Spring 1998 surveys of faculty and students at University of Akron, Community and Technical (C&T) College (Ohio) queried respondents regarding their first-year experience with a faculty academic advising project. Forty of the 72 (55%) full-time C&T faculty responded, and 279 of 400 (70%) student surveys were returned. Faculty findings included: (1) Public Service faculty had the highest response rate (64%) of any division; (2) 45% of surveyed faculty felt neutral or felt they did not have sufficient skills to effectively advise students; (3) 75% of faculty members responding felt they needed more knowledge training; and (4) while the vast majority of faculty believed that students felt positively about having a faculty advisor, 53% were neutral or felt that faculty advising did not have a positive effect on retention. Student findings included: (1) the largest percentage of respondents (28%) were from Public Service, followed by Allied Health (23%); (2) 49% indicated they did not meet with their new faculty advisor, while 45% of respondents said they did; (3) 60% of respondents were positive or neutral when asked whether the faculty advising experience had a positive effect on them. Survey instrument, tabulations of results by question, and 22 figures are included. (PGS)

Faculty Academic Advising:
An Examination
of Students' and Faculty Members' Perception of a First-Year Experience
REPORT: FIRST YEAR’S EXPERIENCE OF FACULTY MEMBERS AS ACADEMIC ADVISORS

FROM: Dr. Gwendolyn Jones

Two different surveys were developed to determine how C&T faculty and students felt about their first year’s experience for Academic Advising. The surveys were distributed in spring, 1998. For the faculty survey distribution, the researcher provided each division chair with surveys to distribute to each faculty in their unit. For the student survey distribution, a total of 400 copies were distributed to the various chairs. The chairs selected, in no particular pattern, individual faculty members to distribute surveys to students. Faculty members had students respond to surveys during a class session, and collected within the same class period.

During spring, 1998 there were a total of 72 full-time faculty members in the Community and Technical College. A total of 40, which represents 55% of the total faculty group, responded to the survey on their first-year’s experience as an academic advisor. For the student surveys, of the 400 copies distributed, a total of 279 responses were collected.

The purpose of the study was as follows:

(1) to determine if C&T faculty members felt that their role as faculty advisors had a positive impact on student retention,
(2) to determine if students had a positive experience from working directly with faculty as academic advisors, and
(3) to provide valuable feedback on benefits and problems associated with the first year’s experience for faculty advising.

Guessing “25” and no response “3”

**Conclusion:**

Data seem to show an uneven distribution of students assigned to each Faculty member. It is not known why such distribution exists.

**Question #2:** Did you attend the pre-advising workshop for Faculty Advising?

Yes 29
No 11

**Conclusion:**

The majority of the Faculty members who responded indicated that they attended the Faculty Advising training workshop. But more than one fourth of those responding did not attend.
A total of forty (40) which represents fifty-five (55%) of the C&T Faculty members responded to the survey. One half did not indicated their division.
C&T College Faculty Survey
Did you attend Pre-Adv.Workshop?

Yes 73%

No 28%
11

Seventy-three percent (73%) of the respondents indicated that they attended the pre-advising workshop.
Question # 3: Did you mail an introductory letter to students informing them that had been assigned as their Faculty Advisor at the beginning of the 1997-98 Academic Year?

Yes 34
No 6

Conclusion:
The vast majority of the Faculty members who responded indicated they mailed an introductory letter to the students. All Faculty members were required to mail such a letter.

Question # 4  What is the approximate number of students you advised?

4 0 0 0 15 20 0 140 15 0 20 0
0 0 0 10

Conclusion:
The majority of the Faculty who responded reported that they had no pattern to the frequency of visits from students on a weekly, monthly, semester or yearly advising. Perhaps the question should have been asked a different way because of the irregular nature of the advising process. It is also not known whether or not students visited the C&T Main Advising office on a regular basis.
C&T College Faculty Survey
Did you write let of intro to stud?

The majority of the C&T faculty members who responded indicated that they had mailed an introductory letter to students. Eighty-five percent (85%) said they mailed a letter while only 15% said they did not.

C&T College Faculty Survey
Able to ans. ques. in a timely manner?

- **Strongly Agree** 23%
- **Agree** 58%
- **Neutral** 10%
- **Disagree** 10%

The vast majority of the respondents felt that they answered C&T student questions on a timely basis. Eighty-one percent (81%) either agreed or strongly agreed while only ten percent (10%) disagreed.
Most of the respondents felt that they meet the needs of evening and week-end students. Twenty-three (23%) percent had no opinion, and 20% disagreed or strongly disagreed.
While 43% agreed or strongly agreed that faculty advising had a positive effect on student retention, thirty-eight percent (38%) had no opinion and, 15% disagreed or strongly disagreed.
A slight majority of the Faculty who responded was negative or neutral (21 of 40 or 53%) about the positive effect on student retention. Seventeen or forty-three percent of the Faculty either agreed or strongly agreed positive effect on retention.

(15) You would strongly support faculty advising, if what (3 most important) issues/problems could be resolved?

Individual Responses are as follows:

Response #1:
- Would not strongly support it.
- Just support it.
- Adequate training.
- Easier access to students files for those in Shrank Hall.
- Access to timely answers of questions.

Response #2:
- Effective Training.
- Someone in charge who knows what’s going on.
- Hire a new staff in C&T advising.

Response #3:
- None

Response #4:
- Knowledge of assigned major.
- Who to contact for answers.
The vast majority (75%) of the respondents either agreed or strongly agreed that if students benefitted from faculty advising it should be continued, 11% disagreed or strongly disagreed, and 13% had no opinion.
Forty-six percent (46%) of the respondents either disagreed or strongly disagreed that faculty advising should be discontinued while 28% had no opinion, and 15% agreed or strongly agreed.
Overall view of students needs.

Response #5:
There have been problems with getting access to students' files.

Response #6:
- Training
- Equal workload.

Response #7:
- Effective training, including release time to participate.
- Clerical support.
- Computer records access. I believe unbridled access to students' records could be a real problem.

Response #8:
- Better preparation; if my area of expertise was advising, then this process would run smoothly.
- More procedural knowledge.
- Less time between presentation of training and actual advising.

Response #9:
- Getting information (ex. Course substitution) to answer advisee questions right when student is in your office.
- Have advising office send out letters
- Have one to two Faculty from one area do advising. Perhaps two so there is a back up.

Response #10:
- No response

Response #11:
- No response

Response #12:
- Continuity between C&T advising, UA advising and department.

Response #13:
- No response

Response #14:
- No response
Response #15:
- Some time and training devoted to it: at the division level —such as part of the division meeting.
- More adequate training
- The issue of how to meet night and weekend students.

Response #16:
- No response.

Response #17:
- I like advising so don’t have any problems.

Response #18:
- Equal load.
- More information.

Response #19:
- Getting the files to me (in another building)

Response #20:
- Logistics RE: files; If I don’t have immediate access to files, I can’t be as responsive as I would like to.
- The “Drop-in” Student.

Response #21:
- N/A

Response #22:
- More training of Faculty
- Contracts should be done by C&T Main Advising Office. To time consuming for Faculty.

Response #23:
- File access.
- Some kind of question and answer sheet covering common problems that arise.

Response #24:
- Students were not sufficiency oriented to new procedures. One letter to them isn’t enough.
- More communication between advising (POL 192) and Faculty. How are we doing? What’s happening in Faculty?

Response #25:
- More time and less outside requirements.
- Advisees must be from my area.
Response #26:
- No response

Response #27:
- Adequate training (paperwork)
- Administrative support (processing the paperwork, secretarial support/staff)

Response #28:
- Remove ######4444 from any interaction. (Staff person at Main C&T advising)(Researcher omitted name)
- See number one
- See number one

Response #29:
- Assign night student's night advisors.
- Train for specific program (Faculty training).
- Division's take responsibility to disseminate updates on a quarterly basis.

Response #30:
- I don't feel that there are sufficient safeguards to prevent misuse of the tremendous amount of sensitive material available through our computers.

Response #31:
- Improved file transfer.
- Better communication and agreement within Faculty advising-same program.
- Reorganization of time required to do a good job.

Response #32:
- Better support from the Main Advising Office.
- Better system to obtain students records from Main Advising Office.

Response #33:
- We could get files from advising when requested.
- We could get timely answers to questions from full time ADVISING STAFF.
- We had better training.

Response #34:
- No response
Response #35:
- More sessions devoted to orientation on advising.
- Access to full-time advising support.
- Uniform decision as to what can be substituted in general studies area.
- Agenda as to how to do it and what can we do to help retained advisee as students in the following semester.
- Advise only those majors we teach.

Response #36:
- No response.

Response #37:
- Need more training on knowledge.

Response #38:
- No response

Response #39:
- Advising on top of a regularly class load is asking too much of Faculty.
- I think it's advisable to have one Faculty in each program area trained to do advising for all students in that area.

Response #40:
- Secretarial Support.

CONCLUSION:

1. Training was the most responded to area.
2. Access to files-especial in another building (Shrank Hall North).
3. More secretarial and administration support from a particular area.
4. Assigning key Faculty and train as advisors.
5. A more timely response to files retrieval
6. Merit and Faculty reward system.
7. Hiring more C&T advising staff.
8. Night and evening advisors needed.
9. Better communication with advising office and Main Advising.
10. A method to provide uniform decision on course substitutions.
11. Students not properly oriented on procedures.
12. More emphasis placed on advising at the division level.
13. Too much to request of Faculty.
14. Student contracts should be handled exclusively from Main Advising Office.
15. More contact and communication to students regarding the advising process

(16) You believe that Faculty Advising in the C&T College was a benefit to C&T students. What are the three-(3) top benefits you feel were achieved

1. • No response.

2. • Students could be knowledgeable.
   • Advised by someone who knows his or her program.

3. • No response.

4. • Closer to students' problems.
   • It is an integral part of what Faculty should be doing.

5. • Closer contact with students.

6. • Closer contact with students outside of the classroom.
   • I learned more about the administration of the career offerings, programs, etc.

7. • No response

8. • Cannot answer number fifteen and sixteen as I had only four(4) students see me all year.

9. • Keep students on tract
   • Build relationships
   • Student and Faculty rapport established.

10. • Personal contract with Faculty member in their program.

11.
12. They see the same person every time.

13. Individual attention to the student with someone that they are comfortable with.

14. Some students like it.
   Get to know.

15. N/A

16. Once the student knows who the advisor is and they establish a working relationship, the student should be in good shape.
   Retention involves much more than the student and advisor relationship. Students drop out due to personal issues or failure to achieve academically. Advisors have little impact on these issues.
   The remedial programs are somewhat helpful, but many students are beyond remediation. The University has an aggressive Open Admission Program and we end up with some students who are not capable of making it and who are problematic in the classroom environment. Advising won’t change this.

17. Student know me
   Accurate information
   Support from Main Advising helped me to do a good job.

18. I found out what students' problems were and how poorly advised they’re been lack, of adequate placement of students- it has been “instructive” not burdensome, but I doubt it has been more or less effective with retention.
   I think every advisee should be required to meet with an advisor perhaps each Faculty should schedule three times each semester that ALL STUDENTS MUST ATTENDED ONE to encourage students.

   Availability to students before and after class.
• Continuity of advice to all students.

20.  
• No response.

21.  
• Positive influence on students.
• Linking of students with Faculty members.

22.  
• Special attention to advisee.
• Increased program awareness of Faculty Advisors.

23.  
• Students dealt less with staff in advising,
• See number one
• We know more about individual course content in our major.

24.  
• Contact with a Faculty member who knows the program the students is in.

25.  
• Met with person in their area.
• More readily available.

26.  
• No Response

27.  
• Can’t answer yet.

28.  
• Personal contact.
• Follow up.
• Personal touch.

29.  
• Student satisfaction.
• Support communication.

30.  
• No Response.
31. Students can discuss classes with someone who is familiar with the course and program.

32. Faculty in better communication with the students.
   - Showing that Faculty cares.

33. Next term schedule.
   - Tentative plan to graduate.
   - Meeting with students.

34. Faculty-students work together as a team.
   - Students are shuffled to a bureaucracy- much more personal.
   - Faculty know their program much better than the advisors, as well as they are more able to assess the students' abilities and goals.

35. Communication
   - Personal contact
   - Instant feedback

36. Students had greater access to an advisor.
   - Greater student and faculty interaction
   - Students had a high level of dissatisfaction with the previous system.

37. No Response.

38. Personal contact with students
   - Proper advising in technical areas
   - Chance to discuss career options with students

39. Close contact with students.

40. Since I do not believe this I can't respond.
Conclusion:
1. There is closer contact with students.
2. It is what the Faculty should be doing.
3. Faculty are more knowledgeable in programs, curriculum.
4. The students see the same Advisor (familiarity).
5. Faculty Advising can't correct problematic students.
6. Discovered that students have been previously ill advised.
7. Faculty should be required to schedule more appointments.
8. Faculty are familiarly with programs.
9. Personal touch and showing that Faculty care.
10. Enhanced student and teacher interaction.
Part II. Results of C&T Student Survey

A total of 400 surveys were distributed to students in the C&T College. C&T Faculty from each of the divisions within the college distributed the surveys. A total of 279 (70%) surveys were returned.

(See appendix for a copy of actual survey)

Below is a breakdown of the number of respondents by division.

Conclusion:
Most of the respondents indicated that they were day and full time students, rather than evening and part time. The total number will not equal 279 since some answered twice and some did not. Each should have answered twice and so responses should add up to 558 but do not. The best solution would have been to ask different questions; one for part-time or full-time status, another for day or evening student.

Conclusion:
The majority of the comments for problems had to do with Faculty availability, including failure to return phone calls, and not allowing enough time to advise (rushed). Other comments include Faculty members advising who did not know needed information, and respondents indicated that they never received letter of introduction. Another major finding was that many of the respondents indicated they never met an advisor.
RECOMMENDATIONS ON HOW TO IMPROVE
THE QUALITY OF
FACULTY ADVISING IN THE
COMMUNITY AND TECHNICAL COLLEGE
SPRING, 1998

The following recommendations are based, in part, upon results received from
two different surveys: 1) Survey on First Year Faculty Advising Experience by
Faculty Members, and 2) Survey on First Year Faculty Advising Experience by
Students. In addition, personal observations and discussions with various
faculty members were also used to develop the following recommendations:

Recommendation one: Develop a plan to enhance the quality and accessibility
of Faculty Advising including development of C&T College policy statements to
address issues such as:

- What are the advising goals for each academic Division?
- When and how an advisor is assigned.
- When advising is required
- When it is recommended
- Procedures for feedback from students on quality and accessibility of
  academic advising
- What are the strengths and weaknesses of academic advising for each
  Division?

Recommendation two: Require that each academic division modify its annual
review/merit pay process to include assessment of advising as an essential
part of faculty evaluation.

Recommendation three: Devise a plan to equalize the total number of advisee
assigned each faculty for all divisions. Determine the minimum, maximum, and
average number of advisees per faculty member.

Recommendation four: Strengthen the communication process between C&T
faculty and students. More involvement and contact should be made with
students. One letter of introduction should not be only source of required
communication to students.

Recommendation five: Seek input from all C&T faculty members on how to best
strengthen the Faculty Advising Program. That is, should all faculty member
act as faculty advisors? Should select individuals from different
department advise?
Recommendation six: Develop an effective method for file retrieval to assist C&T faculty members outside of the Polsky Building (Shrank Hall South).

Recommendation seven: Continue to work with the Main C&T Advising Office for input and assistance in the academic advising process.

Recommendation eight: Consider adding additional staff in the Main C&T Academic Advising Office.

Recommendation nine: Develop Student Focus Groups representing each C&T academic division for the purpose of gathering information regarding all issues related to Student Retention including faculty advising.

Recommendation ten: Replicate a follow-up study after the second year of faculty advising to determine if faculty advising had a positive effect on student retention.

Recommendation eleven: Compare the results of this study to another two-year college for their first year's experience on faculty advising to determine if the results are similar.

Recommendation twelve: Conduct continuous optional training on advising for faculty who need additional help.
