background relates specifically to the listed position qualifications, a complete curriculum vitae, and the name and current title, address, and telephone number of five (5) professional references. Applications will be reviewed beginning October 15, 1999, and continue until the position is filled. Applications and nominations should be sent to:

Governers State University is an equal opportunity/ affirmative action employer
VICE PRESIDENT FOR STUDENT AFFAIRS

The College seeks a dynamic, creative and proactive educator to lead a comprehensive range of programs and services to promote student success. This individual will have the vision and ability to engage the College community in initiatives that link student affairs with a variety of educational opportunities to expand the intellectual and personal development of students.

The successful candidate for this vice presidency will strengthen and broaden approaches that reflect institutional priorities on recruitment, retention, student access and community engagement. She or he will be the primary person to articulate the emerging needs of a diverse student body, provide leadership for institutional strategies to address these needs and engage student affairs staff in professional development opportunities to move planned change forward.

Student Affairs consists of the following clusters: Access (recruitment and entry services, student data management, financial assistance and international student services); Retention Services (counseling, mentoring, EOP, student activities, volunteer services and senior adult programs). This vice president reports to the president and is a member of the executive council.

QUALIFICATIONS:

Master's degree required; doctorate preferred, with a minimum of five years of progressively responsible Student Affairs management experience (community college preferred) and a combination of the following experiences and skills:

- Development, supervision and evaluation of programs to support student success within a multiethnic, multicultural environment, as well as student affairs professional development initiatives within the same context.
- Enrollment management (including recruitment and retention models and community involvement strategies).
- Information technology and its application to student services.
- Student programs and institutional assessment.
- Ability to manage planned and unexpected change.

Salary: $85,000

Search will remain open until the position is filled. The application must consist of a cover letter detailing qualifications, a statement of educational and student affairs philosophy, current resume, as well as three names, addresses and telephone numbers of five references. The College cannot consider incomplete applications. No telephone calls please. Forward application materials to:

Assistant or Associate Professor of Account Position #20955

The desired areas of specialization are in Managerial/Cost and AIS. Candidates must complete all requirements for a Ph.D. or Doctor degree in Accounting from a regionally accredited institution.

Assistant or Associate Professor of Business Position #20042

Candidates must have completed all requirements for a Juris Doctor degree from a regionally accredited institution.

The positions will be filled on a salary of the University of Northern Colorado.

EXECUTIVE DIRECTOR
BROOKDALE CENTER OF AGI
HUNTER COLLEGE

Executive Director Brookdale Center on Aging at Hunter College, a nationally recognized interdisciplinary academic program involving a budget of $15 million and a staff of 40. The Center provides community-based service activities, training and continuing education opportunities for 10,000 people each year in courses, workshops, and conferences. The Center also operates the Institute on Law and Rights of Older Adults and the Re-Institute for Prevention of Financial Exploitation of Elders.

The Brookdale Center works closely with Hunter's School of Work, the Schools of Health Professions and the School of Education to promote and develop gerontology education at Hunter College. Reporting to the Provost, the Executive Director provides intellectual and organizational leadership to the professional and support staff of the Center and guide the management and implementation of educational programs. The successful candidate will be an administrator, able to work with faculty and staff in the aging network of New York State in research and educational activities, as well as in the broader community. A background in gerontology or geriatric medicine is essential. An earned doctorate or equivalent terminal degree is required. The Director will report to the Provost as an HEO (Higher Education Officer) or as a professor. Candidates must have an appointment as professor if they have an academic record sufficient to be tenured. The salary is $85,000.

Send resume, cover letter and the names of three referees to:

Dr. Charles Hays, Director of Human Resources
Hunter College, CUNY, 695 Park Avenue - E151
New York, NY 10021

Hunter College is an Affirmative Action/Equal Opportunity/Affirmative Action/Affirmative Action/Equal Opportunity Employer.
WESTERN MICHIGAN UNIVERSITY

PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Western Michigan University, located in Kalamazoo, Michigan, invites applications and nominations for the position of provost and vice president for academic affairs, the University's chief academic officer. Reporting to the president, the provost shares the president's vision for the University and provides leadership in the development, delivery, and evaluation of academic programs through the University, including eight colleges and a variety of academic units. Western Michigan University ranks among the top 100 public universities in the nation. Western Michigan University is a vibrant, student-supported, student-centered research university of more than 27,000 students.

Applicants should demonstrate appropriate leadership and administrative experience preferably at the dean's level or above. Credentials should qualify candidates for tenure at the rank of full professor in one of the University's academic units. Applicants should demonstrate an earned doctorate or equivalent terminal degree, a record in scholarship and teaching, and a history of success in setting and implementing academic policy.

Applications should include a letter of interest addressing special qualifications, a resume, and the names, titles, addresses, and telephone numbers of five references. The screening process will begin November 1, 1999, and will continue until the position is filled. The projected date for accepting a letter of offer is March 1, 2000. The materials should be forwarded via email or mail to:

Jan Greenwood, Search, Provost's Office, WMU, 1903 W.操纵 Street, Box 568, Kalamazoo, MI 49007

WMU IS AN AFFIRMATIVE ACTION/EQUAL OPPORTUNITY EMPLOYER

PURDUE FELLOWS PROGRAM

Purdue University invites applicants for the Purdue Fellows Program for the academic year 2000-2001. The Program provides stipends, research, and service opportunities for a one-year period to visiting assistant professors or post-doctoral appointees at Purdue University. The primary objective of the program is to develop minority scholars for possible retention and promotion as tenure-track faculty members at Purdue University, West Lafayette campus.

Eligibility: Purdue Fellows are members of the following ethnic/racial groups: African Americans, Hispanics/Latinos, or Native Americans, and U.S. citizens or permanent residents. Recent recipients of doctoral or terminal professional degrees and/or individuals nearing completion of all requirements for such degrees are encouraged to apply. Special consideration will be given to candidates committed to careers in university research and teaching, and whose life experiences, research or employment background contribute significantly to academic diversity and excellence.

Application: Candidates should submit two full copies of each of the following materials (preferably no later than January 1, 2000):

• a current curriculum vita
• a graduate school transcript
• names and addresses of three references
• a description of teaching and research interests

Applications and inquiries should be addressed to:

Purdue Fellows Program
Purdue University
Director, Affirmative Action Office
1065 American Railway Building
West Lafayette, IN 47907-1066

As one of the nation's leading public institutions of higher education, Purdue University, West Lafayette, Indiana, enrolls nearly 30,000 students. As a land-grant university, its academic, leadership, and service programs extend beyond the campus through scholarship, instruction, and service. Purdue University is an equal access/equal opportunity affirmative action employer.
ASSISTANT VICE CHANCELLOR
FOR GRADUATE SCHOOL & RESEARCH

Applications and nominations are invited for the position of Assistant Vice Chancellor for Graduate School and Research at the University of Wisconsin Oshkosh.

RESPONSIBILITIES: The Assistant Vice Chancellor for Graduate School and Research will report directly to the Provost and would be responsible primarily for providing leadership to graduate education to include graduate admissions, recruitment, program review, Graduate Council and program coordinators, research initiatives and supervising personnel functions within the school of graduate studies. Other duties would include providing leadership and supervision to the Continuing Education Division, the Weekend and Evening Degree Program, the Office of Institutional Research and university-wide grant efforts.

QUALIFICATIONS: include a doctorate or an appropriate terminal degree, an outstanding ability in teaching, scholarly activity, and service, experience with and a vision of and appreciation for the value of graduate education and research, administrative experience in higher education at least at the department chair level or equivalent, outstanding leadership and management skills, strong oral and written communication skills, an ability to function effectively in a shared governance environment, a capacity for high volume and diverse workload, and demonstrated grant writing ability.

STARTING DATE: Negotiable; July 1, 2000 preferred.

Application Procedures: Interested candidates should submit a letter of interest addressing the qualifications above, a current résumé and three (3) letters of recommendation to:
Dr. Colleen McDermott, Chair, Search and Screen Committee for Assistant Vice Chancellor for Graduate School and Research, University of Wisconsin Oshkosh, 800 Algoma Blvd., Oshkosh WI 54901. Phone: (920) 424-2290, Fax: (920) 424-0247, E-mail: mcdermott@uwosh.edu

APPLICATION DEADLINE: The deadline for nominations and applications is November 1, 1999.

MENTORS AS CULTURE BROKERS

José Martí, the great Cuban patriot and poet, once said, “Education is preparation for life” (“Educación es preparación para la vida”). Sometimes we forget that education is not just about scholastic endeavors but that it prepares us to be active in the world around us.

It is disheartening to review the nearly 30 percent dropout rate for the nation’s millions of Hispanic students. But remember that not all Hispanic students have trouble in school. And those who succeed have had to master the art of living in three cultures simultaneously: home (Hispanic), outside world (North American, and school/youth). Even without an accent, many repeated experiences as a “minority” begin a process of internalization and identification as being “different” and possibly “less able.”

American educational systems are themselves cultures with particular rules, definitions, values, and beliefs. Students are then enculturated into this unique system, whether or not they share the same cultural background. Often Hispanic students and their parents might not understand these systems simply because they come from a different culture. So, if education is preparation for life, then how we learn affects how we will approach life.

Children especially learn what they SEE. That’s where the idea of mentoring comes in.

The New Revised槌esquez-Spanish-English Dictionary (1985) defines mentor as “mentor, counselor or guide.” But I would argue that mentors are better characterized as “culture brokers” because they are able to bridge cultural gaps.

One of the issues associated with mentoring, it occurs to me, is that it is not what we do but rather HOW we do it. Mentoring might be just as much an attitude as it is a clearly defined activity. For example, is it mentoring if we coach Little League? Is asking a child about his or her family’s special cultural traditions also mentoring? How about taking time out to spend the afternoon with a child in the park? I think that these activities teach children how to behave in society, they model appropriate behavior, and the time spent with the child shows him or her that he or she is important, regardless of cultural background.

Maybe it is time to rethink the idea of “mentoring” so as to include something above and beyond what we might already do. Mentoring can and should be something that we can integrate and build upon. Maybe mentoring could actually be the “can do” attitude we try to infuse in kids?

Not all Hispanic families are the same. They differ by social class and the number of years here in the United States. Families with children who are first-generation Hispanic Americans will need different types of encouragement, help, and mentoring than those who have generations in the U.S. Our experience in Florida with Mexican-origin shows that parents who are recent immigrants who cling to their traditions and have more difficulty relating to their children’s desire to assimilate into our culture. Many times, these parents have lower levels of education themselves and have never experienced the cultural norms of American schools, which makes it difficult for them to relate to their children’s daily challenges. Often these children will stop Spanish and respond to their parents in English, which causes a series of other complications that can be partly addressed through a mentoring relationship.

Dr. Anne Carvajal-Gonzalez, director of USF’s High School Equivalency Pro dropout program, states that her students lack the “know-how,” the “what to do,” the “how to” of not just their language but also their culture.

Teachers, of course, are natural mentors. Many have mastered the fine art of mentoring by engaging in conversation and demonstrating the “day-to-day things” that we think everything from job skills to parenting to professional interactions.

Teachers, of course, are natural mentors. Many have mastered the fine art for it. It is not the same as teaching, however, and teachers cannot be expected to be all things to all people. Mentoring requires a specific attitude that engages them in their important role. Parents are already often mentors and can be mentoring through the school system. Hispanic and other school staff (and parents) should be educated about all levels of school personnel about different cultures that are in a cookbook perspective in which an entire culture is summarized by.

There is a need to work with the entire family, and showing an interest in family is important. Praise for being bilingual can give students and parents a sense that they might lack. Community members who volunteer might need special training to work with and understand the family dynamics. The mentor is able to bridge gaps between parents and children, school systems, and people, and, hopefully, different cultures.

Remember, whatever you do DOES matter. I invite you to assist in helping Hispanic students become “more prepared for life” through mentoring. One word of well-placed encouragement can make all the difference.
About Walden University: Founded in 1970 and accredited by the North Central Association of Colleges and Schools, Walden University is the pioneer in the field of innovative, alternative pathways to graduate degrees. Walden enjoys the reputation of being the leading graduate, distributed learning institution in the country. Doctoral programs use course-based and competency-based curricula; master’s programs are course-based. Instruction, assessment, mentoring, and the delivery of student services rely extensively on the Internet.

Associate Vice President for Enrollment Management: This position requires an individual with strong academic values; a keen sense of entrepreneurship and competitiveness; the ability to work in a fast-paced, team-based environment; and a demonstrated commitment to an academic environment that has an uncompromising commitment to quality, integrity, and student-centeredness. A master’s degree is required; a doctoral degree is preferred. The AVPEM is responsible for leading the successful development and refinement of the University’s enrollment management model and for the effective management of the cross-functional tasks necessary for the attainment of the University’s five-year enrollment projection objectives. The AVPEM reports to the Vice President for Academic Affairs and the position is based in Minneapolis. Some travel is required.

The compensation for this position is highly competitive with the possibility of substantial merit-based monetary incentives. A generous fringe and benefits package accompanies the position. The effective date of appointment is January 15, 2000 or earlier.

Chair of the Management Division: This position requires an individual with a strategic vision of management education in the 21st century; an interest in and commitment to on-line teaching and course delivery; evidence of outstanding interpersonal and communication skills with adult learners, faculty, and staff; a demonstrated record of innovative administrative leadership; teaching, research, and service experience in higher education at a senior rank; and an earned doctorate in business, management, or a related discipline. The Division’s doctoral programs currently include specializations in Leadership and Organizational Change, Finance, and Operations Research. The Division will launch a new on-line MBA program during the coming year with plans to develop additional new programs in the coming years. The Chair is the academic leader and administrator of the Division, serves as the director of the Division’s doctoral program and reports to the Vice President for Academic Affairs.

This is a full-time, 12-month position based in Minneapolis. The compensation package is highly competitive. The targeted appointment date is September 1, 2000.

Program Director for the Ph.D. in Health Services: This position requires an individual with an understanding and vision for health services education in the changing environment of the new millennium; an interest in and commitment to distance education; evidence of outstanding interpersonal and communication skills with adult learners, faculty, and staff; a demonstrated record of innovative leadership; teaching, research, and service experience in higher education or in a practice setting at a senior rank; and an earned doctorate in public health, health science, health administration, or a related discipline. The Ph.D. Program in Health Services enrolls approximately 150 students, has a faculty of 15, and offers specializations in Community Health, Health Administration, and Health and Human Behavior.

The Director of the Ph.D. Program reports to the Chair of the Division of Health and Human Services. The Director’s position is a full-time, 12-month position based in Minneapolis. The compensation package is highly competitive. The targeted appointment date is September 1, 2000.

Program Director for the Master of Science in Education: This position requires an individual with a strategic vision of the future of in-service teacher development; an interest in and commitment to on-line teaching and course delivery; administrative experience; graduate teaching experience in the field of professional education; and an earned doctorate in education. The Director provides leadership for the development and implementation of the program within the University’s Education Division, and reports to the Chair of the Education Division. The Director is responsible for working with K-12 schools to develop student cohorts.

This is a full-time, 12-month position that requires extensive travel related to the recruitment, development, and maintenance of cohort groups of students. The compensation package is highly competitive. The ideal appointment date is January 15, 2000, but consideration will be given to strong candidates who are not available mid-year.

To Apply: Individuals interested in these positions should read the detailed position descriptions and procedures for application at www.waldenu.edu/searches/. The University especially welcomes applications from women and minorities.

Hispanic Heritage

BY GUSTAVO A. MELLANDER

Decade of...

In the 1980s, there was a lot of hullabaloo and excitement that it would be the Hispanic Decade. That was premature for sure. The numbers might have been there, but the infrastructure wasn’t.

As we celebrate this month, we can be a lot more sanguine about the future. Last November’s elections nationwide saw the nation’s 32 million Hispanics mobilize and flex their political muscle. They succeeded from New England to the West Coast—and dramatically so.

In California, they elected Cruz Bustamante lieutenant governor. It was the first time since 1877 that a Latino/Hispanic had been elected to a statewide position. And he won by an impressive 53 percent to 39 percent. The future would seem to be even more Latino-sensitive since they comprise 25 percent of the state’s population.

Ron Gonzalez was elected mayor of San Jose, Silicon Valley’s budding capital. But he was not alone. Six more Hispanic seats were added to the legislature. Veterans such as Ron Pacheco, the first Hispanic Republican elected to the legislature this century, was re-elected and has now been named assembly minority leader. The Democrats have not been left behind. Antonio Villaraigosa from Los Angeles was elected assembly speaker.

Lee Baca was elected Los Angeles county sheriff. With an annual salary of $225,000 per, he is the nation’s highest-paid elected official. (President Clinton receives $200,000.) It should be noted that Baca’s victory might not be a harbinger since his election came about after the highly favored incumbent died a few days before the election. Nevertheless, Sheriff Baca, a Hispanic, holds a highly visible and influential position in a highly populated section of California.

Hispanic gains were not limited to California. They were also evident in Colorado, Massachusetts, New Mexico, Texas, and Wisconsin. Colorado elected the first Hispanic attorney general. Wisconsin elected its first Hispanic in the state legislature, and Massachusetts elected three to its House of Representatives. They are the first to serve in more than a decade.

Thirty-seven percent of New Mexico’s population is Hispanic, the highest percentage of any state, and they elected four of their own to statewide office.

In Texas, aside from helping George W. Bush win an impressive, overwhelming re-election victory, Hispanics elected Tony Garza railroad commissioner. That powerful position oversees the state’s oil and gas industry, and he became the first Hispanic to win statewide elective office in Texas.

In Congress, the number of Hispanic voting members remained steady at 18. (Puerto Rico’s resident commissioner does not have a vote.) Five of the 18 are female, an all-time high.

Other beneficiaries

Hispanic politicians weren’t the only ones to benefit from a focused and invigorated Hispanic electorate. In bellwether New York, Representative Charles Schumer could not have beaten incumbent Alphonse D’Amato in the Senate race without the Hispanic support he received.

Their influence was also seen in the election of Republican Jeb Bush, who defeated incumbent Democrat Bob Graham. And, as mention before, George was re-elected to the US Senate. Both speak and campaign in Spanish and stressed the importance of immigration.

Perhaps as important is the future of this trend, if it turns out to be the new norm. The Hispanic population is expected to grow at a rate of 4% per year compared to the 1% national average. And the Hispanic population in California is expected to grow at an even faster rate of 5% per year.

Presidential politics

It is hard to discuss politics without thinking about the presidential election. Will there be another Hispanic-American candidate? Will Hispanics vote in record numbers? Only time will tell.

If Hispanics increase their turnout, it could have a significant impact on the election. They are the largest minority group in the US and their numbers continue to grow. It will be interesting to see how this affects the election.

Dr. Mellander is a professor of government at George Mason University.
Hispanic Heritage Awards Salutes Excellence

Outstanding Hispanics Are Honored

HISPANIC HERITAGE AWARDS

“Our 1999 honorees are well-known and widely admired as Americans, and as Hispanic Americans, they have given our nation the benefits of their rich heritage.”

RAUL TAIPA
FOUNDATION CHAIR

Hispanic Heritage Award Foundation (HHAF) paid tribute to five American heroes with its 1999 Hispanic Heritage Awards. According to the HHAF, these individuals were chosen because they have reached the pinnacle of their careers, achieving brilliant personal success while contributing to our society.

The winners were honored in September at the John F. Kennedy Center for the Performing Arts. That ceremony, broadcast in early October, was hosted by Daisy Fuentes and featured performances and speeches by Hispanic entertainers. Each honoree was awarded a custom-designed Hispanic Heritage medallion sculpted in sterling and brass, designed by DagenBela Graphics.

In his comments about the honorees, Raul Tapia, chair of the foundation, stated, “Today we stop and reflect on the extraordinary impact Hispanic Americans have made in every area of American life. Our 1999 honorees are well-known and widely admired as Americans, and as Hispanic Americans, they have given our nation the benefits of their rich heritage.”

PLACIDO DOMINGO (for Arts)
“If I don’t have passion for music in my life, I cannot conceive of my existence.”

Placido Domingo is considered by many to be the world’s most important opera figure. Born in Madrid, Domingo moved at the age of 8 to Mexico City, where at age 16 he launched his career with the Mexican National Opera. Since then, he has performed in the greatest opera houses of the world.

His prolific recording career of more than 90 albums has garnered him numerous awards, including eight Grammys.

In September 1998, Domingo celebrated his 30th anniversary with the Metropolitan Opera (N.Y.C.) with his 2,800th career performance. He is also spending time behind the scenes of the opera world by serving as artistic director of the Washington Opera and artistic director designate of the Los Angeles Music Center Opera.

As a humanitarian, Domingo has raised millions for charity through special benefit concerts. In 1985, he joined relief efforts for the victims of the devastating Mexico City earthquake, in which he lost four relatives.

Always interested in helping young people, he has established Operalia, a singing competition for aspiring young opera singers from all over the world.

Among the 1999 National Hispanic Heritage Youth Honorees are: (l) Magaly and Adolfo Lara and (r) Michele Mayorga.
ANTONIA HERNÁNDEZ
(for Leadership)

“...The civil rights organization is a business...I don't make widgets. I go about making change.”

As president and general counsel of the Mexican American Legal Defense and Education Fund (MALDEF), Antonia Hernández provides a strong voice for the Hispanic community and represents its interests. The national litigation and advocacy organization uses the law, community education, and research to protect the civil rights of the nation’s 24 million Latinos. Hernández directs all of these efforts and plans the organization’s long-range goals and objectives, which include immigrant rights and language rights programs to confront the “English only” movement.

Hernández, who moved to Los Angeles from Mexico at the age of 8, grew up with a strong sense of public service that has shaped her professional career. With a law degree from UCLA, she joined the Los Angeles Center for Law and Justice in 1974 and in 1977 became the directing attorney for the Lincoln Heights Office of the Legal Aid Foundation of Los Angeles. She joined MALDEF in 1980 and was elected president five years later.

ANTHONY MUÑOZ (for Sports)

“I think about all the opportunity I was offered, the encouragement, the instruction I was offered, and it allowed me to do only one thing...make my life an offering.”

Football legend Anthony Muñoz, who won Super Bowl rings with the Raiders, the 49ers, and the Redskins, was the first Hispanic to be inducted into the National Football Hall of Fame. That was the pinnacle of a long and illustrious football career, during which he received nearly every honor possible. He was named to 11 consecutive Pro Bowls and was named NFL Man of the Year in 1991.

When he played for the Cincinnati Bengals, Muñoz was so deeply involved in the Cincinnati community that plans are under way to name a street near the new football stadium after him. Former Bengals coach Sam Wyche praised Muñoz, saying, “Anthony is a better person than he was a player. And he was one of the greatest players of all time.”

A devout Christian and family man, Muñoz has made it a point to do as much good off the field as he does on. He has contributed generously to charities such as Children's Hospital of Cincinnati and has spoken at more than 150 high schools urging students to stay in school and off drugs and alcohol.

TINA RAMIREZ (for Education)

“We represent the best of this city, its cultural diversity, its rich artistic life, and its promise of opportunity for people of all ethnic backgrounds.”

Tina Ramirez has combined her incomparable artistic vision with years of performance and teaching experience to create and sustain the nation’s preeminent Hispanic American dance institution, Ballet Hispanico. Incorporating elements of the flamenco, salsa, merengue, mambo, and other dances from Spain, Mexico, the Caribbean, and Central and South America, Ramirez’s art is a wildly rich cross-cultural tapestry that encompasses the Hispanic American experience. Today, Ramirez’s Ballet Hispanico is not only a nationally acclaimed company but also an award-winning school of dance with more than 600 students, and a leader in arts education through Primeros Pasos (First Steps), its nationwide public school program, which brings dance to more than 25,000 children across the country.

Born in Venezuela, Ramirez came to the U.S. at the age of 7 and began studying dance under Lola Bravo, the premier Spanish dancer.
in New York. After she launched her professional career with a tour of North America and Cuba, Ramirez returned to New York to fulfill her promise to take over Lola Bravo's studio when Bravo retired. In 1967, Ramirez created Operation High Hopes, a professional dance training program for minority and economically disadvantaged inner-city children. This led to the formation of Ballet Hispanico in 1970.

Ramirez has received many awards for her work and has served on the dance panel of the National Endowment for the Arts and New York City's Advisory Commission for Cultural Affairs.

GARY SOTO (for literature)

"...my task, aside from writing, is to ensure that Latinos make a literate society."

Gary Soto is an award-winning poet, essayist, and novelist—one of the few Mexican American authors who writes for both children and adults. Through his work, he has given readers around the world insight into Mexican American life, including scenes from his own childhood in the San Joaquin Valley where his family made a living doing field and factory work. Although much of his work is set in Mexican American households, it usually embodies universal themes that transcend the ethnic experience.

Over the years, Soto has won many honors for his work. In 1976, he was awarded the U.C.-Irvine's Chicano Literary Prize. He was given an American Book Award in 1985 for Living Up the Street, his first published work of prose collections. Soto earned Pulitzer Prize nominations in 1978 and 1995.

Since 1977, Soto has been associate professor of both the English and Chicano Studies Departments at U.C.-Berkeley. He is also currently a professor in the department of Creative Writing at U.C.-Riverside. Through his involvement with the General Electric Award for Young Writers, he has been able to help young people with their literary endeavors.

1999 honorees are Placido Domingo, Antonia Hernández, Anthony Muñoz, Tina Ramirez, and Gary Soto.

The winners each received $1,000 to use for their education, plus $5,000 donation to the community organization of their choice. Winners were honored at cere monies held in nine cities earlier this year—Philadelphia, Chicago, Los Angeles, Phoenix, San Francisco, Miami, Denver, San Antonio, and New York City.

The five national winners were selected from the field of regiona honorees. They received an additional $4,000 and traveled to Washington, D.C., with their parents where they were honored at the Hispanic Heritage Awards Ceremony.

This year’s national Hispanic Heritage Youth Honorees are:

Michelle Mayorga received the Second Annual Youth Award for Leadership and Community Services, sponsored by the Fannie Mae Foundation. While at Westor High School, she was a member of the National Honor Society and was valedictorian of her graduating class. Of Nicaraguan descent, Mayorga has received many other honors, including National Hispanic Recognition Scholar
Miami Herald Silver Knight, and Advanced Placement Scholar. Her extensive community service involvement included work for Habitat for Humanity and helping victims of domestic abuse as well as tutoring adults in English as a Second Language. Mayorga began her studies at Yale University this fall.

New York City’s Joseph Puma, winner for the Arts, finds creative ways to bring together his photographic abilities and community service. Also at Yale this year, Puma, of Puerto Rican descent, was a volunteer for the Bureau of Young G.R.A.P.E.s and worked as a writer, editor, researcher, and layout artist to help produce *We’re in Print: The Whole Story by Kids for Kids*, a how-to book to encourage children worldwide to start their own publications. Puma, who attended Marta Valle High School, has won prizes for his photography in the Scholastic Art Awards and has exhibited in local galleries. Allstate Insurance company sponsored the award for the Arts.

Miami’s Claudia Patricia MacMaster, winner for Literature/Journalism, the award sponsored by NBC Television, is passionate about writing in both English and Spanish. MacMaster attended Our Lady of Lourdes Academy, where several of her creative works have been published in the school’s literary magazine and have earned her many prizes. A self-described aspiring poet of Colombian descent, she won first place in her school’s Novice Debate Competition and served as editor of her high school newspaper, *The Grotto*. MacMaster is now attending the University of Florida.

The Bronx, New York’s Jasmine Vallejo, winner for Academic Excellence, aspires to a career in politics and eagerly seeks out positions of leadership in her community. She was valedictorian of her graduating class at Grace Dodge High School, where she also served as editor-in-chief of the school newspaper and yearbook. Of Puerto Rican descent, Vallejo is concerned that other young Hispanics are unaware of their ethnic history; she therefore gives workshops at various colleges about her great uncle Don Pedro Albizu Campos—leader of the Puerto Rican Nationalist Party in the early 1900s. She received the distinguished Posse Leadership Scholarship to Brandeis University, where she is currently enrolled. The Chase Manhattan Bank sponsored the Academic Excellence award.

Magdalena and Adolfo Lara, siblings from Denver, Colo., are co-winners for the Sports award, sponsored by Denver’s Restaurants. This brother and sister pair attended Manual High School, where they were active in varsity athletics and graduated at the top of their class. Magdalena has played varsity basketball since her first year in high school and also competed on the varsity track, cross country, and volleyball teams. She volunteered with a local ambulatory surgical unit and participated in the National Honor Society and Student Council. Despite her extensive extracurricular activities, Magdalena maintained a 3.7 average and fulfilled her academic requirements early enough to graduate last January. Adolfo, Magdalena’s younger brother, also graduated early, at the age of 15. Adolfo started playing varsity baseball at 13 as an ambidextrous pitcher and, in his last season, was pitching 78 mph fastballs. He has been very involved in his church youth group, an experience he believes taught him to work well with others and to respect individual beliefs.

**About the Hispanic Heritage Awards Foundation**

In 1987, a White House task force brought together prominent Hispanics from the private sector and the administration to create an event to highlight Hispanic excellence. The brainchild of these sessions was the Heritage Awards. The Hispanic Heritage Awards Foundation was subsequently established as a nonprofit organization to recognize and reward Hispanic leaders who display excellence in their professions and serve as positive role models in their communities.

The foundation is comprised of 34 national Hispanic organizations, including the U.S. Hispanic Chamber of Commerce, the National Puerto Rican Coalition, and the Cuban American National Council. These organizations work closely with the foundation to showcase Hispanic leaders and their impact on our nation’s communities and youth.

The Hispanic Heritage Awards has become the most celebrated and prestigious event of Hispanic Heritage Month. Broadcast on NBC earlier this month, this year’s event offered the American public the opportunity to learn more about our nation’s Hispanic leaders and their contributions to our society.

The Hispanic Heritage At Foundation also honored six categories—arts, educa leadership, lifetime achiever, literature, and sports. The initials who are profiled in this article not only excelled in their respective fields but have enhanced their communities.

The program began with the Fannie Mae Foundation at sponsoring the award in 1986 with the first Y Leadership and Community Award being presented. This year’s event saw new organizations joined in sponsorship, allowing a tremendous expansion of the program.

This article was compiled by Marilyn Gilroy from news reports and in cooperation with the Hispanic Heritage Foundation.
White House Initiative and CHCI Celebrate
Empowering and Informing

BY MARI CARMEN SARRACENT

For some groups, Hispanic Heritage Month is an everyday undertaking—as such, The White House Initiative on Educational Excellence for Hispanic Americans and the Congressional Hispanic Caucus Institute (CHCI) are no exception. However, supported and promoted by Presidential Executive Order, beginning in September, for an entire month, people nationwide celebrate Hispanic American accomplishments during what has been declared for years as Hispanic Heritage Month. Universities, organizations, local, state, and federal government participate annually.

The White House Initiative was established by Executive Order 13000 to advance the development of human potential, to strengthen the nation’s capacity to provide high-quality education, and to increase opportunities for Hispanic Americans to participate in and benefit from federal education programs. The following are some activities that kicked off prior to Hispanic Heritage Month and will be ongoing.

The Excelencia en Educación conference series is the by-product of several factors—the comprehensive report prepared by the President’s Advisory Commission on Educational Excellence for Hispanic Americans, entitled Our Nation on the Fault Line: Hispanic American Education, which discussed issues regarding Latino educational attainment from pre-kindergarten through graduate and professional education, and the Hispanic Education Action Plan, announced by Vice President Al Gore in 1998, which provides over $520 million in educational program investments.

Secretary of Education Richard Riley stated in the New York Excelencia en Educación conference that “a quality education must be considered a key civil right for the 21st century.”

“The Excelencia and Education conference series was designed by the White House Initiative on Educational Excellence for Hispanic Americans to go to different cities with large Latino populations and let them know that parents must become involved in their children’s education. That is a fundamental key, and families and students need that in order to succeed,” stated Luis Rosero, director of communication for the White House Initiative.

The first Excelencia en Educación was launched in October 1998 with AVANCE in San Antonio, Texas. For the inaugural conference the White House Initiative brought together five federal agencies—Education, Health and Human Services, Labor, Interior, and the Small Business Administration as well as over 400 parents, educators, Latino advocacy organizations and leaders from the private sector. According to the White House Initiative, members of the Clinton/Gore administration and members of the Congressional Hispanic Caucus have spoken.

Small Business Administrator Aida Alvarez (spoke at San Antonio) and U.S. Representative Ruben Hinojosa and Representative Ciro Rodriguez also participated.

“We’ve added government agencies to participate with us and bringing their resources to the table to help the Latino community help itself. In San Antonio, we had approximately 700 participants. In Los Angeles in March of 1999, we had about 800, and about 750 in New York City, which took place in June,” added Rosero.

The conference in New York took place at City University of New York (CUNY)-City College. The Hispanic Federation, Community Association of Progressive Dominicans (ACDP), United Way of NY, the NY Board of Education, CUNY-City College, and ASPIRA of New Jersey collaborated. Speakers included Secretary of Education Richard Riley and U.S. Congress members Nydia Velázquez, Robert Menéndez, and José Serrano.

The academic issues that we focus on are reading, math, science, and college readiness, noted Rosero. These are fundamental courses that kids need to take that will get them to college and a career, he added.

“That is one of the reasons why the conference is geared toward grassroots, making sure organizations, parents, and the community know how they can connect with education agencies,” he added.
Upcoming are visits to Miami and Chicago. The White House Initiative is working with community leaders in Chicago (stated for November 5-6) and Miami (December 3-4).

Recently, Univision launched a major campaign in conjunction with the Department of Education and in collaboration with the White House Initiative entitled "Tu Futuro depende de ti...Educate!" Noed Rosero: "They've committed to a multi-year campaign. All of their affiliates will broadcast public service announcements by featured individuals—Oscar de la Roca, Don Francisco, Giselle Blondet from "Despierta America," and a lot of other visible Latinos—to let the public know that education is the number one priority for our community."

During Hispanic Heritage Month, the White House Initiative held a press conference regarding standards and assessment. Commissioners Sonia Hernández and Efrinda Archuleta, co-chairs of the Assessment Committee of the President's Advisory Commission conducted a briefing at the National Press Club, where commissioners discussed the impact of educational standards and assessment practices on Hispanic students with an emphasis on English language learners.

In addition, modeled after the Initiative, Massachusetts, said Rosero, is the first state to adopt the White House Initiative. "A group of concerned parents took our executive order and transformed it to a local level. They are going to work with all the government agencies in that state [public and private] and with concerned parents to do on a local level what we've done on a national level." Entitled the Massachusetts Initiative, it is composed of public officials, students, educators, administrators and businesses which have joined to develop a statewide response to improve educational achievement for Latino students. Sarita E. Brown, White House Initiative executive director, and Mario Moreno, Department of Education Assistant Secretary joined Massachusetts Governor Paul Cellucci in announcing the state's initiative for Latino students in the State House in Boston. On October 2, a summit meeting was held at Worcester State College regarding these plans.

The White House Initiative also is participating in the Congressional Hispanic Caucus Institute's 1999 Issues Conference summit series, which included an education seminar chaired by U.S. Representative Ruben Hinojosa. White House Initiative Chairwoman Ana Cia Guzmán addressed the CHCI educational seminar too, discussing the different efforts that the Initiative is spearheading.

For the Congressional Hispanic Caucus Institute, Inc., a nonprofit, nonpartisan, education organization that offers educational opportunities and information to develop the next generation of Latino leaders. Hispanic heritage activities culminated at its Annual Gala, which is one of the major Hispanic fund-raising events in the United States. This year marks the 22nd year of the CHCI event. Since its start in 1976, the gala has grown so that it attracts more than 1,500 guests. The theme this year is "Building Coalitions: A Kaleidoscope of Possibilities."

Vice President Al Gore and First Lady Hillary Rodham Clinton addressed salient issues to the Hispanic community at the 22nd Annual Gala, which happened to be the first day of Hispanic Heritage Month. CHCI chairwoman Lucille Roybal-Allard stated: "We are honored to have Vice President Al Gore and the First Lady celebrate Hispanic Heritage Month with us. They recognize the significant role Hispanics will play in the 21st century and the importance of ensuring a constant succession of leadership in our community. It is encouraging that the current administration understands that the Latino agenda is America's agenda."

Attendees at the gala event are, according to CHCI, a "who's who of leaders from the public and private sectors, including members of Congress, entertainers, industry leaders, Cabinet members and community activists."

Geraldo Rivera, host of CNBC's Rivera Live and Giselle Fernandez, former co-host of Access Hollywood, served as co-emcees. Tito Puente and his orchestra provided the entertainment for the evening, and Nelson Escalante an internationally acclaimed artist captured the theme of the event by creating a limited edition poster.

Also at the festivities were Congressman Robert Menendez (D-NJ), vice chairman of the Democratic Caucus and rock music legend Carlos Santana. Both were honored for their long-standing commitment and service to the Hispanic community and received the Medallions of Excellence. Roybal-Allard stated, "We honor Congressman Menendez for his tireless pursuit of fairness, his leadership in the fight for human rights and his dedication to helping underserved communities." Santana received the Medallion of Excellence for Community Service in response to his commitment through his music to innumerable social causes as well as education. According to CHCI, Santana lends time and money to Gataeza es un Mundo (Each Mind is a World), a high school drug out prevention program for Latino students.

Since 1993, CHCI has hosted four national Issues Conferences in Washington, D.C., at which policy-makers, Latino elected officials, and guests have an opportunity to address issues affecting the Latino community's inclusion the following:

- Telecommunications: Hispanic representation in telecommunications, broadband media; slamming; unfair trade practices on long distance rates
- Social Security Reform: private collective investment, budget surplus
- Census & Civil Rights: accurate census and civil rights issues
- Health Disparities: diabetes, substance abuse, mental health, HIV/AIDS
- Education and Training: reauthor the Elementary & Secondary Educa. (ESEA), bilingual education for LEP students, teacher quality and importance of parental involvement and accountability for schools receiving funds. Hispanic dropout rate, among others
- Arts and Entertainment: opportunities who owns what we see, and how can that change
- Immigration: fairness for immigrants
- International Relations: diversify in foreign services, development assistance to America and the Caribbean
- Business and Economic Development: energy deregulation on impact on community

According to CHCI, the issues confer on the black tie gala were scheduled Hispanic Heritage month to discuss, on and under issues and accomplishments of the Hispanic community—"in celebration of achievement as an organization and country—and to empower and inform the com.
At the entrance of the National Archives in Washington, D.C., there is a maxim that reads, "What is Past is Prologue." All areas and all people have a unique history, customs, and culture that defines them—defines them and molds their very existence. Throughout the world, people attempting to prepare for the future seek to find out who they are, where they came from, and where they might be headed.

The Puerto Ricans
Few people in the history of the world have found their very existence so markedly divided between two countries, two cultures as have Puerto Ricans. For four hundred years, they were intimately associated with Spain, and for the past 100 years, they have been associated with the United States. Until quite recently, much of the island's abundant and varied history was not very well known nor much appreciated, not even in Puerto Rico. To address that lack, the Instituto de Cultura Puertorriqueña was created in 1955. Its mission was clear and to the point—to provide the Puerto Rican people with an institution dedicated to the study, conservation, dissemination, and enrichment of Puerto Rico's culture.

The Instituto is presently under the able leadership of former distinguished university professor and administrator Dr. Ramón de la Torre. He is firmly committed to showcasing all that is Puerto Rican and determined not to denigrate other cultures, other expressions. Instead, he labors to emphasize the good that exists in all the peoples and cultures that have created modern-day Puerto Rico.

The American Connection
Census figures are outdated, but it is estimated that there are 3.8 million Puerto Ricans on their tiny 35-mile-wide by 100-mile-long island and some 2.5 million Puerto Ricans in the fifty United States. These estimates are conservative.

As educated people in this country know, Puerto Ricans are an integral part of this nation. Their association with the United States is a long and deep one. Business and cultural ties go back to colonial times. Puerto Rican produce was freely available in Washington, D.C. markets during George Washington's administration. The relationship would intensify dramatically at the end of the 19th century. In 1898, Puerto Rico was invaded by the United States. It would become a war prize of the Spanish-American War, a war that John Hay, Lincoln's former secretary, called "a splendid little war." A war whose justification historians throughout the world have long questioned. A war President William McKinley and millions of Americans did not want. A war that made Theodore Roosevelt a national hero and ultimately president.

But some did want the war. None more passionately so than William Randolph Hearst. His control of the information flow to a large portion of the nation's newspapers gave him the trump cards he utilized to mold public opinion. It was a short, successful, and popular war. Cuba, Puerto Rico, Guam, and the Philippines were war prizes.

Puerto Ricans were granted American citizenship a few years later, 1917, via the Jones Act. They wanted to be good American citizens, and their contributions to America's "arsenal for democracy."

to quote Woodrow Wilson, in the First World War began the long history of Puerto Ricans fighting in America’s wars. Unfortunately, they died disproportionately to other Americans in all those wars. At first, they were willing patriotic volunteers, as were other Americans. They would later be drafted, but thousands of others would continue to volunteer.

Many Americans would be surprised to hear of Puerto Rican service to America. Many have distorted views of Puerto Ricans as low-level laborers or, worse yet, welfare recipients. The culture they live and create on the mainland, although closely connected to the island’s, is at times very different. Buttressed by different realities, at times harsh, at times liberating, those experiences have been and are the subject of considerable research and interest. Since Puerto Ricans travel back and forth to the island very frequently, cross-pollination has been intense.

The Predominant Historical Influences

Few knew of the island’s rich cultural history, which predates Columbus. When he landed there on his second trip, on November 19, 1493, it was then known as Boriquén. It was from that point that Puerto Rico began to develop its unique present-day culture. It is an amalgam that blends its three foundations: the indigenous Taino Indians, together with the African and European, mostly Spanish, influences.

España, La Madre Patria: Spanish Influence

No country has influenced Puerto Rico more than Spain. A loyal outpost for four hundred years, the island is still, a hundred years after their formal separation, intimately tied to La Madre Patria and its many cultural traditions. Fifteen years after Columbus’ trip, Juan Ponce de León sailed from Hispaniola with fifty men to the island that had been renamed San Juan Bautista. Ponce de León explored the southern and eastern part of the island before heading for the northeastern section. He came upon a large bay with a natural port and was so taken by its potential that he called it Puerto Rico—Rich Port. (In years to come, the names would be switched. The island would become Puerto Rico, and the city, San Juan.)

The following year, 1509, Ponce de León returned as Puerto Rico’s first governor, with a larger contingent. It included his wife and children, nearly 100 Spaniards, and one free black man. He founded the colonial capital, Caparra, which was built a few miles inland, away from the coast. From that location, they began to spread Christianity and Spanish mores throughout the island. For twelve years, Caparra was the capital. It was ultimately moved, over Ponce de León’s objection, to the tip of a peninsula along the ocean. Thus began the international city of San Juan, which remains the island’s capital to this day.

Caparra fell into disuse and was abandoned. Its foundations were covered by subsequent development and neglect. They were virtually forgotten. They were unearthed in 1935 and later, under the tutelage of the Instituto, restored to an ongoing historical and educational site. From those early beginnings, Spain would be the most important influence on the island for some
The Fourth Influence: Stateside Puerto Ricans

Those are the three traditionally mentioned foundations of Puerto Rican society. Yet some believe there is another, a fourth strand of influence, that helped create the modern-day Puerto Rico. It is the two and a half million Puerto Ricans who live on the mainland. Over the past one hundred years, hundreds of thousands migrated back and forth. They came to work, but visited their island frequently. Some worked in both locations, Ricans, those on the island and those here on the mainland. Cognizant of the importance of that fact, there had long been an interest, mostly among the intelligentsia, to collect, preserve, interpret, and disseminate the island's heritage.

The movement to enrich the population's perception and help build a stronger foundation for the future gained support in the 1950s. It ultimately led to the establishment of the Instituto de Cultura Puertorriqueña in 1955. Since then, governors of both political parties have been quick to the latest worldwide trends—from the pietistultra-sophisticated, in concert with some island residents imitate the European artistic waves. The fourth century has seen a desire to create from within.

The Instituto has served impetus for creative forces in activities such as literature, music, and the fine arts. Research has also been a spot in such fields as history, anthropology, and folklore. An attempt has been made to be balanced. A single facet has been favored; has been ignored. This has a tuned Puerto Rico's commitment to higher education. Recent Bank statistics note that the Rican rate of enrollment in higher education ranks sixth in the world.

Two significant policy decisions were made early on. The first would labor not to be provincial, particularly, it would not be inscribed by the desires and mores of the capital city, San Juan. The Instituto from the very beginning determined to serve the entire island and not play favorites any one region. And its success—historical sites and cultural realities have been highlighted the Instituto in all parts of the island.

The second policy issue was to be autonomous from the federal political realities of the island. There too it has succeeded. The Instituto has survived and prospered under governors and legislatures from both political parties. There is every reason to be optimistic about the future. Instituto will undoubtedly continue to provide more light for generations yet unborn.
Dr. Tito Guerrero, III, is serving his third year as president of the University of Southern Colorado (USC). Already he has distinguished his presidency in a number of ways.

During his first two years in the post, USC broke existing fund-raising records, netting nearly $12 million. The educator was instrumental, too, in gaining legislative appropriations of $20.5 million to support important capital construction and deferred maintenance projects.

Dramatic changes during his tenure at his former institution, Texas A&M- Corpus Christi, included a doubling of faculty size, a quadrupling in university funding, and a significant expansion of academic offerings.

USC’s president, who received his doctorate in administration, planning, and social policy from Harvard University, has worked as an advisor to a great many institutions, among them the U.S. Agency for International Development, the Costa Rican government, the U.S. Center for Disease Control, the American Educational Research Center, and the National Institute of Education, the Administration for Children, Youth, and Families, the Bureau of Education for the Handicapped, the Florida Department of Education, and the Missouri Coordinating Board for Higher Education.

Guerrero’s master’s in secondary and health education is from the University of North Texas; his bachelor’s from Texas A&M. He was awarded fellowships by the Kellogg, Ford, and National Science Foundations and the American Association of State Colleges and Universities.

During Convocation Week 1999, which had the theme “Maintaining Excellence,” Dr. Guerrero told the USC gathering that it was time to address “the challenge of recognizing and sustaining the many things at which we excel, while continuing to address those areas that require our further attention.” He spoke, too, of USC’s Diversity Plan for 1999-2003. “The USC Diversity Council,” he said, “has arrived at a comprehensive set of goals, responsibilities, and timelines to achieve these goals.”

“As we begin our comprehensive campus-wide assessment,” he said, “our goal must be to identify and initiate those changes that serve to maintain and expand the core of excellence that is the heart of our institution.”

For recognizing the value of diversity, and for showing that commitment in a high-profile manner, our Hispanic Heritage Week issue of The Hispanic Outlook honors the University of Southern Colorado with Dr. Tito Guerrero, III. at the helm. We congratulate...

Tito Guerrero, III, University of Southern Colorado president

the institution for its inclusion on the Honor Roll.

USC is a comprehensive regional university with a polytechnic emphasis. Founded in 1933, it was incorporated as The Southern Colorado Junior College. Classes took place on the top floor of the Pueblo County Courthouse. The “Class of ’35” graduated 17 students. The first building on campus was donated privately by the Colorado Fuel and Iron Corporation in 1936. One year later, local citizens decided to support the institution with county taxes. They organized the Pueblo County Junior College District and the institution was renamed Pueblo Junior College.

In 1951, PJC became the first accredited junior college in Colorado. A decade later, Colorado's general assembly enacted legislation, effective in 1963, that changed PJC to a four-year institution called Southern Colorado State College. It received accreditation in 1966. By then there were four buildings erected on a new campus north of Pueblo's Belmont residential district.

On July 1, 1975, the state granted the institution university status. Three years later, the State Board of Agriculture assumed governance of the university. In 1986, USC, Colorado State University and Fort Lewis College joined the Colorado State University System.

The campus is located on 275 acres in northeast Pueblo, a mid-sized city with a population of approximately 110,000. The campus has 13 state-funded classroom, academic support, and administrative support buildings. Additionally, the campus provides the following self-funded facilities: residence hall, student apartments, student center, recreation center, telecommunications facility, and child care center.

For 1998-1999, USC enrolled 4,036 students in its on-campus programs, equating to 3,535 full-time students for the full fiscal year. Percent of the students were residents of Colorado: 7% percent, other states; and 7% percent, international. Approximately 32% of enrolled students are ethnic minority, and 55% percent are female. Of the total USC student population, 1,033 or 25.6 percent Hispanic. The rest includes 0.8 percent American Indian, 3.3 percent African American, and 2.0 percent Asian.
There were 123 Hispanic graduates in 1997-98, accounting for 19.5 percent for that year. USC employs 559 full-time equivalent (FTE) non-student personnel, consisting of 27 FTE faculty, 160 FTE professional support, and 190 FTE classified support. The ratio of FTE students to FTE faculty is approximately 1:1. For 1998-99, 19 percent of the faculty was ethnic minority, with 16.6 percent of tenure faculty and 35.7 percent of probationary faculty ethnic minority. For that year, 30.7 percent of all employees were ethnic minority.

One of USC's greatest advantages is its size. The small number of students attending allows students to work more closely with the faculty and to have the opportunity for hands-on experience.

Operating on a semester calendar, USC offers 29 bachelor's degree programs and three master's degree programs within the College of Applied Science and Engineering Technology, the Hasan School of Business, the College of Humanities and Social Sciences, the College of Science and Mathematics, and the Center for Teaching and Learning. In 1997-98, USC awarded 71 baccalaureate degrees and 79 master's degrees.

USC is an active participant in the educational and cultural life of southern Colorado. The university has an alliance with Pueblo School District No. 60, operates a community nature center, operates a public K-12 charter school with 400 students, manages the community symphony orchestra, operates a public television station, and is developing excess property for residential and commercial purposes. In 1998-99, USC embarked upon a $7 million remodeling of its Chemistry Building and is recommended for a $10 million remodeling of its Life Sciences and Physics/Mathematics Buildings for 1999-2000.

USC's total expenditures for 1997-98 were $48,192,742, of which 51 percent went for its "education and general" fund, 23.8 percent for auxiliary and self-funded activities, and 24.9 for restricted activities; 13.4 percent were for scholarships and fellowships. A recent study of the impact of the University of Southern Colorado on Pueblo's economy was conducted by Kevin Duncan, USC associate professor of economics, and Melanie Cecil, USC economics student in the MBA program. The study focused on USC's annual budget for 1997-98 and on a survey of yearly student spending. They measured the impact of more than $64 million that is derived from spending by USC students, the local earnings and spending by university employees, and other USC budgets. The study shows that the direct spending from each category creates additional local income, resulting in an increase of money spent, which boosts the economy. The student impact equals 5.2 percent of the total economic impact. These are students who reside in or commute to Pueblo specifically to attend USC. The USC employees' earnings and spending contribute 26 percent of the total impact, while its expenditures comprise 21 percent. According to the study, every USC job creates .392 additional local jobs; therefore, the 520 USC employees result in 214 job opportunities in Pueblo. These facts, along with the 2,400 students who reside in or commute to Pueblo, form the true economic picture.

Earlier this year, USC was the site of the biannual Southern Colorado Minority Youth Conference, hosted twice each year to provide an opportunity for African American, Hispanic, Asian American, and Native American students to visit a college campus. The event was a collaborative effort of the Black Students Organization (BSO), the Movimiento Estudiantil Chicano de Aztlán (MECHA), and the Office of Admissions. The conference featured cultural events and entertainment, a campus tour, and workshops on admissions, financial aid, and scholarships, according to Deborah Martinez-Martinez, who coordinates the event for the USC Office of Admissions. "The highlight of the event," she says, "is the opportunity for high school students to meet and talk with college students during the tours, lunch, and workshops by BSO and MECHA. In addition, if students submit their admission applications on this day, the $52 dollar application fee is waived."

Reaching out into the community is important to Dr. Guerrero, who says: "USC is not an 'ivory tower' set apart from the communities of our region. To serve those communities, we must understand their needs and prepare our students for successful careers, meaningful lives, and positions of leadership in those communities. Our graduates are already making a difference in Colorado and throughout the world. And we must ensure that they continue to make a difference by preparing them to embrace the challenges of these exciting times."

University of Southern Colorado students
Apprentice Program Builds Employability

Bronx School for Career Development

BY

JEFF SIMMONS

Charles Hamilton is enrolled at the Bronx School for Career Development, but doesn't really go to school each day. Instead, he spends about eight hours handling electrical chores on the campus of nearby Fordham University.

It's not education in the traditional sense, and Hamilton is not a traditional student. He is severely learning disabled, and learning basic skills such as reading, math, and science has never come easily. But the imposing yet quiet Bronx student has discovered something that does come easily: satisfaction for a job well done.

"It is cool [having] a job," says Hamilton, sitting in a cafeteria, a floor away from the workshop where he spends most days.

He spent the past academic year, and this summer, working in a thriving apprentice program, one that provides entry-level training in crafts skills and is designed to direct his career path and inevitably land him a job.

Based at the special education high school, the program has now branched out and forged links with seven hospitals and institutions to teach troubled students how to survive in the workforce. This fall, it is expected to grow even more.

"This school has been very effective in making these kids think positive about themselves," says Michael Burke, a former special education supervisor of home instruction who was appointed the school's principal in 1994. "Their academic experience has been for the most part negative before they get here. They don't have disabilities that can be remedied through special techniques. These are very deep-seated learning disabilities. They have a ceiling on academic skills."

Burke adds: "However, there are other talents and aptitudes that are unsrapped. They do much better here. This is a school set up not only to nurture them but to train them."

These are students who most likely won't attend college. The New York City Board of Education developed the school, and others like it, in each of New York City's five boroughs in the 1980s. Thousands of students with severe disabilities attend on a year-round basis, many as old as 21.

But officials acknowledge that there is only so much they can provide within the school walls, so they looked for answers through ties to outside agencies. "The city is worried about what these students are going to have when they get out of the system, and what it is we're going to do with all the money we are spending on special education," Burke says.

Thus the seeds were planted in 1988 for what has since become a flourishing program that matches student apprentices with craffe who serve as role models for the Bronx, the school has collaborated with several institutions and organizations for four years.

Initially it might seem a pairing. Fordham University placed students—many of whom were severely disabled, often Teamsters and veterans at their crafts.

Fordham University has placed students—many of whom were severely disabled, often Teamsters and veterans at their crafts.
ered with it.' But this is a chance for them to learn about the kids in the community.'

Amy Raiss, the high school's work-study program supervisor, for the students and assigned to two programs at Fordham, adds that "When the students first come here, there's a lot of immaturity in the relationships to each other and with their surroundings. They have problems just getting along with each other."

But their self-esteem improves as they gain hands-on experience. "They seem to settle down, and they spend much less time with each other and more with the people they work with," she says. "They are much more aware of themselves and gain respect."

Students are now involved in two programs at Fordham, one directly with the school's operations department and the other with Sodexo Marriott Services, which runs the food service department. It takes a combination of time, patience, and perseverance for the students to participate and succeed in the program.

The three-story high school opened its doors in the mid-1980s, and currently enrolls more than 550 students on a year-round basis. A majority of the students are Hispanic and African American, and many are older than the average student. Their basic reading and math skills are equivalent to or less than a third grader's; often they have an IQ of less than 62 points.

Unlike many surrounding high schools for nondisabled students, this school provides students with vocational training: there are automotive and carpentry workshops, and instruction in food service and photography.

While in these simulated working environments, students, all of them Bronx residents, acquire what Burke and Raiss call "employability skills:" they are taught how to fill out job applications and time cards, handle bank accounts, and accomplish other tasks that might come easily to a nondisabled student or employee.

The high school students learn to work in groups as they are exposed to work experiences but students respond to which skills and then make referrals when the students have spent several years at the school. There are parent conferences, and then the school places the older students, usually those from 18 to 21 years old, at sites to work as apprentices.

"We tell them that we'd like to see how you can use those skills out in the workplace," says Raiss, a former mathematics teacher. "The ones that are most successful make the transition from school to work. They seem to find the people they work with as their peers."

Between 12 and 15 students, the majority of them male, move from an academic and vocational training arena to a place where education becomes a real-life work experience. Most often, they start in entry-level jobs: working in mail rooms, performing grounds-care work, or carrying equipment.

Students meet with Raiss for one hour each day to hone academic skills and for lessons on everything ranging from literacy to substance abuse to AIDS. They also are required to meet for lunch. But it's out on campus where they begin to learn the skills to survive in a competitive marketplace: to be on time for work, to have good attendance, to communicate, to listen, to dress appropriately, and to adhere to safety rules.

"When I first meet the kids, they seem anxious and nervous, and you might even say that some of their emotional and neurological or physical problems are pretty apparent," says John Ambrosini, operations manager at Fordham. "I just look at them, and they have a strong sense of belonging. They carry themselves differently. There are visible changes, and it's remarkable."

Students are often required to wear uniforms, to dress according to where they are assigned. They also are not paid (although some take part in a separate grant program in which they eventually earn wages for three hours of work daily).

"Once they go out into the field they never want to come back to our school," Burke says. "They are treated differently. Now they are given a good deal of responsibility and most of our kids respond positively to that type of environment and they really do carry themselves differently."
It’s a transition that doesn’t escape the craftspeople either. John Vargas, who has worked with Fordham for 15 years, has been paired with Hamilton since September 1998. He recalls how the silent student became inquisitive as Vargas taught him to bend pipes, run wires, and repair outlets.

“At first I thought that maybe he could just lift the ladder or change a light bulb. But Charles has been enthusiastic about working with me and understanding everything I do. Most of the time, I make it my business to explain things to him because he’s curious and I don’t like to leave him in the dark. It actually benefits me, too, because we work together.”

The two spend most days handling electrical tasks at the 85-acre campus’ 30 buildings.

When they discuss a problem and how to correct it, Hamilton is all ears. “Charles is a good listener, so it helps. Sometimes I get home and keep talking to my wife, and she says, ‘Yes, yes, yes.’ All she cares about is that the thing gets done,” Vargas says. “But Charles is in a learning capacity. He says, ‘Yes, yes,’ but asks ‘Why are you doing this? Why is it this way?’ The two start laughing together.

The pair continued to work in unison through the summer months, time in which Hamilton has learned the value of hard work and respect.

“I can say I learned from him,” Hamilton says. “He showed me different tools, bending of piping, and wiring.” Hamilton hopes the skills will win him a job upon graduation next June.

Ambrosini and Raiss pay particular heed to matching personalities, but occasionally the pairings do not work, personalities do not long way to undoing stereotypes rather than reinforcing them,” Ambrosini says.

A number of students enter the school with poor English-language skills. Ambrosini requires them to speak English as often as possible because it is important to dissolve any potential workplace barriers.

“We all need that in the working world,” Ambrosini says. “A lot of time, they speak only Spanish at home with their parents, and here, it’s an English-speaking environment.”

Once they are old enough to graduate, at 21, the students are not simply given a certificate and a handshake and shoved out the door. If they have done well in the program, often they are offered a job. Close to a dozen have been hired by Fordham and Marriott. There are also referrals.

Burke recalls one student who arrived at the Bronx school a “very angry young man.” He cut classes, was racially insensitive, and ignored school rules. There were teachers and counselors with his side. He developed an interest for food service and was with the Sodexo Marriott on campus.

“He did well there and impressed the people at Marriott and they asked him to come back Saturdays. They paid him school and on weekends, he got a job,” Burke points out that Fordham “opened up its heart” to students, inviting them to fill out applications and get to know them.

“What we do with these meaningful, and every day they have a hand in the kids’ and that’s what teaching is all about,” Burke says. “The school really relates to kids’ futures in a meaningful way. We’re about getting kids jobs and getting them to college.”

Angel Perez arrived from Rio three years ago. Perez, 19 and now somewhat fluent in English, spent his last two years running school and working with painting trade each day: “I am doing my thing with pride. I knew I wanted to do it.”

Late this spring, he attended a ceremony that once seen as impossible. He received his Individual Education Program (IEP) diploma at graduation.

“It was great,” he says believes he’ll have a bright future because working with a mentor given him a jump-start.

Now, he says, he has a new passion: “Find a job.” he says, semi-seriously.

The program has now branched out and forged links with seven hospitals and institutions to teach troubled students how to survive in the workforce.

gem, and they must find a new craftsman for the student.

“There are some craftsmen who are resistant to this program. But as a result of meeting the kids one-on-one and seeing that they have personalities and interests, it goes a several parent conferences. “I thought he wasn’t going to make it,” Burke says, “and that we had to send him to a school for emotionally disturbed kids.”

Eventually the transition took place. The student realized that the
Princeton Latinoamericano:
Probing the History and Culture of Latin American Immigrants

BY MARILYN GILROY

ike many communities across the country, Princeton, New Jersey, has experienced an influx of Latin American immigrants. They come seeking a better life and often take their place as laborers, tenants, and consumers in the local area. Until recently, few questions were asked about the many cultures and histories from which these immigrants arrived. That changed when students and faculty from Princeton University set out to document how these recent arrivals had changed the community and, just as importantly, how the Latin Americans were adjusting to their new way of life.

The result is the publication of Latin American Princeton/Princeton Latinoamericano, a book that presents the lives of Latin Americans in Princeton through oral histories, interviews with public leaders, and official statistics. It is a printed record of experiences for the rapidly growing Latin American community of Princeton and an invitation to all communities to learn from these experiences.

This is not Miami or Los Angeles, where Latino and Hispanic immigrants have a visible and obvious presence. This is the story of how a community like Princeton, known as an academic town full of tradition, becomes transformed in subtle and direct ways by one of the most important demographic changes of the 1990s.

The Latinoamericano project grew out of the efforts of Dr. Paul Kramer, now a history professor at Johns Hopkins University, but in 1997 a graduate student at Princeton University. Kramer became interested in Latin American immigrant experiences as an undergraduate at Hopkins, where he worked as a tutor. Kramer sought to tell those stories in their own words, which were then transcribed, edited, and translated into English. The interviews are included in the second half of the book.

Victor Osorio, one of those profiled in the book, was a student in Kramer’s ESL class and became one of his closest friends. As Kramer recalls, Osorio came to class “rain or shine.” “Although I was teaching English to the class,” said Kramer, “Victor taught me about the experience of adapting to a strange and novel culture, about the values of a family, and about hope in the face of adversity.”

Osorio had dreamed about coming to the United States since he was a little boy in Guatemala and saw pictures of beautiful landscapes and sparkling cities in Life magazine. Like other immigrants, he worked as a gardener in what he calls “the toughest job I ever had because the temperature in summer would hit more than 100 degrees and we were out there with shovels and pickaxes pruning trees and cutting grass.”

In class, Osorio was a persistent student and eagerly learned a new language as well as his rights as an employee and resident of the United States. Kramer taught the immigrants to handle some of their basic jobs and living situations—when they were entitled to overtime pay for extra hours worked, how to say critical phrases such as “Where’s my paycheck?” or how to tell the landlord that the apartment needs repairs. In return, Kramer began to learn about some of the working conditions at the construction sites, in the hack kitchens, around the landscaped lawns, and as caretakers of other people’s children—the jobs held by many Latinos in the process. Kramer got a glimpse of how the immigrants were adjusting to the community.

For Victor Osorio, who lives in Princeton with his wife, children, and grandparents, the adjustments were myriad and included language barriers and unfamiliar work habits. “In Guatemala, almost 95 percent of people work at home,” he said. “Each one has his or her loom and works out of the house. It’s rare to see people go to work in factories or office buildings.”
But he also notes the differences in social customs. Back in Guatemala, Osario courted his wife for five years. When he came to the U.S., he was "astonished" by the differences in dating customs. "Back home we were boyfriend and girlfriend, but we respected each other," he said. "Here, it's only hugs and kisses: you never took your girlfriend home to stay with you."

Another immigrant, referred to in *Latinoamericano* only as Felipe, started his own business in Princeton, a restaurant called "A Taste of Mexico." He came to the U.S. from Mexico when he was 15 and worked in the fields of southern California. He could not speak English and did not have legal immigration papers, but through long hours of hard work and some education, he managed to improve his life. Felipe eventually left the fields and began working in restaurants—Greek, Italian, and American—and learned a great deal about the business. He finally got a chance at achieving his dream of owning his own place.

"In Princeton, there was no authentic Mexican restaurant—you had to go to New York," says Felipe.

Felipe met someone who was running a small cafe and wanted to retire, so he negotiated a deal and opened A Taste of Mexico in 1996.

Felipe believes strongly that learning English is a critical part of the adjustment process for immigrants.

"There is too much Spanish all over," said Felipe. "The Korean, Chinese, and those from other countries come here and immediately learn English because there is no one who speaks their language. It is too easy for an Hispanic not to learn English in the U.S."

And while Felipe maintains close ties to his family in Oaxaca, Mexico, his life in Princeton has come to resemble that of many working Americans: he owns a home, pays taxes, and works out in a health club after work.

In addition to the oral histories such as Felipe's and Victor's, *Latinoamericano* offers a study in how the police, health care system, education, and social systems began to adapt to Latin American immigrants. For example, churches in town began to offer services especially geared to the growing immigrant population. Recognizing that religious practices are central to the lives of Latin Americans, St. Paul's Catholic Church, located on the main street of town, began offering a mass in Spanish. Often it was filled with whole families of Latin Americans who came to worship with people of a common background.

Here, too, however, immigrants encountered sharp contrasts between the Catholic church at home and that in Princeton. Several of those interviewed spoke of the whole mass as being "less warm," than those back home and dined a "lack of rapport with priests," who are often on temporary assignment. Some individuals noted that in Guatemala or Mexico, there were many opportunities to be involved in the church and the whole community felt a sense of ownership of the church as opposed to the U.S., where practicing religion seems to be just a "weekly sermon."

Another area of adjustment for entire Latin American families was education. By 1994, nearly eight percent of the students in the Princeton Regional School District were Hispanic children of immigrants. By the time these students reached Princeton High School, they were failing at rates one and half times greater than the overall student population.

As noted in the book, university researchers found that Latino students were often on the low rung of the ladder because of income difference and the accompanying gulf in parental educational attainment, which placed Latino students at a disadvantage when competing with the children of the university faculty or other members of the Princeton upper-middle class.

Add to this, Paul Kramer says, the notion that immigrants find the relationship between the students and teachers in Princeton to be much different than that of their native countries, and the transition to American education became even more challenging. Latino parents said that they had no idea how to advise their children in dealing with the educational system.

Yet Kramer believes that schools offer the best opportunity to integrate immigrants on a widespread basis.

"That's where they get the resources and skills to put them on an equal footing in the community," he said. Finding that equal footing is often a matter of wrestling with stereotypes and power structures that set up barriers to opportunities.

"When we think of Latinos, we say, 'Oh, that's the guy behind the counter at the restaurant,'" said Kramer. "And we probably acknowledge they live in substandard housing and think okay. In other words, we see immigrants in a two-dimensional framework, and it's a kind of segregation from the rest of society.

What we need, Kramer says, is a wider recognition of immigrants as people who belong here and have a role in the community. "We need to stop using the vocabulary of evasion," he says, "People have to stop putting up walls."

One area of the community in which the have come down is health care. As the number of patients requiring translation services increase hospital administration for the Medical Center at Princeton created a full-time position to coordinate these services. Fredy Es from Guatemala was hired for that position feels that it reflects a commitment to serve Hispanic community. The medical center has a special clinic, and of the 10,000 mostly approximately 50 percent are made by Hispanics.

Estrada believes that these kinds of sets can help immigrants adapt to the general harsher changes they experience in the "Practically speaking, coming here directly it's not difficult," said Estrada. "What was difficult was adapting to this change of life."

Estrada and others profiled in the book helping Latin Americans to develop a voice in Princeton and to define themselves and not immigrants. That process exactly the story that Kramer and his college set out to tell. The book is a vivid account of degree to which immigrants adjust to the context and the process by which they make it their own.

"There is now a Latin American Princeton," said Kramer. "It is a reality.

"Latin American Princeton/ Princ Latinoamericano" can be obtained for free online at the web site: <www.princeton.edu/plasapoyo/>.
Changing Our View of the Border

High Hopes for UTEP Borderlands Project

BY GARY M. STERN

Mention the border to most Americans, and what comes to mind is drug-dealing and illegal immigrants. But a new CD and internet site developed at the University of Texas at El Paso (UTEP) aims to alter our view of the border and to show the influence of the border's culture and economics. Dr. Henry T. Ingle developed *The Borderlands Encyclopedia* as an outgrowth of teaching the Borderlands Telecommunications Seminar, which integrated multimedia, videoconferencing, and online teaching. Ingle is associate vice president for technology planning and distance learning at UTEP's Undergraduate Learning Center.

The *Encyclopedia* CD demonstrates that the border between the United States and Mexico breathes, lives, and flourishes and is not a destructive force, as is often portrayed. "The border," declares Dr. Ingle, who is a native of El Paso and comes across in a telephone interview as a man on a mission, "is more than a physical boundary." For the people who are reared near the border that stretches over four states [Texas, Arizona, New Mexico, and California], "the border is not seen as a divider. It is other people who see it as a fence." Indeed, Dr. Ingle notes that 10 million people reside in the 250,000-square-mile borderlands but more than 90 percent of them reside in 13 pairs of sister cities. Every American city on the border has a sister city in Mexico: San Diego has Tijuana; El Paso, has Juarez; Laredo has Nuevo Laredo.

The border represents "two cultures," notes Dr. Ingle. "We cross the border and conduct business on both sides. It's a state of mind for everyone who lives here and enjoys living and working here. It represents our Latino roots and American presence," he adds. It also represents the search for a better life, improved education, and higher literacy rates.

Since the university was already expanding its internet sites, Dr. Manuel Gonzalez, vice chancellor for Telecommunications and Information Technology at the University of Texas at Austin, endorsed the idea of writing a grant to create a CD and internet site about the border. Dr. Ingle drafted a proposal, which led to $25,000 in seed money from UTEP's Multimedia Educational Information Delivery Initiative and eventually $50,000 to finance the CD-ROM.

*Borderlands Encyclopedia* is organized into six topical areas—culture and the arts, family life, business and economics, legal issues, education and training, and NAFTA-related issues. For example, although many people describe graffiti as the prime example of border art, the encyclopedia points to Manuel Acosta, an artist who was inspired by the border to create his paintings. While the media highlights illegal immigration as the border's major activity, the encyclopedia depicts families who have lived in border towns for eight generations. "We explore issues and how they

http://www.utep.edu/border
affect the border—the peso being devalued, effects of Catholicism on families, and the size of border families,” asserts Dr. Ingle.

The CD encyclopedia is part of a multimedia experience. Connected with the CD is an internet site at <www.ute.p.edu/border>. Users can access the internet site, ask questions of scholars, conduct research, and create a fully interactive experience. Users are able to download a video and listen to an audio recording about the border to create this three-dimensional, multimedia experience. Based on feedback, questions, and e-mail from users, scholars, journalists and students, Dr. Ingle updates the internet site continually to keep it dynamic and current. Indeed, users can even contribute to the internet site by reviewing guidelines for submission, proving its interactive nature.

Not only is The Borderlands Encyclopedia aiming to inform and educate, but it also strives to correct the many misperceptions and misinformation that people have of the border. Dr. Ingle attributes this misinformation to shoddy journalism perpetuated by mainstream newspapers such as the New York Times and Washington Post. "Illegal drugs and immigration creates its own stereotype. "We're trying to move beyond food and fiesta and see its life as a three-dimensional reality," Dr. Ingle says.

The NAFTA trade agreement has triggered considerable discussion, debate, and arguments about border trade. It too has fostered considerable misperception and exaggeration, which The Borderlands Encyclopedia hopes to rectify. Many people think that NAFTA has been damaging for the United States and beneficial for Mexico, but that does not reveal the full story, NAFTA has generated a new income base for both countries, but Dr. Ingle acknowledges that job displacement has taken place. He cites workers in the garment industry and manufacturing who lost jobs, which were transferred to Mexico. From the Mexican viewpoint, jobs are being created, but Borderlands Encyclopedia explores the environmental triggered by additional trucks vehicles coming across the I for increased trade.

As part of the grant Borderlands Encyclopedia is distributed free of charge in more than 300 schools in Mexico a U.S. Students in elementary, high, and high school can use CD as a learning tool about life. But its audience extends beyond school-age children; LUTEP faculty teaching a class concerns border life will re copy. Dr. Ingle expects that journalists who require access to information will use the internet site. Scholars studying border life will use t and internet site for research well. Anyone can visit its Web purchase the CD for $24.95.

Fittingly, the CD and internet site are both bilingual. "If we put it in English, we'd perpetuate the same stereotype of U.S. nance," Dr. Ingle says, a myth trying to overcome. Eighty p of the students who study or sides of the border are bilinguists; a dual-language CD is appropriate.

Besides overcoming misperceptions about the border, Dr. Ingle also wants to encourage Hispanics to use multimedia research tool. The media, too, have been fostering the idea that many offer minimal salary and exploitative situations. The

Users are able to download a video and listen to an audio recording about the border to create this three-dimensional, multimedia experience.

Not only is The Borderlands Encyclopedia aiming to inform and educate, but it also strives to correct the many misperceptions and misinformation that people have of the border. Dr. Ingle attributes this misinformation to shoddy journalism perpetuated by mainstream newspapers such as the New York Times and Washington Post. "Illegal drugs and immigration creates its own stereotype. "We're trying to move beyond food and fiesta and see its life as a three-dimensional reality," Dr. Ingle says.

The NAFTA trade agreement has triggered considerable discussion, debate, and arguments about border trade. It too has fostered considerable misperception and exaggeration, which The Borderlands Encyclopedia hopes to rectify. Many people think that NAFTA has been damaging for the United States and beneficial for Mexico, but that does not reveal the full story, NAFTA has generated a new income base for both countries, but Dr. Ingle acknowledges that job displacement has taken place. He cites workers in the garment industry and manufacturing who lost jobs, which were transferred to Mexico. From the Mexican viewpoint, jobs are being created, but Borderlands Encyclopedia explores the environmental triggered by additional trucks vehicles coming across the I for increased trade.

As part of the grant Borderlands Encyclopedia is distributed free of charge in more than 300 schools in Mexico and United States. Students in elementary, high, and high school can use the CD as a learning tool about life. But its audience extends beyond school-age children; LUTEP faculty teaching a class concerns border life will reproduce. Dr. Ingle expects that journalists who require access to information will use the internet site. Scholars studying border life will use the CD and internet site for research well. Anyone can visit the CD's Web site to purchase the CD for $24.95.

Fittingly, the CD and internet site are both bilingual. "If we put it in English, we'd perpetuate the same stereotype of U.S. nance," Dr. Ingle says, a myth trying to overcome. Eighty percent of the students who study or live on either side of the border are bilingual; a dual-language CD is appropriate.

Besides overcoming misperceptions about the border, Dr. Ingle also wants to encourage Hispanics to use multimedia research tools. The media, too, have been fostering the idea that many offer minimal salary and exploitative situations. The
ties avoid using the internet, and this site will trigger interest and use. "We're interested in creating a cross-cultural dialogue as well," he adds. Users can ask questions and provide feedback. "The format is easy and should start a dialogue for people who are curious about the border," he said.

The CD and internet site will also help legitimize the border as an intellectual discipline. Chicano Latin American, and African American studies took years to gain acceptance in academic circles, and border studies are only beginning to gain academic credence.

The Borderlands Encyclopedia helps students understand the "unique history of the border," which stems from the 1848 Treaty of Guadalupe between the U.S. and Mexico, notes Dr. Refugio Rochin, director of the Latino Initiatives Program at the Smithsonian Institute. "People should know that the border was crafted to delineate a social territory. In residence, one forgets the gated self, but we find the population merging and crossing in bicultural ways." He adds that the CD and website enlighten students on border issues concerning culture, language, commerce, labor, and schooling. It will "serve the Latino community in a number of ways, providing information that it can use and research, providing connections with professors and materials that they can use with their students for understanding the border."

What effect is the CD having? Dr. Mario González replies that it offers "outreach and opportunity. It makes information more widely available." Moreover, it is helping to "look beyond the negative stereotype and look at the miracle of what's happening from Brownsville to El Paso." He is referring to a South Texas border initiative that is helping to revive border life, exemplified by the growing importance of universities such as the University of Texas at El Paso.

The encyclopedia encourages students to find out more information on the border. "It's graphic and immediate. Students can access it at home and use it at school for free. It provides youngsters with direct access to enormous information not readily available through traditional search methods," notes Dr. González.

Critics will say that The Borderlands Encyclopedia is painting an overly benign portrait of border life and downplaying issues associated with it, issues such as illegal immigration and drugs. Asked about downplaying the issue, Dr. Ingle responds indignantly, "If you go into the internet resource, you'll find negative pieces counterbalancing the other material. I'm not a Pollyanna or Walt Disney; we print the good, the bad, and the ugly," he said. Yet a closer view does not reveal an extended investigation of what problems are created by illegal immigration or how to surmount the drug issues.

Ultimately, Dr. Ingle would like The Borderlands Encyclopedia to accomplish loftier goals than becoming a part of an education curriculum. He envisions that the CD and internet site and the attention they generate will "stimulate a socioeconomic revival through the border region." He would like to see border towns receive benefits such as improving substandard housing, better schools, and modernized phone and internet service.

"The CD is helping to create a border identity. Having a database will counteract the identity that the media has shaped that might be erroneous. This identity is filled with visuals, sounds, music, and art, and every aspect that defines a place and group of people," says Dr. Ingle. If enough people conduct research via The Borderlands Encyclopedia and its internet site, then the border will become associated with a thriving and distinctive culture, not just illegal activities.
Diversity at UT-Austin Post Hopwood
New Scholarships in Place

BY AMALIA DUARTE

When a reverse-discrimination lawsuit killed affirmative action at the University of Texas at Austin, many expected minority enrollments to dry up. But remarkably, the pool of Hispanic students has not evaporated, and this fall, the number of first-year Hispanic students at UT-Austin is expected to include about as many as in the days before the lawsuit. "We're hopeful that our numbers for the entering (first-year) students will be close to what it was like before the case," said UT-Austin Vice President for Student Affairs Jim Vick. "It's looking pretty good."

Looking good, indeed. Over the three years since the controversial ruling, legislators, alumni, and university officials in Texas have successfully counterattacked a lawsuit that was expected to roll back the clock on diversity at the state's public universities and colleges. "It's been frustrating," said Vick, referring to the handcuffs put on the university by the case. "And we're not where we want to be. But recent numbers show how our hard work is paying off."

Putting even more weight behind this counterpunch is a newly elected attorney general, Republican John Cornyn, who has pledged that his office will take the lead in appealing the lawsuit all the way up to the U.S. Supreme Court. It's a complete about-face for that office.

The case started when four White students, including Cheryl Hopwood, who were denied admission at UT-Austin Law School, sued the school claiming that separate criteria used to judge minority applicants were illegal. After the students won, the previous attorney general, Dan Morales, widened its scope to include scholarships, summer opportunity programs, and undergraduate admissions. (Later, Morales did not seek re-election.)

Now, a new attorney general and the university handed down the first ruling. And afterward, the U.S. Supreme Court declined to hear the case. But UT-Austin Law School Dean Michael Sharlot said that this has no bearing on the high court's taking up the case in the future, although he doesn't expect a quick resolution. "We probably won't hear a decision on this appeal until early in the year 2000," said Sharlot. "The wheels of justice turn embarrassingly slowly. I imagine we probably won't get a resolution on this case for at least two more years."

In its latest appeal, UT-Austin cited the Fifth Circuit's sweeping injunction consideration of race directly with U.S. Supreme Court judgment in the landmark 1978 Bakke case. In the court said that race counts in admission to of California medical school.

The UT-Austin appeal also limited consideration of race as serving compelling interest in maintaining a diverse student body, overcoming the effects of past discrimination. Patrick C. Oxford, a former University of Texas Board of Regents, "The ruling clearly and unfairly at a competitive disadvantage public universities. The executive and judicial branch of the federal government apparently maintain positions, and we cannot prop Texas in such confused circumstances believe this is an excellent brief forward to our team's oral argument."

While the case once again went through the courts, a number of efforts are helping UT-Austin to recruit and admit large numbers of undergraduate Hispanic students even in the law school, which was est by Hopwood, is maintaining Hispanic enrollment. But for now, no one will argue that the law suit was recovered. In the 1994-95 academic year, 170 Hispanics at the law school were enrolled. And for the total of 40 African Americans at the law school and 122 Hispanics. At the same time, 122 Hispanics at the law school were enrolled.

And the incoming numbers at law school tell an even more troubling story, especially...
African Americans. Final enrollment figures for the 1999-2000 academic year were not available at press time, but the number of African American students expected to enroll at the law school this year was in the single digits. Meanwhile, just 32 Hispanic first-year law school students were expected this year, versus the 40 to 60 students who'd enroll each year before Hopwood, said Dean Sharlot.

However, the law school has been working hard to look at other ways of giving minority candidates an edge. An essay for law school candidates was added to help pinpoint minority candidates, for example. The essay allows students to write about how they have overcome adversity—including discrimination—in their lives. The school also started a program to identify and interview potential applicants who are attractive for reasons other than just strictly test scores. “We are actually going out and inviting these potential candidates to come in and interview with us,” said Sharlot.

Additionally, the UT-Austin Law School has partnered with the University of Texas at El Paso, which has an overwhelmingly Hispanic student body, to start the Law School Preparation Institute at UTEP. The institute brings in students for two intensive summer programs after their sophomore and junior years to prepare them to take the LSAT and to offer guidance on the mechanics of applying to law school. Then, during the school year, students continue practicing for the grueling LSAT exam to stay sharp. Of the first class of 10 students, all were accepted into accredited law schools, including UT-Austin and Harvard Law School. “The program is designed to introduce these students to the thinking that's rewarded in the legal profession,” said UTEP Assistant Professor William Weaver, who is an instructor with the Law School Preparation Institute. “It's all kinds of logic problems just like a first-year semester law school course.”

UT-Austin helped with funding the first year of the institute and teaching but now mostly just reaps the rewards in capable students and hopes that other schools will follow with similar programs. UT-Austin Law School Dean Sharlot said, “It's really a very imaginative program, and the credit goes to UTEP. We have urged other colleges in Texas to use this as a model.”

Hopwood also cut off financial aid targeted at minorities, but two scholarship programs have been created at UT-Austin to fill the vacuum. Started two years ago, the President’s Achievement Scholarship is for students who perform well academically and also score high on an adversity index that includes socioeconomic factors, such as attending a high school that is not well funded and where overall SAT scores are low. “If students do well in comparison to their peers, then they get a bonus for that as well,” explained Vick. So far, the university has given out close to 400 of these four-year scholarships, ranging from $1,000 to $5,000, with more than half going to Hispanics.

The second four-year scholarship program started last year, is the Longhorn Opportunity Scholarship. In this program, university officials, and in some instances even the president of UT-Austin, visited inner city schools in Houston, Dallas, San Antonio, and Laredo to recruit students. At these schools, the university promised to give out Longhorn Scholarships worth $4,000 to at least three students who graduated in the top 10 percent of their class. “It really got their attention and got students and teachers excited,” said Vick. “It also brought in students who then qualified for the President’s Achievement Scholarship as well.” So far the university has awarded 100 Longhorn Opportunity Scholarships, all to minority students.

And in yet another financial aid effort, alumni and other private donors have taken the lead. The Ex-Students’ Association of UT-Austin, led by Class of 1999 graduate Larry Temple, has raised more than $4 million for law school and undergraduate scholarships given out through the Texas Leader Scholarships. Because the money is raised and held by a private foundation, the money can be taken into account when awarding the scholarships. “We feel that a racially diverse student body is essential to the future leadership of Texas, and we need to be able to compete with other major universities for these top students,” said Temple when the scholarships were announced in October 1997.

And in another dramatic move that year, the Texas legislature helped level the playing field for minorities by passing a law requiring the state’s public universities admit the top 10 percent of Texas high school graduating seniors. Sponsored by Congresswoman Leticia Van de Putte and Senator Juan Chapa, the bill was aimed at offering encouragement to students in the wake of Hopwood. “The message is that if they have the academic ability, they certainly will be considered,” said Chapa. “We have to tell students that the universities are not closed.” To draw more attention to this new opportunity, this fall a letter is going out from presidential contender Governor George W. Bush, who signed the measure into law, urging top high school graduates to take advantage of it.

As affirmative action continues to be attacked through lawsuits aimed at other universities, these initiatives can serve as a strong model of how to keep campuses diverse. Reflecting on the demographics at the law school, Dean Sharlot said, “It would take something to get the African American students back. And I can’t blame them for choosing Harvard or Yale over us. But with the Mexican American population, it’s different. Most are from Texas, and we have managed to keep enough enrolled so there’s a feeling of support. I’m hopeful that over time the Mexican American student enrollment in our law school will get back to where it was.”
Educators in College Helping Hispanics Onward

As a youngster growing up in Ohio, Melissa Cardenas always knew that she wanted to attend college.

But as time came to write out her college “wish list,” Cardenas didn’t think to put down a school of the size and scope of Ohio University. It wasn’t that she was intimidated by such an immense institution; it was just that for a student coming from the small, tranquil grounds of parochial school, joining one of 18,000 students on a campus hadn’t really entered Cardenas’ thought process.

But a longtime family friend, someone who had known Cardenas since the days of algebra and school lunches, had other ideas. As a founding member of Educators in College Helping Hispanics Onward, Juana Sanchez knew full well that bigger and better educational opportunities awaited Cardenas—if only she knew how to look for them.

So Sanchez introduced Cardenas to ECHHO, a nexus of representatives from an array of colleges and universities across Ohio. She took Cardenas to one of ECHHO’s college fairs. Then she took her to another. Soon, Cardenas had Ohio University at the top of her “wish list.”

“I remember going to some ECHHO fairs, which exposed me to not only Ohio University but also higher education in general,” recalls Cardenas, who four years later had a college degree from Ohio U, a degree she knows she owes in large part to Sanchez. “Juana Sanchez was so adamant about me going to college and really making me interested in college, and those kind of things are now what I got to Ohio University. Just the mentorship and the influence that she had over my life really had a big impact on me.”

Such an impact that after graduation, after landing an assistant director of admissions position at Kent State University, Cardenas became the school’s ECHHO representative. Soon she returned to her alma mater to work as assistant director of admissions, and she quickly became the school’s ECHHO rep. And today, at the tender age of 25, Cardenas is paying back ECHHO in the ultimate way—she is serving as its president.

“After becoming involved in the organization, I just had a real sincere desire to get involved and help the communities where there are a lot of Latino youth,” Cardenas says. “I really wanted to get involved.”

Her involvement brings a smile to the face of Dr. Ronaldo Andrade, the man who first dreamed up the ECHHO program some 16 years ago. Andrade, who refuses to be called ECHHO’s “founder,” says he merely saw the need for such a group and passed the word on to others in higher education, around him. “I suggested it to other people, and they ran with it,” says Andrade, an associate professor of ethnic studies at Bowling Green University.

To Andrade, ECHHO needed to address two major problems facing Hispanic education in Ohio. “One is that there are very few faculty and very few administrators who are Mexican Americans, or Latino, and therefore we are really isolated,” Andrade explains. “I thought there was a need, especially for admissions people talking with each other.” That, unfortunately, is a very difficult thing to make happen. In the competitive world of higher admissions departments competing for top students rarely reveal trade secrets. Andrade wanted to change this by starting the schools to put their egos on the line for once and think of what was best for the students—a surprisingly simple concept.

“Let the university be secondary, let be first,” Andrade announced. “We [leges] do not know what the other or especially when you deal with administering programs for students. So we cut our own throat by not cooperating.”

Not only did Andrade think that the adversarial admissions department cooperation was so far as to be a believe should encourage each other.

“Because we are so isolated and few of us, we need to know each other. We need to encourage each other; we back each other. That was the main thing we faced, and we still do.”

Since its first steps back in 1983, ECHHO indeed come a long way in addressing issues. Today, the volunteer organization includes 90 institutions and other charitable organizations in Ohio, Indiana, Michigan, and among its members. From the $100 membership fee that entitles the schools and organizations to participate in all nine ECHHO college fairs in September, ECHHO is able to award more than $200 to defract the cost of travel and other necessities each year.

While the scholarship money isn’t enough, ECHHO sees its purpose going far beyond that. By bringing students face to face with their educational opportunities at the fairs, and by being able to answer such questions about the college education process, sees itself as a gateway to its member colleges.
"The impact its had—I don't think its necessarily from the scholarships given out," says Ricardo Lucio, who was at the very first ECHHO meeting with Andrade back in 1983, when it was just the two of them and they other reps from Ohio State University. "I think its biggest impact is the information and the way it's delivered to the students. That information is what helps students grow and prosper."

Lucio, who served two terms as ECHHO president earlier this decade, can remember when the ECHHO coffers were bare and when the treasurer had no money to take care of.

"I decided to hit my institution up for some money," recalls Lucio, who for 18 years worked as associate professor of Spanish at both the University of Findlay and Ohio University. "Finally some of the other representatives went to their institutions and asked them for donations.... Today, it carries a $9000 budget. It's not much, but it covers expenses."

In 1994, ECHHO's presidential torch was passed to David Garcia, assistant director of admissions at Bowling Green. Garcia admits that he "had no clue" what ECHHO was about when he began working at Bowling Green in 1992, but "then I heard one of their guest speakers talking about how to get into college and how to get financial aid, and I thought, wow, this is neat... I soon found out about the work they do and how they are involved with Hispanic youth."

Garcia, who is still involved with ECHHO, likes where the organization is going in the new millennium. "Overall, I think ECHHO has reached a point of state wide recognition. Its membership is very strong, and it's represented by a variety of institutions."

But Cardenas will be the first to tell you that there is still plenty of work to be done. In late August, she was busy preparing for the string of upcoming ECHHO college fairs, enrolling new members, looking for new donors, planning for the group's long-term future, and, oh yeah, taking care of her 9-to-5 admissions duties at Ohio U.

"I hadn't realized how much work really goes into an organization like this," Cardenas says while preparing the agenda for that week's ECHHO meeting. "And because we are year-round, we're always meeting and planning, and those things take a lot of time... It can be stressful."

To ensure that ECHHO didn't lose sight of its long-term goals in the midst of so many short-term responsibilities, it instituted an advisory board at its annual meeting in May. Sanchez and Lucio were all there to offer their sage advice, as were several other of ECHHO's early leaders who could no longer serve in a regular capacity.

Besides forming the advisory board, ECHHO mapped out several of its long-term goals at this year's annual meeting. One was to create a Web site, which is now up and running at <www.eccho.org>.

"What we're trying to do now is create a bilingual English/Spanish resource manual for parents, counselors, and students to resource on the Web so they can get the information they need for applying for college and about the financial expenses," Cardenas says. "One thing we try to do, not only during the fairs but during the year, is to do try to be resource contacts for anyone who has questions about our host schools or, really, college in general."

Some other goals are improving ECHHO's general exposure, increasing attendance at the college fairs (currently about 900 each year), and moving the college fairs from high school to college settings "so students can actually get a chance to see the campus and get exposed to more of the college setting," Cardenas says. The drawback, she quickly adds, is that "when we move away from the high schools, we have to provide transportation."

Which leads to the goal of fund-raising. "It's a huge goal every single year," Cardenas says. "For any organization that's working on a shoestring budget, it's really a big issue. It really ties your hands because there isn't a whole lot you can do... You always have big ideas, but if you don't have the funds, or you don't have the resources or [staff] to do it, then it's very, very tough to get those goals accomplished." But judging by how far ECHHO has come since Dr. Andrade first saw the need for it some 16 years ago, there's no reason to think it can't get those future goals accomplished. Andrade, a native of Mexico who came to the United States and got his Ph.D. from the University of Oklahoma in 1975, is certainly impressed with how far ECHHO has come. "Oh, definitely. Not only where it has gone, but what it has done," he says. "I attended that meeting last spring, and it was so wonderful to see them cooperating and talking with each other, having fun, and really helping the students. In terms of minorities, there are a limited number of students that we have out there, and we're really trying to place the students in the right place. And that's wonderful."
Lillian Ortiz: "Old Soul in a Young Body"

New Dean at MCTC MANCHESTER COMMUNITY-TECHNICAL COLLEGE

BY MARVIN STEWART

W hen Lillian Ortiz was selected out of more than one hundred very strong applicants for a job in education, she became the youngest Latina dean appointed to any community-technical college in the State of Connecticut, and perhaps beyond.

Lillian Ortiz, 35, is a woman on a mission. As the dean of institutional development at Manchester Community Technical College (MCTC) in Manchester, Conn., she is presently charged with expanding the college's development relationships with business and industry. Ortiz seems likely to achieve the same high levels of success in this post as she has in many other endeavors.

Ortiz was the youngest of six siblings, and she loves her family. She is a woman who shares concerns about the quality of life within her community and on the job, where she oversees the scholarship program, which serves diverse populations with socio-economic challenges at MCTC.

Ortiz grew up in the heart of downtown Hartford—the south end, a racially mixed neighborhood. She attended Hartford High School and graduated with the class of 1982. While still in high school, she was the Mayor's Youth Task Force and was selected by Governor Ella Grasso to represent youths within the state at the White House Conference on Families. This trip was very inspirational for Ortiz, who had the pleasure of meeting such celebrities as Vice President Walter Mondale and Coretta Scott King. "After this trip I really got interested in politics, public policy, and how it impacts all Americans," Ortiz said.

Ortiz was very inspirational to Ortiz, who had the pleasure of meeting such celebrities as Vice President Walter Mondale and Coretta Scott King. "After this trip I really got interested in politics, public policy, and how it impacts all Americans," Ortiz said.

Her parents shared her newfound interests and encouraged her to finish high school and make the transition to college. At age nineteen, Ortiz started working on weekends with Center City Churches, a multi-denominational religious organization that serves the homeless, elderly, and youth.

There was a time during high school when her guidance counselor told her that she would not make it to college. "She told me I needed to enroll in secretarial courses because I was not college material." Her determination and strong will to go to college led her to enroll in a college prep program funded by the Department of Education and hosted by Trinity College in Hartford. "I spent out of every summer for this program. I sacrificed all to ensure that I could college-level education," Ortiz said.

After Ortiz graduated, she received six scholarships for her college, Central Connecticut State University, where she studied science.

Ortiz was a generation college: She had achieved what her parents wanted her to do and exactly what her guidance counselor couldn't do.

She says she had a mentor, Charles Jones, who was director of the Educational Opportunities Program, who encouraged her throughout her college years at CCSU.

Ortiz worked two jobs, on campus and the other at Center City Churches (CCC). Her employers at CCC was with the Weekend E Service Program. Every week, she would work with meals to, and provided meals to those in need.

Lillian Ortiz (right) and Connecticut State Rep. Pamela Sawyer

When Ortiz graduated with a B.A. in 1986, she was offered the job as coordinator of the Elderly program, as its director had resigned. "I was so grateful, and

Lillian Ortiz

DEAN OF INSTITUTIONAL DEVELOPMENT

"My success stems from my early exposure to the knowledge and wisdom of the elderly."

Lillian Ortiz, DEAN OF INSTITUTIONAL DEVELOPMENT
Upon resigning from the City of Hartford, Ortiz returned to rescue the Connecticut Puerto Rican Forum, ten years after she left, as the new CEO. The agency was in a $300,000 deficit. Ortiz helped take the Forum out of that deficit, doubled its corporate funding, built new programs, and stabilized the organization.

Ortiz played an active role, too, in putting together the Program for Comprehensive Economic Self Sufficiency (PROMESSA), a collaborative effort between four community-based organizations, The Urban League, Connecticut Puerto Rican Forum, Southerland Community Services, and HART. PROMESSA was the first collaborative ever formed to serve all the communities across the city of Hartford. “We made sure that all neighborhoods were served and people in the city were reached before falling through the cracks,” Ortiz said.

Ortiz secured a grant from the Connecticut Business and Industry Association to fund the collaborative in order for people to receive specialized training. More than $1 million was raised for the agency over the years. Ortiz was instrumental in generating public, private, in-kind services and gifts to reach her goal.

Even with such an impressive resume, Ortiz admits that securing the position as dean at Manchester was a most challenging venture. “My husband brought the job to my attention. It had an uphill battle to serve is a personal burden that I carry with honor, to help people achieve their educational goals and successfully manage college programs that raise funds to support them.”

“Philanthropy is one of the bedrocks on which this country was built. The mission of the Office of Development is to bridge a financial need to educational opportunities for students.”

Already, Ortiz was instrumental in revitalizing the “Evenings of Fine Wines,” a major fund raiser for MCTC that generated more than $90,000 at this year’s auction.

She works with the MCTC Foundation and the Alumni Association to raise money to support scholarships and programs.

MCTC’s new state-of-the-art building program is now under construction at a cost of $61 million. Phase I of the project is a new Learning Resources and Technology Center that will cost $26 million. This building, scheduled for completion by Fall 2001, will include a state-of-the art library, laboratories, and a computer classroom. Phase II of the project is the Arts, Science and Applied Technologies building, which will consist of technology labs, an auditorium, and fine arts studios, scheduled to be completed by Fall 2001.

The Development Office is charged with ensuring that all students are supported with scholarships and programmatic support appropriate to their academic success. In so doing, the office is required to develop corporate networks and linkages that will help to support the equipment and other needs of the new campus.

Ortiz is also responsible to establish and reach the goal of the Chancellor’s Office to raise at least $50,000 for the State Endowment Fund. It is her vision to guarantee that no student will be turned away from MCTC due to a lack of financial resources. “It’s a great challenge because the community college system is no used to raising dollars from grants or corporate funds,” she said. “It’s a new and growing area of development for MCTC.”

Ortiz has been a mentor to the past ten years for young fifth and sixth graders through “The Future Is in Our Hands” program. Presently, she mentors two Latines, Elizabeth and Lisa. She is also a member of the MetroMillennium Projects Management Committee in Hartford, which is an economic development engine for the region.

“My success stems from my early exposure to the knowledge and wisdom of the elderly. I wasn’t challenged by diversity because of my exposure to people of varied socio-economic, educational, religious and racial backgrounds,” Ortiz said.

“Because of my rich experiences in life, I view myself as a well-grounded, spirited individual that some might call an old soul in a young body.”

Manchester Community Technical College campus
Barry University Touts Mendez

Barry University (Fla.) research indicates that there are at least seven Fulbright Scholars among Barry's faculty and administration. Dr. Jesús Méndez is one such scholar of whom Barry is particularly proud.

Through a Fulbright, Méndez traveled to Argentina in 1983 to research Argentine intellectual history and intellectual life during the first half of the 20th century, conducting his studies at the Universidad de Buenos Aires.

One of his memorable moments was reading dust-covered letters and manuscripts written by some of the leading Spanish intellectuals of the 20th century (José Ortega y Gasset, Amerigo Castro, Claudio Sanchez-Albornoz, Ramón Menéndez Pidal, for example) at the archives of the Institución Cultural Española.

Diaz-Veizades and Chang Look at Race Relations

The 1992 Los Angeles riot is sometimes painted as an isolated violent reaction by some in the African American community to the Not Guilty verdict issued in the trial of officers videotaped beating Rodney King.

But University of California-Riverside Professor Edward Chang and Saybrook Graduate School (Calif.) faculty member Jeannette Diaz-Veizades (pictured) point out in their new book, Ethnic Peace in the American City: Building Community in Los Angeles and Beyond (New York University Press), that Latinos, Asian Americans, Whites, and African Americans were involved as victims and assailants in the riot.

The authors present local and international examples of people of different racial and ethnic backgrounds building coalitions, resolving disputes, organizing communities, and moving beyond the stereotypes that focus only on negative interactions between minority groups.

Cuba Scholar Aguilar León at University of Miami

The University of Miami (Fla.) Institute for Cuban and Cuban-American Studies (ICCAS) is offering a non-credit course, geared towards the community, exploring Cuba's history and culture.

Cuban History and Culture, taught by noted Cuba scholar and historian Luis Aguilar León (pictured), is offered together with University of Miami faculty and guest lecturers, covers Cuba's history, music, films, art, and literature. Born in Cuba, Aguilar León is professor emeritus at Georgetown University in Washington, D.C., and a senior fellow at ICCAS.

"This is an opportunity to learn about Cuba quickly yet thoroughly," said Jaime Suchlicki, director of ICCAS.

Moreno Attends Kellogg Institute

Gerardo Moreno, director of the Tutoring and Learning Center at Texas A&M University-Corpus Christi, was one of 40 persons in the U.S. to attend the Kellogg Institute for the Training and Certification of Developmental Educators, held at Appalachian State University (N.C.) this past summer.

The four-week intensive seminar, conducted by the National Center for Developmental Education, concentrated on assessment and placement, program evaluation, teaching, and learning strategies, and academic support services. Moreno was required to implement a program development project in the fall.

To cover part of the cost of the seminar, Moreno received the ALANA scholarship, awarded to an individual who works with underrepresented groups.

Olmos Highlights Hispanic Awareness Month at Central Michigan

Award-winning actor Edward James Olmos (pictured), who has been called the "Olivier of the Latino world," was the keynote speaker during Central Michigan University's (CMU's) 1999 Hispanic Heritage Month Celebration.

Olmos, who produces and directs films and is active in community affairs, gave a multimedia presentation, "Americanos: Latino Life in the United States: A Celebration of Latino Culture.

With the theme "Building Co-Kaleidoscope of Possibilities," the celebration also featured an exhibit of carvings by Manuel Salas; discuss CMU sociology, anthropology, and social chair Rod Kirk, physician Edwin R. American Council on Education President Héctor Garza; and Hispanic and Latino music.

Castaneda's Works Donated to Texas-San Antonio

The University of Texas-San Antonio (UTSA) recently accepted donation, Our Catholic Heritage Texas, 1519-1936, a celebrated seven series by noted Mexican American and author Carlos E. Castaneda.

In the weeks immediately preceding death on April 28, 1999, Mrs. Ilse G. San Antonio approached UTSA about her set of Castaneda's work Downtown Campus Library in memory son, Charles Coleman Griffith, an artist. Her sole heir, Llewellyn Griffith conveyed the gift to UTSA representative.

Also, historian and UTSA Professor Almaraz, Jr. presented a copy of his book of Castaneda, Knight Without Armor, Eduardo Castaneda, 1896-1958.

Junior College Association Names Perez-Greene Associate Director

Dr. Margot Perez-Greene, an Iowa Central Community College administrator since 1995, is the new associate director of the National Institute for Staff and Organizational Development, the nation’s second-largest community, junior, and technical college association, which has 600 member colleges and annually holds the country’s largest conference for two-year college faculty.

Perez-Greene’s mission is to improve communication with and service to the institute’s members and to develop and expand partnerships with agencies, companies, and other entities that help promote teaching and learning.

Cardenas Named Outstanding Leader

Mary Rose Cardenas, a Texas Southmost College (TSC) trustee, was named an Outstanding Local Leader at the John Ben Shepperd Public Leadership Forum at the University of Texas of the Permian Basin. The forum is the only Texas conference to bring together young emerging leaders and established public leaders for the development of leadership skills.

Cardenas is serving her fourth term as chair of the TSC board of trustees. She played a key role in establishing the partnership between the University of Texas (UT)-Brownsville and TSC. She also was instrumental in hiring the first Mexican American woman in the country to become president of a college or university, Dr. Juliet V. Garcia of UT-Brownsville.

Gov. George W. Bush commissioned a Yellow Rose of Texas in her honor for her dedication to expanding higher education in South Texas.

Morales at Manhattan School of Music

Clarinetist Ricardo Morales was a guest soloist in a performance of Carl Maria von Weber’s “Concerto No. 2 in E-flat Major, Op. 74” by the Manhattan Chamber Sinfonia at the Manhattan School of Music (N.Y.). Conducted by Glen Barton Cortese, the concert opened the school’s 1999-2000 performance season.

Morales, a native of San Juan, Puerto Rico, received his artist diploma from Indiana University. He is a faculty member at the Manhattan School of Music and principal clarinetist of the Metropolitan Opera Orchestra, a position held since 1995, when he was appointed at age 21.

Pavia Grateful to Communities in Schools

Fernando Pavia, a systems analyst with the international investment firm Goldman Sachs & Co., loves his work and feels blessed by the friends he has made and the opportunities he has been given. He volunteers for different organizations in Miami, Fla., gives generously to many causes, and hopes to one day get his bachelor’s degree and have a career in sports medicine.

Describing himself as detached and relentless as a teenager, Pavia credits Communities in Schools (CIS), Inc. as well as his grandmother, with enabling him to turn his life around. “I can say I’m a success because of CIS, and I want to give back to my community,” said Pavia.

The mission of CIS, an independent network of more than 141 local and 17 state offices, is to champion the connection of needed community resources with schools to help young people learn, stay in school, and prepare for life. Find out more about CIS at <www.cisnet.org>.

Castillo Leads Klipsch School at New Mexico University

Steven P. Castillo is now the official leader of the Klipsch School of Electrical and Computer Engineering at New Mexico State University (NMSU). A Klipsch School profes-

or, he had been interim department leader since December 1998.

Castillo is a senior member of the Institute of Electrical and Electronics Engineers and has served as advisor to the NMSU student chapter of the Society for Hispanic Professional Engineers. He has a bachelor’s degree from NMSU, and a master’s and doctorate from the University of Illinois.

Vice President Gore Announces Adult Learners Grants

Vice President Al Gore announced new $10 million federal grants to expand access to high quality education for adults. The funds will be provided by the U.S. Department of Education’s “Learning Anytime, Anywhere, Anywhere.”

The National Telecommuting Institute will be able to develop an at-home training program that will prepare people with severe disabilities to perform customer service jobs in "e-commerce" from their homes using the Internet.

Also, the Hispanic Educational Telecommunications System will create a virtual learning community to serve an estimated 100,000 students, that will develop workforce training and counseling as well as courses for academic credit.

Contact <www.ed.gov/offices/OPE/FIPSE/LAAP> for much more information on the grants.

Mangual de Delgado New Bloomfield Dean of Admission

Lourdes I. Mangual de Delgado is the vice president of enrollment management and dean of admission at Bloomfield College (N.J.).

Previously, Mangual de Delgado was dean of student development at Hesston Community College of the City University of New York, where she led three divisions: enrollment management, counseling services, and student life. She has a bachelor’s degree from Hunter College, and has
master's degrees from Columbia University's Teachers College.

President Clinton stresses importance of school construction

President Clinton is renewing his commitment to address school construction and modernization. His School Modernization Bond proposal, which provides $24.8 billion in tax credit over two years to modernize up to 6,000 schools, Clinton's proposal has an estimated cost of $37 billion over five years, and is fully paid for in his budget.

Nationally, there is an urgent need for school modernization. White House officials cited the following: the average school is 42 years old; one third of all schools need extensive repairs, which will require approximately $112 billion; and school enrollment is higher than ever, with a record 53.2 million children enrolled in elementary and secondary schools today.

Mt. Hood Offers Spanish Speaker Certified Nursing Program

A new program at Mt. Hood Community College (MHCC) in Oregon will offer native Spanish speakers a unique opportunity to enter medical field.

The Certified Nursing Assistant (CNA) program will provide 16 weeks of instruction combining supervised clinical experience with traditional CNA training. The objective of the program is to prepare the Spanish-speaking student to take the Oregon State Board of Nursing exam to become licensed CNAs.

The Northwest Health Foundation awarded a $28,504 grant to help fund the CNA pilot program, which will begin winter 2000 as part of El Futuro Abierto: MHCC's support service for Latino students.

Brookhaven in Texas Hooks up with Students in Madrid

World University students from Spain begin studying in the Dallas County Community College District (DCCCD) in Texas via distance learning through the LeCroy Center beginning Spring 2000. Jesús López-Davalillo, president of World University in Madrid, and Rosa Pérez-Sanz, director of international programs, visited Brookhaven College and DCCCD representatives and were excited about the possibilities that will emerge from the relationship between World University and Brookhaven College.

"World University wants to develop a student exchange program, not just for its students coming here, but with Brookhaven's science and faculty studying in Spain as well," said Luis Iglesias (photographed), client manager for Brookhaven's Workforce and Continuing Education Division.

Penn State Study Centers on Prenatal Care for Puerto Ricans

Contrary to common perceptions, psychological factors, rather than the liability of migration from Puerto Rico, bar Puerto Rican women living in the United States from access to adequate prenatal health care, according to a team of Pennsylvania State researchers.

World University students from Spain begin studying in the Dallas County Community College District (DCCCD) in Texas via distance learning through the LeCroy Center beginning Spring 2000. Jesús López-Davalillo, president of World University in Madrid, and Rosa Pérez-Sanz, director of international programs, visited Brookhaven College and DCCCD representatives and were excited about the possibilities that will emerge from the relationship between World University and Brookhaven College.

"World University wants to develop a student exchange program, not just for its students coming here, but with Brookhaven's science and faculty studying in Spain as well," said Luis Iglesias (photographed), client manager for Brookhaven's Workforce and Continuing Education Division.

Penn State Study Centers on Prenatal Care for Puerto Ricans

Contrary to common perceptions, psychological factors, rather than the liability of migration from Puerto Rico, bar Puerto Rican women living in the United States from access to adequate prenatal health care, according to a team of Pennsylvania State researchers.
Dr. Nancy S. Landale, professor of sociology, Dr. R. Sal Oropesa, associate professor of sociology, and doctoral students in sociology Michelle Inkle and Bridget K. Gorman are co-authors of the paper, "Prenatal Care among Mainland Puerto Ricans," which was presented at the annual American Sociological Association meeting.

"Among the most frequently mentioned barriers to adequate prenatal care for Puerto Rican women are those that signal psychological uncertainty about the pregnancy itself," said Oropesa (pictured with Landale).

In the News at University of Houston

The Recovering the U.S. Hispanic Literary Heritage project, a national project to reconstitute the literary legacy of U.S. Hispanics from colonial times to 1960, based at the University of Houston (Texas), received $500,000 from the "Save America's Treasures" program of the Department of the Interior. The award will be used to preserve 1,000 literary texts by Hispanic authors of the United States from 1780 to 1940.

The Arte Público Press Web site, <www.arpe.org>, has a Recovering the U.S. Hispanic Literary Heritage link, which is continually updated.

Kids Benefit from Unique Camp at Colorado Mountain

Forty 8th and 9th graders from western Colorado attended the week-long First Ascent Youth Leadership Camp held at Colorado Mountain College's (CMC) Timberline Campus in Leadville.

The camp program, founded five years ago by CMC Foundation Specialist Mariana Velasquez-Schmahl, incorporates physically and mentally challenging situations, set in the wilderness surrounding Leadville, with the goal of teaching teens teamwork, communication skills, and goal setting. (Pictured, Leadville resident Jasmine Marquez participates in rock climbing exercises.)

Fernández on Miracosta Governing Board

Rodolfo "Rudy" Fernández, who completed a six-year term as director of the Governor's Office of California-Mexico Affairs, California Trade and Commerce Department, has joined the Miracosta College Governing Board in California.

"I have received a lot from the community, both professionally and personally, and that is why I believe that in being active in professional and social organizations, I can give something back to the community," said Fernández. "I have a great interest in helping the youth of our country get a good education because they represent the future of this country."

Fernández's affiliations include the Mexican-American Business and Professional Association, Border Trade Alliance Board, San Diego Youth Symphony Board, and the District Export Council of the U.S. Department of Commerce.

Northeastern Receives Award from Historical Commission

Northeastern University (Mass.) received a $153,155 award from the National Historical Publications Records Commission, a division of the National Archives and Records Administration. The award will support "Preserving the History of Boston's Under-Documented Communities," a two-year project to identify, locate, secure, and make accessible the most important and at-risk historical records of four undocumented communities in Boston: African American, Chinese, Puerto Rican, and gay and lesbian.

"Latino Life in the U.S." exhibit at NYC Museum

The Museum of the City of New York presents "Americans: Latino Life in the United States," a photographic exhibition that pays tribute to the people and traditions that distinguish Latino culture as a unique and important part of American culture.

Presently running through Jan. 2, the exhibition features 120 photographs by 30 prize-winning photographers from around the county, and captures the breadth and variety of the Latino experience as well as the pride of the people. (This photo, taken by Rita Rivera, is of police officer Lisa Demetriou and her son at the Puerto Rican Day Parade in New York.)

"Americans: Latino Life in the United States," a project of Olmos Productions, was organized by the Smithsonian Institution Traveling Exhibition Service and the Smithsonian Center for Latino Initiatives.

Pan American Hospital Endows Teaching Chair at Miami-Dade

Pan American Hospital donated $45,000 to Miami-Dade Community College (M-DCC) in Florida to create an Endowed Teaching Chair. Carolina Calderín (pictured), Pan American Hospital CEO, made the presentation to Roberto Martínez (l.), M-DCC board of trustees chair, and Dr. Eduardo J. Padrón (r.), M-DCC president.

The hospital’s gift will be matched with $30,000 from state funds to create a $75,000 endowment that will establish the Pan American Hospital Endowed Teaching Chair with an annual award to one of M-DCC’s most outstanding educators, beginning in 2002.

"I am proud to strengthen M-DCCs commitment to providing the best education possible by supporting our most talented educators and inspiring others to follow their example," said Calderín.

Pew Grant Awarded to Community College Consortium

Recognizing the increasing importance of community colleges in the country's higher education system, The Pew Charitable Trusts awarded a $204,000 grant for a national project to establish new standards for the community college sector. The grant was awarded to the League for Innovation in the Community College: a consortium of commu-
nity colleges (established in 1968) that serves as a project incubator and facilitator of experimental work for the entire community college sector.

Jerry Moskus, 1999 chair of the League's board of directors and president of Lane Community College (Ore.), said the support from Pew enables the League to extend its efforts to help community colleges become better learning-centered institutions.

**Students Receive Laptop Computers at Cal State-San Marcos**

More than 40 low-income first-year students at California State University-San Marcos received new laptop computers as well as training and long-term technical support. Each student will have free use of his/her computer while enrolled at the university. Those who leave before graduation are required to return the computers. When they graduate, the computer becomes theirs.

University President Alexander Gonzalez said, "We must remember that computers are beyond the reach of some of our students. This program allows us to ensure that low-income students are not bypassed by the technology they need to succeed."

**Colorado-Boulder Awarded $600,000**

The Cooperative Education and Internship Program at the University of Colorado-Boulder was awarded approximately $600,000 to continue the National Institute for Standards and Technology Professional Research Experience Program (NIST/PREP).

The program provides outstanding work and learning experiences for undergraduate, graduate, and postdoctoral students at the NIST lab in Boulder. Graduate and postdoctoral students work with faculty on selected projects.

For the past six years, participation in NIST/PREP was limited to local universities. This year marks the first time that the process is open to universities nationwide.

**Scientific Research Grant Awarded to California-San Marcos**

The College of Arts and Sciences at California State University-San Marcos was awarded a $3.6 million, four-year grant to advance scientific research. Funding comes from the National Institutes of Health, Institute of General Medical Sciences, under the Minority Biomedical Research Support program.

"This grant will enhance the university's ability to conduct cutting-edge research in the science division," said Dr. Victor Rocha, dean of the College of Arts and Sciences and program director of the grant. "Building that infrastructure will allow students to participate in modern, state-of-the-art research, which will prepare them to be highly competitive for prestige graduate and medical schools around the country."

**California Lutheran Celebrates Diversity**

California Lutheran University (CLU), in celebration of diversity on campus, hosted a production of Colin Cox and Fran de Leon's "Faces of America." The performance, produced by Will and Company, was part of Diversity Ties, an annual event that emphasizes the value of diversity to CLU.

De Leon (pictured) has received high acclaim for her one-person performance of the emotionally charged play depicting the true stories of nine young ethnically diverse Americans.

On Oct. 28, CLU will celebrate Dia de los Muertos, a traditional Latin celebration that usually takes place on Nov. 1 (All Saints Day) to remember loved ones who have died.

**Texas-Kingsville Represented a Youth Convention**

Texas A&M University-Kingsville's 5th Programs students made presentations at the League of United Latin American Citizens National Youth Convention. The students' main focus was to let area youth know that they do not have to be honor students or in the top 10 percent to succeed in college.

Marcos Benavides (pictured), past SSI Support Services program coordinator, College Assistance Migrant Program coordinator at Texas A&M-Kingsville, coordinated the student presentations.

Student participants included Alvarado, Marcelo Mata, and Villagomez. Graduate student Juan Garcia attended.

Mrs. Consuelo Martinez, Texas Kingsville Special Programs director, presented on Mexican American Education.

**News from LaGuardia Commun College**

Fiorello H. LaGuardia Comm College (LCC) in New York receive a $2 million Department of Education grant over the five years to help close the computer gap predominantly low-income students of whom are Hispanic. The grant, for training of faculty and adjuncts, is designed to provide access to computers to computer science and technology mentors in order to help the student learn precalculus and programming. The grant also includes a $1 million grant for the workplace.

A multimillion-dollar Department Education grant designed to advance the achievement of middle school and high school youth in Western Queens over the five years was awarded to LCC and the Q Urban Partnership. The funds for the Q Urban Project will help provide for teacher training programs and additional support services on the establishment of meaningful connections between students and adults in the city.
Ballet Los Pampas at Westchester

State University of New York-Westchester Community College, in tribute to Hispanic Heritage Month, hosted “Argentine Tango and Folklore,” a performance of Argentine music, folk dance, and tango by Ballet Los Pampas. Founded in 1990, the company combines traditional and contemporary dance forms to create a gliterring extravaganza of sight and sound.

Drawing upon Latin American cultures from the Andes Mountains through the Argentine plains to the contemporary city of Buenos Aires, the dancers performed the Malambo, the Candombe, and the Zamba.

Valencia Awarded $2 Million Federal Grant

Valencia Community College’s (Fla.) Osceola Campus was awarded a $2,090,600 grant from the U.S. Department of Education. The five-year Title V grant will enable the college to continue to advance its learning-centered initiative, focused on measurable improvements in student performance.

The grant gives formal recognition to the Osceola Campus as a “Hispanic-Serving Institution.” Such a designation requires that Hispanic enrollment exceed 25 percent and that more than 50 percent of those students be financially needy. The Osceola Campus Hispanic enrollment is 28.9 percent.

“Continental Harmony” Project to Celebrate Millennium

Fifty composers, creating 50 original musical works, and hundreds of performing artists will join host organizations to form “Continental Harmony,” a nationwide musical celebration of the millennium. Each commissioned piece will be given a premiere performance between Dec. 31, 1999, and December 2000. Performances will include jazz, choral, musical theatre, and orchestral events. Nearly 40 performances are expected to take place on July 4, 2000.

Puerto Rican composer Raymond Torres-Santos (pictured), a Universidad de Puerto Rico professor, is the lone Latino composer to be chosen. He will work with the Newark Boys Chorus and New Jersey Philharmonic Glee Club for the project.

Funding for the project comes from the National Endowment of the Arts, the John S. and James L. Knight Foundation, Rockefeller Foundation, Land O'Lakes Foundation, William and Flora Hewlett Foundation, the Minnesota State Arts Board, and Ohio Arts Council.

District of Columbia Celebrates Hispanic Heritage Month

The following Hispanic Heritage Month events took place in Washington, D.C.:

• Raúl Julia Awards—The National Hispanic Foundation for the Arts recognized newspapers’ coverage of Latinos.

• Hispanic Heritage Youth Awards—Six Hispanic high school students, headed to Ivy League colleges, were honored.

• Congressional Hispanic Caucus Institute Gala —“Building Coalitions: A Kaleidoscope of Possibilities” was the theme.

• Hispanic Educational Excellence—A seminar, “Overview of Latino Education,” was presented by the White House Initiative on Educational Excellence for Hispanic Americans.

• Congress of Congress—Keynote speaker José Gestal lectured on “Hispanics Climbing the Corporate Ladder.”

Politics and Education in Argentina, 1946-1962

by Mónica Esti Rein

Based on extensive research in archives in Argentina and the United States, this book, written in English, deals with the way in which Argentina’s educational system was used for political purposes.

The Quest for Security in the Caribbean: Problems and Promises in Subordinate States
by Helaw Lloyd Griffith

This book examines security problems of the English-speaking Caribbean, also known as the Commonwealth Caribbean. The area’s security concerns have received little comprehensive attention in the past, with writers either doing country case studies or focusing on selected issues. Otherwise, Caribbean security problems have been examined as tangents to the interests of the United States or of European powers.

Latin America
by Román de la Campa

To what degree is the Latin America that is studied in U.S. academies actually an entity “made in the U.S.A.”? In this book, the author argues that there is an ever-increasing gap between the political, theoretical, and financial pressures affecting the U.S. academy and Latin America’s own cultural, political, and literary practices.

Book Review

by Charnel Anderson

Charles Edward Magoon: The Panama Years, by Gustavo A. Mellander and Nelly Maldonado Mellander. Editorial Plaza Major (P. O. Box 3148, Guaynabo, Puerto Rico 00970-3148; e-mail <patrigut@prtc.net>), 1999. ISBN# 1-56328-155-4. $9.95 paper.

The U.S. has been turning over its Canal interests and properties to Panama for the past 20 years. That process ends on December 31. The transition has generated interest in the Panama Canal. What did the U.S. succeed where France had failed? Who helped create the framework, shape the policies and understandings between the U.S. and the Republic of Panama that would last for nearly 100 years?

In 1902, Columbus visited what is now the Republic of Panama. He had no idea whether a water passage existed, nor did he imagine that parts of the Isthmus were only 50 miles wide.

Many followed Columbus’ dream and failed as he had. Finally, Vasco Nuñez de Balboa in 1513 trekked across the steamy, hot isthmus to gaze upon a vast waterway that we now call the Pacific Ocean.

Some trace U.S. interest in a passageway to the late 1700s. But it was the California gold rush in the 1850s that peaked U.S. interest. Thousands found it easier, cheaper, and quicker to sail to the Caribbean side of Panama, walk or ride a donkey across the isthmus to the Pacific, and there board a ship for California.

The U.S. secured diplomatic agreements with European and Latin American countries, strengthening its role on the Isthmus. And worked hard to deter a European foothold.

In the 1880s, the French tried to build a canal in Panama. Within eight years, 20,000 died, millions were lost, and reputations were wrecked. France gave up. The Spanish American War of 1898 highlighted the need to move a navy quickly between both oceans, increasing U.S. interest in a canal. And when the assassination in 1901 of President William McKinley elevated the energetic, tradition-busting, action-oriented Theodore Roosevelt into the White House, U.S.-Latin American relations would never be the same, for Roosevelt wanted a canal.

In 1903, with the clear involvement of high-ranking U.S. citizens and public officials, Panama declared its independence from Colombia. The U.S. turned away Colombian troops and recognized Panama’s independence.

Thousands of North Americans went to the Isthmus and within ten years would achieve one of the greatest engineering feats of all time.

One of many involved was Charles Edward Magoon of Nebraska, an affable young lawyer and Washington bureaucrat who wrote the definitive manual on the administration of overseas possessions, implemented in Cuba, Puerto Rico, Guam, and the Philippines—all prizes of the 1898 war.

Appointed general counsel of the First Isthmian Canal Commission in 1904, Magoon visited Panama and reported back to Roosevelt. His astuteness and diplomacy were not lost on those with power. He was appointed both governor of the Canal Zone and U.S. Minister Plenipotentiary and Envoy Extraordinary to the Republic of Panama. His decisions and actions influenced not only the building of the canal but the diplomatic relations between both countries. Yet nothing had been written or published on this period of his life. Given his critical role in formulating long-term strategies, his “invisibility” was not warranted. He was truly the forgotten Isthmian.

Thanks to the Mellanders, the precedents that he established are now carefully documented. As governor, he launched a multiplicity of institutions that functioned through the long U.S. hegemony in the Canal Zone. As minister, he created procedures that set the pattern by which the U.S. and Panama interacted.

Much of what people recall as being the Canal Zone grew out of the precedents Magoon established: healthy sanitary conditions, superior salaries and good living accommodations for the canal workers, reasonably priced daily necessities, a public school system, and a civilian government, among others.

As minister, Magoon’s contributions were similarly impressive and long-lasting. He helped smooth ruffled feathers, addressed disputes diplomatically, and helped draft the Taft Memorandum, a key document that established working parameters between the U.S. and Panama that remained in place for more than 50 years.

Magoon attended the first elections ever held in the republic, in 1906. His towering presence, his careful hands-off stance but nevertheless high visibility during those elections set the tone for decades.

Gustavo Mellander, an accomplished and meticulous historian and recognized authority on Panama, is well known among “Panama hands” for his noteworthy book, The United States in Panamanian Politics: The Intriguing Formative Years, selected as a “best seller” in the United Nations when it was first published.

For this volume on Magoon, Nelly Maldonado Mellander, his wife and fellow professor at George Mason University, also a serious and committed scholar, helped him conduct primary and secondary research that heretofore examined by other researchers.

They relied heavily on primary sources such as Magoon’s annual reports, his State Department correspondence, Congressional records, private papers, newspapers and periodicals of both countries, and archival material in Panama and the United States. These rich and diverse sources give us a lively portrait of Magoon’s years and contributions in Panama.

This book is good history and a good read. Good because it is historically accurate and good because it is well written. For anyone wanting to know more about how U.S.-Panama relations developed and how those early pioneers lived in the Canal Zone—this is a must read. We are in the Mellanders’ debt.

Dr. Anderson, professor of Latin American history at Inter American University of Puerto Rico for 30 years, has traveled extensively throughout Latin America. He received his Ph.D. from George Washington University.

CALL FOR PAPERS

National Association of Hispanic and Latino Studies

National Conference
February 21-26, 2000
Houston, Texas

Abstracts, not to exceed two pages, should be submitted which relate to any aspect of the Hispanic and Latino experience. Subjects may include but are not limited to literature, demographics, history, politics, economics, education, health care, fine arts, religion, social sciences, business and many other subjects. Please indicate the time required for presentation of your paper (25 minutes/45 minutes).

Abstracts must be postmarked by:
November 23, 1999

Send Abstracts To:
Dr. Lemuel Berry, Jr.
Executive Director, NANAS
Morehead State University
212 Rader Hall
Morehead, KY 40351
Telephone: (606) 783-2650
Fax: (606) 783-5046

OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT GRADUATE FELLOWSHIP PROGRAM

Sponsored by U.S. Department of Energy and administered by Oak Ridge Institute for Science and Education

Benefits:
• Payment of tuition and fees not to exceed $8,000 per year.
• Monthly stipend of $1,200.
• Required summer practicum at a U.S. Department of Energy National Laboratory.
• Renewal awards for eligible participants.

Eligibility:
• U.S. Citizen.
• Students with undergraduate degrees in the physical and life sciences, mathematics, or engineering; including graduate students who have not progressed to the point of having an approved thesis or dissertation topic.
• Attend a Participating University.

Deadline: Monday, January 31, 2000

Contact:

GATES MILLENNIUM SCHOLARS PROGRAM
SIX ADVERTISED POSITIONS

Executive Director
The Executive Director will manage the Gates Millennium Scholars Program, a bold philanthropic initiative recently created and funded with an historic gift from the Bill and Melinda Gates Foundation to provide scholarships and leadership opportunities to academically talented minorities with demonstrated financial need.

Reporting to the President and CEO of The United Negro College Fund, the Executive Director will be responsible for the overall administration and management of the Gates Millennium Scholars Program for African American, Hispanic, Native American and Asian citizens. The fifty-five year old United Negro College Fund currently administers more than 400 scholarships annually as well as providing curriculum, faculty development, and technical assistance to historically black colleges. Through its established administrative system, The College Fund will provide general business services support to the Gates Millennium Scholars Program.

Specific desired experience and attributes include:
- At least eight years of higher education management experience, including a proven record of achievement as a builder of programs serving diverse constituencies;
- Outstanding communication, interpersonal and organizational skills including demonstrated success in fostering interagency cooperation;
- Good analytical skills including technological literacy and knowledge of statistical techniques and research methodology;
- Commitment to fiscal responsibility;
- A goal-oriented, energetic personal style with demonstrated familiarity with and sensitivity to minority higher education issues.
- An (earned) advanced degree is preferred, and a bachelor’s degree is required

Assistant Executive Director
Reporting to the Executive Director, the Assistant Executive Director will manage the application process for the Gates Millennium Scholars Program.

Specific desired experience and attributes include:
- At least five years of higher education management experience in the area of financial aid;
- Good communication, interpersonal and organizational skills;
- Demonstrated skills in fostering interagency cooperation;
- Good analytical skills including technological literacy;
- The ability to work with diverse constituencies;
- A master’s degree.

Four (4) Program Assistants
Reporting to the Executive Director, the Program Assistants will assist in managing the application process for the Gates Millennium Scholars Program.

Specific desired experience and attributes include:
- At least three years of experience in the area of financial aid in a college or university;
- Good communication, interpersonal and organizational skills;
- Technological literacy;
- The ability to work with diverse constituencies;
- A bachelor’s degree.

For each of the positions, candidates who represent the diverse constituencies served by the Gates Millennium Scholars Program are encouraged to apply.

Applications and nominations in confidence to:

AMERICAN PLURALISM AND THE CIVIC CULTURE:
CHALLENGES AND PROPOSALS

This national conference at Smith College on race and ethnicity will bring together academic specialists and social activists to confront the challenges of diversity in American society—relations between old minorities and new immigrants, intra-group tensions of class, gender and age, and the ultimate challenge of making a "more perfect union." The conference goal is the development of public and educational policies for the next century.

For more information, please contact the Office of College Relations, Garrison Hall, Smith College, (413) 585-2170. The conference is supported by The Coca-Cola Foundation and the Office of the President, Smith College.

Dean of Liberal Arts

(Non-Unit Professional Position)

GENERAL STATEMENT OF DUTIES: BHCC seeks a committed and energetic educator who desires to work in a dynamic changing environment, as a team member with the Vice President and other deans in the management of the academic area. The position requires long hours but offers the opportunity to establish the institution as a leader in diversity, technology and learning.

RESPONSIBILITIES: Reporting to the Vice President of Academic and Student Affairs, the Dean's responsibilities include managing the Liberal Arts Division (English, Foreign Language, English-as-a-Second-Language, Behavioral Science, Social Science, Humanities, and Community & Public Service), overseeing academic programs, evaluating faculty and staff, developing and implementing academic policies and strategic plans, enrolling and managing the division budget, encouraging professional and curriculum development, and in general providing innovative leadership to the division.

QUALIFICATIONS: Master's degree in Liberal Arts, Doctorate preferred; teaching and administrative experience in a college setting, preferably in a community college, demonstrating outstanding accomplishments; demonstrated leadership skills, particularly with faculty; competent administrative, computer and policy implementation skills required.

PROVEN ABILITY TO: Work well and lead faculty in strengthening existing and developing new programs; integrate technology, issues of diversity, global awareness and experiential learning into the curriculum; encourage and foster a student centered and diverse campus approach to teaching; encourage team approach in the management of departments and programs, and provide leadership in a strategic planning environment; work in an environment in which change is a highly valued cultural characteristic; work in a diverse environment with a willingness to utilize differences of students, faculty and staff to enhance individual learning and that of the college community; work as a partner with the Vice President in providing leadership to the academic area.

SALARY: $60,000.00-$80,000.00 yr.

Assistant Dean for Enrollment Management/Registrar

(Non-Unit Professional Position)

GENERAL STATEMENT OF DUTIES: BHCC seeks a committed and energetic educator who desires to work in a dynamic changing environment, as a team member with the Dean of Students in the management of the student services area. The position requires long hours but offers the opportunity to establish the institution as a leader in diversity, technology and learning. The Assistant Dean for Enrollment Management/Registrar assists the Dean of Student Affairs in the administration of enrollment services within the Division of Academic and Student Affairs, and in collaboration with the Division of Administration and Fiscal Affairs. The Assistant Dean reports to the Dean of Student Affairs.

RESPONSIBILITIES: The Assistant Dean of Enrollment Management/Registrar is the certification officer for the College and is responsible for student academic record maintenance including generation, storage, control, and security of all student records; chairs the Enrollment Committee that consists of directors of admissions, financial aid and advising, the individual will provide enrollment and technology leadership to all offices associated with enrollment; plans, organizes, and directs registration process, and collaborates with related college personnel to implement an effective and efficient enrollment management system; ensures strong and positive customer service philosophy and manages staff in a manner that ensures student-friendly service; assists the Dean of Student Affairs in developing and maintaining Division-wide policies and systems.

QUALIFICATIONS: Master's degree required in higher education, management, or a related field; Doctorate preferred; administrative experience with student services required; experience required relating to records management in registrar’s office; experience with computerized student and administrative information systems is required.

PROVEN ABILITY TO: Demonstrate exemplary management, supervisory, and organizational skills; demonstrate excellent oral and written communication, and interpersonal skills; provide strong, positive, and proven customer service philosophy; work with a diverse student population.

SALARY: $55,000.00-$60,000.00 yr.

To apply in confidence, interested candidates should send a resume, cover letter and a statement addressing each of the qualifications and proven abilities to:

Bunker Hill Community College
Molly B. Ambrose
Director of Human Resources and Labor Relations
250 New Rutherford Avenue
Boston, MA 02129-2925

Review of Applications will begin on NOVEMBER 1, 1989

Bunker Hill Community College is an Affirmative Action/Equal Opportunity Employer. Women, people of color, individuals with disabilities and others are strongly encouraged to apply.
Consortium for a Strong Minority Presence at Liberal-Arts Colleges
Minority Scholar-in-Residence Program

With a view toward encouraging African-American, Asian-American, Hispanic-American, and Native American scholars to consider teaching and research careers at small liberal-art colleges, the Consortium for a Strong Minority Presence at Liberal-Arts Colleges, an association of selective undergraduate institutions, has established the Minority Scholar-in-Residence Program. Applications are invited for the dissertation fellowship program or the post-doctoral fellowship program in all disciplines of the liberal arts and engineering. Applicants should be working toward the Ph.D. or the M.F.A. degree, or should have received the degree no more than five years before application.

The Minority Scholar-in-Residence will receive a stipend equal to the typical salary for beginning instructors or assistant professors at the host institutions. Scholars will be expected to do some teaching and research, and to participate in other activities under the supervision of a mentor. It is hoped that the scholars will, upon completion of their residency, be strong candidates for tenure-track positions at member institutions of the consortium or at similar institutions.

Scholars must be citizens of the United States and have had no more than five years of teaching or relevant work experience before receiving the award. Ideally, applicants for the dissertation fellowship program should have completed their research before the beginning of the fellowship year.

Among the member institutions of the Consortium, the following offer to sponsor minority scholars during the 2001-02 academic year: Bowdoin, Bryn Mawr, Carleton College, Colorado College, Connecticut College, Grinnell College, Haverford College, Macalester College, Mount Holyoke College, Oberlin College, Occidental College, Pomona College, Rhodes College, Southwestern University, Swarthmore College, Trinity College, University of the South, Vassar College, Wellesley College, Wheaton College, and Williams College.

The brochure describing the program and an application form may be requested by writing to Jean Cousins, Administrative Assistant, CSMP, Grinnell College, P.O. Box 805, Grinnell, IA 50112-0810.

Application deadline: December 1, 1999

Active screening begins on December 15, 1999 and will continue until the positions are filled. Letters of interest indicating position applied for, a curriculum vitae, and two references should be sent to the Human Resources Office, Bryant College, 1150 Douglas Pike, Smithfield, RI 02917-1284.

Applicants should have a strong commitment to excellence in teaching, research and service, and to intellectual contributions, as defined by AACSB standards. Teaching experience and a demonstrated record of continuing publications in referred journals required.

Excellent benefits, and AACSB-accredited. Bryant College is an Equal Employment Opportunity/Affirmative Action Employer, and an institution committed to diversifying its faculty.

Coordinator, Special Learning Services

Washtenaw Community College

A comprehensive two-year college dedicated to student, community, and staff success is presently seeking an individual for the position of Coordinator, Special Learning Services. Note: This position is funded with outside funds and shall not be construed beyond the life of such funding. No continuing employment rights are inferred. This individual is responsible for managing the day-to-day operations of the Special Learning Services office. The Coordinator is responsible for providing support services to students enrolled in federally reimbursable vocational educational programs who require special assistance in order to successfully complete occupational programs as well as students in general education who meet grant-specific criteria. The College is located in Ann Arbor, MI, a community of over 100,000 whose growth and vitality is supported through a cultural enrichment of the arts, entertainment, Bi Ten Sports, and the surrounding metropolitan area.

The successful candidate must possess a Masters degree in counseling, special education, or related field; counseling preferred; equivalent of two years successful work experience in counseling and/or working with foreign and/or differently abled populations. A demonstrated experience and skill in program planning and grant-writing.

Initial annual salary range is $35,200-$38,720 on a twelve month base: dependent upon education and related experience with numerous fringe benefits.

Deadline for receipt of WCC official application form is November 19, 1999.

Interested persons should send completed WCC application form with credentials (transcripts) to the Office of Human Resource Management, Washtenaw Community College, PO Box D-1, 4800 E. Huron River Dr., Ann Arbor, MI 48106. (734) 973-5947 or Fax (734) 973-5948. For more information, please visit our website at http://www.wccnet.cc.mi.us/jobs/. AAV/ADA employer.

NATIONAL INSTITUTES OF HEALTH
NATIONAL INSTITUTE OF MENTAL HEALTH
DIVISION OF EXTRAMURAL ACTIVITIES

The National Institutes of Health, National Institute of Mental Health, invite applications for an extramural program position located in the Division of Extramural Activities, Neuroscience and Behavioral. Science Review Branch (NESRB): Health Scientist Administrator, GS-601-13/14

The incumbent functions as a Scientific Review Administrator and is responsible for all aspects of planning, coordination, direction, and implementation of peer reviews of grants/applications whose focus is in the area of neuroscience and the application of neuroscientific research to the study of mental health.

The NESRB is responsible for the initial review for scientific merit of research and training grants, fellowship applications, cooperative agreements, and contracts and for conducting an annual review of extramural contracts.

Applicants should have a Ph.D. (or equivalent training) and extensive working knowledge of research in the field of neuroscience as applied to the study of mental health or illness. A broad knowledge base of neuroscience and neuroscientific research approaches is essential as the incumbent will be responsible for planning and coordinating the review of grant applications and contracts covering a wide spectrum of neuroscientific techniques and approaches.

This is a GS-13/14 Civil Service position with a salary range of $58,027 to $89,142 per annum (1998 rate with locality pay), as well as full Federal benefits package.

A copy of the full text vacancy announcements is available via the World Wide Web: http://www.nimh.nih.gov/omh/mb/job.html. Interested candidates may contact Ms. Margot Darby, NIMH Personnel Management Branch, at (301) 443-9094. Applications will be accepted if postmarked on or before November 12, 1999 and received within 5 working days.

UNIVERSITY AT BUFFALO
State University of New York

IMMUNOLOGY

Two tenure-track positions available at Assistant/Associate/Full Professor level in the Department of Microbiology and Immunology at SUNY at Buffalo. The successful candidate(s) would be expected to develop an independent research program in the area of cell biology, molecular biology, or immunology. The Department is seeking energetic individuals who are interested in contributing to the growing research activities in the area of cellular and molecular immunology and/or virology. The successful candidate(s) will be expected to teach at both the undergraduate and graduate levels and to contribute to the educational programs. Ph.D. or M.D. degree is required. Salary is competitive and based on experience. Phone: 716-829-7136. Fax: 716-829-7193. Send curriculum vitae, statement of research interests and two to three letters of recommendation to: Dr. John H. Hsu, Professor and Chair, Department of Microbiology and Immunology, University at Buffalo, 284 Life Sciences North, Buffalo, NY 14260.
THE STATE UNIVERSITY OF NEW JERSEY
RUTGERS UNIVERSITY
NEWARK

CRIMINAL JUSTICE FACULTY

The School of Criminal Justice at Rutgers University-Newark has approval to hire two tenure-track faculty members to join us in Fall 2000. For the first position, we seek a warm professor with a distinguished and ongoing program of original research. For the second, we seek an assistant professor of exceptional scholarly promise and commitment to excellence in teaching. The School's needs and interests are wide-ranging across the fields of criminology and criminal justice, with special needs in the areas of corrections.

The School of Criminal Justice is a graduate program offering M.A. and Ph.D. degrees in Criminal Justice. The School also directs a criminal justice undergraduate program which is part of the College of Arts and Sciences. In January 2000, the School will move into a new building on the Newark campus, which also will house the Rutgers-Newark Law School, the Center for Crime Prevention Studies, the secretariat for the Newark Community Assistance Program, and the Criminal Justice/Neighborhood Development Library. This Library is a vast resource for the best scholarized criminal justice collection in the nation, and it regularly attracts international visitors as part of its Fellows Program. The campus at Rutgers-Newark is ranked by U.S. News & World Report as #1 in the nation for student diversity. Research support is excellent. Women and minorities are strongly encouraged to apply.

Applications, including curriculum vitae and addresses of three references, should be sent to:

Dr. Mercer L. Sullivan, Chair
Search Committee
School of Criminal Justice
Rutgers University
15 Washington Street, 12th Floor
Newark, NJ 07102
mercer@rutgers.edu

Rutgers, The State University of New Jersey, is a member of the Association of American Universities and is committed to excellence in scholarship. Rutgers is an equal opportunity/affirmative action employer.

REVIEW OF APPLICATIONS WILL BEGIN DECEMBER 1, 1999.

SCHOOL OF JOURNALISM
Indiana University-Bloomington

Indiana University's School of Journalism on the Bloomington campus seeks applicants for a position as assistant professor on tenure track. Applications should be able to teach courses in communications law and courses in reporting, writing and editing. We have a special interest in people who also can teach in the area of visual communications and/or online journalism. Applicants should have a promising agenda of scholarly research or creative activity and at least three years of professional experience in journalism or a related area. Preference will be given to applicants with a completed Ph.D. or J.D. degree.

Because the School of Journalism's curriculum integrates its resources in print, video and new media technologies to instruct all majors to work across media forms, applicants should be comfortable using a wide range of visual and computer resources in their teaching.

Applicants should send a letter of application, a curriculum vitae, three letters of reference and teaching evaluations, if available to:

Professor Jon Hills
Search Committee Chair
School of Journalism, Ernie Pyle Hall
Indiana University
Bloomington, IN 47405-6201

The search committee will start reviewing completed applications on December 15, and will continue until the position is filled. For more information about the Indiana University School of Journalism at Bloomington, explore our web site at:

http://www.journalism.indiana.edu

The School is particularly eager to consider applications from women and people of color. Indiana University is an Affirmative Action Equal Opportunity Employer.

UNIVERSITY OF WISCONSIN
MADISON

INSECT MOLECULAR BIOLOGIST
ASSISTANT PROFESSOR
DEPARTMENT OF ENTOMOLOGY

The Department of Entomology, University of Wisconsin-Madison is seeking applicants for a full-time, 12 month tenure track faculty position (80% research, 20% instruction). Qualifications include a Ph.D. in Biological Sciences with post doctoral research experience desirable. Duties include: conduct basic research on insect molecular biology, and relate these advances to aspects of insect ecology such as resistance to insecticides and biocontrol agents, identification of novel toxins and mode of action, and insect molecular genetics. Develop program in molecular aspects of insect physiology that interfaces with pest management programs in human health, agriculture, or forestry. Opportunities include participation in campus inter-disciplinary programs. Teaching responsibilities include developing a course that integrates the principles of insect taxonomy. The successful candidate will be expected to contribute to the Entomology Department general undergraduate and graduate instructional mission, including the training of graduate students. The applicant for this position must demonstrate high productivity and innovativeness in research and the ability to successfully compete for extramural funding in support of his/her research program.

A current CV, complete undergraduate and graduate transcripts, a statement of professional and teaching interests, and three letters of recommendation should be sent to: Carol Scheelke, Department Administrator, 237 Russell Labs, 1630 Linden Drive, Madison, WI 53706. E-mail: scheelke@entomology.wisc.edu WEB SITE: http://www.entomology.wisc.edu/

Closing date for applications: December 31, 1999

The UW, an equal opportunity employer, encourages applications from women, minorities, and individuals with disabilities.

CSUB is an EEO/AA employer, and applicants from women, ethnic minorities, veterans, and individuals with disabilities are welcome.
Purdue University invites nominations and applications for the position of Director, Women’s Resource Office.

Responsibilities:

Reporting to the Vice President for Human Relations, the Director will be responsible for implementing a collaborative vision of a community that offers opportunities for women to excel at Purdue University. The Director will provide leadership, advocacy, and support for women by initiating, developing, and administering programs and services that address the needs and concerns of all women at Purdue University. In cooperation with other campus offices and community organizations, the Director will:

- assist department heads, directors, deans, and vice presidents with their efforts to recruit and retain women faculty and staff;
- initiate and sponsor educational and professional development programs that meet the diverse needs of women;
- educate the campus community about gender-based issues and work with others to correct gender-based inequities;
- make recommendations on policies of special concern to women; and
- provide information, advice, and referral to women seeking assistance.

This is a 12-month administrative position; salary and benefits are competitive.

Qualifications:

1. Extensive knowledge of the development and administration of programs which address women’s issues and gender-related concerns, and an understanding and appreciation of the diversity among women required.
2. Experience in a university desired, ability to work with faculty and students in an academic setting required.
3. Leadership ability to build and maintain campus-wide support for the Women’s Resource Office; ability to collaborate with other offices and individuals in program development and problem solving; and effective oral and written communication required.
4. Experience with grant writing, community outreach, and public relations desired.
5. Terminal degree and/or faculty experience desired. A faculty appointment in a relevant academic department is possible, depending upon qualifications.

Purdue University is Indiana’s land grant university, and one of the nation’s leading institutions of higher education and research. Purdue University at West Lafayette enrolls approximately 37,700 students in its 11 schools and over 60 graduate programs, and employs approximately 2,300 faculty and 7,000 staff. The University is committed to increasing diversity throughout the campus and in its academic programs. Rich with cultural opportunities, Purdue is just an hour from Indianapolis and two hours from Chicago.

Nominations/Applications:

Please submit nominations or letter of application with vita and the names of three professional references to:

Dr. Linda A. Simunek
Chair, Search Committee
Office of the Vice President for Human Relations
Purdue University
1075 Hovde Hall
West Lafayette, IN 47907-1075
simunek@purdue.edu

The Search Committee will begin its review of applications on November 10, 1992, and will continue until the position is filled.

Purdue University is an Equal Access/Equal Employment/Affirmative Action Employer, to achieve a diverse work force.

http://www.purdue.edu/humanrel
Kean University, a comprehensive metropolitan university, is committed to excellence and access and to developing, maintaining and strengthening interactive ties with the community. Kean University takes pride in its continuing efforts to build a multicultural professional community to serve a richly diversified student population of 10,000.

NATHAN WEISS SCHOOL OF GRADUATE STUDIES

Assistant Director III Continuing Education
Under the direction of the Director of Continuing Education, the Assistant Director will assist with the implementation of all University Continuing Education programs and policies, with special responsibility for internal management of the Continuing Education Office, including computer operations, program and student records, scheduling, and related functions. The Assistant Director will assist with instructor assignments, facilitate program expansion on the Kean University campus and off campus sites, prepare copy for brochures and the Continuing Education web site, assist with internet and other distance education programs, and assist the Director with Continuing Education reports and communication.

Requires a Bachelor's degree (Master's degree preferred), with at least two years experience in higher education with nontraditional students or noncredit programs. Strong written, interpersonal and computer skills are essential, with web site experience helpful. Ability to work flexible hours, with weekends as needed. Apply to Dr. Roseann Bucalacci, Director of Continuing Education.

Associate Director II Research and Sponsored Programs
Under the direction of the Associate Dean, the Associate Director is responsible for the development of sponsored programs and grants in the sciences, social sciences, allied health areas, and related fields, as well as general sponsored program support for all academic units of the University.

He/she identifies, develops and researches opportunities for faculty and staff, and advises on all aspects of development and submission of research and grant proposals, including: collaborative/partnership arrangements, budget analysis, and all University and government grant and research policies and regulations; maintains the computerized database of faculty research and scholarly activities, comprehensive files and other information on public and private grant sponsors.

Requires a Bachelor's degree supplemented by a Master's degree in a related field (Doctorate preferred), and at least three years professional experience in grant/sponsored programs in sciences, social sciences, allied health areas, and related fields. Computer, web site, grant writing skills, ability to work under pressure, and familiarity with the policies and application procedures of the National Sciences Foundation, including the FASTLANE process, NH, NIH, and related federal agencies are all essential. Apply to Dr. Mark Lender, Associate Dean.

OFFICE OF FINANCIAL AID

Assistant Director III
Under the supervision of the Director of Financial Aid, manages financial aid processing for students. Responsibilities include reviewing aid packages, verifying applicant information, providing educational financial aid advisement for students and their families, and serving as an office liaison for outside funding agencies. The Office of Financial Aid is a highly automated environment using Datatel's Colleague. Financial aid personnel, including sixteen professional and support staff, deliver nearly $30 million in aid to over 5,000 students for the current year.

Requires a Bachelor's degree (Master's preferred) and 2 years of experience in higher education, preferably with an emphasis on student advisement and/or project management. Applicants should possess strong analytical, computer and interpersonal skills. The position carries a salary range of $35,845 to $53,772. The salary offered to the successful candidate will depend on prior work experience and credentials. Apply to Mr. Bart F. Batty, Interim Director of Financial Aid.

Assistant Director III Financial Aid Systems
Under the supervision of the Director of Financial Aid, assists in the management and operation of the department's student financial aid system, including Datatel's Colleague and other federal and state financial aid software packages. The Department of Financial Aid is staffed with sixteen professional and support personnel responsible for the delivery of nearly $30 million in financial aid to over 5,000 students. The Assistant Director of Financial Aid Systems works closely with other systems personnel to maintain computer operations.

A Bachelor's degree (Master's preferred) and 2 years of experience in higher education are required, with a preference for strong analytical skills. Prior experience should include, but is not limited to, Microsoft products, electronic data exchange, Datatel Colleague (desired), and work in a client server environment. The position carries a salary range of $35,845 to $53,772. The salary offered to the successful candidate will depend on prior work experience and credentials. Apply to Mr. Bart F. Batty, Interim Director of Financial Aid.

OFFICE OF THE REGISTRAR

Assistant Director I
Full-time 12 month position reporting the Registrar. Assumes a leadership role in the implementation of Datatel's Colleague Release 16. Responsible for the supervision of students' academic records and scheduling components. Will assist in the production of grade processing.

Requires a Bachelor's degree supplemented by a Master's degree in a field related to the position, plus three years of professional experience in an institution of higher education, preferably a Registrar's Office, with emphasis on scheduling and academic records. Preference given to candidates with experience using Datatel's Colleague software package. Leadership role in the implementation of any computer system or an acceptable alternative is important. Familiarity in query language utilization required. Strong analytical, computer and interpersonal skills a must. Apply to Ms. Carol Gubennet, Registrar.

APPLICATION, SALARY, BENEFITS INFORMATION FOR ALL POSITIONS:
Candidacy review begins immediately and continues until appointment is made. Send letter of interest, up-to-date resume, names, addresses, telephone numbers of three references, official transcripts and three current letters of recommendation required before appointment. Apply directly to Dean or Director as identified.
KEAN UNIVERSITY, 1000 Morris Avenue, Union, New Jersey 07083. Salary is competitive and commensurate
ORANGE COAST COLLEGE

Dean, Literature & Language

Orange Coast College, Costa Mesa, CA (www.occcd.edu) has an opportunity for a full-time, 12 month per year, educational administrator. Reporting to the V.P. of Instruction, this position will coordinate the development of the division’s schedules, provide instructional resources within established budgets, oversee implementation of current employment contracts and assist in the communication, promotion and publicity of the division’s programs. Minimum qualifications include master’s degree (or equivalent), 3 years full-time teaching preferably at the community college level and demonstrated leadership of Literature and Languages educational programs. Knowledge and/or experience in one of the division’s disciplines, background in program accreditation and the ability to develop and implement grant programs desirable. Salary range is $57,084-$69,290/yr plus excellent benefits.

To apply: Call or visit the District Personnel office to obtain job description and required application form, #38-0-00, which must be submitted by the closing date of 10/29/99. Resumes cannot be accepted in lieu of required application.

Southwest Texas State University invites applications and nominations for the position of Director of Auxiliary Services. SWT, a unit of the Texas State University System, is the seventh largest public university in Texas, with enrollment of over 21,500 and an annual budget of $167 million. SWT is located in the scenic Texas hill country at the headwaters of the San Marcos River in the community of San Marcos between Austin and San Antonio. Visit SWT at:

http://www.swt.edu

The Director of Auxiliary Services reports to the Vice President for Finance and Support Services. The Director provides administrative oversight, which includes financial statement preparation, supervision and strategic planning, for the food service contract, shuttle bus contract, and copy service contract as well as the areas of bookstore, ID cards, transportation services, mail services, university press and duplicating.

Requirements: Bachelor’s degree in Accounting, Finance, Business Administration or a related field required; MBA, CPA or equivalent professional certification preferred. Note: MBA, for example, supersedes Bachelor’s degree requirement. Minimum of five years of increasingly responsible financial administrative experience required, preferably in an institution of higher education. Excellent oral and written communication skills are required. Experience in the administration of service provider contracts preferred. A demonstrated commitment to quality, customer service, staff development, diversity and the ability to work in a collaborative manner among such varied constituencies as administrators, faculty, staff, students and the community are required. Candidates must possess strong and demonstrated skills in spreadsheet-based analysis and have a high degree of computer proficiency. Salary for this position is commensurate with qualifications and experience.

For considerations: applications should send a completed SWT application, a comprehensive resume, names and contact information for three references, and a cover letter discussing qualifications for the position to:

Southwest Texas State University
Personnel Office
J.C. Kellam Building, Suite J46
601 University Drive
San Marcos, Texas 78666

Review of applications will begin November 8, 1999 and continue until the position is filled. Job Number 872 For an application, call (512)245-2557. Resume alone will not be considered.

SWT is committed to increasing the number of women and minorities in administrative and professional positions.

ASSOCIATE PROFESSOR POSITIONS

The Biometrics Division of the University of Medicine and Dentistry of New Jersey at the Piscataway-New Brunswick campus is conducting a search to fill one or two full-time tenure-track assistant/associate professor positions. Major responsibilities include: carrying out methodological research and teaching courses in biostatistics, and providing statistical consultation and services to the university community. The candidate should have Ph.D., Sc.D., M.D., D.Ph., or equivalent degree in Biostatistics, with strong interest in developing collaborative research and teaching students in public health and biostatistics environment. Knowledge of computing using SAS and S-Plus in PC and Unix Systems, and experience in the design of experiments or survey sampling are highly desirable. Effective verbal and written communication skills are essential.

The UMDNJ School of Public Health is sponsored by the University of Medicine and Dentistry of New Jersey in cooperation with Rutgers, The State University of New Jersey and the New Jersey Institute of Technology, and in collaboration with the Public Health Research Institute. Applications will be received until the positions are filled. Applicants should send a letter of application, curriculum vitae, and three letters of recommendation to: Welchung Joe Shih, Ph.D., Chair, Search Committee, Division of Biometrics, University of Medicine and Dentistry of New Jersey, EOHsi Building, Room 236C, 170 Frelinghuysen Road, Piscataway, NJ 08854.

UMDNJ is an equal opportunity and affirmative action employer.

ROOSEVELT UNIVERSITY
College of Education

ASSOCIATE DEAN FOR ACADEMIC AFFAIRS/ASSOCIATE PROFESSOR

The College of Education at Roosevelt University invites applicants for the position of Associate Dean for Academic Affairs. Roosevelt is a metropolitan university with two campuses; the College offers courses and degrees in 16 program areas, a master’s in special academic programs, and a doctorate in Educational Administration and Supervision. The College has a dynamic faculty committed to teaching and course development programs that meet the needs of graduates who work in diverse and multicultural settings.

Responsibilities of the Associate Dean for Academic Affairs include coordinating all academic programs of the College and supporting the growth and development of quality academic programs. Under the guidance and support of the Associate Dean, all College programs and projects will develop consistent College’s conceptual framework and with the University mission.

Specific responsibilities of the position will include:
- Working with program areas and the Roosevelt community to ensure continuous and consistent quality and enhancement of all academic programs
- Supervising the Certification Officer and induction process
- Coordinating technology integration with program development
- Coordinating with the Dean, Associate Dean for External Relations, and the faculty in initiating external partnerships that support the vision and the academic programs of the College
- Coordinating the PCsCATE accreditation process
- Teaching courses in year
- Developing and supporting faculty development activities including the procurement of grant other initiatives.

The successful candidate will be knowledgeable about the critical issues facing education and relations in a postmodern era and will have particular knowledge about integrating teaching and learning.

To apply, send a letter of application, vita, official transcript and three letters of recommendation to:
Mr. David Campos
College of Education, Associate Dean Search Committee

ASSOCIATE OR ASSOCIATE PROFESSOR FOR COUNSELOR EDUCATION

The Counseling and Human Services Program Area of Roosevelt University invites applications for a full-time tenure-track assistant or associate professor at the doctorate level. Roosevelt is a multicultural University with campuses in Chicago and northwest suburb of Schaumburg. The Counseling Human Services Program Area is located within the College of Education, and offers three graduate concentrations. The concentrations are school counseling, community counseling, and mental health counseling.

Responsibilities of the Assistant/Associate Professor of Counseling will include teaching seven course years of which one or two of the courses will involve supervision of clinical experiences, research, and committee responsibilities.

The ideal candidate will have a doctorate in counselor education, counseling psychology, or a closely related field. A graduate of a CACREP accredited doctoral program will be given special consideration. We are seeking a generalist with experience in either community counseling, school counseling, or teaching and research in higher education. The candidate must be interested in scholarship and teaching research and must be licensed-eligible in counseling and/or psychology. Applicants are encouraged to apply. Applications for the position will be received until March 1, 2000.

WABASH COLLEGE

Wabash College invites expressions of interest in the Owen Dutton Visiting Minority Professorship. The appointment is directed at recruiting ethnic minorities to consider and research careers at small liberal arts colleges. The one-year appointment, typically begins in the fall semester, is non-renewable, and carries a reduced teaching load, advising responsibility, and the expectation for continuing scholarship. The position is open to all ethnic minorities. U.S. citizens, having Ph.D., ABD or terminal degree in one of the following areas: Art (History), Classics, Computer Science, English, History, Mathematics, Music, Political Science, Psychology, Speech (Rhetorical Studies), Teacher Education (secondary), or Theatrical Studies, or three recent letters of recommendation to: Mary A. Dittrick, Dean of the College, Wabash College, PO Box 352, Crawfordsville IN 47933-0352.
B A L L S T A T E U N I V E R S I T Y

DEAN OF THE HONORS COLLEGE

Ball State University is seeking an experienced scholar/teacher to direct and coordinate activities of its nationally recognized Honors College as of July 1, 2000. Minimum qualifications are an earned doctorate or the terminal degree in the candidate's academic discipline; overall qualifications which merit a faculty appointment at a senior rank within the academic units of the university; demonstrated excellence in teaching, research, full-time and communication skills, and willingness to collaborate with other faculty in the University. Preferred qualifications are: experience in honors education; demonstrated leadership and management skills; commitment to interdisciplinary collaboration; and experience in developing external funding and participation in fund-raising activities.

Created in 1959 as an Honors Program and raised to college status in 2002, the Honors College serves 1,500 outstanding undergraduates from all disciplines, providing a small college atmosphere within the university's 50,000-member community.

The Department of the Honors College reports directly to the Associate Provost and works with the Academic Deans, Department Chairs, and the Office of Admissions to meet the needs of students in the university. Other priority duties include teaching within the Honors College curriculum, developing and administering the Honors College scholarship program, reviewing the College's fellowship program, and coordinating the College's study programs in Oxford, England.

Salary is dependent on qualifications and experience. Review of applications will begin on November 8, 1999, and continue until the position is filled. Send letter of application, curriculum vitae, and names of five references to: Dean of the Honors College, Ball State University, University Center, Muncie, IN 47306. Further information is available on the university's website at www.bsu.edu.

Ball State University is an equal opportunity, affirmative action employer and is strongly and actively committed to diversity within its community.

University of Pittsburgh

Vice Provost and Dean of Students

The University of Pittsburgh invites applications and nominations for the positions of Vice Provost and Dean of Students. The University enrolls more than 31,000 students in more than 350 separate degree programs on five campuses.

The Office of Student Affairs, led by the Vice Provost and Dean of Students, is located on the main campus and plays a pivotal and supportive role in the achievement of the University’s broader educational goals. Its principal purpose is to support a safe and healthy and productive environment that maximizes student learning and development both within and outside of the classroom. Candidates should also have demonstrated experience in working with faculty and other institutional staff.

The Vice Provost and Dean of Students is expected to lead initiatives designed to further integrate students and faculty in the classroom and to develop new and non-traditional opportunities for students. Candidates should have demonstrated experience in working with faculty and other institutional staff.

Candidates for a tenure-track appointment are not required but may be considered if the candidate has the appropriate credentials. Interested candidates are encouraged to apply as early as possible.

Dr. Jack L. Diamond, Chair, Vice Provost and Dean of Students Search Committee, 800 Cathedral of Learning, University of Pittsburgh, Pittsburgh, PA 15260

The University of Pittsburgh is an Affirmative Action/Equal Opportunity Employer

Women and minority group members are invited and encouraged to apply.

North Shore Community College

PRESIDENT

The Board of Trustees of North Shore Community College invites nominations and applications for the position of President of the College.

In its search for the President, the College will assess the candidate's demonstrated leadership ability to:

- Develop and articulate a vision for the future of the College in our service area.
- Implement and execute community college policies as outlined by the Board of Higher Education and in compliance with state and federal laws and regulations.
- Administer fiscal affairs, budgets, facilities, and personnel within a complex organization.
- Maintain a system of participatory governance and professional development in a collective bargaining environment.
- Ensure the development and evaluation of educational programming and curriculum in liberal arts and occupational preparation.
- Ensure successful implementation of the College's strategic plan.
- Direct appropriate staff in developing and evaluating strategies to address institutional effectiveness measures.
- Develop successful alliances with various organizations including specific partnerships with schools, community groups, governmental agencies and local business and industries.
- Participate visibly in public relations, resource development and fund raising for the College.
- Ensure for interpretation and administration of all collective bargaining provisions and requirements.
- Implement and execute Affirmative Action policies and procedures in an environment that promotes sensitivity to pluralism and diversity.
- Participate actively on various local, state, and national committees and task forces addressing issues and problems of interest to community colleges and higher education.

Minimum Qualifications:

Candidates for the position must have the following minimum qualifications:

- Master's Degree from an accredited institution, earned Doctoral Degree preferred; six years of leadership experience in similar administrative position (Dean or above) or equivalent experience in business, government or non-profit organizations; teaching credentials sufficient to warrant appointment at the institution; demonstrated record of successful program development and evaluation; demonstrated record of successful administration of finances, budgets, facilities and personnel; demonstrated knowledge of current major issues facing community colleges; both national and regional/county political awareness; and the ability to function effectively within a complex political environment, knowledge and sensitivity to collective bargaining environments; understanding of the use of technology applications in a complex institution; successful experience in resource development; experience in developing effective and successful alliances with various organizations, including but not limited to, those in business and industry; and participation and cooperation with organizations devoted to the advancement and improvement of community colleges; and proficiency in oral and written communications and interpersonal skills, including the ability to work effectively with administrators, faculty, staff, students, local community members, business and industry, state and local governmental agencies, and other educational institutions.

Compensation for the position will be commensurate with experience and qualifications. More information about the College is available on the web at www.nsc.edu. For more information, contact the Human Resources Office at 978-763-4500, X4490. For full consideration, nomination or application materials should be received by November 1, 1999. Candidates should submit a letter describing interest and qualifications for the position; a resume, and the names, addresses and phone numbers of five references.

Send nominations or applications to Director of Human Resources, North Shore Community College, One Ferncroft Road, PO. Box 3340, Danvers, MA 01922. Visit us on the web at www.nsc.edu.

As an equal opportunity, affirmative action employer, North Shore Community College is seeking candidates who will demonstrate the diversity of its faculty, staff and administration.
COLBY

Colby, a highly selective private liberal arts college of 1750 students located in Central Maine, seeks applicants for the following positions in Development:

Major Gifts Officers

Reporting to the Director of Major Gifts, the Major Gifts Officer's primary responsibility is to cultivate and solicit major gifts ($25,000 minimum) for the College. Other duties include working with the development staff, volunteers, and other Colby administrators and faculty to identify major gift prospects in specific regions of the country; designing cultivation strategies and ensuring follow-up activities and stewardship, and serving as the primary or secondary staff person in specific regional efforts. A bachelor's degree, preferably from a liberal arts college, a minimum of one to three years' experience in development, including personal solicitation of major gifts, and an understanding of and commitment to the values of a liberal arts education are required. The successful candidate must be willing and able to travel extensively, have a commitment to team participation, be deadline and detail-oriented, and possess excellent writing and speaking skills. Candidates with relevant experience and transferable skills will be considered.

Interested candidates should submit two copies of a cover letter and two copies of a resume, including the names and telephone numbers of three references to: Douglas C. Terp, Director of Development Services, Colby College, 1300 Mayflower Hill, Waterville, ME 04901-4888. A review of applicants will begin immediately and will continue until the positions are filled.

Colby is an Equal Opportunity/Affirmative Action Employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby web site: www.colby.edu

GRAND VALLEY STATE UNIVERSITY

ASSOCIATE DIRECTOR FOR MULTICULTURAL CENTER

Grand Valley State University is accepting applications for the position of Associate Director for Multicultural Center. Master's Degree required in Student Affairs. Counseling, Business or related field. Demonstrated experience in student program planning, development, evaluation and supervision of students, and demonstrated knowledge of business related education or experience within the field. Preference for candidate with a college campus background. Ability to understand, research, experience in urban settings, and demonstrated sensitivity to multicultural issues are required. Must be available to work some evenings and weekends.

Send letter of application, resume and four references including telephone numbers and addresses to: Donald Williams Sr., Dean, Minority Affairs, Grand Valley State University, 130 Commons, Allendale, MI 49401. Review of applications will begin November 1 and continue until the position is filled. EEO/AA/IN

CALIFORNIA STATE UNIVERSITY, LOS ANGELES

Vice President for Student Affairs

Applications and nominations are invited for this position, which provides executive leadership, direction, coordination, and administrative, management, and budget formulation and allocation for student services programs and activities. The position provides executive direction to two Assistant Vice Presidents for Student Affairs - one for Education (Admissions, Career Planning and Placement, Financial Aid, Orientation, Outreach, and Resident Life) and one for Student Services (Center for Student Life, Educational Opportunity, International Student Services, Student Advocacy, Students with Disabilities, and Student Health Center). The Vice President will be a member of the 20-campus California State University system, located at the eastern edge of Los Angeles and the Western San Gabriel Valley, with more than 20,000 students reflecting the rich ethnic diversity of the area.

Qualifications:
- An earned doctorate or other terminal degree and a record sufficient to warrant a tenured appointment in an academic department at Cal State L.A.
- A record of significant executive-level responsibility in the area of academic support services
- Proven leadership abilities.
- Demonstrated ability to build relationships with faculty, staff and students
- Excellent oral and written communication skills
- Demonstrated ability and interest in working in a multicultural-multiphrenic environment

Salary for this Administrator IV position is commensurate with experience and qualifications. A comprehensive benefits program is provided.

Submit letter of application, curriculum vita, three letters of recommendation, and transcript from institution highest degree by November 15, 1999 to:

Chair, VPSA, HRM, #H99-90
California State University, Los Angeles
5151 State University Drive
Los Angeles, CA 90032-8534

Reasonable accommodation may be requested.
Dean, School of Music
University of Michigan, Ann Arbor

The University of Michigan is seeking nominations and applications for the position of Dean of the School of Music. The School provides highly effective teaching from undergraduate through doctoral levels in a comprehensive range of courses spanning the fields of music, dance, theatre, and musical theatre. The School combines the advantages of a music conservatory with those of a large public research university with strong interdisciplinary initiatives. The extraordinary faculty includes internationally active performers; former members of leading symphony orchestras, opera houses, and dance and theatre companies; prize-winning composers; and renowned scholars in theory and musicology. Public performances and pre-college outreach programs offer service to the community, the region, and the state. Six classroom buildings and more than a dozen performance spaces provide excellent physical facilities for the School’s extensive instructional programs.

The Dean will provide vigorous artistic and academic leadership to the School, oversee the instructional program, supervise the budget and personnel administration, and assume a major role in fundraising. As the chief executive and academic officer of the School, the Dean reports directly to the Provost and Executive Vice President for Academic Affairs.

Successful candidates should be nationally recognized artists and scholars whose active and distinguished professional records include some combination of performance, teaching, research, and leadership in the arts. Candidates must be qualified to assume a tenured faculty position at the University of Michigan, and will be expected to have a demonstrated commitment to positive action that supports those educational goals associated with a diverse student body and faculty.

Nominations and applications will be reviewed continuously beginning October 1, 1999, and will be accepted until the position is filled. Correspondence should be addressed to:

George I. Shirley
Chair, School of Music Dean Search Advisory Committee
and Joseph Edgar Maddy Distinguished Professor of Music
The University of Michigan
3074 Fleming Building
Ann Arbor, MI 48109-1340

E-mail may be addressed to musicsearch.chair@umich.edu The University has retained the services of Judith Auerbach and Geoffrey Hudson of Auerbach Associates to assist the Search Advisory Committee in this process. Telephone: 617-451-0095; Fax: 617-451-5198. E-mail may be addressed to jaa@auerbach-assc.com or ghudson@auerbach-assc.com

The University of Michigan treats inquiries, nominations, and applications for this position and others in a confidential manner. Applicants should confirm in their letters that they wish their applications to be kept confidential.

A Non-Discriminatory, Affirmative Action Employer

Florida International University

The Department of Physical Therapy of Florida International University (FIU) is currently accepting applications for a full time, 9-month, tenure-track faculty position at the Assistant or Associate Professor rank and one part-time (9-month) clinical instructor.

Minimal requirements include a master's degree, evidence of extensive academic or clinical experience and/or specialist training, eligibility for licensure as a physical therapist in Florida, and research training and experience.

The deadline for applications is October 28, 1999. Applications should include a letter of intent, a CV, and the names and phone numbers of at least three references.

FIU is an equal access/equal opportunity employer. For further information regarding the department, see our website at www.fiu.edu/physther, or contact

VIRGINIA COMMONWEALTH UNIVERSITY

VICE PROVOST FOR ACADEMIC AFFAIRS

Virginia Commonwealth University is seeking nominations and applications for the position of Vice Provost for Academic Affairs

Located in Richmond, the capital of Virginia, VCU is composed of several colleges and schools, including the College of Humanities and Sciences; the Schools of Allied Health Professions, Business, Dentistry, Education, Engineering, Medicine, Nursing, Pharmacy, Social Work, and the School of Medicine. The full-time faculty of 1,500 attract more than $10 million annually in research funding, ranking VCU as one of the best in the region. VCU's 1,300 faculty and staff make the University one of the best in the nation.

MCCV Hospitals also is among the annual study, 100 Top Hospitals: Benchmarks for Success.

With annual revenues exceeding $1 billion, VCU is a significant force in the Richmond region. VCU's 13,000 faculty and staff make the University one of the most comprehensive academic health centers in the state.

VCU currently embarked on a second phase of its Strategic Plan for the Future. Virginia Commonwealth University, initiated by the President and approved by the Board of Visitors, with oversight provided by the Provost. This plan envisions increasing collaborations between the University and the community to enhance economic, community, and health-care development initiatives, including, among others, programs at the Virginia Biotech Research Park, the University School of Engineering, and the new Medical College of Virginia Hospitals. The University is creating interdisciplinary centers and research institutes of excellence to support the community agenda designed to increase the opportunities for students and faculty can work within the community.

The Vice Provost for Academic Affairs will be responsible to the Provost for Academic Affairs for providing leadership, evaluation, and promotion of excellence in academic programs of the University.

Primary areas of responsibility will include Undergraduate Studies, S. Studies, Academic Planning, Strategic Planning, Academic Affairs, Faculty Development and Evaluation, Academic Affairs, Liaison, Retention, Enrollment Management, Undergraduate Research Grant Program, and the University Center for Excellence in Teaching.

All candidates must have an earned doctorate and rank of professor at a research institution. Experience as a provost or vice president is preferable. The person must be an administrator with a strong background in teaching and scholarship, and an understanding of the unique needs of a research institution. The person must be able to work effectively with administrative staff and students, demonstrated leadership ability, and expert understanding of academic affairs, planning, and program development.

Nominations and applications (which should include a curriculum vitae, addresses, and phone numbers of five references) should be sent to:

Mr. Edwin E. Blanks
Chair, Search Committee
Office of the Provost
901 West Franklin Street
Richmond, Virginia 23224-2527

Application review will begin on November 8, 1999. Nominations and applications will be accepted until the position is filled.

For additional information about Virginia Commonwealth University, visit the website at "www.vcu.edu." VCU is an Affirmative Action, Equal Opportunity Employer. Women, minorities, and persons with disabilities are encouraged to apply.
PRESIDENT
EMPIRE STATE COLLEGE

In 1971, a creative and innovative group of educators founded Empire State College as an academically rigorous, student-centered institution. Operating as a college of arts and sciences of the State University of New York, Empire State College is recognized as a world leader in designing and delivering programs, from associate through master's, that meet the academic, personal and professional goals of more than 10,000 students each year. Empire State College remains a true innovator. Faculty mentors and adult students work together to achieve students' educational objectives. Face-to-face tutorials, print-based and on-line distance learning, study groups, seminars and cross registration at other colleges provide the means by which student-centered learning comes to life.

The College's administrative headquarters are located in Saratoga Springs, a historic community of 25,000 residents at the foot of the Adirondack Mountains, 30 miles from Albany, the state capital, and 180 miles from New York City. The College has eight major regional centers and more than 35 smaller units in New York State, as well as international offices in Israel, Cyprus, and Athens. Empire State is distinctive among adult and innovative institutions in its reliance on its own full- and part-time faculty.

Our new president must have an earned doctorate or its academic equivalent, significant leadership experience, a demonstrated commitment to lifelong learning for adults, and strong advocacy and fund raising skills. We seek someone who is comfortable working in a dispersed and highly collaborative environment, who will sustain the creativity of colleagues, who shares our commitment to innovation, and who has the practical disposition and background to make it all work. We invite candidates from academe and from other sectors as well.

For more information about the College and the presidential search, visit the Empire State College web site at www.ssu.edu/pressearch or write to:

Mr. Richard Liebich
Chair, Presidential Search Committee
Empire State College
1 Union Avenue
Saratoga Springs, NY 12866-4390

Dr. Barbara E. Taylor of the Academic Search Consultation service in Washington, DC, is assisting with the search. Inquiries may also be directed to her at 202/263-7480 or e-mail at bet@academic-search.org.

Empire State College is an equal opportunity employer and encourages the nominations and candidates of women and persons of color.

AGNES SCOTT COLLEGE
THE WORLD FOR WOMEN

FACULTY POSITIONS
Agnes Scott College is a highly selective, independent, liberal arts college for women in the Atlanta area with a current enrollment of 900 students and a student-teacher ratio of 9:1. Faculty salaries at all levels are in the top quintile of AAUP rankings for baccalaureate institutions. Support for faculty development is generous and includes a one-semester pre-tenure research leave at full pay. You are invited to browse our home page for further information on the departments, the positions and the College.

ART HISTORY
The Department of Art invites applications for a tenure-track assistant professor position. Previous teaching experience is desirable. Teaching assignment will include Modern and Contemporary Art. Candidates should have the ability to teach 19th and 20th century art, contemporary theory, art criticism, and visual culture (photography, film studies, popular culture). Preference will be given to those who also have experience in a non-Western area (African, Islamic, Pre-Columbian, Native American, Asian). Candidates should have a strong commitmen to teaching from a cross-cultural and interdisciplinary perspective. In addition to teaching, the candidate may be called upon to curate one contemporary exhibition a year in the Dalton Fine Arts Gallery. Application deadline: January 15, 2000. Search chair: Dr. Donna Sadler, Chair, Department of Art.

ASTRONOMY
The Department of Physics and Astronomy invites applications for a tenure-track assistant professor position. We seek an observational astronomer with significant experience at optical wavelengths, and with primary research interest in planetary or solar system astronomy. Candidates should have a Ph.D. in physics, astrophysics, astronomy, or planetary science, as well as a strong commitment to teaching undergraduates and enthusiasm for engaging undergraduate students in research. Some startup funds will be available. Teaching duties will be assigned from the full range of undergraduate astronomy and physics courses. The College is presently engaged in a substantial renovation and expansion of its Bradley Observatory, located on campus. The observatory houses a 30-inch reflector, and after expansion will feature a 70-seat planetarium and a LIDAR facility. The successful candidate will assist in public nights at the observatory during the academic year, and in other outreach efforts. Application deadline: January 1, 2000. Search chair: Dr. Arthur Bowling, Department of Physics and Astronomy.

ECONOMICS
The Department of Economics invites applications for two tenure-track faculty positions at either the assistant or associate professor level. One position will focus on macroeconomics and applied micro courses; the other on microeconomics and applied micro courses. The qualifications and experience of the successful candidates will determine rank. In addition to teaching introductory economics and other macroeconomics or microeconomics, the teaching assignments will involve applied micro and macro courses including international trade, economic development, money and banking, environmental economics and the economics of race, class and gender. We will interview selected candidates at the ASSA meetings. Application deadline: December 15, 1999. Search chair: Dr. Rosemary T. Cunningham, Department of Economics.

ADELINE ARNOLD LORIDANS PROFESSOR OF FRENCH
The Department of Modern Foreign Languages and Literatures invites applications for an endowed chair, full professorship. The Ph.D. And a strong publication record in Medieval or Renaissance literature are required. The candidate will teach upper division courses in both periods and will participate in language instruction at all levels. Native or near native fluency in French is required. The successful candidate will be expected to play a strong leadership role in the department and in the College. We will interview at the MLA meeting in December. Application deadline: December 1, 1999. Search chair: Dr. Steven R. Guthrie, Loridans Professor Search Committee.

MATHEMATICS
The Department of Mathematics invites applications for a tenure-track assistant professor position. We seek someone who is well qualified to teach upper division courses in algebra and combinatorics, and who has both an interest in and experience with innovative teaching with technology. A background in computer science would be an asset. Additional members are expected to teach a wide range of mathematics courses. Application deadline: November 30, 1999. Search chair: Dr. Myrtle Lewis (search), Department of Mathematics at address below, or by E-mail to mathsearch@agnesscott.edu.

MUSICOLOGIST
The Department of Music invites applications for a tenure-track assistant professor position. Previous teaching experience is desired. We seek a musicologist with a foundation in Western art music and a specialty in American music to teach courses to undergraduate students. Application deadline: January 15, 2000. Search chair: Dr. Theodore K. Mathews, Department of Music.

APPLICATION PROCESS
Unless otherwise noted in a specific listing:
• Positions begin August 2000.
• Candidates are expected to have completed the appropriate Ph.D. by July 1, 2000.
• Candidates for all positions are expected to have an ongoing program of scholarly work, to demonstrate evidence of excellent teaching, and to be willing to serve the department and the College during a period of growth.

Founded in 1889 by Presbyterians, Agnes Scott College is committed to fostering cultural diversity and multicultural awareness in its faculty, staff, and students and urges members of under-represented groups to apply. An Equal Opportunity Employer

Dean, Worden School of Social Service

OLLU is a comprehensive university offering degrees through the doctorate to over 3,500 students, with a reputation for excellence particularly in the areas of the sciences and human services. We are an independent Catholic, Hispanic-serving institution located in San Antonio, with satellite programs in Houston and Dallas. We are proud of the emphasis we place on quality instruction.

The WSSS is the oldest school of social work in Texas. Fully accredited by CSWE, with 180 MSW and 145 BSW students and full-time and adjunct faculty, we have developed a direct practice curriculum stressing social and economic justice.

We are looking for applicants and nominees who possess:

- An innovative vision for professional education, including the role of technology and diversity practices.
- Academic leadership in a collegial style with strong support of faculty governance.
- Knowledge of current program development in social work and the challenges facing private higher education.
- Skill in developing new resources in support of student recruitment and persistence.
- An MSW and earned doctorate in Social Work or related field is required.

Reviews of materials begins immediately and continues until we fill this position. Please send letters, vitae, and names of references to:

Phillip A. Hall, Chair, Dean Search Committee
Office of the Provost
141 S.W. 24th Street
San Antonio, Texas 78229-4689

Information on OLLU, the Dean's position, and San Antonio appear at http://www.ollusa.edu. Inquiries to Hall at hallp@lake.ollusa.edu, Fax (210) 431-4628.

OLLU is an AA/EEO institution and actively seeks and encourages applications and nominations from men and women of all races and ethnic backgrounds.

OUR LADY OF THE LAKE UNIVERSITY

411 S.W. 24th Street - San Antonio, Texas - 78229-4689

The Hunter College Campus Schools (HCCS) which comprises the Hunter College High School (HCHS) and the Hunter College Elementary School (HCES), continue the search for a qualified candidate for the dual role of Director of the Hunter College Campus Schools and Principal of the Hunter College High School. HCCS is one of the nation's oldest centers for educating the intellectually gifted and serves a student body that is racially, ethnically, and socioeconomically diverse.

Qualified individual should have the educational background, experience and professional skills necessary to lead the HCCS toward an international reputation as laboratory schools/demonstration sites for the education of intellectually gifted students.

Appointment Date: 9/1/00.

**DIRECTOR/PRINCIPAL - HCCS/HCHS**

**Duties:** The Director/Principal reports directly to and is supervised by the Dean of the Hunter College School of Education. The duties and responsibilities of the Director/Principal include personnel selection and supervision, curriculum development, and budget management for the high school; oversight of these activities for the elementary school; and supervision and evaluation of the principal of the elementary school.

**Qualifications:** Training and experience in school administration, knowledge of theories and practices in the education of intellectually gifted students, proven managerial ability, experience with school-based management, skill in working with a variety of constituencies, skill in curriculum and staff development, SGS or SAS certification is required. An undergraduate degree in a related field is preferred. Experience with the full range of PreK-12 education is preferred. Evidence of leadership in the education of students with diverse backgrounds and in curriculum and staff development that affirm diversity is preferred.

**Salary Range:** $74,773-78,967 plus remuneration of $3,834-$13,231

Send applications to:

Dr. Ellis J. Barowsky, Chair, Search Committee for the HCCS Director
Office of the Dean, School of Education
Hunter College, 695 Park Avenue, New York, NY 10021

Send letter of application, including the names, addresses and telephone numbers of at least three references. Applications will be accepted up to November 15, 1999.

---

**ASSISTANT/ASSOCIATE PROFESSOR - SOCIAL WORK**

Tenure-Track

Springfield College School of Social Work, an accredited Master's in Social Work Program and a leader in MSW graduate education in New England and surrounding areas, invites applications and recommendations for a tenure-track faculty position in the Department of Social Work. The position is within the Social Work Program, responsible for the teaching of undergraduates. The Social Work Program is a social work master’s program accredited by the Commission on Social Work Education (CSWE). The program is designed to prepare students for professional social work practice.

The Department of Social Work is committed to developing a diverse faculty and strongly encouraging diversity in teaching, research, and service. The position is available immediately and will begin in August 2000.

**Qualifications:** Candidates must hold a Ph.D. in Social Work or related field with a strong background in social work practice and research. Experience in teaching social work courses at the undergraduate or graduate level is preferred. Experience in teaching online courses is preferred.

**Responsibilities:** The successful candidate will be expected to develop and teach courses in the Social Work Program, conduct research, and contribute to the program's commitment to diversity.

**Salary:** Competitive, commensurate with qualifications and experience.

Send letter of application, including a current resume and the names, addresses and telephone numbers of three references to:

Dr. Daniel J. Kapp, Chair, Department of Social Work
Springfield College School of Social Work
128 Alden Street, Springfield, MA 01109-1277

Application screening begins immediately and continues until the position is filled.

**SCIENCE OF PUBLIC HEALTH**

Applications and nominations are invited for the position of Dean of the Public Health at UCLA, effective July 1, 2000. The Dean has responsibility for developing and supporting the School's existing and new educational, research, and service programs. The Dean is also responsible for overseeing the integration of new educational programs in environmental health, as well as a number of other academic programs.

Applicants should have a demonstrated record of excellence in teaching, research, and service. The position is open to academics from all fields, including those with backgrounds in health science, environmental health, and public health. Applicants should have a Ph.D. or M.D. degree and at least 10 years of experience in a leadership role.

Applications should be submitted by November 22, 1999 and should include a letter of application, curriculum vitae, and three letters of reference to:

Public Health Dean Search Committee
Office of the Chancellor
University of California
3109 Murphy Hall
Los Angeles, CA 90095-1607
Fax: (310) 828-5643
Email: rdennis@chaminet.ucla.edu

Please view the position description as available at:

http://www.apo.ucla.edu/apo/college_dean.php

To be considered full consideration, nominations and applications should be received by November 22, 1999.
R.I.T
Faculty Position
DEPARTMENT OF PHYSICS
ROCHESTER INSTITUTE OF TECHNOLOGY

The Rochester Institute of Technology is primarily an undergraduate teaching institution with the Department of Physics offering a BS degree in physics. Research topics of current interest in the Department are thin films, magnetic materials, complex (colloidal/macromolecular) fluids, light/thermal neutron scattering spectrosopies, and observational astronomy. The Department maintains an observatory on campus that is used primarily for undergraduate astronomy courses and public outreach. The faculty of the Department also participate in the graduate programs in Imaging Science and Materials Science & Engineering. The Department of Physics invites applications for a tenure track position at the rank of Assistant Professor effective September 1, 2000. The minimum qualifications are a Ph.D. in physics, astronomy or a closely related field, a research focus compatible with the Department’s current research topics, evidence of excellence in teaching lecture and laboratory courses in a US college or university, and a commitment to sustained research involving both undergraduate and graduate students, and initiative in utilizing and/or developing alternative teaching methods. The ideal candidate will make significant contributions in one or more of the following areas in the upper-level physics curriculum: optical physics, computer interfacing, advanced experimental labs, electronics. Candidates should send a curriculum vitae and the names and phone numbers of at least three current references to Chair, Search Committee, Department of Physics, Rochester Institute of Technology, 65 Lomb Memorial Drive, Rochester, NY 14623-5603. Screening of applications will begin December 1, 1999, and continue until a pool of qualified candidates is identified. Descriptions of RIT and the Department of Physics are located at http://www.rit.edu/~674www/.

RIT is an equal opportunity, affirmative action employer; women and minorities are strongly encouraged to apply.

Bates College
Organic Chemistry

The Department of Chemistry at Bates College (www.bates.edu) is a selective liberal arts college of 1,650 students, invites applications for a tenure-track position in Organic Chemistry at the assistant professor level, to begin in September of 2000. The teaching expectations include a two-semester organic chemistry course with laboratory and at least one additional course in an area of interest to the successful applicant. This position also supports our interdisciplinary programs in biological chemistry and neuroscience and provides opportunities to participate in other interdisciplinary programs as well. The applicant will be expected to develop a research program which will involve undergraduates. Major departmental equipment holdings for teaching and research include: 200 MHz NMR, EPR, FT-IR, ICP, GC-MS and UV-visible spectrometers, as well as HPLCs, ultracentrifuges, IBM work stations (with SPARTAN software) and a Nd. YAG-pumped dye laser. A Ph.D. is required; postdoctoral experience is desirable. Review of applications begins November 8, 1999, and will continue until the position is filled. Email inquiries may be directed to tlawson@bates.edu. Applicants should send a CV, undergraduate and graduate transcripts, brief statements of teaching philosophy and research interests, and three letters of recommendation to:

Professor T. Glen Lawson, Chair
Chemistry Search Committee
c/o Secretarial Services
Bates College
7 Lane Hall, 2 Andrews Road
Lewiston, ME 04247

Bates College values a diverse college community and seeks to assure equal opportunity through a continuing and effective Affirmative Action Program.

UNIVERSITY OF TEXAS AT ARLINGTON
ASSISTANT PROFESSOR OF SOCIOLOGY OR ANTHROPOLOGY

The Department of Sociology and Anthropology at the University of Texas at Arlington invites applications for a tenure-track position as assistant professor of sociology or anthropology to begin September 2000. Applicants should have a Ph.D. or reasonable expectation of completion by August 2000. Applicants must possess scholarly strengths in an aspect of Latin American society or culture in the United States. Ability to teach in a women's studies program is desirable. The preferred specialty for anthropology is linguistic anthropology (e.g., sociolinguistics and/or bilingualism); candidates research and teaching experience in other areas of sociocultural anthropology also be considered. Sociology specialties are open. Responsibilities include teaching in undergraduate and graduate programs of the Department of Sociology and Anthropology and the Center for Mexican American Studies.

U.T.A. is a comprehensive, diverse, metropolitan university situated in the Dallas-Fort Worth metropolis, enrolling approximately 25,000 students. The University and larger metropolitan community provide significant resources for scholars committed to Latin American Studies. Anthropology and Sociology at UTA each offer separate B.A. and M.A. degrees.

Applicants must include: 1) Cover letter describing the applicant's research, teaching, and service; 2) current curriculum vitae; 3) three letters of reference. Review of applications will begin in August and continue until the position is filled. Send applications to:

Professor Manuel Garcia y Griego, Search Committee Chair, Center for Mexican American Studies, P.O. Box 19444, University of Texas at Arlington, Arlington, Texas 76019-0444.

Email: cmaa@uta.edu

UTA is an EOUA Employer
City Colleges of Chicago

VICE PRESIDENT, ACADEMIC AFFAIRS & STUDENT DEVELOPMENT

The Vice President is the chief academic and student officer and reports directly to the President of Harold Washington College. Responsibilities include the development, coordination, staffing, evaluation and enhancement of academic and student development programs. The candidate will also oversee the management and development of instructional and planning activities as they relate to the college’s diverse mission and goals.

The Vice President will manage the Deans of College Credit, Student Services and all department chairpersons. Also will make recommendations to the President for academic schedules, appointments to the faculty, promotions, tenure, leaves, and sabbaticals. Furthermore, our selection will promote scholastic achievement, innovative programs and faculty development, while assisting the leadership and on going development of the college.

To qualify, a Master’s Degree supplemented by at least 5 years of diverse and successful academic administrative experience as a Vice President or Dean, or an equivalent combination of education and experience is required. IOWA STATE UNIVERSITY

Where you can become your best.

Associate Director of Governmental Relations
Assistant Director of Governmental Relations

Iowa State University invites applications and nominations for two positions in its Office of Governmental Relations which reports to the President of the University. Iowa State is a comprehensive, land-grant university located in Ames, a community of 50,000 people known for its exceptional quality of life. Iowa State has 28,000 students, 1,700 faculty members and an annual budget of approximately $1.51 billion. The university offers undergraduate, graduate, and professional degrees through its nine colleges: Agricultural and Life Sciences; Business; Engineering; Family, Childhood, and Community Sciences; Food, Agricultural, and Biological Sciences; Health and Human Sciences; Liberal Arts and Sciences; Natural Resources and Environmental Sciences; and Pharmacy and Pharmaceutical Sciences. The university is a member of the Association of American Universities, a national organization of research universities, and is recognized for its excellence in teaching, research, and public service.

Associate Director of Governmental Relations
This position reports to the State Board of Regents and the University President as a legislative liaison to the Iowa General Assembly. The successful applicant will have excellent written and oral communication skills, a bachelor's degree, and five years' experience in government, public affairs, or related fields. An advanced degree in public administration or public policy would be preferred. The position requires a strong commitment to excellence in higher education. The successful applicant will be expected to demonstrate leadership in the development and implementation of effective strategies for advancing the university's legislative and public affairs goals. The University offers a comprehensive benefits package.

Assistant Director of Governmental Relations
This position reports to the director of governmental relations and coordinates federal activities with the university's office of governmental relations. The successful candidate will have excellent written and oral communication skills, a bachelor's degree, and three years' experience in government, public affairs, or related fields. The University offers a comprehensive benefits package.

Nominations and applications for both positions will be accepted until filled. For complete information and to apply, go to: www.iastate.edu/jobs. Application deadline is December 1, 2009. The University is an equal opportunity/affirmative action employer and encourages applications from women and minority candidates.

HARTFORD SEMINARY

PRESIDENT

Founded in 1884, Hartford Seminary's mission is to promote faithful living in a multi-faith environment. It offers the M.A., M.Div., and Th.M. degrees, and certificates in Black and Hispanic and Women's Leadership. It has an international recognition for its centers for the study of Islamic studies and Christian-Muslim relations, and publishes The Muslim World, the oldest scholarly journal on Islam in the English-speaking world. The Seminary has an endowed faculty of 15 and a full-time staff of 70. Hartford Seminary is located in Hartford, Connecticut, midway between New York and Boston. The Greater Hartford area provides among the most diverse and affordable living spaces in the country.

The next president should be a person of theological, academic or other relevant professional distinction with a meaningful faith commitment. The president should be proficient in his or her profession and demonstrate ability to lead the Seminary in raising its national and international profile. The president should have experience in interfaith or inter-group relations and be able to work effectively with the Seminary's diverse constituencies. The successful candidate should have significant experience as a leader, effective communication skills and proven skills in fundraising from sources. Interest and experience in distance learning is desirable.

The Presidential Search Committee will begin to review candidates in November, 1999 and contact an appointment is made. Nominations and expressions of interest will be treated with confidentiality and should be sent to:

Martin L. Budd, Chair
Presidential Search Committee
c/o Day, Berry & Howard LLP
One Canterbury Green
Stamford, CT 06901

Dr. Patricia L. van der Vorm of Academic Search Consultant Service is assisting the Search Committee and inquiries may be made of her at (203) 263-7473 or via e-mail at pv@aademic-search.org.

An Affirmative Action/Equal Opportunity Employer. The Seminary especially encourages applications from women and minority candidates.
Anthony Bonomo

EMPLOYMENT OPPORTUNITIES

THE UNIVERSITY OF TEXAS AT BROWNSVILLE
and
TEXAS SOUTHMOST COLLEGE

Dean of Health Sciences

The University of Texas at Brownsville and Texas Southmost College is seeking a dean for the School of Health Sciences due to the impending retirement of our present dean.

The School of Health Sciences has 33 full-time faculty and seven staff members involved in various accredited programs. The School consists of the departments of Nursing and Allied Health with associate degrees and a BSN. The School is just beginning to develop a graduate program in nursing.

Responsibilities of the position include academic leadership of the School, specifically academic planning, program enhancement, service learning, maintenance of accreditations, faculty recruitment and development, student management, alumni relations, fund-raising, and resource allocation. The Dean reports to the Provost.

Qualifications include an earned doctorate and credentials for appointment at the rank of Professor in one of the disciplines represented within the School. The candidate must have successful administrative experience within higher education, demonstrated excellence in leadership, a commitment to diversity, and the ability to foster collaboration with various internal and external constituents of the School.

Dean of Liberal Arts

The University of Texas at Brownsville and Texas Southmost College is seeking a Dean for the College of Liberal Arts.

The College of Liberal Arts has 76 full-time faculty and eight staff members in the departments of Behavioral Sciences, Criminal Justice, English & Speech, Fine Arts, Government, History, and Modern Languages. Responsibilities of the position include academic leadership of the College, including academic assessment, program planning and development, faculty recruitment and development, fund-raising, and resource allocation. The Dean reports to the Provost.

Qualifications include an earned doctorate and credentials for appointment at the rank of Professor in one of the disciplines represented within the College. The candidate must have successful administrative experience within higher education, including assessment and working in collaboration with teacher preparation programs; demonstrated excellence in leadership; a demonstrated commitment to diversity; and an ability to collaborate with other academic and student support units.

Applications should include a letter of application addressing the qualifications, a position paper on academic leadership, curriculum vitae, unofficial transcripts, and three letters of reference. Review of applications will begin December 1, and continue until the positions are filled. Send applications to:

WILLIAM STATE COLLEGE

ENGLISH LITERATURE

Tenure-track position beginning August 2000. REQUIREMENTS: Ph.D. required. Candidate with a strong background in philosophy, particularly ethics, preferred. RESPONSIBILITIES: teach American literature as well as general education composition and literature courses. RANK/SALARY: Commensurate with qualifications and teaching experience.

LOCATION: Wayne State College is located in Wayne, a city of approximately 5,100 in northeastern Nebraska. In recent years, FTE enrollment has increased by 55%, bringing the student population to 4,000. The college is a focal point and catalyst in northeast Nebraska, not only for education but also for community and economic development, the arts, and cultural activity. Library automation and a campus-wide computer network link faculty to each other and to colleagues across the nation.

DEADLINE: Applications will be reviewed upon receipt and position will remain open until filled. APPLICATION: Send letter of application, curriculum vitae, names and addresses and telephone numbers of three references to: English Literature Search, c/o Interim Vice President for Academic Affairs, Wayne State College, 1111 Main St., Wayne, NE 68787.

Minorities are encouraged to apply. Wayne State is an Equal Opportunity/Affirmative Action Employer.
ONONDAGA COMMUNITY COLLEGE
REGISTRAR

Onondaga Community College invites applications for the full-time, twelve-month position of Registrar. A member of the Enrollment Management/Student Success Services team, the Registrar will manage the complete registration process, supervise the creation, maintenance and certification of academic records, prepare all course schedules and certify degrees and certificates. The candidate will have strong written and verbal communication skills, knowledge of computerized registration and records software (Dartek College® preferred); strong supervisory skills and an ability to complete multiple tasks in a fast-paced environment.

MINIMUM QUALIFICATIONS: Bachelor's degree plus four years' supervisory experience in a records and registration office or equivalent combination of education and experience.

SALARY: Commensurate with education and experience.

DEADLINE FOR APPLICATIONS: Application review begins November 10, 1999 and continues until the position is filled.

TO APPLY: Submit a current resume covering one page of application, together with the names, addresses, and telephone numbers of two (2) references to: Office of Human Resources, Room 114 Service and Maintenance Building, Onondaga Community College, 4941 Onondaga Road, Syracuse, NY 13215-2099 (atten: Registrar search).

OCC is an Affirmative Action/Equal Opportunity employer. Women, people of color, individuals with disabilities, veterans, and other protected class members are urged to apply.

Aims Community College
Executive Vice President
Aims Community College
Greeley, Colorado

Aims Community College invites applications for the position of Executive Vice President. The individual will report directly to the President. General responsibilities include: coordination of College-wide policies, procedures, systems, committees and activities that lead the institution through shared decision making, quality improvement and recognition of success.

The College
Aims is a comprehensive local district community college in Greeley, Colorado, 45 miles north of downtown Denver. The three-campus college serves 14,000 students (4,000 FTE) in a service area that includes a population base of 300,000-plus residents.

Specific Duties
Within established mission and vision statements, responding to directives of the President including implementation and development of special projects o Supervising the areas of human resources, information technology systems, institutional planning, and research, o Two campus deans and grants program O Coordinating academic and student affairs programs and services. O Coordinating and directing staff development programs O Directing and implementing the College's strategic planning process and linking it to the budget planning process O Coordinating and developing comprehensive internal evaluation plans O Responsible for compliance with all federal and state regulations O Coordinating all college committees and tasks force O Maintaining and coordinating college-wide policies and procedures O Assisting the President in determination of appropriate compensation practices for the College's employees O Serve as the administrator in charge of the College in the absence of the President.

Criteria
Understanding of and commitment to the mission of the comprehensive community college in a local control district O Earned doctorate from an accredited institution preferred. O Administrative leadership in a community college O Full-time community college teaching preferred. O Leadership experience demonstrating a strong decision-making style that is based on collaborative relationships, team building, and experience with shared decision-making. O Demonstrated management skills in entrepreneurial activities, human resources, financial management/allocation of resources, strategic planning, team building and conflict resolution. O Evidence of effective working relationships with local, state and federal agencies, other colleges and faculty and staff O Successful record of innovative education and management practices and a willingness to assume considered risks O Demonstrated concern for student needs and for open communications with students O Evidence of an understanding of the use and implementation of technology in education and administrative settings. O Successful record of participation in partnerships with various constituencies including business, public schools, universities and community groups O Sensitivity to diversity issues and a demonstrated ability to lead an institution in which differences are valued (bilingual/bicultural background a definite asset) O Superior written and oral communication skills O Evidence of successful support for community economic development O Demonstrated understanding of the role of the community college in international education.

Application Process
Candidates should submit a letter of application in response to the criteria point by point, a resume and at least three professional reference letters as well as any other pertinent information to: Ms. Diane Miller, Director of Human Resources, 5401 W. 20th St., Greeley, CO 80634.

Applications will be accepted until the position is filled. The screening process will begin November 4, 1999.

EMPLOYMENT STARTING DATE: March 1, 2000

Information
Call Ms. Diane Miller at (970) 330-8008. FAX: 6434 • E-mail: dmliller@aims.edu • Website: www.aims.edu.

UNIVERSITY OF CINCINNATI
DIRECTOR, STUDENT ORGANIZATIONS AND ACTIVITIES

(99PV0651) The University of Cincinnati is a state-supported Research Institution located in southwest Ohio. UC is one of the most architecturally dynamic campuses in America today.

This position is responsible for the overall supervision and administration of the Student Organizations and Activities Office including professional and student support staff and an operating budget of $1,132,000. Programs include leadership training, Greek Advising, student activities, community service and service-learning, diversity programming, and the oversight of Student Government Association and program planning. This position is a key member of the Student Life Management team and will work closely with students, faculty and staff to develop a comprehensive student activities program. This position will also play an instrumental role in a major capital effort to renovate an existing university center and build a new recreation complex.

MIN. QUALS: Master's degree (PhD preferred) in higher education or related field. 5 yrs. professional involvement in student life programming and 3 yrs. supervisory experience. The ideal candidate should possess skills in programming, student advising, leadership development, diversity training, assessment/evaluation, budgeting and resolving conflict. The candidate should also have professional experiences working in a large, comprehensive university with diverse student populations, faculty and community stakeholders.

Resumes accepted until filled. Send resume noting control #99PV0651) and the names, addresses and phone numbers of three references to: Dr. Maurice Gonzalez, University of Cincinnati, PO Box 216193, Cincinnati, OH 45221-0193.

The University of Cincinnati is an affirmative action/equal opportunity employer. Women, minorities, disabled persons, Vietnam-era veterans, and disabled veterans are encouraged to apply.
California State University Monterey Bay

California State University Monterey Bay (CSUMB), is a comprehensive public university that is committed to serving the diverse people of California, especially the working class, historically under-served, and low-income populations. The university values an educational environment of critical and linguistic diversity and gender equity; ethical reflection and practice; effective and experimental use of technologies as resources to people and catalysts for learning; and the integration of cross-disciplinary models enabling students, faculty and staff to engage in innovative, inclusive, and community-oriented service learning. The campus is organized around student learning outcomes in 14 interdisciplinary undergraduate and graduate degree programs. It is global in perspective and of sufficient breadth and depth to meet local, regional, and statewide needs, specifically those of isolated rural communities and inner-city populations. The campus is located on Monterey Bay, 100 miles south of San Francisco.

CSUMB is currently recruiting faculty (tenure track unless noted) in the following areas for appointments effective August 2000.

The University is an equal opportunity educator and employer.
DIRECTOR OF INTERNATIONAL PROGRAMS

UNIVERSITY OF MARYLAND

The University of Maryland, a Research 1 University and the flagship of the state university system, is located in the Baltimore-Washington corridor, in close proximity to the nation's capital. To strengthen its international initiatives, the University has recently reorganized several of the existing international offices into a new unit. The Director of International Programs will direct this newly formed office and will lead the university through academic partnerships in achieving even greater prominence for its current international activities and in developing new initiatives that take advantage of its strategic location. Specifically, the Director of International Programs will serve as the leading advocate for international activities on campus, promote research and form educational partnerships with academic and administrative units; and foster and maintain high quality service and programs for international students and faculty. The position reports directly to the Senior Vice President for Academic Affairs and Provost and operates with a large degree of delegated authority.

The Director of International Programs manages the Office of International Programs which works with the university community to develop policy and long-range planning in international issues, assists with the design of curriculum, conducts faculty development and research, and develops relationships with national and international government agencies, foundations, and funding sources. The Director also assists the deans of the colleges and alumni office in appropriate outreach efforts.

Following a recent reorganization, the Director is also responsible for the following three offices: (1) Office of International Educational Services, a long standing unit that provides centralized services to international students and faculty, including: admission, placement, orientation, advising and counseling; administration of immigration services, exchange visitor programs, study abroad programs, and student exchange programs; and coordination of an international residence hall. (2) J. William Fulbright International Center: This Center, under development, is a joint venture between the University of Maryland and Fulbright International Inc. The Director will be expected to lead the campus in the design and conceptualization of appropriate programming for the Center by facilitating and coordinating initiatives with faculty and academic units. (3) Institute for Global Chinese Affairs: This unit promotes programs, exchanges, and other activities between university faculty and academic units with our Chinese counterparts.

The requirements for the position include: a record of several years of successful administrative/leadership experience in the area of international programs; significant university experience with collaborative partnerships; proven track record in fundraising and program development; Candidates should have a record of scholarly research that would ordinarily justify appointment at the rank of Professor in one of the university's academic units.

Applicants and nominees should submit a letter of interest, curriculum vitae, and the names, addresses and telephone numbers of at least two persons who can be contacted by the search committee for references. Nominations are encouraged and will be received at any time. Please send all materials to:

Search Committee for Director, International Programs
Attention: Ms. Sheila Mahaffy
1119 Main Administration Building
University of Maryland
College Park, MD 20742

For best consideration, please send letter of interest and supporting materials by December 1, 1999. Nominations and application will be accepted until the position is filled. Please feel free to direct all inquiries to the chair of the committee, Dr. Judith Brzisca, either by calling (301) 405-6534 or by email to jbrzisca@osan.umd.edu.

The University of Maryland, College Park, actively subscribes to policies of Affirmative Action and equal education and employment opportunities. Women and ethnic minority candidates are encouraged to apply.

AMERICAN UNIVERSITY
WASHINGTON, DC

TENURE TRACK POSITIONS

American University is an independent, coeducational university with more than 11,000 students enrolled in undergraduate, master's, doctoral, and professional degree programs. The university attracts students from many different backgrounds from all 50 states, the District of Columbia, Puerto Rico, and more than 130 countries. Located in the nation's capital, AU's campus is in a beautiful residential neighborhood, a short distance away from the city's centers of government, business, science, research, and art. The university recently adopted a strategic plan, "Building a Global University: American University in the Next Century."

All inquiries and applications should be sent directly to the Departments listed below. All applications should include a current curriculum vitae and references. All applicants must possess the ability to balance teaching and scholarship, prepare our students to live and work in a diverse world, utilize information technology in the classroom, and promote interdisciplinary inquiry and experiential learning. All positions are at the Assistant Professor level unless otherwise indicated. Review of applications will begin in October unless otherwise noted.

Nominations and applications are invited for the following tenure-track faculty positions for the 1999-2000 Academic Year.

Join us
at the College of Lake County

Faculty like Natalia Casper and Raymond Salazar (pictured above) have found a dynamic and diverse academic community at the College of Lake County.

"I love the small classes and the fact that I have students of all ages and from many backgrounds," said Natalia Casper, a mathematics instructor who joined the college in 1998.

"The college encourages faculty to be creative and provides the resources to be innovative," said Raymond Salazar, a veteran instructor of Spanish.

Both instructors give high praise to the college's award-winning orientation program for new faculty. "A new faculty member isn't alone," Raymond Salazar said. "You have a support network," Natalia Casper added. "The college wants to help you succeed in the classroom."

The College of Lake County is a two-year community college with an enrollment of about 15,000, located in Grayslake, a northern suburb of Chicago. The college offers an attractive compensation package and will recruit for a number of tenure-track teaching positions for the 2000-2001 academic year.

The College of Lake County salutes Hispanic Heritage Month and encourages readers to find out about teaching opportunities at the college.

The Law School of the University of Southern California
POSITION DESCRIPTION - DEAN OF THE SCHOOL

The University of Southern California is inviting applications and nominations for the position of Dean of the Law School. The University is located in Los Angeles and is one of the nation’s premier research universities. USC Law School was the first law school established in the southwestern United States, and is now a national law school serving a student body drawn from over 100 undergraduate institutions distributed throughout the nation. It is one of the preeminent law schools in California, and is typically ranked among the top 15 or 20 in the country.

USC Law School is relatively small, with an average class size of approximately 200 students and a total enrollment of 600. It has approximately 35 full-time faculty, many of whom have advanced degrees or training in other disciplines in addition to law and are recognized nationally as experts in their respective fields. The Law School’s endowment is among the ten largest for private American law schools. The Law School’s primary mission is facilitating the production of quality scholarship by its faculty, and training students for the bar, bench and other pursuits to which knowledge about law and the legal system is relevant.

The Dean of the USC Law School is its academic leader and chief administrative officer, and reports directly to the Provost of the University. The responsibilities of the job include: leading the recruitment, development and retention of talented faculty; promoting excellence in the School’s educational and scholarly functions; planning and managing fiscal matters; leading the School’s fundraising efforts; and maintaining supportive relationships with alumni and with other members of the local bar and bench.

Nominations and applications should be sent to: Randolph Westerfield, Search Committee Chair, c/o Office of the Provost, University of Southern California, Bovard Administration Building, Room 202 - MC 4019, Los Angeles, CA 90089-0419. Applications should include a letter describing the candidate’s qualifications for this position; a curriculum vitae; and names, addresses and telephone numbers of three references. Questions may be directed to Bill Strippol, Director of Information Resources, Office of the Provost (213-740-0917, 213-740-1782 (fax), strippol@usc.edu). Review of applications and nominations will begin immediately and will continue until the position is filled.

USC is proudly pluralistic and firmly committed to providing equal opportunity for outstanding men and women. USC actively seeks nominations of and applications from qualified individuals from the broadest possible community.

(AA/EEOC)

COGNITIVE PSYCHOLOGY

Pending approval and funding, the Department of Psychology at the University of San Francisco issues this announcement for a full-time tenure track position in Cognitive Psychology with an emphasis in neurocognition at the Assistant Professor level, anticipate to begin in the Fall 2000.

Teaching responsibilities may include lower division courses in neuropsychology, cognition, (with lab), research methods, and related courses to undergraduates.

Qualifications: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, and earned doctorate by August 1, 2000, experience and willingness to work in a culturally diverse environment and an understanding of and commitment to support the mission of the University are required.

We particularly encourage minority and women applicants for all positions. The University of San Francisco is an Equal Opportunity/Affirmative Action Employer and will provide reasonable accommodations to individuals with disabilities upon request.

Applicants should submit a letter of application, current vitae, graduate transcripts, brief description of research plans, copies of recent research papers, statement of teaching philosophy, evidence of teaching ability including copies of teaching evaluations, and three letters of recommendation

Cognitive Psychology Search Committee
/c/o Michael Bloch
Department of Psychology
University of San Francisco
2134 Fulton Street
San Francisco, CA 94117-1080

Applications must be received by January 15, 2000, in order to ensure full consideration.

Established as San Francisco’s first institution of higher learning in 1855, the University of San Francisco presently enrolls 8,000 students in the arts and sciences, business, education, nursing, law, and professional studies. The University is a private Catholic and Jesuit Institution and particularly welcomes candidates who will positively contribute to such an environment.

WASHINGTON COLLEGE OF LAW

VISITING PROFESSOR IN CLINICAL PROGRAM

American University. Washington College of Law, is seeking to hire two visiting professors in its Clinical Program for AY 2000-2001. Responsibilities in the in-house, live-client clinical program include teaching a seminar component of a clinic, conducting case rounds and supervising students in their fieldwork. In addition, visiting faculty teach one course each year outside of the clinical curriculum and participate fully in all aspects of the life of the law school. The Washington College of Law currently has the following clinics: civil practice clinic, community and economic development law clinic, criminal justice clinic (prosecution and defense); domestic violence clinic (criminal and civil); international human rights law clinic; tax clinic; and the women and the law clinic. Possible positions include teaching in the civil practice clinic, the criminal justice clinic, domestic violence clinic and the women and the law clinic. The applicant’s teaching responsibilities will depend on experience, interest, and the overall needs of the clinical program.

Minimum qualifications include a J.D. degree, outstanding academic record, three years’ experience as a lawyer, membership in a bar, and experience as a clinical teacher. Desired qualifications include published legal scholarship, participation in clinical teachers’ conferences and workshops, and membership in the District of Columbia bar. American University is an EEO/AA employer committed to a diverse faculty, staff and student body.

Applications consisting of a curriculum vitae and cover letter should be sent by November 1, 1999 to Professor Peter Jaszi, Chair, Faculty Appointments Committee, c/o Office of the Dean, American University, Washington College of Law, 4801 Massachusetts Avenue, N.W., Washington, D.C. 20006, with a copy to Professor Richard Wilson, Acting Director, Clinical Program, at the same address.
UNIVERSITY OF FLORIDA

COLLEGE OF EDUCATION

Applications should be directed to the Chair, Professor Search Committee, School of Social Work, Florida State University, Tallahassee, FL 32306-3144. (850) 644-3225 or Fax: (850) 644-9790. E-mail: profsearch@fsu.edu Website: http://www.fsw.fsu.edu
SCHOOL OF HUMAN DEVELOPMENT AND COMMUNITY SERVICE
Division of Education

Teacher Education in the state of California is undergoing unprecedented growth and change. At CSU Fullerton, we are committed to providing the flexibility and resources necessary to match these opportunities. We are located 25 miles from Los Angeles. The expanding Southern California economy is diversified and vibrant with ample opportunities for dual career couples.

The Division of Education is pleased to announce the opening of the following searches for the 2000-2001 academic year.

Elementary, Bilingual and Reading Education - 3 positions - Rank Open
Teach courses in one or more areas: science, math, reading, language arts, social studies, education, and master’s level. Field supervision in multicultural urban environments. Experience in multicultural education, bilingual education, or educational research strongly preferred.

Applicants should submit a letter of application, curriculum vita, transcripts of graduate work, 3 current letters of professional reference, and a stamped self-addressed envelope to the above address listed below. Questions about this position may be sent to ahishop@fullerton.edu or you may call 714-278-7415.

Reading - 1 position - Assessment and Remediation - Assistant/Associate
Teach reading classes in diagnosis and remediation in the Masters of Science in Education, Reading Program. Responsibilities include directing off-campus reading clinics and teaching courses related to testing and evaluation. Advising students and scholarly and service activities related to the position are also components of the assignment.

Applicants should submit a letter of application, curriculum vita, transcripts of graduate work, 3 current letters of professional reference, and a stamped self-addressed envelope to the above address listed below. Questions about this position may be sent to ahishop@fullerton.edu or you may call 714-278-7415.

Secondary Education - 3 positions - Assistant/Associate
Two positions - Crosscultural, Language and Academic Development (CLAD), Applied Linguistics, Multicultural Education
Teach methodology courses in the CLAD sequence, including instruction in literacy across the curriculum, multicultural education, the education of language minority students, and second language acquisition. Administer the Single Subject CLAD Certificate Program.

One position - General Pedagogy and Director of Admissions
Serve in the capacity of Director of Admissions to the Single Subject Credential Program, and as Future Teachers Program Coordinator. Additional teaching assignments may include multicultural education educational introductory courses in education, or graduate courses in secondary teacher education.

Applicants should submit a complete packet if the following: letter of interest outlining qualifications related to job description, 3 letters of reference (included with application or mailed separately), curriculum vita, graduate transcripts, sample of scholarship/academic writing, and stamped self-addressed envelope to the above address listed below. Questions about these positions may be sent to tadwalk@fullerton.edu or you may call 714-278-7415.

Special Education - 2 positions - Assistant/Associate
Moderate/Severe Disabilities and Early Childhood Special Education
Teach courses in the above areas as well as share in a variety of tasks with colleagues in a small department. These encompass teaching, advising, supervision of graduate level research projects, grantwriting, program development, creative and scholarly activities, university service activities, and collaboration with various community schools and agencies.

Interested persons should submit a letter of application stating their beliefs regarding special education, areas of expertise, completed vita, credentials, three references, and curriculum vita. 3 letters of recommendation, 5 transcripts, and stamped self-addressed envelope to the above address listed below. Questions about these positions may be sent to ahishop@fullerton.edu or you may call 714-278-7415.

Fullerton, CA 92834-6868
Phone: 714-278-7415

Cal State Fullerton is strongly committed to achieving a campus of success through diversity and equity.
DEAN
UNIVERSITY OF MARYLAND
SCHOOL OF LAW

The University of Maryland School of Law invites nominations and applications for the position of Dean.

The School of Law is widely regarded as the leading public law school in the Washington, D.C./Baltimore metropolitan area. The Dean is the chief academic and executive officer of the School of Law, one of six professional schools on the University of Maryland Baltimore campus, and reports directly to the President of the campus. The Dean is responsible for providing leadership for the School's development in the next century, promoting excellence in the School's scholarly activities and educational programs, providing administrative oversight and direction; planning and administering the School's budget; providing guidance for the School's fundraising activities; and fostering relationships with alumni, members of the bar in the region, government officials, and community leaders.

The School of Law is in the top tier of public law schools in terms of private fundraising and alumni participation. The School recently concluded a brief and highly successful capital campaign that raised more than $8 million in private funds for a new $42 million state building project. All public and private funding is in place, and construction is set to begin shortly on this new state-of-the-art building complex, which will house the School of Law, including the Thurgood Marshall Law Library, well into the next millennium.

The Law School's curriculum, widely recognized for its emphasis on integrating theory and practice, combines traditional offerings with innovative programs and a full menu of elective courses. Fifty-three full-time faculty members teach the approximately 635-day and 245 evening students. The School's acclaimed student practice programs are among the most ambitious and extensive in the nation, and include the integration of selected law practice experiences into core courses within the required curriculum. Nationally ranked programs in health care law and environmental law provide highly motivated students with traditional classroom instruction and clinical opportunities in an interdisciplinary setting, in conjunction with the American Bar Association, the School publishes the Business Lawyer, the second most widely circulated law review in the country.

The School of Law brings together students, faculty, and staff from different backgrounds and intellectual interests, ethnic and racial heritages, and academic and social experiences, to form a community where individuals are valued for their professional and personal contributions to the community.

Applicants should have academic credentials appropriate for appointment at the rank of professor, with an accomplished record of scholarship; proven leadership abilities; understanding and support for the University's multiple missions and its commitment to cultural diversity; commitment to the fostering of interdisciplinary activities; experience in fiscal management; and the ability to attract high-quality financial resources to the School.

Nominations and applications for the position of Dean of the School of Law should be submitted to:

Professor Richard Boldt,
Chair, Dean Search Committee
Office of the President
University of Maryland
520 W. Lombard Street
Baltimore, MD 21201

Applications should include a letter describing the candidate's qualifications, a curriculum vitae and the names, addresses and telephone numbers of five professional references. Review of applications will begin November 1, 1999, and continue until the position is filled.

Additional information about the School of Law is available at the School's web address: http://www.law.umaryland.edu.

The University of Maryland Baltimore is an Affirmative Action/Equal

I PUNTO FINAL!

WILL THERE BE LATINO PH.D.S IN THE 21ST CENTURY?

1990s have been a decade of controversy over doctoral education: we read that research universities are producing too many Ph.D.s and that there are few jobs for them. The university teaching jobs are there, evidenced by increases of part-time and temporary or contract position, as well as enrollments. But not the traditional tenure-track positions. This controversy has most likely discouraged young Latinos from pursing Ph.D.s, and now we lack them just when college enrollments are going to soar. We faculty should encourage graduate-school level preparation for those interested in teaching literature, composition, and language, as well as ethnic studies. We need Latino faculty leaders to inspire and mentor the many Latino students of coming decades. Currently, and for the future, jobs are increasing, and Ph.D.s are needed, especially in some of the so-called “hot” fields, Latino studies and Spanish language among them.

In California, frequent reference is made to Tidal Wave II, the Baby Boomers’ children, who will flow onto our campuses for two decades. While administrators and politicians plan for buildings and technology enough to serve all, no mention is made of who will teach all. Add to this the faculty retirements over the next 10 to 15 years—ensured professors who began in the heyday of the late 60s and 70s who will soon be retiring in record numbers. Who will fill their chairs or pods? In the 22-campus CSU system, two-thirds of present tenure faculty are getting ready to retire.

Can the university of the future effectively manage large numbers with distance education and part-time faculty? The public university will most likely attempt this if we do nothing to influence the makeup of future faculty. Some reports that decline the lack of jobs for Ph.D.s are making great generalizations. Certain disciplines have diminished enrollment, but other fields are growing in interest and popularity—Latino Studies programs, for one. If we add together the continuing creation of Latino studies programs, burgeoning enrollments in Spanish departments, the projected increase in students, and oncoming retirements, there is a demonstrable need to prepare new Ph.D.s to become professors in the 21st century. While fighting our ongoing battle against the increase of long-term, part-time faculty and the assault on tenure, we need to grow new Ph.D.s to help combat these issues.

We have not identified and encouraged enough Latinos to pursue Ph.D.s. Their presence in academia is still dismally low. Of all staff and faculty at CSU’s 22 campuses, only 6.3 percent are indicated as Latino or Hispanic.

Present faculty can take action in two areas. First, continue the struggle a ratio of greater numbers of contract or temporary faculty to tenure or track posts at four-year colleges. When administrators convince us that we can more classes with temporary than tenure-track faculty, our programs lose in the run. In the CSU system and elsewhere, financial cutbacks in the late ‘80s stop hiring of tenure-track faculty. More part-time or temporary faculty were not new Ph.D.s had to settle for this type of work. But many faculty without a Ph.D. had to settle, many in their jobs so long that they seem to have rights than new tenure-track faculty. These are not people who can help us continue our programs in the future. Faculty who do not mind this arra because it entails them to teach what they want rather than lower-division are only killing the future of their departments. When they retire, programs c left with only administrators running departments, hiring professors year New professors need guidance and direction from other Ph.D.s, tenured po during their early years. And our programs need faculty advancement to their and knowledgeable about new developments in our disciplines. We should sure that professors of the 21st century are well qualified and placed in positions are permanent, tenure-track.

At the same time, we should make sure that we will have Latino faculty in the faculty of color in our public universities? Many studies track Latinos in higher e posts, and the percentages are not increasing. Perhaps we need a job bank or organization through which a present faculty member is connected with bachelor’s student and agrees to mentor him/her all the way through the Ph.D. a track placement.

We need to target, mentor, and encourage promising students, and we them about the costs to education of too many migrant workers in teaching. We need to send them on a mission to influence the university p and be leaders for the future of education. They need our empowering help us and complete the Ph.D. and move into the faculty ranks in time to influence the children of their generation.

Lawyers and Washington, D.C.

By Gustavo A. Mellander

It is estimated that there are 656,000 attorneys in this county; 70 percent are male, and 30 percent are female. Many law schools report that unlike decades past, 50 percent of their students nowadays are female.

The average starting salary for attorneys is more than $50,000. After five years, many earn more than $80,000. After fifteen years, nearly $125,000. But salaries are all over the map. Some earn a lot less, and a select few make millions a year in and year out.

Washington, D.C.

Laws are born, or hatched, and later interpreted here. Therefore, the nation’s capital is considered by many as the ideal place to study “the Law,” as students are taught to say in law school.

Washington, D.C., affords daily opportunities to view law-making processes firsthand. Students can observe the Senate and House of Representatives, and regulatory agencies such as the Federal Trade Commission, Federal Communications Commission, and the National Labor Relations Board.

The Library of Congress and several other special collections offer the best research resources in the world. The Supreme Court and other federal and local courts are living “workshops.” Administrative agencies and executive departments permit students to observe the American political and legal systems.

It is not surprising that most Washington-area universities have law schools. There are the three Georges: Georgetown, George Washington, and George Mason Universities. American, Catholic, and Howard Universities and the University of Maryland have distinguished law schools as well. Although all provide bread-and-butter training, many are known for their particular specialty.

How to prepare

Those considering this profession should have solid work habits, a curious mind, and an appreciation for logical thinking. The ability to work with and for others is also suggested as a desirable trait.

The study of law is a three-year post-baccalaureate program. Many attorneys suggest that undergraduates majors with significant reading and writing requirements such as history, English, philosophy, and logic are good preparation for law school. Many law schools award a Doctor of Jurisprudence. But many also offer a Master’s in Law and a Doctorate.

Current folklore, or lawyer lore, believes that those who earn As in law school become professors, those who earn Bs become judges, and those who squeak through with a C average become millionaires.

What do attorneys do?

Basically they counsel on a wide variety of issues, and each day more and more people find it necessary to seek legal advice.

Despite lawyer jokes about their lifestyle, most attorneys work long hours, averaging 50 hours a week, and it is not unusual to work 18-hour days when first beginning one’s career. The work is hard, detailed, and stressful. Errors and sloppy work are not tolerated for long.

Many will be surprised to read that according to the Princeton Review Publishers, “over 30 percent of those who receive law degrees are not practicing law (regularly) ten years after graduation.” But it has served them well, for those trained in the law find it to be an excellent springboard to other professions, such as business, finance, and general management. Many Silicon Valley entrepreneurs have law degrees.

Of course, many lawyers enter politics. It is the No. 1 profession in Congress and in statehouses throughout the nation. And once leaving elective office in Washington, D.C., many remain as high-paid lobbyists.

A few lawyers become judges, long one of the most respected careers in America. And one that many a politician sees as the ideal way to end a public service career. Many Hispanics have been appointed or elected to judgeships throughout the country. But America still awaits its first Hispanic Supreme Court Justice.

For those interested in pursuing a law career, detailed information is available from the American Bar Association, headquartered in Washington, D.C. Tel. (202) 662-1000. The Hispanic National Bar Association is also a fine resource for information. It can be reached at (202) 293-1507.

Is the Time Ripe for a Hispanic on the SUPREME COURT?

BY GARY M. STERN

A person from every nationality, religion, and ethnic group that you can think of is represented on the Supreme Court, including Catholics, Protestants, Jews, African Americans and women—except Hispanics. Why not have a Supreme Court that reflects what this country looks like? said Alexander M. Sanchez, director of the Hispanic National Bar Association.

Since Supreme Court Chief Justice William H. Rehnquist and Justice Harry Blackman are in their late seventies and might be nearing retirement, discussion of who will fill a potential vacancy has intensified.

After an exhaustive search to determine the leading legal minds throughout the country, the Hispanic National Bar Association recommended six Hispanics as qualified to be named to the Supreme Court.

"The Supreme Court has always had a commitment to find balance," noted Martin Castro, a Chicago-based partner in Baker & McKenzie, a global law firm and chair of the Hispanic National Bar Association's U.S. Supreme Court Committee. In the past, the balance included finding talented Supreme Court justices from the North, South, East, and West. In more recent times, Supreme Court justices have been named due to their political affiliation, either liberal or conservative. "No one would tolerate a Supreme Court without women. No one would tolerate a Supreme Court without an African American, yet we continue to tolerate a Supreme Court that doesn't reflect our fastest growing group, Hispanics," asserted Castro, a graduate of the University of Michigan Law School. Not only is there no Hispanic Supreme Court justice, but a 1998 USA Today article revealed that of 394 clerks hired by the nine justices, only 1 percent were Hispanic and 7 percent minority.

The Hispanic National Bar Association named six Hispanics as eminently qualified to become a U.S. Supreme Court justice on its short list: Joseph F. Baca, a justice of the New Mexico Supreme Court since 1989; Fortunato "Pete" Benavides, a judge since 1974, currently in the United States Court of Appeals for the Fifth Circuit in Austin, Texas; Jose A. Cabranes, a judge at the U.S. Court of Appeals for the Second Circuit since 1979; Gilbert Casellas, former chair of the Equal Employment Opportunity Commission; Cruz Reynoso, a professor of law at the University of California at Los Angeles since 1991; and Vilma Martinez, a litigation partner with Munger, Tolles & Olson in Los Angeles.

"Each of these six Hispanics possesses the credentials to be a Supreme Court justice," declared Castro. The Hispanic National Bar Association's committee conducted extensive research to determine who were the "best and the brightest," Castro said. Its state and local chapters nominated candidates, and candidates could nominate themselves. The bar association committee reviewed each candidate's resume and writing, interviewed partners and colleagues, conducted extensive background checks, then interviewed the candidates. Many were rejected because their qualifications were...
Thomas often supports conservative political agendas that oppose affirmative action. Vega strongly disagreed with this view. He illustrated the influence that one justice can have by pointing to Thurgood Marshall, the African American who led the fight for civil rights when he was the only Black man on the Supreme Court. "He was able to provide a perspective to colleagues unique to his experience. A Hispanic on the U.S. Supreme Court would provide similar insight to deliberation," said Vega.

Naming a Hispanic to the court would strengthen law and order in the country, suggested Carlos Ortiz. Appointing a Hispanic "would
deemed not substantial enough to be considered for the country's highest judiciary position. The committee's judgment was based on a candidate's "intellect, ability, temperament, and experience," said Castro.

As he the time were ripe for a Hispanic to be named to the Supreme Court, Cades Ortiz, general counsel at Goya Foods Inc. and the Hispanic National Bar Association's White House liaison, replied, "The time has been ripe for some time. It should have happened long ago. The Hispanic American community is the only major constituency that has not had a voice or representation on the Supreme Court. That's lasted 210 years, if my count is correct."

"Many issues critical to the Hispanic community are either before the Supreme Court or will be in the near future," declared Gregory Vega, United States Attorney, Southern District of California, based in San Diego, Calif., and former president of the Hispanic National Bar Association. He identified issues that directly affect Hispanics that will be addressed by the Supreme Court as affirmative action, the upcoming census and whether the method of census should be statistical sampling based on actual count, many immigrant issues, and bilingual education. "At the present time, there is no voice for the Hispanic community in the Supreme Court," he emphasized.

While critics say that one Hispanic on the court will constitute a decided minority and noted that the African American Justice Clarence serve to promote greater respect for law and order and reduce the risk that the Court's decisions were regarded as tainted by prejudice, indifference, or inequity. Moreover, though he agreed that a Hispanic should be named based on merit, he said that every presidential nominee is a political act. He stressed that "30 million Hispanic Americans have never been represented on the court."

Gilbert Casellas, who at 47 is the youngest person on the short list, said that the time is

"No one would tolerate a Supreme Court
without women...
without an African
American, yet we
continue to tolerate a
Supreme Court that
doesn't reflect our
fastest growing group,
Hispanics."

MARTIN CASTRO, CHAIR, HHBA
SUPREME COURT COMMITTEE
Clinton said that he wants the government to look like America.” He added that the “courts function because people believe in what they do. If people begin to believe that the courts are somehow for other people and not for them, they are less likely to have faith in that institution.”

When Louis Brandeis was named the first Jewish Supreme Court justice by President Woodrow Wilson, Jewish people felt symbolically affirmed, Baca said. “No one expected that Brandeis would favor Jewish litigants. It was a symbolic move,” he said, suggesting that Hispanics would feel validated when a Hispanic justice is named.

Judge Fortunado “Pete” Benavides believes in “executive privilege,” suggesting that the president has a right to name anyone who is best qualified to be on the Supreme Court. He added, however, that it “would be a proper thing to name a Hispanic. Hispanics constitute a significant and growing portion of the American population. If a Hispanic is qualified, it would make all Hispanics feel more a part of the process.”

Contacted by The Hispanic Outlook, 59-year-old Jose A. Cabranes, a judge in the United States Court of Appeals for the Second Circuit, based in New Haven, declined to comment on why a Hispanic should be named to the Supreme Court. “A judge,” he replied, “should not comment on that issue.” Cabranes has been a federal judge since 1979, possesses a law degree from Yale Law, taught administrative law at Rutgers University, and served as general counsel to Yale University and the governor of Puerto Rico.

Cruz Reynoso, currently a professor of law at the University of California at Los Angeles, also offers extensive experience as a judge. He served as associate justice of the California Third District Court of Appeals from 1972 to 1982 and then was an associate justice of the California Supreme Court from 1982 to 1987.

Four candidates, Joseph Baca, Fortunato “Pete” Benavides, Jose A. Cabranes, and Cruz Reynoso, have strong judicial backgrounds. Judge Baca has been a justice of the New Mexico Supreme Court for a decade, Judge Fortunato

Appointing a Hispanic “would serve to promote greater respect for law and order and reduce the risk that the Court’s decisions were regarded as tainted by prejudice, indifference, or inequity.”

Carlos Ortiz,
General Counsel,
Goya Foods Inc., and HNBA
White House liaison

has been on the U.S. Court of Appeals for five years, Judge Cabranes has been on the federal bench for 20 years. Cruz Reynoso was a California judge for 15 years. Experts agree that it is much more likely for a current judge to be nominated than someone from outside the judiciary, though that has happened in the past. Neither Gilbert Casellas nor Vilma Martinez has ever served on the judiciary.

This list of Hispanic candidates was first circulated in 1991, before President Clinton named Justice Breyer and Justice Ginsburg to the court.
Ranking Law Schools

Thomas M. Cooley’s Law Dean Devises New System

by Don LEDUC

Law schools across the nation can now be compared objectively on the strength of their academic program, thanks to a new ranking system.

The Program Achievement Rating, devised by Dean Don LeDuc at the Thomas M. Cooley Law School in Lansing, Mich., ranks American Bar Association (ABA)-accredited law schools across the nation.

The study assesses the strength of each school’s academic program by comparing students’ incoming indexes—undergraduate grade point averages (UGPA) and the Law School Admissions Test (LSAT)—with the schools’ bar passage rates.

“The study ranks American law schools using only objective data for each school published in the 2000 ABA Official Guide to Approved Law Schools,” said LeDuc.

The study compares the reported entering-class profile of each school to its bar results. To make the comparison with the other schools, a formula creates an index score for each school. This index score is based upon the undergraduate GPA and the LSAT of its entering class as published by the ABA.

For this analysis, the index was established using the 75th percentile of undergraduate GPA and the 75th percentile of the LSAT reported by each school for its entering full-time students. These two factors were combined. In this analysis, the UGPA was multiplied by 15 and added to the LSAT score. The result was then halved, so that an index number could be expressed in relationship to approximately 100. Each school’s bar passage rate, again as reported to the ABA, was then divided by its index number to establish a PAR number.

The resulting figure is the school’s Program Achievement Ranking, or PAR. Schools with the highest ranking tend to accept students with a wider range of academic abilities and backgrounds. They also tend to have consistently high bar passage rates.

“The PAR system identifies schools that have high academic standards, effective educational programs, and good teaching,” LeDuc explained.

The University of Montana and Wayne State University tie for first place (a 91 rating); Campbell University in North Carolina, Indiana University-Indianapolis, The University of Mississippi, and Mississippi all tie for third place (all with a 90 rating); Indiana University-Bloomington, the University of Minnesota, and Valparaiso University tie for seventh (89 rating); and Cooley Law School, Mercer University, the University of New Mexico, and the University of South Dakota all tie for 10th place (88 rating).

The PAR survey lists schools in four different ways: by index, by ranking, by state, and by school.

The school-by-school list is an easy way for readers to check out their favorite school and find out where it placed on the list.

The PAR system explores the myth that the more selective, theoretically more prestigious schools would always have significantly higher bar passage rates. Such is not always the case. Schools such as those in the top 10, with their challenging academic programs and rigorous standards, are proving that they can produce bar results equal to, or better than, their more exclusive colleagues in academia.

The PAR system appears to be the first objective system since rankings took on the law school world.

“Nearly all rankings of law schools subjective,” LeDuc noted. “Most depend on reputation, which is often more than a reflection of the rankings’ individual biases about educational va

Most rankings are personally know about the quality and performance of law schools at best, and are ignorant of the same features at the majority of American law schools.

“The important feature of this system is its use of facts rather than perceptions. Its formula used is not insignificant in a system could weigh UGPA and LSAT, or could disregard one of the other aspects.

The PAR system alone should not students when they select schools or any other ranking system, said LeDuc.

At Cooley, the largest law school in the third largest law school in States, the high ranking demonstrates Cooley has been trying to get across you just give people a chance to excel, so in its 25 years, Cooley has garnered reputation for giving a wider range of students a chance, and its reward has been consistent and consistently high bar passage rates. The No. 1 spot rotates among four of schools in Michigan, Cooley has claim spot twice in the last five examinations.

Why is Cooley so popular?

“Students come to Cooley for one reason: because they want to be here,” Alvarado, Deputy Director of Admissions.

want a chance to challenge themselves and prove themselves. Cooley provides both is said and done, there are literally 80 minority and non-minority judges, business owners, and other people out there right now who might not I I weren’t for Cooley Law School. One thing, I am proud of that.”

The new study helps demonstrate
ic challenge offered by the op-rated.

The Program Achievement Rating, LeDuc explained, "operates much as the computation of a value-added tax. The entering-class profile can be thought of as a statement of the raw material that each school starts with. The bar passage rate can be thought of as the quality of the product that each school produces.

"The value added reveals the quality of the school's academic program. It represents the achievement of each school in converting the raw material, the entering class, into the finished product, the new lawyer."

One key element of Cooley's strong academic program is its externship program. All third-year students are required to complete at least a 3-credit clinical experience in an externship approved by the school. Placements are available all over the U.S. Students consistently report that their on-the-job legal experience is one of the most valuable programs they have ever participated in.

"My externship at the Michigan Commission on Indian Affairs increased my research abilities and my knowledge of what is available on-line, in the libraries, as well as through other resources. It was a great experience," reported Melissa López Pope, a recent graduate and now the assistant director of admissions at Cooley.

Cooley enjoys the single highest percentage of minority students among all law schools in the state. Over one-quarter of the school's 1,700 students identify themselves as Hispanic, African American, Asian/Pacific American, Native American, or multicultural.

Of the 1,705 students enrolled as of Sept. 3 of this year, 294 were identified as Black, 102 as Asian, 90 as Hispanic, 18 as American Indian, and three as multiracial. In addition, 65 students were listed as coming from foreign countries.

The diversity has been accomplished through the strength of the school's academic program, not through any special consideration for certain populations. All students at Cooley are admitted on the same basis, an index score comprised of their undergraduate GPA and their LSAT.

Alvarado noted that applicants and students both appreciate Cooley's even-handed approach.

"Every now and then, a student will ask me, 'What type of minority program do you have?' I look them straight in the eye and say, 'The same as our non-minority program opportunity.' As a minority myself, I know I would feel much more comfortable walking into that classroom knowing that I was accepted because I met the exact same criteria as every other student there, regardless of race," Alvarado said.

"Every student who has ever been accepted to the Thomas M. Cooley Law School has been accepted because we believed they possessed at least the minimum academic skills to succeed in law school, as well as the moral and ethical integrity to practice law. Our bar passage rates and the success of our graduates support that," Alvarado explained.

Cooley works hard to make everyone feel welcome. The school boasts strong student groups for those interested in a wide variety of interests, whether political, religious, athletic, social, or ethnic. There are vibrant student groups for interested members of various ethnic groups, including the Hispanic Law Student Association, the Asian/Pacific American Law Student Association, the Black Law Student Association, and the Multicultural Law Students Association.

Maritza Betancourt, a Cooley student and student admissions counselor, serves as an officer with the school's Hispanic Law Student Association. The organization is active on a number of fronts, she said.

The association's mission, she said "is to provide a meeting place for Latino students to exchange ideas. We are a support system for all club members. We have our own outline bank, which is available to dues-paying members. We also offer one-on-one tutorial services for any member.

"We provide a mentor program, voluntary community work, guest speakers, intramural sports, and information regarding conventions and externships," she said. The association has collected money for earthquake victims in Colombia, conducted a clothes drive for a local charity group, helped relocate the Council for Domestic Assault's headquarters, and translated will executions for Spanish-speaking clients at the school's doubly Plus, Inc., Elder Law Clinic. Each semester the group meets regularly to discuss current events and career opportunities."

Often graduates make their own career opportunities. David Piña, probably one of the school's better-known Hispanic graduates, is making his name for himself as an innovative private practice attorney in Houston, Texas. Piña, a 1994 graduate of Cooley, is a partner in the Austin, Texas, law firm of López, Piña, and Urrutia. He is active in his law firm, pro bono work, his church, and legal outreach efforts. Piña and his partners focus on family law, personal injury, and medical malpractice.

Cooley was founded in 1972 by former Michigan Supreme Court Chief Justice Thomas E. Brennan. Brennan's vision was to create a law school that was a practical educational arm of the law, rather than a theory-based offshoot of an educational institution. His dream was to provide a legal education for as diverse a population as possible. Twenty-five years later, he has achieved that dream and the school—with a straightforward admissions process that is the same for all.

More information on Cooley can be obtained by accessing the school's Web site at <www.cool-

ley.edu>, or by contacting the school's Admissions Office at (517) 371-5140 or (e-mail) at <cooleyadmis@msu.com>.

Cooley continues to grow, and the school remains committed to its well-known, year-around program with classes offered seven days per week, morning, noon, and night. Students choose from full- or part-time options and choose the schedule that gives them the best opportunity to succeed.

"We know there are many more well-deserving, potentially good attorneys still out there looking for an open door. For a good number of them, Cooley Law School will open that door," Alvarado promised.

Don LeDuc, dean of The Thomas M. Cooley Law School (1982-88 and 1996-present), served as a member of the Michigan corrections commission for seven years and is on the board of directors of the Institute of Continuing Legal Education. As chair of the Thomas Cooley Faculty Self-study Committee, he authored the first report submitted to the American Bar Association. His text, Michigan Administrative Law, is published by West Publishing. Dean LeDuc teaches State and Federal Administrative Law.

AS PREPARED BY THE SECTION OF LEGAL EDUCATION AND ADMISSIONS TO THE BAR IN COOPERATION WITH THE OFFICE OF THE CONSULTANT ON LEGAL EDUCATION TO THE AMERICAN BAR ASSOCIATION.
Cutting Through Granite

Latino and Latina lawyers face significant obstacles

BY
INÉS PINTO ALICEA

"We must keep addressing these issues. Sometimes it seems like water dripping on a stone.... But if the water drips long enough, it makes an impression.... Long enough, and it can cut through granite...."

JUDGE BERNICE B. DONALD
(JULY 31, 1997)*

Latina lawyers are making strides in some areas of the legal profession but still face numerous barriers in others. Recently adopted policies in several states against programs that increase diversity could negatively affect the numbers of Latinas entering law school, according to representatives from several legal organizations interviewed for this article.

"We've come a long way, but there are still barriers," said Alice Velasquez, a Bronx, New York, district attorney who last month took over the helm of the Hispanic National Bar Association (HNBA), an organization that represents the interests of more than 25,000 Hispanic American attorneys, judges, law professors, and law students in the U.S. and Puerto Rico.

"The saddest thing to me is when I realize that people still make an issue of your ethnicity."

According to the Bureau of Labor Statistics, there are about 912,000 lawyers in the U.S., of whom three percent are considered Hispanic. But Hispanic men outnumber Latinas two-to-one in the profession, said a recent study by the American Bar Association.

Ellie Jurado, a New York attorney and HNBA executive director, said that studies on Latinas in the legal profession are difficult to come by. Moreover, for statistical purposes, Latina lawyers are often grouped with Latinos, minority women, or minorities in general. Few research projects have studied this group individually.

But Jurado said her organization found that many of its Latina members tend to pursue civil rights law and criminal law. Indeed, a recent survey of law school students, conducted six months after graduation by the National Association of Law Placement (NALP) in Washington, showed that Hispanic law school graduates tended to pursue government jobs or public interest jobs. NALP said that 18.5 percent of Hispanic law school graduates were employed by the government compared to 12 percent of Anglo graduates. Moreover, Latino law graduates were more than twice as likely to accept public interest jobs as Anglos. Latinos were the least likely to be found in clerkship positions in the legal profession. Those findings are consistent with ABA findings on minority women in general. The ABA found that six percent of minority women take public interest jobs at graduation, compared with two percent of minority men and two percent of Whites.

"The idealistic side of me believes that Latinos are a group of people who care about serving our community," said Velasquez.

But the less idealistic side of me says that Latinos find it more difficult to gain access to the corporate sector. Most Hispanics are first-generation attorneys, and they don't have the network of potential clients that other attorneys seem to have. If you don't bring in clients, you are less likely to succeed. I don't know if I would want to go to a place where I won't be comfortable or where I know I will never make partner."

Jurado said many Latina lawyers find that salary is one of the hurdles they face in the profession. "They tend to get paid less than their male counterparts," she said. "They also don't have the connections they need to help them get their foot in the door. You really have to pave your own way."

Jurado's comments are echoed in the 1st American Bar Association report "Miles to Go: Progress of Minorities in the Legal Profession." It found that a key obstacle for minority success in the isolation minority lawyers often experience in firms. Additionally, minorities often lack access to clients and to extol social networks for developing business for their firms, it said.

As a result, most minority law firms leave majority law firms before they are considered partners, said the report. The study showed that 47 percent of minority law graduates enter firms compared with about 53 percent of minority men and 57 percent of Whites. But it also discovered that 85 percent of minority women and predominantly White law firms before their seventh year in practice. Overall, about 75 percent of associates leave by then, the study said.

Part of the problem for minority lawyers is that the law profession, said the ABA, prepared by the organized Committee on Opportunity for Minorities in the Legal Profession, "Many minority lawyers are..."
first in their families to go to law school or practice law, and thus they lack the professional networks inherited by those more established in the profession. Minority lawyers also tend to lack contacts in White-dominated corporate suites, where most legal business is awarded."

In general, the ABA report painted a dismal picture of the progress of minority lawyers and expressed concern that progress had stalled because of policies adopted recently in different states throughout the country against programs that increase diversity.

The report chronicled gains by minority law students and entry-level lawyers since the ABA Commission was created in 1986, but it cited only minuscule progress in minorities reaching upper professional levels. The report identifies "significant obstacles" to achieving the ABA's goal "to promote full and equal participation in the legal profession by minorities and women" and particularly cites attacks on programs that increase diversity as threatening to stifle minority advancement "for years to come."

Using only undergraduate school grade point averages and admission test scores to select among student applicants would have a "devastating impact" on minority group admissions to law school, says the report. Law school admissions "have already plummeted in California and Texas" under anti-affirmative action policies adopted in those states: Hispanic admissions have dropped 50 percent in public law schools in those states. Minority representation among law students overall has also dropped for the first time in 10 years, said the report.

"The report presents some very sobering information that dispels some commonly held misconceptions regarding the status of minorities in this profession," said ABA commission chair José E. Gaitan. "It is cause for the ABA to reaffirm its commitment to the principle that lawyers of all colors must be allowed to participate in the profession equally."

The report's author, Professor Elizabeth Chambliss of the University of Texas School of Law, recommends improved data collection and dissemination and increased collaboration among researchers at national and local levels.

"The American Bar Association has made a sustained and intensive effort to improve opportunities for real participation in the profession by minority lawyers at all levels for 12 years," said Philip S. Anderson of Little Rock, Ark., president of the association. "We do see real gains, but none among us was so naive as to believe we could undo in a short time the damage of centuries of societal and professional racism," Anderson said. "We do know it is certain that we will not make progress fast enough unless we constantly monitor what we have achieved and what remains to be done. To do that effectively, we must improve the amount and quality of information we compile."

Following are some of the key findings in the ABA report.

- Minority representation in the profession increased to 7.45 percent from five percent in 1980. African American lawyers represented 3.36 percent of the profession and 45 percent of all minority lawyers. Hispanic lawyers represented 3 percent of all minority lawyers.
- Among law students, minority representation rose to nearly 20 percent in 1996 from 10.6 percent in 1980, with Asian American students showing the most increase. Hispanic representation in law schools rose to 5.4 percent of law students from 3.3 percent. More recent statistics to determine the impact of anti-affirmative action policies on Latino law students were not yet available.
- Hispanics made up 1.8 percent of associates in large law firms in 1996.
- Minority graduates pass the bar exam at a lower rate than do Whites, according to a recent study by the Law School Admission Council. The study found in the class that entered law school in 1991, 88 percent of Hispanic law students who took the test passed compared to nearly 97 percent of White test-takers.
- Progress for minority women in the legal profession was even slower. Indeed, a 1994 ABA study concluded that minority women today "encounter the same barriers to employment and advancement as their predecessors who entered the profession decades ago."
- Minority men outnumber minority women in most upper-level jobs. Minority women show a higher law firm attrition rate than any other group of lawyers.
- Minority women suffer a "pervasive disadvantage" in the law faculty market. "Minority women simply have not fared as well as minority men in recent law school hiring," the report said. "Their sex, alone, independent of credentials, work experience, family ties, and geographic constraints--has negatively affected minority women's placement and teaching assignments on law school faculties."
- Minority women in all sectors of the profession report that they are "ghettoized" in certain types of practice and routinely assumed to be incompetent.
- Hispanic men outnumber Hispanic women two to one in the profession as well as in most upper-level jobs. More than 80 percent of all Hispanic administrative law judges are men.
- Only three percent of law firm partners in the 250 largest law firms in the country were minorities in 1996, showing an increase of less than two percent since 198 and only 0.6 percent since 1991. According to a 1997-98 study by the National Association of Law Placement, minority women comprised only about 14 percent of the total number of minority law firm partners.

According to NALP, some cities across the country, however, are friendlier than others to minority attorneys. Judith Collins, director of research and information resources at NALP, shared some of the organization's recent analysis of the 1998-1999 National Directory of Legal Employers, the annual compendium of legal employer data published by NALP. The 1998 directory consisted primarily of large firm listings an included attorney demographic information for nearly 91,000 partners, associates, staff attorneys, and senior attorneys in 630 firms nationwide.

One analysis of the 25 largest cities showed that San Francisco was the most consistently high in representation of both women and minority attorneys and attorneys of color across all levels, the said. Attorney of color accounted for 4.60 percent and women for 18.39 percent of partners reported in San Francisco, Austin, Texas, and Palo Alto, Calif. also reported a higher than average representation of both female partners and partners of color. Miami had the highest percentage of partners of color (28.21 percent) of the cities, and Denver had the highest percentage of female partner (18.90 percent).
Christine Arguello
Government Attorney

When Christine Arguello was 13, she read an article about the Harvard University School of Law and how to become a lawyer. That moment, she decided to be a lawyer, but she kept that decision secret until she was nearly ready to graduate from high school. After she shared her dream with several classmates, they laughed at her.

"The kids kept saying, 'That Chris Martinez thinks she can go to Harvard,'" said Arguello. "It almost broke my spirit. I started thinking, 'Who do I think I am?' But the teacher who heard everything that happened later told me, 'I know you can do it.' I think it was the challenge I needed."

Today, Arguello's name is on the short list for a judicial vacancy on the U.S. District Court for the District Court of Colorado. She is the deputy attorney general of state services in the Colorado Attorney General's Office. Her division provides legal services to all of Colorado's public officials, including the governor, and most of the state agencies. She teaches at the University of Colorado School of Law and serves as a board director with the Colorado Hispanic Bar Association.

"The challenges I face as a Latina lawyer are the same for any other female, but they are increased in magnitude because I am Latina," said Arguello. "People sometimes assume that I got to where I got because of affirmative action. So I've had to be twice as good."

The road to the judiciary indeed has been challenging for Arguello, who said that for many years she never even considered she "could aspire to be a judge" and had never even met a lawyer until she went to Harvard.

Her parents had dropped out from high school and picked beans to make ends meet. They did not want the same fate for their six children and actively encouraged them to pursue academics.

"My parents always emphasized education, but education meant getting a high school degree," said Arguello. "They went on to college and earned degrees, but they knew the importance of education."

In 1980, after serving as the Articles Editor for the Harvard Civil Rights Civil Liberties Law Review, Arguello returned to Colorado to continue her career as a civil litigator. In 1988, when she made partner at Holland & Hart, she became the first Hispanic "male or female" to be promoted to partner at any major law firm in Colorado. Shortly thereafter, she was appointed by the firm to chair its Colorado Springs Litigation Section.

Arguello said that her early years as a lawyer were challenging because she often was not taken seriously and many times she was mistaken to be a secretary. "Judges would say 'Hi, S to me, and other lawyers look at me and see this 5-Latina lawyer and would themselves, 'She'll be a pushy kid,'" Arguello said. "I would go court and tear them apart people would prejudge me but I was a Latina lawyer, and I did I could walk around with a my shoulder about that or I accept it and be twice as g them."

In 1991, Arguello left the practice to begin a teaching career at the University of Kansas School of Law, where she co-authored one of the best casebooks in the Evidence: The Objection A which she said is one of her three achievements. In 1996, KU Arguello by presenting her work of its most prestigious teaching awards, the William T. K Fellowship for Teaching Excellence. In 1998, she was granted and promoted to full professor.

Arguello's career has many interesting turns, and she hopes the next step to become the first Latina Judge in Colorado.

Patricia Salas Pineda
Corporate Attorney

Patricia Salas Pineda have mentors or role models in the legal profession when she is in her career. But she was an able-watcher, a skill that helped her enormously as a "You have to learn quiet to do to succeed," said Pined president and general coun New United Motor Manufa Inc. in Fremont, Calif. The lion company is a joint between Toyota Motor Co. and General Motors Corp. that n
tures vehicles for the two companies and employs 4,700 people. "I would look at people who were successful, and I learned how they operated successfully in their environment. I decided what I would take from each person, and over time, I developed my own style. You have to assimilate in that (corporate) culture, and that does not mean abandoning your Hispanic culture.

Pineda said that some of the lessons she has learned in her people-watching are not lessons you can learn in a book and that watching professionals whom she admired in different fields helped her learn such skills as how to build consensus and how to lead effectively.

"You have to come to grips with what is required to be the best," she said. "That's not an easy order for anyone. One of my biggest personal challenges in my early years was to become more assertive and outspoken and to learn how to do it effectively."

Pineda said that Hispanic lawyers entering the corporate sector also have to strive to develop relationships within their organization so they can find mentors and learn how to advance, but she said those relationships do not have to be unilateral. "You can help them achieve their objectives [within the company], and they in turn can help you."

Pineda joined her company at its inception 15 years ago and now oversees its legal, environmental, and government affairs. She said that her company has been very supportive of her and she has been lucky because she has not faced the barriers or difficulties experienced by other Latina lawyers. Her biggest challenge in her work is being seen as the "bad guy" because she is a corporate attorney, which the public often equates with "being on the wrong side," even though that is not necessarily so, she said.

"As a lawyer and representative for my company, I have been an advocate for issues that are not at odds with my personal life," she said. "I have been very lucky in that regard. Otherwise, it would be very difficult."

But, Pineda said she has felt the discomfort that other Latinas have faced in the legal profession. When she first graduated from Boalt Hall School of Law at the University of California at Berkeley in 1977, she sensed a reluctance by the legal community to accept her because she was a Latina and she was a woman. Pineda said her approach has always been to plunge ahead, "not to accept defeat." That attitude has helped her immensely in her career, a career that she said can be challenging because the business sector makes lawyers develop skills they do not have and teaches lawyers to make decisions many times based on instinct. Pineda said her first job in the corporate sector introduced her to making decisions in a way that was very different from what she learned in law school.

"I was encouraged to make decisions even if I did not have all of the information I would want as a lawyer, to make the best decision with the information that was available and to go with my instinct," she said. "Over time, you develop a business sense and a new confidence and ability to make decisions."

Pineda said that corporate law is a wonderful place for Latino lawyers even though it is a specialty that many Hispanics have chosen to pursue in the legal profession, according to the ABA.

"I would encourage Hispanic lawyers to pursue careers in the corporate sector," Pineda said. "There are a lot of opportunities for us to add value."

Olga Pedroza
Public Interest

Olga Pedroza said she is more comfortable talking to a group of farm workers about legal issues that affect their daily lives than to a corporate board. Her comfort with people whose voices are often forgotten and her success in winning their cases has brought her recognition.

"My clients look like they could be my cousin, uncle, or other relative, so you can joke with them," she said. "I relate to them, and they give me feedback. Many times they haven't had any experience with a lawyer, but when they walk out, their heads are held high."

Pedroza, a public interest lawyer with Southern New Mexico Legal Services, an organization that provides legal services to people in poverty, was recently honored with four other Latinas for their service in public interest law by the Hispanic National Bar Association. University of New Mexico students honored Pedroza in 1996 with their Fighting for Justice Award.

"The love of my life is employment law," said Pedroza, adding that much of her work with the farm workers involves enforcing federal laws, the Fair Labor Standards Act and the Agricultural Workers Protection Act. "I hate to lose."

Pedroza said she had been teaching for a number of years when her husband, a lawyer, went on a law school recruiting trip with one of his former professors. The professor urged Pedroza to consider law school herself, and she decided to take the challenge at the age of 37, raising three children while she studied. She graduated in 1985 from the University of New Mexico and worked in different areas of the profession until she was offered her current position in 1990. Her agency is a contractor with the Legal Services Corp., which was created by Congress to provide legal services to the poor in a variety of areas, including divorce, adoption, welfare, employment, food stamps, and landlord/tenant issues. Her organization is divided into two areas, the one that focuses on farm worker issues—the Centro
Legal Campesino—and the Las Cruces Regional Office, which provides legal services for the poor of Las Cruces and the surrounding area. She is the managing attorney of both offices.

Pedroza said that her job is very rewarding, especially since she has been able to build strong ties with her clients. "A lot of the workers know our office can help."

She said her outreach efforts have paid off. One of her ways to reach workers has been to meet them at an international bridge in El Paso where farm workers gather at 2 a.m. to wait for farmers to contract them for day work.

One of the most difficult aspects of the job is not being able to take a case. "Law and justice are two different things," said Pedroza. "I've had farm workers come in and tell me for example, 'That terrible contractor threw chiles in my face and insulted me. I can't do anything about that. That's hard to tell somebody.'"

She said the job brings its challenges because public interest lawyers, particularly Latina ones, sometimes aren't taken as seriously by judges or even other lawyers. As a result, she said she finds herself having to appeal cases because of judicial oversight or legal technicalities.

"It's very disturbing," she said. "Sometimes, the judges are ridiculous. They make you go to the next level. It's more work, but you do it. You just don't make it a big thing."

**Alice Velasquez**

**Criminal Prosecutor**

Alice Velasquez remembers watching the film *To Kill a Mockingbird* and being so inspired by the attorney in the movie that she decided she wanted to pursue the same profession.

"Every attorney dreams of being that kind of lawyer, of doing the right thing," said Velasquez, administrative assistant district attorney in the Office of the District Attorney of Broom County.

"To me, the law was doing jus-
minority population in the U.S. by 2005 yet comprise only a small num-
ber of the attorneys at law firms nationwide. She also will try to de-
velop different programs to foster men-
toring of up-and-coming lawyers.
  "As experienced attorneys, our
greatest gift to our community is to
mentor young attorneys," she said.

THE HISPANIC NATIONAL
BAR ASSOCIATION

The Hispanic National Bar
Association (HNBA) is an incorpo-
rated, nonprofit, national associa-
tion. Based in Washington, D.C., it
has been a principal force behind
the increased representation of
Hispanics in all sectors of the legal
profession and has served as the
legal voice for Hispanics since it
was founded in California in 1972
as the La Raza National Lawyers
Association.

National officers are elected by
the membership at large; regional
presidents, by their regional mem-
ers. Local Hispanic bar associa-
tions also may become affiliated
with the HNBA. Those of more than
100 U.S. cities are now affiliates.

Within the HNBA are sectors
that represent Latina lawyers, cor-
porate lawyers, Hispanic law pro-
fessors, law students, Hispanic
drudes, and lawyers in the military.
Members also can join committees
that correspond with their particu-
ar area of law.

The primary objectives of the
HNBA are to increase opportunities
for Hispanics in the legal profes-
sion and to address issues of con-
cern to the national Hispanic com-
unity. Legal education and civil
rights have been fundamental
HNBA concerns from the begin-
ning. Judicial appointments and
political representation are also
priorities. The HNBA provides pro-
fessional services to local and
national members who seek assis-
tance with their own professional
advancement and on issues that
affect the Hispanic community.

The HNBA is active in many
national organizations. One is the
National Hispanic Leadership
Agenda (NHLA), a group comprised
of representatives from 21 Hispanic
national organizations, represent-
ing more than 160,000 active
Hispanic community leaders. The
NHLA's task is to provide an agenda
that will improve the Hispanic com-
munity.

The HNBA holds a seat in the
American Bar Association House of
Delegates, which represents more
than 300,000 attorneys. The HNBA
has taken a leadership role, along
with other minority bar associa-
tions, in sponsoring programs that
would increase the number of
minority law school students.

The HNBA also has developed
proposals for law school admission
committees to study factors leading
to the decline in the number of
minority law students and the Bar
passage rate of minority students.

HNBA sponsors a law student
division that seeks to increase
Hispanic student representation in
law schools—a joint effort with all
83 ABA-accredited law schools,
the American Association of Law
Schools, and the Law School
Admissions Council. Through its
related charitable organization, the
Hispanic National Bar Fund, Inc.,
thousands of dollars in scholar-
ships have been awarded to deserving
Hispanic law students.

Since 1975, the HNBA has held
annual national conventions offer-
ing educational seminars, continu-
ing legal education classes, and
social functions that allow Hispanic
professionals with similar goals
and philosophies to network.

CALL FOR PAPERS

National Association
of Hispanic and Latino Studies

National Conference
February 21-26, 2000
Houston, Texas

Abstracts, not to exceed two pages, should be submitted which
relate to any aspect of the Hispanic and Latino experience.
Subjects may include but are not limited to literature,
demographics, history, politics, economics, education, health
care, fine arts, religion, social sciences, business and many other
subjects. Please indicate the time required for presentation of
your paper (25 minutes/45 minutes).

Abstracts must be postmarked by:
November 23, 1999

Send Abstracts To:
Dr. Lemuol Berry, Jr.,
Executive Director, NALAS
Morehead State University
212 Rader Hall
Morehead, KY 40351
Telephone: (606) 783-2650
Fax: (606) 783-5046

CORNELL
UNIVERSITY

DIRECTOR OF ETHICS & PUBLIC LIFE

Wyn and William Y. Hutchinson Professor of
Ethics & Public Life and Director of the Cornell University
Program on Ethics & Public Life

A successful candidate must have a distinguished record of research and publications in any area
of ethics, be an effective teacher, and have proven administrative ability. The successful
candidate will be expected to teach as well as serve as the Director of the Program on Ethics & Public
Life (EPL). EPL is an interdisciplinary program located in the College of Arts &
Sciences that serves Cornell's College. The Program both teaches courses of its own in practical
ethics to students at graduate and undergraduate levels and collaborates with faculty colleagues across
the University who are not specialists in ethics but are enhancing the treatment of the ethical issues
in their own fields.

Applications from persons in all fields of practical ethics are welcome, particularly government,
history, law, and philosophy. An applicant's expertise may include areas such as bio-
ethics, environmental ethics, international ethics, professional ethics, and ethical issues in biomedicine,
public health, public policy, and technology. The appointment will be made at the associate or full professor level, depending on the qualifications of the successful candidate.

Applications must include a brief cover letter containing a statement of interest and suitability for
this position, a comprehensive vita and the names, addresses, and phone numbers of five
references. Each candidate should also send no more than two relevant papers published in recent
years. Nominations of outstanding individuals are also welcome. Applications will be considered on
a rolling basis, although preference will be given to those completed before December 1st, 1999. Full
will continue to be reviewed until an appointment is made.

Please send applications and nominations and direct inquiries to:

Professor Mary Salsalone, Chair,
Ethics Search Committee, Vice-Proctor's Office, 433 Day Hall,
Cornell University, Ithaca, New York 14853

Cornell is an Affirmative Action/Equal Opportunity Employer.
September 1997, President Bill Clinton visited the campus of American University (AU) in Washington, D.C., with a most interesting request. Referring to AU President Benjamin Ladner’s vision of building a diverse university community at the institution, Bill Clinton challenged the American University community to set an example for the rest of the world. “Your president noted that you have people from 140 different racial and ethnic groups here on the university campus,” Clinton remarked. “Good for you. You can be America’s laboratory. You figure it out and let us know.”

In addressing the AU community, University President Ladner stressed, “The diversity of ideas, people, expertise, and values that are hallmarks of this institution are also indispensable ingredients of a vibrant community of inquiry that prizes differing perspectives while embracing the unity and integrity of the community as a whole. As clearly expressed in our strategic plan, we are committed already to meeting this challenge.”

There are three distinct “overarching goals” articulated by the strategic plan to which Ladner refers. They are building a distinctive global university, improving the university’s academic quality and reputation; and creating a “unique academic community of diverse peoples.” President Ladner believes that the third goal sets the stage for the other two. Dr. Ladner suggests, “The cornerstone of that strategic plan and the prospect of its success are the people we belong to the American University community. What is described in specific terms in this plan actually flows from our collective will make a new, even passionate, commitment to encourage and enable students, faculty, staff, alumni, and trustees to build a community inquiry that in multiple and diverse ways affirms the dignity and creative possibilities of every individual.” President Ladner’s visionary plan caught the attention of President Clinton, and it has also come to the attention of the Hispanic Outlook. We are pleased to make the American University an Honor Roll inductee.

American University was incorporated by the government of the District of Columbia in 1891 and chartered by an Act of Congress in 1895 as a United Methodist Church-related institution. The university’s first building was completed in 1898, and the first class was graduated in 1916. Located in a residential area of upper northwest Washington, D.C., American is an independent, coeducational university. All states, the District of Columbia, Puerto Rico and the territories, au

nearly 140 foreign countries are represented within the student body.

Of the university's 10,949 students, 5,419 are undergraduates, and
4,650 are graduates or professional students enrolled in degree
programs. Continuing Studies and the Washington Semester and World
Capitals Program enroll the remaining 1,170 students. There are 4,752
full-time students and 397 part-timers among the undergraduate popula-
tion. Of the 1,170 students enrolled at the Washington College of Law,
1,198 are enrolled in the JD program, 200 in the LLM program, and 23 in
a non-degree program. Total enrollment in the undergraduate pro-
grams includes 52 percent Hispanic, 12.8 percent International, 7.2
percent African American, 3.8 percent Asian, and 0.5 percent Native
American students. 91 percent of the undergraduate part-time stu-
dents are Hispanics.) Hispanics also account for 4.7 percent of master's
program enrollees and 3.0 percent of those enrolled in doctoral pro-
grams. The Washington College of Law attendance figures indicate that
Hispanics account for 71 percent of the total enrollment.

American University has a student/faculty ratio of 13:1. There
are 553 full-time faculty, 457 in full-time teaching positions. 92 per-
cent of the faculty hold a doctorate or the highest degree in their field.
The university also employs 582 adjunct faculty. Six residence halls on
the main campus accommodate 2,900 students per year. An apart-
mant building housing 125 graduate students is located within a mile
of the main campus. Three residence halls on the Tenley Campus pro-
vide housing for 450 Washington Semester students. Students may par-
ticipate in any of more than 110 clubs and organizations. 11 fraternities

and 11 sororities; and varsity, recreational, and intramural sports.

Excluding tracks, concentrations, and specializations, American
University offers 52 bachelor's programs, 17 master's programs, and
18 doctoral programs in addition to the JD and LLM degree.
Certificate programs and associate's degrees are available as well.
Special programs include the Career Center that offers cooperative
education, internships, career preparation, and career planning ser-
ices at the graduate and undergraduate levels.

The university supports the Washington Semester Program that
affords students a choice of one-semester undergraduate programs such as peace and conflict resolution; American politics (national government and public law); art, history, and cultural policy; foreign policy; economic policy; justice; journalism; international business and trade; and international environment and development. All of these programs include internships.

Another exciting option is the World Capitals Program, which includes 13 undergraduate semester-abroad programs in South America, Asia, and Western and Eastern Europe. Many of these include internships. For example, a student may spend a semester in Madrid and attend classes at the College of International Studies in the heart of the city. In a two-part semester, the director and influential guest-lecturers—including politicians, journalists, artists, and writers—discuss political, economic, social, and cultural factors affecting contemporary Spain. There are excursions to sites in and around Madrid that expand on the topics covered by the semester course. All classes are in Spanish. There is also a Semester in Santiago and a Semester in Buenos Aires for students interested in exploring those locations.

American University is most proud of its Washington College of Law and the law school’s mission of “advancing human dignity and... creating opportunities for those pursuing their dreams.” For more than 100 years, WCL has remained faithful to its heritage of diversity and gender inclusiveness, upon which the founders—Emma Gillett and Ellen Spencer Mussey—established an institution of educational excellence. Today, WCL prides itself on meaningful service to the legal profession and the world community, its entrepreneurial faculty and students, and its creativity in developing exemplary academics and path-breaking scholarship.

Claudio M. Grossman, Dean of the Washington College of Law, says that the college has a “challenging atmosphere, one that encourages the exchange of ideas.” He maintains that the WCL experience is not merely a product of faculty, programs, and location, nature. “Without question, our greatest asset is our energetic and heterogeneous student body. WCL students actively involve themselves in the governance of the law school and have many opportunities for professional and personal growth.” Dean Grossman points out that the faculty brings to the law school a rich experience of service as business law consultants, monitors of human rights situations throughout the world, and assistants to nonprofit organizations. The dean also notes that “faculty publications cover a wide variety of issues important in the domestic and international arenas,” and adds that the institutions strong JD program “reflects a wide range of teaching and research philosophies.”

Dean Grossman is very proud of his school’s national recognition and universally respected international Legal Studies program. He continues, “Our International Legal Studies program annually attracts more than 100 lawyers from around the world. This semester our students are from 60 countries in the LL program.” For example, the attendees this year include 20 students from Africa, 22 from North America, 53 from Latin America, 1 from the Caribbean, 19 from Western Europe, 12 from Eastern Europe, from the Middle East, 23 from East Asia, and 32 from South Asia.

Grossman also calls attention to a new international program reporting, “The International Law Masters Specialization in Geneva and the Law has great potential for promoting equity in the legal system.” The new LLM specialization in Gender Studies is the first graduate degree program of its kind concentrating on gender studies offered in the world. The dean says this should not come as a surprise, remarking, “As the only law school founded by women, Washington College of Law has long been recognized as a leading center for feminist legal scholarship, teaching, and advocacy.” He concludes, “Our 15-year fellowship program enrolls women from Latin America who wish to become law professor and bring their home countries to integrate gender studies into their legal education. First Spring of 1998, the first 15 new graduates include Marcela Andrade of Chile and Ana L. Soares of Brazil.”

In addition to reaching out to students and graduates from around the globe who are seeking professional development in Law, students start their academic journey also receive encouragement at American University. The "Acanza" project at WCL is also at providing "Opportunities Through Higher Education" for Hispanic students and their parents at one-day college exposition and fair held at American University’s Bender Arena. Here workshp are offered on such subjects as Choosing a College, How to Pay for College, Planning for College, and Financing College Education. The program has been instrumental in assisting Hispanic high school students in planning for post-secondary education. The annual event is now in its fourth year. It is sponsored by American University, Sallie Mae, the United States Department of Interior, the United States Department of Education, Trinity College, and the National Institutes for Health. The idea is to get the attention of Hispanic high school students attending classes in the Washington, D.C. Metropolitan area, and encourage them to attend institution higher education. More than 1,200 Latino students participated a year. During the event there is a college fair for students to talk with college and university admissions representatives from across the United States who distribute application materials and answer students questions.
Cheating on Campus Reaches New Highs

ETS and Ad Council Join in Campaign to Change Behavior

BY MARYLYN GILROY

"It's definitely what you get assigned—and how long you have to do it—that right there determines whether you're going to cheat."

First-year student at UT

• More than 75 percent of college students have admitted to cheating.
• Computers make cheating easier than ever before. Websites offer to write essays and term papers for college students, promising them "good quality work at reasonable prices."
• Business and engineering majors are most likely to cheat, but cheating is prevalent among all levels in college, even graduate school.
• Most students say that they don't think cheating is a big deal.

Cheating does not end at graduation. Widespread resume fraud is just one serious issue that has caused employers to worry about the level of integrity of new employees.

These startling findings about cheating released by the Center for Academic Integrity and the Educational Testing Center present a dismal picture of student academic conduct across the nation's campuses. In fact, cheating has become so commonplace that students who don't cheat report that they often feel like "fools" for not playing the game, one researcher has said. The problem is clearly out of control and has been spurred by a number of factors, including pressure for high grades, time constraints on students, societal attitudes that tolerate cheating, and failure of schools to catch and punish cheaters.

Alarmed by the statistics and disclosures about widespread cheating, the Educational Testing Service (ETS) and the Advertising Council have joined forces in a national public service campaign to raise awareness about the extent of the problem. They are tackling an issue that requires a change in student attitudes and behavior.

Academic cheating includes not only deceptive or tricky practices in test-taking but also various forms of representing someone else's work as your own. It can mean directly copying another's work, purchasing a term paper or test questions in advance, or paying another to do the work for you. But it also includes more mundane and day-to-day examples of academic dishonesty. One University of Arizona engineering professor reported that he did not perceive a high incidence of cheating on tests but was more concerned about the submission of laboratory and homework assignments that looked identical.

Why and How Students Cheat

The overwhelming majority of students who cheat report that their motive is to "get that grade." It seems that more students than ever are willing to do whatever it takes to get the A or B. As Nancy Cole, president of ETS, said recently, "Too often it is the grade and not the knowledge that is the driving force in a student's education. In a society where so much emphasis is placed on results, the value of learning for its own joy is being lost."

Students who cheat often feel justified in what they are doing. They cheat because they think they will be unfairly disadvantaged in the competition for grades if they don't.

And, says Cole, "If the emphasis is on getting the grade by any means possible, then knowledge, integrity, and personal growth become less important."

Nancy Cole Educational Testing Service president
Students confirm that grades are a major source of anxiety and that they are under pressure from parents and peers to “stay in the game and play the system,” which often means cheating.

One community college student who admitted cheating was asked why, and she replied, “I knew I was prepared for the test, but I was still afraid of getting a low grade. I guess I felt uncertain and just panicked.”

When asked if she felt guilty and regretted this action, she said, “No, because I ended up getting a good grade on the test. But in all honesty, I didn’t deserve the grade.”

While some cheating is due to students’ being anxious, unprepared, or just plain lazy, more often than not it is the result of a time-crunch factor. Students say that their coursework is demanding, and many have the added pressure of working in part-time or even full-time jobs to meet rising tuition bills.

One University of Texas first-year student said, “It’s definitely what you get assigned—and how long you have to do it—that right there determines whether you’re going to cheat.” Other students surveyed indicated that they had too much homework and “tons of activities,” and so cutting corners by cheating was the only way to get by.

Add to these factors the common perception on the part of students that cheating is a “victimless” crime and therefore not a big deal. After all, they say, cheating is all around them—in politics, business, home, and school. As Nancy Cole points out, they see that parents cheat on taxes and financial aid forms; athletes take performance-enhancing drugs, and lawmakers accept gifts and vote with special interests.

Students cheat in ways that might not be as subtle as those of their adult counterparts but are definitely more creative and, in some ways, harder to detect. In several national surveys, students reported that they cheated by pretending to blow their nose on tissues with answers written on them, using the undersides of baseball cap brims to record answers, and writing math or accounting formulas on small pieces of paper. A more complicated method involves bringing ready-made blue books with essay answers in them to class via backpacks and substituting them for blank bluebooks that are passed out by professors.

Others mentioned that they cheat by having the answers written on their hands, or some just have their notebooks open on the floor with information exposed so that all they have to do is casually look down.

Technology has also provided new opportunities. Some students have figured out how to program their calculators with formulas but are able to show an “empty” memory mode when the instructor checks. As for the internet addresses that offer term papers, one such site boasted more than one million hits per year. Another offered to send students its catalog of 25,000 term papers.

Crime and Punishment

Colleges and universities are increasingly adopting stronger codes and penalties for academic cheating. Many are including presentations on cheating as part of orientation sessions and are passing out brochures explaining campus policies and clarifying the nature of plagiarism, which is often one of the most common cheating violations.

Sanctions against students convicted of cheating vary from campus to campus but often include one or more of the following: warning, reduced grade or “F” on the assignment, an “F” in the course, suspension, probation, or revocation of admission.

The University of Virginia, which has a 100-year-old honor code, takes a hard line and expels those students who are convicted of cheating.

Earlier this year, the San Diego Union-Tribune reported that 25 San Diego State University students failed a course in business ethics (yes, ethics) because they cheated. The instructor set a trap for the students after receiving a tip that students were using answers they gleaned from a test given to an earlier session of the class.

What made the case so unusual was the number of students involved. All of the students received a failing grade for the course and were placed on probation.

As an added measure to emphasize the seriousness of the problem, at the University of Southern California, officials have embarked on a campaign that uses the student newspaper to publish cheating violations and the penalties imposed.

Several universities have also faced back by filing lawsuits against companies that encourage cheating. Boston University sued five on-line term paper services, but a federal judge rejected the case. When one local business near the University of Arizona circulated a flyer offering students the service of having a substitute attend their class and take the exam for them, the university began to take steps to investigate the service.

But even though there are policies in writing and procedures for dealing with cheating, the sheer number of student violations and the process of reporting, investigating, and punishing a difficult one. Often English classes and depart too big to investigate w plagiarism. Classes agree 30 students, and three dreds of sections at larger. Some compensation te to minimize possibilities ing by requiring students notes and rough drafts b papers are due.

However, ETS, which analyzed three studies on reports that in most case
don't get caught and they are seldom punished harshly, if at all. In addition, faculty awareness of the severity of the problem has not yet surfaced on many campuses. The ETS surveys found that faculty support of academic integrity policies is low, primarily because only 35 percent of college educators felt that cheating was widespread.

**What Can Be Done**

ETS and the Advertising Council have developed a national public service campaign to discourage academic cheating. The campaign, launched in September, targets middle school children, ages 9-14. According to a recent survey of middle schoolers, two-thirds of respondents reported cheating on exams while 9 out of 10 reported copying another's homework.

By aiming at adolescents, campaign officials hope to change student attitudes by the time they are in high school, where the percentage of students who cheat has skyrocketed to 70 percent. While studies in previous decades indicated that those who cheated were struggling students, 80 percent of the country's best students reported that they cheated to get to the top of their class, according to a 1998 poll of Whos Who Among American High School Students. The majority of these students cited the enormous pressures to be accepted to elite universities as part of their justification for cheating.

With numbers like these, the ETS and Ad Council campaign has a long way to go to be effective. But officials are optimistic, citing other public service campaigns such as those against drinking and driving with the slogan "Friends Don't Let Friends Drive Drunk" and the "Take a Bite out of Crime" neighborhood watch campaign. They point out that the ads in support of curbside recycling programs as well as the ubiquitous Smokey the Bear image to preserve forests had a tremendous impact on behavioral change in society. One of the slogans in the anti-cheating ads will draw on a sports metaphor and feature the slogan, "Cheating Is a Personal Foul."

Susan Murphy-Jacobsen, director of public relations of R&B Communications, which is coordinating the campaign, says that they are hoping to affect attitudes about cheating. "We hope that students will decide not to cheat and not to accept cheating among their friends. We hope this will no longer be 'cool' to cheat."

Nancy Cole of ETS thinks the mass communication approach will generate significant results. "I firmly believe that this advertising campaign could have a powerful, measurable, long-term beneficial impact on our children, the nation's educational system, and society as a whole," she said. "Cheating undermines integrity and fairness at all levels. It leads to weakened life performance and corrupts the merit basis of our society."

ETS officials say that during the three-year run of the campaign, they hope to convince students that cheating has moral and practical consequences and that by doing what is right, students will not only feel pride but a sense of accomplishment. They are asking parents and educators to establish household and classroom rules on and penalties for cheating. They also encourage adults to help students prioritize extracurricular activities and education.

The campaign just might be able to redirect the innate moral compass that many students want to follow. It is clear from the comments of students at the University of Texas that they want to do the right thing, that they want to turn the tide on cheating. The university posted a Web forum entitled "Cheating at UT: Can Integrity Be Legislated?" and asked students to engage in an on-line debate. The majority of the hundreds of bulletin board messages argue against cheating.

UT student Trey Chavez writes, "Cheating is wrong and robs the people who cheat as well as the people who don't cheat of their integrity. People who know about these cheaters and don't report them also lack integrity."

Adds student Monica Escobar, who logged on to the discussion. "Integrity is something deep down within a person. and I feel that having integrity would mean failing a quiz rather than cheating. Many people get overwhelmed with things such as making their GPA, but I feel you should make it the honest way and stick to having integrity."
First-Generation University of Wisconsin Graduate Wins Judgeship

BY
Michael Schmitt

"I'm very proud of the fact that we had a lot of new voters and Hispanics who had never voted, but that's not what won the election. The Hispanic population of the entire county is only 2 percent. I got 59 percent of the vote. That means that my appeal went out to the majority of the voters."

Ralph Ramirez

Breaking new ground has become an old habit for recently elected Wisconsin circuit court judge Ralph Ramirez. After a victory last spring in the Waukesha County judicial election, Ramirez became the first Hispanic to hold that position since 1985. More importantly, in this era of controversy over sources of campaign financing, Ramirez was able to run a grassroots campaign in which he raised 25 percent more money than any other judicial electoral race in Waukesha County.

Like most candidates who think about pursuing election to public office, Ramirez had to give careful consideration to the issue of fund-raising.

"My wife and I gave it some serious thought...Was I ready to take up the task of a campaign, was I financially able to assume the monetary responsibility, were we able to raise money, and so on," said Ramirez.

But Ramirez had the advantage of being involved in raising funds for other organizations, and in the end, he drew on that experience to help run his own campaign without the aid of media consultants.

"All of our advertising originated from us. I talked to my friends, I'd get advice, but the ideas were ours," he said.

Having lived in Waukesha County for most of his life, Ramirez was able to gather community support in the form of numerous small contributions of $10, $25, or $50.

"What money reflects is people's support," he said. "We had more individuals who gave smaller contributions, and that enabled us to raise more money than any other judicial campaign in Waukesha County ever."

"I'm very proud of the fact that we had a lot of new voters and Hispanics who had never voted, but that's not what won the election."

In 1959, Ramirez is the son of migrant workers. His mother, originally from Texas, and his father worked in Oklahoma. After World War II, Ramirez's father moved to Wisconsin and found employment in the foundries. And although Ramirez dropped out of high school he was later able to get his GED and earn his college degree through the GI plan. Ramirez's parents stressed to their children the value of higher education—what it could do for a person. They also stressed a work ethic and, according to Ramirez, "not just a work ethic but a hard work ethic."

Ramirez attended the University of Wisconsin, where he worked toward a degree in political science. While at the University of Wisconsin, Ramirez decided to pursue legal profession. "I can't pin down why, but I knew that I wanted to get in law."

In high school, Ramirez knew as college was that I wanted to get into law. The desire to be a prosecutor developed while I was still in school.

Although he had the support of family and friends (some of whom also hoped to become lawyers), Ramirez faced the difficult task of starting a profession that no one in his family had ever attempted. Therefore, he couldn't offer him any advice about.
"One of the things about being a minority in law school is that so very often, people who are in my position are there as the first ones in the family," he said. "You don't have the family support in the sense that somebody else could say; 'when I was in law school, this is the way it was, or this is what you should do.'

"The experience gives you a feeling of forging ahead, trying to find out what other people may take for granted or other people may know. When you don't have a history of higher education in your family, these are things that are problematic. You are a pioneer."

Paying for college and law school was another issue. Although some financial aid was available, there were no family funds to help with educational expenses. For this reason, Ramirez worked during the summers in the foundries and was employed as a cook while school was in session. When he entered law school, financial assistance was available from the LEO (Legal Education Opportunities) program, which also provided a support network for students who had few places to turn to.

"As members of the LEO program, we had a core group of people—other students and faculty members—who were supportive of us as minorities at the law school," he explained.

As a result of his college experiences, Ramirez has plenty of advice for minorities seeking to enter law school. "Spend some time researching the law school that you want to go to. Don't be afraid to go and then make a decision as to what area of the law you're going to pursue after you get there.

"Our society is based on laws and structured around our legal system. There's so much out there, and so people should not go into law school with one idea in mind as to what they're going to pursue."

Ramirez also encourages those people who think about going to law school to seek out others who have done the same thing. "It can be a scary proposition when you're a pioneer, and I guess people in higher education should never forget that that's still the case, that a lot of these people are pioneers, and they don't have the family history of college and law school," he said.

Most importantly, Ramirez stresses—don't be afraid to ask questions. Lawyers can be busy people, he points out, but if they see someone who has a real interest in pursuing a legal career, they are usually happy to speak to them. After graduating from the University of Wisconsin Law School in 1984, Ramirez became an assistant district attorney for Eau Claire County, Wisconsin, a position he held for three years. He then returned to Waukesha, where he served as legal supervisor and chief prosecutor for the Waukesha Metropolitan Drug Enforcement Group, and as assistant district attorney of Waukesha County. Ramirez found the work both satisfying and challenging, particularly in the area of prosecuting criminals in cases involving sexual violence. His work earned him the endorsement of law enforcement and victim rights advocates.

"I have had great satisfaction in handling those cases, because professionally they're very difficult cases. It's a new area of the law, so it's interesting to be at the forefront of the law. I'm dealing with some new issues that have come up, things that blend both law and psychology. I feel that my abilities have been exercised and tested."

Although he liked his DA job, Ramirez decided to run when some friends suggested he would make a good judge. Ramirez found the suggestion very appealing and saw it not only as the next logical step in his legal career but also as a chance to help his community. After talking it over with his family, he decided to pursue the election.

Ramirez sees many similarities between prosecuting and serving as a judge. "As a DA for 15 years, I've been charged with public safety concerns, but at the same time, I have the obligation to respect individual rights. As a judge, you have the obligation to be fair and impartial, to balance individual rights and community concerns," he said.

In addition, both trial attorneys and judges need to know and understand the rules of evidence. But as a judge, says Ramirez, the role is more like a referee.

"It's sort of like an umpire and a player, in a way," he explained. "But I know the rules. I've played the game."

Ramirez's first judicial assignment will be serving in juvenile court. "I hope to be able to help kids, and at the same time I understand that there are some kids who are kids only in age, who have serious problems that hurt other people."

Even though he will face a demanding work schedule and the task of dealing daily with serious crimes involving drugs, robberies, and a variety of felonies, Ramirez does not lose sight of the need to have other hobbies and to be involved in community activities. He continues his interest in karate, which he began as an undergraduate at Wisconsin. Today, Ramirez is a black belt in karate and is an instructor at a club in Milwaukee that he started with several friends. He says that karate serves as a way for him to relax.

"Just like any other sport or physical activity, it's always been a release," Ramirez said. "I enjoy it immensely, as a discipline in and of itself....[T]here's always something else to learn."

He is also active in his local church, is a member of the library board, and has co-chaired the United Way Campaign in the Waukesha area.

But he sees his position as judge as another opportunity to serve the community. "I'm looking forward to being able to do something good for people," he said. "I think I'll be a fair, impartial...tough judge."

Meet Ralph Ramirez

Ralph M. Ramirez, 40, is the newly elected Circuit Court judge in Waukesha County, Wisconsin.

Prior to his election, Ramirez served as assistant district attorney in Waukesha County. He has practiced in the juvenile, traffic, and misdemeanor/felony courts. His extensive trial practice includes drug cases, serious felony offenses, homicides, and sexual offenses. Ramirez headed the Metropolitan Drug Enforcement Group as its legal director for three years and was the primary prosecutor of Chapter 980 Sexually Violent Person cases.

Ramirez was born and raised in the city of Waukesha, where he now makes his home. He is a graduate of Waukesha South High School, a 1981 graduate of the University of Wisconsin, where he received his bachelor's degree, and a 1984 J.D. graduate of the University of Wisconsin Law School.

Ramirez's community involvement includes co-chairing the Public Service Division of the United Way Campaign for five years, serving as a trustee of the Waukesha Public Library for many years, and being a long-term volunteer with American Field Service (AFS) and a host parent of four exchange students from around the world. He received a "Friend of Education" award for his involvement in the Waukesha public school system. He has worked with schools on a county-wide basis as a speaker and DARE program presenter. Ramirez was honored as the 1998 Volunteer of the Year by the Waukesha County Volunteer Center and the Waukesha Journal Sentinel.

Ramirez and his wife, Renee, have three children.
UTEP's Law Prep Grads Accepted at Top Schools

BY TIMI HAGGETY AND WALLI HALEY

The University of Texas at El Paso's summer Law School Preparatory Institute, initiated last year to sharpen the critical-thinking skills of prospective law students and to prepare them to do well on the Law School Admissions Test (LSAT), has graduated its first cohort with stunning results. All of the program's 10 first graduating seniors have been accepted to some of the nation's most prestigious law schools.

The students and the schools they were accepted to are:
- Victoria Ramirez—Harvard (ranked 2nd in the nation), University of Chicago (ranked 6th), University of Virginia (7th), and UT Austin (15th), which offered Ramirez a one-year scholarship.
- Danny Ramirez—UT Austin, University of Illinois at Urbana-Champaign (23rd), and University of Indiana.
- Alberto Mesta—UT Austin, Boston College (27th), Southern Methodist University (50th), St. Mary's University, Texas Tech, and University of Houston.
- Michelle Crowson—UT Austin, which offered her a one-year scholarship, and on the waiting list at Columbia (5th).
- Myrla Garcia—the University of Oregon.
- Mario Alfaro—Texas Tech University (which offered him a full scholarship).
- Ricardo Aragon—Texas Tech University (which offered him a full scholarship).
- Ernesto Fabela—University of Wisconsin at Madison (29th) and University of Maryland. He is on the waiting list at Washington and Lee University (20th).
- Vanessa Andrews—Seattle University.
- Lisa Cervantes—South Texas Thurgood Marshall School of Law.

“This means that at least half of the graduates will be attending top-30 law schools,” William Weaver, assistant professor of political science and co-director of the institute, says. “All the credit for meeting the high levels of admission goes, of course, to the students. The institute seems to give them a crucial boost in confidence, focus, drive, and critical analysis abilities at just the right time.”

The brainchild of UTEP political science professor Robert Webking, who also co-directs the institute, and Weaver, the Law School Preparatory Institute is a two-year program designed in two parts. The first part—offered six days a week during the summer between the students' sophomore and junior years—consists of intensive workshops that focus on critical reading and analysis and critique of complex arguments.

The second part of the program—an intensive month-long workshop—takes place before the students' senior year. This course focuses on preparing students to do well on the all-important LSAT.

“There is also an introduction to legal writing that serves to reinforce what happens at law school,” Webking says.

The program, run by the university's Public Policy Research Center and carried out in cooperation with faculty at the UT-Austin School, currently has 32 students. The criteria for entering the program are academic achievement and promise and maturity of applicants.

The Challenge

Only one in 25 law students is African American, Latino, American or Native American statisticians that does not accurately reflect the multicultural society in the United States.

Unfortunately, the Hopwood decision—a federal court decision that prevents universities in Louisiana and Mississippi from considering race in admissions—has had a chilling effect on minority law school admissions. Yet, law schools are investing in having a diverse student body. Diversity is a requirement for meeting the accreditation standards of the American Association of Law Schools (AALS). And diversity is a requirement for meeting the accreditation standards of the Association of American Law Schools (AALS). And diversity is a requirement for meeting the accreditation standards of the Association of American Law Schools (AALS).

The Law School Preparatory Institute is working to address underrepresentation of minority students in the legal profession.
students develop the skills and abilities they will need to prepare for and succeed in law school. While the program is open to all students regardless of ethnicity, UTEP, as the largest Mexican American-majority university in the country, provides opportunities for more ethnically diverse law school classes—resulting in a more well-rounded legal profession that can serve both local and national communities more effectively.

“Our students, as a group, tend to have lower LSAT scores than their grade point averages would warrant,” Webking says. “It’s true of minority students nationwide. Our thought was to address that.”

The problem of having too few minority attorneys is as complex as the people and situations lawyers deal with every day.

“Lawyers practice in the larger community, and unless there’s some sense of the diversity of the people they represent, they’re practicing at a disadvantage,” Webking says.

UTEP’s Law School Preparation Institute is making a valuable contribution on several levels: the students benefit by being well prepared to enter law school, and the legal profession benefits from increased numbers of minority attorneys, which in turn benefits our multicultural society.

“We are helping our students develop the skills that will make them successful law students and lawyers. Our students are more attractive to prospective schools because they are better prepared to do the work and to succeed.” — Rich Rewards, Lisa Cervantes, an Institute scholar, says the program has heightened her understanding of what to expect in law school.

“I had no idea what law school would be like, but after meeting with a law professor from U.T. Austin, I have a good idea of what I have to do,” she says.

Even more important, Cervantes says, is her growing confidence in her ability to tackle the rigors of law school.

Institute students uniformly are in agreement that the program offers numerous benefits, from enhancing their ability to analyze complex information to honing their critical-thinking skills. They are excited that once they become lawyers, they might bring a new perspective to the legal profession.

Alberto Mesta, now a first-year law student at UT-Austin, says that the Law School Preparation Institute was one of the most important factors in his acceptance to law school.

“I am very passionate about this program,” Mesta says. “My undergraduate career at UTEP prepared me for law school. The professors and courses expanded my intellect. The institute enabled me to sharpen it.”

Mesta also notes that UT-Austin’s efforts to increase the numbers of students from diverse backgrounds seems to be paying off.

“Especially with regard to Hispanics, the only other place that produces about the same number of Mexican Americans students besides UTEP is the Rio Grande Valley,” he says. “It is good to know that others from your city and university have walked your path.”

Mesta wants other students to have the same level of preparation he has, and so he plans to do everything in his power to continue to support the Law School Preparation Institute once he receives his J.D. and returns to El Paso.

“I want to help make El Paso an even better place to live,” he says.

For Webking, this response is gratifying, and an indication that the institute is working well.

“In this community, if we don’t do something to get people into higher education, the whole community suffers,” Webking says. “The
Law School Preparation Institute is good for the students, it's good for law schools, and it's good for El Paso."

The Law School Preparation Institute Program at UTEP

The Institute accepts about thirty applicants entering their junior year each season. Applicants are selected based on their college performance, communication skills, and demonstrated motivation and desire to go to law school.

Each phase is held in the summer from 8:30 a.m. to 4 p.m. five days each week with special events such as speakers and practice LSAT exams on Saturdays. In order to compensate for income not earned while participating in the Institute, students are awarded a $1,000 stipend for each month of participation.

The Program:
• Prepares students for the LSAT.
• Develops critical thinking, reading, and analysis skills.
• Introduces students to legal thought.
• Guides students in selecting and applying to law schools.
• Develops strategies for becoming a more attractive law school candidate.
• Provides prospective law schools with a substantive account of an applicant’s abilities to succeed as a law student.

Goals
Phase one of the institute has several goals. It introduces students to the work of law school and lawyers and develops the skills necessary to succeed as a law student.

Mornings are devoted to the kind of analytical thinking necessary for success in law school and the practice of law. Here, students investigate a variety of difficult and complex readings in order to understand, critique, and apply their arguments. The students learn to focus on both the content and the form of the argument in order to develop their understanding and logical skills. Students also are made to articulate positions and defend themselves.

In the afternoons, students are exposed to the same classic cases studied in first-year law school—from contracts and torts to civil procedure, property, and criminal law.

The idea is to train the students to parse problems the way law students are encouraged to do in law school. Familiarization with this sort of thinking, and the Socratic process that accompanies it, might make a crucial difference to the success of a student in terms of both passing the LSAT and succeeding in law school, Webbing says. The intensive training will also improve students’ skills and performance for their final two years of undergraduate study, improving not only LSAT scores but also their GPAs.

Phase Two
Phase two is focused on practicing for the LSAT, training students in how to go about applying to law schools, and giving students an introduction to legal research and writing. Each weekday morning, students work with faculty to improve their skills in taking the LSAT.

These intense sessions beyond test-taking skills to help address the core analytical is measured by the test. In the afternoons, students learn how to do which law schools to apply to, to fill out and approach the applications, how to formulate a personal statement to accompany the applications, and how to determine whom they should ask to submit letters of recommendation on their behalf. This session also introduces students to the Law School Assembly Service and what it does.

In addition, students learn to write analytically, and their writing given extensive criticism by faculty.

"Without exception, the students thought that they had improved their reasoning skills, that they understood more about law school than they had before and that they were prepared to develop further in pursuit of goals," says Webbing.

"The professors and courses expanded my intellect. The institute enabled me to sharpen it."

ALBERTO MESTA, STUDENT
PIONEERING MEXICAN LAW COURSE

Thomas Jefferson School of Law

by Pat Hanson

- While driving in Mexico, you are severely injured in a car accident. You don't have Mexican insurance. What do you do next?
- You're ready to buy property at your favorite vacation spot in Zihuatenejo, Mexico. Where do you get information regarding closing procedures?
- A practicing attorney in Los Angeles receives a late-night call. The son of one of his best clients is in a Mexican jail on drug charges. Who does he/she call first?
- You've set up a profitable internet-based marketing business and want to expand to sites in Mexico. What do you need to know?

Twenty-two pioneering students in a summer law course will be better prepared in the future to handle cases like these. This June, they enrolled in a first-of-its-kind-in-the-country course offered at Thomas Jefferson School of Law (TJSL) in San Diego to gain an understanding of the major differences between the Mexican legal system and ours.

Introduction to Mexican Law was created by TJSL's Professor William Slomanson as part of a bigger plan to provide law students with highlights of both the state and federal components of Mexican law. Slomanson is the author of Fundamental Perspectives on International Law, now in its third edition and widely used in political science classes and law schools throughout the country. He recently received a Hispanic Heritage Month Local Hero Award for his contribution to the Hispanic community in San Diego. He was one of the founders of the TJSL chapter of La Raza Lawyers Association. Besides helping to coordinate the local Latina Mujer advocacy conference, he speaks to young Latino males regarding law careers through Hombres Nobles, a program in East San Diego county. As the head of TJSL's San Diego-Tijuana Cross Border Project, Mr. Slomanson has been instrumental in involving various segments of the law school community in bringing more attention to the ties that link the San Diego-Tijuana metropolitan region.

The genesis of Introduction to Mexican Law began with Professor Slomanson's attending classes at Tijuana Law School in order to learn more about the institution and its professors. Slomanson then developed this course to give American lawyers an appreciation for the cultural as well as legal system of Mexico and because of the increasing need for attorneys to comprehend the laws of Mexico due to NAFTA and the global internationalization of commerce. If NAFTA becomes as successful as its proponents believe it will, lawyers will need to know each other's systems in order to assure their clients' or companies' rights are being guarded.

This new course was the first phase of a bigger plan at TJSL to one day offer training and education nationally about Mexican law and relationships between businesses on the border between our two countries. The 2,100-mile border between Mexico and the United States spans eight states and is the second largest shared border on our globe. San Diego, with a population of three million, and Tijuana, with two million residents, are the largest adjacent cities in the world.

During the fall of '99, the TJSL student International Law Society will be hosting several presentations for the public by people such as the Mexican consular officer in charge of Mexico's second consulate at the San Ysidro border, a ranking female officer in the U.S. Border Patrol, and an activist. In March 2000, in conjunction with UC-San Diego and Universidad Autonoma de Baja California, an "Intercity Economic Integration in the 21st Century: San Diego/Tijuana Cross Border" conference will be offered featuring an invited keynote by California's Governor Gray Davis, as well as panels on immigration issues, environmental priorities, the economic development of both cities, and 21st-century MegaCity issues including cross-border infrastructure. (For information about these conferences, call 619-297-1900, ext. 140.)

Chad Taylor, a second-year law student from Louisiana took Introduction to Mexican Law because of his future direction in international law, as well as similarities he'd noticed between...
Mexico and Louisiana's codified laws. "The course cleared up many stereotypes and misconceptions I'd had about how things work across the border. Many of us think of Mexico as a backward place where it takes money to get things accomplished. This is far from true."

Five attorneys from the Prestigious Universidad Autonoma de Baja California (UABC) in Tijuana, all of whom have considerable practical experience in their fields, assisted in teaching the course. Each outlined key concepts in the following subject areas: Federal Constitution; Civil Process in Mexico, Mexican Criminal Law, Civil Obligations (contracts and remedies), and Business Law, with an emphasis on international transactions between Mexico and the United States.

The Mexican legal system is quite different from that of the U.S. For instance, Mexico and the U.S. have quite different standards for liability and damages in the area of torts. Don't expect a jury trial for civil litigation in Mexico. Mexican civil courts do not use juries, and only the judge is the trier of fact. There is a pre-trial stage that is used to prepare and bolster cases in writing, but no discovery phase or pre-trial fact-finding depositions as in the U.S. After a judge receives "La Demanda," there is what is called the Explotation stage, where the plaintiff's and defendant's legal information is filed, along with the object named, the legal foundation of rights, and the value of the object being claimed. If the judge allows a suit to move forward, then either party has ten days to present evidence. The judge reviews all gathered information and decides, giving his ruling with an explanation. This is typical of the majority of countries in the world where the Napoleonic Civil Code prevails as opposed to the Anglo-American Common Law judicial system.

Taylor suggested that in fact the Mexican judicial system might be more efficient than the jury system of the United States. Without juries for civil process and criminal proceedings, attorneys do not give opening or closing remarks when defending a case. Everything is done on paper in advance and filed with a secretary of the Court, who must have a law degree. The judge gets the paperwork, but rarely sees witnesses. In Mexico, there are no precedent-setting decisions unless five courts in succession have taken similar action.

Auto accidents in Mexico are routinely treated as both civil and criminal matters. Without Mexican insurance, which can be purchased for a nominal cost of about $15 a day, U.S. travelers could be detained in jail, or kept from receiving emergency health services. Until someone coughs up the money for damages or services.

Concerning real estate, an American may not own property in Mexico in what is known as "the forbidden zone," 50 kilometers from the border or 100 kilometers from the ocean. Land must be owned by Mexican nationals, in a trust arrangement rather than outright ownership.

Taylor explained the useful concept "amparo" to the author. Any citizen, even foreign one traveling or working in Mexico can employ "amparo" against a Mexican authority if they feel their rights have been violated. For example, the owner of a construction company that frequently moves heavy equipment across the border from the U.S. was told he would be held up for a few days because a customs agent claimed it while he had been presented with the proper papers, they weren't on the agent's computer. The construction company threatened to file an "amparo," which would have made the customs agent liable for the lost work time they would have entailed. Sir "amparo" needn't rely on precedents and affects only the party who brings the suit; he was allowed to continue without delay.

When asked whether there were any problems with the course, both Professor Slomans and student Chad Taylor said that the course n

A Formula for More Minorties in Math and Science

BY AMALIA DUARTE

The dearth of minorities, particularly Hispanics and African Americans, in math and science has been on the academic agenda for decades. But the situation seems even more dire these days as the 21st century fast approaches—as our job market grows ever more tied to high technology and as affirmative action in higher education comes under increasing attack.

Recently, at Rice University in Texas, more than 100 educators, students, and researchers gathered for a three-day conference to tackle this important issue and explore ways in which universities can do more to recruit and retain minorities in the fields of math and science.

With its huge Hispanic population and landmark anti-affirmative action case, known as Hopwood, Texas seemed an appropriate site for the conference's theme: "Steering Minority Education for the 21st Century." "More than 50 percent of kindergartners right now in Texas are Hispanic," said conference moderator Richard Tapia, the Noah Harding Professor of Computational and Applied Mathematics at Rice. "And while Hispanic and African American students do almost as well as others in math and science up to about grade four, the achievement gap broadens in middle school and high school. How well we address this concern right now determines the shape of the future for Texans and for the country as a whole."

The conference was put together by the South-Central Computational Science in Minority Institutions Consortium (SC-COSMIC) and three of its founding member universities: Rice University, the University of Houston-Downtown, and Prairie View A&M University.

This consortium promotes cutting-edge science and math education, enables distance learning, shares research, and provides access to online resources. The conference was co-hosted by Rice University's Center for Research and Parallel Computation, where Tapia is director of education, and the University of Houston-Downtown's Center for Computational Sciences and Advanced Distributed Simulation, where Richard Alo, professor of computer and mathematical sciences, is executive director. (It was funded by the U.S. Army Research Laboratory, with support from the National Science Foundation.)

Alo said he is concerned that in the next century, Hispanics are going to be left behind as the economy shifts into high-tech mode. "In this country, there is a serious underrepresentation of Hispanics, African Americans, and Native Americans in science, mathematics, and engineering training programs," said Alo, who served as conference co-chair. "This is a serious shortcoming in a field where 200,000 jobs go unfilled each year. We must look at all avenues to increase the ethnic representation here to avoid de facto second-class citizenship and to maintain our world leadership in an economy that is high-technology driven."

At the June 1998 conference, participants were challenged to come up with tangible solutions. This past summer, the consortium issued a report summarizing the event and offering numerous ideas for getting more Hispanics and African Americans into math and science. Tapia and Alo issued the report in the hope that it will offer "valid and valuable touchstones for policy-making, funding, and generally improving the state of minority education in this country."

The key recommendations and conclusions in the report centered around four important areas: diversity in the post-Hopwood era; forging partnerships between minority and majority institutions; improving student support and mentoring programs; and increasing the number of minority candidates in postgraduate programs.

With affirmative action dead in Texas after the Hopwood decision and similar cases looming in Washington and Michigan, a spiri-
ed panel discussion took place on how to continue to recruit, admit, and retain minorities to colleges and universities. (In the Hopwood case, four White students, including Cheryl Hopwood, who were rejected from the University of Texas at Austin Law School, successfully sued, claiming that separate criteria used to judge minority applicants were illegal.)

Entitled “The Impact of Affirmative Action on the Technical Workforce of the 21st Century,” the seminar included discussion on everything from why money is being funneled into prisons instead of schools to the challenge of training students in computer science as the technology changes at breakneck speed.

An instructor from the City Colleges of Chicago, Bonita Ellis, described the difficulty of dealing with high school graduates who are not capable of taking college-level courses. “The community college is spending a great deal of money trying to work through this generation that’s coming out of high school without reading and writing skills, and therefore the technical programs are beginning to suffer,” said Ellis. “Our biggest growth is in pre-college-credit classes.”

Alo said that the crisis is even more serious and starts well before high school. “One of the most serious problems we have here in the Houston area is that 89 percent of the population of the inner-city schools are underrepresented minorities,” said Alo. “And after the fifth grade, the drop [in achievement] is drastic among African Americans and Hispanics in math and science. The situation is exasperating in that we’re talking about a lack of preparation. The African Americans and Hispanics are losing out very, very quickly.”

Offering an employer’s perspective on this crisis was a representative from IBM, who discussed how attacks on affirmative action will impact Corporate America’s efforts to diversify in the years to come. While there are thousands of vacant high-tech jobs, few Hispanics, African Americans, and Native Americans are obtaining computer science degrees. The result is that U.S. companies are recruiting thousands of foreign nationals outside the United States. “The pipeline of qualified workers at IBM is very much affected by affirmative action,” said Judge Dickson, director of educational initiatives at IBM. “There is legislation in place now to bring in about 95,000 non-Americans to fill these jobs. We have to ask ourselves, do we want to take away opportunities for underrepresented minorities, with the consequence that we are forced to go outside the United States for qualified people?”

Dickson later argued that money is a key issue for keeping minorities in graduate programs. Citing a study from the National Association for Minority Engineers, he said, “For minorities in graduate school, $10,000 can bring about a 17 percent swing in the retention rate. When we get minorities in graduate school, they depend very heavily on money. Money from endowments is being used for more affluent students to get them to come to a particular school. So, there’s less money for minorities.”

Conference attendees concluded that affirmative action is over and called for the establishment of new approaches to recruit minorities into colleges and universities. These initiatives would include: recruiting at schools with high minority enrollments; identifying alternative assessment systems; developing support networks, including student-mentors and student and faculty role models; and implementing statewide policies in which a top percentage of all high school graduates would be automatically accepted into state-funded institutions.

Another topic addressed during the conference was how to bridge the gap between minority institutions, which educate many Hispanics and African Americans at the undergraduate level, and majority institutions, where minorities often go for postgraduate work. Conference attendees said the key is simply working together more closely.

Conference attendees concluded that the strengths of minority institutions tend to be the weaknesses of majority institutions vice versa. Both need to try to pull and work together more closely to draw from each other’s strengths and buttress weaknesses. For example, a major strength minority institutions, which are...
leges or universities with more than 25 percent minority enrollment, it is that they counterattack the isolation minorities on campus often experience by building self-esteem, providing mentoring, and offering a close-knit, family atmosphere. At the same time, these institutions often lack some of the advanced facilities and equipment enjoyed by majority institutions, and faculty members are many times overworked and paid less than counterparts elsewhere. The result is that minorities attending these schools get the nurturing to stay in school, but not the academic rigor or experience to prepare them for the demands of graduate school or jobs in the industry. Meanwhile, students at majority schools have different issues. Although faculty might be top of their field in terms of research and accomplishments, they do not always place as great an emphasis on student learning.

In addition, student mentoring and developing groups of like-minded people is crucial to easing the transitions from high school to college to graduate programs and finally, the workplace. In a session focusing on transitions, Rice graduate Regina Hill urged the creation of support organizations for first-year students. “Eighteen-year-olds do not completely understand what they are getting into,” she said. “Institutions need to create comfort zones for students in that first difficult year.”

Conference attendees recommended the creation of centers of excellence that would bring to minorities the strengths and overcome the weaknesses of both types of institutions. They suggested that minority and majority schools seek out opportunities to partner or share resources such as world-class researchers and advanced technology facilities. They said that building stronger ties to the “outside” world and collaborating to create highly accessible and nurturing programs and environments would also help minority students.

A heated debate ensued on the topic of whether minority institutions should develop advanced degree programs in science, math, and engineering. Some argued that these programs should be created, particularly in regions where such programs are not readily available. Roland Smith, vice provost at Rice University, said, “While minority students from minority schools sometimes seem less prepared, they are often more battle-ready. Meanwhile, minorities who attend majority schools seem to be more battle-weary and doubtful of their own capabilities.”

Picking up on the theme of the strength of minority institutions, Professor Ramón Espinosa-Vasquez of the University of Puerto Rico described how they established an advanced degree program in computer science at his school. A major reason for creating the program is that many students from the island cannot go to the United States or they prefer to stay local for cultural reasons. He said the department went from no external funding in 1989 to $1 million last year. The master’s degree program was approved in 1993, and they anticipate the addition of a “next level” Ph.D. program in the same discipline.

Likewise, Professor Deidre Williams of Florida A&M University talked about how FAMU successfully developed a master’s program in the software-engineering sciences. FAMU students then attend Florida International University for the Ph.D. in this field. Part of the development strategy was to make sure they weren’t competing with another state-supported university in the city. “We discovered which of these specialties the other state school was not addressing,” said Williams. “Then, we recruited new faculty, including visiting professors with interest in this area. This helped us win a grant.”

Arguing on the other side was Mark Palmer, outreach coordinator for the Center for the Analysis of Production of Storms at the University of Oklahoma, who said, “Minority institutions might be best served by cooperating with a majority institution that has experience. There can be faculty exchanges and joint seminars and joint applied research that can benefit both institutions.”

Participants reached a strong consensus that there should be caution about creating graduate programs at minority schools. Among the top concerns voiced is that advanced degree programs would stretch the limited funds minority institutions have available at the expense of other programs. Indeed, most agreed, it would be better for minority institutions to prepare undergraduate students for programs at majority schools, especially for those who hope to attain a Ph.D.

The consensus was that minority institutions should not develop graduate programs until undergraduate programs are well established—so that resources are not sacrificed. Tapia warned that “two disjointed cycles. minority and majority institutions. With two different standards of graduate research, are not good for the health of the nation.” And as we enter the 21st century—and Hispanics become the country’s largest minority group—the need to better prepare minorities for math and science careers will only grow more crucial.
Four Receive Miami-Dade's Highest Honor

Four Hispanic teachers are among 14 Miami-Dade Community College (Fla.) professors receiving the college's highest honor, the Endowed Teaching Chair, which provides each with $7,500 a year for three years, allowing faculty to explore new teaching methods, develop new projects, purchase specialized training materials, and enhance their technological expertise.

Ivan F. Figueras, associate professor, senior of marketing/management, was awarded the Charles and Carrie Masconardi Endowed Teaching Chair for his creative strategies, which have provided students with unique learning opportunities.

Chemistry Professor Eileen Delgado Johans was awarded The Philip Morris Endowed Teaching Chair in Agriculture and the Natural Sciences for maintaining an extraordinary degree of excellence.

Mercedes Sandoval, professor, arts and sciences, was awarded The Gordon Foster and Thelma Peters Endowed Teaching Chair as a renowned cultural anthropologist and worldwide expert on Afro-Cuban religious systems.

Teresa Maria Rojas, professor, theatre/acting, and director, Prometoe Community Theatre, was awarded The Northern Trust Bank of Florida Endowed Teaching Chair for bringing multicultural performances to audiences throughout South Florida.

Valencia a White House Fellow

Reynaldo A. Valencia, tenured law professor at St. Mary's University School of Law in Texas, was selected for a 1999-2000 White House Fellowship. White House Fellows serve the president as special assistants to Cabinet members and senior White House staff. Duties include drafting and reviewing legislation, researching public policy initiatives, responding to congressional inquiries, writing speeches, and conducting policy briefings.

Valencia, 34, is founder and director of the Center of Latina/Latino Legal Studies at St. Mary's, where he teaches courses on corporate law, corporate bankruptcy, race and the law, and gender and the law. He is faculty advisor to the Hispanic Law Students Association and advisor to the Scholar, the St. Mary's law review on minority issues.

Cortes Takes Post at Fashion Institute of Technology

Dr. Dario A. Cortes was appointed vice president for academic affairs at the Fashion Institute of Technology (FIT) in New York City, bringing with him 20 years of administrative and teaching experience in higher education. He will provide internal leadership and vision for academic programs, oversee academic standards, monitor budgets, and recommend faculty strategies and appointments.

Cortes was previously the dean of the College of Arts, Sciences, and Professional Studies at Fairleigh Dickinson University. He has a bachelor's degree from Queens College, a master's from the University of Virginia, and a doctorate from the University of Illinois.

Hillsborough Community Hires Soto

HILLSBOROUGH The district board of trustees of Hillsborough Community College (Fla.) named Dr. Carl Soto president of Brandon Campus. As chief executive, Soto will be responsible for management, administration, and operation of the campus, the promotion and enhancement of academic affairs, student affairs, and support services, and directing the supervision of campus deans, faculty, and staff employees.

Most recently, Soto was vice president for academic affairs and dean of health occupations at Milwaukee Area Technical College. He has a doctorate from the University of Cincinnati.

Casas Addresses Cultural Differences of Psychology Patient

Effects by health maintenance organizations to take a cookbook approach to providing psychological care often fail to take into account cultural differences of patients, according to University of California-Santa Barbara Professor of Education J. Manuel Casas.

Casas made a case for that assertion in a paper he delivered to the American Psychological Association convention in Boston.

There is a trend in some branches of health care—including psychology— to take a by-the-book approach, writing manuals that match symptoms and conditions with suggested remedies. But the manuals many times do not take into account cultural issues.

"These procedures have not been empirically tested for minority people," said Casas.
Calderón-Salín a USDA Fellow

Texas A&M University-Kingsville Assistant Professor Dr. Delmy Calderón-Salín served a four-week fellowship working for the U.S. Department of Agriculture (USDA) this past summer.

As an agribusiness assistant professor in the agronomy and resource science department at the College of Agriculture and Human Sciences, Calderón-Salín was chosen as a USDA Hispanic-Serving Institutions Fellow. She worked out of the Compliance Review Office of the Foreign Agriculture Service at the USDA. While serving her fellowship, Calderón-Salín, a Honduran native, assisted in the coordination of the Honduran-Hurricane Mitch relief efforts.

Cal State University Honors Sexton

Science teacher Ursula Sexton, a native of Bogota, Colombia, was among 22 California teachers honored at a Sept. 13 banquet. The recognition dinner was the inaugural event of the yearlong Celebrating Teachers observance, a statewide celebration established by the CSU board of trustees and the CSU alumni council.

"I'm very excited because it allows me to be a role model for young girls and women of Latin American heritage," said Sexton, "demonstrating they too can succeed if they have drive and determination."

An elementary school educator, Sexton was selected from a group of 19 nominated from CSU-Hayward.

Author Chávez on Panel at San Francisco State

Lesnik Chávez, daughter-in-law of labor leader César Chávez and the author of the forthcoming novel Sacrifice, was a panelist at San Francisco State University (SFSU) in California, one of three distinguished authors to offer perspectives on the role of education and literature in providing a channel for understanding between nations traditionally at odds. The discussion, "Mending Nations," was the first in a series of programs sponsored by the SFSU Student Affairs' "Stop the Hate Campaign."

Chávez was a criminal attorney in the Dominican Republic before beginning a career in journalism as a television reporter and political talk show host.

Joining Chávez were Luba Brezhneva, niece of former Soviet Premier Leonid Brezhnev, and award-winning television series host Lailie Bakhtiar van Dillen.

Katz Documentary on Public Television

The documentary film El Dia Que Me Quieres (The Day You'll Love Me), by Leandro Katz, associate professor of communication at William Paterson University (N.J.), was shown on public television station Channel Thirteen/ WNET in September, as part of WNET's month-long celebration of Hispanic heritage.

El Dia Que Me Quieres is a meditation on the last photograph taken of Latin American revolutionary Ernesto Che Guevara as he lay dead on a table surrounded by a roomful of gleeful military men. The photograph, taken by Bolivian photographer Freddy Alborta in 1967, was transmitted worldwide and ended the legendary search for Guevara, which had lasted more than two years.

Katz was born in Argentina and has lived in New York City since 1965. He has taught at William Paterson since 1987 and specializes in film production and film studies.

ABA/Law Student Division Honors Boulanger

Stephan C. Boulanger, a 1999 graduate of the Southwestern University School of Law (Calif.), was recognized by the American Bar Association/Law Student Division (ABA/LSI) as the best lieutenant governor for Volunteer Income Tax Assistance (VITA) programs in the nation. Boulanger served as the 1998-99 lieutenant governor for the ABA/LSI's 9th circuit, which encompasses all 114 ABA-approved schools in Southern California and Hawaii.

Through the VITA program, law students are trained by the Internal Revenue Service to assist low-income taxpayers with their tax returns. As the 9th circuit lieutenant governor for VITA Boulanger promoted the VITA program to the law schools and assisted in the development of each law school's program and the outreach to the community.

Del Pico Taylor Conducts Masterclass at West Chester

International award-winning pianist recitalist and clinician Maria de Pico Taylor recently conducted a masterclass at West Chester University (Penn.).

Del Pico Taylor's masterclass examine Hispanic musical folklore, considered by many musicologists to be the richest in the world. Her discussion on the inherent multi-ethnicity and influences of Arab, Jewish, Gypsy, Native American, and African culture on what creates the Spanish sound was enlivened by demonstrations of the development of this unique sound through the use of lively musical examples and exciting audience participation techniques.

Gómez-Peña Presents "Borderstasis" at Lewis and Clark

Performance artist Guillermo Gómez-Peña recently gave a solo presentation "Borderstasis," at Lewis and Clark College (Ore.).

In "Borderstasis," Gómez-Peña explores the fear of immigration and the effects of globalization, censorship, and international sexuality.

To place audience members in the position of "foreigners," Gómez-Peña oft employs humor, hybrid literary genres, combined musical styles, slides, and video. The theatrical makeup and costumes tend
exaggerate cultural stereotypes and edge toward the absurd.

A writer and cultural commentator, Gómez-Peña was also a guest lecturer at Lewis and Clark in the class Border Literature, which was open to all students.

Flores to Expand Recruitment at San Antonio

Manuel Flores is the new director of enrollment management at San Antonio College (SAC) in Texas.

Flores’ primary mission is to expand current recruitment and retention activities and develop and implement new initiatives for the college. These duties extend his work in the past year to intensify advising and recruitment in inner-city schools.

“Retention and recruitment are two of the most crucial elements of enrollment management,” said Flores, who added that he plans “to tap the brain power of SAC faculty and staff” to develop effective strategies.

Flores has a bachelor’s degree from Southwest Texas State University and a master’s from St. Mary’s University.

Soto Receives Hispanic Heritage Award

Gary Soto, a poet who recently was hired as a distinguished professor at the University of California-Riverside, was honored with a Hispanic Heritage Award in Washington, D.C.

Soto was among five honorees at the Kennedy Center ceremony. The other honorees were opera star Plácido Domingo, football player Anthony Muñoz, activist Antonia Hernández, and dance company founder Tina Ramirez.

“I feel honored to be in that company,” said Soto, who has authored nine books of poetry and three young adult short story collections that speak colorfully about the ironies that abounded in his working-class Mexican American neighborhood.

Soto is one of four professors in the creative writing department.

PLACES

Latino Research Center Moves to California-San Marcos

The National Latino Resource Center, founded in 1997 to conduct research and research training and to disseminate information pertaining to findings pertinent to Latino populations in the United States, has moved to California State University-San Marcos. The center and its director, Dr. Fernando Soriano, moved from San Diego State University, where it had been located since its creation.

The center, funded by the National Institutes of Health, has a national scope that addresses all Latino subgroups. It is committed to areas such as health, mental health, education, social issues, housing, labor and employment, and immigration.

Soriano is a leading researcher in youth and school violence.

Flamenco Ballet Company at Southern Arkansas

SAU-M Spanish and American artists from the Boston Flamenco Ballet recently performed two shows at Southern Arkansas University-Magnolia. The group shared its love and enthusiasm for Spanish theater, flamenco, Spanish American folkloric dance, and European traditional dances.

The first performance, “Café de Chinitas: Homage to García Lorca,” re-created the authentic Spanish flamenco tradition, which evolved into its classic form during the 19th century when the Café de Chinitas in Malaga became a stronghold of flamenco art.

The second show, “Cross-Cultural Survey of Music and Dance from Spain and France,” was a chronologically arranged segment presenting historical background performances typical of several centuries of France’s performing arts.

Blanton Museum Collaborates on Latin American Art Program

The Jack S. Blanton Museum of Art of the University of Texas-Austin and the Patricia Phelps de Cisneros Collection, Caracas, Venezuela, have established “Constructive Horizons: The Latin American Perspective,” an art loan research program designed to promote understanding of modern and contemporary Latin American art. “Constructive Horizons” will set new parameters of cultural exchange between public and private institutions in the United States and South America. The aim of the initiative is twofold: (1) to showcase work of Latin American artists in a major teaching and research museum, and (2) to promote research about 20th-century Latin American art.

St. Mary’s Wins Grant for High-Tech Classrooms

The U.S. Department of Education awarded St. Mary’s University (Texas) a five-year $2.1 million grant for high-tech classrooms. Funding through the Hispanic-Serving Institutions Program Title V provision of the Higher Education Act for strengthening institutions is the largest grant of any kind in the university’s 147-year history and one of the highest in the nation to be awarded this year.

The overall program goal is to improve the quality of academic programs through technology-aided teaching and learning to enhance student skills and profici ence with information technologies.

Grant to Assist Loyola Marymount Faculty with Intercultural Issues

Lorola Marymount University (LMU) in California received a $250,000 grant from the Wi and Flora Hewlett Foundation to help introduce intercultural content into the curriculum and teach successfully in diverse classrooms.

Through workshops and discussion groups in conjunction with the LMU Intercultural Initiative, the grant will support the development of teaching strategies to address different learning styles. Faculty will learn how to engage students more actively in their own learning and develop specific techniques for dealing with race in the classroom. This includes addressing tension and/or conflict among students and teachers.
Latino Heritage Art Exhibit at Elmhurst

The Elmhurst College (Ill.) Latino Heritage Month Art Exhibit recently featured

"Mirrors," an exhibit of oil paintings by artists Oscar Luis Martinez and Michele Tuohy of Chicago, who are husband and wife.

Martinez, born in Puerto Rico, has been highly active in the Chicago mural movement, and has a bachelor's degree from the University of Illinois Medical Center Tuohy, of Cuban and Irish descent, studied theater at the University of London's Westfield College, received a degree from Northwestern University, and has a master's degree from the University of Illinois. Both are founding members of the Latin American Museum of Art in Chicago.

In celebration of Latino heritage, Elmhurst also held the 4th annual César E. Chávez Guestship, which featured Cuban exile Rafael E. Saumell's speech, "Oh! Havana: Discussions on Exile." Saumell is an assistant professor of foreign languages at Sam Houston State University.

End of Line for South Florida Minority Program

Dr. Ted Williams, director of the Minority High School Student Research Apprenticeship Program at the University of South Florida College of Medicine (COM) since its inception in 1989, is pictured surrounded by students from the program's final class this past summer. The program, sponsored by the National Institutes of Mental Health, has been cut and cannot continue without alternative funding.

With the help of COM faculty mentors, the eight-week program introduced students to the rigors of laboratory research with the intent of turning them on to science or medicine as a career. The majority of participants went to college, with many majoring in the biosciences.

The final graduates, clockwise from the bottom left corner, were Kenya Dickerson, Lauren Barnes, Shaaka Bailey, Michael Neuhaus, Shalom Vyas, Candace Webb, A.J. White, Nicole Dorsente, Helen Moses-Soto, and Ann Abraham. Not pictured are James Ignacous and Darryl Bolden.

Latino USA Broadcasts Special Series for Hispanic Heritage Month

Latino USA, a production partnership of the Center for Mexican American Studies and KUT Radio at the University of Texas-Austin, recently broadcast four special programs illuminating the culture and history of the estimated 30 million Latinos living in the United States today, in conjunction with Hispanic Heritage Month.

"Common Ground: Latinos, Filipinos, and Native Americans" focused on the unique relationship between Latinos and Native Americans in New Mexico, and the Filipino community; "Latino Parenting," an interview with author Dr. Gloria Rodriguez, examined the state of Latino children today; "Cross-Cultural Youth" examined how Latino youth incorporate aspects of other cultures to express themselves; and "Living Legends of Latino Music" profiled musicians Mongo Santamaria, Tito Puente, and Lydia Mendoza.

Hispanics for L.A. Opera Hosts Plácido Domingo Awards

Hispanics for L.A. Opera (HLAO), a support and audience development group for Los Angeles Opera, held its third annual Plácido Domingo Awards Dinner following the opening night performance of "The Elixir of Love." The honorees were Mexican tenor Ramón Vargas, José Angel Pesador Osuna, former Consul General for Mexico in Los Angeles; and AT&T.

The Plácido Domingo Awards, named for the world-renowned tenor, are given by HLAO to honor Hispanic opera artists who have distinguished themselves in their careers, as well as those who have contributed to the success of opera in the Latino community of Los Angeles.

Pictured here, left to right, HLAO founders Ed and Alicia Clark, honoree Vargas and Pesador Osuna, and HLAO chair Gilbert Moret.

N.J. Performing Arts Center Hosts World Festival III

NJPAC The New Jersey Performing Arts Center (NJPAC) is hosting its third annual World Festival, celebrating the identity and legacy of people of Spanish-speaking heritage.

The year-long series, "Visions of New Worlds: Migration, Assimilation, and Identity—A Festival of Spanish Routes and Rhythms," will feature 20 events, bringing to Newark performers from Spain, South America, Central America, and the Spanish-speaking Caribbean. The series celebrates the diverse art and culture of the Spanish-speaking world, and explores cross-cultural connections with the Portuguese and Pan African works presented during NJPAC's two previous World Festival celebrations. In addition to performances at NJPAC, more than a dozen residencies and humanities programs have been scheduled in partnership with New Jersey universities, libraries, churches, community-based organizations, and national organizations. For ticket information, call (888) 60-NJPAC.

Texas-Brownsville/Texas Southmost Break Ground

More than 200 people attended a groundbreaking ceremony at the University of Texas-Brownsville/Texas Southmost College (UTB/TC) for the new $275 million Life and Health Sciences building.

The state-of-the-art building, to be located on UTB/TC's Main Campus, will house the life and health sciences departments and be a center for local community and business partnerships.
cant historic and cultural continuity of TB/TSC. The buildings will incorporate the local Mexican American influences found in Brownsville and Matamoros while recapturing the scale and detail of the historic buildings of the old Fort Brown area.

Pictured, l. to r.: TSC board of trustee chair Mary Rose Cardenas, UTB/TSC President Dr. Juliet V. Garcia, State Sen. Eddie Lucio, and UT system regent A.R. “Tony” Sanchez present an artist’s rendition of the building.

News from Miami-Dade

The Medical Center Campus of Miami-Dade Community College (M-DCC) in Florida received two national rankings for awarding the most associate degrees in the country. The Medical Center Campus ranked first in nursing, and first in the health professions and related sciences. “We’re proud to be No. 1,” said Dr. Kathie S. Sigler, Medical Center Campus president. Pictured here, M-DCC Medical Campus students examine blood samples in a campus lab.

Dr. José A. Vicente, also pictured, president of M-DCC’s InterAmerican Campus, attended the White House Convening on Hispanic Children and Youth at the invitation of first lady Hillary Rodham Clinton in August. The convening explored the numerous challenges and opportunities facing Hispanics—one of the fastest-growing and youngest segments of the population in the United States—particularly in areas of early childhood development, educational attainment, and adolescence.

Houston-Clear Lake to Establish New ESL Training Program

The U.S. Department of Education awarded a $953,323 grant to the University of Houston-Clear Lake’s School of Education in Texas to establish a new training program for bilingual/ESL teachers, thanks to the initiative of Professors Laurie Weaver and Judy Marquez (pictured l. to r.). The financial award will provide funding for “Project New Horizons” over the next five years.

The program will assist selected future teachers working toward a bachelor of science in interdisciplinary studies with elementary certification and a specialization in bilingual education. Additionally, the program will train 50 selected in-service teachers to gain an endorsement in bilingual education or ESL. Field experience opportunities and workshops also will be offered.

New Mexico Commission to Improve Teacher Education

The New Mexico Commission on Higher Education (CHE) was awarded a three-year, $2.4 million federal grant from the U.S. Department of Education to improve teacher education in the state. College of Education Deans from the University of New Mexico (UNM), New Mexico Highlands University, Eastern New Mexico University, Western New Mexico University, and New Mexico State University united with the CHE and the state Department of Education to win the competitive federal grant.

“This was a joint effort to bring about reform in K-12 education. We’ve got so much work to do,” said UNM College of Education Dean Viola Flores, who helped write the “Earth & Clay” Exhibit at New Jersey City University

“Earth & Clay,” an exhibit of Mes South American artifacts, many dating back as 2300 B.C., was shown recently at Jersey City University (NJCU).

In celebration of Hispanic Heritage Month, the exhibit was made possible by the Council on Hispanic Affairs (CHA) and the generosity of Jaime Andrade and Richard Baker. Hugo Xavier Bastidas, NJCU director of campus galleries, oversaw the show.

At the opening reception, Bastidas (center l.) and Hugo Morales, CHA president, (center r.) discussed pieces in the exhibit.

High-Tech Instruments Benefit Southwestern Chemistry Students

State-of-the-art, analytical, high instrumentation in the chemistry department at Southwestern College (Calif.) gives science majors there a technological edge. After receiving a $70,000 grant from the National Science Foundation and a matching state block grant through Southwestern, Dr. David Brown, chemistry professor who wrote the grant, has been mentoring students since fall of 1998.

During the 1998 fall semester, E López, Renee Link, Po Yee Leung, and Javellana III prepared the first of these high-tech, data-collecting tools for a collaborative effort between Southwestern and University of California-San Diego. Fourier Transform Infrared Spectroscopy played an important role in the history.
Director of the Congressional Hispanic Caucus, became executive director of the HACU National Internship Program.

- U.S. Sens. Kay Bailey Hutchison, R-Texas, and Jeff Bingaman, D-N.M., have been leading a bipartisan effort to form a Senate Hispanic-Serving Institution Coalition to address issues critical to the success of the nation's Hispanic college students.

New Mexico-Valencia to Enhance Student Services for Hispanics

The University of New Mexico (UNM)-Valencia was awarded $2.1 million over five years to enhance student services for Hispanic students. The funds come from the U.S. Department of Education's Hispanic-Serving Institutions Program (Title V Grant).

Alice Letteney, UNM-Valencia executive director, said the funds will help strengthen its student service program and meet the challenges faced by the increasing number of students at UNM-Valencia. Letteney said the funds will also help with the recruitment and retention of students.

The grant was made possible by a strong show of support of students, staff and faculty. Olga Gandara and Stephen Schoonmaker were the lead writers for the grant. Dr. Reinaldo Garcia and Marcella Luna were key contributors.

Glendale to Broaden Access for Underserved Hispanics

Glendale Community College (Calif.) will be a part of a $2.1 million federal grant to develop programs that broaden educational access for underserved Hispanic populations and immigrants.

One of the main components will be developing an information database to address emerging needs in facilities, programs, and course scheduling.

The grant from the U.S. Department of Education was awarded to fund the college’s plan to improve access and success of at-risk, low-income students as well as a rapidly growing Hispanic enrollment.

Colorado-Boulder Students Present Chicano History Week

United Mexican American Students (UMAS), an organization of University of Colorado-Boulder students of Chicano heritage, presented Chicano History Week in mid-September as a tool to learn about a culture that is often overlooked in mainstream society today, according to UMAS chair Theresa Casados.

“This week of events is a great way for people to learn about Chicano history, our position today, and where we are going in the future,” Casados said.

The week-long experience included a reception with the Huiztilopochtli Aztec Dancers, a play, a presentation about migrant farm workers, and a speech by Alurista, a renowned Chicano poet.

New Hires Bring Diversity to Chaffey

Forty-nine full-time faculty and staff members were hired to begin the 1999-2000 academic year at Chaffey College (Calif.). They have brought a great deal of expertise, energy, and most important, diversity to the college. Faculty additions include four Hispanic professors teaching music, Spanish, and correctional science.
Music Professor Patrick Aranda graduated from California State University-Los Angeles with a bachelor's degree in music. He then spent years as a professional musician before receiving his master's from Cal State-Fullerton. Spanish Professor Enedina Borruzo, who grew up in Venezuela, has a bachelor's degree and a master's from Cal State-L.A. as well as another master's and a Bilingual and Cross-cultural Language Acquisition Development Certificate. Correctional Science Professor Henry Rivas graduated from Cal State-L.A. and earned his master's from Cal State-Northridge. Edra Young arrived at Chaffey via an undergraduate year at the University of Madrid, bachelor's degree studies at Immaculate Heart College, and master's studies at Cal State-Northridge and the University of La Verne.

**Pace to Host Puerto Rican Fund's Annual Law Day**

Pace Law School (N.Y.) will be the host site for the Puerto Rican Legal Defense and Education Fund's (PRLEDF) 17th Annual Law Day for prospective students on Nov. 6. All 177 ABA-accredited law schools have been invited to attend.

Students interested in applying to law schools will be able to: speak face-to-face with law school recruiters; pick up brochures and current law school applications; attend an informal panel discussion regarding the law school application process; obtain valuable information regarding financing a legal education; and meet PRLEDF staff members.

---

**Cultural Competence Compendium**

by American Medical Association

This book is a resource for physicians in identifying issues surrounding different populations and learning to examine each patient's cultural background so that appropriate, respectful, patient-centered care is always provided. It includes resources such as policies, publications, and Web sites regarding health care and communication issues confronting people from underrepresented and underserved racial, ethnic, and socioeconomic groups and those with physical or mental illnesses or disabilities.

**Border-Crosser with a Lamborghini Dream**

by Juan Felipe Herrera

This collection of poems, touching on identity, politics, and more, from a unique American writer, has elicited accolades from many, including Luis Alberto Urrea and Benjamin Alire Sáenz.

**Economic Policy and Stabilization in Latin America**

by Nader Nazmi

This book provides a detailed analysis of economic policy in Latin America with particular attention devoted to the problem of controlling inflation and stabilization.

**Batos, Bolillos, Pochos, and Pelados: Class and Culture on the South Texas Border**

by Chad Richardson

This book offers a full portrait of the people of the South Texas borderlands. It uses the voices of several hundred Valley residents, backed by the findings of sociological surveys, to describe the lives of migrant workers, colonia residents, undocumented domestic servants, maquila workers, a Mexican street children.

**Where's the Learning in Service-Learning?**

by Janet Eyster and Dwight E. Giles, Jr.

As academic service-learning continues to grow rapidly, practitioners are discovering a pressing need for solid empirical research about learning outcomes. This timely volume explores service-learning as a valid learning activity.

**Faculty in New Jobs: A Guide to Settling in, Becoming Established, and Building Institutional Support**

by Robert J. Menges and Associates

Drawing on a study from the National Center on Postsecondary Teaching, Learning, and Assessment, this book offers practical, real-world advice covering all phases of the faculty career—from the difficult early process of tilling in, to becoming socially and academically established, to ultimately building institutional support necessary for a successful career.

**Centering Woman: Gender Discourses in Caribbean Slave Society**

by Hilary McD Beckles

Caribbean women are assembled in
book, which examines their battles against male domination and among themselves for social advantage. Females challenged each other for monopoly access to and use of terms such as “woman” and “feminine,” in the process widening the existing social and ethnic divisions among themselves, and thus fragmenting their collective search for autonomy.

Women in Latin America and the Caribbean: Restoring Women to History

by Marysa Navarro and Virginia Sánchez Korrol

In this book, Marysa Navarro examines the role of women and gender ideology during the pre-contact and colonial periods; she looks at both early indigenous societies and the Spanish and the Portuguese who claimed the “New World.” Virginia Sánchez Korrol views the changing roles of women in Latin America and the Caribbean from the early decades of the 19th century to the present.

Edgewalkers: Defusing Cultural Boundaries on the New Global Frontier

by Nina Boyd Krebs

Edgewalkers are people like pro-golfer Tiger Woods and U.S. Congresswoman Loretta Sanchez, people-heroes—who stay true to their particular cultural or spiritual tradition and also engage in mainstream life in their societies across the globe. They “dance in between,” bridge cultural gaps, and maintain their uniqueness.

Edgewalkers embrace cultural complexity rather than emphasize one aspect of their cultural makeup at the expense of another.

Música Tejana: The Cultural Economy of Artistic Transformation

by Manuel Peña

This book gives not only a detailed overview of música tejana but also analyzes the social and economic implications of the music. The breadth, depth, and clarity with which Manuel Peña has treated this subject make this a most useful text for those interested in ethnomusicology, folklore, ethnic studies, and Mexican American culture.

Bitter Fruit: The Story of the American Coup in Guatemala

by Stephen Schlesinger and Stephen Kinzer

This new edition, a classic—a fast-paced and highly readable narrative of the overthrow of Guatemala’s democratic government by the United States in 1954—contains updated information, including new essays by John H. Coatsworth, Richard A. Nuccio, and Stephen Kinzer.

Proceed with Caution, When Engaged by Minority Writing in the Americas

by Doris Sommer

Doris Sommer, in a series of daring forays, shows how ethnically marked texts—from 17th-century Inca Garcilaso de la Vega to Julio Cortázar and Mario Vargas Llosa—use enticing and frustrating language games to keep readers engaged.

The Brazil Reader: History, Culture, Politics

Robert M. Levine and John J. Crocetti, eds.

Capturing the scope of Brazil’s rich diversity and distinction—with over a hundred entries from a wealth of perspectives—this book offers a fascinating guide to Brazilian life, culture, and history.

Construyendo Fuentes (Building Bridges): Concepts and Models for Service-Learning in Spanish

Josef Hellebrandt and Lucía T. Varona, eds.

The editors of this new book—from the American Association for Higher Education’s (AAHE’s) Series on Service-Learning in the Disciplines—in reviewing what Spanish teachers have accomplished and what theory informs us, have compiled a series of suggestions to help students and teachers connect with communities in order to facilitate learning with each other rather than about each other.

1790. 416 pgs. ISBN# 1-565—0224-0. $28.50 paper. AAHE. (202) 293-64-60 ext. 70.

CORRECTION

In the 09/10/99 issue, it was mistakenly reported that Dr. Luis S. Gomez, president of Crafton Hills College (Calif.), had retired as of July 1999. In fact, while his letter of resignation was accepted by the board, it does not become effective until July of 2000. We regret the error.

ANNOUNCEMENT

California State University–Monterey Bay

"Dr. Cordero de Noriega has recently been appointed interim Provost and Vice President for Academic Affairs at California State University, Monterey Bay. Dr. Cordero de Noriega spent 18 years at California State University Sacramento as a member of the faculty and most recently as Dean of the College of Education. Her academic discipline is in Bilingual Multicultural Education, specifically language and literacy."

by Francisco Soto

In the field of Latin American literary criticism, the study of lesbian and gay themes in literature is a very recent phenomenon. David William Foster's book, Gay and Lesbian Themes in Latin American Writing, for example, published by the University of Texas Press in 1991, was the first book-length study to explore gay and lesbian literary themes originating from an area of the world traditionally known for its machismo, heterosexism, and homophobia. Since its publication, there has been a gradual and steady increase in the number of articles and books exploring this topic in Latin American letters. To date, Elena M. Martínez's pioneering book, Lesbian Voices from Latin America: Breaking Ground, is the most significant study of its kind for being the first to analyze the articulation of a lesbian sensibility in the works of five contemporary Latin American women writers.

The book studies the work of writers who have taken lesbian desire and sexuality from its traditional private space of silence and concealment and have brought it into a public/ literary space, thus acknowledging its existence. Instead of attempting to write an all-inclusive book examining all the works in Latin American letters that contain lesbian themes as a rather monosyllabic and unruly task, to say the least, Martínez has wisely chosen to concentrate her efforts on writers whose works privilege a lesbian perspective. By concentrating her efforts, Martínez provides the reader with clear, well-organized critical analyses of particular works instead of presenting a hodgepodge of plot summaries and themes, the standard fare of so-called all-inclusive examinations.

The writers studied are: the exiled Cuban poet Magaly Alabau; the late Mexican poet, playwright, and theater director Nancy Cárdenas; the renowned Argentine critic and novelist Silvia Molloy; Mexican poet and feminist leader Rosamaria Roffiel; and Puerto Rican poet and academic Luz María Umpierre. These writers indeed frame their respective works within a double marginality: as women and as lesbians, they break with the patriarchal view that has insisted upon seeing female sexuality exclusively as a function of reproduction. This heterogeneous group of writers offers the reader a good sample of lesbian literature being produced by Latin American women living in the United States (as is the case with Alabau, Molloy, and Umpierre) and living in Latin America (Cárdenas and Roffiel).

A detailed introductory chapter presents a concise overview of other Latin American works that contain lesbian perspectives and themes but are not considered in Dr. Martínez's book. Here one can find a very helpful summary. The introduction also addresses theoretical issues such as the meaning of the term "Latin American Lesbian Literature": the apparent unavailability of Latin American lesbian texts; how the Latin American literary canon has suppressed lesbian literary expressions; the political implications of a lesbian discourse; the specificity of lesbian eroticism as well as a review of the criticism that has already, albeit in a limited fashion, addressed these issues.

The introduction is followed by five chapters, each closely examining the works of the five women writers. Chapter one, "The Poetics of Space and the Politics of Lesbian Exile," presents a comparative study of the representation of private/public spaces in Magaly Alabau's poetry and Silvia Molloy's novel Certificate of Absence. The representation of interior and exterior spaces in these works articulates the marginal social position of lesbian subjects in society. The representation of space in the works of these two writers serves a poetic function as well as an ideological and political value for the theme of lesbianism in Latin American letters. While Martínez focuses on Magaly Alabau's poetry and Silvia Molloy's novel, she also draws parallels to Nancy Cárdenas's poetry and Rosamaria Roffiel's novel and poetry.

The second chapter, "Re-reading Tradition," is dedicated exclusively to the study of eroticism in Magaly Alabau's two collections of poetry, Electra/Gliamnestra (1986) and Hermana/Sister (1989). Here Martínez carefully studies the sexual representation of sexual love and emotional intimacy in the lesbian relationships presented in Alabau's two collections.

The third chapter, "Privileging Lesbian Eroticism," examines the representation of love among women in the works of Rosamaria Roffiel and Nancy Cárdenas. For both writers, reclaiming love and lesbian sexuality are presented as political acts that empower women and challenge their traditional positioning in society.

The fourth chapter, "Lesbian Eroticism and the Act of Writing," examines the relationship of lesbian love, violence, and writing in Sylvia Molloy's acclaimed novel Certificate of Absence. Here Martínez explores the interesting connection between lesbian love and sexuality as a source of literary inspiration.

Chapter five, "Sexual and Political Affirmation," studies the theme of sexuality as one of political affirmation bound to the Latina perspective in the poetry of Puerto Rican writer Luz María Umpierre.

Martínez has performed a ground-breaking task in writing Lesbian Voices from Latin America. She has laid the foundation upon which other Latin American scholars can continue to examine and analyze a body of discourse that presents lesbian themes and motifs.

Francisco Soto, Ph.D., is associate professor of Spanish and Latin American Literature at the College of Staten Island (City University of New York). He is the author of three books on the celebrated Cuban novelist Reinaldo Arenas, the last of which, titled Reinaldo Arenas, was published by Twainy Publishers in 1998. His articles on Latin American literature have appeared in various academic journals in the United States and abroad.

Cornell Law
Creating Opportunities Since 1887

Cornell University's founders started with what was, at the time, a radical concept:

"First, to secure a place where the most highly priced instruction may be afforded to all—regardless of sex or color."

Today, Cornell Law is proud to continue this tradition of diversity and opportunity. Students of color not only attend, they thrive—assuming leadership roles in the classroom, on the journals, and in student organizations.

Find out why we're the top choice of so many

Faculty Recruitment Program

Loyola College in Maryland is actively seeking to increase in number of faculty of color through the following two programs:

TEACHING FELLOWSHIP - one to two year Teaching Fellowships for African American, Asian American, Native American, Spanish-speaking, and other students who have completed all degree requirements, except the dissertation. Teaching Fellows receive a stipend of $8,000, health benefits, office space, library and computer privileges, and an annual stipend of $8,000. Fellows are expected to teach two to three courses per year and complete a dissertation. Upon successful completion of the fellowship, Teaching Fellows are eligible for tenure-track positions.

VITA BANK - a Faculty of Color Vita Bank for individuals interested in tenure positions. The following departments are currently conducting searches for tenure positions: Economics, Education, General Business, Marketing, Psychology, Fine Arts, and Theology. In addition, these and all other departments participate in the College's Vita Bank. For more information, contact the Office of the Dean of Faculty Development and Diversity in the Office of the Provost. The Vita Bank is open to all disciplines other than those currently being searched and is open to all disciplines other than those currently enrolled in faculty development and diversity programs. Loyola has a strong commitment to diversity, including a strong support for the recruitment and retention of faculty from all backgrounds, and is open to all disciplines. Loyola is committed to diversity and inclusion. Loyola has a strong commitment to diversity, including a strong support for the recruitment and retention of faculty from all backgrounds, and is open to all disciplines. Loyola is committed to diversity and inclusion. Loyola is committed to diversity and inclusion.

UNIVERSITY OF CALIFORNIA, BERKELEY
Chancellor’s
Postdoctoral Fellowship Program for
Academic Diversity

The Program: The Chancellor’s Postdoctoral Fellowship Program for Academic Diversity was established to increase the number of ethnic minority faculty members at the University of California at Berkeley. The program provides postdoctoral fellowships, research opportunities, mentoring and guidance in preparation for academic career advancement. The program currently solicits applications from individuals who are members of ethnic minority groups that are underrepresented in American universities, but all qualified applicants will be considered without regard to race, gender, color, or national origin. Special consideration will be given to applicants committed to careers in university research and teaching, and whose life experience, research or employment background will contribute significantly to academic diversity and excellence at the Berkeley campus.

Awards and Tenure: Awards will be made to applicants who show promise for tenure-track appointments on the Berkeley campus. The Fellowship will be for two academic years, in residence in the Bay Area.

Stipend: $31,000 for the 2000-2001 academic year (11 months plus one month vacation). Costs associated with one-way transportation to Berkeley for the Fellow and immediate family members and removal expenses are reimbursable up to $2,000. Funds are available each year for supplies and expenses ($500), research-related expenses ($1,000), and health insurance ($1,000).

Eligibility: Applicants must be U.S. citizens or permanent residents and must have received a doctorate within four years of the start of the appointment on September 1, 2000.

Application: As application form is not required. Send two copies of the following: curriculum vitae, a statement of proposed research (one to five pages), sample publications, and one dissertation chapter. In addition, three letters of reference are required. One letter must be from the dissertation advisor. A mentor need not be selected prior to applying. Application materials must be postmarked by December 1, 1999.

Awards will be announced in March. Inquiries regarding the program may be directed to: 510-642-1935 or email bridge3@uclink4.berkeley.edu.

Send application materials to:

PRESIDENT

The Bucknell University Board of Trustees announces a nationwide search to recruit the fifteenth President of the University.

Founded in 1846, Bucknell University is a highly selective, primarily undergraduate institution offering a broad curriculum of studies in the humanities, social sciences, and natural sciences, as well as professional studies in engineering, education, and management. Located on a beautiful 400-acre campus in Lewisburg, Pennsylvania, Bucknell enrolls 3,250 undergraduate students. The University's endowment is $400 million.

The President is the chief operating officer, and reports directly to the Board of Trustees. The President is expected to uphold the special qualities and traditions of Bucknell and lead the University to new levels of academic excellence in the next century.

Review of candidate materials will begin immediately. All responses will be held in confidence. Nominations and expressions of personal interest should be sent to:

R. William (Bill) Funk
Education Practice Managing Director
Korn/Ferry International
500 N. Akard
3232 Lincoln Plaza
Dallas, Texas 75201
(Fax: 214/954-1849)

Bucknell University is an equal opportunity affirmative action employer.

Senior Director, Research

McREL, Denver, CO

For the doctorate-level educational researcher with senior experience directing applied research, policy studies and R&D projects, who wants to see good work utilized. Mid-continent Research for Education and Learning (McREL) seeks its first cabinet-level Research Director to build an applied research program that informs systemic reform and teaching practice (and McREL's consulting and new product development) especially in curriculum, learning, and instruction. Strong research design, analytic, and management skills, a faculty with teams, and a record of quality contract work and scholarly publications are required. So is experience preparing successful grant and contract proposals to support and extend emerging research.

Salary $85K+; excellent benefits package. McREL is an EEO/AA Employer. People from diverse racial, ethnic, and cultural backgrounds are encouraged to apply.

Suggestions or a resume and letter to:
Ned Rightor, MCCCX, 111 Fairfield Street,
Needham, MA 02492/Fax 781-449-3112.

The university is an equal opportunity, affirmative action employer.

Further information about the university's faculty openings can be obtained on the university's Web site at http://www-hrs.csun.edu/employment.
Montclair State University • Openings • Fall 2000

Founded in 1908, Montclair State University was awarded university status by the state of New Jersey in 1994. As the second largest university in New Jersey — with approximately 13,500 students, undergraduate and graduate — Montclair State is a comprehensive institution characterized by a cadre of teacher-scholars committed to teaching excellence, program diversity and student access.

Montclair State University is organized into the following colleges and schools: College of Education and Human Services, College of Humanities and Social Sciences, College of Science and Mathematics, School of the Arts, School of Business and the Graduate School. Montclair State awards the following degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science, Master of Arts, Master of Arts in Teaching, Master of Business Administration and Master of Education and applied Doctoral degrees.

All positions Assistant Professor, tenure track, unless otherwise noted and are subject to available funding. Screening begins immediately and continues until position is filled.

*Selected appointments negotiable to higher rank depending on qualifications.

COLLEGE OF EDUCATION AND HUMAN SERVICES

Counselling, Human Development and Educational Leadership. (V-1) Teach in graduate programs in counselling theories/techniques, group dynamics, multicultural counseling, and addiction studies. Primary focus in the area of addiction studies as related to school, agency, higher education, and individual/family counseling. Earned doctorate in Counseling, Psychology, Education or related Human Service field. Five (5) years of experience in teaching/counseling.

Curriculum and Teaching. (V-12) Specialist in teacher education. Teach undergraduate and graduate courses, including field based courses, and advise and supervise students in one of the nation's premier teacher education programs. Assignment includes work in public schools through the Center of Pedagogy and the New Jersey Network for Educational Renewal. Doctorate in Curriculum and Teaching or related discipline and successful public school teaching required.

Health Professions, Physical Education, Recreation and Leisure Studies. (V-2) Teach courses in the area of athletic training and provide leadership in attaining the National Athletic Training Association’s accreditation for the University. Teach undergraduate individual and dual sport or team sport skill courses within the physical education program. Doctorate required in physical education or related field. National Athletic Training Association certification required as well as evidence of teaching at the college or university level. (V-4) Recreation Professions specialist within the leisure services industry. Teach in the core which includes courses in management, budget and finance, marketing, and research. Must be knowledgeable in the area of commercial recreation and tourism/hospitality. Doctorate required in recreation, tourism, hospitality, or related field.

Human Ecology – Three positions. (V-4) Teach courses in Consumer Studies, Personal and Family Management, and Family/Consumer Law at the undergraduate and graduate levels. Advise and supervise students in internships and cooperative education placements. Doctorate in Consumer Studies, Home Economics, Family and Consumer Studies, or related field. Evidence of familiarity with core principles of Human Ecology, Home Economics, Family & Consumer Sciences. College/University teaching and evidence of research and publications preferred. (V-5) Teach undergraduate and graduate courses in Food and Nutrition and Dietetics. Contribute to the ongoing development of the undergraduate and graduate curricula. Doctorate in Food and Nutrition or related field. Knowledge of culturally diverse populations and international issues in nutrition, food science, and dietetics is desirable. Registered Dietitian and at least one degree in Home Economics, Human Ecology/Family and Consumer Studies is preferred. (V-6) Specialist in early childhood education. Participate in CDA training and certification program. Candidates with expertise in life span development, family and interpersonal dynamics will be given preference. Doctorate required (or near completion). At least one degree in education and one of the following: a degree in Home Economics/Human Ecology/Family and Consumer Sciences, experience in a Home Economics/Human Ecology/Family and Consumer Sciences Program, or evidence of familiarity with core principles of Human Ecology. Evidence of a commitment to education for social justice, democratic practice, critical thinking, and a diverse society.

For a complete job description on these positions, please contact Leslie E. Jenkins, Assistant Dean, College of Education and Human Services.
COLLEGE OF SCIENCE AND MATHEMATICS

Biology and Molecular Biology. (V-17) Biology/science education, Ph.D. or Ed.D. with graduate level courses in biology, research in science teacher education and teaching experience required. Teach MS courses in biology science education, and introductory biology courses. Contribute to future doctoral program for K-12 teachers. Pursue successful research/scholarship activities in science pedagogy. Desire experience in supervising science education research.

Chemistry and Biochemistry – Two positions. (V-18) Science Education, Ph.D. or Ed.D in Chemical Education or Chemistry with a strong background in and expertise in science education. Duties involve teaching general/specialty undergraduate courses and graduate level science education courses, contribution for development of a doctoral program in science education for K-12 teachers, and establishment of successful research and grant activity in science pedagogy. Desire experience in supervising science education research. (V-19) Margaret and Herman Sokol Chair in Chemistry for an early career scientist. Must demonstrate uncommon promise of engaging in a rigorous research program and making lasting contributions in the applications of Chemistry to living systems. The Chair must demonstrate a deep commitment to teaching and mentoring students and to supporting their development as scholars. Appointment to the chair will be for a five-year term, dependent upon maintenance of good standing in the faculty appointment, and may be renewable.

Computer Science. (V-20) Specialization in Software Engineering with experience in modern architectures (RISC), Informatics, or Human-Computer Communication. Experience with object-oriented environments including C++ or Java. Ph.D. in Computer Science or closely related field. Establishment of successful research/teaching/grant activity.

Earth and Environmental Studies. (V-21) Ph.D. in an appropriate field with research and teaching expertise in one of the following areas: coastal and estuarine environmental management; waste and pollution management and policy; environmental remediation and/or environmental geology. Excellence in teaching, the pursuit of a funded research program and contribution to the development of an environmental management doctoral program is expected.

Mathematical Sciences – Two positions. (V-22) Pure and Applied Mathematics. Research interests in the following areas: mathematical biology, operations research, optimization, number theory, cryptography, and game theory. Must have a strong commitment to teaching undergraduate and graduate courses in mathematics and applied mathematics, research and the pursuit of grants. Ph.D. in Mathematics or Applied Mathematics required. (V-23) Mathematics Education. Teach undergraduate mathematics and mathematics education courses, and graduate mathematics education courses at the master's and Ed.D. level. Desire experience in supervising mathematics education research. Required to be professionally active, committed to quality teaching and the pursuit of grants. Ph.D. or Ed.D. with some teaching experience and related research interests in grades K-12 and a strong background in mathematics at least through the master’s level required.

For a complete job description on these positions, please contact Joseph Maina, Assistant Dean, College of Science and Mathematics.

SCHOOL OF THE ARTS

Music. (V-24) Music theory for teaching undergraduate and graduate courses. Secondary areas for this position may include, but are not limited to: music technology, composition, secondary piano, ethnomusicology. Doctorate in music required.

Speech Communication – Two positions. (V-29) Communication Arts Graduate Program. Teach graduate and undergraduate courses. Earned doctorate in Communication areas of: Theory, Public Presentation, Human, Organizational, Interpersonal, or a related Communication field. At least three years teaching experience on graduate level. (V-28) Teach undergraduate and graduate courses. Earned doctorate in Communication areas of: Speech, Theory, Organizational, Interpersonal, or related Communication field. Five years experience in teaching.

Theatre and Dance. (V-27) Technical director to teach undergraduate introductory and advanced courses in technical theatre and supervise productions and facilities for theatre and dance programs. Possibility of lighting and sound design assignments. M.F.A. or equivalent Production/Design or Theatre Technology required.

For a complete job description on these positions, please contact F. Sharps, Assistant Dean, School of the Arts.

SCHOOL OF BUSINESS

Accounting – Two positions. (V-28) Teach all levels of account both the undergraduate and graduate level with specific emphasis: Managerial Accounting, Ph.D. in Accounting, ABD, or C.P.A. req. The School of Business offers a Bachelor of Science and a Master Business Administration degree with a concentration in Accounting. School is offering a Master of Science degree in Accounting in academic year 1999-2000.

Information and Decision Sciences. (V-32) Teach all level Quantitative Methods in Business and Management Information Systems in both undergraduate and graduate programs. Applicants should have strong record of publications and must have a demonstrated commitment to excellence in teaching. A Ph.D. in Business Administration is required with a major in Business Statistics, Quantitative Methods, Operations Management, Information Systems, or a related field.

Management – Two positions. (V-33) Teach Business Policing/Emergency/Small Business Management courses at both undergraduate and graduate level. A Ph.D. or D.B.A. required. The School of Business offers a Bachelor of Science and a Master of Business Administration degrees with a concentration in Management.

Marketing. (V-35) Marketing generalist with the ability and willingness to teach a wide variety of courses (Consumer Behavior, Retail Advertising, Web-based Marketing, and Marketing Research) at both undergraduate and MBA levels. A Ph.D. in Marketing is required. Preference given to candidates with teaching experience and a record of a commitment to excellence in teaching and research is highly desired.

Candidates evaluated regarding their capacity to help advance Strategic Charter of the 5555, as outlined on our website: www.montclair.edu/pages/business/about.html

For a complete job description on these positions, please contact F. Sharps, Assistant Dean, School of Business.

ADJUNCTS

(AV-001) Applicant pool for Fall 2000, Spring 2001: Montclair State University has a long history of commitment to cultural diversity programs, faculty and students. To foster this multicultural environment the University encourages applications from minority group members and faculty openings.

Complete job descriptions will be mailed upon receipt of applicants. Submit a letter of interest, including job title and the position’s V- or AV- number.

Montclair State University
Box C315 – V-# or AV-# / HOHE
Upper Montclair, New Jersey 07043

An Equal Opportunity/Affirmative Action Institution.
Assistant Professor of Social Studies Education

DUTIES: Teach undergraduate and graduate methods courses in social studies education and introductory survey courses on diversity in education, advise students, and supervise related field experiences. TERMS: Nine-month, tenure-track position to begin August 21, 2000. MINIMUM QUALIFICATIONS: Earned doctorate in social education or related field, with evidence of scholarly activity, potential for teaching and research, and evidence of high-quality, peer-reviewed publications in social education. Evidence of ability to work with diverse populations. Evidence of commitment to teaching excellence. Evidence of commitment to the use of technology and distance learning in instructional delivery. SEARCH COMMITTEE: Please address all correspondence regarding this opening to the Social Studies Education Search Committee.

Assistant Professor of Urban & Middle Childhood Teacher Education

DUTIES: Teach courses in urban and middle childhood education, and supervise student teaching experiences. TERMS: Nine-month, tenure-track position to begin August 21, 2000. Evidence of scholarly activity, potential for teaching and research, and evidence of high-quality, peer-reviewed publications in urban and middle childhood education. Evidence of commitment to teaching excellence. Evidence of commitment to the use of technology and distance learning in instructional delivery. SEARCH COMMITTEE: Please address all correspondence regarding this opening to the Urban & Middle Childhood Teacher Education Search Committee.

Assistant/Associate Professor of Reading & Language Arts Education

FOUR OPENINGS AVAILABLE. DUTIES: Teach graduate and undergraduate courses in reading, language arts, and related fields, advise students, and supervise related field experiences. TERMS: Nine-month, tenure-track position to begin August 21, 2000. MINIMUM QUALIFICATIONS: Earned doctorate in literacy education or related field, with evidence of scholarly activity and potential for teaching and research, and evidence of high-quality, peer-reviewed publications in literacy education. Evidence of commitment to teaching excellence. Evidence of commitment to the use of technology and distance learning in instructional delivery. SEARCH COMMITTEE: Please address all correspondence regarding these openings to the Reading/Language Arts Search Committee.
The University of Southern California is inviting applications and nominations for the position of Dean of the Law School. The University is located in Los Angeles and is one of the nation’s premier private research universities. USC Law School was the first law school established in the southwestern United States, and is now a national law school serving a student body drawn from over 100 undergraduate institutions distributed throughout the nation. It is one of the preeminent law schools in California, and is typically rated among the top 15 or 20 in the country.

USC Law School is relatively small, with an average class size of approximately 200 students and a total enrollment of 600. It has approximately 35 full-time faculty, many of whom have advanced degrees or training in other disciplines in addition to law and are recognized nationally as experts in their respective fields. The Law School’s endowment is among the ten largest for private American law schools. The Law School’s primary mission is facilitating the production of quality scholarship by its faculty, and training students for the bar, bench and other pursuits to which knowledge about law and the legal system is relevant.

The Dean of the USC Law School is its academic leader and chief administrative officer, and reports directly to the Provost of the University. The responsibilities of the job include: leading the recruitment, development and retention of talented faculty; promoting excellence in the School’s educational and scholarly functions; planning and managing fiscal matters; leading the School’s fundraising efforts; and maintaining supportive relationships with alumni and other members of the local bar and bench.

Nominations and applications should be sent to: Randolph Westerfield, Search Committee Chair, c/o Office of the Provost, University of Southern California, Bovard Administration Building, Room 202 - MC 4019, Los Angeles, CA 90089-0410. Applications should include: a letter describing the candidate’s qualifications for this position; a curriculum vitae; and names, addresses and telephone numbers of three references. Questions may be directed to Bill Strippoli, Director of Information Resources, Office of the Provost (213-740-0917, 213-740-1782 (fax), strippol@usc.edu). Review of applications and nominations will begin immediately and will continue until the position is filled.

USC is Proudly Pluralistic and Firmly Committed to Providing Equal Opportunity for Outstanding Men and Women. USC Actively Seeks Nominations of and Applications from Qualified Individuals from the Broadest Possible Community. (AA/EOE)
WHEELOCK COLLEGE FACULTY POSITIONS

The Social Work Programs at Wheelock College seek colleagues who wish to contribute to a newly-developing graduate program, which will focus on preparing social work professionals who are critical thinkers and ethical practitioners, who are committed to human rights and social and economic justice for all persons, who desire to teach approaches and practices which honor people's strengths and culture, and who are family-centered and neighborhood- and community-based, value inter-professional collaboration and empowerment, and seek to affect change in health, education, social services, and mental health systems in partnership with individuals, groups, families, organizations, and communities.

Social Work Practice - Assistant/Associate Professor: Responsibilities: Teach and provide leadership in the development of the MSW practice courses in the foundation and advanced curriculum, and work in partnership with the field coordinator in the development of the field seminars. Minimum qualifications: MSW from an accredited program; earned doctorate in social work; 2 years' post-MSW practice experience. Desirable qualifications: Ability/experience teaching an advanced generalist approach, interest/experience in teaching BSW students; advising and/or field liaison experience; a demonstrated commitment to diversity; inter-professional education and practice experience; ability to teach in another curriculum area such as research, human behavior, or social welfare policy/practice; ability to teach about diversity, oppression, human rights and social and economic justice; developing research agenda consistent with the vision of the social work at Wheelock, publications and grant writing experience with CSWE accreditation.

Research/Human Behavior - Assistant/Associate Professor: Responsibilities: Teach and provide leadership in the development of research and/or human behavior curriculum at the MSW level; provide leadership in the development of research options for BSW and MSW students. Minimum qualifications: MSW from an accredited program and earned doctorate in social work or closely related field. Desirable qualifications: Earned doctorate in social work preferred; experience teaching quantitative and qualitative research at the BSW or MSW level; experience teaching in another substantive curriculum area; demonstrated commitment to diversity, experience involving students in research; developing research agenda consistent with the vision of the social work at Wheelock, publications and grant writing experience with CSWE accreditation.

Coordinator of Field Instruction - Instructor/Lecturer: This is a 12-month, non-tenure-track position with an initial appointment for 3 years. Responsibilities: Development and coordination of the BSW and MSW field practicum curricula. Minimum qualifications: MSW from an accredited program and 3 years of practice experience; experience as a field instructor. Demonstrated commitment to the social work profession and to diversity; excellent written and oral communication, ability to articulate the mission of Wheelock's social work programs. Desirable qualifications: 5 years' post-MSW experience; inter-professional education and practice experience; evidence of organizational and administrative skills; ability to work collaboratively; with a variety of community professionals; BSW and MSW teaching experience in an urban, multicultural environment; grant writing, experience with CSWE accreditation

Submit cover letter describing your interest and qualifications for the position, a curriculum vitae, writing samples, and the names, addresses, and telephone numbers of 3 references to: Kathleen Kirk Bishop, MSW, DSW, Professor and Dean, Social Work Programs, Wheelock College, 200 The Riverway, Boston, MA 02215-4176; e-mail: kbishop@wheelock.edu. Review of applications will begin immediately, and positions will remain open until filled.

Wheelock College is an Equal Opportunity/Affirmative Action Employer and a member of the Colleges of the Fenway consortium.

EEO/AA
Website - http://www.mankato.mnsu.edu
Applications are invited for tenure-track positions. These positions are at the assistant, associate, or full professor level depending on experience. Applicants should have a Ph.D. in computer science or a closely related field. The department requires demonstrated research accomplishments at the highest level as well as outstanding teaching ability and leadership qualities.

The Department of Computer Science at Cornell University encompasses a wide range of research areas, including artificial intelligence, concurrency and distributed computing, databases, algorithms, information organization and retrieval, multimedia systems, applied logic and semantics, numerical analysis and scientific computing, theory of computation, programming languages and methodology, computer vision, computational biology, graphics, theory, networks, operating systems, and natural language processing.

We are especially interested in networks, databases, digital libraries, graphics, systems, and computational biology. Applicants in all areas of computer science will be considered.

**TENURE-TRACK POSITION IN COMPUTATIONAL BIOLOGY, REF: CSB2**

We are seeking applicants at all ranks for an interdisciplinary tenure track position in computational biology. The applicant should have a very strong background in computer science, and should also have a strong background and research interest in computational aspects of biology.

Research may include such topics as development of genomic databases, bioinformatics, and structural biology. We are looking for candidates with outstanding research accomplishments and who are committed to excellence in teaching computer science.

**NON-TENURE TRACK POSITIONS, REF: NTBS**

We are seeking applicants for non-tenure track professorial positions at all levels as well as lecturers and instructors. The primary focus of these positions would be research or teaching. Applicants should have a Ph.D. in computer science or a closely related field, a research program including demonstrated research accomplishments and a commitment to excellence in teaching computer science or a closely related field.

**RESEARCH, REF: RES83**

Also available, research positions in scientific computing and software systems.

Funding information about the department is available on the World Wide Web at URL: http://www.cs.cornell.edu/

Applicants should submit a vita and the names of at least three references to:

Chair, Faculty Recruiting Committee
Department of Computer Science
4130 Uris Hall
Cornell University
Ithaca, NY 14853-7501

Please include reference number with application.

**ASSISTANT VICE PRESIDENT, INSTITUTIONAL RESEARCH AND PLANNING**

The University of Maryland, College Park in applications and nominations for the position of Assistant Vice President for Institutional Research and Planning. The Assistant Vice President will report directly to the Senior Vice President for Academic Affairs and Provost and will be a member of his staff. The position requires a person with the vision and experience to head a comprehensive unit that provides critical support for decision-making for the President and the Vice Presidents of a major public research university through research, policy analysis, planning, and assessment. The Assistant Vice President will also be charged with the responsibility of identifying trends and circumstances that affect the development of higher education policy. The Assistant Vice President will work with the University's Office of Institutional Support to provide support for initiatives on the office staff. The Assistant Vice President will also be responsible for the preparation of analytical studies and special reports requiring an institutional-wide perspective. The Assistant Vice President will also provide leadership in the coordination of institutional research and planning.

Located in the Washington metropolitan area, the University of Maryland, College Park is the University of Maryland's main campus in the greater Maryland area. It is a leading comprehensive research and graduate university dedicated to the pursuit of excellence in teaching, research, and service to the community, and is formally designated by the state as the flagship institution of the eleven-campus University System of Maryland. The University of Maryland College Park received over $201 million in research support in the 1999 fiscal year. It has 20,000 undergraduate and 8,000 graduate students and 11 schools and colleges.

Required qualifications include leadership and management skills, advanced understanding of analysis techniques and interpretations, strong written and oral communication skills, experience in institutional research and planning, and extraordinary administrative ability to work effectively with senior management. A bachelor's degree is the minimum degree preferred.

The salary is commensurate with experience at $30,000 - $50,000. For best consideration, apply before December 30, 1999. Applications and nominations are accepted at:

Ms. Pauline Robinson
1119 Main Administration
University of Maryland
College Park, MD 20742

The University of Maryland is an equal opportunity employer and women and underrepresented minorities are encouraged to apply.
Teachers College, Columbia University
is building for the next century.

DEAN
COLLEGE OF HUMANITIES AND SOCIAL SCIENCES
(SEARCH CONTINUING)

Montclair State University is a comprehensive public university offering a rich array of programs to approximately 13,000 undergraduate students and post-baccalaureate students. Founded in 1908, the University is organized into three colleges and three schools: College of Education & Human Services, College of Humanities & Social Sciences, College of Science & Mathematics, School of the Arts, School of Business and the Graduate School. Characterized by a distinguished faculty of 450 teacher-scholars, Montclair State offers ten undergraduate degrees in more than 70 majors of study and seven degrees at the master’s and doctoral level in 36 areas of study. The University is located 14 miles west of New York City on a beautiful 200-acre suburban New Jersey campus.

With a faculty of 160 distinguished teacher-scholars and more than 3400 students, the College of Humanities and Social Sciences provides a rich variety of programs leading to the bachelor of arts and master of arts degrees. The College is the largest of the six schools and colleges at Montclair, and it is organized into 15 departments and programs. These are Anthropology; Classics and General Humanities; Communication Sciences and Disorders; English; French, German and Russian; History; Legal Studies; Linguistics; Philosophy and Religion; Political Science; Psychology; Sociology; Spanish and Italian; and several interdisciplinary programs including African-American Studies, Women’s Studies, and Latin American and Latino Studies. The College is home to a number of other programs including the Psychoeducational Center, the Institute for the Advancement of Philosophy for Children, the Center for Archaeological Studies and the Humanities Institute. The College has successfully combined a traditional focus on liberal education with programs at both the undergraduate and graduate level that fulfill specific career objectives.

The dean, who is appointed by the president and reports to the provost/vice president for Academic Affairs, serves as the chief academic and administrative officer of the College. The dean will be regarded as an intellectual leader not only within the College, but across the campus and within the community as well. She/he will have the vision to identify and pursue new opportunities for the College and the intellectual strength to direct its growth and development within the framework of shared academic governance. The dean will be responsible for the administrative and fiscal management of the College, with special attention to the recruiting and development of faculty. She/he will be responsible for effectively representing the College to the campus, alumni and external communities, and provide leadership in the pursuit of the external resources required to augment State appropriations. The dean will be a key member of the University’s core leadership and will be imaginative in finding ways to advance the goals and objectives of both the College and the University, and fostering collaborations across the campus.

QUALIFICATIONS: Each candidate should possess an earned doctorate and a record of distinguished academic achievement appropriate for appointment at the rank of full professor in a department of the College. In addition, she/he should possess:

- a commitment to excellence in teaching/learning, scholarship and the application of knowledge
- a record of successful administration in higher education and a broad understanding of the trends in higher education
- a demonstrated record in the acquisition of external resources
- a thorough understanding of curricular needs in the humanities and social sciences
- experience with instruction utilizing information technology and electronic access to information
- the ability to foster a collegial, collaborative work environment
- a commitment to maintaining and extending student and faculty diversity
- familiarity with a collective bargaining environment
- strong interpersonal communication and listening skills

SALARY: Dependent upon qualifications

SEND LETTER AND RESUME TO: Dr. Kay Wilkins, Chair, Search Committee
MONTCLAIR STATE UNIVERSITY
Box C316-V4036/HO
Upper Montclair, NJ 07043

APPLY BY: Review of applications for the Dean of Humanities and Social Science will continue until the position is filled. The anticipated starting date will be July 1, 2000.

An Equal Opportunity/Affirmative Action Institution
Bates College
Organic Chemistry

The Department of Chemistry at Bates College (www.bates.edu) a selective liberal arts college of 1,600 students, invites applications for a tenure-track position in Organic Chemistry at the assistant professor level, to begin in September of 2000. The teaching expectations include a two-semester organic chemistry course with laboratory and at least one additional course in an area of interest to the successful applicant. This position also supports our interdisciplinary programs in biological chemistry and neuroscience and provides opportunities to participate in other interdisciplinary programs as well. The applicant will be expected to develop a research program that will involve undergraduates. Major departmental equipment holdings for teaching and research include: 300 MHz NMR, EPR, FT-IR, ICP, GC-MS and UV-Vis spectrometers, as well as HPLCs, ultracentrifuges, IBM work stations (with SPARTAN software) and a Coherent YAG-pumped dye laser. A Ph.D. is required, but postdoctoral experience is desirable. Review of applications begins November 8, 1999, and will continue until the position is filled. Email inquiries may be directed to tlawson@bates.edu. Applicants should send a CV, undergraduate and graduate transcripts, brief statements of teaching philosophy and research interests, and three letters of recommendation to:

Professor T. Glen Lawson, Chair
Chemistry Search Committee
C/o Secretarial Services
Bates College

Lewiston, ME 04240

Bates College values a diverse college community and seeks to assure equal opportunity through a continuing and effective Affirmative Action Program.

ASSISTANT DEAN FOR ADMISSIONS

INDIANA UNIVERSITY
SCHOOL OF LAW-BLOOMINGTON

Indian University School of Law-Bloomington is searching for an Assistant Dean for Admissions. This is a full-time administrative position with responsibility for all aspects of admissions at Indiana University School of Law-Bloomington, including marketing, recruiting, and financial aid. The position includes designing and implementing strategic plans for recruitment, collecting and analyzing statistical data to meet enrollment targets, interviewing and counseling prospective students, developing and implementing outreach programs for traditionally-underrepresented law school groups, evaluating applications, making admissions decisions, planning special events on campus for prospective applicants and students, working closely with faculty committees, developing and administering the budgets for admissions and supervising the Admissions Office.

Applicants should have a J.D. degree and some experience in law school admissions, or a strong background in law school admissions, administration, and management. Desired qualities include a commitment to student services and success in development of recruitment programs. The position demands excellent oral and written communication skills, the ability to work effectively with students, faculty, and staff, and the ability to communicate the strengths and values of the Law School. The position requires travel.

Applications will be reviewed on a rolling basis until the position is filled. Address employment target date of the spring of 2000. Salary commensurate with candidate's background and experience.

Send letter of application and resume to Patricia Clark, Search and Screen Committee, Indiana University School of Law, 211 S. Indiana Avenue, Bloomington, IN 47405-7001.
GOVERNORS STATE UNIVERSITY

Governors State University is an upper-division and graduate level institution in the State of Illinois, serving over 9,000 students annually in the Colleges of Arts and Sciences, Business and Public Administration, Education and Health Professions. The university’s main campus is located in University Park, approximately 35 miles south of the University of Illinois. The university’s primary mission is teaching and providing quality education to its culturally and economically diverse, lifelong learners. We are currently seeking to fill following vacancies; nominations and applications should be forwarded to the respective search committee.

DIRECTOR OF TECHNICAL SERVICES

This position combines hands-on technical expertise and administrative duties. The director will supervise, coordinate, and direct the delivery of computing and network services to the entire university community. The successful candidate will oversee standards and procedures to ensure proper use, security and administration of network. Qualifications: Bachelor’s degree or degree-seeking required, with appropriate certifications; demonstrated supervisory experience; minimum of four years experience in an end user support area working with networks and microcomputers; knowledge of design and installation of LAN/WAN technologies, including Unix, Novell, and Micro Knowledge of SUN Solaris architecture; and the ability to provide hands-on management of local area networks to ensure effective operation, reliability and integrity. The position is available immediately, with resumes being accepted through November 12, 1999. To apply candidates should send a letter of interest addressing qualifications and three professional references to: c/o Karyn Purvis, Information Technology Services, e-mail: k-purvis@govst.edu.

UNIVERSITY PROFESSOR OF ART

The successful candidate will teach undergraduate and graduate courses in digital 2D and 3D illustration, animation, and motion graphics as they pertain to both marketable and creative investigation. In addition, the candidate will teach one lecture/seminar studio course in related topics and manage the university art gallery. Qualifications: M.F. Art, significant exhibition/presentation history, and teaching experience. The position is available May 1, 2000. Review of applications will begin immediately and continue until the position is filled. To apply candidates should send a letter of interest addressing qualifications; a current vita; and the names, addresses, and telephone numbers of three references to: c/o Paul Schrader, College of Arts and Sciences.

PROFESSOR OF MEDIA COMMUNICATIONS

The successful candidate will teach undergraduate and graduate courses in media theory/research, print and broadcast journalism/electronic publishing. Qualifications: M.A. 30 hours required, Ph.D. preferred; teaching experience in Journalism, demonstrated record of professional/creative activity; evidence of scholarship in electronic media preferred. The position is available August 1, 2000. Review of applications will begin January 15, 2000, and continue until the position is filled. To apply interested candidates should send a letter of interest addressing qualifications; a current vita; and the names, addresses and telephone numbers of three references to: Michael Purdy, Chairperson, College of Arts and Sciences.

PROFESSOR OF CLINICAL PSYCHOLOGY

Responsibilities will include teaching primarily undergraduate courses in abnormal psychology, theories and treatments, ethics, and personality theories, and occasionally graduate seminar in abnormal psychology. The candidate should have the ability and willingness to engage students in research as well as an interest in helping to develop placement sites. The division has an applied focus. Preference will be given to candidates with a Doctorate in Clinical Psychology. Qualifications: Earned doctorate in Clinical Psychology preferred, ABD accepted, in a closely related area of psychology; evidence of a strong commitment to excellence in teaching undergraduates and graduates; evidence of both an active research program and teaching experience. The position is available August 15, 2000, and will remain open until filled. The review of applications begins January 15, 2000. Applicants should send a letter of interest addressing qualifications, a current vita, three letters of recommendation, and samples of research publica or professional presentations to: Rachel Oriel Berg, Ph.D., Chairperson, Division of Psychology and Counseling.

PROFESSOR OF GENERAL PSYCHOLOGY

Responsibilities will include teaching courses in research methods, undergraduate and graduate statistics, history and systems, and expertise in one or more of the following areas: Social, cognitive, developmental psychology, stress management. We place a high value on teaching experience in the field and research. The division has an applied focus. Preference will be given to candidates with a doctorate in psychology; consideration will be given to ABD candidates. Qualifications: Earned doctorate in Clinical Psych preferred, ABD accepted; a strong commitment to excellence in teaching undergraduates and graduates; evidence of both an active research program and teaching experience. The position is available August 15, 2000, and will remain open until filled. The review of applications will begin January 15, 2000. Applicants should send a letter of interest addressing qualifications, a current vita, three letters of recommendation, and samples of research publications of professional presentations to: Rachel Oriel Berg, P Search Committee Chairperson, Division of Psychology and Counseling.

PROFESSOR OF READING/LANGUAGE ARTS

The successful candidate will teach undergraduate and graduate courses in reading and language arts, advise master’s level theses and projects, and perform appropriate reseach and professional, university and community service. Qualifications: Earned doctorate in reading/language arts education or closely related field; minimum of 3 year elementary, middle school, or high school teaching experience in U.S. Schools; and meet the Board of Education criteria for reading specialists. Preference will be given to candidates whose professional experiences include working as a reading clinician or specialist and teaching in higher education. The position is available August 16, 2000. Review of applications will begin December 1, 1999, and continue until the position is filled. To apply candidates should send a letter of interest addressing qualifications; a current vita; and the names, addresses, and telephone numbers of three references to: C/O Joanne Afinian, Chairperson, College of Education.

PROFESSOR OF LITERATURE AND COMPOSITION

Small and lively program in English (offering the B.A. and M.A.) seeks a colleague to enrich its ranks. While the focus of the tenure-track position will involve various disciplines within American Literature, we seek someone who can adapt to the dynamics of a growing program and who is proud to be a generalist. In addition to having a record of research interests and post secondary teaching experience, the successful candidate will be committed to teaching courses in the core program for majors, teaching writing, and contributing productively to University-wide initiatives in Writing Across the Curriculum. Qualifications: A Ph.D. in English is required by August, 2000. Review of applications begin December 1, 1999, and continue until the position is filled. To apply candidates should send a letter of interest addressing qualifications; a current vita; and the names, addresses, and telephone numbers of four references to: Dr. Rashid J. Muhammad, Chairperson, English Faculty Search, College of Arts and Sciences.

DEAN
GEORGE BUSH SCHOOL OF
GOVERNMENT AND PUBLIC SERVICE

Texas A&M University invites nominations and applications for the position of Dean of the George Bush School of Government and Public Service. This position will provide administrative and academic leadership to develop the teaching, research and public service dimensions appropriate to one of the premier schools in the United States. The School currently offers a Master's in Public Service and Administration and has plans to offer a Master's in International Affairs. The Dean will have the responsibility of recruiting a core faculty. The Dean is expected to play a significant role in formulating the curriculum for the School, in development and external relations, and in establishing an intellect-ual environment and vision for the school.

Candidates for the position should have a record of excellence in scholarly publications, teaching, and service in an area relevant to public policy, management or international affairs. Prior experience in public affairs education is essential; significant experience in the public or private sector is preferred. Academic credentials, including terminal degree, appropriate for appointment as a full professor at Texas A&M are required. Previous academic administrative experience is highly desirable. Applicants should submit a letter of interest and curriculum vitae to:

Professor Howard Kaplan and Professor Condoleezza Rice, Co-Chairs, Dean Recruitment Committee, George Bush School of Government and Public Service, Texas A&M University, College Station, TX 77843-4220.

The committee will begin to review applications on December 1, 1999; however, review of applications will continue until the position is filled.

Texas A&M University strongly encourages applications from women and members of minority groups and is committed to a diverse campus community through Affirmative Action and Equal Opportunity. Please be advised that under Texas law, names and other information concerning applicants or nominees may be subject to disclosure upon request.

For additional information on the position or the School, please contact Professor Kaplan by phone at (409) 845-2411 or by e-mail at h-kaplan@tamu.edu.

USF University of South Florida

The College of Arts and Sciences invites applications for the following positions during recruitment year 1999/2000 for appointments effective August 2000. For specifics about each position, including position qualifications and application requirements, application deadlines and salary information, contact the person identified with the position or see the USF Faculty Vacancy listing at http://ufmbr.usf.edu/ufmbr/vacancy.html. All positions are contingent upon final funding.

The College of Arts and Sciences is a community of scholars dedicated to the idea that educated people are the basis of a just and free society. The College consists of 32 departments/divisions offering 35 master's programs and 13 doctoral programs.

USF is a comprehensive, metropolitan state university, serving more than 34,000 students in nine colleges on four campuses in Tampa, Lakeland, St. Petersburg, and Sarasota. Among the top research universities in the state, USF offers degree programs in 79 undergraduate disciplines, 80 master's and specialists programs, and 20 doctoral programs, including the M.D. The faculty numbers more than 2,000 members.

The University of South Florida is an equal opportunity, affirmative action, equal access institution. For disabilities accommodations information, contact the individual department at least two weeks in advance. According to Florida law applications and nominations regarding these are open to the public.

DEAN OF RELIGIOUS AND SPIRITUAL LIFE

CONNECTICUT COLLEGE, the fourteenth most selective private liberal arts college in the nation, invites applications and nominations for the new position of Dean of Religious and Spiritual Life commencing July, 2000. The College seeks a respected scholar/religious leader to work with the College's religious leaders, faculty, students and staff to develop and expand the College's efforts (1) to meet the religious needs of an increasingly diverse student body and (2) to integrate the religious and spiritual life of the community more fully into the educational mission and programs of the College. Applicants should possess an advanced degree (e.g., Ph.D., Th.D., D.Min.), extensive religious training, and bring to the position leadership skills in the areas of program development and planning, community service, and fund-raising. Although many of the specific activities of the position will be shaped by the Dean, he or she will be responsible for efforts to reach students, especially, outside the traditional chapel walls. In addition, the Dean will be further responsible for coordinating the activities of Herkimer Chapel, assisting the work of interfaith groups, counseling and advising students, and contributing to the intellectual and spiritual life of the campus in ways that will enhance our efforts to integrate the life of the mind, body and spirit.

Review of applications will begin on November 15, 1999. Nominations for this position are encouraged. Candidates should submit the following to the Chair of the Search Committee, Human Resources, Connecticut College, New London, CT 06320: a letter of interest in the position, a resume, four letters of recommendation, and a statement about religious and spiritual life on a liberal arts campus in the next millennium. Located in the historic seaport town of New London, the southeastern Connecticut area offers a rare combination of affordable living and natural, unsupervised beauty with convenient access to Boston and New York City.
BOSTON COLLEGE

Dean
Wallace E. Carroll School of Management

Boston College invites nominations and applications for the position of Dean of the Wallace E. Carroll School of Management. The Carroll School of Management aspires to become internationally recognized for outstanding research and teaching while maintaining a strong commitment to the Jesuit, Catholic mission and heritage of service to society. The School enrolls 2,300 undergraduate and 1,000 graduate students and offers the following degrees: BS, MBA, MS in Finance, and Ph.D. in Management with concentrations in Finance and Organization Studies. These programs combine the best of a classical liberal education with professional education in management practice, and stress sophisticated use of technology, practical experience, teamwork, community service, and ethical practices.

The Carroll School's faculty, students, and staff have created a distinctive community that centers on scholarship, caring, mutual respect, and shared responsibility. Eighty full-time faculty (97 FTEF) are expected to contribute significantly to the advancement of knowledge by publishing in leading journals, and by teaching innovative, relevant courses. In addition, the faculty, students, and staff take pride in their broader commitment to the business community and society through research centers and community volunteer activities.

Founded in 1953, Boston College is ranked among the top 40 national universities in a recent public survey. It is listed among Barron's 52 most competitive undergraduate institutions, and last year enrolled 2,200 freshmen from a pool of 19,700 applicants. The Carroll School has also been ranked as one of the top 40 undergraduate programs in business. Graduate and professional school students numbering 4,500 in Arts and Sciences, Management, Law, Social Work, Education, and Nursing.

Boston College seeks a dean who will promote excellence in teaching, research, and service to society while maintaining the Carroll School's cohesive community. The next dean should possess the vision, leadership, and administrative ability to move the School to the next level of quality in the 21st century and contribute to the University's Jesuit, Catholic tradition. The dean must have a genuine commitment to development and an ability to interact effectively with the business community and other constituencies of the School.

Nominations or applications (accompanied by a curriculum vitae) should be forwarded to:

G. Peter Wilson, Joseph L. Sweeney Chair in Accounting, Bourneuf House, Boston College, Chestnut Hill, MA 02467-5838.

Potential applicants are invited to visit the Boston College web site: www.bc.edu; and Carroll School of Management web site: www.bc.edu/carroll

Review of applications will begin on December 1, 1999 with a view to July 1, 2000 as the starting date for the new dean.

Boston College is an affirmative action, equal opportunity employer. Women and minority group members are encouraged to apply.

BOSTON COLLEGE
A Jesuit Catholic University

ASSISTANT PROFESSOR
MOLECULAR AND ENVIRONMENTAL MICROBIOLOGY
UNIVERSITY OF COLORADO AT BOULDER

The Department of Molecular, Cellular and Developmental Biology (MCDB), and the Cooperative Institute for Research Environmental Sciences (CIRES) at the University of Colorado Boulder seek applicants for a tenure-track faculty position in microbiology. For more information, please visit http://cires.colorado.edu.

Applicants should send a cover letter, curriculum vitae, statements of research interests, and arrange for three letters of recommendation to be sent to: Microbiology Search Committee CIRES, Campus Box 215, Boulder, CO 80309-0215.

The University of Colorado at Boulder is committed to diversity in the academic, administrative, and professional faculty.
Search for the

The City University of New York

The Board of Trustees of the City University of New York and the Presidential Search Committee invite nominations and applications for the position of President of Baruch College.

Established 80 years ago, Baruch is home to the largest collegiate business school in the country, the Zicklin School of Business, the Mildred and George Weissman School of Arts and Sciences, and the School of Public Affairs. Each of the three schools offers undergraduate and graduate degrees; City University's Ph.D. programs in business and industrial/organizational psychology are also housed at Baruch. The business program, which emphasizes a strong liberal arts foundation, is increasingly recognized in national rankings and has produced many of the nation's corporate leaders.

More than 450 full-time and 420 part-time faculty teach at the college, many of them internationally recognized scholars. Baruch enrolls 12,500 undergraduates and 2,500 graduate students, most of whom attend full-time and 85 percent of whom major in a business discipline. Baruch is a mosaic of cultures, with students representing more than 100 ethnic backgrounds and 90 countries.

The college's annual budget is $110 million and its endowment is close to $60 million. Located in the heart of New York's central business district, Baruch is one of 20 campuses of the City University of New York, the nation's largest urban university.

The college seeks a visionary, committed, and influential leader who will guide Baruch into a new era of achievement—a person of distinction, stature and integrity who loves a life of learning. Specific challenges include increasing the level of excellence across all programs, building the school's national reputation, strengthening connections to Manhattan’s business, governmental, and non-profit communities, and further developing Baruch’s active alumni base.

Leading candidates typically will have:

- A broad intellect and grounding in a suitable academic discipline. While a doctorate or professional degree is preferred, the search is open to individuals with significant professional achievement who can understand the challenges of higher education.
- A track record of senior management success in complex organizations that have intact reporting relationships that serve many constituencies and require a service orientation.
- Demonstrated leadership in developing quality academic programs and supporting a distinguished faculty, or a comparable record of leadership in building a strong team that produces exemplary results.
- The capacity to present Baruch’s mission and programs to a wide variety of prominent audiences.
- A strong record of success in attracting financial support from foundations, corporations, governmental sources, and private donors.
- A commitment to enhancing the quality of student life and strengthening the delivery of services to an urban, multi-cultural, multi-ethnic student body.

The position is available on September 1, 2000. A revision of salary and benefits that is now underway will make the compensation package highly competitive. The review of applications will begin immediately, and submission of applications and nominations is strongly encouraged prior to November 15, 1999.

Application: Applicants should respond via the mail. Please send two copies of (1) a letter expressing interest in the position, (2) a curriculum vitae, and (3) the names of five references. References will not be contacted without the applicant's prior permission.

Nominations: Nominations should be sent a letter of nomination and, if possible, the nominee’s curriculum vitae. Applications and nominations should be sent to:

Ann Korn, Managing Director or Joan Sherry, Senior Associate
Korn/Ferry International, 200 Park Avenue, New York, NY 10165
Attn: Baruch College Presidential Search
All inquiries, nominations and applications will be held in the strictest confidence.

Wayne State College seeks applications for the position of Vice President for Academic Affairs. Wayne State College, located in a city of 5,200 in rural northeast Nebraska, is a comprehensive, regional, public four-year college serving nearly 4,000 students. The College's mission is twofold: student development and regional development. The College is one of three four-year campuses governed by the Board of Trustees of the Nebraska State College System and is a collective-bargaining institution.

The Vice President is the senior academic officer of the College. This position reports directly to the President of the College and advises the President and other executive officers on academic affairs. The Vice President is one of four vice presidents; the others being Administration and Finance, Student Affairs, and Development.

The Vice President is responsible for and provides leadership to the following areas: academic policy, academic programs, and faculty personnel matters, including teaching, service, and research. The Vice President coordinates long-range planning of instructional programs, supervises the evaluation of academic programs in relation to accreditation standards, and recommends to the President on faculty and other appointments, retention, promotion, and salary. The Vice President directly supervises the Associate Vice Presidents for Academic Affairs and Graduate Dean, the Associate Vice President for Enrollment Management, the directors of the library, campus computing, and instructional development, and the leaders of eight academic divisions.

The successful candidate will have a record of teaching and academic achievement; a history of leadership and management experience appropriate to a comprehensive institution of higher education; the ability to work cooperatively with students and colleagues and staff at all levels; a strong background in the areas of responsibility noted above; a history of personal and professional integrity; excellent communication skills; and an earned terminal degree in an academic area. Salary will be determined based upon experience. The College provides an attractive benefits package.

Starting date will be no later than July 1, 2000. Review of application materials will begin December 1, 1999 and will continue until the position is filled. Qualified candidates should forward a letter of interest, a resume and the names, addresses and telephone numbers of three current references to:

Mr. Dwayne Johnson, Secretary
Vice President for Academic Affairs
Search Committee
Wayne State College
1111 Main Street
Wayne, NE 68787

GEORGIA SOUTHERN UNIVERSITY
University System of Georgia
Provost and Vice President for Academic Affairs

GEORGIA SOUTHERN UNIVERSITY, a member institution of the University System of Georgia, invites nominations and applications for the position of Provost and Vice President for Academic Affairs. As the chief academic officer of the institution, the Provost/VPA reports to, and works closely with, the President of the University and is the principal administrator in charge during the President’s absence.

CHARACTER: A comprehensive residential university of 14,600 students, Georgia Southern University is a superior undergraduate experience emphasizing academic distinction, excellent teaching, and student success. Georgia Southern is Georgia’s third largest university and, apart from the four research universities, the most comprehensive center of public higher education in the state. Georgia Southern approaches its centennial in an era of new leadership with a vision to rank among the best universities of its class in the nation.

STUDENT PROFILE: One of the top two choices in Georgia for freshmen, including Hope Scholars, Georgia Southern enrolls an increasingly selective student body representing all of Georgia’s 159 counties, and more than 60 nations. Nine out of 10 undergraduates are full-time students. The University is expanding its academic profile through increased admission standards, an expanded scholarship honors program, and increased recruiting of academically talented students.

ACADEMIC SCHOLLS AND QUALITY: A Master’s University accredited by the Southern Association of Colleges and Schools, Georgia Southern offers 130 academic majors, a comprehensive array of baccalaureate degrees and selected master’s and doctoral programs. The University has earned national accreditation in 20 program areas. Academic programs are organized in six colleges: Business Administration, Education, Health and Professional Studies, Liberal Arts and Social Sciences, the Allen E. Paulson College of Science and Technology, and the Jack N. Averitt College of Graduate Studies. The University awarded 2,590 degrees in 1998-99.

REGIONAL MISSION: Georgia Southern serves as its most rural coastal region through outreach and research in economic development, education, cultural opportunities, rural health, and environmental interests. The University is raising the number of professionals in the region through programmatic offerings in Savannah, Brunswick, Augusta, Dublin, and Hinesville.

HISTORY: Founded in 1906 as a district agricultural school, the institution advanced to become a teachers college, a senior college, and in 1959 earned its status as the first university in the southern half of Georgia. The University has recently emerged from a decade of growth which doubled enrollment.

CAMPUSES: The 634-acre park-like campus is completing a $122.3 million building and beautification renovation that spanned the decade. The learning environment for students and the public is enhanced by a museum of cultural and natural history, a botanical garden, and a unique wildlife education center.

The University’s Division I athletic teams compete in the Southern Conference. The campus is located in Statesboro, a fast-growing, multi-county community of 40,000, at the three-hour farm between Savannah and beach resorts, and less than 200 miles from Atlanta.

The Provost and Vice President for Academic Affairs has administrative jurisdiction over academic matters and academic personnel, providing leadership in the planning and development of academic goals for the institution and its colleges. The Provost is responsible for the budget, direction, coordination, and assessment of the institutional programs of the University. The deans of the six colleges, three associate vice presidents, and the directors of major academic units report directly to the Provost.

QUALIFICATIONS:
- Earned doctorate and a distinguished record as scholar and teacher qualifying the candidate for the rank of Professor and tenure upon appointment.
- Ability to communicate high academic and personal values within the University as well as the community beyond the campus.
- Vision and energy to lead an institution committed to a diverse enterprise and to cultivate excellence in scholarship, teaching, and service.
- Successful record of, and commitment to, promoting equality of opportunity and diversity with demonstrated respect and advocacy for faculty, students, and staff.
- History of increasingly responsible administrative leadership positions, typically including the level of dean or higher, which have involved managing complex campus environments, guiding change, planning, successfully affecting organizational improvement, developing and implementing major academic initiatives and programs, managing budgets, and personnel, evaluating performance, and assessing outcomes.
- Superior organizational, interpersonal, and communication skills.
- Appreciation of the importance of distance education and of the evolution of technology in academic institutions.
- Ability to function within a multi-campus university system.

Screening of applications begins November 15, 1999. The position begins July 1, 2000. A complete application consists of a letter addressing the qualifications cited above, a curriculum vitae, and the names, addresses, and telephone numbers of at least five professional references. Applications and nominations should be sent to:
Dr. Robert W. Hunley, Chair, Provost/VPA Search Committee, Office of the President, P.O. Box 6059, Georgia Southern University, Statesboro, GA 30460-6059. Electronic mail: rhunley@gsu.edu

More information about the institution is available through the Georgia Southern University Web Page at http://www.gsu.edu

The names of applicants and nominees, their sex, and other non-evaluative information may be open to public inspection under the Georgia Open Records Law. Georgia Southern University is an Equal Opportunity Affirmative Action Institution. Individuals who need reasonable accommodations under the ADA in order to participate in the application or the screening process should notify the Search Committee at least five days in advance.

WESTERN CONNECTICUT STATE UNIVERSITY
FACULTY OPENINGS
www.wcsu.edu

Plattsburgh State University of New York invites applications for Fall 2000 tenure track positions.

Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shores of Lake Champlain, the College is the principal educational resource for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT provides a quality of life unique in the region. Nearby cultural activities include the Lake Champlain Theatre, the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada. If you are seeking a change of pace from your current position, Plattsburgh is easily accessible to New York City and Boston via air, bus, train and Interstate 87.

Successful candidates must be committed to excellence in teaching in an undergraduate department, developing programs in the arts and sciences, educating and serving the community. Preference will be given to applicants who demonstrate an understanding of and sensitivity to minority and gender concerns. Selected candidates will have an interest in interdisciplinary and collaborative programs such as Women's Studies, Latin American Studies and Canadian Studies, all of which are special focus for the College; a desire to integrate information technologies; and a willingness to participate in the College's Learning Programs.

The faculty is challenged to redefine their teaching roles by incorporating recent research on teaching effectiveness. The college supports faculty scholarship through the NY/UPD/Bargaining agreement, minority and women faculty may apply for one-year Affiliate Action leaves to pursue scholarly projects. Other faculty funding opportunities include joint State/Union travel grants and College Funded-in-House Mini-Grants to provide seed funding for research activities, Research Enhancement Awards, Presidential Research Awards, and Educational Technology Awards.

We offer a competitive salary and an excellent benefits package. Unless otherwise stated, review of applications will begin immediately and continue until the positions are filled.

Application Procedure: Please send or fax cover letter, resume, or curriculum vitae, transcripts, three letters of recommendation and other requested materials in individual ad to: Chair, Search Committee (P# 2367-806), c/o Human Resources, Plattsburgh State University, 101 Broad Street, Plattsburgh, NY 12901-2681, Fax: (518) 564-5060.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action/equal opportunity employer.

Plattsburgh State University of New York
ASSOCIATE CHANCELLOR FOR DEVELOPMENT AND VICE PRESIDENT FOR THE UNIVERSITY OF ILLINOIS FOUNDATION

The University of Illinois at Chicago (UIC) announces a nationwide search to recruit an Associate Chancellor for Development and Vice President for the University of Illinois Foundation. This is the Chief Advancement Officer for UIC.

The University is increasingly recognized for the quality of its faculty, students and academic offerings and is one of the most rapidly emerging major urban research universities in the country. UIC enrolls approximately 25,000 students, employs approximately 12,000 (FTE), and has an annual operating budget of $1 billion.

This position reports directly to the Chancellor of UIC and the President of the University of Illinois Foundation and is responsible for the effective management of the University’s development function. The selected individual will be a key member of the Chancellor’s cabinet.

The Associate Chancellor for Development and Vice President for the University of Illinois Foundation will be responsible for maintaining and building on the momentum created by the successful Campaign Illinois effort which has resulted in over $250 million in private gifts for UIC and the identification of major donor prospects capable of exceeding this level of giving in the future.

Minimum education and work experience include an advanced degree or equivalent experience (a baccalaureate degree is required) and a minimum of five to ten years of fundraising experience with large, successful institution(s) and three to five years of fundraising management experience.

Review of candidate materials will begin immediately and will continue until an Associate Chancellor for Development and Vice President for the University of Illinois Foundation is selected. Please submit applications and nominations to:

Experience with longitudinal data collection and tracking of participants is desirable. Understanding of SPSS and SAS is essential. Majority of the work will be performed out of our offices in New York City (Manhattan).

Submit a letter of application (clearly stating position of interest), curriculum vitae or resume, salary requirements and the names of three references to:

Dr. Jeffrey Parsons, CHEST
New Jersey City University
University of Connecticut, School of Law

The University of Connecticut School of Law seeks applications and nominations for the position of Dean beginning July 1, 2000. The Law School seeks a Dean with the intellectual vision and administrative talent to lead one of the finest public law schools in the country. The Law School's 45 full-time faculty and 406 full-time students, along with 186 part-time and 43 graduate students, comprise a relatively small community which, among its other virtues, provides an excellent student-faculty ratio. The year-round palette of faculty colloquia, outside speakers, scholarly conferences and visiting professors reflects the intellectual vitality and diversity of Law School life. The newly-instituted Immigration Law Center, the LL.M. program in insurance law, the LL.M. program for foreign lawyers in the U.S. Studies, three student-run journals, and active criminal and civil clinics, including a new Tax Clinic opening this fall, are examples of the strength and recent growth in the Law School's programs. Over the next two years, the Law School expects to add as many as six new members to the faculty already distinguished by its scholarly breadth and productivity, a development that presents an extraordinary opportunity to shape the intellectual future of the School.

As the chief academic and administrative officer of the Law School, the successful candidate must demonstrate an ability to facilitate and inspire the Law School's commitment to teaching, scholarship and public service of the highest quality. The candidate also must have a record of professional achievement that warrants appointment at the rank of Professor of Law, as well as demonstrated recruitment, managerial and fund-raising skills. The future Dean will be expected to build upon the Law School's already strong reputation and involvement in regional, national and international legal circles. Overseeing the Law School's participation in the University's $250 million capital campaign in the coming years will be an essential component of the new Dean's responsibilities.

All applications will be kept strictly confidential. Screening of applications will continue until the position is filled. The Law School's commitment to excellence is complemented by a commitment to building a culturally diverse community. Minorities, women and people with disabilities are strongly encouraged to apply. Nominations or applications, including a letter of interest, resume and names of three references, should be sent to: Professor Anne Dailey, Search Coordinator, Dean Search Committee, University of Connecticut School of Law, 65 Elizabeth Street, Hartford, CT 06105; Telephone (860) 570-5260. (Search# 00A143)

University of Connecticut
Indiana University South Bend invites applications and nominations for the positions of Dean of the Division of the Arts, Dean of Liberal Arts and Sciences. These tenured, 12-month positions begin July 1, 2000.

DEAN OF THE DIVISION OF THE ARTS

The Dean is the chief academic officer of the division that includes B.A. programs in speech and mass communications, B.A./B.F.A. programs in theatre and the fine arts, and B.M./B.M.E./M.M. programs in music.

The Division of Arts is comprised of 370 majors, a substantial number who are in fine arts and communication. The 20 full-time faculty members include several of national and international repute. The Division produces more than 70 public performances, exhibitions, and forums a year including those by members of the Alexander Tomaszewski Piano Studio and the Chester String Quartet.

THE SUCCESSFUL CANDIDATE’S QUALIFICATIONS WILL INCLUDE:

- Earned doctorate or appropriate terminal degree. Candidates with exceptional career experience also will be considered.
- Tenure track academic appointment in the rank of full professor, in one of the disciplines within the Division, with teaching experience and significant nationally or internationally recognized scholarship, performance or creative activity.
- Successful academic leadership experience; including an administrative position of chairperson or higher; and experience in academic program development and student recruitment and retention.
- Extensive experience in building community partnerships, including substantial external fund-raising experience.

Salary is competitive and based on experience; benefits are among the most generous in higher education. To ensure full consideration, applications should be received by Dec. 1, 1999. Candidates are asked to submit a letter of application, a curriculum vitae, the names, addresses, and telephone numbers of at least three persons; and a statement of vision on the interrelationships of theatre, visual arts, and communication and the challenge of providing high-quality university-based education and performances.

Information should be submitted in care of: Professor Larry Gerber, Chair, Search Committee for Dean of the Division of the Arts, Office of Academic Affairs, Indiana University South Bend, 1900 Mishawaka Ave., South Bend, IN 46634-7111

DEAN OF LIBERAL ARTS AND SCIENCES

The Dean will provide leadership for a complex academic unit comprising eleven discipline-based departments and two additional academic programs. Liberal Arts and Sciences offers 19 baccalaureate degrees, two master's degrees, and 18 associate degrees. The 100 full-time faculty, 20 professional/clinical staff, and approximately 140 part-time faculty serving Liberal Arts and Sciences as leader with a proven and successful record of excellence in academic administration.

CANDIDATES MUST BE ABLE TO PROVIDE EVIDENCE OF:

- An overall record of research, teaching, and administrative service that will qualify the candidate for a tenured full professorship in a discipline contained within Liberal Arts and Science.
- A record of continuous scholarly research including significant publications and/or creative works.
- A record of strong and successful college-level teaching.
- A record of successful administrative experience in program development, faculty relations, budgeting, and academic governance.
- Excellent oral and written communication skills.
- A level of energy and enthusiasm necessary for the successful leadership of the largest and most complex academic unit on the campus.
- An appreciation for the needs of students, faculty, staff, and alumni at a regional comprehensive institution.

Applicants should submit a cover letter which includes a statement outlining their philosophy of academic leadership, a description of goals they would set for themselves as dean, and a brief description of the breadth and depth of their administrative responsibilities. Candidates should also include a curriculum vitae and a listing of five references.

Review of candidates will begin November 15, 1999 and continue until the position is filled. All materials should be sent to: Dr. James M. Smith, Chair, Search Committee for the Dean of Liberal Arts and Sciences, Indiana University South Bend, Office of Academic Affairs, 1900 Mishawaka Ave., South Bend, IN 46634-7111

IU South Bend is also seeking qualified applicants for the following positions:

- Arts: Mass Communication, Assistant Professor
- Biology: Ecology, Assistant Professor
- Computer Science: Cell Biology, Assistant Professor
- Dental Education: Education, Assistant Professor
- Education: Elementary Education, Assistant Professor
- Elementary/Dir of Global Studies, Assistant Professor
- Secondary Educ - English, Assistant Professor
- Special Education, Assistant Professor
- Special Educ (Mild Disabilties), Assistant Professor
- Counseling Educ, Assistant Professor
- Academic Resource Center, Assistant Professor
- Electronic Services/Reference, Assistant Professor
- English: Academic Resource Center, Assistant Professor
- Library: Academic Resource Center, Assistant Professor
- Mathematics: Academic Resource Center, Assistant Professor
- Nursing: Academic Resource Center, Assistant Professor
- Psychology: Academic Resource Center, Assistant Professor
- Social Work: Academic Resource Center, Assistant Professor
- Speech: Academic Resource Center, Assistant Professor
- Spanish: Academic Resource Center, Assistant Professor

Appointments are available immediately. For further information about any of these positions, contact Dr. Alfred Link, Vice Chancellor for Academic Affairs, Indiana University South Bend, 1900 Mishawaka Ave., South Bend, IN 46634 (e-mail: guilluam@iusb.edu).

IU South Bend is a comprehensive state institution with 7400 students, 245 full-time faculty and 1500 part-time faculty. Although it is comprised of academic units representing the Arts, Business and Economics, Education, Nursing, General Studies, Liberal Arts and Sciences, and Social Work, South Bend is the center of a metropolitan area with over 240,000 residents. The university is a major educational institution in the midwest and a leader in promoting diversity and inclusion. It is especially seeking applications from women or members of underrepresented groups.

IU South Bend is committed to achieving excellence through cultural diversity and actively encourages applications and nominations of women, persons of color, and members of other underrepresented minority groups.
THE COLLEGE OF NEW JERSEY
DEAN, SCHOOL OF BUSINESS

The College of New Jersey (TCNJ) announces a national search for the position of Dean of the School of Business, and invites applications and nominations of individuals who have the interest, ability and qualifications to lead the School of Business into the 21st Century. TCNJ is a highly selective, comprehensive, residential institution recognized as one of the outstanding colleges in the country. The College, enrolling approximately 5,800 undergraduate and 900 graduate students, is located on 255 tree-lined acres in suburban Ewing Township, NJ, and is located between Philadelphia and New York City.

The School of Business enrolls over 1,000 students who are served by 35 full-time faculty. The School of Business offers undergraduate degree programs in accounting, general business, management, economics, finance, information systems, marketing, and international business. All programs and degrees are fully accredited by AACSB. Accounting graduates consistently rank number one in passing rates on the CPA exam for the state of New Jersey. A new state-of-the-art School of Business building is scheduled for completion in October 1999.

Reporting to the Provost and Vice President for Academic Affairs, the Dean provides academic and administrative leadership for the School of Business. The Dean is expected to lead the school in further development of its capabilities for superior teaching, innovative curriculum development, exemplary scholarly research and efficient fiscal, program and human resource management. The Dean is further expected to articulate the vision of the college and the mission of the school to both internal and external constituencies, to enhance the role of the school in the business community, to manage and develop the school’s financial resources, and to extend its reach by attracting a more diverse cohort of highly able students and faculty.

QUALIFICATIONS: Candidates should possess proven leadership and management skills, preferably in higher education, and a thorough knowledge of the philosophy and mission of a school of business. Successful candidates will demonstrate a capacity to work effectively with faculty, students, and leaders in business, industry, and other educational agencies and institutions; be familiar with AACSB accreditation, and have the ability to attract external funding. An earned doctorate in an area associated with Business is desirable.

Review of applications will begin December 1, 1999 and continue until the position is filled. The starting date for the Dean will be July 1, 2000. Applicants should submit a letter of interest, curriculum vitae or a detailed resume, and the names, addresses and telephone numbers of five references to: Dr. Hossam Noui, Chair, School of Business Dean’s Search Committee, Office of Academic Affairs, The College of New Jersey, PO Box 7718, Ewing, NJ 08628-0718. To enrich education through diversity, The College of New Jersey is an Equal Opportunity Employer.

For further information about The College, please visit our web site at www.tcnj.edu

THE STATE UNIVERSITY OF NEW YORK
University at Buffalo-Law School

University at Buffalo Law School, The State University of New York has openings for the following positions:

Director, Charles B. Sears Law Library: serves a large academic law school with 40 full-time faculty, 600 J.D. students and a growing LL.M. program. As the only law library in research dimension in the area, it also serves the bar researchers from area colleges, and the general public. The Library Director is a law faculty tenure-track and administrative position. Applicants must have both J.D. and M.L.S. degrees and demonstrate progressively responsible experience in academic law library administration. The Director will develop and maintain the full range of resources and services in a library, which combines creative use of technology with a tradition of excellent service. Salary range $50,000-$100,000 with generous benefits package.

Law Faculty: The Law School invites applications for tenure-track faculty positions. The Law School encourages examination of the values and empirical assumptions underlying law practice and legal thought, and the school’s lively intellectual environment supports innovative and collaborative forms of teaching. Areas of interest are intellectual property and law and economics, but academically well-qualified candidates with open teaching interests are welcome to apply. Salary range $75,000-$82,000 with generous benefits package.

Director, Legal Writing and Research: This position is a non-tenure-track three-year renewable contract appointment. Obligations will include administering the first-year legal Writing & Research program and also teaching in that program. The director will coordinate the work of five Writing and Research lecturers, and work closely with the library staff and the Law School faculty to develop the substantive content of the Writing and Research program. Salary range $50,000-$65,500 with generous benefits package.

Lecturer, Legal Writing and Research: This is a one-year contract position, renewable for up to a three-year period. Teaching obligations include designing and conducting a two-semester Writing and Research course that progressively develops students’ research, writing and doctrinal and factual analytic skills and provides students with numerous research and writing exercises and substantial individual feedback. Salary range $20,000-$32,000 with generous benefits package.

Send resumes and the names, addresses and phone numbers of three references to Professor Elizabeth Mencher Chair, Appointments Committee University at Buffalo Law School 422 O’Brian Hall Buffalo, N.Y. 14260-1100

THE COLLEGE OF NEW JERSEY

ST. CLOUD STATE UNIVERSITY
A tradition of excellence and opportunity

DEAN
COLLEGE OF SOCIAL SCIENCES

St. Cloud State University invites nominations and applications for the position of Dean of the College of Social Sciences; anticipated starting date is July 1, 2000.

Responsibilities and Qualifications are available online at http://soudor.stcloudstate.edu/effect/NOV100.html

Application: Nominations & applications are invited and should be addressed to: Dr. Allan Maleckas, Vice President for Academic Affairs, St. Cloud State University, 720 4th Avenue South, St. Cloud, MN 56301-4498. Fax No. (320) 255-5282. A complete application consists of a letter of application specifically addressing the responsibilities and qualifications as stated above; a resume; and names, addresses and phone numbers of 3-5 current references who can specifically comment on the candidate's abilities, experience and professional preparation. Candidates may be asked to submit additional application materials. Applications are asked to provide a preferred mailing address, e-mail address, and fax number(s) if available. To ensure full consideration, complete applications must be received by December 16, 1999. Postmarks will not be accepted.

SCSU is committed to excellence and actively supports cultural diversity. To promote this endeavor, we invite individuals who contribute to such diversity to apply, including women, minorities, GLBT persons, persons with disabilities and veterans.

Literacy Education
Learning and Instruction (2)
COLLEGE OF EDUCATION

THE COLLEGE - The College of Education at California State University San Marcos is a dynamic academic unit dedicated to collaborative efforts to improve teaching and learning at all levels. We have formed productive partnerships with area school districts to enhance teaching and teacher education. Our professional education programs are state-of-the-art and include initial teacher credential programs, master's programs for experienced teachers and a credential program for aspiring school administrators. As a part of our commitment to effective education for all students, we devote continuous attention to issues of cultural and linguistic diversity in all aspects of the College and its operation. The college faculty, staff, and administration have constructed a collegial model of program development and decision-making and we model a learning community in all of our programs and activities. The College is approved by the California Commission on Teacher Credentialing and accredited by the National Council for Accreditation of Teacher Education.

THE POSITION - We are looking for individuals for tenure line faculty positions whose primary expertise is in the following areas:

- **LITERACY EDUCATION**. Applicants should have demonstrated excellence in teaching and in educational research (or potential for conducting educational research). Individuals are encouraged to list any additional areas of expertise that they may have. Experience in secondary reading and writing education with an integrated holistic perspective is desirable. Teach courses in both teacher preparation and a Master of Arts program. Understanding of and/or experience with second language acquisition is especially encouraged to apply.

- **LEARNING AND INSTRUCTION** (2 positions available). Applications are invited from exceptional individuals interested in "learning and instruction" applied in teacher credential programs. coursework for which learning and instruction faculty are responsible include topics such as human growth and development, inclusive instructional strategies, learning theories, socio-cognitive learning, lesson planning, classroom management, motivation, assessment, etc., for a range of students from diverse cultural and linguistic backgrounds. Additionally, learning and instruction courses are offered at the graduate level. One position is available at the Assistant Professor level for someone who has demonstrated leadership in learning and instruction in teacher education. Bilingual (Spanish-English) candidates are especially encouraged to apply.

QUALIFICATIONS - Candidates for all positions should have an earned doctorate in an appropriate area of study and be current in their area of expertise.

SALARY - Tenure track positions are available at the Assistant Professor level with competitive salary and benefits. One of the Learning and Instruction positions may be filled at the Associate Professor level. It is anticipated that the successful applicants will assume their positions in mid-August, 2000.

APPLICATION - Interested persons should submit a complete curriculum vitae and a letter of application. Letter of application should include a statement of qualifications in relation to the listed areas of expertise as well as the stated beliefs/vision/mission of the College and interest and sensitivity in working with diverse populations including cross-cultural, multilingual, bilingual and exceptional learner groups. Candidates should explicitly identify their primary and secondary (if any) areas of expertise. In addition, one sample of a recent professional writing should be submitted. Arrange to have sent at least three (3) and no more than five (5) current letters of reference which specifically address qualifications in relation to the information presented in this position announcement.

Materials should be submitted to:

Chair, Faculty Search Committee
COLLEGE OF EDUCATION
California State University San Marcos
San Marcos, CA 92096-0001

To ensure full consideration, all application materials should be received no later than November 15, 1999. Positions are open until filled. For additional information and College of Education mission statement, visit our website: wwww.csusm.edu/COE

CSUSM is an AA/EOE/Title IX Employer

The Center for HIV/AIDS Educational Studies and Training (CHEST) announces openings for the following positions:

RESEARCH ASSOCIATES
(Full and Part Time Positions Available)

The Research Associates will advise the Center for HIV/AIDS Educational Studies and Training (CHEST) staff on a variety of research projects. Applicants should possess a BA/BS in one of the social or behavioral sciences or in a relevant public health field. Applications for the part-time position will ideally be currently employed in a M.A. or Ph.D. program, or planing on enrolling in M.A. or Ph.D. program. Previous research or outreach experience with the New York City gay/lesbian/bisexual community is desirable, as is familiarity with issues involving persons with HIV/AIDS. Previous qualitative and quantitative research experience, and understanding of statistical software package (SPSS, SAS) is also desirable. All positions can accommodate flexible scheduling, as the research Associates will spend a considerable amount of time in the field. Half-time positions are for 16-20 hours per week. The majority of the work will be performed out of our offices in New York City.

OFFICE MANAGER

The Office Manager will be based out of our offices in New York City (Manhattan) and will supervise all field operations and coordinate research-related activities with front-line staff and senior investigators. Applicants must possess a minimum of a BA/BS (Master's preferred) in management, business, public administration, or organizational psychology. Experience with research settings, human resources or non-profit agencies is essential. Applicants must have exceptional interpersonal skills, organizational management abilities, and be able to work independently.

Submit a letter of application (clearly stating position of interest) curriculum vitae or resume, salary requirements and names of three references to:

Metropolitan State University is an equal opportunity, affirmative action employer.
700 E. Seventh Street, St. Paul, MN 55106-5000

THE COUNSELING CENTER
PACE NEW YORK

Staff Psychologist/Coordinator of Services for Students With Disabilities & Multicultural Specialist

We are looking for a dynamic person with a strong appreciation of multiculturalism to join our talented and creative staff to manage services for students with disabilities and the multicultural training component of our pre-doctoral psychology internship (accredited by the APA since 1985). This is an entry-level staff position with great opportunities for innovation and growth. Other duties include: individual & group counseling services to students; crisis intervention services; and supervision of the interns’ clinical supervision of practicum students. We are a full service counseling center servicing a highly diverse University community.

Qualifications: Doctoral degree in counseling or Clinical psychology preferred, advanced ABD’s are encouraged to apply; eligible for licensure as a Psychologist in New York State within 3 years of hire; knowledge of the assessment of physical and learning disabilities; knowledge of the ADA: education and experience in models of multicultural training and service delivery; experience in the supervision of masters level counselors; 2-3 years of experience in a college counseling center or other mental health setting.

We offer a competitive benefits package including free tuition for self, spouse and dependent children. For immediate consideration, please send C.V. with salary requirements to: Sandra Alon, Human Resources Services, Pace University, One Pace Plaza, NY, NY 10038. We are an equal Opportunity/ Affirmative Action Employer.

AUSTIN PEAY STATE UNIVERSITY
REGISTRAR

Austin Peay State University is a comprehensive public liberal arts university in the Tennessee Board of Regents system. The university is fully accredited and offers more than 50 majors in associate, baccalaureate, master, and education specialist degrees. The Registrar is a member of Enrollment Management in the Academic Affairs division and is responsible for the maintenance of academic student records, transcript evaluations, certification of degrees, graduation, and NCAA eligibility. The Registrar is responsible for the supervision of staff, student information systems, university reporting, catalog preparation, automated voice response system, development of class schedules and represents the university on a variety of committees. The Registrar is actively involved with new student registration, decentralized registration, Academic Council, Graduate Research Council and the Technology Board.

REQUIREMENTS: Doctorate degree with at least three years experience or a master’s degree with eight or more years of experience as the Assistant Registrar level or higher required. The candidate must have a technology background with experience in some or all of the following areas: student information systems, automated voice systems, Web registration, and imaging. Strong communications skills and supervisory experience required.

APPLY TO: APSU, Human Resources, PO Box 4507, Clarksville, TN 37044. For a detailed description contact Human Resources at (931) 221-7177. FAX (931) 221-6345. Review of applications will begin December 1, 1999, and continue until the position is filled.

See the APSU Home Page at http://www.apsu.edu for other employment opportunities and information on employee benefits. APSU IS AN AA/EOE

EASTERN MICHIGAN UNIVERSITY
Faculty & Administrative Vacancies

Eastern Michigan University is accepting applications for more than 30 tenure-track faculty positions in its colleges of Arts and Sciences, Education, Health and Human Services and Technology, as well as in the new leading-edge Bruce T. Haile Library. We also are recruiting for Academic Department Head positions in Biology, Computer Science, Political Science and Health, Physical Education, Recreation and Dance, and for Dean of the College of Business. EMU’s scenic campus is located within easy reach of the city of Detroit and several charming rural communities. Neighboring Ann Arbor, home of the University of Michigan, was recently rated as the top community for families in the US.

For position announcements and application instructions please visit www.emich.edu and follow the links to Academic Human Resources by clicking on "Services and Administration," or call us at (734) 487-0076 and we will be happy to fax information to you.

EMU is an affirmative action/ equal opportunity employer.
STATE UNIVERSITY OF NEW YORK COLLEGE AT ONEONTA

The College at Oneonta invites applications for three tenure-track positions at the rank of Assistant Professor. These positions begin with the Fall 2006 semester. SUNY Oneonta, a four-year arts and sciences college with a pre-professional focus, offers liberal arts and professional programs at undergraduate and graduate levels. Increasing emphasis is placed upon technology and community service across all disciplines and the campus has announced a Universal Computer Access program (USCAP) for its students. See the Oneonta home page for additional information (http://www.oneonta.edu). Review of applications begins immediately and continues until positions are filled. SUNY Oneonta is an EEO/AA employer. Women and minorities are encouraged to apply.

Since dates for screening of applications vary with position/department, place your inquiry to contact listed as soon as possible. For a complete list of available positions, go to: http://www.wisconsinjobs.com/uwstout. For information about University of Wisconsin-Stout, go to: http://www.uwstout.edu/.

An Equal Opportunity Employer/Alternative Action Employer values a diverse university community and seeks to ensure equal opportunity.
The Board of Trustees of the City University of New York and the Presidential Search Committee invite nominations and applications for the position of President at LaGuardia Community College.

LaGuardia is the newest of 20 City University of New York campuses and one of six community colleges. Since enrolling its first class of 500 students in 1971, LaGuardia has grown to an enrollment of more than 11,000 degree students and more than 20,000 adult and continuing education students. It has earned an international reputation for its mandatory cooperative education program and many pedagogical innovations, including three model high schools integrated into the campus.

The student body is truly international - more than 60 percent of students were born outside the United States, and 200 languages and cultures are represented on campus. The International High School that is housed on campus admits only newly arrived immigrants with limited English skills. The campus also has strong ties with community colleges in Latin America and Africa.

LaGuardia awards degrees in 30 majors, specializing in career preparation. Forty-three percent of LaGuardia students are enrolled in occupational degree programs and 12 percent are in non-degree programs in fields ranging from computer technology to travel and tourism, veterinary technology to commercial photography or occupational therapy. Forty-five percent of students are employed in programs leading to an A.A. or A.S. degree. To help students continue their education, the college maintains bridges and transfer agreements with 50 baccalaureate degree campuses.

There are 245 full-time faculty members, 47 percent of whom have doctorates, and 416 part-time faculty. The faculty is culturally and ethnically diverse and very stable. Administrative and support staff bring the total workforce to 1,315. The college's annual budget is $75 million, four-fifths of which comes from direct governmental appropriation and student tuition and fees. Faculty research and pilot projects annually add another $11 million in grant awards.

LaGuardia's modern campus is located in Long Island City, Queens, a rapidly growing industrial/business complex just across the East River from Manhattan. The campus includes a Performing Arts Center with two large theaters and exhibition space, and a large indoor sports complex.

The President serves as chief academic and administrative officer of the college, under the general direction of the CUNY Chancellor, according to policies set by the Board of Trustees. Preferred qualifications for the position include:

- A demonstrated commitment to urban, public higher education in a multi-cultural, multi-ethnic city.
- Proven strength in strategic planning, budgeting, and management in a collegial setting.
- A record of respect for faculty and student concerns. An ability to forge consensus with an active and engaged faculty, and a commitment to strengthen the delivery of services to students.
- A record of upholding high academic standards while maintaining broad access, and a record for building systems for campus accountability.
- An earned doctorate or professional equivalent, plus experience in the senior-level management of a community college and in teaching at the college level.
- An appreciation for the benefits of cooperative education and an openness to innovative pedagogies that produce results.
- The ability to communicate with, and represent, the institution to its outside constituents, including the residential and business communities, alumni, legislative and other governmental bodies.
- Experience in attracting external funding and in handling the complexities of city, state, federal and private support.
- An understanding of how technology can be integrated into classrooms to improve learning, and a record of support for technological advancements.

The position is available starting September 1, 2000. A revision of salary and benefits that is now underway will make the compensation package highly competitive. The review of applications will begin immediately; submission of applications and nominations is strongly encouraged prior to November 30, 1999.

Applications: Applicants should send (1) a letter expressing their interest in the position and (2) their curriculum vitae, and (3) a signed statement that at least one individual will support their nomination to the search committee. Applications and nominations should be sent to:

Office of Executive Search and Evaluation
The City University of New York
535 East 80th Street, New York, NY 10021

Attn: LaGuardia Presidential Search

All inquiries, nominations and applications will be held in the strictest confidence.

For additional information: Please contact Elizabeth Rockin, Director of Board Services, Association c Community College Trustees (ACCT); she can be reached by phone at 202-775-4657 or 305-305-4411. Mail address: 1745 N Street, NW, Washington, DC 20035.

The City University of New York is an Equal Opportunity/Affirmative Action/CRCA/Americans with Disabilities Act Employer with a strong commitment to racial, cultural and ethnic diversity. The Search Committee actively seeks and encourages nominations and applications from men and women of all races and ethnic backgrounds.
NOTRE DAME LAW SCHOOL

DIRECTOR OF ADMISSIONS

Notre Dame Law School invites applications for the position of Director of Admissions.

Notre Dame Law School, located in South Bend, Indiana, is the oldest Catholic law school in the United States. Founded in 1869, Notre Dame Law School draws its inspiration from two ancient traditions: English and American common law as well as the Catholic tradition. The Law School seeks to enhance the quality and diversity of its student body, even while maintaining its enrollment at about 550 students.

The Director of Admissions oversees and manages all aspects of the Law School's admissions efforts, including financial aid. This responsibility includes planning and implementing an aggressive and innovative marketing strategy for recruiting applicants of high-quality, evaluating applications and achieving enrollment goals, organizing and housing creative events for prospective students, including students admitted but not enrolled, and managing the admissions office, including the supervision of admissions staff. The Law School expects the Director to develop the structure of the office and encourage the professional development of the staff in order to enhance the strategic reach of all admissions efforts.

The Director must manage a highly confidential process. Periodic travel is required.

The Director must develop productive relationships with faculty members and alumni of the Law School, as well as with undergraduate institutions. Active membership in appropriate professional organizations is expected.

The successful candidate will be outgoing and possess strong communicative and interpersonal skills, both oral and written. The candidate will demonstrate enthusiasm for and familiarity with computers and the relevant software programs available on the market today. Applicants must possess a bachelor's degree, five years related and successful experience in a selective admissions environment and further education (such as a master's degree, a J.D. or an M.B.A.).

The Law School expects the new Director to begin no later than July 1, 2000. We provide a competitive salary and benefits package.

Send resume, cover letter, and names of three references to:

Director of Admissions, Law School Search
Job #9012-383
Department of Human Resources
University of Notre Dame
100 Grace Hall
Notre Dame, Indiana 46556

Notre Dame is an Equal Opportunity Affirmative Action Employer

CENTRAL MICHIGAN UNIVERSITY

DEAN OF THE COLLEGE OF GRADUATE STUDIES

ASSISTANT VICE PRESIDENT FOR RESEARCH

Central Michigan University is a comprehensive state university with over 800 faculty serving an on-campus enrollment of approximately 18,000 students. The university's eight colleges offer more than 20 undergraduate and graduate degrees and 150 major areas of study. The main campus is situated on an 840-acre site in Mount Pleasant, a city of 25,000 residents located in the heart of the lower peninsula of Michigan. The institution is nationally recognized for offering one of the most extensive extended learning programs in North America. The off-campus programs serve an additional 8,500 students at 70 sites and utilize 1,200 adjunct faculty.

The college is seeking an outstanding leader with the vision to assist the university's efforts to move into the next century as a modern institution with a clear focus on promoting a strong learning and research environment. As the chief academic officer for graduate students, the Dean reports directly to the Provost and serves on the Council of Deans. The successful candidate will be expected to provide leadership in the planning and delivery of high quality research and graduate programs. The Dean is accountable for the resources and long-range curricula planning to achieve the mission of the college and the university.

The college offers graduate programs leading to eight doctoral degrees, two specialist's degrees, more than fifty master's degrees, and nine graduate certificates in numerous fields of study including teacher education, health-related professions, business, technology, science, humanities, arts, and law. The Dean also carries the title of Assistant Vice President for Research who is responsible for facilitating institutional support of research, including proposal preparation and external grant funding; and maintaining a positive, effective interaction between federal agencies. The position of the Office of Research and Sponsored Programs is to foster high-quality scholarship and sponsored research and to assure compliance with regulations related to grants, contracts, copyrights, patients, and associated matters.

Required Qualifications for the position include and earned doctorate; an outstanding record of excellence in teaching and scholarly activity sufficient for appointment at the rank of a tenured full professor in an academic department; successful experience in securing external funding; knowledge of regulatory and business matters related to grants, contracts, copyrights and patents; experience in the planning and management of budgets; effective communication skills; demonstrated commitment to shared governance, diversity, and affirmative action; and a record of outstanding leadership and administrative skills. Experience at a graduate program level preferred.

REVIEW OF APPLICATIONS will begin December 3, 1999, and will continue until the position is filled. The anticipated starting date will be July 1, 2000. Candidates should send a letter of application; resume; statements of their educational and administrative philosophy; and the names, addresses and phone numbers of three to five references. Inquiries, nominations and applications should be forwarded to: Office of the Provost, Dean's Search, Warriner Hall 112, Central Michigan University, Mt. Pleasant, MI 48859, Tel (517) 774-3932, Fax (517) 774-2042.

Central Michigan University, an AA/EEO institution, is strongly and actively committed to increasing diversity in its community. URL's include: http://www.cmich.edu; http://www.grad.cmich.edu; http://www.ocserv.cmich.edu; http://www.provost.cmich.edu; http://www.cmich.edu/AAEODIRECTOR

EMINENT SCHOLAR OF HISTORY

Covington College invites applications and nominations for an Eminent Scholar of History endowed chair, a tenure track position reporting to the Chair of the Division of Social Sciences. Primary responsibilities include involvement in research activities focused on the local and state level, development and implementation of educational programs for the entire community: support as a College liaison to the community and appropriate educational institutions; and services to the College's students through the teaching of four courses per year. See details at: http://www.uc鹈epatched.edu for a complete description and application procedures.
ROWAN UNIVERSITY

FACTOR POSITIONS

Rowan University is accepting applications for full-time tenure-track positions beginning September 1, 2000, unless otherwise noted. All positions are at the Assistant Professor level, and are subject to available funding. Selected appointments (noted as **) are negotiable to a higher rank depending on qualifications. Inquiries should be directed to the contact person noted below at Rowan University. (All Millennial Fellows: Applicants should provide a recent and comprehensive curriculum vitae, including complete set of publications and research statements. Support of up to $10,000 per year is also negotiable.)

Rowan University (formerly known as Glassboro State College) is a selective medium-sized university located in southern New Jersey, between Atlantic City and Philadelphia. In 1966, Rowan University received a $100 million gift from Henry and Betty Rowan, one of the largest gifts ever bestowed on a public university. The gift has been a catalyst for the university’s transformation into a university of regional prominence. Founded in 1923 as a normal school for teachers, the university enrolls over 9,500 students in degree programs ranging from bachelor’s through doctoral. The University is divided into six colleges: Business, Communication, Education, Engineering, Fine and Performing Arts, Liberal Arts and Sciences, and University College. The 290-acre campus contains 31 buildings, including six residence halls and three apartment complexes. The university was also the site of the historic Summit Conference between President Johnson and Russian Premier Kosygin in 1967.

COLLEGE OF BUSINESS

Applications will be reviewed beginning November 15, 2000, until positions are filled. Applicants should have a Ph.D. or DBA, or have achieved ABD status with an acceptable completion date. 

*Finance - Teach undergraduate/graduate courses in financial institutions and financial markets. Contact: Ms. Carol Welch, Chair, Accounting & Finance. E-mail: welch@rowan.edu.

Biological Sciences - Teach introductory biology and other courses such as plant soil systems or morphology. Responsibilities may include development of master’s degree program. Research involving undergraduate students is expected. Ph.D. with a specialization in any area of expertise required. Contact: Dr. Andrew Priest, Chair, Biological Sciences. E-mail: priest@rowan.edu.

Physics - Experimentalist sought to teach all levels of physics classes and laboratory science and non-science majors and to involve undergraduates in any area of experimental research. Ph.D. in physics or related field required; excellent community skills and teaching ability, some post-doctoral experience preferred. www.rowan.edu/physics for details of the application process. Deadline: 1/18/2000. Contact: Dr. Maureen O’Halloran, Chemistry and Physics.

Chemistry - Physical chemist to teach Physical Chemistry, Physical Chem for Biochemistry, molecular biology, or a related field. Ph.D. in physical chemistry required; excellent communication skills, and strong interest in undergraduate education. Post-doc experience preferred. www.rowan.edu/chemphys for details of application process. Applications will be reviewed beginning November 15 and continue until the position is filled. Contact: Joanne K. (C) 12/15/99. (D) 12/15/99. Contact: Dr. Seth Bergmann, Computer Science. E-mail: bergmann@rowan.edu.

Criminal Justice - Specialist in some combination of the areas of Courts, Law, Police, and the Criminal Justice System. Ph.D. in Criminal Justice or related discipline preferred. Teaching duties will include introductory classes on courts as well as upper division courses.
PROVOST AND DEAN OF THE FACULTY
Mills College - Oakland, California

Mills College, the oldest women's college established west of the Rockies and located in Oakland, California, invites applications and nominations in its search for a Provost and Dean of the Faculty.

Founded in 1852, Mills College is an independent, liberal arts college offering 34 undergraduate majors and 22 graduate programs. With approximately 733 undergraduate women and 400 graduate women and men students, the faculty numbers 167 members, 79 full-time and 88 part-time. Mills College is a community of people committed to women centered education, a dynamic environment in which students work, learn and explore together.

The Provost and Dean of the Faculty is the ranking educational officer of the College, reporting directly to the President. In this role, the Provost shares in the College-wide leadership and in institutional policy formulation, planning, and administration.

The College seeks a Provost and Dean of the Faculty with strong leadership skills, integrity, creativity, and energy who will: Advance the mission of the College as a women-centered liberal arts institution in a global, multicultural society.

Provide leadership and advocacy for the faculty including but not limited to: provide creative vision and leadership for the academic programs and curricular innovation; provide oversight of academic departments in conjunction with the Academic Dean and Department Heads; supervise the work of the Director of Library and Academic Computing Services, the College Chaplain, the Director of the Art Museum, and Director of Technical Services. Cultivate a collaborative environment among the faculty members, faculty committees, and administrative departments.

Qualified candidates must have an earned Doctorate or terminal degree, with an academic portfolio suitable to a full professor, including a distinguished record in teaching, research, and scholarship. Senior level administrative experience, outstanding communication skills, the ability to build consensus and a commitment to multiculturalism, and shared governance are required.

Review of credentials will begin immediately and continue until the position is filled. Letters of nomination or applications, including curriculum vitae, may be submitted in confidence to:

Provost and Dean of the Faculty Search Committee, Mills College
c/o Educational Management Network/Witt/Kieffer
98 Old South Road, Nantucket, MA 02554

Educational Management Network, a division of Witt/Kieffer, is supporting Mills College with this search. **THE UNIVERSITY OF DAYTON**

**SCHOOL OF LAW**

**Wired for the future**

**Built for success**

- **ADMISSION**
We seek to enroll an entering class that is both diverse in its composition and capable of mastering the skills needed for the legal profession. Apply online and we will waive the application fee.

- **FINANCIAL AID**
Merit-based scholarships range in value from $2,500 to full tuition per year and may be renewed for the second and third years of law school. Last year, one-half of the entering class was awarded scholarships.

- **ENVIRONMENT FOR LEARNING**
A two-year old, 122,500 square-foot facility with 1,400 data and power outlets for technologically-enhanced performance and achievement.

- **ACADEMIC EXCELLENCE PROGRAM**
A voluntary academic support program is offered throughout the first year of law school where weekly tutorials are designed to strengthen students' skills in the areas of critical reading, legal writing, and legal analysis.

- **FACULTY WHO CARE**
Our 28 faculty members at the University of Dayton School of Law care about teaching and the success of students. The "open-door" policy of faculty members encourages interaction between students and faculty outside of the classroom.

**EASTERN COLLEGE**

Eastern College, a Christian college of the arts and sciences, invites applications for the following faculty positions for the 2000-2001 academic year. In fulfilling its mission of "the whole Gospel for the whole world," the college is dedicated to preparing undergraduate and graduate students for thoughtful lives of Christian faith and service. The multicultural community of Christian scholars embraces and promotes diversity among students, faculty, staff, and administration. Located in suburban Philadelphia, on a scenic, park-like campus, Eastern College is accessible to the educational and cultural resources of the major metropolitan centers of New York City, Baltimore and Washington, D.C.

The Eastern College community seeks faculty who:
- Understand and support the Eastern College mission statement
- Are gifted teachers with a strong interest in student life
- Inspire students to follow Jesus Christ by dialoging on the integration of faith, life, and learning
- Have the potential for making a significant contribution to their field of study
- Value collegiality, teamwork and service in a multi-cultural learning environment

Generally, faculty duties include teaching four courses each semester advising students during scheduled office hours, participating in faculty meetings and working committees. Each position is full-time, tenure track (with the exception of instructor levels). Rank and salary are commensurate with experience.

- **Education:** The successful candidate must be eligible for elementary and/or special education certification in Pennsylvania. Experience teaching in the fields of certification is essential, preferably in an urban setting. Administrative or supervisory experience is a plus. Teaching is expected at both the undergraduate and graduate levels. Supervision of student teachers and advising of both undergraduate and graduate students will be part of the faculty load. There may also be assignments in the college's CORE curriculum. A doctorate in education is preferred. However, an ABD in final stages will be considered.
  - **Exercise Science:** Chair of the Exercise Science Dept. Candidates should possess an earned doctorate in Exercise Science, a strong interest in teaching undergraduate students, proven leadership and administrative abilities. Athletic training background and certification (NATA/BOC) are desirable.
  - **History:** United States History. Early American. Teaching responsibilities include survey courses in American History as well as Western Heritage in Eastern's CORE curriculum. Secondary field in a non-western discipline desirable. Organizational skills and teaching experience required. Ph.D. in hand by August 2000 is essential.
  - **Arts:** Associate/Assistant Professor in the M.A. School Counseling and M.S. School Psychology (joint appointment) programs. F in counseling or clinical psychology or Psy.D. required (ABD candidates enrolled in a doctoral psychology program strongly encouraged to apply). Experience working as a school counselor or school psychologist is required.

- **Graduate Counseling:**
  - **Mathematics:** Assistant/Associate Professor level. The preferred candidate will have a doctorate in Mathematics or Math Education, including expertise in an area of computer science, preferably programming. Courses are to include all levels of undergraduate mathematics and 1-2 courses in computer science. The candidate must demonstrate exceptional competence and comfort in teaching and mentoring students. A strong interest in developing and sharing the mathematics and future computer science programs, in line with the mission of the college is required.

- **Political Science:** Comparative politics and international relations. A Ph.D. is preferred, but an ABD in final stages will be considered. Applicants are desired from all areas of comparative politics and international relations and upper-level courses in the candidate's area of concentration. The successful candidate should also expect to teach in the college's CORE curriculum and possibly a course in political theory.

- **Social Work:** Assistant/Associate level, in a CSWE-accredited BSW program. Candidates must have an M.S.W. degree from a CSWE-accredited school of social work (social work programs) and at least two years post-M.S.W. experience in social work practice. Candidates should be prepared to teach in several areas of the social work curriculum (but not limited to) social work research and social welfare policy and services, as well as in the undergraduate CORE program.

- **Sociology:** Teach introductory and advanced courses in both our traditional undergraduate program and in our innovative urban studies program located in central Philadelphia. Teaching areas include sociological theories, urban sociology, economic sociology and social justice. Minimum requirements of an M.A. or M.S.W. are expected. The ability to integrate distinct content with a Christian worldview is essential.

- **Spanish:** Assistant Professor level. Promote Spanish language learning with particular attention to the integration of language, culture, and Spanish studies. Applicants with proficiency in Spanish are preferred and student internships in the Hispanic community in Philadelphia. Applicants should have the Ph.D. in Spanish or A.B.D. in final stages of dissertation. Native or near-native fluency is essential for the role. Spanish language acquisition, and Spanish language and culture studies. Background and experience necessary in current teaching methods, test-taking proficiency, testing, content-based instruction, curriculum development. Experience in computer-assisted language learning and ability to teach beginning, intermediate, and advanced Spanish strongly encouraged.

- **Assistant/Associate level position in the M.A. Course program. Ph.D. in counseling or clinical psychology or Psychology required. ABD candidates enrolled in a doctoral psychology program strongly encouraged to apply.** Experience working as a school counselor or school psychologist is required.

Assistant/Associate level position in the M.A. Course program. Ph.D. in counseling or clinical psychology or Psychology required. ABD candidates enrolled in a doctoral psychology program strongly encouraged to apply. Candidate must have at least three years of clinical experience working with individual, Clinical or other significant experience in an urban multicultural setting is also strongly preferred. S and organizational and conceptual skills are desirable.

Two Non-tenure track Instructor positions for Community/Community in the M.A. Counseling program. Ph.D. in counseling or clinical psychology or Psychology required. ABD candidates enrolled in a doctoral psychology program strongly encouraged to apply. Candidate must have at least three years of clinical experience working with individual, Clinical or other significant experience in an urban multicultural setting is also strongly preferred.

ASSISTANT PROFESSOR SOCIOLOGY

American University's Department of Sociology is seeking applications for a full-time, tenure-track position at the rank of Assistant Professor of Sociology, specializing in International Training and Education (ITE), starting Fall 2000. Ph.D. and evidence of scholarship required. Responsibilities include teaching MA courses, recruiting and advising graduate students in International Training and Education; working with the faculty of the School of Education (SOE) to develop interdisciplinary initiatives; and directing the ITE Program. The successful candidate will add to the Department's mission of international education, policy analysis, and research; he/she should also be deeply committed to interdisciplinary learning, the application of new technologies in teaching and scholarship, and to the preparation of students for life in a diverse and rapidly-changing global society.

Consideration of applications will begin on November 1 and continue until the position is filled. Send cover letter, curriculum vitae, three letters of reference and other relevant material to: Search Committee, Department of Sociology, American University, 4400 Massachusetts Avenue NW, Washington, DC 20016-8072.

American University is an EEO/AA employer committed to a diverse faculty, staff, and student body. Women and minorities are encouraged to apply.

**CHANCELLOR**

University of Illinois at Springfield

Nominations and applications are invited for the position of Chancellor of the University of Illinois at Springfield (UIS).

The Chancellor is the chief executive officer of the campus and reports to the president of the University of Illinois. The University seeks a proven leader who will continue the successful development of the campus’s academic programs and public service mission.

Founded in 1969 as Sangamon State University, UIS became the newest and smallest campus of the University of Illinois on July 1, 1995. Emphasis is placed on public affairs instruction and research and service carried out through community partnerships.

The campus offers bachelor’s, master’s degrees and a Doctor of Public Administration. UIS currently enrolls students at the second-semester sophomore level and continues their education through junior, senior, and graduate levels. State approval was granted this fall for the Capital Scholars Program, which will result in the admission of first-year students in the fall of 2001. Current student enrollment is 4,100 with 188 faculty, 199 profession and 265 support staff.

The Chancellor must have significant diverse senior administrative experience, an earned doctorate, demonstrated leadership ability, as well as understanding and appreciation in the uniqueness of the campus within the University setting. A successful record on inclusiveness, diversity and sensitivity relative to a multicultural campus is required.

The Chancellor Advisory Committee will begin reviewing nominations and applications immediately and will continue to accept applications until a new Chancellor is selected. To assure full consideration, however, candidate materials should be submitted by January 1, 2000 to:

Dr. Frank Kopecky, Chancellor Advisory Committee
University of Illinois
Office of the President
364 Henry Administration Building, m/c 346
506 S. Wright Street
Urbana, IL 61801

The University of Illinois is an affirmative action/equal opportunity employer.

DIVERSITY IN DOLLARS AND CENTS

Public universities frequently proclaim that they are diverse institutions. Many have improved their percentages of minority students, faculty, and staff. Are they forgetting a vital aspect of diversity—doing business with minority-owned companies?

Institutions allocate finances and personnel in an effort to attract top-quality minority students, faculty, and staff. We want our campuses to mirror our communities. Then we purchase goods, services, and construction from large national majority-owned firms—focusing locally-owned minority business.

We justify this with claims that the pay that are no longer relevant. Some are under the misperception that they will be forced to accept inferior products or services just to “help out” minority businesses. Not so. Small minority-owned firms have repeatedly demonstrated their ability to deliver. Some mistakenly believe that viable minority-owned businesses capable of servicing large universities are scarce. Some misperceive minority businesses as small, marginally profitable, “mom-and-pop” retail sales and service outlets when, in reality, the fastest-growing minority business segment is comprised of larger firms engaged in manufacturing, wholesale trade, professional services, and construction services.

Minority-owned businesses have grown explosively over the last 10 years. At double the rate of all firms in the U.S., both in numbers of new firms and total sales. Recent SBA estimates place their number at nearly 2 million, with total sales of $335 billion. Hispanic firms are the largest single segment—772,000.

Some are under the false impression that minority business owners feel they “deserve” contracts because of their minority status. Minority vendors I’ve worked with, though, have sought only a genuine opportunity to compete. Many times, we are not willing to introduce minority firms into the system unless they are clearly perfect in every way; an attribute we rarely require of the businesses that we are currently using.

In addition, most higher education institutions have assembled their minority business development or vendor diversity departments on a miniscule budget with little, if any, idea about how this new department should function. A “compliance only” attitude keeps this department understaffed, often with a purchasing agent whose secondary responsibility is that of an advocate for minority-owned firms.

But other higher education institutions—including the University of South Florida, where I work—have achieved exemplary records of involvement with minority-owned businesses. These public institutions have surpassed compliance and moved to true commitment. To be sure, many might have originally been motivated bystat requirement. But they have demonstrated—not only through dollars spent, but through a change in philosophy—the necessity to build relationships with minority small businesses. I have always believed that voluntary programs are more effective than those mandated. Ultimately, mandated minority business programs will be effective while those driven by commitment flourish.

How can this commitment be achieved in an institution with less than tax openness to doing business with minority firms? First, through leadership, university president must be committed to the program and communicate the need. They must create real opportunity for small minority firms. Next, vendor diversity department must be staffed with knowledgeable, gregarious, motivated individuals who understand the government procurement process and minority markets. These departments clearly defined objectives, and professionals who understand the necessity and requirements. Promoting successful efforts within the institution’s community is essential to maintain needed support of the program.

Strong second-tier (subcontracting) programs must be developed that are compelling reason for prime contractors to embrace proactive vendor diversity stratagem. Institutions must also create a plan to share information about qualified minority within their organizations, as well as with others fostering the same desire for commitment. They must also, at times, know how to say “no” if a product or service does not meet the institution’s needs, refer the vendor to a company where an opportunity might exist.

Soon all public university MBE programs might be in jeopardy. A Ward Conner anti-affirmative action effort similar to ones already successful in California, Washington recently began in Florida. It will certainly challenge our co-sponsors. A statutory requirement is eliminated along with all race and gender preferences, pro- competitiveness will most likely die. Those operating from commitment in severely tested. Public higher education institutions will need to develop procedures to encourage continued and expanded contracting with minority firms.

At USF, we believe that our support of a diverse vendor base contributes to economic growth and strengthens our community. Anything that interferes with collaboration should be viewed with apprehension and must be countered.

Steve Bazell, senior diversity coordinator at the University of South Florida, is West Coast President of the National Minority Supplier Development Council of Florida, executive board Member of the Hispanic Business Initiative Fund, and member of the Tampa Chamber of Commerce, Emerging Businesses Council.

FEATURES

Publisher's Picks List 1999
Hispanic Outlook's publisher presents a list of colleges and universities for Hispanic students. 6

Hispanic Outlook selects Scholarship Winners
Jose Bernardo Saenz and Keith Andrew Martinez—accomplished, well rounded, focused, and driven to success. 16

Ten Colleges Aggressively Recruit Hispanics
Colleges in California, Texas, New Mexico, Florida, Colorado, Ohio, and Michigan share their successful strategies. 18

Hispanics, Education, and Employment
A new 105-page report issued by HACU and ETS offers ways to empower Hispanic youth and adults. 25

College Prep in Houston and Manhattan
Prep for Prep
Two routes to college for minority youths—the longstanding NYC-based Prep for Prep, and a new charter school, YES Prep, with Texas-size aspirations. 28

Ph.D.s: Too Many or Too Few?
The Leadership Alliance takes issue with those who claim there are Ph.Ds being generated but few jobs for them to move into. 31

Mestas New Chancellor of UM-Flint
This poet and policymaker and expert on José Mestas comes to Michigan straight from the National Endowment for the Humanities. 34

A Personal Narrative as a Route to Voice
Muzzled in grade school by anti-Spanish rules, this professor now helps students find their voice for their college writings. 36

A CAPITOL VIEW

BY GUSTAVO A. MELLANDER

Although it's only fall, it's not too early for us to help those who will be seeking financial aid for next year. This is particularly true this year since new and flexible government programs are now in place.

Most states have struggled to keep tuition low. But with the passage of time and constricted state budgets, tuition has crept up year after year in state after state. So the reality is that now in 1999, most college students really need financial assistance to go to college.

College Student Aid

Luckily, a lot is available. And according to the nation's largest source of college student aid, the U.S. Department of Education, applying for federal student financial aid this year will be easier and faster than ever before.

"Most families are eligible for some sort of financial assistance to help pay for technical education or academic studies," U.S. Secretary of Education Richard Riley recently told The Hispanic Outlook at a special press conference. "I always encourage families to apply because they might be surprised at how much aid they qualify for, and now we've cut the paperwork in half and simplified the process for students reapplying electronically."

Further thanks to a streamlined federal application and improved electronic filing, the task is less daunting. This year, an estimated $50 billion in federal grants and loans will be awarded to nearly 8.5 million students out of 10 million applicants. At a minimum, nearly all students are eligible for loans without a federal interest subsidy but often, with rates lower than commercially available loans.

Innovations

With that opening, what can we do to get the word out? We suggest the following can help potential applicants and those who want to help them.

- Applying for federal aid is free. Filling out the Free Application for Federal Student Aid (FAFSA) is the first step in the process. Students can file electronically or on a paper application. Most state and institutional aid eligibility is determined by the FAFSA, so students should start there. Students are also encouraged to talk to the financial aid director at the schools they hope to attend to learn about financial aid packages and other sources of assistance.

- Electronic filing is faster, less error-prone. An estimated 12 to 14 percent of paper applications are returned for errors, adding time to the application process. By filing electronically, students can avoid delays because the software immediately identifies errors and allows for on-the-spot corrections. FAFSA on the Web is now available to students to apply electronically through the internet at <http://www.fafsa.ed.gov>.

- FAFSA on the Web can be accessed with many popular browsers, including Netscape Navigator and Microsoft Internet Explorer. Help is available by calling the customer service hotline at 1-800-4-FAX-FA (1-800-432-9327) (TDD 1-800-533-3243).

- Paper applications are shorter, easier. The paper application for the 1998-1999 school year has been cut in half—from 16 pages down to eight—and redesigned to be easier to complete. Students can obtain a FAFSA at high school guidance offices, libraries, or by calling the Federal Student Aid Information Center toll-free at 1-800-4-FAX-FA (TDD 1-800-533-3243).

- Reapplying for aid has been simplified. Most of the information given by an individual student on the 1998-1999 application will be the same (plus any corrections that were processed). Students simply have to add a minimal amount of new information and update any information that has changed since 1998-1999 (family size, for example).

- This year, students can reapply electronically. Students who received aid last year and who are reapplying for aid can use the renewal version of FAFSA on the Web. For renewal filing over the Web, students are given an electronic access code that serves as the student's signature.

- Parents will still have to sign if the applicant is a dependent. Check with the school financial aid administrator for questions about the renewal paper or electronic FAFSA, or contact the Federal Student Aid Information Center. The department has also listed useful information to make the process more efficient. Two of the key points are:

  - Be aware of deadline dates for the schools to which you are applying. While students have an ironclad window to apply for federal aid, some schools have early filing dates for their own institutional aid that might be based on federal aid eligibility (a list of state deadlines is included in the FAFSA instructions).

  - When answering the question, "How many students are attending college this year?" be sure to include self-pay, part-time students, even if attending part-time in 1999-2000.

Tax Credits

In addition to federal aid, loans, families can take advantage of new education tax that began last year. The first part is a $1,500 Scholarship for the first two years of college or vocational college. Later, a $1,000 Lifetime Learning Tax credit can be applied for classes beyond the first two years of college. Credit can also be for one to pursue classes for personal interest or to improve job-related skills.

These credits can be claimed by both federal taxpayers when they file their tax returns. When filing, 129 million students and their parents can benefit from the 1999 tax credit and the $1,000 tax credit benefit for 1998.

To take advantage of the tax credit, taxpayers must complete an IRS Form 8863 with their tax returns. For more information, call the IRS help line at 1-800-TAX-FORM (1-800-829-3676) or visit the U.S. Treasury Department's Web site at <www.irs.ustreas.gov>.

Bottom Line

Now having money is no longer just an excuse for not attending college.

Dr. Mellander is a professor at George Mason University.
November 19, 1999

Dear Colleagues:

For the fourth year, *The Hispanic Outlook* is proud to present its “Publisher's Picks”—those colleges and universities nationwide that in our view offer solid opportunities for Hispanic students.

The institutions selected are learning what it takes to attract, enable, retain, and motivate Hispanic students, so many of whom lack the legacy of college-educated families or even the dream of education credentials.

A new report by ETS and HACU claims that “by 2015, we could close the education gap between Hispanic and non-Hispanic White youth if we increased college participation among Hispanic youth by 10 percentage points.” Ten percent sounds daunting, but perhaps not impossible. Success will require informed, focused, and funded effort...as well as some good and unforeseen luck.

Educational equity for minorities must be given priority status in private homes and public housing, at PTA and council meetings, at the ballot box, and in the back rooms and chambers where political realities are effected.

*The Hispanic Outlook* will continue to do its part—offering information and a podium to all of you who now work so diligently on behalf of students young and old. This issue includes interviews with the two students who won this year’s *Hispanic Outlook* scholarships, as well as information on applying for next year's.

Our current People, Places, and Publication section, which keeps you up to date on the achievements of your colleagues across the country, appears on our Web site, www.hispanicoutlook.com, as well as in the magazine.

Best wishes to all of you, and to the seven thousand high school guidance counselors who are receiving this issue through a special mailing.

Sincerely,

José López-Isla

Sometimes, the biggest miracles arrive in the smallest bundles.

- But tiny infants grow and sometimes become world leaders.

Our beginnings were small, too.

But in just 25 years,

The University of Texas Health Science Center at San Antonio

★ has become a comprehensive health university for San Antonio and the South Texas/Border Region;
★ has had a $25 billion economic impact on the community; and
★ has gained international recognition for the excellence of its research in areas such as cancer, organ transplantation, diabetes, infectious diseases and diseases related to aging.

A WORLD CLASS COLLEGE,
LOCATED RIGHT IN YOUR BACKYARD

As the founding College in The City University system, City College offers outstanding benefits that exceed many of the area's top private colleges. Our excellent research programs, funded by public and private grants, make City an ideal choice for Science and Engineering students. Our programs in Architecture, Communications, Education and Liberal Arts are some of the best in New York State. Combine this with top-notch faculty, a beautiful urban campus, and tuition costs that are a fraction of those at private schools, and you'll see why an education at City College is truly a thing of brilliance.

The Hispanic Outlook Scholarship Fund is open to high school seniors of Hispanic descent, with at least one parent from a Spanish-speaking Latin American country or Spain. Applicants must be legal residents or citizens of the United States.

Applicants must be entering as a full-time student, in a 2- or 4-year accredited U.S. college recommended in the Publisher's Picks List as printed in the November 19, 1999 issue of The Hispanic Outlook in Higher Education magazine.

Scholarship is renewable annually by students maintaining a 3.4 GPA.

Scholarship amount is $1,000. Application deadline is May 1, 2000. Scholarship recipients will be notified by August 1, 2000.

Hispanic Outlook Selects Scholarship Winners

Jose Bernardo Saenz and Keith Andrew Martinez

BY
Mari Carmen Sarracent

Selecting HOS scholarship winners becomes more difficult as the pool of qualified applicants grows exponentially. The 40 GPAs, excellent recommendations, and impeccable competitive transcripts narrowed the field down to two winners very difficult.

This year's distinguished winners are Jose Bernardo Saenz of Miami, Florida, and Keith Andrew Martinez of El Paso, Texas.

He has a widespread and richly deserved reputation for honesty, determination to excel, and a genuine love of learning....

Guidance Counselor
Ruthe Rosenblatt
speaks of Saenz

Jose Bernardo Saenz, graduate of Coral Gables Senior High School, was accepted at Cornell University in Ithaca, NY. Ruthe Rosenblatt, Saenz's high school guidance counselor, shares her thoughts about Coral Gables’ recent salutatorian: “He's so humble and brilliant. Saenz is a renaissance man. He’s outstanding in every possible way. He has so many gifts.”

Both Rosenblatt and Saenz's mother, Maria, say that his self-motivation and hard-working personality are at the root of his academic success. He has always been fortunate, too, to have his family's support in all his endeavors.

Saenz has wide-ranging interests, but history and chemistry are two subjects that stand out and might, he says, be part of his future academic career.

“I've narrowed down my major to pure chemistry. I did two years of chemistry in high school, and I picked it up pretty easily and enjoyed it. I've also taken several years of French, so I may focus on French literature or history.”

Making the move from Miami to the Ithaca, NY, campus has met Saenz's college expectations. And he says of Cornell, “It’s everything I had expected. There's so much out there, so many resources.”

Though very busy with his course load, Saenz is involved in other activities as well. He’s a volleyball referee for intramural sports on weekends and is looking to work with kids in a local school in Ithaca. Saenz is also a member of COSEP, a minority affairs organization on campus.

Although, he says, “high school and college are totally different in that about 90 percent of Cornell students were valedictorians or salutatorians in high school. You have to be disciplined and never doubt your abilities. If you try hard enough, you'll get it done.”

Saenz was involved in the International Studies Magnet Program, which according to Rosenblatt is the most rigorous program in Miami-Dade County. During his high school years, Saenz participated in many campus organizations, such as the National Honor Society, Science Honor Society, Key Club, Interact, SADD, and Equinox. He also found time to tutor students in AP calculus and chemistry, and volunteered at a local outreach center and other community service projects.

Mothers are known to be partial to their children's accomplishments, and rightfully so. But the entire Coral Gables high school community agrees with Maria Saenz that Jose is gifted. “He's an incredible kid. He's not conceited, and he's very down to earth. He has no airs about him. What he has most is discipline. Whatever he wants to achieve, he sets his mind to it and he does it.” The Saenz family, originally from Colombia, is very proud of Jose and has always been involved and concerned about Jose's education, notes Rosenblatt. Jose received an ovation at graduation. She said, “He gave a
beautiful speech, which he dedicated to an AP history teacher, Robert Schneider, he had in the 11th grade for six weeks, but who passed away unexpectedly from a heart attack."

In her letter of recommendation, Rosenblatt wrote: "Jose is an unusual person. Many young people with his superior intellect and grades would flout these attributes. Jose is both modest and humble about his accomplishments. He lacks any intellectual snobbery, which so many others inflect on their peers and teachers. He has a widespread and richly deserved reputation for honesty, determination to excell, and a genuine love of learning..."

Working toward a bachelor's at Cornell, Saenz admits that he's already thinking about graduate school and a Ph.D. "I'm happy that he got the recognition he did," says Rosenblatt. And now that he's in college, Rosenblatt is sure of Saenz's future. "I'm sure that he has a definite direction!"

KEITH ANDREW MARTINEZ

Harvard University welcomed one of El Paso's finest - Keith Andrew Martinez, a graduate of Del Valle High School, to the Class of 2003 under the Early Action program. Ranked first in his class, Martinez is recognized by his teachers, parents, and peers as a diligent and exceptional student. According to his guidance counselor, Ruben Flores, "He has pursued an exceptional college preparatory program and will graduate on the Distinguished Advanced Honors High School Program." Throughout high school, Martinez took advantage of advance placement courses - such as AP algebra, economics, English and debate class - offered at Del Valle High School and excelled in all of them. In addition to the HO scholarship, upon graduation Martinez was awarded the Sam Walton Scholarship ($1000), Ford Salute to Education Scholarship, and a Harvard Faculty Scholarship in the amount of $20,000.

Flores attests to Martinez's interest in taking advanced placement courses: "Keith is probably the most ambitious student I have ever known. Unfortunately, because there wasn't enough demand, there was a limited supply of AP classes available to fill his schedule. Thus, he compromised by getting an additional independent study class to fulfill his knowledge-driven hunger."

Martinez is clearly eager to learn. His course schedule reflects how challenging his semesters have been. But he also has managed time for a multitude of extracurricular activities, including the role of student council president. "His list of activities is the most extensive I have seen, yet he manages to contribute to every one in a meaningful way," noted Flores.

Teresa Chavez, Martinez's mom, recently told HO, "We are very proud of him, and we are happy that he accomplished his dream of becoming valedictorian of his class. He has always been dedicated to his studies as well as to helping others. "Keith has always been a hard worker. He wanted the school to offer more advanced classes, and he would tell the students to request them. He highlights how important that is in order to get ahead."

Martinez's involvement in the community follows wherever he goes - now in Cambridge, Massachusetts. Says Martinez, "There are so many groups. I've narrowed it down to a few groups, one that gives free legal counseling and another that works with inner-city schools to mentor K-5 students."

Martinez says that his participation in extracurricular activities dates back to his middle school years - "having skipped 6th grade, I didn't have many friends, and I began joining a lot of organizations and really liking it."

Martinez, who describes himself as an ambitious and aspiring Latino, hopes to practice criminal law. As for his first semester at Harvard, Martinez stated, "Harvard is great. It is an awesome institution. I'm so glad that I'm here. My classes are a lot of work, but I enjoy it."

Undoubtedly, Harvard is glad to have Martinez as part of its body. His acceptance letter says "In recent years, over 16,000 students have applied for the places in the freshman class. With more talented and qualified candidates than in any room to admit, the Admissions Committee has taken great care to choose individuals who pr..."

What is exceptional about two winners is that they are accomplished, well-rounded students-focused and driven to succeed academically - while still finding the time to have fun and give back to the community. I'm proud to highlight these accomplishments.

"His list of activities is the most extensive I have seen, yet he manages to contribute to every one in a meaningful way."

RUBEN FLORES, GUIDANCE COUNSELOR, SPEAKING OF MARTINEZ
Ten Colleges Aggressively Recruit Hispanics

BY GARY M. STERN

For obvious reasons, colleges in Miami, San Antonio, New York, or Los Angeles have an easier time attracting Hispanic students than do schools located in Iowa City, Minneapolis, or Seattle. Yet not all schools located in cities with large Latino populations attract a large percentage of Hispanics or nurture them upon their arrival. Here are 10 schools of the top 100 that have a strategy for attracting Hispanic students—from 4.5 percent to 78 percent Latinos of its student body (listed below—highest percentage of Hispanic students to lowest percentage).

#1 East Los Angeles College Moves into Hispanic Communities

When Ernest Moreno was named president of East Los Angeles College, a community college, in 1994, its student body was 58 percent Latino. But Moreno, himself a native of San Gabriel, knew that many Hispanic students were reluctant to leave their family and neighborhood to attend school. He opened satellite campuses in South Gate and Huntington Park, whose populations are more than 95 percent Hispanic. By 1997-98, its 40,000 students were 78 percent Hispanic, 15 percent Asian, 3 percent White, and 2 percent Black.

"Rather than depending on the students to come to us, we come to them," Moreno said. He estimated that over 90 percent of its students come from parents who are not college educated. "Having that first college experience helps to break down barriers," he added.

Students at East Los Angeles College study pre-engineering, allied health, nursing, respiratory therapy, education, and journalism. Many require remediation. "It's a balancing act to make up for what hasn't occurred at the high school level in English skills," Moreno admits.

Because of California's anti-affirmative action policies, Moreno has become more intent on preparing his students with a strong educational underpinning so that they can transfer to four-year colleges.

"The key in my community is constant reinforcement of the concept that they can do it. They can overcome. I always try to be positive," said this president of a Los Angeles community college at which three of every four students are Hispanic.

#2 An Affordable School That Reaches out to Hispanics—San Antonio College

Hispanics comprise 10,105 students of San Antonio College's 20,068 population, over half its student body; a fact that no other San Antonio community college can claim. The schools diverse student body reflects the city's multicultural population, which is about half Hispanic and half Anglo. But several factors beyond its local population explain the college's success in attracting Hispanic students.

One major factor is its reasonable tuition: 15 credit hours cost in-state students $486 including student fees. Since its students' average age is 26 and many attend part-time while working, its reasonable tuition makes attending community college viable. More than 9000 students, nearly 90 percent of its student body, receive some form of financial aid, and nearly 500 students participate in work-study programs.

While many colleges have less than 10 percent Hispanic faculty, San Antonio College has more than 20 percent—184 of its 987 faculty members are Hispanic. "Hispanic students see in front of them people who succeed. It means they can succeed as well," explains Dr. John Hammond, the school's director of public relations.

Creating academic programs that appeal to all students—not just Hispanics—is another key to the school's success. Its Computer Information System program leads to jobs in the internet and computer commerce, its Criminal Justice program leads to police employment, and its Urban Journalism Workshop, which offers special Dow Jones Scholarships, is one of the few of its kind in the nation.

San Antonio College strives to retain Hispanic students after attracting them. Its counseling program reaches any student who requires assistance, and its computer lab helps students who need remediation. Nearly half of the Hispanic students who enter graduate, a rate above the national norm.

Beyond its reasonable tuition and appealing programs, "All students are made to feel they are important through faculty and student interaction and through the active counseling department and social services," asserted Dr. Hammond.

#3 Cooperative Education and Academic Programs Help Latinos Succeed at LaGuardia Community College

At LaGuardia Community College, the "minority" is actually the majority. Of LaGuardia's 10,925 students, 37 percent are Hispanic, 20 percent are African American, 13 percent Asian, 10 percent White, and 1,300 students are international residents on temporary visas. Reflecting the diverse population of the borough of Queens, students at LaGuardia speak more than 115 languages and are almost as polyglot as the delegates of the United Nations General Assembly.

"LaGuardia can help a student get a job, provide them with a cooperative education, and can lead them to a four-year school," explains LaVore Desvigne, associate director of admissions. Indeed, more than 80 percent of LaGuardia students transfer to four-year colleges despite the fact that 60 percent of them required some form of remedial assistance in reading, writing, or mathematics. Almost 1,000 students graduated from LaGuardia in 1996, ranking it fourth in the number of students graduating from community colleges, behind Miami-Dade Community College, Manhattan Community College, and City College of San Francisco.

If a student wants an associate's degree and is looking for an immediate career, LaGuardia offers that option also. Popular majors include allied health, computer science, travel and tourism, business management, nursing, and occupational therapy.
Every LaGuardia student takes three semesters of cooperative education arranged by the school's Cooperative Education Placement Office. For example, an allied health major will intern at one of New York City's hospitals. A gateway course prepares students for their internship, showing them how to write a resume, prepare for an interview, and dress for work.

If students have difficulty speaking English, they can take ESL courses in CLIP, CUNY's Language Immersion Program, a non-credit program.

"La Guardia is not an Ivy League school," acknowledges Desvigne. "As long as a student has a high school diploma, we accept that student and help them succeed," she said.

### #4 Teaching Students Employable Skills: Albuquerque Technical Vocational Institute

While Albuquerque Technical Vocational Institute (ATVI) provides more transfer students to the University of New Mexico (the largest four-year school in the state) than does any other community college, it also prides itself as a school "whose primary mission is occupational training," said Joline Mahr, its director of public relations. Of its 16,228 students, 6,256 Hispanics who attend ATVI are provided with job skills at a very affordable price. Occupational courses for in-house students are free, subsidized by the state and a local mill tax. Liberal arts courses cost a reasonable $30 per credit.

Its most popular vocational courses are business occupation, health, technologies, and trades, among the 41 certificates and 34 associate's degrees offered. Technology courses such as Web and computer technology fill up quickly. An active job placement office assists students in gaining employment.

Retention Hispanic and all students is a priority at ATVI. "We have programs specifically geared to Hispanic students to assist them in staying in school through tutoring, mentoring, and referral to agencies for childcare help," said Mahr. Organizations such as the Spanish Club and the Association of Latin American Students help students feel accepted at the school.

"ATVI is an excellent place to continue a student's education, gain job skills that will make the person employable, or gain credit to transfer to a four-year school," said Mahr.

### #5 Barry University: Helping Spanish-Speaking Students Adjust to College

Many Latinos attend Barry University in Miami because they are attracted to its "special transition programs built into the curriculum to help students whose primary language is not English make the necessary adjustment into our culture and classes," said Francisco Duque, a media relations specialist at Barry University. Several career programs such as Cross-Cultural Management, which teaches international business, Elementary Education, Liberal Studies, Nursing, and Social Work attract Hispanics and other students.

Barry University's 7,700 students reflect the population of Miami: 50 percent White, 30 percent Hispanic, and 17 percent Black. Though 76 percent of its students hail from Florida, Barry University attracts students from 47 states and 64 countries. The school attracts many Catholic Hispanics because it was started by Dominican Sisters in 1940.

US News and World Report recently ranked Barry University as the No. 1 regional university in the south for diversity. It also led all schools in graduating Hispanics with master's degrees in the health and related sciences.

Moreover, it has many bilingual Hispanic staff. Of its 412 faculty staff, 17 are Hispanic, more than 27 percent, and 22 full-time professors are Hispanic, more than 8 percent of staff.

Why might a Hispanic student be attracted to Barry University? Duque replied, "It offers 56 undergraduate majors, 48 graduate degree programs, 24-1 student to faculty ratio, a Catholic dimension, and personalized attention.

### #6 A College That Became University: New Jersey City College

In 1958, Jersey City State College became New Jersey City University. The school, formerly Jersey State Teachers College, entered the millennium as a university, having met a variety of criteria, including offering substantial number of graduate programs. Being named a university "affirms that we have reached a certain level of development in terms of the full spectrum of academic programs," said Dr. Carlos Herran, president of New Jersey City University.

Of its 6,412 undergraduate students 27 percent are Hispanic, 41 percent White, 19 percent African American, 10 percent Asian. Originally, the school was a college serving the heterogeneous population of Hudson County, which provides 60 percent of its students. What started out as a geographic campus became a "magnet" to attract students, said its affable president.

Most of its students hail from working-class, and more than 80 percent of its students receive some form of federal or state aid. But New Jersey City University has managed to hold its tuition at a reasonable $4,000 a year, making it affordable. The most popular major at New Jersey City University is business, followed by criminal justice, nursing, and elementary education.

Dr. Hernandez, who was raised in Queens and graduated from City University and earned his doctorate from City University, is a role model for Hispanic and other working-class students. "I come from a background similar to theirs. With hard work, good luck, and a commitment to a vision a person can achieve his goals and be successful," noted Dr. Hernandez.
Hispanics are also in leadership positions as associate vice president for student affairs and chairs of health sciences and Latin American studies.

“Our mission,” said Dr. Hernandez, “is to bring in a diverse student population that comes to us eager and motivated and have them undertake a rigorous academic program.”

#7 Working with Community Colleges to Attract Hispanics to the University of Southern Colorado

Walking through the campus of the University of Southern Colorado, located in Pueblo, a student will hear German, Italian, and French as well as Spanish. Its business school, one of its most respected departments, attracts more than 200 international students from around the world. The 1,033 Hispanic students (most of whom are Chicano Americans) comprise about one-quarter of the school’s 4,029 enrollment.

The University of Southern Colorado’s ethnic population reflects the diversity of Pueblo, Colorado, which is located south of Colorado Springs. Since the town is 30 percent Hispanic and the school is close to 25 percent Hispanic, its student population matches the city’s demographics. To keep the pipeline of Latinos flowing into the school, recruiters reach out to local high schools with large Hispanic populations and target community colleges.

USC president Tio Guerra, who is Hispanic, visits local high schools himself to inform Chicano students that they are welcome at the four-year school. The school’s recruiters target community colleges such as Pueblo Community College, Pikes Peak Community College, and Lamar Community College, which have large Chicano populations, to transfers and articulation between the schools. Its five-year business program that grants an MBA degree helps attract international students, and its mass communication major, highlighted by the school’s own television station, also appeals to many students.

Hispanic students who require academic assistance have a variety of choices. Students take advantage of tutoring programs at a math and English center, and are helped by on-line writing and math tutoring.

Student organizations such as La Sociedad de las Hermanas y los Hermanos stress networking opportunities. MECHA promotes educational achievement, and the National Hispanic Institute Collegiate Leadership Network organizes a national conference that encourages leadership. “Collectively, these student organizations,” said Reuben Martinez, associate provost, “provide students with a cultural ambiance of educational success.”

“Having a Hispanic president sends a message that you can do what you want and go as far as you want,” explains Terry Freeman, the schools director of communication services.

#8 Still Appealing to Chicanos Despite Affirmative Action Restrictions—San Jose State University

San Jose State, like all other state universities in the California collegiate system, can no longer recruit by ethnic background. Nonetheless, of its 20,681 undergraduates, Hispanics, who are mostly Mexican Americans, comprise 14 percent of its student body. Its remaining students consist of 30 percent Asian, 31 percent White, and four percent African American.

“San Jose State is a welcoming culture,” explains Sylvia Hutchinson, a public affairs officer at the college. “It’s a crossroads for many cultures. A Mexican American or Latino will have exposure to many cultures, including a large Vietnamese contingent. Any student who graduates with a four-year degree has excellent job prospects because of the Silicon Valley boom. It’s a ticket to a good job,” she said.

Because of its Silicon Valley connection, computer science and management information systems are the two most popular majors. Electrical engineering and art follow.

Chicano students use the Chicano Resource Center. SJSU also has articulation agreements with the nearby National Hispanic University to help Latino students transfer in their third year, and has reciprocal library agreements with the school.

The oldest public college in California, San Jose State started as a teacher’s college in 1857, but is now a full-service university, attended by a diverse population, despite the state’s anti-affirmative-action policies.

#9 Appealing to a Growing Hispanic Population—Cleveland State University

Unlike San Antonio and Miami, Cleveland is not a city that attracts large numbers of Hispanics. But Cleveland State University is making an effort to attract Hispanics, who are a rising population in Cleveland, according to Dr. Njeri Nuru-Holm, the college’s vice president for minority affairs and community relations. “Hispanics are migrating north,” she added. Twenty-two
percent of its student body consists of minority students (African Americans constitute the largest segment), so Hispanics should feel accepted at this culturally diverse campus.

Hispanics account for 263 of Cleveland State University's 16,326 students or about six percent of its student body at this urban commuter school located in the heart of Cleveland. Most of its students are part-time. The average age is 28. "Half of our students are right out of high school, and half are older. Our students are jugglers who are handling family responsibilities, work, and school," said Dr. Nuru-Holm.

Since many Hispanic students begin their college education at affordable community colleges, Cleveland State has developed articulation agreements with several local community colleges to encourage Latinos to make the transition to a four-year college. To ease Hispanic students transition into college, Hispanics and other minorities participate in CLASS, Cooperative Learning and Success System, a summer bridge program between high school and college.

Two leading campus organizations encourage participation of Latino students: Oyelo focuses on political issues and community service while Los Latinos Unidos concentrates on campus issues and cultural activities. Other programs include the Esperanza Scholarship, for Latinos, and Link, which arranges mentors and corporate internships for minorities. Illustrating the school's multicultural spirit, the Hispanic Art Exhibition last year was presented at the African American Cultural Center.

Hispanics, of course, major in a variety of subjects but are often attracted to the school's specialties in Latin American studies, urban affairs, social work, education (particularly supplying teachers for Cleveland's public schools), and its new criminology program.

"Hispanic students and other students can succeed at Cleveland State because we have a high retention level, a quality and stable faculty, and Hispanic role models," said Dr. Nuru-Holm.

#10 Maintaining Cultural Diversity at the University of Michigan

More than 21,000 students applied for the 5,200 slots in the University of Michigan's entering class in 1992 which means that three of four students were rejected. Despite lawsuits by some of its graduate students, the University of Michigan is striving to maintain its commitment to diversity, as chronicled in *Hispanic Outlook* in 1996: "We're committed to excellence," said Lester Monis, its associate provost for academic affairs. "In order for us to reach excellence, we need a diverse campus," he said.

Of its 23,000 students, 45 percent are Hispanic, 95 percent are African American, 11 percent are Asian, and one percent are Native American. In total, minorities compose 26 percent of the University of Michigan's student body. To gain acceptance, students must have a B or B+ average in high school with a minimum of 1200 on the SATs. Critics have questioned why the University of Michigan attracts only half of the nine percent Hispanic population in the U.S., but Monis noted that "We're very aggressive in our recruiting efforts." Many academically gifted students who graduate from the University of Michigan advance to law, medical, and other professional schools.

The University of Michigan targets cities in Michigan—such as Saginaw, Bay City, and Grand Rapids— that have larger number of Hispanic students—but also sends recruiters to Chicago, New York, and Los Angeles in search of a diverse student body. "The most qualified students have a chance to gain a scholarship that covers tuition," noted Jim Vanhoke, associate director of undergraduate admissions. Since one year's tuition and board cost about $26,000, scholarships and financial aid are required for most students.

The Minority Student Services and Office of Academic Multicultural Initiatives (OAMI) provide resources to help minority and Hispanic student. OAMI organizes pre-college visitation for interested minority (and other) students, and brings in cultural and ethnic activities.

Once students are accepted, the school strives to retain them. More than 84 percent of all students who are accepted graduate. "3 percent of a minority students graduate, and 88 percent of entering Hispanic students graduate.

Lee Bollinger, president of the University of Michigan, is "fighting lawsuits and is trying to maintain a diverse student population as possible. Monis said.

When one thinks of Las Vegas, glamour and excitement come to mind. In Nevada, it's a prime vacation spot where visitors try to enrich their lives through high rolling and high-budget theatrical presentations. Yet it is also a place where people with high career aspirations enrich their lives. Located in the foothills of the scenic Sangre de Cristo Mountains, Las Vegas, N.M. has a population of about 16,000 people and offers the friendliness found only in a small town. Albuquerque, the big city, is only two hours away. The surrounding area is rich with recreational activities, including al and Nordic skiing, water skiing, bicycling, hiking, horseback riding, swimming, ice skating, hunting and fishing.

Northeastern New Mexico is also a mecca of cultural and arts activity with both Santa Fe and Taos only one hour's drive away. There is more to enrich the lives of area residents. Take, for exam- the recognition for excellence earned by one very progressive institution of higher learning that also serves as a hometown univer This summer, New Mexico Highlands University in Las V. announced an astonishing array of innovative program options for students seeking specialized and unique instruction. Among these new offerings is a natural resources management degree program, graduate degree combining media arts and computer science, a new law enforcement degree program. There is a ground-breaking degree program to address the state's teacher shortage in mathematics and computer science—a new major in math and computer science for secondary school teachers. In addition, the institute Child Development Center recently received accreditation by the National Association for the Education of Young Children (NAEYC). This prestigious recognition has been achieved by only 10 percent of early childhood programs nationwide. Highland's center is the ond four-year school to be so accredited in New Mexico. th University of New Mexico is the other. As a result of this nat- accreditation, the center automatically receives the highest des 10on from the state, which is the appointment as a "gold" facility.

There is also a tie to a very culturally rich past in the re- historic renovations on campus include the restoration of DeN Hall, a building designed in the Spanish Colonial Revival style completed in 1928. Used as a primary school into the 1980s, building will soon house classrooms for college instruction. With much dynamic growth at New Mexico Highlands University, it

Sélima Rael, New Mexico Highlands University president

Wonder that we extend a welcome to the institution as our most recent Honor Roll Inductee.

President Sélima Rael underscores the university's concern for addressing the needs of the diverse citizens of the area. "The mixture of cultures, backgrounds, and perspectives on campus gives every student the chance to gain a greater understanding and appreciation for different peoples with the common goal of a Highlands education." He comments, "At Highlands, students are the focal point of institutional commitment. Students become integral members of the NMHU community and vital contributors to the success of the institution. Highlands combines a wealth of educational opportunities common at large state universities with the personal attention found at small private colleges."

President Rael notes that although Highlands was founded in 1893 as a school dedicated principally to training New Mexico's school teachers, today the institution serves students who are pursuing a broad spectrum of academic interests. He points out that the university offers undergraduate and graduate degrees in ten departments in the College of Arts and Sciences and in the schools of Education, Business, and Social Work. Major disciplines include behavioral science, communication and fine arts, engineering, English and philosophy, history and political science, languages and literature, mathematics and computer sciences, life science, business, education, and social work. "The array of academic and cultural possibilities extends far beyond the classroom," Rael maintains. "In addition to the research projects and cooperative education programs possible for most students, there is a full slate of student activities to pursue on and off campus."

Highlands University was founded in 1893 as New Mexico's School when New Mexico was still a territory. Recognizing an expanding mission of the institution, the state legislature changed the school's name in 1941 to New Mexico Highlands University, derived from the area's magnificent Rocky Mountain terrain.

Today the university has an enrollment of more than 2,500 students and a highly qualified faculty of 121 full-time professors.
percent of whom have a doctorate or terminal degree in their field. Highlands offers 69 undergraduate majors, minors, and concentrations in a wide range of traditional and unique areas, as noted by President Rael. Professional preparation is offered in pre-law and health and science fields, including pre-med, engineering, forestry, medical technology, and biology. Teacher certification programs are offered for elementary, secondary, bilingual, and special education licensure. In addition to distance learning via the internet, NMHU offers classes around the state, as well as with on-site faculty in Rio Rancho, Santa Fe, Española, Farmington, Tucumcari, and Hobbs.

As part of its mission to serve the individual student through personal attention, Highlands maintains open enrollment, small classes, and low tuition. General education requirements provide a well-rounded education for all students regardless of major. All students are assigned an advisor either in their major or through general advising if they have not declared a major. Also of interest, Highlands University participates in the Study Abroad Program and Cooperative Education—a national program that provides students the opportunity, while in college, to gain valuable work experience related to their studies. At Highlands, co-op students get hands-on training, working side by side with experts in their chosen fields while earning professional salaries and benefits during their work assignment. Ninety-five percent of students receive some form of financial assistance, and more than 500 students work on campus.

Figures for the fall of last year show that of a total student enrollment of 2,516, 58.1 percent are female. Hispanics make up more than half of the student body total with 1,459 or 58 percent of all students. There are 130 American Indian, 91 African American, 74 Caucasian, 25 Asian, and 24 non-resident aliens among the total. There are 121 full-time faculty and a student-to-faculty ratio of 15:1. Faculty demographics reflect 32 male and 11 female Hispanics among the full-time faculty roster. Seventeen of these Hispanic professionals have reached the distinguished level of full professor. A campus spokesperson reports that “Diversity may be a buzzword at some places, but at Highlands it’s real. Our student body, faculty, and staff represent a variety of ethnic and cultural backgrounds. While the campus is located in a rural setting, the area historically has had an international and multicultural flavor.”

There are other nice touches. New first-year students are required to enroll in the leadership program, which orients them to college life and university resources, and helps ensure their success through graduation. First implemented in the fall of 1998, the course increased the retention of new entering students from the fall ’98 to the spring ’99 semesters.

During Selino Rael’s tenure as president, NMHU has completed several significant campus improvement projects, including the renovation of historic IIeld Auditorium, expansion of the Thomas C. Donnelly Library and the Victoria de Sanchez Teacher Education Center, the restoration of Perkins Stadium, and the renovation of Douglas Hall.

The educational tradition of the Douglas Hall site goes back to 1891 with the construction of the first school in the New Mexico territory funded by the sale of public bonds. When this building was destroyed by fire in October of 1927, stone from the foundation and walls was used in the construction of the new Douglas Avenue School, which opened one year later in October of 1928. At the time a reporter for the Las Vegas Optic called the new structure “one of the most attractive school buildings in New Mexico.” Renovation of the Spanish Colonial Revival style building began in 1998 with the passage of a New Mexico General Obligations bond and will be completed by the spring semester of 2000. The original design was by the famous New Mexico architect, John Gaw Meem. As one of his earliest public buildings, Douglas Hall shows his training at the Beaux Arts Institute of Design through its formality, particularly the T-shaped layout and the symmetrical arcades of the main entrance. Douglas Hall will house classrooms for the humanities, The Language Learning Center, and the Writing Center—all with state-of-the-art technology. A new addition will contain offices for faculty and graduate assistants in history and political science, languages and literature, and English and philosophy. Also undergoing renovation is Perkins Stadium. The stadium will be for use by the campus and community. The aging Perkins Stadium has been used for years not only by NMHU athletic teams (Cowboy football and Cowgirl soccer play home games there), but also by the entire community for a wide range of interests. Walkers and joggers enjoy recreational use of the facility, and various local high school teams have held training as well as home games at “the Perk.”
Hispanics, Education, and Employment

The Hispanic college gap is costing the United States $130 billion annually in potential wages lost—and another $454 billion in lost local, state, and federal tax revenues that would have been generated by those salaries. A major new study on the cost of the Hispanic college gap was recently released by the Hispanic Association of Colleges and Universities (HACU), and Educational Testing Service (ETS).

"The good news is that Hispanic access to college is improving and that this trend will continue," says HACU President Antonio Flores. "The bad news is that Hispanic youth still trail non-Hispanic White youth in educational achievement."

Indeed, the gap in Hispanic college attendance is expected to grow from the current level of 430,000 Hispanic students now missing out on a college education to 550,000 Hispanic students unable to obtain a college education by the year 2015.

The new 105-page report, "Education = Success: Empowering Hispanic Youth and Adults," by HACU and ETS, outlines the cost of the Hispanic college gap and also offers solutions for correcting problems that now result in inequity and lack of access to a college education for the nation's fastest-growing minority population. Within the next few years, Hispanics are expected to become the nation's largest minority population.

"America loses billions by not improving education for Hispanics," says ETS President Nancy Cole. "But more importantly, it also loses fresh, diverse talents and perspectives." ETS is a leading educational testing and measurement institution and leader as well in educational research. The nonprofit organization annually administers more than 10 million tests in the United States and in 180 other countries.

HACU, a leading voice for Hispanic higher education needs across the nation, represents more than 200 colleges and universities with high Hispanic student enrollment rates in the United States and Puerto Rico, and abroad.

Among Hispanics ages 25 to only 13 percent have a college degree. Of those without a college degree, 18 percent are ready to enroll in college while another 24 percent would be ready to enroll with about 200 hours of basic skills training.

Increasing the number of 18...
24-year old Hispanic youth pursuing an undergraduate degree by 10 percentage points would result in Hispanic youth obtaining a proportional share of college enrollments. "Hispanic underrepresentation on campus also equals underrepresentation in good jobs. "Almost 60 percent of jobs today require college-level skills," says Anthony Carnevale, ETS vice president for public leadership and author of the study. He also co-authored nearly 30 years ago the principal affidavit in Rodriguez v. San Antonio, a landmark U.S. Supreme Court action to remedy unequal tax burdens and educational benefits. "More Hispanic youth will need college to get their first jobs—and more Hispanic adults will need college to keep their current jobs or get better ones." Carnevale says.

On average, Hispanic men earn $17,000 less a year than do non-Hispanic White men, and Hispanic women earn $6,700 less than do non-Hispanic White women. "Evidence is mounting that linguistic, racial, and class bias differences are limiting the job prospects and incomes of minority workers," says Flores of HACU.

More financial resources and other support are needed, says Carnevale. Financial aid has not kept pace with increasing college costs. In addition, more social support, counseling, college and career planning than is currently available is needed for many young Hispanic students entering college who are either first-generation college students or first-generation U.S. residents.

College access and participation must also be addressed, not just at the college level but at all education levels, from kindergarten through graduate school. "We need affirmative development and affirmative outreach for all Hispanic students through the K-16 system, not just college admissions information provided to relatively few students in the spring of their senior year of high school," Carnevale says.

To combat prejudice, Carnevale advocates a strategy of engagement, encouragement, and social support. "Financial investment will be necessary, but even more essential is human investment—showing interest, defining and imparting values and advising and caring," Carnevale says. "If we focus on these deeper causes of frustrated potential, our policies will be more sure-footed," he says.

Cole of ETS also cites the need for better tests. "The ultimate goal is to create tests that establish the linkages to how to improve academic skills and preparation for college," Cole says.

The colleges and universities represented by HACU collectively enroll two-thirds of all Hispanic students in higher education in the U.S. The mission of HACU is to promote the development of member colleges and universities: to improve access to and the quality of postsecondary educational opportunities for Hispanic students; and to meet the needs of business, industry, and government through the development and sharing of resources, information, and expertise.

Report author Carnevale, in his acknowledgments, offered special thanks to three scholars who reviewed and commented on the report in the draft stage: Jorge Chapa, interim director of the Julian Samora Research Institute at Michigan State University; Arturo Madrid, distinguished professor of humanities in the Department of Modern Languages and Literatures at Trinity University in San Antonio; and Laura Rendon, professor of educational leadership and policy studies at Arizona State University in Tempe.

Excerpts from Education = Success: Empowering Hispanic Youth and Adults

Almost six out of ten jobs today require college-level skills.

- By 2015, we could close the education gap between Hispanic and non-Hispanic White youth if we increased college participation among Hispanic youth by 10 percentage points.

- The largest, fastest-growing, and best-paid group of employees is office workers. These jobs pay one and a half times as much as other jobs and will grow by four million by 2006. Only a quarter of all Hispanic men and a third of all Hispanic women are employed in office jobs, compared to half of all non-Hispanic Whites.

- According to NAES, seven percent of Hispanic adults have advanced or superior skills similar to the skills of college graduates.

- Workers with advanced or superior skills have the highest earnings—on average, $29,100 for Hispanic women and $42,600 for Hispanic men.

- About one in five Hispanic adults has competent skills similar to the most highly qualified high school graduates or people with some college but no degree. Hispanic women at this skill level earn $27,300 on average, and Hispanic men earn $37,900.

- By 2006, jobs for people with competent skills will grow by 14 percent, adding 5 percent of all new jobs.

- Hispanics with advanced or superior skills average about $6,008 more a year than do those with competent skills, who earn about $8,580 more than do those with basic skills.

- The 120 most selective colleges and universities graduate about 100,000 students including about 6,000 Hispanic students, each year. The economy, however, creates as many as two million job openings every year that require college-level aid.

- Students with SAT scores above 1,000 have a 60 percent chance of graduating from a 4-year school. More than half of the Hispanic students who score above 1,000 on the SAT come from families with earnings below the national average.

- We need tests that unmask the difference between academic achievement and English-language ability.

- We need tests to establish the linkages between test results and specific classroom activities, as well as types of teacher preparation and in-service training.

- In the emerging global economy and culture, every well-educated person should be literate in more than one language. English should probably be one of them. And in the Americas, the other one should probably be Spanish.

- The proportion of Hispanic college graduates is only 17 percent, about the same as the proportion of Hispanic college students. The proportion of Hispanic college graduates with college degrees or grade training in 1997 is 17 percent, which has reached the levels achieved by general population in 1973.

- Factory jobs are declining, low-skilled service jobs are meekly holding steady, and high-paying jobs are growing only moderately. So where are all the new jobs keep being created? In education, health care, and office jobs.

- The percentage of Hispanic workers with at least some college has doubled since 1974—-9.2 percent to 15.5 percent for men, and from 15.2 percent to 23.7 percent for women.

- Even with affirmative action, Hispanics still don't get their fair share of the seats in the top colleges. And it has almost no impact on attendance beyond the 1 most selective schools.
College Prep in Houston and Manhattan

Private Efforts Target Minorities

BY INÉS PINTO ALICEA

Prep for Prep was launched in 1973 as a pilot project of Teachers College at Columbia University, the result of a doctoral project of the program’s founder, Gary Simons.

Back in 1993, sixth grade teacher Chris Barbic despaired as he watched his students’ enthusiasm diminish as they ventured on to Houston-area middle and high schools. He knew something had to be done to help those students stay on a college-bound path. So he submitted a charter school proposal to the Texas Education Agency, and thus YES College Preparatory School was born in 1995.

"Every year, we've had more and more success," said Barbic, 29. "It's a challenging environment, and I work 18-hour days. This school isn't for everyone. We have kids who come and decide they don't want to do it. But anyone who wants to come here can."

About 90 percent of the school's 400 students are Latino, and almost all of their families are poor. Nearly all of the students qualify for a free lunch. About 20 percent of the students are considered limited-English proficient. The school, which offers an intensive college-preparation program, teaches fifth through eleventh graders. Based on the results of the Texas Academic Assessment Standards (TAAS) test, progress among the school's students is good. Barbic shares the scores proudly. All 43 tenth graders passed the math and writing portion, and 95 percent had passed reading. Scores are equally high among the sixth through eighth graders. But Barbic admits that the real test of his program will come when his current group of eleventh graders start applying to college and get accepted. Will the years of extra work pay off?

It is a question that every college preparatory program faces at its inception. The answer often makes or breaks a program. This article looks at such programs and the challenges that they face—YES College Preparatory School and a more established program, Prep for Prep in New York.

Prep for Prep operates very differently from YES College Prep. It takes academically gifted minority students in the fifth grade for day school placement and in seventh grade for boarding school placement and subjects them to 14 months of intensive training while they are still in the public school system. Once they complete the training, those who remain in the program are then placed in and offered full scholarships to any one of nearly 50 rigorous independent schools around New York. Once in, the students receive an extensive support network of tutors, counselors, and career guidance services up through college. Prep for Prep currently has 812 students enrolled in independent schools and an additional 571 at colleges.

In operation since 1978, nearly 500 of its students graduated from colleges nationwide, many of them Ivy League schools.

The programs are also different in the types of students they are recruiting. YES students are more middle-of-the-road students who show great promise, Barbic said. Prep for Prep looks for the most academically gifted students in New York’s public schools, testing 3,500 of the city’s brightest students for participation in its program. More than 200 earn entry into the program.

“We are looking for students who are smart enough, motivated enough, and work hard enough to be the type of kids independent schools want,” said Dominic Michel, associate executive director at Prep for Prep. The two programs share many similarities. Students are recruited and asked to commit to the rigor of the individual pro-
programs. Both programs require two or three hours of homework, long school days (in the case of YES College Prep, the day ends at 5 p.m.) Monday through Friday, Saturday classes, and summer school. Prep for Prep in New York follows this program until the student is placed in an independent school. There the students adopt the curriculum at the school in which they are placed. YES College Prep in Houston, however, does this at every grade level and continues the same curriculum until the student graduates from high school.

Every senior graduating from YES College Preparatory School, beginning with the class of 2001, is required to gain acceptance to a four-year college in order to receive a high school diploma.

"We have to spend a lot of time helping the students catch up to speed, especially in English, since it is most of the kids' second language," Barbic said. "The minute they walk in the door, our kids are behind because they are competing with kids from private schools. A lot of the kids here have been pushed through the system. The schools weren't giving them the type of education to be prepared for college. Our expectations are a lot higher. We make sure they understand what is expected of them. They know what it takes to get where they want to go and the sacrifices they have to make to get there. We are not aiming for the best and brightest kids in the city but we want to be sure the person is serious about the commitment and the work."

Both programs face the challenge of getting private funds for their work. The problem is equally acute for both—but for different reasons. Since Barbic's program is so new and to some extent unproven in the eyes of potential benefactors, Barbic spends much of his time chasing money and convincing people that his program will work. The school's first class will graduate in 2001.

"When we get the first group to college, it will pay off," Barbic said. "That is when things will explode and the resources will come in."

Barbic's program does receive some funding from the state of Texas, but he said he relies heavily on outside donations to provide many of the extras, such as cultural enrichment programs and the summer and Saturday classes. The money helps send students on extensive field trips. Last year, the tenth graders visited Boston and New York and toured Harvard, the Massachusetts Institute of Technology, Columbia University, and New York University. It also needs money to build a more permanent facility. The school currently operates out of modular units.

He also will have his first 12th grade class next year and must account for that. Eventually, he would like to open more schools.

"The college visits are important because when you hear from a teacher that you can't get into college with Cs, it's one thing, but it's very different when you hear it from a college admissions counselor or from college students who also say they busted their butts and this is the payoff," said Barbic.

The school raises money from foundations, corporations, and other sources to help fund its educational programs. Among the contributors are the Houston Tannenberg Challenge, the Brown Foundation, the McNair Foundation, the North Hills Charter Grant, the Houston Endowment, the Cullen Foundation and others. "We want to perfect the model first," he said.

Michel said that fundraising is also a concern for his program since it is completely privately funded and since it is not a school and can not rely on tuition. But the money is needed for its numerous operations, including sending students in the program abroad for the summer, offering a summer job bank, providing a leadership development program: providing counseling, guidance, and tutorial services for its students; and preparing the students for placement in an independent school. It conducts weekly sessions after public school classes close the day, Saturday sessions, and summer programs.

"All of our students have intelligence, and many have skill—but many don't. So we are looking to bridge the gap between intelligence and skills," said Michel. "We expect them to be the best students in their schools."

Michel said funding is important because the program would like to expand. It is unlikely the number of independent school slots for Prep for Prep students grow significantly, he said, and hopes that the program will be to prepare additional students through other methods.

"We're looking for ways to involve other students," Michel said.

Both programs stress diversity leadership and a sense of giving back to the community and to schools. Barbic's program uses a service-based learning approach, granting community service project credits for a fee. "It is important for these kids to see both that it is important to give back to the community and that there are always people who are fortunate," said Barbic. "It is important that they appreciate the opportunity that has given them even more. We encourage strong alumni bases and we are teaching the students to give back. I would love to see the
come back and teach."

Michel said students in Prep for Prep not only take on internship assignments at businesses throughout the city as part of their leadership development, but they also travel abroad and participate in short retreats at which they discuss ethics, qualities of great leaders, and other relevant issues and participate in activities that develop their own leadership skills.

The two programs had very different origins.

Prep for Prep was launched in 1978 as a pilot project of Teachers College at Columbia University, the result of a doctoral project of the program's founder, Gary Simons. Simons felt there was a void in educational opportunities for minorities and disadvantaged children. He felt that they too should get the opportunity to attend private schools. He developed his program to prepare the students to enter independent schools, which offer grounding for the rigors of college. The program opened its doors to 25 fifth graders in the facilities of Trinity School on Manhattan's Upper West Side. The weekly classes are still offered at that location, although the program has moved its offices to a separate facility.

Barbic majored in English and pre-law at Vanderbilt University in Nashville and after graduating went to work for Teach for America, an AmeriCorps program that allows people to earn teacher certification in exchange for a two-year commitment to teach in a poor neighborhood. Barbic was sent to Rusk Elementary in Houston, where he taught a class of sixth graders who had all flunked the TAAS. He helped them improve their scores significantly (83 percent passed the math portion) but was later disheartened to learn that many went on to join gangs, drop out, or become pregnant once in middle school. Something needed to be done in Houston, where, according to Rice University sociology professor Stephen L. Klineberg's 1994 Survey of Houston's Ethnic Communities, one in three high school-age Hispanic students will fail to graduate from high school.

Barbic and some of his Teach for America colleagues started talking to students and parents and joined forces in 1995 to ask the Houston Independent School District for the privilege of starting a pilot program at Rusk Elementary that would extend students' stay after the sixth grade. The district approved the Project Youth Engaged in Service (YES), a sixth and seventh grade middle school program. The program quickly expanded to other grades, and in 1998 branched out on its own and became a charter school.

"They have strong leadership, dedicated faculty, motivated students, and an inviting facility," said Patsy O'Neill, executive director of the Charter School Resource Center of Texas.

YES College Prep also has a strong following among its parents, said one of the parents of a student involved in the program.

Beatriz Guerrero, a parent of a YES College Prep student, said her daughter was unmotivated in the public school system but that her attitude has changed significantly since enrolling at YES.

"One of the things that surprised me was that the teachers give students their phone numbers at home so they can call them if they need assistance in homework," said Guerrero. "She needed that connection with her teachers in order to further herself in her studies."

Both Barbic and Michel called that connection between talented students and educators vital to making their programs work and succeed.
Ph.D.s: Too Many or Too Few?

Leadership Alliance Cites Dearth of Minorities

BY
Marilyn Gilroy

There are far too few minority scholars with Ph.D.s, especially in the life and physical sciences. So says the Leadership Alliance, which bristles at suggestions from Forbes magazine and the venerable Chronicle of Higher Education that there might be a glut of scholars. And while these two publications recently referred to academe as an "overstuffed market" producing record numbers of Ph.D.s, the Leadership Alliance counters that today's society calls for more, not fewer doctorates, especially in the critical areas of science and math. Moreover, Alliance member institutions are adamant in the belief that they must deliver more women and minorities with graduate degrees.

"The low levels of minorities in graduate degree programs, the scarcity of minorities in Ph.D. programs and in the professorate, and the dearth of minority scientists and engineers in the workforce are not only issues of great concern to the Leadership Alliance, but also, they are our reason for being," says James Wyche, professor of medical science and associate provost at Brown University and executive director of the Leadership Alliance.

Founded in 1992 and based at Brown University, the Leadership Alliance is the largest coalition of its kind in the nation addressing the shortage of underrepresented minorities in graduate school and the professorate. The Alliance creates a pipeline of opportunities including K-12 programs, undergraduate research programs, graduate support programs and fellowships, faculty development opportunities, and national symposia. In the process, the Alliance seeks to develop a generation of outstanding minority leaders and role models not only in higher education but in the public and private sectors as well.

The Alliance consortium consists of 27 institutions of higher learning, including all of the League schools, 10 historically Black colleges and universities, the entire University of Puerto Rico system, which serves 62,000 students. In addition, the Alliance is affiliated with Montana State University and the seven tribal colleges in Montana through the American Indian Reservations Opportunities program based at Montana State.

Although critics continue to question the large number of entering the job market, partly in the humanities, the Alliance says that its efforts are aimed at helping academe make the cuts needed to meet the market demand for a different Ph.D. producing the academic community already begun to provide better more selective graduate education programs with closer ties to the marketplace and changing technology...the kinds of graduate programs that can train researchers who will be able to fit many niches.

Leadership Alliance recently got a welcome boost from President Clinton's 2000 National Science Technology Council (NSTC) for recommendations on how to achieve greater diversity through our scientific and technical force. In his directive, Clinton said, "The number of women, minorities, and persons with disabilities who have careers in science and engineering remains low. It is critical that we work to increase the number of women and minorities awarded degrees..."
ience or engineering, and the trend in minority admissions and degree awards is not encouraging. By 2000, approximately half of America’s school-age population will be from minority groups. Minority participation in science and engineering careers should keep pace with this diversity.

NSTC working subgroups have asked the Leadership Alliance to provide "views and answers on why the participation rates for many members of our society are so low in the sciences."

While Alliance members are developing a formal response to the council’s request, they have identified seven factors that contribute to the current situation and have presented their findings in the most recent edition of Alliance Viewpoint, the organization’s semi-annual policy letter.

Three of the seven factors are technical—lack of student and parental understanding of science, math, and engineering careers; poor instruction and mentoring in these areas; and the consistently low standardized test scores of minority applicants. The remaining factors are termed “ideological” and include the elitist attitude of science and technology and its perceived incompatibility with gender/cultural roles. This ideology and the current anti-affirmative action movement is, according to the Alliance, fostering a climate of “racial, sexual, and cultural hostility and a cold, unwelcoming climate for minorities and women on many college campuses,” especially at top-tier research schools.

The Leadership Alliance is calling upon corporations, school officials, government, and other associations to adopt an outcomes-oriented approach to mentoring minorities and ensuring their recruitment and retention into science and technology graduate schools and, ultimately, into the workforce.

The Alliance is proud of its own track record in producing results that have directly benefited minority scholars. It has helped more than 700 undergraduate and graduate minority students through programs such as the Summer Research Early Identification Program, which pairs minority students with faculty mentors, and the Minority International Research Training initiative that allows minority scientists and students to play an important role in biomedical research projects throughout the world.

During the next 10 years, approximately 300-500 Alliance students are expected to be enrolled in doctoral programs worldwide. Thirty percent of participants in Alliance programs are Hispanic.

Funding for Alliance projects comes from federal sources, including the National Science Foundation (NSF) and the National Institutes for Health (NIH); about 21 percent are from corporations and foundations; and about 65 percent are from individual donors. Since its inception, the Alliance has received more than $8 million of support from both public and private sources.

The showcase event for the Leadership Alliance is its annual national symposium. This year, IBM hosted the fourth symposium, entitled “Partnerships for Future Success.” At the conference, 165 undergraduate student summer researchers came to present their work, network with peers and senior researchers, and explore the possibilities of graduate school and research careers. In addition to attending each other’s presentations, the students heard keynote addresses from industry and academic leaders and received advice from graduate admissions experts and current Ph.D. candidates.

In one session, Dr. Paul Horn, senior vice president of research for IBM corporation, told the audience that just as there was an industrial revolution at the dawn of this millennium, the world is now in the midst of an information revolution. “Information technolo-
gy is going to change everything. No institution, no government, and no individual will be unaffected. Soon there will be no poor countries, just ignorant ones,” he said.

It's a great time to be involved in computing and technology, which, he added, will allow us to do things never before possible. He envisioned a future where we have relationships with our computers that will “think” through the problems we pose for them. He concluded by reminding the student audience that there is a phenomenal amount of information on the internet and this information and the new technology can be used to bring about good.

“You have to be part of the process to make sure that there is access and break down the barriers to utilization of all this information,” he said. “You know it’s really up to you to see that the new technology is used for good.”

Students also heard from deans representing graduate schools at New York University, Princeton, and Harvard who offered a list of do’s and don’ts for applying to graduate school. They advised applicants to be specific, deliberate, and complete at every step of the process. They also stressed the importance of networking for information and contacts throughout college, graduate school, and their careers.

Dr. William B. De Lauder, president of Delaware State University, who gave the symposium’s closing address, said that although the percentages of minorities receiving Ph.D.s is increasing, actual numbers are still too small, and he challenged the students to prepare themselves to replace the currently aging Ph.D. faculty and not to be fooled or dissuaded by the current rhetoric that brands affirmative action as “special treatment” instead of “equal treatment.”

“Don’t ever let anyone make you feel you are not qualified. I guarantee that if you were not qualified, you would not be here. Your goal must be to learn, achieve, and experience all that you can so that you will be prepared to take advantage of opportunities that present themselves.”

Jim Wyche, Leadership Alliance executive director, joined other leaders in offering inspiration and encouragement to the students. “We are expecting the world out of ye he said. “We expect you to do standing things in the future. We have a responsibility to meet challenge to provide leadership. must not fail. So much is riding the efforts of groups like this.”

The Alliance is now accepting applications for the year at Summer Research Identification Program, web offers minorities the opportunity to do graduate-level research 8-10 weeks at premier universities and corporate laboratories throughout the country. Applications, which must be filed by February 1, are available through all member institutions and the Alliance executive office (943-1474) and the Web site www.theleadershipalliance.org.

Mestas New Chancellor of UM-Flint

Poet, Policymaker, and Expert on Martí

BY DONNA ULLRICH

Juan E. Mestas, deputy chair of the National Endowment for the Humanities (NEH), was appointed chancellor of the University of Michigan-Flint, the fifth in its history. His appointment began a month ago.

In recommending him for the post, U-M President Lee C. Bollinger said that Mestas “is deeply respected at the NEH and in Washington, D.C. He has done a remarkable job at NEH, and the continuing vitality and enhanced stature of the endowment are due in large measure to his thoughtful administration of day-to-day operations.”

NEH Chair William R. Ferris called Mestas’ leaving “regrettable,” but wished him well as he moved “ahead to a well-deserved new phase in his career.” He has a “firm guiding hand” that has “helped lead the NEH through thick and thin since 1994.”

Bollinger said that Mestas “brings to the position of chancellor tremendous administrative skills, a strong sense of academic quality and a deep commitment to higher education and its public purposes.”

Mestas, who visited the campus several times in preparation for the new role, meeting with students, faculty, staff, alumni, and community leaders, called the university “a caring institution, committed to academic excellence and quality teaching, and responsive to the world around it.”

“I am thoroughly impressed,” he said, “and can hardly wait to join the family.”

As the second person from the top at the NEH, Mestas was responsible for formulation, development, and implementation of policy and managing the agency’s budget and expenditures.

In addition, Mestas helped guide the agency through several years of severe budget cuts and layoffs, while maintaining morale.

Prior to joining the NEH in 1994, Mestas was vice provost and dean of students at Portland State University (1992-94), managing and providing leadership for the Division of Student Affairs, which was composed of 17 units. He was active in policy development while serving on the Executive Committee and the Council of Academic Deans. He also was associate professor in the Department of Foreign Languages and Literatures.

Mestas earned degrees in Hispanic languages and literatures from the Universidad de Puerto Rico (B.A.) and the State University of New York at Stony Brook (M.A. and Ph.D.). His scholarship has been devoted to study of the 19th-century Cuban poet and author José Martí. He is the author of El pensamiento social de José Martí: ideología y cuestión obrera (Madrid: Editorial Plegios, 1995), and of numerous articles published in scholarly and educational journals. He is also a former editor of several periodicals. Mestas has translated from English to Spanish the works of Tennessee Williams, George S. Kaufman, and Neil Simon, among others. His poetry and short stories have been published in literary magazines and anthologies in Puerto Rico and the United States.

He held several posts at California State University-Long Beach, including director, Retention Services and Educational Equity Programs; director, Educational Access Services; director, Educational Opportunity Program, and (concurrently) associate director, Student Development Programs. He also had teaching and administrative posts at Stony Brook.

An American Council on Education (ACE)/Pew Fellow at the University of Pennsylvania in 1989-90, Mestas contributed to analyses of higher education’s “new majority” and the role that federal funds play in encouraging the recruitment and retention of at-risk youth. He also participated in public policy discussions and higher education studies sponsored by the Pew Higher Education Roundtable, and...
aided the Delaware governor's office in conceiving pilot projects to address the state's dropout and underachievement problems.

As a visiting associate at ACE in 1990-91, he was responsible for several projects in the Center for Leadership Development (CLD) involving policy development, curriculum review, and program planning and implementation for the ACE Fellows Program, Office of International Education, and other ACE units. In 1991-94, he was a member of CLD's faculty, teaching courses on leadership, student retention, and diversity issues.

Mestas is a member of the Council of ACE Fellows and has held several posts in that organization and membership in the Western Association of Educational Opportunity Personnel, National Association of Student Personnel Administrators, and Raza Advocates for California Higher Education, among others.

His community contributions have included service on the Bernard Daily Educational Fund (Oregon), Portland Downtown Community Association, Abrazar Inc. (a senior citizens agency in Orange County, Calif.), LULAC, Head Start (in Long Beach, Calif.), and San Jose State University Day Care Center.

THE CHANCELLOR SPEAKS

A speech by Juan E. Mestas

For higher education, January 1, 2000 is but another date on the calendar. No old challenges will disappear and no new challenges will emerge with the arrival of the millennium. In fact, the challenges that we anticipate for the next several years are already in front of us. What will increase is the urgency to address them successfully. Perhaps our most significant challenge will be to respond to changes promptly and effectively.

The needs and expectations of tomorrow's students might be different from those of today's. The fluidity that we see now in accessing higher education-college is often a lifetime succession of entrances and exits rather than a four-year pause in a young person's life-is likely to become more prevalent. The more attentive we are to the needs and expectations of the students we serve today, the better prepared we will be when the students of the future arrive in our classrooms with different needs and expectations.

Even the notion of classroom might be challenged. A population that has become accustomed to getting everything through personal computers might want to obtain a college education very much the same way. We should be ready then, to integrate the advantages of digital technology with the benefits of face-to-face interaction. For instance, while the Internet has expanded the reach of instruction by opening its time and space, the best educational environment still requires the close proximity of caring teachers and avid learners.

One challenge that few colleges and universities have met well is the need to extend access to quality higher education. Our classrooms, for the most part, do not look like America. And America will continue to change at a fast pace in the direction of increased diversity, making it more difficult—yet more important—to make up for past inequalities and insensitivities. It won't be long before the groups that we now call "minorities" will become a diverse majority, making these very terms inoperative.

And it would be sad if higher education continued to reflect an unfortunate past rather than a promising future. Our challenge as colleges and universities is to bring in the students that we have not been reaching and to give them the support they need to stay enrolled until graduation. Our challenge as a community is to ensure that all students leave our high schools well prepared for postsecondary education.

The University of Michigan-Flint faces all of these challenges and many has been preparing to meet the successsfully. In our classrooms, tracial and nontraditional, students side-by-side, creating a dynamic dialogue between anticipation and experience. We are already using the latest technology in many aspects of the educational process and could be offering online courses as soon as January 2000. We are engaged in intensified efforts to reach and retain "minorit" students and have succeeded in shening the gap in recent years. But must do more, and we must do it better.

The community of the University of Michigan-Flint—students, fual staff, alumni, and friends of the university—must also continue to explore ways to exercise its censibility, to extend its resources and open its doors to the community outside the university. We should, thus, embrace each other with enthusiasm and optimism. That is probably the most pleasant challenge we face.
Personal Narrative as a Route to Voice

Teacher’s own experience leads to teaching strategies

BY
MARIA J. ESTRADA

The following presentation was part of a round-table discussion on college composition and communication that took place at a conference in 1998.

Sure, they were frustrated and quite unprepared to deal with us “Hispanic” students. But the policies were not conducive to study or growth in self-confidence. Secluding us from the rest of the class and asking us not to speak Spanish was not conducive to learning English. Adjusting from a caring environment to this new, cold and strange place caused me to have a nervous breakdown when I was around five or six. I woke up one day, wobbled to the breakfast table, sat down, and started seeing triple. I was disoriented, so much so that I couldn’t walk through doorframes without bonking my head every time, even if I went for the middle of the door. My parents really never understood why I got sick. But I couldn’t tell my parents what the problem was. They were uneducated and didn’t speak English themselves. They were more concerned with surviving and raising us than anything else. Quite honestly, I did not have the language to express the processes of assimilation I was being put through except to conclude that the teachers were mean. So, what happened? I stopped talking.

Gloria Anzaldúa in Borderlands writes about our tongues being ripped out. She writes: “Attacks on one’s form of expression with the intent to censor are a violation of the First Amendment. El Anglo con cara de inocente nos arranca la lengua. Wild tongues can’t be tamed, they can only be cut out.”

I hid mine, so this would not happen for two years. Then I got held back during the first grade and I decided that maybe I should start cooperating. People have a misconception, oftentimes, that Latinos don’t care about education, that they don’t support their children. Well, this misconception is wrong. My parents cared a great deal about education. My father was working over 24 hours a shift out in the fields to ensure that we would make a better life for ourselves through education. So when my father found out I was held back, he became furious. I had never seen my father so angry before in his life, and this time he was angry at me. His face turned purple, and I thought his veins would surely pop out of his neck. He was yelling at me and asking if I was a dummy, una tonta, (which I wasn’t,) and if I wanted to end up like him (which I didn’t).

The next year I transferred to a different school.

There I had a wonderful first grade teacher, Mrs. Lee. She didn’t set us apart or differentiate among the students. My whole attitude changed. I learned to speak English and read. In the second grade, I discovered that once I could read English, I could learn to read Spanish. By then, I was in the “Jackrabbit” group—jackrabbits are fast. I was reading at the top of my class. I also discovered around that time that I loved to write. I adapted and learned to function and excel in the educational system. Unfortunately, the educational system never quite accommodated my writing needs.

Later on in high school, I tried to emulate the five-paragraph essay. I was in honors and AP classes and always got As, but I was never totally proficient like the other students in their writing. Grammar and usage was natural for them, but not for me. Remember, my first language was Spanish. I spoke Spanish at home to my parents and siblings, so I intermixed my sentence struc-
tures and rhetorical patterns. Oftentimes they'd see this as a deficiency. I wanted to go on tangents and use imagery, like my father did when he told his cuentos y historias. I wanted to incorporate my oral skills from my culture into the written text, but was not allowed to do so. I emulated this plastic voice until I went to college. And even then, only a select few teachers encouraged this form of writing.

This writing was the personal narrative. I learned to use personal narrative in my essays and short stories and incorporated personal narrative characteristics in my poetry. I had never been given this freedom. I had never been validated in this way. I wish I had been allowed to use personal narrative from day one of my second shot at first grade. I know I would have been a more effective writer today. So, as a new instructor, one of my goals in the classroom is to use the personal narrative with three purposes in mind: (1) to bring out student voices, (2) to develop student voices, and (3) to maintain student voices.

How then, do you bring out student voices? One of the greatest challenges in the English classrooms is convincing students that they have a voice. Validation as a writer, especially for most students of color, becomes crucial. Students have a great deal of personal knowledge that they can utilize. However, a lack of self-confidence in their language proficiency or in the validity of their voices will impede them from becoming proficient writers.

I believe that creative writing techniques go hand in hand with composition. Creative writing approaches can help the student discover his/her voice. The shift wouldn't be too traumatic. Wendy Bishop asserts that we already borrow ideas from "creative" writing departments. She writes, "compositionists have borrowed effective teaching methods from creative writing workshops—particularly group-response sessions and portfolio evaluation—improved those borrowings and gone beyond them."

I'm suggesting that we be deliberate in our teaching methods. We want to make the requirement of their voices easy and enjoyable. Obviously, we want to use methods that connect with them and interest them.

I believe in taking a post-modernist approach. Allow students to write about things that interest them, such as film, MTV videos, science fiction, video or computer games, etc. Things they are comfortable associating with and writing about. I suggest as many creative writing exercises as possible to get your students writing in a natural voice, a personal voice. I start with things they are familiar with and move to the more personal, like the oldest memory you have of eating at a restaurant. For the students of color, however, their voice must be validated by introducing writers whose works "speak to them." This idea is true for all students, but for students of color who might not have been exposed to other writers of color, this inclusion in the reading could have a positive effect. No one loses in including new and interesting pieces of writing by writers of color.

Julio Marzán has compiled a book of innovative pedagogical essays in Luna, Luna: Creative Writing Ideas from Spanish, Latin American, & Latino Literature. In "Inspiring Young Writers with Chicano Pinto Poetry," Marv See Galindo gives some techniques on how to interest and develop and argumentative essays. I also like to use videos of Guillermo Gómez-Peña’s "Gringostroika" to demonstrate performance poetry that effectively incorporates Spanglish (the mixture of Spanish and English) and personal narrative.

Let's assume that during the first month, you have gotten your class used to the idea of using their "voice." Your students might still have grammar problems or problems synthesizing. So now you want your students to develop their voice. How do you develop the personal narrative in the classroom? You could do the obvious and have your students keep journals responding to the class readings and lectures in a reader response format. You could encourage them to correspond with another classroom. As Dr. Mark Hulbert suggested last year at 4Cs | Conference on College Composition and Communication say, one of the best ways is to encourage them to use personal narrate their papers—or at least narrate characteristics. Students can anecdotes or about experiences others have had to strengthen arguments. In this way, they will introduce the personal narrative into their academic work course, with beginning comp students, some teachers might that the value of the personal nar low, because students of various disciplines may not use the narrative. However, one use that the personal narrative can have is as a help students begin to write essays so that they can move on to more academic interdisciplinary writing would really like to hear from instructors and how they develop narrative voices in their classrooms.

Now comes the question of maintaining student voices. maintaining, I think, is really the students. They have the free to use different techniques, developing their student voice which in turn helps them maintain their newly found skill. I tend to personal narrative in the beginning of my essays because I feel comfortable doing so. In a personal narrative often will lead into my academic writer. The narrative then, become bridge into the academic. An useful exercise for students have them translate the personal narrative into an academic format. There are many benefits the personal narrative can have in composition classroom. I know many of you use personal narrative in the classroom. Now try to use personal narrative, not as the step before going on to more and academic discourses but rather a draft to that discourse.
**PEOPLE**

**Zampetti Discusses Transatlantic Trade at Ramapo**

Fulbright scholar Rico B. Zampetti recently presented "More Than Beef and Bananas: Issues in Transatlantic Trade Relations" at Ramapo College (N.J.), the first lecture this year in its continuing Columbian Fulbright Lecture Series.

Zampetti, who has been on leave as a Fulbright Scholar at Harvard University's Kennedy School of Government, works for the European Commission in Brussels, primarily on bilateral trade policy issues with the U.S.

**González Echevarría Wins Award for Cervantes CD-ROM**

A CD-ROM on the life and work of Miguel de Cervantes, edited by Professor Roberto González Echevarría of Yale University (Conn.), received Choice magazine's Outstanding Academic Book Award for 1998.

The multi-media reference work is part of the Major Authors Online series produced by Primary Source Media, an Orange, Conn.-based company that brings original primary materials of scholarly interest into the electronic domain.

González Echevarría, The Sterling Professor of Hispanic and Comparative Literature at Yale, chairs its department of Spanish and Portuguese.

**California-Santa Barbara Authors Speak at Festival**

Faculty and staff from the University of California-Santa Barbara were among the 140 or more authors at the Santa Barbara News-Press Book and Author Festival.

History Professor Mario García (pictured l.), writing program lecturer Valerie Hobbs, and Spanish and Portuguese Professor Giorgio Perissinotto (pictured r.) displayed their talent at the poetry reading.

García, who specializes in Chicano history, is the author of several books in that field, including *Migrant Daughter: Coming of Age as a Mexican-American Woman*. Hobbs is the award-winning author of three successful young adult novels, the latest being *Carolina Crow Girl*. Perissinotto is a specialist in Hispanic linguistics. His recently published book, *Documenting Everyday Life in Early Spanish California: The Santa Barbara Presidio Memorias y Facturas 1779-1810*, depicts in rich and detailed terms life in the early colonial period of Santa Barbara.

**Venta Oversees Loyola-Chicago Business School**

Dr. Enrique R. "Henry" Venta is the new dean of the Loyola University-Chicago School of Business Administration (Ill.).

"Loyola has a rich tradition in Chicago's business community," said Venta. "I look forward to using our school's strength--faculty and research expertise--to offer specific academic programs that the market is currently demanding."

Venta's responsibilities include fund-raising and alumni relations; overseeing curriculum development, administrative services, and graduate academic programs; and developing corporate and community-based partnerships.

Venta has a bachelor's degree from the University of Puerto Rico, and a master's and doctorate from Northwestern University.

**Bertot Directs International Trade Development at Rancho Santiago**

Francisco Bertot is new director of the Center for International Trade Development for the Rancho Santiago Community College District (Calif.).

Bertot is responsible for operation and promotion of the center, which provides counseling, technical assistance, market research, access to international trade developments, and information to companies trading international businesses in Orange County.

"There are over 10,000 companies in our service area," said Bertot. "The Center for International Trade Development will work closely with businesses and chambers of commerce to customize programs and services designed to take advantage of the global economy."

**Salas Wins Emmy Award**

Tony Salas, a technology supervisor at Orange Coast College (Calif.) who works with faculty members in developing and producing online internet courses and Web pages, was awarded an Emmy by The Academy of Television Arts and Sciences.

Salas, 37, received a Los Angeles Area Emmys for Instructional Programming for his work as graphic animator on the telecourse series *Dollars and Sense: Personal Finance for the 21st Century*, produced by the Coast Community College District. The telecourse is a 36-segment production that is being distributed to colleges and universities throughout the nation by Coast Telecourses.

"I'm told that winning an Emmy happens only once in a lifetime--if at all. Needless to say, I'm thoroughly enjoying it," said Salas.
Long Beach Community College
Welcomes Suarez

Dr. Leticia T. Suarez recently became instructional dean, teaching, instructional media production, learning resources and technologies at Long Beach Community College (LBCC) in California.

Suarez came to LBCC after more than 20 years in related fields in administration and instruction, from the State University of New York and City University of New York.

"Leticia is a seasoned administrator who brings a great deal of expertise in technology and administration," said Dr. Marilyn Brock, vice president of academic affairs. "We welcome her and believe she will make a great contribution to the campus."

Suarez received a bachelor's degree, a master's, and a doctorate from New York University.

Avila Named Ventura's Construction Technology Student of the Year

Yolanda Avila was named Ventura College's (Calf.) Construction Technology Student of the Year. The Ventura College Foundation also awarded her a $1,000 scholarship from the National Association of Women in Construction.

Avila graduated from Ventura College last year and continues to take classes there and at CSU-Northridge, where she is a junior in civil engineering. She also works full-time.

Avila is the only woman in most of her classes. "It's amazing how people look at you, being a woman in construction classes—like you're in the wrong place," said Avila. "Male students always test you, so you have to be on top of things. Now, I believe I'm respected. I have learned to never stereotype people."

August Nominated for Pulitzer

"Grandma" Sanchez introduced her grandson, Jack August, to the story of Carl Hayden—whose major legacy was his many years in U.S. Congress and his involvement in the Central Arizona Project, which brought abundant water from the Colorado River system to the then-fledgling urban areas of Phoenix and Tucson.

August, part-time instructor for the Northern Arizona University history department, grew up to be a historian and now has been nominated for the Pulitzer Prize in history for his book about Hayden, Vision in the Desert, published by Texas Christian University.

"My Grandma Sanchez was the family political activist," said August, "I tagged along as she organized events and carried candidate petitions around South Phoenix neighborhoods. My grandmother first exposed me to the significance of Carl Hayden and his role in Arizona's political affairs."

School of Visual Arts Honors Palladino

As part of festivities of the Master Series Award, the School of Visual Arts (SVA) in New York presented a black tie fund-raising event in honor of the award's 13th recipient, Tony Palladino. SVA annually presents the award to a visual communicator who has created a significant body of work. SVA displayed a retrospective of Palladino's work, "Tony Palladino: Content Matters."

Born in East Harlem, N.Y., Palladino's fascination with the stark visual realities of New York City motivated him to feature them in his earlier work. With the simple use of fragmented type, he created the cover of the Simon and Schuster book Psycho, later used as the poster to promote the film of the same name.

A master of the simple image, Palladino is recognized as one of the nation's leading designers, shaping modern-day visual imagery.

Pictured are "Psycho" (1956) and "The Man That Got Away" (1969).
Hispanic Enrollment up at Northern Arizona University

Hispanic and Native American student enrollment is up at Northern Arizona University (NAU).

"Over the past year, we have focused on getting the message out about the high caliber of NAU's programs," said NAU President Clara M. Lott. "Our freshman class, with its increased quality and diversity, plus increased overall enrollment of Native Americans and Hispanics, is an early indicator that our message is being heard."

Hispanic enrollment is at 10 percent of the total student population for the first time in NAU's history—1,989, representing a 2 percent increase in Hispanic enrollment from last year's 1,950. With that increase, the Hispanic Association of Colleges and Universities now classifies NAU as a Hispanic-serving institution.

Native American enrollment stands at 6.6 percent of the total student population, also an historic high.

Nazareth and SUNY-Brockport Collaborate on Social Work Program

In the first program of its kind in the U.S., Nazareth College (N.Y.) and State University of New York (SUNY)-Brockport will collaborate on a joint Master of Social Work (MSW) program. The Greater Rochester Collaborative MSW Program will open its doors in January 2000 at the SUNY-Brockport MetroCenter.

"Nazareth College is proud to be the first private college in the country to partner with a public institution to establish a collaborative graduate MSW program," said Dr. Robert A. Miller, Nazareth College president.

The MSW program will have two concentrations: Family and Community Practice, and Interdisciplinary Health Care Practice.

Washington State Hosts 3rd Annual Fiesta Aztlan

Washington State University (WSU) held the third annual Fiesta Aztlan in September.

According to Francisco Noe Tamayo, WSU Chicana/o-Latina/o Student Center counselor, the event helped promote campus awareness of diversity issues and helped increase the visibility of WSU Chicana/o-Latina/o organizations.

Tamayo also said that the historic independence of Mexico and the importance of the WSU administration's continuing to embrace diversity at all levels were discussed.

Sabor de la Raza, a WSU student group, performed authentic Mexican folkloric dances.

Cleveland State Celebrates Hispanic Awareness Week

Cleveland State University (Ohio) recently held its 10th Annual Hispanic Awareness Week: "La Promesa de las Culturas Lajinas en el Siglo XXI."

Dr. Félix V. Matos Rodriguez, Northeastern University-Boston assistant professor of history, offered his perspective on the promise and influence of Latino cultures throughout the world.

The Hispano Danza Dance Company, the official dance company of the Hispanic Cultural Center of Cleveland, respectively represented the Hispanic cultures, performing all choreographies with the proper rhythm, technique, and style reflective of the characteristics and traditions of peoples of Latin America.

Other events included a Latino art exhibit, Hispanic community forum, and a Latino awards luncheon.

News from the Jack S. Blanton Museum of Art

The University of Texas-Austin Jack S. Blanton Museum of Art and the Patricia Phelps de Cisneros Collection of Caracas, Venezuela, have established "Constructive Horizons: The Latin American Perspective," an art loan and research program designed to promote understanding of modern and contemporary Latin American art. Phelps de Cisneros (pictured) founded the Cisneros Collection in 1980.

The Blanton recently hosted "Representing Latin American/Latino Art in the New Millennium," a four-day international symposium for scholars and arts professionals. Participants examined the role of Latin American/Latino art and curatorial practices in museums and cultural institutions.

The catalogue for the exhibition "Cantos Paralelos: Visual Parody in Contemporary Argentinean Art," organized by the Blanton, was chosen by the American Institute of Graphic Arts as one of the 50 best-designed books published in the United States this year.

Allan Hancock to Increase Student Transfer Rates

Allan Hancock College (Calif.) was awarded a multi-million dollar competitive grant that will help improve the educational success and increase the transfer rates of its students. The monies come from the DOE's Title V funding, set aside for Hispanic-Serving Institutions. Allan Hancock was one of 39 college and university recipients nationwide.

"This grant will enable us to enhance existing programs to serve more students," said Dr. Ann Foxworthy (pictured), Hancock superintendent/president. Foxworthy emphasized that although Hispanic and disadvantaged students are a focus of the grant, all students will benefit from the funding.

Manhattan Community Awarded Grant for Upward Bound

Borough of Manhattan Community College (BMCC) in New York was awarded a five-year, $975,000 grant from the U.S. Department of Education to help fund Upward Bound, a program that assists high school students in preparing for and graduating from college.

BMCC will provide services to 52 high school students from five local high schools.

Dr. Antonio Pérez, BMCC president, said Upward Bound is another tool in the college's efforts to assist the city's high schools in preparing their students for college-level work. "It is part of our mission to make higher education accessible," said Pérez.
President's Council Announces Y2K Youth Education Program

John A. Koskinen, chair of the President's Council on Year 2000 Conversion, announced at the National Press Club in Washington, D.C., the Y2K Youth Education Program. The program will provide up-to-date information about the Y2K issue and readiness efforts to teachers for classroom use. The information will be distributed via the National Newspaper Association and the Newspaper Association of America, which represent the nation's daily, weekly, and community newspapers.

Texas-San Antonio Gets Grant for At-Risk Students

The LT-San Antonio (UTSA) will receive more than $1.8 million from the U.S. Department of Education over the next five years to help local students, beginning at sixth grade, become better prepared for college.

Through a national initiative, the Gaining Early Awareness and Readiness for Undergraduate Program (GEAR UP), the grant establishes a partnership between UTSA and the Northside Independent School District's Anson Jones and Sam Rayburn middle schools, where three out of four students, on average, are academically at risk.

UTSA is the only San Antonio-area institution to receive a GEAR UP grant this year, said René Cuntí Jr., UTSA's Upward Bound Project Director.

Colorado Mountain Offering Study-Abroad in Spain

Colorado Mountain College (CMC) has joined the Community College of Denver and the Centers for Academic Programs Abroad to offer a study-abroad opportunity in Spain, January 15 through April 16, 2000.

Participants will live with a Spanish family, studying the Spanish language and culture while taking college courses that can be applied toward a degree. "Those who take advantage of this opportunity will spend a semester surrounded by centuries of history, art, and architecture," said CMC Professor Garry Zabel, who will co-direct the program with Dr. Roberto Salaz (pictured) from the Community College of Denver.

California State-Dominguez Hills to Study Diverse Communities

California State University-Dominguez Hills (CSUDH) received a three-year, $350,000 grant from the Ford Foundation to study "Global Diasporas in Southern California," which are ethnic communities formed by immigrants who continue to speak their native language and practice their native customs.

The grant will revolutionize the way non-European cultures are studied, said Dr. Selase W. Williams, dean of the College of Arts and Sciences. Traditionally, Williams explained, "place-based" studies of foreign cultures have required travel to their native land. But the CSUDH model is "people-based," examining not where the cultural group once lived, but where they reside now.

"Learning how to accommodate cultural diversity in every aspect of our lives is a real challenge," said Williams.

Texas-San Antonio Hosts "Language Minority Education" Discussion

LT-San Antonio (UTSA) recently hosted a panel discussion, "Language Minority Education: Perceptions, Policies, and Challenges in the Wake of California's Proposition 227," part of the 28th annual meeting of the Linguistic Association of the Southwest.

Otto Santa Ana (pictured), professor of linguistics at the César E. Chávez Instructional Center in Interdisciplinary Chicana and Chicano Studies at the University of California-Los Angeles, was one of four panelists. Santa Ana is the author of Brown Tide Rising: Metaphor Representations of Latinos in Public Discourse, an analysis of the impact of public discourse on California's recent referenda in the areas of immigration, affirmative action, and bilingual education. Other panelists included UTSA faculty members Juliet Langman and Thomas Ricente Terrence Wiley from California Polytechnic University-Pomona.

Santa Ana also gave a lecture at UTS Metaphors, Politics, and Public Opinion focused on ways for harnessing public course to better represent community color in the larger political process.

Western University Conducts Medical Spanish Courses

Health care students and practitioners wishing to improve their intercultural communication skills were invited to attend beginning and intermediate medical Spanish courses this semester at Western University of Health Sciences (WesternU) in California.

The two four-week courses, Beginning Medical Spanish Intermediate Medical Spanish, were offered by Western and the Claremont Graduate University Division of Extended Learning (Calif.).

"Our goal is to provide health care students and health professionals with practical instruction that will enhance their communication skills," said Dr. Joy KI (pictured) assistant to the executive president for distance learning and e-format outreach at WesternU.

Southwestern Law School Wins Student Bar Association Title

The Southwestern University of Law (Calif.) Student Bar Association was named one of the top four bar associations in the country by the American Bar Association's (ABA) Law Student Division. ABA-approved law schools are divided into four regions, and Western Region encompasses 47 approved law schools in 15 states. The award was presented at the ABA Annual Meeting in Atlanta.

Southwestern's Student Bar Association promotes student interests, provides extracurricular activities, and encourages community service.
City College of New York Hosts Human Rights Seminar

City College of New York recently held "Democracy and Human Rights in Contemporary Dominican Society," a seminar on the prison system, extrajudicial killings, the condition of women and minors, the plight of Haitian immigrants, and the status of the Dominican-born children of Haitians in contemporary Dominican Republic. Speakers included Silvio Torres-Saillant (pictured), director of the City University of New York Dominican Studies Institute; Roberto Alvarez, former staff attorney of the Organization of American States; Eduardo Jorge Pratts, of Fundación Institucionalidad y Justicia; Wilfredo Mora, of Asociación Dominicana de Psicología Jurídica; Susi Pela, Núcleo de Apoyo a la Mujer: Amarré de los Santos, former researcher at Movimiento de Mujeres Dominico-Haitianas; Manuel Maos, of Sheurer, Wiggins, and Hardy LLP; and Luis Heredia Bonneti.

Tunxis Film Series Highlights Hispanic Heritage

Tunxis Community-Technical College (Conn.) presented two Hispanic films in September in commemoration of Hispanic Heritage Month.

The film, Strawberry and Chocolate, was shown along with a lecture on repression in Cuba by Virgilio Acevedo, instructor in history and Spanish at Tunxis. The film The Last Supper was shown followed by a talk by Acevedo on Cuban slavery and Hispanic diversity.

Acevedo, who recently became a full-time faculty member, has a bachelor’s degree from InterAmerican University of Puerto Rico, a master’s from the University of Connecticut, and another master’s from Drew University.

In the News at Oswego

Oswego State University (N.Y.) hosted the 18th annual African, Latino, Asian, Native America (ALANA) Student Leadership Conference, offering free programs, speakers, and workshops. The conference highlighted multicultural activities while bringing together the student body, faculty, staff, and community members in social and educational programs. Sandra Guzman, editor-in-chief of Latina magazine, was a featured speaker.

La Estudiantina de Venusa, a group of 18 young Venezuelan students/musical performers, gave a performance, "A Taste of Venezuela," at Oswego in September. Composed of students and several professors from the University of the Andes, the group uses typical Latin American instruments and includes more recent popular Latin dance music such as merengue and salsa.

Our Lady of the Lake Receives $55 Million

Our Lady of the Lake University (OLLU) in Texas received a $55 million Department of Education Partnership grant to improve the quality of teacher education.

Project CoMet: A Community Partnership for Collaboration, Mentoring, and Technology will increase the number of classroom teachers who will prepare students more effectively for graduation and successful entry into college. It will provide instruction in new technologies, increase the number of teachers in critical need areas such as math and science, and provide ongoing mentoring for classroom teachers.

"Hispaniola" Exhibit at City College of New York

City College of New York’s Dominican Studies Institute recently hosted "Hispaniola: One Island, Two Cultures," an exhibit providing an enriching glance at the historical origins of Haitians and Dominicans, the two peoples who share the island of Hispaniola. Held in the City College Library Atrium, the exhibit stressed the central role of conflict as a force that has moved historical change over the last five centuries.

Frank Maya Pons (pictured l.), author of the book The Dominican Republic: A National History (Markus Wiener Publishers), gave a lecture, "The Hispaniola Experience: A Dominican Perspective." Patrick Bollegarde-Smith (r.), of the University of Wisconsin Department of Africology, gave a lecture, "The Hispaniola Experience: A Haitian Perspective." Curators were Sarah Aponte, Julio A. Rosario, and Sólo Torres-Saillant.

Texas Schools Merge to Enhance Teaching of Science and Mathematics

A new National Science Foundation (NSF) grant will team two Texas rural school districts with two universities and a state research agency to enhance teaching of science and mathematics. The two school districts—Beaville and Hereford—will become a laboratory for select university students to be immersed in the teaching and learning of science and mathematics.

The NSF grant of nearly $700,000 is for the Graduate Teacher Fellows in K-12 Education Project. The three-year project—led by Dr. Diana L. Martinez, dean of science and technology at Texas A&M-University Corpus Christi—links the Texas Engineering Experiment Station with researchers and stu-
University of Texas to Collaborate with Public Schools

Felipe Alanis, a deputy commissioner at the Texas Education Agency, will coordinate university and public school collaborative programs as new assistant vice chancellor for academic affairs in the University of Texas (UT) System.

Alanis will be in charge of an expanded initiative that the UT System is undertaking to coordinate and strengthen its role in the preparation of teachers, in education research, and in other activities that support public education.

"Dr. Alanis is well known in the Texas education community for his superb leadership skills and his extensive knowledge of education issues at all levels," said Ed Sharpe, executive vice chancellor for academic affairs.

Alanis received a bachelor's degree and a master's from UT-Pan American, and a doctorate from UT-Austin.

New Mexico Conducts Program for Chilean Teachers

The University of New Mexico (UNM) conducted an eight-week teacher development program for 26 Chilean elementary school teachers, thanks to a grant Chile's Ministry of Education bestowed upon the UNM College of Education's Office of Latin American Programs in Education and the UNM Latin American and Iberian Institute's Office of International Technical Cooperation.

The program, "Mejoramiento de la Práctica Pedagógica," emphasized hands-on experiences and a balance between theory and practice in the areas of action research, educational technology, and innovations in education.

Wright State Celebrates Hispanic Heritage Month

Wright State University (Ohio), through its Asian/Hispanic Native American Center, celebrated Hispanic Heritage Month with a variety of events, including workshops, films, and art. The theme was "Descubrir Nuestra Cultura (Discovering our Culture)."

As part of a special workshop, Eileen Torres (pictured), vice president of Potomac Alliance Incorporated in Washington, D.C., presented "Understanding and Marketing to the Hispanic Community." Sessions focused on the complex makeup of the market, regional differences, language preferences, and cultural commonalities that define the subculture and glaring differences between the Latino market and others.

Nassau Programs Honor Hispanic Culture

Nassau Community College (N.Y.) recently hosted its 5th annual Hispanic heritage celebration, offering enlightening and educational programs.

In September, Ralph Mercado and Dagmar's Cabezas visited the school. A 30-year veteran of the Latin music industry, Mercado helped salsa music become a worldwide success. Cabezas was the first Hispanic vice president of the City College of New York, and she is one of the founders of Alianza Dominicana, the first Dominican not-for-profit group in the United States.

In October, John Silva and Orchestra performed their Latin sounds; dancer Nelson Flores discussed the cultural background of salsa and merengue; and Julio Padón (picture), president and founder of Latino Sports Venture Inc.; and Carmen Rivera, a member of Latino Experimental Fantastic Theatre, offered their insights.

"Africa in the Spanish Imaginary" at Juan Carlos Center

As part of its year-long focus on the historical and cultural ties between Spain and Africa, New York University's King Juan Carlos I of Spain Center offered "Africa in the Spanish Imaginary," a series of three lectures.

Mbare Ngom, from Morgan State University, spoke on "Images of Sub-Saharan Africa in Spanish Colonial Literature." José María Rivas, diplomat and scholar, who was posted in Equatorial Guinea in the early 1990s, discussed his experiences. Alfonso Armada, correspondent for the Spanish ABC and author of Cuaderno de Ajedrez, was also a speaker.

Baltimore-Essex Celebrates Hispanic Heritage Month

The Community College of Baltimore County-Essex (Md.) recently celebrated Hispanic Heritage Month.

Teresa Tufano gave a lecture highlighting the unique history and rich diversity of Latin American cultures. Tufano founded the Latin American Folkloric Group in 1989 as a means of exposing the public to the diversity of Latin America through music, dance, and literature.

Instrumentalist Correo Aereo performed "The Music of Latin America." Aereo forms--on harp, guitar, and fiddle--songs from the folkloric traditions of Venezuela, Argentina, and Mexico.

Dr. Carmen Nieves gave a lecture on "Contributions of Latino Women in the U.S."

Good Practice in Student Affairs: Principles to Foster Student Learning

by Gregory S. Binning and Elizabeth J. Whi and Associates

This volume identifies the best practices in student affairs, presents research that supports these practices, and gives examples of how to use and implement these principles in the field.

Assessment Essentials: Planning, Implementing, and Improving Assessment in Higher Education
by Catherine A. Palomba and Trudy W. Bazis

Experts in assessment offer this comprehensive, step-by-step guide to the most current practices for developing assessment programs on college and university campuses. This book is filled with a wealth of illustrative examples to show how assessment is accomplished on today's academic campuses.

The Captains of Trees: Stories
by Alberto Alvaro Rios

This collection of stories by renowned Chicano writer Alberto Alvaro Rios re-creates a time and place largely forgotten these days except by grandparents and elders. The stories in this book are part folklore, part oral history, but in full measure literary as they recollect family tales modified by time, telling, and how Rios's graceful perspective.

Jean Rhys
by Elaine Savory

Jean Rhys has long been central to debates in feminist, modernist, Caribbean, British, and post-colonial writing. Elaine Savory's study, which refers widely to Rhys criticism and goes beyond it, is a critical reading of Rhys's entire oeuvre. This book is designed for both the serious scholar and those unfamiliar with Rhys's writing.

The Collected Writings of Salvador Dalí
Haim Finkelnstein, ed. and trans.

This is the first comprehensive collection of Dalí's shorter writings to appear in English. It includes almost all of his writings published in the 1920s and 1930s—most of which appear in this book for the first time in an English translation—and a substantial selection of shorter pieces published in the 1940s and later.

Like the Singing Coming Off the Drums: Love Poems
by Sonia Sanchez

It has been said that Sonia Sanchez's love poems put into words the passions of a generation. In this collection, Sanchez writes—in haiku, tanka, and sensual blues—as few others do of the many forms love takes: burning, dreamy, disappointed, and vulnerable.

Shake Loose My Skin: New and Selected Poems
by Sonia Sanchez

This book covers more than 30 years of work and is a stunning testament to Sanchez's literary, sexual, and political power. Sanchez appears here as Maya Angelou described her, "a lion in literature's forest."

The San Luis Valley: Land of the Six-Armed Cross
2nd ed.
by Virginia McConnell Simmons

A definitive history of Colorado's San Luis Valley, this redesigned edition lays before the reader the voices and narratives of this multicultural land. Spanning the history of the region from prehistoric peoples and Native American tribes to early Spanish settlers, American explorers, railroads, and Euro-American pioneers, this book reveals many diverse stories that are bound together by a unity of place.

Onetti and Others: Comparative Essays on a Major Figure in Latin American Literature
Gustavo San Román, ed.

In this book, international scholars explore the connections between Juan Carlos Onetti, one of the foundational figures of the 1960s "Boom" in Latin American literature, and other relevant writers and texts from Latin America and beyond. The essays reflect a range of perspectives, including influence and gender studies, and focus on topics as diverse as urban settings, prostitution, male fights, and fau and thin characters.

Re-reading José Martí: One Hundred Years Later
Julio Rodríguez-Luján, ed.

Written by renowned Latin Americanists, this collection explores the man who created the notion of Latin America—Nuestra América
also the title of José Martí’s seminal text—as a distinct cultural and racial identity. Together, the essays offer a re-evaluation of his contributions to Latin America’s literature and political evolution.

Aztlán: A Journal of Chicano Studies, Vol. 24, No. 1
Chon A. Noriega, ed.

Aztlán is an interdisciplinary, refereed journal dedicated to scholarly research relevant to or informed by the Chicano experience. First published in 1970 and still the premier journal of Chicano studies, it is issued twice a year. A yearly subscription costs $25. Contact: e-mail <aztlan@csrc.ucla.edu>.

Spring 1999. 224 pgs. ISSN 0805-2604. $1250 paper. UCLA Chicano Studies Research Center. (310) 825-2642.

La narrativa de Alejandro Morales: Encuentro, historia y compromiso social
by Jesús Rosales

This book, written in Spanish, focuses on how contemporary Chicano writer Alejandro Morales’ novels collectively reconstruct the history of the Chicano in the United States and the social implications that stem from it. Morales’ narrative reflects the complexities that make up a “Chicano essence.”

Many publications featured in this section are available through Amazon.com.

Ramón María del Valle-Inclán: El Fulgor de la Palabra

In this program, documentary material and dramatizations are blended to provide an account of a major Spanish novelist and playwright—whose “esperpentos” such as “Tirano Banderas” and “Los Cuernos de Don Friolero” prefigured the theater of the absurd—within the context of his nation’s political turmoil.

(Spanish, 56 min., color) Item #FFH 9123

Andalusia: Cradle of Stereotypes

Andalusia, home of bullfighting and flamenco dancing, is the focus of this program. What is the relationship between the tourist poster images and the real people who live in Andalusia today?

(53 min., color) Item #FFH 2805

Ancient Civilizations: The Aztec

This program explores Aztec culture and history, from the role of human sacrifice in the Aztec religion to their agricultural advances. Commentary by scholars, maps, and contemporary accounts provide an overview of the events that both shaped and destroyed an empire.

(47 min., color) Item #FFH 8689

Donde Digo Diego Rivera

Rivera is the best known of Mexico’s 20th-century artists. His murals are pictorial history books that recount the struggles of Mexico’s peoples for spiritual and economic liberation. This program visits the Rivera Museum, which contains his works, the monuments of his life, and his superb collection of pre-Columbian artifacts.

(Spanish, 56 min., color) Item #FFH 2185

SpanishNow!

With this program, you will learn by immersing yourself in Spanish. You will participate in real conversations, read interesting articles, and watch intriguing videos from Spain, Mexico, and other Spanish-speaking countries. Engaged in this rich multiexperience, you might never feel as if you are studying, and the fact that you actually using Spanish becomes transparent.

Book Review

by Marta Aida Umanzor, Ph.D.

With the 1997 posthumous publication of her novel Rito de iniciación, Rosario Castellanos completed the novelistic cycle she began with Balu Canán forty years earlier. The themes used in Rito de iniciación are the conflicts, frustrations, and achievements of a young female student. The novel is set in 1953, within the student life at the Autonomous University of Mexico (UNAM), located in the Mexico City barrios of Pedregal and San Rafael. The central character is Cecilia, around whom revolve her mother, her stepmother, and a half dozen of her classmates. Her nickname “Cecilia Puersanta” compares her to the Catholic Saint Cecilia, protector of the blind. While she feels proud to have this name, her classmates want her to drop it as soon as possible, considering it too negative.

The text is divided into ten chapters, and each can be read independently, although approaching them in that way breaks the narrative unity, since each presents a different aspect of Cecilia within the “rite of initiation” process. These include: her rebellion against her mother’s severity, her sexual inaction by means of country customs transplanted to a cosmopolitan city, her discovery of Mexico City, the interference of the university as an institution, the apparition of sacred figures, and finally, the discovery of a religious vocation. This whole process of adaptation and discovery carries the theme of a female initiation rite that prepares Cecilia to live on her own, without the support of her parents, stepmother, school, friends, or love.

One of the elements that permeate the novel is a monologue of life that contrasts sharply with Cecilia’s youth and the exuberance of nature expressed in the novel. The adolescent routine of her daily life becomes a nightmare, something Cecilia cannot change, although neither is it her intention to do so. Her life is identified with the uselessness and helplessness of the inhospitable Pedregal. The loneliness of the place affects her deeply. “It’s no use even for death.” She displays a pessimistic resignation towards the future where she sees herself “as a river with a dark and turbulent current...small, alone, surviving.”

This negative attitude towards life changes when Cecilia strips herself of her childhood affectations to choose the clear countenance of the adult. Now timid, lazier, and fear of attracting attention cease to be a problem for her. Her life consists of learning and practicing gestures that she adapts, with reflexive precision, to each circumstance and each situation she encounters. In the first stage, Cecilia imitates her mother, attracting the term “señora.” She is delighted with the decorative effect that being “señora” produces in her, since it was given to her by society at large, not by her family.

Cecilia harbors a fear of being rejected and constantly asks herself, “How will you handle failure?” She is living in the city, far from her father José María and from her boyfriend Enrique, whose presence in her mentors helps her recreate the simple environment of a small town. Cecilia carries a constant fear that her boyfriend might ask her for his freedom. “There is no restraint about grief. It burdens, it overpowers, it destroys.” While Cecilia talks for the sake of talking, Enrique waits patiently, hoping that one day her voice will yield him her flesh, her cares, and her passion. Cecilia does not hesitate to offer her words rather than her body, so her boyfriend eventually stops thinking that this is a type of flirting.

In her diary entry about this event, Cecilia presents herself to the reader as hearless and self-absorbed, while in her oral passage, everything is to the contrary. Well could she represent a protagonist from the sixties. Although freer than she was, she is still somewhat influenced, through marital and social tutelage, by the traditional female model that considers sex outside of marriage a stigma, harshly punished by society. In her final ritual stage, one can see that she is still afraid of confronting a “woman’s vocation.” She has succeeded in passing the college-age baptism of fire, through which “she recovers integrity, dispenses with all the accidental and affected qualities that made her life so difficult, and she discovers herself transfigured in essence, crystallized in definitions that clarified her present while, at the same time, opening up a perspective on time.”

It is not known for sure what motivated Rosario Castellanos to partially exclude Rito de iniciación from publication. In 1964, among a circle of friends, she announced completion of the novel. They criticized Castellanos for continuing in the traditional style. In Mexico during the 1960s, the “pre-boom” stage permeated novelistic expectations, introducing new structures such as experimenting with time, with characters, and with the traditional narrative flow. At this time, many writers distanced themselves from such models as Ernest Hemingway, moving toward William Faulkner, Julio Cortázar, and Gabriel García Márquez. Nevertheless, Castellanos’ generation felt attracted by the English novel, represented by Graham Greene, E.M. Forster, Evelyn Waugh, but without dismissing Joyce, Proust, Kafka, Borges, and Sábato. In studying Castellanos, one has to keep in mind the post-war influence of feminist such as Marguerite Duras, Nathalie Sarraute, Michael Butor, Claude Simon. She was especially attracted to Alain Robbe-Grillet, Simone de Beauvoir, Simone Veil, and Virginia Woolf. It is most intriguing that later she excised the novel from her work, and published it as a short story under the title Alumnada (1971).

The excitement of the “boom” years has passed into history. Since Rosario Castellanos’ death in 1974, critics have been able to more objectively analyze her work. With the publication of the original full novel, Rito de iniciación, she has completed the cycle of her works’ main theme—the triumph of women.

Dr. Marta A. Umanzor, associate professor of modern languages at Saint Michael’s College, Colchester, Vermont, teaches contemporary Latin American literature courses. She is currently working on several book reviews.

This could be your family

Irma Martinez, her husband Vicente, and 13 additional members of her family are graduates of Robert Morris College.

Nineteen years ago, Irma decided she would no longer work in a factory. That's when she took the initiative and applied for admission to Robert Morris College. Irma never imagined her decision would have such an impact on the rest of her family. Since that day, 14 of her family members have followed her path, we hope that this number will continue to grow with future generations.

Just imagine, the decision you make today can influence the course of your family’s life. The College is honored to share remarkable stories such as this one, and looks forward to sharing your story in the future.

Robert Morris College awards the Bachelor of Business Administration Degree, the Bachelor of Applied Science Degree in Graphic Design, the Associate in Applied Science Degree, and the Professional Diploma in a range of progressive fields. Programs of study include Graphic Arts, Web Design, Media Arts, Accounting, Business Administration, Computer Networking, Computer Programming, Medical Assisting, and Healthcare Management.

*Robert Morris College is also the number one private college grantor of Bachelor Degrees in Business Administration to combined African American and Hispanic Americans in the country*

Faculty Diversity Program

A liberal arts, co-educational college on a 79-acre campus, Queens College, one of the senior colleges of the City University of New York, offers an outstanding educational opportunity to approximately 18,000 undergraduate day, evening, and graduate students who represent a rich mosaic of ethnic/cultural, economic, and social backgrounds.

The Faculty Diversity Program has as its aim the development of a pool of candidates which will allow Queens College to progress toward greater faculty diversity. Candidates for these openings must have a doctorate (or, in the fields of music and art, a record of exceptional achievement) and potential in teaching and research which will make a significant contribution to Queens College.

Appointment rank and salary depend on qualifications and experience. All Full Professor, Associate Professor, and Assistant Professor ranks are tenure-track positions. Current salary schedules are: Full Professor, $52,898–$81,924; Associate Professor, $42,616–$58,114; Assistant Professor, $32,703–$57,049. Excellent fringe benefits.

Review of resumes will continue as vacancies become available. Closing date for this search is March 15, 2000. Send vita and references directly to appropriate department chair at Queens College, CLNY, Box HO, 65-30 Kissena Blvd., Flushing, NY 11367-1597.

Y2K PROBLEM:

The Cooperative Grants Program (COOP) of NAfSA is now accepting proposals for the 2000 Incentive Grant Competition. Incentive Grants provide seed funds in the range of $2,000 to $5,000 for campus- or community-initiated projects that creatively involve international and/or U.S. study abroad students in U.S. campuses and communities. Incentive Grant applications must be received by March 1, 2000.

Interested persons may also submit proposals for Mini-Grants, awards of up to $2,000. With a short review period of only five weeks and a rolling deadline, a COOP Mini-Grant can provide you with the funding you need to implement your millennium programming idea during the spring 2000 semester.

For application materials, a list of eligibility criteria, and a Model Program List please visit the COOP web site at www.nafsa.org/coop or e-mail ElizabethS@nafsa.org.

Y2K SOLUTION:

Create a program on one of the COOP millennium themes, listed on the COOP web site at www.nafsa.org/coop, or dovetail with other millennium or special activities. Examples include:

- Involve international exchange students in your community's or state's millennium activities.
- Create a Millennium Gift as an act of service. See www.igc.apc.org/millennium/gifts/index.html.
- Observe or celebrate a U.N. International Day.
Values and a Future Profession –
A Winning Combination!

• Listed by Hispanic Outlook as one of the Top 100 colleges and universities that serve Hispanic students.
• Respected faculty who excel in their fields AND in teaching – their priority is to prepare YOU for your future.
• Over 60 undergraduate programs designed to take you into the 21st century.
• Opportunities to exchange ideas with students from across the U.S. and 70 different countries.
• Over $1,200,000 in Barry Scholarship Funds awarded to qualified Hispanic students in this academic year.

Qualified applicants will be reviewed without regard to race, creed, color, sex, or national origin.

ASSISTANT PROFESSOR
MSEE - FIT TEMPORARY

THE MASSACHUSETTS
MARITIME ACADEMY
is seeking an individual to teach in the Marine and Environmental Protection Department. The position is a one-year full time temporary position at an Assistant Professor. Qualifications include advanced degree (doctorate preferable) Oceanography or related field and college teaching experience. Exp. in research and/or industry/indus.
Applications will include course oceanography, marine wastewater treatment, marine pollution, marine environmental protection, and communication. Please submit all letters of interest, resume, and the names, addresses, and telephone numbers of five (5) professional references to Professor, Ms. Suzanne Burke, Assistant Professor, Human Resources, 101 Academy Buzzards Bay, MA 02532. Deadline: 12/01/09.
303/01/00 or email sgburke@mcs.mins.edu. Visit our web page at http://www.mcs.mins.edu

KOFIAA
Sam Houston State University

Sam Houston State University is ranked as one of the top 100 colleges in graduating Hispanics. We are once again doing everything possible to continue to do well in this area. We are continuing our weekend Spanish programming on our campus radio station, we will be hosting our annual conference on Culturally and Linguistically Diverse Populations, and the continuation of our $1 Million Project UpBEATT program to help relieve the nation’s shortage of skilled bilingual educators. These are just a few of the reasons, along with our new South Texas Admission Counselor, that Hispanic enrollment should continue to increase at our university. Visit our web site at www.shsu.edu or call (409)294-1844.

Veronica A. Leos
is a graduate of Sam Houston State University from our esteemed College of Criminal Justice.

THE UNIVERSITY OF TEXAS AT DALLAS
SCHOOL OF MANAGEMENT
FACULTY POSITION IN ACCOUNTING

The School is recruiting to fill one (1) open position in the Accounting program effective September, 2000. Appointment at Assistant, Associate or Full Professor level will be considered, depending upon the qualifications of the candidates. Applicants must have a Ph.D. degree or equivalent and demonstrate the ability to conduct a nationally recognized research program. Graduate education in a university emphasizing research training and ability and interest for interacting with faculty colleagues on research projects in related disciplines is desirable. Candidates must present evidence of excellence in teaching and a record of scholarly publication in refereed journals commensurate with their level of appointment. Applicants should send complete curriculum vitae (educational history, teaching, research and other pertinent work experience, list of publications, current research papers and presentations, and the names, addresses and telephone numbers of three references) to: Academic Search #6074, The University of Texas at Dallas, PO. Box 830688, M/S AD 23, Richardson, TX 75083-0688. Indication of sex and ethnicity for Affirmative Action statistical purposes is requested but not required. Review of applicant materials will commence in November, 1999 and will continue until the position is filled or the search is closed on May 31, 2000. The University of Texas at Dallas is an Equal Opportunity Affirmative Action employer and strongly encourages applications from candidates who would enhance the diversity of the University’s faculty and administration.

Position in Human-Environment Relations

The University of Colorado, Boulder, Institute of Behavioral Science and the Departments of Geography and Sociology invite applications for an Assistant Professor tenure-track position in Human-Environment Relations. A Ph.D. is required, and preference will be given to candidates with post-doctoral research experience, a track record of funded research, and commitment to collaborative, multi-disciplinary work. Excellence in teaching at both graduate and undergraduate levels is also expected. The position is in the Environment and Behavior Program in the Institute of Behavioral Science, with teaching responsibilities in the tenure-track Department, either Sociology or Geography.

The Environment and Behavior Program currently explores human-environment relationships through the following two areas: (a) upland/lowland linkages and mountain environments, and (b) water resources and land use interactions. These relationships are explored through three thematic approaches: (1) economic, institutional, and environmental sustainability. The Program has established interests in climate-change relations and environmental hazards.

Applications (including statements of research and teaching interests, evidence of teaching ability, curriculum vitae, and copies of two papers, published or unpublished), along with three letters of recommendation, should be sent by February 1, 2000 to the address below.

The University of Colorado at Boulder is committed to diversity and equality in education and employment.

Apply to Prof. Andrei Rogers
E&B Search Committee Chair
Institute of Behavioral Science
Campus Box 484
University of Colorado at Boulder
Boulder, CO 80309-0484
VACANCY ANNOUNCEMENT

New Jersey City University is a culturally diverse public, urban institution located in the greater New York metropolitan area and is one of nine state colleges/universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250.

We are interested in individuals who want to become members of a dedicated faculty that is committed to excellence in teaching and is actively involved in innovative teaching approaches including use of technology. Faculty may be assigned classes at off-campus sites and asked to provide off-line instruction.

Faculty positions will be filled at the level of assistant professor, instructor level of ABD. Applicants should send a letter of application, resume, and three names, addresses and telephone numbers of references to the office of the appropriate Dean by February 1, 2000.

ANTICIPATED OPENINGS

□ College of Arts and Sciences - Anshley W. LeMar, Ph.D., Dean

☐ Art - Strong professional background in traditional, conceptual, and digital illustration and the ability to teach a wide range of courses is required. Candidate should have at least 2 years college teaching experience and must have demonstrated national prominence and or MFA.

☐ Chemistry - Teach Physical Chemistry, Inorganic Chemistry, Chemical Literature and Scientific Software Applications. Candidate should be able to initiate an undergraduate research program and a modern laboratory program including molecular modeling and instrument interfacing.

☐ Computer Science - Requires successful university teaching experience (5+ years) in a variety of undergraduate Computer Science courses, including Software Engineering, Object-Oriented Methodologies, Telecommunication and Networking, Computer Architecture, etc. The ideal candidate should have extensive industrial experience in the fields of Telecommunication and Networking.

☐ English - Position in Creative Writing. At least 2 years of full-time teaching experience or the equivalent. A distinguished body of published work is necessary. MFA or Ph.D preferred. The position requires the ability and willingness to teach support courses in freshman composition, developmental, creative and business writing, and language and usage.

☐ Mathematics - To teach a variety of courses which may include remedial math as well as general level courses in Mathematics Education. A strong mathematical background, experience with using computers and graphing calculators to teach mathematics, and a sincere desire to help students with weak mathematical background are necessary qualifications.

☐ Media - To teach computer graphics in media. A working knowledge of Adobe Photoshop, and 2D and 3D Animation is essential. MFA preferred. Experience in non-linear video editing desirable. The person will work with both Media and Art majors focusing on computer graphics and animation.

☐ Music - Teach undergraduate and graduate courses in Music Education which will include Elementary and/or Secondary. Methods and Research in Music Education. Successful candidates will also be expected to supervise student teachers, supervise grad students, and perform in area of expertise. Public school teaching experience, knowledge of Computer Technology and keyboard and instrumental skills required. College teaching experience desirable.

☐ Philosophy/Religion - Teach a variety of undergraduate philosophy courses including History of Philosophy, Metaphysics, Ethics, Epistemology, and Civilization courses in the General Studies Program.

☐ Political Science - Position requires a specialization in American Government and/or Political Theory; a record of scholarship and publications; willingness to develop and teach a wide variety of courses; excellent computer and Internet skills; and a strong interest in teaching on-line courses.

☐ Women's Studies - Requirements are a Ph.D. in Women's Studies or a related field, and teaching experience in interdisciplinary core courses in Women Studies. We are particularly interested in candidates with expertise in the natural sciences and/or the social sciences and/or global and transnational feminism; or colonial and diasporic studies, or women of color studies. Applicants should also have experience in program development and administration.

□ College of Professional Studies - Sandra Bloomberg, Ph.D., Dean

☐ Business Administration/Management - Industry background in management information systems or production operations management, along with successful teaching or research experience, is desired. Ability to develop applications using state of the art online and distance technology needed. Commitment to major advancement, student retention and department development essential. Ph.D. or D.B.A. in management preferred; related doctoral preparation will be considered for exceptional candidates.

☐ Business Administration/Marketing - Successful professional experience in marketing and college teaching desired. Specific knowledge of marketing research, consumer behavior, sales and integrated market communications necessary. Commitment to major advancement, student retention and department development essential. Ph.D. or D.B.A. in marketing preferred; related doctoral preparation will be considered for exceptional candidates.

☐ Criminal Justice - Ph.D. or ABD in Criminal Justice required. The JD degree is not considered an appropriate terminal degree. Experience as a practitioner in the fields of criminal justice is desirable. Favorable specializations include any combination of the following areas: law enforcement, courts, probation, corrections, parole, juvenile justice, and research. Ability to develop applications using state of the art online and distance technology a plus. Willingness to advise students and contribute to departmental development and operations is necessary.

☐ Health Sciences - A minimum of five years recent health care administration experience desired. Commitment to teaching and student advancement in essential. Ability to develop applications using state of the art online and distance technology needed. Willingness to contribute to departmental development and operations is necessary. Doctorate preferred. Candidate strongly preferred. Applied research background a plus.

☐ Nursing - Teaching responsibilities include theoretical clinical courses in a RN-BS completion program and possibly in a master of science in Nursing program. Psychiatric specialty required; doctoral degree preferred. Experience with college teaching and curriculum development is highly desirable. ABQL to work with an integrated curriculum and a diverse adult population in required. Experience in developing applications using state of the art online and distance technology a plus. Academic advancement and willingness to contribute to departmental development and operations in essential.

□ College of Education - Yiping Wann, Ph.D., Dean

☐ Administration, Curriculum and Instruction (2 positions) - To lead the Educational Administration Program development and modification. Teach courses in educational administration, political and organizational life, and supervision theory both on and off campus, supervise graduate interns, seek opportunities for research including grant applications. Strong theoretical, research and publication background preferred and administrative experience in public schools desirable. Some undergraduate teaching supervision possible.

New Jersey City University
2039 Kennedy Boulevard, Jersey City, New Jersey 07305

An Affirmative Action, Equal Opportunity Employer. The College especially welcomes and encourages applications from women and minority candidates.
BILINGUAL EDUCATION
The Literacy, Language, and Cultural Studies Specialization in the Department of Developmental Studies and Counseling is searching for a faculty member in Bilingual Education. The position will be filled at the rank of assistant or associate professor.

Candidates must have an earned doctoral degree with an emphasis on the education of bilingual learners, in particular, literacy and language development, assessment and instruction, and curriculum development. Teaching courses and supervising students in these areas, conducting independent research, and supervising the research of graduate students are expected.

SCHOOL COUNSELING
Search Extended
The School of Education has available a school counseling position in the Department of Developmental Studies and Counseling. The tenure-track position is to be filled at the rank of assistant professor, with responsibility for program leadership.

Candidates must have an earned doctoral degree in counseling, a record of publication and research, and academic and professional interest in two or three of the following areas: counseling, philosophy, theory and practice; school counseling; group counseling; family issues; assessment; career counseling; and the education of the diverse student population in today's schools, including those with special needs. Candidates will be expected to teach courses, supervise students in field settings, conduct research, and work in interdisciplinary faculty teams for the purposes of program development. Candidates should, furthermore, hold an active license in psychology as well as current certification in school psychology and school guidance and/or school adjustment counseling.

ELEMENTARY EDUCATION
The Department of Curriculum and Teaching is seeking an assistant or associate, tenure-track, faculty member to join the Elementary Education program. The position involves teaching and conducting research in elementary education, particularly the teaching of reading and writing. An earned doctorate is required. Experience as an elementary classroom teacher is preferred. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level.

ENGLISH EDUCATION
The Department of Curriculum and Teaching is seeking an assistant or associate, tenure-track, faculty member to serve in the English Education program.

The position involves teaching, supervising field work, and conducting research in English Education for middle and senior high school students. Teaching experience as a middle or senior high school English teacher is preferred. An earned doctorate in either English or English Education is required. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level.

SCIENCE EDUCATION
The Department of Curriculum and Teaching is seeking an assistant or associate, tenure-track, faculty member to serve in the Science Education program. The position involves teaching and conducting research in the scientific education of elementary students. Experience in elementary schools is preferred and an earned doctorate in Science Education or one of the physical or natural sciences is required. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level.

SPECIAL EDUCATION
Search Extended
The Department of Special Education is seeking an assistant or associate, tenure-track, faculty member, as part of its strategic plan to build a comprehensive program. The position involves teaching about and conducting research in the education of students with learning disabilities, mental retardation, and behavior disorders, and in the integration of such students in regular education settings. An earned doctorate is required. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level. Of particular interest are candidates who are knowledgeable about advances in the study of the causes of learning disabilities, and about research and theory pertaining to the instruction of students with learning difficulties.

The Deadline for Applications is February 1, 2000

A letter of application, a current curriculum vitae, sample publications, and the names, postal and e-mail addresses, and telephone numbers of three references should be sent to:

Ms. Elizabeth Austin
School of Education
Boston University
605 Commonwealth Ave.
Boston, MA 02215

An Equal opportunity, affirmative action employer.
UCDAVIS Opportunities in genomics

The University of California, Davis, is establishing the UC Davis Genome Center through a major campuswide initiative in genomics. The new center is part of a broader campus commitment to build on existing strengths in the life sciences and to establish an internationally recognized program in genomics research. The center will:

- involve faculty scientists from the School of Medicine, School of Veterinary Medicine, College of Agricultural and Environmental Sciences, Division of Biological Sciences, Division of Mathematics and Physical Sciences, and College of Engineering.
- be co-located with programs in molecular medicine, pharmacology, and biomedical engineering in a new 200,000-sq.-ft. building that includes a mod.
- mouse vivarium, small-animal imaging facility, and genomics research core facility.
- provide research space and administrative support for 25 new state-funded faculty positions in genomics (18) and in bioinformatics and computational biology (7). Additional recruitment in these areas is expected in departments throughout the campus.

Director, UC Davis Genome Center

UC Davis invites applications and nominations for the founding director of the UC Davis Genome Center. The director will provide leadership in faculty recruitment to the center as well as in development of academic research and teaching programs in genomics across the entire campus. We seek a director with a vigorous research program and sufficient breadth of experience and interests to provide intellectual leadership for genomics and bioinformatics programs in medicine, veterinary medicine, agriculture, and fundamental life sciences. The director's research could be in any area of genomics, but a focus in functional genomics is desired. The director will be appointed at the professional level in an appropriate academic department in one of six schools, colleges, or divisions. The position will remain open until filled. For full consideration, applicants should send a letter of interest, a curriculum vitae, and the names and addresses of at least five references by January 15, 2000, to: Dr. Larry Hjelmeland, Chair, UC Davis Genome Center Director Search Committee, c/o Dean's Division of Biological Sciences, University of California, One Shields Avenue, Davis, CA 95616.

Associate Director for Bioinformatics, UC Davis Genome Center

UC Davis invites applications and nominations for the founding associate director for bioinformatics, under the director of the UC Davis Genome Center. The associate director will provide leadership in the recruitment of bioinformatics faculty members, development of a core bioinformatics facility, and development of academic research and teaching programs in bioinformatics across the entire campus. We seek an associate director with a vigorous research program and sufficient breadth of experience and interests to provide intellectual leadership in bioinformatics and computational biology in a wide range of genomics. The associate director's research could be in any area of bioinformatics or computational biology. The associate director will be appointed at the professional level in an appropriate academic department in one of six schools, colleges, or divisions. The position will remain open until filled. For full consideration, applicants should send a letter of interest, a curriculum vitae, and the names and addresses of at least five references by January 15, 2000, to: Dr. John Gusfield, Chair, Associate Director for Bioinformatics Search Committee, c/o Dean's Office, College of Engineering, University of California, One Shields Avenue, Davis, CA 95616.

Chair, Medical Pharmacology and Toxicology

The UC Davis School of Medicine seeks a chair of medical pharmacology and toxicology. The chair will provide prominent leadership in the development of educational and research programs. The chair will be responsible for strengthening the Department of Pharmacology and Toxicology with the addition of five new state-funded faculty positions and new research space in close association with the UC Davis Genome Center and the Division of Biological Engineering. Preference will be given to candidates who investigate the genetic and molecular basis of toxicology in cancer, infectious diseases, or new disorders, emphasizing the use of model systems. The successful candidate will be a recognized scientist at the associate- or full-professor level, or equivalent. The position includes an FTE in the School of Medicine and a negotiated resource package. The position will remain open until filled. For full consideration, each applicant should send a letter describing his or her administrative, teaching, and research background, a curriculum vitae, and the names and addresses of at least five references by January 15, 2000, to: Dr. Larry Hjelmeland, Chair, Search Committee for Medical Pharmacology and Toxicology, c/o Dean's Office, School of Medicine, Medical Sciences 1-C, University of California, One Shields Avenue, Davis, CA 95616.

Faculty Positions in Plant Genomics

The College of Agricultural and Environmental Sciences at UC Davis invites applications for two faculty positions in plant genomics. The campus offers faculty appointees an exceptional research environment and the opportunity to teach motivated undergraduates and graduate students in one or more interdisciplinary majors and graduate programs. These positions are open at the assistant, associate, and full levels, and the appointments will reside in an appropriate academic department or be determined in consultation with the successful candidate. Professional positions have responsibilities in teaching, advising, and research (in the Agricultural Experiment Station). Candidates must have a Ph.D. in an appropriate field. Applicants should submit curriculum vitae, transcripts (if within five years of graduation), a statement of research and teaching experience, and the names and addresses of three to five references to: Chair, Plant Genomics Search Committee, c/o Dean's Office, College of Agricultural and Environmental Sciences, University of California, One Shields Avenue, Davis, CA 95616. The positions will remain open until filled, but to ensure consideration applications must be received by December 1.

Comparative Genomics

California agriculture is characterized by a diverse array of crops. The College seeks a plant geneticist with experience in comparative genomics and the proven ability to utilize information and biological resources from model species to make genetic inferences in crop plants. Possible areas of interest include genome evolution, structural basis of allelic variation within species, or phenotypic consequences of genome rearrangement.

Functional Genomics

Functional genomics is the availability of vast amounts of genetic information that will have a significant impact in understanding fundamental plant biochemical and the improvement of both quality and agronomic traits in crops. The research challenge will be to elucidate the function of specific genes and the interactions of large numbers of genes to confer phenotype. The College seeks a plant geneticist with experience in functional genomics and the proven ability to utilize genome sequence information to specify and/or manipulate agriculturally important traits. Possible areas of interest include plant environment interactions in the rhizosphere, environmental stress responses, and metabolism or reproductive biology, including seed development.

Further information about genomics at UC Davis is available at http://genomics.ucdavis.edu
Preferre will be given to candidates with a strong knowledge and interest in Mexican social and political history. United State-Mexico relations, and emancipation and labor themes in a bilateral perspective. Application Procedures: Submit statement of application, curriculum vitae, and the names of three referees to: Dr. James Minor, Mexican History Search Committee, Department of History, Review of applications begins: October 15, 1999.

MANAGEMENT/CHAIR: PROFESSOR. The Chair of the Management Department is the leading faculty member who articulates the department's aspirations, standards, and needs to others inside and outside the University. The Chair reports to the Dean of the College of Business Administration. This position is contingent on Board of Regents approval of the division of the current Department of Management and Marketing. Application Procedures: Submit letter of application, view, a list of three references to: Management Chair Search Committee, Department of Management and Marketing, Review of applications begins: January 15, 2000.

MANAGEMENT/CHAIR: PROFESSOR. BUSINESS COMMUNICATION (POSITION #3). Qualifications: Ph.D. in Management or related discipline required for tenure consideration. ABD in Management or related discipline will be considered. Preference will be given to candidates (1) who place primary importance on teaching excellence and who have demonstrated interest in instructional technology, (2) who engage in scholarly activities, including grants and awards, which provide insight into the practice of business and that enhance the effectiveness of classroom instruction; and (3) who provide service to their profession, the university, and the business community that is consistent with the school's mission. Application Procedures: Submit letter of application, view, a list of three references to: Dr. Robert Olney, Security Committee Chair, Department of Management and Marketing, Review of applications begins: January 15, 2000.

MANAGEMENT/CHAIR: PROFESSOR. STRATEGIC MANAGEMENT (POSITION #4). Qualifications: Ph.D. in Management required for tenure consideration. ABD in Management with dissertation defense within one year will be considered for the position. Preference will be given to candidates (1) who place primary importance on teaching excellence and who have experience/interest in instructional technology, (2) who engage in scholarly activities, including grants and awards, which provide insight into the practice of business and that enhance the effectiveness of classroom instruction; and (3) who provide service to their profession, the university, and the business community that is consistent with the school's mission. Application Procedures: Submit letter of application, view, a list of three references to: Dr. Bill Middlebrooks, Search Committee Chair, Department of Management and Marketing, Review of applications begins: January 15, 2000.

MARKETING/CHAIR: PROFESSOR. The Chair of the Marketing Department is the leading faculty member who articulates the department’s aspirations, standards, and needs to others inside and outside the University. The Chair reports to the Dean of the College of Business Administration. This position is contingent on Board of Regents approval of the division of the current Department of Management and Marketing. Application Procedures: Submit letter of application, view, a list of three references to: Marketing Chair Search Committee, Department of Management and Marketing, Review of applications begins: January 15, 2000.

MASS COMMUNICATION: CHAIR/PROFESSOR (POSITION #45). The Chair provides leadership for a department of 20-25 faculty members and 500-600 faculty members in five years of study leading to the Bachelor of Arts degree in advertising, broadcasting, print journalism, public relations, and general mass communication. A new master's program has been established and the department is currently operating. AED/C Mass Communication. Qualifications: Ph.D. or Ed.D. in Mass Communication. Earned doctorate in relevant field is preferred. Experience teaching in the field is preferred. Application Procedures: Submit letter of application, view, a list of three references to: Dr. Josephine Jordan, Search Committee Chair, Department of Art and Design (BLU014/1072). Review of applications begins: September 15, 1999.

MATHEMATICS ASSISTANT PROFESSOR (POSITION #47). In the areas of combinatorics, discrete algebraic structures and number theory Qualifications: Ph.D. in Mathematics by August, 2000. Applicants must exhibit outstanding research potential as well as excellence in teaching. Application Procedures: Submit letter, curriculum vitae, a research plan, and a list of three references to: Dr. Xiange Xu, Recruitment Committee Chair, Department of Mathematics, Closing Date: January 25, 2000.

PHILOSOPHY: ASSISTANT PROFESSOR. PHILOSOPHY (ENVIRONMENT: NON-TENURE TRACK - POSITION #10). Must be willing and able to teach effectively (with the help of assistants) large sections of introductory philosophy with up to 550 students. This is a required course in SWS General Studies curriculum; it is a writing intensive and includes a 50% critical thinking component. Qualifications: Ph.D. in Philosophy. Research and secondary required. Background in both the history of philosophy and in political philosophy with an emphasis on one of the topics below. Application Procedures: Submit letter of application, curriculum vitae, and a list of references to: Dr. Vincent Latzue, Chair, Department of Philosophy, Closing Date: December 15, 1999.

PHYSICS: ASSISTANT PROFESSOR (POSITION #6). Applied Materials Physicist interested in working with regional and national silicon microelectronic user facilities. Seeks a new faculty colleague whose research plans complement department strengths in the area of thin film growth and characterization. Preferred Ph.D. in thin film deposition, such as novel methods of deposition, characterization and growth processes. Qualifications: Ph.D. in Physics or Materials Science. Experience in the area of low temperature and ambient conditions is desirable. Application Procedures: Send curriculum vitae and a list of three references to: Dr. James S. Crawford, Department of Physics. Review of applications begins: February 15, 1999.

ASSISTANT PROFESSORS

Tenure-track positions available effective Sept. 2000. We are currently seeking education professionals with a commitment to work in multicultural and urban educational settings. Teaching exp and demonstrated potential for scholarly involvement as evidenced by publications/research within the specialty in the profession of education are required. Salary commensurate with experience and qualifications: $32,703 - $57,049.

SCIENCE EDUCATION (K-12) The selected candidate will teach undergraduate and graduate courses in early childhood and elementary education, supervise students in the field, engage in research and scholarly writing, and serve on department, school, college and university committees.

Qualifications: Earned Ph.D. or Ed.D. with concentration in Science Education and at least one of the following: Biology, Chemistry or Physics; certification as a high school science teacher; university teaching and research skills; significant teaching exp in urban public schools; expertise in using technology as a tool in the development of science skills.

EARLY CHILDHOOD EDUCATION (K-12) The selected candidate will teach undergraduate and graduate courses in early childhood and elementary education, supervise students in the field, engage in research and scholarly writing, and serve on department, school, college and university committees.

Qualifications: Earned Ph.D. or Ed.D. in Early Childhood Education; expertise in using technology as a tool in early childhood education; significant teaching exp in head start, day care, public and private pre-school and elementary schools (urban exp preferred); exp in supervision of teachers in diverse settings; university teaching and research skills.

Qualified candidates should send letter of application, curriculum vitae and three (3) letters of reference immediately to: Dr. Alene L. Smith, Chairperson, Department of Curriculum and Teaching-CHO, Hunter College, CUNY, 695 Park Avenue, New York, NY 10021. Review will continue until a candidate has been selected.

Hunter College is an Affirmative Action/Equal Opportunity/IRCA/Americans with Disabilities Act Employer.

The City University of New York

Foothill College

FOOTHILL

English Composition Instructor

Foothill College, located south of San Francisco in Northern California, is a community college serving approximately 15,000 students each quarter.

This position will teach a range of composition courses at all levels, from basic to college-level; develop and evaluate curricula; pursue professional growth activities and maintain scheduled office hours. First Review Date: November 26, 1999.

To receive an application packet, contact: Employment Services Foothill-De Anza Community College District 12345 El Monte Road Los Altos Hills, 94022 (650) 949-6217 employment@fhd.edu www.ffh.fhda.edu/district/hr/employment.html

Assistant Professors

Tenure-track opportunities available for education professionals with a commitment to work in multicultural and urban educational settings. Both positions require participation in research and scholarly writing and serving on department, division, college and university committees. Salary commensurate with experience and qualifications: $32,870 - $57,049.

ELEMENTARY/SECONDARY EDUCATION The selected candidate will teach undergraduate and graduate courses in elementary and secondary education programs.

Qualifications: Earned Ph.D. or Ed.D. in Educational Psychology with specialization in evaluation and assessment of teaching-learning process. Expertise in the teaching-learning process in diverse populations is desirable.

REHABILITATION COUNSELOR EDUCATION The selected candidate will teach graduate courses in rehabilitation counselor education programs & coordinate field placements in counseling programs.

Qualifications: Earned Ph.D. or Ed.D. in Counseling or Counselor Education, or demonstrate in Rehabilitation Counseling Preferred. Expertise in rehabilitation issues in diverse populations is desirable.

Qualified candidates should send letter of application, curriculum vitae and three (3) letters of reference by December 10, 1999 to: Dr. Sherryl Brownie Gravett, Chairperson, Department of Educational Foundations & Counseling Programs-Hunter College, CUNY, 695 Park Avenue, New York, NY 10021.

The City University of New York

UIC

DEPARTMENT OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE FACULTY POSITIONS

UNIVERSITY OF ILLINOIS AT CHICAGO

The EECS Department is in the process of a major expansion of its Computer Science research activity, and invites applications for tenure-track positions at all ranks, as well as applications for lecturer and adjunct positions. Exceptional candidates in all areas of research are encouraged to apply, including those in Computer Science or closely related fields. The department is interested in applicants who are engaged in fundamental research or application-driven creative work likely to generate maximal impact on society. Interdisciplinary applicants are especially encouraged to apply. Applicants should demonstrate research and teaching potential and accomplishments commensurate with the rank they seek.

The University of Illinois at Chicago has undertaken a major shift aimed at establishing itself as one of the nation’s premiere state universities. The EECS Department, known as the birthplace of the CAVE virtual reality environment, hosts active research groups in computer graphics and virtual reality, networks, data mining, artificial intelligence, human-computer interaction, software engineering, computer architecture, database systems, software systems, computer vision, and theoretical computer science. The Computer Science faculty (26 members within the departmental faculty of 33) has been awarded over $80 million in external research grants for the current academic year.

The EECS Department offers BS, MS, and Ph.D. degrees, and has a strong reputation for teaching excellence. It attracts a diverse student body, and is seeking candidates who have an interest in defining and implementing innovative learning programs. The UIC campus is located near downtown Chicago and offers rich opportunities for collaboration with other universities, national research laboratories and high-tech industry. Applicants should send a resume and the names and addresses of at least three references to: Faculty Search Committee, EECS Department (MC 134), University of Illinois at Chicago, 851 South Morgan Street, Chicago, IL 60607-7153. Applications will be reviewed as they are received, but must be received by March 1, 2000 for full consideration. Candidates are especially encouraged to submit electronic versions of their applications for instructions, see the web site http://www.eecs.uic.edu/search.

UIC is an AA/EO employer. We are interested in receiving applications from a broad spectrum of people, including women, minorities, and differently-abled individuals.
Kean University is committed to excellence and to developing and strengthening interactive ties with the community. Kean University takes pride in its continuing efforts to build a multicultural professional community serving a diversified student population of 12,000.

Dean
School of Liberal Arts

Kean University, a publically supported comprehensive, metropolitan institution, seeks applications and nominations for the position of Dean of the School of Liberal Arts. The largest and most complex of five Schools, the School is composed of 11 departments offering 15 degree programs at the baccalaureate and 7 degree programs at the master's level. The departments include: Communication and Theatre, Design, English, Fine Arts, Foreign Languages and Literatures and Cultures, History, Music, Philosophy and Religion, Psychology, Sociology and Anthropology and Social Work. The School also features interdisciplinary collateral programs in Africana Studies, Classical Studies, Global Studies, Jewish Studies, Latin American Studies, Urban Studies and Women's Studies. The School is home to several innovative strategic initiatives programs, including the Graduate Art in Honor Program, Incubator Center, Design Center of New Jersey, Public Relations Studio, Theatre Series Outreach and Development, and Women in Science and Technology. An abiding value of the School is a commitment to an educational environment of cultural and linguistic diversity and gender equality.

Responsibilities: The Dean is expected to provide leadership for the School of Liberal Arts in the areas of teaching, research as well as university and community service. The Dean is also expected to work closely with faculty in curricular matters, including the development of strong and innovative academic programs. The Dean reports to the Provost/VPAA.

Qualifications: The successful candidate will possess an earned doctorate and a record of distinguished academic achievement and appointment at the rank of professor in a department of the School. Other qualifications include: demonstration ability to lead through collaborative and shared governance, and to sustain and support a strong and collegial relationship with faculty, students, staff, and administrators; successful record in budget development, strategic planning and grant acquisition; ability to balance advocacy for the School with the needs of the wider community; and appreciation for and willingness to support the integration of new media technology; experience in developing and leading programs that serve an educationally, ethnically, culturally and linguistically diverse student population.

Application, Salary, Benefits Information: Review of applications will begin on January 10, 2000. Completed applications must include the following: letter of interest; up-to-date resume; names, addresses, telephone numbers of three references. Official transcripts and three current letters of recommendation required before appointment.

Apply to Chair: Dean of Liberal Arts Search Committee, Office of the Provost, Kean University, 1000 Morris Avenue, Union, New Jersey 07083. Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits program included.

An ACT Search

President
Kingsborough Community College
The City University of New York

The Board of Trustees of The City University of New York and the Presidential Search Committee invite nominations and applications for the position of President at Kingsborough Community College.

Founded in 1965, Kingsborough is a modern 71-acre campus in a spectacular waterfront setting in Manhattan Beach, Brooklyn. One of six community colleges in the City University's 20-campus integrated system, Kingsborough offers degree programs in 25 areas and maintains one of the most comprehensive adult and continuing education programs in the City.

About half of Kingsborough's 15,000 students enroll in liberal arts or science degree programs; the rest pursue career-oriented programs in business, the maritime industry, public and human services, health and related sciences, industrial and health technologies and visual arts. Three-quarters of Kingsborough graduates go on to pursue a Bachelors Degree.

The college has a full-time faculty of 240, 82 percent of whom hold a doctorate or University equivalent. Adjunct faculty, drawn from throughout the New York City metropolitan region, number 600. Professional and full- and part-time support staff total 700. The college's annual budget is $66 million, largely funded through New York State and New York City appropriations and student tuition.

Kingsborough has a history of innovation, nurtured by its President of 28 years, the late Leon Goldstein. Kingsborough pioneered the nationally acclaimed College Now program for high school seniors, and has a science and math high school on campus. Other pathbreaking programs include My Turn, which allows senior citizens to fill open class spaces for free, the New Start Program offering students a second chance to succeed in college, a Weeklong College, and Family College, wherein parents on public assistance attend college while their children attend a K-8 public school on campus.

Kingsborough's academic calendar is unusual. It is divided into two 12-week semesters, each followed by a 6-week module. This enables students to complete requirements for an associates degree in less than two years, if they desire.

The student body is racially and ethnically diverse; almost half of Kingsborough's students were born outside the U.S. and 60 percent are the first generation to attend college. One-third are 25 or older and one in four supports children. A broad array of student services permit all students to succeed to the maximum of their abilities.

The President serves as chief academic and administrative officer of the college, under the general direction of the CUNY Board of Trustees, according to policies set by the Board of Trustees.

Preferred qualifications for the position include:

- Experience in the senior-level management of an urban community college and a clear commitment to the needs, multiple roles a community college plays.
- A demonstrated commitment to creative, effective management.
- Ability to successfully navigate in a multi-layered political environment.
- A record of successful administrative leadership.
- A reputation for supporting high academic standards.
- An understanding of how technology can be integrated into classrooms to improve learning, and a record of support for technological advancements.
- Openness to innovative programming to expand the college's reach into the community and to better serve its students.
- An earned doctorate or professional equivalent, college-level teaching experience, and a record of scholarly and/or professional achievement.
- A commitment to enhance the quality of student life and strengthen the delivery of services to a multi-cultural student body.
- The ability to communicate with, and represent, the institution to its inside constituencies, including the residential and business communities, alumni, and legislative and other governmental bodies.
- Experience in attracting external funding and in balancing the complexities of city, state, federal and private support.

The position is available starting September 1, 2000. A revision of salary and benefits that is now underway will make the compensation package highly competitive. The review of applications will begin immediately; submission of applications and nominations is strongly encouraged prior to December 15, 1999.

Applications: Applicants should send (1) a letter expressing their interest in the position that addresses and demonstrates how they meet the Search Committee's preferred qualifications, (2) their curriculum vitae, and (3) the names of at least eight references (two each: superiors, subordinates, faculty members, and community/business leaders). References will not be contacted without the applicant's prior permission.

Nominations: Nominations should be sent a letter of nomination and, if possible, the nominee's curriculum vitae. Applications and nominations should be sent to:

Office of Executive Search and Evaluation
The City University of New York
535 East 80th Street
New York, New York 10028

All inquiries, nominations and applications will be held in strictest confidence.

For additional information, please contact Elizabeth Roche, Director of Board Services, Association of Community College Trustees (ACCT), 1740 N Street, N.W., Washington, D.C. 20036. She can be reached by phone at 202-775-4057.

The City University of New York is an Equal Opportunity/Affirmative Action/Veterans/Disabled Employer with a strong commitment to racial, cultural and ethnic diversity. The Search Committee actively seeks and encourages nominations and applications from men and women of all races and ethnic backgrounds.
Daytona Beach Community College is a public, multi-campus, comprehensive community college which serves approximately 10,000 full-time equivalent and 33,000 head count students. It is home to the Southeast Museum of Photography.

www.fullerton.edu
Associate Dean for Academic Affairs
Appointment Fall, 2000
University of Connecticut, School of Social Work

The University of Connecticut School of Social Work, a leader in MSW graduate education in Connecticut and throughout the New England region, is an integral part of the State's flagship, land and sea grant Research One University. It shares with the other units of the University, the pursuit of excellence in teaching, research and scholarship and a commitment to public service through local, national and international programs. The curriculum of the School of Social Work is a two-year, 60-credit Master's program that focuses on practice methods as its primary advanced concentrations. Responsibilities: Oversee MSW academic program, including supervision of the Office of Academic Affairs and Student Services. Work collaboratively with faculty and Educational Policy Committee to identify educational objectives and to plan all aspects of the MSW curriculum in both classroom and field education. Provide academic leadership for the MSW program and its ongoing systemic evaluation, including assuring compliance with CSWE standards. Maintain academic and non-academic standards for MSW students. Oversee the School's offices of admission and financial aid to develop recruitment and retention of students. Maintain and develop joint degree programs. Work with community agencies to develop new educational collaborations, as well as maintain quality of existing programs. Represent the School as the Dean's deputy at University meetings and programs. Other duties as assigned by the Dean.

Qualifications:
- MSW and earned Doctorate.
- Minimum of two years post-MSW professional practice and experience in full-time teaching and field advising in an MSW program.
- Scholarly record to support an appointment as Associate Professor.
- Prior experience in educational administration preferred.
- Well-developed written/oral communication skills.
- Commitment to diversity.

Salary: Competitive.

Applications will be accepted until the position is filled. Screening will begin immediately. Please send curriculum vitae including the names, addresses and telephone numbers of three references to: Associate Dean Catherine Havens, University of Connecticut School of Social Work, 1798 Asylum Avenue, West Hartford, CT 06117-2698. We encourage applications from under-represented groups, including minorities, women and people with disabilities. (Search # 0A139)

UNIVERSITY OF CALIFORNIA, BERKELEY
Tenured or Tenure-Track Preparation
Human Development with Emphasis on Science Education. The Graduate School of Education, University of California, Berkeley, seeks applicants for a tenure or tenure-track position in human development and science education with an emphasis on younger students, to begin in Fall 2000. The successful candidate will join a faculty group in the School of Education that merges developmental perspectives with cognitive science advances in studying children’s learning and development. Duties include conducting and teaching undergraduate and graduate preparation programs. Applicants should have a doctoral degree in developmental pedagogy, cognitive or related fields and demonstrate excellence in research and teaching through a strong peer-reviewed publication record. Applications should be completed by December 1, 2000.
Send a letter of application, curriculum vitae, a statement of research and teaching philosophy, and three letters of recommendation to: University of California, Berkeley, Department of Child Development and Science Education, 2513 University Hall, Berkeley, CA 94720-8730, or fax (510) 643-6645.
Applications from women and minorities are encouraged. A letter of interest is required.

ROCKHURST UNIVERSITY
History, Non-Western: The History department of Rockhurst University, a Jesuit institution, invites applications for a tenure-track assistant professorship to begin in August 2000. Ph.D. required. Besides a specialization in at least one area of non-European history, the candidate should be prepared to teach African American history, the American survey, and in the University’s Master of International Relations and Education program. Please send a letter of application that includes teaching philosophy, a c.v., and the names, addresses, and telephone numbers of three references to Prof. Genevieve Robinson, Chair, Dept. of History, Rockhurst University, 1100 Rockhurst Rd., Kansas City, MO 64110-2561. Applications will be accepted until the position is filled. AA/EOE Women and minorities are encouraged to apply.
HARVARD UNIVERSITY
GRADUATE SCHOOL OF EDUCATION

ECONOMICS OF EDUCATION
FACULTY POSITION

The Administration, Planning, and Social Policy Area of the Harvard Graduate School of Education is conducting a junior faculty search for an economist who has two education-related specialties. One specialty must be higher education finance, with a demonstrated ability to teach about demand-side topics, such as the impact of institutional aid on the choices of students, and supply-side topics, such as factors affecting productivity and the responses of colleges and universities to changes in competitive pressures. The second education-related specialty could focus on any one of a variety of areas, for example, school finance or the impact of education on economic development. The appointment will be at the Assistant Professor or Associate Professor level (without tenure) to a person with an earned doctorate. The appointment will begin in September 2000.

The person hired for this position will be expected to teach effectively master’s and doctoral students from diverse backgrounds, to supervise doctoral dissertations, and to conduct active research programs. The standard full-time teaching load is three courses per year. The position is an opportunity to teach and work with students who plan to be educational leaders. The School is particularly interested in receiving applications from women and candidates of color.

To apply for this position, send receipt by December 3, 1999, a statement of teaching and research interests, a curriculum vita, copies of three publications and/or writing samples, and three letters of recommendation to:

Professor Richard Murnane, Chair, Economics of Education Search Committee c/o Gill Keesey, Director of Academic Services (HOG) Harvard Graduate School of Education 122 Longfellow Hall, 13 Appian Way Cambridge, MA 02138

Applications from women and candidates of color are especially welcome. The Harvard Graduate School of Education is an Affirmative Action/Equal Opportunity Employer.
VICE PRESIDENT FOR STUDENT AFFAIRS
KEENE STATE COLLEGE
Keene, New Hampshire

Keene State College seeks nominations and expressions of interest in the position of Vice President for Student Affairs. An affiliate of the University System of New Hampshire, Keene State College is a public, comprehensive, primarily undergraduate college located in the Monadnock region of southwestern New Hampshire. The College has an enrollment of approximately 3,800 undergraduate students, 100 graduate students and 800 continuing education students.

The College seeks a Vice President who can provide dynamic leadership for a comprehensive student affairs program in a residential public college setting. The Vice President is responsible for creating and sustaining an environment that supports student success, encourages collaboration between academic and student affairs, and fosters a sense of community within the student affairs division and across campus. Reporting directly to the President, the Vice President serves as a member of the President’s Cabinet and participates in all aspects of institution-wide planning, program and policy review, and educational/developmental programming in support of the academic mission of the college. Areas reporting to the Vice President include admissions, alcohol and drug abuse prevention, athletics and recreational sports, campus safety, counseling, disability services, health services, judicial affairs/mediation, residential life and dining services, student center (including student activities, Greek life, and community service), student development, and a grant-funded TRIO program. The Vice President represents the campus to the trustees of the University System of New Hampshire in regard to student affairs issues.

The successful candidate must demonstrate a strong record of administrative leadership in student affairs or comparable qualifications, a minimum of eight years of experience in higher education at a baccalaureate institution, organizational and management abilities, an understanding of public higher education, familiarity with enrollment management and retention strategies, and clear evidence of student advocacy. An earned doctorate in a related field is preferred; however, comparable experience and professional credentials may be given consideration.

Review of credentials will begin December 15 and continue until the position is filled. Appointment date will be set by the mutual agreement of the successful candidate and the College but will not be later than August 1, 2000. Letters of nomination or applications, including curriculum vitae, may be submitted in confidence. Applicants should submit two copies of all materials to:

Vice President for Student Affairs Search Committee
Keene State College
229 Main St., Keene, NH 03435-2608

Educational Management Network, a division of Witt/Kieffer, is supporting Keene State College with this search. Requests for a copy of the Position Specification or questions may be directed to Lucy Leske via e-mail at keen@emmenn.com. Additional information about the College is available on the Keene State College Web site, http://www.keene.edu. Keene State College is a member of the Council of Public Liberal Arts Colleges, a national alliance of leading liberal arts colleges in the public sector. As an AA/EO employer, we actively seek women and minority candidates.

VICE PRESIDENT AND DIRECTOR
OFFICE OF MINORITIES IN HIGHER EDUCATION
American Council on Education
Washington, DC

The American Council on Education (ACE), founded in 1918, is the nation’s higher education association. ACE is dedicated to the belief that equal educational opportunity and a strong higher education system are essential cornerstones of a democratic society. ACE’s approximately 1,800 members include accredited, degree-granting colleges and universities from all sectors of higher education, and other education organizations and associations. Additional information about ACE is available at their website: http://www.acenet.edu.

ACE’s Office of Minorities in Higher Education (OMHE) monitors the progress of minorities in postsecondary education and engages in efforts to broaden their educational and employment opportunities in higher education. ACE is seeking a Vice President and Director capable of leading the OMHE and conceptualizing new approaches to achieve long-standing goals of openness, opportunity and diversity on the nation’s college and university campuses.

The successful candidate will possess strong conceptual and analytical skills, the capacity to mobilize resources and work with other programs throughout ACE, and draw on the talent available inside and outside higher education; be a person capable of building alliances with the business and political communities; and be someone who has demonstrated the ability to work with and across multiple and diverse constituencies.

Reporting to the Senior Vice President of ACE, the Vice President, OMHE, will demonstrate the capacity to lead and possess the conceptual strength to provide a fresh vision. S/he will be a proven leader who seeks suggestions of others with a collaborative leadership style yet takes firm positions where warranted. S/he will ideally possess a terminal degree, be a skilled diplomat with strong interpersonal and superb communication skills and understand the emerging issues impacting higher education. High energy, unwavering commitment and a demonstrated ability to be a forceful spokesperson for higher education on matters relating to minorities is essential. Significant leadership experience in higher education, associations, or similar organizations is required.

The search for the Vice President is currently underway and will continue until the position is filled. For full consideration, materials should be submitted no later than December 17, 1999. Letters of nomination or application, including a cover letter and two copies of a resume, should be submitted in writing to the consultants supporting ACE in this search:

ACE Office of Minorities in Higher Education
c/o Gary J. Posner/Howard T. Jessamy
EDUCATIONAL MANAGEMENT
NETWORK/WITT/KIEFFER
2015 Spring Road, Suite 510
Oak Brook, IL 60523

A request for a copy of the complete Position Specification and questions concerning this search may be directed to either Gary J. Posner (615-665-3388) or Howard T. Jessamy (301-654-5070) or via e-mail to ACE@emmenn.com.
PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Florida Gulf Coast University (FGCU), the State University System's newest member institution, seeks an energetic and accomplished academic leader to serve as Provost and Vice President for Academic Affairs. The position is the senior vice president and chief academic officer of the university reporting to President William C. Merwin.

The university is a new, comprehensive public university offering a broad range of undergraduate and graduate areas of study, with a mandate from the Florida Board of Regents to employ innovative ideas and technologies in the development and delivery of programs and services. FGCU opened for classes in August 1997 and received accreditation by the Southern Association of Colleges and Schools in June 1999. The 760-acre campus, located in one of the fastest growing regions of the United States, complements the natural beauty and ecology of Southwest Florida. In only its third year of operation, FGCU boasts a student body of 3300 students, a full-time faculty of 170 and an annual operating budget of $36.5 million. A capital expansion program will provide two additional academic buildings, a fine arts complex, a student activity center, and athletic facilities to support the expected enrollment growth to 8000 students by 2003.

The Provost is expected to continue the advancement of FGCU's unique mission and guiding principles, to facilitate the work of an energetic faculty in a student learning environment, and to bring strong, innovative, and imaginative leadership to the university community. In order to gain additional insight into the position requirements and the university, applicants should access the Provost Search Web site at www.fgcu.edu/provost. The following units report through deans or directors to the Provost: the colleges of arts and sciences, business, education, health professions; the school of public and social services; the offices of student services, library services, instructional technology, planning and evaluation, and research and sponsored programs.

The university seeks candidates who possess an earned doctorate from an accredited institution, preferably in a field represented at the university, and with strong academic teaching and scholarship credentials. Candidates must present evidence of successful experience within complex organizations in positions of increasing responsibility in all aspects of academic administration, budgeting, and resource allocation, and have at least three years of distinguished academic leadership at a dean or equivalent level, with five years highly desirable. Candidates must be able to demonstrate a commitment to participatory management and diversity, possess exceptional interpersonal and communications skills, and partnership building.

Screening of applications will begin on or about December 8, 1999 and will continue until the position is filled. The anticipated starting date for the position is July 1, 2000. Electronic mail inquiries may be addressed to provost@fgcu.edu.

Applicants and nominees should submit a letter expressing interest and qualifications for the position, current curriculum vitae, and a list of at least five professional references to:

Provost Search Committee
Florida Gulf Coast University
Human Resources, Post 11287
Attn: D.B. Osterbolt
10501 FGCU Boulevard South
Fort Myers, Florida 33965-6565

Florida Gulf Coast University is an Equal Opportunity Employer and encourages women, people of color, and people with disabilities to apply. The search is being conducted under the Public Records Act and the Government in the Sunshine Laws of the State of Florida.
Director of Human Resources

New Jersey City University invites applications for the position of Director of Human Resources. The Director is responsible for coordinating the University’s human resource programs, including but not limited to staffing, benefits administration, employee relations, training and development, human resources information systems, and equal employment opportunities.

Minimum qualifications for this position include: a Master’s degree, preferably in a discipline related to human resources management, ten years experience in progressively responsible human resources positions, supervising/managing human resources programs preferably in the public sector and civil service and union environment. Experience with a computerized HR system is also necessary.

Salary is in the $56,000 to $84,000 range, and is dependent upon qualifications and experience. New Jersey City University provides an excellent benefits package.

To apply, please submit a resume and letter of interest to:
Michael Tippens, Search Committee Chair
New Jersey City University
2809 Kennedy Boulevard
Hepburn Hall, Room 314
Jersey City, NJ 07305

Deadline for applications: No later than the end of business on November 26, 1996.

Equal Opportunity Employer

**DEAN - SCHOOL OF INFORMATION AND LIBRARY SCIENCE**

**Search Extended**

Pratt Institute is accepting applications and nominations for a leader with demonstrated vision, innovation, organization and commitment to academic excellence in information and library science. Reporting to the Provost, the Dean participates in campus strategic planning and development, and is responsible for the School’s budget, management, administration, faculty review, and dynamic leadership of professional programs.

Pratt’s School of Information and Library Science has been a leader in the education of librarians and information professionals since 1890. The school has been accredited continuously by the ALA since the beginning of the accreditation process in 1926. During the past seven years the school has enjoyed significant growth in both enrollment and the size of its faculty.

The successful candidate should have earned a doctorate in LIS or a closely related field, a demonstrated record of achievement in academic administration, and a scholar and associate scholar able to incorporate evolving information technologies in the School’s curricula. Individuals with entrepreneurial skills and an ability to build productive partnerships are encouraged to apply. The anticipated start date is July 1, 2000.

Letters of application or nominations should be accompanied by an up-to-date curriculum vitae, plus the names and addresses of five professional references whom we may contact.

The postmark deadline for applications and nominations is January 10, 2000. Applications and nominations should be sent to: Office of the Provost, SILS Search Committee.

Pratt Institute is an Equal Opportunity Employer (M/F).

The attractive campus is located in a picture Chautauqua County village 60 minutes from Niagara Falls.

SUNY Fredonia is an equal opportunity, affirmative action employer, and actively seeks a diverse candidate pool on the basis of race, color, creed, sex, marital status, disability, national origin, or veteran status.

Send letter of application, vita, and three letters of reference along with additional materials to Office of Human Resources, Drew University, 36 Madison Avenue, Madison, NJ 07940.

AA/EO

CHANCELLOR

University of Illinois at Springfield

Nominations and applications are invited for the position of Chancellor of the University of Illinois at Springfield (UIS).

The Chancellor is the chief executive officer of the campus and reports to the president of the University of Illinois. The Chancellor is a proven leader who will continue the successful development of the campus's programs and public service mission.

Founded in 1969 as Sangamon State University, UIS became the newest and smallest campus of the University of Illinois on July 1, 1999. Emphasis is placed on public affairs instruction and research and service through community partnerships.

The campus offers bachelor's, master's degrees and a Doctor of Public Administration. UIS currently enrolls 2,000 students at the second-semester sophomore level and continues their education through junior, senior and graduate levels. State approval was granted for fall 2001 for the Capital Scholars Program, which will result in the admittance of first-year students in the fall of 2001. Current student enrollment is 4,100 with 188 faculty, 199 professes 265 support staff.

The Chancellor must have significant diverse senior administrative experience, an earned doctorate, diverse leadership ability, as well as understanding and appreciation in the uniqueness of the campus within the University of Illinois system. A successful record in inclusiveness, diversity and sensitivity relative to a multicultural campus is required.

The Chancellor Advisory Committee will begin reviewing nominations and applications immediately and continue to accept applications until a new Chancellor is selected. To assure full consideration, however, candidates materials should be submitted by January 1, 2000.

Dr. Frank Kopecky, Chancellor Advisory Committee

University of Illinois

Office of the President

364 Henry Administration Building, m/c 346

506 S. Wright Street

Urbana, IL 61801
Plattsburgh
INFORMATION LITERACY PROFESSIONAL
INFORMATION LITERACY PROGRAM

The Division of Library & Information Services at Plattsburgh State University of New York invites applications for a newly created Information Literacy Librarian position. This position is responsible for the continued development of Plattsburgh’s outstanding information instruction program that began in 1979. The core feature of the current program is a required one-credit component of General Education. The integration of information literacy across the curriculum is presently a key initiative in the College’s strategic plan. This position will play a leadership role in planning and implementing the successful candidate will bring experience, energy and vision to the collaborative effort of infusing information literacy concepts and skills throughout the college curriculum.

The Information Literacy Librarian joins a team of librarians currently engaged in an active and diverse information literacy program that is already experimenting with new integrated information literacy approaches. This is an exciting opportunity to develop and shape a new program in conjunction with other campus initiatives, including a review of General Education, a growing emphasis on instructional technology, and an expanding distance learning program. This position also participates in the core responsibilities of librarians: instruction, reference desk service, collection development and programmatic group work. Successful candidates will have an interest in integrating information technologies and a willingness to participate with new distance learning programs.

Required Qualifications: A Master’s degree from an ALA-accredited institution or foreign equivalent. Academic library experience that includes a minimum of four years of active participation in an information literacy/library instruction program, demonstrated ability to assume a leadership role in information literacy, demonstrated knowledge of current information literacy theory and practice; demonstrated success as an instructor of information literacy; commitment to group decision-making, thorough familiarity with academic environments, successful experience in working with classroom faculty; outstanding interpersonal, communication and organizational skills.

Preferred Qualifications: Experience in planning and implementing an information literacy program; experience with group work; scholarly contributions to the literature of information literacy; active involvement in professional information literacy activities.

Salary & Benefits: $40,000 minimum, academic rank commensurate with experience; tenure track position.

Applications from women and minority candidates are especially welcomed. Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

Applications will be reviewed beginning on December 1, 1999 and will continue until position is filled. Please submit cover letter, resume and the names, telephone numbers and addresses of three references to: Chair, Search Committee (F12366-SS80), UT 251, Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901. Fax: (518) 564-5000.

Assistant Professor
CLINICAL PSYCHOLOGY

San Jose State University

Tenure track position beginning Fall, 2000. Requirements: Ph.D. in Clinical or Counseling Psychology from an APA-approved clinical program, an APA-approved internship, eligibility for licensure in California within two years, and an interest in supervising clinical graduate students. Specialized training in child-clinical is strongly preferred; however, applicants with training in gerontology, clinical assessment, family systems assessment and therapy, health psychology, or gender and ethnicity in therapy will also be considered. Evidence of teaching excellence and demonstrated research potential is essential. Also required is awareness of and sensitivity to the educational goals of a multicultural population.

Responsibilities: Applicants should be prepared to teach undergraduate and graduate courses in abnormal psychology, child and adult psychopathology, child and adult assessment, systems of psychotherapy, interviewing and counseling methods, and/or area of specialization. The successful applicant will teach and supervise graduate students in the M.S. in Clinical Psychology program. We seek an active scholar-teacher with an established program of research who can direct graduate and undergraduate student research and who is willing to serve as a mentor for undergraduates who aspire to postgraduate training in clinical psychology. Send application letter, vita, and three letters of recommendation to: Clinical Recruitment Committee (F12366-SS01), Department of Psychology (DMH 157), San Jose State University, San Jose, CA 95192-0120. Review of applications begins February 1, 2000 and will continue until the position is filled.

SJU is an Equal Opportunity Employer.

Utah State University

DEPARTMENT HEAD SECONDARY EDUCATION

Utah State University seeks an individual to administer and provide leadership to the 12 faculty members and teach two courses during the academic year. Requires an earned doctorate in related field with knowledge of secondary teacher education programs; a scholarly record and teaching skills commensurate with appointment to rank of professor; effective organizational, leadership, and interpersonal communication skills; evidence of an open, collaborative management style and evidence of commitment to meeting the needs of diverse learners and language minority students. See http://personnel.usu.edu (2-148) for full job description. Send cover letter, complete vita, and the names and phone numbers of at least five references to Dr. Kay Camperell, Search Committee Chair, Department of Secondary Education, Utah State University, 2815 Old Main Hill, Logan, UT 84322-2815. Review of applications begins January 1, 2000, and continue until the position is filled. AA/EOE.

PACIFICA Graduate Institute

PACIFICA Graduate Institute is a fully accredited graduate school, near Santa Barbara, California, with Ph.D. programs in Depth Psychology, Clinical Psychology, and Mythological Studies and M.A. programs in Counseling Psychology and Mythological Studies. We have an innovative program which seeks to teach depth psychology (including the psychodynamic tradition, Jungian, and archetypal approaches) through an interdisciplinary focus, with particular attention to historical and cultural context, while linking psychology to analogous spiritual and healing traditions cross-culturally. Our program is year-round and attended by many non-traditional students. We have several core faculty positions open beginning Fall, 2000.

- In our Department of Mythological Studies, a non-clinical humanities program, we are seeking a candidate whose interests focus on the mythologies and religious traditions of the indigenous peoples of the Americas. The candidate should also be able to teach anthropological, ethnographic, and cross-cultural methods of research, as well as courses concerned with mythic themes in contemporary American culture. A Ph.D. in religious studies, literature, anthropology, history, or a related field is required.

- In our Ph.D. psychology programs, we are seeking several candidates with strong backgrounds in research who can advise doctoral dissertations and teach interdisciplinary courses linking person, culture, and world from a depth psychological perspective. Experence with a variety of research methodologies is desired, including ethnographic, phenomenological, hermeneutic, feminist, cross-cultural, social-constructionist, grounded theory, and participatory action research. Applicants interested in the interface between depth psychology and community or ecological activism are encouraged to apply. A Ph.D. in psychology or a related field is required.

- In our M.A. Counseling Program, we are seeking a Ph.D. or M.A. scholar-practitioner with a MFT or related psychology license and extensive clinical and supervision experience.

All positions include administrative work and dissertation advising and require demonstrated excellence in teaching and active participation in research and writing. To apply, send a letter of interest, CV, and list of 5 references. by January 1, 2000 to

Academic Dean
PACIFICA Graduate Institute
249 Lambert Rd.
Carpinteria, CA 93013

GENERAL INFORMATION
The University of Texas at El Paso, with an
enrollment of approximately 16,000 students, is
one of two campuses in the University of Texas
System. The city of El Paso, with a population of
600,000, is positioned in the world’s largest
binational metropolitan area, adjacent to the city
of Juarez, Mexico. The University offers 60
bachelor’s degrees, 53 masters degrees, and 6
doctoral degrees.

The Kinesiology Program offers B.S. and M.S.
degrees in Kinesiology. There are approximately
260 undergraduates and 25 graduate students
pursuing these degrees. The Texas Legislature
recently allocated money for a new
Kinesiology/Athletics Building, which will include
state of the art exercise science laboratories and
athletic training facilities.
The University does not discriminate on the basis
of race, color, national origin, sex, religion, age,
disability, or sexual orientation in enrollment or

University of Southern Maine

The University of Southern Maine, with campuses in Portland, Gorham, and Lewiston-Auburn, is the largest
university in the University of Maine System, with a graduate and undergraduate enrollment of more than 10,000.
Southern Maine is one of the most diverse in the state; half of the students are full-time, nearly 60% are women, and
the undergraduate is 27. As a comprehensive public university, it is a major educational force in the New
England region, to excellence in teaching, research and public service. The Greater Portland area, with a population
located on the ocean less than two hours north of Boston, and offers a full range of cultural activities, numerous sports
recreational settings and unparalleled scenic beauty.

All jobs are nine-month, tenure-track Assistant Professor positions unless stated otherwise. We hope to attract
and retain faculty committed to diversity, excellence and an active examination of ideas that can provide our students
understanding of the richness and complexity of our society.

CALIFORNIA STATE UNIVERSITY
Bakersfield

SCHOOL OF EDUCATION

Located 110 miles north of Los Angeles in the southern San Joaquin Valley, Bakersfield offers all the amenities of modern city life without the disadvantages. New housing is the best in the state for value and availability; excellent lifestyle for families; stress-free driving; convenient airport. The School of Education at CSUB, an Hispanic-serving institution, is WASC, NCATE, and CCTC accredited. We seek to create an inclusive, progressive, and democratic teaching and learning environment. Faculty with a sincere commitment to public education and improving educational opportunities for diverse learners are invited to apply for tenure-track positions. Summer employment available.

QUALIFICATIONS: All positions require a doctorate or ABD status appropriate to the position; substantial K-12 teaching experience with diverse learners; well-articulated research and publications agenda; evidence of service to, and collaboration with, public schools; collegiality. Preferred: A strong knowledge base in multicultural education and/or second language acquisition and experience with technology-mediated instruction.

POSITIONS:

1. CHILD DEVELOPMENT/EARLY CHILDHOOD EDUCATION (ASSISTANT)

Seeking a dynamic colleague to build a program that prepares students to work in a wide range of settings with a culturally and economically diverse population. Doctorate in child development, early childhood education or related field. Teach undergraduate child development and early childhood education classes; advise and mentor students; supervise field experiences related to classes; active participation in service in a diverse and active community focused on the well-being of children and their families; evidence of effective teaching; strong interpersonal skills.

2. READING/LITERACY, ELEMENTARY AND/OR SECONDARY (ASSISTANT/ASSOCIATE) (TWO POSITIONS)

Teach reading/literacy courses for preservice, master's level, and reading specialist credential. Supervise elementary- or secondary student teachers in classroom settings. Doctorate in reading/literacy. Ability to write grants and incorporate computers in the literacy classroom is desirable. Ability to interact effectively as a team member with faculty and off-campus partnerships and assume a leadership role in the school and community.

3. SPECIAL EDUCATION, MODERATE SEVERE DISABILITIES: ASSISTANT/ASSOCIATE

Teach courses in moderate/severe disabilities (including multiple disabilities) with a special focus on age-appropriate curriculum adaptations and innovative inclusion strategies leading to maximum adult levels of independence (i.e., working toward optimum transition success). Significant portion of this position assignment is supervision of field-based practicum and master's level student's research. Earned doctorate in special education or related field; successful university level teaching and supervision experiences. Minimum of two years of public school or community agency teaching and/or clinical experience serving students with moderate to severe disabilities, preferably in cross-cultural settings.

SALARY: Commensurate with education and experience. Excellent benefits.

BEGINNING DATE: September 5, 2000

APPLICATION PROCEDURE: Applications received by January 4, 2000 will be given full consideration; positions are open until filled. Submit letter of application with current vita, transcripts of graduate coursework or university placement file, and three letters of reference to:

Dr. Cheryl Santos, Dean
School of Education
California State University, Bakersfield
9001 Stockdale Highway
Bakersfield, CA 93311-1099

CSUB fosters and appreciates ethnic and cultural diversity among its faculty and students and is committed to increasing the diversity of its faculty to reflect the diversity of the campus community. Applicants from women, ethnic minorities, veterans, and individuals with disabilities are welcome.

UNIVERSITY OF FLORIDA

Department of Educational Leadership, Policy and Foundations
COLLEGE OF EDUCATION

The Department of Educational Leadership, Policy & Foundations in the College of Education at the University of Florida invites nominations and applications for three tenure-track positions for the 2000-2001 academic year to contribute to its teaching, research, and service missions.

Assistant Professor of Curriculum and Instruction

The successful candidate should have an earned doctorate in Curriculum & Instruction or School Administration, and would be expected to teach graduate courses in instructional leadership, i.e., Instructional Theory and Research, Supervision of Instruction, Administration in Special Education, or School Curriculum. The successful candidate should demonstrate the ability to develop and maintain a substantial program of research productivity, to teach effectively, to contribute to academic program development, and to promote the preparation of graduate students. Preference will be given to candidates who have public school administrative experience, can relate to the issues of school practitioners, and have experience chairing dissertations.

Assistant Professor of Educational Leadership

The successful candidate should have an earned doctorate in Educational Leadership/School Administration, and would be expected to teach graduate courses in Educational Leadership (e.g., Educational Organization and Administration, Administration of Educational Personnel, Labor Relations in Public Education, Educational Planning, Utilization of Computers in School Administration, Administration of Special Education). The successful candidate should demonstrate the ability to develop and maintain a substantial program of research productivity, to conduct outreach to public schools, to teach effectively, to contribute to academic program development and to promote the preparation of graduate students. Preference will be given to candidates who have public school administrative experience, can relate to the issues of school practitioners, and have experience chairing dissertations.

The deadline for applications for the positions of Curriculum and Instruction and School Administration is December 30, 1999. Interested candidates should forward a letter addressing his or her qualifications, a current curriculum vitae, and five letters of reference speaking to the qualifications of the applicant. All materials should be sent to:

Linda S. Behar-Horenstein
Associate Professor
P.O. Box 11049
Department of Educational Leadership, Policy & Foundations
College of Education
University of Florida
Gainesville, FL 32611-7049
Email: beharen@engr.ufl.edu
Phone: 352-392-2391 ext. 269

Assistant or Associate Professor of Foundations of Education

The successful candidate should have an earned doctorate in social, historical or philosophical foundations, and would be expected to teach graduate courses in Social Foundations (e.g., Philosophy of Education, Values and Ethics in Education, Educational Sociology, Socioeconomic Foundations of Education, and School and Society). The successful candidate should demonstrate the potential to lead the development of a quality graduate program in educational foundations, the personal to conduct a self-directed program of research and conduct outreach to public schools. Preference will be given to candidates who can relate to the issues of school practitioners, have experience chairing dissertations, and have an interest and/or experience in educational policy studies.

The deadline for applications is December 30, 1999. Interested candidates should forward a letter addressing his or her qualifications, a current curriculum vitae and five letters of reference speaking to the qualifications of the applicant. All materials should be sent to:

R. Craig Wood
B. O. Smith Research Professor

Candidates are particularly sought for the following disciplines:

Art and Literacy Education
Counselor Education-School Counseling
Counseling Psychology-Community and Behavioral Health
Literacy and Cultural Studies

Salary for the 2000-2001 academic year will be $35,000. Additional funds will be available for travel and research-related expenses. The position will include an array of fringe benefits suited to the candidate's needs. Candidates should send a letter of interest, vita, selected reprints/preprints, official transcripts, and three letters of recommendation concerning research skills to:

Scott McNabb, Chair, Postdoctoral Associate Search Committee
Office of the Dean
N459 Lindquist Center
University of Iowa
Iowa City, IA 52242-1529

Screening of applications will begin December 17, 1999 and will continue until the successful candidate is hired.

The University of Iowa is an Equal Opportunity/Affirmative Action employer. The College of Education is actively recruiting applications from minorities and women.

Candidates are encouraged to visit the College of Education website at:
http://www.uiowa.edu/coe2.

LIBRARY: TECHNOLOGY LIBRARIAN

DePauw University Libraries, located in Greencastle, Indiana, supports a liberal arts undergraduate student population of 2,216. There are three libraries in the DePauw Library system: Roy G. West Library (main library), Prevo Science Library and the Music Library. DePauw University is seeking an experienced Technology Librarian to provide leadership and technical expertise to support DePauw's move toward expanded electronic resources and services. This is a 12-month position that reports to the Library Director and has oversight responsibilities for Library Computer Services and Instructional Media Services. The Technology Librarian position carries nominal faculty rank and is a renewable term appointment (the initial appointment is for three years). Specific responsibilities include: provide collaborative leadership in the ongoing development and implementation of the Libraries' technology plans; participate in the Libraries' information and instruction services, provide leadership in developing instructional programs to strengthen the technology expertise of library staff, provide expertise in the areas of media and computer technology, recommended goals and priorities for service areas, monitor user satisfaction and develop methods for improving services; coordinate the hiring, training, and evaluating Instructional and Media Library Computer staff and students; manage all budgets pertaining to the two departments; participate in electronic and print collection development; prepare budget proposals to enhance services; participate as member of the library administrative team; coordinate the preparation of IMS and LCS annual statistics; work with the Private Academic Library Network of Indiana (PALNI) and DePauw Computer Center staff to provide consistent and dependable access to the on-line catalog and other electronic resources.

Required Qualifications: Master's degree from an ALA-accredited program in library science with a concentration or degree in information technology, instructional media and/or computer technology. Three to five years of increasingly responsible experience coordinating electronic/media services and managing services. The successful candidate will offer some combination of experience providing hardware and software technical support for library computer systems, including Z39.50, TCP/IP, and WWW technology, the ability to manage, support and troubleshoot LAN and Web-based library products and systems, a knowledge of instructional media equipment and support issues, a knowledge of library automation systems, particularly DRA. In addition to technical background, the successful candidate must demonstrate strong oral, written and analytical skills; and the ability to work with a collegial academic environment. Salary competitive; excellent benefits. Send letter of application, resume and letters of recommendation to:

Dr. Kathy Davis
Director of Libraries
Roy G. West Library
DePauw University
Greencastle, IN 46135

Review of applications will begin on November 10, 1999 and continue until the position is filled.

CALIFORNIA STATE UNIVERSITY
SAN BERNARDINO

Tenure-Track Positions for 2000-2001 Academic Year

California State University, San Bernardino, a comprehensive regional university, is one of the 23 State Universities with approximately 14,500 students, 456 full-time faculty, and 52 undergraduate and graduate degree programs. The campus contains five colleges: Business and Public Administration; Education, Arts and Letters; Natural Sciences; and Behavioral Sciences. Off-campus programs are offered at the Coachella Valley Center in Palm Desert. The University is 70 miles east of Los Angeles, offering easy access to beaches, mountain, and desert resorts. The rapidly expanding area offers a wide variety of cultural and recreational opportunities. Housing costs average 20% below those of Los Angeles County.

We are seeking to recruit faculty members who will contribute to the goals and objectives of the University's mission. Accordingly, preferred candidates will be expected to meet the traditional requirements of excellence in teaching, act and professional work, and serve to the University and community as well as to demonstrate interest or experience in the following academic area as a member of a collaborative team: a) alternative modes of instructional delivery to include off-campus lectures; b) the learning process, i.e., innovative teaching strategies and/or research on how students learn and apply over an extended period of time; and c) partnerships with the community to enhance social, economic, and cultural development. We are serious about faculty recruitment and we value the diversity in our student body. All qualified applicants are encouraged to apply. Application materials will be accepted until the position is filled. For more information and application information visit the Web site at www.csusb.edu.

Princeton Theological Seminary is an equal opportunity employer.
Michigan Tech

Provost and Senior Vice President for Academic and Student Affairs

Michigan Technological University announces a search for a distinguished, innovative, and nationally recognized scholar/leader to assist the University in achieving continuous exceptional advancement in the next decade. The position is available as early as July 1, 2020.

Responsibilities: The Provost and Senior Vice President for Academic and Student Affairs serves:

Chief academic and budget officer responsible for strategic and financial planning related to all academic programs, research, and student services, including graduate and undergraduate programs.

As the Chief Executive Officer of the University in the absence of the President, Dr. Curtis J. Tokarski, and reports to the university Board of Trustees.

The Provost will work closely with the President, Vice Presidents, Deans, Directors, CFA faculty, students, and staff to promote scholarship, the growth of the University's research enterprises, the strategic management of academic and graduate programs within a diverse, holistic university environment to serve the unity of teaching, scholarship, and research.

Qualifications: Candidates should possess:

- A record of significant administrative achievement, preferably at a research-oriented university or other institution,
- A proven ability to communicate clearly, effectively, and collegially with the many constituencies whose contributions are required for the successful implementation of University initiatives,
- A clear understanding of the mission of a scientific and technological institution, and a vision to promote a broad array of activities of national and international scope in teaching, research, and service,
- A record of teaching and scholarly or professional attainment that merits appointment as a tenured full professor within one of the University's departments, preferably demonstrated by a record of publications or presentations at a national or international level, or a record of creative or professional achievement that establishes a strong national or international reputation,
- A record of teaching and scholarly or professional attainment that merits appointment as a tenured full professor within one of the University's departments, preferably demonstrated by a record of publications or presentations at a national or international level, or a record of creative or professional achievement that establishes a strong national or international reputation,
- An earned doctorate and commitment to shared governance, affirmative action, and diversity.

The University: Michigan Technological University is a comprehensive research university with undergraduate, master's and Ph.D. students, and a reputation for exceptional instruction and research. The University is enjoying success in the growth of its research programs and capital facilities. Michigan Tech is located in the scenic Upper Peninsula of Michigan, at the base of historic Keweenaw Peninsula near the shores of Lake Superior. Michigan Tech's 4,000 faculty and 10,000 students are served by the University's strategic focus on engineering and science education initiatives.

Vice Chancellor for Research and Dean of Graduate Studies

The University of California, Irvine, invites applications and nominations for the position of Vice Chancellor for Research and Dean of Graduate Studies. The Vice Chancellor for Research, Dean of Graduate Studies, reports to the Executive Vice Chancellor. The Vice Chancellor for Research serves as UC Irvine's Campus Compliance Officer responsible for ensuring that UC Irvine research is consistent with University of California policies and procedures as well as federal laws and state statutes, and for overseeing the integrity of research at the University. The Vice Chancellor for Research/Dean of Graduate Studies also provides academic leadership to the campus in the areas of research and graduate education.

For the position of Vice Chancellor for Research and Dean of Graduate Studies, UC Irvine seeks a person who is qualified to be a full professor in the University of California system with significant administrative and leadership experience. Essential requirements for this position include prior faculty experience, scholarly or research accomplishments, and the ability to articulate the general public and university community the needs and goals of the University in order to advance the campus in its pursuit of academic excellence in research and graduate studies. The University of California has a strong commitment to the policies, principles, and goals of affirmative action and seeks an individual who also shares that commitment.

The desired starting date is on or before June 30, 2000. Review of candidates will begin December 1, 1999, and continue until the position is filled. Nominations, applications and requests for additional information should be addressed to:

President

Universidad Privada Boliviana
(Cochabamba, Bolivia)

UNIVERSIDAD PRIVADA BOLIVIANA (UPB), founded in 1993, seeks a new President to begin March 1, 2000 or as soon thereafter as possible. UPB is a private University offering the bachelors and masters degree primarily in business, engineering and law. The University is committed to educating Bolivia's new generation of entrepreneurial leaders. After only six years, UPB currently enrolls nearly 1000 (FTE) students.

UPB seeks a President who:

• Has a Ph.D. or its equivalent
• Is an experienced and creative academic administrator
• Has proven experience as a manager and leader of a multi-cultural, multi-racial environment
• Has public relations and fund raising experience, including the articulation of vision and mission of the enterprise
• Has a comprehensive understanding of budget building, budget control and the appropriate international standards for displaying and interpreting financial data about the University
• Has the ability to inspire, recruit and lead faculty, staff and students, board members, and community leaders to the cause of the enterprise
• Is supportive of faculty, staff and curriculum development
• Has the ability to build and sustain a team approach to management without sacrificing the proactive leadership role
• Is familiar with Bolivian life and culture or has work experience in South America
• Is a creative writer and speaker, fluent in both Spanish and English.
• Is committed to the education of the future leaders of a stronger Bolivia

For more information about UPB, visit our website www.UPB.edu

Compensation and fringe benefits are competitive

Interested persons should send a current resume, cover letter (in English) and the names of three references to:

MIDWESTERN STATE UNIVERSITY

Wichita Falls, Texas

President

The Board of Regents of Midwestern State University, a university of approximately 6,000 students offering programs through the Master's level, invites applications and nominations for the position of President to succeed Dr. Lou Rodriguez who will retire August 31, 2000. The President is the chief executive officer of the University, reporting directly to a nine-member Board of Regents appointed by the Governor of the State of Texas.

With an annual budget of over $41 million for the 1999-2000 academic year, Midwestern State is located in Wichita Falls, Texas, a progressive community of 100,000 people in North Central Texas. Founded in 1922, the University of 47 undergraduate and 16 graduate programs in six colleges, including the Colleges of Business, Education, Fine & Health Sciences, Liberal Arts, and Science and Mathematics. Detailed information regarding the MSU campus, stufife and academic programs can be found at http://www.mswu.edu.

Preference will be given to applicants who have:
- An earned doctorate and evidence of successful teaching experience at the university level.
- Proven administrative abilities, including planning and managing large budgets, preferably at a tax-supported, state university.
- The ability to communicate effectively with and elect support from the local communities, alumni, and state educational and legislative agencies.
- The highest degree of personal integrity, honesty and ethics in dealing with others and the strength of character that stand by personal convictions and principles.
- A history of working closely with students to understand their problems and needs.
- An understanding of the changing nature and scope of higher education and its increasing role of distance education.
- A demonstrated commitment to equal rights for all people.

Applications and nominations should be sent to:
Kathryn A. Yeager, Chair
Presidential Search Committee
Midwestern State University
P.O. Box 2100
Wichita Falls, TX 76307

To receive fullest consideration, applications and nominations should be submitted by December 31, 1999, and include a letter of application, resume, and at least three letters of reference. The appointment will be effective September 1, 2000. Telephone inquiries may be directed to Mr. Steve Holland, Director of Personnel, (940) 997-4133.

Midwestern State University is an Affirmative Action/EQUAL OPPORTUNITY EMPLOYER

WESTERN MICHIGAN UNIVERSITY

DEAN

College of Fine Arts

Western Michigan University invites applications and nominations for the position of Dean of the College of Fine Arts. The Dean is the chief academic executive officer of the College and provides leadership and vision for its future. Reporting directly to the Provost and Vice President for Academic Affairs, the Dean serves on the Dean’s Council, which is involved with University-wide policy and planning issues.

Western Michigan University, a Carnegie Doctoral I university, ranks among the top 200 public universities in the nation, according to the most recent News and World Report’s list of top national universities. Western Michigan University is a vibrant state-supported, student-centered research university in an entrepreneurial culture of more than 20,000 students, located in Kalamazoo, Michigan, halfway between Chicago and Detroit.

Founded in 1917, the College of Fine Arts consists of four widely recognized and nationally accredited academic programs: the Departments of Art, Theatre and the School of Music. The College offers BFA, MFA, and BA degrees in 19 undergraduate majors, as well as nine masters degree programs in music and art. More than 1,200 performances and exhibitions, which reach audiences of more than 30,000 annually, are presented annually. The College’s performing facilities are among the finest in the United States. Important partnerships have been developed between the College and arts organizations throughout Kalamazoo and the State of Michigan.

Applicants must have appropriate administrative experience with a successful record in local responsibilities and personnel matters. Candidates should be highly qualified to return to the rank of full professor in one of the College’s academic units. Applicants should have an appropriate terminal degree and equivalent experience. Candidates must have evidence of commitment to diversity and, preferably, a record of securing external funding.

Applications should include a letter of interest addressing special qualifications, a resume, and the names, titles, addresses, and telephone numbers of three references. Nominations are welcome and encouraged. The screening process will begin immediately and will continue until the position is filled.

AN EQUAL OPPORTUNITY, AFFIRMATIVE ACTION EMPLOYER
DEAN

COLLEGE OF HEALTH & HUMAN PERFORMANCE

The University of Maryland invites applications and nominations for the position of Dean of the College of Health & Human Performance. The College is composed of the Departments of Family Studies, Health Education, and Kinesiology. The College houses a Wellness Research Lab for Faculty and Staff and the Family Service Center for area families.

The Dean has responsibility for approximately 65 faculty, 920 undergraduate students, and 233 graduate students in the three departments. Health Education offers bachelor's, master's, and doctoral degrees and a Gerontology Certificate through the Center of Aging housed within the department. Kinesiology, which has been consistently ranked in the top 20 programs nationally since 1990, offers bachelor's, master's and doctoral degrees. Family Studies offers a bachelor's degree and two master's degree programs, a program in Family Studies and an accredited Marriage and Family Therapy program. The College has an annual budget of approximately $5.1 million and has experienced substantial growth in research productivity over the past several years, with currently $4 million per year in research support. The College is housed in modern facilities and possesses state-of-the-art experimental laboratories and facilities.

The Dean is expected to provide innovative leadership to build upon the excellent research and educational activities within the College. The primary responsibilities of the position include providing academic leadership; maintaining and enhancing opportunities for development with alumni and government and industrial partners; and supplying administrative oversight and direction. Candidates should have qualifications for a tenured full professorship in one of the College's departments, a distinguished record of scholarly achievement, a strong commitment to excellence in teaching, research, and service, demonstrated administrative ability, a demonstrated record of promoting diversity, and excellent interpersonal and communications skills. The Dean reports directly to the Senior Vice President for Academic Affairs and Provost, the chief academic officer for the University.

College Park is the flagship campus of the University System of Maryland with over 2,000 faculty, 25,000 undergraduates and 8,000 graduate students and has a proud tradition of academic excellence. The University is located in College Park, Maryland approximately 8 miles from the U.S. Capitol.

The preferred starting date for this position is July 1, 2000. Review of applications will continue until the position is filled. For best consideration, applications should be received by December 15, 1999. Applications and nominations, including a cover letter, curriculum vitae, and the names of at least three references should be sent to: Search Committee, Dean for Health and Human Performance, 1119 Main Administration Building, University of Maryland, College Park, MD 20742.

For more information about the College of Health and Human Performance, please visit their web site at (www.inform.umd.edu/HHP/).

The University of Maryland is an equal opportunity employer, and women and minorities are encouraged to apply.

UNIVERSITY OF MARYLAND

DEAN

College of Engineering and Physical Sciences
University of New Hampshire

The University of New Hampshire invites nominations and letters of application for the position of Dean of the College of Engineering and Physical Sciences.

The University: The University of New Hampshire is located in Durham on a 188-acre campus, 60 miles north of Boston, 8 miles from the Atlantic coast, and is convenient to New Hampshire's lakes and mountains. This is a Land Grant, Sea Grant and Space Grant institution enrolling 12,500 students, with a full-time faculty of over 600, offering over 90 undergraduate and more than 70 graduate programs.

The College of Engineering and Physical Sciences is one of the University's six schools and colleges, with 1,100 undergraduate majors and 400 graduate students. Its Dean is responsible for the administration of the college's academic programs in engineering, physical sciences, and mathematics; its interdisciplinary programs; affiliated research centers; fundraising; and oversight of capital campaign projects.

The Dean: The successful candidate will have a demonstrated commitment to undergraduate and graduate education and research in engineering, physical sciences, and mathematics. He or she will have had successful administrative experience including personnel and program management, program evaluation, program development, budget development and management, and planning as well as a significant record of accomplishment in teaching and research. A terminal degree in an appropriate field is preferred or significant administrative experience. Above all, the Dean must possess the leadership skills to work effectively with faculty, students, and administrators within the University as well as with diverse constituencies outside the University.

The Dean oversees academic programs in nine departments: Chemical Engineering, Chemistry, Civil Engineering, Computer Science, Earth Sciences, Electrical and Computer Engineering, Mathematics, Mechanical Engineering, and Physics, along with the Engineering Technology Program. The college's academic and research faculty secure some $27,000,000 in external research funding annually. The Dean is involved with several on-campus research centers, including the Institute for the Study of Earth, Oceans, and Space, the Environmental Research Group, the Marine Program including the ocean Engineering Program and the new Center for Coastal and Ocean Mapping. Initiatives in Environmental Technology, Materials Science, and Communication Technologies are also underway.

Applications: Nominations and letters of application should include the name, address, phone and email address of five references, and should be submitted to:

CEPS Dean's Search Committee
Office of the Provost and VP for Academic Affairs
Thompson Hall 207
University of New Hampshire
Durham, NH 03824

The Committee will begin review of applications immediately and will continue until the position is filled. Date of appointment will be no later than July 1, 2000.

UNH is strongly committed to achieving excellence through diversity. The University actively encourages applications and nominations of women, persons of color, people with disabilities, and members of other underrepresented groups.
Search Extended

ASSISTANT DIRECTOR

The Office of Multicultural Student Affairs within the Division of Student Affairs at

Virginia Commonwealth University

Virginia Commonwealth University, an urban institution committed to a multicultural and diverse environment, invites applications for the position of Assistant Director of the Office of Multicultural Student Affairs. MONTANA STATE UNIVERSITY BOZEMAN
California State Polytechnic University, Pomona

VICE PRESIDENT
FOR ACADEMIC AFFAIRS

California State Polytechnic University, Pomona, invites applications and nominations for the position of Vice President for Academic Affairs.

The University: California State Polytechnic University, Pomona, is a comprehensive, public university with a polytechnic emphasis in the application of science, technology, and the arts, to the needs of the professions and the society. Additional information is available at the university web site: http://www.cspupomona.edu.

Duties and Responsibilities: The Vice President for Academic Affairs reports directly to and works closely with the President, and serves as the chief executive officer in the President’s absence. As the university’s chief academic officer, the Vice President fosters high quality academic programs and ensures maintenance of the university’s academic standards. The Vice President provides visionary leadership to all colleges and academic divisions of the university; directs the recruitment and selection of all academic personnel; supervises and reviews academic programs; and acts on appointment, retention, and promotion of faculty; participates in the development and fund-raising activities of the university; and consults with the Academic Senate and other constituencies.

Qualifications: The successful candidate will demonstrate or have:

- An earned doctorate from an accredited institution, and qualifications for an appointment as a tenured full professor in an academic department;
- A distinguished record of achievements in teaching, scholarship, and service;
- A clear commitment to excellence in education, and visionary leadership for the development of quality academic programs;
- Proven ability to promote the professional growth of students, faculty, and staff;
- At least three to five years of successful experience as an academic administrator in higher education at progressive levels;
- Understanding (with experience desirable) of resource planning and allocation in the context of a large, preferably a multi-campus university system;
- A collaborative style of leadership in order to work effectively with various internal and external constituencies within the context of a shared governance system;
- Strong commitment to the educational equity goals of the university and its increasingly diverse ethnic, cultural, and international character; and
- Strong support for the university’s mission and advancement goals.

Send nominations and completed applications to

Chair, Search Committee, Vice President for Academic Affairs
Office of the President
California State Polytechnic University, Pomona
3801 West Temple Avenue
Pomona, CA 91768-4020

Nominations for the position will be invited to apply. A complete application will include the following: a) a letter of interest, including a statement of how the candidate satisfies the position qualifications listed above; b) a current curriculum vitae; c) the names, titles, addresses, and telephone numbers of five colleagues who can provide current assessments of the candidate’s qualifications for the position; finalists for the position should be prepared to provide three letters of reference upon request.

The university seeks to fill this position by June 1, 2000. Review of completed applications will begin on February 1, 2000, and will continue until the position is filled.

Salary is competitive and includes a comprehensive benefits package.

California State Polytechnic University, Pomona, is an Equal Opportunity/ Affirmative Action Employer. Cal Poly Pomona subscribes to all state and federal regulations and prohibits discrimination based on gender, race, sexual orientation, national origin, disability, marital status, age, religion or veteran status. The university hires only individuals lawfully authorized to work in the United States.

Fair Lawn, NJ 07410-0451
Tel.: (201) 845-9744
FAX: (201) 368-0433

Pending approval and funding, the University of San Francisco seeks applications for a tenure-track position in Public Relations at the Assistant Professor level. Anticipated to begin in the Fall 2000.

Teaching responsibilities may include inter alia, Public Relations Writing, Public Relations Theory, Public Relations Research and Campaigns, Public Speaking, and other courses according to the candidate's specialty. Competency in related areas, such as advertising and organizational communication, is also desirable. The faculty member will assist in building a public relations program, develop and advise the PRSSA chapter, and assist with Public Relations internships. Because the University of San Francisco is a Jesuit institution situated in a culturally diverse region, the new program will emphasis nonprofit and international PR; professional public relations experience in either of these areas is extremely desirable.

QUALIFICATIONS: University teaching experience, evidence of a strong commitment to teaching, evidence of scholarship, an earned doctorate by Fall 2000, experience and willingness to work in a culturally diverse environment, and an understanding of and commitment to support the mission of the University are required. The candidate will be expected to develop an independent and ongoing research program.

Applicants should submit a letter of application, current vitae, graduate transcripts, brief description of research plans, copies of recent research papers, statement of teaching philosophy, evidence of teaching ability including copies of teaching evaluations, and three letters of recommendation to:

Rhonda Parker, Chair, Public Relations Search Committee
Department of Communication Studies, University of San Francisco
2130 Fulton Street, San Francisco, CA 94117-1080

Applications must be received by January 7, 2000, in order to ensure full consideration.

The University of San Francisco is a private, Catholic and Jesuit institution and particularly welcomes candidates who will positively contribute to such an environment. USF is an Equal Opportunity/ Affirmative Action Employer, and will provide reasonable accommodations to individuals with disabilities upon request.
Purdue University's nationally and internationally recognized Agronomy Department is seeking a dynamic head with a creative vision for plant, soil, and environmental sciences.

The department has 45 faculty and 90 professional, clerical, and technical staff. Undergraduates (170 students) major in plant genetics and plant breeding, environmental soil science, soil and crop science, soil and crop management, agronomic business and marketing, applied meteorology, international agronomy, and turf science. Graduate (80 students) and research programs include: plant genetics and breeding, plant biology, soil, and environmental sciences, turf science and cropping systems. Faculty participate in interdisciplinary programs in biochemistry and molecular biology, genetics, geographic information systems and remote sensing, plant physiology, water resources, and in the Environmental Science and Engineering Institute, as well as the interdisciplinary undergraduate program in natural resources and environmental science. The department has a productive research partnership with USDA/ARS in both crops and soils. Extension educators serve crops, crops, and environmental clientele across Indiana and the nation. The department is committed to international dimensions of the discipline and has historically been engaged in global education and research.

The department is housed in newly remodeled offices, laboratories, and greenhouses and has excellent field research capabilities near campus and at locations across the state. The department's annual budget is approximately $9.5 million, more than $4 million from extramural sources. Additional information about the department can be obtained at http://www.agry.purdue.edu. Purdue University is committed to the continued development of this internationally recognized department.

QUALIFICATIONS:

The successful candidate must have an outstanding record of scholarly achievement and a demonstrated commitment to excellence in research, teaching, and extension. Excellent interpersonal, communication, decision-making, and administrative skills are required. The person must be skilled in building teams and in managing interdisciplinary research, extension and education programs. Candidates must have an earned doctoral degree and be eligible for tenure at the rank of professor.

Qualified persons should submit a letter of application; a statement of research, teaching, extension, and administrative philosophy; and complete curriculum vitae with addresses and telephone numbers of five references. Applications will be reviewed beginning December 1, 1999 and review will continue until the position is filled. Send applications, nominations, and inquiries to:

Professor Robert Nielsen
Chair, Department of Agronomy Head Search Committee
1140 AGAD Building
Purdue University
West Lafayette, IN 47907-1140
Phone: (765) 494-5456
Fax (765) 494-7420

Purdue University is an equal opportunity/affirmative action employer.
Gaius Charles Bolin Fellowships for Minority Graduate Students

2000-2001 Academic Year

In 1985 Williams College established the Gaius Charles Bolin Fellowships to underline the importance of encouraging able minority students to pursue careers in college teaching. The Bolin Fellowships enable two minority graduate students to devote the bulk of their time during the academic year to the completion of dissertation work.

Named in honor of its first black graduate, who was admitted to Williams in 1885, the Bolin Fellowship will be awarded for minority students who are working towards the Ph.D. in the humanities or in the natural, social, or behavioral sciences.

ELIGIBILITY:

Applicants must be U.S. citizens, and must have completed all doctoral work except the dissertation by the end of the current academic year.

TERMS:

The stipend for 2000-2001 is $26,000. The College will also provide housing assistance, academic support including office space and computer and library privileges, and an allowance of up to $1,500 for research-related expenses.

During the year of residence at Williams, the Bolin Fellows will be assigned faculty advisers in the appropriate departments, and will be expected to teach one-semiterm course.

APPLICATION:

Candidates should submit two full sets in hand copy form (electronic applications will not be accepted) of each of the following materials, postmarked by January 1, 2001, to be received by January 10, 2000:

- A full curriculum vitae
- A graduate school transcript and three confidential letters of recommendation
- A copy of the dissertation prospectus, preferably limited to 10-15 pages
- A description of teaching interests

RESPOND TO:

David L. Smith
Dean of the Faculty
Hope Hall
Williams College
Williamstown, Mass. 01267

NOTIFICATION:

Candidates will be notified of the Selection Committee's decision by early March, 2000.

Williams College, a coeducational liberal arts institution, offers an outstanding undergraduate education to 2,000 students. The college has built its reputation on a long tradition of outstanding teaching and scholarship and on the academic excellence of its students. Among the opportunities that Williams offers its students and approximately 260 faculty members are interdisciplinary programs and centers, including the Oakley Center for the Humanities and Social Sciences, the Multicultural Center, extensive library and museum collections, computer center and well-equipped laboratories.

An Affirmative Action/Equal Opportunity Employer

UNIVERSITY OF ILLINOIS AT SPRINGFIELD

Located in the state capital, the University of Illinois at Springfield is the third campus of the University of Illinois. The UIS campus serves over 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students. Its faculty are committed teachers, active scholars, and professionals in service to society.

UIS is seeking assistant professors (except where noted below) in the following disciplines, beginning August 16, 2000. All candidates must have an earned doctorate prior to beginning employment.

Most of us who are succeeding can credit our mentors and role models with giving us the nurturance and/or inspiration we needed to get where we are. I had a very special role model—the late Dr. Ernesto Galarza (1905-1984). He inspired me and others of my generation to become scholars activists—committed to a scholarship and pedagogy aimed at the betterment of Latinos, especially the economically and politically disadvantaged. His life and legacy is not well known.

Galarza rose from poverty to become one of the pioneers and foremost shapers of the Latino intellectual experience in the U.S.—the first Mexican American to receive a Ph.D. in history and political science, the first to be a leader in the labor movement, the first nominated for a Nobel Prize in literature—a true Renaissance man. He was a poet, a social scientist, and an historian who transcended rigid disciplinary boundaries.

Born in Jalisco, a mountain village in Mexico, he came to the U.S. at age eight with his mother and uncle, during the 1910 Mexican Revolution. They settled in Sacramento and worked in the agricultural “factories of the fields.” A child laborer, his field work did not distract him from his love of learning. Galarza graduated with honors from high school, won a scholarship, graduated from Occidental College with Phi Beta honors in ’27 and, in ’29, from Stanford with an M.A. in Latin American History, then on to Columbia, working toward a Ph.D.—the first Mexican American admitted at both graduate schools. The Depression and World War II delayed his Ph.D. until 1944.

Galarza and his wife, Mae, founded a progressive elementary school in N.Y. He also worked as a researcher for the Foreign Policy Association, rapidly becoming a noted expert on Spanish and Latin American affairs.

When the Spanish Civil War broke out in 1936, Galarza, a militant anti-fascist, supported the Loyalists fighting the Hitler-supported forces in Spain, and helped promote the Abraham Lincoln Brigade. When Hitler invaded Poland in 1939, Galarza went to work for the Pan American Union (later named the OAS), creating and heading a Division of Labor and Social Information for Latin America. His research and travels throughout the Americas enabled him to become a strong voice against fascism and for democracy. He observed firsthand the oppressive conditions confronting the poor and working classes. He lobbied for their interests in written reports, in public speeches, at conferences, and in meetings with high-ranking Latin American and U.S. officials.

When the President of Bolivia was assassinated with the support of the U.S. Department of State, Galarza denounced the U.S. role and was forced to resign from the Pan American Union. The Bolivian government later honored him for promoting human rights and democracy in the Americas. Galarza declined a nomination to become Secretary-General of the UN and a Harvard professorship to work for the Arkansas-based Southern Tenant Farmer's Union. "I don't know how many opportunities I have had to make money..." he wrote to a sister in 1922. "But...I could not see cutting myself off from the world that really bore me—my mother's world and that of her people.”

A labor leader more than 10 years, Dr. Galarza organized the first farmworkers union, long before Cesar Chavez, leading strikes and simultaneously researching the inner workings of the agricultural corporations and government agencies serving the needs of private wealth. He wrote books about oppressive conditions faced by U.S. farmworkers and the cheap labor brought from Mexico by the Bracero Program, created by Congress in WW II. Merchants of Labor was pivotal to the program's termination. Spiders in the House and Workers in the Fields showed how government laws, regulations, and agencies were manipulated to undermine the struggle to unionize farmworkers. Farm Workers and Agri-Business in California captures the rise of agricultural corporate power. Galarza joined LBJ’s “War on Poverty.” He persuaded the Ford Foundation to fund community programs aimed at urban Latino barrios.

In 1971, he founded a bilingue education laboratory, envisioning a way for children to retain their Latino culture and identity despite acculturation. His children's series, Mini-Libreros, exemplified his belief that it is possible to remain a Latino in spirit and consciousness within a society that does not respect cultural diversity.

Dr. Galarza’s life and work left a vibrant intellectual legacy. He proved it possible to be a scholar and active citizen. He was both a “man of fire” and a man of quiet dignity, deeply committed to social justice. He remains a source of inspiration, especially to those of us struggling for educational change.

Going to College: Public Perceptions

Those of us in higher education believe in the personal and societal benefits of going to college. But what about the rest of the country? Do they agree?

The National Center for Public Policy and Higher Education has issued a report that will be of comfort to all in higher education. The Center is an independent, nonprofit, nonpartisan organization. Further, it is not affiliated with any institution of higher education or government agency, so we can assume its findings to be academic and unbiased.

The Center reports that 75 percent of Americans believe a college education is more important today than it was ten years ago. That is one of the major findings of its study, The Price of Admission: The Growing Importance of Higher Education. The report has found its way to congressional offices on the Hill and onto Department of Education desks in Washington, D.C. The policy wonks love it!

It has been widely read and noted as Washington gears up for an election year, is being widely quoted. It follows the popularly held belief that the expenditures, tuition, and fees of going to college are just too high. Congresspersons have heard from their constituents. Bipartisan attention to the issue has been enhanced by the report’s findings of widespread support for higher education. It reports that 89 percent of the American public believes that all qualified and motivated students should be able to attend college.

Public opposition to tuition increases is fierce and unrelenting. Eight-five percent of survey respondents feel that students and families are currently doing all they can to pay for college. Interestingly, the public is evenly divided on who should do more to absorb additional costs—the colleges and universities or the taxpayers or both.

Politicians outside of Washington have been listening as well. Governors throughout the nation have pressured their state institutions to keep tuition from rising. The double-digit increases of a few years ago are over.

The study found that while Americans are still concerned about access to higher education, public anxiety about students being shut out of college has diminished somewhat since the recession of the early 1990s, when an earlier survey about American attitudes toward higher education was conducted.

In addition, Americans believe that students from low-income families comprise the group most likely to be shut out of college. This, in spite of the variety of state and federal assistance programs.

Even though many middle-income families still have their own problems to cope with, many acknowledge that low-income groups face the greatest barriers to college opportunities. The findings clearly suggest that low family income is more of a barrier to access than is race or ethnicity. Some states with high Hispanic populations, populations that have not been well served by colleges and universities, would arrive at a different conclusion. Income is important, but if institutions do not exist in highly populated Hispanic areas, enrollment is adversely affected as well.

In an example of accepting responsibility, an overwhelming number of Americans, 91 percent, believe that the benefit a student derives from college depends mostly on the amount of effort he or she puts into it. That contrasts sharply to the 71 percent of respondents who thought so in 1993.

Other Findings
• 45 percent of Americans think a college education is more difficult to obtain now than it was ten years ago. This number is down from 55 percent in 1993, when much of the country was in recession and when tuitions were rising sharply.
• 86 percent believe that high school graduates should go on to college because in the long run they will have better job prospects, compared to 79 percent in 1993.
• 85 percent think it is a “fair” or “poor” idea to raise college prices, up from 80 percent in 1993.
• 87 percent expressed concern that students are incurring too much debt to meet college costs, compared to 81 percent in 1993.
• 77 percent agree that students appreciate the value of a college education more when they have some personal responsibility for paying for it.
• 44 percent think that higher education should bear more of the burden of increased costs and increased demands through teaching more classes and cutting costs and 56 percent believe that taxes and state government should absorb a greater share of the costs.

Future Plans
The Center, with offices in San Jose, California, and Washington, D.C., is determined to be a force for the creation of higher education public policy. For the near future, the Center intends to focus particularly on the following questions:

Who should be served by higher education?
How should financial responsibility for college be shared among students and families, higher education institutions, and state and federal policymakers?

What are the most effective productive ways for government to invest in higher education?

How can public policy encourage cost effectiveness in higher education?

How can state and federal policies stimulate and encourage increased quality?

Copies of The Price of Admission report are available from the National Center for Public Policy and Higher Education: (408) 271-2599 or <http://wvw.highered.org>.

State Universities and Land-Grant Colleges Embracing Change

By Amalia Duarte

This past fall, a campaign aimed at stopping binge drinking among college students created a buzz. It featured full-page advertisements in major newspapers including the New York Times, USA Today, and Wall Street Journal, a Web site, and a best-practices brochure highlighting what campuses were doing to combat this problem.

This publicity-generating project was just one of many diverse initiatives recently launched by the nation’s oldest higher education organization, the National Association of State Universities and Land-Grant Colleges (NASULGC). Graham Spanier, president of Pennsylvania State University, a member of NASULGC, came up with the idea for the binge-drinking campaign. And, in fact, Penn State already leads by example. The university sponsors alcohol-free nightclubs at the student union, where students can enjoy comedians, listen to concerts, play interactive games, and watch movies. "Too many students are ending up in the emergency rooms of local hospitals. Students are dropping out of college before graduating. And much of the crime involving college students is related to excessive consumption of alcohol," said Spanier. "If we are going to succeed in addressing this public health issue, we need the interest and support of the general public."

While NASULGC’s roots date back to 1887, when it began as an association for land-grant schools, the group’s focus today is on cutting-edge issues such as distance learning and corporate-campus partnerships. Representing more than 200 land-grant and public universities in all 50 states, the organization is busy establishing a direction and blueprint for the next century. "We believe that the environment impacting higher education will continue to change in the new century—in the years ahead," said NASULGC President C. Peter Magrath, "and so we need to change as a result."

Among the external impacts cited by Magrath is reduced public funding for higher education, the country’s rapidly changing demographics, new technologies, and the need to be more connected with the community at large.

"Universities are not perfect, and at times we've appeared to be arrogant and indifferent and smug," said Magrath. "Sometimes, our attitude has been, 'Just give us the money, and leave us alone.' Well, we recognize that’s wrong. It doesn’t work, and we have to be more responsive."

Another significant trend faced by NASULGC schools is declining enrollments. From 1990 to 1997, the Association saw enrollment go down throughout the country, except in the Rocky Mountain and..."
Southeast regions. In the New England region, for example, enrollment dropped by nine percent, and in the Plains region—Iowa, Kansas, Minnesota, Montana, Nevada, North Dakota, and South Dakota—enrollment was down by eight percent.

While the overall percentage of students attending NASULGC schools has shrunk, minority enrollments are sharply up. During that same time period, Hispanic enrollment at NASULGC schools rose by 24 percent to 200,000, African American enrollment grew by 16 percent to 287,000, and enrollment among Asian/Pacific Islander increased by 38 percent to 226,000. Native American enrollment went up by 40 percent to 27,000. (NASULGC includes the 29 Native American tribal schools that are members of the American Indian Higher Education Consortium, which attained land-grant status in 1994.)

With all of these changes in the background, the association has undertaken a major look at where it needs to go in the 21st century. The blueprint comes in a series of reports in the form of letters to public university officials, issued by the Kellogg Commission on the Future of State and Land-Grant Universities. The commission was created by a $1.2 million grant given by the W.K. Kellogg Foundation and includes 27 former public and land-grant university presidents. Together, the letters will frame a vision for reforming public higher education and outline action steps for change.

The Reports

So far, four reports have been issued, with the final report expected by the spring of 2000. The reports released to date focus on the Student Experience, Student Access, The Engaged Institution, and A Learning Society. While the reports’ recommendations are voluntary, they carry the weight of coming from some of higher education’s top leaders. Penn State’s Spanier serves as chair John V. Byrne, former president of Oregon State University, is the commissions executive director, and Dolores Spikes, president of the University of Maryland Eastern Shore, is commission vice chair. The commission also includes the presidents of Ohio State, the University of Minnesota, Texas A&M University, the University of Vermont, Iowa State University, and Tuskegee University.

Each report offers specific recommendations for change and also best practices already underway at member institutions. In the initial report, entitled Returning to Our Roots: The Student Experience, the commission stated, “Our key challenge is twofold. We must maintain our legacy of world-class teaching, research, and public service. At the same time, in a rapidly changing world, we must build on our legacy of responsiveness and relevance.” Magrath said the bottom line is that universities have to “put the students’ needs first.”

One university at the forefront of trying to make changes in this area is Pennsylvania State University. The school’s five-year-old William A. & Joan L. Schreyer Institute for Innovation in Learning brings together a cadre of faculty, administrators, and students to work on creating a new culture of under-
Students are allowed to re-enroll immediately if they are willing to meet certain conditions, including meeting with a counselor and spending a specific amount of time at study locations on campus. And they must agree to remain in the program for at least two consecutive semesters and are required to earn a "C" average or better during their first term of participation. An important aspect of this program is that ordinarily, students dropped from the university lose their financial aid eligibility. But New Visions counselors work with the financial aid office so that students can have their aid restored right away.

In the third report, *Returning to Our Roots: The Engaged Institution* Iowa State University, where an agricultural crisis became a catalyst for change, is a leading example. In the mid-1990s, Iowa State established an economic development plan and launched several technology development and technology transfer initiatives to support this plan. The result has been a rapid growth in the number of undergraduate programs that engage students in real-world activities and experiences. An example cited is that the school's College of Engineering requires all bachelor's degree graduates to have co-op or internship experience. And a Saturday MBA program began in 1995 to offer local business people an opportunity to further their education.

The most recently released report, *Returning to Our Roots: A Learning Society*, calls for NASULGC members to become institutions that support lifelong learning. "It's the assumption now that we are in a knowledge-driven world, and it has to be from kindergarten through life," said Magrath. "New technology forces change. And so we have to educate students, not just to get a degree, but to become lifelong learners."

At the University of Florida, the Bright Futures Mentoring Program pairs students with children who live in local public housing neighborhoods. They meet children at centers twice per week to work on school-related activities and to become familiar with the child, family, and neighborhood. The program started in 1990 when the local housing authority and police approached the school about helping area children. "The timing was perfect," recalled Professor Elizabeth Bondy, who runs the program for the School of Teaching and Learning. "We in elementary teacher education were concerned about how we could do a better job for one-on-one tutoring. The program has repeatedly won funding from the U.S. Department of Housing and Urban Development (HUD). And year after year, parents sign their children up for tutoring.

For the college students, it's a learning experience about a part of Gainesville that's 20 minutes by car but totally unfamiliar. "Some of them are scared because all they've seen of these neighborhoods is what's in the media," said Bondy. "Once they begin to know their child, they start to say things like, 'Gosh I can't believe how smart and wonderful he is. I like being with him. He is so interesting.'"

A fifth, not-yet-issued report will explore the culture on campuses. Magrath hopes these reports will act as a rallying cry to lead his association into the next century. "There is a revolution going on in higher education, and we need to provide leadership," he said. "We are becoming a nation of minorities. And these under-served populations have to be brought in. There are new technologies changing the way we can learn. And we can't go on being business as usual."

Amalia Duarte is an editor in Public Relations at Lucent Technologies.
The Birth and Growth of Land-Grant Institute

Conceived by Morrill as “Social levelers”

by Pat Hanson

Historian and novelist James Michener felt that The Morrill Act changed the social structure of American education. He wrote that it was one of the two greatest acts of legislation in the nation, the second being the GI Bill of 1945. The Land-Grant Act gave legislators from each state 50,000 acres of federal land and stipulated that “income from that land be used for the endowment, support, and maintenance of at least one college...to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.” The law specified that the “leading object” of the colleges would be the teaching “of such branches of learning as are related to agriculture, mechanics...[and] military tactics,” although not to the exclusion of “other scientific and classical studies.”

In short, this act represented the first federal intervention in public education in U.S. history. It expanded American higher education to include practical training along with the classical studies traditionally offered only to clergymen, teachers, physicians, and lawyers. The result was a vast network of free, state-run agricultural and engineering colleges, which eventually grew into such public institutions as the Universities of California, Illinois, Maine, Minnesota, Wisconsin, and Wyoming, as well as Iowa State, Purdue, Penn State, and Texas A & M, to name a few.

With the industrial revolution underway and a rapidly expanding nation in desperate need of better educated frontiersmen to build the West, Congress created a new type of college where ordinary citizens could learn farming and engineering at public expense. At the beginning of this century, the newly-created land-grant universities supplied the scientific research programs that discovered and tested the methods that helped revolutionize American agriculture. Crop rotation, hybrid seeds, and chemical fertilizers are among the best-known results.

Sale or use of this land raised enough money for the colleges to operate, but the endowments gradually became depleted. A second bill, also introduced by Senator Morrill in 1890, provided for an annual federal appropriation for each college, then of approximately $30,000. In states with racially segregated colleges, the subsidies were split between White and Black land-grant colleges. Today the 105 land-grant colleges and universities between 2.5 and 3 million students. The federal government now a tenth of their revenues, the rest coming from state and local, endowments, private and public gifts and grants, and students.

Although all land-grant colleges are now desegregated. African Americans continue to constitute the majority of the students at formerly all-black.

In 1934, Senator Jeff Bingaman, a junior senator from New Mexico, another bill that created a land-grant university—29 Native American colleges.

The land-grant colleges also featured in this issue of Time. They are a legacy of Morrill’s vision for the education of future landowners. Morrill inspired the next generation of leaders to change society, to reach out to all people to serve the common good.

During his 44 years in Congress, both a representative and a senator, Morrill was also a champion for improving the architecture of the nation—Washing. D.C. He was responsible for the construction of several buildings regarded as landmarks, most notably the Library of Congress. He was present for the groundbreaking ceremony for The New Library of Congress’s new twenty-two-mi Agriculture and Science Executive Vice President and Chief of Staff, using Vermont homestead. Sen. Smith Morrill with the very great

had been dedicated to establish the university in 1862 by the sig

Land-Grant Act by President Lincoln.

“We know that the mixing of education and soil and the blessedness of Hiram Hadley’s New Mexico A & M camp smiled upon by both of these great 19th-century educational biologists. We also hope that each of us will remember that for countless centuries and women have taken sustenance from the soil and that they built strong institutions upon it.”
New Mexico State University at Las Cruces

Reaping, Wrangling and Researching

BY PAT HANSON

What do chiles, conflict resolution, and environmentally friendly bricks have in common? They are among the many things for which New Mexico State University (NMSU) has received national recognition. It is also the only land-grant university in the Carnegie Foundation’s Research 1 category that qualifies as a Hispanic-serving institution.

NMSU was founded as Las Cruces College in 1888 when New Mexico was still a territory and was established as a land-grant college—New Mexico College of Agriculture and Mechanic Arts—by the Territorial Legislature in 1889. Located at Las Cruces, a city of about 78,000, on the old Camino Real between Mexico City and Santa Fe, it lies near New Mexico’s borders with Texas and Mexico. The geography features desert, mesas, the farmlands of the Rio Grande Valley, and the Organ mountains of the Rocky Mountain chain.

Las Cruces is a community in which public officials—the mayor, the sheriff, school board members, the public school superintendent, judges, doctors, senior executives—are as likely as not to be Hispanic.

At the college, of the 15,400 students enrolled, about 46 percent are minorities—39 percent of them Hispanic. The faculty-student ratio is one to 17.1, with nine percent of faculty Hispanic. Seventy-three bachelor’s degree, 51 master’s degree, and 24 doctoral programs are offered through six colleges: Agriculture and Home Economics, Arts and Sciences, Business Administration and Economics, Education, Engineering, and Health and Social Services.

Since 1988, the number of minority undergraduates in the College of Agriculture and Home Economics at NMSU has more than doubled. Indeed, three-quarters of total student growth between 1988 and 1998 was in minority, mostly Hispanic. Incoming classes resemble New Mexico’s high school graduating classes as never before. Hispanic students come from farms and ranches and from major metropolitan areas, including El Paso, Texas, only 40 miles away.

NMSU was named one of the nation’s best values in higher education by America’s 100 Best College Buys, 2000 for being above average academically but below average in cost. For the 1999-2000 academic year, tuition is $1,251 for full-time undergraduates who are New Mexico residents, or $4,083 per semester for full-time non-resident undergraduate students.

NMSU’s Cooperative Extension Service provides off-campus...
research-based education in all 33 of New Mexico's counties. Its College of Agriculture and Home Economics has 26 affiliated clubs, including a rodeo team, which has featured National Collegiate Rodeo finalists in recent years, among them steer wrestler C.J. Aragon. Its two-time national champion Western Equitation team one year included Shannon Salazar.

Agriculture and Home Economics Associate Dean I. Misael Gonzalez is on leave as Under Secretary at the U.S. Department of Agriculture SDA and was listed last year as one of the nation's 100 most influential Hispanics by Hispanic Magazine.

**Horticultural Advances**

Rural traditions are an important part of Anglo and Hispanic lifestyles in the Las Cruces area. The Mesilla Valley is still dominated by many ways by an agricultural economy, and chile, in particular, is part of the local psyche. The smell of roasting chile is a sign of autumn there, the way apple picking is in the Midwest. When new students arrive at New Mexico State University for their student-run orientation, they are taken to "chili camp," a program that consists of the typical introduction to campus life but also features a chili cookoff. That is because New Mexico is the leading state in pungent chile production, with more than 2,000 acres under cultivation in 1998.

Fabian Garcia, a member of NMSU's first graduating class in 1994, achieved national prominence as a horticulturist. As the first Hispanic to head a land-grant agricultural research station in the country, he developed the first viable commercial chile pepper and as a result became the father of the southwestern food industry. Innovations over many years in onions, cotton, pecans, and chile peppers by the college Agricultural Experiment Station continue to bring federal recognition to the university.

Professor Paul Bosland, chief geneticist and chile breeder, and head of NMSU's Chile Pepper Institute, carries on Garcia's legacy today. He invented a hot chile pepper in hopes that some people who don't eat chile now will get hooked. Ten years in the making, the new hot chile pepper and an equally hot-green chile might develop vast new markets for New Mexico's chile farmers.

This year a computer society at Harvard, in its Annals of Improbable Research, awarded him an "Ig Nobel Prize." Actual Nobel award winners confer these honors "to celebrate the unusual, honor the imaginative, and spur people's interest in science." Professor Bosland, on receiving the biology prize in Boston "for breeding a spiceless jalapeno chile pepper," congratulated the awardees for knowing New Mexico was a state of the union.

The northeastern U.S. is a prime target market for the hot-chile peppers.

New Mexico State University is offering free seed packets of NuMex Primavera, the jalapeno, and of NuMex Conquistador, the green chile. Send your name and address to: NuMex Primavera, Chile Pepper Institute, Box 30003MSC, New Mexico State University, Las Cruces, NM 88003. The Institute produces a newsletter and books on Capsicum-related subjects, research on cultivating new varieties of chiles, and preventing agricultural diseases. It sponsors the annual scholarly New Mexico Chile Conference, serves as a bank to preserve chile germplasm, and is an international clearinghouse and archive for related information.

**Conflict Resolution**

The U.S.-Mexico Resolution Center at NMSU is the smallest but busiest of its kind and mediation groups as a result of NAFTA, the treaty linking the U.S. and Mexico. NMSU has taken the lead in promoting cooperation as it resolves regional cross-border disputes with Mexico. The involved are as varied as was in the case of laser radiation equipment fair market price for pecans.

Nancy Oretskin is an unemployed professor of bus NMSU in 1993 when she sent a proposal to her senator, Domenici (R-N.M.). She realized that the NAFTA agreement had an article encouraging cooperation and other means of dispute resolution, it had failed to create an organization to carry out the work. "The Center was to help mediate conflicts, but does training and education served a valuable role in organizing both sides of the to the concept of alternate resolution," Oretskin said.
Arbitration and mediation are relatively new concepts in the Mexican legal system, where until recently many Mexican legal experts argued that they were unconstitutional. This June, in cooperation with the trade ministry, NMSU's Conflict Resolution Center sponsored a conference in Mexico City for the three NAFTA countries. One hundred fifty Mexican judges attended to learn about arbitration and mediation. The center has received more than $1.5 million in earmarked congressional funds, and handled between 15 and 20 cases.

Center Takes on Water Policies

Water policies are often controversial in desert areas. However, Jose Garcia, director of the Center for Latin American Studies at NMSU, believes that "examining issues from a regional cross-border perspective can help the area plan for more efficient use of resources." With the help of a $400,000 grant from the Hewlett Foundation, shared with the Houston Area Research Center, Garcia and his team of researchers will work with area managers, experts, analysts, and water users to communicate the unique nature of water issues in each section of the region. Within two years, they hope to lay the foundation for mutually agreeable water policies.

Border Cultures Research

NMSU was one of only ten U.S. colleges to receive challenge grants from the National Endowment for the Humanities last year. This $450,000 will seed the Southwest and Border Cultures Institute, which will collect cultural materials for use in humanities research that can help Southwest communities. Materials might range from Indian pottery to collected papers of political figures. The grant will also support research that has direct results in the community. "The classroom is being extended out into the community," said Reed Dassenbrock, director of the Arts and Sciences Research Center. "Students go off-campus to work with social agencies or catalog historical buildings."

Activist Centers

The mission of NMSU's Center for Latin American Studies is to stimulate scholarship on Latin America, provide outreach to the public and to public schools on Latin America, and to serve as a clearinghouse on related activities at the NMSU campus. It publishes an online news digest focused on border-area issues, *Frontiers Norte Sur* (www.nmsu.edu/~frontera/main.html). Recent issues highlighted changes in the INS policy that extends the border area that Mexicans are able to travel through without special permission.

Education experts from around the country come to Las Cruces every summer for an annual conference on Teaching Spanish to Native Speakers, sponsored by NMSU's Office of Minority Recruitment and Retention. Each year, the conference attracts teachers, linguists, researchers, and the general public. Cecilia Rodriguez-Pino, director of NMSU's Institute for Native Speakers, called it "the only conference I know of that focuses on the field of heritage language instruction. Other language conferences might have only two or three sessions out of 100 that address the needs of native Spanish-speakers."

NMSU is also known for its efforts in getting health care professionals to work in under-served areas along the U.S.-Mexican Border. In Doña Ana County, where the college resides, there are about 35 isolated colonias, or unincorporated small communities, some lacking a basic infrastructure such as running water, septic systems, and waste water treatment plants. NMSU's Southern Area Health Education Center and its Border Health Education Training Center, funded by grants from the U.S. Health Resources & Services Administration (HRSA) and the Kellogg Foundation, link graduate students in pre-medicine, nursing, anthropology, social work, public health, and even business to field experiences designed to meet community needs.

Environmental Concerns

The Department of Health Science will be adding a new major in Environmental and Occupational Health, proposed for the 2000-2001 school term, which arose out of a direct need to address local community problems. Down the road in neighboring El Paso/Juarez, hundreds of new maquiladoras, or factories, have arisen right across the border as a result of NAFTA. Many are releasing chemicals into the water system and pollution into the skies. "While environmental regulations in Mexico are strict on paper, they are rarely enforced," said Daryl Smith, program coordinator of SoAHEC. "This could be said for New Mexico as well."

Mexico is noted for its attractive brick works and pottery. Many consumers and companies might be unaware, however, of the environmental hazards that go along with producing brick on a large scale. Brick-making kilns spew thick smoke into the atmosphere on a daily basis. With the help of funds from the Environmental Protection Agency and a few charitable foundations, Robert Marquez, a Ph.D. candidate in NMSU's chemistry department, has invented a new brick-making kiln that could virtually eliminate pollution from brick kilns. Some two million people who live along the border near El Paso/Ciudad Juarez are exposed on a daily basis to smoke that streams out of 400 brick kilns in the Juarez area of Mexico. Marquez's kiln has reduced the grams of contaminates released per minute by the atmosphere from 250-750 to just two grams per minute. Now with a prototype in place, the EPA is ready to promote the new kiln on a massive scale in Mexico. Marquez and his associate, Antonio Lara, a chemistry and biochemistry professor, believe the Marquez kiln will easily catch on in Mexico and elsewhere because the oven actually saves between 50 and 75 percent in fuel costs for brickmakers.

So whether it be for its food, its culture, the community, or its scholarship, NMSU remains "one of the best values in higher education in the country."
As one might expect, three of the top four universities with the highest percentage of Latino full-time faculty, based on a study produced by the U.S. DOE's Office of Postsecondary Statistics in 1995, were located in cities with large Hispanic populations. The first three—the University of Miami at 12 percent, New Mexico State University at eight percent, and Arizona State University at five percent—are located where large numbers of Latinos live. But fourth on the list was the State University of New York (SUNY) at Albany at five percent.

Albany is known as the capital of New York, a place where Democrats bicker with Republicans (and vice-versa), but it's not a place where one can find "café con leche, arroz con pollo," or many Latinos, compared to Miami, Tucson, or Albuquerque. In order to attract 28 full-time Latino faculty to its full-time staff, SUNY at Albany has made a concerted effort to expand its diversity and reach out. It managed to attract Latino staff over the last few years, during which the college was downsizing its faculty from 700 to 500 full-time members. SUNY at Albany also ranks first among all SUNY schools in the percentage of bachelor's degrees awarded to Hispanics.

Its influential Latin American and Caribbean Studies department has played a central role in helping attract Hispanic faculty, explained Dr. Carlos Santiago, associate provost and dean of graduate studies. Dr. Santiago himself has been in spearheading the university's initiative to compete for talent scholars. In the early Puerto Rican Studies program, efforts emanated from sit-in protests by students again. But the program turned into Latin American Caribbean Studies de that now has 22 full-timers. "That department has established a core of Latino faculty," Dr. Santiago noted. The department offers specialties in American Literature, Cultural Studies, and so it can appeal to a diverse group of scholars. When pro- Latino faculty visit Albany and meet the department's nearly two-dozen members, it sends the message that Hispanic representation is welcome on campus and will not be marginalized.

"The Latin American Caribbean Studies department is interdisciplinary," Dr. Edna Costa-Belémitter professor of Latin American and Caribbean Studies Women's Studies. The department allows other departments to hire talented Latin American and Caribbean Studies professors, who also teach at Latin American and Caribbean Studies. Therefore, American and Caribbean Studies is not an isolated effort, but integrated into the academic landscape.
sity," said Dr. Acosta-Belén. Other universities' Women's Studies and Asian Studies departments have emulated that model. Since SUNY at Albany is a research university, having Latino professors from many areas helps the school attract a diverse group of researchers. Latino faculty are attracted to many specialties, including a Ph.D. program in Spanish, master's degree in Latin American and Caribbean Studies, bachelor's degree in Puerto Rican Studies. "You get people represented in many disciplines who play a role in recruiting," she noted.

The Latin American and Caribbean Studies Department takes a "hemispheric" view of its discipline, which also helps attract faculty, said Acosta-Belén. "Our approach is to focus not only on Latin American countries but also those populations that are in regions populated by the 30 million Latin Americans and Caribbeans outside of that area," she said.

But it's the university's openness and commitment to diversity that has played a key role in attracting Latinos. When the political science department was looking for a professor with a specialty in International relations, Dr. Santiago brought to the department chair a resume of an excellent Latino scholar, but one who did not have international relations expertise. The Latino scholar was interviewed and so impressed the department's chair and search committee that an additional budget line was added and the scholar was hired on at a junior level. "We can only do this when the faculty member is a member of an underrepresented group," the university's provost noted.

Once the Latino scholar is hired at SUNY at Albany, he or she often joins a mentoring program. Many faculty from this core group of staff in Latin American and Caribbean Studies and Latino staff in other departments mentor junior Hispanic staff who are hired. "To be around people who are linguistically and culturally in tune helps them with personal issues. It also helps them to get to know faculty and become a part of a close-knit faculty," Dr. Santiago stated. At many schools, Latino faculty are isolated, particularly at colleges not located in Miami, Dallas, or Chicago, but at SUNY at Albany, the critical mass of 2 full-time faculty and additional part-time staff encourage them.

To reach out to Hispanic scholars, the university has established a joint appointment policy. A professor of biology, for example, who has an interest in Latin American Studies, is granted a joint appointment in both departments with full voting rights. The joint appointment policy "gives faculty who are trained in the discipline of biology or political science ownership over activities in other departments," Dr. Santiago said.

Why is SUNY at Albany, where minorities compose only one-fifth of the entire student body, so committed to establishing a diverse faculty? "Our student body is 2 percent minority and expanding. We're located only three hours from New York, so diversity is important. We aspire to have role models on campus for all of our students," said Dr. Santiago. "We cannot in the beginning of the 21st century hope to educate people of the state with the perspective of one group or one gender. We need the enrichment, energy and viewpoint of Latino, African American, Asian, and Native American scholars," declared Dr. Gloria DeSole, senior advisor to the president for affirmative action and employment planning at SUNY at Albany. Karen Hutchcock, SUNY at Albany's president, has been a prime supporter of diversifying its staff, putting it budget where its values are. "We've had a consistent recruitment program for scholars of color and women scholars," said Dr. DeSole.

But it takes more than an active recruitment program because many universities are looking to expand their staff and hire Latino scholars. That's why staff like Dr. Santiago and Professor Edna Acosta-Belén play pivotal roles. As president of the Puerto Rican Studies Association, Dr. Santiago comes into contact with up-and-coming Puerto Rican scholars who are about to earn their doctorates. Like a baseball scout assessing young talent, he can spot the Hispanic earning a doctorate in economics, English, or Spanish. Furthermore, Dr. Santiago, who earned a Ph.D. in economics from Cornell University, contacts faculty at Columbia University or Cornell University, keeping tabs on other Latinos scholars about to earn...
their doctorate. Knowing that Albany is competing with elite schools nationwide for the limited number of Latinos earning doctorates, Dr. Santiago is actively networking to learn about available "talent."

Dr. Acosta-Belén has been instrumental in attracting Ford Foundation grants to establish conferences and workshops on racial and gender diversity. "Having these workshops on campus creates an environment that offers support at different levels," she said. The grant also pays for faculty development workshops and helps develop new courses in race and gender areas.

Minority students, whose activism led to the creation of the Latin American and Caribbean Studies Department nearly 30 years ago, continue to play a role. Pueaza Latino, which means Hispanic Strength of Force, is an active Latino student group on campus that encourages the university to hire more Hispanic staff to serve as role models in their education.

But SUNY at Albany faces severe competition from many other universities to attract talented Latinos. "We're competing with private universities who often have more resources than we have," Dr. Santiago noted. Success breeds success. Since there's a core group of Hispanic scholars teaching at SUNY at Albany, they can offer one another support. Upon starting at Albany, they are introduced to other faculty. Many Latino faculty have settled in a town called Amsterdam, not far from Albany, which attracts Latinos and other ethnic residents.

The Latino Research Review (formerly the Latino Review of Books) published by SUNY at Albany has also helped create an inclusive climate. Latino faculty read the literary and professional journal and submit articles, which helps strengthens the university's name recognition among Hispanics. "It's like the University of Houston's Hispanic press," helping to put SUNY-Albany on the Hispanic map, said Dr. Santiago. In addition, the Northeastern Conference brings 5,000 active college students to campus. Often Latino faculty are asked to speak, which sends another diversity message to students.

Despite its success and ranking fourth in the nation in Hispanic staff, critics might suggest that SUNY-Albany could do even better. Dr. Santiago believes that SUNY-Albany could do even better. She added that the school still desired credit raised the number while downsizing staff by 200. "It's particularly to do affirmative action during downsizing," she revealed. Now downsizing has subsided and SUNY at Albany is hiring again, Dr. Santiago said. She looks forward to adding more talented minority staff. "We are now hiring faculty. The quality of our Latino professors is high. As we add new hires, we expect that we will rise from our current position at a higher percentage in attracting Latino staff," she said. "It's extremely diverse that makes a difference in someone's education," she added.

What are the key factors enabling SUNY at Albany to succeed at the Latino level? "We have a core of faculty with excellent networks," Dr. Santiago said. Dr. Acosta-Belén, who has taught at SUNY at Albany for years, replied that it's a combination of factors. We have a very broad faculty. Student services are responsive to the diversity of our student body. The University has decided to play a leadership role in the affirmative action office does special advertising and uses its programs to attract faculty.

---

**UIC DEPARTMENT OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE FACULTY POSITIONS**

**UNIVERSITY OF ILLINOIS AT CHICAGO**

The EECS Department is in the process of a major expansion of its Electrical and Computer Engineering activities, and invites applications for tenure-track positions at all ranks, as well as applications for research assistant professor positions. Exceptional candidates in all areas of research are encouraged to apply for Ph.D. in Computer Engineering/Electrical Engineering or closely related field. Areas of particular interest are: communications, computer engineering, MEMS, power electronics, and VLSI. We are seeking applicants who are engaged in fundamental research or application-oriented creative work likely to generate measurable impact on society. Interested applicants are especially encouraged to apply. Applicants should demonstrate research and teaching potential, and accomplishments, and communicate with the ranks they are seeking.

The University of Illinois at Chicago has undertaken a major shift aimed at establishing itself as one of the nation's premier state universities. The EECS Department has 53 faculty members (including twelve IEEE or ACM Fellows) and offers BS, MS and PhD degrees. It has about 500 graduate students and has been awarded over eight million dollars in external research grants for the current academic year. The departmental research laboratories include a 3,000 sq. ft. class 100/1000 clean DCT: Biomedical Functional Imaging and Computation Laboratory; Communication, Sensing and Navigation Laboratory: the endowed Andrew Leonard Laboratory; Machine Vision and Neural Networks Laboratory: Microsystems Research Center; Power Electronics Research Laboratory; and Signal/Image Research Laboratory.

The department has approximately one-third of its research space, much of it in a new engineering research building, and an operating expenses budget of over $200,000,000. For more information, visit our website: http://www.eecs.uic.edu.

The UIC campus is located near downtown Chicago and offers rich opportunities for collaboration with other universities, national research laboratories, and high-tech industry. Applicants should send a resume and the names and addresses of at least three references to: Faculty Search Committee, EECS Department (MC 154), University of Illinois at Chicago, 851 South Morgan Street, Chicago, IL 60607-7050. Applications will be reviewed as they are received, but must be submitted before March 1, 2000 for full consideration. Candidates are strongly encouraged to submit electronic versions of their applications; for instructions, see the web site: http://www.eecs.edu/chemistry.

UIC is an AA/EO employer. We are interested in receiving applications from a broad spectrum of people, including women, minorities, and differently-abled individuals.

---

**PRESIDENT**

**Universidad Privada Boliviana**

(Private University of Bolivia)

Cochabamba, Bolivia

UNIVERSIDAD PRIVADA BOLIVIANA (UPB), founded in 1923, seeks a new President to begin March 1, 2000 or as soon thereafter as possible. UPB is a selective, bilingual, baccalaureate and masters degree-granting institution. The University is committed to educating Bolivia's next generation of entrepreneurs. After only six years, UPB currently enrolls nearly 1,000 full-time students.

**UPB seeks a President who:**

- Has a Ph.D. or its equivalent
- Is an experienced and creative academic administrator
- Has proven experience as a manager and leader of a multi-faceted higher education enterprise
- Has public relations and fundraising experience, including the articulation of and mission of the enterprise
- Has a comprehensive understanding of budget building, budget control and appropriate international standards for displaying and interpreting financial data at the University
- Has the ability to inspire, recruit and lead faculty, staff and students; build community leaders to the cause of the enterprise
- Is supportive of faculty, staff and curriculum development
- Has the ability to build and sustain a team approach to management without sacrificing the productive leadership role
- Is familiar with Bolivian life and culture or has work experience in South America
- Is a creative writer and speaker, fluent in both Spanish and English
- Is committed to the education of the future leaders of a stronger Bolivia.

For more information about UPB, visit our website www.UPB.EDU. Compensation and fringe benefits are competitive.

Interested persons should send a current resume, cover letter (in English) and the names of three references to:

Dr. Douglas G. Trout, President, America's Friends of the Private University Bolivia (AFPUB), 16621 Darwen Court, Leesburg, VA 20176 USA

Email: ditrou@amf.com
The Honor Roll

Arizona State University West
Rapid Growth and Solid Ties to Community

by Roger Deitz

Professor, administrator, and author, Dr. Elaine P. Maimon became the fourth educator and first woman to serve as provost of Arizona State University West back in August 1996. Nationally recognized as a founder of the Writing Across the Curriculum movement, Dr. Maimon has co-authored three books and directed institutional efforts (sponsored by the National Endowment for the Humanities) to improve the teaching of writing. Among other distinctions, she is a member of the American Council on Educ. Commission on Women in Higher Education.

As provost of ASU West, Dr. Maimon is the chief operating one of the three anchor campuses of Arizona State University senior officer of ASU as a whole. With her background as an professor and her understanding of the importance of commu skills, she could not be more committed to the diverse students and to the community that it serves. “ASU West is a camp borderlands,” she says. “Within our educational environment, cultural groups have remarkable opportunities to learn from each other.” She says that among ASU’s three anchor campuses, ASU the “family campus.” “We even have entire families—parents and grandchildren—enrolled simultaneously, greatly enhancing inter-generational character. Success stories abound at ASU We of our students are the first members of their families to attend. Our commencement ceremonies are community celebrations.”

Commencement at ASU West is indeed a time for success. Last summer, ASU West responded to student requests by a commencement for summer graduates. The ceremony honored individuals receiving bachelor- and master’s degrees. Am graduates was a student speaker selected to address the convernent by a student-faculty committee, a woman who had a tertorial perspective on the founding of the ASU West campus the 1940s, Cecilia Marquez Moreno. Her father and other fam bers worked as migrant laborers on the farmland that is now of ASU West. Nearing her 50th birthday, Cecilia achieved he of a university education. Having earned her bachelor’s d secondary education, Moreno has obtained a full-time teaching business courses at Trevor Browne High School. her husband have instilled the importance of education in their children: all three are now attending or have graduated from including a daughter attending ASU West. Another gradu
Sanchez, a single mother who runs a special event management company, she has juggled obligations to family, career, church, and community while pursuing her bachelor's degree in global business/Marketing. A first-generation college student, Sanchez says that her studies at ASU West have made a positive impact on the way she conducts her business, enabling her to attract national clients.

As far as the Hispanic community is concerned, Dr. Maimon notes, "Over the last several years, we have worked to increase our Hispanic enrollment. Our motto is "Estamos aqui para ti" (we are here for you), and we make the motto real in numerous ways: a newly established Ethnic Studies minor that offers hands-on internships for students in community organizations, multiple pathways to earning a college degree, and seamless transfer from the community colleges."

And it is just that community that is the key for the provost. Dr. Maimon points out, "We believe in full engagement with the community. The Partnership for Community Development is a clearinghouse for research that applies directly to community needs. Our nationally recognized series, Racial Legacies and Learning, provided a community forum for the discussion of challenging questions."

The numbers support Dr. Maimon. More than 58 percent of ASU West's graduates are first-generation university students. More than 67 percent are 25 years of age or older (66 percent of all students are female). Approximately 22 percent of the student body is made of minorities. Of 4,860 total students attending the fall of last school year, 561 or 11 percent, were Hispanic—the largest minority group on campus. Native Americans numbered 66 or 1.6 percent; African Americans, 134 or 2.7 percent; and Asian Pacific Islanders, 167 or 3.4 percent. The faculty total of 207 includes 26 or 12.6 percent Hispanic. There are 114 female and 93 male Hispanic faculty members. The university boasts a 16:1 student-to-faculty ratio as the school endeavors to make ASU West faculty an important, personal presence in educational and professional development of students.
Arizona State University West is a vital component of ASU’s multi-campus vision. Students who attend the beautiful, strikingly new campus enjoy a small-college atmosphere on a conveniently located, full-service neighborhood campus, while having access to resources of a nationally recognized Research 1, PAC 10 university. ASU West provides a friendly, student-centered environment designed to serve individuals who balance academics with the multiple demands of work and family. It is located in the rapidly growing northwestern area of metropolitan Maricopa County.

ASU West was created in 1984 by an act of the Arizona legislature responding to a twelve-year grassroots effort to expand educational opportunities in Arizona’s West Valley region. The campus has come a long way in its short history. The idea of founding a regional college campus was conceived by the citizens of the area. The group pressing for higher education in the region, the Westside Citizens’ for Higher Education Committee, was established in 1972. A feasibility study conducted in 1977 strongly indicated that a college campus was needed in the West Valley. In 1978, ASU Main was linked to the region through extension courses offered at MetroCenter Shopping Mall, and at the Alhambra Elementary School in 1980. In 1982, the state legislature designated 300 acres for construction, and by 1986, 2700 students were enrolled in ASU courses in Alhambra and Glendale Community Colleges. In 1991, the core of ASU West’s campus was completed, and the following term, accreditation was received from the North Central Association of Colleges and Schools. In 1993, the first graduating class was celebrated at the school’s first commencement. Growth has been rapid. ASU West graduated 186 students at that first commencement and approximately 1.100 five years later, in 1998. By the start of last year’s term, the university employed more than 700 people: 216 full-time and 243 part-time academic employees. There are 335 full-time and 103 part-time non-academic employees.

ASU West currently offers 29 baccalaureate degree programs and five master’s degree programs, plus specialized minors and programs leading to professional certificates. Degree programs are offered through five academic units: the College of Arts and Sciences, College of Education, College of Human Services, Division of Collaborative Programs, and the School of Management. The institution serves the diverse needs of approximately 5,000 working adults, returning students, and continuing students, many of whom balance academics with work and family life. A point of pride is the personal and professional counseling available for each student. Classes are conveniently offered in the day and evening, as well as on weekends, through television (cable) and the internet, and at off-campus locations. The 300-acre campus is easily accessed via the interstate routes 1-10 and I-17. The institution is located in Phoenix. Just to the west of the campus is the city of Glendale. Facilities are state-of-the-art and consist of seven major buildings (600,000 square feet) surrounded by a beautifully landscaped, natural environment. The red brick campus was modeled after Oxford University in England.

As Provost Maimon has indicated, ASU West’s effort to strengthen its commitment to diversity and community partnerships recently received major support from the Association of American Colleges & Universities when it was selected as the only institution in Arizona to participate in the “Racial Legacies and Learning: An American Dialogue” initiative. This nationwide effort was launched in collaboration with President Clinton’s Initiative on Race, and implemented by AAC&U. It is designed to promote learning about racial issues in dynamic ways. ASU West will be at the forefront of this project as one of only 56 “lead institutions” in the U.S. and one of only eight in the nation designated as a regional site by the AAC&U. The project is aimed at answering the question, “What should higher education be doing, with its local communities, to prepare graduates to address the legacies of racism and the opportunities for racial reconciliation in the United States?”

This past October 6th, ASU West sponsored a broad-based community discussion on building racial understanding through its yearlong dialogue, “Racial Legacies and Learning: An American Dialogue.” John A. Romandetti, president of Denny’s restaurants, was the keynote speaker, along with Rachelle Hood-Phillips, Denny’s chief diversity officer. Denny’s has received several awards from the NAACP for leadership in diversity management. In August 1998, Fortune Magazine ranked Denny’s/Adventura No. 2 on its list of the “Best 50 Companies for Asians, Blacks, and Hispanics.” This inaugural community forum showed how Denny’s faced difficult diversity issues head-on, while providing insights applicable to all parts of society. “ASU West was a logical selection for this recognition since issues of diversity and dialogue about race, class, and gender are at the core of our mission,” observes Dr. Maimon, adding that the initiative “enables us to expand our efforts to model ways that campuses and communities can learn together about racial issues and opportunities in American society.” The Partnership for Community Development mentioned by Provost Maimon enables faculty in the College of Human Services to share their research and teaching expertise with such organizations as the YMCA, The Foundation for Senior Living, The Peoria School District, and the Northside Training Center among others.

Last January, the ASU Regents approved the first new degree since 1995, one that opens a streamlined pathway toward a bachelor’s degree. The program accepts 60 hours of academic credit from an associate of applied science (AAS) degree and applies it in one full block, eliminating a course-by-course review, as the first two years of a bachelor’s degree. The approval means that anyone with an AAS from a community college can earn a bachelor’s degree in only two years through the new Bachelor of Applied Science degree. Students began enrolling in courses leading to the BSN degree starting last Spring.
Teaching Strategies That Promote Equal Opportunity

Part One: Collaborative Learning Communities

What can we do as teachers to ensure that students, coming from a variety of backgrounds—life experiences, are motivated to learn, to stay school, and to achieve as part of their life go? There is a pedagogical strategy that seems to mivate students, improve student learning and retention, enhance the development of critical thinking skills, and create a more harmonious classroom atmosphere. That strategy involves the creation of learning teams in the classroom and the use of collaborative learning strategies.

An effective way to create harmony and reduce prejudices in the classroom is to create male/female, racial/ethnic learning groups. These learning teams have been compared to sports teams, which tend to bind members together for a common goal, and often lead friendships across racial/ethnic lines. According to social psychological research, these collaborative learning groups reduce prejudice and undercutting categories that lead to stereotyping thinking. Social psychologist Elliot Aronson found that collaborative learning groups work extremely well for grade school children where prejudices are not as entrenched as those adults. However, research has shown that the formation of these teams can be effective with learners as well.

Research done by Dr. Samuel Gaertner, a psychologist at the University of Delaware, suggests ways to implement learning groups that reduce prejudices among students. The instructor selects the groups. What appears to be an advantage is the mixing of students is really carefully planned. The instructor puts together groups of fou six men and women from diverse racial/ethnic and age backgrounds. Students are given a task to complete in a given length of time that requires group cooperation. (More will be later about the nature of the task.) A group of recorders/reporters is either selected by the instructor or elected by the group. The instructor should make sure that if groups are elected, they do not automatically ass
women students the task of taking the notes, for this could be the result of societal power hierarchies dictating the group dynamic. Power dynamics that operate in society at large might govern the interactions of the collaborative groups if they are not supervised carefully. It is the instructor’s responsibility to ensure that roles within groups do not play out gender- and race-based stereotypes. Therefore, instructors need to pay attention to gender, race/ethnicity, and class issues not only in terms of group composition but also in terms of group dynamics. The group recorder/reporter will record the group’s work and report to the larger group when the class reconvenes. Sometimes, two students can play these roles separately.

Once students become a unified group, they begin to like each other better than they like students belonging to other groups; ironically, this simulates the process that can lead to prejudice formation in other circumstances. There is a debate as to whether students should stay in the same group so as to bond with the members of their diverse group for several tasks, or whether they should be mixed again with others to form another single unified group to work on a further task. If the latter occurs, preferences for people shift once again. Dr. Gaertner’s research, which suggests the mixing of groups, shows that forming new groups widens the students’ sense of who is in their group. Working within various groups changes student thinking from “us and them” to “we.” Whatever approach is taken, a common element in achieving group cohesiveness is to have students spend about ten minutes of their first collaborative learning session getting to know each other. Learning groups can reduce prejudice and biases because the people whom students once identified as part of some other group are now perceived as part of their own group.

The research of Elliot Aronson and other social psychologists demonstrates that certain criteria are necessary for prejudices to be reduced. Students must feel they are of equal status with other group members. They need to have a common goal, and they need to be interdependent. In other words, everyone is needed to achieve the goal, and each student should feel accountable for his or her contribution.

The use of collaborative learning groups not only promotes a greater appreciation of diversity among students but also seems to promote more active involvement and greater retention of material. Many scholars and educators have been suggesting for quite a long time that students need to be more active participants in the learning process. While this is certainly not a new idea, many of us have shied away from using “group work” because we might have experimented with it and found the common pitfalls. The common problems associated with students’ working in groups include off-task conversations, social loafing (students not carrying their load), and students taking over while others fail to participate. Collaborative learning strategies address these areas of concern.

The following guidelines can change mere group work into collaborative learning teams and thus avoid the pitfalls inherent in group work:

- Start by having all students write something related to the group assignment so that all students have an investment.
- Create a focused task. This must be carefully planned. What should the task accomplish? What do you want students to learn? How much time will it take? What are some milestones along the way?
- Collaborative learning requires that groups work on tasks that usually have more than one answer or solution, and that require or benefit from multiple perspectives. The task in some way requires collective judgment.
- Set up the groups with the intention of fostering diversity within the groups. Either appoint or have the groups elect a group recorder-reporter for purposes of accountability.
- Create tasks that require cooperation rather than competition. One technique is to have students reach some kind of consensus. If they have something written, they can share each idea written, one at a time, using a round robin technique so that no one student dominates the group and to ensure that everyone participates.
- Be the time-keeper and classroom manager, but stay minimally involved with the groups. Circulating among the groups tends to temporarily heighten the activity of the group with which we are working while the other groups “wait their turn.” Without the teacher’s interfere-

**An effective way to create harmony and reduce prejudices within the classroom is to create male/female, multiracial/ethnic learning groups.**

From What Ifs to Why Nots

Training Culturally Competent RNs

BY STEVE HARMON

When “Yolanda” leaves her tidy but modest home in a South Texas colonia to see to her medical needs, she often grapples with a series of “what ifs.” What if she has to speak English? What if her decision to buy medicines at lower cost in nearby Mexico or her belief in curanderismo [folk medicine] is questioned? What if they just don’t understand?

Dr. Susan Baker, director of Texas A&M International University’s Dr. F. M. Canseco School of Nursing, knows all about the “what ifs,” and she’s encountered people like Yolanda on a daily basis. Here on the U.S.-Mexico border, she knows that it’s the “what ifs” that consciously limit the decision of many colonia residents to seek needed health care. Sadly, she also knows that it’s all too easy for “what ifs” to become “never minds.”

Dr. Baker says that part of the answer is to turn “what ifs” into “why nots.” She has provided health care to the residents of favelas in Brazil and helped organize South Texas neighborhood-based health fairs known as convivios, which focus on developing relationships with and sensitivity to patients. Her experience with language and culture was crucial to her part in developing the transcultural model of nursing at A&M International.

“So how do you answer the “what ifs?”

Baker says that the answer is nurturing a qualified cadre of nurses who are culturally sensitive, bilingual, and in tune with the needs of the predominantly Spanish-speaking community.

As the fastest growing city in Texas and the second fastest growing in the nation, Laredo is experiencing a dramatic demographic shift. In the period from 1990-97, the city recorded a 37.5 percent population increase, about an additional 50,000 people. South Texas is now home to one in 10 new Texans. Under a projection that assumes levels of migration similar to those seen from 1990-96, Laredo could balloon to nearly 650,000 by 2030, a growth of 301 percent. Its sister city, nearby Nuevo Laredo, Tamaulipas, Mexico, is projecting similar growth rates.

With more than 95 percent of its population Hispanic, Baker says that Laredo is a natural incubator for nurses who have the ability to address the needs of the Hispanic community.

A&M International’s STA-BSN program aims to increase the number of Hispanic students receiving a BSN degree.

Baker says that these students will be a major part of the answer. “It comes down to very basic logic. Anyone seeking medical care seeks a sense of familiarity, no matter what their culture or ethnicity. We can work to provide a sense of security by making sure that healthcare providers are more attuned to their clients’ needs, preferences, and culture. It is human nature to trust those who are us, people with whom we feel affinity. Any visit to a médico authority is frightening. It can make less so when we feel that will be understood,” she explains.

Baker is project liaison for $265,000 federal grant provided by A&M International aimed at expanding enrollment of regents-approved Hispanic nursing students seeking BSN degrees. She and assistant professor Natalie Burkhalter developed the project to promote...
cess of students in the Bachelor of Science in Nursing Program.

The Department of Health and Human Services' Health Resources and Services Administration (HRSA) provided the award for the Nursing Special Project, known as STAT-RN (South Texas Access to RN Education).

STAT-RN targets expanding enrollment of regional Hispanic nursing students in professional nursing programs and shortening of the time frame needed to obtain licensure as registered nurses in the State of Texas.

Baker says the time is now to help secure greater Hispanic representation in the health professions.

"At both national and state levels, nurses from Hispanic backgrounds are seriously underrepresented in comparison to other ethnic groups and to the percentage of Hispanics in the general population. Here in Laredo and Webb Counties, we have a 95 percent Hispanic population capable of addressing this shortage," she explained.

The project focuses on two key factors that research shows stymie or prolong Hispanic students' efforts to succeed in nursing programs.

"National research shows a 30 percent dropout rate for Hispanics in nursing programs. This has been directly tied to economic hardship issues that involve the need to support the family and an educational preparation that might not have emphasized the knowledge and skills needed to succeed in the selected program," she said.

In order to assure student success in coursework and on the state nursing licensure examination, STAT-RN provides increased tutorial support, learning materials, development of online testing, student study-skill development, and faculty development.

STAT-RN also includes a collaborative research component with Prairie View A&M University's College of Nursing, another campus of The Texas A&M University System.

"This component provides us with the opportunity to compare the effectiveness of teaching strategies used to address learning needs of basic nursing students in our two schools of nursing that serve predominantly minority student populations in The Texas A&M University System," Baker explained.

One of the first students in the A&M International program said that the added support is making a nursing school, and the program has helped to provide the flexibility and support I need to meet all my responsibilities. Nursing is totally different from anything I've ever done before, and I needed a lot of help to understand new ways of learning," he said.

Baker says that the regional need for qualified, culturally sensitive nurses is overwhelming.

"Laredo has just opened Mercy Health Center, a brand new 350-bed hospital, and Doctors' Hospital has begun its construction of a new facility as well. It's not unusual for both hospitals to extend their recruiting reach for nursing professionals as far as Canada or the Philippines. The two hospitals estimate that they need at least 100 new RNs a year to support the healthcare needs of the community," she said.

A&M International President Dr. Charles Jennett said that the program is an incisive response to the needs of the university's service area.

"The healthcare industry in our region is mushrooming, as is the need for culturally competent, Spanish-speaking nurses committed to the community, the odds are better than ever that Yolanda won't wonder 'what if,' but simply ask, 'why not?'"

For more information on Texas A&M International University STAT-RN program, contact Susan Baker at (956) 326-2574 or e-mail to sbaker@tamu.edu.
Latino Alums Help Fund USF Education for Worthy Students

Year Two for Saber Es Poder Scholarships

BY INÉS PINTO ALICEA

As a young child, Stephanie Rodriguez witnessed the financial and emotional struggles that come with being raised by a single mother without a college degree.

"If I had to take anything back of my background, I wouldn't, because it was such an inspiration to me to get an education," said the 20-year-old junior honors nursing student from Stockton, Calif.

The young woman's perseverance and drive have paid off. She and five other Latino students recently won prestigious scholarships at the Jesuit-run University of San Francisco (USF), where about eight percent of its 8,000 or so students are Latino, said Raul Aguilar, a 1967 USF graduate who runs the program and heads La Compañía, the university's Latino alumni association.

"Most of the recipients are active in the Latino community already," said Aguilar. "We are looking to see how active they are...and how active they are going to be when they graduate. We want to promote people who are going to give back to the community."

The Saber Es Poder (Knowledge Is Power) scholarship gives each of the recipients $5,000 for one year of study. The scholarship, now in its second year, was created in memory of six Jesuits slain in the late 1980s at the University of Central America in El Salvador. Seven students received scholarships in the program's first year.

"It is nice to be recognized," said Rodriguez, the first member of her family to attend college. "I couldn't believe it when I got the news. The scholarship promotes leadership skills, and it makes me feel more like a leader."

But Rodriguez was already considered a leader at the San Francisco school. Along with her studies, she tutors young Latino students at a USF center. After graduation, she plans to pursue studies toward a degree as a nurse practitioner.

"In my eyes," she said, "I see a nurse as an angel of mercy, one who cares for the total well-being of the person."

Rodriguez said that she was very active in school and community activities, but financing college was always a concern, so the news of the scholarship was a relief.

"The cost of tuition here is a burden to my family," said Rodriguez. "Anything I could receive is great."

The Rev. Luis Quihuis, a Jesuit priest and assistant to the USF president for multicultural affairs, created and directed the scholarship program its first two years. He said that he spearheaded the scholarship program because there was a growing need to find ways to make private universities more affordable for families of modest incomes. Tuition, housing, books, and fees can run nearly $25,000 per year at the university. So Rev. Quihuis, who is now pastor to Our Lady of Sorrows Church in Santa Barbara, Calif., spoke to several Latino alumni and corporate leaders about creating a scholarship just for Latino students at the university. And the response was overwhelming, said Aguilar.

"The reception to the program has been very warm," he said two years ago. "We raised $80,000 for it all out [in] a scholarship fund and make it self-sufficient."

The Rev. Quihuis said that people were initially skeptical about his proposal to tap into the Hispanic/Latino alumni.

"There is a tendency to look at Latinos as not involved in the community," he said last year. "The university discovered that Latinos do give if the cause is right."

He said that in the first year alone, the university received more than 100 new individual donors, many of them Latino, that have come from the Church and other community organizations.

Aguilar said that he has received such interest in the program.

"Many Latino alumni who feel included in the university's mission are now engaged in the community," he said. "The scholarship has found a way to involve Latino alumni in the community."

This year's six recipients were selected from 105 Latino undergraduate and graduate applicants who attended the university or were invited to attend the university Selection criteria included academic performance, financial need, community service, leadership skills, and the ability to make a meaningful contribution to the university community.

Rev. Luis Quihuis, SCHOLARSHIP FOUNDER
skills, and extenuating circumstances, based on the personal history submitted by the applicant.

The Rev. Quilquis emphasized the importance of the role of a student's community service in the selection process.

"I always tell the students that no one goes through life alone and that education is not just for them but also for the community," he said.

Another key aspect to awarding students the scholarships is simply honoring them for hard work.

"It emphasizes the importance of their education," said the Rev. Quilquis, adding that students must maintain a "B" GPA during the scholarship year.

Dacia Delgado, a junior with a major in business and a minor in Spanish at the USF Mclaren School of Business, said that the scholarship certainly helped her to keep focused on her education rather than worrying about paying for that education.

"It keeps me going toward my goal, and it is reassurance that I am doing something right—and getting rewarded for that," said Delgado, who was born in San Francisco but raised in Portland, Ore. At USF, she is an honors student enrolled in the Erasmus Project, named after the Renaissance humanist, a special program that seeks to develop, refine, and balance intellectual pursuits with responsible participation in community service and world affairs. Along with her studies, she works part-time and volunteers at the Hamilton Family Shelter, reading bedtime stories to homeless children. She also worked as the student activities coordinator for the residence hall association, as a peer counselor during orientation, and as a volunteer for campus ministry.

Roberto Lopez, Jr., a 21-year-old senior and scholarship recipient, said that the scholarship will help him meet his "obligation of fulfilling who I can become."

"I am trying to pave the road for my three younger brothers, to set an example for them." said Lopez, a junior psychology major and honor student. "I was honored to be chosen from an elite group of students. I was really flattered and blessed."

Lopez is also a catcher on the baseball team, where he emerged as a team leader. Born in the copper mining town of Globe, Ariz., he graduated with honors from Globe High School. The eldest of four children, he is the first of his family to attend college. In addition to sports and athletics, Lopez is known for his volunteer work in the Bay Area Latino community. He assists as a coach for Little League teams and is active in an interdenominational ministry group on campus. He is considering professional baseball and graduate school after leaving USF.

The selection process was chaired by Aguilar, an account executive with Villar Press in South San Francisco. Other members of the selection committee were USF Trustee Herman Gallegos; Rose Castillo Guibault, vice president for corporate communications and public affairs for the California State Auto Association; Tony Martinez, special assistant dean of the USF College of Professional Studies; Jim Gonzalez, president of Jim Gonzalez and Associates, a Sacramento lobbying firm; and the Rev. Quilquis.

Other award recipients are Sergio L. Dominguez, Jr., Marco D. Nuñez, and Derrick Kibler, Jr.

Dominguez, a sophomore majoring in pre-physical therapy, was born and raised in San Francisco and graduated with honors from Sacred Heart Cathedral High School. His interest in physical therapy began after he was diagnosed in high school with Guillain-Barre Syndrome, a viral disorder that results in temporary paralysis. Dominguez is actively involved in the Latino community, working at the Dolphin Club, an after-school program at St. Anthony's Immaculate Conception Elementary School in the city's Mission District.

Nuñez is a USF law student who expects to graduate in 2000. Born in Mexico City, Mexico, to migrant farm workers, he was raised in El Centro, Calif. The youngest of three siblings, he is the first in his family to graduate from a university and the first to pursue graduate studies. While at USF, Nuñez helped organize a food and clothes drive for victims of Hurricane Mitch. He is vice president of the USF La Raza Law Student Association and this year was a legal intern in the Criminal Law Clinic. He also tutors his peers in the Academic Support Program of the law school. After graduation, Nuñez would like to return to El Centro and practice law concerning undocumented juveniles and their relationship to the criminal justice system.

Kibler is a freshman and computer science major, from East Union High School in Madera, Calif., where he maintained a 4.0 GPA. He is a member of the California Scholarship Federation. Active in sports, he coaches basketball for the San Francisco Park and Recreation Department.

USF is a private Jesuit university, established in 1855. The city's first institution of higher education, USF began as a one-room school house with an enrollment of 25 students. USF is one of 28 Jesuit colleges and universities located in the U.S.
Field of Dreams:
From Farm Work to Medical Work

Commencement Speech, Harvard Medical School

BY ALFREDO QUIÑONES-HINOJOSA
M.D., CLASS '69

My father used to tell me when I was a little kid that "aunque no tengas buena puntería, si le tiras al cielo, a lo mejor le pegas a una estrella" (even if you do not have good aim, if you shoot at the sky, you may hit a star). Well, I am not known for my baseball abilities, so Pedro Martinez does not have to worry about his job. I am better known for my perseverance... I am thankful and honored to have the opportunity to give this commencement speech. Please, let me echo what was told to me by many of my friends and classmates graduating today from Harvard Dental and Medical School. It was the support of our loved ones and mentors, our determination, discipline, and dreams that have taken us here today.

"Con trabajo, determinación, y apoyo, puedes llegar a ser el arquitecto de tu propio destino" (with hard work, determination, and support, you can become the architect of your own destiny). My family constantly told me. Growing up in Mexicali, Mexico, I developed self-confidence and a sense of independence at an early age. In order to help my parents financially; as the oldest child. I was simultaneously attending elementary school and pumping gas in my parents' small gas station at the age of five. Helping to shoulder the financial burden while quite young—qualities for which I continue to be thankful up to today.

The idea that our dreams are within our reach is not novel. I am no different from any of my classmates graduating today. We are all here with incredible and interesting stories. The only difference, perhaps, is that I am in front of you willing to share my own.

My story in the United States began one night in January 1987. As an eager, ambitious, young Mexican. I crossed the border illegally, landed in the fields of California, and became a migrant farm worker. I packed the little I had and with $65 in my pocket, decided to explore "El Norte," I migrated to the United States to fulfill a dream. The dream that people, like myself, have of escaping poverty; and one day return unmanfully to our own countries.

The reality was a stark contrast. I spent long days in the field. Fruits and vegetables, sleeping under leaky camper shells, my hair tied from pulling weeds, a thing I could... My only was that I had a good tan in top shape.

One day in the field was talking with a co-worker. He said, "This is your fate; spend the rest of your life in the fields." Those words were hard to hear. I realized that English language skills an education, and without this predicted fate of migrant farm worker for my life seemed very likely.

I wish I could tell you inspired me to leave the farm for San Joaquin Valley that I possessed me to move a job. the ability to speak English knowledge of what was coming next. I do not know did it. I think that my although it was fogged I was more powerful thing at the unknown. It was those decisions that the life entirely, since mira.

This experience has always reminded me of what Henrik I said: "Rob a man of his life-illusion, and you rob him also of his heart.

The Importance of Mentoring

After the fields, I began to work in a rail car repair cor Stockton, California. I first cleaned railroad cars. Then, I was a painter; and a high-pressure valve specialist, and within 16 r
supervisor. On April 14, 1989, an event took place that made me reevaluate my direction and my life. I fell into a railroad tank carrying liquefied petroleum gas—I almost died! I woke up in the hospital and saw a person dressed all in white; I felt assured to know that a doctor was taking care of me. I had a feeling of being on terra firma. This brush with death gave me the strength to continue pursuing my dreams with a rejuvenated force.

I constantly daydreamed. I have learned that if our minds can conceive a dream and our hearts can feel it, it will be much easier to achieve that dream. At night, I attended community college. I started out taking English as a Second Language classes. Less than three years of hard work later, I was a member of the track and field team and captain of the debate team. As a member of the track team, I found that a race does not end once you reach the finish line; rather, every time you reach the end, a new race begins. During my speech class, a mentor who believed in me made me the captain of the debate team. I began to appreciate that the ability to work as part of a team is vital to succeed.

Everything went well in community college; my life in academia was beginning to take off. My mentors helped me to get to my next stop, the University of California-Berkeley. At Berkeley, I met more important role models and mentors. I learned from them that “knowledge is better learned by action than by contemplation.” I also learned that it takes much more than intelligence to succeed; it also takes discipline, dedication, determination, and a dream. Without knowing it, I was being prepared for medical school. When one of my mentors told me once that I should apply to Harvard, I thought that he was a very nice man but clearly *living la vida loca* (or a little insane in the brain).

After my acceptance to Harvard Medical School, I hesitated to attend. I was not sure it was the institution where a poor student who grew up in a small rural community in Mexico, like I did, would thrive. My mentors at Berkeley insisted that I travel to Boston and visit Harvard. During that visit, I met two distinguished professors, Drs. Edward A. Kravitz and David D. Potter. From them and other important mentors here at Harvard, I have learned to see academic medicine as an opportunity to understand and treat human diseases better, but more than an opportunity to provide leadership and support to future physician-scientists in order to serve our communities in the best possible way. These outstanding professors embody the words of Plutarch: “the mind is not a vessel to be filled but a fire to be ignited.”

Like many others here today, I realized long ago the great extent to which I have depended on the help received from my mentors in pursuing my dreams of being a physician-scientist. Henry Brooke Adams once said that “A teacher affects eternity; he can never tell where his influence stops.” I, like many of us, hope that I can begin to have the same impact as a mentor to future medical students and graduate students—to change their lives for the better.

Our Dreams Have No Barriers. No Borders, and No Limits

It is no secret that minority communities have the highest dropout and lowest educational achievement rates in the country. The “pipeline” to higher education and especially in professional programs is not fully “primed” for minority students. Although members of minority groups make up about 18 percent of the U.S. population, in 1994, they accounted for only 3.7 percent of the M.D. faculty at the nation's medical schools. Recent investigations found that Black and Hispanic physicians are more likely to practice in low-income and minority communities and to include minorities and poor people among their patients (Komaromy et al.). Minority physicians are twice as likely to work in locations designated as health workforce shortage areas by the federal government (Keith et al.). Minority patients are more than four times as likely as Whites to receive their regular care from a minority physician (Moy and Bartman). I have been very fortunate in my involvement in education to meet outstanding minority role models—the quality of role models is high, but the numbers are low.

Dr. William Bowen and Derek Bok, in their book *The Shape of the River*, point out that a “healthy society in the 21st century will be one in which the most challenging, rewarding career possibilities are perceived to be, and truly are, open to all races and ethnic groups.” The effort to recruit underrepresented minority students in selective institutions has come under “heavy fire.” Changes in admission policies in places such as California and Texas have occurred recently. The astounding effects that a “race-neutral admission policy” has had in decreasing the number of Blacks, Hispanics, and Native Americans being admitted to institutions in these states indicate that the time is “ripe” for reevaluating the role of race-sensitive admissions policies that have been applied and where their consequences have been during the past thirty years.

Recently, while having a dinner with some of my friends, we spoke about Harvard’s contributions and commitment to making our institution a leader in science, in community service, and in recruitment of underrepresented students. We felt privileged and honored to be part of this family that has demonstrated dedication, discipline, love, and passion for everything they have done. Many of us have commented that we hope one day as future physicians we can all embody the value that this institution and its dedicated faculty has inculcated in us—the value of being a role model, a mentor, an outstanding physician, a colleague, and a friend.

Like many other illegal immigrants, I arrived able only to contemplate what my dreams might be. Now, due to the support I have from my family, my wife, Anna, and our dear daughter, Gabriela, the support of my friends and mentors, the backing of vital organizations such as our institution, I feel that I can contribute greatly to our community as a physician-scientist.

Today we graduate from this fine institution, happy, ready to take on the world, perhaps also slightly nervous about starting residency. Let us not forget that thanks to our loved ones and our mentors, and the determination and dedication we all carry, we have been able to fulfill our dreams.

I now can welcome and accept my fate of “working in the fields” for the rest of my life...but in the “field of academic neurosurgery.”

Teaching Spanish/Teaching Transitional English
University of Kentucky Shows the Way

BY DOUG TATTERSHALL

The value of knowing Spanish is growing. That applies to Kentucky as well as to states such as California and Florida that have far larger Hispanic populations.

"More and more in the area where we live, there's a crying need for Spanish," said Margaret Jones, who chairs the University of Kentucky (UK) Spanish Department.

Jones is contacted frequently as a translator, particularly by social service agencies and hospital emergency rooms. But she also sees an increased demand in the business world: a local car parts store recently approached her specifically looking for potential employees who speak Spanish. That is because as the Hispanic population increases, its buying power also increases. A University of Georgia study showed that the buying power of Hispanics in Kentucky increased by 40 percent from 1990 to 1996.

"We've had no need before for anything but English," Jones said. "But now there is a need."

In Kentucky, 28,543 Hispanics make up less than one percent of the population, according to a report last fall. But the population is growing, sparked in part by a demand for farm labor.

Adela Hernandez, a Hispanic woman who moved to Kentucky from Texas 10 years ago, remembers only rarely bumping into other Hispanics when she first came to Lexington. Today, she sees them regularly. A survey by the Lexington Hispanic Association shows that 50,000 Hispanics live in the state.

The influx of Hispanics helped increase the number of students taking high school Spanish. That has trickled into an increase in college level Spanish. Jones said. WithSpanish coming to have practical applicability students from various majors are taking Spanish classes.

"This is why economics students, taking Spanish, as well as others," she said. "Another language is really important. But not only learn on a linguistic level, you learn about another culture and about how you fit in with the larger society."

And while Jones is helping English-speaking students learn Spanish, two colleagues, a retired professor, John Lihani, and a graduate student, Genny Bae, are teaming up to bring a simplified version of English to the world.

Lihani, a University of Kentucky Spanish professor emeritus, developed "Transitional English" as a way for people to learn the language quickly.

"I see Spanish as breaking down barriers," she said. "It can allow you to help someone understand how to take her medicine or to help someone get an insurance card for her child or to send a note to a parent about a child's progress in school."

A knowledge of Spanish also is important for teaching English to Hispanic immigrants. Many determined to learn English to get their job opportunities and ability to get along in the United States, Hernandez said.

The influx of Hispanics helped increase the number of students taking Spanish. That has trickled into an increase in college level Spanish. Jones said. WithSpanish coming to have practical applicability students from various majors are taking Spanish classes.

"This is why economics students, taking Spanish, as well as others," she said. "Another language is really important. But not only learn on a linguistic level, you learn about another culture and about how you fit in with the larger society."

And while Jones is helping English-speaking students learn Spanish, two colleagues, a retired professor, John Lihani, and a graduate student, Genny Bae, are teaming up to bring a simplified version of English to the world.

Lihani, a University of Kentucky Spanish professor emeritus, developed "Transitional English" as a way for people to learn the language quickly. It is the first simplified version of English intended for universal use. Rather than rely on traditional instruction, Lihani..."
ten is particularly suited to people who are not in school but still want to learn English for occasional and limited communication.

For example, his system could allow Latin American shopkeepers to learn to communicate with English-speaking tourists, who make up a growing part of that region's tourist industry.

Lihani based his approach on research published by scores of linguists who studied pidgin-creole English and foreign English talk. He already has tested his version of Transitional English in Slovakia. With the support of a Fulbright grant, he compared the fluency of a group of students instructed in Transitional English to the fluency of a group of students who had taken traditional English instruction. Looking at scores on English tests, he found that his beginning group of Transitional English students scored 80 percent of what intermediate and advanced students scored on the same test. His beginning students had taken only two months of instruction while the traditionally instructed students had as much as four years of instruction.

"This showed me that with this simplified English, you learn quicker, and that when you go on to standard English, you also will learn that better," Lihani said.

Since then, with help from several colleagues, he has developed an experimental textbook for Spanish-speakers interested in learning Transitional English. The textbook is online at <http://www.uky.edu/~globiec/>. A visit reveals a preface, instructor's guide, ten lessons that include exercises, questions and answers, and a photograph of Dr. Lihani with "Webmeister" R.W. Kiser, also a professor emeritus. Lesson 8 gives us Litt Red Råyding Hud, but Lesson 9 moves on up to the Gétisbrg Adrés, Deklarærjshn av Indépendáns, and a Tök Grm et Fulbrighters Riséjshn, as well as vocabulary, proverbs, and two jokes. Lesson 10 presents the Histri at: "Tranšisbl English," Priembl tu Konstitusbn, and Améndmants tu Konstitusbn: Bil av Rayts.

Lihani's Transitional English uses a lettering system immediately familiar to Spanish speakers in order to make pronunciation easier. For example, native English speakers might stumble over the word "sayd" but native Spanish speakers will recognize its pronunciation as "side."

Lihani also simplifies English by using only subject pronouns, even when used as adjectives or objects. Therefore, "she" is used both as a subject of a sentence and in place of "her." (Hence, "av-shi"—or "of-she"—is used for "her." Adding "-ed" to the verb always creates the past tense. So "mit" (meet) becomes "mited" rather than "met." and "it" (eat) becomes "ited" rather than "ate."

Ballard, a UK Spanish doctoral student from Bardstown, Ky., is preparing to go to Costa Rica next year to train instructors to teach Lihani's Transitional English.

"English would be useful in Costa Rica because tourism is the No. 1 industry there now. They want to learn English," Ballard said. "Transitional English would help them get to a point where they communicate, which boosts their confidence level. From there, they can continue to improve their English."

Ballard at first was skeptical of Transitional English because the grammar is not always correct. However, she came to appreciate the need to learn English quickly when her husband, a native Costa Rican, came to the United States. He needed to learn English well enough to find work as soon as possible, but it took him about a year to learn it well enough to get by on his own.

Now Ballard is eager to see how Lihani's version of Transitional English works for Latin Americans trying to learn the language quickly.

UK: A BRIEF HISTORY

The roots of the University of Kentucky are anchored in the federal Morrill Land-Grant Act of 1862, which led to the founding in 1865 of the Agricultural and Mechanical College on the outskirts of Lexington. The establishment of the A&M college fulfilled the vision of John Bowman, a Kentuckian whose self-appointed mission was to launch a public university in Kentucky where the public could receive a quality education at minimal cost. He succeeded. In its first year, 1866, the A&M College enrolled 190 students, who paid annual fees of $10.

UK launched its Agricultural Extension Service in 1910, four years before the U.S. Congress enacted funding for such programs. In 1912, UK launched its graduate school. Forty-two years later, the UK board of trustees authorized establishment of the colleges of medicine, nursing, and dentistry, and the College of Pharmacy was moved from Louisville to UK.

Today UK offers 87 bachelor's-level, 88 master's-level, and more than 60 doctoral-level degree programs, and has been designated by the Carnegie Foundation as a Research I University.
The GED program at San Joaquin Delta College has helped thousands of students who dropped out, left out, pushed out, and those living on the margins to obtain their high school equivalency diploma and get their lives on the right track. SJ Delta College is located in Stockton, California, within the largest agriculture-producing belt in the world—the San Joaquin Delta—and is home to one of the most successful GED programs in the country.

The GED program is offered in both English and Spanish by two full-time faculty. One, a relative newcomer, is Pamela Pam. I am the other, and have been with the program for nine years. Eva Chavez serves as the sole program recruiter. Assistant Chair of Communication Skills Dr. Kathy Hart and Chair Dr. Mary Ann Cox direct the program. More than seven part-time faculty work with the program.

GED is a program designed to help individuals obtain self-esteem and to enable them to receive a high school education. The campus and the GED program serve the San Joaquin, El Dorado, and Calaveras Counties. Because the program offers instruction in Spanish, citizens of Mexico who have U.S. residency status often live in the area and have relatives or friends, to study for the GED en Español.

The program is presented five times a year in nine-week sessions. Students can elect to attend either three daytime or two evening sessions a week. They study writing, math, science, social studies, and literature in preparation for the GED exam. An average grade of forty-five in each subject area earns them a diploma.

The program is an offshoot of HEP, the high school equivalency program. Delta College lost its HEP funding in 1990 and launched the GED program as a Migrant Transition Program. In 1997, it was extended to all students, not just migrants. Enrollment was boosted and, at present, is booming.

The San Joaquin Delta College has committed to this program over the years as it represents a second chance for youths who otherwise might have no future and no hope. GED students have gone on to become teachers, professors, mechanics, machine operators, RNs, and LVNs. For many, it has offered a push that helped them start a career.

Jerome Flores, whom I first met when he was 19, told me of the trouble he had been in in his early youth. He had been sent to the local juvenile hall and had no hope for his future. “My life was the streets, and I saw no way out of the streets.” Then he met up with the late Georgia Sutton and worked with both of us in the GED Program. “Sutton and Ramirez helped me see the light. I got my GED in 1994, studied vocational painting, and landed a job at a glass factory.” Flores boasts that he has a wife, two small children, a 401K, a house, and a steady check.

Flores is only one of thousands who have benefited from the program. Maria Lazaro, a former student, now has her own elementary classroom and is listed presently as one of the part-time instructors in the GED program. “This program gave me my start,” states Lazaro. She explains how the program taught her the value of helping others. “I feel helping others is the greatest achievement,” she says.

Herman Ambroz, an aspiring artist, wishes his high school experience could have been as positive as his experience at Ramirez’s classroom. “I wish there were more teachers in my high school who I would like Mr. Ramirez. There should be more teachers who take the time.” Ambroz obtained his GED in May 1999, in a ce held yearly in the Athenaeum Auditorium. It has plans to become a graphic artist and business. “If I can overcome some obstac know I can reach my goals,” he says. “I have worked hard and I have a good job as a pressman.” A big start, and I think Spanos is just star up. I even have two cars, and I’m going with my art and poetry,” a jubilant Ambroz.

The GED full- and part-time staff are a title self-esteem issue that students bring the classroom. Some students enter the program with low self-esteem, a poor self-image of motivation, poor academic and social skills. To meet their need, self-esteem, graduation ceremony is conducted at 7:30 each spring semester for all GED graduates. The annual graduation ceremony has become a tradition since the inception of the program. Those who attend the ceremony to the music of “Pomp and Circumstance” through an audience consisting of families, members of the San Joaquin Delta of E Cluch of Friends, the college president, the vice president of instruction, the vice president of services, the program administrators, staff recruiters, and support staff. Key persons from the greater San Joaquin County, greater Stockton, and the greater Stockton valley are invited as guests. Delta’s president usually opens the ceremony with a welcome address. Two speakers represent all students—one student.
Daytime instruction is offered in two self-contained four-and-one-half-hour classroom sessions on the Delta Campus Monday through Friday. I am the regular full-time bilingual instructor, and my class is offered in an English and Spanish mix. There is a great night session demand for the GED Exam in Spanish; therefore, monolingual Spanish courses are offered during two-night, three-and-one-half-hour sessions on and off campus, usually Mondays/Wednesdays or Tuesdays/Thursdays. Monolingual instruction in Spanish for the GED is offered in all subject matter and is taught solely in Spanish. These course offerings in Spanish create the opportunity for monolingual Spanish speakers to obtain their GED in their native language during the day or night.

From fall 1990 through spring 1997, computer-assisted instruction, with a highly qualified tutorial assistant, was offered with software from Educational Development Inc., N.Y. N.Y., using ten Apple computers. By assessing student skills in writing, grammar and punctuation, social studies, literature and the arts, science, and math, instructors were able to prescribe computerized instruction in individual areas where students had weaknesses. Students were given specialized instruction in writing a four-paragraph essay and in reading poetry, short stories, plays, and biographies. Students were instructed in mathematical concepts such as fractions, percents, geometry, and algebra. GED students were guided in computerized instruction in behavioral sciences, history and geography, and earth science, biology, astronomy, and physics. Computerized instruction also offered the opportunity for students to gain hands-on experience operating a computer.

In 1996, the tutorial assistant transferred to the Tutorial Center. Consequently, we have temporarily eliminated this element of the program but hope to reinstate it because of its value to student learning and because it provides students with important experience with computers.

Presently, a new site has been chosen for the program on campus, and software is being procured for a new computer lab.

Overall, the GED program at San Joaquin Delta College serves more than 700 hundred students per year. Between 250-344 students graduate yearly from the bilingual program. The program has been a success because of the quality of the instructors, all of whom have a genuine interest in each of their students. The SJDC board and administration have remained steadfast in their commitment to this successful program. The next graduation ceremony at which GED diplomas of recognition will be given out will be May 26, 2000. For many students, it will be a night to remember—a night when unfinished business is completed. And for all students, it will certainly be the beginning of a journey into a better life.
LETTER TO THE EDITOR
October 11, 1999

Since Hispanic Outlook put the spotlight on California State University-Monterey Bay this past summer, I thought it important to provide some relevant facts regarding the composition of the faculty, staff, and student body. It is my hope that this information might clear up any misconception about the commitment of the University to diversity. CSUMB Monteray Bay was able to recently hire an interim provost, a highly respected administrator from within the CSU system, Dr. Diane Cordero de Noriega. Diane is an 18-year veteran of the California State University system, having come up through the faculty ranks at the Sacramento campus. I would also like to share with you my latest communication with the CSUMB campus community. This is the springboard for opening a series of open discussions on our vision, in preparation for a long-term strategic planning effort.

Sincerely,

Dr. Peter Smith
President

Following are excerpts from Dr. Smith's 10/4/99 letter to the CSUMB Community, mentioned above. The HO article to which he refers is "The Dream: Defeated or Beuatiful?" (Vol. 9, #25, Aug 27).

- Recently, in a thoughtful note to me, Dr. Steve Watkins, parliamentarian of the Faculty Assembly, asked me to reconsider my interpretation of the Faculty Assembly's vote of no confidence in my ability to lead the development of a multicultural university. I am taking the liberty of responding to Dr. Watkins with this paper in order to make a larger point about universities in general and, more specifically, the status of debate and discussion on serious issues at CSUMB, etc.

- Over the next several years, our thoughtful commitment to the values of a university and the values of our Vision Statement will be tested. This is the work of years, not months. And, as we contemplate the work before us, we should hold the words of the 19th-century German poet Heinrich Heine close to our hearts. As Heine stood with a friend before the great cathedral of Amiens in France, his friend wondered aloud, "Heinrich, why can't people build buildings like this anymore?" Heine answered, "In the days of this great cathedral, people had convictions. We moderns have opinions, and it takes more than opinions to build a great cathedral.

What is the similar commitment for a university? Historically, universities have stood as bastions of free speech and debate, as places where provocative thought is not only protected but encouraged. . . .

- As a university community, we are faced with a challenge. How do we develop and practice our commitment to multiculturalism and, at the same time, remain committed to the exchange of divergent ideas and views in an environment of h orange and mutual respect? [E.N. Previous sentence underlined in the original.]

- When I served in the United States Congress, I met a young African American woman who had endured the reality of growing up in a low-income neighborhood in Washington, D.C. She had walked through gangs and drug dealers to get to school every day. She had persevered and was on her way to Howard University following fall. When I asked her what she would change, if she could change anything, so that others might follow her footstep more easily, she answered, "I would give myself more courage. Then I would not be afraid to tell the drug dealers on the corner, 'Get out of my way. I'm going to succeed despite you.'

- Over my years here, I have been approached by student faculty, staff, and administrators who are also afraid. They are afraid to join the campus conversation on multiculturalism. They fear retaliation: for fear of being branded a racist if they think they are not. This thinking is too much for their perception of the dominant theme on campus. Others say they fear retaliation from colleagues, peers or the administration. These fears, regardless of the source or to whom they are directed, run against the very grain of a university and must not be tolerated.

- Diversity of opinion, like diversity of cultures and experiences, gives strength to an intellectual community. This "brainpower" allowing for different perspectives is part of the strength.

- In this context rises the question, how will we build on our commitment to multiculturalism? By welcoming diverse views, by bringing people into the conversation. Not by driving people out or silencing them.

- We have proven that we have passion for our Vision Statement. Now we must be passionate for the soul of the university, for an environment of tolerance, mutual respect, acceptance where people can speak without fear of retaliation. Our strategic plan will be the vehicle through which we convert our vision of the university to its mission.

Editor's Note:

Dr. Smith also provided Sept. 1999 reports reflecting faculty gender and ethnicities, and staff/administrative gender and ethnicity at CSUMB. In summary: Latino/Mexican American are shown as 24 percent of staff and 17 percent administration; 26 percent of students; 32 percent of tenure track; 15 percent tenure-track, 15 percent multi-year; 15 percent "temporary" lecturers, librarians, and coaches. The faculty rep also indicates 20 tenure-track and four multi-year vacancies.
PEOPLE

Castaneda Named to Spanish Borderlands Research Chair

Dr. Antonia I. Castaneda of St. Mary’s University (Texas) was named O’Connor Professor of Spanish Borderlands History for academic years 1999-2001. She is the fourth St. Mary’s professor to hold the endowed research chair.

A Chicana feminist historian and associate professor of history, Castaneda has focused her research, publications, and teachings on gender, sexuality, and women of color in California and the Spanish-Mexican borderlands from the 1770s to the present. During her tenure as O’Connor chair, she plans to complete and publish her manuscript on the social and cultural history of indigenous and mestiza women in colonial Alta California from 1770-1850.

Santa Ana Musicians Perform in Mexico

Santa Ana College (Calif.) music professor David Lopez and his students performed at several venues in Mexico at the invitation of the International Consortium for Education and Economic Development, which held a major conference at the Technological University of Tabasco.

“This exposure gave myself and our students a chance to get away from familiar surroundings and participate in an international exchange,” said Lopez, a saxophonist and director of numerous college instrumental and vocal groups.

Joining Lopez on the trip were bassist Ruben Ramirez and brothers Carlos (piano) and Ruben (drums) Ordaz.

UCLA Celebrates Munro and Lopez Publication

The University of California-Los Angeles (UCLA) Chicano Research Center held a publication party for the first ever Zapotec-English dictionary, co-authored by UCLA’s Pamela Munro and Felipe H. Lopez.

Six years ago, Lopez, an Oaxacan immigrant, approached Munro, a UCLA linguistics professor. “My language has never been written down,” he said. “In a few generations, it might be lost. Can you help me?” She agreed.

Diccionario Xithesh Dil’zsb Sab Sann’ Lur’te is a two-volume, 650-page dictionary of the endangered Zapotec language spoken in the pueblo of San Lucas Quiavini, in the Valley of Oaxaca, Mexico, and by many immigrants in Los Angeles.

Hispanic Leadership Conference in Chicago

President Clinton told Hispanic leaders at the 9th annual conference of the United States Hispanic Leadership Institute (USHLI) that America increasingly will “look like you.” In his keynote address, Clinton summed up the progress and problems of America’s fastest-growing minority.

The theme of the October conference, held in Chicago, was “Taking Responsibility: Making Latinos Count in America’s New Majority.”

Among the many national Hispanic leaders who spoke were Bill Richardson, secretary of the U.S. Department of Energy; Aida Alvarez, administrator of the Small Business Administration; Kenneth Apel, commissioner of the Social Security Administration; Henry Cisneros, president of the division; Ida Castro, chair, Equal Employment Opportunities Commission; and Rep. Luis Gutierrez.

Dr. Juan Andrade, Jr., USHLI president, said: “We are proud to provide a unique forum that unites the leaders of today with the leaders of tomorrow.”

Sanchez Attends Faith and Values Forum

Texas Woman’s University students Perla Sanchez and Tammy Calhoun attended the 9th annual National Student Leadership Forum on Faith and Values, hosted by Sens. Pete Domenici, Daniel Akaka, and Bill Frist, and Reps. Mike Doyle and Steve Largen. Vice President Al Gore was a special invited guest.

Discussions focused on the leadership abilities shown by Jesus of Nazareth, Mahatma Gandhi, Mother Teresa, and others, including the negative example of Adolph Hitler.

“We learned that what drove these leaders to make such great decisions for humanity was their faith,” said Sanchez, who is a social work major, peer advisor for Creating Opportunities for Leadership and Obtaining Racial Support, and member of Intervarsity Christian Fellowship.

Montejano at Corpus Christi

Diana Montejano was a keynote speaker at Texas A&M University-Corpus Christi during Hispanic Heritage Month. A published poet and writer, Montejano spoke about achieving writing goals, and evaluated students’ individual works.

While attending Our Lady of the Lake University through the Project Teacher Excellence Program, Montejano worked as a legislative research aide to Sen. Joe J. Bernal, co-sponsor of Texas’ first bilingual education bill. During this time, Montejano taught at one of the first bilingual education pilot schools.

Presently, Montejano teaches English and creative writing courses to at-risk youth and presents readings in El Paso, San Antonio, and Austin.
Spalding Receives Excellence Award

DePaul University (Ill.) political science professor Rose Spalding received the university’s 1999 Rev. William T. Cortelyou-Martin J. Lowery Award for Excellence.

As the award-winner, Spalding delivered a public lecture, “Development, Revolution, and Democracy: Following the Question from Managua to Mexico.” Spalding, a recognized authority on Central American and Mexican politics, authored *Capitalists and Revolution in Nicaragua: Opposition and Accommodation, 1979-1993*, a book about Nicaragua under the Sandinistas. She earned her doctorate at the University of North Carolina-Chapel Hill.

Two Cross Border for Nursing Education

Raul Ornelas (pictured 1) and Jesus Saucedo-Ramos (2) are both committed to the two-year Eastern New Mexico University-Roswell nursing program.

Ornelas, from Juarez, Mexico, and Saucedo-Ramos, from Torreon, Mexico, are both 43 years old, veterans, and now best friends. They were living with their families when they heard about the two-year associate’s degree program. They left their families and moved to Roswell with the goal of becoming nurse practitioners.

They say that despite the sacrifices, the experience has been great.

Saumell-Muñoz Lectures at Elmhurst

Saumell-Muñoz, a Cuban exile, is an assistant professor of Latin American literature at Sam Houston State University in Huntsville, Texas. He specializes in 19th- and 20th-century Cuban literature.

Ford Lectures on El Pilar Maya Archaeological Site

The Maya of southern Mexico and Central America built one of the world’s great civilizations, leaving a legacy of magnificent forest-shrouded temples and exotic artifacts that continue to mesmerize 20th-century peoples as archaeologists unearth their past and seek to solve the mystery of their collapse.

University of California-Santa Barbara (UCSB) archaeologist Anabel Ford has concentrated for six years on the ruins of El Pilar, a Maya city along the border separating Belize and Guatemala. At El Pilar, Ford has brought together representatives of the indigenous community, scholars, and government officials to create an ecological and archaeological reserve.

Ford recently discussed at UCSB plans for the site’s future.

Vargas Dowdy Named “Latina of Promise”

Elizabeth Vargas Dowdy, chair of the Manatee Community College (Fla.) English, reading, and languages department, was named a 1999 “Latina of Promise” by *Hispanic Magazine*. The award recognizes outstanding academic achievement, a commitment to community service, and leadership potential.

Vargas Dowdy was a first-generation American who grew up in an El Paso barrio. One of the first to teach English for speakers of other languages in the Manatee County school system, Vargas Dowdy founded the Manatee Community College Hispanic American Organization, developed a program for migrant students, was named “Teacher of the Year” by Florida Foreign Language Instructors in Community Colleges, and successfully competed on the national level for a $5,000 AALUW scholarship.

Morales and Corbett Strengthen West Chester Ties to Latin America

West Chester University (Penn.) tie Latin America have been strengthened through the efforts of professors Edmundo Mor and Idzi Corbett.

Morales, a Peruvian native and a two-time Fulbright award recipient, specializes in the culture of the people of the Andes. He was invited to serve on the Andean Countries Review Committee to review applications for the 2000-2001 Fulbrights.

Corbett, also a Fulbright award recipient, helps the Ministry of Education of Republic of Nicaragua in its basic education reform efforts. He recently directed National Standa Project for Basic Education, which focused on Nicaraguan primary and secondary schools.

Long Island Hosts Feuer Exhibit

Photographer Elvat Feuer (picted 1) celebrated the beauty and cultural significance of “casita” gardens located in New York’s Puerto Rican neighborhoods with a color exhibit at Long Island University-Brookl...
Fellowship from the National Conference of Editorial Writers Foundation.

The fellowship is presented annually to a journalism educator committed to preparing minority students for successful careers in journalism.

Chávez is director of the SJMC Office of Student Diversity, a founder of the National Association for Hispanic Journalists, and is chair of the Colorado Press Association’s Diversity Committee. He has a bachelor’s degree from Texas Tech and a master’s from the University of Washington.

**Yale-Oxford Symposium Honors de Campos**

Yale University (Conn.), in cooperation with the Centre for Brazilian Studies at the University of Oxford (England), hosted “On Transcreation: Literary Invention, Translation, and Poetics,” a symposium dedicated to Brazilian poet Haroldo de Campos in his 70th year. De Campos gave a talk, “The Ex-Centric Viewpoint: Tradition, Transcreation, Transculturation.”

A leader in experimental poetry for more than three decades, de Campos this year was awarded the first Octavio Paz prize for poetry as well as the Roger Calixto prize in France for the translation of his prose work Galaxias.

Along with a degree in law, de Campos has a doctorate in literature from the University of Sao Paulo and an honorary doctorate from the University of Montreal.

**Montoya Presents Optics Research at SACNA Conference**

Joseph Montoya, New Mexico State University physics doctoral student, presented his research on nonlinear optics at the national conference of the Society for Advancement of Chicanos and Native Americans in Science, held in Oregon.

Montoya, who has an EPA fellowship, said his work with silver aggregate and laser radiation could eventually be used to combat air pollutants. His research is titled “Laser Induced Silver Fractal Aggregation Growth and Non-Linear Spectral Properties of Silver Aggregates.”

Montoya is a graduate of the University of California-Riverside.

**Ortega Receives Honorary Degree**

Cardinal Jaime Lucas Ortega y Alamino, archbishop of Havana, recently received an honorary degree from the University of San Francisco (Calif.), and delivered a major address on the state of the Roman Catholic Church in Cuba.

The bilingual event also featured the music of Coro Hispano de San Francisco, a leading choral ensemble of the Bay Area’s Spanish-speaking communities.

Ortega became Cuba’s first cardinal in more than 30 years when Pope Paul II elevated him in 1994. The son of a sugar cane cutter, Ortega spent 10 months in a prison camp in 1966 as “an enemy of the Cuban Revolution.”

**Salinas Wins Children’s Book Award**

Nacho, Tío, and Miguel are three pigs pursued by José, the hungry wolf in Bobbi Salinas’ English/Spanish version of The Three Little Pigs. Salinas’ book, The Three Pigs/Los Tres Cerdos, is the 1998 winner of the Tomás Rivera Mexican American Children’s Book Award, sponsored by Southwest Texas State University’s College of Education.

Salinas, from Alameda, Calif., is an author, illustrator, teacher, ethnic clothing designer, community activist, and strong promoter of cultural education.

“I believe that when educating young people, we must provide them with truth and experiences that help them develop their critical minds,” Salinas wrote at the end of The Three Pigs/Los Tres Cerdos.
Rockland Honors Hispanic Students

Rockland Community College (N.Y.) presented Outstanding Hispanic Student awards to six students. Selected for their academic, artistic, athletic, and/or leadership achievements, each received a $100 scholarship.

North Texas Getting Aid for GEAR UP

The University of North Texas will receive $4.2 million during the next five years as part of a federal grant for the Gaining Early Awareness and Readiness for Undergraduate Program with the goal of helping low socioeconomic students realize their full academic potential and attend college.

The initial target is Stockard Middle School, a public school of seventh and eighth graders located in a largely Hispanic, low-income section of southwest Dallas.

"This program will enhance current programs and get students focused on attending college," and help make the transition to college preparation easier, said Oscar Rodriguez, Dallas Independent School District VI superintendent.

Cal State-Fullerton Hosts Dialogue on Race

California State University-Fullerton joined the White House and the U.S. DOE in sponsoring the second annual "Campus Dialogue on Race" town hall.

Panelists taking part in the dialogue are, l. to r., Ashik Popat, president of Associated Students Inc.; Dr. Richard L. Wiseman, professor of speech communication; Dr. Isaac Cardenas, chair and professor of Chicano studies; Rusty Kennedy, event moderator and executive director of the Orange County Human Relations Commission; Dr. Julie Stokes, assistant professor of Afro-ethnic studies; Jessica Medina, president of the campus chapter of Movimiento Estudiantil Chicano de Aztlán (MECHA); and Phu Nguyen, president of the Vietnamese Student Association.

U.S. Department of State Offers Internships

Throughout the year, the U.S. Department of State provides internship opportunities for qualifying U.S. citizens who are students in nearly every academic discipline.

The intern program is offered in spring, summer, and fall with application deadlines of July 1, Nov. 1, and March 1 respectively. Most internships are unpaid. Summer offers the most placement opportunities and attracts the most applicants. Students are encouraged to apply for spring and fall intern periods, when selection prospects are enhanced due to fewer applicants.

For a copy of the intern brochure, fax a request to Lynn Green at: (202) 261-8841. Or write to her at: U.S. Department of State, Recruitment Division, 5th Floor, 2401 E. St. N.W., Washington, D.C. 20522-0518.

Nike Appoints New Executives

Nike, Inc. (Ore.) recently appointed new key executives. Oscar Cardoza became vice president of human resources, USA region. Cardoza has a bachelor's from Beloit College and juris doctorate from McGeorge College of Law.

Joaquin Hidalgo became vice president and global brand director for socc. Hidalgo has bachelor degrees from the University of Dayton.

Mariano Diaz became director of the Nike Foundation. Diaz has a bachelor's degree from the University of California-Santa Barbara and master's from Harvard's Graduate School of Education.

Northern Essex Helps Hispanic Students, Business Owners

To accelerate the entry of area Latinos into career and job-training programs at North Essex Community College (NECC) in Massachusetts, the NECC Foundation awarded $8,888 to fund the college's new Fast Track Access Program. Fast Track was designed to assist Latinos who need remedial work before enrolling in classes. NECC by providing eight weeks of intensive skills development. "We can ensure that the
students will be better prepared to complete their course work and gain marketable skills," said Dr. Jorge Santiago, NECC assistant dean for pre-college programs.

NECC also will get a $400,000 federal grant to create a Lawrence Business Assistance Center to train, educate, and assist Hispanic business owners and entrepreneurs.

**President's Scholars at Cal State-L.A.**

Seven outstanding students entered California State University-Los Angeles as the first beneficiaries of the new President's Scholars program. All motivated high achievers, (l-r) Ivan Albert Reyes, Laurel E. Diskin, Numan Benjamyn Parada, Nathan Craig Charlton, Monica Chew, Ciro Alfonso Ramirez, Jr., and Hunly Chy were selected from local high schools to receive the university's most prestigious scholarship. Each will receive $5,000 per year during four years of full-time enrollment.

Parada plans to major in civil engineering and minor in music. Ramirez, a National Hispanic Scholar finalist and first in his family to attend college, wants to pursue a career in physics.

**Mortgage Finance Program at Miami-Dade**

Miami-Dade Community College (M-DCC) in Florida officially launched a new Mortgage Finance Program in September.

The Fannie Mae Foundation, headquartered in Washington, D.C., granted M-DCC $595,000 as part of its Communities Initiative designed to promote diversity in the mortgage and housing industry through professional education and training.

The program arose out of concern over statistics that show Hispanics and African Americans are less likely than non-minorities to become homeowners.

Research shows that the mortgage approval rate for Hispanics and African Americans increases when a minority lender is involved in the loan process.

Pictured here, are (l to r) Juan Contreras, Alba Lyons, and Arlean Charles Nebeltt, students in M-DCC's first Mortgage Finance Program class.

**Pacific Oaks Colloquium Addresses California's Children**

Three prominent California educators and authors addressed issues on the developmental and cultural needs of California's children in the next century during Pacific Oaks College's (Calif.) fall colloquium.

Guest speakers included Dr. Rodolfo Acuña (pictured at l.), author and CSU-Northridge chair of Chicano Studies; Dr. Leobardo Estrada (r.), professor at the UCLA School of Urban Planning; and Richard Rodriguez, author, essayist, and journalist.

Respondents included Vera Vignes, superintendent of the Pasadena School District; Gloria Gutierrez Delaney, assistant superintendent; and Pacific Oaks faculty member Dr. Rebecca Rojas, among others.

**Erie Holds Hispanic Heritage Night**

Erie Community College (N.Y.) sponsored Hispanic Heritage Night in October.

Wendell Rivera, Latin jazz musician and founder of the Latino Student Association, was awarded the Distinguished Hispanic Alumni Award: The Outstanding Community Service Award went to the Hispanic Women's League for its outstanding support of student scholarships. Pedro Rodriguez (pictured) won the Outstanding Professional Service Award for his dedication to Hispanic students as a city campus counselor and a director of PERKINS III, which offers counseling, mentoring, career assessment, personal enrichment workshops, and linkages to campus and community services.

Cesar Diaz, a Puerto Rican educational filmmaker, presented his documentary *We are from Puerto Rico: Narrations from the Unmelting Pot*.

**Latino Student Advancement Conference at Central Michigan**

Advocates for Latino Student Advancement in Michigan Education (ALISME), a coalition that hopes to put Latino students on the "super highway" to education, held its fourth annual Recruitment and Retention Conference at Central Michigan University (CMU) in October.

The conference targets Latino students who are juniors or seniors in high school or enrolled in two- or four-year colleges.

Juan Zamudio, assistant director in academic advising at CMU, worked with the Office of Minority Student Services to bring ALISMe's conference to CMU.

**St. Francis Hosts Hispanic Festival 1999**

St. Francis College (N.Y.), together with Fleet Bank, celebrated hosted Hispanic Festival 1999 in October. Events focused on Hispanic music, dance, art, culture, history, and film.

Dr. Enildo Garcia (pictured), professor of Spanish, foreign languages, fine arts, and international cultural studies at St. Francis, gave a lecture, "Cultures in Contact: The legacy of the U.S. in Cuba in Education, Business, and Law (1899-1902)."

In the art exhibition "Portraits of Chimborazo," Colombian-born photographer Lida Borm captured the strength and beauty of the inhabitants of isolated Chimborazo, Ecuador.
Paid Internships at U.S. Transportation Department

The U.S. Department of Transportation pledged to spend $510,000 on a Hispanic Association of Colleges and Universities (HACU) program designed to reverse an historic shortage of Hispanics in federal workforce ranks.

The funds will provide paid internships next year at the Department of Transportation to top students at HACU-member colleges and universities through the award-winning HACU National Internship Program, which has introduced more than 2,000 students to federal internships and career opportunities since its inception in 1992.

“This pledge represents an important milestone,” said William Rafael Gil (pictured), HACU National Internship Program executive director. “Hispanics remain the only under-represented minority population in federal workforce ranks.”

Southwest Detroit College Program Empowering Latinas

The Southwest Women’s Educational Empowerment Project, a collaborative venture between Madonna University (Mich.) and The Religious of the Sacred Heart, is offering instruction at St. Vincent’s School in Detroit. The project goal is to provide educational opportunities for women, primarily Latinas, in Southwest Detroit.

Pictured here, Delia Garcia (standing), employee resources, Mexican Industries. addresses (l. to r.) Clancy Jackson, Latino Family Services; Lydia Hryzodub, Latino Family Services; and the Rev. Don Hanchon, pastor of Holy Redeemer and coordinator of the Hispanic Pastoral Plan for the Archdiocese of Detroit.

Human Rights and Press Freedom in Latin America Explored at Michigan State

Journalists, human rights activists, academic experts, and students gathered at Michigan State University (MSU) for a two-day international conference to explore the relationship between human rights and press freedom in 21st-century Latin America.

“As Latin America and the Caribbean enter into the 21st century, the new sets of economic, social, and regional perspectives will impose a rapid transformation of the region,” said Manuel Chavez, assistant director of the MSU Center for Latin American and Caribbean Studies. “Human rights and press freedom play a critical role on the stability of the region and in the progress of the new economic alliance of the Americas.”

Long Beach City Awarded Title V Grant

Long Beach City College (Calif.) was awarded a Title V Grant for the Developing Hispanic-Serving Institutions Program. The college currently serves 26,076 students, of which 26 percent are Hispanic.

The grant will allow the college to expand its capacity to serve Hispanic and low-income students through the development of intervention strategies to increase and support student retention and persistence.

The Places of History: Regionalism Revisited in Latin America

Deris Sommer, ed.

Responding to the pressures of current theoretical trends toward models of cultural globalization, the essays—by the most well-known and respected Latin Americanists—collected here bring a historical focus to literary studies. They suggest that only by exploring the particularities of regional historical cultures can the multiple meanings of American identities be understood.

Latina Performance: Traversing the Stage

by Alicia Arrión

This book considers the emergence of a Latina aesthetics developed in the United States but simultaneously linked with Latin America. As dramaticists, performance artists, protagonists, and/or cultural critics, the women examined herein book attention to their own divided position.

The Decolonial Imaginary: Write Chicanas into History

by Emma Pérez

Emma Pérez discusses the historical methodology that has created Chicanas in history. Borrowing from theorists, philosophers of history, and cultural feminist critics, Pérez argues that the Chicanas and Chicanos narrative has often omitted gender. She examines new tools for uncovering the places of Chicanas who have been relegated to silence.

Puerto Rican Women's History: New Perspectives

Félix V. Matos Rodríguez and Lini Delgado, eds.

The first anthology in either English or Spanish dedicated exclusively to essays about Puerto Rican women and gender history. The editors have assembled 11 essays by top scholars writing on...
examine the work of nine Argentinean artists whose iconoclastic production can be seen as finding a common ground in the critical recourse of parody. Designed by Henk van Assen, former assistant professor of design in the University of Texas' Department of Art and History, the catalog was chosen by the American Institute of Graphic Arts as one of the 50 best designed books published in the United States this year.

The World of Túpac Amaru: Conflict, Community, and Identity in Colonial Peru
by Ward Stavig

One of the most significant indigenous uprisings in the Americas, known by the name of its leader, Túpac Amaru, occurred in colonial Peru. The rebellion was one of the most significant events in the history of the Americas, and it is the subject of this book. Ward Stavig examines the issues, values, and themes, central to the lives of ordinary Andean men and women within the Cuzco province, which were the wellspring of the rebellion.

The Knowledge Factory: Dismantling the Corporate University and Creating True Higher Learning
by Stanley Aronowitz

Leagues to community colleges—lacking. Proposing a specific new curriculum that can be put into practice today, Aronowitz offers a vision of a true higher learning that can put a well-rounded education back at the center of the university's mission.

I, Carmelita Tropicana: Performing between Cultures
by Alina Troyano
