This reference grammar is written for speakers of English who are learning Swahili. Because many language learners are not familiar with the grammatical terminology, this book explains the basic terminology and concepts of English grammar that are necessary for understanding the grammar of Swahili. It assumes no formal knowledge of English grammar and is written in very simple language. This book is designed to be used as a supplement to other Swahili language textbooks, and provides more extensive explanations of the grammar lessons presented in textbooks. The manual is arranged by topic to help learners locate information easily. The book is organized in 55 chapters with a section for each part of speech: nouns, pronouns, adjectives, verbs, adverbs, conjunctions, and prepositions. There are also sections for sentences and miscellaneous. References appear in footnotes throughout the text. Contains a glossary, an index, and an answer key. (KFT)

African Language Learners’ Reference Grammar Series

The *African Language Learners’ Reference Grammar Series* is written for speakers of English who are learning African languages. Since many language learners are not familiar with grammatical terminology used in their textbooks, the books in this series seek to explain the basic terminology and concepts of English grammar that are necessary for understanding the grammar of an African language. The primary objective of the *African Language Learners’ Reference Grammar Series* is to provide language learners with grammar books that will supplement their textbooks. These books are not intended to replace a textbook. The books in the series assume no formal knowledge of English grammar and are written in easy to understand language.

Interested parties may contact the National African Language Resource Center (NALRC) about the possibility of working with the Center to publish a similar grammar book for their respective languages. Manuscripts are subject to external review and must follow the theoretical framework established for the series.

A series such as this depends on the vision, good will and labor of many. Special appreciation is extended to the U.S. Department of Education’s IEGPS (International and Education and Graduate Programs Service), the NALRC staff members, the NALRC’s Field Advisory, National Advisory, and Local Advisory Boards, and the University of Wisconsin-Madison College of Letters and Science, especially Jane Tylus (Associate Dean for the Arts and Humanities) and Phillip Certain (Dean of the College of Letters and Science), as well as various individuals who support the efforts of the
NALRC. Without the support, advice and assistance of all, the *African Language Learners' Reference Grammar Series* would not have become a reality.

Antonia Folárin Schleicher  
Series General Editor
FOREWORD

This monograph is a pedagogical grammar of Swahili that is well illustrated and exhaustive both in the wide range of phenomena considered and examples provided. The book provides the grammar of Swahili in such a way that the novice and the advanced student will constantly find recourse to read and revisit the contents of the book at various points of their study.

The oft remarked elegance of the Swahili language will be appreciated even by those whose need is not to speak Swahili but merely to understand the workings of its grammar components. Crucial notions concerning nouns, verbs and adjectives and the way these categories relate to one another are clearly laid out so that no knowledge of linguistics and teaching methodology is assumed or expected. The book is organized in a way that makes it good for both quick and detailed referencing. It follows the fundamentals of good pedagogical grammars in that it is written with careful attention to detail matched with simplicity of explanation. The end result is that the learner will now be equipped with the fundamentals of how the Swahili language is constituted. Grammar remains an important component in second language learning in spite of much commentary to the contrary. This grammar, being a work of considerable quality, supports a teaching philosophy that places a premium on learner autonomy. Instead of students relying on teachers, teachers evolve to become facilitators and mentors of the learning process. This book will particularly aid our diverse teaching personnel who may be presently apprehensive about teaching grammar or integrating it into their lesson plans.

This grammar, being the inaugural volume in the African Language Learners' Reference Grammar Series, is sure to serve as a model for the upcoming ones. The first of its kind for
Swahili, this book should be a delight to those of us who champion the nurturing of learner engagement and learner initiative as some of the necessary elements towards lifelong learning. This book is a milestone for the field of African language learning and teaching and will hopefully be met with the applause it deserves. The book *Swahili Learners' Reference Grammar* is testament to the excellent work being accomplished by the National African Language Resource Center (NALRC) at the University of Wisconsin-Madison. The field owes many thanks to the authors and to the NALRC.

John Mugane  
President-Elect, African Language Teachers Association (ALTA)  
Assistant Professor of Linguistics  
Ohio University, Athens, Ohio  
January 2001
ABOUT THE AUTHORS

Antonia Yétúndé Folárín Schleicher is a Professor of African Languages and Linguistics at the University of Wisconsin-Madison. She is also the Director of National African Language Resource Center (NALRC), funded by the Department of Education. She currently teaches courses such as Yoruba language and culture, African linguistics, second language acquisition, with specific reference to African languages, and a culture course on Yoruba life and civilization. She is experienced in developing both textual and technology materials for learning African languages. She is the author of three textbooks and two CD-ROMs for teaching and learning Yoruba. These textbooks and CD-ROMs are now used as models for developing other Less Commonly Taught Language (LCTL) materials. She has also co-authored a book with Professor Lioba Moshi, titled “African Language Pedagogy: An Emerging Field.” She is currently co-authoring a book on “Guidelines for Developing African Language Textbooks.” Professor Schleicher has organized different national workshops on how to develop materials for African languages and LCTLs in general. She is familiar with how different language acquisition theories can impact the development of textbooks for learning and teaching languages.

She is the Immediate Past-President of the African Language Teachers Association (ALTA), the President-Elect of the National Council of Organizations of Less Commonly Taught Languages (NCOLCTL), and an Executive Board Member of the UW-Madison Teaching Academy.

Katrina Daly Thompson is a doctoral student in the Department of African Languages and Literature at the UW-Madison. A student of both Shona and Swahili, she completed her M.A. degree in 1999 with a thesis entitled
"The Translator as Trickster: How A Grain of Wheat becomes Tsanga Yembeu." In 1999 she spent seven weeks in Tanzania studying advanced Swahili as a fellow on the Fulbright Hayes Group Project Abroad, and in 2001 she will spend nine months doing research in Zimbabwe. Her research and teaching interests include Shona and Swahili languages and cultures, African popular cultures, post-colonial literatures and translation theory and practice. Katrina spent July 2000 studying technology and language teaching at Middlebury College with a grant from the Mellon Foundation. She is currently working on a dissertation on Shona film and television.

PREFACE

The *Swahili Learners' Reference Grammar* is written for speakers of English who are learning Swahili. Since many language learners are not familiar with grammatical terminology used in their textbooks, this book explains the basic terminology and concepts of English grammar that are necessary for understanding the grammar of Swahili. It assumes no formal knowledge of English grammar and is written in very simple language.

The primary objective of the *Swahili Learners' Reference Grammar* is to provide Swahili learners with a grammar book that will supplement their textbooks. It is not intended to replace a Swahili textbook. Occasionally, learners need more extensive explanations of the structures presented in their textbooks. This manual provides such additional detail. The grammar is arranged by topic to help learners locate information easily. For example, information on nouns can be found in Chapters 1-5.

The following are the design features of the *Swahili Learners' Reference Grammar*:

1. The organizational design is built around the basic word order of a Swahili sentence. The bulk of the manual focuses on nouns, pronouns, adjectives, verbs, adverbs, and objects. The text also includes various types of work with compound and complex sentences and with several other topics.

2. The grammar book presents the underlying structure of Swahili in a coherent and orderly manner.

3. The resources in this manual are built on a framework of explanations, examples, and short reviews. Each chapter is a self-contained discussion of a particular grammar topic.
brief definition of the grammar topic is followed by an explanation and examples of the way the grammatical construction is used in English. Then a parallel section illustrates the use of the same grammar point in Swahili, step by step, using sample sentences translated from Swahili into English.

4. It is assumed that the study of grammar should be tied to the real needs of learners both to help them better understand course materials and to expand their accuracy and fluency in Swahili.

5. The presentation of individual grammar items is tied to the larger context of the basic structure of Swahili. For example, the meanings of individual tenses are presented within the framework of the verb system.

6. The materials in this manual include the study of processes as well as particular grammatical items. For example, compounding, as well as the present tense particle, are covered in the section on VERBS.
TO THE LEARNERS

The *Swahili Learners’ Reference Grammar* is written to help you understand the basic grammatical terms that you may not be familiar with in your Swahili textbook. It is hoped that this manual will not only help you to acquire grammatical competency in Swahili, but also in English. Knowing the grammar of any language you are learning is very important because it allows you to express your thoughts and intentions in a way that is acceptable to native speakers. Many times, grammar mistakes can make your speaking and writing difficult to understand. In Swahili, an example in which grammar affects meaning directly is if you use a past tense marker “li” instead of a future tense marker “ta” when describing to a friend your plans for the future.

The table of contents and the index are provided to help you to locate the grammatical terms and concepts that you want to understand in greater detail. Remember to use both the TABLE OF CONTENTS and the INDEX on a regular basis.

Make sure you understand the explanations and the examples provided both in English and in Swahili. Whenever a REVIEW is provided, remember to do it to assess your knowledge of the grammatical terms you are learning. If your answers do not match the ANSWER KEY, make sure you review the section before you move on to another section.

Below are some strategies that can help you to learn the grammar of Swahili in a more effective manner:

1. **Be on the lookout for patterns:** Don’t wait for your instructor or others to point out a pattern; look for it yourself. Sometimes the patterns that you can recognize yourself will be more helpful than those given in your textbook or presented in this manual, because they are
organized in ways that are clearer to you. If you uncover the patterns yourself, it will be easier to remember and follow them.

2. **Learn the rules**: Make sure you understand how a particular rule works. This will reduce the amount of memorization you will need to do.

3. **Organize**: After you have constructed your own grammar tables in the way that makes the most sense to you, make sure you review them and add any new information that you acquire. For example, you can make a table of Swahili noun classes, tenses, or negative tenses. Each time you learn a new word that belongs to a particular category you have set up, enter it in your table. This is especially important if the word is an exception to a rule and needs special attention.

4. **Experiment**: Try to experiment with rules because most grammar rules have boundaries that you need to discover by yourself to avoid mistakes. The way to find the boundaries is to keep applying a rule until you discover that it no longer works. For example, in Swahili you cannot always apply agreement rules simply according to what class a word is in:

   - **kitabu/vitabu** (class 7/8):
     - Kitabu *kinapotea*.
     - Vitabu *vinapotea*.

   - **kiongozi/viongozi** (class 7/8):
     - Kiongozi *anaenda*.
     - Viongozi *wanae*
     (use class ½ agreements)
5. **Work towards mastery when doing grammar exercises:** When doing oral grammar exercises in class, at home, or in the language lab, carefully focus on the grammar. At this point, every one of the teacher's corrections or the correct responses on tape should be accurately repeated. Many learners habitually listen passively to the teacher's corrections or the models on tape without repeating the correct form. Avoid falling into this bad habit, as it is only by repeating the corrected version that you give yourself an opportunity to learn it. When working on a grammar point, strive to be 100% correct. In this way, when your attention is diverted to other considerations, you will be more likely to recall the correct form.

6. **Avoid repeated errors:** Try to understand why you consistently make a certain kind of error. Is it because you are not clear about the rule? Or is it that you have totally misunderstood the rule? Or could it be that you have not learned the rule boundaries—that is, its exceptions? You can avoid making the same mistake by checking your textbook, this manual, or by asking your teacher for an explanation or clarification.

7. **Note whether additional work has any effect on your performance:** Sometimes extra practice—such as doing grammar drills—may not improve your speaking accuracy. However, using language in real-life situations may be very beneficial. The amount of time spent on an activity may not be as important as finding and using the type of activity that helps your learning.

8. **Be patient:** There is no language that is grammar-free, although some languages have more complex grammatical systems than others. It is impossible to learn, much less remember, all the rules in a limited period of time. It will take some time before you will be able to speak and write
without grammatical errors. Work on your grammar diligently but patiently. Learning one rule at a time, practicing often and doing frequent reviews are good learning principles.
ACKNOWLEDGMENTS

We would like to acknowledge our appreciation for the support of the National African Language Resource Center (NALRC) through funds from the Department of Education, Grant # P229A990001, which provided the financial support for the preparation of this book. Without such support, this book would not have been possible. Our grateful appreciation is also extended to the following people who have contributed one way or the other towards making this project possible: Magdalena Hauner, Anne Lewinson, Zeynab Shaaban, Himid Ali, Abdulswammad Ali, Ammar Ali, Assim Ali, Hud Ali, and Hilda Kokuhirwa.

We are greatly indebted to all the Swahili language scholars, such as Alwiya Omar, John Inniss, John Mugane, and F.E.M.K. Senkoro, who took time out from their busy schedules to review, in various stages of development, some or all the chapters of this book and provided valuable suggestions that helped in shaping the final draft of this book. We, however, assume full responsibility for any errors in this book.

Words are inadequate to express our thanks to Kristi Hobson and Karin Gleisner, who served as editor and assistant editor for this project. Both Kristi and Karin spent a great deal of time, not only making sure that some of the Swahili examples were accurate but also assisting with the overall organization of the book. Our thanks also go to Amadou Fofana, who helped to read through the first draft to be sure that it followed the intended organizational structure.

This book is dedicated to Charles, Carla, Anthony and the UW-Madison Fall 2000 Swahili students.
INTRODUCTION

Learning Swahili, like learning any foreign language, requires that you look at each word in terms of its part of speech, its meanings, and its function. This book is designed to help you understand the part of speech, the meaning and the function of the Swahili forms that you will be learning.

1. Part of speech
Words are grouped by types and each type is called a part of speech. Here is a list of the nine different parts of speech used in English:

<table>
<thead>
<tr>
<th>Noun</th>
<th>Article</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pronoun</td>
<td>Conjunction</td>
</tr>
<tr>
<td>Verb</td>
<td>Preposition</td>
</tr>
<tr>
<td>Adverb</td>
<td>Interjection</td>
</tr>
<tr>
<td>Adjective</td>
<td></td>
</tr>
</tbody>
</table>

Each part of speech has its own rules. You must learn to identify the part of speech for each word so that you will know which rules to apply. Understanding the rules for each part of speech will help you understand the function and relationship of the words in both English and Swahili sentences.

Look at how the word love functions in the sentences that follow:

The boys love to play soccer.

| verb |

The boys love to play soccer.
My love for you is great.

noun

Charles wrote Rosa a love letter.

adjective

The English word love is the same in all three sentences, but in Swahili different words will be used for the verb, the noun and the adjective.

2. Meaning

An English word must be connected with a Swahili word that has an equivalent meaning. For example, the word water, in English, has the same basic meaning as the Swahili word maji.

The best way to learn words with equivalent meanings is to memorize the words. However, there are some English words that are borrowed into Swahili. These kinds of words are easier to learn because they are very close to the English counterparts. Some examples include:

<table>
<thead>
<tr>
<th>ENGLISH</th>
<th>SWAHILI</th>
</tr>
</thead>
<tbody>
<tr>
<td>motorcar</td>
<td>motokaa</td>
</tr>
<tr>
<td>America</td>
<td>Amerika</td>
</tr>
<tr>
<td>office</td>
<td>ofisi</td>
</tr>
<tr>
<td>soccer</td>
<td>soka</td>
</tr>
</tbody>
</table>

Sometimes, if you know one Swahili word it can help you to learn another. For example knowing that the Swahili word kití means chair should help you to learn that mwenyekiti means chairperson. Similarly, knowing that kuzungumza means to converse will help you to learn that mazungumzo means conversation.
For the most part, there is little or no similarity between words, and knowing one Swahili word will not help you learn another. As a general rule, such words must be memorized separately. For example, knowing that bibi means *grandmother* will not help you to learn that babu is *grandfather*.

In addition, there are some combinations of words that take on a special meaning. Such words are referred to as *idioms*. Idioms are usually unique to each language. For example, in Swahili, *kuenda* means *to go*, while *wazimu* means *spirits*. However, *kuenda wazimu* means *to go crazy*. You need to pay special attention to these kinds of idiomatic expressions so that you can use them appropriately.

### 3. Function

A word must be identified according to the function it performs in the sentence. Each word, whether in English or in Swahili, serves a unique function in the sentence. Determining this function will help you to find the proper Swahili equivalent.

Look at how the word *her* functions in the sentences that follow:

- *We went to visit her.*
  - direct object
- *Her dress is new.*
  - adjective
In English the word *her* is the same in both sentences, but in Swahili two different words, each following a different set of rules, must be used because the word *her* has two different functions.

While studying Swahili, you must learn to recognize the part of speech, the meaning, and the function of each word within a sentence.

**TAKE NOTE**

Since you already know English, this book will show you how to identify parts of speech in English. You will then learn to compare and contrast English and Swahili constructions. This will give you a better understanding of the explanations you receive in class or find in your Swahili textbook.
NOUNS
A noun is a word that signifies a person, animal, place, thing, event or idea. For example:

- a person: teacher, student, nurse, doctor, grandmother, Mr., Sheriff
- an animal: dog, cow, bull, lion, bird, hyena, elephant
- a place: house, school, city, state, country, continent, island, Tanzania, Kenya, Mecca
- a thing: book, shirt, computer, drum, veil, dish, food
- an event or activity: birth, death, marriage, graduation, soccer, sleep, the Olympics
- an idea or concept: freedom, wealth, love, power, beauty, history, Organization of African Unity

As you can see, a noun can name something tangible (i.e. that you can touch), such as glass, coffee, and grandmother, or it can name something abstract, such as racism, music, and courage.
There are two types of nouns, common and proper. A noun that refers to any person, animal, place, thing, event or idea that is not specific is called a **common noun**. A common noun never begins with a capital letter unless it is the first word in a sentence. All the words above that begin with a lower-case letter are common nouns. A noun that names a particular place, animal, place, thing, event or idea is a **proper noun**. A proper noun is always capitalized. All the capitalized words above are examples of proper nouns.

Shakila is a **student**.

\begin{center}
\begin{tabular}{c|c}
proper & common \\
noun & noun \\
\end{tabular}
\end{center}

A noun that is made up of two words is a **compound noun**. A compound noun can be made of two common nouns, such as *trade unions* and *mother tongue*, or two proper nouns, such as *East Africa*.

**IN ENGLISH**

To train yourself to recognize nouns, read the following paragraph where the nouns are in italics.

*Swahili* is spoken extensively in *Tanzania*, *Kenya* and *Uganda*. Along the *coast of Kenya* and *Tanzania*, and on the *islands near their coasts*, it is the first *language* of many *people*. *Others* speak it as a second *language*, not only in these three *countries* but also in the *Democratic Republic of the Congo*, *Zambia*, *Malawi*, *Mozambique*, and even *Saudi Arabia*.
KWA KISWAHILI

A noun is called jina or nomino. The plural, nouns, are majina or nomino. Swahili nouns are identified in the same way as they are in English; that is, they can signify people, animals, places, things, events or ideas. Study the following examples:

- **a person**
  - fundi (craftsperson), askari (soldier), kipofu (blind person), Mkristo (Christian), Profesa Senkoro (Professor Senkoro)
- **an animal**
  - chui (leopard), swala (antelope), kobe (turtle), mbu (mosquito), panya (rat)
- **a place**
  - chuo kikuu (university), msikiti (mosque), shamba (field), eneo (space), Unguja (Zanzibar), Msumbiji (Mozambique)
- **a thing**
  - pipi (candy), zawadi (gift), kitambaa (cloth), kalamu (pen), mkono (hand)
- **an event**
  - arusi (wedding), sherehe (party), kushona (sewing), mchezo (game), safari (journey)
- **an idea**
  - falsafa (philosophy), hesabu (math), ushirika (cooperation), elimu (education), uhuru (revolution)
A common noun is called nomino ya jumla or nomino ya jamii and a proper noun is nomino kamili or nomino ya pekee. A compound noun is called nomino ambatani.

Shakila ni mwanafunzi.
Shakila is (a) student.

proper noun   common noun

To train yourself to recognize nouns, read the following paragraph (followed by its English translation) where nouns are in italics.

(The Institute of Swahili and Foreign Languages is on the island of Zanzibar, in the city of Zanzibar. Zanzibar has many people of various backgrounds: Africans, Arabs, Indians, Chinese and others. Many foreigners travel to Zanzibar to study at the Institute. They can study Swahili, Arabic, and other African and world languages. It is a very good school.)
TERMS USED TO TALK ABOUT NOUNS

- **NUMBER** – A noun has a number. It can be classified as singular or plural.

- **GENDER/CLASS** – Every Swahili noun is associated with one of eighteen classes. English nouns have only three classes, usually known as gender; the classes are masculine, feminine and neuter. Swahili nouns do not differentiate in terms of masculine, feminine and neuter genders.

- **COUNT OR NON-COUNT** – A noun can be classified as to whether it is a count or non-count noun; that is, whether it refers to something that can be counted or not.

- **FUNCTION** – A noun can have two different functions in a sentence; that is, it can be the subject of the sentence or an object.

---

**REVIEW**

Circle the nouns in the following sentences.

1. I marked the date of the party on the calendar.
2. Lulu broke her leg while riding her bicycle to Dodoma.
3. The film we saw yesterday disturbed me.
4. A woman’s beauty is her personality, not her appearance.
5. Dar es Salaam is a city the President has always wanted to visit.
Chapter 2
ARTICLES

An article is a word placed before a noun to show whether the noun refers to a specific person, animal, place, thing, event or idea, or to a nonspecific person, animal, place, thing, event or idea.

- a specific piece of cloth
  - She wrapped the piece of cloth around her shoulders.
  - She wrapped a piece of cloth around her head.
- a nonspecific piece of cloth

IN ENGLISH
There are two types of articles, definite articles and indefinite articles. A definite article is used before a noun referring to a specific person, place, animal, thing or idea. There is one definite article, the.

- He stole the books from me.
  - some specific books

An indefinite article is used before a noun referring to a non-specific person, animal, place, thing, event or idea. There are two indefinite articles, a and an. A is used when the noun it precedes begins with a consonant.

- I bought a dress.
  - not a specific dress
An is used when the noun it precedes begins with a vowel (a, e, i, o, or u).

Zuhura peeled an orange.

not a specific orange

Plural nouns that do not refer to someone or something specific are used without an article.

Kezilahabi writes novels.

not specific novels

KWA KISWAHILI
The grammatical term for articles is vibainishi, but there are no articles in Swahili. When you translate a sentence into English, articles, if appropriate, must be added. Your knowledge of English and the meaning of the sentence will help you to add the article which best fits the sentence’s meaning. For example, the following Swahili sentences can each be translated in two ways:

Mtoto ataenda shuleni.
A child will go to school.
The child will go to school.

Watoto wataenda shuleni.
Children will go to school.
The children will go to school.

Even though there are no articles in Swahili, you need to be aware of their use in English. Sometimes you will use demonstrative adjectives to approximate the function of articles. For example:
Watoto hawa wataenda shuleni.
These children will go to school.

You will learn more about demonstrative adjectives in Chapter 18.

REVIEW

Using the word for word translations of Swahili sentences into English, write complete English sentences. You will need to add the appropriate articles.

1. Mwanafunzi alisoma kitabu.
   student read book

2. Mwandishi anakaa huko bara.
   writer lives (there on) mainland

3. Mtoto atakula chungwa na mkate.
   child will eat orange and bread
CHAPTER 3
NOUN CLASS

A noun class is a set of nouns in a language that shows the same patterns of word or a set of nouns that shows the same system of agreements between different parts of speech.

Swahili, like any other Bantu language, has a well-defined noun class system. Swahili nouns can be classified as Class 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, or 18. Class 12 is extremely rare in Swahili, and Class 13 does not exist. Below is an example of a Swahili sentence that illustrates how the class system works.

Alikiona kitabu changu mezani wild iliyopita.

He saw it book my on the week that which passed table

(He saw my book on the table last week.)

Number in the grammatical sense means that a word can be classified as singular or plural. When a noun refers to one person, animal, thing, place, or event, it is called singular. When it refers to more than one, it is called plural.

one cup

| singular |

two cups

| plural |
More parts of speech indicate number in Swahili than in English and there are more spelling and pronunciation changes in Swahili than in English.

<table>
<thead>
<tr>
<th>ENGLISH</th>
<th>SWAHILI</th>
</tr>
</thead>
<tbody>
<tr>
<td>nouns</td>
<td>nouns nomino/majina</td>
</tr>
<tr>
<td>verbs</td>
<td>verbs vitenzi</td>

<tr>
<td>pronouns</td>
<td>pronouns viwakilishi nomino</td>
</tr>
<tr>
<td></td>
<td>adjectives vivumishi</td>
</tr>
<tr>
<td></td>
<td>relative constructions virejeshi</td>
</tr>
</tbody>
</table>

Since each part of speech follows its own rules to indicate number, you will find number discussed in the chapters on relative constructions, adjectives, pronouns, and verbs. This chapter will only explain the number of nouns.

**IN ENGLISH**

English is usually not regarded as a class language, but there are some examples in English that can illustrate how nouns in different classes behave. For example, consider pluralization in English:

<table>
<thead>
<tr>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>cat</td>
<td>cats</td>
</tr>
<tr>
<td>house</td>
<td>houses</td>
</tr>
<tr>
<td>dress</td>
<td>dresses</td>
</tr>
<tr>
<td>farmer</td>
<td>farmers</td>
</tr>
<tr>
<td>pencil</td>
<td>pencils</td>
</tr>
<tr>
<td>church</td>
<td>churches</td>
</tr>
</tbody>
</table>
All these nouns form their plural the same way, by adding *s* or *es*. Therefore, these nouns and others like them can be said to be in the same noun class. Now consider these words:

- sheep
- deer

These do not change in the plural. They belong to another noun class. Other examples are:

- mouse
- louse
- goose
- foot
- tooth
- man

- mice
- lice
- geese
- feet
- teeth
- men

The above examples form yet another noun class, one that changes the vowel “inside” the noun to make it plural.

Notice that these noun classes in English are no longer called noun classes. They are called “regular” and “irregular” nouns. All the nouns that take ‘s’ are called regular nouns, while those that do not take s are called irregular nouns. This is because, in English, only the ‘s’ plural class can have new words added to it. When a class can get new words, it is called “productive”. In English plural formation, there are many noun classes, but only one is productive (hence they are called “regular”, while other noun classes are not productive, hence they are called “irregular”).
Some nouns, called collective nouns, refer to a group of persons or things, but the noun itself is considered singular.

The soccer team is doing well this season.
The family is moving to Iringa.
The committee has a difficult decision to make.

KWA KISWAHILI
The word for grammatical number is namba. When used to refer to nouns it is called namba ya jina. A singular noun is called jina la umoja and a plural noun is jina la wingi. As in English, the plural form of a Swahili noun is usually spelled differently than the singular. Every noun belongs to a noun class, and each class of nouns has its own rules for forming the singular and the plural. There are sixteen classes (1-11 and 14-18). For most noun classes (1-11), the odd numbers denote the singular and the even numbers denote the plural.

<table>
<thead>
<tr>
<th>CLASS</th>
<th>SINGULAR</th>
<th>PLURAL</th>
<th>CLASS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>mtu (person)</td>
<td>watu (people)</td>
<td>2</td>
</tr>
<tr>
<td>3</td>
<td>mti (tree)</td>
<td>miti (trees)</td>
<td>4</td>
</tr>
<tr>
<td>5</td>
<td>jengo (building)</td>
<td>majengo (buildings)</td>
<td>6</td>
</tr>
<tr>
<td>7</td>
<td>kitabu (book)</td>
<td>vitabu (books)</td>
<td>8</td>
</tr>
<tr>
<td>9</td>
<td>ndege (plane)</td>
<td>ndege (planes)</td>
<td>10</td>
</tr>
<tr>
<td>11</td>
<td>usiku (night)</td>
<td>siku (nights)</td>
<td>10</td>
</tr>
</tbody>
</table>

You can see that each class has a system for forming the plural. You should also note that class 12 is not listed because it is infrequently used and has no regular plural form.
In Swahili, all noun classes are productive, just as in any Noun Class language. Swahili nouns follow rules for grammatical class. The word for class or classes is ngeli.¹ A few generalizations can be made about the kinds of nouns that fall into each of the noun classes. However, there are many exceptions, so you should always memorize the class of each noun in both the singular and plural.

**CLASS 1 ngeli ya kwanza**
Nouns in class 1 are singular, and refer to living things such as people and animals. They usually begin with the nominal prefix m-, but sometimes begin with mw- or, rarely, with mu-. In Swahili a nominal prefix is called kiambishi awali cha jina.

- *mtu (person)*
- *mwalimu (teacher)*
- *muumba (creator)*

Some singular nouns do not belong to class 1, but, because they refer to people and animals, use class 1 agreements in most grammatical contexts.

- *kijana (young person, class 7)*
- *kipofu (blind person, class 7)*
- *paka (cat, class 9)*

You will learn more about how to use class 1 agreements in Chapters 20 (Subject Prefixes) and 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).

Proper nouns that refer to people are also treated as if they were in class 1. Because many Swahili names are words that

---

¹ The word namna (*type or kind*) is also used for grammatical class. See G.W. Broomfield, *Sarufi ya Kiswahili* (London: Sheldon Press, 1931): 40-47.
are also used as common nouns, you might confuse them with the noun of another class. To avoid this mistake, take note if the noun is capitalized, which will indicate that it is a proper noun.

<table>
<thead>
<tr>
<th>COMMON NOUNS</th>
<th>PROPER NOUNS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>juma</strong> (<em>week, class 5</em>)</td>
<td><strong>Juma</strong> (<em>a boy's name, class 1</em>)</td>
</tr>
<tr>
<td><strong>zawadi</strong> (<em>gift, class 9</em>)</td>
<td><strong>Zawadi</strong> (<em>a girl's name, class 1</em>)</td>
</tr>
<tr>
<td><strong>sudi</strong> (<em>luck, class 9</em>)</td>
<td><strong>Sudi</strong> (<em>a boy's name, class 1</em>)</td>
</tr>
</tbody>
</table>

**CLASS 2 ngeli ya pili**

Nouns in class 2 are plural of nouns in class 1, and they refer to living things such as people and animals. They always begin with the nominal prefix *wa-*.

- **watu** (*people*)
- **walimu** (*teachers*)
- **waumba** (*creators*)

Some singular nouns do not belong to class 2, but because they refer to people and animals, they use class 2 agreements in most grammatical contexts.

- **vijana** (*young people, class 8*)
- **vipofu** (*blind people, class 8*)
- **paka** (*cats, class 10*)

You will learn more about how to use class 2 agreements in Chapters 20 (Subject Prefixes) and 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).
CLASS 3 ngeli ya tatu
Nouns in class 3 are singular. They begin with the nominal prefix m-. Almost all singular nouns that refer to plants are in class 3, but many other objects are as well.

mti (tree)           mgomba (banana tree)
mzizi (root)         mradi (project)
mkutano (meeting)

CLASS 4 ngeli ya nne
Nouns in class 4 are the plural of nouns in class 3 and they begin with the nominal prefix mi-. Almost all plural nouns that refer to plants are in class 4, but many other objects are as well.

miti (trees)         migomba (banana trees)
miradi (projects)

CLASS 5 ngeli ya tano
Nouns in class 5 are singular, and usually refer to inanimate objects or abstract ideas. Many class 5 nouns begin with the letters j- or ji-

jicho (eye)           jengo (building)
jiwe (rock)

However, many other class 5 nouns have no recognizable nominal prefix at all.

hitaji (requirement)  duka (shop)
shetani (devil)
There are a few class 5 nouns that refer to people, but in most grammatical contexts these use class 1 agreements (see CLASS 1 above).

**polisi** (*policeman*)  
**daktari** (*doctor*)

You will learn more about how to use class 5 agreements in Chapters 20 (Subject Prefixes), 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).

**CLASS 6 ngeli ya sita**  
Nouns in class 6 are the plurals of nouns in class 5, and they usually refer to inanimate objects or abstract ideas. They always begin with the nominal prefix **ma**-

- **macho** (*eyes*)  
- **majengo** (*buildings*)  
- **maduka** (*shops*)  
- **mawe** (*rocks*)  
- **mashetani** (*devils*)  
- **mahitaji** (*requirements*)

There are a few class 6 nouns that refer to people, but in most grammatical contexts these use class 2 agreements (see CLASS 2 above).

**mapolisi** (*policeman*)  
**madaktari** (*doctor*)

There are also class 6 nouns that have no class 5 equivalents and can be both singular and plural.

- **mazingira** (*environment*)  
- **mashtaka** (*accusations*)  
- **maisha** (*life*)  
- **mazishi** (*funeral*)
You will learn more about how to use class 6 agreements in Chapters 20 (Subject Prefixes), 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).

**CLASS 7 ngeli ya saba**

Nouns in class 7 are singular, and usually refer to inanimate objects, abstract ideas, and languages. They always begin with either ki- or ch-.

- **kitabu** *(book)*
- **kina** *(rhyme)*
- **chakula** *(food)*
- **Kiswahili** *(Swahili)*

There are some class 7 nouns refer to people and take class 1 agreements (see CLASS 1 above).

- **kipofu** *(blind person)*
- **kilema** *(a crippled person)*
- **kifaru** *(rhinoceros)*

You will learn more about how to use class 7 agreements in Chapters 20 (Subject Prefixes), 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).

In some cases, adding the class 7 nominal prefix ki- can be used to make a noun of another class diminutive (smaller).

- **mtoto** *(child)* class 1 ⇒ **kitoto** *(little child)* class 7
- **mbuzi** *(goat)* class 1 ⇒ **kibuzi** *(little goat)* class 7
- **embe** *(mango)* class 5 ⇒ **kiembe** *(little mango)* class 7
CLASS 8 ngeli ya nane
Nouns in class 8 are the plurals of nouns in class 7, and they usually refer to inanimate objects or abstract ideas. They always begin with the nominal prefix vi- or vy-.

**vitabu (books)**
**vyakula (foods)**
**vina (rhymes)**

There are some class 8 nouns that refer to people and take class 2 agreements (see CLASS 2 above).

**vipofu (blind people)**
**vilema (crippled people)**
**vifaru (rhinoceroses)**

You will learn more about when they take class 2 agreements in Chapters 20 (Subject Prefixes), 34 (Objects), and in the series of chapters on adjectives and pronouns (6-20).

CLASS 9 ngeli ya tisa
Nouns in class 9 are singular, with no recognizable nominal prefix. They usually refer to inanimate objects or abstract ideas.

**safari (journey)**
**kazi (work)**

Proper nouns that refer to places are also in class 9.

**Tanzania**
**Amerika (America)**
**Zuhura (the planet Venus)**

Many class 9 nouns are adopted words, words that were adopted from other languages into Swahili. These are called maneno yaliyotoholewa.
kompyuta (computer, from English)
sayari (planet, from Arabic)

Many nouns that refer to animals, and some that refer to people, are in class 9, but in most grammatical contexts they are treated as if they were class 1 (see CLASS 1 above).

simba (lion)  mbwa (dog)
baba (father)

CLASS 10 ngeli ya kumi
Nouns in class 10 are the plurals of nouns in class 9 and class 11, and they have no recognizable nominal prefix. They usually refer to inanimate objects or abstract ideas.

safari (journeys)  kazi (jobs)

Many class 10 nouns are adopted words.

kompyuta (computers, from English)
sayari (planets, from Arabic)

Many nouns that refer to animals, and some that refer to people, are in class 10, but in most grammatical contexts they are treated as if they were class 2 (see CLASS 2 above).

simba (lions)  mbwa (dogs)
baba (fathers)

CLASS 11 ngeli ya kumi na moja
Nouns in class 11 are singular, with the nominal prefix u-. Often they refer to long, thin objects.

ukuta (wall)  ulimi (tongue)
udevu (whisker)
CLASS 14 ngeli ya kumi na nne
Nouns in class 14 are abstract ideas. Although class 14 nouns look like class 11 nouns, you can tell the difference because they only exist in the singular; there is no way to make a class 14 noun plural. They begin with the nominal prefix u-.

uhuru (freedom)    umoja (unity)
ujamaa (socialism)

CLASS 15 ngeli ya kumi na tano
Nouns in class 15 refer to actions. These are verbal nouns, also known as gerunds or infinitives. In Swahili they are known as vitenzijina. They begin with the nominal prefix ku-, also known as an infinitive prefix.

kusoma (studying)    kufanya (doing)
kupeka (biting)

CLASS 16 ngeli ya kumi na sita
Nouns in class 16, 17 and 18 are called locatives because they refer to places. In Swahili they are called majina ya mahali. Class 16 nouns refer to places that are specific or close to the speaker; they can be either singular or plural depending on context.

mahali (place; places)

Almost any noun from any other noun class can be made into a class 16 noun by adding the locative suffix -ni.

nyumba 9/10 (house) ⇒ nyumbani 16 (at the house)

chumba 7 (room) ⇒ chumbani 16 (in the room)
CLASS 17 *ngeli ya kumi na saba*

Nouns in class 17 refer to places that are general or not close to the speaker; they can be either singular or plural depending on context. Almost any noun from any other noun class can be made into a class 17 noun by adding the locative suffix *-ni*.

- *mji* 3 (*city*) ⇒ *mjini* 17 (*in the city*)
- *nchi* 9/10 (*country*) ⇒ *nchini* (*in the country*)

CLASS 18 *ngeli ya kumi na nane*

Nouns in class 18 refer to places that are inside or very close to another object; they can be either singular or plural depending on context. Almost any noun can be made into a class 18 noun by adding the locative suffix *-ni*.

- *mfuko* 3 (*bag*) ⇒ *mfukoni* 18 (*in the bag*)
- *kichwa* 7 (*head*) ⇒ *kichwani* 18 (*on the head*)

As you can see, nouns of class 16, 17 and 18 look the same. The differences between them can be understood by looking for other clues in the sentence.

**TAKE NOTE**

Like English, Swahili has collective nouns, known as *nomino wingi*. Here are a few examples.

- *familia* (*family or families; class 9/10*)
- *kundi* (*group; class 5*)
- *kamati* (*committee(s); class 9/10*)

However, in Swahili the number of these words can be treated in one of two ways.
1. A collective noun may be treated as a singular noun of whatever noun class it belongs.

**Familia** inaenda dukani.
the family it is going to the store
(The family is going to the store.)

**Kundi** linatoa uamuzi wake.
the group it is decision its
announcing
(The group is announcing its decision.)

2. Or a collective noun may be treated as a group of its members.

**Familia** wanaenda pwani.
family they are going to the coast
(The family is going to the coast.)

In this example the phrase the people of is understood but not stated.

**(Watu wa)** **familia** **wanaenda** **pwani.**
(the people of) the family they are going to the coast
(The family is going to the coast.)

Note that these sentences mean the same thing regardless of how the collective noun is used.

As you learn a new noun, you should always learn its class in both the singular and plural, because its class will affect the spelling and pronunciation of words related to it.

Textbooks and dictionaries usually list words only in the singular. Sometimes they indicate the class of a noun with numbers that indicate both its singular and plural.
Other times they indicate the class of the noun by providing the plural or the plural nominal prefix.

mtu (watu) or mtu (wa-)
kifo (vifo) or kifo (vi-)
ukuta (kuta)

REVIEW

A. Read out loud the English and Swahili words below. Indicate whether the word is singular (S) or plural (P).

1. desks S P
2. msichana (girl) S P
3. mitihani (tests) S P
4. mabega (shoulders) S P
5. paka (cats) S P
6. family S P
7. ukubwa (size) S P
8. kitabu (book) S P
B. Identify the class of each of these nouns. If there is more than one possible answer, write all of the possible answers.

a) kilabu (club)

b) walimu (teachers)

c) dirishani (in the window)

d) ndizi (bananas)

e) jicho (eye)

f) uso (face)

g) miji (cities)

h) sahani (dish)

i) maji (water)

j) mwana (son)

k) maktabani (at the library)

l) udogo (smallness)
Chapter 4
VERBAL NOUNS

A verbal noun is a verb form that is part verb and part noun. It is also known as a gerund. Another kind of verb is the infinitive, which gives the verb's basic meaning.

*To wake up in the morning is to begin life anew.*

infinitive

infinitive

*Waking up in the morning is painful for me.*

verbal noun (gerund)

IN ENGLISH
Infinitives
An infinitive is a form of the verb without person or number, giving its fundamental meaning. The infinitive is composed of two words, *to + verb*.

*to enjoy  to speak  to fall*

When you look up a verb in the dictionary, you find it without the *to*. This form is called the dictionary form.

*enjoy  speak  fall*

All verbs have a present infinitive and a perfect infinitive. The present infinitive is usually *to + the verb*. The perfect infinitive is *to have + the past participle of the main verb*. 
Present Infinitive

to be

to borrow

to say

Perfect Infinitive

to have been

to have borrowed

to have said

The infinitive is generally used with another conjugated verb. You will learn more about conjugated verbs in Chapters 21-44.

To lose one’s way is to learn one’s way.²

infinitive conjugated infinitive verb

He loves to learn about other cultures.

conjugated infinitive verb

Gerunds

The gerund, or verbal noun, is formed from the dictionary form of the verb + -ing.

buying

praying

sleeping

It can operate in a sentence in almost any way that a noun can: as a subject, object of a verb, or object of a preposition.

² A loose translation of the Swahili proverb Kupotea njia ndiko kujua njia. The message is that one shouldn’t be afraid to try new things or to fail; both are opportunities to learn.
Running is exhilarating.

noun from the verb *to run*
subject of the sentence

Juma loves *running*.

noun from the verb *to run*
direct object of the verb *to love*

The sport of *running* is competitive.

noun from the verb *to run*
object of the preposition *of*

Since the English *-ing* form of the verb can be part of a verb phrase, a verbal adjective (*gerundive* or *present participle*; see Chapter 42), or a verbal noun (*gerund*), it is important to distinguish among these three uses in order to choose the correct Swahili equivalent.

Mwanaarusi is *visiting* friends.

verb phrase
present tense

She is a *loving* mother.

verbal adjective (*gerundive*)
present participle

Seeing is difficult in this fog.

verbal noun (*gerund*)
KWA KISWAHILI

Infinitives and gerunds are the same thing; to avoid confusion, in this book both are referred to as **verbal nouns**. In Swahili they are both called **vitenzijina**. The singular, **infinitive** or **gerund**, is **kitenzijina**. In addition to being verbs, they are also nouns of class 15 (see Chapter 3, Noun Class).

Verbal nouns are composed of one word with the prefix **ku-** + the verb stem.

- **kucheza** *(to play; playing)*
- **kutembea** *(to walk; walking)*
- **kusema** *(to speak; speaking)*

There is only one kind of infinitive, the present infinitive or **kitenzijina cha wakati uliopo**. The main uses of the infinitive/gerund are to complement the meaning of the conjugated verb and to function as a noun.

*Amina anapenda kucheza karata.*

| conjugated | infinitive/gerund | verb |

*(Amina loves to play cards; or Amina loves playing cards.)*

*Kuona kifaru kunavutia.*

| infinitive/gerund |

*(To see a rhino is interesting; or Seeing a rhino is interesting.)*

A verbal noun can function in any way that a noun can function.
**Kuuliza si ujinga.**³

Subject

*(Asking is not stupid; or To ask is not stupid.)*

**Sisomi kuandika kwake.**

<table>
<thead>
<tr>
<th>direct object</th>
</tr>
</thead>
</table>

*(I don’t read his writing.)*

**TAKE NOTE**

It is important to distinguish between English \textit{–}ing forms. For reference, there is a chart on the next page summarizing the various English \textit{–}ing forms and their Swahili equivalents.

---

³ A Swahili proverb, which would be literally translated as “Asking is not stupidity.”

REVIEW

A. Fill in the blanks using infinitives.

1. Ninapenda __________________ mchana.
   (I like __________ in the afternoon.)
2. Je, unataka ________________ kesho?
   (Do you want __________ tomorrow?)
3. He knows how __________ very well.
4. __________________ is great fun.
5. Tumechelewa ________________ dukani.
   (We were late __________ at the store.)

B. Underline the –ing word in the sentences below. Circle whether the –ing word is a gerund (G), an adjective (A), or part of a verb phrase (VP).

1. Wanting to visit her mother, Ashura went to Pemba.  
   G  A  VP
2. The train traveled slowly, never reaching great speeds.  
   G  A  VP
3. Zawadi was always thinking about her studies.  
   G  A  VP
4. By riding her bike, Adija was able to reach school on time.  
   G  A  VP
5. I enjoy swimming in Lake Victoria.  
   G  A  VP
To negate a verb is to make it negative. An affirmative verb is one that is not negated.

I am a student.
He wanted to be a teacher.
They will travel on the weekend.

A negative verb is one that is negated.

I am not a student.
He did not want to be a teacher.
They will not travel on the weekend.

Like all verbs, a verbal noun (that is, an infinitive or a gerund) can be negated.

I would prefer not to swim.
Not asking would be foolish.

IN ENGLISH
Adding the word not before the infinitive or gerund negates a verbal noun.

to bite ⇒ not to bite
biting ⇒ not biting
KWA KISWAHILI
Inserting the morpheme\(^4\) -to- or -toku- in between the subject marker -ku- and the dictionary form of the verb negates a verbal noun.

\textit{kupeleka} \Rightarrow \textit{kutopeleka or kutokupeleka}
\textit{sending, to send} \Rightarrow \textit{not sending, not to send}

\textit{kufanya} \Rightarrow \textit{kutofanya or kutokufanya}
\textit{doing, to do} \Rightarrow \textit{not doing, not to do}

REVIEW

A. Rewrite the infinitive or gerund in each sentence, putting it in the negative.

1. Do you want to walk?

2. Travelling by train is risky.

4. While walking, he fell.

\(^4\) A \textit{morpheme} is the "smallest linguistic unit which has a meaning or grammatical function." See "Morphology: The Minimal Units of Meaning: Morphemes," \textit{Language Files}, 5\textsuperscript{th} edition, Monica Crabtree & Joyce Powers, compilers (Columbus: Ohio State U. P., 1991): 127.
B. Rewrite the verbal noun in each sentence, putting it in the negative.

1. Kucheka ni kuzuri.
   Laughing is good.

   Kamati wanataka kukutana.
   The committee wants to meet.

3. Nilikumbuka kutia chumvi.
   I remembered to add salt.
PRONOUNS
Chapter 6
INTRODUCTION TO PRONOUNS

A pronoun is a word used in place of one or more nouns. It may stand for a person, place, thing or idea.

For example, instead of repeating the proper noun Abunawas in the following sentences, it is preferable to use a pronoun in the second sentence.

\[ \text{Abunawas went to the market. Abunawas decided to buy a donkey.} \]

\[ \text{pronoun} \]

\[ \text{Abunawas went to the market. He decided to buy a donkey.} \]

A pronoun can only be used to refer to someone or something that has already been mentioned or is understood. The word that the pronoun replaces or refers to is called the antecedent of the pronoun. In the example above, the pronoun he refers to the proper noun Abunawas. Abunawas, therefore, is the antecedent of the pronoun he.

IN ENGLISH
There are different types of pronouns. They are described in the following chapters. Listed below are the most important categories and the chapters in which they are discussed in detail.

Personal pronouns (Chapter 7) change in form in the different persons and according to the function they have in the sentence.
- as subject (see Chapter 19); for example:
  *I* love; *they* walk; *he* bathes; *she* listens.

- as direct object (see Chapter 35); for example:
  Adija buys *it.*
  The boy knows *her.*
  The girl hit *him.*

- as indirect object (see Chapter 36); for example:
  The teacher bought *her* a gift.
  The priest offered *me* advice.
  The farmer sold *us* a cow.

- as object of a preposition (see Chapter 48); for example:
  Go with *them.*
  These are for *you.*
  Sit next to *him.*

**Reflexive pronouns** (Chapter 8) refer back to the subject of the sentence (see chapter 19).

  He helped *himself.*
  They relied on *themselves.*
  She talks to *herself.*

**Interrogative pronouns** (Chapter 9) are used in questions at the beginning of the question sentence. They are the first words, unless they are the objects of a preposition (see Chapter 48).

  *Who* is driving the bus?
  *What* are you doing?
  *Whom* will you interview?
  *To whom* are you speaking?
Demonstrative pronouns (Chapter 10) are used to point out people or things.

These are sweet. Those are sour. This is our house. That is hers.

Possessive pronouns (Chapter 11) are used to show possession.

Whose dog is this? It is hers. Mine is the brown dog over there.

Relative pronouns (Chapter 12) are used to introduce relative subordinate clauses (see Chapter 49, Sentences, Phrases and Clausules). For example:

The car, which he bought, is fast. The food, which they are cooking, smells delicious.

Indefinite pronouns (Chapter 13) indicate certain people or things that are not specified or not clearly seen. For example:

Someone is coming for dinner. I gave him something for his trouble.

KWA KISWAHILI
These various types of pronouns (with the exception of the reflexive pronouns) also exist in Swahili. They are different from English pronouns, however, because Swahili pronouns always reflect the class of the nouns to which they refer. The next seven chapters will illustrate how the different Swahili pronouns function.
A personal pronoun is a word taking the place of a noun that refers to a person or thing.

I am listening to music.
We are leaving tomorrow.
His parents love him very much.
They watched the movie and enjoyed it.

IN ENGLISH
Personal pronouns have distinct forms that show their function in a sentence. Personal pronouns can function as subjects or objects.

Personal Pronouns as Subjects
A different pronoun is used depending on the person referred to (I as opposed to you) and some pronouns (such as she and they) indicate whether one person or more than one person is involved in the action of the verb. For example:

He sat, and they stood.
- Who sat? He did. He is the singular subject of the verb sat.
- Who stood? They did. They is the plural subject of the verb stood.

Here is a list of the pronouns used as subjects:

<table>
<thead>
<tr>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st person</td>
<td>I</td>
</tr>
<tr>
<td>2nd person</td>
<td>you</td>
</tr>
<tr>
<td>3rd person</td>
<td>he/she/it</td>
</tr>
</tbody>
</table>
Personal Pronouns as Objects
A different pronoun is used depending on the person referred to (me as opposed to you) and some pronouns (such as her and them) indicate whether one person or more than one person is acted upon.

The policeman arrested her and me.
- The policeman arrested whom? Her and me. Her and me are the direct objects of arrested.

The doctor spoke to them frankly.
- The doctor spoke to whom? To them. Them is the direct object of spoke to.

The students are sitting behind you and him.
- The students are sitting behind whom? You and him. You and him are objects of the preposition behind.

Most pronouns that function as objects in a sentence are different from the ones that function as subjects. Compare the subjects and objects in English for the personal pronouns:

<table>
<thead>
<tr>
<th>SUBJECT</th>
<th>OBJECT</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>me</td>
</tr>
<tr>
<td>you</td>
<td>you</td>
</tr>
<tr>
<td>he/she/it</td>
<td>him/her/it</td>
</tr>
<tr>
<td>we</td>
<td>us</td>
</tr>
<tr>
<td>you</td>
<td>you</td>
</tr>
<tr>
<td>they</td>
<td>them</td>
</tr>
</tbody>
</table>

Only you and it have the same form as subjects and objects.
KWA KISWAHILI
Personal pronouns, which are called viwakilishi nomino vya watu, are the same whether used as subjects or objects.

Yeye alinipiga. He hit me.
Nilimpiga yeye. I hit him.

However, Swahili personal pronouns do have different forms depending on the person referred to and whether they are singular or plural.

Here is a list of the personal pronouns used as subjects and objects:

<table>
<thead>
<tr>
<th>1st person</th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>mimi</td>
<td>1, me</td>
<td>sisi</td>
</tr>
<tr>
<td>wewe</td>
<td>you</td>
<td>ninyi (or nyinyi)</td>
</tr>
<tr>
<td>yeye</td>
<td>he, him</td>
<td>wao</td>
</tr>
</tbody>
</table>

The words it, they, and them are not expressed by personal pronouns in Swahili when they do not refer to people. Instead, demonstrative pronouns are used. Demonstrative pronouns are explained in Chapter 10.

TAKE NOTE

In English there is no difference between you in the singular and you in the plural. For example, if there were many people present and someone asked aloud, "Are you coming with me?" you could stand for one person or for many.

In Swahili there is a difference between you in the singular and you in the plural.
**Wewe uende dukani.** You (singular) should go to the store.

**Ninyi mwende dukani.** You (plural) should go to the store.

---

**REVIEW**

Write the Swahili personal pronoun you would use to replace the underlined words in each sentence.

1. **We** are getting ready for our journey. ________
2. Would **you** (pl.) mind helping **us**? ________
3. Go to the neighbors and ask **them** for some bags. ________
4. **They** won’t mind loaning **us** some rope, too. ________
5. If they aren’t there, ask the man who lives next door. **He** is very nice and I know **him** well. ________
Chapter 8
REFLEXIVE PRONOUNS

A reflexive pronoun is a pronoun that is used either as the object of a verb or as the object of a preposition. It is called reflexive because it reflects back to the subject.

Tiriza likes to look at herself in the mirror.

reflexive pronoun

IN ENGLISH
Reflexive pronouns end with -self in the singular and -selves in the plural.

<table>
<thead>
<tr>
<th>1st person</th>
<th>myself</th>
<th>ourselves</th>
</tr>
</thead>
<tbody>
<tr>
<td>2nd person</td>
<td>yourself</td>
<td>yourselves</td>
</tr>
<tr>
<td></td>
<td>himself</td>
<td></td>
</tr>
<tr>
<td>3rd person</td>
<td>herself</td>
<td>themselves</td>
</tr>
<tr>
<td></td>
<td>itself</td>
<td></td>
</tr>
</tbody>
</table>

Reflexive pronouns can have a variety of functions: direct and indirect objects, and objects of a preposition.

- He hurt himself while exercising.
  He is the subject of hurt; himself is the direct object.
• They bought *themselves* a new sofa.
  *They* is the subject of *bought*; *themselves* is indirect object.

• She is always talking about *herself*.
  *She* is the subject of *talking*; *herself* is the object of the preposition *about*.

**KWA KISWAHILI**
There is no pronoun that serves the same function as the English reflexive pronoun. However, Swahili can express the reflexive meaning by using the object marker *-ji*, *shamirisho ya kujirejea*, the reflexive object marker.

- **Nilijilipia ada za shule.** *I paid the school fees for myself.*
- **Ulijisaidia.** *You helped yourself.*
- **Alijiangalia.** *He looked at himself.*
- **Tutajinunulia gari.** *We will buy ourselves a car.*
- **Mnajificha.** *You all are hiding yourselves.*
- **Wanajipikia.** *They cook for themselves.*
Review

Translate the following sentences, using the Swahili verbs given. If you are unsure about which subject markers to use, you will need to review Chapter 20, Subject Prefixes.

1. He loves himself.
   (kupenda to love)

2. Do you understand yourself?
   (kufahamu to understand)

3. She trusted herself.
   (kuamini to trust)

4. They rely on themselves.
   (kutegemea to rely)

5. Can you all read to yourselves?
   (kusomea to read to)
An interrogative pronoun is a pronoun that introduces a question. Interrogative comes from the verb to interrogate, which means to question. Here are some examples of interrogative pronouns used in questions.

*Who* is going to the cinema?
   | replaces a person

*What* did you eat yesterday?
   | replaces a thing

In both Swahili and English, a different interrogative pronoun is used depending on whether it refers to a person or a thing. The form of the interrogative pronoun also sometimes changes according to the function the pronoun performs in the sentence. For example, the interrogative pronoun could function as the subject, direct object, indirect object or object of the preposition.

**IN ENGLISH**
Different interrogative pronouns are used for asking about people or things.

*Who* wants dessert?

*What* is your name?

**Asking about People**
The interrogative pronoun to ask about people has three different forms depending on its function in the sentence.
1. *Who* is used for the subject of the sentence.

   *Who* wrote *Rosa Mistika*?

   subject  |  direct object

2. *Whom* is the form used for the direct or indirect object of the sentence, or with the object of a preposition.

   *Whom* do you love?

   direct object  |  subject

   To *whom* did you give the book?

   indirect object

   With *whom* did you go?

   object of a preposition

3. *Whose* is the possessive form and is used to ask about possession or ownership.

   *Look at that beautiful garden. Whose* is it?

   *Whose* can refer to one or more persons.

   *Whose* are these books?

   - They are the student’s. (singular answer)
   - They are the students’. (plural answer)
Asking about Things
What is used to ask about things. It does not change forms.

What is for dinner?
   subject

What are you learning this week?
   direct object

What did you give to her?
   indirect object

With what did you write?
   object of a preposition

What is considered singular when followed by a singular verb. The answer can be singular or plural.

What is for dinner?  |  Meatloaf is for dinner.
   singular verb     |  (singular answer)
                        |  Rice and beans are for dinner.
   (plural answer)

KWA KISWAHILI
As in English, different interrogative pronouns are used for asking about people or things.

Nani anasikiliza redio?
Who is listening to the radio?

Nini kilitokea? (Kitu gani kilitokea?)
What happened? (What thing happened?)
Asking about People
The interrogative pronoun to ask about people has two different forms depending on whether it is singular or plural. Both forms can be used as subject, direct object, indirect object or object of a preposition. Generally they precede the verb if functioning as a subject and follow the verb if functioning as an object.

Nani is used when a singular answer is expected.

1. It can be used as a subject of a question. For example:

   Nani atakuja kesho? Who will come tomorrow?
   Juma atakuja kesho. Juma will come tomorrow.
   (singular answer)

2. It can be used as a direct object. For example:

   Ulimwona nani? Whom did you see?
   Nilimwona Salma. I saw Salma. (singular answer)

3. It can be used as an indirect object. For example:

   Alimpa nani barua? To whom did she give a letter?
   Alinipa mimi. She gave a letter to me. (singular answer)

4. It can be used as an object of a preposition. For example:

   Utasafiri na nani? With whom will you travel?
   Nitasafiri na Sudi. I will travel with Sudi.
   (singular answer)

Note that nani always take class 1 noun agreements, i.e. the a- subject marker and the -mw- object marker.
Akina nani is used when a plural answer is expected.

1. It can be used as a subject of a question. For example:

   **Akina nani watakuja kesho?**  
   *Who will come tomorrow?*  
   **Ali na babake watakuja kesho.**  
   *Ali and his father will come tomorrow.* (plural answer)

2. It can be used as a direct object. For example:

   **Tutawatembelea akina nani?**  
   *Whom will we visit?*  
   **Tutawatembelea wanafunzi.**  
   *We will visit the students.* (plural answer)

3. It can be used as an indirect object. For example:

   **Waliwapa akina nani zawadi?**  
   *To whom did they give gifts?*  
   **Waliwapa watoto zawadi.**  
   *They gave gifts to the children.* (plural answer)

4. It can be used as an object of a preposition. For example:

   **Mtawapikia akina nani?**  
   *For whom will you all cook?*  
   **Mtawapikia rafiki zetu.**  
   *We will cook for our friends.* (plural answer)

Note that akina nani always takes class 2 noun agreements, i.e. the wa- subject marker and the -wa- object marker.

Both nani and akina nani can be used as possessive forms by combining them with the preposition -a (of).
Kitabu hiki ni cha nani?
*Whose book is this?*

Nyumba hizi ni za akina nani?
*Whose houses are these?*

Note that the preposition -a must always agree with the class of the noun to which it refers. It takes the same set of class prefixes as possessive adjectives (see Chapter 16).

**Asking about Things**

*Nini* is used to ask about things. It is the same for the singular or the plural, and can function as the subject, direct object, indirect object or object of a preposition. Generally it precedes the verb if functioning as a subject and follows the verb if functioning as an object.

(Kitu gani kinakusumbua?)
*(What thing is bothering you?)*

*Nini* kinakusumbua? *What is bothering you?*

subject

Unataka nini? *What do you want?*

direct object
Alikupa nini? *What did she give to you?*

indirect object

Mtaenda na nini? *With what will you all go?*

object of a preposition

Do not confuse the **interrogative adjectives** with the **interrogative pronouns**. Interrogative adjectives (Chapter 17) always accompany a noun, while pronouns stand alone.

**two types of *whose***

*Whose* bag is this?

- *Whose* is an interrogative adjective modifying the noun *bag*.
- Mfuko huu ni wa nani?

I found this bag; *whose* is it?

- *Whose* is an interrogative pronoun modifying the noun *bag*.
- Nilikuta mfuko huu; ni wa nani?

In Swahili the interrogative adjective that means *whose* (*-a nani*) takes the same form as the interrogative pronoun *whose* (*-a nani*). It is an adjective if it follows a noun, but a pronoun if it stands alone.
two types of *what*

*What* book are you reading?

- *What* is an interrogative adjective modifying the noun *book*.
- Unasoma kitabu *gani*?

*What* are you reading?

- *What* is an interrogative pronoun standing in for the word *book*.
- Unasoma *nini*?

If *what* precedes a noun, it is an interrogative adjective. If it stands alone, it is an interrogative pronoun.

In Swahili, *gani* follows the noun it modifies, while *nini* stands alone. Thus *gani* is an interrogative adjective, while *nini* is an interrogative pronoun.
Underline the interrogative adjectives and interrogative pronouns in the sentences below. Circle whether each word that you underline is an interrogative adjective (A) or an interrogative pronoun (P) and — if applicable — a subject (S) or object (O). You should be able to do this even if you don’t understand all the words in the Swahili sentences.

1. *What do you want to do in Zanzibar?*  
   \( \text{A P S O} \)

2. *What towns will you visit?*  
   \( \text{A P S O} \)

3. *With whom will you travel?*  
   \( \text{A P S O} \)

4. *Whose suitcase is this?*  
   \( \text{A P S O} \)

5. *Whom will you stay with?*  
   \( \text{A P S O} \)

6. *Nani anaenda nawe?*  
   \( \text{A P S O} \)

7. *Mtununua zawadi gani?*  
   \( \text{A P S O} \)

8. *Wewe ni mtalii wa aina gani?*  
   \( \text{A P S O} \)
9. **Akina nani wanakulipia safari yako?**
   
   A P S O

10. **Utafanya nini baada ya safari yako?**
    
   A P S O
A **demonstrative pronoun** replaces a noun that has been mentioned previously or is understood. It is called demonstrative because it points out a person or thing. The word *demonstrative* comes from the verb *to demonstrate*, which means *to show*.

**IN ENGLISH**

The demonstrative pronouns are *this (one)* and *that (one)* in the singular and *these* and *those* in the plural.

The distinction between *this* and *that* can be used to contrast one object or person from another, or to refer to things that are not the same distance away. The speaker uses *this* or *these* for the closer objects and *that* or *those* for the ones farther away.

- We have two sons. *This* (one) is Hud; *that* (one) is Assim. *These* are our fields. *Those* are the neighbor's.

**KWA KISWAHILI**

Demonstrative pronouns are called *vionyeshi* in Swahili. The singular, *demonstrative pronoun*, is called *kionyeshi*. Here are some examples of demonstrative pronouns used in sentences:

- *Nina zawadi mbili kwa familia yako. Hii ni kwa wazee na ile ni kwa watoto.*
  *I have two gifts for your family. This is for the elders and that is for the children.*

- *Hawa ni watoto wangu. Wale ni wa dada yangu.*
  *These are my children. Those are my sister's.*
There are three types of Swahili demonstrative pronouns. The one used depends on the distance between the speaker or hearer and the object or person pointed out, as well as on whether this is the first time the object or person is being mentioned or a reference to someone or something that has already been mentioned. All demonstrative adjectives must agree with the noun they refer to, using a system of class agreements.

Demonstrative pronouns use the same three sets of forms as demonstrative adjectives, which are explained in Chapter 18. For this reason, they are sometimes referred to simply as demonstratives. In Swahili, both are called vionyeshi. The difference is that demonstrative adjectives always follow the noun they modify, while pronouns stand in for the nouns they refer to.

1. The first type of demonstrative adjective is equivalent to the English demonstratives this or these. It is used exactly as this and these are used in English.
While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean *this* or *these* begin with the letter *h* and end with the same syllable used as a subject prefix in verbs (see Chapter 20, Subject Prefixes). The one exception is in class 1, where the syllable *yu-* is used rather than the subject prefix *a-*. The sound in between the *h* and the subject prefix is always the same as the final vowel.

Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.

<table>
<thead>
<tr>
<th>CLASS</th>
<th>DEMONSTRATIVE</th>
<th>ENGLISH TRANSLATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>huyu</td>
<td>this (person)</td>
</tr>
<tr>
<td>2</td>
<td>hawa</td>
<td>these (people)</td>
</tr>
<tr>
<td>3</td>
<td>huu</td>
<td>this (thing)</td>
</tr>
<tr>
<td>4</td>
<td>hii</td>
<td>these (things)</td>
</tr>
<tr>
<td>5</td>
<td>hili</td>
<td>this (thing)</td>
</tr>
<tr>
<td>6</td>
<td>haya</td>
<td>these (things)</td>
</tr>
<tr>
<td>7</td>
<td>hiki</td>
<td>this (thing)</td>
</tr>
<tr>
<td>8</td>
<td>hivi</td>
<td>these (things)</td>
</tr>
<tr>
<td>9</td>
<td>hii</td>
<td>this (thing)</td>
</tr>
<tr>
<td>10</td>
<td>hizi</td>
<td>these (things)</td>
</tr>
<tr>
<td>11</td>
<td>huu</td>
<td>this (thing)</td>
</tr>
<tr>
<td>14</td>
<td>huu</td>
<td>this (thing)</td>
</tr>
<tr>
<td>15</td>
<td>huku</td>
<td>this (action)</td>
</tr>
<tr>
<td>16</td>
<td>hapa</td>
<td>this (specific place)</td>
</tr>
<tr>
<td>17</td>
<td>huku</td>
<td>this (general place)</td>
</tr>
<tr>
<td>18</td>
<td>humu</td>
<td>this (inside place)</td>
</tr>
</tbody>
</table>
2. The second type of demonstrative is equivalent to the English demonstratives \textit{that} or \textit{those}, and is used to refer to people or things that are distant from the speaker and hearer.

<table>
<thead>
<tr>
<th>CLASS</th>
<th>DEMONSTRATIVE PRONOUN</th>
<th>ENGLISH TRANSLATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>yule</td>
<td>that (person) over there</td>

<tr>
<td>2</td>
<td>wale</td>
<td>those (people) over there</td>
</tr>
<tr>
<td>3</td>
<td>ule</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>4</td>
<td>ile</td>
<td>those (things) over there</td>
</tr>
<tr>
<td>5</td>
<td>lile</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>6</td>
<td>yale</td>
<td>those (things) over there</td>
</tr>
<tr>
<td>7</td>
<td>kile</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>8</td>
<td>vile</td>
<td>those (things) over there</td>
</tr>
<tr>
<td>9</td>
<td>ile</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>10</td>
<td>zile</td>
<td>those (things) over there</td>
</tr>
<tr>
<td>11</td>
<td>ule</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>14</td>
<td>ule</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>15</td>
<td>kule</td>
<td>that (thing) over there</td>
</tr>
<tr>
<td>16</td>
<td>pale</td>
<td>that (specific place) over there</td>
</tr>
<tr>
<td>17</td>
<td>kule</td>
<td>that (general place) over there</td>
</tr>
<tr>
<td>18</td>
<td>mle</td>
<td>that (inside place) over there</td>
</tr>
</tbody>
</table>
While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean *these* or *those objects or people mentioned earlier* begin with the same subject prefixes used with verbs (see Chapter 20, Subject Prefixes) and end with the syllable -le. The one exception is in class 1, where the syllable yu- is used rather than the subject prefix a-.

Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.

<table>
<thead>
<tr>
<th>Class</th>
<th>Example 1</th>
<th>Example 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>class 2</td>
<td>wa- + -le = wale</td>
<td>wa- + -le = wale</td>
</tr>
<tr>
<td>class 4</td>
<td>i- + -le = ile</td>
<td>i- + -le = ile</td>
</tr>
<tr>
<td>class 7</td>
<td>ki- + -le = kile</td>
<td>ki- + -le = kile</td>
</tr>
<tr>
<td>class 18</td>
<td>m- + -le = mle</td>
<td>m- + -le = mle</td>
</tr>
</tbody>
</table>

3. The third type of demonstrative is also equivalent to the English demonstrative *that* or *those*, but it is used to refer to a person or thing that has been previously mentioned. This type of demonstrative is also used to refer to people or things closer to the hearer and far from the speaker.
<table>

</tbody>
</table>

While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean these or those objects or people mentioned earlier follow the pattern of the demonstratives that mean this or these, except that the final vowel changes to -o.

Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.
class 1  huyu  ⇒  huyo
class 3  huu  ⇒  huo
class 10  hizi  ⇒  hizo
class 17  huku  ⇒  huko

Note that in classes 4, 7, 8, and 9 the vowel change (from -i to -o) results in a sound change in the preceding consonant(s).

| class 4 & 9 | hii  ⇒  hiyo |
| class 7    | hiki  ⇒  hicho |
| class 8    | hivi  ⇒  hivyo |

REVIEW

Underline the demonstratives in the sentences below. Circle whether each is a demonstrative adjective (A) or pronoun (P).

1. This is not what I expected.  A  P
2. Those cookies are delicious.  A  P
3. What do you think of these?  A  P
4. I haven’t tried those yet.  A  P
5. When did you find time to cook all this food?  A  P
6. Pati hii ni nzuri sana; watu wengi wapo.

7. Huyo ni nani?

8. Yule ni kakangu.

9. Alileta hiki?

10. Sivyo; alileta chakula hicho.
A possessive pronoun is a word that replaces a noun and that also shows who possesses that noun.

This house is ours.

In this example, ours is a pronoun that replaces the noun house and that shows who possesses that noun.

IN ENGLISH
Possessive pronouns only agree with the person who possesses, not to the object possessed.

Is this your house? No, it is not ours.
Are these your eggs? No, they are not ours.

In these two examples, the same possessive pronoun ours is used, although the object possessed is singular (house) in the first sentence and plural (eggs) in the second.

Here is a list of the English possessive pronouns:

<table>
<thead>
<tr>
<th></th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st person</td>
<td>mine</td>
<td>ours</td>
</tr>
<tr>
<td>2nd person</td>
<td>yours</td>
<td>yours</td>
</tr>
<tr>
<td>3rd person</td>
<td>his/hers/its</td>
<td>theirs</td>
</tr>
</tbody>
</table>
KWA KISWAHILI
Possessive pronouns are called vimilikishi. The singular, possessive pronoun, is kimilikishi. Here are some examples of possessive pronouns used in sentences:

Kitabu hiki ni changu. This book is mine.

Skati lake ni buluu; langu ni nyekundu. Her skirt is blue; mine is red.

While the English possessive pronouns differ from possessive adjectives, Swahili possessive pronouns and adjectives take exactly the same forms. Both, therefore, are called vimilikishi. Here are the forms of the possessive pronouns (and adjectives):

<table>
<thead>
<tr>

</tbody>
</table>

The difference between possessive pronouns and adjectives is that possessive adjectives always follow the nouns they modify, while possessive pronouns stand in for the nouns they refer to; both must agree in class with the nouns to which they refer. For example:
Kamusi **yangu** imepotea. *My dictionary is lost.*

possessive adjective modifying kamusi

Je, una kamusi? Do you have a dictionary?
Yangu imepotea. *Mine is lost.*

possessive pronoun, standing in for kamusi

**REVIEW**

Underline the possessives in the sentences below. Circle whether the possessive is a pronoun (P) or an adjective (A).

1. *How old are your children?*  
   A  P

2. *Five and seven. And yours?*  
   A  P

3. *My son is ten and my daughter is three.*  
   A  P

4. *Mine are both girls.*  
   A  P

5. *What are their favorite activities?*  
   A  P

   A  P

7. *Ulinunua wao wapi?*  
   A  P

8. *Duka lile lile ambapo ulinunua wenu.*  
   A  P

   A  P

10. *Sivyo; lake Musa.*  
    A  P
Chapter 12
RELATIVE PRONOUNS/CONSTRUCTIONS

A relative pronoun is a word that can serve two purposes:

1. As a pronoun, it stands for a noun or another pronoun previously mentioned, the antecedent.

   The food (that) you want is not available.

2. It introduces a subordinate clause, a group of words having a subject and verb separate from the subject and verb of the main clause. A main clause can stand alone as a complete sentence, but a subordinate clause cannot. See Chapter 49 (Sentences, Phrases and Clauses).

   main clause
   
   I bought a gift for Salim, who recently graduated from college.
   
   subordinate clause

   The subordinate clause in this example is also called a relative clause because it starts with a relative pronoun (who). The relative clause gives us additional information about the antecedent (Salim).
IN ENGLISH
The most frequently used relative pronouns are who, that, which and what. Different relative pronouns are used according to whether they refer to a person or to a thing.

Referring to a Person
The relative pronoun who is used when the antecedent is a person.

Who can be used with both restrictive and non-restrictive clauses. A restrictive clause is one that is essential to the meaning of the sentence. A non-restrictive clause is one that functions as a parenthetical comment and is usually set off by commas; it is not essential to the meaning of the sentence.

Did you see the man who was just here?

restrictive clause

Adija, (who is) a friend of ours, is coming to visit.

non-restrictive clause

Who is the only relative pronoun that changes its form depending on its function in the relative clause. Who has five forms used in three different functions: who, whoever, whom, whomever, and whose.
• *Who* and *whoever* are the forms used as the subjects of the relative clause.

She married a man *who* truly loved her.
A. *Who* is the subject of *loved*.

Student loans are available to *whoever* needs them.
B. *Whoever* is the subject of *needs*.

• *Whom* and *whomever* are the forms used as the objects of the relative clause. In these examples it is between parentheses because it is often omitted.

This is the friend about *whom* I was telling you.
A. *Whom* is the object of the preposition *about*.

We can invite *whomever* you would like.
B. *Whomever* is the direct object of the verb *invite*.

• *Whose* is the possessive form.

Abunawas is a character *whose* stories are well-known.

**Referring to Things**
The relative pronouns *which* or *that* are used when the antecedent is a thing. They do not change forms.
That is used only when the relative clause is a restrictive clause. Here it is in parentheses because it is often omitted.

Could you get me the pencil (that is) on my desk?

restrictive clause

Which is used only when the relative clause is a non-restrictive clause.

Those shoes, which Zawadi bought last week, are too small for her.

non-restrictive clause

KWA KISWAHILI

There are three kinds of relative constructions, which are called virejesi. All relative constructions must agree in class with their antecedents. Each of the three relative constructions can be used to translate all of the English relative pronouns.

Here are the forms that mark agreement. In some cases they serve as suffixes; in other cases they serve as infixes.
<table>
<thead>
<tr>

</tr>
</tbody>
</table>

The amba- construction

The only relative construction that is actually a pronoun is amba-, which takes a relative suffix. Note that amba- can be used with the same meaning as the English forms who, whom, whose, that and which.

- Nina rafiki ambaye anakaa huko Uganda. (class 1)
  I have a friend who lives in Uganda.

- Nina rafiki ambaye nitamtembelea mwezi ujao. (class 1)
  I have a friend whom I will visit next month.

- Nina rafiki ambaye jina lake ni Sudi. (class 1)
  I have a friend whose name is Sudi.

- Niliona mti ambao ulianguka. (class 3)
  I saw a tree that had fallen down.
• **Mti ambao ufianguka ni mkubwa.** (class 3)
  *The tree, which fell down, is big.*

**Infixed relative**
A second form of the Swahili relative is the **infixed relative** or *kirejeshi-kati*, in which the relative form functions as a verbal infix. The infix occurs in a verb after the tense marker and before the verb root.

\[
nina + ye + enda = \text{ninayeenda I who go}
\]

The infixed relative cannot be used with the perfect tense (Chapter 26) or the -a- tense (Chapter 22). The future tense takes a modified form when used with the infixed relative; the infix -ka- occurs after the future tense marker and before the relative infix.

\[
nitaenda I will go \quad \text{nitakayeenda}
\]
\[
nita + ka + ye + enda
\]
\[
I who will go
\]

Note that the infixed relative can be used with the same meaning as the English forms *who, whom, that and which.*

• **Nina rafiki anayekaa huko Uganda.** (class 1)
  *I have a friend who lives in Uganda.*

• **Nina rafiki nitakayemtembelea mwezi ujao.**
  (class 1)
  *I have a friend whom I will visit next month.*

• **Niliona mti ulioanguka.** (class 3)
  *I saw a tree that had fallen down.*

• **Mti ulioanguka ni mkubwa.** (class 3)
  *The tree, which fell down, is big.*
Compare these four sentences to those given above that contain the *amba-* relative. Note that the sentences express the same meanings.

**Tenseless relative**

A third form of the Swahili relative is the **tenseless relative**, or *kirejesi bila tensi*, in which the relative form functions as a verbal suffix. The verb contains no tense marker and the relative form occurs after the verb root.

\[ \text{li + jengwa + lo = lijengwalo which is built (class 5)} \]

Because this kind of relative is tenseless, it expresses an activity or state that happens regularly or continuously. Note that the tenseless relative can be used with the same meaning as the English forms *who, whom, that*.

- **Nina rafiki akaaye huko Uganda.** (class 1)
  *I have a friend who lives in Uganda.*

- **Nina rafiki nimtembeleye mara kwa mara.** (class 1)
  *I have a friend whom I visit often.*

- **Ana magari yaharibikayo kila wiki.** (class 6)
  *He has cars that break every week.*

**TAKE NOTE**

The three forms of the Swahili relative can, for the most part, be used interchangeably. However, you should keep a few differences in mind that affect how often each form is used:

1. It takes longer to say *amba* + a verb than it does to say a verb with the relative form infixed or suffixed.
2. If you want to use a past or future tense, the tenseless relative cannot be used.
3. If you want to use the perfect tense or simple present, you must use the amba- relative.

When the relative form is used as a direct object, and its antecedent is a person, an object marker must also be used. See Chapter 34, Objects, to review object markers.

Use of the Relative Construction
The relative pronoun enables you to combine two short simple sentences into one complex sentence.

The relative as subject

A. Shakila ni msichana hodari.
   *Shakila is an intelligent girl.*

B. Atashinda.
   *She will be successful.*

You can combine sentence A with sentence B by replacing the subject she with the relative construction in Swahili or with the pronoun who in English.

*Shakila ni msichana hodari ambaye atashinda.*
*Shakila is an intelligent girl who will be successful.*

*Ambaye atashinda* or *who will be successful* is the relative clause. It does not express a complete thought, and it is introduced by a relative pronoun.

*Ambaye* or *who* stands for the noun *msichana* or *girl*. *Msichana* or *girl* is the antecedent of *ambaye* or *who*. Notice that it stands immediately before the relative pronoun, which introduces the clause and gives additional information about the antecedent.
**Ambaye** or *who* serves as the subject of the verb *atashinda* in Swahili or *will be* in the relative clause.

The relative as object

A. Shakila ni msichana hodari.  
*Shakila is an intelligent girl.*

B. Mwalimu anampenda Shakila.  
*The teacher likes Shakila.*

You can combine sentence A and sentence B by replacing the object *Shakila* with the relative pronoun *whom*.

Shakila, **ambaye** mwalimu anampenda, ni msichana hodari.  
*Shakila, whom the teacher likes, is an intelligent girl.*

**Ambaye mwalimu anampenda** or *whom the teacher likes* is the relative clause. **Ambaye** or *whom* stands for the proper noun *Shakila*. *Shakila* is the antecedent. Notice again that the antecedent comes immediately before the relative pronoun.

**Ambaye** or *whom* serves as the direct object of the relative clause. (*Mwalimu* or the teacher is the subject.*)
The relative as object of a preposition

A. Shakila ni msichana mwenye hodari.  
   *Shakila is an intelligent girl.*
B. Nilienda shuleni naye.  
   *I went to school with her.*

You can combine sentence A and sentence B by replacing the personal pronoun *her* with the relative pronoun *whom.*

*Shakila ni msichana hodari niliyeenda shuleni naye.*  
*Shakila is an intelligent girl with whom I went to school.*

*Niliyeenda shuleni naye* or with whom I went to school is the relative clause.

The infix *-ye* or *whom* stands for the noun *msichana* or *girl.*  
*Msichana* or *girl* is the antecedent. Notice again that the antecedent comes immediately before the relative pronoun.

**TAKE NOTE**

In English, relative pronouns are often omitted. It is important that you reinstate them because they must be expressed in Swahili. Restructuring English sentences that contain a dangling preposition will help you to identify relative clauses.
Salma is the woman I told you about.

Salma is the woman about whom I told you.

Salma ni mwanamke ambaye nilikuzungumzia.
(literally: Salma is the woman whom I was discussing about with you.)

OR

Salma ni mwanamke ambaye nilikuambia habari zake.
(literally: Salma is the woman whom I was telling you about (her news).)

REVIEW

Restructure the sentences below to avoid dangling prepositions.

1. Dar es Salaam is the city we are going to.

2. Those girls are the ones I was talking to.

3. This is the road we should be driving on.

4. This umbrella is not the one I came with.
An **indefinite pronoun** indicates people or things but does not refer to specific people or things.

*Someone* called while you were gone.
Accidents can happen to *anyone*.
*No one* is here.
*Nothing* is happening this weekend.

**IN ENGLISH**
The indefinite pronouns include *all, any, both, each, either, neither, everyone, everybody, everything, none, one, several, some, someone, somebody, something, few, many, several, most, another, others, anyone, anybody, and anything*.

Note that many of these words can be either pronouns or adjectives, depending on their use in the sentence.

*Both* of you are invited. (pronoun)
*Both* students are invited. (adjective)

When the indefinite pronoun is the subject of a sentence, it usually takes a singular verb and any other pronoun referring to it agrees with it in number and gender. When gender may be either masculine or feminine, both pronouns may be used.

*Each* of us must pay for *him* or *herself*.
Have *any* of the mothers brought *her* children?

Some indefinite pronouns, such as *everyone, everybody, everything, all, and some* can take either a singular or plural verb or pronoun.
Everyone wants to visit Zanzibar during his or her vacation. (singular)
Everyone will come, but they may not stay. (plural)

When the indefinite pronoun is plural in meaning, such as both, few, many, most and several, it takes a plural verb and is referred to by a plural pronoun.

Most of the workers received their paychecks.

KWA KISWAHILI
The indefinite pronouns include -ote (all), -o -ote (any), -ote -pili (both), -ingi (many), -ingine (another, others), baadhi ya (some of), -mojawapo (one) and kadhaa (several), where the hyphen (-) indicates that the pronoun agrees in class with the noun to which it refers.

With the exception of baadhi ya, all of these words can be either pronouns or adjectives, depending on their use in the sentence.

Unataka cho chote? Do you want anything? (pronoun)
Unataka kitu cho chote? Do you want anything? (adjective)

You may note that the number of Swahili indefinite pronouns is much smaller than the number of English pronouns. Many of the concepts that are expressed by indefinite pronouns in English are expressed with other parts of speech in Swahili. Take note of the following (near) equivalents.
<table>
<thead>
<tr>
<th>English</th>
<th>Swahili</th>
</tr>
</thead>
</table>
| each = kila | Kila mtu alipenda matokeo. \(^5\)  
Each (person) liked the results. (adjective) |
| everyone = kila mtu | Kila mtu anahudhuria shule.  
Everyone attends school. (noun phrase) |
| everything = kila kitu | Kila kitu kipo. \(^6\)  
Everything is here. (noun phrase) |
| or vitu vyote | Vitu vyote vipo.  
Everything is here. (noun phrase) |
| or kila jambo | Kila jambo lilitokea kwa haraka.  
Everything happened quickly. (noun phrase) |
| or mambo yote | Mambo yote yalitokea kwa haraka.  
Everything happened quickly. (noun phrase) |
| either = -o -ote | Jibu lo lote ni sawa.  
Either answer is correct. (adjective) |
| or -mojawapo | Chagua kikapu kimojawapo.  
Choose either basket. (adjective) |
| neither = hapana -moja + relative | Hapana mmoja aliyeishi hapa.  
Neither (person) lived here. (clause) |
| someone = mtu fulani | Mtu fulani alikuja kukuona.  
Someone came to see you. (noun phrase) |

\(^5\) Kila is used only with singular nouns, and is one of the few Swahili adjectives that precedes the nouns it modifies.

\(^6\) Kitu (plural: vitu) is used for a thing that is an object; while jambo (plural: mambo) is used for a thing that is abstract.
<table>

REVIEW

Underline the pronouns in each of the sentences below. Indicate whether it is indefinite.

1. Is anyone coming to class today?
   Indefinite? Yes No

2. No, everyone has left for vacation.
   Indefinite? Yes No

3. What about Juma? Has anyone seen him?
   Indefinite? Yes No

4. I saw him, but he told me he wasn't feeling well.
   Indefinite? Yes No

5. Who else is coming besides you?
   Indefinite? Yes No
ADJECTIVES
Chapter 14
INTRODUCTION TO ADJECTIVES

An adjective, called kivumishi in Swahili, is a word that describes or modifies a noun or pronoun. Be careful not to confuse an adjective with a pronoun. A pronoun replaces a noun, but an adjective must always have a noun or pronoun to describe.

Listed below are the various types of adjectives and the chapters where they are discussed.

In both English and Swahili, adjectives are classified according to the way they describe a noun or pronoun.

A descriptive adjective indicates the quality of someone or something. See Chapter 15, Descriptive Adjectives.

Tatu is playing with a red ball.
The room is small.

A possessive adjective shows who possesses someone or something. See Chapter 16, Possessive Adjectives.

Sijali is talking to his father.
Your sister is beatiful.
An **interrogative adjective** asks a question about someone or something. See Chapter 17, *Interrogative Adjectives*.

*Which* boy wrote her a letter?

*What* time do you want to leave?

A **demonstrative adjective** points out someone or something. See Chapter 18, *Demonstrative Adjectives*.

I want to buy *this* apple.

We visited *that* town last year.
Chapter 15
DESCRIPTIVE ADJECTIVES

A descriptive adjective is a word that characterizes a noun or pronoun. It indicates the quality of that noun or pronoun. As the name implies, it describes the noun or pronoun. For example:

\[
\text{The girl is beautiful.}
\]

\[
\text{noun} \quad \text{descriptive adjective}
\]

\[
\text{described}
\]

IN ENGLISH
A descriptive adjective does not change form, regardless of the noun or pronoun it modifies.

That is an excellent book.
Didn’t you think the play was excellent?
I have a blue shirt.
His pants are blue.

Descriptive adjectives are divided into two groups depending on how they accompany the noun they modify.

1. An attributive adjective usually precedes (comes before) the noun that it modifies.

That is an excellent book.
I have a blue shirt.
He is sitting at the round table.

2. A predicate adjective follows a linking verb such as be, seem, appear, look, become, etc.; it refers back to the subject.
The play was excellent.
His pants are blue.
You look sad today.

KWA KISWAHILI
Descriptive adjectives are called vivumishi vya kueleza. The singular, adjective, is called kivumishi cha kueleza. Most descriptive adjectives agree in class with the noun or pronoun that they modify; that is, the prefix of the adjective reflects the class of the word described.

Descriptive adjectives generally use the same prefixes that the nouns themselves use. In the dictionary you will find them listed with out a prefix. Here is a chart illustrating adjectival class agreement using the adjective -refu, which means tall or long, as an example.

<table>

<td>mu-</td>
<td>mahali murefu</td>
<td>a long place</td>
</tr>
</tbody>
</table>

Your teacher and textbook will explain the exceptions to the general rules embodied in this chart.
Although most adjectives agree with the nouns that they modify using class agreements, there are also a number of adjectives that are invariable, meaning that they never change their form. Here are a few examples.

\[
\begin{align*}
\text{safi clean} & \Rightarrow \text{mtu safi clean person} \\
& \Rightarrow \text{kisu safi clean knife} \\
& \Rightarrow \text{mahali safi clean place}
\end{align*}
\]

\[
\begin{align*}
\text{ghali expensive} & \Rightarrow \text{tunda ghali expensive fruit} \\
& \Rightarrow \text{kiti ghali expensive chair} \\
& \Rightarrow \text{bei ghali expensive price}
\end{align*}
\]

When you locate an adjective in the dictionary or glossary, you will know whether or not it is invariable based on whether it is written with a dash before it (such as -dogo) or not (such as bora). Adjectives written with a dash must always agree with the nouns that they modify, while adjectives written without a dash do not.

As in English, descriptive adjectives in Swahili can be either attributive adjectives or predicate adjectives.

An attributive adjective, called \text{kivumishi angama} in Swahili, always follows the noun that it modifies.

\begin{align*}
\text{Hiki ni kitabu kizuri.} & \text{ This is a good book.} \\
\text{Nina shati la buluu.} & \text{ I have a blue shirt.}
\end{align*}

A predicate adjective, called \text{kivumishi arifu} or \text{kivumishi cha maelezo} in Swahili, follows a linking verb such as \text{kuwa (to be)}, \text{kuonekana (to seem, to appear)}, \text{kua (to become)}, etc.; it refers back to the subject and therefore must agree with it in class.
Mchezo ulikuwa mzuri. The play/game was good.
Suruali yake ni nyekundu. His pants are red.
Unaonekana mwembemba. You look skinny.
Anakuwa mrefu. He is becoming tall.

TAKE NOTE

Nouns that refer to people or animals take descriptive adjectives of class 1 if they are singular and class 2 if they are plural, regardless of the class to which the noun itself belongs.

daktari (class 9) ⇒ daktari mzuri
  good doctor

mbwa (class 10) ⇒ mbwa wakali
  vicious dogs
REVIEW

In the sentences below, underline the descriptive adjectives. Circle whether the descriptive adjective is an attributive adjective (A) or a predicate adjective (P).

1. Whose child is this young boy? A P
2. I prefer short stories over novels. A P
3. Adila is smart. A P
4. The tall man is looking at you. A P
5. Their house is beautiful. A P
A possessive adjective is a word that describes a noun by showing who possesses the person or thing referred to by the noun. The owner is called the possessor, and the noun modified is called the person or thing possessed.

• His is the possessive adjective.
• He (understood) is the possessor.
• Book is the possessed.

IN ENGLISH
There are eight possessive adjectives.

<table>
<thead>
<tr>
<th>PERSON</th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st</td>
<td>my</td>
<td>our</td>
</tr>
<tr>
<td>2nd</td>
<td>your</td>
<td>your</td>
</tr>
<tr>
<td>3rd</td>
<td>his, her, its</td>
<td>their</td>
</tr>
</tbody>
</table>

The possessive adjective refers only to the person who possesses, that is, the possessor.

Zeinab loves her children.

When the 3rd person singular (his, her, its) and plural (their) are used, there may be two possible meanings.
Ustadhi destroyed his car in an accident.

- Ustadhi destroyed his own car.
  OR
- Ustadhi destroyed someone else's car.

Usually the context of the sentence will help you understand the correct meaning; however, when there is a possibility of misunderstanding, the word own is added after the possessive adjective.

Ustadhi destroyed his own car in an accident.

In this case, and whenever own can be added after the possessive adjective, the possessive adjective is called reflexive; it "reflects back" to the possessor, which is usually the subject of the sentence or clause.

The family moved into their house.
  (referring to their own house)

If the possessive adjective refers to a possessor other than the subject of the sentence or clause, it is called non-reflexive.

The family moved into their house.
  (referring to someone else's house)
KWA KISWAHILI

A possessive adjective is called **kimilikishi**. The plural, possessive adjectives, is **vimilikishi**. The possessive adjective for Swahili are as follows:

<table>
<thead>
<tr>
<th>PERSON</th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st</td>
<td>-angu <em>(my)</em></td>
<td>-etu <em>(our)</em></td>
</tr>
<tr>
<td>2nd</td>
<td>-ako <em>(your)</em></td>
<td>-enu <em>(your pl.)</em></td>
</tr>
<tr>
<td>3rd</td>
<td>-ake <em>(his, her, its)</em></td>
<td>-ao <em>(their)</em></td>
</tr>
</tbody>
</table>

Here is a chart illustrating possessive adjectival class agreement using the possessive adjective -angu, which means *my*, as an example.

<table>
<thead>
<tr>
<th>CLASS</th>
<th>POSS. PREFIX</th>
<th>SWAHILI EXAMPLE</th>
<th>ENGLISH TRANSLATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>w-</td>
<td>mtoto wangu</td>
<td>my child</td>
</tr>
<tr>
<td>2</td>
<td>w-</td>
<td>watoto wangu</td>
<td>my children</td>
</tr>
<tr>
<td>3</td>
<td>w-</td>
<td>mti wangu</td>
<td>my tree</td>
</tr>
<tr>
<td>4</td>
<td>y-</td>
<td>miti yangu</td>
<td>my trees</td>
</tr>
<tr>
<td>5</td>
<td>l-</td>
<td>jina langu</td>
<td>my name</td>
</tr>
<tr>
<td>6</td>
<td>-</td>
<td>majina yangu</td>
<td>my names</td>
</tr>
<tr>
<td>7</td>
<td>ch-</td>
<td>kiti changu</td>
<td>my chair</td>
</tr>
<tr>
<td>8</td>
<td>vy</td>
<td>viti vyangu</td>
<td>my chairs</td>
</tr>
<tr>
<td>9</td>
<td>y-</td>
<td>ndizi yangu</td>
<td>my banana</td>
</tr>
<tr>
<td>10</td>
<td>z-</td>
<td>ndizi zangu</td>
<td>my bananas</td>
</tr>
<tr>
<td>11</td>
<td>w-</td>
<td>ulimi wangu</td>
<td>my tongue</td>
</tr>
<tr>
<td>14</td>
<td>w-</td>
<td>uhuru wangu</td>
<td>my freedom</td>
</tr>
<tr>
<td>15</td>
<td>kw-</td>
<td>kuandika kwangu</td>
<td>my writing</td>
</tr>
<tr>
<td>16</td>
<td>p-</td>
<td>nyumbani pangu</td>
<td>at my house</td>
</tr>
<tr>
<td>17</td>
<td>kw-</td>
<td>nyumbani kwangu</td>
<td>at my house</td>
</tr>
<tr>
<td>18</td>
<td>mw-</td>
<td>nyumbani mwangu</td>
<td>in my house</td>
</tr>
</tbody>
</table>

7 Another Swahili term for the possessive adjective is **kivumishi cha mwenyewe** (Broomfield 68).

8 The difference between “at my house” in Class 16 and Class 17 is that Class 16 is slightly more specific. Class 17 could indicate not only the house but also the space around it.
The other possessive adjective roots use the same possessive prefixes listed here to form possessive adjectives.

The same prefixes are used to express the possessive preposition of, with the root -a preceded by the noun possessed and followed by the possessor.

<table>
<thead>
<tr>
<th>CLASS</th>
<th>SWAHILI EX.</th>
<th>ENGLISH TRANSLATION</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>14</td>
<td>uhuru wa nchi</td>
<td>the country's freedom</td>
</tr>
<tr>
<td>15</td>
<td>kuandika kwa Musa</td>
<td>Musa's writing</td>
</tr>
<tr>
<td>16</td>
<td>nyumbani pa Sudi</td>
<td>at Sudi's house</td>
</tr>
<tr>
<td>17</td>
<td>nyumbani kwa Sudi</td>
<td>at Sudi's house</td>
</tr>
<tr>
<td>18</td>
<td>nyumbani mwa Sudi</td>
<td>in Sudi's house</td>
</tr>
</tbody>
</table>

As in English, when the 3rd person singular (-ake) and plural (-ao) are used, there may be two possible meanings.

**Ustadhi aliharibu gari lake.** *Ustadhi destroyed his car.*
- Ustadhi destroyed his own car.
  
  OR
- Ustadhi destroyed someone else's car.

Usually the context of the sentence will help you understand the correct meaning; however, when there is a possibility of misunderstanding, the word **-enyewe** (*himself, herself, itself*) is added after the possessive adjective. Using the possessive prefixes given in the chart above, the adjective **-enyewe**
agrees in class with the noun that is the possessor. For example:

Ustadhi aliharibu gari lake mwenyewe.
Ustadhi destroyed his own car.

In this case, and whenever -enyewe can be added after the possessive adjective, the possessive adjective is called reflexive (kimilikishi kinachojirejea in Swahili); it “reflects back” to the possessor which is usually the subject of the sentence or clause.

Familia walihamia nyumbani kwao.
The family moved into their house.
(referring to their own house)

If the possessive adjective refers to a possessor other than the subject of the sentence or clause, it is called non-reflexive, or kimilikishi kisichojirejea in Swahili.

Familia walihamia nyumbani kwao.
The family moved into their house.
(referring to someone else's house)

Possessive Contractions
Swahili possessive adjectives can be contracted in a number of ways.
If the noun possessed ends in the vowel -a, it can elide with the four possessive adjectives whose roots begin with the vowel -a (-angu, -ako, -ake, and -ao). If this occurs the possessive prefix is dropped. This contraction is most commonly used with nouns that refer to family members (e.g. mama, baba, dada, kaka), a number of which end in the vowel -a. Using a contraction does not change the meaning.

mama yangu ⇒ mamangu my mother  
mama yake ⇒ mamake his/ her mother  
mama yao ⇒ mamao their mother

The third person singular possessive, -ake, can be contracted with almost any noun that it modifies. When contracted, it keeps the possessive prefix and its last vowel, -e, but becomes attached as a suffix to the end of the noun modified. This type of contraction is most commonly used to refer to family members and in poetry.

mume wake ⇒ mumewe her husband  
titi lake ⇒ titile her breast  
bibi yake ⇒ bibiye his/ her grandmother

TAKE NOTE

1. The possessive adjective is not as commonly used in Swahili as it is in English. For example, in English, people often use the possessive adjective to refer to people whom they employ.

I saw my doctor today.  
Our cleaning lady was ill yesterday.  
My seamstress is sewing me a dress.

In Swahili this is not the case. These three sentences, for example, would not use the possessive adjective.
Nilimwona daktari leo.
I saw a/the doctor today.
Msaidizi aliumwa jana.
The helper was sick yesterday.
Mshonaji ananishonea gauni.
The sewer is sewing me a dress.

When referring to people, possessive adjectives are usually used to refer to family or friends.

Nahitaji kumwuliza mama yangu.
I need to ask my mother.
Rafiki yako ni nani?
Who is your friend?

2. Another way that possessive adjectives in Swahili differ from those in English is that Swahili often uses a plural possessive where English uses the singular possessive. For example, a house or a country in Swahili is almost always possessed by more than one person.

Most speakers would not use the word kwangu (my) with the word nyumbani (house).

Unakaribishwa nyumbani kwetu.
You are invited to our house.

Similarly, most speakers would not use the word yangu (my) with the word nchi (country).
Katika nchi yetu, kuna watu wengi.
In our country, there are many people.

3. All nouns take possessive adjectives of the class to which the noun itself belongs, even if they refer to people or animals (which in other circumstances would be considered class 1 and 2 nouns).

   mama (class 9) ⇒ mama yangu *my mother*

   mbwa (class 10) ⇒ mbwa wetu *our dogs*

**REVIEW**

A. Below are a series of English sentences, followed by a Swahili translation in which the possessive adjective or preposition has been left blank. Fill in the Swahili possessive. In the blanks below each pair of sentences, write your answers in both English and Swahili.

1. We bought our car on Vuga Road.
   
   Tulinunua motokaa _________ katika mtaa wa Vuga.
   
   Possessor: __________________________

   Noun Possessed: ____________________
2. You all bought your cars on Vuga Road.

Mlinunua motokaa ________ katika mtaa wa Vuga.
Possessor: _______________________
Noun Possessed: _______________________

3. They bought their cars on Vuga Road.

Walinunua motakaa ________ katika mtaa wa Vuga.
Possessor: _______________________
Noun Possessed: _______________________

4. She bought her car on Vuga Road.

Alinunua motokaa ________ katika mtaa wa Vuga.
Possessor: _______________________
Noun Possessed: _______________________

5. I bought my car on Vuga Road.

Nilinunua motokaa ________ katika mtaa wa Vuga.
Possessor: _______________________
Noun Possessed: _______________________
B. For each Swahili phrase listed below, list the possible contractions. If no contraction is possible write “none.”

1. **dada yake** *his/her sister*

2. **mtoto wao** *their child*

3. **baba yangu** *my father*

4. **gari lake** *his vehicle*

5. **paka wako** *your cat*
Chapter 17
INTERROGATIVE ADJECTIVES

An interrogative adjective is a word that asks a question about a noun. For example:

*Which* course do you want?
| asks information about the noun *course*

**IN ENGLISH**
The words *what, which,* and *whose* are called interrogative adjectives when they come before a noun and are used to ask a question about that noun.

*What* chair do you like to sit in?
| noun

*Which* bag is Adila’s?
| noun

*Whose* house is that?
| noun

*What* and *which* are used interchangeably to ask for different kinds of information about a noun:

- the name of a person or thing
  *What* car did he buy? The Toyota.
  *Which* countries did they visit? Tanzania, Kenya, and Uganda.
• the kind of person or thing
  *What* (sort of) dog bit you? A brown and white dog.
  *Which* (sort of) foods do they like? Rice and meat.

KWA KISWAHILI

Interrogative adjectives are called *vivumishi vya kuuliza*. The singular, *interrogative adjective*, is called *kivumishi cha kuuliza*. There are three types of interrogative adjectives: *gani*, -pi, and -ngapi. The one used depends on the type of information being asked about the noun.

Like all Swahili adjectives, the interrogative adjectives always come after the noun they modify.

1. *gani?*

   The interrogative adjective *gani* (*what?*) is an invariable adjective, which means it does not need to agree with the noun it modifies.

   **Anampenda mvulana gani?**
   *What boy does she like?*

   **Ulinunua kitabu gani?**
   *What book did you buy?*

2. *-pi?*

   The interrogative adjective -pi (*which?*) must agree in class with the noun it modifies. The prefixes it uses are the same as the verb subject markers (see Chapter 20, *Subject Prefixes*), except in class 1, where the prefix is *yu*.

   **Anapenda mvulana yupi?**
   *Which boy does she like?*

   **Ulinunua kitabu kipi.**
   *Which book did you buy?*
While gani and -pi can be used interchangeably like what and which in English, gani is used more often. The interrogative adjective -pi is more likely to be used when the possible answers to the question which? are understood.

Mtatembelea nchi ipi?
*Which country (of the understood options) will you all visit?*

3. -ngapi?
The interrogative adjective -ngapi (*how many?*) must agree in class with the noun it modifies. The prefixes used are the same as those used for descriptive adjectives (see Chapter 15, *Descriptive Adjectives*). It can only be used with plural nouns.

Tutaalika watu wangapi?
*How many people will we invite?*

Motakaa ngapi ziliuzwa?
*How many cars were sold?*

**TAKE NOTE**

1. Nouns that refer to people or animals take interrogative adjectives of class 1 if they are singular and class 2 if they are plural, regardless of the class to which the noun itself belongs.

   daktari (class 9) ⇒ daktari yupi? *which doctor?*
   mbwa (class 10) ⇒ mbwa wapi? *which dogs?*

2. The word what is not always an interrogative adjective. In the sentence *What are you doing?*, it is an interrogative pronoun. It is important that you distinguish one from the other, because in Swahili a different word is used for the interrogative adjective what (gani?) and the interrogative pronoun what (nini?). Nini also follows
different rules, which are explained in Chapter 9, *Interrogative Pronouns.*

**REVIEW**

Circle the interrogative adjective in each of the sentences below. Draw an arrow to the noun each adjective modifies. Circle the interrogative adjective that would be used in Swahili.

1. What cereal do you like to eat?
   
   \[
   \text{gani} \quad \text{-ipi} \quad \text{-ngapi}
   \]

2. How many times a week do you exercise?
   
   \[
   \text{gani} \quad \text{-ipi} \quad \text{-ngapi}
   \]

3. Which movie does he want to see?
   
   \[
   \text{gani} \quad \text{-ipi} \quad \text{-ngapi}
   \]

4. What town do they live in?
   
   \[
   \text{gani} \quad \text{-ipi} \quad \text{-ngapi}
   \]

5. What page is the teacher reading from?
   
   \[
   \text{gani} \quad \text{-ipi} \quad \text{-ngapi}
   \]
A **demonstrative adjective** is a word used to point out a noun. It is called demonstrative because it points out (demonstrates) a person or thing. For example:

*This* boy is handsome.

points out the noun *boy*

**IN ENGLISH**

The demonstrative adjectives are *this* and *that* in the singular and *these* and *those* in the plural. They are a rare example of English adjectives agreeing with the noun they modify: *this* changes to *these* before a plural noun and *that* changes to *those*.

<table>
<thead>
<tr>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>this</em> picture</td>
<td><em>that</em> picture</td>
</tr>
<tr>
<td><em>that</em> window</td>
<td><em>those</em> windows</td>
</tr>
</tbody>
</table>

The distinction between *this* and *that* can be used to contrast one object with another or to refer to things that are not the same distance away from the speaker. We generally say *this* (or *these*) for a closer object, and *that* (or *those*) for one farther away.

Adija uses two school bags. *This* one is for her books.

| showing contrast |  

133
That one is for her lunch.

showing contrast

referring to things at hand

These things go in the blue bag. Those things go in the red bag.

referring to things at a distance

KWA KISWAHILI

There are three types of demonstrative adjectives, which are called vionyeshi in Swahili. The singular, demonstrative adjective, is called kionyeshi. The one used depends on the distance between the speaker or hearer and the object or person pointed out, as well as on whether this is the first time the object or person is being mentioned or a reference to someone or something that has already been mentioned. All demonstrative adjectives must agree with the noun they modify using a system of class agreements.

1. The first type of demonstrative adjective is equivalent to the English demonstratives this or these. It is used exactly as this and these are used in English.
While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean *this* or *these* begin with the letter *h* and end with the same syllable used as a subject prefix in verbs (see Chapter 20, *Subject Prefixes*). The one exception is in class 1, where the syllable *yu-* is used rather than the subject prefix *a-.* The sound in between the *h* and the subject prefix is always the same as the final vowel.

Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.

<table>
<thead>
<tr>

<tr>
<td>11</td>
<td>ule</td>
<td>ukuta ule</td>
<td>that wall over there</td>
</tr>
</tbody>
</table>
While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean *these* or *those objects or people mentioned earlier* begin with the same subject prefixes used with verbs (see Chapter 20, *Subject Prefixes*) and end with the syllable -le. The one exception is in class 1, where the syllable yu- is used rather than the subject prefix a-. Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.

<table>
<thead>
<tr>
<th>Class</th>
<th>Subject Prefix</th>
<th>Syllable</th>
<th>Demonstrative</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>wa-</td>

</tr>
</tbody>
</table>

While you should try to memorize the demonstrative for each class, you will learn them much faster if you understand how they are formed by studying patterns in the chart above.

All of the demonstratives that mean these or those objects or people mentioned earlier follow the pattern of the demonstratives that mean this or these, except that the final vowel changes to
Here are a few examples of how this demonstrative is formed in different classes. Try to see the pattern for the other classes.

<table>
<thead>
<tr>
<th>Class</th>
<th>Demonstrative</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>huyu</td>
</tr>
<tr>
<td>3</td>
<td>huu</td>
</tr>
<tr>
<td>10</td>
<td>hizi</td>
</tr>
<tr>
<td>17</td>
<td>huku</td>
</tr>
</tbody>
</table>

Note that in classes 4, 7, 8, and 9 the vowel change (from -i to -o) results in a sound change in the preceding consonant(s).

<table>
<thead>
<tr>
<th>Class</th>
<th>Demonstrative</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 &amp; 9</td>
<td>hii</td>
</tr>
<tr>
<td>7</td>
<td>hiki</td>
</tr>
<tr>
<td>8</td>
<td>hivi</td>
</tr>
</tbody>
</table>

1. Unlike most Swahili adjectives, two of the demonstrative adjectives—the one that means this or that and the one that refers to objects or people mentioned previously—can be used either before or after the noun without changing the meaning.

   huyu mtu OR mtu huyu  this person
   hili jina OR jina hili this name

2. When referring to a location (i.e. class 16, 17 or 18), all of the demonstrative adjectives almost always come before the noun.
hapa nyumbani  
right here at this home
pale nyumbani  
over there at that house
hapo nyumbani  
at that specific house mentioned earlier
huku Tanzania  
here in Tanzania
kule Tanzania  
(over there) in Tanzania
huko Tanzania  
in Tanzania (previously mentioned)
humu mfukoni  
in this bag
mle mfukoni  
in that bag over there
humo mfukoni  
in that bag I mentioned earlier

If the demonstrative used to refer to that or those objects or people at a distance is placed before the noun it approximates, the English article the and refers to someone or something mentioned earlier.
REVIEW

For the English sentences, circle the demonstrative adjective that would be used in Swahili. For the Swahili sentences, circle the demonstrative adjectives. Draw an arrow to the noun each adjective modifies. In some cases, the noun may be understood but not explicated stated.

1. Do you like this shirt?
   ![hii ile hiyo](image)

2. No, I prefer that one.
   ![hii ile hiyo](image)

3. What about these shoes?
   ![hivi vile hivyo](image)

4. Yes, those are really nice.
   ![hivi vile hivyo](image)

5. Where did you get the hat you had on yesterday?
   ![hii ile hiyo](image)
(I bought that hat at that store over there.)

7. Tuende hapo dukani. (Let's go to that store.)

8. Subiri kidogo; nahitaji kulipia suruali hizi.  
(Wait a little; I need to pay for these pants.)

9. Usinunue zile; hizi ni bora.  
(Don't buy those; these are better.)

10. Lakini hizi zinanifaa kuliko hizo.  
(But these fit me better than those.)
Chapter 19
SUBJECTS

The subject of a sentence is the person, object, or idea being described. When you wish to find the subject of a sentence, identify the verb and then ask who? or what? before the verb. The answer will be the subject. For example:

The girl slept in the room.

subject of the verb slept

The key broke.

subject of the verb broke

IN ENGLISH
The subject of the sentence performs the action of a verb or is acted upon by a passive verb. You will learn more about passive verbs in Chapters 41 (Verb Extensions) and 44 (Active and Passive Voice). The subject is a noun, a pronoun or a phrase that is used as a noun.

The dog wagged its tail.

- What wagged its tail? The dog.
- The dog is a noun, which functions as the subject.
She studies Swahili and Arabic.

- Who studies Swahili and Arabic? She.
- *She* is a pronoun, which functions as the subject.

Walking to Iringa took two hours.

- What took two hours? Walking to Iringa.
- *Walking to Iringa* is a phrase used as a noun that functions as the subject.

Train yourself to ask *who?* or *what?* to find the subject. Never assume that the first word in the sentence is the subject. Subjects can occur in many different places in a sentence.

While shopping, Salma lost her bag.
Do you like pilau?
"Why?" asked Mariamu.

Some sentences have more than one main verb; you need to find the subject of each verb.

Sudi watched television and Zuhura read a book.

- *Sudi* is the subject of the first verb, *watched*.
- *Zuhura* is the subject of the second verb, *read*.

A singular subject takes a singular verb; a plural subject takes a plural verb. The verb must agree with its subject in number. Noun classes are explained in Chapter 3.
KWA KISWAHILI
The subject of a sentence is called mtenda or kiima. The plural, subjects, is called watenda or viina. Subjects function in the same way in Swahili as they do in English. It is particularly important that you recognize the subject of the sentence in Swahili so that you will make the subject marker of the verb agree with the noun class of the subject.

Kitabu kilikuwamo mfukoni. (The book was in the bag.)

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>subject</td>
<td>subject verb</td>
</tr>
<tr>
<td>class 7</td>
<td>prefix</td>
</tr>
<tr>
<td>class 7</td>
<td></td>
</tr>
</tbody>
</table>

TAKE NOTE
In both English and Swahili it is very important to recognize the subject of each verb. You must make sure that each verb agrees with its subject; that is, you must use a class 1 subject marker when a class 1 noun is the subject, and a class 10 subject marker when a class 10 noun is the subject. You will learn more about subject markers in the next chapter.
REVIEW

Underline the subject(s) in each of these sentences.

1. The tall trees will fall over if it is too windy.
2. Drinking tea in the morning is quite pleasant.
3. As I walked by the car, the driver waved at me.
4. After passing through Zanzibar, the storm hit Pemba.
5. Pilau is made with rice, vegetables and spices.
CHAPTER 20
SUBJECT PREFIXES

While English does not have subject prefixes (also called subject markers), they are extremely important in Swahili. The subject prefix of a verb indicates the class of its subject, which will also indicate whether the noun of the subject is singular or plural.

IN ENGLISH
There are no subject prefixes. Instead, English uses nouns and personal pronouns (he, she, it, and they) to indicate the subject of a sentence.

\[\text{John is playing ball.}\]
subject (noun)

\[\text{He will be home at 6 o’clock.}\]
subject (personal pronoun)

KWA KISWAHILI
Each noun class and personal pronoun has its own subject prefix, called kiambishi awali. In the plural it is viambishi awali. The subject prefix is the same for all the tenses, except for some of the personal pronouns, which have different prefixes for the -a- tense. (You will learn more about verb tenses in the next chapter.) The subject prefix is attached to the verb. It always comes first, followed by the tense and then the verb in the dictionary form.
zi + li + ondoka = ziliondoka they (class 10) left

verb (to leave; kuondoka)
tense marker (past)
subject marker (class 10)

As explained in Chapter 21 (Introduction to Verbs & Verb Tenses), Swahili is called an **agglutinating language** because it agglutinates (i.e. sticks together) a lot of meaningful sound segments to form a word that could be considered a phrase or even a sentence in English.

**Personal Pronouns**

Each personal pronoun — *I, you (singular), he/she, we, you (plural), and they* — has a subject prefix. Personal pronouns are explained in Chapter 7.

<table>
<thead>
<tr>
<th>PERSONAL PRONOUN</th>
<th>SUBJECT MARKER</th>
<th>SUBJECT MARKER (PRESENT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kiwakilishi nomino cha mtu</td>
<td>Kiambishi awali</td>
<td>Kiambishi awali cha wakati uliopo</td>
</tr>
<tr>
<td>mimi (I)</td>
<td>Ni-</td>
<td>na-</td>
</tr>
<tr>
<td>wewe (you singular)</td>
<td>u-</td>
<td>wa-</td>
</tr>
<tr>
<td>yeye (he or she)</td>
<td>a-</td>
<td>a-</td>
</tr>
<tr>
<td>sisi (we)</td>
<td>Tu-</td>
<td>twa-</td>
</tr>
<tr>
<td>ninyi (you plural)</td>
<td>m-</td>
<td>mwa-</td>
</tr>
<tr>
<td>wao (they)</td>
<td>wa-</td>
<td>wa-</td>
</tr>
</tbody>
</table>

Mimi **ninaenda kwa daktari.** *I am going to the doctor.*

subject marker -1st person singular
Watoto wanacheza. *The children are playing.*

subject marker - 3rd person plural

Ninyi mtapewa zawadi. *You all will be given gifts.*

subject marker - 2nd person plural

**CLASS 1**
The subject marker for class 1 is the same as the third person singular (he or she), a-. It is the same for all tenses of the verb.

Mtuvanapika. *The person is cooking.*

**CLASS 2**
The subject marker for class 2 is the same as the third person plural (they), wa-. It is the same for all tenses of the verb.

Watu wanapika. *People are cooking.*

**CLASS 3**
The subject marker for class 3 is u-. It is the same for all tenses of the verb.

Mti unaanguka chini. *The tree is falling down.*

**CLASS 4**
The subject marker for class 4 is i-. It is the same for all tenses of the verb.

Miti inaanguka chini. *The trees are falling down.*
CLASS 5
The subject marker for class 5 is li-. It is the same for all tenses of the verb.

Jengo lilijengwa mwaka huu.
The building was built this year.

CLASS 6
The subject marker for class 6 is ya-. It is the same for all tenses of the verb.

Majengo yaliyengwa mwaka huu.
The buildings were built this year.

CLASS 7
The subject marker for class 7 is ki-. This prefix is easy to remember because it is the same as the nominal prefix for nouns of class 7, like kisu or kipindi. It is the same for all tenses of the verb.

Kiswahili kinasemwa kule Afrika ya Mashariki.
Swahili is spoken in East Africa.

CLASS 8
The subject marker for class 8 is vi-. This prefix is easy to remember because it is the same as the nominal prefix for nouns of class 8, like visu or vipindi. It is the same for all tenses of the verb.

Visiwa vinapata watalii wengi.
The islands get many tourists.
CLASS 9
The subject marker for class 9 is i-. It is the same for all tenses of the verb.

Safari ilienda vizuri. *The trip went well.*

CLASS 10
The subject marker for class 10 is zi-. It is the same for all tenses of the verb.

Safari zilienda vizuri. *The trips went well.*

CLASS 11
The subject marker for class 11 is u-. This prefix is easy to remember because it is the same as the nominal prefix for nouns of class 11, like ubao or ufunguo. It is the same for all tenses of the verb.

Ulimi wangu unauma. *My tongue hurts.*

CLASS 14
The subject marker for class 14 is u-. This prefix is easy to remember because it is the same as the nominal prefix for nouns of class 14, like umoja or uzima. It is the same for all tenses of the verb.

Uhuru ulipatikana miaka ya sitini.  
*Freedom was achieved in the 1960s.*
CLASS 15
The subject marker for class 15 is ku-. This prefix is easy to remember because it is the same as the infinitive prefix for nouns of class 15, like kulinda or kuchukua. It is the same for all tenses of the verb.

Kushona kunanifurahisha.
Sewing makes me happy.

CLASS 16
The subject marker for class 16 is pa-. It is the same for all tenses of the verb.

Nyumbani palikuwa na watu wengi.
There were many people in the house.
(literally: At the house the place had many people.)

CLASS 17
The subject marker for class 17 is ku-. It is the same for all tenses of the verb.

Mjini kutakuwa na hali ya hewa nzuri.
In the city there will be good weather.
(literally: In the city the place will have good weather.)

CLASS 18
The subject marker for class 18 is m-, mu- or mw-.

Mfukoni muna matofaa.
In the bag there are apples.
(literally: In the bag the place has apples.)
SUBJECT PREFIXES WITHOUT NOUNS
While a subject prefix always agrees in class with the subject of the sentence, it also allows you to leave out the noun of the subject if both the speaker and the listener understand it.

Instead of saying:  You could simply say:

Mimi nilienda dukani.  Nilienda dukani.
I went to the store.  I went to the store.

Watoto walienda dukani.
The children went to the store.

Walienda dukani.

Ndizi zitauzwa.
The bananas will be sold.

Zitauzwa.
They will be sold.
(Bananas is understood.)

TAKE NOTE

In Chapter 3 (Noun Class) you learned that sometimes you will need to look for clues in the sentence to know whether a noun is singular or plural. Here you have learned about subject prefixes, one example of this kind of grammatical clue. Recognizing the subject marker will help you to figure out in what class the noun of the subject belongs, including whether it is singular or plural.

For example, if you see or hear a sentence where the subject marker on the verb is ya-, you will know that the subject is a class 6 noun.

Matunda yalikatwa.
The fruit was cut.
If you see or hear a sentence where the subject marker on the verb is i-, you will know that the subject is either a class 4 or a class 9 noun. Looking at the noun itself will help you choose between these two possibilities.

**Mikutano ilivunjika.**
*The meetings were cancelled.*

Since you already know that class 4 nouns begin with mi-, in this case you can tell that the noun is a class 4 noun.

**Safari ilivunjika**
*The trip was cancelled.*

Since the noun has no nominal prefix, you can tell that *safari* is a class 9 noun.
REVIEW

Circle the subject prefix of each verb, and draw a line from it to the subject with which it agrees. (In some cases the subject may be understood but not stated.) Identify the noun class of each subject prefix. You should be able to do this even if you don't know what these words mean. If you find this difficult you might need to reread Chapter 3 (Noun Class).

1. Wewe utaenda shuleni lini?  Class ______
2. Vitabu vilinunuliwa jana.  Class ______
3. Maembe yananuka.  Class ______
4. Anapenda kuogolea.  Class ______
5. Vijana watagombana.  Class ______
6. Jiwe linatupwa.  Class ______
7. Muhogo uliuzwa sokoni.  Class ______
8. Kulia kwake kunanisikitisha.  Class ______
9. Sherehe zitaanza wiki ijayo.  Class ______
10. Utoto wake unaonekana wazi.  Class ______
VERBS
Chapter 21
INTRODUCTION TO VERBS AND VERB TENSES

A verb is a word that signifies an action, occurrence, state of being, or condition. The action can be bodily, as in such verbs as cry, laugh, sew, or repair, or mental, as in such verbs as wonder, desire, plan, love. Verbs such as be and become express a state or condition rather than an action.

The verb is at the grammatical center of a sentence; you usually cannot express a complete thought without a verb.

To train yourself to recognize verbs, read the following paragraph where the verbs are in italics.

Zainab and her family are Muslims. Every day they wake at dawn to pray. After breakfast she dresses her children, who get ready to go to school. During the day she cooks and cleans, but in the evenings Zainab teaches Koranic lessons to other women, something she enjoys doing because it gives her some time away from taking care of her family.

The tense of a verb specifies when the action of the verb takes place: in the present, in the past, or in the future.

<table>
<thead>
<tr>
<th>present</th>
<th>I go</th>
<th>past</th>
<th>I went</th>
<th>future</th>
<th>I will go</th>
</tr>
</thead>
</table>
As the above examples demonstrate, you can indicate when
the action of the verb takes place by putting the verb in a
different tense without giving any additional information such
as I go now or I went yesterday or I will go tomorrow.

IN ENGLISH
There are two kinds of verbs depending on whether the verb
can take a direct object: transitive verbs and intransitive verbs.
A transitive verb is one that takes a direct object. You will
learn more about direct objects in Chapter 35. In some
dictionaries, a transitive verb is indicated by the abbreviation
v.t. (verb transitive).

The teacher brought the chalk.
   |                     |
   transitive verb      direct object

The traditional healer sells medicine.
   |                     |
   transitive verb      direct object

An intransitive verb is a verb that does not take a direct
object. Some dictionaries indicate an intransitive verb with
the abbreviation v.i. (verb intransitive).

The old man sleeps for hours.
   |                     |
   intransitive verb

My father runs every day in the morning.
   |                     |
   intransitive verb
There are six main tenses in English.

**present**  I go  **present perfect**  I have gone
**past**  I went  **past perfect**  I had gone
**future**  I will go  **future perfect**  I will have gone

The listing of the forms of a verb in all six tenses is called a **synopsis**. Above is a synopsis of the verb *go* in the first person singular. These tenses are discussed individually in Chapters 22-29. There are also more complex tenses that can be created by combining the main tenses; these will be explained in Chapter 43, Compound Tenses.

**KWA KISWAHILI**

Verbs are called **vitenzi**, and they are identified in the same way as in English. Transitive verbs are called **vitenzi elekezi**. Intransitive verbs are **vitenzi visoelekezi**. If you are memorizing the definitions of Swahili verbs, be sure to note whether the word is transitive or intransitive. Conjugated Swahili verbs have at least three parts: the subject marker (see Chapter 20), the tense marker (see Chapters 21-44), and the dictionary form.

\[
\text{ni + li + chelewa} = \text{nilichelewa} \quad \text{I was late}
\]

\[
\text{ni} \quad \text{li} \quad \text{chelewa} \\
\quad \text{verb (to be late; dictionary form)} \\
\quad \text{tense marker (past)} \\
\quad \text{subject marker (first person singular)}
\]

Swahili is called an agglutinative language \(^9\) because it agglutinates (i.e. sticks together) a lot of meaningful sound

---

\(^9\) "Morphology: Morphological Types of Languages," *Language Files*, Monica Crabtree and Joyce Powers, compilers (Columbus: Ohio State U.P., 1991): 159. Some linguists, however, consider Swahili a "parasynthetic language," "one that allows multiple prefixes and suffixes appended to a verbal and/or nominal root" (John Mtembezi Inniss, personal communication, 4 July 2000).
segments to form a word that would be considered a phrase or even a sentence in English. The process is called **agglutination** or **uambishaji**.

Tenses are called **nyakati** (or **wakati** in the singular) or **tensi**. There are five main tenses in Swahili.

**present progressive**  

\[ \text{wakati uliopo unaendelea} \]

\[ \text{ninaenda} \quad \text{or naenda} \]

**I am going**

**simple present**  

\[ \text{wakati uliopo sahili} \]

\[ \text{ninaenda} \quad \text{or naenda} \]

**I go**

**present perfect**  

\[ \text{wakati uliopo timilifu} \]

\[ \text{nimeenda} \]

**I have gone**

**past**  

\[ \text{wakati uliopita} \]

\[ \text{nilienda} \]

**I went**

**future**  

\[ \text{wakati njao} \]

\[ \text{nitaenda} \]

**I will go**

The listing of the forms of the verb in all five tenses is called a **muhtasari** (**summary**). These tenses are discussed individually in Chapters 22-29. There are also more complex tenses that can be created by combining the main tenses; these will be explained in Chapter 43, **Compound Tenses**.

---

10 The word **ufupisho** (shortening) or **kidokezo** (hint or suggestion) can also be used to express the idea of a synopsis. See TUKI English-Swahili Dictionary (Dar es Salaam: TUKI, 1996).
REVIEW

A. Underline the verbs in the sentences below. Circle whether the verb is transitive (V.T.) or intransitive (V.I).

1. Juma loves his wife. V.T. V.I.
2. The book was on the table. V.T. V.I.
3. The old man spit when he saw it. V.T. V.I.
4. What do you want to do today? V.T. V.I.
5. The president will be travelling. V.T. V.I.

B. Write a synopsis in the second person singular (-u-) for the Swahili verb kupenda (to like).

Present Progressive ____________________________
Simple Present _________________________________
Present Perfect ________________________________
Past _________________________________________
Future ________________________________________
Chapter 22
PRESENT

There are two forms of the verb that indicate the present tense, although they have slightly different meanings.

- **simple present**  
  Laila reads the book.

- **present progressive**  
  Laila is reading the book.

The **simple present** indicates that the action is habitual or occurs regularly. It is used to express a statement of fact.

I walk to the shore.

The **present progressive** indicates that the action is going on at the time when the speaker is speaking.

I am walking to the shore.

**IN ENGLISH**

As you saw in Chapter 21 (Introduction to Verbs and Verb Tenses), there are three forms of the verb that indicate the present tense, although they have slightly different meanings.

- **simple present**  
  Laila reads the book.

- **present progressive**  
  Laila is reading the book.

- **present emphatic**  
  Laila does read the book.
Combining the verb to be in the present tense with a gerund, or verbal noun, forms the present progressive. You learned about verbal nouns in Chapter 4, and you will learn about the verb to be in Chapter 30.

In addition to the simple present and present progressive tenses, English also has the present emphatic tense.

**present emphatic**  
Laila *does read* the book.

To ask questions, you must use the progressive or emphatic form.

*Is Laila reading* the *book*?  
*Does Laila read* the *book*?

**KWA KISWAHILI**

There are also two forms of the verb that indicate the present tense. Both forms can be used to express the present progressive and the simple present tenses. Their usage and precise meaning depend on context, dialect, and personal preference.

**present progressive**  
Laila *is reading* the book

*anasoma or asoma*

**simple present**  
Laila *reads* the book.

*anasoma or asoma*
habitual present

Laila usually reads the book.

husoma

In Swahili the present progressive is called **wakati uliopo unaoendelea**. It is expressed with either of the tense markers -a- or -na-. While the subject marker changes depending on the class of the subject, the tense marker stays the same as long as the verb remains in the present progressive tense.

In Swahili the simple present is called **wakati uliopo sahili**. It can also be expressed with either of the tense markers -a- or -na-. Both are explained in greater detail below.

In Swahili the habitual present tense is called **wakati uliopa wa kawaida**. It is expressed without a tense marker and with the subject marker hu-. It is explained in greater detail below.

**THE -A- TENSE**

Note how the subject markers combine with the -a- tense marker; their sounds merge to create slightly different forms.

\[
\begin{align*}
ni + \text{-a-} & = \text{nasoge}a & \text{I am moving} \\
u + \text{-a-} & = \text{wasoge}a & \text{you are moving} \\
a + \text{-a-} & = \text{asoge}a & \text{she/he is moving} \\
tu + \text{-a-} & = \text{twasoge}a & \text{we move} \\
\end{align*}
\]
Although the translations given here are present progressive, note that all six of these forms could also express the simple present tense, depending on context.

As you can see, the -a- tense marker is only used with the personal subject markers, including class 1 and 2. The other classes (i.e. 3-18) always use the -na- tense marker, whether the tense is simple present or present progressive. You will need to decide from context whether the meaning is simple present or present progressive.

Gari la moshi linakwenda kila siku.
The train goes every day.
Sasa hivi gari la moshi linakwenda mjini.
Right now the train is going to town.

To conjugate a Swahili verb with the -a- tense marker, start with the infinitive.

kulinda  to guard

For verbs with a dictionary form that is more than one syllable long, drop the infinitive prefix ku-, which leaves you with the dictionary form.

linda  to guard
To this form add the subject marker that agrees with your subject and the tense marker -a-.

\[
\text{tu} + \text{a} + \text{linda} = \text{twalinda we guard or we are guarding}
\]

- **verb** (to guard; dictionary form)
- **subject marker** (first person plural)

This process works the same way when the dictionary form has only one syllable.

\[
\text{kula} \quad \text{to eat (infinitive)} \quad -\text{la} \quad \text{to eat (dictionary form)}
\]

\[
\text{wa} + \text{a} + \text{la} = \text{wala they eat or they are eating}
\]

- **verb** (to eat; dictionary form)
- **subject marker** (third person plural)

**THE -NA- TENSE**

Here is the verb **kusogea** *(to move)* conjugated using the **-na-** tense.

- **nin asogea** \( I \text{ am moving} \)
- **anasogea** \( \text{she} / \text{he is moving} \)
- **m nasogea** \( \text{you all are moving} \)
- **lin asogea** \( \text{it is moving} \)
- **unasogea** \( \text{it is moving} \)

class 5

class 11 or 14
Although the translations given here are present progressive, note that all six of these forms could also express the simple present tense, depending on context.

To conjugate a Swahili verb in the -na- tense, start with the infinitive.

\textbf{kulinda} \hspace{1cm} \textit{to guard}

For verbs with a dictionary form that is more than one syllable long, drop the infinitive prefix ku-, which leaves you with the dictionary form.

\textbf{linda} \hspace{1cm} \textit{to guard}

To this form, add the subject marker that agrees with your subject and the tense marker -\textit{na-}.

\begin{align*}
t + n + \text{linda} & = \text{tunalinda we are guarding or we guard} \\
\text{verb (to guard; dictionary form)} & \\
\text{tense marker} & \\
\text{subject marker (first person plural)} &
\end{align*}

This process works slightly differently if the dictionary form has only one syllable.

\textbf{kula} \hspace{1cm} \textit{to eat (infinitive)} \hspace{1cm} \textbf{-la} \hspace{1cm} \textit{to eat (dictionary form)}

For verbs with only one syllable in the dictionary form, keep the infinitive prefix ku- when you add the subject marker and the -\textit{na-} tense marker.
THE PRESENT HABITUAL TENSE
This tense is used to indicate habitual or customary action. It does not use a tense marker or the usual subject markers. Instead the prefix hu- is used for all the noun classes. Unless the subject is clear, the subject is indicated by an independent pronoun or other noun subject.

Mimi husoma kila siku.
I usually study everyday.
Juma hututembelea kila wikendi.
Juma usually visits us every weekend.

The hu- prefix always comes before the dictionary form of the word. With monosyllabic verbs, therefore, the infinitive prefix ku- is dropped.

kula to eat
Mariam hula ndizi.
Mariam usually eats bananas.
TAKE NOTE

There is no emphatic form of the verb in Swahili. If you want to ask a question in the present tense, you must use the simple present or the present progressive, but turn the sentence into a question. You will learn more about asking questions in Chapter 50 (Declarative and Interrogative Sentences).

Some verbs in the present progressive tense in Swahili will be translated into the simple present in English.

- **Kufurahi** to be happy
  
  Mkulima anafurahi.

  The farmer is happy.

  (literally: The farmer is being happy.)

As you can see, the literal translation doesn’t sound right in English. You should be able to use the context and the word’s meaning to decide which tense to use when translating.

---

11 "He is happy" could also be expressed with the perfect tense, by saying "amefurahi."
REVIEW

Below you will find English sentences translated into Swahili with the conjugated Swahili verb missing. Given the infinitive of the verb, conjugate the verb in the present tense to fill in the blanks.

1. The girls are carrying water. (*kubeba = to carry*)
   
   Wasichana ___________ maji.

2. Sudi’s family is moving to Dar es Salaam. (*kuhamia = to move to*)
   
   Familia ya Sudi ___________ Dar es Salaam.

3. The trees are growing quickly. (*kukua = to grow*)
   
   Miti _______________ kwa haraka.

4. The European is visiting East Africa. (*kutembelea = to visit*)
   
   Mzungu _____________ Afrika ya Mashariki.

5. His eye is looking at those buildings. (*kuangalia = to look at*)
   
   Jicho lake ____________ majengo hayo.
6. What time do you usually wake up?

*(kuamka = to wake up)*

*Wewe __________ saa ngapi?*

7. What do they usually do during vacation?

*(kufanya = to do)*

*Wao ______________ nini wakati wa likizo?*
Chapter 23
NEGATIVE PRESENT

To negate a verb is to make it negative. An affirmative verb is one that is not negated.

I am a student. He wants to be a teacher.
They would prefer to go on the weekend.

A negative verb is one that is negated.

I am not a student.
He does not want to be a teacher.
They would prefer not to go on the weekend.

Like all verbs, a present tense verb can be negated.

IN ENGLISH
The present progressive and the simple present tenses each have their own rules for forming the negative.

The present progressive tense is made negative by adding not after the auxiliary verb to be and before the main verb. You will learn about negating the verb to be in Chapter 30.

The doctor is working in his office.
The doctor is not working in his office.

the verb to be the main verb
The simple present tense is made negative by adding *do* or *does* + *not* + the dictionary form of the main verb.

The doctor works in his office.
The doctor *does not* work in his office.

Often *do* or *does* is contracted with *not*.

- do not ⇒ don't
- does not ⇒ doesn't

Doctors *don't* work.
A doctor *doesn't* work.

**KWA KISWAHILI**
The present negative is called *wakati uliopo kanusho*. The -a- tense and the -na- tense form the negative in the same way.

- **anasoma** (*she is studying*) ⇒ **hasomi** (*she isn't studying*)
- **asoma** (*she studies*) ⇒ **hasomi** (*she doesn't study*)

You will need to examine the context in order to decide whether a negative present verb suggests a present progressive or simple present tense.

The present tense is made negative by adding the negative prefix *ha-* before the subject marker. After the subject marker, there is no tense marker. The dictionary form of the verb is used, but its ending changes from -a to the negative suffix -i.
ha + tu + sem + i = **hausemi** (*we don't speak, we're not speaking*)

- negative suffix
- verb (to speak; *kusema*)
- subject marker (first person plural)
- negative prefix

If the dictionary form of the verb ends in a vowel other than -a, its ending does not change.

ha + tu + jibu = **hatujibu** (*we don't answer, we're not answering*)

- verb (to answer; dictionary form)
- subject marker (first person plural)
- negative prefix

The only subject for which this process works differently is the first person singular (I). In that case, instead of adding the negative prefix **ha-**, change the subject marker **ni-** to **si-**.

si + 1 + i = **sili** (*I don't eat, I am not eating*)

- negative suffix
- verb (to eat; *kula*)
- negative subject marker (first person singular)
REVIEW

A. Rewrite the following sentences, putting each verb into the present negative tense.

1. The trees are being cut down.

2. Those houses are being built.

3. I think of you as a nice person.

B. Conjugate the verb *kupenda* (*to love*) in the negative present tense.

I don't love
you don't love
s/he doesn't love
we don't love
you all don't love
they don't love
The past tense is used to express an action that occurred in the past. For example:

I went to the store yesterday.

past tense of the verb to go

IN ENGLISH
There are several verb forms that indicate that the action occurred in the past.

<table>
<thead>
<tr>
<th>Verb Form</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>simple past</td>
<td>I walked</td>
</tr>
<tr>
<td>past progressive</td>
<td>I was walking</td>
</tr>
<tr>
<td>past emphatic</td>
<td>I did walk</td>
</tr>
<tr>
<td>perfect</td>
<td>I have walked</td>
</tr>
<tr>
<td>past perfect</td>
<td>I had walked</td>
</tr>
<tr>
<td>past perfect progressive</td>
<td>I had been walking</td>
</tr>
</tbody>
</table>

The simple past is called "simple" because it is a simple tense; in other words, it consists of one word (walked in the example above). The other past tenses are called verb phrases or compound verbs; in other words, they consist of more than one word, an auxiliary plus a main verb.

This chapter focuses on the simple past tense. Auxiliary verbs are explained in Chapter 33 and compound tenses in Chapter 43.

To form the simple past tense of regular verbs, adding the suffix -ed to the dictionary form of the verb forms the past tense.

<table>
<thead>
<tr>
<th>Verb Form</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>to answer</td>
<td>I answered his question.</td>
</tr>
<tr>
<td>to borrow</td>
<td>They borrowed her bicycle.</td>
</tr>
</tbody>
</table>
Irregular verbs, however, change their form dramatically in the past tense. These are just a few examples:

- to bring: December brought snow and freezing rain.
- to fall: The tree fell on the house.
- to cling: The baby clung to her mother.

**KWA KISWAHILI**

There are several tenses that correspond to the six English tenses listed above.

**SIMPLE PAST:**

**Nilikimbia**

*I ran*

**PAST PROGRESSIVE:**

**Nilikuwa niki kimbia**

*I was running*

**PERFECT:**

**Nimekimbia**

*I have run*

**PAST PERFECT:**

**Nilikuwa nimekimbia**

*I had run*

**PAST PERFECT PROGRESSIVE:**

**Nilikuwa nimekuwa niki kimbia**

*I had been running*
Note that there is no past emphatic tense in Swahili. There is however, an additional form of the past tense that exists in Swahili but not in English. The -ka- tense describes an action that follows another action. It is described in greater detail below.

The simple past tense and the perfect tense are called "simple" because they are simple tenses; in other words, they consist of one word (nilitembea and nimetembea in the examples above). The other past tenses are called verb phrases or compound tenses; in other words, they consist of more than one word, an auxiliary plus a main verb. This chapter focuses on the simple past tense. You will learn more about the perfect tense in Chapter 26, about auxiliary verbs in Chapter 33, and about compound tenses in Chapter 43.

THE SIMPLE PAST TENSE
The simple past tense is called wakati uliopita. Its tense marker is the morpheme -li-, which occurs after the subject marker and before the verb. The form of the past tense is the same for every subject, including all the noun classes.

For monosyllabic verbs, use the verbal noun form of the verb.

\[
\text{wa} + \text{li} + \text{kunywa} = \text{alikunywa} \quad \text{be/she drank}
\]

- \text{verb (to drink; kunywa)}
- \text{tense marker (past)}
- \text{subject marker (third person plural)}
For verbs with more than one syllable, use the dictionary form of the verb.

\[ u + li + taka = \text{ulitaka} \quad \text{you wanted} \]

- verb (to want; dictionary form)
- tense marker (past)
- subject marker (second person singular)

THE -KA- TENSE
This tense is used to indicate a sequence of events. In a sequence of two verbs, the action of the verb marked by -ka- occurred after the time of the verb preceding it. Note that the verb itself incorporates the sense of both the conjunction and and the adverb then.

\[ \text{Nilifika nyumbani nikamwona}. \]
\[ I \text{ arrived at home and (then) saw him.} \]

The morpheme -ka- occurs after the subject marker and before the dictionary form of verb. Monosyllabic verbs, therefore, drop the infinitive prefix ku-. The form of the -ka-tense is the same for every subject marker, including all the noun classes.

\[ u + ka + enda = \text{ukaenda} \quad \text{and then you went} \]

- verb (to go; enda)
- tense marker (past sequence)
- subject marker (second person singular)
REVIEW

A. Change the following sentences from present tense to past tense.

1. I want to go to the movies.

2. The doctor is coming to dinner.

3. His grandmother breaks her hip.

4. Ndizi zinapikwa. (The bananas are being cooked.)

5. Majina yao yanatajwa. (Their names are being stated.)

B. Translate the following sentences.

1. I went to the market and bought oranges.

2. He said hello and then left.

3. Ulienda shuleni ukafanya nini?

4. Walinunua baisikeli wakasafiri.

5. Tulipika pilau tukala.
Chapter 25
NEGATIVE PAST

Like all verbs, a past tense verb can be negated. For example:

I did not go to the store last week.

past tense negative of the verb to go

IN ENGLISH
The past tense is made negative by putting did + not before the dictionary form of the verb.

You all did not go to the mosque.
The children did not like to eat chicken.

Sometimes did and not are contracted.

you did not ⇒ you didn’t

KWA KISWAHILI
The negative past tense is called wakati uliopita kanusho. It is formed with the negative prefix ha- + the subject marker + the negative tense marker -ku- + the dictionary form of the verb.

ha + m + ku + panda = hamkupanda (you all didn’t climb)

| verb (to climb; dictionary form) |
| negative tense marker (past) |
| subject marker (second person plural) |
| negative prefix |
Verbs with a second person singular subject (you) or a third person singular subject (he or she) form the past negative in the same way, but the negative prefix ha- combines with the a- or u- sound of the subject markers to create slightly different results.

ha + u + ku + lima = **hukulima** *(you didn't farm)*
- verb (to farm; dictionary form)
- negative tense marker (past)
- subject marker (second person singular)
- negative prefix

ha + a + ku + zunguka = **hakuzunguka** *(s/he didn't wander around)*
- verb (to wander around; dictionary form)
- negative tense marker (past)
- subject marker (third person singular)
- negative prefix

The only subject that forms the past negative differently is the first person singular (I). Instead of adding the negative prefix ha-, the first person singular uses the negative subject marker si- in place of its positive singular marker ni-.

si + ku + tembea = **sikutembea** *(I didn't walk)*
- verb (to walk; dictionary form)
- negative tense marker (past)
- negative subject marker (first person singular)
REVIEW

Rewrite the following sentences using the negative past tense.

1. The books were sold yesterday.

2. The teacher wrote on the blackboard.

3. The writer published a new novel.

4. Tulienda dukani. (We went to the store.)

5. Alishona gauni. (She sewed a dress.)
Chapter 26
PERFECT

The past tense is used to express an action that occurred in the past. The perfect (or present perfect) tense is one kind of past tense. It is used to indicate that the action occurred at least once, has just occurred, or began in the past but continues in the present.

Mariamu has gone out.

perfect tense of the verb to go

IN ENGLISH
The perfect tense is formed by using the word have or has + the past participle of the verb.

I have lived here for ten years.
The train has arrived at the station.

Sometimes the subject of the verb is contracted with have or has.

I have ⇒ I've
the train has ⇒ the train's

KWA KISWAHILI
The perfect tense is called tensi timilifu. Its tense marker is -me-, which occurs after the subject marker and before the verb. The rule for forming the perfect tense verb is the same for every subject marker, including all the noun classes.

For monosyllabic verbs, use the verbal noun form of the verb.
For verbs with more than one syllable, use the dictionary form of the verb.

\[
\text{wa + me + cheza} = \text{wamecheza they have played}
\]

**TAKE NOTE**

There are a few Swahili verbs that use the perfect tense with a present tense meaning.

- **kuchelewa** to be late  \(\text{nimechelewa} \)  
  \(I \text{ am late} \)

- **kukaa** to sit  \(\text{amekaa} \)  
  \(s/\text{he is sitting, s/ he sits} \)

- **kupotea** to be lost  \(\text{mmepotea} \)  
  \(\text{you all are lost} \)

- **kuchoka** to be tired  \(\text{wamechoka} \)  
  \(\text{they are tired} \)

- **kuvunjika** to be broken  \(\text{kimevunjika} \)  
  \(\text{it is broken (class 7)} \)

You will need to memorize the verbs that follow this rule.
REVIEW

Read the following paragraph. Circle the verbs that would be in the perfect tense in Swahili.

"We have wandered up and down this street five times. I think that we are lost," I said to my friend. "You've said that already," she answered grouchily. She has been grumpy all day, I thought to myself. "Have you ever thought about asking for directions?" I suggested. "We're late, you know," I added. "I know," she answered, "but I have been late before and it didn't matter."
Like all verbs, a perfect tense verb can be negated.

Mariamu has not gone out.

negative perfect tense of the verb to go

IN ENGLISH
The perfect tense is made negative by putting not or never between has or have and the past participle of the verb.

<table>
<thead>
<tr>
<th>PERFECT TENSE</th>
<th>NEGATIVE PERFECT TENSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>They have been to our new house.</td>
<td>They have not been to our new house.</td>
</tr>
<tr>
<td>She has left the country.</td>
<td>She has never left the country.</td>
</tr>
</tbody>
</table>

Sometimes the subject of the verb is contracted with has or have.

they have ⇒ they’ve
she has ⇒ she’s

Sometimes have or has is contracted with not.

they have not ⇒ they haven’t
she has not ⇒ she hasn’t
KWA KISWAHILI

The negative perfect tense is called tensi timilifu kanusho. Its tense marker is the perfect tense marker -ja-, which occurs after the subject marker but before the verb. It is formed with the negative prefix ha- + the subject marker + the tense marker -ja- + the dictionary form of the verb.

ha + zi + ja + uzwa = hazijauzwa (they haven’t been sold)

<table>
<thead>
<tr>
<th></th>
<th>verb (to be sold; dictionary form)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>negative tense marker (perfect)</td>
</tr>
<tr>
<td></td>
<td>subject marker (class 10)</td>
</tr>
<tr>
<td></td>
<td>negative prefix</td>
</tr>
</tbody>
</table>

Verbs with a second person singular subject (you) or a third person singular subject (he or she) form the past negative in the same way, but the negative prefix ha- combines with the a- or u- sound of the subject markers to create slightly different results.

ha + u + ja + soma = hujasoma (you haven't studied)

<table>
<thead>
<tr>
<th></th>
<th>verb (to study; dictionary form)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>negative tense marker (perfect)</td>
</tr>
<tr>
<td></td>
<td>subject marker (second person singular)</td>
</tr>
<tr>
<td></td>
<td>negative prefix</td>
</tr>
</tbody>
</table>

ha + a + ja + hitimu = hajahitimu (s/he hasn’t graduated)

<table>
<thead>
<tr>
<th></th>
<th>verb (to graduate; dictionary form)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>negative tense marker (perfect)</td>
</tr>
<tr>
<td></td>
<td>subject marker (third person singular)</td>
</tr>
<tr>
<td></td>
<td>negative prefix</td>
</tr>
</tbody>
</table>
The only subject that forms the past negative differently is the first person singular (I). Instead of adding the negative prefix ha-, the first person singular uses the negative subject marker si- in place of its positive singular marker ni-.

\[
\text{si} + \text{ja} + \text{hama} = \text{sijahama} \quad (I \text{ haven't relocated})
\]

\[
\text{si} + \text{ja} + \text{hama} = \text{sijahama} \quad (I \text{ haven't relocated})
\]

\[
\text{verb (to relocate; dictionary form)}
\]

\[
\text{negative tense marker (perfect)}
\]

\[
\text{negative subject marker (first person singular)}
\]

**TAKE NOTE**

The negative perfect in Swahili often implies that the action has not occurred yet, but that it may in the future.

**Sijatembelea Tanzania.**  
*I haven't visited Tanzania (yet).*

**Gari la moshi halijaja.**  
*The train hasn't come (yet).*
Rewrite the following sentences putting verbs in the negative perfect tense.

1. I have been to that store many times.

2. We've had a lot of rain this month.

3. A boy has fallen down the well.

4. **Wameenda msikitini.**
   *(They have gone to the mosque.)*

5. **Baisikeli imepotezwa.**
   *(The bicycle has been lost.)*

6. **Uhuru umefika.**
   *(Freedom has arrived)*
Chapter 28
FUTURE

The future tense is used to express an action that will occur in the future. For example:

I will go to the store later this afternoon.

futur tense of the verb to go

IN ENGLISH
The future tense is formed by using the word will + the dictionary form of the verb:

The party will start tomorrow.
The baby will crawl before she walks.

Sometimes the subject of the verb is contracted with will.

I will ⇒ I'll 
you will ⇒ you'll

KWA KISWAHILI
The future tense is called wakati ujao. Its tense marker is -ta-. It is formed by combining using the subject marker + the tense marker -ta- + the verb. The rule for forming the future tense verb is the same for every subject marker, including all the noun classes.
For monosyllabic verbs, use the verbal noun form of the verb.

\[ a + ta + kua = atakua \quad \text{s/he will grow} \]

- verb (to grow; kukua)
- future tense marker
- subject marker (third person singular)

For verbs with more than one syllable, use the dictionary form of the verb.

\[ wa + ta + nenepa = watanenepa \quad (\text{they will get fat}) \]

- verb (to get fat; dictionary form)
- future tense marker
- subject marker (third person plural)

**REVIEW**

Use the second person singular (you) to create future tense verbs for each of the infinitive verbs listed below.

**INFINITIVE**

**to go** kuenda

a. **ENGLISH FUTURE TENSE**

b. **SWAHLI FUTURE TENSE**

a. __________________________

b. __________________________

**to begin** kuanza

a. __________________________

b. __________________________
to laugh \textit{kucheka} 

\begin{enumerate}[a.]
\item \\
\item 
\end{enumerate}

to walk \textit{kutembea} 

\begin{enumerate}[a.]
\item \\
\item 
\end{enumerate}

to borrow \textit{kukopa} 

\begin{enumerate}[a.]
\item \\
\item 
\end{enumerate}
Chapter 29
NEGATIVE FUTURE

Like all verb tenses, the future tense can be negated.

She will not go to the store later today.

negative future tense of the verb to go

IN ENGLISH
The future tense is made negative by putting the word not between the word will and the dictionary form of the verb.

<table>
<thead>
<tr>
<th>FUTURE TENSE</th>
<th>NEGATIVE FUTURE TENSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The party will start tomorrow</td>
<td>The party will not start tomorrow.</td>
</tr>
<tr>
<td>The baby will crawl after she</td>
<td>The baby will not crawl until</td>
</tr>
<tr>
<td>walks.</td>
<td>after she walks.</td>
</tr>
</tbody>
</table>

Sometimes the words will and not are contracted.

the party will not start ⇒ the party won't start
the baby will not crawl ⇒ the baby won't crawl

KWA KISWAHILI
The negative future tense is called wakati ujao kanusho. It is formed by using the negative prefix ha- + the subject marker + the tense marker -ta- + the verb.
For monosyllabic verbs, use the verbal noun form of the verb.

\[ \text{ha + m + ta + kula = hamtakula (you all will not eat)} \]

- \text{verb (to eat; kula)}
- \text{tense marker (future)}
- \text{subject marker (second person plural)}
- \text{negative prefix}

For verbs with more than one syllable, use the dictionary form of the verb.

\[ \text{ha + wa + ta + nenepa = hawatanenepa (they will not get fat)} \]

- \text{verb (to get fat; dictionary form)}
- \text{tense marker (future)}
- \text{subject marker (third person plural)}
- \text{negative prefix}

Verbs with a second person singular subject (you) or a third person singular subject (he or she) form the past negative in the same way, but the negative prefix \text{ba} combines with the \text{a-} or \text{u-} sound of the subject markers to create slightly different results.

\[ \text{ha + u + ta + nunua = hutanunua (you will not buy)} \]

- \text{verb (to buy; dictionary form)}
- \text{tense marker (future)}
- \text{subject marker (second person singular)}
- \text{negative prefix}
ha + a + ta + zungumza = **hatazungumza** *(s/he will not converse)*

- verb (to converse; dictionary form)
- tense marker (future)
- subject marker (third person singular)
- negative prefix

The only subject that forms the past negative differently is the first person singular *(I)*. Instead of adding the negative prefix **ha-**, the first person singular uses the negative subject marker **si-** in place of its positive singular marker **ni-**.

si + ta + lala = **sitalala** *(I will not sleep)*

- verb (to sleep; dictionary form)
- tense marker (future)
- negative subject marker (first person singular)

**REVIEW**

Rewrite the following sentences using the negative future tense.

1. *Class will begin at 10 a.m.*

2. *The new store will open next week.*

3. *The warm season will be very humid this year.*
4. **Safari itakwisha kesho.**  
   *(The trip will end tomorrow.)*

5. **Kitabu kitaanguka chini.**  
   *(The book will fall down.)*

6. **Mti utakua pole pole.**  
   *(The tree will grow slowly.)*
Chapter 30
THE VERB 'TO BE'
KUWA

The verb *to be* is an irregular verb, which means that it is conjugated differently than other verbs in some of the tenses. Because it is irregular, it is studied separately from other verbs.

She *is* a good student.

present tense verb *to be*

**IN ENGLISH**

Like all verbs, the verb *to be* can be conjugated in the present, perfect, past, and future tenses, and in the positive and negative.

**Present Tense**
The verb *to be* conjugated in the present tense is the English verb which changes the most; it has three forms: *am, are, and is.*

<table>
<thead>
<tr>
<th>Subject</th>
<th>Form</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td><em>am</em></td>
</tr>
<tr>
<td>you</td>
<td><em>are</em></td>
</tr>
<tr>
<td>he, she, it</td>
<td><em>is</em></td>
</tr>
<tr>
<td>we</td>
<td><em>are</em></td>
</tr>
<tr>
<td>you all</td>
<td><em>are</em></td>
</tr>
<tr>
<td>they</td>
<td><em>are</em></td>
</tr>
</tbody>
</table>
In conversation the subject and the verb *to be* are often contracted.

I am ⇒ I'm  
you are ⇒ you’re  
he is ⇒ he’s  
she is ⇒ she’s  
it is ⇒ it’s  
we are ⇒ we’re  
they are ⇒ they’re

**Negative Present Tense**
To negate the present tense of the verb *to be*, simply add the word *not* after the verb *to be*.

I am not  
you are not  
he, she, it is not  
we are not  
you all are not  
they are not

**Present Tense**
There are two forms of the verb *to be* in the perfect tense: *have been* and *has been*.

I have been  
you have been  
he/she/it has been  
we have been  
you all have been  
they have been
In conversation, the subject is sometimes contracted with the helping verbs *have* and *has*.

I have been ⇒ I’ve been  
you have been ⇒ you’ve been  
he has been ⇒ he’s been  
she has been ⇒ she’s been  
it has been ⇒ it’s been  
we have been ⇒ we’ve been  
they have been ⇒ they’ve been

**Negative Present Tense**
To negate the perfect tense of the verb *to be*, add the word *not* in between *have* or *has* and the verb *to be*.

I have not been  
you have not been  
he/she/it has not been  
we have not been  
you all have not been  
they have not been

**Past Tense**
There are two forms of the verb *to be* in the past tense: *was* and *were*.

I was  
you were  
he/she/it was  
we were  
you all were  
they were
Negative Past Tense
To negate the past tense of the verb to be, add the word not after the verb to be.

\[
\begin{array}{ll}
\text{I was not} & \text{we were not} \\
\text{you were not} & \text{you all were not} \\
\text{he/she/it was not} & \text{they were not}
\end{array}
\]

In conversation the verb to be and the word not are sometimes contracted.

\[
\begin{array}{l}
\text{was not} \Rightarrow \text{wasn't} \\
\text{were not} \Rightarrow \text{we weren't}
\end{array}
\]

Future Tense
There is only one form of the verb to be in the future tense: will be.

\[
\begin{array}{ll}
\text{I will be} & \text{we will be} \\
\text{you will be} & \text{you all will be} \\
\text{he/she/it will be} & \text{they will be}
\end{array}
\]

In conversation sometimes the subject is contracted with will.

\[
\begin{array}{ll}
\text{I will be} \Rightarrow \text{I'll be} & \text{we will be} \Rightarrow \text{we'll be} \\
\text{you will be} \Rightarrow \text{you'll be} & \text{they will be} \Rightarrow \text{they'll be} \\
\text{he will be} \Rightarrow \text{he'll be} & \\
\text{she will be} \Rightarrow \text{she'll be} & \\
\text{it will be} \Rightarrow \text{it'll be} & 
\end{array}
\]
Negative Future Tense
To negate the future tense of the verb to be, add the word not in between the word will and the verb to be.

I will not be
you will not be
he/she/it will not be
we will not be
you all will not be
they will not be

In conversation sometimes the words will and not are contracted.

will not be ⇒ won't be

KWA KISWAHILI
The verb to be is kuwa; this is the verbal noun form of the word. Like all verbs, the verb to be can be conjugated in the present, perfect, past, and future tenses. It is only irregular in the present tense; the other tenses follow the same rules as most verbs.

Present Tense
The verb to be, conjugated in the present tense, has only one form for all subjects, including all the noun classes: ni.

Mimi ni mwanafunzi. I am a student.
Wewe ni mwanafunzi. You are a student.
Yeye ni mwanafunzi. He or she is a student.
Sisi ni wanafunzi. We are students.
Ninyi ni wanafunzi. You all are students.
Wao ni wanafunzi. They are students.
Kiti ni kigumu. The chair is hard. (class 7)
Mahali ni pazuri. The place is nice. (class 16)
Negative Present Tense
To negate the present tense of the verb *to be*, the word *si* is used for all subjects, including all the noun classes.

- **Mimi si daktari.** I am not a doctor.
- **Wewe si daktari.** You are not a doctor.
- **Yeye si daktari.** He/she is not a doctor.
- **Sisi si daktari.** We are not doctors.
- **Ninyi si daktari.** You all are not doctors.
- **Wao si daktari.** They are not doctors.
- **Hii si migomba.** These are not banana trees. (class 4)

Perfect Tense
To form the perfect tense of the verb *to be*, follow the rules for forming the perfect tense from monosyllabic verbs.

- subject marker + -me- perfect tense marker + kuwa
  - **nimekuwa** I have been
  - **umekuwa** you have been
  - **wamekuwa** they have been (class 2)
  - **yamekuwa** they have been (class 6)

Negative Perfect Tense
There are two possible ways to negate the perfect tense of the verb *to be*. One way is to follow the rules for negating the perfect tense of monosyllabic verbs.

- negative prefix *ba-* + subject marker + -ja- tense marker + wa
hatujawa we haven't been
hamjawa you all haven't been
hawajawa they haven't been (class 2)
hazijawa they haven't been (class 10)

Or you can keep the ku- prefix of the verbal noun form of the verb kuwa.

negative prefix ha- + subject marker + -ja- tense marker + kuwa

hatujakuwa we haven't been
hamjakuwa you all haven't been
hawajakuwa they haven't been (class 2)
hazijakuwa they haven't been (class 10)

Remember that the formation of the first person (I), second person (you) and third person (he or she) is slightly different.

sijawa or sijakuwa I haven't been
hujawa or hujakuwa you haven't been
hajawa or hajakuwa he/she hasn't been

Past Tense
To form the past tense of the verb to be, follow the rules for forming the past tense from monosyllabic verbs.

subject marker + -li- tense marker + kuwa
Negative Past Tense
To negate the past tense of the verb to be, follow the rules for forming the negative past tense from monosyllabic verbs.

negative prefix ha- + subject marker + -ku- tense marker + wa

hatukuwa we weren't
hamkuwa you all weren't
hawakuwa they weren't (class 2)
halikuwa it wasn't (class 5)

Remember that the formation of the first person (I), second person (you) and third person (he or she) are slightly different.

sikuwa I wasn't
hukuwa you weren't
hakuwa he or she wasn't

Future Tense
To form the future tense of the verb to be, follow the rules for forming the future tense from monosyllabic verbs.

subject marker + -ta- tense marker + kuwa

watakuwa they will be (class 2)
utakuwa it will be (class 11 or 14)
zitakuwa they will be (class 10)
kutakuwa it will be (class 15)
Negative Future Tense

To negate the future tense of the verb to be, follow the rules for forming the negative future tense from monosyllabic verbs.

Negative prefix **ha-** + subject marker + **-ta-** tense marker + **kuwa**

- **hamtakuwa** you all will not be
- **hawatakuwa** they will not be (class 2)
- **hazitakuwa** they will not be (class 10)
- **hakutakuwa** it will not be (class 15)

Remember that the formation of the first person (I), second person (you) and third person (he or she) are slightly different.

- **sitakuwa** I will not be
- **hutakuwa** you will not be
- **hatakuwa** he or she will not be
Fill in the blanks to conjugate the verb *to be* in both English and Swahili.

a. *I ______ a teacher.*

b. *Mimi ______ mwalimu.*

1. **present tense**
   a. ______________________
   b. ______________________

2. **negative present**
   a. ______________________
   b. ______________________

3. **perfect tense**
   a. ______________________
   b. ______________________

4. **negative perfect**
   a. ______________________
   b. ______________________

5. **past tense**
   a. ______________________
   b. ______________________

6. **negative past**
   a. ______________________
   b. ______________________
7. future tense
   a. _____________________
   b. _____________________

8. negative future
   a. _____________________
   b. _____________________
Chapter 31
THE LOCATIVE VERB ‘TO BE’

One use of the verb *to be* is to state a noun’s location. For example:

He is in the living room.

The verb to be

prepositional phrase indicating location

IN ENGLISH
In order to express a noun’s location, use the verb *to be* with a preposition or a prepositional phrase. These prepositions include *at, in, on, above, below, near, under, behind, among, between, beside, etc.*. The prepositional phrases include *next to, in front of, to the side, etc.*. Regardless of the preposition used, the verb *to be* is conjugated normally. (See Chapter 30, The Verb ‘to be’.)

I am in the house.
I have been among the trees.
I was on the roof.
I will be under the awning.

I am not in the house
I have not been among the trees.
I was not on the roof.
I will not be under the awning.
KWA KISWAHILI
In order to express a noun’s location, a locative suffix is added to the verb to be, kuwa. There are three locative suffixes: -po, -ko and -mo. These form three locative verbs: kuwapo, kuwako, and kuwamo.

The suffix -po is used to refer to either a specific location or one that is close to the speaker. It is used even if the verb is followed by a word that means here.

Majengo yapo hapa.
*The buildings are here.*

Nitakuwapo Dar es Salaam.
*I will be (here) in Dar es Salaam.*

The suffix -ko is used to refer to either a general location or one that is far from the speaker.

Alikuwako maktabani. *He was at the library.*

Mit iko msituni. *The trees are in the forest.*

The suffix -mo is used to refer to emphasize that the noun is inside or on the surface of a location.

Kitabu kimo mfukoni.
*The book is in the bag.*

Glasi ilikuwamo mezani.
*The glass was on the table.*

As you can see, the -po, -ko, and -mo suffixes can be used to translate the English prepositions in, at, or on. Other prepositions and prepositional phrases will be translated using Swahili prepositions in combination with the locative verbs.
Alikuwako baina yetu. *She was between us.*

| locative verb suffix | preposition (baina, between) |

**Present Tense**

To form the present tense of the locative verb, combine the subject marker + the locative suffix. The only subject marker that is different from the ones you have already learned is the third person singular (he or she; class 1) which is *yu* instead of *a*.

<table>
<thead>
<tr>
<th>KUWAPO</th>
<th>KUWAKO</th>
<th>KUWAMO</th>
</tr>
</thead>
<tbody>
<tr>
<td>nipo <em>I am here</em></td>
<td>kuko <em>you are there</em></td>
<td>nimo <em>I am inside</em></td>
</tr>
<tr>
<td>upo <em>you are here</em></td>
<td>yuko <em>s/he is there</em></td>
<td>umo <em>you are inside</em></td>
</tr>
<tr>
<td>Yupo <em>s/he is here</em></td>
<td>Yupo <em>s/he is there</em></td>
<td>Yumo <em>s/he is inside</em></td>
</tr>
<tr>
<td>tupo <em>we are here</em></td>
<td>tuko <em>we are inside</em></td>
<td>tumo <em>we are inside</em></td>
</tr>
<tr>
<td>mpo <em>you all are here</em></td>
<td>mko <em>you all are there</em></td>
<td>mmo <em>you all are inside</em></td>
</tr>
<tr>
<td>wapo <em>they are here</em></td>
<td>wako <em>they are there</em></td>
<td>wamo <em>they are inside</em></td>
</tr>
<tr>
<td>lipo <em>it is here</em></td>
<td>liko <em>it is there</em></td>
<td>limo <em>it is inside</em></td>
</tr>
</tbody>
</table>

**Negative Present Tense**

To negate the present tense of the locative verb, add the negative prefix *ha*. Remember that the first person singular (*I*), second person singular (*you*), and third person singular (he or she) have slightly different negative prefixes.
**KUWAPO** | **KUWAKO** | **KUWAMO**
---|---|---
*sipo* I am not here | *huko* you are not there | *simo* I am not inside
*hupo* you are not here | *huko* you are not there | *humo* you are not inside
*hayupo* he/she is not here | *hayuko* he/she is not there | *hayumo* he/she is not inside
*hatuypo* we are not here | *hatumo* we are not inside
*hampo* you all are not here | *hamko* you all are not there | *hammo* you all are not inside
*hawapo* they are not here | *hawako* they are not there | *hawamo* they are not inside
*halipo* it is not here (class 5) | *haliko* it is not there (class 5) | *halimo* it is not inside (class 5)

**Other Tenses**

Only in the present tense and negative present tense is the locative verb conjugated differently from the regular verb *kuwa*. All other tenses are conjugated in the same way as they are for the verb *kuwa*, but –*po*, –*ko*, or –*mo* are added as suffixes.

**PERFECT**

*Wamekuwapo*

they have been here

**NEGATIVE PERFECT**

*Hawajawapo*

they have not been here

**PAST**

*Walikuwako*

they were there

**NEGATIVE PAST**

*Hawakuwako*

they were not there
FUTURE

watakuwamo
they will be inside

NEGATIVE FUTURE

hawatakuwamo
they will not be inside

REVIEW

Circle the locative suffix you would use if translating these sentences into Swahili.

1. The boys are at the pool. -po -ko -mo
2. I am at home. -po -ko -mo
3. Where are you? -po -ko -mo
4. We are in Kenya. -po -ko -mo
5. Mt. Kilimanjaro is in Tanzania. -po -ko -mo
6. The oranges are in the sack. -po -ko -mo
7. What is biting you is in your clothes.\textsuperscript{12} -po -ko -mo
8. We are in the store. -po -ko -mo
9. The university is right here. -po -ko -mo
10. The library is right over there. -po -ko -mo

\textsuperscript{12} An English translation of a Swahili proverb.
Chapter 32
THE VERB 'TO HAVE'

The verb *to have* is used to indicate that one noun possesses another noun. It is an **irregular verb**, which means that it is conjugated differently than other verbs in some tenses. Because it is irregular, it is studied separately from other verbs.

I have a dog.

<table>
<thead>
<tr>
<th>present tense</th>
</tr>
</thead>
</table>
I had a dog.

<table>
<thead>
<tr>
<th>past tense</th>
</tr>
</thead>
</table>
I will have a dog.

| future tense |

IN ENGLISH
Like all verbs, the verb *to have* can be conjugated in the present, perfect, past, and future tenses, and in the positive and negative.

**Present Tense**
The verb *to have*, conjugated in the present tense, has two forms: *have* and *has*.

<table>
<thead>
<tr>
<th>I have</th>
<th>we have</th>
</tr>
</thead>
<tbody>
<tr>
<td>you have</td>
<td>you all have</td>
</tr>
<tr>
<td>he, she, it has</td>
<td>they have</td>
</tr>
</tbody>
</table>
Negative Present Tense
To negate the present tense of the verb to have, add the words do not before the verb have.

I do not have
you do not have
he, she, it does not have
we do not have
you all do not have
they do not have

In conversation sometimes the words do or does are contracted with the word not.

do not have \(\Rightarrow\) don't have
does not have \(\Rightarrow\) doesn't have

Perfect Tense
There are two forms of the verb to have in the perfect tense: have had and has had.

I have had
you have had
he/she/it has had
we have had
you all have had
they have had

In conversation sometimes the subject is contracted with the helping verbs have and has.

I have had \(\Rightarrow\) I’ve had
you have had \(\Rightarrow\) you’ve had
he has had \(\Rightarrow\) he’s had
she has had \(\Rightarrow\) she’s had
it has had \(\Rightarrow\) it’s had
we have had \(\Rightarrow\) we’ve had
they have had \(\Rightarrow\) they’ve had
Swahili Learners' Reference Grammar

Negative Perfect Tense

To negate the perfect tense of the verb to *have*, add the word *not* in between *have* or *has* and the verb *had*.

- I *have not had*
- you *have not had*
- he/she/it *has not had*

- we *have not had*
- you all *have not had*
- they *have not had*

In conversation sometimes the words *have* or *has* are contracted with *not*.

- *have not had* → *haven’t had*
- *has not had* → *hasn’t had*

Past Tense

There is only one form of the verb to *have* in the past tense: *had*.

- I *had*
- you *had*
- he/she/it *had*

- we *had*
- you all *had*
- they *had*

Negative Past Tense

To negate the past tense of the verb to *have*, add the words *did* *not* before the verb *have*.

- I *did not have*
- you *did not have*
- he/she/it *did not have*

- we *did not have*
- you all *did not have*
- they *did not have*
In conversation the words *did* and *not* are sometimes contracted.

\[
did \text{ not } have \Rightarrow \text{ didn't have}
\]

**Future Tense**
There is only one form of the verb *to have* in the future tense: *will have*.

\[
\begin{align*}
\text{I will have} & \quad \text{we will have} \\
\text{you will have} & \quad \text{you all will have} \\
\text{he/she/it will have} & \quad \text{they will have}
\end{align*}
\]

In conversation sometimes the subject is contracted with *will*.

\[
\begin{align*}
\text{I will have} & \Rightarrow \text{I'll have} \\
\text{you will have} & \Rightarrow \text{you'll have} \\
\text{he will have} & \Rightarrow \text{he'll have} \\
\text{she will have} & \Rightarrow \text{she'll have} \\
\text{it will have} & \Rightarrow \text{it'll have} \\
\text{we will have} & \Rightarrow \text{we'll have} \\
\text{they will have} & \Rightarrow \text{they'll have}
\end{align*}
\]

**Negative Future Tense**
To negate the future tense of the verb *to have*, add the word *not* in between the word *will* and the verb *have*.

\[
\begin{align*}
\text{I won't have} & \Rightarrow \text{I won't have} \\
\text{you won't have} & \Rightarrow \text{you won't have} \\
\text{he won't have} & \Rightarrow \text{he won't have} \\
\text{she won't have} & \Rightarrow \text{she won't have} \\
\text{it won't have} & \Rightarrow \text{it won't have} \\
\text{we won't have} & \Rightarrow \text{we won't have} \\
\text{they won't have} & \Rightarrow \text{they won't have}
\end{align*}
\]
I will not have
you will not have
he/she/it will not have
we will not have
you all will not have
they will not have

In conversation sometimes the words will and not are contracted to form the word won't.

I will not have ⇒ I won't have
you will not have ⇒ you won’t have
he/she/it will not have ⇒ he/she/it won’t have
we will not have ⇒ we won’t have
they will not have ⇒ they won’t have

KWA KISWAHILI
The verb to have is used to indicate that one noun possesses another noun. It is an irregular verb, which means that it is conjugated differently than other verbs in some tenses. Because it is irregular, it is studied separately from other verbs.

The infinitive of the verb to have in Swahili is kuwa na, which literally means to be with. It is considered an irregular verb because, only most verbs, in the present tense the conjugated verb is not formed from this infinitive. Instead, in the present tense the verb acts as if its infinitive is kuna.

Like all verbs, the verb to have can be conjugated in the present, perfect, past, and future tenses, and in the positive and negative.
Present Tense
The verb *kuwa na*, conjugated in the present tense, is formed by combining the subject prefix with the stem *-na*. Subject prefixes are explained in Chapter 20.

<table>
<thead>
<tr>
<th>Subject Prefix</th>
<th>Verb Stem</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>nina</strong> I have</td>
<td>tuna we have</td>
</tr>
<tr>
<td><strong>una</strong> you have</td>
<td>mna you all have</td>
</tr>
<tr>
<td><strong>ana</strong> he or she has</td>
<td>wana they have</td>
</tr>
<tr>
<td><strong>ina</strong> it has (class 9)</td>
<td>zina they have (class 10)</td>
</tr>
</tbody>
</table>

Negative Present Tense
To negate the present tense of the verb *kuwa na*, combine the negative marker *ha*– with the subject prefix and the stem *-na*.

\[
ha + tu + na = hatuna \text{ we do not have}
\]

The formation of the first person (I), second person (you) and third person (he or she) is slightly different, just as it is for regular verbs.

<table>
<thead>
<tr>
<th>Subject Prefix</th>
<th>Negation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>sina</strong> I don’t have</td>
<td></td>
</tr>
<tr>
<td><strong>huna</strong> you don’t have</td>
<td></td>
</tr>
<tr>
<td><strong>hana</strong> he or she doesn’t have</td>
<td></td>
</tr>
</tbody>
</table>
Perfect Tense
To form the perfect tense of the verb *to have*, follow the rules for forming the perfect tense from monosyllabic verbs.

- **subject marker** + **-me- perfect tense marker** + **kuwa na**
  - *nimkuwa na*  *I have had*
  - *umekuwa na*  *you have had*
  - *wamekuwa na*  *they have had* (class 2)
  - *yamekuwa na*  *they have had* (class 6)

Negative Perfect Tense
There are two possible ways to negate the perfect tense of the verb *to have*. One way is to follow the rules for negating the perfect tense of monosyllabic verbs.

- **negative prefix** *ha-* + subject marker + **-ja- tense marker** + *wa na*
  - *hatujawa na*  *we haven’t had*
  - *hamjawa na*  *you all haven’t had*
  - *hawajawa na*  *they haven’t had* (class 2)
  - *hazijawa na*  *they haven’t had* (class 10)
Or you can keep the ku- prefix of the verbal noun form of the verb kuwa na.

negative prefix ha- + subject marker + -ja- tense marker + kuwa na

hatujakuwa na we haven't had
hamjakuwa na you all haven’t had
hawajakuwa na they haven’t had (class 2)
hazijakuwa na they haven’t had (class 10)

Remember that the formation of the first person (I), second person (you) and third person (he or she) is slightly different.

sijawa na or sijakuwa na I haven’t had
hujawa na or hujakuwa na you haven’t bad
hajawa na or hajakuwa na he/she hasn’t had

Past Tense
To form the past tense of the verb to have, follow the rules for forming the past tense from monosyllabic verbs.

subject marker + -li- tense marker + kuwa na

alikuwa na be had
tulikuwa na we had
mlikuwa na you all had
ilikiwa na they had (class 4) or it had (class 9)
Negative Past Tense
To negate the past tense of the verb to be, follow the rules for forming the negative past tense from monosyllabic verbs.

negative prefix ha- + subject marker + -ku- tense marker + wa na

hatukuwa na we did not have
hamkuwa na you all did not have
hawakuwa na they did not have (class 2)
halitakuwa na it didn’t have (class 5)

Remember that the formation of the first person (I), second person (you) and third person (he or she) are slightly different.

sikuwa na I didn’t have
hukuwa na you didn’t have
hakuwa na he or didn’t have

Future Tense
To form the future tense of the verb to be, follow the rules for forming the future tense from monosyllabic verbs.

subject marker + -ta- tense marker + kuwa na

watakuwa na they will have (class 2)
utakuwa na it will have (class 11 or 14)
zitakuwa na they will have (class 10)
kutakuwa na it will have (class 15)
Negative Future Tense
To negate the future tense of the verb *to have*, follow the rules for forming the negative future tense from monosyllabic verbs.

negative prefix **ha-** + subject marker + **-ta-** tense marker + *kuwa na*

- **hamtakuwa na** you all will not have
- **hawatakuwa na** they will not have (class 2)
- **hazitakuwa na** they will not have (class 10)
- **hakutakuwa na** it will not have (class 15)

Remember that the formation of the first person (I), second person (you) and third person (he or she) are slightly different.

- **sitakuwa na** I will not have
- **hutakuwa na** you will not have
- **hatakuwa na** he or she will not have

**REVIEW**

Fill in the blanks to conjugate the verb *to have* in both English and Swahili.

A verb is called an **auxiliary verb** or **helping verb** when it helps another verb form one of its tenses. (See Chapter 21, *Introduction to Verbs and Verb Tenses*, and Chapter 43, *Compound Tenses.*) When it is used alone, it functions as a main verb.

\[
\begin{align*}
\text{His mother} & \quad \text{is cooking rice.} \\
\text{auxiliary verb} & \quad \text{is} \\
\text{main verb} & \quad \text{cooking} \\
\text{verb phrase} & \quad \text{rice.}
\end{align*}
\]

\[
\begin{align*}
\text{His mother} & \quad \text{is a Muslim.} \\
\text{main verb} & \\
\text{verb phrase} & \quad \text{a Muslim.}
\end{align*}
\]

\[
\begin{align*}
\text{Juma} & \quad \text{has left the room.} \\
\text{auxiliary verb} & \quad \text{has} \\
\text{main verb} & \quad \text{left} \\
\text{verb phrase} & \quad \text{the room.}
\end{align*}
\]

\[
\begin{align*}
\text{Juma} & \quad \text{has a bicycle.} \\
\text{main verb} & \\
\text{verb phrase} & \quad \text{a bicycle.}
\end{align*}
\]

\[
\begin{align*}
\text{The students} & \quad \text{did understand.} \\
\text{auxiliary verb} & \quad \text{did} \\
\text{main verb} & \quad \text{understand.}
\end{align*}
\]

\[
\begin{align*}
\text{The students} & \quad \text{did homework.} \\
\text{main verb} & \\
\text{verb phrase} &
\end{align*}
\]

An auxiliary verb plus a main verb form a **compound verb**, also called a **verb phrase**.
IN ENGLISH
There are several auxiliary verbs: forms of to have, to be, and to do, as well as a series of auxiliary words such as will, would, may, might, must, can, and could, which are used to change the meaning of the main verb.

Auxiliary verbs and words serve seven purposes:

1. to indicate the tense of the main verb in a verb phrase. See Chapter 21, Introduction to Verb and Verb Tenses.

   present \[
   \text{His mother is cooking rice.}
   \]
   \[
   \text{auxiliary to be} \quad \text{verb phrase}
   \]

   perfect \[
   \text{Juma has left the room.}
   \]
   \[
   \text{auxiliary to have} \quad \text{verb phrase}
   \]

   future \[
   \text{We will swim after lunch.}
   \]
   \[
   \text{auxiliary will} \quad \text{verb phrase}
   \]
2. to help form the perfect tenses. See Chapter 43, *Compound Tenses*.

Juma *has left* the room.

perfect

We *had visited* her in the hospital.

past perfect

3. to help form the progressive forms of the present, past, and future tenses. See Chapter 22, *Present*, and Chapter 43, *Compound Tenses*.

His mother *is cooking* rice.

present progressive

She *was watching* a movie.

past progressive

They *will be travelling*.

future progressive

4. to indicate the passive voice. See Chapter 44.

Sudi *is liked* by his classmates.

present passive

She *was seen* riding her bicycle.

past passive
5. to help form questions and to make sentences negative. See Chapters 49 and 50.

*Does* Zakia *like* breadfruit?
Zakia *does not* like breadfruit.

6. to help form the emphatic forms of the present and past tenses. See Chapter 22, *Present*, and Chapter 24, *Past Tense*.

His mother *does like* to cook rice.

<table>
<thead>
<tr>
<th>present emphatic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Juma <em>did leave</em> the room.</td>
</tr>
<tr>
<td>past emphatic</td>
</tr>
</tbody>
</table>

5. to help form ideas of possibility or probability. See Chapter 39, *The Subjunctive Mood*.

Our friends *may visit* next week.

**KWA KISWAHILI**
Most tenses or ideas that are composed of a verb phrase in English are expressed by a single verb in Swahili.

His mother *is cooking* rice.

- in English: present progressive
- in Swahili: present → **anapika** or **apika**
Juma *has left* the room.
- in English: perfect
- in Swahili: perfect → *ameondoka*

We *will swim* after lunch.
- in English: future
- in Swahili: future → *tutaogolea*

Sudi *is liked* by his classmates.
- in English: present passive
- in Swahili: present passive → *anapendwa*

She *was seen* riding her bicycle.
- in English: past passive
- in Swahili: past passive → *alionwa*

*Does* Zakia *like* breadfruit?
- in English: present interrogative
- in Swahili: present → *anapenda*

Zakia *does not like* breadfruit.
- in English: present negative
- in Swahili: present negative → *hapendi*

His mother *does like* to cook rice.
- in English: present emphatic
- in Swahili: present → *anapenda* or *apenda*

Our friends *may visit* next week.
- in English: subjunctive
- in Swahili: present conditional → *wangetembelea*
Perfect and progressive forms, however, are expressed with a verb phrase or compound tense, which are explained in Chapter 43. In verb phrases, the verb *kuwa* (to be) functions as an auxiliary verb.

*Tulikuwa tukienda shuleni.*
*We were going to school.*

**REVIEW**

Underline the verbs and verb phrases in the following paragraph. Circle the auxiliary verbs.

Because Chausika was always asking his wife to go to the shop, his brother Mashaka had thought about buying him a bicycle. Mashaka went to the local bicycle repair shop and tried to buy a used bicycle. After bargaining he was finally able to get the bike for a good price. “My brother will ride this bike every day,” he thought to himself. Now Chausika does not need to ask his wife to go to the shop.
Chapter 34
OBJECTS

The object of a sentence is the person, idea or object toward whom or which the action of the verb is directed. It answers the question whom? or what? asked after a verb or preposition.

Alwiya enters the school.

verb direct object

- Alwiya enters what? The school.
- The school is the direct object of the verb enters.

Adija walked toward Juma's house.

verb object of a preposition

- Juma's house is the object of the preposition toward.

The old man will mail the letter to me.

verb direct indirect object

- The old man will mail what? The letter.
- The letter is the direct object of the verb will mail.
- The old man will mail the letter to whom? Me.
- Me is the indirect object of the verb will mail.
The three types of objects will be studied separately: **direct object** (Chapter 35), **indirect object** (Chapter 36), and **object of the preposition** (Chapter 48).

**IN ENGLISH**
An object is a noun or a pronoun.

\[
\text{Fatma loves Suhail.} \\
\text{noun} \\
\text{Whom does Fatma love? Suhail.}
\]

\[
\text{Fatma loves him.} \\
\text{pronoun} \\
\text{Whom does Fatma love? Him.}
\]

**KWA KISWAHILI**
An object is called **mtenda** or **shamirisho**. The plural, **objects**, are **watenda** or **shamirisho**.

An object can be a noun or pronoun, but it can also be represented by an object marker that agrees with the noun or pronoun in class.

\[
\text{Fatma anampenda Suhail.} \quad \text{Fatma loves Suhail.} \\
\text{Fatma anampenda yeye.} \quad \text{Fatma loves him.} \\
\text{Fatma anampenda.} \quad \text{Fatma loves him.}
\]

Every personal pronoun and every noun class has an object marker that can be used to express a direct object. An object marker is called **kiambishi kati cha shamirisho**; the plural is **viambishi kati vya shamirisho**.

The object marker goes between the tense marker and the dictionary form of the verb, following this structure:

subject marker + tense marker + object marker + dictionary form of the verb

Object markers can be used with any tense, in the affirmative or negative.

There are three situations in which object markers are used.
1. An object marker must be used when the direct object is a person or a personal pronoun.

   Tunamfahamu Adija. We know Adija.
   Tunamfahamu yeye. We know her.
   Tunamfahamu. We know her.

2. If the direct object is understood, an object marker can be used in place of the noun that is the direct object; in this case it functions like a pronoun in English.

   instead of: Walinunua vitabu. They bought books.
   you can say: Walivinunua. They bought them.

3. An object marker can be used together with a direct object for emphasis.

   Alizitaka ndizi. He wanted bananas (as opposed to apples).
Underline the objects in the sentences below.

1. I took Zakia to the party in town.
2. Abunawas bought a donkey at the market.
3. The rooster crowed at dawn, waking the whole family.
4. Bring your books to class tomorrow.
5. The teacher invited us to her house for a party.
Chapter 35
DIRECT OBJECTS

A **direct object** is an object that receives the action of the verb directly. It answers the question *whom*? or *what*? asked after the verb.

*Musa is reading the book.*

- Musa is reading what? The book.
- *The book* is the direct object.

*Mariamu likes Usi.*

- Mariamu likes whom? Usi.
- *Usi* is the direct object.

Verbs can be classified according to whether or not they take a direct object.

A **transitive verb** is a verb that takes a direct object. It is indicated by the abbreviation *v.t.* (verb transitive) in dictionaries. You learned about transitive verbs in Chapter 21 (Introduction to Verbs and Verb Tenses).

*Juma loves Adi*ja.

    |    |
    transitive direct object

An **intransitive verb** is a verb that does not take a direct object. It is indicated by the abbreviation *v.i.* (verb intransitive) in dictionaries. You learned about intransitive verbs in Chapter 21 (Introduction to Verbs and Verb Tenses).
**IN ENGLISH**

A **direct object** is a noun or pronoun that receives the action of the verb without a preposition between the verb and the noun or pronoun object.

\[
\text{Lubaya is building a new house.}
\]

\[
\text{verb} \quad \text{direct object}
\]

\[
\text{The teacher likes her.}
\]

\[
\text{verb} \quad \text{direct object}
\]

**KWA KISWAHILI**

A direct object is called **shamirisho yambwa**. As in English, a direct object is a noun or pronoun that receives the action of the verb directly, without a preposition. (Prepositions are explained in Chapter 47.) It answers the question **nani?** (who?) or **nini?** (what?) asked after the verb.

\[
\text{Nilikopa pesa. I borrowed money.}
\]

- Nilikopa nini? Pesa.
- No preposition separates **pesa** from the verb **kukopa**.
- Therefore, **pesa** is the direct object.
Abdul atanunua machungwa. *Abdul will buy oranges.*

- No preposition separates *machungwa* from the verb *kununua*.
- Therefore, *machungwa* is the direct object.

As with English verbs, Swahili verbs can be transitive or intransitive depending on whether or not they are followed by a direct object.

The object marker, covered in Chapter 34, is used only for direct objects.

**TAKE NOTE**

English and Swahili do not have the same relationship between a verb and its object. For example, a verb may take an indirect object in English but a direct object in Swahili, or an object of a preposition in English but a direct object in Swahili. Therefore, when you learn a Swahili verb it is important to find out if its meaning incorporates a preposition. Your textbook and dictionaries will indicate when the meaning of a Swahili verb incorporates a preposition.
Here are some differences you are likely to encounter.

1. **ENGLISH**: object of a preposition ⇒
   **SWAHILI**: direct object

   He is looking for coffee.
   - Function in English: object of a preposition
   - *He is looking for what? Coffee.*
   - *Coffee is the object of the preposition for.*

   **Anatafuta kahawa.**
   - Function in Swahili: direct object
   - **Anatafuta nini? Kahawa.**
   - The verb *kutafuta* is not followed by a preposition; therefore, its object is a direct object.

   Many common verbs require an object of a preposition in English, but a direct object in Swahili.

   - **to look at** ⇒ **kuangalia**
   - **to wait for** ⇒ **kusubiri**

2. **ENGLISH**: indirect object ⇒ **SWAHILI**: direct object

   We gave *him* five hundred shillings.
   - Function in English: indirect object
   - *We gave books to whom? Him*
   - *Him* is the indirect object of the verb *to give* (five hundred shillings is the direct object).
Tulimpa shilingi mia tano.

- Function in Swahili: direct object.
- **Tulimpa nani shilingi mia tano? Yeye** (expressed with the class 1 object marker $-m$).
- The verb *kupa* is not followed by a preposition; therefore, its object is a direct object.

Several common verbs require an indirect object in English but a direct object in Swahili.

<table>
<thead>
<tr>
<th>English (Indirect Object)</th>
<th>Swahili (Direct Object)</th>
</tr>
</thead>
<tbody>
<tr>
<td>to listen to</td>
<td>kusikiliza</td>
</tr>
<tr>
<td>to give to</td>
<td>kupa</td>
</tr>
</tbody>
</table>

**REVIEW**

Underline the direct object in each of the following sentences.

1. She gave me a present.

2. Zulekha is reading the newspaper.

3. Pili will drive the car.

4. Hud visited his grandmother.

5. Ammar wrote a letter to his sister.
Chapter 36
INDIRECT OBJECTS

An **indirect object** is a noun or pronoun that receives the action of the verb indirectly.

\[
\text{I gave the books to the teacher.}
\]

| verb | indirect object |

**IN ENGLISH**
An **indirect object** is a noun or pronoun that receives the action of the verb with the preposition *to* relating it to the verb. It answers the question *to whom?* or *to what?* asked after the verb.

She talked *to the teacher* after school.
- She talked to whom? The teacher.
- *The teacher* is the indirect object.

He returned books *to the library*.
- He returned books to what? The library.
- *The library* is the indirect object.

**KWA KISWAHILI**
An indirect object is called **shamirisho yambiwa**. It is used as a second object after a direct object. It does not follow prepositions, because the meaning of the preposition *to* or *for* is included in the verb itself. It answers the question *what?* asked after the direct object.
Some verbs are naturally prepositional, like *kupa*, which means *to give*.

**Ulimpa daktari pesa zangu.**
You gave the doctor my money.
- *Ulimpa daktari nini? Pesa zangu.*

Other verbs are made prepositional with an **applied extension**, also known as a **prepositional extension** or **mnyambuliko wa kufanyia**.

**Babangu alininulia baisikeli.**
My father bought me a bicycle.
- *Babangu alininulia nini? Baisikeli.*
- *kununulia = to buy for (from kununua, to buy)*

Prepositional verbs are explained in Chapter 41 (Verb Extensions).
REVIEW

Underline the indirect object in each of the following sentences.

1. Lioba read a story to her grandmother in the hospital.
2. I sent a letter to my family last week.
3. The teacher gave me a good grade in the course.
4. The children will speak to you about borrowing your toy.
5. Juma drove the car to the store.
Chapter 37
INTRODUCTION TO MOOD

In the grammatical sense, mood is a term applied to verb tenses. Different moods serve different purposes. For instance, the verb tenses which state a fact belong to one mood, and the verb tense which gives orders belongs to another. Some moods have multiple tenses, while others have only one tense. For example:

You are studying. (indicative mood)
Study! (imperative mood)
I wish you would study. (subjunctive mood)

You should recognize the names of moods so that you will know what your Swahili textbook is referring to when it uses these terms. You will learn when to use the various moods as you learn verbs and their tenses.

IN ENGLISH
Verbs can be in one of three moods.

1. The indicative mood is used to state the factual action of the verb. This is the most common mood, and most of the verb forms that you use in everyday conversation belong to the indicative mood. The majority of the tenses studied in this book belong to the indicative mood: for instance, the present tense (Chapter 22), the perfect tense (Chapter 26), the past tense (Chapter 24), and the future tense (Chapter 28).
Zuhura is travelling to Uganda.

Abdul-Swammad has gone out.

The workman finished his job.

You will arrive tomorrow.

2. The imperative mood is used to give commands or orders. It is explained in Chapter 38. This mood is not divided into tenses.

Sudi, wash the dishes!

3. The subjunctive mood is used to express a wish, hope, uncertainty or other similar attitude toward a fact or idea. It is explained in Chapter 39. This mood is not divided into tenses.

I want you to go to the store.
The doctor suggested that my father not eat salt.
KWA KISWAHILI
Verbs can be in one of four moods, called hali.

1. As in English, the indicative mood is the most common. The majority of the tenses studied in this book belong to the indicative mood: for instance, the present tense (Chapter 22), the perfect tense (Chapter 26), the past tense (Chapter 24), and the future tense (Chapter 28). In Swahili the indicative mood is called hali ya kuarifu.

2. As in English, the imperative mood is used to give orders and it is not divided into tenses (see Chapter 38). In Swahili it is called hali ya amri.

3. As in English, the subjunctive mood is used to express a wish, hope, uncertainty or other similar attitude toward a fact or idea. Unlike English, it can also be used to give orders. It is not divided into tenses (see Chapter 39). In Swahili it is called hali ya dhamira tegemezi.

4. Swahili grammar also has a mood called the conditional mood, which has two tenses: the present conditional and the past conditional (see Chapter 40). In Swahili it is called hali ya sharti.

► When there is no references to mood, the tense belongs to the most common mood, the indicative.
Chapter 38
IMPERATIVE MOOD

The imperative is the mood of the verb used for commands or orders. For example:

Come here!

imperative mood of the verb to come

IN ENGLISH
There are two types of commands. The type of command used depends on who is being told to do, or not to do, something.

1. When an order is given to people other than the speaker, the dictionary form of the verb is used.

Zawadi, close your book!
Students, study hard for tomorrow’s exam!

In these sentences neither Zawadi nor students is the subject; the speaker is merely calling out their names. Rather the subject is you, which is understood.

To negate this kind of imperative, add the word don’t before the dictionary form of the verb.

Zawadi, don’t close your book!
Students, don’t study hard for tomorrow’s exam!
4. When an order is given to oneself as well as to others, the phrase let's (a contraction of let us) precedes the dictionary form of the verb.

*Let's go to the movies.*

To negate this kind of imperative, add the word *not* between the phrase *let's* and the verb.

*Let's not go to the movies.*

**KWA KISWAHILI**
The imperative mood is called *hali ya amri*. The same two forms of commands exist. However, only commands given to people other than the speaker are expressed by the imperative mood. The *let's* command is expressed by the subjunctive, which is discussed in Chapter 39.

The command to a another person or other people uses the *imperative mood*, separated into singular and plural. The imperative singular of most verbs is the dictionary form.

*Kimbia! Run! Simama! Stand up!*

The imperative plural is usually the dictionary form minus the final *-a + -eni*.

*Kimbieni! Run! Simameni! Stand up!*
To form the imperative plurals of verbs that do not end in *-a*, simply add *-ni*.

**Karibuni!** Welcome! (Literally, come near!)

**Jibuni!** Answer!

However, some verbs are irregular; you will need to memorize their imperative forms.

**Nenda! Nendeni!** (from *kuenda*, to go)

**Njoo! Njooni!** (from *kuja*, to come)

Your textbook and teacher will introduce you to other irregular imperatives.

**TAKE NOTE**

Negative commands and commands that take object markers are expressed in the subjunctive mood rather than in the imperative mood. You will learn about the subjunctive mood in Chapter 39.
Change the sentences below to the imperative mood.

1. The children are playing dominoes.

2. The students are reading their books.

3. Ashur is careful not to burn himself while cooking.
Chapter 39
THE SUBJUNCTIVE MOOD

The subjunctive is the mood used to indicate a wish, hope, uncertainty or other comparable perspective toward a fact or an idea. For example:

I wish you could come to the party.

subjunctive mood of the verb to come

IN ENGLISH
The subjunctive is difficult to recognize because it is spelled like other tenses of the verb. It is used in two kinds of constructions.

1. The subjunctive is used in contrary-to-fact statements.

   If you were me, what would you do?
   • Implication: But you are not me.

   We wish that you were here.
   • Implication: But you aren’t.

To negate this kind of subjunctive, simply add the word not after the subjunctive form of the verb.

   If I did not like cake so much, I’d be skinnier.
   If you were not visiting, I would go to work today.
1. The subjunctive is used in clauses following verbs of asking, wanting, telling, demanding or recommending.

I asked that she meet me in my office.

instead of meets

The judge ordered that he be incarcerated.

instead of is incarcerated

These are just a few examples to show that English has the subjunctive mood, but it is not used as frequently as it is used in Swahili.

Note that these two sentences could also be written:

I asked her to meet me in my office.
The judge ordered him to be incarcerated.

These sentences still contain the subjunctive mood, although it is difficult to see. If the subject of the main verb in a sentence is different from the actor of the second verb, the second verb is in the subjunctive mood.

I asked that she meet me in my office.

or

I asked her to meet me in my office.

• I is the subject of the main verb, asked.
• She is the actor of the second verb, meet.
To negate this kind of subjunctive, simply add the word *not* before the subjunctive verb.

He asked her *not to come* to his house.

or

He asked that she *not come* to his house.

They advised that I *not worry*.

or

They advised me *not to worry*.

**KWA KISWAHILI**

The subjunctive is called *dhamira tegemezi*. It is formed by combining the subject or object marker + dictionary form of the verb with the final -a changed to -e.

<table>
<thead>
<tr>
<th>Subject Marker</th>
<th>Meanings</th>
<th>Dictionary Form</th>
</tr>
</thead>
<tbody>
<tr>
<td>niende</td>
<td><em>I ought to go; let me go</em></td>
<td>(from kuenda, to go)</td>
</tr>
<tr>
<td>wale</td>
<td><em>they ought to eat; let them eat</em></td>
<td>(from kula, to eat)</td>
</tr>
</tbody>
</table>

Verbs that do not end in -a keep their final vowel.

<table>
<thead>
<tr>
<th>Subject Marker</th>
<th>Meanings</th>
<th>Dictionary Form</th>
</tr>
</thead>
<tbody>
<tr>
<td>ujibu</td>
<td><em>you ought to answer</em></td>
<td>(from kujibu, to answer)</td>
</tr>
<tr>
<td>turudi</td>
<td><em>we ought to return; let’s return</em></td>
<td>(from kurudi, to return)</td>
</tr>
</tbody>
</table>

To negate the subjunctive, combine subject or object marker + negative marker -si- + dictionary form of the verb with the final -a changed to -e. Verbs that do not end in -a keep their final vowel.
The Swahili subjunctive is used in several kinds of constructions.

1. The subjunctive is used in clauses following verbs of asking, wanting, telling, demanding and recommending.

   Nilitaka aje nyumbani kwetu.
   *I wanted her to come to our house.*

   Nilitaka asiye nyumbani kwetu.
   *I wanted her not to come to our house.*

   Aliomba nimsaidie.
   *She asked me to help her.*

   Aliomba nisimsaidie.
   *She asked me not to help her.*

As in English, you can tell that the subjunctive must be used if the subject of the first verb is different from the subject of the second verb.

2. The subjunctive is used to express commands that contain object markers. As explained in Chapter 34, if the object of the verb is a person, an object marker must be used.

   Nisaidie! *Help me!*

   Zichukue! *Take them!* (class 10)
To make this kind of command more polite, add the word *tafadhali* (please).

*Tafadhali nisaidie!* Please help me!
*Tafadhali zipate!* Please get them! (class 10)

3. The subjunctive is used to express negative commands.

*Laila, usiende!* Laila, don't go!
*Wanafunzi, msiende!* Students, don't go!

4. The subjunctive is used after *tafadhali* (please), *(ni)* lazima (*it is necessary*), *afadhali* (*it is better*) or *itabidi* (*it behooves*) to express a request or an obligation.

*Ni lazima uende.* You must go.
(literally: *It is necessary that you go.*)

*Lazima tuende.* We must go.
(literally: *It is necessary that we go.*)

*Afadhali tumwalike.* We'd better invite her.
(literally: *It is better that we invite her.*)

*Itabidi msiende.* You all should not go.
(literally: *It behooves you not to go.*)
5. The subjunctive is used to express the purpose of the action of a previous verb, after the word *ili* (*in order that*).

\[
\text{Asome vitabu ili ajifunze.} \\
\text{He reads books in order to learn.} \\
\text{or} \\
\text{He reads books in order that he learn.}
\]

6. The subjunctive is used to ask for permission.

\[
\text{Nisome aya hii?} \\
\text{Am I to read this paragraph?} \\
\text{or} \\
\text{May I read this paragraph?} \\
\text{or} \\
\text{Should I read this paragraph?}
\]

To make this kind of command more polite, add the word *tafadhali* (*please*).

\[
\text{Tafadhali nisome aya hii?} \\
\text{May I please read this paragraph?}
\]

7. The subjunctive is used to include the speaker in a command in the construction that means *let's*.

\[
\text{Tuende. Let's go.} \\
\text{Tusifanye hivi. Let's not do this.}
\]
TAKE NOTE

Note that because the subjunctive has so many uses in Swahili, and also because it can be formed with the subject or object marker, many constructions have more than one possible meaning.

**Nisaidie.**
- If **ni**- is the object, the meaning is *Help me!*
- If **ni**- is the subject, the meaning is *Let me help.*

To understand the intended meaning of a subjunctive construction, you will need to look at the context in which it occurs.

In Swahili the subjunctive mood is not used to express contrary-to-fact statements as it is in English. Contrary-to-fact statements in Swahili are expressed with the conditional mood, which is explained in Chapter 40.
Underline the subjunctive verb in each sentence.

1. I want him to help me with my homework.
2. He asked her to say her name again.
3. I wish that you could come.
4. He ordered that the food be brought immediately.
5. What do you want me to do?
The conditional mood is used to express the English words *should*, *could*, or *would*, as well as contrary-to-fact (unreal or implausible) statements.

past tense conditional mood of the verb kuuliza (*to ask*)

\[
\text{Ningelimwuliza lakini nilisahau.}
\text{I would have asked him but I forgot.}
\]

IN ENGLISH
There is no conditional mood. English uses the indicative and subjunctive moods to express *should*, *could*, *would*, and contrary-to-fact statements. You will learn more about contrary-to-fact statements in Chapter 51.

KWA KISWAHILI
The conditional mood is called hali ya sharti. It has two tenses: present and past.

PRESENT TENSE
The present tense is expressed by the morpheme -nge- after the subject marker and before the verb.

subject marker + -nge- + verb

Monosyllabic verbs use the verbal noun form of the verb to form the conditional mood.

\[
\text{ningekula I would/could eat}
\]
Polysyllabic verbs use the dictionary form of the verb to form the conditional mood.

**tungeenda** we would/ could go

**PAST TENSE**
The past tense is expressed by the morpheme -ngeli- after the subject marker and before the verb.

subject marker + -ngeli- verb

Monosyllabic verbs use the verbal noun form of the verb to form the conditional mood.

**ningelikula** I would/ could/ should have eaten

Polysyllabic verbs use the dictionary form of the verb to form the conditional mood.

**tungelienda** we would/ could/ should have gone

**TAKE NOTE**

The conditional mood is most often used to express the English words *would* and *could*. In the past tense it may also express the word *should*.

**Ungeliuliza kwanza.** You should have asked first.

Paying attention to context will help you determine whether Swahili words in the conditional mood express *could*, *should* or *would*.

---

13 A saying from a *kanga*, a cloth with a Swahili proverb-like saying on it, worn by women throughout much of East Africa.
Chapter 41
VERB EXTENSIONS

While English verbs can change their meanings by changing their form or becoming compound verbs, Swahili verbs change their meanings by adopting verb extensions.

\[ I \text{ ate breakfast.} \quad \text{to eat changes to} \quad I \text{ made him eat breakfast.} \]
\[ \text{to make eat} \]
- single verb changes to a compound verb

\[ \text{Nilikula chamshakinywa.} \quad kula (\text{to eat}) \quad \text{changes to} \quad \text{Nilimlisha chamshakinywa.} \quad kulisha (\text{to make eat}) \]
- root verb takes a causative extension

KWA KISWAHILI
There are six different kinds of verb extensions, called minyambuliko: the prepositional extension, the passive extension, the stative extension, the reciprocal extension, the causative extension, and the reversive extension. They are added to the root verb or kitenzi cha msingi, to modify its meaning.

THE PREPOSITIONAL EXTENSION
This type of extension is called mnyambuliko wa kufanyia in Swahili. It is used to suggest that the action of the verb is done to, for (on behalf of), or about the direct object of the verb.
Nilimsomea.
I read to him.
Alinilipia.
He paid for me.
Tulikuzungumzia shule.
We talked to you about school.

A prepositional verb is formed by adding an extension to the verb. There are four forms of this extension: -ia, -ea, -lia, and -lea. Your textbook or teacher will explain how to know which form to use; for now you only need to be able to recognize the extension. When you see or hear a verb that ends in one of these forms, you will know that its meaning is prepositional. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the prepositional verb.

kufanyia to do to/for (from kufanya, to do)
kuendea to go to/for (from kuenda, to go)
kuzalia to give birth to/for (from kuzaa, to give birth)
kukojolea to urinate on (from kukojoa, to urinate)

Note that in English the object in these examples is the object of the preposition, but in Swahili it is a direct object. Whether the extension suggests the English preposition to, for, or about is determined by the meaning of the root verb and the context in which the verb is used.

THE PASSIVE EXTENSION
This type of extension is called mnyambuliko wa kufanywa in Swahili. It is used to suggest that the action of the verb is done to (rather than by) the subject of the verb; another actor is implied even if not directly stated.
Nilipigwa (na kaka yangu).
I was hit (by my brother).

Kilisomwa (na kamati).
It was read by the committee.

Aliambiwa (na daktari).
She was told (by the doctor).

A passive verb is formed by adding an extension to the verb. There are three forms of this extension: -wa, -liwa, and -lewa. Your textbook or teacher will explain how to know which form to use; for now you only need to be able to recognize the extension. When you see or hear a verb that ends in one of these forms, you will know that its meaning is passive. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the passive verb.

kuuzwa to be sold (from kuuza, to sell)
kujibiwa to be answered (from kujibu, to answer)
kununuliwa to be bought (from kununua, to buy)
kulelewa to be married (from kuoa, to marry)

You will learn more about passive verbs in Chapter 44.

THE STATIVE EXTENSION
This type of extension is called mnyambuliko wa kufanyika in Swahili. It is used to suggest that the action of the verb happens to the subject, but without an implied actor. It can also be used to suggest that the action of the verb is able to happen. For this reason, it is sometimes also called the potential extension.
Baisikeli ilivunjika. *The bicycle broke.*  
Chakula kimeharibika. *The food is ruined.*  
Inafanyika. *It is doable.*

When the stative extension is used to suggest that the action of the verb happens to the subject, the present tense is not used except to suggest that the action is still in the process of happening.

Baisikeli inavunjika. *The bicycle is breaking.*  
Chakula kinaharibika. *The food is being ruined.*

The perfect tense, expressed by the -me- tense marker, is used instead if the result of the action is in the present.

Baisikeli imevunjika. *The bicycle is broken.*

A stative verb is formed by adding an extension to the verb. There are six forms of this extension: -ika, -eka, -oka, -lika, -ikana and -ekana. Your textbook or teacher will explain how to know which form to use; for now you only need to be able to recognize the extension. When you see or hear a verb that ends in one of these forms, you will know that its meaning is stative. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the stative verb.

**kuvunjika** to be broken (from kuvunja, to break)  
**kuendeka** to be passable (from kuenda, to go)
kuondoka to leave (from kuondoa, to remove)
kuchagulika to be chosen (from kuchagua, to choose)
kusemekana to be said (from kusema, to say)
kupatikana to be available (from kupata, to get)

Since a stative verb has two possible meanings, either that the action of the verb happens to the subject or that the action of the verb is possible, you must know the meaning of the verb without its extension and listen to the context in which the extended verb occurs in order to decide which meaning is intended.

THE RECIPROCAL EXTENSION
This type of extension is called mnyambuliko wa kufanyana in Swahili. It is used to suggest that two or more subjects perform the action of the verb together or toward one another.

Tutaonana. We will see each other.
Wanapendana. They love each other.
Zilifanana. They looked like each other. (class 10)

Note that the subject of a reciprocal verb is usually plural, and there can be no object nor object infix.

A reciprocal verb is formed by adding an extension to the verb. There is only one form of this extension: -ana. For now you only need to be able to recognize the extension. When you see or hear a verb that ends in this form, you will know that its meaning is reciprocal. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the reciprocal verb.
kusikilizana to listen to each other
(from kusikiliza, to listen to)
kusaidiana to help each other
(from kusaidia, to help)

In some cases a reciprocal verb may take a singular subject if the action is performed by a singular subject but reciprocated by the object of the preposition (see Chapter 48). In this case the verb is followed by the preposition na, which means with or and, and then the object of the preposition.

Unafanana na dada yako.
You look like your sister.

Nilikutana na rais.
I met with the president.

Wazo lako linaendana na mpango.
Your idea fits with the plan.

THE CAUSATIVE EXTENSION
This type of extension is called mnyambuliko wa kufanyiza in Swahili. It is used to suggest that the subject causes the direct object to perform the action of the verb.

Aliendesha gari. He drove the car.
(Literally: He made the car go.)

Pesa zako zilimwezesha asafiri.
Your money enabled him to travel.

The causative extension can also be used to turn an adjective into a verb; the new verb suggests that the subject causes the direct object to take on the attribute of the adjective.
sahihi correct ⇒ kusahihisha to correct
(literally: to make correct)
bora better/best ⇒ kuboresha to improve
(literally: to make better)
fupi short ⇒ kufupisha to shorten
(literally: to make short)

In addition, the causative extension can be used to turn a noun into a verb.

sababu reason, cause (class 9/10)  →  kusababisha to cause

.taifa nation (class 9/10)  →  kutaiifisha to nationalize

A causative verb is formed by adding an extension to the verb. There are six forms of this extension: -isha, -esha, -lisha, -lesha, -iza and -eza. Your textbook or teacher will explain how to know which form to use; for now you only need to be able to recognize the extension. When you see or hear a verb that ends in one of these forms, you will know that its meaning is causative. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the causative verb.
kuaminisha to inspire confidence
(from kuamini, to believe)
kuogopesha to scare (from kuogopa, to fear)
kukalisha to seat (from kukaa, to sit)
kuzoelesha to train, teach
(from kuzoea, to get used to)
kufanyiza to cause (from kufanya, to do)
kucheleza to delay (from kuchelewa, to be late)

THE REVERSIVE EXTENSION
This type of extension, also known as the conversive extension is called mnyambuliko wa kufanyua in Swahili. It is used to suggest the opposite or reverse of the root verb.

Nilifungua mlango. I opened the door.

A causative verb is formed by adding an extension to the verb. There is one form of this extension: -ua. Your textbook or teacher will explain how to use the extension; for now you only need to be able to recognize it. When you see or hear a verb that ends in this form, you will know that its meaning is causative. If you know the meaning of the root verb, the verb without any extensions, you will be able to figure out the meaning of the causative verb.

kufungua to open (from kufunga, to close)
kuvua to undress (from kuva, to dress)
MULTIPLE EXTENSIONS
Many verbs can take more than one extension in order to make their meanings even more complex. Here are a few examples.

\[
\begin{align*}
\text{kushona} & \Rightarrow \text{kushonea} \Rightarrow \text{kushonewa} \\
\text{root verb} & \quad \text{prepositional} & \quad \text{passive} \\
(\text{to sew}) & \quad (\text{to sew for}) & \quad (\text{to be sewn for})
\end{align*}
\]

\[
\begin{align*}
\text{kuandika} & \Rightarrow \text{kuandikia} \Rightarrow \text{kuandikiana} \\
\text{root verb} & \quad \text{prepositional} & \quad \text{reciprocal} \\
(\text{to write}) & \quad (\text{to write to/for}) & \quad (\text{to write to each other})
\end{align*}
\]

\[
\begin{align*}
\text{kuunga} & \Rightarrow \text{kuungana} \Rightarrow \text{kuunganisha} \\
\text{root verb} & \quad \text{reciprocal} & \quad \text{causative} \\
(\text{to join}) & \quad (\text{to join each other}) & \quad (\text{to make join each other})
\end{align*}
\]

TAKE NOTE
While a few dictionaries include entries for extended verbs, many do not. If you encounter an extended verb that is unfamiliar to you, you will need to learn to recognize (or make an educated guess at) the root verb so that you can find it in dictionaries.

When verb extensions are included in dictionaries, often these abbreviations are used:

prepositional \quad \text{Prep.}
passive \quad \text{Ps.}
stative \quad \text{St. /Pot.}
reciprocal \quad \text{Rp.}
causative \quad \text{Cs.}
reversive \quad \text{Rv./Cv.}
Using the root verb and its meaning,¹⁴ indicate whether the extended verb is prepositional (Prep.), passive (Ps.), stative (St.), reciprocal (Rp.), causative (Cs.), or reversive (Rv.), and then give a possible English translation. Some verbs may have multiple extensions.

A. **kupinga** to cause an obstruction, put in the way, obstruct, stop the way, block, thwart, check, oppose, contradict

1. **kupingwa**  
   - Prep  
   - Ps  
   - St  
   - Rp  
   - Cs  
   - Rv  
   Meaning: __________________________

2. **kupingika**

Meaning: ______________________
A **participle** is a verb used as an adjective or as part of a compound verb.

Salim was running.

- participle used as part of the compound verb *was running*

Running home, Salim tripped on a tree root.

- participle used as an adjective that modifies *Salim*

**IN ENGLISH**

A participle is the *-ing* form of a verb.

- *coming*
- *going*
- *sitting*

The participle has three functions:

1. as part of a verb phrase to form the progressive forms (see Chapter 43, Compound Tenses).

Zeinabu is writing a letter.

- verb phrase

Juma was waiting for class to begin.

- verb phrase

2. as an adjective to describe a noun or pronoun (see Chapter 15, *Descriptive Adjectives*). In this function it is known as a **gerundive**.
Zeinabu is a loving woman.

adjective describing the noun woman

She is interesting.

adjective describing the pronoun she

3. as an adjective introducing a participial phrase. In this function it is known as a gerundive. As an adjective, it can modify any noun in a sentence.

I went to the store carrying a bag.

- The entire phrase carrying a bag functions as an adjective modifying the subject, I.

Walking to school, Rajabu saw a snake.

- The entire phrase walking to school is an adjective modifying the subject, Rajabu.

Sudi saw the teacher smiling.

- Smiling is an adjective modifying the object, teacher.

KWA KISWAHILI
The participle in Swahili is called a tenseless participle or kitenzi cha -ki-. The plural, tenseless participles, is called vitenzi vya -ki-. It is formed by combining a subject marker + the infix -ki- + the dictionary form of the verb. Because a subject marker is included, and because it functions as an adjective, the Swahili tenseless participle must agree in class with the noun or pronoun it modifies.

nikienda I going
wakija they coming
tukikaa we sitting
The participle has two functions:

1. as part of a verb phrase to form the past and future progressive forms (see Chapter 43, Compound Tenses).

   past progressive
   
   Mosi **alikuwa akifanya mazoezi**.
   Mosi was doing exercises.

   future progressive
   
   Utakuwa **ukisoma leo jioni**.
   You will be studying this evening.

2. as an adjective introducing a participial phrase. In this function it is known as a **kivumishijina**. As an adjective, it can modify any noun in a sentence.

   **Nilienda dukani nikibeba mfuko**.
   I went to the store carrying a bag.

   - **Nikibeba** is an adjective modifying the first person singular subject, indicated by the subject prefix **ni**.
   - The participial phrase is **nikibeba mfuko**.
Akitembea kuelekea shulen, Rajabu aliona nyoka.

Walking to school, Rajabu saw a snake.

- Akitembea is an adjective modifying the third person singular subject, indicated by the subject prefix a- and the pronoun Rajabu.
- The participial phrase is Akitembea kuelekea shuleni.

Sudi alimwona mwalimu akitabasamu.

Sudi saw the teacher smiling.

- Akitabasamu is an adjective modifying the third person singular object, indicated by the subject prefix a- and the noun mwalimu.

**TAKE NOTE**

What might appear to be a present participle (verbal adjective or gerundive) because it is a verb form ending in -ing could also be a gerund (verbal noun). Be sure to read Chapter 4, *Verbal Nouns*, in which there is a chart summarizing the various English -ing forms and their Swahili equivalents.
REVIEW

Underline the participles in the sentences below. For each sentence, circle whether the participle is used as an adjective (A) or as part of a verb phrase (VP).

1. Musa was walking to the store. A VP
2. Mariamu, studying for her exam, was tired. A VP
3. Learning the students’ names, the teacher felt overwhelmed. A VP
4. What will you be doing? A VP
5. This morning we were cooking breakfast when there was a knock at the door. A VP
Chapter 43
COMPOUND TENSES

Compound tenses are used to create verb tenses that are more complex than those that are considered “simple.”

His mother is cooking rice.

auxiliary main verb verb
compound tense

Juma has left the room.

auxiliary main verb verb
compound tense

The students did understand.

auxiliary main verb verb
compound tense

IN ENGLISH

In English these are the simple and compound tenses, conjugated here in the first person singular:
| SIMPLE TENSES | present | I go |
| | past | I went |
| | future | I will go |
| | perfect | I have gone |
| | past perfect | I had gone |
| | future perfect | I will have gone |

| COMPOUND TENSES | perfect progressive | I have been going |
| | past progressive | I was going |
| | past perfect progressive | I had been going |
| | future progressive | I will be going |
| | future perfect progressive | I will have been going |

Simple tenses are explained in Chapters 21-29.

As you can see in the above examples, compound tenses in English have a progressive meaning. To create compound tenses in English, auxiliary verbs and the present participle are used. *Have, has, be, been, was, had,* and *will* are all examples of auxiliary verbs, verbs that help the main verb.

To make the perfect tense progressive, the subject, the verb, and two auxiliary verbs combine in this way:

\[
\text{subject + have/has + been + tenseless participle}
\]

*It has been raining.*
*They have been planting maize.*
To make the past tense progressive, the subject, the verb, and one auxiliary verb combine in this way:

subject + was/were + tenseless participle

*She was resting.*  
*We were working.*

To make the past perfect tense progressive, the subject, the verb, and two auxiliary verbs combine in this way:

subject + had + been + tenseless participle

*They had been working* for an hour when the machine broke.

To make the future tense progressive, the subject, the verb, and two auxiliary verbs combine in this way:

subject + will + be + tenseless participle

*You all will be eating* at 2 o’clock.

To make the future perfect tense progressive, the subject, the verb and two auxiliary verbs combine in this way:

subject + will + have + past participle

*You will have mastered* Swahili grammar when you finish this book.
In Swahili compound tenses are called tensi za maneno mawili, which literally means *two-word tenses*.

These are the two-word tenses, conjugated here in the first person singular.

- **PERFECT PROGRESSIVE**: nimekuwa nikienda
  
  *I have been going*

- **PAST PROGRESSIVE**: nilikuwa nikienda
  
  *I was going*

- **PAST PERFECT**: nilikuwa nimeenda
  
  *I had gone*

- **FUTURE PROGRESSIVE**: nitakuwa nikienda
  
  *I will be going*

- **FUTURE PERFECT**: nitakuwa nimeenda
  
  *I will have gone*

Note that two of the tenses that are considered “simple” in English are compound tenses in Swahili: the past perfect and the future perfect. Swahili compound tenses can have a progressive or a perfect meaning.

Two of the tenses that are compound in English are actually three-word tenses, tensi za maneno matatu, in Swahili.

- **PAST PERFECT PROGRESSIVE**: nilikuwa nimekuwa nikienda
  
  *I had been going*
FUTURE PERFECT PROGRESSIVE

nitakuwa nimekuwa nikienda
I will have been going

As you can see, to create compound tenses in Swahili, the verb kuwa (to be) and the tenseless participle are used. The verb kuwa functions as an auxiliary verb, a verb that helps the main verb. The conjugation of the verb kuwa is explained in Chapter 30.

To make the perfect tense progressive, the verb kuwa and the tenseless participle combine in this way:

perfect tense of kuwa + tenseless participle

Mvua imekuwa ikinyesha.
It has been raining.

To make the past tense progressive, the verb kuwa and the tenseless participle combine in this way:

past tense of kuwa + tenseless participle

Alikuwa akipumzika. She was resting.

To make the future tense progressive, the verb kuwa and the tenseless participle combine in this way:

future tense of kuwa + tenseless participle

Mtakuwa mkila saa nane.
You all will be eating at 2 o'clock.
To make the past tense perfect, the verb *kuwa* and the main verb combine in this way:

\[
\text{past tense of } kuwa + \text{ perfect tense of the main verb}
\]

*Tulikuwa tumesoma.* *We had studied.*

To make the future tense perfect, the verb *kuwa* and the main verb combine in this way:

\[
\text{future tense of } kuwa + \text{ perfect tense of the main verb}
\]

*Nyumba itakuwa imejengwa.*
The house will have been built.

To make the past perfect tense progressive, the verb *kuwa* and the main verb combine in this way:

\[
\text{past tense of } kuwa + \text{ perfect tense of } kuwa + \text{ tenseless participle}
\]

*Walikuwa wamekuwa wakizungumza.*
*They had been talking.*

To make the future perfect tense progressive, the verb *kuwa* and the main verb combine in this way:

\[
\text{future tense of } kuwa + \text{ perfect tense of } kuwa + \text{ tenseless participle}
\]

*Tutakuwa tumekuwa tukisafiri.*
*We will have been travelling.*
REVIEW

Read the following paragraph. Underline the phrases that make up a compound tense in English. Make a list of those phrases that would require a compound tense in Swahili, and give the name of the compound tense.

One afternoon Zakia was walking in the woods. She had woken up early that morning so by the afternoon she had grown quite tired. "When will I reach the lake?" she was wondering. "Will I be walking all day? By the time I arrive, it will have grown dark."

The voice of the verb refers to the relationship between the subject of the verb and the action that the verb expresses. There are two voices: active and passive.

A sentence is in the **active voice** when the verb indicates an action performed by the subject. A verb in the active voice is called an active verb.

```
The dog chases its tail.
```

(subject verb direct object)

In this example, the subject, *the dog*, performs the action of the verb, *chases*, and the direct object, *its tail*, is the recipient of the action.

A sentence is in the **passive voice** when the verb indicates the action done to the subject by someone or something else. A verb in the passive voice is called a passive verb.

```
The tail is chased by the dog.
```

(subject verb phrase agent)

In this example, the subject, *the tail*, does not perform the action of the verb, *is chased*, but rather is having the action of the verb performed upon it. The doer of the action, *the dog*, is called the agent.
IN ENGLISH
The passive voices is expressed by the verb *to be* conjugated in the proper tense + the past participle of the main verb. Note that the tense of the sentence is indicated by the tense of the auxiliary verb *to be.*

\[
\text{The tail } \textit{is chased by the dog.} \\
\text{subject verb phrase agent} \\
\text{present passive}
\]

\[
\text{The girl } \textit{was bitten by the dog.} \\
\text{subject verb phrase agent} \\
past passive
\]

\[
\text{The dog } \textit{will be punished by its owner.} \\
\text{subject verb phrase agent} \\
future passive
\]

KWA KISWAHILI
The active voice is called sauti ya kufanya and the passive voice is sauti ya fanywa. Likewise an active verb is called kitenzi cha kufanya and a passive verb is kitenzi cha kufanywa.

Passive verbs are not expressed with an auxiliary verb. Instead, the passive is expressed by a passive extension or mnyambuliko wa kufanywa, which is added to the end of the root verb. You learned about the passive extension in Chapter 41 (Verb Extensions).
The basic passive ending is -wa, but depending on the vowel sounds in the root verb, it may occur as -wa, -liwa, and -lewa. Your teacher or textbook will explain how to choose the proper ending when forming a passive verb; for now you only need to know how to recognize the passive.

A passive verb can be used in any tense.

<table>
<thead>
<tr>

</table>

* Note that some of these constructions would not occur in English; nevertheless the Swahili forms may exist.
| FUTURE PERFECT PROGRESSIVE  | atakuwa amekuwa  
|                           | akiambiwa       
|                           | *she will have been being told* |

In Swahili the agent, which is called wakala or ajenti, is expressed in one of two ways depending on whether it is a living being (i.e. a person or an animal) or a non-living thing (i.e. an object or idea).

When the agent is a person or animal, the passive verb is followed by the preposition na, and then the agent. Na in this case means by, but in other situations it may also mean with or and.

\[\text{Alipewa pesa na mamake.}\]

(subject passive direct object agent)

(He was given money by his mother.)

When the agent is a non-living thing, the passive verb is followed by the preposition kwa, and then the agent. Kwa in this case means by or with, but in other situations it may also mean for or to.

* Note that some of these constructions would not occur in English; nevertheless the Swahili forms may exist.
Utapigwa kwa fimbo.

subject passive agent

(You will be hit with a stick.)

TAKE NOTE

A passive Swahili verb never takes an object marker.

REVIEW

Underline the verb or the verb phrase in each of the sentences below. Circle whether each verb is active (A) or passive (P). You should be able to identify the verb in each Swahili sentence even if you don’t know what the sentence means. If you can’t identify a Swahili verb, you should reread Chapter 21 (Introduction to Verbs and Verb Tenses).

1. The books were moved yesterday. A P
2. Akia moved the books this morning. A P
3. Was she hurt? A P
4. No, she didn’t hurt herself. A P
5. When will she sell the books? A P
6. Vitabu vitauzwa kesho asubuhi. A P
7. Kwa nini aliamua kuuza vitabu vyake? A P
8. Aliamrishwa na babake. A P
9. Je, watu wengi watanunua vitabu? A P
10. Ndiyo; vitabu vitanunuliwa na mashule. A P
ADVERBS
Chapter 45
ADVERBS

An **adverb** is a word that describes a verb, an adjective or another adverb. Adverbs indicate manner, quantity, time, place and intensity.

Sudi speaks Swahili *beautifully*.

| verb | adverb of manner |

Adija is *very* clever

| adverb | adjective of intensity |

The baby doesn’t walk *very well*.

| adverb | adverb of intensity | of manner |

**IN ENGLISH**

Adverbs can describe verbs, adjectives or other adverbs in a variety of ways.

♦ **Adverbs of manner** answer the question *how*. They are very common adverbs and can usually be recognized by their suffix *-ly*.

The rabbit ran *quickly*.

- *Quickly* describes the verb *ran*; it tells you how the rabbit ran.
Adverbs of quantity, degree or intensity answer the question *how much* or *how well*.

The rabbit ran *often*.
- *Often* describes the verb *ran*; it tells you how much the rabbit ran.

Adverbs of time answer the question *when*.

The rabbit will run *soon*.
- *Soon* describes the verb *will run*; it tells you when the rabbit will run.

Adverbs of place answer the question *where*.

The rabbit is running *around*.
- *Around* describes the verb *is running*; it tells you where the rabbit is running.

**KWA KISWAHILI**

Adverbs, called *vielezi* in Swahili, are invariable; they never change form.

Swahili adverbs have the same functions as English adverbs.

- *vielezi vya jinsi*  
  *adverbs of manner*
- *vielezi vya kadiri*  
  *adverbs of degree or intensity*
- *vielezi vya hesabu*  
  *adverbs of quantity*
- *vielezi vya wakati*  
  *adverbs of time*
- *vielezi vya mahali*  
  *adverbs of place*

Some adverbs are formed from the adjective stems plus the class 8 adjectival prefix vi-. Almost any adjective stem can be turned into an adverb.
Juma anacheza mpira vizuri.
*Juma plays soccer well.*
- Vizuri is formed from the adjective stem
  -zuri (good, well).

One adverb that is formed from an adjective stem in a different way is kidogo *(a little)*, from the stem -dogo *(small).* It takes the class 7 adjectival prefix -ki.

Ninampenda kidogo. *I like him a little.*

Some adverbs are formed by combining kwa + abstract nouns.

Juma alitembea kwa haraka.
*Juma walked quickly.*
- Kwa haraka is formed from the noun haraka *(speed).*

Adverbs that refer to styles associated with ethnic groups or nationalities are formed from the class 1 nouns by replacing the class 1 noun prefix with the class 7 adjective prefix. They are always capitalized. (Don’t confuse these forms with the nouns used to refer to languages, such as Kiswahili and Kiingereza.)

Mzungu *(a European) ⇒ Kizungu (in a European style)*
Mswahili *(a Swahili) ⇒ Kiswahili (in a Swahili style)*
TAKE NOTE

In English some adverbs are identical in form to the corresponding adjectives.

Juma is *fast*.  
| adjective  
| modifies the noun *Juma*  

Juma runs *fast*.  
| adverb  
| modifies the verb *run*

It is important that you differentiate between a word used as an adverb or as an adjective so that, if you are translating into Swahili, you will know which Swahili form to use: the adverb, which is invariable; or the adjective, which agrees in class with the noun it modifies.
REVIEW

A. Circle the adverbs in the sentences below, and underline the word each adverb modifies. Circle the part of speech of the word the adverb modifies: verb (V), adjective (Adj.), or adverb (Adv.).

1. Kezilihabi writes beautifully.  
   V     Adj.     Adv.

2. His novels are very interesting.  
   V     Adj.     Adv.

3. *Rosa Mistika* is worth reading often.  
   V     Adj.     Adv.

4. The main character, Rosa, is quite sympathetic.  
   V     Adj.     Adv.

5. You will feel extremely sorry for her.  
   V     Adj.     Adv.

B. Circle whether the underlined word in each of the sentences below is an adjective (Adj.) or an adverb (Adv.).

1. *Viatu hivi ni vizuri.*  
   Adj.     Adv.

2. *Tunafahamiana vizuri.*  
   Adj.     Adv.

3. *Vitendo vyake vilikuwa vibaya.*  
   Adj.     Adv.

4. *Timu yetu ilicheza vibaya.*  
   Adj.     Adv.

5. *Anavaa Kimarekani.*  
   Adj.     Adv.
CONJUNCTIONS
Chapter 46
CONJUNCTIONS

A conjunction is a word that joins words or groups of words.

   Adija and her mother are having an argument.
   Neither Sudi nor Zuhura eat meat.
   I wanted to go to the party, but I was sick.

IN ENGLISH
There are two kinds of conjunctions: coordinating and subordinating.

Coordinating conjunctions join words, phrases, and clauses that are equal in form; they connect or coordinate ideas of equal rank. Typical coordinating conjunctions are and, but, or, nor, yet, and for.

   beautiful or ugly
   over here and over there
   connects words
   connects phrases

   The day was warm but we felt comfortable.
   connects clauses

Subordinating conjunctions join a dependent clause to a main clause; they subordinate one clause to another. The main idea is expressed in the main clause, and the clause introduced by a subordinating conjunction is called a subordinate clause. Typical subordinate conjunctions are although, because, if, unless, so that, while, that, whenever, and until.
We drove quickly until we were near the school.

Although he loves her, he can’t marry her.

NOTE: The main clause is not always the first clause of the sentence.

KWA KISWAHILI
Conjunctions, called viunganishi in Swahili, are invariable; they never change. They do not have number, class or tense.

The major coordinating conjunctions are na (and), lakini (but), au (or), and wala (nor). Typical subordinating conjunctions are ijapo (although), ingawa (although), kwa sababu (because), kwani (because), kwa kuwa (because), kama (if), wakati (when), ili (so that), kabla (before) and baada (after).

Most conjunctions require the use of the indicative mood (in any tense) for the verb that follows.

Ataenda dukani kwa sababu anahitaji sukari.  
She will go to the store because she needs sugar.
However, there are a few exceptions. **Ili** *(so that)* requires the use of the subjunctive mood for the verb that follows.

*Nilikuambia ili ujue.*  
*I told you so that you'd know.*

**Wakati** *(when)* requires the use of the relative construction with the class 16 relative infix -po- in the verb that follows.

*Wakati nilipoenda shuleni, nilikuwa mdogo.*  
*When I went to school, I was small.*

**Kabla** *(before)* requires the use of the negative imperfect tense in the verb that follows.

*Kabla hajafika, tuliwazungumzia watoto wetu.*  
*Before he arrived, we talked about our children.*

**Baada** *(after)* requires the use of the imperfect tense in the verb that follows.

*Baada amefika, tuliacha kuwazungumzia watoto wetu.*  
*After he arrived, we stopped talking about our children.*
Kama (if) requires the use of the conditional tense in the verb that follows.

**Kama akija, tutamwona.**
*If he comes, we will see him.*

When you learn a new conjunction, be sure to memorize what kind of verb it governs.

**Subordinating Conjunction or Preposition?**
Occasionally the same word can be used as a subordinating conjunction and a preposition in English. Some of the Swahili subordinating conjunctions are also used as prepositions, but with slight modifications.

For instance, *before* can be used as a subordinating conjunction and as a preposition in English. In Swahili, however, as a subordinating conjunction *before* is *kabla*, but *kabla ya* as a preposition. The subordinating conjunction *wakati* (*when*) becomes *wakati wa* as a preposition, and the subordinating conjunction *baada* (*after*) becomes *baada ya* as a preposition.

You can distinguish between a preposition and a subordinating conjunction simply by determining if the word introduces a prepositional phrase or a subordinate clause (see Chapter 47).
Before leaving, they packed their bags.

Kabla ya kuondoka, walifungwa mizigo yao.

Before they left home, they packed their bags.

Kabla hawajaondoka nyumbani, walifungwa mizigo yao.
REVIEW

In the sentences below, circle whether the underlined word is a preposition (P) or a subordinate conjunction (SC).

1. I spoke to him after class.
   P   SC

2. After you finish reading, write out a summary.
   P   SC

3. I believed him because I know he is an honest person.
   P   SC

4. Because of her illness, she was unable to attend.
   P   SC

5. She read the book before she saw the movie.
   P   SC

6. We met up before the party.
   P   SC
PREPOSITIONS
A preposition is a word that shows the relationship between a noun or pronoun and another word in the sentence. Prepositions may indicate position, direction, time, manner, means or agent.

I walked by the store.

Juma was given a gift by his teacher.

IN ENGLISH
The noun or pronoun that the preposition connects to the rest of the sentence is called the object of the preposition. Together they make up a prepositional phrase. Here are examples of prepositional phrases.

• to show location The book is on the table.

• to show direction Come toward me.

• to show time She has studied Swahili for years.

• to show manner He ate the meal with great fervor.
• to show means I cut myself with the knife.

• to show agent The show was seen by many.

To help you recognize prepositional phrases, here is a passage in which the prepositional phrases are in italics and the preposition that introduces each phrase is underlined.

Africa is the second-largest continent (after Asia), straddling the equator and lying largely within the tropics. Africa forms a plateau between the Atlantic and Indian oceans. Before the 1880s Europeans were, except in South Africa, largely confined to the coastal regions. By the end of the 19th century the whole continent, except for Liberia and Ethiopia, was under foreign domination either by European powers or by the Ottoman Empire. Beginning in the 1940s, the former colonies secured their independence within the space of 40 years, but the process of rapid decolonization brought unrest and instability to many parts of the continent. A major factor in this unrest was, and continues to be, the artificial boundaries created by colonialism.15

KWA KISWAHILI
Prepositions are called vihusishi. The noun or pronoun that the preposition connects to the rest of the sentence is called the shamirisho ya kihusishi. Together they make up a kirai cha kihusishi. There are several uses of prepositions in Swahili.

- to show location  
  Alikaa *chini ya mti.*
  *She sat under the tree.*

- to show time  
  Tulikuja *kabla ya saa tatu.*
  *We came before nine o'clock*

- to show cause  
  Alipigwa *kwa sababu ya makosa.*
  *He was beaten because of mistakes.*

- to show agent  
  Alipewa *zawadi na mama yake.*
  *She was given a gift by her mother.*

- to show means  
  Alikatwa *kwa kisu.*
  *She was cut by a knife.*

---

16 Note that when a passive verb is followed by a preposition of agent and the object of the preposition is animate, the preposition is *na*; but when it is followed by a preposition of means and the object of the preposition is inanimate, the preposition is *kwa*. See Chapter 44, Active and Passive Voice.
to show possession  
Nipe kitabu cha Sudi.  
Give me Sudi's book.  
(Literally: the book of Sudi.)

to show type  
Amevaa nguo za Kiunguja.  
He is wearing Zanzibari clothing.\(^{17}\)  
(Literally: of the Zanzibari style.)

to show manner  
Alisema kwa ukali.  
She spoke severely.\(^{18}\)  
(Literally: with/ by severity.)

to show comparison  
Adija anasoma zaidi kuliko Sudi.  
Adija studies more than Sudi.

---

\(^{17}\) Note that prepositions that show type form prepositional phrases that function as adjectives. See Chapter 14, Adjectives.

\(^{18}\) Note that prepositions that show manner form prepositional phrases that function as adverbs. See Chapter 45, Adverbs.
TAKE NOTE

You must learn to distinguish in English between prepositional phrases introduced by to indicating the indirect object (see Chapter 36, Indirect Objects) and to indicating direction toward a location, because these take different forms in Swahili.

♦ to indicating a direct object ⇒ prepositional verb

The action of the verb is done to or for someone or something. The prepositional phrase answers the question to what? or to whom? In English, the indirect object can be expressed either by to or by reversing the word order and putting the indirect object without the to before the direct object (see Chapter 34, Objects).

He read the book to me.
He read me the book.
  • He read the book to whom? To me.
  • Me is the indirect object.

In Swahili, the indirect object must be expressed as the object of a prepositional verb.

Alinisomea kitabu. He read the book to me.

♦ to indicating direction toward a location ⇒ kuelekea + object

The preposition to is used in a phrase of direction towards a location. It answers the question to where?

She was running to school.
  • She was running to where? To school.
• To school is the object of the preposition to.

In Swahili, if the object of the preposition is an object, the locative is expressed by the infinitive of the verb kuelekea (to go toward) + a class 17 noun.

Alikuwa akikimbia kuelekea shuleni.
She was running toward the school.

If the object of the preposition is animate, the locative is expressed by the infinitive of the verb kuelekea + the noun.

Alikuwa akikimbia kunielekea mimi.
She was running toward me.
REVIEW

Underline the prepositional phrases in the sentences below, and circle the prepositions.

1. The United Republic of Tanzania consists of the mainland republic of Tanganyika and the island republic of Zanzibar.
2. The interior is dominated by a plateau.
3. The capital, Dodoma, lies in the center of Tanzania.
4. The plateau is broken by the Great Rift Valley, the west arm of which contains lake Tanganyika.
5. The east arm runs through central Tanzania to meet the west arm near Lake Malawi.

Chapter 48
OBJECT OF THE PREPOSITION

An object of a preposition is a noun or pronoun which receives the action of the verb through a preposition.

I walked by the store.

object of the preposition by

Juma carried a gift for his teacher.

object of the preposition for

IN ENGLISH
An object of a preposition receives the action of the verb through a preposition other than to. (Objects of the preposition to are considered indirect objects and are discussed in Chapter 36.) It answers the question whom? or what? asked after the preposition.

Sudi is shopping for new shoes.
- Sudi is shopping for what? New shoes.
- New shoes is the object of the preposition for.

I went to the game with my father.
- I went to the game with whom? My father.
- My father is the object of the preposition with.
KWA KISWAHILI
An object of a preposition, called *shamirisho ya kihusishi* in Swahili, receives the action of the verb through any preposition. (Prepositions are explained in Chapter 47.) It answers the question *nani?* (*who?*) or *nini?* (*what?*) asked after the preposition.

Alizungumza na mwenyeduka.
*He spoke with the shopkeeper.*
- Alizungumza na nani? Mwenyeduka.

Tulisafiri kwa basi. *We travelled by bus.*
- Tulisafiri kwa nini? Basi.

TAKE NOTE

The relationship between a verb and its object is often different in English and Swahili. For example, a verb may take an object of a preposition in English but a direct object in Swahili. Therefore, when you learn a Swahili verb it is important to find out if its meaning incorporates a preposition. Your textbook and dictionaries will indicate when the meaning of a Swahili verb incorporates a preposition.
ENGLISH: object of a preposition
⇒ SWAHILI: direct object

He is looking for coffee.
- Function in English: object of a preposition
- \textit{He is looking for what? Coffee.}
- \textit{Coffee is the object of the preposition for.}

Anatafuta kahawa.
- Function in Swahili: direct object
- \textit{Anatafuta nini? Kahawa.}
- The verb \textit{kutafuta} is not followed by a preposition; therefore, its object is a direct object.

Many common verbs require an object of a preposition in English, but a direct object in Swahili, because their meanings already incorporate a preposition.

\begin{align*}
\text{to look at} & \quad \text{kuangalia} \\
\text{to wait for} & \quad \text{kusubiri}
\end{align*}

An object of one of these verbs, or of a prepositional verb (explained in Chapter 41, Verb Extensions), is not an object of a preposition; it is an object or an indirect object.
Circle the object of the preposition in each sentence.

1. They will walk by the window.
2. I went to the store for Zawadi.
3. The oranges were sold in bunches.
4. The teacher told us about Swahili grammar.
5. Let's speak in a whisper.
SENTENCES
Chapter 49
SENTENCES, PHRASES & CLAUSES

A sentence is the expression of a complete thought. For example:

The dog ran across the street.

A phrase is a group of two or more words expressing a thought, but without a subject or a conjugated verb; it may contain an object.

the dog across the street
| object of the preposition across

A clause is a group of words containing a subject and a conjugated verb.

the dog ran
he saw a cat

A clause can combine with other clauses to form a compound or complex sentence.

The dog ran across the street because he saw a cat.

IN ENGLISH
SENTENCES
A sentence usually consists of at least of a subject (see Chapter 19) and a verb (see Chapter 21).
Abunawas spoke.

subject  verb

The teacher was laughing.

subject  verb phrase

subject

Where did you go?

verb phrase

Depending on the verb, a sentence may also have direct and indirect objects (see Chapters 35-36).

Laila passed the exam.

subject  verb  direct object

The farmer sold him a tractor.

subject  verb  indirect  direct object  object

In addition, a sentence may include various kinds of modifiers: adjectives (see Chapter 14), adverbs (see Chapter 45), prepositional phrases (see Chapter 47), and participial phrases (see Chapter 42). Modifiers are adjectival if they modify nouns. Modifiers are adverbial if they modify verbs, adjectives or adverbs.
Laila passed the difficult exam.

Laila successfully passed the exam.

Laila passed the exam despite her refusal to study.

Laila, trying hard to remember details, passed the exam.

It is important that you be able to recognize complete sentences and to distinguish phrases and clauses from complete sentences.

**PHRASES**
The various kinds of phrases are identified by the type of word beginning the phrase.

1. **prepositional phrase**: a preposition + object of preposition

   *along* the road  
   *after* the party  
   *towards* the house

A prepositional phrase is adjectival if it modifies a noun, adverbial if it modifies a verb. (See Chapter 47, Prepositions, and Chapter 48, Object of the Preposition.)
2. **participial phrase**: starts with a participle

- driving the car
- driven by anger
  - present active
  - perfect passive
  - participle of to drive

A participial phrase is adjectival since it modifies a noun. (See Chapter 42, Participles.)

3. **infinitive phrase**: starts with an infinitive

- to study vocabulary
  - infinitive
  - object of to study

- to water the plants daily
  - infinitive
  - adverb modifying to water

4. **verb phrase**: starts with an auxiliary verb or word (see Chapter 33)

To recognize such phrases you need to recognize the individual parts (prepositions, participles, infinitives) and then isolate all those words within groups of words which work as a unit of meaning. If this unit of meaning does not have both a subject and a conjugated verb, it is a phrase.
CLAUSES
There are two kinds of clauses: main (or independent) and subordinate (or dependent). A main clause generally expresses a complete thought, the important idea of the sentence. If it stood alone with a capitalized first word and a period at the end, it could be a simple sentence. A subordinate clause cannot stand alone as a complete sentence. It must always be combined with a main clause.

<table>
<thead>
<tr>
<th>main clause</th>
<th>subordinate clause</th>
</tr>
</thead>
<tbody>
<tr>
<td>The turtle won the race because the rabbit fell asleep.</td>
<td></td>
</tr>
<tr>
<td>subject verb</td>
<td>subject verb</td>
</tr>
</tbody>
</table>

TYPES OF SENTENCES
There are three types of sentences: simple, compound, and complex.

1. A simple sentence consists of only one main clause with no subordinate clauses. It has a subject and a conjugated verb. There may be many modifiers with a variety of word order.

There is no set position for the verb in an English sentence or clause, but the subject usually comes before the verb, except in questions.

<table>
<thead>
<tr>
<th>Zuhura watched television.</th>
</tr>
</thead>
<tbody>
<tr>
<td>subject verb</td>
</tr>
</tbody>
</table>

A modifier can come before or after the subject or the verb.
Quietly the children tiptoed past their parents’ bedroom.

| adverb  | subject | verb |

The children quietly tiptoed past their parents’ bedroom.

| subject | adverb  | verb |

The children tiptoed quietly past their parents’ bedroom.

| subject | verb | adverb |

In questions, the word order varies from the normal simple sentence order.

| subject |

Did Zuhura watch television?

| verb phrase |

2. A **compound sentence** consists of two statements or equal main clauses. These two statements are joined by coordinating conjunctions (see Chapter 46, Conjunctions).

The two main clauses are connected by a coordinating conjunction. Each clause has its own subject and conjugated verb. Each, standing alone, could be a simple sentence.

(main clause 1) (main clause 2)

The window was open and a nice breeze entered the room.

| coordinating conjunction |
3. A **complex sentence** is a sentence consisting of a main clause and one or more subordinate clauses.

The main clause in a complex sentence generally can stand alone as a complete sentence.

The subordinate clause cannot stand alone as a complete sentence; it depends on the main clause for its full meaning, and it is subordinate to the main clause.

\[
\text{subordinate clause} \quad \text{main clause}
\]

\[
\begin{array}{c}
\text{Although the window was open, no breeze entered.} \\
\text{subordinate subject verb} \\
\text{conjunction subject verb}
\end{array}
\]

It makes sense to say "no breeze entered" without the first clause in the sentence; therefore, it is a main clause and could stand alone. It does not make sense to say "although the window was open" unless we add a conclusion; therefore, it is a subordinate clause.

It is important that you be able to distinguish a main clause from a subordinate clause. To do so will help you to write complex sentences and avoid sentence fragments. Subordinate clauses are introduced by subordinate conjunctions (see Chapter 46, Conjunctions) or relative pronouns (see Chapter 12).
Lulu rested because she was tired.

Lulu took a nap, which she needed.

All relative clauses are adjectival since they modify nouns.

KWA KISWAHILI
Sentences are called sentensi. Phrases are called virai. Clauses are called vishazi. Sentences, phrases, and clauses are generally identified the same way in Swahili as they are in English.

SENTENSI
A sentence usually consists of at least of a subject (see Chapter 19) and a verb (see Chapter 21).

Sudi alikimbia. Sudi ran.

---

20 Other terms used for sentences include masungo ya maneno (singular: fungo la maneno) and sentens. See G.W. Broomfield. Sarufi ya Kiswahili: A Grammar of Swahili for Swahili-Speaking People (London: Sheldon Press, 1931).
However, because a Swahili verb contains the subject and the verb, a Swahili sentence may consist of only one word.

**Alikimbia.**  
*He ran.*

Depending on the verb, a sentence may also have direct and indirect objects (see Chapter 35 and 36).

- **Laila alishinda mtihani.**

  - Subject  | Verb  | Direct object

- **Mkulima alimwuzia trekta.**

  - Subject  | Indirect verb  | Direct object
  -          | Object         | Object

In addition, a sentence may include various kinds of modifiers: adjectives (see Chapter 14), adverbs (see Chapter 45), prepositional phrases (see Chapter 47), and participial phrases (see Chapter 42). Modifiers are adjectival if they modify nouns. Modifiers are adverbial if they modify verbs, adjectives or adverbs.

- **Laila alishinda mtihani *mgumu.***

  - Adjective

- **Laila alishinda mtihani *vizuri.***

  - Adverb
Laila alishinda mtihani ingawa alikataa kusoma.

adverbial prepositional phrase
telling how Laila passed

adjectival participial phrase modifying Laila

Laila, akijaribu sana kukumbuka kila kitu, alishinda mtihani.

It is important that you be able to recognize complete sentences and to distinguish phrases and clauses from complete sentences.

VIRAI
The various kinds of phrases are identified by the type of word beginning the phrase.

1. kirai cha kihusishi (prepositional phrase): a preposition + object of preposition

   karibu na meza (near the table)
   baada ya pati (after the party)
   mbele ya gari (in front of the car)

A prepositional phrase is adjectival if it modifies a noun, adverbial if it modifies a verb. (See Chapter 47, Prepositions and Prepositional Phrases, and Chapter 48, Object of the Preposition.)

2. kirai cha kitenzi cha -ki- (participial phrase): starts with a participle
akiendesha gati driving a car  
third person present active participle of kuendesha

akiendeshwa na hasira driven by anger  
third person present passive participle of kuendeshwa

A participial phrase is adjectival since it modifies a noun. (See Chapter 42, Participles.)

3. kirai cha kitenzijina (infinitive phrase): starts with an infinitive

kusoma msamiati to study vocabulary  
infinitive object of kusoma

kumwagia mimea kila siku to water plants every day  
infinitive adverb modifying kumwagia

4. kirai cha kitenzi (verb phrase): a compound tense (see Chapter 43)

To recognize such phrases you need to recognize the auxiliary verb in a two word tense.

VISHAZI
There are two kinds of clauses: main (or independent) and subordinate (or dependent).

A main clause, called kishazi kikuu in Swahili, generally expresses a complete thought, the important idea of the sentence. If it stood alone with a capitalized first word and a period at the end, it could be a simple sentence.
A subordinate clause, called *kishazi tegemezi* in Swahili, cannot stand alone as a complete sentence. It must always be combined with a main clause.

```
main clause     subordinate clause
Kobe alishinda shindano kwa sababu sungura alilala.
```

*The turtle won the race because the rabbit slept.*

A subordinate clause is adjectival if it modifies a noun, adverbial if it modifies a verb, adjective or adverb. Subordinate clauses are introduced by subordinate conjunctions, which are explained in more detail below.

**TYPES OF SENTENSI**

There are three types of sentences: *simple*, *compound*, and *complex*.

1. A simple sentence, called *sentensi sahili*, consists of only one main clause with no subordinate clauses. It has a subject and a conjugated verb. There may be many modifiers with a variety of word order.

   There is no set position for the verb in an Swahili sentence or clause, but the subject always comes before the verb.
Zuhura aliangalia televisheni.

A modifier can come after the verb.

Watoto walipita kimya chumba cha wazazi.

In questions, the word order does not vary from the normal simple sentence order. The only difference between a sentence and a question is the addition of a question mark at the end, and, sometimes, the interrogative marker Je at the beginning.

Zuhura aliangalia televisheni?

or

Je, Zuhura aliangalia televisheni?

2. A compound sentence, called sentensi ambatani, consists of two statements or equal main clauses. These two statements are joined by coordinating conjunctions (see Chapter 46, Conjunctions).
The two main clauses are connected by a coordinating conjunction. Each clause has its own subject and conjugated verb. Each, standing alone, could be a simple sentence.

```
main clause 1       main clause 2
```

**Dirisha lilikuwa wazi na upepo mzuri uliingia chumbani.**

coordinating conjunction

*The window was open and a nice wind entered the room.*

3. A complex sentence, called **sentensi changamano**, is a sentence consisting of a main clause and one or more subordinate clauses.

The main clause in a complex sentence generally can stand alone as a complete sentence.

The subordinate clause cannot stand alone as a complete sentence; it depends on the main clause for its full meaning, and it is subordinate to the main clause.

```
subordinate clause       main clause
```

**Ingawa darisha lilikuwa wazi, upepo haukuingia.**

subordinate subject verb main clause subject verb

*Although the window was open, the wind did not enter.*

It makes sense to say "**upepo haukuingia**" without the first clause in the sentence; therefore, it is a main clause and could stand alone. It does not make sense to say...
“ingawa dirisha lilikuwa wazi” unless we add a conclusion; therefore, it is a subordinate clause.

It is important that you be able to distinguish a main clause from a subordinate clause. To do so will help you to write complex sentences and avoid sentence fragments. Subordinate clauses are introduced by subordinate conjunctions (see Chapter 46, Conjunctions) or relative constructions (see Chapter 12).

```

<td>Lulu alipata usingizi ambao alihitaji.</td>
</tr>
<tr>
<td>relative pronoun</td>
</tr>
</tbody>
</table>
```

Lulu got the sleep which she needed.

All relative constructions are adjectival since they modify nouns.
A. Circle whether the sentences below are simple (S), compound (C) or complex (CX).

1. Swahili is a Bantu language and it is a member of the Niger-Congo family of African languages.  
   \[ S \quad C \quad CX \]

2. It developed as a lingua franca and trading language in most of East Africa, becoming the official language of Tanzania in 1967 and of Kenya in 1973.  
   \[ S \quad C \quad CX \]

3. It is also in use in parts of central and southern Africa.  
   \[ S \quad C \quad CX \]

4. It has a large body of literature, including poetry, novels, short stories, and theater.  
   \[ S \quad C \quad CX \]

B. Circle whether the following\textsuperscript{22} are phrases (P), clauses (C), or sentences (S). All punctuation has been omitted.

1. Kenya's flag dates from 1963  
   P C S

2. when the country became independent  
   P C S

3. it is based on the flag of KANU (Kenya African National Unity)  
   P C S

4. the political party that led the nationalist struggle  
   P C S

5. the Masai warrior's shield and crossed spears represent the defense of freedom  
   P C S

Chapter 50
DECLARATIVE & INTERROGATIVE SENTENCES

A sentence is classified according to its purpose—whether it makes a statement or asks a question.

A **declarative sentence** is a sentence that makes a statement.

*Zubura owns many books.*

An **interrogative sentence** is a sentence that asks a question.

*Does Zubura own many books?*

In writing, an interrogative sentence has a question mark at the end. In speech, an interrogative question usually has a rising intonation.

**IN ENGLISH**
A declarative sentence can be changed to an interrogative sentence in one of three ways:

1. Add the auxiliary verb *do, does, did, will,* or *shall* before the subject and change the main verb to the dictionary form of the verb. *Do* and *does* are used to introduce a question in the present tense and *did* to introduce a question in the past tense (see Chapters 22-25 on the present and past tenses). *Will* or *shall* are used to introduce a question in the future tense (see Chapter 28, Future Tense).
2. Some verbs allow you to change their word order, placing the verb before the subject.

STATEMENT  

Sudi is on the couch reading.

subject  verb

QUESTION  

Is Sudi on the couch reading?

verb  subject

3. Adding a short phrase at the end of the statement. This short phrase is sometimes called a tag question. A tag question is used when you expect a “yes” or “no” answer.

Sudi isn’t sitting on the couch, is he?
Sudi is sitting on the couch, isn’t he?
KWA KISWAHILI

Statements, called matangazo, can be changed into questions, called maswali, in one of three ways. Note that the word order does not change. In spoken Swahili, a rising intonation is used with questions, similar to the intonation used in English questions.

TANGAZO  Sudi amekaa kwenye kochi.

1. Adding the question indicator Je to the beginning of the sentence and a question mark to the end. Je is usually used with questions that expect a “yes” or “no” answer.

   SWALI    Je, Sudi amekaa kwenye kochi?

2. Adding a question mark to the end of the sentence, when expecting a “yes” or “no” answer.

   SWALI    Sudi amekaa kwenye kochi?

3. Adding a tag question, called kirai shawishi, to the end of the sentence. Sivyo is the most common tag question. It expects a “yes” answer, but a “no” answer may be given.

   SWALI    Sudi amekaa kwenye kochi, sivyo?
   SWALI    Sudi amekaa kwenye kochi, au sivyo?
TAKE NOTE

All three of these methods are used for questions that expect a "yes" or "no" answer. Questions that expect a more complicated answer usually use interrogative pronouns or adjectives (see Chapters 9 and 17).

REVIEW

Change the following sentences\(^{23}\) to questions.

1. The Republic of Kenya straddles the Equator in East Africa.

2. Mombasa lies on the narrow coastal plane.

3. Most of Kenya comprises high scrubland around Lake Turkana.

4. In the southwest are the Kenyan highlands.

5. Mount Kenya is the country’s highest peak.

6. Nairobi is the capital.

7. The Great Rift Valley cuts through western Kenya.

8. Mombasa is hot and humid.

9. The coast is lined with mangrove swamps.

10. Kenya is the world’s fourth largest tea producer.

12. Watu wengi wanasesema Kiswahili kama lugha ya pili.

14. Wanafunzi wengi wa Kimarekani wanachagua kusoma Kiswahili.
Chapter 51
CONDITIONAL SENTENCES

Sentences that state that if a certain condition exists then a certain result can be expected are called conditional sentences. They are complex sentences (see Chapter 49, Sentences, Phrases and Clauses) consisting of two parts.

1. a condition, the subordinate clause, which is introduced by if or unless
2. a conclusion, the main clause, which is the result of the condition

If you don’t eat, you will be hungry.

condition conclusion
subordinate clause main clause

IN ENGLISH
There are three types of conditional sentences.

1. simple conditions
The condition can take place in the present, past or future.

Present If you work hard, you are rewarded.

<table>
<thead>
<tr>
<th>present</th>
<th>present</th>
</tr>
</thead>
</table>

Past If you worked hard, you were rewarded.

<table>
<thead>
<tr>
<th>past</th>
<th>past</th>
</tr>
</thead>
</table>
future If you *work* hard, you *will be rewarded*.  

present future

- Although the present tense is used, a future time is implied.

1. “should-would” conditions

Some doubt is implied about the possibility of the condition occurring, as expressed by the “should” in the condition and “would” in the conclusion.

If you *should* work hard, you *would* be rewarded.

2. contrary-to-fact conditions

There is no possibility of the condition actually occurring; as the name implies, the condition is contrary-to-fact. These statements can only be made about the present or past.

<table>
<thead>
<tr>
<th>present</th>
<th>If you <em>were working</em> hard, you would be rewarded.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>subjunctive</td>
</tr>
<tr>
<td></td>
<td>• Implication: You are not working hard. <em>Were</em> is an example of one of the rare uses of the subjunctive in English. See Chapter 39, <em>The Subjunctive Mood</em>.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>past</th>
<th>If you <em>had worked</em>, you would have been rewarded.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>past perfect indicative</td>
</tr>
<tr>
<td></td>
<td>• Implication: You did not work hard.</td>
</tr>
</tbody>
</table>
KWA KISWAHILI
The same three types of conditional sentences exist, but two
different constructions are used.

1. **sharti sahili (simple conditions)**
The condition can take place in the present, past or
future.

<table>
<thead>
<tr>
<th>present</th>
<th>Kama ukifanya kazi, unapewa tuzo.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>present participle</td>
</tr>
<tr>
<td></td>
<td>If you work you will be rewarded.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>past</th>
<th>Kama ulifanya kazi, ulipewa tuzo</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>past</td>
</tr>
<tr>
<td></td>
<td>If you worked, you were rewarded.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>future</th>
<th>Kama ukifanya kazi, utapewa tuzo.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>present participle</td>
</tr>
<tr>
<td></td>
<td>If you work, you will be rewarded</td>
</tr>
</tbody>
</table>

- Although the present participle is used, a future time is
  implied.

1. **hali ya sharti (the conditional mood)**
The conditional mood is used to express both should-
would and contrary-to-fact conditions.

---

24 Note that the present participle can be used to imply if with or
without the word kama (if): Ukifanya kazi, utapewa thawabu. See
Chapter 42, Participles.
Kama ungefanya kazi, ungepewa tuzo.
If you should work, you would be rewarded. (should-would)
or
If you were working you would be rewarded. (contrary-to-fact)

Kama ungelifanya kazi, ungelipewa tuzo.
If you had worked, you would have been rewarded.

REVIEW

Circle whether the conditional sentences below\textsuperscript{25} are simple (S), should-would (SW) or contrary-to-fact (CF).

1. If you visit Uganda, you will see many lakes and swamps.
   \textbf{S} \quad \textbf{SW} \quad \textbf{CF}

2. If you should travel toward the west, you would see an arm of the Great Rift Valley.
   \textbf{S} \quad \textbf{SW} \quad \textbf{CF}

3. If the Ugandan flag used green instead of yellow, it would have the same colors as the Kenyan flag.
   \textbf{S} \quad \textbf{SW} \quad \textbf{CF}

4. If the National Resistance Army had not captured Kampala in 1986, Museveni would not have become president.
   \textbf{S} \quad \textbf{SW} \quad \textbf{CF}

5. *If you travel east from Kampala, you cross Lake Victoria and enter Tanzania.*

6. *Kama ungeliniuliza, ungelijua kwamba pati ni leo.*

7. *Kama ukitaka kuja, niambie tu.*

8. *Tutafurahi sana kama ukija na wenzako.*

9. *Ungeweza kuleta chakula kidogo?*

10. *Kama huwezi, si kitu.*
Chapter 52
DIRECT & INDIRECT STATEMENTS

A **direct statement** is the transmission of a message by direct quotation. The message is set in quotation marks.

*My mother said, “I like your friend Laila.”*

An **indirect statement** is the reporting of a message without quoting the words directly. It does not use quotation marks.

*My mother said (that) she likes my friend Laila.*

Notice in the first sentence above that the speaker’s first person pronoun (*I like . . .*) in the direct statement changes to the third person pronoun (*she likes*) to agree logically with the perspective of the person doing the reporting. Also, in the second sentence, the possessive adjective *your* has changed to *my*.

**IN ENGLISH**

An indirect statement is easy to recognize since the reported message is introduced by *that* forming a subordinate clause (see Chapter 49, Sentences, Phrases and Clauses) used as an object of the verb. No quotation marks are used. Frequently, especially in speech, the introductory word *that* is omitted.

*The teacher said (that) we should study tonight.*
*The president claims (that) he will lower taxes.*
When the direct statement is transformed into a reported message, there is usually a shift in tense to maintain the logical time sequence in indirect statement.

**DIRECT STATEMENT ⇒ INDIRECT STATEMENT**

<table>
<thead>
<tr>
<th>DIRECT STATEMENT</th>
<th>INDIRECT STATEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>She said, “I like Laila.”</td>
<td>She said that she liked Laila.</td>
</tr>
<tr>
<td>past</td>
<td>present</td>
</tr>
<tr>
<td>She said, “I liked Laila.”</td>
<td>She said that she had liked Laila.</td>
</tr>
<tr>
<td>past</td>
<td>past</td>
</tr>
<tr>
<td>She said, “I will like Laila.”</td>
<td>She said that she would like Laila.</td>
</tr>
<tr>
<td>past</td>
<td>future</td>
</tr>
</tbody>
</table>

**KWA KISWAHILI**

Indirect statements, called **kauli zilizotajwa**, are used not only after verbs of saying, but also after verbs of thinking, feeling, sensing, writing and the like. Swahili uses the introductory words **kwamba** or **kuwa** like the *that* of the English construction. Indirect statement is very commonly used in Swahili, but follows rules slightly different from those used in English. Note that there is not usually a shift in tenses when a direct statement is transformed into an indirect statement.
TANGAZO  ⇒  KAULI ILIYOTAJWA

| Alisema, “Nampenda Laila.” | Alisema kwamba anampenda Laila |
| past | present | past | present |

| Alisema, “Nilimpenda Laila.” | Alisema kuwa alimpenda Laila |
| past | past | past | past |

| Alisema, “Nitampenda Laila.” | Alisema kwamba atampenda Laila |
| past | future | past | future |

REVIEW

Change the direct statements below to indirect statements.

1. Salim told me, ‘My ankle really hurts today.”

2. I thought, ‘Of course it does; you fall down all the time.”

3. ‘Maybe you should go to the doctor,” I said.

4. ‘Alright,” said Salim. ‘I’ll go.”
5. *Salim went to the doctor, who told him, “You have a sprained ankle.”*

10. *Salim alienda kwa daktari ambaye alimwambia, “Ulivunja mguu wako.”*
Chapter 53
COMPARISONS

When adjectives are used to compare the qualities of the nouns they modify, or when adverbs are used to compare the qualities of the verbs they modify, they change forms. This change is called comparison.

comparison of adjectives

Although Shakila is pretty, Adija is prettier.

comparing the noun Shakila

comparing the noun Adija

comparison of adverbs

Although Shakila writes well, Adija writes better.

comparing the verb writes

comparing the verb writes

IN ENGLISH

There are three degrees of comparison and each degree is formed in a different way.

1. The positive form refers to the quality of a person or thing. It is simply the adjective or adverb form.

Usi is short.

Juma runs fast.
The fabric is colorful.
The presidents speaks quickly.

2. The comparative form compares the quality of one person, thing or action with that of another person, thing or action. It is formed:
• by adding -er to short adjectives and to adverbs that do not end in -ly.

Usi is shorter than Mwanampate. Juma runs faster than other boys his age.

• by placing more or less in front of longer adjectives and most adverbs.

This fabric is less colorful than that fabric. This president speaks more quickly than the last one.

1. The superlative form is used to stress the highest or lowest degree of a quality. It is formed:

• by adding -est to short adjectives and to adverbs that do not end in -ly.

Usi is the shortest teacher in the room. Of all the boys, Juma runs fastest.
by placing most, least, very or exceedingly in front of longer adjectives and most adverbs.

This fabric is the most colorful one I have ever seen.
This president speaks very quickly.

Some of the most common adjectives and adverbs have irregular comparative and superlative forms; here are a few examples.

<table>
<thead>
<tr>
<th>English</th>
<th>Comparative</th>
<th>Superlative</th>
</tr>
</thead>
<tbody>
<tr>
<td>bad, ill</td>
<td>worse</td>
<td>worst</td>
</tr>
<tr>
<td>far</td>
<td>farther</td>
<td>farthest</td>
</tr>
<tr>
<td>further (additional)</td>
<td>furthest</td>
<td></td>
</tr>
<tr>
<td>good, well</td>
<td>better</td>
<td>best</td>
</tr>
<tr>
<td>little</td>
<td>less, lesser</td>
<td>least</td>
</tr>
<tr>
<td>littler</td>
<td>least</td>
<td></td>
</tr>
<tr>
<td>much, many</td>
<td>more</td>
<td>most</td>
</tr>
</tbody>
</table>

KWA KISWAHILI
Comparison is called ulinganishaji, from the verb kuliganisha, to compare. Swahili has the same three degrees of comparison that exist in English, but they are expressed differently.

1. The positive form, called umbo halisi, is simply the adjective or adverb. See Chapter 14, Adjectives, and Chapter 45, Adverbs.

   Usi ni msupi.
   Usi is short.
   Juma anakimbia kwa haraka.
   Juma runs quickly.

2. The comparative form, called umbo linganishi, compares the quality of one person, thing or action with
that of another person thing or action. It is formed by using a comparative preposition after the adjective or adverb compared. These conjunctions include kuliko, zaidi ya, kupita, and kushinda.

Usi ni mfupi kuliko Mwanampate.
(Usi is shorter than Mwanampate.)
Juma anakimbia kwa haraka zaidi ya wavulana wengine.
(Juma runs faster than other boys.)
Kitambaa hiki kina rangi chache kupita kile.
(This fabric has fewer colors than that one.)
Rais huyu anasema upesi kuwashinda wengine.
(This president speaks more quickly than others.)

When the object of comparison is not specified, the adjective zaidi (more) is used without any conjunction.

Mtu huyu ni mwema zaidi.
This person is better.
Nina vitabu vyingi zaidi.
I have more books.
3. The superlative form, called umbo lenye sifa ya juu (au ya chini) kabisa, is formed by using the comparative prepositions described above, followed by the noun or adjective -ote (all). The dash (-) indicates that -ote must agree in class with the plural noun to which it refers.

Usi ni mwalimu mfupi kuliko wote.
(Usi is the shortest teacher.)
Literally: Usi is a short teacher than all (the others).

Juma anakimbia kwa haraka zaida ya wavulana wote.
(Juma runs fastest of all the boys.)
Literally: Juma runs with speed greater than all the boys.

Kitambaa hiki kina rangi nyingi kupita vyote.
(This fabric is the most colorful of all.)
Literally: This fabric has many colors to surpass all.

Rais huyu anasema upesi kuwashinda wote.
This president speaks the most quickly.
Literally: This presidents speaks quickly to conquer all.
TAKE NOTE

Because they are also verbs, the Swahili comparative prepositions *kupita*, which literally means *to pass or surpass*, and *kushinda*, which literally means *to conquer*, must take object markers when followed by nouns that refer to people. See Chapter 35, Direct Objects.

REVIEW

In the sentences below, draw an arrow from the adjective to the noun it modifies. Circle the degree of comparison: positive (P), comparative (C) or superlative (S).

1. His travel expenses were greater than mine.
   
   P  C  S

2. Juma and Adija’s wedding was very traditional.
   
   P  C  S

3. My cousin is the best swimmer in town.
   
   P  C  S

4. The novelist is respected.
   
   P  C  S

5. Hud is the least competitive boy on the team.
   
   P  C  S

---

26 Sentences 6-10 are adapted from G.W. Broomfield, *Sarufi ya Kiswahili* (London: Sheldon Press, 1931).
6. Huyu ni bwana mkubwa.

8. Ng’ombe ni mrefu kuliko kondoo.

10. Amekuwa hodari lakini sasa ni hodari zaidi.
MISC.
Reduplication is a process of creating new words by doubling a word or part of word. For example:

*hoity-toity*

**IN ENGLISH**
Reduplication is not common in English, but it does occur. Here are some examples:

*higglety-pigglety*
*hocus-pocus*

**KWA KISWAHILI**
Reduplication is called [urudufu], from the adjective [rudufu], which means *double or twofold* and the verb [kurudufu], which means *to double*. Reduplication in Swahili is used to form new words or to exaggerate a word's original meaning. Note that the part of speech can also be modified, and that reduplicated words comprise various parts of speech.

**REDUPLED VERBS = VITENZI RUDUFU**

kuenda (verb) to go
⇒ kuendaenda (verb) to go on and on
REDUPPLICATED NOUNS = MAJINA RUDUFU

**kupinda** (verb) to bend, twist, fold, bend up

⇒ **kipindupindu** (noun) seizure, convulsions, cholera

**kuvunjia** (verb) to break, to break down, to break up

⇒ **kivunjavunjia** (noun) praying mantis (from a superstition that should you happen to kill one, you will break the next thing you touch)\(^{27}\)

REDUPPLICATED ADVERBS = VIELEZI RUDUFU

**sana** (adverb) very

⇒ **sana sana** (adverb) extremely

**sawa** (adjective) like, alike, equal, the same, just, right, level

⇒ **sawasawa** (adverb) equally, just the same

Another use of reduplication is to form intensive pronouns, called **viwakilishi vya nguvu**, or reduplicated demonstratives, **vionyeshi rudufu**, from the demonstrative adjective/pronoun -le. See Chapter 18, Demonstrative Adjectives and Chapter 10, Demonstrative Pronouns.

---

Nataka kitabu kile kile.
*I want that same book (as the one mentioned previously).*

Alihudhuria shule ile ile.
*He attended that same school (as the one mentioned previously).*

**TAKE NOTE**

Not all words can be reduplicated and still signify anything meaningful. You should be able to recognize and guess at the meaning of reduplicated words, but be cautious about forming them yourself.
Chapter 55
INTERJECTIONS

An interjection or exclamation is a cry, an expression of strong feeling or emotion. It usually occurs at the beginning of a sentence, and stands apart from the grammar of the sentence. For example:

Hey! Where have you been?

interjection

IN ENGLISH
There is a great variety of such emotional words, including most words of swearing and profanity. They belong to both written and spoken language, but are separated from the main clause by a comma; the sentence usually ends with an exclamation mark.

Ab, the water feels great.
Yikes, what in the the world are you doing?!

KWA KISWAHILI
Interjections are called vihusishi, from the verb kuhisi, to feel. A variety of emotional words exists in Swahili, including expressions of awe, anger, fear, joy, sadness and the evoking of God. An interjection is invariable; it never changes form. Here are a few examples.
<table>
<thead>
<tr>
<th>INTERJECTION</th>
<th>EMOTION/PURPOSE EXPRESSED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lo!</td>
<td>surprise</td>
</tr>
<tr>
<td>Ah!</td>
<td>grief</td>
</tr>
<tr>
<td>Ole!</td>
<td>grief</td>
</tr>
<tr>
<td>Ee-e-e-e</td>
<td>consolation</td>
</tr>
<tr>
<td>Haya!</td>
<td>agreement/attention-getting</td>
</tr>
<tr>
<td>Ala!</td>
<td>annoyance, impatience</td>
</tr>
<tr>
<td>Inshallah</td>
<td>if God is willing (from Arabic)</td>
</tr>
</tbody>
