Not only do Seattle community colleges have a more ample requirement, according to the AAC&U. In the western region, 78 percent of colleges had one in place, followed by the middle states with 68 percent. The South nearly 60 percent.

**Requirement at UCLA**

Mitchell Chang, assistant professor of higher education and organizational change at the University of California at Los Angeles (UCLA), conducted one of the most thorough studies of diversity requirements during the Spring 1999 semester. He analyzed their effect at a public university in the Northeast where the requirement had been present since 1992 and approximately one-third of the students were students of color. He measured the extent to which students' racial prejudice was diminished and found that completing the requirement significantly reduces these levels.

"In turn," he says, "reduces levels of racial prejudice are associated with enhancing students' ability to adapt successfully to change and with developing students' values and ethical standards through thoughtful reflection of relevant facts."

"These outcomes are widely considered to be among the most important goals in higher education. So in this way, these requirements not only help to improve race relations but also advance other highly cherished educational interests," says Chang.

Despite these unarguably positive findings by a member of its staff, UCLA is the only member of the University of California system with no diversity requirement in place.

In 1996, when Max Espinosa was a student and academic affairs commissioner at UCLA, he spearheaded an effort to change this. Espinosa, later a University of California student regent, says his main argument was that "it's important for universities to prepare students for leadership in an increasingly multicultural society."

"It's also an issue of understanding and appreciating each other's different experiences in the U.S.," he says, "and of supporting the academic areas that are developing that kind of research."

Espinosa, now the higher education chief consultant to the State of California State Assembly Budget Committee, says part of the reason UCLA has resisted establishing such a requisite is that it "saves a lot of money."

When a university adds a requirement, Espinosa explains, it "demonstrates an institutional commitment to that area of study."

As a student organizer, it was clear to him that the University was not prepared or committed to put in the necessary time, energy, or resources, he adds.

Espinosa was not the only UCLA student to advocate a diversity requirement. On November 29, 1999, in a letter to the *Daily Bruin*, Rochelle Ileto and Brenda Yen wrote. "These classes would make more students aware and sensitive to each other's cultures and differences, and would allow for an appreciation of the ways different people think and act."

"Ethnic and gender studies would benefit people the same way English and math classes do," the students argued; "we would be broadening our intellect by learning things which are unfamiliar or unknown to us."

**The Opposition**

The issue has its staunch opponents. One of the most outspoken is Bradford P Wilson, executive director of the National Association of Scholars, Princeton, New Jersey.

"My position is one of opposition to allow the general education curriculum to disintegrate and be replaced by diversity requirements," he says.

"The courses themselves are an excellent thing," Wilson says, "but I don't think that crowding out the core liberal arts is a good thing."

Wilson explains that the number of required courses is changing, but the

Divisions based on Regional Accrediting Agency
number of years during which they must be completed is not changing. So when you add a new course or set of courses, students will have to sacrifice certain courses for the sake of the diversity course. He says he sees the diversity requirement "in competition with the traditional core--as an argument to get away from the traditional core."

Another of Wilson's complaints, and one held by many, is that the requirements have become too broad. "It works for students who don't need guidance," he says, "but first-generation college students are hurt by this, because they don't get a lot of advice at home and are confronted with a bewildering variety of options and choices."

Poston, from UIC, says he too worries about "curricular creep," the process by which the list of approved courses to fulfill the requirement keeps getting bigger.

UCLA's Chang has been involved with a somewhat broad requirement at the University of Massachusetts-Boston. "This type of requirement," he says, "despite being broad and varied, proved to have a positive effect on students' racial attitudes."

The sometimes amble course selection is actually a source of hope in Chang's study. "Given the course variability, the findings also suggest that learning about one significant difference in U.S. society (e.g., gender or class differences) might also transfer well to thinking about other differences and subsequently reduce multiple types of prejudice," he says.

Arguments against diversity requirements claim that they have no academic value and are part of higher education's ideological project in sensitivity training. "Some charge that it reduces college teaching to social browbeating and is a good example of political correctness run amok," says Chang.

Betsy Palmer, assistant professor of higher education at the University of Alabama, analyzed the effect of diversity courses on more than 1,000 Pennsylvania State University students. One of her goals was to determine which particular courses were most effective.

"Courses affiliated with women's studies and ethnic studies programs positively enhanced attitudes toward gender and racial differences more than courses not affiliated with those departments," Palmer says. She also found that discussion-based courses were more effective than lecture courses.

"Students in courses that examined power relations among diverse groups reported greater gains than students in courses that did not address power relations," she says. Also, courses that highlighted the achievements of individuals from targeted groups showed greater gains in student knowledge than courses that did not address this area.

How do students feel about diversity requirements? "Nearly 90 percent of students indicated that they would have taken courses with diversity content even if the requirement did not exist," Palmer reports.

Even better news is that nearly 60 percent of the students in Palmer's study suggested that their experience in a diversity course has motivated them to look at multiple perspectives in other courses and to rethink history from the perspectives of a targeted diversity group.

"Their experience in a diversity course had influenced a majority of the students to discuss issues of discrimination and prejudice with friends outside of class," Palmer adds, "and nearly 40 percent of the students suggested that their class experiences made them more aware of racial intolerance on campus."
The architects consider it to be a revolutionary measure, an alternative to accreditation that gives colleges and universities a better—and quicker—opportunity to heighten their awareness of their strengths and weaknesses.

Institutions across the nation undergo the accrediting process every decade in a step-by-step that can at times incite nail-biting. Such approvals pave the way for students to receive federal aid, and for parents to give a thumbs up to a recognized institution.

But some critics have argued that the process spans too much time in between abbreviated visits by screening committees. And that, often, institutions haven’t kept pace with changing educational priorities.

That’s where, its proponents say, the Academic Quality Improvement Project—AQIP—steps in to fill the gaps AQIP was introduced last year at the annual meeting of the North Central Association of Colleges and Schools.

“It meets institutions’ needs where they are, and it has the potential to help institutions to develop better systems of information on their campuses,” says Steven D. Crow, executive director of the Higher Learning Commission.

“It’s an approach to accreditation that lines up with some of the management styles of our institutions. In short, they’re into doing quality improvement practices on their campuses and really want an accrediting process that supports that.”

But, Crow reasons, AQIP “also helps think through the whole importance of the role of a culture of evidence. Quality improvement says you can make better decisions based on good information, as opposed to the latest fad or what happened yesterday. You literally try to find out what’s working and what isn’t, and you ground your decisions on that kind of evidence. That is increasingly coming to mark more of how higher education has got to operate.”

North Central accredits members in 19 states, including Ohio, Indiana, New Mexico, the Dakotas, Arizona, and Arkansas. The program was unveiled before more than 400 educators from across the country in Chicago last April, and what surprised many was that it directly competes with NCAs traditional model.

Although organizers say the program seemed to energize the room, many educators, nevertheless, approached it with a wait-and-see attitude. More than 100 of the NCAs 1,000 members expressed interest, but so far only about 30 have signed on. Many others are cautiously waiting to gauge the reaction of those who’ve become part of its newborn phase.

Funded by a grant from the Pew Charitable Trusts, AQIP provides quality assurance through a review of an institution’s goals and initiatives. That review is designed to improve performance by requiring that participants...
measure their programs and processes more often than in the traditional accreditation system.

Hispanic Outlook recently sat down with AQIP's director, Stephen D. Spangehl, to ask about the project, its origins, and its future.

HO: What went into creating this program?

SPANGEHL: Pew Charitable Trusts notified us in March [1999] that we'd received a one and a half million-dollar grant...effective July 1st of that year. We did quite a bit of work through the following March to determine what pieces would make it up. At that point, we assembled a decision team of experts from around the country, and they helped to put together its structure. It took a lot of work, and we got people who were pretty well known for understanding quality principles and higher education, not just from our region. We had educators from California and Alabama. We looked for people who really understood how the quality movement could be applied to higher education.

Our goal in the grant proposal to Pew was to involve a third of NCA's 1,000 institutions in this program, in one way or another, by the end of the three-year period. So we are under one-tenth of the way there. There's a lot still to be done.

HO: How does AQIP differ from traditional accreditation?

SPANGEHL: This is very different. Traditional accreditation is a process on a 10-year cycle of asking institutions to study themselves, then write a report, and be visited for three days by a team of people that checks out whether the institution's self-analysis is accurate. What we've substituted is an ongoing program of working with an institution to help it focus on its quality improvement and hold it accountable for maintaining a constant improvement cycle. Instead of 10 years, it's on a three-year cycle. It involves much more interaction in a kind of coaching relationship, rather than a judgmental relationship. We think that for a lot of institutions...this will be a much more supportive accrediting process.

HO: What was the reaction?

SPANGEHL: A lot of sessions at the meeting were on quality, so it fit in well. We explained how the program worked, and there was a lot of interest. A number of institutions were intrigued by this model, and about 120 expressed interest. But many were not anxious to be the first ones to test it. About 30 institutions, at this point, wanted to tie accreditation to it.

HO: How do you compare the two systems?

SPANGEHL: Most institutions are on a 10-year cycle, so they really don't have to make a decision until about two years before they com up for accreditation. We have some participants who just came from accreditation and joined right away, because this is what they want to do. If your next visit is 2008, there's no urgency in making a decision on AQIP. This says if you can show evidence of a continuing, systemic quality improvement program, and evidence that the program is having results, and that you're actually improving in what you set out to improve—that is a good, solid basis for continuing accreditation.

In the rest of the world, quality assurance based on inspections is being replaced by quality assurance funded on a continuing basis, so there is continuing attention to systemic management and improvement. This is analogous to what takes place in the automotive industry. They no longer conduct spot checks on the carburetors to make sure the boxes are filled out correctly. They ask the suppliers to get their "ISO9000" certified so they can trust any product the supplier supplies.

HO: Why did you get involved?

SPANGEHL: I've been at NCA for 10 years. At one time or another, I worked with 250 colleges and universities and helped them prepare for the traditional self-study process.

I came to the conclusion that for institutions doing systemic, continuous improvement, we could provide a better service than the traditional process, one that was more supportive. So what we proposed—and what we plan to do is to use the grant to develop a whole new approach and get it up and running and then to be self-supporting.

What's radical is not the time limit but the relationship between institutions and us. Up until now, accreditation has been pretty much a compliance process. We send out a set of rules. We inspect to see if a college or university meets them. And if you meet them, we say we'll see you again in a decade. This puts in place of that a much more nurturing relationship between us and the institution.

We want to help you achieve your goals and your students by being as supportive as possible in helping you identify the things you ought to be working on, rather than simply coming in and judging you and saying you're not doing the right things, you failed.

HO: How do participants begin?

SPANGEHL: The process involves them first attending a strategy forum—six or eight institutions at a time. Each puts together a seven- to ten-member team, including the college president, board members, leaders of the faculty and staff. They come together for three days of intensive examination of their own goals and the goals of other institutions attending.

Working with them is pretty continuous. At meetings, we ask them to identify three or four prime goals they will work on over the next three years. We
ask them to decide where they are really going to apply their attention to move an institution where they want it to be. For example, Kent State wants diversity. So we will help Kent clarify what they really want to accomplish in diversity and how they measure it, how they will hold themselves accountable.

We asked each institution: Is this really the most critical thing you need to work on? Do you have a measurement theme? We really grilled them, and asked them to grill themselves. We gave them time to go back home and make sure the goals they'd chosen were the ones they want to stay with.

It's a peer review process an institution is going to put all of its energies into to make it stronger. We've already held forums in St. Louis in November, and Phoenix in March, and the next one is in June in Chicago. We expect to be running these monthly within two years.

**HO:** How difficult is it to promote—to change the accreditation mindset?

**SPANGEHL:** For the institutions already doing some kind of quality program, it's not a hard sell. They have a clear focus on why they exist. They're very clear that they exist to serve a group of students, and they know their needs. It aligns perfectly with where they're already putting their energies.

Universities where there is a complex mix of different sets of purposes have a harder time with the AQIP model, because it basically says you have to know whom you're in business to serve. So we've had fewer universities step up quickly.

I would hope that if we have an institution that is not very serious about what goals it had set for itself, it would voluntarily exit from the process and go back to the traditional one. They have to be serious to stay with this.

**HO:** When do you gauge success?

**SPANGEHL:** For our colleges, this system will be in place of the traditional self-study and visitation process. We haven't decided yet to what degree we are going to employ physical visits to campuses and will it be a team or a series of individuals. We are rethinking that process.

If we're going to put people on airplanes to visit, we want it to have real value to the colleges. We want them to get something out of that experience that they could not get any other way. Right now, visits often do not seem to be of much value for the college being visited.

**HO:** What's the response outside of your region?

**SPANGEHL:** There is a great interest in other regions to use quality assurance principles, especially if some institutions are using them already as part of the accreditation process.

**HO:** How is this modeled after the Malcolm Baldrige National Quality Program?

**SPANGEHL:** The Baldrige program is within the federal Department of Commerce, and originally designed for manufacturing industries to help make them more competitive worldwide. It says to an institution—you need to look at yourself in systems terms, look at yourself in a management system, in an information system, in a word processing system, and you can focus on those systems and continuously make what you want to accomplish. As a result, you can make your company much, much stronger.

Baldrige was originally set up as an award program, but many organizations are using it to improve without ever applying for an award. Just in the last year, Baldrige extended to health care and higher education.

We took the same underlying principles and tried to customize them, particularly to the needs of higher education. For instance, we've been very careful in the language we speak, because we're dealing only with colleges and universities. So we try to not use business language and don't refer to "customers." If you talk about stakeholders and not students in the discussion, you shut people out. We've tried to respect the traditions of higher education and at the same time use the principles that have worked well in other areas and show how they can be applied to the education arena.

**HO:** The cost?

**SPANGEHL:** It's hard to figure. Normally, for accreditation, an institution sets up a bunch of teams and spends two years working on a self-study. Those are people who already work for an institution, who are taken away from what they normally do. That's a pretty sizable cost, though it doesn't show up as a new expenditure. The cost of our program is much more imbedded into the life of what an institution does. It might cause you to incur other kinds of costs, such as to train people.

Overall, I think it might come out costing pretty much the same. But it's hard at this point in the development process to give a hard number.

**HO:** How important is the shorter time frame?

**SPANGEHL:** This will help institutions that find themselves faced with a lot of challenges that they didn't face 10 years ago. The higher education market is intensely competitive. Institutions that cannot compete for students by offering programs and services that meet the students' needs are not going to survive and stay viable. They also have to identify markets in ways that they didn't in the past, maybe find narrower niches in the market.

We have tried to allow for the diversity of institutions. We accredit everything from the Universities of Chicago and Michigan down to small, privately owned secretarial colleges. We cherish our role in maintaining that diversity of opportunity.

Our argument is that if you take a look at yourself carefully only once a decade, the world's changing much too fast for you to survive. There's too much competition.

Students have choices like they never had before. They can get on the Internet and take courses from 50 colleges around the world instead of having to go to a local community college. They are much more careful and smarter shoppers.

We are trying to provide a program that says if you are the kind of college that wants to be agile and meet the needs we have, this is the program that will support you in that effort.
The University of Houston-Downtown, an open-admissions, urban university, has just received a five-year, $1.9-million development grant to implement a comprehensive Learners' Community program on campus. The initiative will target UHD's highly diverse first-time-in-college student population and aims to boost the retention and graduation rates of this group.

Funding for the project originated from Department of Education Title V funds earmarked for Developing Hispanic Serving Institutions—for the improvement and expansion of essential services to the Hispanic community and other underrepresented groups.

Like many other colleges and universities across the nation, UHD has experienced the serious problem of low minority retention and minority graduation rates.

The grant, states Dr. Max Castillo, UHD president, will establish "an integrated, University-wide resource and referral center that will support the retention of our highly diverse student population."

Research indicates that multiple barriers exist that prevent college persistence for Hispanic students. Universities across the nation are aware of the underrepresentation of Hispanic students in the American higher educational system. Hispanic students exhibit low enrollment rates and even lower rates of persistence than do White students (Rendon, 1994). The low persistence rates of Hispanic students after matriculation exacerbate the problem of underrepresentation. Carter and Wilson (1992) reported that Hispanic students comprise 6.1 percent of the total number of undergraduates enrolled in the U.S. and that only 3.1 percent of these students completed a baccalaureate degree.

During the Fall 2000 semester, 81 percent of UHD's first-time-in-college population were minority students, and nearly half of them—465 percent—were Hispanic. UHD established University College in response to the large number of first-time-in-college students enrolling at UHD who were not declared majors and who were not succeeding at college-level coursework.

"Of the nearly 9,000 students enrolled at UHD in Fall 2000, over half (6,208) are now advised and monitored by UC until they officially declare a major field of study and have an official degree plan approved," explains University College Dean Dan Jones. "The primary goal of the Learners' Community will be to facilitate the academic performance of this first-time-in-college population in order to enhance its educational success." Concerns about academic underpreparedness, technology, financial aid, family and work obligations, citizenship, and ESL will all be addressed within the Learners' Community Project. "Specifically," explains Jones, "the Learners' Community initiative will provide support services to this group of students in order to address academic underpreparedness and enhance student social and academic integration into the University."

During the past two decades, student persistence in higher education has been investigated extensively. The Learners' Community Initiative at UHD has been designed to reflect the multiple variables that affect student retention and persistence in higher education that have emerged from this body of research (Nora, 1987; Nora & Cabrera, 1992, 1996; Nora, Cabrera & Castañeda, 1992; Pascarella & Terenzini, 1991; Tinto, 1993).

The Initiative will be comprised of four major components, all of which reflect the institutions' goals.

- Component One: Coordination
of Existing Academic Programs

The College Success Program course already offered at UHD has been refined and expanded to develop a content-based first-year-student seminar with clear disciplinary focus. Moreover, the course will serve as a linchpin for linked courses and course clusters offered to beginning students. These course linkages will allow students to take the Freshman Seminar course, a developmental course in reading, writing, or math and a core curriculum course, which will be taught by faculty trained to work with developmental students.

Supplemental instruction will be offered for courses that have historically high attrition rates. "Supplemental Instruction is an academic support program that utilizes peer-assisted study sessions for difficult academic courses," explains Robin Davidsoa, new program director of the Title V Grant. "Supplemental Instruction is taught through informal seminars in which students compare notes, discuss readings, develop organization tools, and learn how to integrate course content and reasoning skills. These sessions are taught by SI Leaders; students who have successfully taken the 'high risk' course."

"University College has also developed a system whereby those students who are not succeeding in their developmental coursework can be identified early in the semester, and intervention by both academic advising staff and departmental faculty can be initiated," explains Davidson. "This intervention strategy will target the midterm of the first semester for students in developmental courses. Faculty teaching developmental courses will identify those students who are at risk of failing and forward those names to the UC Academic Advising Center. The academic advisors can then provide guidance to these students to ensure that students make use of academic support services on campus."

During the grant period, program faculty and staff will be enabled to participate in professional development seminars and workshops, in the areas of, for example, collaborative learning, the use of technology, and best teaching practices. All faculty involved with the Title V Initiative will be required to attend training programs for faculty mentors working with entering students.

- Component Two: Academicships, and will help students complete the required paperwork and develop budget plans Academic counselors will also develop a Probation Recovery Program targeting students who experience a low GPA by the end of their first semester. The counselors will aid students in devising a structured recovery plan that will involve strategic advising recommendations, reduction of a student's outside workload, future course sequencing, and

Basic Skills Lab offers tutoring services in each of the developmental content areas (reading, writing, and math) and provides faculty and peer tutors, computer-assisted instruction, and test preparation activities.

To help ensure the success of the peer-mentoring program, University College has established a collaborative partnership with the Division of Student Affairs. This program will provide peer mentors and first-year-student orientation leaders to work with the first-time-in-college population. These mentors will also work with the Community Outreach Counselor in order to visit students in the local high schools who will be entering UHD the following year.

Peer advisors will help students with anxieties about college and will tailor presentations and group activities to the particular needs of these incoming students. Peer advisors and mentors will also participate in an online e-mail service for first-time-in-college students, answering questions received through electronic mail.

To help close the gap that students experience between their in-class and out-of-class experiences, support groups in the form of Freshmen Interest Groups (FIGS) will offer the opportunity for collaboration among Academic and Student Affairs, discipline faculty, and students. Discussion groups, guest speakers, and conferences will be planned to enhance student interest in and understanding of various career paths.

- Component Four: Institutional Support for Student Success and Retention

A strong assessment team is being developed for the initiative. A network among University College, the Office of Institutional Research, the Information Resources Department, and the Academic Colleges at UHD will be established to collect data and create a database. The intent of establishing a Title V Assessment Team is not only to provide an outcomes assessment of activities and objec-
tives specific to the Title V program, but also to inform faculty, staff, and all program stakeholders of the profile of factors impacting student retention and persistence at UHD.

Responding to Community Needs and Concerns

Dr. Max Castillo, president of the University of Houston Downtown, sums up the importance of receiving this grant: "UHD has always prided itself on being in the business not only of selecting winners but of creating winners. The funding provided by this grant to initiate a Learners' Community Initiative is an opportunity to create an intake, advising, and support system that better serves the needs of students as it improves the University's performance on key indicators of student success."

STUDENT LIFE INTERN

Oberlin College Student Life and Services seeks applications for Community Coordinator position in the area of Latino/a. Full-time, 11-month position (7/16/01 – 6/15/02) renewable for one year. Entire description: [http://www.oberlin.edu/HR/otherjobs.html]. Requirements: Familiarity with Latino/a culture/BA; experience demonstrating strong interpersonal and organizational skills. Salary commensurate with experience; including 5 meals/week; tuition remission up to 5 credit hours per semester; benefits package. Send applications, resume and names of three references to Rachel Beverly, Assistant Dean and Director of the Multicultural Resource Center, Oberlin College, Wilder 105, Oberlin, Ohio 44074. Applications accepted until position is filled. AA/EOE

OBERLIN

YORK COLLEGE City University of New York Anticipated Opening

Director of Testing and Assessment
(Higher Education Associate)

Duties:
Reporting to the Assistant Vice President for Academic Affairs, this position has overall supervision, planning, budgeting and administrative responsibilities for all testing and assessment activities. As such, the successful candidate will be responsible for overseeing the establishment of a testing center at the College, for the implementation and revision of all standardized test batteries sanctioned by CUNY and the College, including the CUNY ACT and CUNY Proficiency Exam. Responsibilities include: development and implementation of a testing program to guide students’ admissions and academic placement; analyzing existing and developing and implementing new test security protocols; providing expertise in the areas of test construction and validation to departments seeking to evaluate and improve testing instruments, protocols and placements; developing and implementing innovative approaches to testing preparation and other duties. (See CUNY web site: www.cuny.edu/academic/ for full job details.)

Qualifications:
Minimum of an appropriate baccalaureate degree and six years of related experience, and excellent communication and interpersonal skills required. Advanced degree in educational psychology, quantitative analysis, psychometric theory/educational measurement of psychology and experience as a psychometrician working in a research and/or testing agency strongly preferred. Must be knowledgeable about statistical procedures associated with tests, including qualitative and quantitative analysis; be able to work and communicate effectively with students, faculty, and external organizations in a diverse community.

Salary: $42,616 - $63,410, commensurate with salary history and experience.

Send three (3) copies of application (cover letter, resume and the names, addresses and telephone numbers of three references) by 5/1/01 to:

FACULTY

CLINTON COMMUNITY COLLEGE
PLATTSBURGH, NEW YORK

Join forward-thinking, dynamic faculty and staff at Clinton Community College, a progressive community college located in Northern New York on Lake Champlain, with a panoramic view of the Green Mountains of Vermont and the Adirondack Mountains of New York. The College, a member of the State University of New York System, enrolls 1,200 FTE students and awards associate degrees in career oriented and liberal arts/sciences programs of study. The College follows the following positions available fall 2001 semester:

MATHMATICS
The successful candidate will teach courses in statistics and basic skills, as well as first and second year level mathematics courses. Master’s degree in mathematics or related field is required; teaching and/or tutoring experience at a community college is preferred.

MICROBIOLOGIST/MOLECULAR BIOLOGIST
The successful candidate will teach courses in microbiology, general biology, Master’s degree in biology or related field, and 2 years teaching experience at college level, preferably at a community college level, is required. Industrial experience in a cleanroom is preferred.

CRIMINAL JUSTICE
The successful candidate will teach courses in criminal justice, criminal law, juvenile delinquency and related subjects. Bachelor’s degree in law enforcement, criminology, or related field, with pursuit of master’s degree required. Previous experience in law enforcement, criminology, or a related field required; teaching experience is preferred.

ELECTRONICS TECHNOLOGY
The successful candidate will teach courses in Digital Electronics, Analog Electronics, Communication Electronics, and C Programming. A bachelor’s degree in electrical engineering, teaching and industrial experience is required; a master’s degree and community college experience is preferred.

COMPUTER INFORMATION SYSTEMS
The successful candidate shall possess a master’s degree in computer science or a closely related technical field and have previous experience and expertise in computer programming, computer hardware, computer networking and operating systems. Computer certification in Microsoft, A+, or Cisco systems and teaching experience is preferred.

BIOCHEMIST/BIOTECHNOLOGIST
The successful candidate will teach courses in general college chemistry, microbiology, and biotechnology. Master’s degree in biochemistry or related field with two years teaching experience, preferably at a community college level, required. Industrial experience in biotechnology is preferred.

JOB DUTIES include teaching 15-16 credit hours per semester, conducting scheduled office hours for student conferences and advisement, as well as participation on committees.

The salary range based on discipline and commensurate with experience is $30,000-$45,000, and is complemented by an excellent benefits package. For full consideration, application materials should be received by April 30, 2001; submissions will be accepted until the position is filled.

To apply submit a letter of interest, resume, unofficial transcripts and the names, addresses, and telephone numbers of three professional references to: Human Resources Officer, Clinton Community College, 136 Clinton Point Drive, Plattsburgh, New York 12901

Clinton Community College, a member of the State University of New York System, is an Equal Opportunity/Affirmative Action employer and complies with ADA requirements.

Council for Higher Education Accreditation Urges Changes in College Transfer Policies

WASHINGTON, D.C.

More than half of the nation's undergraduates will not have an alma mater; they will have at least two. With a majority of bachelor's degree earners now attending more than a single institution prior to attaining their degree, colleges and universities must revamp long-standing transfer policies to make them more efficient, consistent, and easy to understand for an unprecedented pool of students, according to a new report from the Council for Higher Education Accreditation (CHEA), the nation's largest membership organization of higher education institutions.

"The number of students who seek to transfer credits will continue to rise dramatically. These students will be higher-skilled workers who continually return to school. They will be students seeking credits earned through online courses, satellite campuses, foreign institutions, and corporate universities," said Judith Eaton, president of CHEA. "Higher education must take steps to make transfer requirements and procedures clear to these students and effective in meeting their needs."

The report calls for colleges and universities, accrediting organizations, and national higher education associations to include new criteria in establishing transfer policies. These changes will affect the number of students being granted credit for courses taken at other institutions and the ease of obtaining a degree for many students who transfer.

"Pressure to attend college and earn higher education degrees has never been greater," said Eaton. "At the same time, higher education is going through significant changes in the composition of the student body and the typical progression to attain a degree. We see a need to address these unprecedented changes as a part of a larger effort to ensure quality in higher education."

The statement was developed by CHEA's Committee on Transfer and the Public Interest, which was formed in 1998 to examine the issue of transfer and to establish guidelines for accreditors and higher education institutions. The committee included leaders of regional and national accrediting organizations, state higher education systems, and national higher education associations.

In addition to calling for these changes, the statement asserts CHEA's commitment to bring leaders together to address emerging issues for transfer and to develop tools and strategies to meet the needs of students and institutions.

The document is available online at www.chea.org.

MALDEF Troubled by Proposed Changes to Higher Education Jurisdiction Assignment

WASHINGTON, D.C.

The Mexican American Legal Defense and Educational Fund (MALDEF) joined members of the Congressional Black and Hispanic Caucuses and others in urging the chair of the House Education and the Workforce Committee to reconsider a decision about to be taken by the Committee that would have undermined minority higher education efforts.

The approved rules would have removed minority higher education issues from the jurisdiction of the Subcommittee on 21st Century Competitiveness (higher education) and placed them under the jurisdiction of the Select Education Subcommittee.

A bipartisan compromise in Congress prevented the change from happening.

MALDEF called for the restoration of jurisdiction over Titles I, III, V, VI, and VII of the Higher Education Act (HEA) to the Subcommittee on 21st Century Competitiveness, thereby keeping the HEA intact and inclusive.

Angelo Amador, legislative analyst for the Washington, D.C., office of MALDEF, said at the time, "Under the new structure, when the postsecondary committee discusses improving higher education and increasing competitiveness of our college students, our concerns will not be addressed. By separating postsecondary educational opportunities this way, they have inadvertently set the Latino postsecondary education priorities into a 'separate but equal' scheme."

Combining minority higher education issues with unrelated social programs, such as adoption and domestic volunteer programs, would have presented minority postsecondary education as a social problem, especially when one considers the fact that minority higher education has been combined with programs directed toward at-risk youth—programs such as juvenile justice, child abuse, and runaway youth.

"There are shortages of minorities among all the professions, and a critical part of the efforts to reform and improve the education of our population includes postsecondary education. Segregating the programs that benefit minorities from those that affect other major groups is the wrong way to further our mutual objectives," concluded Amador.
NACE Reports Gains in Starting Salary for New College Grads

BETHLEHEM, Pa.

Despite talk of softening in the economy, a recent salary offer report from the National Association of Colleges and Employers (NACE) showed that graduates in many fields are getting higher starting salary offers than they did last year. The Winter 2001 Salary Survey showed that nearly all disciplines posted gains, albeit generally modest ones, in their starting salary offers.

"What is different is the tenor of the competition. We've become accustomed to competition running at a fevered pitch rather than gathering steam over the course of the year, and used to the idea that starting salaries for all types of graduates increase by leaps and bounds instead of moving upward at a steady pace," said Marilyn Mackes, NACE executive director. "The Winter 2001 issue of Salary Survey represents a return to 'the norm.' Traditionally, the first salary report of the year has included modest increases as employers keep careful watch on their workforce needs and the growth of their organizations."

"Modest" describes the salary increases afforded accounting and business administration graduates. Accounting grads saw a 3.8 percent increase in salary, while the average offer to business administration grads nudged up just 1.3 percent.

Economics/finance and MIS graduates both got a nice bump up in their average offers. For their first job out of school, economics/finance grads experienced a 57 percent increase in starting salary. The average offer to MIS grads was 47 percent higher.

Data were scarce for liberal arts grads, but the average offer to psychology grads went up 4.8 percent.

In the technical disciplines, there is more evidence of competition, and average starting salary offers in some engineering fields are up substantially. Computer engineering grads have seen a 14.3 percent increase in starting salary. Civil engineering grads were also among those who made substantial gains. The average salary offered to them rose 9.2 percent. Electrical engineering grads saw a 66 percent increase, and mechanical engineers, 58 percent.

The average offer to computer science majors increased 59 percent.

Interestingly, information sciences grads, a favorite with employers last year, saw the average salary offered to them dip 1 percent. The decrease, however, may represent nothing more than a statistical blip.

ACE Reports on Research of National Commission on the High School Senior Year

WASHINGTON, D.C.

The American Council on Education said that, according to preliminary research released by the National Commission on the High School Senior Year, more than a third of the nation's high school seniors graduate without the skills they will need to succeed in the workforce or postsecondary education.

The report, "The Lost Opportunity of Senior Year: Finding a Better Way," found that high school students do not value their senior year. Instead, students view their senior year as a final "farewell tour of adolescence" and neglect their schoolwork, rather than treating it as an imperative year of learning, the report states. It calls on higher education and K-12 educators to work collaboratively to improve the 12th grade year for U.S. students.

This is the first of two reports by the commission, which was created last year by the U.S. Department of Education, the Carnegie Corporation of New York, the Charles Stewart Mott Foundation, and the Woodrow Wilson National Fellowship Foundation. The Commission is made up of educators, administrators, and political leaders, including the new U.S. secretary of education, Roderick R. Paige. Its second report, set for a June release, will include specific recommendations on improving the senior year.

Findings of the preliminary report showed graduation rates for low-income and students of color lagging behind those of middle- and upper-income students and, in large cities, up to 40 percent of high school students dropping out. Many of these students are hindered by low expectations. Also, U.S. students need a high school diploma and at least two years of postsecondary education to ensure their economic security, the report states.
Muhlenberg Renews Scholarship Agreement with Latin Alliance

In Pennsylvania, Muhlenberg Evening College Dean Dr. Samuel Laposata (pictured) and Erlinda Agrón, president of the Latin Alliance of Allentown, jointly announced the renewal of a scholarship agreement whereby Muhlenberg will offer five full scholarships to members of the Hispanic community in Allentown. Both Muhlenberg and the Alliance will be part of a committee that selects the recipients.

Muhlenberg College President Arthur Taylor implemented the first Hispanic scholarship program in 1996. Two of the five original scholarship recipients have graduated, and three remain in the program.

Texas-Pan Am to Host Hispanic Engineer Conference

The University of Texas-Pan American will be the academic host of the 2002 Hispanic Engineer National Achievement Awards Conference (HENAAC), one of the field’s most prestigious.

HENAAC recognizes Hispanic excellence in science and technology and brings together students and professionals from the corporate, government, and academic sectors. Past academic hosts, all known for strong and long-standing engineering programs, include Rice University, the University of Houston, and the University of Texas-El Paso.

“We are proud to be in the same company as HENAAC’s past academic hosts. It shows the strength of our engineering program,” said Roland S. Arriola, vice president for external affairs. “Although at 10 years our program is relatively young; our students and faculty have made great strides and have turned heads.”

New Members for Claremont Graduate Board

Dr. Rocio Ramos de Villarreal (r), Ernest M. Camacho (l), and Richard J. Ciecka joined Claremont Graduate University’s (Calif.) board of trustees.

Villarreal, vice president of the Center of Intellectual Capital and Competitiveness, a private consulting firm in Mexico, was the first woman to be Technical Secretary of the Economic Cabinet of the Presidency of the Republic of Mexico.

Camacho is the founding president and CEO of Pacifica Services Inc., a Pasadena company serving governmental and commercial customers in the disciplines of civil engineering, electronic engineering, and construction management. It received the “Outstanding Hispanic Business of the Year” award from the Latin Business Association.

Ciecka is president and CEO of Mutual of America Capital Management Corporation, the investment subsidiary of Mutual of America Life Insurance Co. in New York.

“Overcoming Hatred” Exhibit at Union County College

Union County College in New Jersey hosted “Overcoming Hatred/Creating Community,” a series of events open to the community and dedicated to creating a more civil society through an understanding of the roots of hatred. The week of events bridged the College’s observations of Black History Month and Women’s History Month.

An art and photography exhibit, featuring works on loan from the N.J. State Museum in Trenton and the Haremza Foundation Collection, was displayed in the Tomaso Art Gallery of the Kenneth MacKay Library. The exhibit depicted the Holocaust and other examples of persecution and included works by Charles White, Jacob Landau, Ben Shahn, Alex Nozick, and Edward Kufko.

Coca-Cola Enlarges Scholarship Program

The Coca-Cola Foundation enlarged its First Generation Scholarship Program in Florida, promising to provide $500,000 in scholarships over four years to students who are first in their family to attend college.

Through a partnership with the Florida Independent College Fund (FICF), the scholarships are available to students attending FICF’s 25 member schools, will be administered with FICF, and represent the largest of FICF’s scholarship programs. The First Generation Scholarship Program is now under way on nearly 300 U.S. campuses in 27 states, and on 52 university campuses in China.

First Generation Scholars receive a $5,000 scholarship, renewable for up to three additional years, based on academic standing and participation in campus activities.

Afro-Cuban Jazz at Manhattan School Concert

The Manhattan School of Music and Greater Harlem Chamber of Commerce, in collaboration with the Harlem Jazz and Music Festival, celebrated Black History Month with a "Masters in Music" concert in the Manhattan School’s John C. Borden Auditorium in New York. The evening honored internationally renowned jazz greats Lionel Hampton, vibraphonist, and saxophonist Ornette Coleman, the first honoree of the Festival’s "Legend Award."

The concert showcased the Manhattan School of Music Afro-Cuban Jazz Orchestra, directed by Bobby Sanabria; Joe Cuba performed with his Latin Jazz Sextet; and vocalist/recording artist Gloria Lynne performed with her Jazz Quintet. All three leaders are
nationally renowned. Sanabria's own ensemble is Ascensión.

Afro-Cuban jazz, too often approached by jazz musicians from a superficial level, is often overlooked in the chronicles of jazz history, says Sanabria, who hopes to help it gain the recognition it deserves.

Miami-Dade Presents “Documenting Cuba”

The department of cultural affairs at Miami-Dade Community College in Florida, through its Cultura del Lobo Performance Series, is presenting “Documenting Cuba,” an anthology of 10 documentary films that examine controversial topics in the Cuban community. The film series, which runs through June, is being held in the Wolfson Campus Auditorium. Alejandro Rios is the curator of the series and will introduce each screening.

Secuencias inconclusas was the first film shown. The documentary, the U.S. film premiere of Cuban director Amanda Chávez, a resident of Brazil, explores the development of the film industry in Cuba after 1959. The story is told firsthand by the film's actors, producers, and technicians; all express some type of frustration with the revolution's cinema. Chávez was present at the premiere.

Luna Directs Postmodern Hamlet at Corpus Christi

J. Don Luna, associate professor of theater at Texas A&M University-Corpus Christi, directed HamletMachine, Heiaer Müller's brilliant postmodern concept piece loosely based on Shakespeare's Hamlet.

Luna, a veteran of about 40 plays, received a Master of Fine Arts in acting and directing from the University of Arizona. He studied with Lee Brener of Mabou Mines Theatre Co in New York and performed off-Broadway in Brener's experimental, multimedia Wrath of Kali in the summer of 1994.

John R. Wilson was technical director of HamletMachine, which seeks to allow the audience to bring the multiple realities of their own lives to the work and create their own piece: Hamlet as myth, as victim, as misogynist, as illegal, as one of us, as man become a part of the machine.

Pima Campus President Elected to HACU

Dr. Miguel Palacios, president of Pima Community College’s (Ariz.) Desert Vista Campus, was elected to the board of directors of the Hispanic Association of Colleges and Universities (HACU). He will serve a three-year term.

"HACU is nationally recognized as a leader and champion for Hispanic issues in postsecondary education," Palacios said. "I will be able to participate with other college and university presidents in the development of policy recommendations affecting Hispanic-serving institutions."

Palacios joined Pima Community College in 1971 as a Spanish instructor at the West Campus. After moving up the career ladder to campus president, Downtown Campus, he was selected to head the Desert Vista Campus in 1997.

UT-Austin Professor Probes Human Brain

Dr. Adriana Alcantara, assistant professor of psychology at the University of Texas (UT)-Austin and a member of the Institute for Neuroscience and the Waggoner Center for Alcohol and Addiction Research, received the Distinguished Alumni Award of the American Psychological Association (APA) Minority Fellowship Program in Neuroscience in recognition of her distinguished record in behavioral neuroscience research and education.

Alcantara, also UT-Austin's Searle Scholars Program nominee, studies cellular mechanisms underlying movement, thinking, and emotion in the part of the brain called the basal ganglia. Her aim is to improve basic understanding of those functions and to find out exactly what leads to a variety of neuropsychiatric and degenerative disorders which originate there.

Alcantara gave a plenary talk at the 20th Anniversary Career Opportunities in Research Education and Training (COR) meeting in Washington, D.C. She believes the COR honor and the APA award "demonstrated to the National Institute of Mental Health that these programs work and that they need to continue encouraging and funding underrepresented minorities."

Loyola Center Receives Pew Grant

A group of Chicago, Ill.-area high school and college students will learn how they can make a difference in shaping national and local policy through a $400,000 two-year grant awarded to Loyola University Chicago's Center for Urban Research and Learning (CURL) by the Pew Charitable Trust. The grant will support the Youth Voices in Policy Project (Youth VIP), an initiative to connect youths to policy issues in their communities and at the state and national levels.

According to Dr. Philip Nyden, Loyola professor of sociology and anthropology and CURL director, the disparity between what students learn inside the traditional classroom and what they see in the world around them has contributed to a sense of futility in influencing public policy.

Youth VIP will address this civic withdrawal by teaching an approach to policymaking that emphasizes university and community collaboration. CURL and the University Community Collaborative of Philadelphia (Pa.) have shown that research that combines the knowledge and creative energies of both university and community can be a powerful force in social change and engaging the community in policymaking.

Cisneros’ Orinoco Collection on Exhibit in Frankfurt

"Indian Life on the Orinoco: The Cisneros Collection," an exhibition that features one of the world's greatest and most comprehensive collections of ethnographic objects from the Amazon Basin, opened at the Museum für Völkerkunde, in Frankfurt, Germany. The exhibition, which runs through Sept. 25, presents a rare glimpse of the extraordinary Orinoco Collection, recently awarded the prestigious Leone d'Oro di San Marco, one of Europe's most distinguished cultural prizes. The Orinoco Collection is owned by the Fundación Cisneros, a Venezuela-based private philanthropic organization committed to the future of Latin America.

Patricia Phelps de Cisneros, chair of the Fundación Cisneros, said, "The Orinoco Collection offers a vivid portrait of the indigenous cultures of the Amazon Basin, each of them distinct yet sharing a common tie to the land in which they live. We are grateful to the Museum
für Völkerkunde for recognizing the sophistication, beauty, and power of these diverse cultures, which are so rapidly disappearing.

**PeaceJam Holds Youth Conference in New Mexico**

Adolfo Pérez Esquivel, 1980 Nobel Peace Laureate from Argentina, led a PeaceJam Youth Conference, “Human Rights and Justice for All,” at El Museo Cultural de Santa Fe, in Santa Fe, N.M. Area youth worked shoulder-to-shoulder with Pérez Esquivel to hone their peacemaking, conflict resolution, and community-healing skills.

The event focused on nonviolence, using the example of Argentina’s “Dirty War,” waged in the 1970s by the government against its own people. The Nobelist was essential to the peace process in Argentina and has been able to encourage the movement toward a truer form of democracy in many Latin American countries. He presently runs a philanthropic foundation, Service for Peace and Justice, which promotes peace and human rights in South America and the world.

**ENMU-Roswell Gets the Gold for Marketing**

Eastern New Mexico University-Roswell received a Gold Medallion Award of Excellence from the National Council for Marketing and Public Relations (NCMPR), presented to its community relations department for a promotional video produced for the Aviation Maintenance Technology program. Critical Careers in Aviation. Dr. Dwight Rogers, associate dean of career and technical education, and Donna Gutiérrez (pictured), community relations director, wrote the script for the video, used to promote the program and recruit students. Carl Erdman of Nash Street Media did the photography and editing.

NCMPR, an affiliate of the American Association of Community Colleges, is the only organization that exclusively represents marketing and public relations professionals at community, technical, and junior colleges.

**Corpus Christi Hosts Diverse Piano Ensemble**

The piano duo of Susanna García and William Chapman-Nyaho participated in the Distinguished Visitors in the Arts Series at Texas A&M University-Corpus Christi’s Warren Theatre.

García, a native South Texan and daughter of the late Hector P. García, and Chapman-Nyaho, a native of West Africa, bring the better of two diverse cultures together to create a nearly flawless piano ensemble. They have gained recognition throughout the U.S., Europe, and Africa with the blending of standard repertoire and new works. The piano duo is described as “one head, one heart, but four incredible hands!”

Critics have praised García’s “impressive technical skills and musical communication in performance” and her “remarkable critical insights into music.” She is an active clinician, presenting workshops and master classes for teacher groups throughout the U.S.

**Upcoming Events at NYU King Juan Carlos 1 Center**

New York University’s (NYU’s) King Juan Carlos 1 of Spain Center will host the seminar “Los sitios de Colombia” April 24 and 25, which will include lectures, films, and a photo exhibit, all on the besieged nation of Colombia. Lecturers are Margarita Serje, anthropology, École des Hautes Études, Paris; Erna von der Walde, department of Spanish and Portuguese, NYU; and Zoraida Díaz, photographer.

April 28, the King Juan Carlos 1 Center will host “Patologías,” the 10th Annual NYU/Columbia Graduate Conference on Spanish and Portuguese Literatures. Topics include escrituras errantes, perversiones, pat(h)ologías, clandestinidades, fractured states, hysteria and repressions, psychiatry, warfare, abyección, exílios, decadencia and degeneration, miscigenation, pollution and toxic environments, vaccines, cyber/netics, aphasia, and broken languages.

May 3-6, the Center will host the conference “José María Blanco White and the Traditions of Exile,” the first in a series of three encounters focused on the fascinating Spanish intellectual and exile José María Blanco White (Seville, 1775–Liverpool, 1841). Participants include Juan Goytisolo, Susan Kirkpatrick, Sylvia Molloy, Antonio Cascales, Antonio Benítez-Rojo, Luis Fernández Cifuentes, Martin Murphy, and Manuel Moreno Alonso.

**Navarro Given Leadership Award**

The National Center for Public Policy and Higher Education (Calif.) reported that M. Susana Navarro received the Virginia B. Smith Innovative Leadership Award for the year 2000. Navarro is executive director of the El Paso Collaborative for Academic Excellence.

The Collaborative, an unusual partnership of the University of Texas-El Paso and public schools, has led to significantly improved student performance in schools in and around El Paso.

The endowed award, named for the president emerita of Vassar College, was established to encourage and support leadership and innovation in American higher education and is jointly administered by the Council for Adult and Experimental Learning and the National Center for Public Policy and Higher Education.

**Rhode Island Professor Given Fulbright for Teacher Exchange/Brazil Initiative**

Patricia Medeiros Landurand, professor of special education at Rhode Island College (RIC), was awarded—along with three schoolteachers in Rhode Island—a grant to participate in the Fulbright Teacher Exchange/Brazil Initiative.

Landurand partnered with Valdérine Gomes, professor, Federal University of Goias, who enjoyed a six-week stay at RIC.

RIC is part of the Fulbright/Brazil collaborative program involving U.S. colleges throughout the country partnering with universities in Brazil. The program was initiated by then-President Bill Clinton to foster cross-cultural collaboration among universities, said Landurand, who said that Portuguese, the language of Brazil, is her “first language,” as she was raised by a
grandmother who came from Portugal and spoke only Portuguese in the home.

**New Mexico State’s Generaciones Addresses Latina Dropouts**

Raising the expectations placed on Hispanic girls is the best way to address the high dropout rate among Latinas, said Laura Guadarrama Spencer (pictured), director of New Mexico State University’s (NMSU’s) Chicano programs.

*Generaciones*, a mother-daughter program for fifth grade Hispanic girls, strives to teach young Latinas that there are many advantages to finishing high school and graduating from college, Spencer said.

The program was originated by NMSU’s minority recruitment and retention committee, directed by Juan Franco, vice president for administration. It is based on research that shows a fifth grade girl’s chances for graduating from high school, pursuing higher education, and avoiding self-destructive behaviors are greatly enhanced if she has a productive and close relationship with her mother, high self-esteem, and established personal and career goals.

**Nazareth Establishes Minority Fund**

Nazareth College’s (N.Y.) new Minority Scholarship Fund received $5,000 from the Greater Rochester Diversity Council. The donation will inaugurate a scholarship aimed at providing vital support to minority students hoping to attend the college. The first scholarship will be available in Fall 2001.

"Nazareth College helped us make the Diversity 2Thousand conference a great success," said Glenda Lusk, board chair of the Greater Rochester Diversity Council. "We wanted to acknowledge the hard work that helped us present the largest diversity conference in the country. The Minority Scholarship Fund is the perfect way for us to do that."

**News from University of Texas System**

The University of Texas (UT) System board of regents approved planning authority for graduate-level academic programs in the life sciences to be offered jointly by the UT Health Science Center-San Antonio and UT-San Antonio. In addition to master’s-level programs in physics and teacher education, the collaboration proposes both master’s and doctoral degrees in eight areas: bioengineering, biology, communication disorders, computational biology or bioinformatics, linguistics, music psychology, neurosciences, and social work.

The board of regents approved an "accountability" plan that will provide new ways of measuring how well the nine general academic universities in the UT System are fulfilling their missions. The plan includes methods for measuring performance in teaching, research, and public service and will take into account the differences in disciplines, program levels, and types of student.

**Author Speaks on “Hidden History” at CU-Boulder**

The University of Colorado (CU) Friends of the Libraries presented a talk by noted mystery writer Miriam Grace Monfredo, “Stalking the Mysteries of Hidden History,” at the ninth annual Just Desserts program at CU-Boulder.

A historian and former librarian, Monfredo is a well-traveled speaker on the history of America and the evolution of women and minority rights. A resident of Rochester, N.Y., she has lectured in 34 states in the past three years. Her most recent book, *Sister of Cain*, is the first volume of a Civil War trilogy set in Virginia during the Union’s failed 1862 campaign to capture Richmond. Her fifth book, *The Stalking Horse*, was chosen by the Voice of Youth Advocacy as one of 1998’s best adult mysteries for young adults.

Monfredo’s fiction has received positive reviews from *The New York Times*, *Chicago Tribune*, and *Newsday*, among other publications.

**Texaco Sponsors Sphinx Competition**

The Texaco Foundation held its 4th Annual Sphinx Competition at Orchestra Hall in Detroit, Mich. Highlights included a performance by the Sphinx Symphony, comprised of Black and Latino professional musicians from all over the nation.

The competition is a springboard for talented young Black and Latino classical string musicians nationwide. "It’s hard to believe that Blacks and Latinos comprise just 3 percent of the musicians in America’s orchestras," said Foundation President Anne Dowling.

Sphinx winners shared $90,000 in prize money and opportunities to perform as soloists with major orchestras around the country. Semi-finalists received scholarships to prestigious music camps and academies.

Hispanic participants included Richard Biaggiini, Ilmar Gavilin, Aristides Rivas, Ingrid Roberts, Elizabeth Ramos, and Victor Sotelo. The honorary committee featured Yo-Yo Ma, Andre Previn, Itzhak Perlman, Nigel Kennedy, and Jaime Laredo.

**ACCD Boasts Highest-Ever Enrollment**

The Alamo Community College District (ACCD), Texas, enrolled a record number of students for the Spring 2001 semester. The total was expected to be nearly 42,000, a significant increase from the number enrolled in spring 2000.

Among the ACCD colleges, Northwest Vista College, the district’s newest, experienced the most dramatic surge in enrollment—nearly 5,000, close to 2,000 more than in Spring 2000 and a far cry from the 33 students who enrolled in Spring 1996, shortly after the College began offering classes.

**Pérez Performs at UT-Austin Conference of Graduate Students**

A performance and talk by recording artist Lourdes Pérez and Annette D’Armata highlighted “Out of Bounds: The Fifth Annual Graduate Student Conference on Race, Identity and Representation” at the University of Texas-Austin.

Pérez-singer, songwriter, musician, and social activist—delivered the keynote address “Out of Bounds in Vieuxes: Resisting the U.S. Presence in Puerto Rico” and performed with D’Armata. A popular performer in her native Puerto Rico and in Austin, Pérez has made her mark with a “unique and powerful voice” and the forcefulness of her social justice messages. She has written and performed music for film and theater as well.

The conference also featured panels on visual representation, Latino American identity and stereotypes, global communication, and studies of race and gender identities in popular culture.
South Florida Professor Writes About Multiracial Children

More than two million children are multiracial in the U.S., but there is no consensus on what they call themselves. Golfer Tiger Woods, for example, says he is "CabinAsian" to reflect his Caucasian, Asian, Chinese, Native American, Thai, and Black heritage, while actress Halle Berry says she is African American, although her mother is White and her father is Black.

To help teenagers cope with their racial backgrounds, University of South Florida education professor Barbara Cruz (pictured) wrote *Multietnic Teens and Cultural Identity: A Hot Issue*, published by Enslow Publishers, Inc.

"Adolescence is a tough time for anybody, because a lot of identity issues arise at that time," Cruz said. "But it's even more so when you are of mixed race. When dating enters the situation, parents and adults start to inject their prejudices and biases, on girls especially."

North Florida Professor Leads Space Program for Students

Marianne Barnes, a University of North Florida (UNF) professor in curriculum and instruction, is the principal investigator for the Protein Crystals in Space Program in Florida Schools—a project funded in Florida through a $50,000 grant from The Florida Space Grant Consortium, Space Port Florida, and the Florida Space Research Institute. Its purpose is to expose Florida middle school and high school students to the emerging science of structural biology.

Students learn the importance of growing high-quality protein crystals in the microgravity environment of space. Growing protein crystals in space is a critical element for finding cures for diseases such as HIV and cancer through new advances in drug design.

Barnes involves her science methods students at UNF in protein crystals activity, making it part of their teacher preparation program.

Lectures at Canisius on Imprisoned Women of Mexico

José-Kampñer is recognized for her extensive research on this subject. Her doctoral work at the University of Michigan focused largely on the life stories of women who kill. She evaluated the women's prison system in Mexico, initiated policy changes to help female prisoners, and wrote a comparative study of women charged with homicide in the U.S. and Mexico.

Her latest research looks at post-traumatic stress disorder as it relates to school failure of Latino children living in Southwest Detroit who are separated from their incarcerated mothers.

M-DCC Presents Brazil's Grupo Corpo

Grupo Corpo, a Brazilian dance company, brought innovative style and visual spectacle to Miami, Fla., as the highlight of the Cultura del Lobo Performance Series presented by the cultural affairs department of Miami-Dade Community College. The performance at the Jackie Gleason Theater of the Performing Arts in Miami Beach was the first stop in Grupo Corpo's limited tour of the U.S. to present new works by its resident choreographer, Rodrigo Pedreira.

Since its inception in 1975, Grupo Corpo has become an icon of Brazil's contemporary fine arts community. Hailing from Belo Horizonte, the 19-member company is internationally recognized for its technical proficiency and colorful and unusual stage sets and costumes. Its style combines classical ballet, Brazilian folk dance, jazz, tap, and modern dance.

QEM Network Honors UTSA Engineering Professor

University of Texas-San Antonio (UTSA) College of Engineering mathematics professor Manuel P. Berriozábal was recognized for his program that teaches junior high school and high school students to become future engineers. Berriozábal, director and founder of TexPrep, received the Exemplary MSE Education Partnership Award from the Quality Education for Minorities (QEM) Network.

The award recognizes partnerships that successfully contribute to the achievements of minorities in science, mathematics, and engineering, and was given at QEM’s Ninth Annual National Conference in Washington, D.C., where it is based. The Network is a nonprofit organization dedicated to improving education for minorities throughout the nation.

Paraguayan Ambassador at Ohio's Miami University

Diego Abente, ambassador from Paraguay to the Organization of American States, presented the Grayson Kirk Distinguished Lecture "Out with the Old, Latin America and the Promise of a New Century" at Miami University (Ohio).

Abente, a former professor of political science at Miami, returned to his home country in 1993 to work on the re-democratization of Paraguay after decades of authoritarian rule. He had left in 1979 after two years in prison for protesting against the dictatorship. A key player in the nation's transition to democracy, he was elected senator and, later, vice president of the Senate of the Republic of Paraguay; he was also vice president of the political party Encuentro Nacional.

Grayson Kirk, Miami Class of 1924, was a pioneer in developing international relations as a field of political science.

University of Dallas in Phase II of $104 Million Campaign

The University of Dallas announced the start of the $37,050,000 Phase II of the University's unprecedented $104 million capital campaign.

The Rev. Monsignor Milam J. Joseph, University president, said, "The University of..."
Dallas, as the only Catholic university in North Texas, has a tremendous responsibility to meet the best traditions of Catholic education. We are committed to a much larger role in the intellectual and artistic life of the Dallas-Fort Worth region.

Phase II focuses on funding both new academic resources for students and faculty and building new student life and fitness facilities. Components include: a center to consolidate the Graduate School of Management; Student Life/Fitness Center/Athletic Fields; and endowed professorships and scholarships.

The announcement follows the completion of the Haggerty Arts Village, extensive residence hall renovations, and campus grounds improvements. The University is enjoying a period of record enrollment in its undergraduate and graduate programs.

DOE Awards Cal State Fullerton $14 Million

More than $14 million from the U.S. Department of Education was awarded to California State University-Fullerton for programs aimed at encouraging students to pursue undergraduate and doctoral degrees.

The funding—generated from six grants—is benefiting more than 1,200 junior high, high school, and college students during the 2000-01 academic year through the Upward Bound, Student Support Services, GEAR UP, and Ronald E. McNair Post-baccalaureate Achievement programs. All are designed to reach out to first-generation, low-income college-bound and university students.

Dr. Silas H. Abrego, associate vice president for student affairs, said, "The students who have participated have succeeded at Cal State Fullerton and now have the opportunity, if they wish, to pursue their doctoral studies.

ENMU-Roswell Student a Centennial Scholar

The American Association of Community Colleges named an Eastern New Mexico University-Roswell student a Centennial Scholar. David Rodriguez was selected as New Mexico's highest scoring nominee in the All-USA Academic Team competition. Rodriguez, local chapter president of the Phi Theta Kappa Honor Society, is pursuing a bachelor's degree and a master's in business administration.

Northern Essex Faculty Member to Teach in China

Dr. Jorge Santiago (pictured), a member of the business faculty at Northern Essex Community College (NECC) in Massachusetts and director of its Institute for Community and Workforce Development, will be in China for two weeks in May. He will participate in a seminar, "The Latino Culture and Its Experience in the United States of America," for Chinese doctoral candidates at Guangxi University.

The seminar will address Latino culture, traditions, demographic and migration trends, history, religion, social issues, and other concerns. Santiago says it will "begin to introduce Chinese scholars to the Latino culture and some of the experiences Latinos have had in the U.S."

Santiago is also to make a presentation with NECC president Dr. David F. Hartleb in Annapolis, Md., in June, complete an article for ETS and HACU, complete a welfare reform research project, and make a presentation at the University of Puerto Rico in the fall.

City College of San Francisco Promotes Diversity

City College of San Francisco is the lead agency in the statewide two-year "Promoting Diversity and Student Equity Initiative" funded by the board of governors of the California Community Colleges at $131,914 the first year and $164,944 the second. Dr. Gus Guichard, vice chancellor of human resources for California Community Colleges, is monitoring the project.

In January, an external team explored ways to achieve project goals, and helped develop public service announcements, a survey to assess campus attitudes, materials to help create conversations about diversity, and a list for faculty of possible classroom activities. It also developed a related CD and is establishing a website that will promote diversity globally.

NAHJ Scholarship Banquet in New York

NBC's Soledad O'Brien was the mistress of ceremonies at the National Association of Hispanic Journalists (NAHJ) 12th Annual Rubén Salazar Scholarship Banquet in New York City. The banquet is a fundraiser to benefit the Rubén Salazar Scholarship Fund. O'Brien is the co-host of NBC's Weekend Today.

The fund's mission is to increase the number of Latino students entering the media profession. The fund has awarded scholarships to 348 students and raised $470,000 since its inception in 1986.

This year, NAHJ welcomed the support of several new banquet sponsors, including Microsoft and Bloomberg. NAHJ unveiled the creation of an endowment to benefit the scholarship fund, with a goal of raising $1 million.

Calles Lectures at North Carolina Health Professions Event

Dr. Luz M. Calle was the Inspirational Speaker in Science lecturer for the North Carolina Health Careers Access Program, University of North Carolina-Chapel Hill, in conjunction with its Spring '01 Health Professions Forum. Calle is lead scientist at the NASA Kennedy Space Center in Florida and chemistry professor at Randolph-Macon Woman's College in Virginia.

A native of Medellín, Colombia, Calle graduated from the Universidad de Antioquía with a bachelor's degree in chemistry. She earned a master's at Western Michigan University and a doctorate at Ohio University, also in chemistry.

For the last 11 years, Calle has spent summers working for NASA's Kennedy Space Center. Her initial work there used chemistry and biology to investigate the role of antioxidants in cancer prevention. Recently, she has been working in the area of prediction, prevention, detection, and control of corrosion on space flight hardware and ground support equipment for an upcoming mission to Mars.
Columbia Info Tech Courses Go out to High Schools

Columbia Interactive Arts and Sciences, a newly created online presence for arts and sciences at Columbia University (N.Y.), announced that select high schools across the country are offering Columbia Interactive courses to their students this spring. They include: Grandview Preparatory School, Boca Raton, Fla.; Regis High School, N.Y.; Albany Academy for Girls, Albany, N.Y.; Berkshire School, Sheffield, Mass.; Mount Alvernia High School, Newton, Mass.; and St. John Vianney High School, Holmdel, N.J.

Columbia Interactive was formed through a partnership with Cognitive Arts, a designer of educational software said to base its "learn-by-doing" methodology on 25 years of academic research into how people learn, remember, and reason.

PUBLICATIONS

People's Power: Cuba's Experience with Representative Government

By Peter Roman

"People's Power is a theoretical and historical account of representative government in Cuba. It explains how the Cuban model was built on the theoretical foundations set in Rousseau, Marx, and Lenin, and the historical precedents of the Paris Commune, the 1905 and 1917 soviet, and the pre- and post-Stalin years of the Soviet Union."

Latinos and U.S. Foreign Policy: Representing the "Homeland"?

Rodolfo O. de la Garza and Harry P. Pachón, eds.

"Public policy elites and the general U.S. public doubt the depth of Latino patriotism, sus-

pecting Latinos of representing their homelands' interests over and above those of the United States. Through a series of studies surveying Latinos throughout the US, this book demonstrates that Latino Americans are more like other Americans with respect to foreign policy than is popularly assumed."

The Maya Diaspora: Guatemalan Roots, New American Lives

James Loucky and Marilyn M. Moors, eds.

"Driven from Guatemala by socioeconomic crises and political violence, the Maya have been forced to adapt to life amid new cultures in the United States, Canada, Mexico, and elsewhere in Central America. And throughout their struggle for survival, the displaced Maya remember their homeland while they search for a new place to live."

Miami, U.S.A. (Expanded ed.)

By Helen Muir

"Helen Muir's affectionate account of Miami first appeared in 1953 and has grown through several revisions--a popular history of a remarkable city. Muir brings the story of the frontier post transformed by a host of near-legendary figures and events to a new century of readers."

Liberalization, Crisis, and Change in Colombian Agriculture

By Carlos Felipe Jaramillo

"This book provides an in-depth look at the impact of recent economic reforms on Latin American agriculture. Focusing on the experience of Colombia, it highlights the critical role that macroeconomic factors play in determining agricultural outcomes and, in particular, the effect of the real exchange rate. The Colombian experience might yield valuable lessons for other countries still in the early stages of agricultural policy reform."

Tamed Frontiers: Economy, Society, and Civil Rights in Upper Amazonia

By Fernando Santos-Granero and Frederica Barclay

"This is an engaging story of major changes in the political economy, rural landscape, and civil society of Loreto, the northern portion of Peruvian Amazonia, since 1891, when it was first integrated into the national society and world economy."

Reinventing Revolution: The Renovation of Left Discourse in Cuba and Mexico

By Edward J. McCaughan

"Based on in-depth interviews with 74 intellectuals of the lefts in Cuba and Mexico, Reinventing Revolution explores the rapidly changing thinking of progressives on the big and enduring questions of democracy, economic alternatives, and national sovereignty. The author feels that the collapse of state socialism, the rise of neoliberalism, and accelerated economic globalization have deeply challenged the old paradigms of Latin America's socialist and nationalist lefts and have given
e to renovative ideas that defy both Marxist and liberal orthodoxies.

The Selected Odes of Pablo Neruda

By Pablo Neruda

The atom, a tuna, lasi-ss, love—the everyday elements and essences of man experience glow in this transcendent language of the poetry of Pablo Neruda's odes. The iliear poet wrote some 800 odes during his lifetime. Here, Margaret Petersen, in her translations, vividly conveys poet's vision of the realities of day-to-day life.

Slavery, Secession, and Southern History

Robert Louis Paquette and Louis A. Ferleger, eds.

For generations, Civil War historians have argued about the centrality of slavery to disunion, the nature of master-slave relations in the Old South, and the impact of the war on post-bellum race relations, politics, and culture. This book advances these debates by bringing together 10 original interpretive essays by 12 prominent scholars.

The Dialectics of Globalization: Regional Responses to World Economic Processes—Asia, Europe, and Latin America in Comparative Perspective

Meneses and Salavia, eds.

Through comparative analyses of case studies by leading economists, social scientists, and social historians, this volume refines the under-standings of general mechanisms by examining regional responses to globalizing tendencies and projects of economic integration.

Latin America and the Caribbean in the International System, 4th ed.

By G. Pope Atkins

This edition has been thoroughly revised to reflect the evolving characteristics of the current international system that have had a dramatic effect on every aspect of international relations in Latin America and the Caribbean. The original purpose of this book is unchanged. It continues to provide a topical current and analytical integrated survey of the region's role in the world.

El Coyote, the Rebel

By Luis Pérez

A soldier at the age of 13. An honorably discharged veteran at the age of 13. A miner, a cottonpicker, a shepherd, and a graduate of Hollywood High. Luis Pèrez lived an incredible life and then shaped his story into a vividly realized autobiographical novel. Originally published in 1947, this book now includes an introduction by Lauro Flores.

Myths and Realities: Best Practices for Language Minority Students

By Katherine Davies Stainway and Denise McKeon

Language minority students, including Limited English Proficiency students, constitute the fastest-growing segment of the U.S. student population today. Written with mainstream educators in mind, this book provides fundamental background information on issues such as second-language acquisition; assessment, placement, and programming; and legal requirements for educating linguistically diverse students.

CONFERENCES

National Conference on Practice-Oriented Education
April 25-27

With the sobering backdrop of a flagging economy, a generation of dot-com demise, and an increasing interest in fortifying students with practical experience to propel them into the working world, Northeastern University, Boston, Mass., will convene a first-of-its-kind national conference, exploring new ways to integrate the theoretical and practical aspects of the higher education experience.

Contact: (617) 373-2170; website, www.poe.neu.edu.

2001 Teleconference Series
April 26, 1:00-4:00 p.m. EST

The National Resource Center for the First-Year Experience & Students in Transition, in cooperation with Distance Education and Instructional Support at University of South Carolina, presents “Engaging Commuter Students: Redesigning Campuses for the Majority of America’s College Students.” Among the panelists is María Vallesco, provost/CEO, Palm Beach Community College (Fla.). Live and interactive via satellite.

Contact: website, www.sc.edu/fye.

NILD Leaders 2001
Newport, R.I., April 29-May 3
Phoenix, Ariz., May 20-24

While the National Institute for Leadership Development, based upon a philosophy of inclusivity and diversity, is for women and men in community colleges, the Leaders 2001 programs are for women. The programs are sponsored by Phoenix College, Maricopa Community Colleges, and League for Innovation in the Community College.

Contact: NILD, (602) 223-4030; e-mail, nild@pcmail.maricopa.edu.

Latino Book and Family Festival
May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan.

Contact: (760) 434-7474.

3rd Annual Latino Education Conference
May 13-15

“Critical Issues Affecting Latino Educational Achievement in the 21st Century” is the theme of this year’s ASPIRA, Inc. of New Jersey conference. Confirmed keynote speakers include Carlos Hernández, president, New Jersey City University; Antonia Pantoja, founder, ASPIRA National Association; and Sara Martínez Tucker, president, Hispanic Scholarship Fund. At Bally’s Park Place Hotel and Casino.

Contact: Carmen Torres, (973) 484-7554, or e-mail, cstorres@nj.aspira.org; website, www.aspira.org.

MALDEF Annual Fundraiser
May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development and the Community College Leadership Program present their 23rd annual international conference, “Making a World of Difference…” “a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty” in Austin, Texas.

Contact: John Rouche and/or Suanne Rouche, (512) 471-7545.

NCORE 2001
May 30-June 3

The Southwest Center for Human Relations Studies at the University of Oklahoma-Norman presents “National Conference on Race and Ethnicity in American Higher Education.” In Seattle, Wash.

Contact: (405) 292-4172; website, www.occe.ou.edu/NCORE.

NMCI 16th Annual National Conference
May 31-June 3

The National Multicultural Institute’s 2001 theme is “Creating a National Agenda: Multicultural Partnerships for Change.” The major goals of this conference are to: (1) offer an opportunity for in-depth diversity training and skills-building; (2) focus on some of the unique issues that professionals face in working with a culturally diverse population; and (3) create a multicultural environment in which an open, cross-cultural dialogue can occur. At the Hyatt Regency Washington on Capitol Hill Hotel, Washington, D.C.

Contact: NMCI, (202) 737-1234 or (800) 233-1234; website, www.nmci.org.

ILUAC 72nd National Convention and Exposition
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6135.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15

This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter’s College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, “Interpreting Latino Cultures: Research and Museums.” In Washington, D.C.

Contact: website, www.si.edu.

AAHE Assessment Conference
June 23-27

“From Expectations to Results: What Are We Finding, and How Are We Improving” is this year’s theme. Opening plenary speaker is Richard Light, professor of education and public policy at Harvard University, and author of Making the Most of College: How Assessment Can Help Both Students and Us. In Denver, Colo.

FACULTY OPPORTUNITIES

Mid-State Technical College, located in Central Wisconsin, offers Associate Degrees and Technical Diplomas in 50 careers, as well as personal enrichment classes and contracted business services. Mid-State is seeking qualified candidates for these positions at our Wisconsin Rapids Campus beginning the 2001-2002 academic year:

**Computer Information Systems Instructor**
Teach computer information systems subjects, such as network design and administration, PC troubleshooting, systems analysis and design, concepts of database management, and AS/400 fundamentals. Instruct in language classes, such as COBOL, RPG, C/C++, Visual Basic, SQL, and JAVA. Bachelor's Degree with a related emphasis required; Master's in Computer Science or Business Administration preferred.

**Office Systems Instructor**
Teach office systems subjects, such as document processing, office procedures, emerging office technologies, and Microsoft Office applications. Bachelor's Degree with a business-related emphasis required; Master's Degree preferred.

**Nursing Instructor**
Direct clinical and lab supervision of nursing students in area health care agencies/services, including supervising preceptored clinical experiences. May also teach various Health Careers program courses. Master's Degree in Nursing required.

**Industrial Mechanical Technology Instructor**
Teach courses in the Industrial and Mechanical Technician Program with emphasis on industrial equipment maintenance and repair and other related technologies, such as hydraulics and industrial automation. Bachelor's Degree with a related emphasis required; discipline-centered, Master's preferred.

**Urban Forestry Technology Instructor**
Teach courses in all aspects of tree and landscape maintenance with emphasis on proper fertilization based on soil testing, proper use of pesticides, safe and proper operation of equipment, and climbing and rigging. Bachelor's Degree with a related emphasis required; Master's in Forestry preferred.

Faculty positions require two years of relevant work experience. Post-secondary teaching experience preferred.

Mid-State offers a competitive salary and a comprehensive benefits package. Please specify position(s) for which you are applying. Applications accepted until positions are filled. Send letter of application and resume to: Human Resources Office, Mid-State Technical College, 500 - 32nd Street North, Wisconsin Rapids, WI 54494; Fax: (715) 422-9414; E-mail: hrddept@midstate.tec.wi.us

Book Review

By Lee M. Penyak

In this carefully edited collection of 23 primary sources dealing with the social, economic, and political history of Latin America over three centuries, Richard Boyer and Geoffrey Spurling make history come alive. Brief introductions by the individual historians who originally worked with the documents and contributed to this work precede each source, and each concludes with insightful notes that the reader feels compelled to consult. The authors draw upon diverse genres such as criminal and inquisition records, wills, letters, dowries, and confession manuals. Themes examine cultural contact, gossip and communication, sexuality, and inheritance, among others. The editors' attention to detail is demonstrated by the inclusion of maps that make sense, pictures and illustrations that complement the documents, and an especially complete glossary and index that render the text easy to use. The book is crafted with considerable care.

In their introduction, Boyer and Spurling spell out their intentions: to highlight the trials and tribulations of everyday people; to demonstrate how historians work with archival materials; and to teach students how to do history rather than simply read it. They very successfully accomplish their first two goals.

Unlike a traditional textbook that must synthesize and generalize, Colonial Lives has the advantage of testing our views concerning social norms and institutions. Better still, the actors are primarily people from disadvantaged groups who interact with one another and, inevitably, with their social, economic, and political superiors. For example, Indians use Spanish courts to legitimize land claims, parishioners complain to Inquisitors about abuses in the confessional, dishonored husbands kill their adulterous wives but do not necessarily get away with murder, slaves occasionally outmaneuver their owners in manumission cases, and women organize drinking and gambling events that lead to fatal results. The editors convincingly present "the intrigues, struggles, and ambivalences that characterize their lives and those of the people who lived around them."

This fall, I used Colonial Lives in my Latin American history class. Most students were junior and senior history majors who had previously taken a course in the historian's craft. My course was also designed to fulfill "general education" requirements for which it had been approved. Therefore, students were expected to acquire the skills to identify sources, recognize an author's value system, collect evidence, and draw conclusions. Colonial Lives proved to be an excellent match, especially since the editors desired to show "how general statements are built up from primary materials." This task was left to the individual contributors. Some, like Thomas A. Abercrombie, wrote lengthy and thoughtful introductions that included tips on extrapolating information and reading the documents more judiciously. Others emphasized the historical background necessary to place this new information in context. All clearly relished the opportunity to demonstrate their skills.

The book is slightly less successful in its attempt to help students learn how to do history. This results, perhaps, from the editors' preference that students assume the burden of interpretation and analysis. For example, they state their intention not to "include detailed analytical commentaries [because] that we leave to you." My students tended to learn more from entries with provocative questions that fostered critical reading. A few entries, while interesting, did not guide students as thoroughly. Instructors can and should formulate questions to enhance learning. But pedagogical objectives of the book could have been better met by incorporating questions in each author's introduction. Furthermore, an instructor's resource manual that includes classroom discussion questions and reaction paper suggestions seems especially appropriate for this type of text.

As the editors state, no anthology should attempt to be encyclopedic. Nonetheless, doing history can also imply using documents and learning skills that students might not automatically associate with the field. To this end, an introductory chapter on codices and paleography would have been useful. Skilled commentary and interpretation of codices would have fostered an appreciation of how anthropologists and historians gather information on pre-Hispanic peoples. Photocopies and explanations of manuscripts from the 16th to the 19th centuries would have more clearly demonstrated the opportunities and challenges that confront researchers. Both types of documents usually intrigue students.

Colonial Lives is unique in its attempt to illustrate daily life in Latin America and simultaneously teach the processes at work in historical analysis. No other text truly forces students to think and analyze as historians. Most upper-division students thoroughly enjoy the challenge presented by Boyer and Spurling in this excellent work.

Dr. Penyak is an assistant professor of Latin American history at the University of Scranton. His current areas of investigation include midwifery and their involvement in sex crimes trials, and midwifery and the medical profession in Mexico.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers' Guidelines.
Dallas County Community College District

Dallas County Community College District is an accredited, public two-year college district in Dallas County, Texas. Founded in 1965, the District has an enrollment of approximately 53,000 credit and 45,000 non-credit students per long semesters and employs over 2,500 full-time faculty and staff members. The District is seeking innovative individuals to work in a stimulating environment with an ethnically diverse student population to provide leadership and exceptional educational development.

The mission of the DCCCD is to equip students for successful living and responsible citizenship in a rapidly changing local, national, and world community. We do this by providing accessible, affordable, effective, quality educational opportunities for development of intellectual skills, job skills, personal growth and/or transfer to a baccalaureate program. In fulfilling our purpose, we further cultural, economic and workforce development in the communities we serve.

In 1999, the District instituted the Visiting Faculty and Administrator Scholar Program, a two year program that enables the recruiting of more women and minority faculty and administrators. The program, the first of its kind in a community college district, has successfully employed 43 scholars since its inception. New faculty and administrators are mentored by senior faculty and administrators while the district provides professional development opportunities for the scholars. Currently, the DCCCD is seeking 21 new visiting scholars for the upcoming academic year. The DCCCD invites individuals to submit their application information for consideration is our Visiting Faculty and Administrator Program.

This a great opportunity for recent graduates with an MS and 18 hours in their desired teaching areas enabling them to acquire one year of required teaching experience to meet minimum educational criteria for full-time, permanent, District teaching positions. The District is a great place to start a career in the fastest growing metropolis in the nation.

Dr. William Wentrich, Chancellor of the DCCCD pointed out that the district has been a leader in support for women and minorities. The DCCCD is number one among North Texas public colleges and universities in both number and percentage of minority faculty and administrators. Fifty-six percent of DCCCD credit student enrollment is female. The DCCCD is number one in both number and percentage of minority enrollment in North Texas.

The District defines an applicant as an individual who responds with a completed application form to a posted DCCCD job vacancy and meets the minimum requirements of the positions as defined in the generic job description. However, résumés/applications for the Visiting Faculty and Administrator Program are being accepted for consideration. Submit Information to:

Dallas County Community College District
District Human Resources
701 Elm Street
Dallas, Texas 75232
Att: Visiting Scholar Program

To discuss further information concerning the Visiting Scholar Program contact:

AN EQUAL OPPORTUNITY AFFIRMATIVE ACTION EMPLOYER

University of South Florida

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,000 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

More than twenty-three percent of the student population is African American, Hispanic, Asian American, Native American or other nationality. Students come from every state and more than 100 foreign countries.

The university is currently recruiting for the following faculty positions:

Over 3,000 faculty & staff positions!
Director
Recreational Sports

Colorado State University invites nominations and applications for the position of Director of Recreational Sports. The Director is responsible for the overall operation of the department including the student recreation center, intramural sports, club sports, and non-credit instruction. As a Director in the Division of Student Affairs, this position shares responsibility for participation in projects and activities related to the Division.

This is a full-time administrative position reporting to the Assistant Vice President for Student Affairs. The position takes direction from the Assistant Vice President for Student Affairs and other university officials, as is in conformance with the Recreational Sports department mission statement, the Colorado State University mission statement, and the appropriate guidelines pertinent to college and university recreation activities. The Division of Student Affairs at Colorado State University is a comprehensive student affairs program that serves a major state university and land grant college. The Division of Student Affairs encompasses a wide array of departmental services and programs addressing the needs of a student body of approximately 23,000.

QUALIFICATIONS:
A candidate for this position must meet the following qualifications: Master's degree in Recreation, Physical Education, Exercise Science, Student Personnel or related area; minimum of seven years of professional experience in campus recreation including at least five years of administrative experience in a senior administrative position of a major university student recreation program; demonstrated success in program development, management, and leadership in higher education; Certified Recreational Sports Specialist as defined by the National Intramural-Recreational Sports Association highly recommended.

Salary is commensurate with education and experience. The starting date is negotiable: July 1, 2001 preferred.

Nominations must be received by 5:00 p.m. MST, May 11, 2001 or your application consisting of a letter of interest, resume, and the names, addresses, and telephone number of three references must be received by 5:00 p.m. MST, May 1, 2001 to: Dr. Michael Ellis, Chair, Search Committee
director of Recreational Sports, Director's Office, Lory Student Center, Colorado State University, Fort Collins, Colorado 80523, (970) 491-6395.

Applications will be accepted until the position is filled; however, for full consideration completed applications must be on file on or before 5:00 p.m. MST, May 18, 2001.

Colorado State University is an equal opportunity affirmative action employer and complies with all federal and Colorado State laws, regulations, and executive orders regarding affirmative action requirements.

DEAN, SOCIAL SCIENCES and HUMANITIES

MIDDLESEX COUNTY COLLEGE is a comprehensive community college located on a 200-acre campus in Edison with outreach centers in New Brunswick and Perth Amboy. In addition to a credit enrollment of 11,000 students, the College maintains an aggressive program of corporate and community education. Its total operating budget is approx. $50 million.

The College is committed to high quality academic programs, career and transfer-oriented. Joint degree and/or dual degree programs are offered in partnership with Rutgers University, University of Medicine and Dentistry of New Jersey, and the New Jersey Institute of Technology. The College is also committed to contributing to the economic growth & development of its service area

through the offering of an extensive range of training & retraining programs. Qualified candidates will possess a Master's degree in the appropriate academic discipline (an earned doctorate is preferred); a minimum of five years of academic administration experience; and at least five years of teaching experience at the collegiate level.

The successful candidate must be able to demonstrate evidence of the following: institutional leadership in fostering innovation and excellence in teaching and learning; knowledge and ability in the administration of technology to teaching and learning; experience in curriculum design, development and evaluation; ability to work effectively with culturally and ethnically diverse student, faculty and staff; excellent interpersonal and supervisory skills; experience with developmental/first-year educational programs; and a strong commitment to the philosophy of a comprehensive college positioned itself for the future.

Salary is based on qualifications and experience. Previous applicants for this position do not need to reapply.

Application deadline date: May 16, 2001. Your resume, a copy of your college transcripts and a letter of candidacy which addresses how you meet the qualifications listed above, should be submitted to Human Resources Dept., Ref. #16-48. Materials should be mailed to:

Cerro Coso Community College

Cerro Coso Community College is accepting applications for the following full-time, tenure-track faculty positions for Fall, 2001 and two (2) administrative positions.

Cerro Coso Community College was established in 1973 as a separate college within the Kern Community College District. It is the only college in the district that is not a member of the California Community College System.

The college has five instructional sites, which include a large geographical service area (18,000 square miles) of any community college in California and serves a population of approximately 18,000. The 320-acre Indian Wells Valley campus is located in the upper Mojave Desert in the city of Ridgecrest, with a population of 28,000.

Ridgecrest is home of the China Lake Naval Weapons Station. Ridgecrest is located about 130 miles north of Los Angeles and 120 miles east of Bakersfield. Additional campuses are located at the south end of Edwards Air Force Base, to the west at Lake Isabella in the Kern River Valley, and to the north in the adjacent Inyo and Mono county communities of Bishop and Mammoth Lakes. The fifth instructional site, CC-Online, is a virtual campus that provides services and learning opportunities to students worldwide.

Cerro Coso offers the Associate in Arts and the Associate in Science degrees as well as certificates of completion in thirty career and occupational programs. Total student enrollment is approximately 5,600 each semester with an annual FTE of over 2,800.

Employment Opportunity

Dean of Developmental and General Education

Responsible for the coordination of the Developmental and General Education programs in a community college where approximately 70 percent of all students require remediation in one or more areas. The Dean conducts on-going assessment and evaluation of developmental and general education programs, and works closely with academic departments and schools/colleges to recommend policy revisions and curricular innovations. The Dean will lead the NADP (National Association for Developmental Education) certification process of all developmental education courses, create and maintain a student tracking system of all developmenta and freshman general education students, and collaborate with and integrate learning and student support services into a comprehensive developmental education program.

Master's degree in one of the areas in the General Education program required. Five years experience teaching general education courses at the college level, and a minimum of three years administrative experience at the Department Chair level or higher required.

Applications will be reviewed upon receipt and continue until the position is filled. Please send a letter of intent, a curriculum vitae, transcripts (a copy is acceptable for applying), a list of five references familiar with your working developmental and general education, and a position paper on what the characteristics of a successful developmental and general education program should be.

President
Community College of Southern Nevada
The University and Community College System of Nevada

The Board of Regents of the University and Community College System of Nevada (UCCSN) has decided to re-open the search for the position of President of the Community College of Southern Nevada (CCSN); due to an extensive delay in the process that was caused by litigation over issues relating to the Nevada Open Meeting Law. The Board of Regents invites nominations and candidate letters of interest for the position.

The President is the Chief Executive Officer of the College, reporting directly to the Chancellor of the UCCSN, and through the Chancellor to the eleven-member Board of Regents. The UCCSN is a state system of higher education consisting of 2 universities, 4 community colleges and a research institution.

The search will be conducted in accordance with the open meeting and open records laws of the State of Nevada. All applications will be subject to review by the media and public.

For confidential inquiries about the position, and a presidential profile which outlines the presidential leadership qualities, the distinguished strengths and agenda for the next president, please contact: Dr. Narcissa A. Polonio, Director, Board Leadership Services, Association of Community College Trustees, 1740 N Street, NW, Washington, D.C. 20036; e-mail at npolonio@acct.org. Applicants must submit their materials prior to April 30, 2001.

To request an electronic transmission of the presidential profile, please e-mail Susan Smees at ssmees@acct.org.

The UCCSN is an Equal Opportunity/Affirmative Action Employer and employs only United States citizens and aliens authorized to work in the United States.

- An ACCT Search-

President of
Oxnard College

The Board of Trustees and the Chancellor of the Ventura County Community College District invite applications and nominations for the position of President of Oxnard College. The President provides leadership and advocacy for the college, is supportive of and participates in a college participatory process, is responsible and directly accountable for all college operations, and is a district team member on the Chancellor’s cabinet. The person being sought would make a long-term commitment to the college in order to implement a common vision developed through shared governance processes.

Nominations and applications

Nominations and applications will be accepted until the position is filled. However, the presidential search committee will begin reviewing applicants' materials in May 2001. Submissions of application packets are especially encouraged prior to that time.

All inquiries, nominations and applications will be held in the strictest confidence. The Ventura County Community College District is an equal opportunity institution and does not discriminate on the basis of race, color, gender, religion, age, national origin, disability, marital status, sexual orientation, or Vietnam veteran status. Applications from all persons interested in the position are encouraged.

Submit applications and nominations to: Oxnard College Presidential Search Committee, Ventura County Community College District, PO Box 1920, Camarillo, CA 93011-1920

For confidential telephone inquiries about the position contact: Dr. Al Fernandez, Search Consultant, Community College Search Services, Telephone: 805/650-2846; Fax: 805/650-8408; E-mail: afrancenc@msn.com

For the brochure and general inquiries regarding the application process, contact: Ms. Judi Costales, Search Liaison, Telephone: 805/384-8319
ASSISTANT/ASSOCIATE PROFESSOR OF TOURISM AND HOSPITALITY MANAGEMENT

The selected applicant will be responsible for teaching undergraduate and graduate courses in the tourism and hospitality management curriculum. Active participation in professional national and local associations, and community and university service will be expected. Developing and maintaining a productive line of research, along with external funding, is expected. The position requires the supervision and mentoring of undergraduate and graduate interns.

The applicant should have teaching and research experience in tourism or hospitality appropriate to the appointment level desired. A proven track record of publications, grants, and funding will be reviewed for appointment as an assistant or associate professor. Industry experience is desirable. An earned doctorate is required. The appointment begins July 1, 2001.

Applicants for this position should submit a letter of application, curriculum vitae, the names of three references, sample publications, and other supporting materials to: Dr. Wesley Roehl, Chair, Search Committee, School of Tourism and Hospitality Management, Temple University, 201-C Villacqua Hall (062-62), Philadelphia, PA 19122 (215-204-5861, wroehl@temple.edu).

Temple University is an Affirmative Action/Equal Opportunity employer. Women and minorities are encouraged to apply.
TEXAS A&M UNIVERSITY

Assistant Professor of Adult Education

The College of Education of Texas A&M University invites applications for the position of Assistant Professor of Adult Education with an emphasis in Adult Literacy in the Department of Educational Administration and Human Resource Development, beginning 1 September 2001. This is a 10 1/2 month position.

Preferred qualifications: An earned doctorate in adult education with an emphasis in adult literacy. Candidates should have a record of research and publications. Experience seeking and managing grants is desired. Experience advising doctoral dissertations and in using distance modalities for teaching is preferred.

Responsibilities: Teach graduate courses in literacy and adult education. Advise masters and doctoral students, and guide doctoral dissertations. Develop and pursue a research agenda in the field. Work with diverse populations. Collaborate with colleagues in meeting the mission and goals of the academic program. Contribute to appropriate service activities benefiting the department, college, university, and the profession.

The screening of completed applications will begin 1 May 2001 and continue until the position is filled. To apply, send a letter of application, a complete vita, official transcripts, and the names, addresses, phone numbers and email addresses of three references to:

Pace University

Vice President of Student Services

Founded in 1906, Pace University is a private comprehensive university, offering more than 300 majors and 3,000 courses within six undergraduate and graduate colleges, to a diverse population of 9,000 undergraduates and 5,000 graduate students. Located in New York City and Westchester County, Pace draws its strength from being a unified institution that offers students a choice of several campus locations, each with its own distinctive atmosphere, ranging from the quintessential urban New York City, to the medium-sized city of White Plains, to the suburban campus of Pleasantville/Briarcliff.

The Position

Reporting to the Provost/Executive Vice President for Academic Affairs, and an integral part of the President’s Executive Council, the Vice President for Student Services oversees the following areas: Dean for Students Office, Student Accounts and Registrar Services, NCAA Division II Intercollegiate Athletics, Intramural Athletics, Judicial Affairs and Compliance, and Student Auxiliary Services. The Dean for Students’ office encompasses Campus Activities and Student Development supporting over 100 registered student organizations, as well as, Residence Life (about one-quarter of traditional students live in campus housing), Community Health and Wellness, Student Counseling, and Multicultural Affairs. Student Auxiliary Services encompasses Housing Operations, Lease Management of off campus housing, outsourced Food and Vending Services, and the Student Mailrooms. This position manages 6 direct reports and is responsible for a division budget of approximately $12 million.

Qualifications

The successful candidate must hold an earned doctorate and have had extensive leadership experience in the area of student services and student affairs. Pace is seeking a dynamic and student-centered professional with a demonstrated understanding of the relationship between student life and academic life, who possesses a commitment to providing quality services to students as well as a commitment to diversity. Creativity, collaboration, the ability to plan and meet budget expectations, outstanding managerial skills, and the ability to function as part of a complex managerial team in a multiple campus environment are important qualifications for the new Vice President.

Application and Nomination

To ensure full consideration, applications should be received by May 27, 2001. Nominations of individuals for this position may be sent to the address below. A resume, with an accompanying cover letter, including three references, may be submitted by email attachment to mail@spelmanjohnson.com or on-line at www.spelmanjohnson.com. If you are unable to submit materials electronically, please mail a resume and cover letter to:

Southern Illinois University

EDWARDSVILLE

DIRECTOR

EAST ST. LOUIS CENTER

Southern Illinois University Edwardsville invites nominations and applications for the position of Director of its East St. Louis Center. The East St. Louis Center consists of 21 programs serving over 17,000 people a year. The Center is supported by 150 staff members and a $13.5 million budget, of which $12.5 million comes from grants and contracts. Programs cover services for pre-school children to adults, and range from allied health services to the performing arts. Programs include Head Start, a Charter School, Upward Bound, as well as other TRIO programs.

For more information about the East St. Louis Center, see www.siu.edu/ESL.

Southern Illinois University Edwardsville is predominantly an undergraduate institution with 33 Master’s programs. Serving approximately 12,000 students, the main campus is located 25 minutes northeast of downtown St. Louis. In pursuit of its mission to enhance area development, the East St. Louis Center, located in Illinois directly across the river from downtown St. Louis, represents a critically important expression of SIUE’s commitment to the region. The Center’s mission is to improve the quality of life for individuals and families by utilizing research to provide comprehensive programs, services, and training in the areas of education, health, social services, and the arts.

The Director reports directly to the Provost and Vice Chancellor for Academic Affairs and sits on the Provost’s Academic Affairs Council. The Center is located in East St. Louis, Illinois with a new $28 million facility of 180,000 square feet scheduled for completion by August 2002.

A Master’s degree is required. A terminal degree is strongly preferred. At least five years of successful administrative experience managing activities similar in scope to those at the Center, preferably in an institution of higher education, is also required. Candidates should have a firm commitment to the mission of the University and to the programs and activities of the East St. Louis Center. Candidates should have a record of successful leadership including an ability to work productively with academic and administrative colleagues, community leaders, and personnel of external agencies. Applicants must be able to plan carefully and establish priorities within budgetary constraints and must have experience in seeking and managing external grants. A willingness to aggressively pursue opportunities for external resources in support of the Center’s programs is required. The successful candidate must demonstrate an imaginative and positive approach to solving problems and attaining the goals of the Center and the University.

Review of applications will begin immediately and continue until the position is filled. Application packages should include a letter of application, curriculum vitae, and three letters of recommendation. Send applications to:

Dr. Patrick Ferrill, Chair
East St. Louis Center Director Search Committee
School of Dental Medicine
Southern Illinois University
2800 College Avenue
Alton, Illinois 62002

Salary is competitive and commensurate with qualifications and experience.

Southern Illinois University Edwardsville is an equal opportunity, affirmative action employer. Women and minorities are encouraged to apply.

Washington & Jefferson College is pleased to announce searches for the positions listed below.

ASSISTANT DEAN FOR MULTICULTURAL AFFAIRS

Primarily responsible for multicultural student services

ASSISTANT DIRECTOR OF CAREER SERVICES

Primarily responsible for developing and coordinating internship opportunities

For complete descriptions of these positions and information on applying, please visit W&J at: www.washjeff.edu/campus_services_jobs.asp.

Washington & Jefferson College is a private, co-educational, national liberal arts college of 1,200 students with a strong academic and student life tradition. The college is located in a southwestern Pennsylvania community of diverse people, religions, and cultural traditions. W&J was founded in 1781 and is located about 25 miles southwest of Pittsburgh, PA. The College is an Affirmative Action/Equal Opportunity Employer. VISITING ASSISTANT PROFESSOR
SCHOOL PSYCHOLOGY

The Psychology Department at Plattsburgh State University of New York announces a Visiting Assistant Professor position in School Psychology for the 2001-2002 academic year. The position is expected to begin on August 27, 2001. The Psychology Department offers baccalaureate degrees in Psychology and the MA and CAS (Specialist) degrees in School Psychology. The successful candidate will be committed to excellence in graduate training and supporting the learning and development of children, youth, and families.

Responsibilities include: teaching graduate courses in the School Psychology program and undergraduate courses in the successful candidate's area of expertise; developing and maintaining an active research program that engages undergraduate and graduate students in meaningful roles in the research process; and supervising School Psychology Interns and Practicum students, and engaging in community outreach appropriate to practicum and/or intern supervision of School Psychology graduate students.

Qualifications: An earned doctorate (Ph.D., PsyD or Ed.D.) in school psychology and the requisite training and experience for certification as a School Psychologist in New York State are preferred qualifications; however, candidates who are nearing completion of their doctorate will be given full consideration. Expertise in problem solving consultation and applied behavior analysis is desirable, however, applicants with expertise in any area of School Psychology will be deemed qualified.

Applications from women and minority candidates are especially welcomed.

Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

Salary: $32,000 - $40,000, dependent upon qualifications and experience, with excellent benefits. Review of applications will begin immediately and continue until the position is filled. Please submit letter of application, curriculum vitae, three letters of recommendation, graduate transcripts, a statement of teaching philosophy and evidence of teaching ability to: Chair, Search Committee (PJ# 2546-808), c/o Human Resources, Plattsburgh State University of New York, 101 Broadway, Plattsburgh, NY 12901-2081. Fax: (518) 564-5600.

Plattsburgh STATE UNIVERSITY OF NEW YORK

VICE PROVOST FOR INTERNATIONAL PROGRAMS
New Mexico State University
New Mexico State University, the state's land-grant institution, invites applications for the position of Vice Provost for International Programs. The institution serves a multicultural student population of more than 22,000 students on five campuses. The Vice Provost for International Programs reports to the Provost, and is responsible for providing leadership for the development, implementation, and coordination of international programs and services for the university system.

Candidates must have a doctorate degree; have academic experience and qualifications meeting a tenure-track appointment in an academic department; possess a minimum of five years of administrative or management experience in a college or university affiliated with international activities; must have a successful record in obtaining grants and contracts with international funding agencies; and demonstrate a strong commitment to promoting a global perspective on the academic arena. In addition, the candidate should be able to encourage and facilitate participation by students, faculty and staff in international education and research experiences; be professionally competent in at least one language other than English; be willing to travel internationally and required to have had considerable overseas professional experience. The position is an annual appointment with competitive salary and benefits package.

Screening of applications will begin mid-May, and continue until the position is filled. Offer of employment is contingent upon verification of individual's eligibility for employment in the United States.

Nominations, letter of inquiry, and letter of application with resume, names and telephone numbers of three persons prepared to write letters of reference should be sent to: Nancy A. Oretski, JD, Chair, Search Committee, Vice Provost for International Programs, New Mexico State University, Box 30001 MSC 305GC, Las Cruces, New Mexico 88003. Email: oretskni@nmsu.edu

New Mexico State University is an equal opportunity/affirmative action employer. For more information regarding this position, visit the website at www.nmsu.edu.

SAINT JOSEPH COLLEGE
West Hartford, CT

Education Curriculum Faculty Position

with emphasis on the areas of science, mathematics or social studies

Department of Child Study/Education/Special Education

The College invites applications for a tenure track assistant/associate professor appointment to begin in August 2001. In respect to the College's commitment to partnerships in multi-cultural school settings, we especially encourage applications from people of color. Responsibilities will include teaching in the teacher certification program at either the graduate or undergraduate level. This program includes philosophy of education; issues, policies and law in American schools; schools, learning and the impact of culture; educational research; curriculum development; and curriculum and instruction: adaptive strategies. Additional responsibilities may include supervision of students in field placements, advisement of students, scholarly research, or participation in an urban Professional Development School serving a predominantly multicultural population.

Qualifications include a doctorate in education or a related field and a minimum of three years of experience teaching in or administering schools (doctoral candidates nearing completion will also be considered). Experience working with diverse student learners is highly desirable.

Send letter of application, curriculum vitae, copies of transcripts, and three letters of reference from people who have supervised your work to the Human Resource Department, Education Curriculum Search, Saint Joseph College, 1678 Asylum Avenue, West Hartford, CT 06117. Please specify that you are applying for the Education Curriculum faculty position (with emphasis on the areas of science, mathematics or social studies).

Review of applications will begin immediately and continue until the position is filled. An EO/M/F/V/D employer. Women and minorities are encouraged to apply.

Learn more about Saint Joseph College at www.sjc.edu.

George Mason University invites applications and nominations for the position of Director of Graduate Admissions. The Director of Graduate Admissions is responsible for the recruitment of graduate students. Duties include developing a university wide marketing strategy, coordinating the processing of graduate applications, and designing university wide graduate publications. The Director will work closely with the academic units in designing and implementing a graduate recruitment and marketing plan. The position will report to the Dean of Admissions.

Qualifications of the position include a bachelor's degree (graduate degree preferred) with related experience in higher education and graduate admissions with outstanding interpersonal, oral and written communication skills. This position is a full-time, twelve-month administrative faculty position.

The closing date for applications is Friday, May 4, 2001. Interested candidates should submit a letter of application, curriculum vitae, and names of at least three professional references to:

Chair, Search Committee for Director of Graduate Admissions
Office of the Provost, MSN 3A2
George Mason University
Fairfax, VA 22030

George Mason University is a dynamic public teaching and research university in the Virginia suburbs of Washington, D.C. Half of its 24,000 students are full time, forty percent are graduate students, a quarter are minority students, and ten percent live on campus. The growing reputation of George Mason University as an exciting institution derives from its innovative undergraduate programs in both traditional disciplines and in integrative studies, as well as its increasing number of post-baccalaureate certificate and degree programs. Further information about the university can be found on the web at www.gmu.edu.

George Mason University is an Equal Opportunity, Affirmative Action Employer. The University offers a competitive salary and benefit package. Applications from and nominations of women and minority candidates are strongly encouraged.
**Director of Housing and Food Services**

Colorado State University invites nominations and applications for the position of Director of Housing and Food Services. The Director of Housing and Food Services provides overall leadership for a large and complex program in the Division of Student Affairs at Colorado State University. In addition to being an educational leader in the Division, the Director is the manager of the largest auxiliary budget ($44 million) at the University. As a Director in the Division of Student Affairs, this position shares responsibility for participation in projects and activities related to the Division.

The Director is responsible for all financial, operational, and programmatic aspects of the campus residential environment. Responsibilities include staff supervision, training and evaluation; management of facilities; budget development and analysis; computer/technology applications; planning; research; student development; and the facilitation of programs that contribute to the University's educational objectives. Facilities include 4,700 residence hall spaces, 925 apartments, nine residential dining centers, and all residential and academic buildings at the Pingree Park Mountain campus.

This is a full-time Administrative Professional position reporting to the Vice President for Student Affairs. The position takes direction from the Vice President and is in accordance with University, Housing and Food Services, department mission statement, the Colorado State University mission statement, and the appropriate guidelines pertinent to university auxiliary activities. The Division of Student Affairs at Colorado State University is a component of the student affairs program that serves a major state university and land grant college. The Division encompasses a wide array of departmental services and programs addressing the needs of a student body of approximately 23,000.

Colorado State is in Fort Collins, a city of 110,000, which is 65 miles north of Denver. The city offers a unique blend of metropolitan advantages and small-town friendliness. Located at the western edge of the Great Plains and at the eastern base of the Rocky Mountain foothills, Fort Collins with its ideal climate provides easy access to numerous outdoor activities.

**QUALIFICATIONS**

A Master's degree in Student Personnel or related areas is required, Ph.D. is preferred. At least eight years of professional experience in Student Affairs is required with a minimum of five years as a senior administrator in Housing and Food Services. The successful candidate must have a very strong working knowledge of all aspects of Housing and Food Services.

Salary is commensurate with education and experience. The desired starting date is August, 2001.

Nominations must be postmarked by May 31, 2001. For full consideration, applications consisting of a letter of interest addressing the qualifications for and the responsibilities of the position, resume, and the names, addresses, and telephone numbers of three references must be postmarked by June 7, 2001. Please send to Ann Malen, Chair, Search Committee for Director of Housing and Food Services, 105 Ammons Hall, Colorado State University, Fort Collins, Colorado 80523, Telephone: (970) 491-5709, Fax: (970) 491-1134. A full job description can be obtained by contacting the Chair.

CSU is an EEO/AA Employer.

---

**Director, Office of Institutional Equity**

The University of Notre Dame has restructured and centralized its affirmative action/equal opportunity programs culminating in the creation of the Office of Institutional Equity. The University seeks a leader who will provide the vision necessary to foster the growth of this new office and who will develop the office in such a way as to most effectively accomplish the University's goals of creating a more diverse workforce and a more welcoming and inclusive environment for all its members. As a Catholic institution of higher learning, these goals spring not only from the University's desire for academic excellence but also from the University's character as a Catholic institution that embraces all of humanity and is committed to social justice.

The Director (along with his or her staff) will be responsible for several duties related to affirmative action/equal opportunity. The Director will ensure compliance with all aspects of affirmative action requirements and related programs, including preparing and monitoring the plan and other University efforts. In addition, the Director will work with hiring departments to develop diverse pools of candidates for faculty and senior-level staff positions. The Director will investigate and respond to internal complaints of harassment and discrimination. The Director will coordinate disability issues related to faculty and staff. The Director will also assist other campus departments in providing guidance regarding affirmative action and equal opportunity issues. Because this is a newly organized Office, the Director will have the opportunity to build a new staff of at least three people. The Director will report to the President; will have a dotted-line reporting relationship to the General Counsel; and will work closely with the Office of the Provost, Department of Human Resources, and Office of Institutional Research.

**Qualifications:** Advanced degree; preferably a J.D., masters, or Ph.D. At least five years experience working with affirmative action and equal opportunity laws, regulations and policies, including experience with the EEOC, OFCCP and other relevant government agencies. Experience in higher education, including knowledge of tenure and other faculty personnel issues, and in working with highly confidential and sensitive issues; investigation and conflict-resolution skills. Strong analytical and writing skills. Computer proficiency and experience analyzing salary and other statistical data. Interpersonal and communication skills to deal effectively with multiple constituents and to earn the trust of a variety of people. Sensitivity to cross-cultural issues. Ability to remain objective and patient. Self-confidence and a sense of humor. Understanding of and commitment to Notre Dame's Catholic nature and mission.

**Salary:** Competitive and commensurate with experience and other qualifications; eligibility for the University's comprehensive benefits.

Review of candidates begins April 16th and will continue until the position is filled. Interested candidates should send a cover letter, resumé, and a list of three references to:

**Department of Human Resources**
University of Notre Dame • 100 Grace Hall • Notre Dame, IN 46556
hr.1@nd.edu • Fax: 219-631-6790

The University may request writing samples during the search process. All offers will be contingent upon the applicant's successful completion of a drug test and criminal background check.

The University of Notre Dame is an Affirmative Action/Equal Opportunity Employer.

---

**Oakton Community College** is a dynamic, comprehensive community college with two campuses serving the North Shore suburb of Chicago. The College is known for its academic innovations, commitment to serving students and solid financial position.

**Director of College Relations and Marketing**

The Director of College Relations and Marketing provides overall leadership for the effective planning and coordination of the College's marketing initiatives and, in conjunction with the Director of Admission and Enrollment Management, develops the marketing strategies for enrollment planning. The Director provides leadership for institutional marketing, public and community relations, publications and Web development, media relations, newsprint and radio advertising, and major College-sponsored events.

The successful candidate will be creative, have strong organizational skills, communicate well orally and in writing, and understand the needs of and work well with diverse constituencies. He or she will have a Master's degree in an appropriate discipline, at least 5 years administrative experience in a college or university, and demonstrated successful marketing and public relations experience. An ability to effectively represent the College to the larger community is required.

**Director of Admission and Enrollment Management**

The Director of Enrollment Management develops admission and enrollment strategies and services for new, continuing and former student populations. Specific initiatives for alumni relations are developed related to community and adult outreach. In collaboration with the Director of College Relations and Marketing, the Director of Admission and Enrollment Management plans, organizes and manages the recruitment program of the College. The Director supervises a staff of 5 employees.

The College seeks candidates who have demonstrated experience in the implementation of technology-related applications in the admissions and recruitment process; demonstrated ability to identify, develop and execute recruitment and outreach plans and strategies for diverse student populations and who: are creative, have strong organizational and interpersonal skills, and who write well. A Master's degree in an appropriate discipline and 4 years experience in admissions and/or enrollment management is required. Prior management and supervisory experience are necessary.

To apply, submit your resume and cover letter to:
Oakton Community College, Human Resources, 1500 E. Golf Road, Des Plaines, IL 60016-1268.
(847) 635-1675, fax: (847) 635-1764, e-mail: admsearch@oakton.edu.

Additional information about Oakton can be found at www.oakton.edu. Confidential screening of applicants will begin for both positions on May 7, 2001 and will continue until the positions are filled. Preferred starting date for both positions is July 1, 2001.
The University of West Florida

Purchasing Director

The University of West Florida, one of the ten state universities in Florida, is located in Pensacola, Florida, and enrolls over 8,500 students at its Pensacola and Ft. Walton Beach campuses. This position is located on the Pensacola campus of approximately 1,500 acres that has been designated as a nature preserve. Over 1,000 students live on campus with another 2,000 living nearby. The University seeks a qualified individual to serve as Purchasing Director.

Responsibilities: The position reports to the Vice President for Administrative Affairs, and is responsible for serving as chief administrator for the University’s procurement program which encompasses central receiving, central stores, surplus property disposition, Minority Business Enterprise program, and the University’s Purchasing Department.

Qualifications: Minimum qualifications are a master’s degree in an appropriate area and six years of appropriate experience; or a bachelor’s degree in an appropriate area and eight years of appropriate experience.

Salary Range: $60,000-$85,000

Application: UWF is an equal opportunity employer. Women and minorities are especially encouraged to apply. To ensure full consideration, candidates are asked to submit the following:

- cover letter summarizing qualifications
- detailed resume, and
- name, mailing address, e-mail address, and telephone number for three professional references.

Deadline is May 11, 2001. Desired starting date is July 1, 2001.

Send application to: Dr. Cornelius Wooten, Vice President Administrative Affairs

AGRONOMY & SOILS
AG PROGRAM ASSOCIATE POSITION

The Department of Agronomy & Soils, Auburn University is seeking candidates for an AG Program Associate position. This position is funded from external sources.

Responsibilities include but are not limited to: collecting, organizing, analyzing data, maintaining records and data bases; preparing and presenting technical reports, educational/informational programs/workshops; conducting surveys and studies; developing, updating and presenting printed materials, web-based and other electronic information technologies for dissemination of research results and technology transfer, coordinating support and services with other university offices/departments as well as federal and state agencies/institutions; providing general professional assistance to faculty members to support technology transfer of research results.

Minimum qualifications are a Bachelor's degree in Agricultural Economics, Agronomy, Soil Science or closely related field (a minimum of 10 quarter hours course work or equivalent in agricultural economics is required) and six years experience in agriculture research and related areas is required or a Master's degree in the above and three years' experience. Essential requirements are excellent interpersonal and written communication skills; demonstrated technical expertise with computers, software and statistical programs; and demonstrated application of agricultural research and technologies. Knowledge of southern cropping systems is required. Candidate must be currently authorized to work in the U.S. Salary will be commensurate with education and experience. Experience in desktop publishing software, presentation graphics and web-based information systems is highly desirable.

Minorities and women are encouraged to apply.

Candidates should send a letter of application, resume, transcripts and names/addresses of three references to:
Ag Program Associate, Log H15937
Human Resources
Langdon Hall
Auburn University, AL 36849
P.H: (334)844-4145
FAX: (334)844-1617

Review of applications will begin after April 13, 2001. Position is available immediately.

Auburn University is an equal opportunity affirmative action employer.

© 2001 HISPANIC OUTLOOK
Last year, I was the keynote speaker at the Forum for Diversity in Graduate Education, held in San Francisco. The conference coordinators hoped I would present a reasoned answer to the question, "Why go on to graduate school?" My audience included some of California's brightest college students whose ethnicities are very much underrepresented in graduate schools.

It wasn't an easy question. I would have liked to tell them unequivocally that they should pursue graduate work, but the truth is that I—like many other Latinos—let the world define my choices and path in life for a fairly long time before I finally discerned my own desires and choices. My path was more circular than linear, reminding me of a line by the late poet Theodore Roethke, "I learn by going where I have to go."

As I recontemplate the question, I realize that higher education in general, and professors in particular, face the same circular path of learning by going where they need to go. Due largely to the demand for access, higher education must adapt to new directions. And one direction clearly emerging is toward the primacy of teaching and of educating future professors to teach. This shift will profoundly impact the research model as the primary vehicle for training and preparing future faculty.

The world's store of information is said to double every seven years. Imagine what this means to an institution like CSU-San Marcos, approaching only its 10th anniversary, and how our young professors must be constant fast-paced learners or risk being left in yesterday. The role of the professorate is being challenged, not only by the pace of information but also to make teaching more of a goal in graduate training. Traditionally, the triad of teaching, research, and service has been at the heart of the profession. Depending on the type of institution, research or teaching is emphasized. However, the research endeavor has always been viewed more positively, and research institutions have been at the top of the academic hierarchy.

Today at all types of institutions, we witness a movement away from the primacy of research and toward the emphasis on teaching. A recent Carnegie Commission report called for a much higher priority for teaching at the undergraduate level and suggested that faculty be rewarded for outstanding teaching on an equal level with cutting-edge research. In reality, research institutions represent about three percent of the universities where graduate students will be hired after their Ph.D. Most positions available in academe are at non-research institutions such as my own. The movement toward an emphasis on teaching at all types of institutions cannot come soon enough.

Why the push for these and other changes? To guarantee a quality undergraduate education for all students. The primacy of teaching is especially critical for Hispanics. Consider the relative sizes of university systems in California alone. The California State University, of which San Marcos is a part, educates more than 75,000 Hispanic students each year, compared to only 20,000 by the University of California system. Those statistics indicate that most doctoral graduates will find jobs not in research institutions but in large university systems like CSU, where teaching is the primary focus. As we draw faculty from research universities, the quality of instruction for my students will depend in large part on a renewed focus on training future professors to teach well.

In my speech a year ago, I told the students to seek out mentors or role models at the undergraduate level in preparation for advanced study. I noted that "they don't have to look like you; they just have to believe in you." For a long time to come, the odds are high that their role models won't look like them. But for the short run, we can at least ensure that they will bring strong teaching to institutions like CSU. That can only result in more Hispanic students' choosing to pursue graduate study and reinforcing new ideas for making teaching a focal point, in addition to research and scholarly activities.

Done correctly, these changes will bring about a system that's more responsive and better suited to the changing faces and needs of students, no matter their background. Donald Kennedy, former president of Stanford, has written that higher education is recognizing that academic freedom—the cornerstone of the modern university—has as its counterpart academic duty. This implies that the Academy must respond to student needs. The long-term results will make higher education more accountable for what it does and how it is done and benefit Hispanics at all levels of academe.

IMMIGRATION!
Academic Service to the Latino Community  back cover
Bilingual Schools Work!

BY GUSTAVO A. MELLANDER

Bilingual programs have been around in this country for hundreds of years. During various periods in the 1800s, bilingual schools existed and were conducted in such non-English languages as German, Swedish, Italian, and Chinese—to name but four. Their goal was to help children—and adults—make the transition from their native tongue to English. Many reached that goal. Many failed to do so.

It is not easy to learn a foreign language. Many immigrants never did. It is particularly difficult if, as an adult, you are busy working full time or if a child, you find you are ridiculed daily. In some cases, immigrants had to wait until their children struggled through the education system before someone in the family had learned English well enough to translate for the family. In most cases, it wasn’t until the grandchildren of immigrants grew up that the family could count on truly proficient English speakers.

Total Immersion Programs

Alas, by that time, the grandchildren could not speak nor understand their grandparents’ native tongue. During the 19th century, all non-English immigrant groups were subjected to a sink-or-swim educational system. All too many sank. Sank and remained prisoners of their linguistic ghettos.

Under sink-or-swim, students were simply assigned to regular classrooms with native speakers as if they already understood English. They didn’t. It was a chaotic and frightening experience. And it got worse. Not only did immigrant children, already burdened with life-altering adjustments, find themselves lost and confused in the all-English classroom, but they also were made to feel inferior.

Their native language was frequently dismissed, mimicked in a pejorative fashion, and characterized as inferior to English. Children can be mean; they picked up on the themes and harassed the non-speakers. Even well-meaning teachers were often at a loss as to how to build confidence and self-respect among immigrant children.

Transitional Bilingual Programs

With the passage of time, it became clear to some teachers and administrators that there were far too many casualties. The total-immersion system, successful in some cases, left behind too many “failures.” Some teachers learned a few non-English words, the better to communicate with their students. The successes that grew from those experiences, plus a dash of common sense, led to the beginnings of bilingual transitional programs.

By relying on a child’s native tongue, a bridge could be built to English proficiency. And by not denigrating a child’s native tongue and customs, a level of trust and self-respect could be created that helped children learn. By building upon strength and respect, hundreds of thousands have been helped.

Today it is not unusual for a school district to represent more than 15 foreign languages—many have more than 25, some more than 100. The major goal is still to build a bridge between the child’s language and the new working one, English. Seems simple and logical enough.

But the attacks on bilingual education continue. The most popular reason to oppose bilingual education is that “it doesn’t work.” Children, it is claimed, are not learning English. Readers of The Hispanic Outlook need not be told that some bilingual programs, for a vast variety of reasons, have failed. But many more have succeeded.

What Really Works?

A California-based study making the rounds in Congress reports that children in bilingual education classes performed better in academic achievement tests than did students receiving most of their instruction in English. Students in 63 schools with bilingual education programs did better on academic achievement tests in English than did students in more than 1000 similar schools that provide instruction to most students only in English.

The results are particularly intriguing since both bilingual and English-immersion schools had Hispanic enrollments averaging 73 percent. Further, the students in these schools came overwhelmingly from low-income families in which the parents had limited formal education.

“As a mother, I made the choice to continue my son’s bilingual education class because I felt that this was the best way for him to learn English and succeed in school. With this new information, I know that I made the right choice by requesting a waiver, and that he is receiving the best education possible,” said Carmen López, a parent in San Diego County.

Her comments run counter to surveys conducted by those who oppose bilingual education. They claim that most parents are opposed to having their children in bilingual programs because they are conducted in Spanish and therefore children do not learn English in a timely fashion.

However, research conducted by Dr. Norm Gold concludes, “This study shows that both groups of school districts made progress on California’s API from 1999 to 2000. Bilingual schools exceeded their growth targets for Hispanic students by almost five times, while the comparison schools exceeded their targets by only four times. California parents making such important educational decisions for their children should know that students in bilingual education are performing better and are learning English.”

Bottom line: This and other data-based research indicate that bilingual education is not a barrier to academic achievement for Hispanic students. They learn the subject matter, and they learn English. Many earn higher grades when enrolled in bilingual programs.

Dr. Mellander is a professor at George Mason University.
¡Saludos!

Academic distinction takes on many forms, whether it is as the recipient of an award or endowment, or by earning a ranking such as in our Top 100 list, the focus of this issue. Colleges and universities for Hispanics are listed based on graduation criteria provided by the U.S. Department of Education. The Carnegie Classification of Institutions of Higher Education, while not a ranking, is an important taxonomy of degree-granting and accredited academic institutions that many refer to and depend on for informational, policy, and decision-making purposes.

The current system distinguishes the following classifications: doctoral/research universities-extensive and intensive; master's colleges and universities I and II; baccalaureate colleges-liberal arts, general, and associate's; associate's colleges; specialized institutions and tribal colleges and universities. This system of classification was originally published in 1973 and has been subsequently updated several times. The Carnegie Foundation will complete another revision in 2005 that will reflect a thorough reassessment of the classification system, which will enable multiple classifications of institutions.

Florida International University has positioned itself on the top tier of the Top 100, as the No. 1 institution (see profile on page 28) for awarding the most bachelor's degrees to Hispanics, and as Carnegie's Doctorate-III, which means it has awarded 50 or more doctoral degrees per year across at least 15 disciplines. Doctoral/Research Universities-Intensive refers to institutions that have awarded 10 degrees per year across three or more disciplines or at least 20 doctoral degrees for the year overall. Master's College and Universities I institutions typically award 30 or more master's per year across three or more disciplines. Master's II schools award 20 or more master's degrees per year. Baccalaureate Colleges-Liberal Arts designation indicates that institutions awarded at least half of their bachelor's in the liberal arts fields. Bachelor's Colleges-General award less than half of their bachelor's in the liberal arts fields; and in Bachelor's/Associate's Colleges, bachelor's degrees accounted for at least 10 percent of undergraduate awards. At Associate's Colleges, bachelor's degrees represented less than 10 percent of all undergraduate awards.

Up next, HO will spotlight the Notre Dame Institute for Latino Studies; Dr. Dolores M. Fernández on Bilingual Education; the first of a two-parter on conflict in the Classroom; and much more.

Con muchísimo gusto,

M. Grossett

Bridging the gap to your future...

Sam Houston State University

SHSU has one of the highest graduation rates for Hispanic students, and we offer excellent job opportunities. There are numerous organizations for student involvement, many of which are exclusively Hispanic, helping make your college experience a memorable one. Let Sam Houston State University be a part of your future. For more information call 936-294-1828 or visit us on the web at WWW.SHSU.EDU.
May 7, 2001

Dear Colleagues:

It’s been said it takes a village to raise a child. It can take even more to raise a first-generation college graduate who is Hispanic. So many elements—public, private, and personal—need to be in place and working smoothly. And when they are and when they do, there is cause for celebration.

Thus we now celebrate the Top 100—those four-year U.S. colleges and universities that, by the latest National Center for Education Statistics, conferred the most academic degrees on Hispanics.

The institutions are diverse—state-sponsored and independent, large and small, religious and secular, profit and nonprofit. At least one offers solely distance education. And the locations are diverse, as the geography of Hispanidad shifts and spreads. The Top 100 now represents 33 states, including North Carolina, where the Hispanic population grew from 81,000 to 878,000 between Census 1990 and Census 2000.

These Top 100s granted, to students overall, 10,300 more bachelor’s, 1,200 fewer master’s, and 1,200 fewer doctoral degrees than those of the previous year. But Top 100 bachelor’s degrees to Hispanics increased by 2,600, to 41,000, and master’s rose to 10,292. Doctorates to Hispanics held nearly steady at 971, and those earned by Hispanic women rose by 56, to 524.

These gains are not fortuitous, but hard won—by the graduates and by all who helped inspire a dream, create a pipeline, ease and illuminate the way. Colleges and universities working with K-12 districts and community groups, bringing youngsters and parents on campus, streamlining admissions and transfers. National and local advocates pressing tirelessly for fair access. Governments and foundations designing and underwriting strategies of inclusion. Faculty and staff going the extra mile as coaches and troubleshooters. Mothers and fathers urging—your brain, not your back.

To all of these heroes, so many of them unsung, and to all the graduates and the institutions that help make it possible, a heartfelt BRAVO!

¡Felicitaciones!

José López-Iss

Every year The Hispanic Outlook devotes an issue to the Top 100 schools awarding the most bachelor's, master's, and doctorates. Here is a synopsis of this year's results:

Bachelor's

Florida International University made the headlines as No. 1, granting the most bachelor's to Hispanics—2,062. Women bachelor's recipients at FIU also outnumbered Hispanic males, 1,210 to 852. It was one of nine Florida institutions on the list—University of Florida (No. 4), University of Miami (No. 21), University of Central Florida (No. 23), University of South Florida (No. 35), Barry University (No. 39), Florida State University (No. 42), Florida Atlantic University-Boca Raton (No. 49), and Nova Southeastern University (No. 73).

Thirty-one schools in California ranked among the Top 100, with San Diego State University at No. 3, graduating 991 Latinos.

The University of Texas at El Paso came in second with 1,251 Hispanic graduates. Texas accounted for 21 schools.

New York rounded up 10 institutions, including seven in the CUNY system: Lehman College at No. 8 (411), then John Jay College of Criminal Justice, City College, Hunter College, Bernard M. Baruch College, Queens College, and Brooklyn College. St. John's University, New York University, and SUNY at Stony Brook were the other N.Y. institutions.

Five New Jersey schools made the Top 100: Rutgers University—New Brunswick awarded bachelor's to 398 Hispanics.

The University of Illinois at Chicago, at No. 40 with 400 Hispanic bachelor recipients, was the first of five Illinois institutions to make the list. New Mexico schools totaled four, starting with University of New Mexico-Main Campus, ranked No. 12 with 739 Hispanic graduates. The University of Arizona made No. 15 among the Top 100, reporting 706 Hispanic graduates. The state of Colorado had three schools on the list. University of Colorado at Boulder is No. 65, and reported 226 Latino bachelor's.

Washington, Massachusetts, Pennsylvania, Maryland, Michigan, Utah, Missouri, Nevada, and Virginia each had one school on the list.

Master's

Hispanics earning a master's degree represented 10,292 out of 133,582 total master's granted at the Top 100 schools for Hispanics. The University of Wisconsin-Madison (No. 81), and George Washington University, in the District of Columbia (No. 79), were not on the Top 100 Bachelor list (and their states were not represented) but are recognized as top schools for Hispanics based on the number of master's degrees conferred—53 master's degrees each.

FIU is still No. 1, granting 467 out of 1,284 total master's to Hispanics.

Women master's surpassed men, 301 to 166. The state of Missouri moved up a few notches from No. 93 on the Top 100 Bachelor list, graduating 163 Hispanics at Park College, to No. 6, (Webster University) on the Top 100 master's list, conferring master's degrees to 204 Hispanics. Massachusetts' Harvard University, standing at No. 19–150 Hispanics out of 3,040 total master's—and New York's Columbia University (No. 32) and Fordham U. (No. 33) with 115 and 114 Hispanic master's respectively made it aboard.

Doctorates

In the 1998-99 academic year, 971 Hispanics, or 4 percent, earned doctoral degrees out of 26,811. A few more states that had not been represented currently have institutions in this category: University of Minnesota-Twin Cities (No. 21), the University of North Carolina at Chapel Hill (No. 29), Indiana University (No. 45), University of Iowa (No. 46), Oklahoma State University-Main Campus (No. 48), University of South Alabama (No. 57), University of Hawaii at Manoa (No. 78), and Rhode Island's Brown University (No. 89). Only the top 10 institutions on the doctoral list granted 20 doctorates or more to Hispanics; ten or more doctorates were granted at the top 37 schools. Columbia University was No. 37.

Top Disciplines

Business and marketing is the most popular Bachelor concentration for Hispanics. FIU graduated 575 Hispanics in this discipline. Other popular majors are: social sciences (University of California-LA 372), multi/inter-disciplinary studies (U.Texas-Pan American 317), education (FIU 295), psychology (FIU 191), liberal arts and sciences (California State University-Fresno 177), protective services (CUNY-John Jay College of Criminal Justice 168), communications (The University of Texas at Austin 114), and health sciences (U.Texas-Pan American 107).

In the master's category, education tops the list, led by Nova Southeastern University with 223 Hispanic graduates. Business and marketing came in second, and the University of Miami dominated this area with 137 Hispanic master's.

Psychology by far garnered the most Latino doctorates—28 at the California School of Professional Psych-LA. Education, biological sciences, and engineering/technology were the runners-up in the doctoral categories that drew the most Hispanics. The University of Texas at Austin granted doctoral degrees in education to 18 Latinos, the University of California-Berkeley, 8 in biological sciences, and Cornell University-Enowed Colleges conferred seven in the engineering/technology area.

¿Por Qué Usted?
(Why You?)

¿Por Qué Nosotros?
(Why Us?)

- The University of New Haven is a small, co-educational university between New Haven and Bridgeport, CT — both with large Hispanic communities. We are close to New York and Boston.

- UNH is first among all Connecticut colleges and universities serving minority populations (all groups).

- UNH educates students from more than 25 states and 50 countries.

- Small classes, caring professors, and programs for those who need extra help make learning easier.

- We prepare students for successful careers and lives.

Visit www.newhaven.edu or call 1-800-DIAL-UNH x7319

OUR CLASSROOM IS THE WORLD

SCIENCE FACULTY!
Opportunities for Outstanding Students

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research. Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (rooms, board, transportation) while students pursue an undergraduate degree. For each award year, scholars work 10 weeks with salary benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!

Advisors to students apply if they:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

For more information, contact the UGSP at:
http://ugsp.info.nih.gov ■ E-mail: ugsp@nih.gov
Phone: 1-800-528-7689 ■ TTY: 1-888-352-3001

MORE GLORY FOR
FLORIDA INTERNATIONAL UNIVERSITY

BY TODD MARTINEZ-PADILLA SIMMONS
When the Carnegie Foundation for the Advancement of Teaching released the preliminary version last August of its much-watched classification system for U.S. colleges and universities, some might have wondered whether there had been a mistake in the system's leading tier for research universities.

There among the Ivy and traditional state schools was Florida International University (FIU), a public research university in Miami that opened its doors just 28 years ago. But FIU's presence was no error. The school's doctoral and research programs met the criteria established by Carnegie for the prestigious classification, even if the University was the youngest of 52 schools in that premiere category.

If anyone still needed convincing, however, proof aplenty was released in October, when the legendary Phi Beta Kappa honor society voted to establish a chapter at FIU, making the University the youngest in the nation so honored by the 224-year-old organization.

FIU, in fact, is now Florida's only public urban university with both the Carnegie and Phi Beta Kappa designations. One of 77 universities nationwide with both honors, it is the only one of those that is also a majority-Hispanic institution and the only one with a Hispanic president—Modesto A. Maidique.

"We're very proud that we reached these milestones, but even more important than the recognition we've gotten from them is the academic excellence that made both possible," said Maidique, who recently began his 15th year as FIU president, placing him among the nation's 10 longest-serving research university leaders.

"Wherever I go, colleagues ask me how we've done it. Of course, part of the answer is timing and location. But it always gives me an opportunity to tell them about FIU, and ours is a great story to tell."

Founded in 1965 and opened to students in 1972, FIU is one of the nation's youngest research universities. Though South Florida is the state's largest metropolitan area, political vagaries made creating the University more difficult than it should have been, historical observers say. By the time the school finally opened, more than 5,667 students enrolled—still the largest opening-day class for a new university in U.S. history.

For its first few years, FIU offered only upper-division courses. Though the University grew quickly, adding a North Miami campus in 1977 and lower-division programs in 1981, doctoral programs didn't debut until 1984.

Maidique was named president two years later. He was then 46, but despite his relative youth, he brought a lengthy resume—four degrees from MIT; faculty appointments at Harvard and Stanford, and success as a high-tech electronics and biotechnology entrepreneur in the private sector. Those experiences helped him envision the possibilities for FIU—by then, nearly 16,000 students strong—and plans that would help the University realize its potential.

Part of that potential began to take shape in the early 1990s, when FIU rose to the top of U.S. universities in producing Hispanic bachelor's degree graduates. Drawing on a service-area population roughly 50 percent Hispanic, the University enrolled tens of thousands of students of Cuban, Caribbean, and Central and South American descent. Today, it is far and away the top U.S. producer of Hispanic graduates at both the undergraduate and master's levels, and ranks third nationally in production of all minority graduates, according to U.S. Department of Education statistics.

Even as the University continued to grow, Maidique and the rest of the University leadership set their sights on lofty goals of quality Strategic expansion of the University's research programs in a range of disciplines became a top priority in the early 1990s, when FIU was bringing in less than $10 million a year in research contracts and grants. By last year, that figure had grown to nearly $60 million, more than $40 million of it from federal sources.

That was more than enough, it turns out, to meet the criteria of the Carnegie Foundation for the leading "Doctoral/Research University-Extensive" category. The Foundation's revamped criteria for that top category, released late last Summer, required that each university produce at least 50 doctoral graduates each year in at least 15 disciplines. FIU surpassed that with ease: Ph.D.'s were conferred on 69 individuals at the December 2000 commencement ceremonies, and the usually larger spring commencement won't take place until this month.

For Maidique, who had made achieving the Carnegie designation his top priority and who had established a faculty task force in 1998 to accelerate progress toward that goal, the new "Extensive" designation was a major piece of good news. Phi Beta Kappa reinforced FIU's rise with its selection of FIU as one of seven colleges and universities nationwide to be home to new chapters. FIU was both the only Florida institution and the only majority-Hispanic college or university chosen in the 2000 vote.

"There's no question that the names of both the Carnegie Foundation for the Advancement of Teaching and Phi Beta Kappa are virtually synonymous with high quality in higher education," said Maidique. "This recognition helps raise the profile of our university, and gives people a clearer idea of the quality and productivity of FIU, its faculty, and its students."

Generating Success

One area in which the University particularly excels is engineering education. The FIU College of Engineering is the largest producer of Hispanic
bachelor's degree recipients in the United States.

Dr. Gustavo Roig, director of the FIU Center for the Advancement of Engineering Pre-College Education, says the reasons behind FIU's success are numerous. First and most obvious, the University draws on a sizable local Hispanic population in both Miami-Dade and Broward counties. Nearly 50 percent of Miami-Dade's population is Hispanic.

Second, the University admits a significant number of students who don't meet traditional academic criteria, either in terms of grade-point average or SAT score. Those students are able to develop the skills they need to succeed through non-credit studies at the FIU Learning Center or the Tutorial Center, which is part of the University's Department of Mathematics.

That kind of additional assistance can be important to students still mastering English, for instance, or for students coming from countries or regions with poorly funded K-12 schools.

"These are students who often can perform, if given the chance," said Roig. "We're an institution with a big heart, as well as high quality. When you can serve students who have the potential to be successful and they prove themselves, you benefit the community."

Those opportunities are supplemented by the Freshman Experience, a mandatory, two-hour credit course that helps first-year students gain the study, time management, and asset management skills necessary to succeed at a major public urban research university.

In engineering, Roig and the College's other leadership and faculty ensure that undergraduate students have the chance to engage in research—an uncommon opportunity for most bachelor's degree seekers. Many do so, for instance, through the FIU Hemispheric Center for Environmental Technology (HCET), which recently was awarded a $35 million, five-year grant for research and development projects nationwide at U.S. Department of Energy sites. The major grant—presented to University leaders in Miami by Energy Secretary Bill Richardson, at the time the nation's highest-ranking Hispanic—includes incentives to bring Hispanic and other racial and ethnic minority students into research.

The result of all those factors is "a tremendous diversity among our Hispanic students. The demographics here are such that we have a tremendous rainbow of countries and backgrounds," said Roig, pointing to the fact that students from throughout Central and South America and Spain and more than 100 other countries are among the University's nearly 2,400 international students. "That greatly enhances the experience here."

Nurturing Hispanic Students

Student Affairs Vice President Dr. Patricia Telles-Irvin says the University's demographics virtually ensure that many of its student organizations and initiatives will have a heavily Hispanic flavor, even if they're not specifically geared toward Hispanic students. Of the University's 110 student organizations, only about 10 percent have a special focus on Hispanic students. "What's different here is that your typical fraternity or sorority, for instance, is predominantly Hispanic," said Telles-Irvin.

Still, the University works diligently to make sure that the campus atmosphere is comforting and nurturing for Hispanic students. As part of Hispanic Heritage Month in October, the University produces a popular Leadership Awards ceremony that includes a dinner and dance. Prominent student, faculty, staff, and community Hispanic leaders are recognized both for their contributions to the Hispanic community and to the community at large. Past community leadership honorees include state Representative Mario Díaz-Balart—whose brother, Lincoln, is a U.S. Representative—and Rosa Sugañas, a prominent Miami businesswoman.

"When we acknowledge individuals of similar backgrounds, it gives our Hispanic students a sense of connection to and pride in their culture, a sense of 'I can do it, too,'" said Telles-Irvin, who, as a Mexican American, is also a visible role model for many Hispanic students. "It's all part of trying to let students know we care about them."

Above all, says Telles-Irvin, the University's leadership works to make sure that FIU meets the needs of its Hispanic students, as well as those of the student body in general. "In the eight years I have worked here, I've always been impressed with the leadership of our president on these issues. He's very focused and proud of his heritage," she said. "I think people outside the University know that about us—that we're committed at the senior level and throughout the University."

Two additional important components in FIU's success are its main "feeder" institutions—Miami-Dade Community College and Broward Community College, both widely considered to be among the nation's best two-year institutions. The majority of FIU's undergraduates begin their higher-education experience at one of those two institutions, making the quality of instruction at both critical foundation for later work at FIU.

Roig's individual success as a mentor to Hispanic students and the work of his Center at FIU have caught the attention of others nationwide. He was recently named to the prestigious National Science Foundation's Committee on Equal Opportunities in Science and Engineering by NSF Director Rita Colwell, and to the NSF Advisory Committee for Engineering.

As a member of the Equal Opportunities committee, Roig will bring

The University admits a significant number of students who don't meet traditional academic criteria, either in terms of GPA or SAT score.
expertise from FIU to bear on NSF policies and activities that “encourage full participation of underrepresented groups in science, engineering, education, professional, and technical fields.” As a direct advisory group to the NSF director, the committee has the opportunity to wield significant influence in one of the nation’s most influential science organizations.

Projected Milestones

If, as they say, past is prologue, FIU is prepared for even greater achievements over the next few years. Because of the University’s singular accomplishments and demographics, many of those projected milestones will have a sizable impact on Hispanic students and Hispanics in higher education.

First, the University is expected to enroll 5,000 to 8,000 more students between now and 2010, increasing its enrollment to 37,000 to 40,000. Well over half of those new students will be Hispanic.

Second, the University’s recent receipt of a Kellogg Foundation ENLACE Grant of $2 million means that FIU will be at the center of a broad, community-based effort to increase the number of Hispanics who graduate from high school and progress through college. Community, K-12, and University officials, led by Rig, prepared for the ENLACE grant for more than a year, and have detailed plans in place that they hope will help improve education attainment at all levels.

Third, FIU is scheduled to open South Florida’s first public College of Law next year. One of the College’s objectives is to increase the number of severely underrepresented Hispanics practicing law in the state.

FIU’s law college will also be special in its focus on international and transnational law. Just seven months after the College’s ratification by the state, the University hired Leonard P. Strickman as its first-ever dean. Strickman, former dean of both the University of Arkansas and Northern Illinois University law schools and a widely recognized expert in law school accreditation, is already well into the process of such prerequisites as hiring staff and faculty and building the law library (for more information, visit http://www.fiu.edu/law).

“The law school will build on the dynamic progress of Florida International University,” said Strickman. “It has high aspirations for providing to South Florida residents a unique, high-quality legal education opportunity to prepare themselves for the practice of law in both domestic and global matters. And it is an opportunity that will be attractive for those South Floridians who have not been able to afford the costs of a good legal education.”

And that’s not all. Also next year, the University is expected to debut its Division I-AA football team and open a new designer home for the FIU School of Architecture—part of a massive building campaign that includes a new Graduate School of Business Administration, a marine biology research center, expanded on-campus housing, a second 1,000-car campus parking garage, a new presidential residence at FIU-University Park, several Greek houses, and more.

It’s all a far cry from 28 years ago, when the University opened on the airstrip of an old, abandoned airport.

“From our vantage point, the future is very, very bright,” said Maidique.
A native of McAllen, Texas, Dr. Miguel (Mike) Nevárez has been president of The University of Texas-Pan American since 1981, guiding the institution through its evolution into a well-respected comprehensive regional university. He is the first Hispanic elected to head the institution. His career at UT-Pan American began in 1971, when he was an assistant professor, associate dean of men, and acting director of counseling and testing. Prior to his appointment as president, he was vice president for student and university affairs and a professor of elementary education.

These have been exciting times for the school, and for its leader. UTPA has seen numerous milestones during his tenure—including the momentous and long-awaited merger with The University of Texas System in 1999. Nevárez says this has been a period of tremendous growth in both enrollment and in the numbers of degrees offered, especially graduate degrees, and the University’s first doctoral degrees. (See “Two Decades of Energy and Vision,” a profile of Dr. Miguel A. Nevárez, The Hispanic Outlook, Dec. 4, 2000).

As part of the winter commencement, the first students in the Master of Science degree program in mechanical, electrical, and manufacturing engineering received their diplomas. UTPA, which offers the only accredited manufacturing engineering programs in Texas, joins Kingsville and San Antonio in offering the only engineering graduate degree programs in South Texas.

“UT-Pan American continues to expand both its graduate degree and research programs,” says the president. “This adds to our already strong program to support expanded professional education for a variety of industries. With this degree program in place, industries will be more willing to relocate here, knowing that their engineering staff can continue to grow professionally and meet the challenges of working in a global economy.”

Nevárez stresses that this new master’s has an additional benefit. The program supports the University’s efforts to make initiatives such as the Cross Border Institute for Regional Development (CBIRD) a reality. CBIRD is a strategic effort designed to strengthen infrastructures, create new technologies, and build public-private partnerships benefiting the U.S.-Mexico border region. The recently created UTPA CBIRD Program will provide strategic planning to establish a baseline to help the region develop into “a new high-tech
Dr. Miguel A. Navares, University of Texas-Pan American president

corridor: "The new master's degree program is an important opportunity for residents of the region and is "driven by demand in the area for expanded graduate education."

A graduate program has been part of the University's overall plan for the Department of Engineering since 1992. "It's a giant leap forward in our progression to build the engineering program," observes Dr. Edwin W. LeMaster, chair of the Department of Engineering. "It's going to better equip us to meet the needs of the engineering community in the Río Grande Valley." The department started offering graduate-level courses in 1997. Approximately 50 practicing engineers are registered for the courses.

Another draw to prospective engineering graduate students is the state-of-the-art $23 million, 122,006-square-foot Engineering Building. Completed in 1996, the building features a 250-seat auditorium, 18 laboratories, classrooms, and faculty offices. "We're going to better utilize the Engineering Building and its equipment through the master's degree program," says LeMaster. "We already have everything we need in place, including 17 Ph.D. faculty."

Under the approved degree program, students will have three options. The first is a course work-only degree with 36 semester credit hours of class work. The second is a professional degree with 30 hours of course work and a six-hour practicum. The third option is a thesis degree with 24 hours of course work and a minimum of six hours of master's-level thesis work.

Other additions to the degree programs are a Master of Science in computer science, a Master of Education in special education, a Master of Science in rehabilitation counseling, and a Master of Fine Arts in art. There is also a new pharmacy doctoral (Pharm.D.) degree with UT-Austin.

Its History

UT-Pan American was founded as a two-year college by the Edinburg school district in 1927. It joined the state system of four-year colleges and universities as Pan American College. The first graduate
programs were offered in 1971, and the institution changed its name to Pan American University. When it merged with The University of Texas System in 1989, the school became The University of Texas-Pan American. The University was named “Pan American” to “reflect its desire to bridge the cultures of North and South America.” The name also reflects the school’s rich cultural and ethnic diversity.

Its location, Edinburg, is the county seat of Hidalgo County, one of four counties collectively known as the Lower Río Grande Valley of Texas. Hidalgo County is composed of many small cities and communities that comprise the McAllen-Edinburg-Mission metropolitan area, which has a population of over 500,000. It is one of the fastest-growing areas in the nation. The economy of the region is based on agriculture, manufacturing, retail sales, tourism, government services, international trade, and health care.

The Río Grande Valley forms at the southern tip of Texas, bordered by Mexico on the south, only 20 miles from the campus, and the Gulf of Mexico and South Padre Island on the east, about 60 miles from the campus. UT-Pan American is the fifth largest component of the UT System and the 10th largest public university in Texas. Reflecting the demographics of the region, more than 80 percent of UT-Pan American’s students are Mexican American. This gives UTPA the highest number of Hispanic students in the state and the second highest in the nation. Many represent the first generation of their families to go to college, and it is not uncommon for students, upon graduation, to triple the earning power of their parents.

UT-Pan American offers 49 bachelor’s degrees and 41 master’s degrees in more than 50 fields of the sciences, business, the arts and humanities, education, and the social and health sciences. The University offers a doctorate in business administration with an emphasis on international business, and, in cooperation with UT-Austin, a doctorate in educational administration. Cooperative degrees with two University of Texas health science centers lead to Bachelor of Science degrees in occupational therapy and physician assistant studies.

Total enrollment for Fall 2000 was 12,759, with more than 10,600 Hispanic students enrolled. The class included 65 African Americans, 15 Native Americans, 287 non-resident aliens, 133 Asians, 992 Whites, and 578 others. Undergraduate enrollment for Fall 2000 totaled 11,187, with 9,484 Hispanics, or 84.8 percent. The number of faculty listed for Fall 2000 was 710, with 405 full-time and 305 part-time. Tenured or tenure-track full-time faculty numbered 194. Of the total, 308 are Hispanic, 324 White, and 78 other.

UT-Pan American has grown a great deal in the last ten years, and one area with the most progress has been the health sciences—a boon for the region. Based on 1997-98 statistics, UTPA ranked fourth nationally in granting nursing degrees to Hispanics, trailing only Florida International University in Miami, UT-El Paso, and the UT Health Science Center in San Antonio. This accomplishment is very significant as the nation is awakening to a serious shortage of professional nurses. UTPA awarded 35 nursing degrees to Hispanics (12 men, 23 women), and those numbers are growing. In December of 1999, 60 Bachelor of Science nursing degrees were awarded to Hispanics. An additional 17 obtained an associate’s degree in nursing in May of that year. Dr. Helen Castillo, dean of the College of Health Sciences and Human Services, attributed part of the success to the University’s “aggressive recruitment and retention efforts.”

With occupational therapy and physician assistant studies programs now available, she expects even more Hispanic students to receive bachelor’s degrees in health professions from the College of Health Sciences and Human Services. “I think we’re doing a very good job in producing nurses for the Río Grande Valley, especially nurses who can provide culturally congruent care,” observes Dr. Carolina Huerta, chair of the Department of Nursing. “We’re Hispanics treating Hispanics.”

The UTPA Premedical Honors College is statistically “tops in the nation.” The Baylor-UTPA program was established to address the critical need for healthcare providers in South Texas—where 13 counties, including Hidalgo and Cameron, have been identified by the U.S. government as “medically underserved.” The UTPA-Baylor partnership was the first of its kind in the nation. Now, with two classes graduated, the program has already significantly increased the number of South Texas students accepted to medical schools. Indeed, the program has been so successful that it prompted Dr. William H. Cunningham, chancellor of The University of Texas System, to challenge UT medical schools to develop similar programs. The University of Texas Medical Branch at Galveston was the first to answer the call and come on board, developing a comparable partnership with UTPA.

In 1999, 16 UTPA students were accepted to medical schools. The class of 2000 featured 25 future physicians, and there are more than 60 students in the pipeline.

“This is certainly a pioneering effort,” says William A. Thomson, BCM Center for Educational Outreach director. “Given the success of the program to date, we fully expect that the Premedical Honors College will continue to have a strong, positive impact on the number of students from South Texas who access medical school.”
Saying education reform is a top priority of his administration and that “no child will be left behind,” President George Bush Jr. introduced, shortly after taking office, an education reform package that includes several provisions likely to impact Latino students nationwide.

“President Bush’s assertion that no child will be left behind is important because Latino children historically have been left behind,” said Diana Natalicio, president of the University of Texas at El Paso and a member of the transition advisory team on education for the president. “He has made it clear that all children [are to] be given an opportunity to a good education.”

Bush announced a plan that would, among other things, consolidate numerous federal education programs to give states greater freedom in using federal education funds—in exchange for strengthening accountability demands on states.

“We believe in accountability, but we want to make sure that the accountability proposed gets the results intended, which is to improve schooling,” said Raul González, education policy analyst for the Washington-based National Council of La Raza. “Their focus on closing the achievement gap [between Whites and Blacks and Latinos] is a good thing. That is what the federal role should be in education.”

HO explored several provisions of the Bush education reform package—high stakes testing, the consolidation of federal education funds, and vouchers—that are likely to affect Latino students and have been the most controversial. For this article, The Hispanic Outlook interviewed a number of people about the Bush plan.

“President Bush does for education across the country what they’ve done in Texas and in Houston, we’re headed for a national disaster,” said Walter Haney, a professor of education for the Lynch School of Education at Boston College.

Haney, a senior research associate for the College’s Center for the Study of Testing, wrote an article called “The Myth of the Texas Miracle in Education,” which was released at a January conference sponsored by Achieve and the Harvard Civil Rights Project. In it Haney argues that some of the education reform measures adopted in Texas, particularly the heavy reliance on the standardized test known as the Texas Assessment of Academic Skills (TAAS) to determine Texas’ schools success or failure, “did noth-
scores in Houston rose significantly, and many in the media called it one example of the “miracles” occurring in Texas in education.

“So the Texas story is a sad reminder of what we have seen again and again, namely that when enough pressure is brought to bear on schools, test scores can be increased,” said Haney. “But such increases frequently come at large cost to the broader learning of students, to the meaningfulness of test results themselves, and to the longer-term educational welfare of students who do persist in school to graduate from high schools.”

Linda McNeill, a professor of education at Rice University in Houston, said that because the schools invest a large portion of their funds in buying testing and practice materials and hiring consultants to boost their scores, little is left to address the schools’ other needs. Meanwhile, pervasive problems, such as low teacher morale, inadequate facilities, and a high dropout rate, are being ignored, she said.

“The quality of teaching has declined,” said McNeill. “Latino children have been devastated, decimated by these policies.”

McNeill said the curriculum in some of Texas’ schools has become so “watered down” because of the emphasis on improving TAAS scores that children can read and understand small test passages and multiple choice questions but cannot comprehend an entire book. Students must past the TAAS to graduate from high school regardless of their accomplishments and courses passed, and soon Texas will require that the test’s reading section be used to determine whether a child proceeds from third to fourth grade. Many schools begin practicing and drilling in September for the spring test, she said.

“There’s such a gap between the appearance of quality and the actual, persistent problems,” argued McNeill, who is a co-director of Rice University’s Center for Education. “As you look at the test scores, you need to look at how they’re being produced.”

The Bottom Line

The standardized testing is not the only controversial aspect of the plan. The accountability portion is equally controversial, if not more so.

The Bush plans calls for offering bonuses to states and schools that made the most progress in improving student achievement, and for requiring that schools that do not make enough progress in one year receive aid to improve. If a school fails two years, pupils may choose to attend another public school as corrective action continues. If schools fail to meet standards for three consecutive years, Bush has proposed that those schools be allowed to provide a $1,500 voucher so the students can attend private schools or receive private tutoring—a plan strongly opposed by most Democrats and some Republicans.

“When grown-ups say they are going to do whatever it takes to push scores up...so the politicians get the results they want,” said McNeill. “It’s not a model you want for the country.”

Bush’s proposal would mean a real change for most school systems. While nearly every state has academic standards, many have found it difficult to hold teachers, administrators, and students accountable to them. Moreover, fewer than 20 states now have programs of annual standardized tests.

“It’s a different approach to how we deal with
accountability and the assessment of schools,” said Max Castillo, president of the University of Houston-Downtown, adding that he thought the package was “very comprehensive.” “It will require a total change in the infrastructure of accountability.”

Haney said testing students is fine if it leads to improved learning by children, but attaching “Draconian sanctions” to the test results puts schools and administrators “under tremendous pressure to increase scores.”

Haney said that when he compared dropout data for Texas from 1978 through 1988 with data since the TAAS test began to be administered, 1990/1991, he found that the TAAS exit test is associated with a significant increase in the dropout rate of minority children. Prior to the launch of the test, the dropout rate for minority children tracked closely to the dropout rate for White children in Texas.

“The results clearly suggest the possibility that after 1990, schools in Texas have increasingly been failing students, disproportionately Black and Hispanic students, in grade nine in order to make their grade 10 TAAS scores look better,” said Haney. “The fact that by the end of the 1990s, 25-30 percent of Black and Hispanic students, as compared with only 10 percent of White students, were being failed in grade nine instead of being promoted to grade 10, makes it clear that the apparent diminution in the racial gap in TAAS grade 10 pass rates is in some measure an illusion.”

Natalicio said that Bush's plan “is a wonderful point of departure for conversations at the highest levels for the future of this country” and that the “spotlight that the accountability proposal puts on the schools forces all to pay attention to what is happening in schools.” The president is willing to hear varying opinions on his proposal “to make the best plan possible.” But Haney said that when Bush was on the campaign trail and some of the campaign workers heard about his work, they were highly critical, even though his findings were supported by other researchers.

Natalicio said that the students she sees enrolling at her university are coming better prepared, thanks to the accountability standards implemented in the state. She said fewer students have to enroll in remedial math at UTEP.

But Haney said his research indicates that there were “marked declines” in the numbers of students who are prepared academically for higher education in Texas. He studied the results from 1989 through 1997 of the college readiness testing program in Texas—TASP, the Texas Academic Skills Program. He found that the college readiness of Texas students has “fallen precipitously, at least as measured by the TASP reading, writing, and math tests.” For example, 81,159 members of the high school class of 1998, “all of whom presumably passed the TAAS, took the TASP tests two years later— but 55,350 of them failed,” said Haney.

Indeed, results from 1993 to 1999 on the SAT-M indicate that the learning of Texas students has deteriorated relative to students nationally,” Haney added. “The deterioration of the academic preparation of college-bound youth in Texas during the 1990s tells us that the costs of ill-conceived test-based accountability schemes fall not just on students who ‘fail’ in such a system but also on those who in the short term seem to have succeeded.”

Another element of the Bush proposal would require states to report student assessment results and to break them down by race, gender, and socioeconomic status, something few states do.

“By requiring the data, the schools can't simply mask the results of poor and minority children,” said Natalicio. “It is important to have high expectations for all children.”

Jim Scheurich, an associate professor of educational administration at the University of Texas at Austin, said that requiring such data from schools in Texas has “improved educational equity in the state.” In a study he conducted of four school districts in Texas, he found that the students in each had shown significant improvement in a number of areas.

“When the data came out publicly, the schools began to realize how poorly they were doing with children of color,” said Scheurich. “It made them change what they were doing so they would be successful with all student groups.”

Scheurich said that while he believes from his research that the accountability policies adopted in Texas have had a positive impact on schools, he said it is important not to follow Texas' lead in one area. The national plan should not be so reliant on a single set of test results to praise or condemn a school.

“We're better off looking at a variety of variables,” said Scheurich. “We do want accountability because before accountability, there was a huge percentage of low-income children and children of color who were left to fail.”

While Bush says it would be up to each state to decide which tests to use, he has suggested verifying the results through the National Assessment of Educational Progress (NAEP) exams, a voluntary sampling taken regularly of
students in every state.

But Haney said in his article that when he looked at the results Texas students had on the NAEP, he found that the gains students showed on the NAEP were “less than half the size” of the Texas gains on the state TAAS assessments.

“These results indicate that the dramatic gains on the TAAS during the 1990s are more illusory than real,” said Haney.

Valenzuela, associate professor of curricular instruction and Mexican American Studies at the University of Texas at Austin, said that by relying on one or even two tests to determine a schools success, school leaders, whose jobs are tied to that success, are likely to find ways to boost their scores. That was the case in Texas until 1998, when lawmakers tightened the policies so schools could not keep low-performing children from harming their scores. Still, Valenzuela says there is evidence that schools claim exemptions for many students under the label of special education.

“The schools with higher scores tended to also have higher numbers of exemptions,” said Valenzuela.

“There have to be safeguards,” said Natalicio. “We can’t say that we don’t support an effort to achieve accountability because somebody engages in shenanigans. Most people want to do the right thing. You must limit the number who can be waived or excluded so you can’t marginalize a group of children.”

With the debate raging among testing experts over the viability of Bush’s plan, educators themselves worry whether Bush’s overall package will cost them money—whether for expanding their test programs or by siphoning public funds to help parents pay for private schools.

A clearer picture is expected later this spring of how much Bush’s testing initiative will cost. Bush has asked for an 11 percent increase in federal education spending, which would bring it to $44.5 billion from $39.9 billion, far less than the amount former President Clinton had sought for the fiscal year. Of that, spending on elementary and secondary education would increase to $19.8 billion from $18.2 billion, an 8 percent increase.

Rod Paige told Congress the administration also was exploring possible savings in federal money already devoted to education to carry out Bush’s reform plan. Lawmakers in Washington say Bush’s request is not enough to accomplish his plan. Bush has said his education proposals would cost $47.5 billion over 10 years.

Castillo said the plan would indeed need “significant resources” to be implemented. “You can’t test unless you strengthen the curriculum, teacher preparation, and math and science classes,” said Castillo. “If you prepare your teachers and change the culture, then you have more success.”

The plan calls for streamlining about 50 federal education programs into five categories of grants that the states would receive. While the federal government provides seven percent of the country’s school costs, much of the money is allocated to helping the most impoverished schools and the lowest-achieving of the nation’s 53 million school children.

Bush’s plan would give states more latitude to decide which schools received extra subsidies, but Democrats in Congress insist that states be compelled to steer that money to schools with the greatest share of low-income students.

Latino civil rights groups historically have opposed giving states latitude in using federal education funds because they argue that without certain restrictions or requirements, states might fail to adequately serve minorities and children from low-income families.

“It makes sense to consolidate some of the programs, like teacher training and the technology programs, but there are some programs that should not be consolidated—like migrant education—because the services will disappear,” said González. “If the states haven’t done a good job of closing the achievement gap, they shouldn’t be given flexibility.”

Another element of the Bush proposal that will impact Latino youth who are Limited English Proficient would require that students who have been in school for three years be taught in English. The proposal calls for giving schools more freedom to spend money on bilingual education if they demonstrate progress in English proficiency.

González said that the three years the Limited English Proficient students would be given before they were taught full-time in English would not be supported by civil rights groups because it is an arbitrary time frame not based on any research on the learning of English. “It creates an incentive to teach kids English rather than math or science, which creates other problems,” said González.

Valenzuela, who did in-depth research of the Houston schools for her book Subtractive Schooling: U.S. Mexican Youth and the Politics of Caring, agrees, arguing that such assimilation was adopted by the HISD under Paige and that it negatively impacted Latinos. “Schooling in general takes away your language and culture,” said Valenzuela. “If schooling were additive, bilingualism and biculturalism would be encouraged. The idea is, historically, to Americanize people. I would argue that you can hold onto your culture and language and be a full-fledged American.”

Another controversial aspect of Bush’s plan involves his call for giving vouchers to students in low-performing schools. The idea of vouchers, which would allow parents to use public money to send their children to private schools, has waned in popularity lately. Voters in California and Michigan defeated voucher ballot initiatives in November. A federal appeals court ruled against Cleveland’s voucher program. Opponents of the vouchers say they siphon money from public schools and that low-performing students are not always welcome by private schools. Moreover, Bush’s proposed $1,500 would not be enough to cover many private school tuitions, effectively shutting out low-income families from that option.

“We believe we have insufficient funds now to support our public schools adequately and all we would see vouchers doing is deplete the little dollars that are available for public education and funnel them to nonpublic schools,” said Daniel A. Domenech, school superintendent of Fairfax County, Va., as reported in The Washington Post.

The waning public interest, however, has signaled to Democrats and moderate Republicans that they needn’t pay much attention to supporters of vouchers among conservatives in Congress. Moreover, the politicians argue that by selecting Paige to head the Education Department, Bush offered additional evidence that he did not plan to fight on the voucher issue. Paige showed lukewarm support for vouchers in Houston; he created a limited voucher program but put more emphasis on accountability.

Bush’s official line is still to support vouchers, but he has told Congress that the voucher issue will not be the deal breaker in getting his educational reform package passed.
REUTERS NEWARK

Named #1 in Diversity

University Tuned-In to Cultural Wealth of Newark

BY MARILYN GILROY

Many colleges claim to have a diverse student population, but only one institution can command the top spot in that category in U.S. News & World Report's venerable annual rankings. That spot belongs to Rutgers University-Newark, for the fourth consecutive year, according to the 2001 edition of U.S. News' America's Best Colleges.

In publicizing the rankings, the magazine pointed out that "college-bound students who think that learning from people of different backgrounds is part of the university experience will want to consider student-body diversity when choosing a school."

Rutgers-Newark Provost Norman Samuels agreed and commented, "In an increasingly global world, a multicultural educational atmosphere such as ours is an invaluable resource. We embrace diversity and the richness it brings to our students on campus."

In determining the ranking, U.S. News & World Report factored in the total proportion of minority students—not including international students—and the mix of students. Approximately 13 percent of the student body is Hispanic.

Rutgers-Newark, a doctorate-granting research institution, is one of three campuses of Rutgers, the State University of New Jersey. The campus enrolls 9,300 undergraduate and graduate students and has 425 full-time faculty members. It is located on 35 acres in downtown Newark, New Jersey's largest city.

"This is a campus with students from every ethnic background," said Dr. Steven Diner, dean of the faculty of arts and sciences at Rutgers-Newark. "They reflect the region and the New York area, which has a large number of immigrants."

Diner joined the University three years ago and immediately noticed how easily the students interacted and that the campus seemed free of the social self-segregation of students that occurs at many colleges.

"This is a campus where students are remarkably comfortable with the level of diversity," said Diner. "Our students are of so many different colors that after a while, you don't even think about it. There is an extraordinary ease among the students with each other because no one group has the majority here."
Diner says the diversity lends a special element to classes and makes teaching more interesting. "I taught a course that focused on U.S. immigration, and it was the most wonderful experience because students brought their rich backgrounds and family histories to class," said Diner.

"One of my students had a mother who was Cuban and a father who was from Palestine, which meant there was a lot of talk about politics at home. It is this kind of mixed ancestry that leads to the great ease of interaction in class and on campus."

In addition, says Diner, students at Rutgers-Newark are primarily first-generation working-class students who are highly motivated. "They don't flounder by questioning their identity and purpose like many privileged students do," said Diner.

Rutgers-Newark draws a large part of its student population from the local metropolitan area but has its share of international students as well. The student union has mounted 75 flags representing the backgrounds of students at Rutgers-Newark.

The 5,800 undergraduates and 3,500 graduate students major in business, nursing, criminal justice, law, management, liberal studies, political science, and history, among others. The city of Newark often serves as a springboard for learning and research activities that supplement classroom teaching in many of these programs.

Using the city as a resource and enhancing its relationship with the University is a concept about which Dean Diner is passionate. "I feel strongly about the urban connection that we have," he said. "I came here thinking that the cities are critical to advancing the mission of teaching and research at this institution."

Diner, a former professor of history at George Mason University, joined Rutgers-Newark in 1998 with a wealth of experience in urban policy and planning. One of his first projects at Rutgers-Newark was to assist in the development of the Joseph Corrwall Center for Metropolitan Studies. The Fund for New Jersey gave the Center $24 million, which is being used in part to support applied research on urban policy issues in Newark and northern New Jersey. The goal is to create a nationally recognized center for scholarly research on cities and urban life and to be an authoritative source of analysis of public policy in Newark and the surrounding area.

"I have a lifelong scholarly fascination and personal love for cities," said Diner when the gift was announced. "My entire career has involved linking cities and universities. I like the idea of breaking out of the ivory tower, and I believe that the success of universities in the future will hinge on their ability to maintain interactive relationships with their surrounding communities."

Diner has challenged faculty to develop experiential courses that utilize Newark and neighboring towns. "One of the things we have been able to do is make changes in our style of pedagogy and have our teaching draw on the urban environment," he said.

That philosophy is most notably embodied in the classroom of Professor Clement Alexander Price, who has been at Rutgers-Newark for 30 years and has made optimal use of the city and its environs as a teaching laboratory.

Price is chair of the department of African-American studies, and teaches courses in U.S. urban history and the history of New Jersey. For the last 15 years, he has taught a course on the history of Newark. Students in the class accompany Price on a tour of Newark, a popular component of the course, which Price has adapted to reflect the dramatic changes within the city.

"When I began giving the tour 15 years ago, it focused on the devastation wrought on Newark by the 19th and first half of the 20th century," said Price. "Recently, I'm pleased to say that I've added on the tour the extraordinary changes in the city, such as improved housing for low- and moderate-income families, better land-use policies, and, of course, the New Jersey Performing Arts Center."

In 1996, Price initiated the Rutgers-Newark Institute on Ethnicity, Culture and the Modern Experience, applying his scholarly interest in race and ethnicity to public understanding of American culture.

Price's profound influence as a teacher and his contributions to the University and the community were acknowledged when he was chosen as the 1999 New Jersey Professor of the Year by the Council for Advancement and Support of Education, which works in cooperation with the Carnegie Foundation.

Other Rutgers-Newark faculty have developed research and teaching projects that also focus on urban neighborhoods. Diner says that one faculty member is doing research on race riots in American cities while another, specializing in mathematics education, is studying how students in a local high school that serves lower-income families learn calculus using the computer and SimCalc software.

The drive to link the University with the city's cultural heritage has led to a transformation of the University's classical and modern languages department, which has begun to focus on immigrant languages and heritage language study.

"You have these individuals from diverse backgrounds with various levels of competencies and undergraduates who are notoriously resistant to studying languages," said Diner. "So we thought, why not offer languages
that they are motivated to study because of their background?

"For example, The Ironbound section of Newark is home to one of the largest Portuguese populations in the United States. Many of these students have been brought up in a house that speaks Portuguese, but they don't speak it fluently. So we started offering some courses and Portuguese culture programs."

Diner credits faculty member Asela Laguna-Díaz, a professor of Spanish, with providing the impetus to focus on the Portuguese community. She had been organizing events, such as a Portuguese film festival, and felt the University could benefit from expanding programs and courses in Portuguese Studies.

Through collaboration with Lisbon's Camoes Institute, the new program in Portuguese studies is now a reality. The Institute and Rutgers-Newark each support a full-time instructor of Portuguese language, literature, and culture while Rutgers-Newark also provides office space and clerical space for a Camoes leitor (professor).

Last fall, campus and community members were treated to a rare public appearance by contemporary Portuguese novelist José Saramago, winner of the 1998 Nobel Prize in Literature, who gave a special lecture as part of ceremonies celebrating the new Portuguese studies program.

Building on this success, Diner hopes to offer programs to reach other segments of the population. "We have added faculty who teach Arabic because our Muslim students have expressed interest in the language. We are also considering the expansion of our Asian language courses to include Korean and Mandarin," said Diner.

All of these initiatives are designed to give Rutgers-Newark students new social and intellectual opportunities that will expand their horizons and help them move into the working world. In addition, the University is making headway in luring some of the area's best and brightest to seek admission.

Diner is especially proud of the newly organized Honors College that has recently expanded to a full four-year program with an enrollment of 90 students. It is part of the effort to attract high-achieving students to the urban campus. Rutgers-Newark also created the Provost Scholars program, which awards scholarships to students who are in the top 15 percent of their high school class. Currently, 150 students have taken advantage of this offer, which is worth $10,000 over a four-year period, assuming that the students maintain a 3.2 grade point average and complete at least 30 credits each year.

"I wish we had more scholarships to give to students, particularly those who are willing to serve as mentors to others," said Diner. "They have busy lives and don't always have the time to get involved, so the money would help."

What else is on Diner's wish list?

"I wish we had more dormitories so that our students could have the 24-hour experience of the urban community connection," said Diner. "We will always be a commuter school, but some of our students would benefit from the dorm experience."

Another challenge is to try to make the faculty as diverse as the student body. "The problem is that the pool of African American and Hispanic Ph.Ds is just not as large as it should be," said Diner. "But we are trying to make the faculty as diverse as possible. We have just hired four new faculty; two of them are African American. We are looking for faculty with outstanding research credentials. That is an important part of the work we do, and we want faculty who share that commitment."

The combination of diversity, community connections, and new research initiatives is an approach that seems to be creating positive results for Rutgers-Newark. Enrollment declines of past years have been reversed because, as Diner says, students recognize that this is an exciting place to be.

"We say to students, 'If you want experiential hands-on learning, internships, service learning, and opportunities to be part of a vibrant community, this is the place.'"
While intellectual distinction is important to being selected, the selection committees seek applicants who offer promise of effective service to the world in the decades ahead.

Student Eduardo Peñalver was in the midst of negotiations with Cornell University officials to increase the hiring of Latino faculty and improve recruitment of Latino students when he received word that he was up for the final round of interviews for a prestigious Rhodes Scholarship. Peñalver left the negotiations, did the interview, and returned for another round with University officials.

"The University was in an awkward position because [it] wanted me to get it yet we were negotiating these issues," said Peñalver, a Yale Law School graduate who is now a law clerk for U.S. Supreme Court Justice John Paul Stevens. Peñalver did get the scholarship and spent the next two years studying philosophy and theology at Oxford University in England.

Peñalver is one of several Latinos who have won the oldest and most prestigious academic exchange fellowship in the world. The program is attempting to expand its outreach efforts to get more applicants from universities that traditionally have not produced award recipients.

"We don't have any kind of targets, goals, or quotas," said Elliot Gerson, American secretary of the Rhodes Scholarship Trust, which each year honors 32 young Americans and a number of outstanding students from other countries with a Rhodes Scholarship to study at Oxford University. "We have a record of recognizing extraordinary people from different backgrounds. But we are trying to expand awareness of the scholarship."

Peñalver said he and other former Latino Rhodes Scholars have discussed how to boost the number of Latinos, but he adds that considering the low percentage of Latinos enrolled in college, the program's record with Latinos should not be considered "terrible." In fact, he said, the year he was selected, while he was the only Latino, there were five African Americans out of 32 total Scholars.

"There are fewer Latinos than there could be," said Peñalver. "But, I don't think it's a biased process. There are a lot of people who spend their four years in college gunning
for that Rhodes scholarship. Some of the people I met in college knew what they needed to get and how to get it. They had grown up surrounded by intelligentsia, and they knew how to make themselves academically competitive. Many of us Latinos don’t grow up in that kind of environment.”

The Rhodes scholarship, created from the will of British philanthropist and colonialist Cecil Rhodes, is the oldest international study award available to American scholars. Winners are selected on the basis of high academic achievement, personal integrity, leadership potential, and physical vigor, among other attributes.

“The terms of the will are excellent,” said Terence D. Valenzuela, a Rhodes Scholar in 1973. “The people who meet those terms are good people. Every ethnic background has good people. The program does not shut anybody out of the competition. You do have an edge if you go to a college that has a tradition of sending Scholars. The barrier has been getting into the colleges so you can get into the pool. There are more Latinos, African Americans, and Asians applying today. The group that is applying is more diverse…”

Regional selection committees choose the U.S. Scholars each year from among those nominated by selection committees in each of the 50 states. While nearly every year, a Rhodes Scholar will be selected from an institution that has not formerly supplied a successful applicant, Gerson said, some 297 colleges in the United States have had a Rhodes Scholar since the first U.S. Scholars were elected in 1904.

“We have been successful at leveling the playing field,” said Gerson, adding that the program has seen a significant increase in the past decade in the number of institutions successfully preparing candidates for the rigors of the application process. Gerson said he and his staff meet with college advisors, speak at different conferences, and have set up an extensive website to expand outreach. The office also actively encourages colleges and universities to designate a Rhodes coordinator at their school so that students are made aware of the program.

“We have focused on advisors from less well-known institutions,” Gerson said. However, he added, it is difficult to quantify how many of the organization should take more steps to assure minorities and women are included.

“I have long thought that the American Rhodes Trust and American universities should do more to attract a diverse applicant pool and to select a diverse group of Scholars, both because Rhodes Scholars are supposed to represent the United States in England and because the scholarship is a unique, horizon-broadening opportunity,” said Rodríguez, a Yale Law School graduate who now serves as a law clerk to Judge David S. Tatel, U.S. Court of Appeals for the D.C. Circuit in Washington, and who, for the 2002-2003 term, will clerk for Justice Sandra Day O’Connor on the Supreme Court.

“The fact that Rhodes Scholars come from all over the world, including Africa, the Caribbean, Canada, Australia, and Europe, means that the Rhodes community at Oxford is far more diverse than people might realize. And again, it is that international network that makes the scholarship such a valuable one—all the more reason to be ever-conscious of the extent to which women and minorities in the United States become a part of it.”

Eric Garcetti, a 1993 Rhodes Scholar who was running for a seat on the Los Angeles City Council in April, said that efforts he undertook to organize previous Latino Rhodes Scholars to help push for the recruitment of Latinos did not have much success because there is usually only one Latino Scholar per year. But he said that once his campaign is over, he will launch an effort again. Garcetti is no stranger to
political activism; during his Oxford stint, he organized a three-day fast of Rhodes Scholars to protest the passage in California of Proposition 187, the anti-affirmative action legislation.

"I look forward to a day when a Latino arrives at Oxford and can get together with other Latinos and just kick back together," said Garcia. "This program is important to the community because, for better or worse, it is aligned to access power in this country. It is important that Latinos enter the traditional quarters of power."

While intellectual distinction is important to being selected, the selection committees seek applicants who offer promise of effective service to the world in the decades ahead. Talented students with diverse academic specializations and career plans are encouraged to apply. However, the applicant's undergraduate program must provide a sufficient basis for further study at Oxford in the proposed field.

Valenzuela recalls with fondness his time as a Rhodes Scholar, saying that his time spent at Oxford in 1973 was profound. It helped lead him to his current profession as a physician and professor of emergency medicine at the University of Arizona Health Sciences Center in Tucson. "It was a delightful interlude," said Valenzuela, Arizona secretary for the Rhodes Trust, which means he organizes the selection process for candidates from his state. "It was a time to think about where I had come from and where I wanted to go."

Valenzuela was studying at Harvard University and was captain of the fencing team when he was selected for the scholarship. He studied biochemistry while in England. "The scholarship opened a lot of doors," said Valenzuela. "People make certain assumptions about your credibility. The name has a certain cachet."

The Road to Rhodes

Rhodes Scholars are appointed for two years of study at the University of Oxford, with the possibility of renewal for a third year. All education costs, such as tuition, laboratory, and certain other fees, are paid by the program. Each Scholar also receives a maintenance allowance to cover expenses for term-time and vacations. The Rhodes Trustees cover the necessary costs of travel to and from Oxford, and upon application, may approve additional grants for research purposes or study-related travel.

The Rhodes scholarships owe their origin to the remarkable vision expressed in the will of Cecil Rhodes, who dreamed of improving the world through the diffusion of leaders motivated to serve their contemporaries, trained in the contemplative life of the mind, and broadened by their acquaintance with one another and by their exposure to cultures different from their own. He also wanted students to benefit from the individualized instruction of his alma mater—Oxford.

Rhodes named nine beneficiary countries in his will, and since 1904, other countries have been added to the list. In 1975, the scope of the Rhodes scholarships was further extended when legal changes in the United Kingdom permitted the Rhodes Trustees to open the competition to women.

The United States provides the largest of the national delegations, but the American contingent forms only a minority of the total. Rhodes Scholars are selected from Australia, Bangladesh, Bermuda, Canada, the Commonwealth Caribbean, Germany, Hong Kong, India, Jamaica, Kenya, Malaysia, New Zealand, Pakistan, Singapore, South Africa, Uganda, Zambia, and Zimbabwe.

The countries of the Commonwealth Caribbean are Anguilla, Antigua, Bahamas, Barbados, Belize, British Virgin Islands, Cayman Islands, Dominica, Granada, Guyana, Jamaica, Montserrat, St. Kitts-Nevis, St. Lucia, St. Vincent, Trinidad, and Tobago.

In a typical term, some 250 Rhodes Scholars are in residence at Oxford. So far, there have been 2,916 U.S. Scholars.

Though the structure of the Rhodes scholarships has been modified somewhat over the years, the founder's basic purposes have been maintained. Rhodes wanted the administrators of his will to seek out those qualities of excellence in young people that would contribute to "the world's fight." He specifically directed that no candidate be disqualified due to race or religion.

Rhodes wished his Scholars to benefit from education at Oxford and to return, enriched by their experience, to positive careers in their home countries, without losing the affection for the University of Oxford and for the United Kingdom, which he believed that experience would nurture. The scholarships are seen as long-term investments in the growth of promising young people and in the encouragement of ever-closer international relations.

Rhodes set forth in his will the criteria, which still guide Committees of Selection in their assessment of applicants. The standards by which prospective Rhodes Scholars are to be judged are: literary and scholastic attainments; energy to use one's talents to the full, as exemplified by fondness for and success in sports; truth, courage, devotion to duty, sympathy for and protection of the weak, kindliness, unselfishness and fellowship; and moral force of character and instincts to lead and to take an interest in one's fellow beings.

Selection committees in each of the 50 states select the 32 U.S. students who best satisfy these multiple criteria. The committees consider applications from applicants who maintain their legal residence within that state or have attended a college or university in the state for at least two years. Each state committee nominates applicants to appear before a district committee of selection. Each of the eight district committees [each] designates four applicants as Rhodes Scholars-elect. The state and district committees of selection meet annually in early December.

The committees are structured to bring a variety of perspectives to the evaluation process. Typically, some selectors are from academic life, and others, from law, government service, business, medicine, or journalism. At least one member will be a scientist. Some committee members have been Rhodes Scholars, but at least one, and always the chairperson, is not to be a Rhodes Scholar.

After the Rhodes Scholars-elect have been named, the Warden of Rhodes House in Oxford seeks places for them at the University's colleges. Because Oxford's 39 colleges make their own decisions on admissions, election to a Rhodes scholarship does not automatically guarantee entry to Oxford. Applicants must submit two recent samples of written work, about 2,000 words each. Rhodes Scholars enter Oxford University in October of the year following election. The academic year in Oxford is divided into three terms that are eight weeks long. Terms are interrupted by six-weeks vacations in mid-winter and spring and by the "long vacation," which extends from late June to early October.

Scholars are required to be full-time students at Oxford for the duration of their degree programs. Students live in college dorms. The student common rooms in the colleges enrich student life through varied activities ranging from debating societies to dramatic and musical groups, and they promote a wide range of athletic competitions. Most colleges have sports grounds nearby that provide tennis courts and playing fields for soccer, rugby, cricket, and field hockey. College boat houses on the Thames River support major rowing competitions among the colleges.

The first college of the University of Oxford was founded in 1249 as a residence for Scholars attending the lectures of the learned men who had been gathering there for several decades.

"It's great fun to live in a place where history is so prevalent," said Valenzuela.

Peñalver said Latinos who are interested in

44 HISPANIC OUTLOOK 05/07/2001 1376
applying should commit themselves to an activity they love. "That's the one thing many of the Rhodes Scholars had in common--so if you love campus politics, do that, and if you love sports, do that," said Peñalver. "The Scholars excelled at what they loved to do and pursued it with passion, so they had stories to tell."

Because Rhodes Scholars are selected for their potential over a lifetime, their physical fitness is an important factor in their selection. Candidates do not have to show evidence of outstanding achievement in organized sports, but they must demonstrate the physical vigor to make an effective contribution to the world around them, Gerson said. Moreover, American and other foreign students who participate in sports played in the English amateur tradition garner additional benefits from their Oxford experience, he said.

"Getting to know Brit, in particular, was a challenge because of their comparative reserve, but through my department and the college sports teams I joined, I eventually felt a part of British student life," said Rodriguez.

The system of education at Oxford has two characteristics that significantly differentiate its program from those offered by American universities and colleges. Students are taught in small sessions by a tutor or tutors. This requires that the student prepare one or two essays each week, which the student reads to the tutor, who will then discuss the essay to probe and refine the student's understanding of the assigned topic. Then the students undergo exams by independent examiners, not their tutors. Students also are invited to voluntarily attend a wide array of lectures given by resident and visiting scholars.

"When you attend a school that has had other Rhodes Scholars, then you see that they are not much better than you and that you can do this too," said Valenzuela. "My fear is that really good candidates will say, 'I could never do that.'"

It is a sentiment echoed by Garzetti, who said that all of the minority Scholars he has met indicated that "none of them thought of themselves as Rhodes Scholars. We need to ingrain in the culture of all minorities that we can aspire to the highest things," said Garzetti.

Rhodes Scholars must have completed a bachelor's degree before being admitted to the University of Oxford. Most Rhodes Scholars pursue and complete either a Bachelor of Arts degree with honors or a Master of Philosophy degree during their two-year stint at Oxford. Applicants for the master's degree must have a substantial undergraduate background in their proposed area of study.

In the United States, applicants for Rhodes scholarships must be U.S. citizens aged 18 or over but not yet 24 years of age on October 1 in the year of application. For more information on the application process, see www.rhodes scholar.org. Applicants must submit their applications by the October deadline to the secretaries of their state committees. An applicant must submit several documents, including a birth certificate, an academic transcript, up to eight letters of recommendation, a letter of endorsement from the student's college or university, and a 1,000-word essay on the student's reasons for wishing to study at Oxford.

Applicants must also undergo a mandatory personal interview. No applicant can be elected to a Rhodes scholarship without being interviewed by state and district committees of selection. Applicants must pay their own expenses to appear before the state committees. The Rhodes Trust will pay the transportation costs (but not hotel expenses) of candidates who are nominated by state committees to the district committees of selection.
Overhauling the Neglected Profession of Teaching

ACE Report Puts Ball in Presidents’ Court

BY ISIS ARZTE

The quality of teachers is believed to be the single most important factor in student achievement. Its importance is upheld by decades of extensive research. But, despite the research findings, a great many teachers at elementary and high schools across America are significantly underqualified. The increasing demand and continuous shortage of instructors exacerbates this calamity, forcing many schools to hire these substandard teachers.

The situation is especially dire for minority students and those who live in high-poverty schools. ACE cites one study that found 70 percent of the 7th through 12th graders in high-poverty schools were being taught by unqualified teachers.

In response to these alarming statistics, ACE proposes a solution, or at least a substantial first step toward one, in its report, "To Touch the Future: Transforming the Way Teachers Are Taught." In its nearly 40 pages, the group challenges college and university presidents to take action.

The document identifies two essential "transformations" that must take place. First, "the teaching of teachers must improve," and secondly, "the schools themselves and the conditions for teaching must change in fundamental ways to attract, retain, and empower productive teachers."

Why does ACE specifically address college presidents? "Ultimately, it is [they] who outline the agenda, define the issues, commission studies, recommend policies, set institutional priorities, call for action, and form alliances with groups beyond the campus," states the report.

And also because it is colleges and universities that produce the vast majority of teachers, says Betty Castor, president of the National Board for Professional Teaching Standards (NBPTS), a former president of the University of South Florida and a member of the ACE presidents task force on teacher education.

To Castor, the condition of America's K-12 school system is vividly illustrated by the stark contrast between the K-12 reputation and that of higher education in the U.S. "Generally, throughout the world, the university system is considered the best and is well respected," Castor says. "Why can't they do a better job in K-12?" she asks.

Ideally, if decision-makers heed the advice outlined by ACE in its ten-step "action agenda," our country's children can look forward to receiving the excellent education they deserve.

The ACE 10-Step

Step One - "College and university presidents must take the lead in moving the education of teachers to the center of the institutional agendas."

This advice might, at first, seem somewhat vague and obvious. But actually, it is the most important of the ten. The quality of teachers and of teacher education has deteriorated largely because the subject has been ignored. Thus ACE tells authority figures in higher education "to accept the challenge and responsibility to lead constructive change."

Calvin M. Frazier, senior consultant, Education Commission of the States, says he was...
once guilty of neglecting the education of teachers. As the Colorado commissioner of education through much of the 1970s and 1980s, I gave minimal attention to the preparation of educators," he writes, in his report, "Quality Control and Quality Assurance Issues." 

"I met regularly with the deans of education, felt fairly knowledgeable about the Colorado programs, but didn’t assume a major responsibility for teacher education," he admits. "That I left to higher education leaders." Frazier adds, "I was not unlike state superintendents and commissioners across the country who left the licensing and certification responsibilities to the Department of Education."

A progression of passive attitudes such as his was ultimately responsible for today’s crisis.

José A. Vicente, president of the InterAmerican campus of Miami-Dade Community College (M-DCC), says he and his fellow administrators "are not complacent, and want to play an active role in elevating the profession." To this end, three years ago, they established the first school of education in a community college system in the nation, based on the InterAmerican campus, where 96 percent of the students are of Hispanic origin.

“Our goal is to give prospective teachers a quality foundation in the first two years and provide them with early exposure in the field,” he says.

**Step Two** - “Presidents need to clarify and articulate the strategic connection of teacher education to the mission of the institution.”

This “action step” asks college presidents to stand back and evaluate how the school of education works within the institution’s overall goals. ACE goes so far as to say that if presidents discover that the “teacher education programs operate at the periphery of the institution’s strategic interests and directions, they should be moved to the center— or moved out.”

Castor says, “While I was at the University of South Florida, one way we showed initiative was by starting a charter school in K-12, with the highest-risk students.” Strides such as this vividly demonstrate a college’s commitment to its education program.

**Step Three** - “Presidents should mandate a campus-wide review of the quality of their institution’s teacher education programs.”

Successful teaching programs, says ACE, share the following characteristics: “a common vision of what good teaching actually is, well-defined standards of practice and performance, a rigorous core curriculum, extensive use of problem-based methods such as case studies and portfolio evaluation, and strong relationship between the teacher education program and reform-minded schools”

The report acknowledges that a command of subject matter is necessary, but argues that, alone, it is insufficient. "Knowledge that is specific to the profession of teaching pedagogical methods, curriculum design, adolescent development, student cognition and learning, and classroom management skills also must be mastered," it states.

Given these criteria, the group advises colleges to appraise their existing programs, including the academic content obtained by teachers-to-be, the quality of students admitted to the program, how to teach literacy in their own content area,” Berry advises. They should also be able to communicate and work together with parents and families, he says.

**Step Four** - “Presidents and governing boards should commission rigorous periodic, public, independent appraisals of the quality of their institutions’ teacher education programs.”

Of the nearly 1,200 higher education institutions that offer programs for the education of prospective teachers, fewer than half are accredited by a national accreditation organization, ACE reveals. If presidents employ a third-party assessment of their teaching programs, ACE suggests, they will not only validate their own program but encourage public confidence.

Castor commends the work of the National Council for Accreditation of Teacher Education (NCATE), and says its judgment is well respected by schools.

In his report, Frazier mentions a new assessment group, the Teacher Education Accreditation Council (TEAC), organized by the Council of Independent Colleges. TEAC, he writes, “has a more institutional focus and proposes to streamline the accreditation process while recognizing the institutional missions and states’ expectations for teacher education programs.”

**Step Five** - “Presidents must require that education faculty and courses are coordinated with arts and science faculty and courses.”

ACE notes that faculties and programs often become isolated behind departmental lines and proposes that “arts and sciences faculty and courses work in conjunction with the education faculty and courses.” In this way, the preparation of instructors would not be an isolated area, but an institution-wide incentive.

**Step Six** - “Presidents should ensure that their teacher education programs have the equipment, facilities, and personnel necessary to educate future teachers in the uses of technology.”

ACE research indicates that “teachers are inadequately prepared to apply technology to teaching.”

Berry says that teachers often can use technology to bridge the gap due to economic disparities. For instance, if a student from a poor family has never been to a beach, and a particular lesson
involves the beach, the students who have been there are at an obvious advantage. But with a computer, any child can take a cyber-trip to the beach.

ACE mentions that presidents must ensure not only that the necessary materials are available, but that teachers are taught how to best employ these resources. "The federal government too should spend just as much on equipping teachers to use technology as it does to buy the hardware," it adds.

Since its facility is so new, M-DCC's InterAmerican campus made a point of including not only state-of-the-art technology but technology classrooms in which prospective teachers are taught how to create CD's, use audio visual equipment, and much more, says Vicente. Also, Technology and Teaching is one of three required courses in the education program, along with Introduction to Education and Teaching Diverse Populations.

**Step Eight** - "College and university leaders should strengthen inter-institutional transfer and recruitment processes."

More than one-fifth of those who will become practicing teachers start out at community colleges, ACE reports. It is thus vital that the transition between one institution to the next is as smooth as possible.

Community colleges are also pools of potential teachers, in the sense that they enroll a large proportion of minority students than do four-year institutions and are also an entry point for mid-career adults. "Clearer pathways can encourage both mid-career adults and minority students to pursue careers as teachers," ACE suggests. "Establishing functional relationships with other colleges and universities and developing clearer pathways to degree completion are two good ways of expanding the numbers entering teaching careers," it concludes.

That said, M-DCC's program is noteworthy on two points. First, the College has an agreement with Florida State schools, Florida International University, and Barry College, to ensure an easy transition into their schools. A more complex agreement with Barry allows M-DCC's students to complete their entire four-year teacher education at M-DCC's campus. Secondly, the Community College has an alternative teaching certification program, which encourages students in other disciplines to consider a career in teaching.

**Step Nine** - "Presidents should ensure that graduates of their teacher education programs are supported, monitored, and mentored."

ACE writes that, each year, thousands of fully prepared young teachers leave their classrooms to pursue other options. "At best, five years after graduation, only half of these teachers will remain in teaching, according to patterns observed in 1994," it adds.

As proof of the positive influence of mentoring systems, ACE mentions an "induction" program in California "where time was set aside for interaction between a beginning teacher and a mentor, where in-service training was tailored to beginning teachers, and where mentor skills were carefully developed." The result: teacher attrition was reduced by two-thirds.

Castor says that systems such as those are common in Japan. "In the Japanese system, new teachers are never isolated," she says; "they work in a team."

**Step Ten** - "Presidents should speak out on issues associated with teachers and teaching and should join with other opinion leaders to shape public policy."

Here, ACE states the obvious, namely that "current mechanisms of academic quality control in colleges and universities, in schools and school systems, and in state law and regulations fall short of ensuring that only qualified teachers teach."

Public policy should therefore strive to reform the system itself, given that "a school environment that does not foster and reward excellence will not attract or retain the best teachers," ACE argues.

Vicente strongly agrees with the need for reform, and says he is currently "attempting to educate decision-makers, inform them of the concerns and of the disparity in funding."

As ACE suggests by the title of its plea for change, taking action today gives college and university presidents a chance "to touch the future."
Merging Latin American and Latino Studies

UMass in Public-Private Tri-State Partnership

BY JOE BECK

Carmen Diana Deere is an extraordinary matchmaker. As director of the Center for Latin American, Caribbean and Latino Studies, at the University of Massachusetts, she tirelessly merges the natural interests of many faculty members with student demands.

Program director since 1992, she essentially linked Latino Studies with Latin American Studies on the campus, a move she says only two other schools in the country had done at that time—State University of New York-Albany and University of California at Santa Cruz. “Coming from what was originally called African American Studies in the ’70s,” Deere commented, “was a growing Latino population in the late ’80s. There was an increasing demand for courses, particularly on our campus, for these students.”

The demand for such programs and academic changes seemed natural to Deere. “The integration of Latin American and Latino Studies as a whole seemed to be a natural response to what we were hearing from our students and the faculty itself. Since a large percentage of our faculty is Latino, and our enrollment is comprised of more people from Latin America, the interest from both parties facilitated the transition very nicely,” she said.

Deere said that when she became director, first- and second-generation Latino populations were enrolling in schools “and we looked around for models, for schools that were successful at this approach,” she said.

The UMass interest apparently spawned a wave of similar models that eventually led to the formation of the Latin American Studies Association, of which Dr. Deere is president.

“My position as president helped me get a clear view of the future, and we have since served as models to help other schools with their transitions,” she said.

The main goal of the Center for Latin American, Caribbean and Latino Studies (CLACLS) is to promote interdisciplinary research and education and integrate international area studies with the study of multiculturalism. The Center represents the natural evolution of the UMass Latin American Studies Program over three decades.

LASCNE

The Latin American Studies Program is a Department of

Gloria I. Bernabe-Ramos (left), associate director; and Carmen Diana Deere (right), director of the Center for Latin American, Caribbean and Latino Studies professor of economics at the University of Massachusetts-Amherst.
Education Title VI National Resource Center in area studies, the only such program in the UMass system, through its participation, since 1988, in LASCNE, the Latin American Studies Consortium of New England. The National Resource Center mandate is to promote effective teaching, research, and public outreach in area studies. The Latin American Studies Executive Committee administers the program and advises interested students. The program is designed to respond to many contemporary realities.

According to program literature, “The economic integration of the Americas has increasingly linked the welfare of North Americans, particularly Latinos/as, to those of the peoples of Latin America and the Caribbean. It is increasingly impossible to analyze the well-being of the Latino/a communities in the U.S. without taking into account economic development policies in Latin America as well as a U.S. foreign policy toward the region.”

“The pace of contact and integration,” it continues, “has tended to outstrip the ability of traditional humanities and social science disciplines at U.S. universities to address pressing issues of cultural diversity and hemispheric integration in the curriculum.”

LASCNE maintains that integration of Latino/a and Latin American Studies is one of the best ways to promote multiculturalism.

Center activities include a speakers series and film and research workshops at which faculty and graduate students present preliminary research findings, and annual or biennial conferences on Latin American or Latino/a themes.

Collaborative ventures, carried out with other centers and agencies, include workshops for K-12 teachers in western Massachusetts, and Consortium projects, such as the sharing of visiting faculty and speakers, faculty/student exchanges, joint library acquisitions, a working papers series, scholarly conferences and colloquia, and public outreach programs.

The Center administers a Title VI Foreign Language and Area Studies Fellowship competition for graduate students. It engages in external fundraising, particularly special activities in support of curriculum development, research travel to the Caribbean and Latin America, and in helping to establish research linkages with Caribbean and Latin American institutions.

The Consortium unites the Latin American Studies programs of the University of Massachusetts, University of Connecticut (UConn), Brown University, and Yale University in “a public-private tri-state partnership to expand and improve teaching and research on Latin America and the Caribbean in the greater New England region.”

Connecticut, Brown, and Yale offer B.A. degrees in Latin American Studies, while Massachusetts offers an undergraduate certificate and a minor. UConn offers an M.A. in Latin American Studies, and a master’s level at the other schools is available through discipline-based programs. Doctoral study is available at each partner school.

Each campus provides instruction in Spanish and Portuguese. A comprehensive roster of courses covering all of Latin America and the Caribbean is available to Latin Americanist students at LASCNE institutions through cooperative agreements regarding course enrollment and faculty exchanges. An agreement among the libraries provides access and borrowing privileges for LASCNE students, faculty, and visiting scholars, offering some 800,000 volumes and nearly 5,000 serials covering all aspects of the region.

Faculty, which number approximately 130, include some of today’s most distinguished scholars of Latin America and the Caribbean as well as those working in professional programs such as business, law, forestry and environmental studies, health and medicine, and regional planning. As active researchers, faculty also help connect students to research and study opportunities throughout the region.

LASCNE facilitates learning about the region by the public through outreach programs for K-postsecondary educators, the business community, and the general public, and by sharing expertise with the media. Outreach programs extend the range and impact of faculty, students, and resources to thousands of people yearly.

3,032 Latinos Reveal What They Value in Their Leaders

BY ISIS ARTZE

Two developments will substantially change the face of America's leadership in the coming years. One, those at the helm will be leading a more culturally and ethnically diverse group of people; and two, leaders will increasingly come from the Latino community. This will occur in our country's government and in the private sector.

With that in mind, the National Community for Latino Leadership, Inc., presents “Reflecting an American Vista: The Character and Impact of Latino Leadership.” In this report, the group releases the findings of its survey of 3,032 Latinos from California, Florida, New York, Illinois, and Texas, which inquired about their values, views, and attitudes with regard to what constitutes meaningful and effective leadership.

New Jersey Congressman Robert Menéndez says NCLL's research is of great worth. "It is always helpful to gain insight as to what the community wants," he says. "It’s easy to lose sight of what people want from their leaders," he adds, "so introspection is always valuable."

During his 27 years in leadership positions, says Menéndez, he has tried to maintain a sense of his constituents' needs, and his many positions attest to his efficacy. He was the first Latino elected as a mayor in the state of New Jersey and, more recently, vice chair of the Democratic Caucus, making him the fourth highest-ranking Democrat in the House of Representatives and, HO is told, the first Hispanic ever elected to such a leadership position in Congress.

NCLL's report comes on the heels of the first presidential election in which candidates dedicated substantial effort to securing the Latino vote—a wise decision, given the Latino turnout.

An estimated 7 million Latinos—nearly 7 percent of all voters—participated on Election Day. This marked a significant increase over 1996, when only 4 percent of those voting were Hispanic. Also, the percentage of eligible Latinos who voted, 71, was far greater than the national average of 51 percent.

"Bush certainly made an effort to appeal to the Latino community by embracing family values and talking that up," says Albert Moreno, senior vice president and general counsel of Levi Strauss & Co., and a board member of the National Association of Latino Elected Officials (NALEO) educational fund.

"The focal point of el pueblo (people and community) resonates throughout much of the survey," NCLL reports, explaining that "this points to a cultural framework that places more emphasis on family and community than it does on the individual."

More than a third of Latino respondents, 38 percent, mentioned a family member as the person they most admired, says NCLL. In contrast, surveys conducted by Gallup and other pollsters find that only 20 to 24 percent of the general population mention a relative or friend as the individual they most admire.

Nevertheless, reveals NCLL, it takes much more than talk of family and community to entice Hispanics, and the report proceeds to outline in more concrete terms what Latinos expect from their leaders.
The findings are condensed to what NCLL calls “The Four C’s of Latino Leadership.” Latinos want leaders to: “exhibit character in their public dealings and private lives (58.9 percent); demonstrate competence (11.8 percent); express compassion in their exercise of leadership (96 percent); and practice community servanthood (92 percent),” it reports.

Says Menéndez, “I expect leaders to lead by example,” echoing the respondents’ demand for leaders who demonstrate character.

“The primacy of honesty and integrity, along with the emphasis of a leader being spiritual, ethical, possessing strong moral values, and being a good person, attests to character,” according to the report, which describes this quality as existing on two levels: “The public dimension of character demands that leaders keep their word and deliver on their promises—que sea un cumplidor—one who does what he says he is going to do,” wrote one respondent.

The second, the personal dimension, requires that leaders live in an ethical and spiritual manner. “With 8.5 percent of the respondents citing strong moral values, spirituality, or being a good person as their most desirable quality,” says NCLL, “this dimension of personal character was one of the most valued qualities.”

The Honorable Sylvia García, city controller of Houston, Texas, agrees. “I think the public does look for honesty, integrity, and commitment,” attributes she says she has striven to demonstrate during her career.

Moreno adds that constituents want to know a leader’s “core values.” While “these do not have to be 100 percent in agreement,” he says, “there should be substantial overlap [of the leader’s values and those of the followers].”

Of the second leadership “C”—competence—Menéndez says he expects leaders to be able to develop a plan to realize their vision. What good is a vision if the individual in charge lacks the intellectual means to make it a reality?

In selecting these two qualities, character and competence, Latinos surveyed reflected the views of the general population. In selecting the other two qualities, they diverge from mainstream perspectives. “Latinos differed from non-Latino citizens by placing a prime emphasis on compassion, caring, respect, and community servanthood as qualities they want to see in their leaders,” reports NCLL.

Moreno believes that “to the extent that there are differences in what Hispanics look for, they're not significant.” He says that universal qualities such as “a vision of the future and the ability to articulate it...

with a strategy, as well as the ability to communicate the vision and strategy in an inspirational way" are more substantial than any subtle distinctions between the Latino viewpoint and that of non-Latinos. However, Moreno concedes, there might be differences based on "what values get weighed as more important."

"Some might emphasize respect; others, compassion; and others, honesty or courage. My guess," he says, "is that the area with greater weight, for Hispanics, is compassion, especially when thought of in connection with one's family, but compassion is a value that all citizens value."

NCLLs report upholds Moreno's assumption. "[Leaders] should also be compassionate, loving, and kind. Latinos also want leaders to be humble, sincere, and sensitive to those whom they purport to lead."

Other criteria discerned by NCLLs poll are that leaders be "unselfish and empathetic toward others;"

García says she is not at all surprised by this finding. "We've always had a very strong sense of compassion," he says, "because of our pride, our work ethic, because of who we are and where we came from."

Menéndez agrees. "I think our community's nature is compassionate," he says; "it's a sense of familía, in the largest sense of the word, not only in the blood sense, and this extends to those less fortunate than us. It's deep within our roots, culturally, religiously, and as part of our civic obligation."

One final leadership characteristic reported by NCLL is community servanthood. "Latinos expect leaders to be community servants," says the report, quoting one respondent who said, "que ayuda a la gente." In other words, a leader should help the people and general community.

García considers this a crucial point. "It's important that anybody who wants to assume a leadership role always have a sense of community," she says, "because without a community, we couldn't be leaders."

She adds that in her personal life, she maintained a solid work ethic, a commitment to her community, as well as honesty, integrity, and professionalism. "My parents laid down this foundation for me," García says, "and these traits have served me well from the time I was class president in high school to my leadership position in college, to the one I now hold."

Menéndez, too, thinks community servanthood is a "must" leadership trait. "I expect leaders to have a vision that encompasses the hopes and aspirations of the people they seek to lead," he says.

A leader, he continues, is "someone who has a vision of where the community should be and serves as its advocate in public forums."

Another NCLL conclusion is that within the Latino community, there was a striking consensus on views and values toward leaders. "The study found no significant differences between Latino subgroups, between young adults and seniors, citizens or non-citizens, or between Latinos and Latinas in the qualities they deemed important for leaders to possess."

Last year, more Hispanic politicians were elected to state and local offices than ever before. Nevertheless, Latinos still play a relatively modest role in national political life, with only 19 Latinos among the 435 members of the U.S. House of Representatives.

The Latino population is growing faster than any ethnic group in the U.S., but our political representation has not maintained the same growth. NCLLs report might help us move one step closer to achieving equity in our country's leadership.
Eleven Groups Form Diversity Pipeline Alliance, the Nation's First Unified Effort to Attract Minorities to Business Careers

WASHINGTON, D.C.

A group of leading organizations has banded together to form a new coalition, the Diversity Pipeline Alliance, to address the problem of minority underrepresentation in business and management education.

"Business is a career and educational choice rich with opportunity for young African Americans, Hispanic Americans, and Native Americans. Minority students need to hear that message—and to know that higher education and business want to see them in the classroom and the executive suite," said Nicole M. Chestang, executive vice president and secretary of the Graduate Management Admission Council, lead sponsor of the effort. "By bringing together all of the dedicated organizations already working toward that goal, the Diversity Pipeline Alliance can tell that story with one voice, more effectively and powerfully than ever before."

The Diversity Pipeline Alliance will prepare and release a comprehensive report on the status of minority participation in business education. The Alliance will conduct an aggressive marketing campaign to show minorities aged 12 to 24 how studying business can open exciting career opportunities. The campaign will aim to identify and debunk myths or misperceptions that might now be dissuading minority students from studying business. It will also show how studying business can bring career success in the professional, nonprofit, and government sectors.

The Diversity Pipeline Alliance, an initiative of the Graduate Management Admission Council, was formed in response to increased demand for a diverse workforce—a demand that creates pressure on institutions to diversify classrooms. The Alliance was founded by II of the nation's most prominent academic institutions, foundations, and nonprofit organizations committed to increasing interest in management education and careers among students of color. They are Citigroup Foundation, Consortium for Graduate Study in Management, Graduate Management Admission Council, KPMG Foundation, Leadership Education and Development, Management Leadership for Tomorrow, National Black MBA Association, Inc. (including Leaders of Tomorrow), National Society of Hispanic MBAs, The PhD Project, The Robert A. Toigo Foundation, and Sponsors for Educational Opportunity.

College Board Rebuts UC System Proposal to Discontinue Use of SAT I

NEW YORK, N.Y.

The College Board, in response to the University of California (UC) System's proposal to no longer require the SAT I in the UC admissions process, offered the following statement by College Board President Gaston Caperton:

"... The University of California's colleges and universities are some of the most competitive in the country. The great desirability of UC schools makes the admissions process very challenging. Currently, the UC System, which uses multiple criteria including the SAT I and SAT II, has one of the fairest and most effective admissions processes in the country."

"... Dropping the SAT makes no more sense than dropping classroom grades. Neither the SAT nor classroom grades are perfect measures of a student's readiness for college. But, when professional admissions officers use the SAT and classroom grades in combination with extracurricular activities, personal essays, and recommendations, they have a powerful set of tools."

"The SAT now provides a national standard and encourages high achievement. The SAT is a common yardstick in an era of grade inflation, and where students complete different courses with different teachers using different grading systems."

"It is true that some groups of students do not perform as well as other groups on standardized tests, including the SAT. As do all high-quality assessments, the SAT scores reflect unfairness in our educational system. It is urgent that we focus our energy on raising standards for everyone, rather than on eliminating tools that help reveal unequal educational opportunities."

"Today, the SAT is used by nearly 90 percent of four-year colleges, because it is an excellent, reliable, and valid test. For 75 years, the SAT has continued to help students, families, and colleges manage the admissions process. To eliminate an extremely useful piece of information in the process is not fair to anyone."
NCLR Says Hispanic Child Outcomes Continue to Be Pressing Issues for the Nation

WASHINGTON, D.C.

Data released by the U.S. Census Bureau about the nation's Hispanic population underscore the need for President Bush and Congress to make the right choices about the nation's budget priorities, especially with respect to children and education—this according to Raúl Yzaguirre, president of the National Council of La Raza (NCLR).

Yzaguirre, speaking on behalf of NCLR, issued the following statement:

"According to the report, more than one-third of Latinos are under 18 years of age. Other data show that they represent the second largest group of students in the nation's schools. However, Latino children are underrepresented in Head Start, early childhood development programs, after-school programs, and rigorous academic courses. Taken together, this suggests that President Bush's calls for tax cuts should be balanced with investments in the nation's education of its children. If we equip Latino and all children with high-quality education and ensure their well-being, we will have a tremendous pool of talent ready to lead the nation forward, and every American will benefit.

"Educational investments are especially important, because Census data show that educational disparities between Latinos and other Americans continue to be striking, especially at a time when employers and the economy demand workers with high skill levels. In 2000, 57 percent of Hispanics 25 years old and over had graduated from high school, compared to 88 percent of non-Hispanic Whites in the same age category. More than one-fourth (27.3 percent) of Hispanics had less than a ninth grade education; in contrast, only 4.2 percent of non-Hispanic Whites were at this education level. Only one in 10 Hispanics (10.6 percent), compared to almost three in 10 non-Hispanic Whites (28.1 percent), had a college degree. As a nation, we have the resources to close these gaps. We know what works, and we can do better. NCLR believes we must do better, especially since, in about 20 years, one in four children in the United States will be Hispanic. A large share of our nation's future economic growth will depend on the millions of Hispanic children in our school system, on the opportunities we give them, and on the priorities we set for ourselves today...."

ACE Reports on Data that Show Male Faculty and Faculty at Four-Year Institutions Continue to Earn More than Other College Faculty Members

WASHINGTON, D.C.

The average salaries for all full-time instructional faculty on 9- and 10-month contracts in 1998-99 ranged from a high of $71,322 for professors to a low of $33,819 for instructors, according to data released by the National Center for Education Statistics. The American Council on Education recently reported on the following data findings:

- The average salary for all professors on a 9- or 10-month contract in 1998-99 was $71,322, and for associate professors, $52,576. Assistant professors on average earned $43,348, while instructors were paid $33,819 annually, and lecturers, $36,819.
- Women faculty continued to earn less than their male counterparts. Among professors, men on average earned about $9,000 more annually than women professors, while among instructors, the salary difference between the sexes was less than $1,600.
- As expected, most faculty at four-year degree-granting institutions earned higher salaries than those at two-year colleges. However, instructors and lecturers at two-year schools on average earned more than their counterparts at four-year institutions in 1998-99.
- An instructor at a two-year college on average earned $36,472 in 1998-99, while an instructor at a four-year institution earned $32,752. Likewise, at a two-year school, a lecturer on average earned $39,221, while a lecturer at a four-year institution was paid $36,749.
- However, on average, faculty members at four-year institutions earned $9,000 more per year than those at two-year schools, while those at two-year public colleges earned about $10,300 more than faculty at two-year private, nonprofit institutions. When examined by academic rank, the difference was about $20,300 for professors, $12,200 for associate professors, and about $9,300 for assistant professors.
Harvard Museum Showcases Latin American Art

The Fogg Art Museum, Harvard University (Mass.), presents more than 60 paintings, drawings, and sculptures in its groundbreaking exhibition "Geometric Abstraction: Latin American Art from The Patricia Phelps de Cisneros Collection." The exhibition, on view through Nov. 4, offers for the first time in North America an in-depth look at an important dimension of Latin American art that until recently has been underrepresented in U.S. collections and exhibitions.

"Collaborations between North and Latin American critics, scholars, and institutions are far too rare," said James Cuno, Elizabeth and John Moors Cabot director of the Harvard University Art Museums. "With increasing awareness of our cultures' common histories and interests, it is only appropriate that individuals and institutions from all of the Americas join together to present the work of the most important artists of our common hemisphere."

Pérez Lectures at Texas A&M Corpus Christi

Dr. Emma Pérez, chair of the department of history at the University of Texas-El Paso, was the Wagensein Lecturer for 2001 at Texas A&M University-Corpus Christi. Her visit was sponsored by the Women's Center for Education and Service.

Pérez obtained her bachelor's degree, master's, and doctorate from the University of California-Los Angeles. She is one of 21 Chicanas in the U.S. with a Doctor of Philosophy in history. She has authored three books, including the critically acclaimed novel Gulf Dreams. Her articles have appeared in The Women's Review of Books, Journal of American History, Lesbian Review of Books, and Aztlan: A Journal of Chicano Studies.

Miami Hosts Latin American Art Specialist

Carol Damián, specialist in pre-Columbian art and in the art of Latin America, presented Miami University's (Ohio) third annual Usigli lecture, "Pre-Columbian Images in Mexican Modern Art."

Damián, associate professor and chair of the visual arts department of Florida International University, is the author of The Virgin of the Andes: Art and Ritual in Colonial Cuzco, and is the Miami, Fla., correspondent for Art Nexus and Arte Al Dia magazines.

The Usigli lecture was sponsored by the departments of art, Spanish and Portuguese, and theatre; the Latin American studies program; the art museum; and the special collections at King Library.

M-DCC Teams Sweep Stock Market Contest

In its first-ever participation in a nationwide stock market simulation, student teams from Miami-Dade Community College's (M-DCC's) Wolfson Campus swept the competition, winning all four top college-level awards, and taking first place as the best postsecondary team in Florida. The winning students are (clockwise from top left) Theodore Gordon, Karl Charles-Pierre, Alfredo Nuñez, and Julio Cuarezma, all enrolled in Professor Ana Cruz's managerial accounting class.

The Florida Stock Market Simulation is one of the largest events of its kind in the nation. Participants are students from fourth grade through post-graduate levels who trade stocks for a 10-week period using an imaginary account of $100,000. Each team may buy, sell, short sell, short cover, or buy on margin any stocks listed on the New York Stock Exchange, NASDAQ, and the American Exchange. Winners are chosen based on their portfolio's overall performance.

UT-Austin Honors Migrant Student of the Year

Samuel Bernabe, eldest son in a family of seven, was named 2001 Migrant Student of the Year at the University of Texas (UT)-Austin for his exemplary academic accomplishments, achieved despite the obstacles he and his family faced as migrant field workers.

Bernabe, a student at McAllen Memorial High School in the Rio Grande Valley, was selected from roughly 1,000 migrant students throughout Texas participating in UT-Austin's Migrant Student Graduation Enhancement Program, provided through the Continuing and Extended Education's Distance Education Center. A senior with a 3.81 GPA, Bernabe is ranked No. 38 in a class of 328 students. He will graduate as a Tech Prep Scholar and Texas Scholar.

CSU Grant Supports Chávez Celebration at Fresno State

The California State University (CSU) chancellor's office awarded CSU-Fresno a $34,000 grant in support of its César Chávez Day of Service and Learning. Ofelia Gámez, director of the College Assistance Migrant Program at Fresno State, administers the grant. The celebration educates students about the founder of the United Farm Workers union and his values and provides service to the community. Chávez's birthday, March 31, was proclaimed a state holiday by
the California legislature last year and is recognized by the CSU board of trustees.

The CSU funds are part of a grant approved by the state legislature and allocated by the California Commission on Improving Life Through Service (CILTS), the governor's community service commission. CILTS was established in 1994 and is dedicated to uniting Californians of all ages and backgrounds in community services. CILTS promotes citizen involvement by all Californians and strongly supports national and community service and volunteerism programs.

Thunderbird Offers Global Telecommunications Seminar

The executive education department at Thunderbird, The American Graduate School of International Management, Ariz., announced the dates of its Fall 2001 Global Telecommunications Management Program. The two-week seminar is geared to telecommunications executives with global responsibilities and provides course work on international strategy, mergers and acquisitions, marketing and finance, and cross-cultural management. The program will run Oct. 14-26 on the Thunderbird campus in suburban Phoenix. For the past two years, the program has sold out.

Thunderbird is the world's oldest and largest graduate school of international management education. The school's executive education programs have been recognized by Business Week, Financial Times, and other publications as among the top 20 in the world. Every year since 1996, U.S. News and World Report has ranked the school No. 1 in the speciality of international business.

NJCU Exhibits “DIAS POR America”

“DIAS POR America,” an exhibition of abstractions of national symbols by Rainiel Guzmán, was displayed at New Jersey City University (NJCU).

The one-person show featured 25 works that are the artist's depictions of all the flags of the Americas. Relying on the conventions of optical art, which utilizes color and geometric shapes to create illusions, and inspired by the surrealists, Guzmán uses oils to create small, rectangular, “flag-like” works meant to be viewed by one person at a time.

Guzmán's finished works are titled using phonetic wordplays on the names of the countries that they represent, such as “Mix l Can” for Mexican, “Near Erupting In” for Nicaraguan, “Pair Routing In” for Peruvian, and “Pueblo-We Can” for Puerto Rican.

UTSA Announces Appointments

The University of Texas-San Antonio announced the following administrative appointments:

Associate Professor of Educational Leadership Blandina "Bambi" Cárdenas was named interim dean of the College of Education and Human Development. An early spokeswoman for the Mexican American civil rights movement, Cárdenas was a member of the U.S. Civil Rights Commission for 13 years and is a former director of the office of minorities in higher education for the American Council on Education.

Assistant Professor of English Louis G. Mendoza succeeds Cárdenas as director of the Hispanic Research Center, established in 1989 to expand research efforts across all academic disciplines on the fastest-growing segment of the U.S. population. Mendoza has expertise in cultural and ethnic studies, contemporary literary theory, and Mexican American literature.

Professor of Psychology Raymond J. Garza was named director of the Metropolitan Research and Policy Center. His research and interests include cross-cultural psychology, personality theory, and interethnic relations.

Pueblo Community College Targets Hispanics

In Colorado, Pueblo Community College's (PCC's) advanced manufacturing program is geared toward recruiting Hispanic students—including initiatives for early intervention, inclusion of family in orientation, and other efforts to help student retention.

PCC, with a large Hispanic population, attributes its successful student service component to its scholarships, learning center, tutors, childcare services, and other positive motivators.

Carriann Rael, PCC graduate, is the institution's One Stop Recruiter. A strong advocate of the community college, she attended PCC on a scholarship and was the graduation speaker at her commencement. She is completing her bachelor's degree at the University of Southern Colorado.

Mercy College Screens Guantanamera

Guantanamera was one of several films shown at Mercy College's (N.Y.) International Film Festival.

Directed by Tomás Gutierrez Alea and Juan Carlos Tabio, Guantanamera (1997) is a graceful, comedy-romance road movie about a group of friends and relatives accompanying the body of a famous diva on a journey across Cuba to her final resting place in Havana. Guest speaker Dr. Augsto Hachboun, Dobbs Ferry Campus dean, Mercy College, introduced the film and led a discussion.

Clearinghouse in the Making of Hispanics Cancer Agenda

The Redes En Acción National Steering Committee (NSC) will hold its second meeting in San Antonio, Texas, Aug. 15-17.

Last year, 40 members of the highly diverse NSC—representing academic institutions, federal and private entities, and various national community-based organizations—spent three days identifying and prioritizing Hispanic cancer issues during the first planning session for the Redes En Acción: Cancer Awareness, Research and Training program.

Principal investigator Dr. Amelie G. Ramirez called the meeting "a highly successful first step in developing a national Hispanic cancer agenda." Ramirez is associate professor of medicine and deputy director of the Chronic Disease Prevention and Control Research Center at Baylor College of Medicine in San Antonio.

The unique mission of Redes En Acción is to create a "first-of-its-kind" clearinghouse of information and resources concerning Hispanics and cancer. The organization hopes to make the NSC meeting a biannual occurrence.

Three Earn National Council of La Raza Awards

At its 14th annual Capital Awards event, the National Council of La Raza—the nation's largest constituency-based Hispanic organization—honored two members of Congress and a governor for their staunch support of the Hispanic community.
Sen. Harry Reid, D-Nev., Rep. James T. Walsh, R-N.Y., and Democratic Governor Tom Vilsack of Iowa were recognized for their work on civil rights, immigration, education, and other issues affecting Latinos.

Tessie Santiago, lead actress on the syndicated TV series Queen of Swords, was mistress of ceremonies; Christina Vidal, lead actress on Nickelodeon's Taina series, sang the national anthem; and poet/author Pat Mora recited an inspirational poem.

**Mexican Cabinet Member Speaks at UT-Austin**

Dr. Juan Hernández, a cabinet member of Vicente Fox, president of Mexico, presented "Mexican Migrants to the U.S., Remittances, and Mexico-U.S. Guestworker Policy Initiatives" at the University of Texas-Austin Student Union.

Hernández, a long-time advisor to Fox, was appointed to his Cabinet last December.

As special advisor on migrant affairs, Hernández oversees Fox’s proposed Guestworker program and issues around the treatment of Mexican migrants in the U.S. and around guarantees for safe remittances to Mexico from migrants in the U.S., estimated to be between $6 billion and $7 billion annually.

The son of U.S. and Mexican parents, Hernández is on leave from his job as professor of arts and humanities and director of the Center for U.S.-Mexico Studies at the University of Texas-Dallas.

**Austin Study Trip to El Salvador Becomes Relief Effort**

An Austin College (Texas) student group traveled to El Salvador, delivering aid, supplies, and support to the earthquake-ravaged country. Students had planned a study trip that would examine postwar transitions, and issues from peacemaking to liberation theology. After the earthquake in January, students promptly changed the focus to one of support.

The Austin College community made significant donations to the relief fund, collecting medicines and medical supplies, plus computers and other technology needs for organizations and churches involved in the relief effort.

Austin students are establishing a tradition of relief efforts. In 1998 and 1999, students formed "Too Relief to gather donations and medical supplies for the recovery of Nicaraguans devastated by Hurricane Mitch.

**South Mountain Student at Harvard/Princeton Conference**

Martin Saucedo, South Mountain Community College (Ariz.) honors student, attended the first Harvard and Princeton Public Policy and Leadership Conference. More than 40 students from throughout the nation were introduced to the field of public policy. They listened to distinguished speakers, attended policy workshops, and explored career opportunities in the field.

Saucedo, 22, a native of Mexico who spoke Spanish growing up in Texas, now speaks two additional languages fluently—English and French—and is currently learning Russian. He hopes to some day help children and influence public policy as a psychiatrist, and for now has his sights set on a university pre-medical program.

Recently, the young man was nominated for both Arizona and national awards for Phi Theta Kappa distinguished chapter president.

**Latina Author and Rubi Theater at Hunter College**

Dr. Nicholasa Mohr presented "Reflections of the Big Mango: Growing up Latina in the USA" at the 2001 Annual Bella Abzug Lecture in Women's Studies at Hunter College in New York.

Mohr was born in Manhattan's El Barrio and raised in the Bronx. A past winner of the American Book Award and many other literary honors, she has written many short story collections, plays, essays, and books for children, young adults, and adults. Among her titles are In Nueva York, El Bronx Remembered, and La Cancion del Coqui.

The Rubi Theater Company, an ensemble of artists, writers, and educators performing works by members and other Latina/o writers living in the U.S., gave a stage reading of Mohr's

play I Never Even Seen My Father. Afterward, Mohr and José García, Rubi's artistic director, fielded questions from the audience.

**Union County College Exhibits Rodriguez Works**

Paintings and collages by Gloria Rodríguez were recently displayed at the Tomasulo Gallery at Union County College in New Jersey.

The exhibition, "The Image to Inspire," is said to establish a new type of syncretism—not only religious, but social and cultural in nature. Rodríguez's paintings evoke archetypal themes and employ a new vocabulary of classical and urban origin. The new translations of multicultural and religious images are made familiar to the viewer in a sensitive and personal manner that all ages and ethnicities can grasp.

**News from the Getty**

- The J. Paul Getty Museum, Los Angeles, Calif., will host the exhibition "Manuel Álvarez Bravo: Optical Parables" Nov. 13, 2001, to Feb. 17, 2002. Long hailed as one of the great masters of 20th-century photography, Bravo, born in Mexico in 1902, blends an acute social consciousness with a poetic and often enigmatically modern sensibility. His work came into its own during the 1930s, following the social and political turmoil of Mexico's 10-year Revolution. It contains both Surrealist undertones and a magical documentary reality.

- The Getty Museum offers, in Spanish, gallery talks, audio-guide recorded tours, architecture tours, storytelling, and the Family Room resources. For further information, call (310) 440-7930.

- Getty Online, The Getty's "gateway" website at www.getty.edu, offers helpful information about the Getty Center, including directions, exhibition and event listings, and a virtual tour. News releases are posted, along with volunteer, internship, and employment opportunities, and hot links to other Getty sites.

**H.S. Student Receives Scholarship to Loyola University Chicago**

Xochitl Riverás winning entry from Latino Art Beat's Third Annual Hispanic Heritage Competition, held last year, which earned her a $20,000 scholarship award to Loyola University Chicago, Illinois, was on display at the Instituto Cervantes Michigan Avenue gallery. Rivera won for her entry in the advanced drawing and...
painting category, and her work featured a stylized self-portrait of an Aztec princess.

The exhibit, "What Hispanic Heritage and Culture Means to Me," featured 24 prize-winning art works in 2-D, 3-D, black and white photography, and video. Winning artists were on hand to answer questions about their work during the opening reception. In addition to Rivera, José Díaz and Sahajid Muñiz won first and second prizes in the 3-D category, respectively, for their joint interpretation of Michelangelo's "The Creation." Díaz and Muñiz each were awarded $8,000 Loyola scholarships.

Latino Art Beat's president and executive director, Don Rossi Nuccio, and vice president, Daniel O. Cisneros, were on hand to kick off the fourth annual competition, to be held July 14-15.

Luevano Appointed to St. Mary's Post

Margaret Luevano was appointed director of international student services at St. Mary's University in Texas. Luevano graduated from St. Mary's in 1998 with a bachelor's degree in international relations. She received a master's in Middle Eastern studies from the University of Texas-Austin in 2000.

In addition to her extensive studies in international relations, Luevano has traveled in Turkey, Israel, and the Middle East. She is proficient in Spanish, French, and Standard Arabic.

New Executive Director for Minority Nonprofit

Dr. Darnita R. Killian, dean of students at Emory University (Ga.), was named executive director of A Better Chance, the national resource for identifying, recruiting, and developing leaders among academically gifted students of color. Killian, a recent Fulbright scholar, will function as the internal manager of the organization, responsible for programs, staff, and managing day-to-day operations of the 38-year-old organization.

A Better Chance identifies and recruits academically talented and motivated students of color and guides them toward a variety of educational opportunities. Founded in 1963, it is the oldest and only national organization of its kind. Through its signature venture, the College Preparatory Schools Program, it places students in some of the finest private and public schools.

M-DCC Foundation Elects Officers

The Miami-Dade Community College Foundation, Inc.—the fundraising arm of Miami-Dade Community College in Florida—elected new officers to three-year terms on its board of directors.

Victor M. Díaz, Jr. (l.), elected chair, is a civil trial lawyer, specializing in aviation, commercial, and plaintiff's personal injury litigation. He graduated, with honors, from Duke University and earned his law degree from Yale. Antonio L. Argiz (r.), elected vice chair, is a manager and shareholder of the accounting firm of Morrison, Brown, Argiz and Company. He has a bachelor's degree in business administration from Florida International University and has done graduate work in auditing and taxation. Albert E. Dotson, Jr., elected secretary, is an attorney in private practice who has represented prominent clients in issues involving land use regulation, environmental insurance compliance, development incentive negotiations, and acquisition and lending. He has a bachelor's degree from Dartmouth and a juris doctorate from Vanderbilt.

News from Texas-Pan American

Through the efforts of the University of Texas-Pan American (UTPA) and Rep. Rubéa Hinojosa, a manufacturing assistance center will be developed in Hidalgo County. The new center was made possible through a $316,729 grant from the National Institute of Standards and Technology of the U.S. Department of Commerce. A total of $56 million will be issued during the next five years, with funds awarded to the Texas Engineering Extension Service in College Station and then distributed to UTPA. Hinojosa said the grant means "great things for South Texas—reduced underemployment, expanded educational opportunities, and financial stability."

Drs. Carolina G. Huerta, Jan Maville, and Barbara Tucker, UTPA nursing professors, were "Educat'ing for Cultural Competence" symposium presenters at Innovative Education for the New Century, a nursing conference in St. Louis. Huerta was appointed to the American Association of Colleges of Nursing (AACN) Master's Education Conference planning committee. The annual national conference is sponsored by AACN, which represents baccalaureate and higher education nursing in the U.S.

Rhode Island Alumna Writes Book of Spanish Poetry

A 44-year-old Rhode Island College (RIC) alumna, who has been writing poems in Spanish since the age of 17, has gathered them in her first book, "Las campinas claman el llanto de mi alma (Your Hills Claim the Calling of My Soul.)." Magdalena "Maggie" Picot self-published and hopes to have the Providence, R.I., public schools provide copies for its teachers to benefit the many Latino students in the system.

"I didn't have a pair of shoes until I was age five," said Picot, a native of Puerto Rico, adding that she still "maintains my roots" in that life even though she now resides "in a nice house in a good neighborhood." Her family immigrated to western Massachusetts in 1972.

Picot, who has a master's degree from RIC, works in the Rhode Island Department of Corrections and is currently running the whole home confinement program for the state of Rhode Island as acting administrator of community confinement. She says she is "the first Hispanic administrator" in the department.

UTPA Foundation and VAMOS Keep Hope Alive for Students

Starting this fall, the University of Texas-Pan American (UTPA) Foundation and the Valley Alliance of Mentors for Opportunities and Scholarships (VAMOS) will each contribute $30,000 annually to provide up to 20 scholarships through a joint Valley Scholars program. "Without this scholarship, I probably would not be able to continue in college, as I would have to work full time," said Maribel Matamoros, junior communications major at UTPA.
Valley scholars who have completed their two-year program at South Texas Community College and are transferring to UTPA will receive financial support, thanks to the new partnership. Said UTPA President Dr. Miguel A. Navedez (pictured), “The goal for all of us is to get more students to participate in higher education.”

Barnard Researcher Speaks at Columbia on Mexican Students in Public Schools

At Columbia University in New York, Barnard College sociologist Robert Smith discussed his research on the shifting meaning of Mexican ethnicity in the public schools as a result of changes in U.S. immigration laws and the migration process.

Among his findings, he concludes that boys and girls experience ethnicity differently in their schools, which affects their school performance and their transitions to the work world. Smith’s research is based on more than 100 interviews and ethnographic research in students’ homes, communities, and schools in the U.S. and Mexico. Smith’s research was supported by the National Science Foundation, the Social Science Research Council, the Columbia University oral history research office, and the Spencer Foundation National Academy of Education.

Big Rise in Medical School Applicants from St. Mary’s

St. Mary’s University (Texas), a Hispanic-serving institution (HSI) with an undergraduate enrollment that is 63 percent Hispanic, is bucking national trends, especially when it comes to the number of medical school applications submitted by students each year.

According to a report published in the September 2000 issue of the Journal of the American Medical Association, medical school applications have fallen over the last three years. The national report showed that applications among women and underserved minorities have gone down.

But at St. Mary’s, the number of students intent on pursuing medical careers is rising. Dr. Rosemarie Wahl, chair, department of biological sciences, said the number of female students from St. Mary’s applying to medical school over the last three years has risen 17 percent, and applications by underserved minority students at St. Mary’s increased 19 percent.

News from Bethel College and Seminary

Bethel College and Seminary in Minnesota, both part of its Benson Great Hall Concert Series. “Sizzlin’ Sandoval: Hot Latin and Burnin’ Jazz” featured internationally renowned trumpeter Arturo Sandoval, who was born in Cuba and defected to the United States in 1990, with the help of U.S. trumpet legend dizzy Gillespie. An eminent virtuoso of classical guitar, Christopher Parkening, joined a talented and versatile young batonist, Jubilant Sykes, to perform music of Brazil and the Americas in a second concert, “Brazilian.”

Bethel is expanding opportunities for adult learners. The new Master of Arts in ethnomusicology focuses on music cultures of non-western societies and prepares students for cross-cultural ministries. The Master of Arts in nursing offers four new concentrations: Christian health ministry, health systems leadership, nursing education, and school health. The new Master of Arts in teaching meets licensure requirements for graduates with a bachelor’s degree in a teachable major who want to enter the profession.

Ramapo Professor Discusses 19th-Century Novel Set in Cuba

Patricia M. Ard, assistant professor of English at Ramapo College of New Jersey, discussed a recently reissued book that she edited, Juanita: A Romance of Real Life in Cuba Fifty Years Ago. Originally published in 1887, and reissued in September by the University Press of Virginia, Juanita was written by Mary Peabody Mann, who based it on her experience of living on a Cuban slaveholder’s plantation from 1833 to 1835. The novel raises questions about the relation of slavery in the Caribbean to that in the United States, probes the connection between romance and race, and brings to light significant aspects of anti-slavery feminist authors.

Ard’s introductory essay “reinvigorates the place of women writers in the American Renaissance and American reform movements”

Señoritas Latinas Unidas Launches Virtual Book Club

In keeping with the technological age, but not losing respect for the written word, the National Philanthropy Committee of Sigma Lambda Upsilon/Señoritas Latinas Unidas Sorority, Inc., created the Virtual Book Club. The Club fosters cultural and intellectual discussions, cutting across geographic barriers by using the Internet.

The Virtual Book Club’s first selection, Under the Feet of Jesus, by Helena Maria Viramontes, was selected by Maria J. Schmidt, the organization’s first Distinguished Hermana.

The Club welcomes diverse thoughts and opinions. Visit the website http://pub7.ezboard.com/blsu, and click on “Book Club.” One does not have to be a registered user to access this service.

South Texas Professor Releases Law Handbook

South Texas College of Law Professor Olga L. Moya (pictured) and Houston attorney Andrew L. Fono released a new, updated version (3rd ed.) of their environmental law handbook. Currently, Federal Environmental Law, The User’s Guide, second edition, is in wide use in American law schools, law firms, and corporations. The text summarizes and highlights the relevant sections of, and changes in, administrative law and federal environmental statutes, including the National Environmental Policy Act, Resource Conservation and Recovery Act, Superfund, the Clean Air Act, and the Clean Water Act. The book is published by West Group.

Moya is a tenured professor of law at South Texas, where she teaches environmental law, toxic torts, administrative law, and international environmental law. She has been honored by the University of Texas School of Law and the Hispanic National Bar Association, and she serves on the Metropolitan Transit Authority Board of Harris County. Fono is a graduate of South Texas College of Law and practices environmental law as an associate in the office of Haynes and Boone.

[Ed. note: See “Olga Moya: Tenured Latina Law Professor: Of Mixed Emotions and Toxic Torts,” in The Hispanic Outlook, June 5, 1998, for a profile in which Moya talks about how environmental issues are especially important to Hispanics because they so often affect poor communities. She talks about her roots in a migrant worker family and about incidents that motivated her to enter the law field.]
International Higher Education Systems, new ed.

By John P. Eddy and Stanley D. Murphy

This publication includes new material and research useful to those who work with international students, international academic programs around the world, and international relations in all fields.

International education means we are in a global village, interacting and interfacing with people of different cultures, languages, and ethnic origins.

On the Rim of Mexico: Encounters of the Rich and Poor

By Ramón Eduardo Ruiz

This book addresses the ties and asymmetries across the Mexico-U.S. border, from Tijuana/San Diego to Matamoros/Brownsville. Based on extensive research, travels, remembrances, and first-hand interviews, it is a moving portrait of the people, places, and issues that make up border life today.

Political Cleavages: Issues, Parties, and the Consolidation of Democracy

By Alejandro Moreno

Alejandro Moreno argues that the political split between authoritarian and democratic ideologies is the main determinant of party competition in less-developed, relatively new democracies. That is, political competition is drawn between those parties that propose to further democratic consolidations and those that advocate a return to authoritarian order. Moreno compares several political cleavages in new democracies in Latin America. (Part of the Latin America in Global Perspective multi-volume series.)

The Lepers in Blue: Coercive Performance and the Contemporary Latin American Theater

By Amalia Gladhart

Analyzing texts from a number of Latin American countries and eschewing any attempt to define "a" Latin American theater, this study examines the ways in which performance, coercion, and resistance are linked within a variety of plays and the ways in which that linkage reflects broader social issues.

First Day to Final Grade: A Graduate Student's Guide to Teaching

By Anne Curzan and Lisa Damour

This text focuses on the "how-tos" of teaching, such as setting up a lesson plan, running a discussion, and grading, as well as issues specific to the teaching assistant's role as both student and teacher.

Farewell to the Peasantry?

By Gerardo Otero

Focusing on three Mexican agricultural regions from the 1930s to the present, this book offers a strikingly new analysis of the intersection of class relations, political mobilization, and regionally varying cultural heritage in rural Mexico.

Dickens in Galdós

By Timothy Michael McGovern

Spanish novelist Benito Pérez Galdós (1843-1920) stated that one of his greatest influences was the English novelist Charles Dickens. This study focuses on Dickens' use of type characters as tools for social criticism and the manner in which Galdós utilizes these same types in order to critique Spanish society. (Book 12 in the Comparative Cultures and Literatures series)

English-Spanish Translation, Through A Cross-Cultural Interpretation Approach

By Francisco Castro-Paniagua

As translation involves more than mere mechanics, but is a discipline tied to cultural understanding, translators must focus on the dissimilarities and incongruities between the source and target societies, as well as their languages. This book will enable those involved in this process to understand the differences between the Anglo-Saxon and Hispanic cultures in a more cohesive manner.

Belated Declaration of Love to Séraphine Louis: A Bilingual, Critical Edition of Denzil Romero's Short Stories

Stephen J. Clark, ed.

This book brings together a panoramic survey of Venezuelan narrative, the original Spanish text (with full English translation) of eight short stories by the late writer Denzil Romero, and a focused commentary of his stories and his work.

Canto General, 50th anniversary ed.

By Pablo Neruda

This body of work, which many prominent critics believe to be the poet's masterpiece, is the stunning epic of an entire continent and its people. Although some parts of the poem, including "The Heights of Macchu Picchu," have been translated, this is the first time the Canto has appeared in its entirety in English. Translated by Jack Schmitt.

Latino Metropolis

By Victor M. Valle and Rodolfo D. Torres

Los Angeles: a rich mosaic of multinational cultures? Scratch the surface of the city's image and a grittier truth emerges--its huge, shimmering economy was built largely on the backs of Latino immigrants and still depends on them. This book exposes the underside of the development and restructuring that have turned Los Angeles into a global city, and reveals the ways in which ideas about ethnicity--Latino identity itself--are implicated and elaborated in the process.

Latin American Politics and Development, 5th ed.

Howard J. Wiarda and Harvey F. Kline, eds.

This revised and updated edition reflects the complex political and economic developments that have occurred in Latin America over the past five years. The editors emphasize the trend toward democratization, and democracy's problems, as the organizing theme of the book, covering pressing issues such as economic reform, globalization, political unrest, and the international drug trade.

Many publications featured in this section are available through amazon.com.

CONFERENCES

Latino Book and Family Festival

May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan. Contact: (760) 434-7484.

3rd Annual Latino Education Conference

May 13-15

"Critical Issues Affecting Latino Educational Achievement in the 21st Century" is the theme of this year's ASPIRA, Inc. of New Jersey conference. Confirmed keynote speakers include Carlos Hernández, president, New Jersey City University; Antonia Pantoja, founder, ASPIRA National Association; and Sara Martínez Tucker, president, Hispanic Scholarship Fund. At Bally's Park Place Hotel and Casino.

Contact: Carmen Torres, (973) 484-7554, or e-mail, ctorres@nj.aspira.org; website, www.aspira.org.

MALDEF Annual Fundraiser

May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

NILDL Leaders 2001

Phoenix, Ariz., May 20-24

While the National Institute for Leadership Development, based upon a philosophy of inclusivity and diversity, is for women and men in community colleges, the Leaders 2001 programs are for women. The programs are sponsored by Phoenix College, Maricopa Community Colleges, and League for Innovation in the Community College.

Contact: NILD, (602) 223-4030; e-mail, nild@pcmail.maricopa.edu.

NISOD 2001

May 27-30

The National Institute for Staff and Organizational Development and the Community College Leadership Program present their 23rd annual international conference, "Making a World of Difference...", "a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty" in Austin, Texas.

Contact: John Rouche and/or Suanne Rouche, (512) 471-7545.

NCORE 2001

May 30-June 3

The Southwest Center for Human Relations Studies at the University of Oklahoma-Norman presents "National Conference on Race and Ethnicity in American Higher Education." In Seattle, Wash.
The National Multicultural Institute's 2001 theme is "Creating a National Agenda: Multicultural Partnerships for Change." The major goals of this conference are to: (1) offer an opportunity for in-depth diversity training and skills-building; (2) focus on some of the unique issues that professionals face in working with a culturally diverse population; and (3) create a multicultural environment in which an open, cross-cultural dialogue can occur. At the Hyatt Regency Washington on Capitol Hill Hotel, Washington, D.C.

Contact: NMCI, (202) 737-1234 or (800) 233-1234; website, www.nmci.org.

LULAC 72nd National Convention and Exposition
June 3-9
The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6135.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15
This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter's College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29
The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, "Interpreting Latino Cultures: Research and Museums." In Washington, D.C.

Contact: website, www.si.edu.

AAHE Assessment Conference
June 23-27
"From Expectations to Results: What Are We Finding, and How Are We Improving" is this year's theme. Opening plenary speaker is Richard Light, professor of education and public policy at Harvard University, and author of Making the Most of College: How Assessment Can Help Both Students and Us. In Denver, Colo.

HERS, Mid-America Summer Institute
June 24-July 20
The University of Denver's HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.

Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

The Barahona Center Summer Workshops 2001
June 25-27
July 9-11
July 23-25
The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/La literatura en Español dirigida a los lectores infantiles y juveniles. At CSU-San Marcos.

Contact: Isabel Schön, director, (760) 750-4070; e-mail, ischon@csusm.edu.

Deaf Education Technology Conference
June 25-29
"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

AFT QuEST 2001 Conference
July 12-15
The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for PreK-12 teachers, school staff, and state and local education leaders, including from the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

UNM's Taos Summer Writers' Conference
July 14-20
There are weekend workshops and weeklong workshops to select from. Among the many workshop leaders are Pat Mora, "Los cuentos: Family Stories for Beginners," and Alma Luz Villanueva, "Stories: Dreaming Characters to Life." Some scholarships are available. In Taos, N.M.

Contact: website, www.unm.edu/~taosconf.

EACUBO/Cornell Administrative Management Institute
July 22-27
AMII2001, a professional seminar for college and university administrative/business managers and department heads, is presented by the Eastern Association of College and University Business Officers and the Cornell University School of Continuing Education and Summer Sessions. In Ithaca, N.Y.

Contact: (607) 255-7259; e-mail, cusp@cornell.edu; website, www.sce.cornell.edu/EXEC/.

2001 NACUBO Annual Meeting
July 28-31
The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

Book Review

By José B. Fernández

In 1807, El Missisipi, the first Hispanic newspaper, appeared in New Orleans. Since that year, the Hispanic press has played a leading role in Hispanic communities throughout the United States. In some instances, Hispanic newspapers such as Key West's El Yara and New York City's La Voz de América kept the flame of Cuban and Puerto Rican independence alive in the latter part of the 19th century. At times, newspapers such as El Heraldo de México, published in Los Angeles, and Gráfico, published in New York City, safeguarded the civil rights of Hispanic readers by carrying numerous editorials and columns against prejudice, bigotry, and discrimination. The New Mexican newspapers El Nuevo Mundo and La Voz del Pueblo served as barriers against Anglo-Saxon linguistic and cultural expansionism.

On many occasions, Hispanic periodical publications provided education for their readers and were the principal vehicles for literary creativity. During the 19th century and the first half of the 20th, Hispanic newspapers placed their readers in contact with Peninsular and Spanish-American literature by publishing in their pages the works of prominent figures such as Juan Valera, Benito Pérez Galdós, Rubén Darío, José Martí, Lola Rodríguez de Tió, and Mariano Azuela.

In an effort to reconstitute the documentary legacy of Hispanics in the United States, Nicolás Kanellos, a leading authority on Hispanic letters of the U.S. and author of numerous reference works, and Helvetia Martell, a noted Hispanic bibliographer with the Inter-American Defense College Library, have compiled this formidable bibliography of Hispanic periodical publications in the U.S.

The book is divided into two parts. Authored by Kanellos, the first part provides an historical survey of Hispanic periodicals published in the U.S. prior to 1960. While Kanellos maintains that his survey is a brief one, its very size (136 pages) causes one to ponder whether he has been too modest in describing his work. Indeed, the term survey is a misnomer, for Kanellos has provided the reader with an exhaustive and insightful study. In examining the impact of Hispanic periodical publications, Kanellos has done a masterful job of exploring the many periodicals published throughout the years. Presenting the material from a chronological and geographical perspective allows the reader to observe the periodicals' similarities and differences.

According to Kanellos, the periodicals mirror the nature of Hispanic culture in the United States: exile, immigration, and nativism. In a clear, concise, and convincing manner, Kanellos explains the simultaneous interrelationship that exists between exile and immigrant communities. As time passes, these communities, he asserts, evolve into native com-

munities, thus the term nativism. Kanellos buttresses his assertion with an impressive list of primary and secondary sources.

Throughout the pages of this study, Kanellos presents the reader with an outstanding gallery of Hispanic newspaper figures: philosopher-priest Félix Varela, the intellectual author of Cuba's struggle for independence and publisher of Philadelphia's El Habanero; Ricardo Flores Magón, radical publisher of the border newspaper Regeneración; Ignacio Lozano, powerful and astute publisher of San Antonio's La Prensa; Julio Arce, the most syndicated columnist in the Southwest; Blanca de Moncalleano, fiery feminist voice of El Paso's Pluma Roja; and Juan Antonio Corretjer and Julia de Burgos, the giant literary figures of New York City's nativist Puerto Rican newspaper Pueblos Latinos. Examining the trajectory of these figures reveals Kanellos' thoroughness in treating their specific contributions to Hispanic journalism and the Hispanic community in general.

The book's second part, prepared by Martell, contains a bibliography of some 1,700 periodical entries arranged by title in alphabetical order. Each entry cites the title, place of publication, publisher, and date of publication. Additionally, the bibliography contains three indices: one geographical, one chronological, and a general name and subject index. The geographical index is arranged alphabetically by state and then city, and the chronological index, by the beginning year of publication. This distribution is helpful to the reader looking for specific information.

Martell's criteria for inclusion of entries are based on all known serials published in Spanish language in the United States prior to 1960 and all known serials that were produced by or that served Hispanic communities in the United States, whether published in English or bilingually.

In examining Martell's arduous task of cataloguing, organizing, and compiling the periodical publications, one immediately takes note of her thorough and professional scholarship.

Kanellos and Martell should be commended for bringing to light the publications of a people whose intellectual contributions have been overlooked by mainstream institutions responsible for bibliographic control. This bibliography is of inestimable value for the historian, sociologist, ethnographer, and the general reader. It is also a must reference tool in any library.

Dr. José B. Fernández, a specialist in Spanish colonial letters of the United States, is professor of history and foreign languages at the University of Central Florida. He received his Ph.D. from Florida State University.

All employment opportunities are posted online at www.dist.maricopa.edu/hrweb, and for public view at the District Office, Room 226, 2411 W. 14th Street, Tempe, AZ 85281 or 480-731-8444. Applications are required.

The Maricopa Community Colleges are located in the Phoenix, Arizona Metropolitan area. MCCCD is an affirmative action and equal employment opportunity employer.
University of Houston - Where Diversity Counts

One of the highest priorities of the
University of Houston is ensuring that members of
diverse communities have access to the full range
of educational opportunities provided.
And UH is succeeding: approximately 53%
of our students are female and women
earn 55% of the degrees awarded;
no one ethnic group constitutes
a majority of the student body.

Pitzer College

Founded in 1963, Pitzer College specializes in close tuition/student relationships and a strong democratic ethos. With about 850 students, Pitzer College is one of the five undergraduate colleges and two graduate institutions that comprise the Claremont Colleges Consortium. The colleges are physically contiguous and share a central library, bookstore, medical center and other facilities. Joint programs are available in the sciences, music, theatre and interdisciplinary studies.

Pitzer’s educational philosophy emphasizes the development of students’ autonomy within the context of a residential community. Students create academic programs in close collaboration with their academic advisors. Those programs pursue Educational Objectives that focus on interdisciplinary perspectives, intercultural understanding, and social responsibility. The Educational Objectives also include the acquisition of a broad knowledge in the arts, humanities, social and natural sciences combined with in-depth knowledge in a particular field of study. Throughout the curriculum, Pitzer College integrates the development of critical thinking, formal analysis, and effective oral and written expression.

Pitzer’s commitment to democratic participation is seen in the inclusion of student representatives on all of the College’s standing committees. Students, staff and faculty participate in College Council, Pitzer’s decision-making body. Pitzer’s alumni and trustees are actively engaged in supporting the vision, goals and objectives of the College.

Pitzer celebrates cultural diversity and intercultural understanding. Ethnically diverse students come from throughout the United States and nearly 20 other countries. Students are encouraged to participate in one of Pitzer’s many language and cultural immersion programs. These choices include Botswana, China, Costa Rica, Ecuador, Italy, Japan, Nepal, Ontario (California), Turkey, Venezuela and Wales, as well as other locations.

Pitzer fosters interdisciplinary perspectives in individual courses and in many of its programs. Students may concentrate in a current array of 19 explicitly interdisciplinary programs.

Pitzer develops personal and social responsibility by emphasizing a concern for the social consequences and ethical implications of knowledge and action. Pitzer students can take courses that embrace this objective and can participate in numerous community-based research projects here and abroad.

The College is currently engaged in several endeavors to advance its educational mission. It is building endowment funding to increase student and faculty diversity through scholarships and professorships. Pitzer is engaged in a Master Planning process to reinvent the residential living and learning environments. It is exploring ways to further invigorate intellectual life at the College through, among other things, enhanced support for faculty scholarship and creative work, curricular development, and campus-community partnerships in learning.

Applicant/ Nomination Information
Applications and nominations should be directed to:

John N. Tienney, Chair
Presidential Search Committee - Pitzer College
1140 North La Brea Avenue
Los Angeles, CA 90038

Applications should include a letter of interest, detailed vita, and the names, addresses, and phone numbers of at least five references. Applications and nominations will be accepted until the position is filled.

Send letter of application, transcripts and three letters of recommendation to The Richard Stockton College of New Jersey, AA51, Office of Housing and Residential Life, Linda Rihiner, PO Box 195, Pomona, NJ 08240-0195.

Stockton is an AA/EOE. Women and minorities are encouraged to apply.

American University
Washington, D.C.

The Department of Performing Arts in the College of Arts and Sciences at American University invites applications for a one year, temporary Assistant Professor of Music, beginning Fall 2001. Responsibilities include conducting and coordinating all orchestral and chamber music activities and teaching undergraduate general education and music courses. Qualified candidates will have a minimum of a Master's degree, preferably completed or pending DMA or PhD, proven success as a conductor of professional, college and community orchestras, and experience teaching at the university level. Applicants should submit a resume, three letters of reference and a video tape of conducting to Dr. Naima Prevots, Chair, Department of Performing Arts, American University, 4400 Massachusetts Avenue N.W., Washington, D.C. 20016. The department's search committee will begin reviewing applications April 20, 2001 and will continue until the position is filled.

American University is an EEO/AA employer, committed to a diverse faculty, staff and student body. Women and minorities are strongly encouraged to apply.

Assistant or Associate Professor in Archives, Records and Information Management

The College offers a highly regarded graduate program (MLS and PhD) for educating archivists, records managers and related information professionals. We seek a faculty member with substantial understanding of archival science, records management, historical use of archives, electronic information systems, the role of modern information technology in organizations, and the impact of digital information technology on recordkeeping and archives. Candidates should also have expertise in networking applications and access systems used with archival records, including the Internet and the World Wide Web. We are particularly interested in applicants who are dedicated to advancing the profession through research and service and to educating students who will achieve successful archival and records management careers in the information age. The appointee will be expected to teach courses in archives; records management; and the management, preservation, accessibility, and use of electronic records.

A doctorate in library/information science, history, or a related field is required for this tenure-track appointment. The appointment covers 9 months each year with the opportunity for summer teaching. More information about the College's program is available from its web site:

Applications will be accepted until appropriate candidates have been identified. Review of applications will begin on October 1, 2001, and the position is expected to be filled in February 2002 or August 2002. Inquiries and applications should be sent to the Search Committee Chair:

Dr. Bruce W. Dearstyn, Professor

The University of Toledo invites nominations and applications for the position of Collection Development and Acquisitions Librarian. The University is a Carnegie Doctoral/Research Extensive state-supported university with an enrollment of approximately 18,000 students. The faculty of the seven colleges within the university are represented by the AAUP. The University is situated in a suburban, residential neighborhood on the wooded 255-acre University campus. The city itself is a major attraction in the civic, cultural, and commercial life of the Greater Toledo community. The region affords a range of cultural opportunities that include a renowned museum of art, zoo, symphony orchestra, metropolitan park system, and science museum. Toledo is located on the western shore of Lake Erie, in close proximity to major cities in the Midwest.

**Major functions:** Plan and coordinate collection development policies, procedures, and strategies; develop and monitor liaison program; administer an approval plan; manage acquisition of books and some non-book material; prepare and monitor library materials budget. Specific duties and responsibilities: Select books and electronic resources and serve as a library liaison in several subject areas; coordinate the activities of selectors; oversee the review of approval plan; assemble annual and special reports on the collection; supervise, hire and train acquisitions support staff (currently 3 FTE); manage gift books; manage mending/replacement/rebinding/withdrawal review of books; shape remote storage policies and procedures; work 4-5 hours per week on the reference desk.

**Required:** MLS from an ALA accredited school. Two years of experience in collection development and library acquisitions, institutional accounting practices, dealing with vendors; two years of supervisory experience. Demonstrated professional achievement (e.g., publications or presentations); demonstrated institutional or professional service.

**Preferred:** Demonstrated competence with INNOPAC or similar library software; demonstrated competence with GOBI or similar approval plan software; familiarity with bidding process; experience in collection development within a consortium environment.

More information can be found at www.cl.utoledo.edu. The 12-month appointment will be made at the appropriate tenure-track faculty rank based on qualifications, with a minimum rank of Assistant Professor. Minimum salary of $32,500. Review of applications will begin May 31, 2001 and continue until the position is filled. Send letter of application, current vitae, names, addresses, phone numbers, and e-mail addresses for five recent professional references to:

**ORANGE COAST COLLEGE**

**VICE PRESIDENT, STUDENT SERVICES**

The Board of Trustees for the Coast Community College District invites applications for this high profile, senior level position. The successful candidate will report directly to the President of the college and will have administrative responsibility for all student services programs including policy development and fiscal performance while maintaining academic excellence.

**Qualifications**

- Possession of a Master's Degree from an accredited institution and at least one year of formal training, internship, or leadership experience reasonably related to the administrative assignment or equivalent education and experience. Candidates should have three years full-time administrative experience at a division dean/chair level or higher, preferably in student services and qualified to teach in one of the District's instructional programs.

**Application Requirements**

Interested candidates must complete a District application packet by the search closing date of May, 14, 2001. Please refer to Job #26-02 when making this request. Applications will be screened under a process of utmost confidentiality by a committee of representatives from the college community. Final candidates identified by the selection committee will be interviewed by the President of the college.

**About the College**

Ranked eighth among America's largest single-campus community colleges, Orange Coast College (OCC) serves nearly 25,000 credit students each semester. OCC is located in Orange County, on Southern California's beautiful Pacific Coast between Los Angeles and San Diego and enjoys a reputation as a place of academic excellence, a cultural center and valued community resource. Thousands of Orange County residents look to OCC as a source of intellectual and cultural enrichment.

**MICHIGAN STATE UNIVERSITY**

**HOMER NOWLIN ENDOWED CHAIR**

Chair of Water in Agricultural and Natural Resource Systems

Michigan State University, College of Agriculture and Natural Resources invites applications and nominations for the Nowlin Chair of Water in Agricultural and Natural Resource Systems. The individual holding this fully endowed chair will be tenured as a full professor in a department of the College of Agriculture and Natural Resources. The individual should provide leadership in multidisciplinary efforts focused on the environmental, social, economic, and policy impacts of water in agricultural and natural resource systems of the Great Lakes Basin and the world. Responsibilities of the successful candidate include:

- Conducting highly creative and outstanding research on water at multiple scales addressing specific questions concerning environmental, social, and economic impacts.
- Providing leadership for undergraduate, graduate, and off-campus agricultural and natural resource educational programs.
- Catalyzing and facilitating collaborative relationships and ventures with colleagues across the College and University, including the attraction of extramural contracts and grants.
- Supplying intellectual guidance to and collaborating with various external audiences such as farmers, foresters, fishers, agricultural and natural resource industries, agricultural and natural resource organizations, state and federal governments, consumers, firms, national, regional, and international organizations.

Michigan State University is searching for an individual with a distinguished record of achievement; a multidisciplinary orientation; an appreciation of a systems approach; a demonstrated sensitivity to agricultural, economic, social, policy, and ecological issues; significant research, teaching, and outreach capabilities; and a demonstrated commitment to the land grant philosophy. Applicants must have an earned doctorate in a related field, expertise in water-related issues, and an outstanding record of obtaining extramural funding.

Applications and nominations for the Nowlin Chair of Water in Agricultural and Natural Resource Systems will be received until July 1, 2001, or until a suitable candidate is identified. Women and minorities are encouraged to apply. Send applications (including three references, CV, and statement of current/recent research interests and goals) to: Dr. Jon Bartholomie, Institute of Water Research, 115 Manly Miles Building, Michigan State University, East Lansing, MI 48823-5243; E-mail: bartholomie@msu.edu; Phone (517) 353-9785; Fax (517) 353-1812.

MSU is an Affirmative Action/Equal Opportunity Institution
Vacancy Announcement

Director, National Institute of Neurological Disorders and Stroke (NINDS)
National Institutes of Health (NIH)

THE POSITION: The NIH is seeking exceptional candidates for the position of Director, NINDS. The Director provides leadership and direction to the national research program on the causes, prevention, diagnosis, and treatment of neurological disorders and stroke, and basic research in related scientific areas. Through NINDS’ intramural laboratories and the extramural scientific community, the Institute supports laboratory and clinical investigations and training of scientists with particular interest in the biomedical and behavioral sciences for research careers in the neurosciences. The NINDS has a FY 2001 budget of approximately $1.3 billion and a staff of approximately 800 to support the Institute’s efforts.

The Director develops Institute goals, priorities, policies, and program activities, and keeps the Director, NIH, abreast of developments and needs of the categorical diseases of the Institute as they relate to the overall mission of the NIH and identifies needs for new or amended NIH-wide policies, procedures and practices. The Director, NINDS, maintains liaison and/or fosters collaborations with other government research programs, private foundations, universities and private research institutes, scientific societies, voluntary health agencies, and international health and research organizations with interest in the categorical disorders of the Institute.

In addition to the leadership and managerial/administrative responsibilities described, the incumbent may carry out his/her own research program. Resources commensurate with the proposed program will be provided.

THE CHALLENGE: NINDS has occupied a central position in the world of neuroscience for nearly 50 years. Scientific opportunities are abundant, the task of preventing and treating nervous system disease has never been more urgent, and the public’s confidence in biomedical research has never been stronger. This position offers a unique opportunity for the right individual to provide strong and visionary leadership to an organization dedicated to reducing or eliminating the burden of neurological disease through the support and performance of the highest quality laboratory and clinical research aimed at increasing our understanding of the different disorders affecting the brain and nervous system and developing the most appropriate and effective means of prevention, treatment, and rehabilitation, and through the timely dissemination of research findings and information that will promote neurological health.

Inherent in this challenge is the investigation of healthy and diseased brain, spinal cord, peripheral nerves, and the neuromuscular junction and muscle so that a more complete understanding may be gained of the abnormal processes that lead to neurological diseases. These investigations are conducted in hundreds of extramural laboratories and clinics throughout the United States and in the NINDS’ own intramural facilities in Bethesda, Maryland.

THE QUALIFICATIONS REQUIRED: Applicants must possess an M.D. and/or Ph.D. degree and senior-level research experience and knowledge of research programs in one or more scientific areas related to fundamental neurosciences, or problems in clinical neurology. They should be known and respected within their profession, both nationally and internationally, as individuals of outstanding scientific competence. Candidates should have demonstrated leadership of a research program involving dealings with outside groups and extensive planning, program assessment, and analysis of program objectives; the development of plans for the resolution of major operational problems and issues; and management of financial and human resources, including selecting, managing, and motivating staff using fair and equitable staffing/recruitment practices.

SALARY/BENEFITS: The Director, NINDS, will be appointed at a salary commensurate with his/her qualifications and experience. Full Federal benefits, including leave, health and life insurance, retirement and savings plan (401K equivalent) will be provided.

HOW TO APPLY: Applicants must submit a current Curriculum Vitae, and bibliography to: Ms. Carmen Garcia, Division of Senior and Scientific Employment, National Institutes of Health, Building 31, Room 3308, 31 Center Drive MSC2203, Bethesda, MD 20892-2203. Applications may also be sent via E-Mail to: garciae@od.nih.gov

APPLICATIONS MUST BE RECEIVED BY CLOSE-OF-BUSINESS JUNE 15, 2001

The NIH is an Equal Opportunity Employer.
Located on an attractive campus in the heart of Boston, Northeastern University is a premier research university that is student-centered, practice-oriented and urban. Founded in 1898 and the world leader in cooperative education, Northeastern offers Bachelor’s, Master’s and Doctoral degrees to approximately 24,000 full-time and part-time students in seven colleges. Applications are invited for the following positions:

**Associate Director**

**Financial Services System, Student Financial Services** - The Associate Director is responsible for the operation of PowerFaIDS, a client-server financial aid system accessed daily by staff to service over 20,000 students. As a key member of the management team, the Associate Director will bear primary responsibility for ensuring that PowerFaIDS supports the inquiry, reporting, coding, and data needs of the University and operations. The Associate Director will develop and execute PowerFaIDS training for new and continuing staff as appropriate. Bachelor’s degree required. Advanced degree preferred. Six years of business services experience required. Prior experience with a recent version of the PowerFaIDS product is critical as is prior experience in Financial Aid preferably in a private FEEL institution.

**New Student Orientation/Commuter Services** - Work with the Director in the development and implementation of the university-wide summer and quarter orientation programs. Coordinate and execute logistical operations and programming components including database administration and enrollment management in collaboration with faculty, administration and student services. Serve as the primary contact for participating campus offices and departments. Master’s Degree in higher education administration. College Student Personnel. Counseling or related fields. Minimum of five years of professional experience in higher education or student affairs administration.

**Assistant Director**

**Admissions** - Recruit, interview and counsel prospective students. Assess academic credentials and other application materials. Assist in the development of outreach and recruitment programs. Attired college fair. Bachelor’s degree with 1-3 years of experience in post-secondary admissions. Strong experience in recruitment procedures, travel scheduling, student counseling and group presentations.

**Financial Aid Counselor**

**Student Financial Services** - Advise students, parents and others on availability, eligibility, procedures and alternatives for financial aid. Calculate student need. Distribute Title IV monies and scholarships. Speak to various audiences, including workshops and meetings regarding the financial aid process. Bachelor’s degree plus two to three years of experience in student personal administration, preferably in financial aid. Knowledge of Title IV and Federal needs analysis. Working knowledge of computer systems and familiarity with data processing systems preferred.

For complete job descriptions please see www.nwu.edu. Candidates must have experience in or a demonstrated commitment to working with a diverse staff/student population. Send resumes to Angeline Andersson, 137 Richards Hall, Northeastern University, 360 Huntington Ave, Boston, MA 02115. Northeastern is an Equal Opportunity/Affirmative Action, Title IX Employer.

**Director for Learning Services Academic Programs and Services Department**

**MILLERSVILLE UNIVERSITY**

Responsible for the direction and leadership of the University’s academic and learning services with principal responsibility to plan, coordinate, and administer the University’s services for students with learning and/or physical disabilities. Duties include the coordination of tutoring services and the implementation of Supplemental Instruction with related programs as approved. It is essential that the Director of Learning Services be able to work effectively with faculty, students, administrators, and parents.

**Millersville University**, a comprehensive, student-centered institution, is highly regarded for its dedication to quality instruction, principles of diversity, and client services. The University employs 550 staff and 350 full-time faculty, and has an honored history of providing excellent teacher education and a strong liberal arts curriculum in the arts, sciences, and humanities. It has received national recognition as a top regional public institution and is listed as one of the 100 best values in public higher education in the nation. Additional information about Millersville University can be found at www.millersville.edu.

**Required:** A Master’s degree in Special Education, Psychology, Counseling, or a related field with training or experience in the interpretation of psychological tests and their application to learning disabilities; three years professional experience in providing comprehensive disability services to adolescents and adults; a demonstrated ability to interpret all documents relating to students with learning disabilities; a working understanding of the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, and disability laws as applied to higher education; a professional record that indicates high potential for administrative leadership; excellent organizational and analytical abilities; effective communication skills for interaction with faculty and students; knowledge of planning and database systems that support learning services; understanding of and commitment to higher education and diversity; and a successful interview. The successful candidate should have an understanding of and experience in disability culture.

**Preferred:** Managerial experience coordinating learning support services on the higher education level.

**Salary:** Based on qualifications; comprehensive benefits include fully-paid health care and undergraduate tuition waiver for employee/dependents.

Full consideration given to applications received by May 25, 2001. Send letter of application detailing experience as it relates to the qualifications, resume, and the names, addresses, and phone numbers of three professional references to: Learning Services, 202, Millersville University, P.O. Box 1002, Millersville, PA 17551-0302. An AA/EO Institution.

---

**SENIOR FACULTY POSITION**

**IN EXPERIMENTAL PHYSICS**

**Dartmouth College**

The Department of Physics and Astronomy at Dartmouth College invites applications for a senior level faculty position in condensed matter/materials or biophysics. Candidates should have demonstrated outstanding research accomplishments and have an established record of teaching both at the graduate and undergraduate level. The successful candidate will complement active groups in the areas of nanoscience and biophysics. Potential interactions with other faculty in the molecular materials program, engineering, chemistry, biology and the medical school will be viewed favorably.

Applicants should submit a CV including a full list of publications, a statement of research interests, a brief statement that highlights teaching experience, and a list of at least five referees to the following address: Faculty Search, Department of Physics and Astronomy, Dartmouth College, 6127 Wilder Laboratory, Hanover NH 03755-3528, USA.

Consideration of applicants will begin in April 2001 and will continue until the position is filled. Dartmouth College is an equal opportunity/affirmative action employer. We encourage applications from women and minority scientists.

---

**EASTERN MICHIGAN UNIVERSITY**

**Eastern Michigan University is an Equal Opportunity Employer**

www.emich.edu
Director of Student Centers

Your key role will be to provide overall management of the following areas: university student centers, food service, vending, and summer conference services. Reporting to the Associate VP of Student & Auxiliary Services, you must demonstrate excellent skills in the following areas: customer service, strategic planning, facilities management, project management, financial planning, personnel management, marketing, administration, food service, vending services, information systems, and student development theory. Master’s degree in appropriate field combined with 7 years full-time experience (5 of which must be in management) in university center/student union program with increasing responsibilities in the areas of personnel management, facilities and operations, management, planning and strategic planning. Computer literacy required, particularly in PC software applications. We are currently completing a new student center at our Lincoln Park campus. This state-of-the-art building will open in November 2001 and become an anchor for the university’s campus life. Minimum salary is $65,000 and includes excellent university benefits. The expected start date for the selected candidate is July 1, 2001.

Coordinator of Adult Student Services

Selected individual will be responsible for the overall leadership, vision and implementation of services to adult student learners at DePaul University. This population of over 10,000 learners is in educational pursuits at all of our 7 Chicagoland campuses. Reporting to the Associate Vice President for Student Affairs, you will oversee the entire operation which provides a variety of services for adult students as well as create new opportunities for adult students in the areas of area and regional community education. This position, located in the area of Area Education, is expected to be knowledgeable about the resources, needs and trends of adult learners. Master’s degree in Counseling or related field, 3-5 years of professional experience in the areas of planning, administration and coordination of innovation and programs in higher education; and 2+ years of adult student services experience required.

For the above two positions, interested candidates should submit cover letter and resume, indicating position preference, with at least three references by May 24th, 2001, to: Director of Student Centers Search, DePaul University, 1 E. Jackson Blvd., Room 1400, Chicago, IL 60604. Applications may be emailed to dabearnl@wppost.depaul.edu or faxed to 312-362-5671.

Director of Student Leadership Institute

Responsible for the overall leadership, vision and direction of DePaul University’s Student Leadership Institute. Specifically, you will design leadership development programs, activities and opportunities for undergraduate students; provide leadership and strategic direction to the Student Leadership Institutes; and supervise a team of student leaders. For the above two positions, interested candidates should submit cover letter and resume with at least three references by May 24th, 2001, to: DePaul University, Human Resources, 1 E. Jackson Blvd., Chicago, IL 60604. E-mail: wchipsi@wppost.depaul.edu Fax: 312-362-5175. DePaul University is committed to diversity in educational and employment. Individuals from underrepresented groups and diverse backgrounds are encouraged to apply. For more information about DePaul University, please visit our website at www.depaul.edu

ASSISTANT CHAIR

Social Sciences

The Department of Social Sciences at The New School invites applicants for a new part-time position as Assistant Chair. Working closely with the Chair and faculty, the Assistant Chair has primary responsibility for developing all on-campus and on-line courses. The Assistant Chair works with prospective and current faculty to initiate, refine, and assess courses and syllabi. Advanced degree and excellent written and verbal communication skills required. Experience teaching in an adult education context preferred.

Interested applicants should send resume and cover letter to: Liz Brown, Program Coordinator, NEW SCHOOL UNIVERSITY, 66 West 12th Street, Room 507, New York, NY 10011 or e-mail: NSU승 giveaways@newsschool.edu Please write Search #21049 in the subject line to ensure proper distribution of resume.

New School University

As a private university as well as its individual academic divisions, is committed to a policy of equal opportunity in all its activities and programs, including employment and promotion. It does not discriminate on the basis of race, color, national or ethnic origin, citizenship status, sex, sexual orientation, age, physical disability, veteran or marital status.
The University of Wisconsin System (UWS) invites applications and nominations for the position of Chancellor of the University of Wisconsin-Green Bay. UW-Green Bay was founded in 1965 and stresses a distinctive academic approach emphasizing "interdisciplinary" studies. Interdisciplinary majors apply knowledge from several subjects or disciplines to one field of study with "hands-on" learning. UWGB is an innovative public university of about 5,500 students and offers 35 undergraduate majors, 1 master's degree and 4 cooperative master's degrees. The North Central Association of Schools and Colleges accredits the University. The institution has a highly successful NCAA Division 1 athletics program. The university community includes approximately 545 employees, with about 200 faculty/instructional staff, 160 academic/administrative staff, and 185 classified personnel. The university has an operating budget of $67.9 million. UW-Green Bay seeks a chancellor with the capacity to lead an energetic institution within a large and dynamic public higher education system.

UW-Green Bay is one of eleven comprehensive universities in a public higher education system that also includes two doctoral institutions, a system of freshman-sophomore transfer colleges, and a statewide extension. The Chancellor of each UWS institution reports to the President of the UW System.

The position is available September 1, 2001. Application materials should include a letter of application addressing the attributes noted in the full position description that can be accessed on the World Wide Web by connecting to http://www.uwgb.edu/chairs/chance/search/contact.htm, curriculum vitae, and the names, addresses, email addresses, and telephone numbers of at least five references that include faculty, student, and community leaders. Submission of materials as a Microsoft Word attachment is strongly encouraged.

Evaluation of applications will begin on May 29 and will continue until the position is filled. In accordance with Wisconsin's Open Records Law, requests for confidentiality by nominees and applicants will be honored, if so requested, except that names and titles of the finalists must be disclosed.

Requests for information and written nominations and applications should be directed to: Professor Scott Furlong, Chair; Chancellor Search and Screen Committee; c/o Lynn Gilles, Office of Planning and Budget; University of Wisconsin-Green Bay; Green Bay WI, 54311-7001; email: furlongs@uwgb.edu; voice: 920-465-2061.

The Committee is being assisted by Jean Dowdall, Vice President, A.T. Kearney Executive Search. She can be contacted at jean.dowdall@akearney.com.

The University of Wisconsin is an Affirmative Action/Equal Opportunity employer and actively seeks and encourages applications from women, minorities, and persons with disabilities. It is our policy to provide reasonable accommodations to qualified individuals with disabilities who are employees or applicants for employment.
SEARCH EXTENDED
Position Announcement

[Founding Dean]

School of Natural Sciences, Mathematics and Engineering

Description: California State University, Bakersfield (CSUB) is extending the search for the Founding Dean of the School of Natural Sciences, Mathematics and Engineering (NSME). We seek an academic leader with vision and energy who will work collaboratively with the CSUB Science faculty who, over the past 30 years, have compiled a distinguished record in teaching, research, and service. Natural Sciences, Mathematics and Engineering offers baccalaureate and masters degrees in disciplines of biological and physical sciences and mathematics and in computer science and nursing. Our new Bachelor of Science in Engineering program will be housed in this school beginning in Fall, 2001. The School of Natural Sciences, Mathematics and Engineering also participates in a diversified baccalaureate degree in Liberal Studies for students interested in elementary school teaching. In addition, Natural Sciences, Mathematics and Engineering has established baccalaureate degree programs at the University’s off-campus center in Antelope Valley.

CSUB enrolled its first students in 1970 and is one of the 23 campuses in the California State University (CSU) system. In the Fall of 2000, CSUB enrolled 6,500 students (or 5,400 full-time equivalent students (FTES)). Of these students, (1,000) were majors in the department that now form the School of Natural Sciences, Mathematics and Engineering, with 60 full-time faculty members. The University’s diverse student body is reflected in the Fall, 2000 admissions which included students of the following groups: African American 127, Asian 172, Latino 568, Native American 34, and White 826, including undergraduate and graduate students. For additional information, please refer to the CSUB Home Page at [http://www.csusb.edu/].

The service region for CSUB is larger than West Virginia and includes the Southern San Joaquin Valley, the eastern Southern Sierra Nevada, and the western Mojave Desert. Bakersfield, the largest city in the region and among the fastest growing in the state, has a population of 247,000; the population of this service region exceeds 700,000. Bakersfield offers the amenities of modern city life and a relaxed lifestyle for families. Los Angeles and the Pacific Ocean are only two hours away. New housing is the best in the State for value and availability. Light industries and service businesses have expanded on the traditional economic base of oil and agriculture.

Responsibilities: The Founding Dean of the School of Natural Sciences, Mathematics and Engineering (NSME) is expected to provide leadership within the context of the CSU system and CSUB’s service region. The Dean is responsible for ensuring excellence in teaching, research and scholarship, and in community service; recruiting, hiring, and evaluating NSME faculty; academic planning, budgeting, and personnel management. The Dean is expected to work collaboratively with faculty and other academic administrators. The Dean will have major responsibilities in acquiring grants and contracts and engaging community leaders to establish partnerships that will enhance the School’s programs. The Dean represents the School within the University and to external constituencies.

Qualifications:
1. An earned doctorate and a record of teaching excellence, scholarly achievement, and other qualifications sufficient to merit appointment as a Professor in one of the disciplines in the School of Natural Sciences, Mathematics and Engineering;
2. Appropriate academic administrative experience preparing the candidate to perform the level and range of responsibilities described above;
3. Demonstrated success in the acquisition of external funding and the development of community partnerships;
4. A record of effective engagement with faculty, students, staff, university administrators, and members of the greater community; and
5. A demonstrated commitment to serving the University’s ethnically and culturally diverse population.

Applications and Nominations: Applications will be accepted until this position is filled. Completed applications must include the following:
1. Letter of application addressing the responsibilities and qualifications described above;
2. Current vita that includes the names, addresses, telephone numbers, and e-mail addresses of at least four references.

Nominations and applications should be sent to:
Dr. Thomas Meyer
Chair, Search Committee, NSME Dean
California State University, Bakersfield
9001 Stockdale Highway
Bakersfield, CA 93311-1099

Salary and benefits are competitive and commensurate with experience and qualifications. Appointment is expected to begin late summer 2001.

CSUB fosters and appreciates ethnic and cultural diversity among its faculty, students, and administrative staff. Applications from women, ethnic minorities, veterans, and individuals with disabilities are welcome.

BUFFALO STATE
State University of New York

SUBSTANCE ABUSE COORDINATOR
(Alcohol, Other Drug Prevention Coordinator)

Responsibilities: Provide leadership in development, presentation, evaluation of alcohol, other drug and violence prevention programming. Direct peer education programs and activities at student health center related to alcohol, other drug and violence prevention. Participate in all health center grants involving alcohol and violence prevention. Collaborate with campus staff and faculty/staff on alcohol and violence prevention programs. Gather data related to alcohol and violence and generate campus biennial report. Participate in volunteer program including training and evaluation of students. Evening and weekend hours required.

Required Qualifications: Bachelor’s degree. Two years experience working in substance abuse prevention education. Computer skills including Power Point. Public speaking, program development and implementation skills. Ability to function as part of a team.

Preferred Qualifications: Master’s degree in student personnel administration or related field. Experience in violence prevention education. Credentialed substance abuse prevention education specialist. Experience in college setting.

Review of applications will begin April 23 and continue until the position is filled. Send letter of application, résumé, to: Search Committee Chair, Alcohol, Other Drug Prevention Coordinator, Buffalo State College, Weigel Health Center, 1300 Elmdorf Ave., Buffalo, NY 14222-1265. For more information about the college, visit www.buffalostate.edu.

Buffalo State is an affirmative action/equal opportunity employer and encourages applications from women, racial/ethnic minorities, persons with disabilities, and Vietnam-era veterans.

COLLEGE LIBRARIAN

Occidental College seeks an experienced, dynamic, and creative leader for its College Librarian. The College is embarking upon an ambitious program to merge the Library and Information Technology functions and services, and we expect the new College Librarian to play a major role in this initiative as well as to oversee a reinvention of the traditional library functions. The position reports to the Chief Information Officer and is a full-time faculty position at the College. Specific responsibilities include the collaborative development of the library’s collections and services, allocation and control of the library’s budget, management of the library’s human resources, and identification of opportunities for the use of new technologies. The College Librarian will participate in library and campus committees, nurture and develop consortial relationships with other libraries and direct successful grant writing and fund raising efforts.

An ALA-accredited Master’s degree is required. We also expect candidates to have demonstrated leadership and management skills in an academic library. Experience in a private college library is highly preferred. Candidates must have an informed vision of the library in the 21st century and skills to advocate for and communicate that vision. Demonstrated achievements in fund raising, applications of technology, and consortial arrangements particularly desired. The College Librarian must understand the special place of the library in a liberal arts college and work collegially with faculty, students, and staff. The successful candidate will have demonstrated service orientation and excellent written and oral communication skills.

Occidental College is a small, highly selective, private liberal arts college located in Los Angeles. The College has a long tradition of excellence and equity and is consistently rated the most diverse small college in the country. It is also one of the most successful colleges at combining teaching and scholarship by its faculty, and in supporting research by its undergraduates. For more information about the College and the Library, visit our website at [www.oxy.edu].

Applications should send letter describing their qualifications relating to the position, a current vita, and the names, addresses, telephone numbers, and e-mail addresses of three current references to: Librarian Search Committee, Human Resources, Occidental College, 1600 Campus Road, Los Angeles, CA 90041. The search will continue until the position is filled.

Occidental College is proud of its outstanding record in the diversity of its student body, its faculty, and its staff. We are committed to improving that record.

OCCIDENTAL COLLEGE
Equal Opportunity Employer
The University of Florida, Institute of Food and Agricultural Sciences (IFAS), Sponsored Programs Office, is recruiting for a Director of Research Programs. If an accommodation due to a disability is needed to apply for this position, please call (352) 392-4621 or TDD (352) 392-7734. A/A/EEO.

USF University of South Florida

The University of South Florida invites nominations and applications for the position of:

**Associate Vice President for Diversity and Equal Opportunity**

Founded in 1956, the University of South Florida is a public research university of growing national distinction, serving 36,000 students in ten colleges on campuses in Tampa, Lakeland, St. Petersburg, and Dover Fl. It has been classified “Doctoral/Research University – Extensive” by the Carnegie Foundation for the Advancement of Teaching. Reflecting its breadth of graduate and research programs, USF is one of three public universities in Florida classified as a Research I Institution by the Florida Board of Regents. With more than 2,000 faculty, USF offers baccalaureate degrees in 79 fields, 89 master’s and specialist programs, 25 doctoral programs, and the doctor of medicine degree.

As a major metropolitan university, USF anticipates continuing growth in undergraduate and graduate programs and research. USF research programs attract $171 million in external research funding in 1999-2000. Major areas of research, scholarship, and creative work include marine biology, microbiology, children and family issues, aging, pedagogy, applied social and behavioral sciences, neuroscience, cancer, biomedical fields, environmental policy, and visual and performing arts. USF’s College of Medicine is affiliated with seven teaching hospitals: Tampa General Hospital, the H. Lee Moffitt Cancer Center and Research Institute, All Children’s Hospital (St. Petersburg), the Shriners Hospital for Children, the James A. Haley Veterans Hospital, Bay Pines Veterans Medical Center (Pinellas), and the Morton Plant Hospital (Clearwater). USF is increasingly engaged in research-based efforts addressing economic development and a wide range of urban issues.

For more information on the University of South Florida please visit the following website: http://usfweb.usf.edu.

**POSITION AND QUALIFICATIONS**

The University of South Florida seeks to employ an Associate Vice President to administer Diversity and Equal Opportunity programs and initiatives at the University. This is a highly responsible leadership position reporting directly to the Provost of the University on a continuing basis, responsible to the President of the University for periodic reports, and serving on the President’s Staff.

**JOB REQUIREMENTS**

The person holding this position will direct the activities of Diversity and Equal Opportunity Office and will be responsible for the development, administration, and coordination of University-wide diversity initiatives. This official will have primary responsibility for ensuring compliance with the University’s policies guaranteeing equal opportunity, access and equity. This official will also oversee the development and administration of a comprehensive educational program about diversity and equal opportunity, and will promote development of skills that will enhance the ability of the faculty, staff, and students to live, work, and interact productively in a diverse community. In issues of policy and practice related to diversity and equal opportunity, this official will assume a major advisory role to the President, the Provost and the other Vice Presidents.

The person occupying this position will interact with administrators, faculty, staff, and students of the University on a daily basis. This person will also represent the interests of the University in interactions with the local community and with State and federal regulatory bodies.

**MINIMUM QUALIFICATIONS INCLUDE:**

- A graduate degree in a field/discipline related to functional areas of responsibility; five years of post-graduate experience in the administration of diversity and/or EO/AA programs, including experience in compliance review, complaint investigations and resolution and development and monitoring of an AA plan; demonstrated leadership competencies; strong interpersonal skills; ability to use a PC and appropriate software programs; strong written and verbal communication skills.

**PREFERRED QUALIFICATIONS INCLUDE:**

- An earned doctorate or law degree; experience in diversity programs and/or EO programs in a university setting; record of participation in related professional organizations as demonstrated through offiﬁcers, board members, presentations, papers, and publications.

Salary is negotiable and competitive.

**APPLICATION PROCESS**

Send letters of application or nomination to: Dr. Barbara Morrison-Rodriguez, Chair, Associate Vice President for Diversity and Equal Opportunity Search Committee, Office of the Provost, University of South Florida, 4202 E. Fowler Avenue, ADM 226, Tampa, FL 33620. E-Mail: bmorrison@usf.edu

Letters of application or acceptance of nomination should be accompanied by current resume and the names and addresses of five references. References will not be contacted until advanced stages of screening, and candidates will receive prior notification.

The State of Florida has a Public Meetings Law and a Public Records Law and all university searches are conducted under these laws. All meetings of the Search Committee are publicly announced and conducted. All documents submitted to the Committee are treated as open material with the exception of evaluative documents specific to the performance of the faculty of the State University System of Florida.

Review of applications and nominations will begin on May 21, 2001 and continue until the position is filled.

The University of South Florida is an equal opportunity, affirmative action, equal access institution. For disability accommodations, please contact Ms. Huddie Sampir at (813) 974-2010 or TDD at (813) 974-1510 at least five working days in advance of need.

EMPLOYMENT OPPORTUNITIES

THE UNIVERSITY OF TEXAS AT BROWNSVILLE
and
TEXAS SOUTHMOST COLLEGE

Assistant Vice President for Administration and Partnership Affairs

Assist the VPAP in all areas of administration including Southmost Union Junior College District Board (SUJCD) activities; prepare agendas, conduct board meetings, preparation and management of budgets; serve on various committees, oversee the collection of data and preparation of state, federal and other agency reports; coordinate the acquisition of real property; assist in the management of SUJCD staff.

Master's degree required; doctorate degree preferred. Two years management experience in a position that require the following skills and abilities: writing and oral communication skills; program preparation and public speaking skills; ability to work with professional and non-professional staff within the campus community as well as local and state officials; ability to work in a dynamic, evolving environment that fosters enthusiasm for change and challenge.

Architect II

Meets with client to verify the understanding of the project scope and purpose. Prepares preliminary designs, cost estimates and time feasibility schedules. Prepares final design documents, specifications, and cost estimates for authorized projects. Coordinates involvement of civil, structural, mechanical and electrical engineers and interior design, team members, as well as outside professional consultants and project architects. Conducts project review sessions with client and other Physical Plant Staff. Consults with clients and administrative officials. Ensures compliance with all relevant codes and requirements. Inspects work in progress. Performs related duties as required.

Bachelor's degree in architecture required. Three years experience in the general practice of architecture and general construction required. More than five years of such experience preferred.

The University Setting: The University of Texas at Brownsville and Texas Southmost College is located in the lush, semitropical city of Brownsville, at the southernmost tip of Texas. Just 20 miles from South Padre Island and the Gulf of Mexico, and one hour from the state capital of Austin, the city is a mix of traditional and modern culture. Brownsville is the largest city in the Rio Grande Valley with a unique bilingual, bicultural population of more than 140,000 residents. The people of Brownsville and Matamoros cross the border daily to work, shop and conduct business. The city serves as the main thoroughfare into Mexico, ranked fourth in the United States with 9.26 percent of U.S. border crossing transactions.

Established in 1931, UTB is the newest of 15 component institutions operated by the University of Texas System. Following a community-wide vision, UTB formed a one-of-a-kind partnership with Texas Southmost College, a comprehensive community college. The partnership provides students with the broadest of a college education and a university, offering a seamless education from certificate programs and associate degrees, to bachelor and master's degrees, to a doctoral degree cooperative and a wide range of lifelong learning opportunities. Located on the grounds of historic Port Brown, UTB/TSC and SUJCD serves more than 9,000 students drawn from the communities of Brownsville, Matamoros and the surrounding areas.

Applications will be reviewed upon receipt and continue until the position is filled. Please submit a letter of interest, vita, transcripts (a copy will be acceptable for applying), and a list of five references with name, address, and telephone number to:

Columbia University

IN THE CITY OF NEW YORK

Senior Development Officer

Columbia University Graduate School of Journalism and the Columbia University Libraries are each seeking a Senior Development Officer. Reporting to the Assistant Vice President and Executive Director of University Development and Alumni Relations, the Senior Development Officer works in close collaboration with the Dean of the Graduate School of Journalism or the Vice President for Information Services and University Librarian. She/he will be responsible for the identification, cultivation, solicitation, and stewardship of gifts in the $50,000 to $1 million range from a portfolio of 200 to 250 active individual prospects. In conjunction with the staff, he or she will work to advance the development program to meaningfully engage alumni/prospective donors.

The successful candidate will be seasoned and creative development professional with at least five years’ experience in fund-raising, capable of organizing, implementing, and participating directly in a comprehensive fund-raising program with a high degree of professionalism, sensitivity, and integrity. A documented, proven track record of performance in solicitation of major gifts and significant experience working with faculty and/or volunteers are required. Outstanding written and oral communication skills, superior organizational ability, and an entrepreneurial spirit are essential. A bachelor’s degree is required; an advanced degree is advantageous.

Please submit nominations or expressions of interest to:

FAX: (334)464-2641
E-mail: dconner@aces.auburn.edu

Review will begin June 1, 2001 and continue until a suitable candidate is selected. The position start date is October 1, 2001.

Information on the All Poultry Product Safety and Quality Program can be found at www.ag.auburn.edu/dept/ph/geek.html

Auburn University is an Affirmative Action/Equal Opportunity Employer.
Freelance Item Writers

Law School Admission Council (LSAC), an educational service organization that develops and administers the Law School Admission Test (LSAT), wishes to contract with individuals to write multiple-choice questions for the LSAT. A Master's degree or the equivalent is required; a Ph.D. is preferred. Creativity and the ability to write in a clear, correct, and non-technical manner are also required. A broad background in liberal arts and experience in college teaching are highly desirable. A goal of this initiative is to increase the diversity of writers of LSAT questions.

Accordingly, inquiries from qualified women and minorities are strongly encouraged. Additionally, experience teaching at a historically black university or other educational institution with a large minority enrollment is highly desirable. Coursework or teaching experience in women's studies, Asian American studies, African American studies, Latin American studies or Native American studies is also highly desirable. Additional qualifications for writing specific types of LSAT questions:

ANALYTICAL REASONING: A degree in Philosophy, Theoretical Linguistics, or other discipline requiring strong analytical skills is needed. Training in formal logic or mathematical logic is highly desirable.

LOGICAL REASONING: A degree in Philosophy, Theoretical Linguistics, or other discipline requiring strong reasoning and analytical skills is needed. Training in formal and/or informal logic is highly desirable.

READING COMPREHENSION: A degree in Literature or other discipline requiring strong skills in writing, reading, and interpretation of texts is needed. For additional information, please contact:

Adam Thompson, Senior Test Specialist
Law School Admission Council
661 Penn Street, Newtown, PA 18940
Tel: 215-968-1267, email: athompson@lsac.org

Law School Admission Council seeks to diversify the pool of its test writers by recruiting college-level faculty members. We encourage applications from women and members of minority groups.

Housatonic Community College
80 Lafayette Boulevard
Bridgeport, CT 06604
E-mail: ho_schroeder@hcc.commnet.edu

Letter of application must be received or postmarked on or before Monday, May 21, 2001.

All applicants interviewed will be required to complete a state application form.

Housatonic Community College is an Affirmative Action/Equal Opportunity Employer. M/F. Members of protected classes are encouraged to apply.

ITHACA COLLEGE

POSITION ANNOUNCEMENT

ITHACA COLLEGE

Office of the Vice President and College Counsel

POSITION:
Director of Affirmative Action and Equal Employment Opportunity

RESPONSIBILITIES:
Ithaca College seeks an experienced leader who can serve as an active resource to the President, senior administration, faculty, staff, and students in the development and implementation of institutional policies and practices which further the College's commitment to diversifying the College's workforce. This individual will assist in the College's efforts to create a supportive environment for diversity. The successful individual will possess the qualities necessary to establish effective liaison with faculty, staff, and students. Specific duties include ongoing development, monitoring, and implementation of College search and selection procedures; collaborative development of programs and training for faculty, staff, and students which addresses a diverse workforce and student body, equity issues, and sexual harassment.

The individual will be directly responsible for ensuring compliance with all college, local, state, federal laws related to affirmative action, disability, and sexual harassment and will be responsible for investigating and resolving all reports of discrimination made by faculty, staff, and students. The Director of Affirmative Action reports to the President under the direction of the Vice President and College Counsel.

QUALIFICATIONS:
Master's degree is required. A Ph.D., J.D., or equivalent is preferred. With a minimum of 3 years of related experience, preferably in a higher education setting. The successful candidate will have strong organizational and leadership skills, be creative, have excellent communication and mediation skills, and possess the ability to work with groups representing diverse perspectives.

ITHACA COLLEGE:
Ithaca College strives to become the standard of excellence for residential comprehensive colleges, fostering intellect, creativity, and character in an active, student-centered learning environment. The College is the largest independent, comprehensive, residential college in New York State. The College offers approximately 5000 full-time students in five schools: Business, Communications, Health Sciences and Human Performance, Humanities and Sciences, and Music. The College is located about sixty miles southwest of Syracuse and fifty miles southeast of Rochester, combines rich cultural and commercial features within a diverse multicultural population and the spectacular scenery of central New York's Finger Lakes region. Cornell University, also located in Ithaca, enhances the cosmopolitan flavor of the community and provides abundant opportunities for cross-cultural activities.

APPLICATION PROCEDURES:
Submit a letter of interest, resume, and list of four references to:
Dr. Roger Richardson, Chair; Director of Affirmative Action Search Committee; Office of the Vice President and College Counsel; Ithaca College; 320 Job Hall; Ithaca, New York 14850-7005

SCREENING DATE:
Screening will begin immediately and will continue until the position is filled.

Ithaca College is an Equal Opportunity/Affirmative Action Employer. Members of protected classes (including people of color, persons with disabilities, Vietnam veterans and women) are encouraged to apply.

HISPANIC OUTLOOK 05/07/2001
One of the nation's most prestigious colleges, Dartmouth offers exceptional opportunities to the talented people who contribute greatly to our success. Our ongoing training, advancement opportunities, family-oriented environment, and host of academic, recreational, and cultural resources make Dartmouth an outstanding place to build your career. Be part of a tradition that represents excellence in learning, development, and achievement - a combination that means success for your career.

Director of MBA Admissions

The Tuck School of Business at Dartmouth invites nominations and applications for the position of Director of MBA Admissions. The Tuck School seeks a creative, dynamic individual with a significant record of accomplishment and leadership who will substantively contribute to the advancement of its MBA Program. The Director of MBA Admissions manages all of the activities of the Tuck Admissions Office, which is responsible for the recruitment, selection, and enrollment of a high quality international class of students.

Responsibilities
- The Director is responsible for the development of an overall admissions plan, and the development of a related marketing strategy that is consistent with the overall Tuck strategy.
- The School's selection and recruitment program places heavy emphasis on interviews, which are conducted both on campus and in major cities throughout the world. The Director oversees an active minority and international recruiting program.
- Other general recruiting activities include a number of corporate presentations, attendance at GMAC forums, a student host program, and an active follow-up program for admitted candidates.

Qualifications
- An MBA degree or an equivalent combination of education and experience is required.
- Previous strategic marketing and MBA admissions experience preferred. Must be willing to travel nationally and internationally.
- Strong interpersonal and administrative experience is necessary.
- Must be able to communicate with people of diverse backgrounds from the general public, all levels of university, and the business community.

Application deadline is June 1, 2001. Interested candidates should submit a cover letter and resume to the following address:

Elizabeth Roberto
Manager, Human Resource Office
The Tuck School of Business

Wesley Theological Seminary
Announcement of Positions

Pastoral Theology and Congregational Care

WTS seeks to fill a tenure-track position. Teaching needs include core courses in pastoral care and counseling, with expertise in the areas of group process, bereavement, chemical dependency, human sexuality, and family systems theory. Candidates should have a disciplined knowledge of the field of pastoral care, with an emphasis on contextual, inter-cultural, and communal approaches to congregational healing. Competence in the critical psychological and social sciences as well as theology is expected. Candidates should also have a deep concern for the formation of religious leaders and a personal history of engagement in the local church. Involvement in the church at the judicatory and ecumenical levels is desirable. Ph.D. required; M.Div. or equivalent degree preferred. Certified membership in AAPC and/or APCE is preferred. Rank: open. Position begins July 1, 2002. Deadline: October 1, 2001.

James Cecil Logan Professor of Evangelism

WTS is continuing a search for an opening in a tenure or tenure-track position beginning with the academic year of 2002-2003. Candidate should hold a Ph.D. degree in one of the theological disciplines and be able to communicate commitment to the evangelistic ministry of the church with spiritual conviction and intellectual integrity. Experience with a variety of church settings and connectional and ecumenical relationships is expected. In addition, candidate must possess the ability to assist seminarians in the formation of their personal lives for authentic ministry in and to the contemporary world. Candidate will be expected to teach in such areas as theology of evangelism, new congregational development and re-formation of existing congregations, cross-cultural communication of the gospel, evangelism in a multi-cultural society, and the inter-face between Christian faith and a culturally and religiously pluralistic society. Knowledge of the global dimensions of evangelism, including missiology, would be an asset. Candidate must possess a sound knowledge of the Wesleyan tradition. Applicants should demonstrate scholarship in evangelism studies and the broader missional outreach of the church. Ordination and active participation in the life of a congregation are expected. Rank and compensation will be commensurate with experience. Deadline: October 1, 2001.

Interim Associate Director of the Practice in Ministry and Mission Program

WTS seeks to fill this interim position from July 1, 2001 through December 31, 2002. Responsibilities include coordinating placement process for contextual education programs (M.Div., M.A., Student Pastors, Urban Ministry), assisting with cross-cultural immersion requirements, conducting theological reflection colloquies, orienting learning partners and teaching congregations, conducting site visits, advising students, and general program administration. Experience with contextual education and Ph.D. or D.Min. related field desired. Position will remain open until filled.

Persons interested in applying should send a resume with a cover letter describing their suitability for the position, and direct letters of reference to: Dr. Bruce C. Birch, Dean, Wesley Theological Seminary, 4500 Massachusetts Avenue, NW, Washington, DC 20016 (send e-mail to: bbrich@wesleysem.edu). EOE/AA.
COLUMBIA UNIVERSITY
Development Officer
Community Impact

The Development Officer will implement and develop an effective strategy for this exciting student volunteer service organization. The position will entail the general organization and administration of a fund-raising plan including proposal writing, direct solicitation, and working with alumni and others to bring about a successful strategy.

The successful candidate will have the required bachelor's degree or its equivalent and three to five years' development and nonprofit organization experience. Excellent communication skills, both written and verbal; ability to prioritize multiple tasks, including prospective relationships and to work autonomously under pressure of deadline. Computer literacy and database experience essential.

This is a grant-funded position. Please submit resumes via e-mail to columbia@webhire.com or fax to (800) 438-6942. Visit the Columbia Web site for reference number. The Web site address is www.hr.columbia.edu/hr, or you may mail your resumes to Columbia University P.O. Box 920, Burlington, MA 01803

Columbia University is an affirmative action/equal opportunity employer.
Vice-Provost for Enrollment Management and Services

Cleveland State University (CSU) invites applications and nominations for the newly created position of Vice-Provost for Enrollment Management and Services. This position, reporting directly to the Provost and Senior Vice President for Academic and Student Affairs, coordinates and leads university-wide efforts in recruitment and retention.

RESPONSIBILITIES: The Vice-Provost for Enrollment Management and Services has primary responsibility for developing, implementing, coordinating and assessing a comprehensive and effective enrollment management program for CSU. This position focuses on developing the character, number and diversity of all new students entering the University as well as retention success while enrolled through graduation. The Vice-Provost must also take into account CSU's commitment to the mission of an urban university and to maintaining a highly multicultural student body. The Vice-Provost leads the campus-wide effort to improve institutional practices that positively influence transition to college, college and major choice, student satisfaction and retention and student success. This responsibility includes leadership for all operations of the Offices of Admissions, the Registrar and Financial Aid.

In accomplishing these responsibilities, the Vice-Provost for Enrollment Management and Services is required to work collaboratively with deans, faculty, administrators, staff and students to create and maintain a university-wide focus on student satisfaction. These areas include academic colleges, academic support services, student affairs, minority affairs, financial affairs, public relations, student life and alumni organizations. The Vice-Provost serves as the chief spokesperson on enrollment issues and as a conduit for the educational needs of the Greater Cleveland and Northeast Ohio community.

QUALIFICATIONS: Master's degree or equivalent combination of training and experience. Doctorate preferred. Minimum of seven years of higher education experience that must include: (1) leadership responsibility either for enrollment services and/or admissions; (2) extensive responsibility for marketing; and (3) experience working with information technology systems and technology tools designed for enrollment management. A total of ten years of experience is preferred, including the required seven years in higher education plus any additional related experience in the corporate or higher education sectors. Demonstrated success in achieving enrollment management goals. Demonstrated ability to supervise and coordinate multifunctional teams. Working knowledge of organizational practices and policies in a variety of higher education areas such as academic affairs, student affairs, finance, facilities, human resources, budgeting, marketing and athletics preferred. Demonstrated ability to interact and communicate effectively with diverse public constituencies preferred.

THE UNIVERSITY: Cleveland State University is a public, comprehensive university serving Cleveland and the northeast Ohio region, enrolling some 15,000 students and employing 550 faculty and more than 1,000 staff. The metropolitan Cleveland area approximates a population of 5 million people and features a thriving business community, including 21 Fortune 500 corporations, a growing "high-tech" manufacturing sector, and a strong infrastructure in support of regional economic development. The Greater Cleveland area offers an outstanding quality of life, combining the cultural and other amenities of a large city with a wide choice of attractive communities in which to live. Cleveland has outstanding cultural, recreational and intellectual opportunities. It is one of America's greatest and most well-established cities. The University has a strong urban tradition, serving Greater Cleveland as a community leader in accessible education. Cleveland State University provides educational opportunities to many diverse and talented students living throughout the Greater Cleveland and Northeast Ohio area. For more information about CSU, please visit our Web site at www.csuohio.edu.

COMPENSATION: Salary is very competitive, based upon qualifications and experience. Cleveland State University offers its outstanding benefit package that includes medical, dental, vision, disability and life insurance as well as tuition assistance.

This is a twelve-month position, available June 2007. To apply for the position, please send a letter of application outlining your experiences and success in higher education in the areas of admissions and retention and your resume with the names, addresses and telephone numbers of 5 references to: Search Committee, Vice Provost for Enrollment Management and Services, c/o Provost's Office, Cleveland State University, Rhodes Tower 1209, 1890 East 22nd Street, Cleveland, Ohio 44114-4355; e-mail: JMcLoughlin@csuohio.edu; phone (216) 687-3583. Review of applications will begin immediately and continue until the position is filled. Cleveland State University is an AA/EOE committed to nondiscrimination. M/F/D/V encouraged.

DOMINICAN UNIVERSITY OF CALIFORNIA

Position: Biology
Institution: Dominican University of California
Location: CA

Biology, Chair, Department of Natural Science and Mathematics and Associate Professor, Biology at Dominican University of California, San Rafael, California. 2-year tenure track faculty position with release time for program administration beginning July 1, 2001. For full position description and application information go to www.dominican.edu and click on "Jobs at Dominican." EOE.
Knox College
Business Office
Galesburg, Illinois 61401-4999

Admission Officer
Assistant/Associate Director or Counselor
Multicultural Emphasis

Knox College invites nominations and applications for two positions in the Office of Admission. The emphasis of both positions will be on developing and coordinating strategies to recruit students of color, with a focus on African-American students and the other on Latino students. Successful candidates will be responsible for a full range of recruitment activities within a geographic territory, which include representing the College at off-campus events, counseling prospective students, conducting interviews, and evaluating applications.

Applicants should demonstrate exceptional verbal and written communication skills, an outgoing personality, effective organizational and analytical abilities, an interest in working with persons of diverse backgrounds, and an appreciation for the value of residential, liberal arts education. Prior experience in college admission, particularly in a selective college environment, is desirable. Title (Counselor, Assistant Director or Associate Director) and compensation will be commensurate with experience.

To apply, submit a letter of application, including a description of your qualifications, along with your resume to Paul Steen, Director of Admission, Knox College, Galesburg, Illinois 61401. Review of applications will begin immediately and continue until the positions are filled.

Knox College, one of the nation's forty "Colleges That Change Lives," is a community of 1,200 students and 350 faculty and staff with a long-standing commitment to providing access and opportunities to all qualified students. The Office of Admission seeks a staff that reflects the diversity of our community.

VICE-PRESIDENT FOR STUDENT LIFE

Manhattan College is a Catholic coeducational institution of higher learning in the Lasallian tradition offering degree programs in the arts, business, education, engineering and science. Located in the Riverdale section of New York City, the college has approximately 3,200 full and part-time undergraduate and graduate students enrolled in over 40 fields of study. The faculty/student ratio is 1:13. The College is committed to excellence in teaching a diverse student body and preparing students for successful careers and fulfilling lives.

Reporting to the President, the Vice-President for Student Life is a member of the President's Executive Cabinet and oversees Admissions/Financial Aid, Athletics, Campus Ministry/Social Action, Career Services, Counseling Center, Dean of Students, Food Services, Health Services, Residence Life, Student Activities and Security.

Qualifications: Although an earned doctorate and extensive experience in Student Services Administration is highly preferred, we are open to candidates with doctorates and experience in related and non-traditional areas.

Manhattan College is seeking a professional who:
1. In addition to giving support to our Campus Ministry/Social Action and Counseling Departments, is able to assure that the College's Catholic values and morals remain the foundation for the lived culture in our Resident halls.
2. In view of the growing percentage of students who choose to reside on campus, is able to enhance and expand our array of student activities, especially those that our more academic in nature.
3. Understands the potential and pitfalls of a Division I Athletic Program noted for its very high graduation rate, gender-equality compliance, and conference competitiveness.
4. Is able to collaborate with the Assistant Vice-President for Enrollment Management to assure continuing achievement of recruitment goals and improvement in our already strong retention rate.

Applications must be received no later than May 28, 2001. Please send a resume, cover letter, three references and salary requirements to: Ma. Barbara Fabo, Chair, Search Committee, c/o Human Resources Department.

DEAN,
COLLEGE OF ALLIED HEALTH SCIENCES

(573N) The University of Cincinnati invites applications and nominations for the position of Dean of the College of Allied Health Sciences.

Founded in 1819, the University of Cincinnati, a state-supported research institution, offers 450 academic programs on five campuses including a major medical center. The total enrollment is 33,180 including more than 5,000 graduate students. The University's annual budget is more than $700 million and its endowment approaches $1 billion, making it the 40th largest university endowment in the nation and 15th among public universities. The University is also among the nation's top institutions in income from patents.

The College of Allied Health Sciences is a new college, founded in 1998 as part of the University Medical Center. CAHS offers undergraduate, masters and doctoral programs. The academic programs include: Communication Sciences and Disorders, Dietetics and Nutrition, Genetic Counseling, Medical Technology, Advanced Medical Imaging Technology, Physical Therapy, and Physical Therapy Assisting. At the present time, the College has 40 full-time faculty, 275 undergraduate students and 415 graduate students. As part of the Medical Center campus, the College enjoys collaborative relationships with the College of Medicine, the College of Pharmacy, the College of Nursing and Health, and the Children's Hospital Medical Center. A leader in research and medical education, the University of Cincinnati Medical Center received over $140 million in grant funding in 2000. Several of the departments are ranked in the top ten among peer departments in medical schools across the nation.

More information about the College of Allied Health Sciences and the University of Cincinnati is available at our Website, http://www.uc.edu.

Nominations and applications for the position of Dean of the College of Allied Health Sciences are being accepted at this time. The Dean should be a person with strong leadership skills and a vision for the future of the health professions. The successful candidate for this position should possess the following qualifications:

- An earned doctorate in a health-related field or in a discipline related to the health professions, the bio-medical sciences or health education.
- A distinguished record in teaching, scholarship and service appropriate for an appointment at the rank of professor.
- Experience in academic administration including budget administration, faculty development, strategic planning, personnel management, and new program development.
- Experience in interdisciplinary collaboration in research and teaching.
- Demonstrated leadership skills and superior interpersonal and communications skills.
- Ability to develop a vision for increasing enrollment in existing programs, for the development of new undergraduate programs and expansion of graduate programs, and for increased research funding.
- A commitment to enhancing diversity and equity with a particular emphasis on increasing diversity in the student population.
- An understanding of current and emerging issues in the allied health professions.

Completed applications should include a statement of interest (noting control #), vitae, and three letters of reference including contact information for those providing the letters. Review of applications will begin on May 25 and continue until an appointment is made. It is anticipated that the dean will begin his or her tenure on or before January 1, 2002.

Please send nominations or applications to: Barbara Leitow, Office of the Senior Vice President and Provost for Health Affairs, University of Cincinnati Medical Center, PO Box 870963, Cincinnati OH 45267-0663. Visit our Website at: www.uc.edu/

The University of Cincinnati is an affirmative action/equal opportunity employer. Women, minorities, disabled persons, Vietnam-era and disabled veterans are encouraged to apply. UC is a smoke-free environment.

ACADEMIC SERVICE TO THE LATINO COMMUNITY

The Latino journey from community to campus has not always been easy, although the increased number of Latino students, staff, and faculty might indicate there are fewer obstacles than before. Will this increased number bring parallel improvement in their communities? Will the number finding their way to the campus continue to increase? And will they be successful while there? The answers are closely related to the degree of involvement of those on campus with the communities that surround them.

In a recent article, "Too Few Universities Answer the Call of Cities," Neal R. Peirce of the Washington Post Writer's Group, criticizes the academic world and those who inhabit it. While noting the contribution that universities make to the economic, health, and social well-being of the surrounding communities, he asks, "Could our colleges and universities, into which we've poured so much of our public and private wealth, do more to help the urban regions of the nation that now are so deeply afflicted by rising crime and ethnic group polarization?" He then answers the question: "Faculty, graduate students, and undergraduates could all be involved in research and extensive experiential learning, working with neighborhood leaders who know the situation 'on the ground' to explore solutions to these perplexing and dangerous problems of our time."

For those who have tried to help the university break down academic walls and reach out, this situation represents a great opportunity. But there are impediments. Some are deep-rooted and not easily overcome, but a few are not insurmountable. They include:

- ACADEMIC ISOLATION, closely related to academic freedom and part of the self-selection process that often lures professionals with the promise that they can "do their own thing"—without constant supervision;
- EMPHASIS ON THEORY, rather than practical skills, which often provides great ideas but few techniques for solving problems;
- HEAVY TEACHING LOADS that allow little time for active community service;
- TENURE, PROMOTION, AND RAISES based on campus-based activities of teaching, research, and writing rather than community service.

The net result—there is often no payoff from community service for profes-
More Latino Accomplishments
Pitzer College seeks its fifth president, a person of exceptional energy and passion. This leader will look forward to challenges and be adept at identifying inventive, exciting, attainable opportunities for our young, but now mature, college. We envision a leader who, by the demonstrated example of past experience, can:

- Promote a commitment to learning and to the liberal arts, and to the engagement of that learning in responsible action.
- Embrace, reinvigorate, and gain recognition for the distinctive aspects of Pitzer's curriculum, pedagogy, and research goals.
- Represent and support Pitzer's commitment to the importance of empowering student academic autonomy in the context of a residential community.
- Support faculty scholarship and creative work.
- Foster open and participatory governance that includes faculty, students and staff of the college.
- Build ties between the Board of Trustees, the emerging alumni and the entire campus community and continue to build a strong Student/Alumni/Board base for the college.
- Demonstrate interest in and commitment to student life issues and be a presence on campus.
- Develop and lead an effective, talented, and committed staff.
- Continue, advocate and strengthen the college’s commitment to diversity.
- Manage conflict creatively and successfully.
- Advance the common goals of the Claremont Colleges Consortium and represent Pitzer's perspective in the Council of Presidents.
- Build endowment activity by the successful completion of the current comprehensive campaign, the oversetting of the master planning process, and the immediate launching of a program for capital campus development and building renovation.
- Articulate the intellectual mission of the college before different audiences in a wide variety of forums.
- Seek opportunities to invigorate the intellectual lives of students, faculty and staff.
- Represent the college as an exemplar of its mission and values.

College Profile

Founded in 1963, Pitzer College emphasizes closely affiliated student relationships and a strong democratic ethos. With about 1,300 students, Pitzer College is one of the five undergraduate colleges and two graduate institutions that comprise the Claremont Colleges Consortium. The campuses are physically contiguous and share a central library, bookstore, medical center and other facilities. Joint programs are available in the sciences, music, theatre and interdisciplinary studies.

Pitzer's educational philosophy emphasizes the development of students' autonomy within the context of a residential community. Students create academic programs in close collaboration with their academic advisors. Those programs pursue Educational Objectives that focus on interdisciplinary perspectives, intercultural understanding, and social responsibility. The Educational Objectives also include the acquisition of a broad knowledge in the arts, humanities, social and natural sciences combined with in-depth knowledge in a particular field of study. Throughout the curriculum, Pitzer College integrates the development of critical thinking, formal analysis, and effective oral and written expression.

Pitzer's commitment to democratic participation is seen in the inclusion of student representatives on the College's standing committees. Students, staff and faculty participate in Council College, Pitzer's decision-making body. Pitzer's alumni and trustees are actively engaged in supporting the vision, goals and objectives of the College.

Pitzer celebrates cultural diversity and intercultural understanding. Ethnically diverse students come from all over the United States and nearly 20 other countries. Students are encouraged to participate in one of Pitzer's many language and cultural immersion programs. These include Botswana, China, Costa Rica, Ecuador, Italy, Japan, Nepal, Ontario (California), Turkey, Venezuela and Wales, as well as other locations.

Pitzer fosters interdisciplinary perspectives in individual courses and in many of its programs. Students may concentrate in a current array of 19 explicitly interdisciplinary programs.

Pitzer develops personal and social responsibility by emphasizing a concern for the social, ethical and intellectual implications of knowledge and action. Pitzer students take courses that embrace this objective and can participate in numerous community-based research projects here and abroad.

The College is currently engaged in several endeavors to advance its educational mission. It is building endowment funding to increase student and faculty diversity through scholarships and professorships. Pitzer is engaged in a Master Planning process to reinvigorate the residential living and learning environments. It is exploring ways to further invigorate intellectual life at the College through, among other things, enhanced support for faculty scholarship and creative work, curricular development, and campus-community partnerships in learning.

Application/Nomination Information

Applications and nominations should be directed to:

John N. Tierney, Chair
Presidential Search Committee • Pitzer College
1140 North La Brea Avenue
Los Angeles, CA 90038

Applications should include a letter of interest, detailed vita, and the names, addresses, and phone numbers of at least five references. Applications and nominations will be accepted until the position is filled.

Miami University invites applications and nominations for the position of Director of Equity and Equal Opportunity as our current Director, Dr. Gary Hunter, is retiring after 22 years of distinguished service. The new Director (and his or her staff) will work with campus-wide constituencies to provide the leadership and vision necessary to advance the University's goals of creating a more diverse workforce and a more welcoming and inclusive environment for all. This position will report to the President with a dotted line to the General Counsel.

Miami University is ranked as one of the premier public universities in the United States and is especially noted for the quality of its academic programs, its distinguished faculty and its high graduation rates. Miami is the most selective public university in Ohio and among the most selective of all public universities nationwide. Miami employs over 4,500 full-time faculty and 2,500 staff members. Miami has an enrollment of 16,000 students on its main campus in Oxford, Ohio. The University, located near Cincinnati, is renowned for the beauty of its 2,000-acre campus. There are also two regional campuses, located in Hamilton and Middletown, Ohio, and the John E. Dobbins European Center in Luxembourg.

Additional information about the University can be found at www.muohio.edu

The Director will ensure compliance with all aspects of affirmative action requirements and related programs, including preparing and monitoring the plan and other University efforts. In addition, the Director will work with hiring departments to develop diverse pools of candidates for faculty and staff positions; ensure compliance with fair employment hiring policies and procedures; investigate and respond to complaints of harassment and discrimination; coordinate disability issues related to faculty and staff; address issues of equity, based on gender and sexual orientation; and assist other campus departments in providing training regarding affirmative action and equal opportunity issues.

Qualifications include a Bachelor's degree; at least three years experience working in Human Resource Administration, Equal Employment Opportunity or Affirmative Action in the public sector or higher education; knowledge of affirmative action and equal opportunity laws, regulations and policies including experience with the EO/EOC, OCFP and other relevant government agencies; investigation and conflict-resolution skills; strong analytical and writing skills along with experience in analyzing statistical data; and strong interpersonal and communication skills. Preferred qualifications include an advanced degree (J.D., Master's or Ph.D.) and experience in a public university.

Salary is competitive and commensurate with experience and other qualifications and is candidate is eligible for University provided benefits.

Screening of applications begins May 15th and will continue until the position is filled. Interested candidates should send a cover letter, resume and list of three references to:

Ms. Kate Stoss
Office of Personnel and Benefit Services
179 McGuffey Hall
Miami University
Oxford, OH 45056

The University may request writing samples and references during the search process. This search is subject to the provisions of the Ohio Public Records Act. Miami University offers equal opportunity to education and employment and encourages candidates with diverse backgrounds to apply.

Miami University's Campus Crime and Safety is available at www.muohio.edu/police.

A hard copy may be obtained by contacting the Personnel Office.

HISPANIC OUTLOOK 0 05/21/2001
Mathematics Education and the 21st Century

BY GUSTAVO A. MELLANDER

When many of us went to college, mathematics was arcane and something some of us struggled through. Eventually we were told it really wasn't that important. We were encouraged to concentrate on those subjects we enjoyed and in which we excelled.

The wheel has turned. Now we are told that unless children master mathematics, they will not succeed in college. Further, their life opportunities will be limited. At the same time, we are told that our education system doesn't prepare our students properly in either mathematics or the sciences.

Washington, D.C., has studied the issue for years. A new report from the National Research Council states that students' progress toward proficiency in mathematics requires major changes in instruction, curricula, and assessment.

"Too few students leave elementary or middle school with adequate mathematical knowledge, skill, and confidence for the nation to be satisfied with the condition of school mathematics," said Jeremy Kilpatrick, chair of the committee that wrote the report.

To successfully develop all aspects, a coordinated and systematic approach to mathematics education is required. Simply developing speed in pencil-and-paper arithmetic might have been sufficient for our parents and grandparents, but today's students need a deeper understanding of mathematics to thrive in an increasingly technical economy. Improvement requires a comprehensive and sustained effort among policymakers, administrators, teachers, university faculty, parents, and others to enhance both instruction and achievement.

Knowledge of mathematics is important for making sense of a high-tech world, yet the nation's approach to mathematics has been inconsistent and marked by an emphasis on routine arithmetic—often with a heavy dose of memorization and repetition, the committee said. Furthermore, recent studies have shown that many elementary and middle school teachers have only a shaky grasp of mathematics themselves and often are unable to clarify key concepts for students or solve problems that involve more than basic calculations.

Such failure to more fully explore mathematics limits an individual's potential and hampers national progress by insufficiently preparing future workers and citizens, the report points out. Results from state, national, and international assessments conducted over the past 30 years indicate that U.S. students can adequately perform straightforward computational procedures but tend to have a more limited understanding of fundamental mathematical ideas. They also have trouble applying mathematical skills to solve even simple problems. These trends could impede the academic advancement of at-risk students.

Paramount in the report's recommendations is the finding that the nation can and should groom all students to be "mathematically proficient," mastering much more than disconnected facts and procedures. Moreover, this target should drive school-improvement efforts.

Five intertwined and equally important strands comprise the committee's definition of mathematical proficiency.

First, capable students should be able to understand and apply important concepts. They also should be able to compute with ease, formulate and solve problems, and explain their reasoning. Finally, they should have confidence in their abilities and view mathematics as a sensible and worthwhile subject. Each strand requires constant attention.

The committee concentrated on how students learn about numbers and operations. Relevant research was abundant in those areas, and debates over mathematics curricula and instruction in elementary and middle schools often center on arithmetic. Nonetheless, the goal of proficiency also applies to other important areas of mathematics, including algebra, geometry, and statistics, according to the report.

The ideal curriculum should link calculation to everyday situations to help students make connections. Numbers and operations can be illustrated in various ways. For example, one-half could be shown as a fraction, a decimal, a percentage; a point between zero and one on a number line; or as a shaded portion of a figure.

Role of Colleges and Universities

To better prepare teachers for elementary or middle school math instruction, colleges and universities should create programs or courses that emphasize thorough knowledge of mathematics and of the processes through which school children come to understand the subject, the committee said. On the job, schools should give teachers more time and other resources—such as continuous and high-quality training, as well as useful instructional materials—to acquire a solid understanding of mathematics and improve their techniques.

Proficiency is an ambitious goal. But the United States will never reach it by continuing to tinker with the controls of education policy, pushing one button at a time. In recent years, many states and school districts have raised academic standards in mathematics, introduced new assessments, and offered teachers new professional-development opportunities. But these efforts have been fragmented.

While a solid base of scientific evidence supports the committee's call for immediate action to help all students become mathematically proficient, I suggest additional research is needed to shed more light on the elements of successful mathematics teaching and learning, as well as on those obstacles that block progress. The fruits of such investigation, coupled with data from systematic evaluation of programs and initiatives, could encourage improvement efforts.

Seems like ideal projects for our universities and colleges to undertake.

Dr. Mellander is a professor at George Mason University.

---

14-9 05/21/2001 O HISPANIC OUTLOOK 5
¡Hola!

Much of what we know about our foremothers and forefathers and their settlement in the U.S. had not been documented in textbooks but disseminated through cultural lore and passed on from previous generations. That is until recently when a movement in earnest to recapture and record our history has taken place. These archives not only detail how and when various immigrations arrived, their struggles, accomplishments, and contributions to American history, but also debunk certain historical assumptions. One of our features, entitled "Recapturing Latino History – Document by Document" examines this progression: "In these historical archives are old photographs depicting men working alongside women, and Blacks alongside Whites, in tobacco factories. . . . There was an alternative to Jim Crow, and it existed here in Tampa," Patrick Riordan, the director of the University of South Florida's Resource Center for Florida History and Politics, explains, "and it can be studied through the records of social clubs, and there was an alternative to gender stereotyping, and that, too, can be studied in these records."

However, the volume of material available is not even distributed across ethnic groups. "Many a campus these days can boast of compilations of textbooks and novels reflecting Hispanic heritage and African American culture. Often the collections are linked to an ethnic studies department. But a clamor is rising for higher education institutions to turn the page and broaden the diversity of their offerings."

Some higher education institutions, such as University of Texas at Austin, Stanford University, the City University of New York's Center for Puerto Rican Studies, and the University of South Florida, are recognized for their ethnic studies collections. Needless to say, there is room for more. The return on investment would be worth it for colleges and universities to broaden or even begin to develop these cultural archives.

Next, HO will devote many of its pages to education in the health professions and health care issues. Several feature stories include: expanding the number of nursing graduates in San Diego, preparing tomorrow's Hispanic M.D.s, and the changing face of health care.

M. Sarsenat
TITO GUERRERO
RIGHTING THE SHIP

Grants and Diversity Rising at USC

BY MICHELLE ADAM

Tito Guerrero, III, built a solid track record at Texas A&M University at Corpus Christi for 21 years before accepting the post of president at the University of Southern Colorado in Pueblo, Colorado, four years ago. He had climbed the ranks from assistant professor, dean of students, and vice president of student affairs—His first—to his last post there—provost and vice president of academic affairs.

Although extremely successful during his tenure at Texas A&M, where he was responsible for doubling faculty size, quadrupling University funding, and expanding academic offerings—his eyes were on the gold. “By the time I became a provost, I already had in my mind the desire to be a president someday,” said Guerrero. “There’s probably a certain amount of ego in thinking that I could make an important contribution.”

Guerrero recounted how he became president of the University of Southern Colorado. “My former boss, Robert Furgason, who is the current president of Texas A&M-Corpus Christi, and I were talking about the possibility of my moving on and seeking the presidency. A year before an opening for the presidency here at USC occurred, he said, ‘You know, Tito, one of these days, if the University of Southern Colorado is ever looking for someone, you really ought to look at it. It’s a phenomenal place to work.’” Much to Guerrero’s surprise, USC did announce an opening, and, of course, he applied. The result speaks for itself.

“I am going to guess that some of the factors that played into their decision to hire me had to do with the fact that I had a fairly stable career at Corpus Christi. I didn’t climb the academic ranks by moving from one institution to another, but rose through the ranks at one institution. I think that communicated to folks that I made commitments for the long haul,” said Guerrero.

Other factors that perhaps attracted USC to pick Guerrero were his track record in diversifying faculty and staff, his prior success in increasing university funding, and his ability to unite others and garner support for a cause. All of this was of grave consequence to USC, which, at the time of Guerrero’s hire, had been experiencing a long-term decline in enrollment.

“The order of the day was to do something about our enrollment decline. I am pleased to say we have been able to turn that situation around,” said Guerrero.

Four years later, the record reflects success. Described by the local newspaper as “righting the ship,” Guerrero has not only reversed enrollment decline but has brought more diversity, money, and community outreach to the University.

In terms of numbers, the past two years at USC have witnessed an increase in enrollment from a six-year decline, counting a 9 percent increase in first-year-student enrollment in 1999 and an additional 7 percent this past year.
"The proof is in the pudding—we are seeing some very positive indicators," said Guerrero. Asked how he accomplished the feat, Guerrero pointed toward his University-wide effort of outreach. He visited and built relationships with local high schools and community colleges in the area, as he did with local movers and shakers such as city government, the Chamber of Commerce, and advocacy groups.

Guerrero was also proud to point out that the enrollment increases have not been without diversification. "All minority enrollments are up," he said. The effect of this has been that for the first time, this past year USC achieved Hispanic Serving Institution status, which means that more than 25 percent of its approximately 4,000 students are Hispanic. To be specific, about 272 percent, according to Guerrero's estimates of this past fall. "As an HSI, there are certain procurements that we can compete for that institutions not HSIs cannot," said the president.

Already benefiting from the new HSI status, USC has been awarded a $100,000 grant from the W.K. Kellogg Foundation to develop a new community-wide approach toward keeping Hispanic students enrolled. The University will partner with 14 educational and civic groups across Southern Colorado to find ways to help Hispanic students better prepare for college-level coursework. This is of vital importance to USC since, according to the local newspaper, The Pueblo Chieftain, "Dropouts by Hispanic students have constituted a major factor in USCs declining enrollment."

Beyond the grant, however, Guerrero has already made efforts in the direction of improving retention. He has put in place what he calls "intrusive advising." With this, faculty and staff are advised to look for early warning signs of students floundering or experiencing difficulties and to intrude and assist them before it is too late.

"There is evidence to suggest that the institution had not done as well as it could have for Hispanics and other minority students as we are doing now," said Guerrero.

During his first three years as president, Guerrero established records for fundraising (netting approximately $18 million) and for legislative appropriations to support capital construction and deferred maintenance projects (approximately $31 million). USC received about $15 million in external research and service delivery project funding as well. In sum, under his leadership, the University experienced a 19 percent increase in federal and a 34 percent increase in private grant and contract activity. The success he has achieved in attracting funds has come during a time, however, when he has been forced to make budget cuts in the millions in order to balance out the result of an accumulated low enrollment during the years prior to his presidency.

Asked what has contributed to his successes at USC in such a short time, Guerrero points toward his administration and staff.

"The conductor, himself or herself, is not going to be able to produce that beautiful music. It is going to require all members of the orchestra working together to do that. That is how I feel. I think I can bring certain elements into the work situation, but it is the individuals with whom I have the good fortune to work who in the long run really make these successes possible," he said.

But when pushed to find his own place in the picture of success, Guerrero added, "I hope that some of the successes we've experienced are a manifestation of the degree to which people believe I bring integrity, enthusiasm, and support for our educational mission. I think that with those factors at play, donors will be more likely to share their hard-earned resources, and colleagues will believe they have an administration that supports them and allows them to take risks."

"It is Guerrero's strength in working with others that attracted him in the first place to try his hand at leadership in academia. Although he experienced success as a teacher in the classroom, as an administrator he felt he could help more with his skills. "I felt that I just had the ability to work well with people—to be able to get them to think about coming together as members of a community to work toward a common goal," he said.

The Early Years

Given his many years in the field of education—close to 30—it comes as a surprise to hear Guerrero say that he originally had no interest in academia or the like. He recalls his earlier years growing up in Karnes City, a
small town south of San Antonio, Texas, which until recently didn’t have even one stop light. His father had a sixth grade education, and his mother, a fourth grade education. And his parents grew up in a system in which Mexicans, Blacks, and Whites attended separate schools.

Guerrero was part of the first class to enter the school system in 1954, after the Supreme Court’s Brown v. Board of Education decision ended segregation. “But when I was growing up, I couldn’t be a Boy Scout or Cub Scout. There were barbershops that wouldn’t cut my hair. I couldn’t swim in the swimming pool in town. The only ticket for me to really enjoy the fruits of society would be to go to school,” he said. So that’s what he did.

Guerrero received an undergraduate degree at Texas A&M University and a master’s at the University of North Texas. But the ride was anything but easy. “I never received any kind of free money,” he said. At that time, Guerrero had friends who were working in higher education, but, he said, “I never saw myself in higher education. They were earning poverty wages.”

It was when Guerrero received a free Ford Foundation fellowship to Harvard, under the agreement that upon completion he work in higher education, that he couldn’t refuse this career path. “It was like winning the lottery,” he said. “That fellowship did it. I had to agree that I would commit to start working as a faculty member. To have an opportunity to go to Harvard and get a doctorate and have the entire experience paid for by somebody else was something I couldn’t say no to.”

As one of the few of his community to go on to college and succeed as he has, Guerrero now sees it as his responsibility to help the less fortunate achieve access and retention in higher education.

“Access continues to be a big concern for me. There are still too many children who are not taking full advantage of the educational opportunities available to them,” he said. “I think we need to work hard with community colleges, with public and private schools, to do all that we can to make it possible for a child in this society to be able to really believe that he or she can achieve his or her fondest wish.”

Guerrero is appalled by the high school dropout rates for Hispanics. Although improving, “we still have a long way to go.”

“I think we have a responsibility to do all that we can to redirect fiscal resources that will make it possible for students of limited means to be able to think or believe that a higher education is just as possible for them as it is for children who come from a family of higher privilege.” When looking at USC and where he can make a difference in retention, he said, “I’m proud that our highest retention of minorities is among Hispanic students here at the University, but we still have lots of room to improve in this area.”

His own understanding of the value of education for all drives Guerrero to seek to continue to improve and bring further educational opportunities to those in the communities surrounding USC. Looking into the future, he is currently leading the University’s participation in a detailed analysis of regional demographics to determine the higher education needs of Southeastern Colorado. He is collaborating with the larger Colorado university, Colorado State University, in bringing more graduate programs to USC (CUA, a state research university, has approximately six times the number of students as USC, a more regional university). The benefit in this is that students can achieve graduate degrees without having to travel three or more hours out of the area to do so. As a reflection of these changes, Guerrero is considering the possibility of changing the name of his university to Colorado State University-Pueblo.

Another area of interest for the future of USC is technology. “We are really proud of the degree to which we are becoming increasingly sophisticated in the area of technology. We have the lowest ratios of computers to students of campuses nationwide. We also have had a very aggressive group of folks in technology who have helped us get significant funding,” said Guerrero. Cited recently in the local newspaper was USC’s receipt of $107 million in federal grants to improve teacher quality and competence with technology. The grant money will help the University in its outreach efforts to 16 school districts and five community colleges. The schools governing board acknowledged this achievement, among others, as the result of Guerrero’s leadership and “goals that he set and accomplished.”

As a major provider of teacher credentials in the state, USC is looking to enhance its teacher preparation program, and is seeking national accreditation for it. Guerrero has also established a strategic planning committee to devise a four-year plan to address the changes the University might face.

As USC president, Guerrero invests a lot of time in administrative work that addresses needs of the University and all those it seeks to serve. And through his specific interest in issues concerning Hispanics in education, he invests time, too, as vice chair of the board of directors of HACU (Hispanic Association of Colleges and Universities), and as a member of the editorial board of The Hispanic Outlook.

Guerrero is also a role model for other Hispanics in education. After all, each step forward that one Hispanic takes creates an opportunity for the next. Though Guerrero’s parents never finished middle school, his daughter, Amaris, is now a student at Trinity University in San Antonio, Texas.

And how would Tito Guerrero most like to be remembered? “The most important thing to me would be that I was a good father.”
Recapturing Latino History
Document by Document

BY JEFF SIMMONS

The voluminous materials that surround Patrick Riordan put an eye-opening historical spin on the labor movement. Compiled for years, the resources include union and social club records from Ybor City, a city of immigrants that took root in the late 1880s where Tampa now sits. Photographs show Cuban, Spanish, Jewish, and Italian workers, many rolling cigars.

"Usually you find units in textbooks that discuss immigration and naturalization and focus on New York City and Chicago, places in the North," says Riordan, director of the University of South Florida's Resource Center for Florida History and Politics. "But these records tell about an alternative migrant history."

"What's fascinating about this collection is that it discusses immigration from the Caribbean and from Sicily and from Spain to a southern town, and this is part of industrialization. It does not fit the national pattern, but it breaks the rules; it shatters our myths"—myths about gender and racial segregation, he says.

In these historical archives are old photographs depicting men working alongside women, and Blacks alongside Whites, in tobacco factories. This, he says, was absolutely unheard of during this period of time.

"There was an alternative to Jim Crow, and it existed here in Tampa," Riordan explains, "and it can be studied through the records of social clubs, and there was an alternative to gender stereotyping, and that, too, can be studied in these records."

This collection has a home in the library at University of South Florida in Tampa. School leaders see it as a window to the past, an opportunity for students to comprehend not just history but the community that has evolved around them.

However, such treasures are far and few on college campuses across the nation. While the Hispanic population in the U.S. has swelled dramatically in the last decade, the number of specialized campus collections reflecting its culture and diversity has not kept pace.

Many a campus these days can boast of compilations of textbooks and novels reflecting Hispanic heritage and African American culture. Often, the collections are linked to an ethnic studies department. But a clamor is rising for higher education institutions to turn the page and broaden the diversity of their offerings.

UC-Santa Barbara

"There is absolutely a growing need out there, and those institutions that have established collections in these areas are in much better positions than those that have not invested materials, personnel, or the infrastructure to support ethnic archives," says Salvador Guerena of the University of California at Santa Barbara.

Guerena, considered by the American Library Association to be an expert on the topic, says that with ethnic studies maturing rapidly on college campuses, there are more interdisciplinary scholarships and, therefore, more need of primary resources.

"We're seeing an increasing demand for materials to support kindergarten through 12th grade initiatives that would involve archival materials, rare photographs, artistic materials, and
other cultural materials," adds Guerena, who heads the California Ethnic and Multicultural Archives within the campus library's Department of Special Collections.

Experts say there's no single resource that currently outlines the efforts across the nation, and they lament that it would not be a long list at present. They cite advanced collections at the University of Texas at Austin, Stanford University, the City University of New York's Centro for Puerto Rican Studies, and the University of South Florida.

"These collections are far and few," Guerena says.

At Santa Barbara, collections focus on four major ethnic groups: African Americans, Chicanos and Latinos, Native Americans, and Asian Americans. The campus strove to become a national repository for Chicano artistry, housing thousands of silk-screen prints and an estimated 20,000 slide images. The library also has obtained the archival records of cultural centers from across the state.

"You can only do so much, and there is a big need for a multi-institutional effort to address the problem and close the gap in recorded histories," he says. "A special collection can offer a snapshot of history that records moments in time, a history that is very important to know about."

Guerena pointed to two efforts to create a national repository, both now defunct. "It's sort of hit or miss, any sort of systematic effort at documenting and providing primary resource materials about the Latino community and it's something that really needs to be addressed," he says. The Smithsonian Institution has set up an archival program in Washington, D.C., that contains an Hispanic division. But few colleges have done anything systematic, he says.

As it stands, scholars often must traverse the country to conduct research through fragmented collections. But those few still represent an increase. And their creation takes not just perseverance but financial backing and people power.

UT-El Paso

"My sense is that as the Hispanic student population grows at an institution, so does the demand for materials dealing with the culture, the history, the sociology and politics, and even the economics of the Hispanic population," says César Caballero, associate librarian for public services, University of Texas at El Paso.

"The public is still skeptical and ignorant about the size of the market. They have not learned how to market the Hispanic populations," he says, even on the heels of the U.S. Census 2000 data trumpeting the boom in the nation's Hispanic population.

Caballero, a former American Library Association board member, says that often-generous donors provide the impetus for special collections when they bequeath private materials assembled for decades. "A collection that would be considered outstanding should contain more than just books. Obviously, books are necessary, but there should be a sizeable reference collection, and journals, articles, serial-type publications, and audiovisual materials."

Recorded music, he notes, is another important factor, as well as sheet music. UTEP's special collection includes books on Hispanic sociology, history and literature, folk medicine and psychology, among other topics. The books are coupled with primary source materials: manuscripts. There are manuscripts of Carlos Morton, a famous Chicano playwright from El Paso, and materials from the poet Lalo Delgado. Admittedly, he says, the collection is small, but growing.

"I would say Hispanic or Chicano collections should concentrate on acquiring materials dealing with the Hispanic population in general, especially if they have populations that represent different Hispanic groups," he says.

Schools need to also look in their backyards and acquire materials from the regions where they are located. For instance, he has seen campuses collect diaries from immigrant families, or records from civic and political organizations.

University of South Florida

At the University of South Florida, the first donation records on Centro Español in the region arrived at its doorstep in the late 1980s. Records detailed who lived there and offered information on cultural events such as concerts and social clubs.

There were records on insurance programs and clinics, marriages and weddings, how groups elected their officers—all facets of life.

The school's collection has expanded to bring more social club
The Annotated Periodical Literature Annotation Project

A project to annotate the literary prose contained in U.S. Hispanic periodicals from 1803 to 1980. Discrete collections of the annotated literature, summarized by scholarly introductions and interpretative essays, will be produced in print and electronic format.

Grants-in-aid and Fellowships Program

A program that provides financial support for research and publication by scholars who further the project's mission of locating, preserving, and making accessible the literary contributions of U.S. Hispanics. A yearly Call-for-Proposals for research and reports will be distributed to scholars across the country and abroad.

The U.S. Hispanic Archives and Information Consortium

A project to unify archival holdings nationally, create and distribute electronic U.S. Hispanic archives, and curricula that coordinate the access, acquisition, preservation and use of research materials.

records into the fold, in addition to those of the Centro Español club. Now, there are records from the Cuban club, the Centro Asturiano club, the Italian club, and the German-American club. The Germans came to Ybor City with the technology to create cigar boxes with multicolored labels and embossing, and were influential at the turn of the century. All five groups have turned over original papers to the school.

The tall order facing administrators and staff there: plans to digitize all of those records and put them on the Internet. That is where funding—often an obstacle to salvaging a collection—comes into play. The school is now in search of funding for a bilingual effort so that non-Spanish speakers can have access as well.

"It's a big project. You have to have curators and archivists to go through the materials and prepare them for use. In our case, we have to protect them and keep them free of insects. You have to make them ready and inspect them, file them appropriately. They're often mislabeled," says USF's Riordan.

**UT-Arlington**

At the University of Texas at Arlington, the Special Collections Library Division has divided much of its attention between the Mexican American War of 1846 to 1848, the cartographic history of Texas and the Gulf of Mexico, and Mexico from 1810-1920.

Tucked away among its shelves are more than 30,000 volumes, 7,000 linear feet of manuscript and archival collections, 5,000 historical maps, and 3.6 million photographic prints and negatives. The school has published a newsletter, The Compass Rose, twice yearly to publicize its holdings.

Collections include one donated by Franklin Madis, a Duncanville, Texas, businessman. In 1986, he handed over schoolbooks and manuscripts reflecting the government, politics, legal aspects, religious affairs, and social life of Northern Mexico and Southern Texas.

Madis began collecting Mexican documents and manuscripts in 1962 and to date has not stopped. Many of the items in the collection came from individuals and families in Mexico and the United States, and from book dealers in both countries.

Work to build an extensive resource library dates back decades. In 1970, the Library Committee of the Inter-University Council of the North Texas Area, now part of the Association of Higher Education of North Texas, started projects to acquire research material.

On the heels of two successful projects, a third got under way to investigate microfilming archival resources in Mexico. Committee members narrowed their search to archival resources in the State of Yucatan.

That collection—achieved through grants and campus funding initiatives—has come to include church records, documents on property and land sales, transfers, wills and testaments, colonial and congressional documents, and newspapers.

"The reason this is important is that the history we in Texas share with Mexico is so close and so intimate that to understand Texas, you have to understand Mexican history, and before that, you have to understand the history of New Spain," says Dr. Gerald Saxon, associate director of libraries at the University of Texas at Arlington.

The school has compiled one of the most extensive collections related to the U.S. war with Mexico. There are books, maps, posters, manuscripts, and journals—all to help students and scholars understand aspects of that period.

"Just as scientists have laboratories where they ask questions and try to answer them with experiments, we see historical archives as being laboratories for social scientists, where they come in and study the past and try to answer questions about it," Saxon says.

Sally Gross, who heads the University's Special Collections division, says those materials on the war came via a donor. "He was very interested in the war and thought it was underappreciated because the Civil War took so much precedence," she says. "He amassed a collection and gave it to us in 1974, and we have continued to buy materials on the war as they've become available," she says.

The school went so far as to create an extensive oral history project in which 150 Mexican Americans, such as political figures and magistrates, collected their lives and influence.

**University of Houston**

Experts say that one of the toughest obstacles has been securing works from Hispanic writers, because publishers frequently have snubbed such literary efforts under the notion that their appeal would be limited. But those at the University of Houston disagree and have spent quite some time culling literature from numerous Hispanic writers. The school has divided books about democracy and books about immigration issues, says Alejandra Balestra, coordinator of the "Recovering the U.S. Hispanic Literary Heritage" project.

"We think it is very necessary to preserve these kinds of books because libraries loan the books out and often they are left in really bad shape," she says. "People don’t take care of them, so we must."

The project began in 1999 through a $300,000 grant from the U.S. Department of the Interior. Project organizers are currently microfilming all of the books—about 70 of 460 are completed as yet—and then intend to place them on the Internet.

So far, the project has produced three volumes of work by leading scholars on Hispanic literary history in the States. The project is recovering works of poetry, book reviews, literary notices, and other pieces by Hispanics in the United States from 1808 to 1960.

"We have a lot of books, and its important for Hispanics in the United States to know that from colonial times, Hispanics wrote about democracy and immigration," Balestra says.

That encourages experts because exposing the literature and contributions that Hispanics have made is hoped to foster more widespread interest.

**Brooklyn College**

"It takes money and it takes vision," says Anthony Stevens Arroyo, director of Brooklyn College's Office of Religion in Society and Culture, in New York City, "and this compelling need to service the common good, and the ability to be sensitive."

He says there is a pressing, urgent need to forge ahead now. "Look at the amounts of money being spent on Holocaust archives, especially now that people realize that these last survivors are going to die. And there’s this rush to get the last memoirs of these people because once they go, we cannot get any more history from them. So now it’s the same thing with Latinos: a whole generation emigrated in the 1950s, and they’re dying and we should preserve their history."

"We should feel a rush to get information together," he adds. "We always learn about ourselves by looking in the past."

Harvard University

Old School with New Ideas

BY ROGER A. DEITZ

If your university was established after 1636, it can’t be Harvard, no matter how many academic buildings are old and stately or Ivy-covered. Harvard University celebrated its 350th anniversary in 1986. Harvard is the oldest institution of higher learning in the United States—but is world renowned as a place of new ideas and is, in reality, a dynamic community with a varied population.

Founded 16 years after the Pilgrims arrived in Plymouth, the University has grown from nine students with a single master to an enrollment of more than 18,000 degree candidates, including undergraduates and students in 10 graduate and professional schools.

Another 13,000 students are enrolled in one or more courses at the Harvard Extension School. More than 14,000 people work at Harvard, including nearly 2,000 faculty. There are also 7,000 faculty appointments in affiliated teaching hospitals.

Six U.S. presidents—John Adams, John Quincy Adams, Theodore and Franklin Delano Roosevelt, Rutherford B. Hayes, and John Fitzgerald Kennedy—were graduates of Harvard, and one can add to this list the name of George W. Bush, who earned his graduate MBA from the institution. There are 38 Nobel laureates among the school’s current and former faculty.

Neil L. Rudenstine, Harvard president, views his institution, the people who learn, teach, and work there, as a very special learning community. He reflects, “Every day I am reminded how remarkable a community this is—one that brings together astonishingly talented people to pursue their highest aspirations, to push beyond the edge of what’s known and to discover something new about the world and about themselves. There is no human pursuit of greater value to individuals and to society.” On the issue of diversity, President Rudenstine has observed, “I believe that student diversity contributes powerfully and directly to the quality of education in colleges and uni-

and Native Americans, 0.8 percent. Harvard expects that between 85 and 90 percent of the admitted students will choose to enrol in September.

Dr. Marilyn McGrath Lewis, director of admissions, reports, "The flexibility of Early Action allows admitted students to consider their college choices and their financial aid options throughout their senior year. Perhaps Harvard's leading graduation rate of 97 percent is associated with the flexibility that Early Action provides."

The Gazette reports that interest in Harvard has increased in the past few years due to "demographic trends" and also due to "the cumu-
lative effect of more comprehensive recruiting and the resulting public awareness of Harvard's new financial aid program." The generous aid program, first announced in September 1998, has been highlighted in all recruitment presentations. Harvard increased its scholarship budget by 20 percent and now spends more than $75 million annually in scholarships and oversees more than $93 million in total financial aid. Nearly 50 percent of undergraduates are on scholarships, while 70 percent of all undergraduates receive some sort of financial aid.

Harvard College was established by vote of the Great and General Court of the Massachusetts Bay Colony and named for its first benefactor, John Harvard of Charlestown. John Harvard was a young minister who, upon his death in 1638, left his library and half his estate to the new institution. Harvard's first scholarship was created in 1643 with a gift from Ann Radcliffe, Lady Mowbray.

In 1879, the "Harvard Annex" for the instruction of women by Harvard faculty was chartered by the Commonwealth of Massachusetts as Radcliffe College. A 1977 agreement delegated responsibility for the education of undergraduate women to Harvard College as well, and in 1999, President Rudenstine announced the launch of a major venture in interdisciplinary learning, the Radcliffe Institute of Advanced Study, created through the mega-merger of Radcliffe College with Harvard. On September 14, 1999, Harvard College assumed full responsibility for the education of undergraduate women. At that point, Harvard College created the Ann Radcliffe Trust, "a set of programs for Harvard undergraduates that seeks to raise the awareness of women and women's issues at Harvard."

Harvard's oldest buildings date from the eighteenth century, including Massachusetts Hall (1720), Wadsworth House (1725), and Holden Chapel (1744). Established to provide a learned ministry to the colonies, Harvard only later created graduate programs, beginning with medical studies in 1782. Law and divinity did not become graduate departments until 1816 and 1817. Even so, the College did not take on the aspects of a true university until mid-century, when a library building (1841), an observatory (1846), a scientific school (1847), a chemistry laboratory (1857), and a natural history museum (1860) were built.

Harvard's 26th president, Neil Rudenstine, came into office in 1991 and initiated an intensive process of academic planning, intended to identify University-wide priorities for the coming years. Under his leadership, there has been a major effort to adapt the research university to an era of rapid information growth and financial constraints. The president stresses a University commitment to "excellence in undergraduate education, the importance of keeping Harvard's doors open to students from across the economic spectrum, the task of adapting the research university to an era of rapid information growth, and the challenge of living together in a diverse community committed to freedom of expression." Rudenstine has chosen to step down as president on July 1, 2001. A recent and successful capital campaign raised $2.6 billion, which will allow the University to take meaningful steps toward those goals, such as increasing both undergraduate and graduate student financial aid, embarking on new construction projects to provide cutting-edge facilities for study and research, and endowing new chairs and professorships to ensure that Harvard continues to attract top faculty.

Its faculty and staff number about 20,000; many are part-time. There are more than 270,000 living alumni. Of the 18,938 students enrolled for 1999-2000, 1,034 were Hispanic (6 percent); 1,771, African American; 2,278, Asian/Pacific Islander; 98, Native American; and 2,977, international students. Among the group were 78 Hispanic law students and 60 Hispanic medical students. Hispanics were awarded 375 degrees for the academic year 1998-1999. Excluding the faculty of medicine, the University faculty total runs to 1,867. Annual tuition for the academic year 1999-2000 was $22,028, plus $1,590 in mandatory fees.

Harvard today comprises a Faculty of Arts and Sciences, including Harvard College and a Graduate School of Arts and Sciences, and eight other faculties: Business Administration, Design, Divinity, Education, Government, Law, Medicine and Public Health (including Dental Medicine), and the Radcliffe Institute for Advanced Study.

Harvard's total campus area occupies about 500 acres, concentrated in Cambridge (and Boston). Cambridge was founded in 1630 as Newtowne. In 1637, the tiny village was the location of the then-unnamed college, named Harvard the following year. Newtowne was renamed Cambridge in recognition of Cambridge University, where many of the leading colonists had been educated.

Today, with a population of about 95,800, Cambridge is Massachusetts' seventh largest city, one with a rich history and long-established neighborhoods with strong ethnic roots and traditions. As an indication of its diversity, Cambridge public schools now offer ESL programs to students speaking 46 different languages. Cambridge is also the birthplace of the state's high technology industry. The presence of both Harvard and the Massachusetts Institute of Technology has encouraged a variety of technical, research, and professional firms to locate in the city.

Harvard benefits greatly from the vitality and culture of Cambridge and the Boston area. This helps attract talented faculty and students, and the Harvard community works hard to give back to Cambridge and Boston in many ways, including more than 240 public service programs involving Harvard students, staff, and faculty.
LATINO RESEARCH UMBRELLA, CATALYST, AND LIAISON

16-Center Consortium Now at Notre Dame

BY INÉS PINTO ALICEA

Advocates for the Latino community were enraged when Latinos were drastically undercounted in the 1990 Census, costing states millions in federal funds. One organization that has been at the forefront of an effort to ensure that the Latino presence is counted in the 2000 Census is the Inter-University Program for Latino Research (IUPLR).

The U.S. Census signed a memorandum of understanding with the IUPLR that allows it to be a Census Information Center, which means the Latino studies programs affiliated with the IUPLR will help the Census distribute to historically underrepresented groups the information gathered in the 2000 Census. The agreement gives the IUPLR first access to all newly released data from the Census for analysis and dissemination, and it provides IUPLR researchers with training to manipulate the data, said Philip García, associate director of the IUPLR. The data collected by the Census helps the federal government determine how federal funds are distributed across the country and how this affects the apportionment of legislative seats.

"It gives us an opportunity to evaluate the data as soon as it comes out," said García. "The basic requirements for a Census Information Center are to promote access to Census information among underserved communities, repackage Census information to make it more appropriate for local users, and provide non-technical interpretations or explanations when necessary."

The Census effort is just one more way that the Latino researchers involved with the IUPLR make research at the university level applicable to Latinos in their daily lives.

The IUPLR is a consortium of 16 Latino research centers based at graduate research institutions. The Latino scholars study a variety of issues—including politics, economic development, health policy, international migration, human rights, mass media, poverty and education—and how they impact Latinos in the United States.

"The IUPLR allows us to establish a collective, a national Latino intellectual presence," said Gilberto Cárdenas, executive director of the IUPLR. Cárdenas also heads the University of Notre Dame's Institute for Latino Studies, is a professor of sociology, was selected for the new Julian Camara Chair in Latino Studies at the University of Notre Dame, and is the University's vice provost. He also was recently appointed to

Philip García (L), associate director of IUPLR, and Gilberto Cárdenas (R), executive director of the IUPLR.
the Bill and Melinda Gates Foundation Millennium board. "There are things we need to know about our community. We want to make Latino issues a priority."

Headquartered at the University of Notre Dame in the Institute for Latino Studies, the IULPR has three goals: to increase the intellectual presence of Latino scholars; to enlarge the capacity of Latino research centers; and to expand the availability and dissemination of policy-relevant Latino-focused research.

But Cárdenas said the IULPR distinguishes itself from other Latino research organizations such as the Tomás Rivera Institute for Public Policy because the IULPR does more than develop research products.

"Most of our focus is on institutional development in the academy," Cárdenas said. "We want to develop the research capability of our institutions. We put a lot of time and investment into that kind of work."

The consortium acts as an umbrella, catalyst, coordinator, liaison, and communications link for Latino research centers. It serves as a networking center and a place to exchange ideas for Latino scholars. It operates as a clearinghouse for the public and a resource to policy-makers seeking information on Latino history, culture, and other topics.

"Our relationship has been quite good and beneficial," said Dennis J. Bixler-Márquez, director of the Chicano Studies Research Program at the University of Texas at El Paso (UTEP), of the working relationship between UTEP and the IULPR. "It has given us national dissemination of our research to key legislators and organizations on specific issues of interest to Latinos."

The IULPR also serves as a mentoring network by pairing senior scholars with junior scholars to work on projects together. The young scholars collaborate on major research projects and publications, said Cárdenas. That way, the organization plays a role in increasing the pool of Latino doctoral students.

"A lot of scholars owe their success to the seminars the IULPR has sponsored to train young faculty in the proper research qualities to be successful in academia," said Bixler-Márquez.

Established in 1982 by Latino scholars at Stanford University, Hunter College, the University of California at Los Angeles, and the University of Texas at Austin, the IULPR got a jump-start with funding from the Carnegie and Ford Foundations. It was housed at UT-Austin for a number of years before moving to Notre Dame, Ind. The University of Notre Dame has been generous in assisting the IULPR with its budget, said Cárdenas.

"The IULPR also has been a shot in the arm," said Bixler-Márquez, for the directors of Latino studies programs "because it allows us to shape how these programs evolve and address community needs."

Cárdenas said member centers pay dues and agree to attend meetings once or twice each year to discuss IULPR work and progress. Universities wishing to join the IULPR submit an application, and the IULPR board of directors, comprised of the directors of all of the centers that are current members, then decides whether or not to allow that university's membership.

The Census project is not its only large-scale undertaking. The IULPR is working on three other major projects, said García. The first has to do with Latino AIDS education. It brings Latino artists together to develop visuals to alert the Latino community about AIDS and to provide information on AIDS. A second project involves creating a report on the best practices across the country in promoting higher graduation rates. The third encompasses research for the Casey Foundation, to help the organization better evaluate a community's health, with regard to funding projects for families and children, said García.

Each of the member institutions has its own distinct personality, and each contributes in different ways, he said.

"Some of the institutions are more into research, and some are more into teaching, and some do both," said García, adding, however, that all the members agree to specific projects that will be worked on together.

The IULPR uses a "working group" model to initiate and conduct interdisciplinary and comparative research on a wide range of topics. These interdisciplinary groups have created a new paradigm for Latino-focused research by bringing together research teams from diverse regions and national origins to address particular issues relevant to Latinos from various disciplines and perspectives—national, regional, and international—and to produce policy-relevant results. Working groups carry out multiyear, in-depth research, with the IULPR providing seed money, fundraising help, coordination, and visibility for their efforts. Foundations provide support for research, publications, and dissemination of working group results.

Cárdenas said the foundations' money "has generated a whole new body of research."

While working groups are generally based at IULPR centers and frequently directed by IULPR centers' associated faculty, many also involve scholars and researchers from a broad variety of institutions. Currently, working groups do not necessarily rely exclusively on academics but also involve qualified experts from related fields and organizations.

One of the newest working groups is the one on economic development. It is studying access to financial capital for small businesses, evaluation of levels of technical assistance for Hispanic small businesses, and alternative models of job creation for low-income Latinos.

The first priority of the Inequality and Welfare group is to determine where the various legislatures and governors are headed on welfare reform. Although this process is occurring nationwide, a great deal of local variation can be expected on the central themes. For example, while federal guidelines permit states to award welfare benefits to individuals for up to five years, some states are reducing this to two or three years. The initial goal of the group is to research both the debates and the final outcomes of the welfare reform laws to be passed in a few selected states. The group's long-range goal will be to follow the policy process in these states once the laws are enacted.
The Migration and Human Rights group was studying the impact of family separation on migrants' mental health. The Politics group analyzed the 1996 election poll data to determine the voting patterns of Latinos, and measured their positions on various policy issues and areas. The study also compared and contrasted voting patterns of male and female Latinos, and of Latinos and non-Latinos.

The Smithsonian Connection

Another important aspect of the work of the IULPR involves its relationship with the Smithsonian Institution. The two now offer an interdisciplinary program of long-term and short-term residencies at the Smithsonian in Washington, D.C. The program makes available the extensive Smithsonian collections to scholars exploring humanities projects that link material culture with curatorial approaches and the politics of public display, that encompass in-depth and advanced research in the museum field, and that contribute much-needed Latino perspectives and interpretations to topics within many Smithsonian museums and collections. The program has a different theme each year and funds both junior and senior scholars.

"It benefits the Smithsonian but the Latino students as well," said Garens.

Refugio Rochin, director of the Smithsonian Center for Latino Initiatives, an institutional member of IULPR, said that the IULPR is a "very strong, integral part of our outreach to Latino scholars." The IULPR maintains a site office at the Washington-based center where it co-sponsors with the center a residency program for senior and junior scholars and a wide range of D.C.-based and policy-focused programs.

"Without them, we wouldn't have the national coverage of scholars of Latino studies," said Rochin. "Their scholars help give us ideas for collections we want to make."

At the senior level, the fellowship program invites applications from academics, curators, senior museum professionals, and other experienced professionals. All applicants must demonstrate an acceptable level of expertise in their topic and a working knowledge of English and Spanish. Senior fellows will be in residence at the Smithsonian in the capital up to six months and receive a stipend of up to $25,000. In addition to developing research, the senior fellows will be encouraged to present at least one public lecture and to participate in appropriate museums activities and forums.

At the junior level, the program is open to recent Ph.D. graduates and museum professionals. Junior fellows will be in residence up to four and a half months and will receive a stipend of up to $12,000. Junior fellows will be encouraged to pursue a hands-on approach and to take part in all suitable museum activities, which can include exhibition research and planning, installation, educational outreach, and documentation of collections. Fellowships cannot be used for dissertation research. The deadline is January 30.

Senior fellows must send a detailed research proposal; junior fellows, a prospectus describing their academic background, career goals, the research interest they wish to pursue at the Smithsonian, and the reasons for their interest. Applicants must relate their work to the resources at the Smithsonian.

Silenced Now
Living the Undivided Life

BY ZULMARA CLINE

People do funny things. Specially us. The cards are stacked against us, and just trying to stay in the game, stay alive and in the game, makes us do funny things. Things we can't help. Things that make us hurt one another. We don't even know why.

-Song of Solomon, Toni Morrison

Speaking Out

"I just can't stand it when parents do not send their kids to school because they have no clean clothes. These parents just don't care about their kids getting an education, and we have to educate them anyway. Well, I can tell you that I am tired of it. I think that if the parents don't get the kids to school on time every day, we shouldn't have to educate them. I mean if the parents don't care, why should we? Or we should at least get the DA to go over there and put those parents in jail. This is ridiculous—not going to school because you have no clean clothes."

"I agree. I don't know about your school, but at my school, we have parents who will keep their kids home not only for dirty clothes but also on a rainy day, to baby-sit, when grandma comes to visit, and assorted other reasons. And those Mexican parents don't care at all, especially about their girls. They keep them home to baby-sit sometimes for a week at a time. They just don't care, and we don't know what to do. We can't teach them if they are not in school."

"Well, at my school, we have parents, especially Mexican parents, who will take their children to work in the fields rather than send them to school. Isn't that child abuse? Can't we call the police or the DA or someone? There ought to be a law."

"What really burns me up," another chimed in, "is those parents who are here in America and refuse to speak English to their children. Don't they know this is America and in America if you are going to be a success you have to speak English?"

As I sat there listening to the principals discuss minority parents and the problem of attendance and English language acquisition, I found myself undergoing a series of emotions that ranged from anger, rage, frustration, empathy, understanding, and fury. I was seething in my seat, not knowing if I should speak out, stay quiet, challenge their assumptions, or get angry with them for speaking without knowing the facts and the issues—for speaking, out of turn, about a people, a culture they knew nothing about.

I knew my views were different, decidedly different. I was a minority female. I had grown up in one of “those” families they were complaining about. My perspective, which was different from theirs, was based on a very different past. A set of experiences that only those of us who grew up in certain homes, in certain families, could understand and relate to.

On that day, I chose to speak up. I said what I thought needed to be said in order to deepen their understanding of the families they were discussing, the families they were trying to help. I thought that was why they would bring me into their midst, allow me to become part of the inner circle. I was not one of them; therefore, I reasoned, they were seeking information, knowledge, and perspective from one who had experienced what they, in their vastly different American-mainstream-middle-class experience, could only guess at. I thought the reason they would hire someone like me was to benefit from my experience as they attempted to understand the families and communities that were not making it, as they attempted to adapt and adopt programs to improve minority student achievement. So I said my piece, with passion, fury, and all the pent-up emotions spilling forth as I recounted tales of my mother who cared deeply about education but kept us home on rainy days so that we would not get sick because she did not have the money for doctors. I related how we stayed home at times because there was no money to wash clothes or dry them and my mother would wash them by hand and hang them in the house to dry overnight, but on cold frigid nights in New York, windows had to be kept shut and clothes did not dry overnight. However, my mother did care. She cared very deeply about all of us getting a good education.

I recounted tales of a mother who spoke to her children in Portuguese, not because she did not care about whether we learned English, but because she felt a need and desire to communicate with her children and this was the only language she knew. This was her language of love, anger, discipline, and caring. How could her children know her, love her, respect her if she did not speak to them from her heart. Her heart's language was not English—it was Portuguese—she intuitively knew that for her to successfully mother her children, she needed to speak to them in her heart's language. She cared. She cared deeply. That is why she would speak Portuguese to her girls—her daughters needed to know her in order to love her and respect her. She knew she could not teach or influence her children unless her children knew that she cared about them and loved them.

On that day and on many others like it, in meetings and in private conversations, I did not “silence my voice.” I said what needed to be said. I found the courage to be genuine. I spoke out with passion, understanding, empathy, and spirit. I spoke out to let my voice be heard. The voice that said: there is another explanation here; the parents do care. The voice that said: the world is not only like you have experienced it, but also like I have experienced it.

Reflective Analysis

The response surprised me. Instead of appreciating my “different” experience and the insights it could offer, I was shunned and outcast by the group.

I saw the world differently because I had experienced it differently. I was the “poor immigrant child” who had “made it.” I had a Ph.D. from the University of California; however, my very real and lived experiences were discounted because I was not saying what they wanted to hear. I was not conforming to the accepted model, pattern, or standard of working in his organization. I was the classic renegade; I refused to be led; I refused to silence my voice.

I was basically saying there are circumstances here that need to be taken into account as we try to develop programs and policies that will lead to opportunities and success for the children who are not succeeding. Laundry can be a very big deal for a family struggling to get a meal on the table. Rain can be a..."
barrier when there is no money for warm clothes, doctors, medication, or proper care. Language is an issue, but the answer is not to tell parents to cease communicating with their children. The answer is to find ways in which communication can be enhanced with the addition of a new language and culture.

I did not honor the dominant view of the families and the communities that these children inhabited. I did not validate the perspective that the “families were the sum total of the student achievement problem.” I did not substantiate the perspective that the parents and the community, not the educational system, were the problem. My view was definitely different; my values were on a different level; my knowledge base stretched two continents; my cultural perspectives were “colorchrome” and not “monochrome.” I did not see the world as others did—my experiences precluded that. You see, my mother cared. My mother would have been accused of not caring by this group of well-meaning educators, who were only trying to help.

The Price

At the time, I did not realize it, but now I know. I have paid a price for not silencing my voice. I have still to be hired as a principal. I am still not a member of the team. I am still not in the “club.” I am still an outcast. It has taken some time, but I now realize that my experiences are not valued, honored, validated, nor appreciated. Essentially, who I am is an embarrassment to who they are. They do not want to hear about how life is for the “other half.” Their theories and hypotheses serve them well because they are able to “blame the victim” and never look inside or reevaluate what they are doing, the systems they have designed, the failures they are creating, the deficient structures they are perpetuating.

They do not want to hear about it. They do not care for the views, ideas, ideals, or dreams that do not match their own. They are not really looking for things to be different. There is no real, concerted effort to understand, to build bridges, or to design new structures to bring others into the fold. Yes, they will consider hiring us and putting us into positions of power and allowing us into their “club” and allowing us to become a part of the team, but we need to pay a price. For with acceptance comes a demand to conform to rigid rules of behavior, narrow values, and static ways of thinking. They say they want us to bring in diverse perspectives; however, they want this perspective only when it validates what they are doing and thinking. They do not want us to broaden their understanding with a life of experiences that might be decidedly different from the one that they know.

They effectively try to silence our voices with promises of acceptance and promotion, if only we would play the game. No, mine is not a story of lack of skills, motivation, math classes, science classes, or inspiration. Mine is a story of VOICE and the refusal to stay quiet in the face of an ever-increasing attack on my people, my culture, my way of life, my family, and, yes, my mother.

Mine is a decision to live an undivided life, as described by Parker Palmer in The Courage to Teach:

I call this the Rosa Parks decision, for she is our most vivid icon of the undivided life. ...Rosa Parks decided to live divided no more—decided that she could no longer act as if she were less than a full human being, the way institutional racism had defined her. She decided that she must act instead on her heart's knowledge of her own humanity.

On the days that I spoke out, I also had to make a decision that I would no longer live a divided life. I could no longer sit quietly when I knew in my heart that what was being said was not “totally” right, was not “completely” true, but only a partial part of the story. I do not mean to suggest that my reality was truth; I do claim, however, that my reality had the potential of adding depth and breadth of perspective to the discussions, of deepening understanding of complex issues.

Conclusion

Although my recollections are selective, they are what is important to me in so many ways, for this is what stands out. In all of the memories that I have, it is those that have the biggest impact on me, it is these that have made an indelible imprint on my life, my journey. It is these memories that have shaped who I am today and who I will become tomorrow. It is in the telling of my story that I can begin understanding me and making sense of the community of which I am a part, as so eloquently stated by Richard Stone in The Healing Art of Storytelling:

Telling a story, especially about ourselves, may be one of the most personal and intimate things we can do. Through storytelling we can come to know who we are in new and unforeseen ways. We can also reveal to others what is deepest in our hearts, in the process, building bridges. The very act of sharing a story with another human being contradicts the extreme isolation that characterizes so many of our lives. As such, storytelling carries within it the seeds of community.

As the storyteller of my story, I know it is not the absolute truth of the story that matters as much as the way that the truth is remembered and made to “fit” to explain what is happening in our lives. It is the special way that we weave our memories and experiences together that has an impact on who we are and what we are accomplishing. It is our stories that help us to make sense of the world in which we live. The rich tapestries of our lives that are interwoven to help us to become the person that we are meant to be. No, my voice has not been silenced. Yes, I have paid a price.

Zulma Cline is an assistant professor in the area of literacy at California State University-San Marcos. Formerly an EEN Start director, she has also been an instructor for Chapman University in the areas of language acquisition and multicultural education. Dr. Cline completed her Ph.D. at the University of California-Santa Barbara on the effects of socialization on school administrators. She is currently a scholar practitioner, writing extensively in the areas of literacy, diversity, English language learners, and multicultural education.

Hostos Students Overcoming Multiple Barriers
Fernández Lauds Faculty for Teamwork

BY JOE BECK

“In terms of excellence, I believe our greatest potential lies in our efforts to refine and expand our dual-language program. The reputation we build by capitalizing on bilingualism—promoting it, as a lifelong asset, not a disadvantage to be overcome—will place us in the vanguard of this nation’s community colleges.”

Dr. Dolores M. Fernández, President
Eugenio María de Hostos Community College

Dolores Fernández didn’t accept the job as president of Hostos Community College when it was offered to her in January 1998 by the then-Chancellor of the City University of New York (CUNY) system Christoph M. Kimmich. That is, until she heard an African American female minister of a Bronx church speak at Hunter College a year later.

The minister challenged the audience. “All of you in the audience today—those people that feel comfortable with yourselves with higher degrees in your backpacks—how many of the people in your communities have the same options as you?”

Fernández left the auditorium that afternoon and called the CUNY chancellor to accept the position. Now there’s no place she’d rather be than Hostos, leading a renaissance of academic, cultural, and community growth that offers a dual-language approach to all of its students.

“I felt I had been selfish. I have been given wonderful opportunities, and it was time I gave back some of my good fortune,” she commented. She fulfills that mission on a daily basis, and that is evident to those with whom she works. One of the trustees of the College overheard Fernández counseling one of the students at the College. The student is a single mother who often brings her baby to school in a stroller. “I’m proud of what you’re doing,” she told her. “Get your education for yourself first, then for the

“We have faculty with credentials from Harvard, Yale, and Oxford. The mission of the school is something that brought them here, to this college, and to this community.”

DR. DOLORES M. FERNÁNDEZ, PRESIDENT
baby. I know it's hard. There are papers and a lot of work to do, but just hang in there. Your work will pay off, and your life will be better for it," she added. How many college kids get a one-on-one conversation with the president? Fernández's open-door policy assures that her students get just that. A majority of them are young, single mothers whose lives are hectic and complicated, and one of her greatest assets is that she can readily identify with them.

The Mission

The mission of the College reminds her of the importance of the College to the community it serves.

The mission of Hostos Community College is to provide educational opportunities leading to socioeconomic mobility for first- and second-generation Hispanics, Blacks, and others in New York City who have encountered significant barriers to higher education. An integral goal of the College is to provide transitional bilingual education opportunities for its Spanish-dominant students.

Hostos specifically addresses their need to improve their English language and computational skills. The College does not seek to replace the languages and cultural values of its students but rather to enable them to function comfortably and easily in a variety of sociolinguistic settings. A cornerstone of the mission is to offer dual-language educational opportunities in an environment that fosters appreciation, understanding, and respect for cultural diversity, second-language acquisition, and intellectual growth. But English-language proficiency is also a primary goal for all students.

Non-Academic Needs

Opportunities is a word that peppers Fernández's conversation and thought, and to that end, she lives out the true meaning of the school's mission. At the helm of a community college, she calls attention to the non-academic needs of the community.

"Sometimes in the morning, I walk around the halls of the classroom buildings, and I greet some of our students," she says. "Some of them have all their belongings with them, and I know they have been in the building all night. They have no place else to go," she said. "In fact, I have told security that if people are in the building at 11:00 in the evening, to help families in crisis is another resource she would like to see in the future. "I wish we had a discretionary fund that would be available to help families in need, families that hit hard times. Sometimes through no fault of their own—a loss of a job, illness, etc—they are without enough income for several months to keep the family with home and food," she said.

Fernández is not alone in her concern for the community. The faculty at Hostos, she is quick to credit, are also deeply committed to the community and the students they serve.

"This college was put in the South Bronx for a reason. It has a specific mission, and the majority of professors who teach here are aware of that. We have faculty with credentials from Harvard, Yale, and Oxford. The mission of the school is something that brought them here, to this college, and to this community," she ended.

Hostos Renaissance

The collaboration between Fernández and the faculty is not surprising. One would expect a team effort, based on the vision statement for the school: To make

Hostos Community College a "School of Excellence" for students seeking a liberal arts or career education in a dual-language, multicultural learning environment.

The College is at a unique period in its history. It is undergoing a renaissance that will enable students to profit from new and innovative approaches to teaching and learning. The school is committed to rigorous career and liberal arts programs that lead to meaningful employment or successful pursuit of higher-level studies.

This Hostos Renaissance represents the growth and strengthening of those academically challenging programs and activities that have been central to the development of Hostos Community College.

A comprehensive language-across-the-curriculum model that includes a dual-language approach is offered to all students. This model is designed for ESL learners as well as native English speakers who want to learn Spanish. The elements of accelerated learning are provided in order for students to have the opportunity to prepare for passing the basic skills tests earlier in their college careers. Language

Dr. Dolores M. Fernández with Julio Iglesias
development skills are offered in all basic skill areas for students who need this type of support in preparation for advanced college-level work.

Preparation doesn’t stop there. Students are exposed to language-enhanced content courses in various disciplines that promote second-language learning and the development of writing skills. These courses are language enhanced by faculty who systematically incorporate diverse linguistic tasks into their pedagogy, such as structured reading, writing, oral assignments, writing-based assessment, library assignments, and resource guides, as well as dual-language glossaries and bibliographies.

In addition, language-enhanced courses are taught in English, and students are offered tutorial assistance to help them succeed. This component is based on research findings that suggest that the learning of a second language is best achieved in meaningful contexts. Linguistic skills applied in more cognitively demanding, content-based settings are more likely to become a natural part of an adult’s second-language repertoire.

The value of such an academic program is evident in today’s ethnically diverse world. Mastery of two languages adds value to the career and liberal arts training provided to students. Students are prepared for today’s linguistically and culturally challenging world of work. Hostos Community College will continue to develop its dual-language program to establish its unique place as the premier dual-language academic and career institution in the city, state, and nation.

Fernández believes that Hostos students can function in two languages and some might go on to four-year colleges. Others will work in career fields such as nursing and dentistry in hospitals in their own Bronx community and elsewhere. Many students will have developed interpersonal skills and will be able to communicate effectively with patients and other community members who might be proficient in only one language. This is the community and family spirit at work.

Fernández believes deeply in community, and stressed its importance in her March 2, 2000, State of the College address.

“Since coming to the institution, I have learned a great deal. Experience in a community college has been a revelation. I take pride in the fact that Hostos is more than a two-year school. Community is our middle name. I have also learned about the South Bronx. This is a remarkable community, with a vitality and resiliency of its own and the kind of diversity that makes New York the capital of the world.

In addition to learn-as-you-go education in the intricacies of the City University system, I’ve also come to realize a few things about myself. One of these things is that I function best in an organization that works like a family. By this, I don’t mean one in which everyone is always in agreement. My own family is certainly not like that, and I daresay neither is yours. In a real family, individual members are frequently at odds with one another. Dissension can be covert or overt. Alliances form and dissolve; the balance of power shifts; negotiations go nowhere; communication breaks down. Then, at other times, burnt bridges are miraculously rebuilt. Consensus blossoms out of barren ground, harmony fills the air, and it suddenly becomes apparent that the whole is greater than the sum of its parts. Why?

“Because members of a family realize they care about one another in profound ways that transcend thought, word, and deed.”

**George Mason University**

Director of Development Research

George Mason University is seeking a Director of Development Research. This position is part of the development team and works closely with development officers to manage the solicitation process and support the fund-raising activities by planning, organizing, and conducting research on individuals, corporate and foundation donors and prospects. This position reports to the Director of University Development and supervises two researchers.

A baccalaureate degree is required with three years of related experience (prior capital campaign experience would be beneficial). The position requires leadership ability, excellent research skills and an aptitude for identifying individual, corporate and foundation major gift prospects; and mastery of on-line informational databases (Dialog, Experian, CDA Invest/Net, DataTimes) and use of the Internet. Also required are outstanding communication and organizational skills and the ability to work collegially within a diverse team.

Review of applications will begin June 6, 2001, and continue until the position is filled. Applicants should submit a cover letter and resume to:

AA/EEO
The path Arnoldo De León followed out of the cotton fields of South Texas was much the same as that taken by many other Mexican Americans out of poverty. Only the destination was different.

He not only landed in an Angelo State University classroom—first as a student and later as a professor, but ultimately he became one of the leading historians in the relatively young field of Mexican American history.

"When you research Chicano or Mexican American history, you find out that it is the history of yourself," De León said.

Consequently, De León has learned a lot about himself over the last three decades. And through his research, writing, and classroom instruction has taught a generation of students a lot more about Chicano history.

In a field that is just over 30 years old, De León has published some of the seminal works, including *They Called Them Greasers: Anglo Attitudes Toward Mexicans in Texas, 1821-1900* and *The Tejano Community, 1836-1900*, winner of the Border Regional Library Association's 1982 Book Award.

He has been called the most prolific Mexican American historian since Carlos Eduardo Castañeda and has published 13 books, 11 booklets, 37 major refereed articles, 32 minor articles, and 49 book reviews in some 13 professional journals.

"The argument had always been that the resources were not there for Mexican American history," De León said, "but one of the things that historians have recognized is that actually the sources are there, if you just look for them. In the case of Mexican American history, the sources just hadn't been researched."

Over the course of his scholarly career, De León has immersed himself in government documents, newspapers, diaries, journals, and other resources—some written by Mexican Americans but many not—and proved the materials were there if someone just took the time to notice. De León did, and the academic as well as the Hispanic communities took notice of him.

Today he has been called "the foremost Texas-Mexican historian" by such leading Hispanic scholars as Rodolfo Acuña of the California State University at Northridge, and "dean of Mexican American history in Texas" by Thomas H. Kren, head of Special Collections and Archives at Texas A&M University-Corpus Christi.
The acclaim was something De León could never have imagined from his childhood days in South Texas, where he grew up on a small ranch in Nueces County. His father was a farmer, and his mother, a housewife.

"I did a lot of work in the cotton fields," he recalled. "I worked in the fields from the age of five until 18."

His teenage and formative years were spent in Robstown, Texas, where he graduated from high school.

"We grew up with prejudice, but I was never kept from any public place, nothing very obvious as far as discrimination is concerned," De León said. "The school, for example, was integrated, and there was racial friction but never any racial conflicts. We developed a consciousness of being Mexican Americans, and part of that is explained by this friction that you were different from the others, many of whom were the sons and daughters of the ranch owners and the merchants in town."

This was during the '50s and '60s when few jobs were available in town for Hispanics who wanted to get out of the cotton fields. There was only "Mexican work," and that work was in the field, De León said.

"Those were different times compared to now, when you don't have difficulty getting a job in the bank, for example, or in the supermarket, but at that time I couldn't find a job."

He studied a year at Del Mar College in Corpus Christi, but he was too poor to sustain himself and make satisfactory progress toward a degree, so he went into the Air Force.

"The military was my way out of poverty. That was my way off the farm. At that point I had a steady income, and I was independent, or at least no longer dependent on my parents. I could make my own decisions, set my own goals, those types of things. Up until that time, I had never considered becoming a historian."

During his enlistment, he was stationed at Goodfellow Air Force Base in San Angelo, Texas. It was there that he met his wife, and there he would return after completing his military commitment, to enroll at Angelo State University.

"What my goal had always been was to find the financial resources—to save money, actually—so I could finance my education. By the time I got out of the military in 1967, I had the savings, and I had the veteran's benefits," he said.

Once he enrolled in history classes, his professors began to see that he had a knack for writing and a knack for history. His next goal was to finish his degree and get a job teaching in public schools. Just getting a college degree would have been a significant accomplishment in his family. However, several ASU faculty members, including current department head Dr. Charles Endress as well as Dr. H. Dempsey Watkins and Dr. Bob Holcomb, encouraged him to go to graduate school.

A member of the Texas Christian University history faculty came to the ASU campus on a recruiting trip during the spring of 1970. The timing could not have been better. De León, who was scheduled to graduate in May, was offered a National Defense Education Act Fellowship to attend TCU in the final year of the fellowship program.

It was also a year in which affirmative action took bloom and the Chicano Movement was gaining notice among many, including De León. His professors' faith in his abilities had given him a quiet confidence to succeed, and he did, earning both his master's and doctoral degrees from TCU. In later years, Don Worcester, now a TCU professor of history emeritus, would call him one of the most productive of the 50 Ph.D. candidates whose dissertations he directed. De León completed his Ph.D. in 1974.

"During that time there was a demand for history teachers, educators, historians who could recapture, research the Mexican American past. Once I accepted the fact that I had this talent for research and writing, I felt I had a commitment to those in the movement," De León said.

"My contribution was going to be and still is my writing, because I felt I should compensate those in the movement for what they did for me in the form of moral support or in opening doors that would not have been opened without them. My contribution has always been through my scholarship, and I think I work as hard in making that contribution as anybody else. You don't necessarily have to be a politician to make a contribution to the uplifting of a people."

As a librarian, De León has inspired many young scholars and routinely gets compliments or letters from students who have read his works or followed his example as an historian. Mexican American history focuses on the period in the Southwest after Spanish rule ended in Mexico. Mexican American history is contrasted with Spanish Borderlands history, which encompasses Spanish Colonial history, including exploration of the Southwest, the mission era, and subsequent settlement.

The field of Mexican American history was born in the 1970s alongside the Chicano movement and is generally defined as the history of Mexican-descent people after 1836 in Texas and after 1848 elsewhere in the Southwest when the treaty of Guadalupe Hidalgo recognized them as citizens of the United States.

The governmental turmoil of the 30-year period preceding the Treaty of Guadalupe Hidalgo left Southwestern Hispanics, particularly in Texas, to grapple with changing sovereignties. Take for example, José Antonio Navarro, who was born in 1795 and became one of three Mexican signers of the Texas Declaration of Independence. He was a subject of Spain until 1821, when Mexico won its independence. He was a citizen of Mexico until
Texas gained independence, and a Texan when the Constitution of 1836 made him a citizen of the Republic of Texas. After the Treaty of Guadalupe Hidalgo in 1848, he became a United States citizen.

In Texas, that political upheaval—the racial animosities following the slaughters at the Alamo and San Jacinto and the ultimate triumph of the Anglo culture—gave rise to the Mexican American community. Only after World War II, with the strengthening of the League of United Latin American Citizens (LULAC), the founding of the American GI Forum, and the intervention of the federal government in racial issues, did that second-class status begin to change.

"Right after World War II, you have a generation of Texans who joined organizations like GI Forum or LULAC, and they became the ones in the forefront of questioning laws and court practices through legal challenges of such things as educational segregation or the poll tax," he said. "Then you had the government responding not only to Mexican American issues but also to the Black civil rights movement of the 1960s. By the 1960s, many of the issues present in the '40s and '50s—segregation, educational inequality, poll taxes—had fallen by the wayside."

Obviously, De León said, times have changed, but they have not eliminated the challenges that past generations have endured—poverty, embarrassment, low social status, inadequate education.

History, though, provides Mexican Americans a unity with their ancestors because it shows a similarity of experience and challenge. De León cites the educational reform movement of the 1920s and 1930s in San Antonio or the Congresso Mexicanista of 1911 when Hispanics gathered in Laredo to discuss education, culture, civil rights, and issues such as poverty and unemployment.

"When you research the history of Mexican Americans, you recognize you had many of the same experiences," De León said. "Obviously, the times are different, but there are many of the same struggles, obstacles, so on. On the other hand, you discover things you didn't know about." While that knowledge can be a unifying experience, it can also be a burden of history when the past is repeated.

"I would like to see a place where everyone is able to enjoy the kind of economic comfort that professionals such as myself enjoy," De León said. "That would be an ideal—where everybody enjoys a level of comfort so that they don't have to experience hunger or embarrassment. People of my generation have been able to achieve a certain level of comfort, but you have this constant immigration so that you find this poverty some of us left behind 30 years ago just reappearing. It doesn't seem to disappear, and as a result, it just becomes part of the Mexican American experience."

His success not only as a chronicler of Hispanic history but also as a Mexican American has a certain irony in that his parents cannot fully understand his accomplishments.

"They know that I am a doctor or a Ph.D., that I teach at Angelo State University, and that I have written many books," he said. "I have obviously surpassed their greatest hopes and expectations, but because they're common people, now retired, and didn't have an education, they really can't fully appreciate it."

For instance, he is a fellow of the Texas State Historical Association (TSHA) and a member of the Texas Institute of Letters. He is on the board of directors of the Texas Council for the Humanities.

He was editor of the Hispanic entries for the TSHA's New Handbook of Texas and has served on the editorial boards of the New Mexico Historical Review, Southwestern Historical Quarterly, and Journal of Big Bend Studies.

All of those positions have helped him further Mexican American history.

Because Mexican American history is a young field of study, it is also a small field. By comparison to Western history, where perhaps a thousand serious scholars write about the Old West, De León estimates that, nationally, there could be as few as 50 serious historians of Mexican American history.

The field, though, is bound to grow because the nation's Mexican American population is increasing. That population growth has expanding national ramifications, including more Hispanics in government and more attention to Mexican American issues, whether poverty, educational inequality, or English only, for example.

"As the demographics change, Mexican American history will not become irrelevant," De León said. "If anything, I think it will become more relevant because you will have more people wondering where did we come from and what exactly is our contribution here."

"Although the demographics will change, things that are a part of a people's past linger as indeed they have for the last 150 years for Mexican Americans. People still need to understand their Mexican American heritage. Number one, it is a good heritage. And number two, it is a proud heritage, one they can appreciate and should."

MORE ABOUT ARNOLDO DE LEÓN

Arnoldo De León began teaching at Angelo State University in San Antonio, Texas, immediately after earning his Ph.D. in history from Texas Christian University—and he has been teaching there ever since, occupying since 1988 the C.J. "Red" Davidson Endowed Professorship. De León began his studies at Del Mar College, spent four years in the U.S. Air Force, then completed his B.A., in history at Angelo State University before moving on to TCU for his master's and doctoral work.

De León is also author of more than one hundred book reviews, articles, and booklets, and has made dozens of professional presentations. Last spring he delivered "Ethnicity in the Sunbelt: A Look Back from 2000" at the Center for Mexican American Studies at the University of Houston. In 1998, he presented the keynote speech at the Fellows' Luncheon at the 102nd annual meeting of the Texas State Historical Association in Austin. His works in progress include Racial Frontiers in America: African-, Chinese-, and Mexican-Americans in the U.S. West, 1848-1890 (UNM Press) and a revised and updated edition of Ethnicity in the Sunbelt: Mexican Americans in Houston (Texas A&M UP).

Among De León's other accomplishments are his faculty sponsoring of the Association of Mexican American Students (AMAS) at Angelo State University for virtually his entire time there and his service on the editorial boards of several scholarly journals, including the relatively new-born Journal of Big Bend Studies.
Unique Partnership Brings Classes to NFL’s Chargers

National University Link Benefits Staff and Players

BY ED BRENKEN

When National University holds its commencement exercises this spring in San Diego, a unique group of students will be walking away with their Master’s in Business Administration. While most of their fellow graduates studied for one year on a college campus, this group of 11 students earned their MBAs over the course of three years right at their place of work—the San Diego Chargers’ NFL training facility in Murphy Canyon, Calif.

These professional students are the first to graduate from a partnership set up between the San Diego Chargers and National University. Established in 1998, the program brings National’s MBA classes directly to the Chargers’ training site and headquarters, where both players and staff members are encouraged to further their academic careers.

The program was initially designed with the Chargers’ players in mind but many administrative staff have benefited. According to the NFL Players Association, only 30 percent of NFL players in 1998 owned a bachelor’s degree. The Chargers were not immune to this trend. That year, only seven members of the team’s 60-player roster had completed their college degree (a scant 12 percent). With the average NFL playing career lasting just three and a half years, the Chargers organization recognized that something needed to be done to ensure that its players had something to fall back on once their playing days were over. Dick Lewis, the Chargers’ coordinator of player programs, was given the nod by team owner Dean Spanos to launch a program that could meet this goal.

“Everybody looks at an NFL organization and they think that NFL organizations don’t really care,” says Lewis, who has been with the Chargers in many capacities for the past 20 years. “But he maintains that after working with the players on a day-to-day basis, people started to say, ‘What are we doing to help them after football?’”

Lewis says the Chargers’ decision was easy. “In essence, let’s help them be the best that they can be,” he says, “even after they leave football.”

Lewis’ first step was to find a college in the San Diego area that could meet the specific needs of the Chargers. Since the team’s season begins with training camp in June and can extend into the month of January, the team needed a program that could operate within the specific time frame of February through May. And in order to make the program as accessible as possible, the team wanted a partnership that could bring the classes directly to the team’s headquarters. After reviewing several proposals, Lewis and the Chargers settled on National University (NU) in nearby La Jolla, Calif.

“When we talked to National, we knew that was the way to go because they were willing to work with us to get this thing done,” Lewis says, “It’s a unique university—that’s the beauty of it. The beauty is to have the program done right here at this facility, where when a player finished their day, or an employee finished their day, they just moved downstairs into a classroom. It’s beautiful.”
It has to make the employees feel good.”
Indeed, NU was well equipped to handle the Chargers’ needs. The school, which this year ranked 87 on The Hispanic Outlook Top 100 colleges list of bachelor’s degrees awarded to Hispanic students, is specifically geared toward serving adult learners. The school features 25 different campus locations throughout California, including nearly a dozen on-site programs at places such as McDonald’s corporate headquarters, Children’s Hospital in Los Angeles, the U.S. Department of Defense’s Department of Financial and Accounting Services, and the U.S. Border Patrol.

When Nancy Rohland, NU’s director of enrollment management, was contacted by Lewis about the proposed one-of-a-kind partnership, she knew the team had found its match. “The most unique part of the University is we have a one-course-per-month format. That’s probably what we’re known best for,” says Rohland. “It works really well with professionals, regardless of their profession…. They may have certain times during the year where it’s just not practical to run classes. For example, an accountant can’t be taking classes during tax season.”

“So that’s why it worked out so well in the off-season. [The Chargers] took one course in February, one course in March, one in April, and one in May, and then they can all help with mini-camp or whatever they need to do.”

NU President Jerry C. Lee, an avid Chargers fan and former executive with General Motors, says the partnership fit is right in line with the University’s mission. “National University is continually pursuing lofty goals outside the ordinary traditions of ivory towers…. This is a virtual university at work. It brings education to where it is needed.”

One catch, specifically for the players, was that the students needed a variety of courses to complete their degrees. One player might have been an accounting major who was one math class shy of graduating; another, a journalism major who still needed to complete a course on libel. Obviously, National wasn’t going to be able to bring a busload of professors—all from varying disciplines—to the Chargers’ training site, even just once a month. So a decision had to be made.

“They all went to different colleges, they all majored in different things, and they all needed different courses, so there was no commonality as far as what they needed,” says Rohland. “So degree that is normally obtained in one year. But this was not a major deterrent. Not only do the students get a discount rate on tuition from National, since the classes are not held on an NU campus, but the Chargers players even agreed to set up a special fund, raised through player fines, to pay for 70 percent of the employees’ remaining tuition. With that incentive, 11 of the 18 students originally enrolled in the program will pick up their MBAs this spring, according to Rohland.

Of the seven who did not complete the course, four were players—the only four players who enrolled in the program. While the partnership was originally designed with players in mind, Lewis and Rohland soon realized that life in the NFL is not always conducive to staying in one place for any length of time.

“A couple of the players were in the MBA program,” says Rohland, “but part of the problem was injuries and trades. Somebody will be in the program, and then all of a sudden you hear, ‘Oh, they’re no longer going to be a Charger,’ which has happened in some cases. So the continuity in the organization, other than your real senior players like a Junior Seau [an All-Pro linebacker], has actually been with their staff, because some of their staff have been there forever and those are the ones who stuck with the program.”

“So even though at different times we’ve had many different players, none of the players are actually completing the program, which is unfortunate,” she says. “We had hoped to have them, and some of them have made significant progress, but none of them are ready to complete yet.”

“It’s tough to keep players involved,” agrees Lewis. “Some got cut; some got traded. But the employees are here totally, so we were able to get them and keep them involved.”

Even for the players who were not able to complete the program, or who were not interested in obtaining an MBA, the partnership has made strides toward furthering their education.
Rohland can work with players on a case-by-case basis, finding out if there are any classes—either degree- or non-degree-related—that the player can take at a National campus and then transfer the credits back to their original home school.

"Dick Lewis might have a player, and he'll give me a call and say, 'This is the situation. Can you meet with this person and find out what they need to complete the degree program from wherever they played football?'" says Rohland, who helped just such a player back in March. "And we'll work with them on trying to get the courses they can to complete—from National, or in some cases we'll send them to other universities. We just try to help them find a course they can take concurrently to complete their degree from their home university."

Rohland is glad to see that the Chargers recognize this need for continued education. The alternatives, as she's seen, can be dire.

"I'd say both the NFL and NBA are really concerned about this phenomenon with people not completing their education," she says. "And if a player gets injured, a lot of times they don't have anything to fall back on. I know one former Charger now owns a car wash, and there's another who's working at a car wash. There are some who just aren't making it."

"Now, it's a lot better, I think, than in the old days, because the money is better on the front end [of their contracts], but it's still a real concern," adds Rohland, who has two former Chargers employed on her staff at NU. "The attitude of the NFL has changed where they really want to push for these guys if they started a career prior to graduation, which is most common. That carrot out there is an enticement, but they want them to get that completed as soon as possible."

With the first group of students graduating with their MBAs this spring, both Lewis and Rohland say they would like to see the partnership begin anew after the 2001-02 NFL season.

"We'll probably start something up during the off-season next year," says Rohland, who has been contacted by other NFL teams about setting up similar partnerships. "I've been contacted by Green Bay, but we can't go to Green Bay and do something like this because we're an accredited university and we have to get authorization to go into cities where we're not located...So we are limited in that regard."

Lewis, who "most definitely would like to see more players involved in the future," wonders why other NFL teams haven't followed the Chargers lead and established similar partnerships.

"It surprises me a little, but I think they just don't have the information yet," he says. "We haven't really been out there tooting our horn—we've just sort of been doing it. The president said, 'OK, let's do a program; get it done and help the students.'"

"He's the man. He's the one who makes it happen," Lewis says of Spanos, the team owner. "The students love the program, and they're appreciative of Dean Spanos for allowing us to do it."

"I've been a lot of places in my life," adds Lewis, "but I've never seen a place that cares as much as this organization cares about its employees."

---

**University of Central Florida**

**General Counsel**

The University of Central Florida seeks an executive-level attorney to serve as General Counsel. The General Counsel represents the university in legal and administrative forums; serves as a legal resource to the president, the president's advisory staff, and the Board of Trustees; reviews and negotiates contracts and other legal documents on behalf of the university; serves as the university's agent in various transactions; provides formal written legal opinions as requested by the president; reviews institutional policies, procedures, and related documents; manages litigation for the university and coordinates the provision of outside counsel and legal services as necessary; serves as liaison to other legal officials in the state; informs the administration of the legal ramifications of pending legislation and may draft proposed legislation.

Candidates for the position will have completed a law degree from an accredited ABA school of law, be a member of or eligible for membership in the Florida Bar, and have ten or more years of legal experience beyond entry level. A background in higher education or the public sector, experience within a complex organizational structure, and litigation experience are preferred. Candidates should have mature and objective judgment, exceptional oral and written communication skills, a working knowledge of legal issues as they affect public higher education, and the ability to manage department staff, budgets, and outside consultants. In addition, candidates should be able to represent the university professionally and tactfully and to maintain confidentiality.

Interested applicants should submit a resume and a letter of application that specifically addresses the candidate's qualifications for this position to Dr. Beth Barnes, Chief of Staff, Office of the President, University of Central Florida, Orlando, FL 32816. Applications will be accepted until the position is filled.

The University of Central Florida is a rapidly-growing, public metropolitan research university serving almost 35,000 students on the main campus in Orlando and several branch campuses and centers. UCF is committed to gender and racial and ethnic diversity and encourages applications from women and minorities.

UCF is an equal opportunity, affirmative action employer: All searches and documents are subject to the open records laws of the State of Florida.
Turning Classroom Conflict into Teachable Moments: Part I

BY ANGELA PROVITERA MCGLYNN

In an incident I remember as the only time I lost a sense of myself as in control in a classroom setting, a student pushed one of my emotionally charged "buttons" by making what he probably perceived as an innocuous statement. I taught this class following my viewing of the umpteenth time on network news the beating of Rodney King by members of the Los Angeles Police Department.

After watching the tape so many times, rather than becoming desensitized to the violence of it, I became more incensed that I was watching one of the great infringements on civil rights of our lifetime. I happened to be teaching the section on "racism" in my social psychology course. When I brought up the Rodney King beating as just such an example of the institutional racism of our police system, a young White male loudly proclaimed that Rodney King was beaten only because he resisted arrest. I am not proud to admit that I jumped down the student's throat with some overly forceful challenge.

In an article entitled, "Hot Moments in the Classroom," Dr. Lee Warren, associate director of the Derek Bok Center for Teaching and Learning at Harvard University, says, "Hot moments occur when people's feelings--often conflictual--rise to a point that threatens teaching and learning. These moments occur during discussions of issues people feel deeply about and can result from classroom dynamics in any field." The discussion of the Rodney King beating was just such a moment.

In this first part of my two-part series on dealing with the challenges of the emotionally charged classroom setting, I will focus on managing one's self in the situation, and begin to discuss strategies for creating "teachable moments."

As I look back on this student's statement, which I now refer to as an example of a "teachable moment," I am still haunted by my missed opportunity. Had I understood my own "hot buttons" better, I might have been able to follow Dr. Warren's advice. She offers several tips for managing ourselves in the classroom.

Dr. Warren says that if faculty can maintain a steadiness in the face of an emotionally hot student remark, the students themselves will be better able to stay steady. This will allow students an opportunity to learn something in the moment. She suggests that when we experience our own hot button being pushed, we should take a deep breath, allowing a bit of time to collect ourselves and our thoughts. This brief silence will also allow students to reflect on the issues raised. (Counting to ten is now back in favor among psychologists as an effective way to diffuse our own anger.)

Dr. Warren cautions against taking attacks personally; she says that a student's attack on us is most often an attack against the role of authority figure that we play as "teacher" rather than a personal affront. She says that if we take a student's remarks personally, we might miss the opportunity to see what student's ideas represent in the classroom and in the world at large, and thus lose our effectiveness in being a facilitator, helping students to overcome their prejudices.

When students make prejudiced remarks about people or issues that we feel very strongly about, particularly when they have treaded upon a group we are part of or identify with, Dr. Warren suggests keeping some distance between the comments and ourselves. She says that both faculty and the students would be better served if we could find ways to use the comments to enhance the students' understanding. Dr. Warren says, "...if we can remove ourselves from our
own emotional reactions of the moment, we can begin to see the heat as an opportunity to explore different views... It also helps sometimes to think about listening for the 'song beneath the words of the student. What is the student really saying? Why is this coming up at all, and why at this time?' In some discussions that took place on my campus, our faculty grappled with just such questions.

Mercer County Community College (NJ) has a group known as The Mercer Curriculum Project that meets on a monthly basis. This group is not part of college governance; rather, it is a grassroots group of faculty who come together to discuss ways to make the college curriculum more inclusive and to make classroom atmosphere more welcoming and more inclusive. I chair the project meetings. During the spring term, we devoted two sessions to discussing strategies for dealing with classroom situations in which students make prejudiced remarks.

At the first meeting, when I asked my colleagues for examples of students voicing prejudiced attitudes in class, a history professor recalled the following incident: In her Western Civilization class, she deals with the history of the development of religions. During a discussion, a student asked, "Why don't Jews believe in The New Testament and in Jesus?" The history professor explained that Jews believe that a person named Jesus existed but they do not believe that Jesus is the Son of God. The student persisted, "Why don't Jews believe that Jesus is God?" This history professor told us that when she probed further into the student's belief system, the student believed in the evolution of religion, from polytheism, to monotheism and Judaism, to the most "enlightened and true view of Christianity.'"

I believe that my colleagues should be commended for not taking the remark personally (she happens to be Jewish) and for probing further into the student's belief system. Another colleague at our meeting, a counselor, said that the principal issue we are dealing with is: how do we open someone to hear a new perspective? How do we enhance students' receptivity to the world of new ideas? A professor of English added that many students might come to college with beliefs about religion that are indoctrinated beliefs, and they have never been exposed to a bigger picture. She shared her own experience coming from a fundamentalist family, and then expanded her views through history and religion courses in college.

Another history professor offered a strategy that works in his classes for reducing anti-Semitism. The strategy could be used in dealing with the "religion problem" mentioned above as well as in many other instances across disciplines. In his history class, before he discusses anti-Semitism and the Holocaust, the professor names the stereotypes about Jews that led up to the Holocaust. Before any student has an opportunity to discuss the beliefs, he labels these beliefs as stereotypes and talks about prejudice against the Jewish people. This same strategy could be applied in various contexts. For the "religion problem," the professor could state at the outset that there are people who hold a model that there is one true religion, and these people don't recognize that there are many different religious belief systems. Of course, one risk we might run by setting the stage in this way is that students might not express their ideas as openly.

One of my colleagues at this meeting teaches English courses for international students. She said that students learn very early in the semester how diverse the group is in terms of cultural backgrounds. She does exercises with her students at the beginning of the semester in which students share aspects of their own identities. This professor believes that students are apt to be more sensitive with the remarks they make in class if they recognize the diversity in the room.

Another strategy that I believe works well at times is to pause after a prejudiced remark and remain silent. This allows the remark to hang in the air. Very often, students will jump in and challenge the remark in a way that is productive and more powerful for other students to hear than if they heard from the "authority figure" in the room.

I am reminded of a poignant story I read by Professor Meachum, who teaches a developmental psychology course. He added to his course syllabus five autobiographies in which a diverse group of individuals describe their experience of growing up in different contexts. He received a scathing e-mail from a student who had a racist perspective. This e-mail went to the entire class as part of the course list serve.

Professor Meachum wanted to respond immediately but decided to sleep on his response. The next morning, when he turned on his computer, he was gratified to see that there were several e-mail responses from his other students who had eloquently responded to the offending e-mail with text-based, sophisticated analyses. Professor Meachum said that he learned a lesson, and that is to trust his students.

In the article, Meachum said that he has learned to deal better with student resistance to diversity readings by anticipating that some students will be troubled by the implications that readings on race, gender, and sexual orientation have for their own still-developing beliefs, values, and identities. He also learned that he needs to strive more for discussion among his students than for discussion between his students and himself.

I suppose that prejudiced remarks by students are more likely to come up in humanities and social science courses than in other disciplines. At our Mercer Curriculum Project meeting, a historian offered another example of student prejudice and insensitivity. When this history professor teaches about ancient Greece and explains the culturally accepted patterns of homosexuality, invariably there are students who giggle and make prejudiced comments. This professor voiced two concerns: How do we, as faculty, help students to overcome their homophobia, and what can we do to make the classroom atmosphere hospitable to the gay students in the class?

I believe that these two concerns expressed at our meeting are critical issues that need to be addressed. From my own observations in my courses such as human sexuality, psychology of women, child development, and social psychology, prejudices about sexual orientation seem to be alive and well. In fact, homophobia might be the last of the prejudices that people feel free to voice aloud in classroom settings and perhaps in the outside world.

Our counselor at the meeting, who also teaches communications courses, offered two strategies for dealing with homophobia in the classroom. She said that when she discussed gender differences in nonverbal communication, specifically when she talked about women being more comfortable with touch than men are in same-sex friendships in our culture, students would giggle. Now, when she teaches this section, she starts off by asking students if they have heard about the concept of homophobia in their other courses. She usually finds that over half the students know what the word means. A discussion of homophobia follows the question. This professor believes that if so many of us discuss our culture's prejudices in class, including homophobia and heterosexism, students will be transformed in their belief system through the educational process.

A long-term study done at The University of Michigan has actually shown some positive transformational thinking of college students. The study found that the majority of students became more accepting of lesbians, gay men, and bisexual people during their four years of college (Kardia).
The second strategy the counselor/communications professor offered at our meeting involves what Dr. Elizabeth Paul (The College of New Jersey) has called a "content-to-process" shift. Dr. Paul said that sometimes when a class is off track, she stops whatever they are doing and says, "Let's analyze what is happening here right now." Students then take more responsibility for their own resistance to learning. When the giggling occurs in response to discussion of same-sex touch, my colleague addresses the giggling behavior head on. She processes the giggling right in the class as it happens. She talks about the meaning of giggling, and how people often giggle when they are feeling anxious or uncomfortable.

My colleagues and I have grappled with the challenge of turning prejudiced comments into "teachable moments," and I shared some of our strategies here. In Part II (which will appear in HSN's June 18, 2001 issue), I will further explore creating strategies for teachable moments, and I will offer strategies for diffusing the emotionally charged classroom atmosphere.

**Buffalo State**
State University of New York

**Director of Center for Excellence in Urban and Rural Education**

Buffalo State is seeking candidates for the position of director of the Center for Excellence in Urban and Rural Education, to begin August 2001. The center is a newly established teaching and service unit designed to serve as the linchpin of a college-wide commitment to facilitate improvement of Pre-K-12th grade education in urban and impacted rural settings. The center director will hold a tenure-track appointment in the teacher education department at the college, and will be expected to teach at least one course per year and maintain a continuing scholarly agenda. The director will report directly to the Dean of the Faculty of Applied Science and Education. [www.buffalostate.edu](http://www.buffalostate.edu).

Required Qualifications: An earned doctorate in an education-related field; at least three years of successful teaching and/or administrative experience in an urban or rural Pre-K-12 school environment; at least five years of successful experience as a college faculty member, with experience in pre-service teacher education and graduate education; an established scholarly record (in the area of urban and/or rural education) sufficient to qualify for faculty appointment in a department of the college at the rank of associate professor or professor; and demonstrated ability to provide high-impact, facilitative leadership to a wide variety of constituent groups—both internal and external to the college.

Preferred Qualifications: Academic specialty preparation (at master's or doctoral level) in urban education; professional education experience in Pre-K-12 urban school or urban school system; successful experience in the acquisition of external funds (grants) and grants project management; demonstrated successful professional work experience in racially and culturally diverse settings; and leadership and management experience.

With almost 12,000 students, Buffalo State College is the largest four-year comprehensive college in the State University of New York (SUNY) system. Continuously accredited by NCATE since 1954, the college enrolls approximately 4,000 students in various teacher education programs at the bachelor's, master's, and postmaster's levels. The college's commitment to teacher education renewal work is manifest in its formal collaboration with 22 professional development schools (public and private/parochial) from 10 public school districts.

Buffalo is the second-largest city in New York State and is less than a two-hour drive from Toronto. As a city with a rich history, Buffalo offers a tremendous variety of social and cultural opportunities including a highly recognized professional theater district and a major symphony orchestra. Historic architecture imbues the downtown area; buildings designed by Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright can be found throughout the community. The city's original parks and parkway system are products of famed landscape architect Frederick Law Olmsted. The college is located in the city's museum district, which includes a history museum in one of the original buildings constructed for the 1901 Pan-American Exposition and the Albright-Knox Gallery—a world-class art museum with a world-renowned collection of modern art. Additional information about the college is available at its Web site, [www.buffalostate.edu](http://www.buffalostate.edu); more information about the city of Buffalo can be found at [www.buffalo.com](http://www.buffalo.com).

Interested candidates should submit a letter of application that addresses the responsibilities and qualifications, a current curriculum vitae, and a list of at least five references with complete contact information. (Reference will not be contacted without prior permission.) Mail application materials to Dr. Richard J. Lee, Associate Dean, Faculty of Applied Science and Education, Buffalo State College, 1300 Elmwood Ave., Buffalo, NY 14222, or submit materials electronically to majchrab@buffalostate.edu.

Review of applications will commence June 1, and will continue until the position is filled.

**Buffalo State is an affirmative action/equal opportunity employer and encourages applications from women, racial/ethnic minorities, persons with disabilities, and Vietnam-era veterans.**
HACU Conducts 2001 National Capitol Forum on Hispanic Higher Education

WASHINGTON, D.C.

Hispanic higher education leaders met in the nation's capitol last month, urging Congress to approve record spending increases targeting the education needs of the nation's youngest and fastest-growing population.

Armed with new Census Bureau reports showing a 60 percent increase in Hispanic population growth during the past decade, presidents and chancellors of colleges and universities serving large Hispanic populations in every major state met with members of Congress to stress a new urgency to Hispanic education funding needs.

ACE Discusses Gender Equity in Intercollegiate Sports

WASHINGTON, D.C.

A recent article in Higher Education and National Affairs, a publication of the American Council on Education (ACE), said that the number of women's intercollegiate sports teams has increased in recent years, and this growth has largely taken place without impacting men's teams.

ACE referred to a report from the U.S. General Accounting Office (GAO). The report, "Intercollegiate Athletics: Four-Year Colleges' Experiences Adding and Discontinuing Teams," shows that between the 1992-93 and 1999-00 academic years, 963 schools (out of 1,191 institutions surveyed) added at least one intercollegiate sports team, while 307 schools discontinued teams. Of the 948 schools that added one or more women's teams, 72 percent reported doing so without discontinuing any other sports team.

However, among NCAA Division I-A schools, which usually have large intercollegiate athletic programs, 54 percent reported discontinuing a men's team and cited gender equity considerations as a "great" or "very great" influence on the decision to drop the team. Insufficient student interest was cited by 6 percent of the institutions. In comparison, at smaller institutions—NCAA Division III schools—lack of student interest was cited by 44 percent of those surveyed as a great or very great influence in a decision to drop a men's team, followed by the need to reallocate resources to other sports (26 percent), and a decrease in budget and gender equity considerations (21 percent).

The Capitol Hill visits were a part of the Hispanic Association of Colleges and Universities (HACU) 2001 National Capitol Forum on Hispanic Higher Education. HACU, representing more than 270 colleges and universities that altogether serve more than two-thirds of all Hispanic higher education students, urged record federal funding increases for education initiatives spanning kindergarten through graduate school.

"It is all too clear that the nation's economic and social success will hinge on the academic success of our Hispanic communities," said Antonio R. Flores, HACU president and CEO. Hispanics, now the nation's largest ethnic population, suffer average high school dropout rates exceeding 40 percent. Nearly 90 percent of Hispanics over the age of 25 do not have a bachelor's degree.

HACU called for a $100 million appropriation in fiscal year 2002 to Hispanic-serving institutions (HSIs) under Title V of the Higher Education Act. (Congress appropriated $68.5 million to HSIs under Title V for fiscal year 2001.)

HSIs receive only a fraction of federal funds on average compared to all other degree-granting institutions.

HACU also called for record spending increases in initiatives ranging from pre-college and minority teacher preparation projects to new funds for graduate school programs.

The Congressional Hispanic Caucus endorsed HACU's proposal for a $100 million Title V appropriation. The Caucus submitted its request for that amount to the House Appropriations Subcommittee on Labor, Health and Human Services, and Education.

Title IX of the Education Amendments of 1972 forbids gender discrimination at schools that receive federal funds, and requires schools to provide equitable opportunities for women and men to participate in intercollegiate sports. In the past, some schools have eliminated men's teams in an effort to meet gender equity requirements.

Overall, the GAO report shows that since 1993, schools have added nearly three times as many women's teams as men's teams—1,919 and 702, respectively. In addition, twice as many men's teams as women's teams have been discontinued (386 and 150).

For both sexes, soccer teams have increased the most over time. Among women's sports, the largest decline was in gymnastics, and for men, wrestling.
Bush Chooses University Researcher for DOE Post

WASHINGTON, D.C.

President George W. Bush selected university researcher Susan B. Neuman to be the Department of Education’s assistant secretary for elementary and secondary education, a job that typically has gone to a top school administrator. The appointment was awaiting confirmation by the Senate.

According to Education Week, Neuman, who is professor of education and the director of the Center for the Improvement of Early Reading Achievement at the University of Michigan-Ann Arbor, has focused on the importance of providing books and other reading materials to children who live in poor neighborhoods.

The weekly newspaper reported that Neuman, 54, is perhaps best known for her work as a professor at Temple University, where she taught for 10 years. In several studies, she showed that children in poor neighborhoods have much less access to books, magazines, and newspapers in places like barbershops and daycare centers than do middle-class children.

"I really hope to bring more of a research background to the job," Neuman said in an interview. "I believe that research matters, that it can really make a difference.”

She said she was most proud of her research showing that giving children five more books and reading to them frequently had a "dramatic" effect on boosting their academic achievement.

Neuman is expected to oversee an office with the largest amount of direct funding for federal programs to K-12 schools. Fourteen in all, they include Title I, class-size reduction, American Indian education, school repair and modernization, and reading-excellence programs.

Richard L. Allington, professor of education at the University of Florida, called Neuman a “leading researcher” for her work on early-literacy programs.

And, the news of her selection drew a favorable response from a range of education groups. "We understand that she’s a respected researcher, and we hope that it’s a demonstration of the Bush administration’s commitment to the many programs under her portfolio," said Alex Wohl, director of public relations for the American Federation of Teachers.

The International Reading Association, based in Newark, Del., hailed Neuman’s selection. She has been a member of the group’s board of directors. "Susan Neuman has the understanding and expertise to inform the debate on closing the achievement gap between students from affluent backgrounds and those living in poverty," the group’s leaders said in a prepared statement.

Education Week is published 43 times per year by Editorial Projects in Education Inc., Bethesda, Md.

Pew Trusts Enthusiastic about National Survey of Student Engagement

PHILADELPHIA, Pa.

Public indices of college and university quality, such as published college rankings, focus largely on resource and reputation measures, not on the quality of undergraduate education and student learning. In fact, tools are insufficient for measuring the quality of what is taught and learned at colleges and universities.

Last year, with the support of The Pew Charitable Trusts, Indiana University launched the National Survey of Student Engagement (NSSE), which questions undergraduates at baccalaureate-granting institutions about the extent of their engagement in activities that improve student learning—e.g., interactions with their professors, writing papers, participation in classroom discussions. The first national administration of NSSE went smoothly: nearly 200,000 students at 276 four-year colleges and universities were surveyed during the spring of 2000, and results from the survey were published later in the year in the “College Student Report.”

The Community College National Survey of Student Engagement will make this picture of American higher education more complete. Through this grant, a version of NSSE—appropriate to the mission, student population, and attendance patterns at community colleges—will be developed and administered at these institutions, which now enroll more than half the nation’s first-year and sophomore-level students and 44 percent of the entire undergraduate population.

Data collected from both the two- and four-year NSSEs will provide critical information to higher education policymakers, accreditors, academic leaders, and the public about educational quality.
family, and community." Prizes included vouchers for GED workbooks, exams, and more.

WXEL-TV42 is a service of Barry University. The station, affiliated with PBS, the Public Broadcasting Service, meets the educational, cultural, and entertainment needs of the community with acclaimed national and local programming.

**Goya-Manet Exhibition at CUNY Graduate Center**

"Election Affinities: Prints by Goya and Manet" was on display in the new Fifth Avenue art gallery at the City University of New York (CUNY) Graduate Center. Using 56 etchings and lithographs from the collections of the Arthur Ross Foundation and the New York Public Library, the exhibit examined the critical role printmaking played in Francisco José de Goya y Lucientes' and Edouard Manet's respective oeuvres and offered insights into Manet's fascination with thematic and technical innovations of the Spanish master.

Diane Kelder, professor emerita of art history at the CUNY Graduate Center, is the gallery's curator. The Center's Doctor of Philosophy program in art history ranks among the leading programs in the country and provides curators, directors, and other leaders to arts institutions in Manhattan and around the world.

**Dartmouth Opens Latin American, Latino, and Caribbean House**

Dartmouth College in New Hampshire has a new Latin American, Latino, and Caribbean House. It will be an academic and residential affinity space tied to the Latin American, Latino, and Caribbean Studies program (LAACS), and a social/cultural space for the College's growing Latino student population.

Alex Hernández-Siegel, assistant dean of student life and advisor to Latino/Latina students; Professor Marysa Navarro, chair of the LAACS program; the faculty; and the College's administration worked with the student body to establish the house and its programming.

The number of Latino students at Dartmouth has grown from 18 in the Class of 1990 to 78 in the Class of 2003, making Latinos about 5 percent of the undergraduate student population.

**Law School Dean Reappointed at St. Mary's**

Bill Piatt was re-appointed to a new three-year term as dean of St. Mary's University School of Law in Texas.

Piatt, who became dean in 1998, is one of only two Hispanic deans out of 182 law schools in the United States. At St. Mary's, two of the three associate deans are from a minority background: David López and Charles Cantú. The other, Victoria Mather, is the first woman ever to serve as associate academic dean at St. Mary's.

Under Piatt's leadership, minority enrollment in the entering class reached its highest levels ever. Minority students now make up approximately 45 percent of the student body, the highest in the history of the law school, which has been part of St. Mary's since 1934.

**Philanthropist Gives $2.6 Million to UTPA**

Philanthropist Albert L. Jeffers will contribute a $2.6 million "unitrust" to the University of Texas-Pan American (UTPA)—the largest single planned donation to the University by an individual. The funds will be used for full scholarships.

Jeffers, an attorney specializing in intellectual property law, is well known nationally and internationally. He served on the board of trustees at the University of Evansville for more than 35 years. Driven by a passionate belief in the power of education, he created several charitable remainder unitrusts, nam-
ing universities as beneficiaries, including his most recent to UTPA.

The University plans to name its theatre of dramatic arts the Albert L. Jeffers Theatre in recognition of his generosity.

**Mott Executive Heads State Association**

Carlos Cisneros, executive director of financial aid at Mott Community College (Mich.), was elected president of the Michigan Student Financial Aid Association (MSFAA). The Association's mission is to enhance student financial awareness, promote student access to postsecondary education, and provide professional development opportunities for its members. MSFAA is composed of professionals from colleges, universities, banking institutions, loan guarantee agencies, high school guidance centers, and associated organizations and agencies.

Cisneros has a bachelor's degree from Saginaw Valley State University and is working on a master's from Central Michigan University.

**Allan Hancock Sponsors Comedy Celebrating Cultural Diversity**

Allan Hancock College's Extended Opportunity Programs and Services, in celebration of cultural diversity, sponsored a satirical multimedia performance featuring actress-cellist Maria Elena Gaitán. "The Adventures of Connie Chancita," a lively blend of stand-up comedy, history, and cello music, was held at Santa María High School in Santa María, Calif.

Gaitán is the first artist in the United States to receive the Gateways Bi-National Ford/Rockefeller Residency Award from the Guadalupe Cultural Arts Center in San Antonio, Texas. Currently an artist-in-residence at the Esperanza Center for Peace and Justice under the Ford Foundation's Animating Democracy Initiative, she is creating a new multimedia performance at the invitation of the Mexican Fine Arts Center Museum in Chicago.

**Morehouse Hosts Symposium on Growing Gender Gap**

Morehouse College (Ga.), one of the nation's four remaining all-male institutions of higher learning, recently held the millennium's first symposium dedicated to reviewing the changing status of men in higher education.

Symposium keynoters included Richard Lapchick, director, Center for Sport in Society, Northeastern University; Thomas G. Mortenson, senior fellow, Center for the Study of Opportunity in Higher Education; and Michael T. Netles, sociologist, University of Michigan.

In 1998, men accounted for just 43 percent of all college students, down from 48 percent in 1985, according to the National Center for Education Statistics. U.S. Department of Education officials project that by the year 2008, women might earn more than 800,000 of the degrees awarded, while men will continue to hover in the 500,000 to 600,000 range. The dwindling presence of male students has become most evident at the nation's liberal arts colleges and minority-serving institutions, where, in some instances, male enrollment has dipped to 30 percent.

**NCLR Criticizes Bush Tax Plan**

The National Council of La Raza, in early March, upon reviewing President Bush's proposed tax plan, issued the following statement while introducing the Fair Taxes for All coalition:

...The Bush plan provides 40 percent of the benefit of tax cuts to the wealthiest Americans while failing to provide any benefit to more than half of Hispanic families with children. Despite two decades of economic growth and hard work by Latino parents, millions of Hispanic children cannot count on the basic necessities of life...These families work hard, play by the rules, and deserve a tax cut. But most will receive nothing....

...Three in 10 Latino children lack any form of health insurance. About one-third of Hispanic children live in inadequate housing and/or overcrowded housing, and most of their families spend more than half of their incomes on rent. More than four million Latino children don't get enough to eat, or don't have adequate, healthy diets, because their families can't afford it. Latino children are less likely to be enrolled in early childhood development programs...and almost 30 percent of Hispanic children don't graduate from high school. The overwhelming majority of these Latino children come from working families, and most of these families do not receive any government help....

**MALDEF Applauds Bush Decision on Salvadoreans**

The Mexican American Legal Defense and Educational Fund (MALDEF) expressed its full support of President Bush's decision to officially grant undocumented Salvadorans Temporary Protected Status (TPS). The Immigration and Naturalization Service had suspended deportations for Salvadorans following a devastating earthquake earlier this year. However, TPS was needed to allow the country of El Salvador to rebuild itself and tend to its citizens without having to incorporate a large influx of Salvadoran nationals who might have been deported from the United States.

"We are pleased to see the administration recognizing that fair and compassionate U.S. domestic immigration policy not only has domestic, but has international, humanitarian, and economic ramifications as well," said Marisa J. Demeno, MALDEF's Washington, D.C., regional counsel.

**Cal State-Northridge Provides Scholarships, Honors Alumni**

California State University-Northridge's (CSUN) La Raza Alumni Association hosted its seventh annual La Raza Scholarship Banquet. CSUN Chicano/a studies professor and award-winning author Rodolfo Acuña (pictured) was the guest speaker. Three CSUN alumni were honored.

Evertio Ruiz, Chicano studies professor at CSUN, was honored for his work as a scholar and as founder of Mariachi Aztlán, a student group that encourages interest in mariachi music; Lorraine Chaparro, chair of the Oxnard Community College psychology department, for her involvement in counseling people in the community; and Maria Chavez, head of the Secondary Success program of the Clark County School in Las Vegas, for her volunteerism and work in education.

A tax-deductible donation of $50 benefited La Raza Alumni Association's scholarship program.
Nevada Student Earns College Credits Along with H.S. Diploma

Lizbeth Álvarez earned college credits before she even had her high school diploma in hand, while she was enrolled in the Community College System of Nevada's community college high school.

"It was a wonderful program," said Álvarez, a native of Mexico, who immigrated to the United States when she was 12. "The classes were small, so I was able to get more attention and help. Since English was a second language for me, I originally had a hard time with my classes when I first came here."

Although her parents had always supported her desire to continue her education after high school, Álvarez knew she couldn't afford to be a full-time student. However, armed with 28 college credits and a high school diploma, the 3.25 GPA student received notice in the mail that she was eligible to receive a Millennium Scholarship.

Álvarez is pursuing an associate's degree at the Community College of Southern Nevada in accounting with a minor in art and will transfer to the University of Nevada-Las Vegas next fall.

Southwestern President Receives Education Award

Dr. Serafin A. Zasuea, superintendent/president of Southwestern College in Chula Vista, Calif., received the Joe Rindone Excellence in Education Award from the Chula Vista Chamber of Commerce at the organization's annual installation ceremony.

The chamber cited Zasuea as "a dynamic leader who has taken the College from the last century into the new with the speed of light. He orchestrated the first bond issue for the College to be passed in 35 years and continues to work for parity in state funding for the College."

Rindone was Southwestern's founding superintendent in 1961. The award was established and presented to him in 1997 in recognition of his monumental contributions to education in the South San Diego County region.

Bronx Community College Honors Castro and Román

Bronx Community College (BCC) in New York honored women who are successful role models during the program "Magnificent Women Defining Success," part of the school's Women's History Month celebration. The honorees for this year were Ida L. Castro, chair of the U.S. Equal Employment Opportunity Commission, and María Román, president of the board of directors of the National Puerto Rican Day Parade. Three BCC members also were honored: Mary E. Coleman, vice president for administration and finance; Dr. Kwai Park-Kim, business and information systems department; and BCC alumna Gloria Davy, health, physical education, and wellness department.

The College also held a "Kaleidoscope Awards Luncheon," honoring StarHawk, an internationally known, award-winning author, ecofeminist, and peace activist; Dr. Ruth Bass, chair of the BCC art and music department; and Regina Tobin, associate registrar at BCC.

Women Scholars, Activists, Filmmakers, Artists, and Poets Converge at Smith College

Smith College in Massachusetts held a four-day conference marking the launch of its new and widely heralded women's studies journal, *Meridians: feminism, race, transnationalism.*

A joint venture of Smith and Wesleyan University (Conn.), *Meridians* is the first peer-reviewed, scholarly journal devoted to issues of women of color. The inaugural issue was published in October; the second, featuring an interview with Edwidge Danticat, poetry by Adrienne Su, and an historical essay by Paula Giddings, was released in conjunction with the conference.

Conference highlights included: a talk by former Salvadoran guerrilla combatant María Ofelia Navarrete, political activist and the subject of the 1991 PBS documentary *Maria's Story,* activists Angela Y. Davis and Elizabeth "Betita" Martínez and legal scholar Sharon Hom speaking about effective human rights organizing among women of color, nationally and internationally; and Smith College President Ruth J. Simmons (pictured 1) and *Meridians* Senior Editor Kum-Kum Bhavnani (r.) discussing the future of scholarly publishing by and about women of color.

Research on Culture in the Marketplace Wins Grants for CU-Boulder Professor

The Marketing Science Institute (MSI) awarded Lisa N. Peñaloza, associate professor of marketing in the University of Colorado-Boulder College of Business, two grants totaling $25,000 to fund her ongoing research on culture in the marketplace.

Peñaloza researches the way in which consumers and marketers express and produce culture in such venues as ethnic markets, retail concept stores, and the Denver Stock Show. Her research is of particular interest to marketing companies and practitioners because it addresses issues they face in solving real-world marketing problems.

Peñaloza uses an ethnographic approach to research, which consists of extensive observation, interaction, and in-depth interviews with people as they live in their normal environment. "While this approach is common in anthropology and sociology, it is making an increasing impact in marketing research," Peñaloza said. "It provides in-depth understanding of cultural exchanges, which are vital in an increasingly global market."

MSI is a not-for-profit organization that matches leading-edge academic research with corporate marketing practitioners.

Southern Methodist Women's Symposium Honors Reyes

Delia Reyes received the Profiles in Leadership Award at Southern Methodist University's (Texas) 36th Annual Women's Symposium. She was honored for improving opportunities for women and girls through her community service.

Reyes, the only woman to chair the U.S.
Hispanic Chamber of Commerce, is president and CEO of Reyes Consulting Inc., a marketing and public relations firm, and is CEO of Adrian Reyes Strategies, a subsidiary. She is director of the Texas Utilities Advisory Board for Dallas and has consulted with several community and public service organizations, such as Parkland Hospital, Head Start, and Univision.

A graduate of Havana Business College in Cuba, she has won Hispanic magazine's Hispanic Achievement Award for Leadership, Women's Enterprise magazine's Women of Excellence Award, and the Dallas Can! Academy's Dallas Mother of the Year Award.

**UT-Austin Researchers Distinguish Language Differences from Learning Disorders**

A language difference is not a language disorder. Yet, every year, some bilingual children in Texas wind up being funneled into classrooms designed for children with learning disabilities.

Dr. Elizabeth Peña, assistant professor at the University of Texas (UT)-Austin's department of communication sciences and disorders, is working to develop better ways to assess language skills in bilingual children to prevent misdiagnosis—and to make sure that those bilingual children with genuine learning problems get the help they need. She and Dr. Lisa Bedore, assistant professor of communication sciences and disorders at UT-Austin, are collaborating with researchers in California and Pennsylvania to develop a language test for bilingual children 4, 5, and 6 years of age that will measure important aspects of their use of language.

In addition, Peña, Dr. Lynda Miller, president of SMART Alternatives Inc., and Dr. Ronald B. Gillam, associate professor at UT-Austin's department of communication sciences and disorders, have developed a new diagnostic tool, "Dynamic Assessment and Intervention: Improving Children's Narrative Abilities," published by Austin-based Pro-Ed.

**University of Southern California, Students Travel to Cuba**

The University of Southern California (USC) Marshall School of Business sent Dean Randolph W. Westerfield and 50 business professionals enrolled in its part-time Master of Business Administration (MBA) program on a trip to Mexico City and Havana, Cuba, to study business practices and strategies employed for foreign investment.

Cuba's willingness to host students in USC's MBA for professionals and managers program is further evidence of its interests in opening the country and improving its economy by attracting foreign investment.

The trip was arranged in cooperation with Cuba's Centro de Promoción de Inversiones, part of the Ministry for Foreign Investment and Economic Cooperation, which oversees foreign investment for the embargoed Caribbean nation, and with the approval of the U.S. Treasury Department.

**Sánchez Reappointed to San Francisco Health Commission**

Dr. David J. Sánchez, Jr. (pictured), was reappointed by Willie L. Brown, Jr., mayor of San Francisco, Calif., to a four-year term on the San Francisco Health Commission. In addition, he will serve on the San Francisco Health Authority and the San Francisco General Hospital Foundation.

Sánchez is a professor of family and community medicine at the University of California-San Francisco (UCSF), where he was honored for 30 years of service. He continues to chair the UCSF policy board on student outreach, recruitment, retention, and academic enrichment. He is also on the National Hispanic Medical Association Leadership Fellowship Advisory Committee and is a trustee of the San Francisco Foundation.

**Varella Hudson Addresses Southern Colorado Graduates**

Victoria Varella Hudson delivered the Spring 2001 commencement address to University of Southern Colorado (USC) graduates, faculty, and guests at the Colorado State Fair Events Center. Varella Hudson, president and director of strategic planning for Cartel Creativo, is known nationally for her business savvy, high energy, and unrelenting drive in taking her Hispanic communications agency from zero to $75 million in annual billings since 1995.

USC President Tito Guerrero said that the University's recent federal designation as a Hispanic-serving institution made the selection of Varella Hudson a particularly relevant choice. "Victoria Varella Hudson is an outstanding role model for women, minorities, and anyone who aspires to be an effective communicator in today's multicultural environment," said Guerrero.

**PepsiCo Names Harrison Senior VP of Global Diversity**

PepsiCo, Inc. promoted Ronald Harrison, vice president of community relations and a 36-year veteran of the corporation, to the new position of senior vice president of global diversity and community affairs. The promotion expands Harrison's long-standing role in promoting diversity among PepsiCo's employees and suppliers. He will assist PepsiCo in establishing a global diversity council designed to leverage PepsiCo's diversity efforts across the entire corporation. He continues as the corporation's chief liaison with a variety of national minority organizations.

Harrison is an active leader on the corporate advisory boards of the Congressional Black Caucus, the U.S. Hispanic Chamber of Commerce, the National Council of La Raza, the National Urban League, and the National Puerto Rican Coalition. He has been a board member and trustee of the National Hispanic Corporate Council, the Executive Leadership Council, the International Franchise Association, the Cuban American National Council, and the College of New Rochelle.

**Albee Extols Virtues of Creative Arts at Sul Ross State**

Playwright Edward Albee delivered this year's Mary Thomas Marshall Lecture, "The Playwright vs. the Theater," at Sul Ross State University in
Texas. The three-time winner of the Pulitzer Prize is a distinguished professor and scholar-in-residence at the University of Houston.

Albee, deeply disturbed by Congress' efforts during the past 10 years to destroy the National Endowment for the Arts, preached the importance of creative arts in a democratic society. He also expressed concern that America's university students are not at the forefront of political involvement.

Pictured with Albee (l.) is Abelardo Baeza, professor of English and Spanish at Sul Ross.

Texas-Arlington/Southern Methodist Researchers to Study Immigrants

An interdisciplinary team of researchers from the University of Texas-Arlington (UTA) and Southern Methodist University (SMU) received one of the largest grants ever given by the National Science Foundation in the field of cultural anthropology. The three-year $445,000 grant will be used to conduct the first comprehensive study of immigrants in the Dallas-Fort Worth area.

While older cities such as New York and Chicago have been the subject of numerous studies on immigration, this is one of the first studies to focus on a "suburban metropolis" that includes new suburban as well as older urban environments. Dallas, Tarrant, Collin, and Denton counties all will be included in the study.

"Today's immigrants span the gamut from the top to the bottom of the labor market, and they go where the jobs are, not just where their compatriots are," said James Hollifield, professor of political science at SMU and one of four researchers involved with the project. He is joined by Caroline Brettell and Dennis Cordell, from SMU, and Manuel García y Griego, director of the Center for Mexican American Studies at UTA.

UCLA Biology Professor Keynotes Texas A&M-Kingsville Seminar

Dr. Elma González was the keynoter at Texas A&M University-Kingsville's Third Annual President's Distinguished Student Research Seminar, hosted by the biology department.

González became full professor in the University of California-Los Angeles (UCLA) biology department (now organismic biology, ecology, and evolution) in 1993—the first Mexican American woman scientist to become full professor in the UC system, joining a select group of approximately six Latina full professors in all disciplines throughout the nine campuses. She is well known nationally for her efforts to improve and expand access for historically underrepresented individuals in scientific and research careers.

González has a bachelor's degree from Texas Woman's University, a doctorate from Rutgers University, and did postdoctoral research at UC-Santa Cruz.

Cal State L.A. Professor Receives American Chemical Society Award

California State University-Los Angeles chemistry professor Carlos G. Gutiérrez received the 2001 American Chemical Society Award for Encouraging Disadvantaged Students into Careers in the Chemical Sciences. The award, sponsored by The Camille and Henry Dreyfus Foundation, Inc., was given to Gutiérrez for his significant contributions to the educational success of students underrepresented in the sciences. It also recognizes his dedication as a classroom instructor, faculty advisor, research supervisor, director of University programs, and his active participation in programs at the national level.

Gutiérrez directs Cal State L.A.'s NIH (National Institutes of Health) Minority Access to Research Careers and Minority Biomedical Research Support programs and is faculty coordinator and mentor for the Beckman Scholars program. In his 20-plus years at Cal State L.A., he has mentored more than 180 students through NIH-funded programs or as a faculty participant in other projects such as the National Science Foundation-sponsored Research Improvement in Minority Institutions and Research Experiences for Undergraduates programs.

Mexico's PAN Leader Speaks at Columbia

The Latin American Institute of Columbia University's (N.Y.) School of International and Public Affairs hosted Felipe de Jesús Calderón Hinojosa, Mexican federal representative and leader of the parliamentary faction of the PAN in the Mexican House of Representatives. Calderón Hinojosa presented a lecture, "PAN and Power: Challenges of the Mexican Congress."

News from Palo Alto College

Palo Alto College (Texas) received a five-year $1.8 million grant aimed at strengthening and improving services at the southside community college. The Title V federal grant is earmarked for developing Hispanic-serving institutions. Palo Alto's student body is 65 percent Hispanic and 30 percent White/Non-Hispanic.

Velda Villarreal, former director of academic support services at Palo Alto, is now dean of student services, overseeing admissions, counseling, testing, tutoring, recruitment, and student activities.

Laura Beizer became coordinator of the new Ray Ellison Family Center. Beizer has a strong background in family studies and infant and early childhood development, and she plans to incorporate various areas of the college, such as the Ozuna Children's Library, conducting on-campus field trips, and working with the art and theater departments. She has a bachelor's degree from Cornell University, a master's from Pennsylvania State University, and a doctorate from the University of California-Los Angeles.

Smithsonian Presents "A Latina Celebration"

In honor of Women's History Month, the Smithsonian Center for Latino Initiatives presented "A Latina Celebration" at the Smithsonian Institution Castle in Washington, D.C. The event featured a distinguished Latina panel, a special tribute to United Farm Workers union co-founder Dolores Huerta, a book signing by Esmeralda Santiago, and a poster signing by Sina Sutter. Ford Motor Company, Goya Foods, Inc., and the Fannie Mae Foundation sponsored the celebration.

Martin Joins Domingo and Friends at Los Angeles Opera Gala

The red carpet was rolled out at the Dorothy Chandler Pavilion during "Plácido Domingo and Friends: The Welcome Concert and Gala," as stars from the world of opera, film, music, and television celebrated Plácido
Domingo's new leadership position with the company. Four of the world's leading conductors shared the podium: Los Angeles Opera principal conductor Kent Nagano (1), Los Angeles Philharmonic's Esa-Pekka Salonen, and guest conductors Valery Gergiev and John Williams (next to Nagano). “We wanted to wait for the right time to officially welcome Plácido,” said Leonard Green, Los Angeles Opera board president and chief executive officer. Domingo, closely associated with Los Angeles Opera since 1984, assumed artistic leadership in July 2000.

International superstar Ricky Martin joined a roster of classical music stars for the official welcome to new artistic director Plácido Domingo (c).

Martin, who detonated the Latin Pop Explosion, is like Domingo an international success story. His hit single “Livin’ La Vida Loca” was the No. 1 single in five international markets, and his album Ricky Martin (1999) has been certified platinum (one million sales) in 33 countries.

**Video Placement Worldwide™**

Updates Teachers on Free Videos

Video Placement Worldwide™ (VPW), one of the leading distributors of free, sponsored educational materials to teachers, added "Video Placement Review," an online newsletter, to its website, www.vpw.com.

The newsletter is another way that VPW is helping teachers discover the high-quality, sponsored educational videos and other materials that are available at no cost with just the click of a mouse. Identical to the printed version that VPW sends to registered educators, it includes information about titles, updated versions of existing offerings, and tips providing practical information on how teachers can use VPW's materials in their classrooms. Teachers may order from a wide array of available videos, including titles that deal with health and safety, life skills, volunteerism, careers, environmental awareness and protection, and more.

**Publications**

**Cuba: The Contours of Change**

Susan Kaufman Purcell and David Rothkopf, eds.

This book offers a range of views on the growing political and economic challenges facing the Castro regime, how those challenges will be met, and Cuba’s prospects for a peaceful transition to democracy. It includes two strongly opposing assessments of the nature, impact, desirability, and sustainability of the U.S. embargo against Cuba.

**Mário de Andrade: The Creative Works**

By José I. Suárez and Jack E. Tomlins

Few if any writers have generated as much critical controversy in 20th-century Brazilian literature as has Mário Raul de Mochis Andrade (1893-1945), São Paulo's most famous modern son. To capture all aspects of such a personality is virtually impossible. This study is limited to the purely creative works: the poetry, short stories, and novels, as they figure among the major developments of Brazil's Modernist movement.

**Tierra del Fuego: An Historical Novel**

By Sylvia Iparraguirre

Based on the true story of a Yamana Indian, Jenmy Button, this suspenseful seafaring tale explores Captain Robert Fitzroy's abduction of Button from his home on Cape Horn and Fitzroy's attempt to "civilize" Button in England in order to return him to his country as a bearer of "enlightened society." The story deals with European arrogance and exploitation without resorting to the cliché of the "Noble Savage." Translated by Hardie St. Martin. Winner of the 2000 Sor Juana Inés de la Cruz Prize.

**Reyita: The Life of a Black Cuban Woman in the Twentieth Century**

By María de los Reyes Castillo Bueno, as told to her daughter Daisy Rubiera Castillo

A Black woman known as "Reyita" recounts her life in Cuba, spanning more than 90 years. Her voice is at once dignified, warm, defiant, strong, poetic, principled, and intelligent. Her story begins in Africa with her own grandmother's abduction by slave traders and continues through a century of experiences with prejudice, struggle, and change in Cuba for Reyita and her numerous family members. Translated from Spanish by Anne McLean. Introduction by Elizabeth Dore.

**Reading and Writing the Ambiente: Queer Sexualities in Latino, Latin American, and Spanish Culture**

Susana Chávez-Silverman and Librada Hernández, eds.

In this collection of essays, many leading literary scholars trace gay and lesbian themes in Latin American, Hispanic, and U.S. Latino literary and cultural texts. Far-ranging, historically as well as geographically, this book includes discussions of texts from as early as the 17th century to writings of the late 20th century.

Sal Si Puedes (Escape If You Can): César Chávez and the New American Revolution
By Peter Matthiessen

In the summer of 1968, Peter Matthiessen met César Chávez for the first time. They were the same age: 41. Matthiessen lived in New York City while Chávez lived in Sal Si Puedes, the San José barrio where his career as a union organizer took off. This book is Matthiessen’s panoramic yet finely detailed account of the three years he spent traveling and working with Chávez. In it, he provides a candid look at the many sides of this enigmatic and charismatic leader, who lived by the laws of nonviolence. With a foreword by Ilan Stavans and a postscript by the author.

Market, Socialist, and Mixed Economies: Comparative Policy and Performance—Chile, Cuba, and Costa Rica
By Carmelo Mesa-Lago

How can we determine which economic model best provides for economic development and social welfare? Noted economist Carmelo Mesa-Lago analyzes three Latin American countries with divergent economic systems: Chile (a market economy), Cuba (socialist), and Costa Rica (mixed). Mesa-Lago received assistance and contributions from Alberto Arenas de Mesa, Ivan Brenes, Verónica Mostecinos, and Mark Samara.

Sinking Columbus: Contested History, Cultural Politics, and Mythmaking during the Quincentenary
By Stephen J Summerhill and John Alexander Williams

This book describes and analyzes the failure of the 1992 commemoration of the 500th anniversary of Christopher Columbus’ voyage from Spain to the New World, once “universally” hailed as the “discovery of America.” Despite this failure, the book recognizes the Quincentenary as an important and illuminating event in the recent political and cultural history of the United States, Europe, and Latin America.

Dueling Eagles: Reinterpreting the U.S.-Mexican War, 1846-1848
By Richard V. Francaviglia and Douglas W. Richmond, eds.

This book brings together the thoughts of respected American and Mexican scholars who examine the lesser-known aspects of the war, including the influence of Great Britain, the role of the first war correspondents, and the reasons for the collaboration of many Mexicans with United States troops.

Romance of a Little Village Girl
By Cleofas M. Jaramillo

Cleofas M. Jaramillo (1878-1956) grew up in northern New Mexico, and her memoir, originally published in 1955, offers a unique and engaging portrait of daily life and customs from the late 19th century through the early 20th century. She discusses religion, politics, local customs, family, love, and more, recounting in unique detail customs associated with courtship, marriage, fiestas, and hospitality that are so much a part of Hispanic culture in New Mexico. Introduction by Tey Diana Rebolledo.

Children of Facundo: Caudillo and Gaucino Insurgency During the Argentine State-Formation Process (La Rioja, 1853-1870)
By Ariel de la Fuente

Post-independence Argentinean instability and political struggle from the perspective of the rural lower classes are examined. As the first comprehensive regional study to explore 19th-century society, culture, and politics in the Argentine interior—where more than 50 percent of the population lived at the time—the book departs from the predominate Buenos Aires-centered historiography to analyze this crucial period in the processes of state- and nation-building.

Latin America in the World Economy: Mercantile Colonialism to Global Capitalism
By Frederick Storton Weaver

This book considers the dual aspect of Latin American development: how external factors (phases of world capitalism since Columbus) interweave with internal factors (Latin American culture, politics, and social groups). The author demonstrates how domestic social conflicts and power relations have consistently capitalized on changes in the international economy while, conversely, engagement with the international economy has consistently constrained local struggles and patterns of change.

Many publications featured in this section are available through amazon.com.
CONFERENCES

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development and the Community College Leadership Program present their 23rd annual international conference, "Making a World of Difference..." a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty." In Austin, Texas.

Contact: John Roueche and/or Suanne Roueche, (512) 471-7545.

NCORE 2001
May 30-June 3

The Southwest Center for Human Relations Studies at the University of Oklahoma-Norman presents "National Conference on Race and Ethnicity in American Higher Education." In Seattle, Wash.

Contact: (405) 292-4172; website, www.occe.ou.edu/NCORE.

NMCI 16th Annual National Conference
May 31-June 3

The National Multicultural Institute's 2001 theme is "Creating a National Agenda: Multicultural Partnerships for Change." The major goals of this conference are to: (1) offer an opportunity for in-depth diversity training and skills-building; (2) focus on some of the unique issues that professionals face in working with a culturally diverse population; and (3) create a multicultural environment in which an open, cross-cultural dialogue can occur. At the Hyatt Regency Washington on Capitol Hill Hotel, Washington, D.C.

Contact: NMCI, (202) 737-1234 or (800) 233-1234; website, www.nmci.org.

LULAC 72nd National Convention and Exposition
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6135.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15

This 20th annual meeting/conference on multicultural affairs has as its theme "Social Justice—Racial Justice: Reconciliation and Transformation." At Saint Peter's College in Jersey City, N.J.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, "Interpreting Latino Cultures: Research and Museums." In Washington, D.C.

AAHE Assessment Conference
June 23-27

"From Expectations to Results: What Are We Finding, and How Are We Improving" is this year's theme. Opening plenary speaker is Richard Light, professor of education and public policy at Harvard University, and author of Making the Most of College: How Assessment Can Help Both Students and Us. In Denver, Colo.

HERS, Mid-America Summer Institute
June 24-July 20

The University of Denver's HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.

Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

The Barahona Center Summer Workshops 2001
June 25-27
July 9-11
July 23-25

The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/La literatura en Español dirigida a los lectores infantiles y juveniles. At CSU-San Marcos.

Contact: Isabel Schon, Director, (760) 750-4070; e-mail, ischon@csusm.edu.

Deaf Education Technology Conference
June 25-29

"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

Gender on the Borderlands Conference
July 12-14

Sponsored by St. Mary's University, the conference will explore gender in the geographic region that becomes the Spanish/Mexican/U.S. Borderlands, now the Mexico-U.S. border. In San Antonio, Texas.

Contact: Antonia Castañeda, History Dept., (210) 436-3608; e-mail acastanet@alvin. stmarytx.edu; website, http://ats.stmarytx.edu/~bdlands/.

AFT QuEST 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for PreK-12 teachers, school staff, and state and local education leaders, including the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor "TeleLearning 2001," “the premier event in distance education and educational telecommunications.” At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

ACE 2001 Conference
October 13-20

"The nation's most important national conference on diversity and improving minority participation in postsecondary education." Sponsored by the American Council on Education's Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

Contact: website: www.ace.org.

HACU 15th Annual Conference, in Puerto Rico
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme "'Excellence Through Diversity': Celebrating Our Past and Reshaping Our Future" in San Juan, Puerto Rico.

Contact: (210) 576-3218; website, www.hacu.org.

UNM's Taos Summer Writers' Conference
July 14-20

There are weekend workshops and weeklong workshops to select from. Among the many workshop leaders are Pat Mora, “Los cuentos: Family Stories for Beginners,” and Alma Luz Villanueva, “Stories: Dreaming Characters to Life.” Some scholarships are available. In Taos, N.M.

Contact: website, www.unm.edu/~taosconf.

National Conference on Critical Thinking and Educational Reform
Atlanta area June 23-26
San Francisco area July 21-24

The Center for Critical Thinking presents (Atlanta) “Critical Thinking in Subject Fields” and (San Francisco) “Dimensions of Critical Thinking.”

Contact: (800) 833-3645; website, www.criticalthinking.org.

EACUBO/Cornell Administrative Management Institute
July 22-27

AMI2001, a professional seminar for college and university administrative/business managers and department heads, is presented by the Eastern Association of College and University Business Officers and the Cornell University School of Continuing Education and Summer Sessions. In Ithaca, N.Y.

Contact: (607) 255-7569; e-mail, cusp@cornell.edu; website, www.sce.cornell.edu/2001.

Leadership Alliance 6th Annual National Symposium
July 27-29

The Symposium is the culmination of the Leadership Alliance’s Summer Research Early Identification Program—10-week research internships at 15 of the Alliance’s 28 member institutions. Dr. Ruth J. Simmons, newly appointed president of Brown University, will deliver the opening keynote address. At the Evergreen Conference Center in Stone Mountain, Ga.

Contact: (401) 863-1474; website, www.theadminstrationalliance.org.
Book Review

By Jaime S. Gómez

Heider’s White News applies the ethnographic method to effectively document racial bias in news reporting. White News would be useful in both graduate and undergraduate studies.

It is an excellent resource because it describes in detail and in a simple manner the qualitative methodology—participant observation—used in the study, included as an appendix that I suggest be the first section read. In addition, it provides a rich arena for the introduction and discussion of hegemonic theory and how it could be applied to news coverage.

One of the particular values of the book resides in its several interviews with community leaders; all of whom were people of color. These voices are rarely heard and rarely given an opportunity to speak about coverage of local news.

Undergraduate journalism students would benefit from the book’s perspective on the ethics and value of “balanced and complete” coverage. All students could benefit by reflecting on the causes, consequences, and solutions to biased news coverage of people of color. The book offers many examples.

Heider, a ten-year veteran news reporter and manager, decided to return to the newsroom not as a journalist but as a researcher and observer. For this study he chose two cities, Honolulu, Hawaii, and Albuquerque, New Mexico, because of their large minority populations other than African American (the author claims that most research done on race and media “frames questions in terms of Black and White”) and some shared characteristics that made them suitable for comparison: both cities are medium-sized television markets, and the television stations cover the entire state.

Heider sat in at editorial meetings, went out with reporters and photographers, and interviewed community leaders of color—state lawmakers, grassroots organizers, and tribal officials, among others. Their testimonies provide insights into how the local news coverage of people of color is perceived by those involved.

In the book’s introduction, the author clarifies the concepts of race and ethnicity. Race, Heider claims, was a term first used by several disciplines to identify different typologies of human beings. There is not a cogent scientific definition of race because it “still very much is a crucial and material social construct in everyday existence.” The term ethnicity comes from the Greek ethnikos, which refers to people from a particular nation. The problem with this classification is that not all people from the same country share a common language, culture, or skin color. So Heider concludes that the terms race and ethnicity may be used side by side or interchangeably and that this usage can be attributed to overlap and slippage between distinctions that in both cases are social constructions.

The author also provides his theoretical framework for analysis: hegemonic theory and Eells’ everyday racism.

Chapter One describes the managerial power structure and explains how it governs the decision-making process within the context of hegemony and everyday racism, and as related to power and ownership. The point comes across that people of color have made very few inroads into managerial positions.

Chapter Two identifies two topic areas as the ones with most coverage: racial-ethnic festivals and crime. Here Heider introduces what he calls the primary theoretical contribution of the book: incognizant racism, a term he proposes “to describe this process in news practice where journalists consistently neglect to cover the issues and complexities of communities of color.”

Chapters Three, Four, and Five take on the issues of public relations and access, the role of geography, and journalists’ knowledge of history, respectively, and how they influence news coverage of people of color.

In Chapter Six, the author concludes that the newsrooms studied “represent, in many ways, the local, daily method by which hegemony operates through local news” and that decision-making power remains in the hands of a few committed to support the status quo.

In Chapter Seven, the author offers two possible remedies: reporter outreach and education. Regarding reporter outreach, Heider reports that people of color from the communities involved “had no difficulty suggesting how their coverage could improve.” Among these suggestions are to have reporters talk to community members more often, and to have a reporter assigned to cover a specific community. Regarding education, news organizations could have training sessions for people who want to learn more about news making and its organizational structure, and how to create successful strategies for selling a story to a news organization.

My main criticism would be that although criteria for newsworthiness are suggested throughout the book, they are not expanded fully enough. They would be valuable for developing students’ deeper understanding of the decision-making process as described in this study and would also bring forth the issue of news values, a topic often neglected in the broadcast news curricula.

Dr. Gomez teaches in the communication department at Eastern Connecticut State University.

ATHLETIC TRAINING
FACULTY POSITION

Loyola Marymount University invites applications and nominations for a tenure-track faculty position at the Assistant Professor or Associate Professor level who will develop and manage an educational undergraduate degree program for the preparation of athletic trainers. The program must follow the standards and guidelines issued by the Commission on Accreditation of Allied Health Education Programs. The program will be housed in the Natural Science Department within the College of Science & Engineering and will draw upon courses offered by the College & the University. The successful candidate will report to the Chair of the Natural Science Department.

The successful candidate will be expected to develop and manage an undergraduate athletic training program; prepare, deliver, and teach courses within the program; engage in scholarly activity; advise students; assist with clinic supervision of students; recruit faculty as needed for the program; prepare materials needed for the accreditation of the program by the Commission on Accreditation of Allied Health Education Programs; maintain records and reports as required by the National Athletic Trainers Association (NATA); and serve on department, college, and university committees.

Applicants must possess a Ph.D. with specialization, preparation, and expertise in athletic training, or other closely related field and certification as an athletic trainer from the National Athletic Trainers Association, Inc. Preferred qualifications include evidence of successful undergraduate and/or graduate teaching experience in athletic training at the four-year college or university level, ability to begin and institute foundations of an NATA approved athletic training program, record of published research, and evidence of a current research agenda, knowledge of the sciences, computing software, and instructional technology related to athletic training programs, and excellent interpersonal and communication skills.

The University's goal is to fill the position during the summer of 2001. The review of applications will begin June 1, 2001, and continue until the position is filled. Applications should be received by April 15, 2001. The University is an Equal Opportunity Affirmative Action Employer and is committed to building a culturally diverse faculty and encourages applications from women, members of minority groups, persons with disabilities, and veterans.

Applications and supporting material should be sent to:

Student Development Specialist (Counselor)

EXTENDED SEARCH
Brookdale Community College is recognized for its focused commitment to its students and community. Brookdale provides a world of opportunities for study, learning and working experience, in the traditional classroom, via the Internet, through experiential learning opportunities, and by distance education courses. Brookdale has grown dynamically into an institution with limitless horizons, as it continues to meet the evolving needs of its students and its community. Located on 200 acres in central coastal NJ, the sprawling campus provides a pastoral setting, approx 50 miles south of NYC and 70 miles northeast of Philadelphia.

The College invites applications for a Student Development Specialist (Counselor) - a full time, tenure track entry-level position for September 2001. Brookdale is an innovative and comprehensive open admission two-year college with an enrollment of 11,500 credit students (approximately 7,500 FTE). We seek colleagues who share our unequivocal commitment to quality instruction, collaborative relationships and who value service, diversity, innovation and technological literacy.

A Master's Degree in Counseling or closely relate field is required. Counselors employ a variety of individual/group counseling methods to provide a full range of professional counseling and advisement services. There is an increasing emphasis on planning and implementing innovative programmatic strategies and interventions to support student growth and development and facilitate academic success in today's highly transitional and diverse educational environment. A highly flexible team orientation, facility with current technological applications in counseling, a collaborative organizational approach, and an understanding of the diversity of today's student population are essential. Some evening work and travel within Monmouth County may be required.

Additional preferences: Candidates should have familiarity with current technological advances related to the discipline. Position may require participation in community-based activities.

Compensation: Annual salary range for Instructor level for September 2001 is currently under negotiation. (Salary range for 9/1/00-6/30/01 is $33,523-$39,012.) Position is entry level and salary is commensurate with qualifications and experience within the identified range. Faculty members receive additional compensation for extra workload and work during the summer months.

The application deadline is June 1, 2001. Previous applicants from search efforts closing February 16, 2001 need not reapply. An application will be considered again. Applicants should submit letter of application (indicating desired position), curriculum vitae, unofficial copies of graduate transcripts and three references to Human Resources Office, Brookdale Community College, at the address listed below. Our email address is hrdept@brookdale.cc.nj.us, and our fax number is (732) 224-2970. For more information about Brookdale Community College, please refer to our website at http://www.brookdale.cc.nj.us.

Visit our website: http://www.brookdale.cc.nj.us

Brookdale Community College is an Equal Opportunity/Affirmative Action Employer and its staffing process is pursued through an unwavering commitment to diversity, not only as a compliance responsibility, but as an active conscious effort to build and develop diversity within the faculty and staff.

Ball State University

Ball State University is located in Muncie, Indiana, on an attractive campus 50 miles northeast of Indianapolis. Approximately 17,500 graduate and undergraduate students enroll in one of seven academic colleges that offer 126 undergraduate programs, 76 master's programs, and 20 doctoral programs. Ball State University strives to be a premier teaching institution offering instruction and scholarly inquiry of high quality within an environment that emphasizes personal attention.

Ball State University encourages all interested applicants to frequently visit the official Ball State University web site at www.bsu.edu where all open positions are listed and described in detail.

Ball State University is an equal opportunity, affirmative action employer and is strongly and actively committed to diversity within its community.

ASSOCIATE DIRECTOR
OF ADMISSION

Smith College seeks an Associate Director of Admission to plan, coordinate and take a creative role in the management and supervision of the alumnae volunteer network, comprised of approximately 1,900 volunteers around the world and to coordinate all efforts related to the recruitment and selection of international students to Smith College. Responsibilities include: staff supervision, campus programming, admission interviewing, application review, coordination of domestic and international travel for eight to ten weeks per year to recruit high school students and meet with alumnae, and other assigned program activities.

Qualifications: Bachelor's degree, graduate degree preferred; a minimum of three years' experience in admission, or a related field; demonstrated organizational and interpersonal skills; excellent oral and written communication skills; staff or volunteer supervision. Must be able to articulate the values of a selective liberal arts college for women to prospective students, parents, and secondary school personnel.

Review of resumes will begin immediately and continue until position is filled. Forward a resume, cover letter and names of three references to: Office of Admission, Smith College, Box 558, 7 College Lane, Northampton, MA 01063.

Smith College is an equal opportunity employer encouraging excellence through diversity.

SOUTH VALLEY COMMUNITY COLLEGE

Mathematics
(Faculty Tenure-track Position)

One full-time position to teach a broad range of lower division mathematics courses including algebra, finite mathematics, calculus and analytic geometry, and differential equations. Ability to teach computer languages a plus.

Qualifications: Masters degree in mathematics required. Teaching experience at a community college desirable.

Preference will be given to candidates who demonstrate a commitment to the community college philosophy; familiarity with the use of technology in the classroom; demonstrate teaching strategies with a focus on student-centered learning and excellence interpersonal skills. Position will begin Fall Semester, 2001. Successful candidates will be placed on the salary scale to reflect their own degrees/experience. Salary is augmented by a liberal fringe benefits package with no FICA deduction. Summer teaching and other extracurricular activities available.

To apply: Send letter of application, resume, copies of all transcripts and the names and phone numbers of three professional references to: Curt Devan, Coordinator of Personnel Services, South Valley Community College, 173 IL Route 2, Dixon, IL 61021. E-mail: devanc@svcc.edu

Applications will be reviewed beginning June 11, 2001, and will remain open until the position is filled. SVCC is an affirmative action, equal opportunity employer. SVCC is interested in receiving applications from individuals who would enhance the diversity of the College.
Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position:

CAREER COUNSELOR

Employee will be responsible for carrying out the normal range of career services work, with an emphasis on counseling and programming. This is a temporary position, lasting 10 months, beginning in mid-August 2001 and ending in mid-June 2002. Qualifications include: a Bachelor's degree is required, a Master's degree in a related field is preferred; a strong commitment to an education in a small liberal arts college is necessary; knowledge of job search process and familiarity with career development theory; excellent interpersonal and communication skills required; and computer proficiency is necessary.

Interested candidates should submit two copies of a cover letter and a resume, including the names and telephone numbers of three references, to: Douglas C. Terp, Director of Personnel Services, Colby College, 5850 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

Sauk Valley Community College

DEAN OF ARTS, SOCIAL SCIENCE AND P.E.

The College seeks an innovative, flexible, creative, and visionary leader who is committed to student learning and student success. The Dean is the chief academic administrator for the Division of Arts, Social Science and P.E. and reports to the Vice President of Instructional Services. Areas covered by this Division include English, Speech/Theater, Social Science, Art/Music, Criminal Justice, Education, Human Services, P.E. and Adult Education. The Dean plans, budgets, and evaluates all activities that originate from the Division office; supervises all full-time and part-time Division faculty; assists in shaping College goals; and has overall responsibility for the quality of the Division.

Responsibilities: Development and coordination of instructional schedules, assignments, budgets, and supervision of faculty and support staff; coordination, evaluation, and recommendation for curricular revisions; academic outcomes assessment; supervision of the Learning Lab, the fitness center and the Adult Education grant in the district.

Qualifications: An earned master’s degree from a regionally accredited institution and relevant and successful full-time administrative experience in an educational setting required. Evidence of support for the mission of a comprehensive community college; functional computer literacy; appreciation for working in a team environment; strong oral and written communications skills; experience with alternative teaching/learning options, curriculum design and evaluation; and a positive leadership approach are desired.

Salary is competitive, dependent upon experience, and is augmented by an attractive fringe benefits package, including no FICA deduction.

Applications: Please submit letter of application specifically detailing how your experience meets the outlined requirements and responsibilities. Additionally, include a resume and the name/address/phone numbers of three professional references to: Curt Devan, Coordinator of Personnel Services, Sauk Valley Community College, 173 IL Route 2, Dixon, IL 61021. email: devanc@svcc.edu

Position available January 2002. Applications will be reviewed beginning August 27, 2001, when faculty return for Fall semester. The position will remain open until filled. SVCC is an affirmative action, equal opportunity employer. SVCC is interested in receiving applications from individuals who would enhance the college.

THE COLLEGE OF WOOSTER

1189 Beall Avenue
Wooster, OH 44691-2363

Economics Faculty
Two Positions
beginning Fall, 2001

Admissions Positions

Program Assistant
for the Vice President
for Academic Affairs

For complete job descriptions go to www.wooster.edu.

THE RICHARD STOCKTON COLLEGE OF NEW JERSEY

SPANISH, Tenure track, Sept. 2001, Assistant/Associate Professor (Aust. $38,789-$44,688/Assoc. $47,149-$54,224); may be higher depending on qualifications, experience and increases in appropriately established compensation plan. Teach introductory through advanced-level courses in Spanish language; teacher preparation and General Studies curriculum. Teaching load is 24 semester hours, typically six-hour courses per year. Ph.D. required with college-level teaching. Preference will be given to candidates who possess a background in teacher preparation, experience in foreign language acquisition and demonstrated knowledge of oral proficiency methodology. Native or near-native fluency is required, as well as a firm commitment to teaching excellence and an on-going agenda for research and publication. The candidate must also show competency in assessment and computer aided instruction. Other responsibilities include strong interest in pedagogy, student advisement, and a willingness to prepare student teachers in order to fulfill the New Jersey World Languages Initiative. The College especially seeks individuals who will contribute to both the college’s mission and the College’s commitment to teacher preparation, general education and outreach to primary and secondary education institutions.

Screening will continue until position is filled. Send letter of application with CV, statement of teaching philosophy and three letters of recommendation to Kenneth Dollarhide, Dean, Arts and Humanities, Richard Stockton College of New Jersey, AA51, PO Box 195, Pomona, NJ 08240-0195. Stockton is an A/AEOE. Women and minorities are encouraged to apply. R014603
USF University of South Florida

Founded in 1956, the University of South Florida is a public research university of growing national distinction, serving 36,000 students in ten colleges on campuses in Tampa, Lakeland, St. Petersburg, and Sarasota. It has been classified "Doctoral/Research University-Extensive" by the Carnegie Foundation for the Advancement of Teaching. Reflecting in breadth of graduate and research programs, USF is one of three public universities in Florida classified as a Research I institution by the Florida Board of Regents. With more than 2,000 faculty, USF offers baccalaureate degrees in 79 fields, 89 master's and specialist programs, 25 doctoral programs, and the doctor of medicine degree.

More than twenty-three percent of the student population is African American, Hispanic, Asian American, Native American or other nationality. Students come from every state and more than 100 foreign countries.

**BRIDGWATER STATE COLLEGE**

**SCHOOL OF PHYSICAL EDUCATION**

**NEW INSTITUTE FOR POST-GENOMIC SCIENCE AND TECHNOLOGY**

The University of Illinois at Urbana-Champaign invites applications and nominations for the position of Founding Director of a new institute dedicated to research in post-genomic science and technology. The Director will be influential in creating and charting the focus of this Institute, which will provide an interdisciplinary research environment in which genomic information can best be exploited to drive fundamental advances in the biological sciences. We are looking for a strong leader with an exceptional record of scholarly accomplishment, who will build on established excellence in the biological and physical sciences, engineering and agriculture, and who will enhance our strong campus tradition of interdisciplinary interactions. The Director should have the vision and ability to couple first-class academic research with appropriate goals both in education and economic development, and have the ability to promote partnerships with the public and private sector. This Initiative involves the hiring of up to 40 new faculty. The Institute will occupy an 110,000 sq ft facility to be constructed beginning in 2001.

The University of Illinois already is home to a number of large-scale interdisciplinary centers, institutes and programs, including the Beckman Institute for Advanced Science and Technology, the Biotechnology Center, the W. M. Keck Center for Comparative and Functional Genomics, and the National Center for Supercomputing Applications. For more information, see: http://www.uiuc.edu/units/veres/pginfo.htm

The institute Director will be charged with the overall leadership of the Institute. This will include establishing areas of research focus and leading efforts to hire faculty positions associated with the Institute, by working with existing campus units; managing the Institute's physical and financial assets; assisting the Institute's faculty in acquiring external support for research, and representing the Institute in the broader community.

The Director will hold a doctoral degree in one of the disciplines represented in the Institute, have achieved the rank of Professor in a leading research institution, and have an outstanding record of scientific accomplishments, with experience in academic administration desirable.

To be assured of full consideration, nominations and applications (including a curriculum vitae) should be postmarked by July 15, 2001. This full time (twelve month) position is available as soon as a suitable candidate can be identified. The salary is competitive and negotiable. Please send applications to: Professor Tony Waldrop, Vice Chancellor for Research, Chair, Search Committee, Office of the Vice Chancellor for Research, University of Illinois at Urbana-Champaign, Swanland Administration Building, Room 420, 601 East John Street, Champaign, IL 61820. Attention: Melanie Looft, 217/333-0034; 217/333-3716 (fax)

The University of Illinois is an Affirmative Action, Equal Opportunity Employer.
TEACHER-SCHOLARS
GENERAL STUDIES
DEVELOPMENTAL EDUCATION

GENERAL COLLEGE
UNIVERSITY OF MINNESOTA
TWIN CITIES CAMPUS

The General College of the University of Minnesota-Twin Cities seeks up to four teacher-scholars in areas relevant to Higher Education Access Policy and Developmental Education. General College provides a lower-division, developmental general studies curriculum in the sciences, social sciences, humanities, mathematics, and basic writing, and is widely recognized as a model access program. The college serves pre-major students who do not meet the admission profiles of the highly selective freshman-admitting colleges in the University. The successful candidate will provide leadership in Higher Education Access Policy or Developmental Education research, must have a teaching strength in a relevant lower-division discipline, and will provide service as a member of a multi-disciplinary faculty committed to multicultural education.

These full-time tenured or tenure-track positions are at the levels of Assistant Professor, Associate Professor, or Professor and begin in August 2002 (the start date can be flexible).

For a complete position description and application procedures, call (612) 625-2880, view the General College Website at www.gen.umn.edu, or write to the Developmental Education Search, University of Minnesota-General College, 240 Appleby Hall, 128 Pleasant St. SE, Minneapolis, MN 55455. The application deadline is open; however, because review of applications will begin September 17, 2001, early application will insure consideration.

The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, color, creed, religion, national origin, sex, age, marital status, disability, public assistance, Status, veteran status, or sexual orientation.

Well known for its reputation for excellence and as the largest Catholic University in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you'll work in a collaborative environment that values, supports diversity and encourages professional development. Join us in this important role:

SENIOR DIVERSITY OFFICER
AND SPECIAL ASSISTANT TO THE PRESIDENT FOR DIVERSITY

Reporting to the President of the University, the selected professional will build transformative alliances with various university constituencies to maximize their, and the institution's, ability to realize the potentialities that a truly diverse community of faculty, staff and students create within a university committed by mission and values to achieving this diversity. This position will be peered with professionals in the University Mission Office and have day-to-day accountability to the University Secretary/Senior Executive for the University Mission. Advanced Degree; 5+ years experience in developing/implementing programs focused on diversity policies and procedures, preferably in a higher education environment; excellent oral/written communication skills; and credibility with diverse communities external to the university required.

DePaul University offers competitive salaries and a best-in-class benefits package. For immediate and confidential consideration, please forward resume to: DePaul University, Human Resources, Job Code: 2162, 1 E. Jackson Blvd., Chicago, IL 60604. E-mail: wcberst@wdepaul.edu Apply online: www.wdepaul.edu Fax: 312-362-5116. DePaul University is committed to diversity and equality in education and employment.

The Board of Trustees of Cleveland State University invites nominations and applications for the position of President.

Founded in 1964, Cleveland State University is a growing, urban university with 40 buildings spread over an 85-acre campus. With a faculty of over 500, the University offers a broad mix of bachelor’s and graduate programs in the humanities, natural sciences and social sciences as well as the professions.

One hundred and seventeen degree and program choices are offered through CSU’s seven colleges: The College of Arts and Sciences, the James J. Nance College of Business Administration, the Penn College of Engineering, the College of Education, the Maxine Goodman Levin College of Urban Affairs, the Cleveland Marshall College of Law and the College of Graduate Studies. CSU enrolls a diverse student body of approximately 16,000 students, including 700 international students from 62 countries. More than one-fourth are graduate students.

The President has overall academic and administrative responsibility for the University and reports to the Board of Trustees.

Strong educational/academic/administrative experience in institutions of recognized excellence is important. An earned doctorate of philosophy or equivalent degree or other terminal degree is desirable. Equally significant is a record of intellectual accomplishment, evidencing a superior mind and an appreciation for educational values. The best candidates will show a clear understanding of the opportunities for growth in an urban university and a creative sense of how to further the University’s teaching and research missions. The President must be a community-minded individual with a strong commitment to open access to educational opportunities.

The Presidential Search Committee will begin the review of applications immediately and will continue to the time of selection. Applications should include curriculum vitae and references with titles, complete addresses and telephone numbers. Please visit us on our Cleveland State University web site and submit applications to our retained consultant.

Cleveland State University is an Affirmative Action/Equal Opportunity Employer.
DIRECTOR, NEW PATHWAYS PROGRAM

The Institute for Liberal Arts and Interdisciplinary Studies at Emerson College invites applications for the position of Director of the New Pathways Program. The Institute for Liberal Arts and Interdisciplinary Studies is a center for innovative teaching and scholarship that cuts across traditional boundaries of disciplines, departments, and major programs. Its mission is to promote campus-wide involvement in the liberal arts and interdisciplinary studies, to support faculty development and collaboration leading to curricular innovation, and to advance the theoretical and ethical understanding of the fields of communication and new communication technologies. The New Pathways Program is a new first-year program that focuses on student-centered, integrated learning and emphasizes the importance of the first year as both a transitional and a preceding setting experience for undergraduate students. The initial focus of this program will be on the formation of a series of cohort-based, curricular, co-curricular, and residential "learning clusters" which will be piloted in the 2001-2002 academic year.

Reporting to the Executive Director of the Institute for Liberal Arts and Interdisciplinary Studies, the Director of the New Pathways Program will have primary responsibility for developing and implementing long-range and annual program. Specific responsibilities for this position will include:

• Working with the appropriate faculty and the Executive Director of the Institute to plan and develop the thematic cohorts and curriculum for the New Pathways Program.
• Recruiting faculty to teach within the New Pathways Program and supervising their teaching and pedagogical development.
• Teaching, as appropriate, courses within the New Pathways Program on the recommendation of the Executive Director of the Institute.
• Developing the annual course master for the New Pathways Program, including working with the appropriate schools and administrative offices of the College to determine class-room space and scheduling.
• Collaborating with the various schools and administrative offices of the College that have responsibility for the curricular, co-curricular, and residential experience of first-year students, including academic departments, academic advising, student and residential life, career services, the learning resource center, the library, and academic computing/information technology) so as to ensure an integrated first-year experience for the students of the New Pathways Program.

• Providing academic advisement and establishing a system of faculty and peer mentoring for students in the New Pathways Program.
• Planning, developing, and implementing a teaching and learning program intended to enhance and support faculty teaching in the New Pathways Program and at the Institute for Liberal Arts and Interdisciplinary Studies.
• Working with the Vice-President of Enrollment and the Director of Admissions as well as other officers of the College to plan recruitment and admission to the program and to provide a plan for student retention.
• Conducting interviews with all incoming students in the New Pathways Program to determine individual student goals and facilitate student growth through individual planning and guidance in the first year.
• Developing and implementing frameworks for assessing student performance and overall program effectiveness.
• Preparing and managing the annual budget for the New Pathways Program.
• Serving on the Institute Advisory Committee and on other appropriate committees of the College as required.
• Seeking external funding to support initiatives connected to the New Pathways Program.

Qualifications: A terminal graduate degree (MFA, Ph.D.) in a humanities, social, or behavioral science discipline; at least four years of teaching experience and evidence of teaching excellence at the undergraduate level; knowledge and commitment to student-centered approaches to teaching and learning; experience developing and implementing first year and/or integrated curriculum; demonstrated ability to work collaboratively across a variety of academic and administrative offices; familiarity and/or direct experience with the use of new media to augment classroom instruction. Grant writing and previous administrative experience preferred.

Please send application materials, including a resume and a list of at least three references to: David Bogon, Executive Director, Institute for Liberal Arts and Interdisciplinary Studies, Emerson College, 120 Boylston Street, Boston, Massachusetts 02116-4624. Review of applications will begin on June 1, 2001 and will continue until the position is filled. Emerson College is an Affirmative Action/Equal Opportunity Employer. Visit our website at: www.emerson.edu.

California State University Monterey Bay

Multiple-Year Lecturer
Visual and Public Art
(#MBVPAL-0016)

California State University Monterey Bay (CSUMB), is a comprehensive public university that is committed to serving the diverse people of California, especially the working class, historically underserved, and low income populations. The university values an educational environment of cultural and linguistic diversity and gender equity; ethical reflection and practice; effective and experimental use of technologies as resources to people and catalysts for learning; and the integration of cross-disciplinary models enabling students, faculty and staff to engage in innovative instruction and coordinated service learning. The curriculum is organized around student learning outcomes. It is global in perspective, and of sufficient breadth and depth to meet local, regional, and statewide needs, specifically those of both isolated rural communities and inner-city populations. The campus is located on Monterey Bay, 100 miles south of San Francisco.

The successful candidate will be responsible for 8-12 units of direct instruction each semester in undergraduate courses in Visual and Public Art, provide oversight for campus and community public projects, maintain collaborative working relations with community partners, liaison with the campus Service Learning Institute, contribute to the development of an arts education model for VPA, advise students in the VPA degree program, participate in program assessment of student learning, and engage in artistic production.

Effective Starting Date: August 2001
Minimum Qualifications: Must have an MFA or terminal degree in a related field, with a minimum of two years of university teaching.

Salary Range: $40,000 - $45,000 for academic year
Priority Filing Date: Friday, June 8, 2001 at 5:00 p.m. Position open until filled.

For full job description and application procedures, visit: www.csumb.edu/general/fac-recruit

Fax: 301-226-4455. For more information, call 301-226-4400.
Dean - Instructional Technology and Learning Support Services

Brookdale Community College is a growing institution recognized for its vision, excellence in educational practices, effectiveness in meeting diverse and eclectic student needs, utilization of state-of-the-art technology and resources, and its capacity to anticipate the current and future needs of the students, citizens and community it serves. Located on 200 acres in central coastal NJ, the sprawling campus provides a pastoral setting, approximately 50 miles south of NYC and 70 miles north of Philadelphia.

Brookdale Community College invites applications for the position of Dean of Instructional Technology and Learning Support Services. The individual appointed to the position will be responsible to provide leadership in the college-wide planning and utilization of educational technology achieved through the integration, promotion and development of information resources, services and applications, as well as expanding strategies for learning within the emerging technological context. This is a cabinet level position and reports directly to the Executive Vice President of Educational/Student and Outreach Services.

The successful candidate will possess a Master’s Degree (Ph.D. preferred) in Instructional Design, Educational Technology or a related field, with five years of progressively responsible experience in distributed education, instructional technology or related fields and as well as college level instructional experience; demonstrated ability to succeed within a collaborative management environment; strong interpersonal and communication skills are required. Must have current knowledge of distributed education and instructional support tools. Salary is competitive and commensurate with qualifications/experience. A comprehensive benefits package is included.

Applicants should send a letter of interest, resume, salary history, salary requirement, address and phone numbers of three professional references by June 15, 2001. Materials should be sent to Human Resources Office, Brookdale Community College, at the address listed below. Our email address is hrdept@brookdale.cc.nj.us, and our fax number is (732) 224-2970. For more information about Brookdale Community College, please refer to our website at www.brookdale.cc.nj.us.

765 NEWMAN SPRINGS ROAD • LINCROFT, NJ 07738
Visit our website: http://www.brookdale.cc.nj.us

Brookdale Community College is an Equal Opportunity/Affirmative Action Employer and its staffing process is pursued through an unwavering commitment to diversity, not only as a compliance responsibility, but as an active conscious effort to build and develop diversity within the faculty and staff.

**New Jersey City University**

**POSITION ANNOUNCEMENT**

**Extension Aquatic Animal Health Specialist - Sea Grant Extension Associate IV - A66**

The State of New York has established a Marine Disease and Pathology Consortium at the State University of New York at Stony Brook. The Marine Sciences Research Center (MSRC) for the purpose of performing research and outreach on marine diseases and pathology. The Laboratory will be jointly staffed by the Marine Sciences Research Center, SUNY Stony Brook; the College of Veterinary Medicine, Cornell University; and New York State Sea Grant. This position is for a New York Sea Grant Extension Specialist who will be located at the Marine Sciences Research Center, SUNY Stony Brook. He/she will be responsible for developing and implementing an outreach program focusing on establishing and maintaining effective communications between the Laboratory at Stony Brook, the fishing community, and government agencies. The specialist will also coordinate efforts with the Aquatic Animal Health Program located at the College of Veterinary Medicine, Cornell University.

The position requires at least a masters degree and substantial knowledge and experience with matters of aquatic animal health. The ideal candidate will have expertise in diseases of marine invertebrates. At least five years of experience is required after receipt of the Ph.D. degree or two years after the Ph.D. Experience in Sea Grant extension or the equivalent is desired. Desired professional experience would include disease diagnosis, conduct of field investigations of disease outbreaks in wild populations and/or in the mariculture environment. This position requires excellent communication skills with interested parties ranging from academics, fishermen, and government officials. It is expected that this position occasionally will involve some laboratory work as well as joining lobster fishermen at work.

Review of applications will begin June 1, 2001, but applications will be accepted until the position is filled. Applicants should send statement of interests, CV, names of three references, and official college transcripts to:

Nancy Greenewalt  
New York Sea Grant Extension Program  
346 Roberts Hall  
Cornell University  
Ithaca, New York 14853-6505  
Telephone: 607-255-2352  
E-mail: nsg3@cornell.edu  
Fax: 607-255-2121

For more information about New York Sea Grant visit its web page at: [http://www.nysaagrant.org](http://www.nysaagrant.org).

Cornell University is an equal opportunity/affirmative action educator and employer.

**Research Associate/Senior Research Associate**

**Aquatic Animal Health Specialist**

The Department of Microbiology and Immunology, College of Veterinary Medicine, Cornell University is conducting a search for a faculty-level position, Research Associate or Senior Research Associate, for a newly established Marine Disease and Pathology Research Consortium. The Consortium is a laboratory jointly staffed by the Marine Sciences Research Center, SUNY Stony Brook, the New York Sea Grant Institute, and the College of Veterinary Medicine, Cornell University. The position is located at the Marine Sciences Research Center, SUNY Stony Brook. The incumbent is expected to participate in a coordinated effort to address questions of disease found in aquatic animals in the Marine District of New York. Applicants should possess an advanced degree (DVM and/or PhD) and have diagnostic and research capabilities and experience in diseases of marine invertebrates and/or fish. The position will involve extensive interactions with faculty and staff of the Marine Sciences Research Center, SUNY Stony Brook; the College of Veterinary Medicine, Cornell University; New York Sea Grant Institute; New York State Department of Environmental Conservation; as well as commercial fishermen, aquaculturists and other constituents on Long Island. The incumbent is expected to seek extramural funds for research efforts that will address in-depth, applied and basic aspects of diseases of marine aquatic animals. The opportunity also exists for interactions with students from SUNY Stony Brook, Cornell University and other institutions of higher education.

The Search Committee will begin evaluating applications on 1 June 2001. The search will remain open until the position is filled. Applicants should send a statement of interest, CV and arrange for three letters of reference to be sent to:

**Aquatic Animal Health Specialist Position**

Department of Microbiology and Immunology  
College of Veterinary Medicine  
Cornell University  
Ithaca, New York 14853-6401

**STONY BROOK**

**STATE UNIVERSITY OF NEW YORK**

**Tenured/Tenure-track Faculty Position in Marine Animal Disease and Pathology**

The Marine Sciences Research Center (MSRC) of the State University of New York at Stony Brook seeks applicants for a faculty position (tenure open) in marine animal disease and pathology. This position is associated with MSRC’s newly-established Marine Disease and Pathology Research Consortium, whose mission is to conduct research on marine animal diseases and pathology, especially those of importance to New York’s marine fisheries and aquaculture industries. Investigators from MSRC, the College of Veterinary Medicine at Cornell University, and New York Sea Grant will jointly staff the laboratory. The incumbent will be expected to develop an active research program that addresses applied and basic aspects of diseases of marine animals and to teach courses at MSRC. Applicants should possess an advanced degree (DVM and/or PhD) and have diagnostic and research experience in the disease of marine invertebrates and/or fish. Special consideration will be given to individuals with expertise in diseases of marine invertebrates.

Review of applications will begin 01 June 2001, but applications will be accepted until the position is filled. Applicants should send a statement of interests, CV, and arrange for three letters of reference to be sent to:

**University of Iowa**

**Director of Affirmative Action**

The University of Iowa seeks an Assistant to the President, Director of Affirmative Action and ADA Coordinator to lead the University's effort to create a more culturally diverse and humane University community. The University of Iowa's commitment to diversity is part of a rich tradition. As the first pubic university to admit women and men on an equal basis, and as an institution that values diversity as a fundamental principle and core value, the University seeks an individual who has vision and who will be creative in using best practices to enhance diversity and inclusiveness. The Director reports to the President. The Director, along with his or her staff, will be responsible for heading up the University's compliance with affirmative action and equal opportunity laws and policies. The Director will be responsible for preparing the affirmative action plan and monitoring compliance with the plan and with other initiatives. The Director will monitor hiring and search efforts; coordinate compliance with disability and equity laws and policies; investigate and respond to internal and external complaints of discrimination and harassment; coordinate and provide educational training and outreach programs throughout the University of Iowa on such topics as sexual harassment, affirmative action and diversity; advise the president and other university officials on a wide range of policy issues affecting affirmative action, equal opportunity and diversity.

Qualifications: Advanced degree required. J.D. preferred, or an equivalent combination of education and experience is necessary. Experience working with affirmative action/equal opportunity laws, regulations and policies; experience with compliance and diversity issues; and a demonstrated commitment to diversity are required. Ability to work effectively in a shared governance environment, and to work collaboratively with diverse constituents are required. Excellent verbal and written communication skills and effective interpersonal communication skills are required. Experience with the responsible handling of confidential and sensitive issues is preferred. Administrative experience in higher education setting is preferred. Experience in policy development is desired. Experience working with regulatory government agencies is desired. The University of Iowa is an affirmative action equal opportunity employer. Women and minorities are encouraged to apply. Please send resume and the names of three references to the chair of the search committee Sue Buckley, Associate Director for Human Resources, c/o Pat Nisley, President's Office, University of Iowa, 101 JH, Iowa City, IA 52242. Electronic submission may be sent to: susan-buckley@uiowa.edu. Screening of applications begins June 12, 2001.

For more information, please link to http://www.uiowa.edu or http://www.uiowa.edu/aa.

Dean, College of Arts & Sciences

Arizona State University West, located in Phoenix, Arizona seeks a dean to lead its College of Arts and Sciences. The College consists of six interdisciplinary departments offering 12 traditional disciplinary degrees and 6 interdisciplinary degrees. One hundred faculty and staff work with a current enrollment of 1,020 undergraduate majors.

The dean reports directly to the Provost and works with other campus deans to develop interdisciplinary approaches to teaching, research, and service. He/she represents the College both within and outside the university. The dean must be committed to working with faculty – both through the administrative structure and faculty governance system – to achieve university academic goals in research and learning and to further the campus goals of diversity, equal opportunity, and affirmative action. Responsibilities include budget, planning, development, personnel decisions, student academic affairs, faculty development, promotion of research, and planning and implementation of degree and non-degree programs.

QUALIFICATIONS

REQUIRED
A successful candidate must exhibit leadership and strategic vision, and have:

• Relevant administrative experience.
• A demonstrated commitment to cultural diversity that includes supporting the diversity of the faculty, students, and staff.
• A terminal degree in a discipline and a strong record in research, teaching, and service that merits appointment as a Professor with tenure in a department of the College.
• A demonstrated commitment to promoting excellence in research and creative activities.
• Demonstrated effective interpersonal and communication skills.
• A demonstrated commitment to excellence in teaching.
• A demonstrated understanding of the integration of teaching, research, and service.
• A demonstrated commitment to working with multiple constituencies on and off campus.

DESIRED
Preference will be given to candidates with demonstrated experience in:

• Organizational change.
• Evaluation of faculty for promotion and tenure purposes.
• Budget management.
• Curriculum and program development and assessment.
• Technology applications in teaching and research.

APPLICATION DEADLINE
August 1, 2001, or the 1st. Monday of each week thereafter until the position is filled.

APPLICATION PROCEDURE

Applicants must address how they meet the qualifications listed above in their letters of application. Please send letter of application, curriculum vitae and the names, addresses, and telephone numbers of three referees to:

Dean Michael A. Awender, Chair, Search Committee
c/o Laraine Grandt
Arizona State University West
P. O. Box 37100
Phoenix, Arizona 85069-7100

For more Information: 602/543-3254 Fax: 602/543-7731

Confidentiality of all applications will be maintained. Referees will be contacted only after permission from the candidate has been obtained.

Arizona State University West is an Equal Opportunity/Affirmative Action Employer that actively seeks diversity among applicants and promotes a diverse work force.

62 HISPANIC OUTLOOK 05/21/2001 1488
Executive Director

The National Council of Teachers of Mathematics (NCTM) located in Reston, Virginia near Washington DC was founded in 1920 and is a nonprofit professional association dedicated to the improvement of mathematics education for all students in the United States and Canada. The NCTM membership is made up of more than 100,000 teachers of Mathematics from kindergarten through college. The association has a $16 million annual budget and headquarters a staff of 110. NCTM is the largest mathematics education organization in the world, formally affiliated with 250 local and special interest groups.

The Executive Director serves as the chief staff officer and reports to the President and Board of Directors. He/She is responsible for executing the policies and plans of the association. The Executive Director maintains personal contacts with affiliate organizations, other educational, government, and public service organizations, and supervises all internal staff activities.

The successful candidate will have a background in Mathematics education and demonstrable experience with and understanding of NCTM, and a commitment to personal and institutional excellence and integrity. He/She will possess relevant management/administrative background, including experience with matters of budget and finance as well as first-rate leadership skills, communication and advocate skills, including the ability to build consensus and be supportive of the staff. The executive will have managed complex projects or organizations.

Please submit a curriculum vitae (five pages or less) and a letter (five more than two pages) outlining why you feel you would make an excellent Executive Director. The Search Committee will begin reviewing applications on May 1, 2001, and continue until the position is filled. All nominations and expressions of interest should be submitted as soon as possible to:

Charles S. Ingerson, Jr.
Korn/Ferry International
900 19th Street, NW
Washington, DC 20006
charles.ingerson@kornferry.com

All inquiries, nominations and applications will be held in strictest confidence. The National Council of Teachers of Mathematics is an equal opportunity affirmative action employer.
FORWARD TO THE PAST:
MISDIRECTED AGAIN

MISGUIDED BY FAULTY THINKING, IT APPEARS THE REPUBLICAN 107TH CONGRESS IS GOING BACKWARDS WHEN CONSIDERING FUTURE FUNDING OF 203 HISPANIC SERVING INSTITUTIONS (HSIs) AND 118 HISTORICALLY BLACK COLLEGES AND UNIVERSITIES (HBCUs). THE HOUSE EDUCATION AND WORKFORCE COMMITTEE RECENTLY VOTED TO REDIRECT ALL BUSINESS DEALING WITH COLLEGES AND UNIVERSITIES WITH HIGH HISPANIC AND AFRICAN AMERICAN ENROLLMENT FROM THE SUBCOMMITTEE HANDLING THE REAUTHORIZATION OF THE HIGHER EDUCATION ACT TO A NEW SUBCOMMITTEE CALLED SELECT EDUCATION. WHILE "SELECT EDUCATION" IS A NICE TERM, IT DISGUISES AND MISREPRESENTS THE TRUE WORK OF THE COMMITTEE, WHICH IS TO CONCERN ITSELF WITH VIOLENCE, CHILD ABUSE, AND OTHER "SOCIAL PROBLEMS."

This act by the Committee Majority demonstrates "rearview-mirror" thinking—conceiving the issues of people of color in higher education as being separate from and unequal to mainstream higher education. Worse, the action reveals the mindset that people of color, no matter at what stage of their schooling, are troubled, since this new committee is to focus on "at-risk youth," juvenile justice, child abuse, runaways, etc.

In a letter to the Committee chair, members of the Black and Hispanic Caucus said this action reestablishes the "separate but equal" doctrine in essence divides higher education into two groups: minority-serving and non-minority-serving colleges and universities. History proves that the "separate but equal" doctrine never produced an equal status; it maintained an unequal set of conditions.

Republicans say this reclassification and new subcommittee will allow them to focus on issues facing HBCUs and HSIs, the inference being special attention and possibly more funds. Yet, whenever minority-serving institutes of higher education (HIs) are removed from the general pool of funds allowed for all IHEs, inequities exist and persist. And once minority-serving institutions fall behind, they never catch up!

The move illustrates a fundamental flaw in the thinking of the Committee Majority—that minority higher education issues are separate from the mainstream of higher education. Splitting the issues between two subcommittees creates the possibility of disjointed recommenda-

tions that could result in a fractured system.

This backward approach of separate and unequal is resurrected from the dead at a most inopportune time, a time when the Hispanic population is growing at a rapid pace, and the economy is completing one of its most robust periods in history.

Instead of working toward the president's laudable campaign goal—that "no child should be left behind," the Republican-dominated Education and Workforce Committee returns to the old thinking, "separate and unequal." Just when you believe that school segregation is put behind us, the Republican leadership breathes life back into it.

Separate-but-equal never worked because it was never intended to bring about a level playing field. It was a tactic to give the appearance that equity and equality were the goal. From its establishment in Plessy v. Ferguson (1896) until its overturning in Brown v. Board of Education (1954), only separatism was upheld—never equality. Separate has always meant unequal.

Where in this action is the concept expressed by President Bush, "affirmative access?" How will minority-serving institutions have affirmative access to the pool of funds available to all non-minority-serving institutions? America's education is too crucial to the well-being of our society to fall prey to party politics. Education is to develop individuals who in turn create the future. We cannot go forward and create anew by reverting to the worst ways of the past.

This regressive action by the Republican Congress alerts all who have worked to bring traditionally excluded populations to the decision table that we must be ever vigilant. Given the new context, we will need to support those in Congress who have a progressive mentality and act to restore past efforts that were bringing us to a fair and just society. Our next significant opportunity is when the Higher Education Act undergoes reauthorization this congressional term.

PS. In March, a bipartisan compromise in Congress prevented the change from happening.

If interested in submitting a ¡Punto Final! "think piece," please e-mail us at sloutlook@aol.com for guidelines.
HISPANIC Representation in Health Care
La Elección es Suya
The Choice is Yours

La carrera en
Dietética es divertida y excitante
Dietetics is a fun and exciting career

that lets you make a real difference in people’s lives.

Whether you play sports or love to cook, do well in math or prefer science, start thinking now about a career in Dietetics.

Within the field of dietetics, you can choose to be either a registered dietitian (RD) or a dietetic technician, registered (DTR).

Whichever option you choose, you’ll share your knowledge of food and nutrition to help people make healthful food choices. Both RDs and DTRs work in many different places. Read on to find out more about these exciting career options.

RD Registered Dietitian. Dietitians make decisions about nutrition care for people of all ages. They advise doctors and nurses, and teach others about the importance of good nutrition and healthful food choices. Some manage foodservice businesses and consult with chefs in restaurants. Dietitians may work in groups as team leaders or in their own nutrition businesses. Dietitians complete at least a 4 year college degree and training, and have earned the credential registered dietitian (RD).

DTR Dietetic Technician, Registered. Dietetic technicians are team members who support the work of dietitians and other health care professionals to improve people’s health. They interview people about their eating habits and teach them the importance of nutrition to stay healthy. Dietetic technicians complete at least a 2 year college degree and training, and have earned the credential dietetic technician, registered (DTR).

Scholarship Information
The American Dietetic Association Foundation (ADAF) offers scholarships to encourage eligible students to enter the field of dietetics. Once you are enrolled in a college dietetics program accredited by the Commission on Accreditation for Dietetics Education you may be eligible for an ADAF scholarship.

The record is clear that tobacco is the No. 1 substance most responsible for avoidable illness and death. Heart attacks, emphysema, strokes, and lung cancer are killers, and those illnesses are devastating and painful ones. They are either caused or aggravated by using tobacco.

Tobacco is no longer glorified in the popular media, yet its hold on society is pervasive and intense. Youngsters still sneak a smoke, and far too many adults hold onto the habit. Strangely enough, some who know better, such as nurses, continue to indulge in a disproportionate fashion.

Millions of Americans consume this deadly toxin on a daily basis. Its use brings premature death to nearly half a million each year, and it contributes to profound disability and pain in many others. About one-third of all tobacco users will die prematurely because of their usage of tobacco. Unlike many past epidemics, there is a clear, contemporaneous understanding of the cause of this premature death and disability—the use of tobacco.

The U.S. Surgeon General has been warning us for more than 50 years. Unfortunately, Hispanics, that ever-growing population cohort, are also among the most addicted of all groups. Many begin smoking long before their teenage years and continue longer than other ethnic groups. Only Asians are more addicted than Hispanics.

It is a testament to the power of tobacco addiction that millions have been unable to overcome their dependence and save themselves from its consequences: perpetual worry, unceasing expense, and compromised health. Indeed, it is difficult to identify any other condition that presents such a mix of lethality, prevalence, and neglect, despite effective and readily available interventions.

According to the U.S. Surgeon General, despite high, sustained tobacco-use prevalence, the response of both clinicians and the U.S. health care delivery system is disappointing. To wit: recent studies show that most smokers are not offered effective assistance in quitting. The smoker's lack of success in quitting and the clinician's reluctance to intervene can be traced to many factors.

Until recently, few effective treatments existed, effective treatments had not been identified clearly, and health care systems had not supported their consistent and universal delivery. But that has changed. Good, sustainable, and successful therapies now exist.

The Surgeon General's "Tobacco Use and Dependence" (2000) publication reveals the considerable progress made in tobacco research and treatment since it was published in 1996.

There is now stronger evidence of the association between counseling intensity and successful treatment outcomes, and effective new counseling strategies have been developed, including telephone counseling and counseling that helps smokers enlist support outside the treatment context.

The updated booklet offers practitioners many more efficacious pharmacologic treatment strategies, including seven smoking cessation medications. The value of combining nicotine replacement therapies and medications obtained over the counter is discussed. Evidence is now strong that several smoking cessation treatments work and are cost-effective.

All of this is examined in great detail in "Tobacco Use and Dependence". Chapter 1-Overview and Methods, provides the clinical practice and scientific context of the project and describes the methodology used to generate the findings. Chapter 2-Assessment of Tobacco Use, describes how each patient is different and thus should have his or her tobacco-use status determined, and how tobacco users should be assessed for willingness to make a quit attempt.

Chapter 3-Brief Clinical Interventions, summarizes effective brief interventions that can easily be delivered in a primary care setting. Separate interventions are described for the patient who is willing to try to quit, for the patient who is not yet willing to try to quit, and for the patient who has recently quit.

Chapter 4-Intensive Clinical Interventions, outlines the category of treatments producing the highest success rates.

Chapter 5-Systems Interventions Relevance to Health Care Administrators, Insurers, and Purchasers, offers a blueprint for changes in healthcare coverage and healthcare administration.

Chapter 6-Evidence, presents the results of statistical analyses and the recommendations that emanate from them.

Chapter 7-Special Populations, evaluates evidence on tobacco intervention strategies and efficacy with special populations (e.g., women, pregnant smokers, racial and ethnic minorities, hospitalized smokers, smokers with chemical dependency, children and adolescents, and older smokers).

Chapter 8-Special Topics, presents recommendations relevant to weight gain after smoking cessation, non-cigarette tobacco products, clinician training, and economics of tobacco treatment.

Findings and Recommendations

The key recommendations of "Tobacco Use and Dependence" follow.

Although there is reason to be optimistic, tobacco dependence is a chronic condition that often requires repeated intervention. However, effective treatments exist that can produce long-term or even permanent abstinence.

A variety of effective tobacco-dependence treatments are available. Consequently, every patient who uses tobacco should be offered at least one of them.

Patients willing to try to quit tobacco use should be provided treatments identified as effective.

Patients unwilling to try to quit tobacco use should be provided a brief intervention designed to increase their motivation to quit.

Brief tobacco-dependence treatment is effective, and every patient who uses tobacco should be offered at least brief treatment.

Treatments involving person-to-person contact (via individual, group, or proactive telephone counseling) are consistently effective, and their effectiveness increases with treatment intensity (e.g., minutes of contact).

In short, still a gloomy story but one that can change for the better.

Dr. Mellander is a professor at George Mason University.
Saludos

According to the Bureau of Labor Statistics (BLS), from 1986 to 1996, nearly one out of every nine new jobs created by the economy was in health occupations. That trend is expected to continue until 2006. Some of the expanding health careers include health diagnosing, health assessment and treating, health technology, and health service occupations. Hispanic and Asian immigration is noted as a contributing factor to the labor force growth; however, a dearth continues in the number of Hispanics represented in some healthcare careers. BLS 2008 projections for employment in the health and allied services industry show growth in a variety of occupations—such as registered nurses, physicians, physical therapists, respiratory therapists, dietitians, and nutritionists.

For instance, state occupational projections comparing 1998 to 2008 employment data reveal increases in most states for physicians (571,700 in 1998, and 695,300 for 2008). California, New York, Florida, Texas, Pennsylvania, Illinois, Ohio, Massachusetts, and New Jersey calculate at least a 5,000 increase in the number of physicians in the state. California expects to have 123,550 more physicians and 49,100 more registered nurses. Nationwide more than 450,000 more employment positions for registered nurses are anticipated. But where do Latinos fit in?

In this issue, HO features articles that take a look at how certain states and academic institutions are dealing with preparing more Hispanics to fill positions in health care on the service end and/or as educators. One article notes that while minorities as a whole make up about 25 percent of the population, only 10 percent are involved in the health professions workforce. Specifically to Hispanics, Latinos represent roughly six percent of physicians, less than four percent of dentists, and two percent of nurses. To increase representation, the Bureau of Health Professions, a part of the Human Resources and Services Administration, runs programs to increase diversity in this field.

Next up, HO will talk about colleges sponsoring K-12 classes, a new study, and much more.

Hasta la próxima

M. Saucens

Still Living in Poverty

The article “Poverty Rate Lowest in 20 Years” (Outlook on Washington: A Capitol View, March 26, 2001) was quite informative and articulate. I cringed, though, with the author’s ending comment, “All in all, the 1990s was a great decade for Hispanics and many other Americans.” It sounded as if we should celebrate victory over poverty.

Thirteen million of our children live in poverty. Fifty percent of children living with single mothers live in poverty.

These are alarming numbers, and Americans should be ashamed of these facts.

Adequate nutrition, health care, and housing—three basic needs necessary for cognitive, physical, and emotional development—are absent from many of these children’s lives. On a daily basis, they face many obstacles to getting a quality education.

In a country as wealthy as America, there should be no children living in poverty. We have to press onward to advocate for our children’s needs. I encourage you to keep this issue in the forefront of your magazine.

Sincerely,

Janine Leath
Fort Worth, Texas
Preparing Tomorrow’s Hispanic Physicians

BY TONY P. MARTÍNEZ AND ALISON P. MARTÍNEZ

The waiting room of Dr. Xavier Iturbe, pediatrician, is strewn with dolls, toy cars, and puzzles. Piñatas hang from the ceiling. Snapshots of Dr. Iturbe proudly smiling with his little patients brighten two bulletin boards.

"Working on your own in rural settings teaches you to be a complete doctor," he says. "You have to deal with whatever happens." Even now, in his modern office in New Mexico’s Lovelace Health Plan, with easy access to high technology and other physicians to back him up, Dr. Iturbe’s intent but calm demeanor marks him as the pediatrician parents pray for. About 70 percent of his patients are Hispanic.

Dr. Iturbe is one of more than 30,000 Hispanic physicians now practicing in the United States. Half a century ago, he would have been one of far fewer.

In 1950, only five Hispanic women and twenty-two Hispanic men graduated from medical school in the United States. Although the numbers slowly increased, and jumped after each of three new medical schools opened in Puerto Rico, overall, numbers remained tiny.

Not that Hispanic educators ignored the problem. Far from it. One of those who spoke out, Dr. Fernando M. Treviño, Ph.D. MPH (then of University of Texas-Galveston, now of North Texas
University), warned of disparities for Hispanic Americans in the education of healthcare professionals, and the correlation with inadequate health care for Hispanic populations. As early as 1984, Dr. Treviño and colleague A. J. Moss documented low and falling access to medical care among Hispanic ethnic groups, especially Mexican Americans. The lack of Hispanic physicians contributed to a lack of culturally competent medical care for the Hispanic population.

Dr. Treviño showed that minority physicians are more likely than others to treat underserved populations. He predicted America’s increasing need for healthcare professionals and pointed out that Hispanic Americans could fill that need while improving their economic participation in American society. Most important, Treviño wrote in 1993, equity demands equal access to medical education for all.

“Leaders of schools of the health professions can neither idly lament the failures of the high schools and colleges, or they can become actively involved in the quest for equal educational opportunity.”

In 1991, the Association of American Medical Colleges (AAMC) had launched “Project 3000 by 2000” to address the worsening problem of minority underrepresentation in U.S. medical schools. The goal was for 3,000 students from underrepresented minorities to start medical school each autumn by the year 2000. (The Project targets only four minority groups: Mexican Americans, mainland Puerto Ricans, African Americans, and Native Americans. Minorities that are not greatly underrepresented in the health professions, including Commonwealth Puerto Ricans, Asian Americans, and Cuban Americans are, not targeted.)

“Project 3000 by 2000” places on institutions of medical education the responsibility to improve opportunities for minority and disadvantaged young people who want to study medicine and related fields. The Project also affirms that these institutions must work in partnerships with high schools and colleges, which bear the primary responsibility for educating health professionals of the future.

With support from the Robert Wood Johnson Foundation, The W.K. Kellogg Foundation, the Henry J. Kaiser Family Foundation, and The Pew Charitable Trusts, the AAMC took to the field on several fronts. AAMC gathered statistics. AAMC convinced every medical school in the country to make a faculty member or administrator responsible for increasing minority enrollment. AAMC developed a workshop that has been presented to medical school admissions committees all around the country, entitled “Expanded Minority Admissions Exercise,” demonstrating nontraditional ways to evaluate minority applicants and how to select students with a high likelihood of success.

Hispanic applicants who are accepted by medical schools have, on average, lower MCAT scores and GPAs than do non-Hispanic Whites. And Hispanic medical students are less likely than are other Whites to graduate on time—or to graduate at all.

The reasons reach back into their early education. In 1993, Dr. Treviño summarized several contemporaneous studies: “More than 90 percent of Hispanic-Latino students attend urban schools. Since urban school systems face a limited tax base, crime, drugs, deteriorating infrastructure, and persistent poverty, Hispanic students are directly affected... Although they value education, half of Hispanic-Latino parents are functionally illiterate, some have limited English proficiency, and many work several jobs or lack child care. These factors limit... their ability to serve as advocates for their children... Hispanics-Latinos often lack positive role models in their communities.” In 1991, the National Educational Goals Panel reported that between 1975 and 1990, high school completion rates improved 12 percentage points for African American students and 2 percentage points for non-Hispanic White students but dropped 5 percentage points for Hispanic students!

Even those with diplomas are not well prepared, Treviño continued, because “Seventy-five percent of senior-year Hispanic-Latino students are enrolled in nonacademic tracks that do not offer the preparation in mathematics and science required for college and subsequent education and training in the health professions.”

Mediocre English reading and writing skills also handicap Hispanic students. Dr. Iturbe emphasizes that for Hispanic students, it is very, very important to achieve outstanding mastery of the English language. Students need to read fast and with perfect comprehension, just to get through textbooks and score well on tests. Students also need advanced aural-oral skills to decipher nuances of meaning in discussions and quasi-social interactions. Cultural values of respect and conflict-avoidance may make Hispanic students seem slow-witted to their professors. Dr. Iturbe recommends that students show their real ability and integrity through volunteer...
work if necessary.

After Bakke vs. University of California-Davis (which limited affirmative action programs), and based on a deepening understanding of what holds back talented minority students, Project 3000 by 2000 has begun to emphasize improved education at high school and earlier levels. "Opponents and proponents of affirmative action agree that improving the K-12 education that students receive is the best way to ensure racial and ethnic diversity in the health professions over the long term," said AAMC President Dr. Jordan J. Cohen.

The AAMC now sponsors workshops and conferences for educators in schools for health professionals, colleges, and K-12 school systems who are working to prepare more minority students for careers in the health professions and health-science research. In collaboration with the Robert Wood Johnson Foundation, AAMC also funds local educational partnerships to improve minority access to health-professionals education in communities around the country.

Fewer than three percent of U.S. elementary and secondary school teachers are themselves Hispanic. The other 97 percent have limited familiarity with Hispanic cultures and specific socioeconomic factors affecting Hispanic students—but they can put students in touch with individuals and organizations well prepared to guide and encourage them.

Dr. Carlos Frias, an American-born physician who trained in Argentina, emphasizes that "every medical school in America is great. They all produce good doctors." The prospective student should look for a school that fits his or her budget, learning style, and specialty interest. For example, a student interested in rural practice might consider the University of New Mexico, ranked high in that field and hospitable to Hispanic students (accepting 21 of 95 Mexican American applicants in 1999).

Sabrina Martínez, a pre-med student at the University of Dallas, says, "A medical school that has a good acceptance rate for female students and especially Hispanics is on the top of my list." Stefan Reymoso, a student at Medical College of Pennsylvania–Hahnemann, concurs: "It's okay to be the only Hispanic student...; however, I preferred a school with some support [for Hispanic students], like MCP-Hahnemann."

Where will a Hispanic student not be alone?

These top ten schools have each graduated hundreds of Hispanic physicians. Nevertheless, anywhere except Puerto Rico, Hispanic medical students are a lonely few among the others.

Building their own "buddy system," in 1970, Hispanic medical students in the Northeastern United States formed the National Boricua Latino Health Organization, the first major student organization to support and speak for Hispanic medical students specifically. Other groups sprang up, and now the National Network of Latin American Medical Students, an umbrella organization including Boricua and other regional associations, counts forty-nine chapters, each with anywhere from two to two hundred members.

What colleges send the most Hispanic students to medical school?

While the top ten schools make a big contribution, most matriculants still come from hundreds of other colleges all over the country—wherever talented students get rigorous preparation and informed guidance.

Minority students are well advised to take advantage of the AAMC's "Minority Medical Education Program (MMEP)" summer sessions, which help promising, highly motivated students from targeted minorities to gain admission to and succeed in medical school. MMEP is available at the University of Alabama, Baylor, Universities of Arizona and Washington, Case Western Reserve, Chicago, Columbia, Duke, UNCF Vanderbil t/Fisk, UMDNJ (New Jersey's medicine and dentistry university), University of

---

Virginia, and Yale.

Each campus offers a unique experience, but all the summer sessions bring together young people who can support and encourage each other in the years to come. The programs identify students' strengths and weaknesses, build self-confidence, and teach the study skills medical school will demand. Students need not spend the summer at the same campus where they eventually matriculate. AAMC Section for Student Services provides application forms and information. The MMEP application procedure in itself can be helpful as practice for actual medical school application.

By 1998, the AAMC concluded that "Despite more than 30 years of efforts by the AAMC and its member institutions to increase minority representation in medical school, some minority groups are still underrepresented. Blacks, Hispanics, and Native Americans—approximately 25 percent of the U.S. population—accounted for less than 15 percent of medical school graduates in 1998." Although the success of a generation's efforts has been imperfect, still the United States now benefits from the skills and services of thousands who, without those efforts, never could have studied medicine. As all educators become aware of assistance available to targeted minority students, we may confidently expect continued progress based on resources now in place.

### Useful Resources
- Association of American Medical Colleges represents 125 accredited U.S. medical schools, 16 Canadian medical schools, and 400 teaching hospitals. Its website, www.aamc.org, showcases details of the programs mentioned here and to solidly researched publications.
- AAMC's "Minority Student Opportunities in United States Medical Schools" (2000 edition only $12) provides school profiles and statistics.
- Write AAMC at 2501 M Street NW, Washington, D.C. 20057-1500, or telephone (202) 828-0416.

In his Get into Medical School: A Guide for the Perplexed (Galen Press, 15th edition, 1997, §9.95) Dr. Kenneth V. Iserson frames the questions that students should ask themselves and the schools; this book helps the student use AAMC's "Opportunities" proactively. New and prospective students will wish to contact the National Network of Latin American Medical Students. The website, www.nnllams.org has links to local chapters.
Latina Awardee Leading the Charge in Drug Prevention

BY MICHELLE ADAM

"I think the stabilization and decrease in the use of drugs by 12- to 17-year-olds is due to the prevention programs that have been developed,"

DR. RUTH SÁNCHEZ-WAY

More than 30 years ago, Dr. Ruth Sánchez-Way was a social worker in New York, the city of her birth. What she saw at the onset of her career was the devastating effect that drugs and alcohol had on the lives of those families whose needs she tried to address. What she discovered back then, in her ten years in social work, was her desire to enter the field of addiction and to make a difference in what was then a barely existent field of substance abuse prevention.

Today, Sánchez-Way is more than involved in substance abuse prevention. She is the director of the highly influential and federally funded Center for Substance Abuse Prevention, responsible for providing executive leadership and management in the federal effort to prevent substance abuse. Described by Mississippi Medical News as a “seasoned veteran in the war against drugs,” she is now at the forefront of a movement toward prevention, which has taken center stage especially in the last decade.

During many years dedicated to prevention—as director of the division of state and community systems development and as associate administrator for minority concerns for the Substance Abuse and Mental Health Services Administration, among others—Sánchez-Way observed national trends in substance abuse. She described drug use as high in the late 1970s and the early 1980s, then in a decline until the early 1990s, when use began rising again.

“Right now we are in a period of stabilization,” she said. “We are seeing that 12- to 14-year-olds’ use has stabilized or decreased. But we are still concerned
about the increase in use by 18- to 24-year-olds of all drugs. We have seen an increase in ‘club drugs’ and the use of Ecstasy in the past several years.”

Whereas LSD was the popular drug of the 1960s, and alcohol and marijuana, a constant throughout the years, “club drugs” have gained popularity the past several years among college students who, according to Sánchez-Way, have historically been most susceptible to high drug use. Speaking of 18- to 24-year-olds, she said those who are students in college “use more alcohol and drugs than those who are out in the workforce.”

The term “club drugs” refers to a variety of drugs often used at all-night dance parties (“raves”), nightclubs, and concerts. And among these club drugs, Ecstasy is the fastest-growing abused drug in the nation. Late last year, the former White House “Drug Czar,” General Barry McCaffrey, warned the nation of the serious threat that the drug and its rapid increase in popularity posed to children. According to the Department of Health and Human Services 1999 study, “Monitoring the Future, Ecstasy (MDMA),” a chemically produced pill primarily smuggled from Europe was the only illegal drug for which significant usage increases were detected the prior year. The National Institute on Drug Abuse reported the following on the use of Ecstasy: “In 1998, 3.6 percent of 12th graders, 3.3 percent of 10th graders, and 1.8 percent of 8th graders reported they had used MDMA in the past year.”

Based on a follow-up group of graduates from each surveyed high school class, the study reported the following: “The number of college students who had used MDMA during the past year rose from 9 percent in 1991 to 24 percent in 1997. Among young adults, annual MDMA use rose from 8 percent to 21 percent during the same period.”

Ecstasy has especially become a concern for Sánchez-Way and others in the prevention field because of the often unrecognized dangers, addictions, and fatal effects of the drug and the fact that it is no longer limited to the club scene. “They are addictive, and young people don’t know or don’t want to believe they are,” said Sánchez-Way. Ecstasy, which has been called the “hug drug” for its unwarranted reputation for unharmful qualities, causes long-lasting damage to brain areas that are critical for thought and memory, according to research findings in the June 15, 2000, issue of The Journal of Neuroscience.

In an experiment with red squirrel monkeys, researchers at Johns Hopkins University demonstrated that four days of exposure to the drug caused damage that persists six to seven years later. “Long-term effects on serotonin levels can cause learning and memory problems and can cause coma and hallucinations,” said Sánchez-Way.

In extreme cases, Ecstasy laced with PMA (paramethoxyamphetamine) claimed the lives of six people in Florida this past July, prompting officials in that state to issue a public safety alert. The government also reported that 1,041 people sought emergency room help in 1998 because they had abused the drug, compared with 677 people a year earlier. (Within a ten-month span during the early part of last year, agents from the Customs Service seized a record 8 million doses of Ecstasy at the nation’s airports and other ports of entry, far exceeding the 3.5 million confiscated last year, according to a report in The New York Times, August 2, 2000.)

The fact that club drugs are often laced with unknown quantities of different drugs and are mixed with other drugs and alcohol makes them all the more dangerous. Said Sánchez-Way, “College students need to know that all club drugs are addictive and harmful. A lot of them are mixing different drugs. That is a killer. You don’t know what is in these pills. These are being developed in clandestine laboratories. Most of the Ecstasy is imported from Holland and Belgium. If you get sick and go to the emergency rooms, the doctors don’t know how to treat you because they don’t know what you’ve taken. You don’t know what you’ve taken.”

While the typical users of club drugs have been young Caucasians from middle and upper socioeconomic groups, when it comes to general use of drugs and alcohol, said Sánchez-Way, “you don’t see the differences any more. Some of the protective factors that were in place that kept African Americans and Hispanics from using drugs and alcohol have disappeared, have broken down. Hispanic use was very similar and continues to be similar to the White use.”

Beyond ethnicity, said Sánchez-Way, “We need to pay attention to the club drugs because of their rapid increase in use from one year to the next. Ecstasy use is also going down into the high schools. The use was primary around the rave scene, the over-18 White, middle-class population, but now we are seeing that this use of Ecstasy has gone outside of the clubs and is available community-wide and is now going into the high school.
level. There are 12th graders, 10th graders, and 11th graders reporting the use of Ecstasy. That is what is very alarming."

As a Hispanic American leading the charge in drug prevention, Sánchez-Way was recognized in May of 2000 by MALDEF (The Mexican American Legal Defense and Educational Fund), which honored her with its first annual Excellence in Government Service Award. In 1998, she received from Bill Clinton the Senior Executive Service (SES) Presidential Meritorious Executive Rank Award, which recognizes those who exemplify the highest level of integrity, leadership, and personal conduct and who consistently demonstrate exceptional performance. WHUR Radio, the number one radio station in the greater Washington, D.C., area, named her "Hometown Hero of the Week" last October for her efforts in preventing drug abuse locally and across the nation.

With all that, what exactly has Sánchez-Way and the Center for Substance Abuse Prevention done to facilitate drug prevention nationwide, and especially among college-age students and Hispanics?

"We are trying to get effective programs to every community," said Sánchez-Way. This entails implementing, evaluating, and disseminating grant-supported studies and their findings; offering state incentive grants (SIGs) to help coordinate substance abuse strategies and efforts at the local and grassroots level; and engaging in national public education and awareness efforts, such as the Hispanic/Latino Initiatives—Hablemos en Confianza and Soy Unica.

The Center disseminates programs, creates partnerships, offers information through its website, and helps train others on how to implement drug prevention programs. Sánchez-Way's office offers block grants to states, helping communities fund alcohol and drug prevention programs, and maintains a national clearinghouse on drug information (1-800-729-6686 or www.health.org).

The Center helps businesses establish drug-free workplaces and maintains laboratories that process urine samples for them.

On the educational front, CSAP provides information to colleges and helps develop drug-free programs.

"Many of the colleges are adopting alcohol- and drug-free campuses," said Sánchez-Way. What this entails is no alcohol and drug use on campus, with fraternities removing drinking from their parties. Sánchez-Way has worked with the Association of College Deans in instructing them on how to create drug-free campuses, and within each state, there is a national prevention network of state employees working with the colleges on implementation.

CSAP materials include Tips for Teens and a forreal.org website targeted at young people. Sánchez-Way has also worked with Latino experts to create materials made especially for Latino groups.

"When I was acting director, I looked at materials we had, but they were outdated. I said that this wasn't going to do. We had to develop materials just for Latinos," she said. Hablenos en Confianza is what these materials have been called, and this includes publications for parents in order to help identify where problems with drugs or alcohol are showing up and what to do about it. There are also activity books for young people. In April, Soy Unica, Soy Latina was released. These are activity books encouraging nine- to 14-year-olds to stay in school and help build good relationships between Latina girls and their mothers.

Sánchez-Way is currently in preliminary discussions with HACU, the Hispanic Association of Colleges and Universities, regarding conducting focus groups and looking at the pattern of Latinos' drinking on college campuses. But for now, when it comes to drugs, and especially club drugs like Ecstasy that are used on and off campus and during spring break, the prevention efforts target all groups attending college. The key has been to educate all on the devastating effects of these drugs and to help campuses create drug-free zones.

During the past ten years, Sánchez-Way has definitely seen what works in prevention. She lists among the successes: family-strengthening programs, local community programs that bring together different sectors of the population, and events such as First Night, where families can come together without drugs and alcohol. At the college level, creating drug-free campuses has been key, as well as making it clear that even when it comes to alcohol, for the majority of students—this is illegal.

"Changing the environment at colleges has made a difference," said Sánchez-Way.

As the first Latino in her position since CSAP was established in 1986, Sánchez-Way brings to her job family values. "Our Latino culture is based on the strength of family and values. I bring to this job the importance of family and the values and standards that we as Latinos hold—that we are all a part of an extended family, a larger community, and that we need to help each other," she said.

Sánchez-Way was raised by her Puerto Rican mother and Cuban father in Hell's Kitchen, New York City, and in Woodside, Queens, New York. She makes a point of saying that family values, which Latinos hold so dear, is what has proved to be the best preventative for drug abuse. "Our research shows that those are strong factors when it comes to the non-use of substances," she said.

Although an optimist in her effort to help curtail and prevent drug use and abuse, she is alarmed by the recent rise in club drugs among college students and younger. And it is the very act of paying attention and giving rise to concern before it is too late that, in her mind, has made prevention as effective as it has been.

"Our research shows us that prevention programs do work. Those young people who are exposed to more prevention programs and activities are less likely to use drugs. I think the stabilization and decrease in the use of drugs by 12- to 17-year-olds is due to the prevention programs that have been developed," said Sánchez-Way. "I know it has paid off."
“Nurses Now” Takes On RN Shortage

BY JOANNA PARRINO CLARK

On any given Sunday, the classified sections of newspapers across the country are replete with advertisements for nursing positions. At the same time, however, the number of applicants qualified to fill these positions has fallen alarmingly low. Headlines in many of the same newspapers confirm the emergence of a growing medical crisis caused by a national shortage of nurses.

The problem is already palpable in California, where the nurse-to-resident ratio is only 2.27 per 1,000 residents, compared to a national average of 3.22 per 1,000 residents. Experts warn that the worst is yet to come, estimating the state will need 25,000 new nurses over the next six years.

With the quality of health care at stake, one California community has met the challenge head-on, creating an innovative town-and-gown collaborative that might well serve as a model for other regions.

Motivated by some 700 nursing vacancies within the San Diego region, San Diego State University’s (SDSU) School of Nursing last year introduced Nurses Now, a partnership with several area hospitals and healthcare systems designed to significantly increase the number of new nurses available locally for employment. SDSU’s commitment to diversity in recruitment and enrollment is emerging as an important factor in the success of this initiative within San Diego and Imperial County communities, areas with large Hispanic populations where the ads for nurses often cite a preference for candidates bilingual in English and Spanish.

State of the Nursing Profession

The recent shortage of nurses provokes an introspective look at today’s nursing profession. Nursing is seen as one of the few “traditional” professions. While in the past this status might have been a plus, now students can choose among countless career opportunities, prompting some nursing schools to re-introduce themselves as a possibility for today’s student.

Traditionally, a shortage of nurses results when the healthcare industry’s growth surpasses the availability of graduating nursing students. But today’s shortage is compounded by the fact that the average age of registered nurses is rising and there are too few new nursing graduates to replace those who retire. According to the U.S. Health and Human Services Department, the number of nurses less than 30 years old dropped to 91 percent of the profession in 2000, down from 251 percent in 1980.

The current shortage of nurses is being reported as the greatest in history in the United States. The number of new nurses joining the profession since 1996 accounted for only a 57 percent increase in the nation’s pool of 27 million registered nurses—the lowest increase ever reported in a four-year period.

“Nursing is a publicly visible profession,” said Dr. Patt Wahl, director of San Diego State University’s School of Nursing. “This is good because it engages people from all cultures and exposes them to the profession. Adversely, this exposure provides only a limited view of the many possibilities in the field.”

Students, unfortunately, often see nursing as an underpaid, overworked, dead-end profession. Although some aspects of this negative image might be true for certain jobs within the profession, students can still find good reason to pursue a career in nursing.
"While there are various reasons why the nursing profession is experiencing this shortage, as an institution of higher education, our challenge is to debunk the negative ideas about nursing and entice students to choose nursing for their career," said Dr. Richard Reed, professor and undergraduate advisor of San Diego State University's School of Nursing. "Fortunately, nursing is an incredibly diverse field offering a number of options, including specializing in a particular area such as OB/GYN, pediatrics, or ER; working in health care administration; or even continuing education to the doctoral level and becoming nursing faculty."

From an academic perspective, the solutions fall at the opposite ends of the spectrum. Some nursing programs need to entice students to become nursing majors by marketing all the benefits of the profession and actively recruiting students. Other nursing programs, while still dedicated to recruiting quality students, face a quite different problem—a long waiting list of qualified applicants but not enough resources to accommodate them all. San Diego State University, the largest educator of nurses for San Diego and Imperial Counties, for years has faced the problem of an impacted nursing program.

"What happens is that students who are put on waiting lists get discouraged and they move on to other career paths," Dr. Wahl said. "Nurses Now provides SDSU a means of accepting more qualified students. Hence, increasing the number of nursing graduates from SDSU."

Beyond the obvious implications for quality of patient care, the current nursing shortage is also influencing the demographics of the profession.

**Shortage Threatens Diversity**

"When there are fewer nurses interested in the field, diversity within the profession is also threatened," said Anita Holt, president of the San Diego Chapter of the Association of Hispanic Nurses and interim director of vocational nursing at Southwestern Community College.

Hispanic nurses account for just two percent of the nation's registered nurses, according to a 2000 report by the U.S. Bureau of Health Professions.

"One challenge of recruiting Hispanic students to study nursing is the lack of Hispanic nurse role models. By encouraging more Hispanic students to study nursing, we also create a set of role models for future generations of nurses," Holt said.

San Diego State University proactively recruits Hispanic students to its nursing program by working with high school and community college counselors and by attending health and career fairs. Currently, 16 percent of students enrolled in the nursing program at SDSU are Hispanic, a number that is steadily increasing due to recent outreach efforts.

"I strongly encourage my students who are interested in pursuing a bachelor's degree in nursing, especially Hispanic students, to apply to the SDSU program," Holt said. "SDSU has a reputation for embracing diversity, which is particularly important in light of the shortage of nurses."

A diverse nursing staff is also crucial to creating rapport with patients. For this reason, San Diego's large Hispanic population establishes a call for more Hispanic nurses in this region.

"It is important to have nurses from all backgrounds because it gives patients a sense of comfort and familiarity," said Dr. Wahl. "Therefore, we find it especially important to promote diversity within the School of Nursing at SDSU."

**Nurses Now, SDSU's Regional Solution to a National Problem**

In San Diego, as part of the Nurses Now partnership, seven participating hospitals and healthcare systems have signed a three-year commitment to fund one new faculty member for the nursing school. These seven new instructors will allow the school to nearly double enrollment—an estimated 40 additional students—over the next four semesters. Under Nurses Now, the
SDSU School of Nursing admits 90 students per semester, up from 50 students before. Nursing students are accepted their sophomore year after taking seven prerequisites. Prospective students must maintain a 25 GPA, and skills such as bilingual ability and healthcare experience are also weighed in the admission decision.

Prior to Nurses Now, the school graduated 90-100 nurses per year; under the new program, this number should almost double. Through Nurses Now, San Diego State University and its partners will dramatically increase the number of nurses available for employment in San Diego and bring new leadership to the nursing community.

"Although the first graduates of Nurses Now will not be ready for employment until 2003, this program takes the first vital step in the right direction," Dr. Wahl said. "Nurses Now allows us to accept more qualified students instead of putting them on waiting lists, which eventually will add more graduates to the pool of nurses."

San Diego State University proposed the Nurses Now partnership as a collaboration between the academic and professional worlds of nursing to create a solution for this burgeoning problem. Nurses Now soon surpassed its initial goal of five partners. Hospitals and healthcare systems that have joined the partnership to date include Sharp Healthcare, Alvarado Hospital, Scripps Health, Kaiser Permanente, Children's Hospital and Health Center, Tri-City Medical Center, and UCSD Medical Center. The total value of the hospitals' commitment is $1.5 million over three years.

Nurses Now offers partnership hospitals a number of benefits, including priority access to SDSU students and a means of contributing to the increased number of qualified applicants in the nursing job market. When students are ready for clinical training, partnership hospitals provide a venue for hands-on instruction. When the students are ready to enter the job market, SDSU will arrange a job fair exclusively for partner hospitals to offer them the first chance to hire SDSU graduates.

"The beauty of the Nurses Now program is that it opens the lines of communication between the University and the hospitals," said Kathy Drucquer Duff, development director, SDSU's College of Health and Human Services. "This is not a problem of one hospital or one university; it is a community problem. Through Nurses Now, SDSU is able to work together with the partner hospitals to create a solution that benefits everyone."

Because Nurses Now allows SDSU to offer more students a top-quality nursing education, this program is another way that the University can fulfill its commitment to meeting the needs of the San Diego region.

"Recruiting top-quality nurses to San Diego is extremely difficult," said Darlene Wetton, chief nursing officer, Alvarado Hospital and Medical Center/SDRI. "The more nurses we can train here locally, the easier it will be to fill vacancies and maintain a high level of health care for our patients."

After the hospitals have fulfilled their three-year commitment, SDSU's School of Nursing will evaluate the Nurses Now program. If the nursing shortage remains a community issue at that time, Wahl said, the University would consider funding permanent faculty positions.

"The current nursing shortage is a challenge that requires a community-wide effort to resolve," Wahl said. "As a major supplier of nurses to local hospitals, the SDSU School of Nursing is in a unique position to assume a leadership role and bring together local hospitals to address this important issue."

SDSU president Stephen L. Weber sees Nurses Now as a perfect example of how a university can be a force for identifying regional solutions while improving the quality of its educational programs.

"Innovative partnerships such as Nurses Now complement an already strong nursing program," Weber said. "The relationships we have established with local hospitals will ensure that our professors teach cutting-edge nursing practices and that a wide range of influence goes into developing educational programs that address this important health care issue."

Jodina Barrino Clark is a public relations specialist in the Marketing & Communications Department, a division of University Advancement, at San Diego State University.
Whether you take a walk around campus to view the striking Bhutanese architecture that is so unmistakably Himalayan, talk to the diverse students, or glance at the course offerings, you will discover that UTEP is an institution of higher learning like no other, an institution of buildings, and of buildings.

Located in the world’s largest bilingual metropolitan area, the University of Texas at El Paso is committed to proving that “academic and research excellence can be achieved at urban and minority institutions in a context of equity and access.” Building on its foundation as “the largest Mexican American-majority university in the nation,” UTEP has worked aggressively toward that goal in many areas.

In the past ten years, the University has dramatically increased its funded research and expanded its doctoral program offerings. UTEP’s success has earned it reclassification as a doctoral/research-intensive university in the Carnegie Classification of Institutions of Higher Education. All the while, UTEP has been ranked second or third overall in the nation in bachelor's degrees awarded to Hispanics and is in the top 10 in bachelor's degrees awarded to Hispanics in critical fields including business, engineering, and health sciences. This has led to intensive recruitment of graduates by major U.S. and international businesses and prestigious graduate and professional schools. President Diana Natalicio reports, “Becoming nationally known for our commitment to both equity and excellence is the result of a decade or more of consistent action on the part of faculty, staff, and students on this campus and our many alumni, friends, and supporters.” Dr. Natalicio adds, “We were established to respond to the needs of the region’s mining industry, and for more than 80 years, we have created educational opportunities that are responsive to the dreams and aspirations of the people of this binational region. Our primary mission on this campus is to identify the enormous talent residing in this region, nurture it, and gain for it the opportunities and recognition that it so richly deserves.”

UTEP began as the Texas State School of Mines and Metallurgy in 1914. It is now nationally recognized for creating academic opportunities for its largely first-generation student population, as well as for its innovative approaches to higher education. Each UTEP student, says

Natalicio, represents a "unique set of talents, challenges, and expectations," and, she adds, "it is our responsibility to create and adapt opportunities that are responsive to them."

Set amid the rugged foothills of the Rocky Mountains, The University of Texas at El Paso is the second oldest university in the UT System. The institution offers 73 bachelor's and 71 master's degrees from six colleges (Business Administration, Liberal Arts, Education, Engineering, Health Sciences, and Science) and the Graduate School. Doctoral degrees are offered in U.S.-Mexico borderlands history, geological sciences, computer engineering, psychology, materials science and engineering, environmental science and engineering, educational leadership and administration, and biological sciences. UTEP offers two cooperative doctoral programs in the health sciences through partnerships with other University of Texas System institutions...a nursing, program with the UT Health Science Center at Houston School of Nursing and a pharmacy program with the UT Austin School of Pharmacy. The University also offers two Web-based master's degree programs, in business and in educational technology.

UTEP's unique architecture, derived from the style of buildings in the Himalayan kingdom of Bhutan, are believed to be the only examples of this architecture in the Western Hemisphere. As a mining school in 1914, the campus consisted of a Main Building, a dormitory, and an assay building—all on property now the Fort Bliss Army base. When a fire gutted the Main Building in 1916, it destroyed all furnishings and laboratory equipment and most of the school's records. Dean

Steven W. Worrell and his wife Kathleen had apartments in the building, and it was Kathleen, a traveler and faithful reader of National Geographic, who suggested the Bhutanese style for the rebuilding effort. The Geographic article in question was titled "Castles in the Air: Experiences and Journeys in Unknown Bhutan." It appeared in the April 1944 issue with photographs by John Claude White. Dean Worrell secured a $100,000 emergency appropriation from the 35th Legislature, the School of Mines offered its 22-acre property to the army, and rebuilding began on a new 229-acre tract of land, donated
by El Pasoans, on the western foothills of the Franklin Mountains. This would remain the permanent location of the school through all of its other designations—the College of Mines, Texas Western College, and The University of Texas at El Paso. After consultations with the architectural firm of Charles M. Gibson and George C. Robertson, four exotically designed buildings were planned and erected, using the $100,000 emergency fund. Construction began in June 1917 on the new Main Building (Old Main of today), Burges Hall (Graham Hall today), a Chemistry Building (the two-story section of today's Quinn Hall) and a power plant. By January 1918, the buildings were ready for occupancy by the 61 students signed up to attend classes that semester. In the decades since the opening of those first Bhutanese buildings, the distinctive architectural style has undergone gradual, and in some cases drastic, change. But, since the opening of the $27.6 million University Library in 1984, the University has returned to the purer style, much to the relief of all who view that style as a precious asset to be preserved.

Today the campus is comprised of 82 buildings on 366 acres, including the 125,000-square-foot Undergraduate Learning Center, which houses state-of-the-art technology and multimedia resources. The campus also features the 52,000-seat Sun Bowl Stadium (site of last summer's Ricky Martin concert); the 12,222-seat Don Haskins Center; a modern fine arts complex with galleries and theaters; a museum of natural and cultural history; and an FM public radio station. The Swimming and Fitness Center features two 25-meter pools, an exercise room, and additional recreational facilities. The six-story University Library collection exceeds two million items, including more than one million books and bound journals. The Library subscribes to more than 4,500 journals, microforms, and electronic databases.

UTEPE serves a large binational, bicultural population on the U.S.-Mexico border, and the University's student population closely mirrors the demographics of the region. Sixty-nine percent of the student population is Hispanic, and nine percent are Mexican nationals. Fifty-four percent are first-generation university students. Enrollment for Fall 2000 was 15,224. That included 15 percent Anglo, 2 percent African American, 1 percent Asian, and 0.3 percent Native American. Approximately 82 percent of the students are from El Paso County, and these students commute; 81 percent are employed. UTEP employs 841 full-time and part-time faculty. More than 93 percent of the University's tenure-track faculty members hold doctoral degrees or the equivalent in their fields.

The University of Texas at El Paso offers a variety of programs dedicated to the history and culture of the region, and has created centers of learning and research dealing with border issues. The Chicoano Studies Program is designed to provide students with opportunities to learn about Chicanos through a number of disciplines, including history, literature, and linguistics. The U.S.-Mexico Borderlands History Ph.D. Program offers research opportunities and studies of the unique borderlands region. The new Center for Law and Border Studies is a resource for legal research, education, and outreach in the region. The Center includes the highly successful Law School Preparatory Institute, which has been recognized for helping prospective law students develop critical thinking skills and study habits needed to perform well on the LSAT and in law school.

The Center for Inter-American and Border Studies is dedicated to research, academic programs, and public outreach projects focused on inter-American relations. The CIBS conducts and sponsors research on topics related to the Mexican border and Latin America, including political and social trends, cultural history, the role of the border in the global economy, and health and the environment. The Institute for Border Community Health Education is a partnership between UTEP and several other regional organizations. The Institute operates school-based primary-care clinics that provide training for students in healthcare professions programs, and address the healthcare needs of the region's medically underserved areas.

Time magazine praised UTEP for its community outreach programs in the 2000 edition of "The Best College for You," an annual college guide published in association with the Princeton Review. These programs include The El Paso Collaborative for Academic Excellence, a UTEP-based coalition among higher education, public school districts, and the community. It is committed to increasing the academic achievement of the region's children and has earned praise from national leaders, including then-U.S. Secretary of Education Richard Riley. The Center for Civic Engagement aims to build leadership, social capital, civic capacity, and deeper democracy in the region. It brings together initiatives that connect faculty and students with the community, including the Civic Learning Team, the Youth Empowerment Project, the Praxis Program, the AmeriCorps Assets for Youth project, and the Institute for Community-Based Teaching and Learning. The latter incorporates community service experiences into the curricula of courses across all colleges taught by faculty members who themselves are actively engaged in the community.
Mentoring Minority Medical Students

Bristol-Myers Squibb Donates $3 Million Since 1993

BY JEFF SIMMONS

Omar Sahagun's adolescence was filled with obstacles. He navigated a difficult path through an impoverished neighborhood in the San Fernando Valley, about 20 minutes from east Los Angeles. One of triplets and among five siblings, he watched as his single mother struggled to make ends meet.
The youngsters had little choice when were plucked from their home school and bused elsewhere to improve diversity.

Several years later, after cries from one child to stay closer to home, Sahagun and his siblings were pulled back. But by then, Sahagun had become disillusioned with studies, and his grades caved as he entered high school.

"I became rebellious," says Sahagun.

The teenager drew companionship through gang allegiance. As inner-city gang members, he and his brother Oliver "got involved with the wrong crowd," he concedes. "We were simply getting in trouble every other weekend.

Reflecting on that period, Sahagun realizes that his choice of friends was poorly executed. "They claimed to be your best friends, but we didn't know much about each other," he says.

The Sahagun brothers conspired to slam the brakes on what was to be a dead-end road.

The two enlisted in the Army in 1989, and that was where they finished their high school education and became emergency medical technicians (EMTs). Together, their family bond giving them strength, they started working at Los Angeles County General Hospital.

That experience changed their lives. As field medics, their interest in medicine flourished and enticed them to pursue college degrees and attend medical school.

"I feel like I've really traveled to the moon and back," says Sahagun, now 29 years old and attending Harvard Medical School. What taught him even more, he says, was a fellowship program that allowed his academic passions to thrive. Sahagun was accepted into the 2000 class of fellows within The Fellowship Program in Academic Medicine for Minority Students.

The program offers research funding to exceptional minority medical students who want to pursue biomedical research on a college or university campus. Its goal is to boost the numbers of underrepresented groups in the field.

According to National Medical Fellowships, Inc., Puerto Ricans, Mexican Americans, African Americans, and American Indians comprise less than four percent of the M.D. faculty at the nation's medical schools—considerably less than their percentage in the overall population.

"That's fewer than 4,000 out of 90,000," says Anders Hedberg, director of the science initiative at the Bristol-Myers Squibb Foundation. "There's always been a very small number of minorities in the medical field, in academic medicine."

"Right now," he continued, "when you look at the number of graduates at medical schools in the United States, less than 12 percent are underrepresented minorities."

Since it was established in 1983, the program has brought 450 students into its fold, giving them the chance to complete an eight- to 12-week fellowship program. The Bristol-Myers Squibb Foundation has supplied more than $3 million over the last decade and became the program's sole funder in 1993.

Fellows are second- through fourth-year medical students who are considered by the Association of American Medical Colleges to be underrepresented. They must attend either an M.D.-granting medical school or a degree-granting program at a college of osteopathic medicine in the U.S. A student can receive only one fellowship.

Many of the students have faced significant obstacles—such as cultural, financial, and linguistic—on their paths to studying medicine.

Candidates need to submit biographical information, letters of recommendation, two-page research proposals, and letters of commitment from potential mentors who've agreed to work with the students. The deadlines are usually in November.

Decisions are based on academic achievement, leadership, and the potential of a student to play a "responsible" role in academic medicine. A Program Development Committee additionally considers whether the research proposal is clear, and whether the student grasps the project's objectives.

Every year, 35 students are chosen, and each receives a $6,000 grant. Fellows choose their mentor themselves, either someone at their school or at another medical or academic center. Mentors must be able to devote two to three months to work with or supervise the student during the summer or regular school year. The mentor can use up to a third of the $6,000 to cover internship costs and to attend an annual March symposium.

"The mentors not only help students decide what aspect of the research project they will work on during their fellowship, but guide them toward doing the work, and set them on the right path, giving them literature and support," says Maritza Meyers, senior vice president for pro-
program operations and management at National Medical Fellowships, the not-for-profit organization that administers the program.

"The idea of the program is to expose students to the joys and rigor of biomedical research," says Meyers. "This has been an incredible opportunity. It gives them funding to do research they may have had an interest in but did not know how to get support for, and the prestige of a fellowship has opened doors for students."

One aspiring fellow struggled to make inroads with a potential mentor until he revealed he was applying for the fellowship and sought the professional's guidance. "With that, the door was opened to him, and this man opened so many other doors," she says.

Students have researched a broad range of topics: identification of cancer-related genes; transplantation of islet cells for treating diabetes; early detection of drug resistance in HIV; physician-patient communication of risk factors for AIDS; and the role of estrogen-replacement therapy in early Alzheimer's dementia.

Mentoring doesn't end with the fellowship program. Fellows have fostered professional ties with their mentors, who serve as counselors and guide them toward residency programs and even job openings.

"It's a way of coming together with colleagues with whom they may be working the rest of their lives," she says.

Hedberg says the mentorship is the core element. It is a prerequisite of these people to stay in touch within the field during the training. The program is based on the relationship between a fellow and a mentor.

Each March, the program holds a symposium at Bristol-Myers Squibb's Pharmaceutical Research Institute to give fellows a chance to present their research to scientists. They also get a chance to network.

The event is considered the largest gathering of minority medical student researchers in the states.

"A lot of times, students don't know what is available to them. They need something to nurture them, and this becomes a source of pride for them," says Meyers. At the gathering, they see myriad students "who look like them, who have the same interests," she says.

When fellows arrive for the conference, they are asked to mentor high school students as part of the Role Model Roundtable.

More than a hundred 11th and 12th grade students from Philadelphia and New Jersey convened at the Institute's headquarters in Princeton on March 7th. The students were African American, mainland Puerto Rican, Mexican American, and American Indian.

Over the course of a day, they got the chance to listen to groups of about a dozen to fellows-turned-mentors. They asked about their lives, their pursuits, and the obstacles they'd had to overcome.

"Even though this is only a couple of hours that the fellows do this, they really appreciate this opportunity," Hedberg says. "This is a chance for them to give back and close the loop, when they've been given the chance to work with a mentor."

"It's rewarding when we see these individuals come in each year, very young and energetic, who may have had very unusual challenges getting an education and into medical schools," he adds. They begin to find tremendous energy in the mentor relationship. You see them give a presentation of their work they've done in their training, and now they're basically aspiring to help others do the same.

The hope is that fellows will get more involved in their communities and in their schools. According to the Association of American Medical Colleges, more than 50 percent of 1999 medical school graduates who are underrepresented minorities say they plan to practice in underserved areas, compared with 19 percent of all other graduates.

Sahagun last year served on the admissions committee at Harvard in hopes of bringing more Latinos into the educational mix. He is putting himself and the committee on the back for the institution's admission of Latinos went from 10 to 24 in one year.

"One thing I want to do is push for people to get into Harvard Medical School because the numbers across the nation are incredibly low," he says. "Harvard tries to increase diversity among its student population, but the numbers are still quite low."

Meyers says that fellows have gone on to teaching positions as well. The AAMC reports that nearly 26 percent of 1999 medical students from underrepresented minority groups plan to work full-time in academia after completing their training.

"Students can make a valuable contribution by delivering direct care in communities of need but also, more importantly, by influencing how research is done by teaching future cadres of medical students," Meyers says. "Teaching makes a difference as well."

National Medical Fellowships is poised to undertake a long-term study to map where its graduates have landed. The two-year project will track students from the first 10 years of the fellowship to determine whether the program has made a difference.

"The evidence of success is where they've been placed," she says. "Are they staff researchers? I think some of the indicators of success are whether they have graduated and completed residencies, and if they are at medical centers and research institutes."

Sahagun says he expects to be one of the success stories. A third-year medical student at Harvard, he is applying this summer for residency. He says he is interested in infectious diseases or possibly cardiology, and someday hopes to work in the Los Angeles area.

Often asked whether there's anything in his past he'd like to change, his answer is always no.

"Of course, I'd never encourage anyone to take the wrong path or to do the same thing as I did. But I've learned from my past experience, and I thank God I am who I am. It molded me into the person I am now."

Sahagun, who will graduate in 2002, now speaks to high school students and potential colleagues. He tells them to seek role models and to pursue their education. He fills the high school auditoriums with anecdotes about brushes with danger and crime. He says he didn't have many role models while he grew up, but now he realizes they were out there, if one looked hard enough.

"When I grew up, there were people who tried to encourage me to continue my schooling, but they never saw my life. They didn't know how it was never to have a positive role model," he says. "These people had no idea how difficult it was to break the barrier. Students look at me and say. "Wow, this kid has gone from getting shot at to success.'"

He tells the students they should consider medicine, and not believe that blue-collar jobs are their only option. "There are a lot of people terrified of the sciences," he says. "They see an equation they never saw before, and they are immediately terrified and shy away from it."

"But it's doable. No one ever said everything in life is going to be easy.'"
Culturally Competent Care—
A Passionate Priority

Savvy Aid from Three Sectors of HRSA

U.S. Department of Health and Human Services
HRSA
Health Resources and Services Administration

BY
MICHIELLE ADAM

There are towns along the border of Mexico and the United States and in the rural and urban landscape of this country where affordable health care is a luxury all too difficult to come by. Here, where large numbers of minority and medically underserved people live, where poverty and poor health go hand in hand, the federally funded Health Resources and Services Administration (HRSA) is sending its army of medical staff to try to bridge the gaps.

Since 1982, the HRSA has been committed to improving access to quality health care for the underserved, vulnerable, and special needs populations of this country, which include large numbers of Hispanics. HRSA-supported community health centers serve millions in approximately 3,000 medically underserved communities. In addition, HRSA is also helping promote the recruitment and training of a culturally competent and diverse workforce to improve health care and healthcare delivery to these underserved populations.

HRSA is a large and comprehensive federal agency with an annual budget exceeding $6.23 billion. Several areas within the agency are of special concern to Hispanics in education. These include the Bureau of Health Professions and its multiple scholarships, loans, and programs that benefit Hispanics; the National Health Service Corps, which, as part of the Bureau of Primary Health Care, provides financial assistance to health professions students in exchange for service after graduation in rural and urban health professional shortage areas; and the Office of Minority Health and its efforts to assure improved health care for Hispanics and other minority groups, and to direct grants and funding support to Hispanic Serving Institutions in accordance with the White House Initiative on Educational Excellence for Hispanic Americans.

Bureau of Health Professions

When Bureau Director Dr. Sam Shekar speaks, he expresses his great concern for increasing the number of Hispanic health professionals in the country—a mission that his Bureau takes very seriously. "We already know," he said, "that the Hispanic population in the United States is close to or has surpassed African Americans as the most populous minority group in this country, and that by 2050 Hispanics will be a quarter of the population.

"We already have a gap in representation in health professions. Minorities as a whole make up about 25 percent of the population, while only 10 percent of the U.S. health professions workforce consists of minorities. This gap may grow unless we do more to encourage minorities and other disadvantaged individuals to be able to come into health professional careers."

To increase representation, the Bureau runs programs that support training efforts for minorities in the field of health. Within its Division of Health Professions Diversity are three programs of specific value to Hispanics and other minorities: the Health Careers Opportunity Program, the Center of Excellence, and the Minority Faculty Fellowship Program. The HCOP, with currently 102 grants, provides funds for colleges and universities to develop programs for students from disadvantaged backgrounds who have an interest in pursuing careers in
health and allied health professions. Last year, funds for this program totaled $9.1 million. Eight Hispanic Serving Institutions (HSIs) were awarded $2 million, five Hispanic Serving Health Professions Schools received $2.1 million, and 18 Hispanic-focused projects were awarded $5 million.

The Center of Excellence currently has 25 grants that help health professions schools train underrepresented minorities. For example, Baylor College of Medicine in Houston, in partnership with UT-Pan American, has established a model program in South Texas, with COE support, to introduce more students to health careers. The Center strives to graduate more Hispanic physicians to work in the underserved region of South Texas. University of California at Davis, with COE assistance, currently provides Latino medical students with tutorial assistance, entrance exam preparation for medical school, and financial support. The Minority Faculty Fellowship Program also supports institutions in the identification, recruitment, selection, and training of underrepresented minority faculty at their institutions.

The reasons why more Hispanics should be brought into the health profession are all too clear to Shekar. “There is definitely a need for better care and better treatment, and we know from data that health professionals who are either Hispanic or culturally competent with Hispanic populations provide better-quality care to the Hispanic populations they are serving.” And, said Shekar, “We have data that show that Hispanic physicians are two and a half times more likely than other physicians to treat Hispanic patients, and that Hispanic and other minority physicians are more likely to treat Medicaid and uninsured patients than non-Hispanic physicians in the same area. So we know that culturally competent health care contributes to better health outcomes and more satisfied patients.”

Other statistics also confirm the need for more Hispanics in the health professions field. For example, Hispanic adults across all income levels are more likely to lack health insurance than are non-Hispanics. A full third of the uninsured children in the United States are Latino. “The problems are serious,” said Shekar. “The rate of diabetes among Hispanic Americans is twice that of non-Hispanics. Hispanics experience about 21 percent of new AIDS cases, and the AIDS rate among Hispanics is four times that of non-Hispanics. Hispanics are more likely to learn that they have AIDS later in the stage of illness than others. There is definitely a need for better care and better treatment.”

When most people think about the health professions, the first thing that comes to mind is the doctor. But, according to Shekar, there are 270 possible health careers for Hispanics to embark upon. Currently, however, while Hispanics represent about 13 percent of the population, they represent less than six percent of physicians, less than four percent of dentists, and a mere two percent of nurses. And the disparity “could possibly grow,” said Shekar.

Supporting the White House Initiative in 2000, HRSA distributed 152 grants totaling $37.8 million to HSIs, Hispanic Serving Health Professions Schools, and other Hispanic-focused projects. Another Bureau program, Scholarships for Disadvantaged Students, awarded $1.2 million to HSIs, which in turn enrolled 2,726 Hispanics in the program.

Within the Bureau’s Division of Nursing, the Nursing Education Opportunities for Individuals from Disadvantaged Backgrounds has awarded 246 grants, about $40 million since the program’s inception in 1989. The Nursing Workforce Diversity program also provides funds to defray the costs of special projects that increase access to nursing training by the disadvantaged.

The Bureau also pairs up with organizations such as the National Hispanic Medical Association to support such ventures as the Resident Leadership Program, which helps enhance the leadership skills of Hispanic physicians at schools such as the Weill Cornell Medical College and UT at San Antonio Medical School.

Shekar oversees 43 grant programs in total, and is proud of their effects. “Last year, we supported nearly 35,000 needy students from all racial and ethnic backgrounds and helped 10,000 students graduate with health professional degrees,” he said. “And we graduate three to five times more minorities, who are more likely to return to their communities and provide much needed care.”

The challenge remains, however, to bring more people into health professions.

“Kids are not applying for or entering into health profession careers as much as they used to. We are trying to make sure that kids know about health professions. We are working assertively to see if we can partner with schools and other entities and our grantees to have their children, their parents, their teachers, and their counselors know about the various health professions that are there,” said Shekar.

He added, “There is a strong commitment and support by the government to make sure that people from disadvantaged backgrounds have a great opportunity to participate in health professions. The commitment is continuing and..."
has been since the program began.'

**National Health Service Corps**

Dr. Marisel Cancel-Méndez was a second-year medical student at La Universidad Central del Caribe in Puerto Rico when she first learned about HRSA. Other students told her about the agency's scholarships, and she applied for one. Cancel-Méndez received full payment of her tuition, books, and medical equipment, along with a stipend, for her final two years of medical school.

"That really made my day. I didn't need to think of other stresses," said Cancel-Méndez. As part of the National Health Service Corps Scholarship Program, she could optimally have received up to four years of education fully paid, and other assistance, in return for giving a year of support in an underserved area for every year of scholarship support, with a minimum two years of field service required.

As part of her scholarship agreement, Cancel-Méndez has been working at Su Clinica Familiar, an HRSA-funded community center in Brownsville, Texas, since completing her residency in Puerto Rico. She is a clinician-internist and provides medical care to this predominantly Hispanic community along the Texas-Mexico border. "It's been a great experience," said Cancel-Méndez. "I'm giving to other people what God and programs like this have given to me. It's great professionally and personally."

Cancel-Méndez is a strong asset to her border community not only for her medical knowledge but also for her cultural and linguistic skills. "The patients ask for me because I can speak their language. Some things are very personal," she said. "That has made a big difference between me and the non-Corps physicians. I can understand how they feel."

Dr. Ron Weaver, assistant surgeon general and NHSC's director, estimates that about 22 percent of the population they serve is Hispanic. When they work with communities, NHSC asks each to advise what skills and abilities it needs. Hispanic patients often seek out physicians like Cancel-Méndez, who speaks their language and shares a common culture.

"Communities want bilingual and bicultural clinicians," said Weaver. "We are anxiously recruiting underrepresented minorities to reflect the diversity of these areas. And we encourage every clinician to develop skills in cultural competency. Having cultural competency skills is incredibly important."

An estimated 35 percent of the clinicians recruited with scholarship and loan programs would be categorized as minority, but the numbers still fall short of the 53 percent minority population they serve.

Another popular program for health professions students is the NHSC Loan Repayment Program, through which fully trained clinicians with qualified educational loans are offered repayment of those loans if they choose to serve at an eligible site while receiving a competitive salary. According to Weaver, NHSC pays up to $25,000 in loan repayment for each year for the first two years of service, and up to $35,000 the third year. Beyond this, these practitioners are salaried by the communities they represent.

Last year alone, 840 people applied for the loan, and about 337 applications were accepted, said Weaver.

In 1998, 26 out of 356 scholarship awardees were Hispanic, and in 2000, 22 of 284. In the loan repayment program, 46 of 628 recipients were Hispanic in 1998, and only six out of 600 in 2000. Although NHSC has emphasized recruiting minorities for these programs, the elimination of affirmative action programs has significantly reduced the number of minority clinicians enrolling and graduating from health professions schools, according to NHSC sources.

NHSC also runs SEARCH: Student/Resident Experiences and Rotations in Community Health, a program that helps link communities with academia. NHSC funds programs in various states, which in turn link up with universities to offer student/resident experiences and rotations in community health. Students or residents are given the
opportunity to train on interdisciplinary teams and acquire the skills needed to provide culturally competent care that is responsive to the needs of underserved populations.

As part of the Advocacy/Mentorship Program for Recruitment of Certified Nurse Practitioners, NHSC has also entered into a partnership with the American Association of Colleges of Nursing to establish a network for the recruitment of certified nurse-practitioners. Through the program, they have built a network of nurse practitioner mentors who serve as role models for minority nurse practitioner students.

Weaver is proud of the group of people who have worked and are now working in communities through the NHSC recruitment efforts. “I truly believe the vast majority of individuals in health do want to make a difference in their field. We have seen a cadre of clinicians who carry that spirit. Story after story exemplifies that,” said Weaver. And, he added, “I believe as a program that we are certainly a place to look if you want to make a difference in the community you serve.”

Office of Minority Health

The Office of Minority Health was created in 1992 to provide leadership and guidance throughout HRSA to help improve the health status of racial and ethnic minorities. It is the focal point within the agency for addressing minority health issues affecting HRSA programs and initiatives. One such initiative includes The White House Initiative on Educational Excellence for Hispanic Americans.

“We want to do everything in our power to increase that pipeline of getting more Hispanic students into institutions where they have an opportunity to go into health professions, hopefully then going back into the community to serve people who look like them,” said June Horner, director of HRSA’s Office of Minority Health. “We want to make sure that schools are attracting, recruiting, retaining, and helping get Hispanics into the health professions.”

Horner’s office works with HSI s to build community and academic partnerships and to provide technical assistance to those schools that need help.

“What we do is look at a community that may be in need, and if there is an institution there, and we feel a partnership would be of benefit, we try to encourage a partnership,” said Horner. For example, OMH will help an institution in an underserved region establish an accreditation process for nursing. Or, in Texas, along the border where large numbers of Hispanics live, an institution may want to do more than just educate its students. HRSA, through OMH, would then help build a partnership between this institution and its community. “In some communities that academic institution may be a catalyst to benefit the community as a whole,” said Horner. “We encourage them to go beyond education...to bring services to the area.”

OMH also helps link up HSIs to grants and other health-related help. The office sometimes provides technical assistance for setting up new programs within HSIs as well as lending a hand in the form of financial support or equipment if needed. The University of Texas School of Medicine in San Antonio was awarded a Partnership for Health and Professions Education Grant to establish, in collaboration with the community, a direct academic channel for Hispanic students seeking careers in the health professions. Florida International University and the University of Houston School of Public Health each received Health Administration Traineeships and Special Projects Grants to develop and implement student training programs in health administration, hospital administration, and health policy analysis. In the year 2000, 26 HSIs received funding that totaled more than $14 million.

OMH works directly with the agency’s newly funded technical assistance center in Maryland. The center, opened last September, is designed to help minority schools that can’t afford paid consultants put together competitive grant proposals for HRSA funding. “We try to level the playing field by giving them that added assistance so that they will have a competitive edge in applying for these dollars,” said Horner. The center’s first workshop was provided to HSIs, and three workshops for HSIs have been conducted to date. Fourteen HSIs participated. Horner expects this activity to “increase applications from HSIs and increase funding going to HSIs.”

Sonia Casasnovas, director of grant resources at Texas A&M International University, attended one of the center’s workshops on behalf of her school and called it “one of the best workshops I have ever attended. We got to really talk about our project with the people from the HRSA programs we were interested in. We were given a lot of insight into what to do and not to do. This is very unusual and beneficial for HSIs.”

With the center’s help, her university’s school of nursing is preparing two grants for submission to HRSA. The school is interested in developing a master’s degree program in nursing and is also seeking funds to provide services in rural areas along the border.

To further provide assistance to HSIs, OMH has been conducting site visits at schools such as Texas A&M. “If there are issues and needs articulated, we come back and work on that,” said Horner. “I think we have really benefited from working closely with these institutions to see where we need to go. We have been fortunate with the partnerships,” she added. “We are forging ahead.”

BY INÉS PINTO ALICEA
Sheila Smitherman, a Latina from New Mexico, knew as an undergraduate that she wanted to study medicine, and her summer spent at the Honors Premedical Academy (HPA) only intensified her desire.

But Smitherman, now a third-year medical student at Baylor College of Medicine in Houston, said the program gave her a bit of a reality check on what she still needed to do to enhance her competitiveness among medical school applicants. Smitherman said the challenging program offered to minority college students and graduate students considering careers as physicians gave her an edge over other medical school applicants.

"This program was good for me in a lot of ways," said Smitherman. "I met a lot of fantastic physicians that I still keep in contact with. It prepared me for how a hospital works, which made me more comfortable during my rotations. The program helped me develop a really good personal statement for my medical school application."

The HPA at Baylor College of Medicine and Rice University in Houston is one of 11 national sites of the Minority Medical Education Program (MMEP) sponsored by The Robert Wood Johnson Foundation of New York. The HPA runs every year for six weeks, from the end of May to the beginning of July. Selection to the program is based on academic achievement and interest in medicine. Participants receive college credit, housing, tuition and fees, some meals and a stipend.

"Medical schools want to see you are dedicated to the field of medicine, and an experience like Baylor College of Medicine.

"We've had a lot of success getting students into medical school," said Ferry. Some 51 percent of the participants in the 2000 program were Hispanic, and about two-thirds of the HPA participants come from Texas.

"I was surprised how hard I worked and how much I didn't mind it," said Smitherman, who plans to specialize in neurosurgery. "I just wanted to do more. I never had such a productive, academic summer that was so much fun."

The Honors Premedical Academy provides rigorous coursework in science and communications, as well as a clinical experience in the Texas Medical Center. Students are enrolled in courses at Rice University and Baylor College of Medicine and receive a total of nine semester hours of undergraduate credit for completing all academic components of the program.

Grades are transferable to most undergraduate institutions around the country, said Ferry.

On a typical day in the program, students participate in their clinical experience from 7 a.m. until noon.

In the afternoon, they take classes. On Fridays, the students hear motivational speakers and other lecturers, undergo MCAT reviews, and work on their medical school applications. "These programs are important because they really open up doors," said Ferry. "We need to get the word out that this is an important experience that will help get them into medical school."

In all the summers of their undergraduate years, suggests Ferry, students need to show that they are interested in medicine and that they understand the application process.

Program Courses

The program offers three components in which students can earn college credit upon successful completion of the program. Three courses comprise the bulk of the program:

Medical Technical Communications, aka English 317 (three semester hours, letter grade), includes intensive preparation in writing, oral presentation strategies, and group discussion sessions focused on pertinent medical issues. Course assignments lead to the development of a medical school application essay and interview skills, with significant personal feedback from instructors. Activities complement work in clinics and laboratories and promote insight into the function of language in medicine. Ferry said this class also helps students prepare for oral interviews for medical school applications.

"You can get into medical school with a good interview," said Ferry.

Human Structure and Development, aka Biology 403 (three semester hours, letter grade), focuses on the structural organization of the human body from the microscopic to the gross level. Functional and clinical correlates are integrated and emphasized through lectures, dissections, and demonstrations.
Preceptorship in the Health Sciences, aka AHS 399 (three semester hours, pass/fail), provides greater understanding of the day-to-day practice of medicine and/or basic science research. Students are assigned to a clinical or research setting and participate in various activities, supervised by Baylor faculty members. Students keep a journal. Daily journal entries and targeted assignments encourage them to critically reflect on their experiences and to discuss many of the issues and challenges encountered. “A lot of students take classes in the summer anyway,” said Ferri. “Students only use up six weeks of their summer, and then they have the rest of the summer to work.” There are an estimated 43,000 medical school applicants for some 16,000 slots open at medical schools nationwide, said Ferri, and competition is intense. Students accepted at Baylor College of Medicine, for example, have a 3.8 GPA and score a 33 out of 45 on the MCAT. The average MCAT score for Latino students entering medical schools nationwide is 25, she said.

Two full-length MCAT exams are administered during the program, and students receive detailed score reports highlighting their strengths and weaknesses. A short MCAT overview session is provided covering topics such as test content and structure, types of questions, national test statistics, and strategies for studying and practicing for the test.

All Texas medical schools and selected other schools are invited to visit Baylor for a Medical School Recruitment Fair and meet with HPA students on the last day of the program. This is a great opportunity for students to practice interview skills, establish key contacts with representatives from participating institutions, and begin to get their names known.

But HPA is not all work, said Ferri. Students are given opportunities to go to parties, take field trips to the beach, and join other events at which they can socialize with Baylor medical students, faculty, staff, and fellow HPA participants.

Ferri noted that HPA is a great way for prospective medical students to make contacts and get recommendation letters. One source of contact is the program’s speaker series, which explores career pathways of successful citizens and professionals both within and outside medicine. Students attend presentations by Baylor faculty and research scientists that focus on topics related to medical careers. Participants also have the opportunity to interact with medical school faculty, staff, and students and to receive personalized academic, career, and medical school admissions counseling.
Smitherman said she was assigned to work with pediatric cardiologist Tim Feltus and she still keeps in touch with him. "He is a good role model," Smitherman said. "He's a lot of what I want to be as a physician."

To be eligible for the HPA program, a student must be a U.S. citizen or hold a permanent visa, be a minority, have an overall GPA of at least 3.0, a science GPA of at least 2.75, and a combined SAT or ACT of at least 950 or 20, respectively. The student must demonstrate a sincere interest in a medical career and have completed at least one year of college. Post-baccalaureate applicants are eligible, too, according to Elizabeth López, HPA program coordinator.

The program is operated jointly by Baylor College of Medicine and Rice University. Rice houses the students, provides them with undergraduate credit, and offers many of the classes for the program. Baylor is the host site and offers the students the clinical experience as well as many other activities related to the program.

Dedicated to education, research, and public service, Baylor is one of the top three Texas colleges and universities in research and development funding, and with total annual research support of $239 million, one of the top biomedical research institutions among the nation's 126 medical schools.

The Baylor College of Medicine has 1,542 faculty members, including instructors, of whom 91 or 6 percent are Latino, according to college statistics. Of the 971 medical residents, 61 are Hispanic, and of the 683 medical school students, 77 are Hispanic. The College instructs students in 21 medical specialties. The College also has nearly 400 students enrolled in its 12 Ph.D. programs in biomedical sciences. Baylor students train in the seven Baylor-affiliated hospitals in the Texas Medical Center, which is one of the largest incorporated medical centers in the world.

Rice University is private, independent, nonsectarian, and coeducational. It offers undergraduate and graduate studies in the humanities, social sciences, natural sciences, engineering, architecture, administrative sciences, and music.

The Baylor College of Medicine is not the only school to offer such a program. Other MMEP institutions are Case Western Reserve, UNCF Vanderbilt-Fisk, University of Alabama, the Chicago Consortium, Columbia University, Duke University's School of Medicine, UMDNJ–New Jersey School of Medicine and Dentistry, University of Arizona, University of Washington, University of Virginia, and Yale University. The Baylor College of Medicine is the only one, however, that offers academic credit to prospective medical students, said Perry.

The deadline for this year's program was March 1, but program officials said it is never too soon to get the application started because schools admit on a rolling basis. "The sooner the application is in, the better," said López.

For more information, call 1-800-798-8244 or 713-798-8200. To download an application, go to www.aamac.org and look for "students," and then go to the MMEP program link. Interested students also can e-mail mme@aacmc.org for more information. The site is coordinated by the Association of American Medical Colleges.

---

OHIO UNIVERSITY

Provost

Applications and nominations are invited for the position of provost at Ohio University for appointment in Fall 2001 or as soon thereafter as possible.

Position Description: The provost shares with the president the central administrative role in the university and serves as the chief academic officer. The Provost also has major budget planning responsibility. In addition, the provost works with the vice presidents to coordinate other institutional affairs.

Qualifications: Candidates must have appropriate academic credentials for a tenure appointment at the rank of professor; substantial administrative and leadership experience in both academic and budgetary matters; understanding of and commitment to public higher education; demonstrated commitment to a diverse university community; and commitment to open administration and a collegial system of faculty governance.

The Institution and Setting: Ohio University is a state-assisted, Doctoral Research-Extensive university, with six campuses. The main campus in Athens enrolls 39,290 students; the five regional campuses, all in Southeast Ohio, enroll an additional 14,000 students. The University offers bachelor's degrees in 92 fields, master's degrees in 66 fields, and doctoral degrees in 28 fields. Its academic organization includes colleges of Arts and Sciences, Business, Communication, Education, Engineering and Technology, Fine Arts, Health and Human Services, University College, a unique Honors Tutorial College, and a College of Osteopathic Medicine. Ohio University also has 48 centers and institutes that serve academic, research, and service needs for the university and community. The Athens campus is residential with selective admissions; regional campuses are open admission. The university budget for 2000-2001 exceeds $350 million.

Athens, with a combined resident and student population of 40,000, is located 75 miles southeast of Columbus, Ohio, in a beautiful area of wooded hills. Other information is available on the university web site: http://www.ohio.edu/

Application Process: Review of applications materials will begin in May and continue until the position is filled. Please send letter of application and professional references along with names and contact information of five professional references to:

FERRIS STATE UNIVERSITY

School of Criminal Justice

Tenure-Track Criminal Justice Faculty to teach undergraduate courses in criminal law and procedure, legal issues in corrections, a graduate course in legal issues in criminal justice, and other courses as assigned. May serve as generalist track coordinator. Other duties include scholarly research, student advising, new course development, committee work, maintenance of expertise in the field, and service activities. Position will include occasional travel to teach courses at satellite locations.

Required: Juris Doctorate from an ABA accredited law school, professional experience in the field of criminal justice, and potential for scholarly achievement. Must be admitted to the Michigan Bar by 8/1/02.

Preferred: In addition to JD, a graduate degree (Ph.D., ABD, Masters, LL.M.) in criminal justice or related discipline and prior teaching experience.

Screening will begin on 6/25/01, and continue until the position is filled. Applicants must send a letter of application explaining why they are interested in the position and how they meet the qualifications; vita, unofficial transcripts of undergraduate and graduate education (finalists will be required to submit official transcripts); and names, addresses, and phone numbers of three professional references to: JOB CODE HO-9045, Dr. Frank Crowe, Director, School of Criminal Justice, Ferris State University, 420 Oak Street, PRK-150, Big Rapids, MI 49307. For more information about Ferris, visit our web site at http://www.ferris.edu.

New Site a Big Draw for Hispanics

First in Wisconsin to Offer Bilingual Ed Leading to Bachelor's

BY JEFF SIMMONS

Lights burn all day inside Concordia University South Center. During the day, students are training to become medical assistants. At night, the same classrooms are filled with adults striving to earn bachelor's degrees in management and communications.

Opened a year ago on the south side of Milwaukee, the Adult Education Center elicited quite a bit of attention last year. It held the distinction of hosting Wisconsin's first bilingual education center where adult students could earn bachelor's degrees.

The nighttime and daytime programs are different but have had the same impact. They reach out to Hispanic residents where they live and provide them with opportunities to study and learn near their jobs and homes.

Set in a former Lutheran church, the site was chosen because it's in the heart of a region in which the Hispanic population has swelled over the last decade. That growth signaled a need for more opportunities.

But it couldn't be achieved without some blood, sweat, and tears, and Concordia officials say they still lobby each day to bring more students into
the fold. They are visiting schools and churches and meeting with community groups.

The building used to house the Ebenezer Lutheran Church's elementary school and then a public school system Head Start program. Classrooms in the three-story structure underwent major renovations—new heating and cooling systems, a room converted into a clinical lab, blackboards tossed into the dumpster.

"The biggest challenge was getting the building physically ready because it had been used as a grade school," says Patrice Burns, Concordia University South Center. "We really wanted to make it accessible for professional adults."

"We went from a typical grade school classroom with desks and children's artwork to a room that looks like a conference room," she says. "Instead of desks, tables are used in a U-shape where the teacher is in the middle, so it's much more involving."

The Center drew accolades for focusing its work on bringing adult Hispanics into the education arena. All instructors within the Adult Education Center were bilingual, and tutorials were bilingual as well.

"It was unheard of; it was completely new to Wisconsin," Burns says. "Bilingual programs are available in Milwaukee, but they really cater to people with very limited educational skills or goals. So ours was innovative in that it was designed for people who are looking for an advanced degree."

The South Center program, which began just over a year ago, follows a successful one run across town and a similar one run at a Concordia campus in New Orleans. The latter program catered to Vietnamese students and now enrolls Hispanic students.

Concordia additionally operates an adult education center in Milwaukee's Sherman Park neighborhood on the west side, where the African American population is dominant.

"They are both in working-class neighborhoods, lower-income environments," she says. "What we have in common is that we are working with adults in the area who are looking to finish their college degrees."

The Adult Education Center offers an accelerated program, with different adjunct instructors stepping into its five classrooms every month to teach new components. Instructors also teach at Concordia's four other campuses based in the City of Milwaukee.

The programs are designed with a Christian liberal arts context and emphasize student growth in their spiritual, intellectual, and relational lives.

Though organizers blitzed the area with television and print ads—even direct mail—the year-round program attracted only eight students initially. That number is steadily growing, and now is at 30.

The adult students attend school after work, one night a week for four hours. That crunches a 10-week, three-credit course in half.

Most of those now enrolled have some prior college experience but dropped out or severed their ties because of family obligations or financial ones. But this program has given them a boost—because 85 percent of their employers reimburse students for their tuition if they complete the course with high grades.

"The curriculum of each of our classes is looked over and assessed every year, and the majority of our professors are professionals working in this specific field," Burns says. "For example, if a student has an account management course, his or her teacher is someone with a master's degree who works as a manager in accounting. If it's a human resource management course, then a human resource manager would be teaching it."

"It is very up to date and provides the current skills and information one needs in the field right now," she says.

It has admittedly been a struggle, but organizers believe the numbers of students will continue to grow steadily. The South Center adult program offers two other majors—criminal justice administration and the ESL program aligned with management and communications.

Components of those two programs kick off this fall, and Burns, a former ESL teacher in Spain, adds that the school will start a teacher certification program for people currently in the public school system.

Location has been a key attraction. For many, it could take close to an hour to reach Concordia's main campus in Mequon. And that distance could pose a hardship because of work and family demands.

"Several students have come up to me and said, 'I am up for a management position or promotion, and my employer said that if I had a degree, this job would be mine,'" Burns says.

Students must be 25 years or older, and the average age there is 36. Most are women, about 60 percent. At most of the other Concordia adult education centers, women comprise about 80 to 90 percent of the enrollment. The classes are mostly Hispanic: currently, 40 percent are Hispanic, 30 percent are White, and 30 percent are Black. But all have common goals: to start or complete a degree, and to show their children the importance of acquiring an education.

"They're reaching a point in their lives where they want to do something about their education. I find that people come to us because they've gone to bigger schools and they were unhappy there. They like the smaller class size, and they get more attention with us."

Concordia officials say they sought to tap an area that had gone untouched. Many local groups already offered literacy-based English as a Second Language classes. But Concordia offered proficiency-based courses in reading, writing, and conversation to help students become more fluent.

Concordia University was founded in 1881 as a school of the Lutheran Church-Missouri Synod, and it formally became a university more than a century later, in 1989 A four-year liberal arts school, it now has 10 colleges and universities and offers 37 majors.

Concordia enrolled more than 4,500 students in credit- and non-credit generating courses last year. Of that number, more than 2,400 attended degree programs at its nine off-campus adult education centers.

While the South Center facility is only a year old, it now houses a jewel in Concordia's crown: MAP—the 20-year-old Medical Assistant Program. That nine-month program trains students for jobs in hospital clinics or private physicians' offices.
The program receives a steady flow of applicants, and its move is fashioned in part to help address the need in the South Center area for bilingual assistants at clinics and hospitals and private physicians' offices.

"Clinics are looking for people who speak Spanish to come into the clinics and do these things and communicate with patients," says Roseann Slota, who is MAP's director.

The Federal Bureau of Labor Statistics reported that in 1998, there were 252,000 medical assistants employed and that by the year 2008, there will be 398,000 such jobs—a 58 percent increase.

"The world of medicine is changing," says Slota. "We are changing into a managed care environment where large clinics are popping up, and these clinics recognize that they need people who are multilingual."

Medical assistants handle medical and clinical duties ranging from juggling phone calls and receiving patients to preparing medical reports, processing insurance forms, and scheduling surgeries. They also prepare examining rooms, take patients' medical histories, check vital signs, and perform routine laboratory tests.

Students are trained for a variety of healthcare positions, such as medical receptionists, medical room assistants, laboratory assistants, phlebotomists, and EKG technicians. They are taught how to draw blood, sterilize equipment, and administer electrocardiograms.

The program, which awards students 34 credits, draws between 15 and 25 students each academic year. The program is competency-based, meaning that students must meet certain standards before they can progress to the next level.

"It's very rigorous," Slota says, "There is a lot of studying, reading, writing, and test-taking."

Unlike the Adult Education program there, MAP attracts a wider range of students—from their early 20s to their 50s. Also, all of the students speak Spanish and English well already, so instructors are not bilingual.

The curriculum spans the administrative to the clinical. Students learn all medical terminology and administrative functions, and pore through charts and books to cul knowledge about anatomy and physiology.

There is also a class, The Bible as Literature, which offers an overview of the Bible to acquaint students with its background, content, and messages. Students must read the Old and New Testaments.

Taught by healthcare workers, the students learn how to communicate effectively with patients, emergency procedures, medical ethics, and computer science. They also must wear uniforms to class to get accustomed to the work atmosphere.

Slota, who also oversees the Radiologic Technology Program and the Health Care Administration Program, knows the school well. She received her Bachelor of Arts degree in health care administration and her M.S. in education at Concordia University-Mequon.

"The program by far is the closest to my heart because I started as a student here and can relate to these students," says Slota, who says she grew up in a poor, blue-collar family. "We did not have money to go to college."

"These women are in the same situation. They are very motivated to go back to school, and I am so excited for them because they want to get an education and pull themselves out of poverty," she says. "Some of them come in with low self-esteem because a lot of these women didn't do well in high school and they are afraid they are going to fail again. Many have been away from school for a number of years."

That was Susana Contreras' experience. She started with the program last August after her mother handed her pamphlets she received in the mail. "It was really, really hard being out of school for six years and having a kid," says Contreras. "It was hard starting at the bottom again."

Contreras couldn't have done this in the program that was located on the main campus because of her family and job. But now, she has a short walk: only five blocks from home.

She believes that her success now is due in part to the fact she receives more attention in a smaller environment. "The teachers care about our personal life; they ask us how our week is, if we are having problems," she says.

She also sees the demand in the area. Whenever she brings her son to a doctor's office, she notices others struggle to communicate with assistants who don't speak Spanish. "Around here, there is a high demand," she says, "even for receptionists."

Contreras, who is 22, has nearly completed her studies and is about to receive her certificate. This month, she begins her externship in a clinic. "I have more of a head on my shoulders and a better outlook for the future," she says.

Many of her classmates are destined to land firmly on their feet. Slota says that 100 percent of graduates are placed, many receiving offers even before the school gets a chance to help them.

"I get doctors, hospitals, clinics, and HMOs calling me weekly asking when our students are graduating," Slota says. "We help students as much as we can, but often places are begging for names."

The move has helped to enliven the program somewhat. It had always faced stiff competition from other colleges or outfits that educate medical assistants. But now it seems as if the new location has generated more interest.

Slota says she moved it to the new quarters because she believed the demand was there and untapped. The program didn't have any Hispanic students before, and now it is more than half Hispanic.

"I struggled for the last few years with recruitment and to get our name out. I thought—let's bring our program to individuals there who don't have the opportunity to get to our campus in Mequon. And it seems to be working.
College of American Pathologists Targets Latinas

Offers Free Reminders to Get a Pap Test

BY MARILYN GILROY

Education. Job opportunities. Good health.
That's what Hispanics, like most individuals, want out of life, according to a recent analysis on National Public Radio. These conclusions were based on results from questionnaires and polls in conjunction with Census 2000.

But while there have been many new programs to advance minority education, and notable progress in job opportunities, healthcare issues for Hispanics have remained on the back-burner. With the surge in Hispanic population growth, these issues have begun to attract the attention of the healthcare community. Hispanic women in particular are being targeted in various initiatives.

One professional medical group, the College of American Pathologists (CAP), has stepped up to help Latinas combat the risk of cervical cancer by reminding them to get their annual Pap smear test. According to CAP, thousands of Latinas in the United States risk their lives each year by not getting an annual Pap smear, a lifesaving test that could reduce the likelihood of their developing cervical cancer.

The Pap test, introduced in the U.S. after World War II, is the most effective cancer-screening test known to medical science. It uncovers treatable abnormalities before they turn into cancer.

According to a Centers for Disease Control and Prevention study, more than 25 percent of Hispanic women failed to get a Pap test in the last year.

As one means of addressing this problem, the College of American Pathologists is providing a free bilingual Internet-based service that will help remind women to schedule their annual Pap test. Registering for this simple reminder could save their lives.

CAP is a medical society serving more than 15,000 physician members and the laboratory community worldwide. The CAP campaign was developed after a survey by the Gallup organization revealed that women who receive a reminder from their doctor are much more likely to schedule their annual Pap test than are those who didn't get a reminder (78 percent vs. 47 percent). According to a study by Cheskin Research, in the past two years, household computer use has increased approximately 68 percent among U.S. Hispanics, compared to about 43 percent in the general population.

"Because of the overwhelming evidence to suggest a reminder could encourage many more women to get this important test, the CAP urges women to find ways of reminding themselves," said Filberto Cavazos, MD, FCAP, pathologist and associate professor at Ohio State University. "Such ways include scheduling their Pap test close to their birthday or logging onto www.papsmear.org to register for an e-mail message on any date they choose."

CAP is hoping that women will take action and schedule their annual Pap-test once they have received a reminder. "It takes only seconds to set up the reminder," said Cavazos. "Many women are so busy with their careers and families, they don't take time for their own health—including receiving a Pap test each year, but these seconds it takes to set up the reminder could save a woman's life."

Approximately 16,000 new cases of cervical cancer are diagnosed each year in the United States, with about 4,800 deaths annually from the disease. The five-year survival rate with advanced cancer is 14 percent, but there is a 90 percent survival rate with localized cancer. According to CAP, 80 percent of all women who die from cervical cancer did not have a Pap test in the past five or more years.

The Pap smear is a relatively simple procedure whereby a physician obtains cells from the surface
of the cervix, often using a special brush to sample the area where most cancers begin to develop. The cells are placed on a glass slide, which is sent to a laboratory where they are examined by specially trained cytotechnologists. The results are usually available to the patient's doctor within a few weeks.

What makes the test so important is that cervical precancer or cancer in the early stages can be treated with a high probability of cure. Cervical cancer takes time to develop into a deadly disease. In addition, no other screening procedure in medical history is as effective for detecting cancer. Since it came into common usage more than 60 years ago, the Pap test has reduced cervical cancer deaths in the U.S. by 70 percent, making it a very effective cancer-screening tool.

Pathologists, doctors who treat patients through laboratory medicine, and other healthcare providers know that having an annual Pap test is one of the most important things a woman can do to help prevent cervical cancer. In fact, pathologists recommend that every woman who is over the age of 18 or who is sexually active should have a Pap test every year.

The CAP-sponsored Pap test reminder website is free of advertising, and the e-mail reminder is sent free of charge. E-mail address-es are used only for this reminder and to provide registrants the opportunity to comment on the value of the service.

The website also features stories from campaign spokespeople such as Diana García, who, in the spring of 1994, developed an abnormality that appeared on her annual Pap smear. Even though García hoped to start a family, she had to undergo a complete hysterectomy to remove the cancer cells that the doctors believed had originated in her cervix. The operation saved her life, and since then, García has worked to educate other young women on the importance of the Pap smear. She has been a featured speaker at conferences, including last year's "No One Alone" teleconference sponsored by the Center for Cervical Health. The conference brought cervical cancer survivors from around the globe together to inform, educate, and support other women worldwide.

Casting a Lifeline to Hispanic Women

If efforts such as the CAP campaign are to succeed, other government, civic, and medical organizations will have to become involved in public measures to raise awareness of health issues among Hispanic women. The National Women's Health Care Information Center reports that women of color do not often avail themselves of preventive health tests and that efforts to increase screening rates will have to consider a number of factors that inhibit women from getting tests.

Experts say that the major barriers to health care include the inability to pay and the lack of healthcare personnel and facilities close to where people live. In some cases, there is the additional factor of needing services delivered in a culturally acceptable manner. Hispanics often work in low-wage, part-time, non-unionized service jobs without health insurance or a regular source of healthcare services. It is estimated that as many as one-third of Hispanics are uninsured, and many use the emergency room of a nearby hospital as the most common source of medical treatment.

The issue has become increasingly significant as Hispanics have become the largest minority in the United States. According to the Journal of Rural Health, breast and cervical cancer mortality rates are higher in Hispanics than in other U.S. women and subgroups. Lack of health care is particularly critical among migrant workers, many of whom have not received mammograms or Pap smears. One study of Hispanic women in rural Washington State revealed that 38 percent had never heard of a mammogram and only 44 percent had received a Pap smear within the prior year. In addition, the women perceived these tests as unnecessary or diagnostic procedures rather than as preventive health measures.

For this reason, areas with a concentrated Hispanic population have begun to offer free services in an effort to address the problems of prevention. Last year, Los Angeles County mounted an aggressive and successful cervical cancer screening program by offering free Pap smears. The free services were available at sites throughout the county, and bilingual workers were on hand to assist patients.

A clinic in Ulster County, New York, which serves mostly migrant workers from Mexico and Central America who have come to the Hudson Valley to work on the farms, provides Pap tests and screening for other diseases, such as tuberculosis and diabetes, that often affect Latinos in greater numbers. Clinic workers, who are fluent in Spanish, even escort women to a hospital in Poughkeepsie so that they can receive mammograms.

Many other areas of the country will probably follow suit and adopt similar programs in the next decade, especially as the population ages. In 1998, Phi Kappa Phi Journal predicted that healthcare issues for Hispanics will become

According to a Centers for Disease Control and Prevention study, more than 25 percent of Hispanic women did not get a Pap test in the last year.
even more significant as the number of Americans age 65 and older represents a larger proportion of U.S. citizens. The shift from Whites to Hispanics will be reflected in the elder population with the numbers of older Hispanic women increasing in this cohort. With these women having lower median incomes in general, they are at risk for poor health and are less likely to have good medical care unless something is done to reverse this trend.

**CAP Advocates Expanded Health Care**

CAP, renowned for advocacy in preventive health care, is one of the organizations lobbying to bring these issues to the attention of legislators. It played a key role in working with Congress to introduce a bill that would improve access to Pap tests for all women. CAP was instrumental in the successful passage of legislation that improved Medicare payment for the test and included pelvic examination coverage.

CAP brings an impressive array of resources to the task of championing health care. It is the world’s largest association composed of pathologists and maintains a staff of nearly 400 people in its Northfield, Illinois, headquarters and its Division of Government and Professional Affairs in Washington, D.C. The mission of the College is to represent the interests of patients, the public, and pathologists by fostering excellence in the practice of pathology and laboratory medicine. CAP offers continuing education programs, seminars, and conferences for pathologists, and laboratory improvement programs. It helps members monitor new medical regulations and licensure standards for labs. The College offers brochures and videos to help give the public a better understanding of health and wellness issues.

CAP’s members are medical school graduates who have completed 4 to 5 years of accredited residency to prepare for a career in pathology. Pathologists, sometimes known as “the doctor’s doctor,” are physicians who care for patients by using the tools of laboratory medicine to provide information essential to the prevention, diagnosis, and treatment of disease. A pathologist studies body fluid and tissues, helps a doctor make a diagnosis about medical problems, and uses laboratory tests to monitor the health of patients with chronic conditions. Specifically, a pathologist performs tests on blood that is drawn as part of an annual physical, examines tissue biopsies for cancer, performs an autopsy to determine cause of death and obtain any relevant genetic information about disease for the family of the deceased, and performs rapid tests during surgery to determine whether tumors have been completely removed or additional surgery is necessary.

Dr. Filberto Cavazos, a member of CAP who worked on the Pap smear reminder campaign, is the laboratory director at Memorial Hospital of Union County in Marysville, Ohio. He is also an associate professor at Ohio State University Hospital. He earned his medical degree at University of Nuevo León (Mexico) and completed his pathology residency at Roswell Park Memorial Institute in Buffalo, New York, and at the University of Missouri Medical School. Cavazos strongly supports CAP’s efforts to encourage and motivate women to seek these tests and ensure that they are available in local communities.

“We must continue to promote the benefits of these lifesaving screening tests in the fight against cancer,” said Cavazos. “We must also advocate for high-quality and cost-effective care for all patients.”

HACU and IBM Form Alliance to Narrow Educational Achievement Gap

WASHINGTON, D.C.

The Hispanic Association of Colleges and Universities (HACU) and IBM announced an alliance designed to recruit and better prepare Hispanic students for a variety of careers in the computer industry. The program provides long-term support of educational programs and ongoing commitment to funding, mentoring, technology, and recruiting initiatives—which will close the Hispanic educational achievement gap and help ensure the success of this growing population.

"HACU is committed to strengthening the institutional capacity of its member colleges and universities across the United States and abroad, particularly their information technology infrastructure," said Antonio Flores, HACU president and CEO. "Several national studies have reported a 'digital divide' between minority and non-minority populations when it comes to computer access and expertise in today's high technology economy. The agreement with IBM is a major step in our efforts to increase access to this essential technology and connectivity to the Internet for Hispanics."

The HACU/IBM initiatives will provide: e-mentoring portals for Hispanic students who seek career advice and counsel from IBM professionals; e-business curriculum development for select HACU campuses; an IBM executive to be part of HACU's strategy and philanthropic councils; executive partners to help with business and planning assistance; various student and faculty internship opportunities; and a technology alliance, in which Hispanic students, faculty, and their families can purchase a variety of IBM personal computers and options at significantly discounted prices.

"This effort plays to IBM's long-standing role in educational reform and in narrowing the 'digital divide'...across all communities," said Bob Gonzales, vice president, employee services, IBM Corporation, and IBM executive representative to HACU. "Our relationship with HACU complements the other successful Hispanic education and recruiting efforts underway at IBM...and calls attention to the increasing role business must play in making educational tools, career opportunities, and ongoing program support available to students everywhere."

This year, IBM expects to hire approximately 20,000 new employees and hopes to increase the number of Hispanic recruits across all disciplines. In the past three years alone, IBM has nearly doubled the number of Hispanic hires. The recruitment initiatives with HACU will tap students and professors from HACU member institutions—colleges and universities with predominant Hispanic enrollment—to help fill critical IBM positions with qualified college graduates and information technology professionals.

ACE Survey Finds That Americans Believe International Education and Issues Are Important U.S. Concerns

WASHINGTON, D.C.

A survey from the American Council on Education (ACE) shows that most Americans believe that international issues will significantly impact their lives and the lives of today's youngsters, and that colleges and universities must play a prominent role in preparing citizens to be engaged in international issues. ACE surveyed 1,000 adults ages 18 and over. Survey findings include:

• Sixty-three percent of adults "strongly" agreed that international issues would be important for future careers, while 25 percent "strongly" agreed that these issues would impact their own careers in the coming years.
  • Of those surveyed, a total of 67 percent "somewhat" or "strongly" agreed with the statement that international issues and events will have an impact on their daily lives.
  • An overwhelming majority of those surveyed indicated that educators must play a major role in providing international education opportunities and experiences. More than 75 percent of those surveyed agreed that foreign languages should be required in high school, while 71 percent agreed that colleges and universities should require foreign languages.

• In addition, 75 percent of those surveyed said they "strongly" or "somewhat" agreed that students should have a study-abroad experience while in college, and nearly 80 percent agreed that an institution's international offering is an important factor to consider when choosing a college or university to attend.
• Fifty-three percent of survey respondents believed it was "very important" to know about the cultures and customs of others in order to successfully compete in a global economy, while nearly 40 percent believed such knowledge was "somewhat important."
NACE Survey Says Employers Project 18.8 Percent Increase in College Hiring

**Bethlehem, Pa.**

Employers plan to hire 18.8 percent more new college graduates this year than they did last year, according to a recent survey conducted by the National Association of Colleges and Employers (NACE).

In March, NACE surveyed employers who had responded to an earlier survey about college hiring. Employers were asked how their hiring plans had changed since August 2000, when the earlier survey was conducted. The results of NACE's "Job Outlook 2001 Update" show that almost half (47.7 percent) plan to stick with their original hiring projections; 45.8 percent are lowering their projections; and 65 percent expect to hire more new college graduates than they originally planned.

Despite the fact that nearly half have decided to trim their college hiring, overall employers expect to hire 18.8 percent more new college hires in 2000-2001 than they hired in 1999-2000. That's down from the 23.4 percent increase employers projected earlier this year. Most of those planning to scale back cited the economy as the reason.

"Many employers plan to cut back, but they aren't curtailing college hiring," said Marilyn Mackes, NACE executive director. "We're still looking at a very positive market for new college graduates."

Employers also were asked to gauge competition for new college graduates; overall, employers rated competition at 39 (5-point scale where 1 is not competitive and 5 is very competitive). Service employers gave competition a 3.8 rating, while manufacturers rated competition at 4.0.

"For many employers, there has been a real 'war for talent' over the last few years," said Mackes. "Despite what we've heard about a slowdown, employers are still characterizing the college employment market as competitive."

In fact, 68.2 percent of those responding to the "Job Outlook 2001 Update" said they are using signing bonuses this year to attract the right candidates, while 64.7 percent said they offered signing bonuses last year.

MALDEF Supports Bill to End High-Stakes Testing as Sole Determinant of Student Performance

**Washington, D.C.**

The Mexican American Legal Defense and Educational Fund (MALDEF), in hopes of fairness and accuracy in high-stakes educational decisions for students, supports legislation in Congress requiring that other factors besides standardized tests be used in high-stakes decisions.

MALDEF said it believes that tests serve an important role in educational settings and are valuable instruments not to be ignored. Tests, however, are imperfect gauges that when used improperly can create barriers to educational opportunity and progress.

Some states and school districts have made standardized testing the sole determinant of student achievement and progress—including graduation—with very serious adverse consequences for individual students. Not only is this practice extremely harmful and unfair, highly respected professional testing organizations and testing experts agree that it is not appropriate to make standardized test results the sole determinant of a high-stakes decision, said MALDEF.

"The most important provision of this act is that it prohibits performance on a standardized test from being the sole determinant in a decision about retention, tracking, and graduation," stated Angelo I. Amador, MALDEF's Washington, D.C., legislative analyst. "Multiple measures of academic achievement, including grades and teacher evaluations, are to be used in such decisions."

MALDEF wants all students, including LEP (limited English proficient) students, to participate in assessments with tests that have been validated for that purpose and with accommodations designed for their special needs. MALDEF also wants to ensure equal opportunity to fair and accurate assessment by providing all students with schools that can provide the educational tools and resources necessary to compete and succeed on these tests. Students should only be tested on the materials and skills that they had an opportunity to learn.

"We cannot permit the continuation of a practice that allows one point on a standardized test score to end a student's educational and economic development," added Amador. "Denying a student a diploma based on a single standardized test unfairly and inappropriately blocks continued-education opportunities for individual students, and often permanently locks them into the lowest wage-earning sector in the economy. Most of these students are the most disadvantaged in our society, and many are Latino children."
Valdivieso Leads Educational Research Policy and Priorities Board

Rafael Valdivieso, executive director of the National Educational Research Policy and Priorities Board (NERPPB) in Washington, D.C., recently was one of Education Week's "People in the News."

Valdivieso is responsible for leading the board as it seeks to establish new standards of conduct and evaluation in education research. Created by Congress in 1995, NERPPB is meant to act as the voice of education researchers, teachers, and other groups who produce or use educational research.

Before joining NERPPB, Valdivieso was vice president and director of the schools and community-services program at the Academy for Educational Development.

News from University of Southern Colorado

* The University of Southern Colorado hosted the eighth annual Colorado Women of Color in Higher Education Conference—exploring strategies to empower female minorities in higher education at all levels. The conference provided a forum of collaboration, networking, mentoring, and support; promoted professional growth; and developed strategies on how to end institutional and interpersonal racism. Mildred García, vice provost and professor in the social and behavioral sciences department at Arizona State University-West, was the keynote speaker.

* Chicano poet and author Ramón Del Castillo recited several of his works at the University, including "La Curandera," "If Only She Could Talk," and "La LLorona of Anglo-Saxon America." Del Castillo, who has been involved with students of all ages as a civic leader, says his poetry "displays a common characteristic of a deep concern for the preservation of cultural values."

King Juan Carlos and Queen Sofia Join SMU Celebration

King Juan Carlos I and Queen Sofia of Spain attended the International Festival of Opening Events for the new Meadows Museum at Southern Methodist University in Texas. The museum houses one of the largest and most comprehensive collections of Spanish art outside of Spain.

King Juan Carlos was honorary president of the International Inaugural Committee of Honor for the museum's opening.

The king and queen attended a dinner recognizing the late Algur and Virginia Meadows and The Meadows Foundation and family for their gift of the museum and its internationally acclaimed collection spanning 1,000 years of Spanish art. King Juan Carlos also received an honorary Doctor of Arts, recognizing him "as the gifted designer of one of the most remarkable political transitions in the history of Europe, and as the architect of a vibrant democracy and civil society."

Guillermprieto Wins Long Island University Journalism Award

Long Island University bestowed the George Polk Award for Foreign Reporting to Alma Guillermprieto.

Guillermprieto was honored for her three-part analysis of the war in Colombia and its relationship to the drug trade, published by The New York Review of Books. "After stalking the Colombian jungle to hear from campesinos (rural people) as well as government officials and guerrilla leaders, she traced the strands of a grim struggle destined to defy easy solutions," according to the University.

The New York Times received a George Polk Special Award for its revelatory series "Race in America," which examined the gap between what Americans say out loud about race and what they feel in their hearts.

AAHE Hispanic Caucus Honors Educators

The following educators were 2000-2001 American Association for Higher Education Hispanic Caucus Award Winners: Dr. Virginia Sánchez Korrol, Outstanding Latina Faculty in Higher Education; Luis Valdez, Outstanding Latino in Cultural Arts; Jesús Rangel, Outstanding Support of Hispanic Issues in Higher Education; Dr. Teófilo Jaime Chahín, Outstanding Latino in Higher Education Creativity and Publications; and Dr. Douglas Patiño, Alfredo de los Santos Distinguished Leadership in Higher Education.

Kean Lecture and Symposium Celebrates Diversity

Kean University (N.J.) celebrated cultural diversity with a free daylong program, including a lecture by Dr. Beverly Daniel Tatum (picture), author of the book Why Are All the Black Kids Sitting Together in the Cafeteria? The lecture was followed by the fifth annual presidential symposium, "Privileged Knowledge: Do Americans Think Differently?" Dr. Kaiping Peng, cultural psychologist from the University of California-Berkley, was a keynote.

Tatum, a developmental psychologist and dean at Mount Holyoke College, explored, in part, racial identity development issues as they occur in schools throughout the country and attributed them to the socialization process. She also discussed an effective approach to creating a climate of achievement for all students.

The symposium focused on the relationship between human beings' behavior and
thought processes, and their cultural backgrounds and upbringings.

University of Texas System Helps Minority Subcontractors

University of Texas (UT) Chancellor R.D. Burck announced a program to assist small subcontractors in qualifying to work on construction projects in the UT System. The program will include outreach to companies owned by minorities or women and certified by the state as Historically Underutilized Businesses.

The Bonding and Technical Assistance Program will begin as a pilot project with the construction of the $183-million Ambulatory Clinical Building at the U.T.M.D. Anderson Cancer Center in Houston.

"The leadership of the Hispanic Contractors Association of America, the Texas Asian Chamber of Commerce, the Texas Association of African American Chambers of Commerce, and the Texas Association of Mexican American Chambers of Commerce have worked closely with the UT System's office of community relations to make this pilot project a reality," said Burck.

Santa Ana to Train the Technologically Disadvantaged

Santa Ana College, Digital Bridge Alliance, and Technically Speaking, Inc., are collaborating on a new project that will empower individuals with an economic disadvantage by directing them toward the computer and information age.

A Neighborhood Technology Center (NTC) held its grand opening at the Mexican American Opportunity Foundation in Santa Ana, Calif., providing free computer access and professional training. Geared toward adults in low-income families, individuals now have the opportunity to train in eight-week modules offered in the day and evening with coursework in basic Internet exploring, Microsoft Office applications, and specific technology-related job skills.

"Santa Ana College will provide the training and track the progress of the maiden classes to garner information on how low-income groups use technology as an enabler to learning, employment procurement, and personal development," said NTC project coordinator Dr. Lynne Stedman.

Chicano Artist Constructs Mural at Fullerton

Nationally recognized Chicano artist Frank Romero, participating in the Fullerton College artist in residence program, painted a mural for the city of Fullerton, Calif.

The mural focuses on historical aspects of Fullerton, with Fullerton College as the focal point. Romero based the mural’s background on photos he took at locations around the city.

Romero first gained experience while working at the Charles Eames Studio in Venice, Calif. He has since participated in individual and group shows throughout the United States and Europe and was a key contributor to the 1984 Olympic Arts Festival with “Going to the Olympics,” a large-scale mural that now adorns Highway 101 in California.

Hostos Community College Hosts Hall of Fame Concert

Eugenio María de Hostos Community College, City University of New York, hosted the International Latin Music Hall of Fame’s Third Annual Induction Award Ceremony and Concert.

The event, held at the Hostos Center for the Arts and Culture, featured Graciela, Johnny Albino y Su Trio San Juan, Raúl Azpiazu, Chocolate Armentero, Adela Dalto, Luisito Figueroa, Kathy Cristina Almonte and the ILMHF Ensemble, with Alfredo Valdés, Jimmy Delgado, Nelson González, Johnny Rodríguez, Andy González, George Delgado, and special guest Richie Puente. Miguel Pérez was master of ceremonies.

Loyola College Symposium Addresses “Living in Another Language”

The 2001 Symposium on Language, Literature, and Society at Loyola College in Maryland featured four speakers addressing the challenges of “Living in Another Language.”

Beltrán Navarro, a Latino leader and advocate in the Maryland-Washington, D.C., area, gave a talk, “Should English be Maryland’s Official Language? A Latino Advocate’s Point of View.” Navarro is an appointed member of several state, city, and private entity commissions and has received numerous awards for his work in the community.

Independent writer and lecturer James Crawford discussed the politics of language in his address, “The Assault on Bilingual Education: A New Phase of English-Only Politics.” He is the author of several books, including Bilingual Education: History, Politics, Theory and Practice.

Joseph Tusiani, poet and retired professor, and Dr. Hanna Geidrich-Leffman, Symposium founder and professor emerita of modern languages and literatures at Loyola, were also featured speakers.

Cuyahoga Connects to Hispanic Students

The theme of this year’s Hispanic Education Conference at Cuyahoga Community College (CCC) in Ohio was “Connecting Hispanic Students to CCC.”

The conference, sponsored by the CCC Hispanic Steering Council, targeted a large workshop to persons in the Hispanic education field—high school and middle school principals and guidance counselors, community agencies, and CCC recruitment and retention staff. It focused on retaining Hispanic students in the education track and on student challenges in their transition to higher education.

Dr. Frank W. Reis, CCC executive vice president for human resources and administration, was the keynote. As co-chair, with Al López, of the Hispanic Steering Council since its inception in 1991, Reis has gained insight into the educational needs of the Hispanic community of Greater Cleveland.

López said that the conference provided a forum for meaningful dialogue between high school and college representatives who have the most experience with Hispanic students.

Northeastern Illinois Hosts Mexican American Poet

Northeastern Illinois University’s Apocalypse Literary Coalition, a student-based organization, sponsored a poetry reading by award-winning poet Gary Soto.

Soto, a California native, writes about the lives of Mexican Americans, nature, and his personal dreams. He writes with pathos about his life as an urban Mexican American boy growing up in California in the 1960s.
Soto's poems have appeared in many literary magazines, including The Nation, Ploughshares, The Iowa Review, Ontario Review, and, most frequently, Poetry, which honored him with the Bess Hokin Prize and Levinson Award. He was one of the youngest poets to appear in The Norton Anthology of Modern Poetry.

In 1999, he received the Literature Award from the Hispanic Heritage Foundation and the author-illustrator Civil Rights Award from the National Education Association.

The author of 10 poetry collections for adults, Soto is also known for his essays, children's books, and young adult novels.

Montoya Named Student Regent at New Mexico Tech

Anthony Lewis Montoya, Jr, a senior electrical engineering major at the New Mexico Institute of Mining and Technology, was appointed to the New Mexico Tech board of regents, the university's five-member governing board.

"I harbor a deep interest in student representation, which is instilled with pride in my attending New Mexico Tech," said Montoya. "As a student regent, I wish to maintain the integrity of the school, as well as ensure that the reputation it carries will last for many more generations."

Montoya has several academic honors to his credit. Last year, he was selected as one of the top 100 Hispanic college students in the United States by Super Onda magazine, and was named to the All-New Mexico Academic Team by Phi Theta Kappa, the international honor society of two-year colleges. Montoya recently was inducted into Tau Beta Pi, the national engineering honor society.

Nobel Peace Prize Winner Speaks at LIU-Brooklyn

The Latin American and Caribbean studies program at Long Island University-Brooklyn presented a discussion on the struggle for indigenous rights, with Rigoberta Menchú, Nobel Peace Prize laureate.

Menchú rose to worldwide prominence as an advocate for democracy and human rights during Guatemala's bloody civil war. Born in 1959 in the predominantly Mayan province of El Quiché in Guatemala, Menchú lived through the exploitation and oppression of the Mayan population. After the torture and assassination of her parents and other family members by the armed forces, she was forced to leave the country in 1980. In exile, she became one of the most significant voices of indigenous people in the international community.

Menchú became well known in the Western world after the publication of her book I, Rigoberta Menchú, an Indian Woman in Guatemala in 1983. She became both the first indigenous person and the youngest person ever to receive the Nobel Peace Prize, in 1992. Today, she acts as UNESCO's goodwill ambassador for peace, and in that capacity, she promotes education for cultural tolerance.

Rutgers Libraries Documenting Latin American History

Rutgers University Libraries opened a new exhibit, "The United States and Latin America: Troubled Past, Complex Future." Presented by Special Collections and University Archives, and the Friends of Rutgers University Libraries, the exhibit showcases rich collections documenting Latin American history, politics, and culture, particularly focusing on the Cold War period, when Latin America became a battleground in the contest between the United States and the Soviet Union for global hegemony.

The exhibit will run through July 1. It includes photographs, artifacts, letters, rare books, historical pamphlets, and other materials that document the role of the anticomunist "democratic left" in Latin American policy during this period. Featured correspondence from Latin American leaders including Venezuelan President Rómulo Betancourt, Colombian President Eduardo Santos, Puerto Rican Gov. Luis Muñoz Marín, as well as artists such as Chilean poet Gabriela Mistral, the first Latin American to win the Nobel Prize.

Fresno State Fulbright Scholars Lecture Abroad

California State University-Fresno faculty Thomas Witt Ellis and Dr. Miguel Pérez (pictured) are 2000-2001 recipients of Fulbright Scholar Grants, which allow faculty and professionals to lecture and conduct research abroad.

Ellis, associate professor in the department of theatre arts with a major discipline in theatre and dance, lectured at the National Taiwan University in Taipei on advanced acting and film acting. He has a bachelor's degree from California State University-Sacramento and a master's from Michigan State University.

Pérez, assistant professor in the department of health science with a major discipline in education, lectured and conducted research at El Bosque University in Bogotá and the University of the North in Barranquilla on substance use and abuse among adolescents in Colombia. He has a master's degree and doctorate from Penn State University.

News from the University of Delaware

• Sandra Guzmán, Emmy award-winning journalist and former editor-in-chief of Latina magazine, spoke on "Latino Leadership in the New Millennium" at the University of Delaware.

• Literatura y Cine presented the film Don Segundo Sombra. The film celebrates the lifestyle of the gauchos, the Argentinean cowboys who occupied the pampas up until the beginning of the 20th century.

• The University organized a bus trip to New York City, with a special stop at El Museo del Barrio in Spanish Harlem. El Museo, which houses more than 8,000 pieces of pre-Columbian and contemporary artifacts from Puerto Rico and Central and South America.

• In April, Larry Harlow and the Latin Legends performed their salsa blend of Puerto Rican and Afro-Cuban rhythms, spiced with New York bebop, at the University. The Latin Legends, who carry on the rich traditions of salsa recordings made famous on the old New York City Fania label, include Harlow, Yomo Toro, and Adalberto Santiago.

California-San Diego Holds Chávez Celebration

The University of California-San Diego (UCSD) celebrated the life and contributions of César Chávez with a month-
long roster of diverse activities—this, following the state of California’s first-ever observance of the new César Chávez state holiday, March 31.

The co-founder of the United Farm Workers labor union and principal figure in the Chicano civil rights movement was the subject of a film festival, essay contest, two symposia, an exhibit on his life as part of an annual campus cultural celebration, and a display of books at the UCSD bookstore.

Thurgood Marshall College Provost Cecil Ilyde and David Valladolid, president of the San Diego Chicano Federation, coordinated the activities.

**Cal State-Long Beach Remembers Chávez**

In recognition of the inaugural celebration of the new holiday honoring the Chicano/Latino activist, California State University (CSU)-Long Beach hosted César Chávez Remembrance Week with the theme “Education of the Heart.”

“The primary goal of the week is to make the campus community aware of the plight of the farmworkers and the contributions by César Chávez to Mexican Americans,” said Grace Delgado (pictured), professor of Chicano and Latino studies at CSU-Long Beach and faculty advisor to the Chicano and Latino Student Association. “It’s also a good way to bring the community into the University.”

Along with Delgado, CSU-Long Beach Chicano and Latino studies professors and lecturers José López, Victor Rodríguez, Anna Sandoval, Luis Arroyo, and Eduard Díaz-Schwarzbach were among the many participants.

**Barceló Selected as University of Washington President of Minority Affairs**

University of Washington (UW) President Richard A. McCormick selected Nancy “Rusty” Barceló to be the next vice president for minority affairs, effective July 1. She also will have an affiliate faculty appointment in the department of American ethnic studies. The appointment awaits approval by the UW board of regents.

Barceló has served since 1996 as associate vice president for multicultural and academic affairs at the University of Minnesota and has chaired Chicano studies since 1999. Working with colleges and support units, Barceló developed and coordinated student service programs, which increased retention rates among minority students. She also coordinated efforts to increase the number of graduate students of color at Minnesota.

Barceló has both a master’s degree and a doctorate from the University of Iowa.

**Abalos Receives MECHA Award**

Dr. David T. Abalos received the Mercer County (N.J.) Hispanic Association’s MECHA Individual Award at its 11th Annual Gala Dinner Dance. The award was given in recognition of Abalos’ commitment to the empowerment and advancement of the Latino community, for his advocacy work on behalf of Latino/Latina students, for his contributions to a better understanding of diversity among and between communities, and for his continued support of Latino youth and their parents.

Abalos was a visiting professor at Princeton University during the spring semester, teaching Latina/Latino politics in the United States. He is a professor at Seton Hall University (N.J.).

**Latina Author Shares Her Heritage at West Chester**

Well-known Latina writer Judith Ortiz Cofer read from her poetry, fiction, and essays at West Chester University of Pennsylvania.

A native of Puerto Rico, Cofer addressed issues of biculturalism and the creative process in the arts. She has written numerous highly acclaimed books, including *An Island Like You: Stories of the Barrio*, named a Best Book of the Year 1995-1996 by the American Library Association. She teaches creative writing and English at the University of Georgia.

Cofer was one of four panelists in the women’s summit program “Lifting as We Climb: Women Leading in the 21st Century.” The meeting explored opportunities and challenges for women in the 21st century; their role as change agents in the workplace and in the community; strategies for success; effective leadership styles; and balancing career, family, and community service roles.

**Nebraska-Lincoln Hosts “Latin American Realities” Exhibit**

The Sheldon Memorial Art Gallery and Sculpture Garden at the University of Nebraska-Lincoln presented “Latin American Realities/International Solutions,” a “virtual reconstruction” of the international conceptual art exhibition “Hacia un perfil del arte Latinoamericano (Toward a Profile of Latin American Art).” The exhibition was organized in the early 1970s by Jorge Glusberg, director of the Center of Art and Communication in Buenos Aires, Argentina.

“Toward a Profile of Latin American Art” consisted of 148 works by 67 artists from North, Central, and South America who sought to engage the aesthetic, economic, cultural, and social problems in Latin American countries. In response to these ideological convictions, Glusberg and his artists translated their utopian visions into a rigidly uniform 235- by 355-inch blueprint that was intended to assert a “conceptual” and “architectural” aesthetic. The works were an overt critique of the West’s glorification of the artist as the romantic genius who provided “food” for the soul of the connoisseur but not “food” for the belly of the underprivileged.

**Rutgers-Newark Art Gallery Appoints Director**

Artist and curator Corlliss F. Cavaliere was named director of the Robeson Center Art Gallery on the Newark campus of Rutgers, The State University of New Jersey. He had been acting director since March 2000.

Prior to coming to Rutgers-Newark, Cavaliere was curator/museum supervisor at the Civic Center Museum in Philadelphia, Pa., and curator for the Port of History Museum. He is an independent curator and artist for the 55 Mercer Street Gallery in New York, and has had many one-person exhibitions along the east coast of his paintings and drawings.

Cavaliere has a bachelor's degree from Maryand Institute College of Art and a master's from the Tyler School of Art. He also completed a residency in painting at the Vermont Studio Center.
UNM President Receives Kappa Sigma Award

University of New Mexico President William C. Gordon received Kappa Sigma's John Goodwin Tower Distinguished Alumnus Award.

Kappa Sigma is a men's college fraternity, with 10,000 undergraduate members in 210 chapters throughout North America. The John G. Tower Distinguished Alumnus Award honors "Kappa Sigma Brothers who have shown a commitment to their business, family, church, philanthropy, and community activities." The award is named for John G. Tower, former U.S. senator from Texas who served on the organization's Supreme Executive Committee for six years and as its Worthy Grand Master from 1971-73.

Gordon was initiated into the Delta-Omega chapter of Kappa Sigma at Wake Forest University in 1965. He earned both a bachelor's degree and a master's from Wake Forest and a doctorate from Rutgers University.

NYU Conference Examines Role of Universities in Latin American Society

"Higher Education and Civil Society in Latin America," a two-day conference at New York University's King Juan Carlos I of Spain Center, examined the changing role of universities in Latin American society.

Universities in Latin America have long played an important role in national development, educating elites to take on leadership positions in government, business, science, and other key areas. Political and economic developments over the past decades, however, have created shifts in the role. Public expectations of universities now include meeting the needs of the labor market, preparing future leaders for resolving national crises, and creating a more just society. How do Latin America's universities balance these conflicting claims?

Raúl Atria, Corporación de Promoción Universitaria, Chile; Armando Alcántara, Centro de Estudios Universitarios, UNAM, Mexico; and Pablo Gentili, Universidad del Estado del Río de Janeiro, Brazil, addressed the question, "Does the Latin American University have a Role in the Promotion of Social Justice?"

Olmos Speaks at Macalester

Edward James Olmos, award-winning actor, director, producer, and community activist, took part in the series "Democracy, Activism, and the Multicultural World" at Macalester College in Minnesota.

Aside from his successful entertainment career, Olmos is a community leader and humanitarian serving as the U.S. Goodwill Ambassador for UNICEF and a national spokesman for organizations such as the Juvenile Diabetes Foundation. He is the executive director of the Lives in Hazard Educational Project, a national gang prevention program funded by the U.S. Department of Justice. In 1999, he developed a multimedia project, Americanos: Latino Life in the United States, designed to inspire Latino pride and establish connections among Latinos and others through photography, film, music, and books.

Zozaya-Geist and Mikkelsen Named to Eastern Washington Board

Jesús Zozaya-Geist (pictured) and Kris Mikkelsen became new members of the Eastern Washington University (EWU) board of trustees.

Zozaya-Geist, with a strong business background, is a senior consultant at Lockheed Martin. She is its March of Dimes WalkAmerica and Wonderwalk coordinator and works with Junior Achievement, where she utilizes her bilingual abilities in English and Spanish. She has a bachelor's degree from EWU.

Mikkelsen is general manager of Inland Power and Light. A certified public accountant, she has a bachelor's from EWU.

UT-Austin's Brazil Center Hosts Brazil Week

The Brazil Center of the University of Texas-Austin's Teresa Lozano Long Institute of Latin American Studies hosted Brazil Week 2001.

Events included a demonstration and class of capoeira, an Afro-Brazilian martial art, and screenings of the classic movie Orfeu Negro (Black Orpheus, 1959, Oscar for Best Foreign Language Film) and the new release Orfeu (2000), about romance during Carnaval in Rio de Janeiro. The movies were followed by a discussion on the global influences on Rio's famous Carnaval music and a comparison of modern-day Rio to the Rio of 40 years ago. Another discussion addressed the influence of soap operas on family life, and why they might be part of the reason Brazilians are having fewer children.

National Secretary of the Amazon Mary-Helen Allegretti gave a presentation on sustainable development options in the Amazon; there was also a literature symposium and a workshop on African identities in colonial Brazil.

Cisneros Addresses Austin Business Community at St. Edward's

Henry Cisneros, chair and CEO of American CityVista, presented his ideas for developing competitively priced "villages within cities" to the Austin, Texas, business community at St. Edward's University.

Cisneros joined forces with national home-builder Kaufman and Broad for the purpose of building homes in the central zones of America's major metropolitan areas. Using a "smart-growth strategy," Cisneros said the joint venture will provide new residential options for individuals of all backgrounds and incomes. The American CityVista developments will be wired for technology, yet designed to honor local tastes and traditions. The company has targeted cities in Texas, Arizona, Nevada, California, and Denver for development. Texas cities being considered for new neighborhoods include Austin, Brownsville, Dallas, Edinburg, Harlingen, Houston, Laredo, McAllen, and San Antonio.

Cisneros is former secretary of the U.S. Department of Urban Development and former president of Univision Communications. In 1981, he became the first Hispanic mayor of a major U.S. city when he was elected to lead San Antonio. He served from 1981 to 1989.

Inhalant Prevention Coalition Preaches Awareness

More than one million youngsters aged 12-17 used inhalants in the past year. They and their parents need to be aware that sniffing could result in death.
Kicking off the eighth annual National Inhalants and Poisons Awareness Week, the National Inhalant Prevention Coalition, with input from the Substance Abuse and Mental Health Services Administration’s Center for Substance Abuse Treatment (CSAT) and the White House Office of National Drug Control Policy (ONDCP), held a press briefing on the dangers of inhalant use.

Featured at the briefing were Dr. H. Westley Clark, director of CSAT; Edward Jurith, acting director, ONDCP; Ann Brown, chair of the U.S. Consumer Product Safety Commission; Dr. Ruth Sánchez-Way (pictured), director of the Center for Substance Abuse Prevention; Harvey Weiss, executive director of the National Inhalant Prevention Coalition; Carl T. Johnson, president of the Compressed Gas Association; and Diane Stem, parent of a youth who died from inhalant use.

ENMU-Roswell Employee in Leadership Program

Nadine A. Montoya, administrative systems manager at Eastern New Mexico University (ENMU)-Roswell, is participating in the National Institute for Leadership Development LEADERS 2001 program, an international program for administrators and faculty in higher education. LEADERS 2001 participants are chosen for their professional abilities, their interests in advancement in higher education, and the quality of their proposed projects.

The yearlong program is designed to enhance the skills that participants need to assume major decision-making roles in their institutions. It includes institutional practice in supervisory and human relations skills, planning and budgeting, and organizational transformation, as well as discussions with national experts on the issues confronting higher education during the next decade.

Montoya earned an associate’s degree at the University of New Mexico and is working on her bachelor’s there.

Mt. San Antonio Student Organizes Dr. Seuss Event

Amy López, a 24-year-old education major at Mt. San Antonio College (SAC) in California, recruited fellow students, parents, and community business members to participate in a local reading event, held in conjunction with the National Education Association’s fourth annual Read Across America celebration, in honor of Dr. Seuss’ (Theodore Geisel’s) birthday.

Coordinating the event came naturally to López, who tied together her longtime admiration of Dr. Seuss’ books, her work as a reading tutor, and her college major. As an AmeriCorps reading tutor, part of Mt. SAC’s new Teacher Preparation Institute, López is one of approximately 30 Mt. SAC students who help students in first through fourth grade classrooms at elementary schools.

The program is funded through a $73,000 AmeriCorps grant and a $350,000 “Teacher and Reading Development Partnerships” Community College Chancellor’s Office grant.

Camino Real Meeting Held in Albuquerque

The organizing committee for the Seventh Annual Colloquium on the Camino Real de Tierra Adentro held a meeting at the National Hispanic Cultural Center in Albuquerque, N.M. Committee members and representatives from the University of New Mexico, National Park Service, Bureau of Land Management, Mexican Consul, and Instituto Nacional de Antropología e Historia reviewed the status of the colloquium, to be held in Aguaclavientes, Mexico, Oct. 17-19.

The Camino Real de Tierra Adentro has left its mark along 1,200 miles of trail, etched during its prehistoric and historic periods of use. Prehistorically, Indians used variants of the trail to travel along a route that stretched from the ancient Aztec capital at Tenochtitlan (today's Mexico City) to Paquimé in northwestern Chihuahua, where Pueblo Indians from New Mexico went to trade. By 1609, the road ran from Mexico City to Santa Fe, carrying trade items and new settlers into New Mexico.

Today, roughly 400 miles of the trail lie within the United States, and about 800 miles lead southward from the border to Mexico City.

The bi-national colloquia are a way to commemorate the common history shared by the United States and Mexico.

Beyond Affirmative Action:
Reframing the Context of Higher Education

By Robert A. Ibarra

The world has changed, and universities have been forced to keep pace by experimenting with affirmative action, curriculum overhauls, part-time degree programs, and the like. But at the core of the modern establishment is an ingrained academic culture that has operated in the same way for centuries, contends Robert Ibarra, and in this book, he calls for a complete paradigm shift.

¡Viva México! ¡Viva la independencia! Celebrations of September 16

William H. Beazley and David E. Lorey, eds.

Celebrations of Mexico's Independence continue each year on Sept. 16, almost 200 years after the struggle. This book examines the holiday, exploring how this most important public festival in the civic calendar has given Mexicans a rich tradition of national celebration that is part myth, part official pomp, and part popular merrymaking.

A New Century in Retrospect and Prospect
By James J. Van Patten

What changes and challenges does the New Millennium hold for society? In an interdisciplinary study of educational systems, technology, government, and the workplace, this book evaluates how future changes will affect nearly every aspect of our society and discusses the changes society will have to make to meet these challenges.

Sex, Drugs, and HIV/AIDS in Brazil
By James A. Inciardi, Hilary L. Surratt, and Paulo R. Telles

The authors examine the emergence of AIDS in Brazil, its linkages to drug use and the sexual culture, and its epidemiology in such populations as cocaine users, "street children," and male transvestite prostitutes.

Cervantes and His Postmodern Constituencies
Anne J. Cruz and Carroll B. Johnson, eds.

As critical theories expand and turn against themselves, both Cervantes and his writings have been made the target of differing and dissonant opinions. This volume not only affords a timely view of these scholarly debates, it attempts to move Cervantes studies beyond such recent collective pulse-takings and prognoses as Quixotic Desire (1995), Cervantes (1995) and Leer et Quijote (1996).

Culture and the State in Spain: 1550-1850
Tom Lewis and Francisco J. Sánchez, eds.

This volume represents an attempt to understand relationships between subjectivity and the state in Spain from the earliest articulations of the "subject" during the Renaissance to the consolidation of an array of bourgeois subjectivities in the mid-19th century.

Racial Trends and Comparisons in New Mexico During the Late 20th Century: What the Census Tells Us
By the Bureau of Business and Economic Research, University of New Mexico

This report illustrates New Mexico's distinctive and evolving racial landscape. Utilizing data obtained from recent estimates, the 1990 census, and previous censuses, it traces statewide racial trends and often compares New Mexico to other states and the nation as a whole.

Latin American Literature and Mass Media
Edmundo Paz-Soldán and Debra A. Castillo, eds.

This volume examines the concerns of media-conscious writers from the turn of the 20th century to the turn of the 21st century. It focuses on narrative fictions—especially as they have been inflected by modern forms of mass media (television, cinema, comics, computerized hypertext, and electronic media) by recent Latin American writers and inquires about the status of the literary enterprise as it begins to be cognizant of an immense conceptual shift equivalent in impact to the Gutenberg Revolution 500 hundred years ago.

Flash and Crash Days: Brazilian Theater in the Post-Dictatorship Period
By David George

This book examines how the absence of censorship and the exigencies of protest and ideological purity have given rise to a variety of theatrical modes. These new modes, which
Brazil has never experienced in the past, allow all voices the opportunity to be heard in the marketplace of artistic ideas: women's perspectives, sexual identity, psychological issues, the individual in society and religion.

Literatura española: una antología

Tomo 1: De los orígenes hasta 1700
Tomo 2: De 1700 hasta la actualidad
(Spanish)
By David William Foster

National Conference on Critical Thinking and Educational Reform

Atlanta area June 23-26

The Center for Critical Thinking presents (Atlanta) “Critical Thinking in Subject Fields” and (San Francisco) “Dimensions of Critical Thinking.”

Contact: (800) 833-3645; website, www.criticalthinking.org.

AAHE Assessment Conference

June 23-27

“From Expectations to Results: What Are We Finding, and How Are We Improving” is this year’s theme. Opening plenary speaker is Richard Light, professor of education and public policy at Harvard University, and author of Making the Most of College: How Assessment Can Help Both Students and Us. In Denver, Colo.

HERS, Mid-America Summer Institute

June 24-July 20

The University of Denver’s HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.

Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

The Barahona Center Summer Workshops 2001

June 25-27
July 9-11
July 23-25

The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/La literatura en Español dirigida a los lectores infantiles y juveniles. At CSU-San Marcos.

Contact: Isabel Schon, Director, (760) 750-4070; e-mail, ischon@csusmt.edu.

Deaf Education Technology Conference

June 25-29

“Instructional Technology and Education of the Deaf: Supporting Learners, K-College,” the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

Gender on the Borderlands Conference

July 12-14

Sponsored by St. Mary’s University, the conference will explore gender in the geographic region that becomes the Spanish/Mexican/U.S. Borderlands, now the Mexico-U.S. border. In San Antonio, Texas.

Contact: Antonia Castañeda, History Dept., (210) 336-3608; e-mail acastane@alvin.stmarytx.edu; website, http://ats.stmarytx.edu/~bdlands/.

Many publications featured in this section are available through amazon.com.
AFT QuEST 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for PreK-12 teachers, school staff, and state and local education leaders, including the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

UNM’s Taos Summer Writers’ Conference

Book Review

By María Elvina Luna Escudero-Alie

**Ojos Bonitos, Cuadros Feos**, the last play written by Vargas Llosa, is an incredibly engaging book that contains, despite its short length, all the elements in Vargas Llosa's works. The story is presented through an interesting and intriguing conversation between a good-looking young navy official, Rubén Zevallos, and a mature, famous, and prestigious art critic, Eduardo Zanelli, who writes an art column in the influential newspaper El Comercio. The conversation takes place in Zanelli's beautiful apartment, located in an upper-middle-class neighborhood of Lima. Eduardo Zanelli meets Rubén Zevallos at the art gallery El Vernissage during an exhibition and invites him to his apartment that very night.

While Zanelli is expecting to fulfill his sexual fantasies with Zevallos, reality derides him. Zevallos has used his good looks, and his knowledge of Zanelli's sexual preferences, to flirt insistently with him so he could meet him. Once they are in Zanelli's apartment listening to classical music and drinking whisky, the art critic starts his seduction, comparing his young companion to Alcibiades and Greek gods. Zevallos asks questions and makes fun of Zanelli, calling him shy, cowardly, gay, one who has not come out of the closet yet, etc.

While they are drinking Scottish whisky and listening to Mahler's "Das Lied von der Erde," Zanelli has the first surprise of the night when his guest reveals his navy affiliation. Zanelli is intrigued but still hopes for a sexual encounter. The second surprise of the night for Zanelli is that Zevallos has never had a homosexual relationship with anyone and, in fact, is not even gay. With this second revelation, Zanelli's surprise turns to disappointment and anger. He asks Zevallos to leave his apartment, but the young lieutenant has more to say. He talks about Alicia, his former fiancée, a student and admirer of Zanelli. The art critic does not remember her at all; moreover, he has expressed earlier his disdain for his students and the public that attends art exhibitions. Zevallos tells Zanelli how discouraged, hurt, and depressed Alicia was after Zanelli's ironical review of her first and last painting exhibition, about which Zanelli remembers only his title: **Ojos Bonitos, Cuadros Feos**. Zevallos castsigates him for humiliating Alicia with that unnecessary mockery of her painting and his allusion to a frivolous personality she did not have. Zanelli's opinions were very crucial to her; thus she became extremely desperate. The last surprise of the night for Zanelli is to learn that the young official wants to kill him to avenge Alicia's suicide. The art critic pleads for his life, offering some alternatives to Zevallos' plan of revenge. Zevallos is not appeased and shoots the critic with an unloaded gun.

The characteristic narrative structure of Vargas Llosa's works includes games of elusion of time and space, hidden facts, Chinese boxes, puzzles, intrigues in the argument, ambiguity, elliptical and surprising endings, clever dialogues about different and engaging topics, masterful application of irony, frustrated yet congenial characters, the illusion of a complete world, and an amusing, precise, and very polished use of language. All these distinctive features are also present in **Ojos Bonitos, Cuadros Feos**.

In this play, Vargas Llosa's characters discuss and question the condition of the artist, the concept of beauty, the meaning and relevance of the art critic, the nature of art itself, and the importance of talent. Through the revealing conversation of Zevallos and Zanelli, and the words of Alicia living in Zevallos' memory, we are exposed to a nihilistic world in which alienation, anguish, and solitude reside. Neither Zanelli nor Zevallos is free, happy, or satisfied with his life. Zanelli considers himself a frustrated painter, a sharp critic who does not enjoy his job. Zevallos had planned to marry Alicia, have children, and live a conventional life. His life is empty after Alicia's suicide. She had dreamed to become a painter and was not motivated to be a housewife. With the negative critique of her painting by her idol, Eduardo Zanelli, she felt that her dream was demolished, and she leapt into an abyss facing the cold sea.

**Ojos Bonitos, Cuadros Feos** tells us about the importance of following a passion and persisting toward it, the meaning of freedom, the hidden face of truth, and the impossibility of love in an alienated world. Vargas Llosa uses irony in depicting hypocritical postures towards art and the lack of personality of some who agree with everything that is in fashion, according to others' opinions of what is beautiful and elegant. Vargas Llosa's play questions the real motivation of some acrid and insensitive critics who, like Zanelli, are only frustrated artists. This delightful play is both entertaining and profound, and reconfirms the vast creative talent of Mario Vargas Llosa.

Escudero-Alie, whose current degrees are from La Pontificia Universidad Católica del Perú, is now a Ph.D. candidate at Georgetown University, specializing in contemporary Hispanic American literature. She teaches in the Language and Cultural Studies Program at Trinity College.

BRYN MAWR COLLEGE
DEAN OF ADMISSIONS AND FINANCIAL AID

Bryn Mawr College invites nominations and applications for the newly enhanced position of Dean of Admissions and Financial Aid. Founded in 1885, Bryn Mawr College has, since its inception, been dedicated to the education of women. It attracts talented and ambitious students from all over the world to its beautiful 135-acre campus in the suburbs of Philadelphia.

Bryn Mawr is renowned for the rigor of its academic programs, which serve approximately 1,200 students in the undergraduate college and 500 students in interdisciplinary graduate programs. The College offers a four-year liberal arts curriculum leading to the B.A. degree; it also offers the M.A. and Ph.D. degrees in some departments. Its cooperative programs at Haverford College, Swarthmore College, and the University of Pennsylvania further enrich the educational opportunities available to its students.

Reporting directly to the President, the Dean of Admissions and Financial Aid is a senior officer of the College, who will work closely with the President, the faculty, and other senior officers. The Dean will develop and implement a strategy to attract and support a diverse student body of outstanding intellectual ability. With responsibility for admissions, financial aid, and retention, the Dean will supervise approximately 200 employees and will oversee an operating budget of $22 million. The College awarded more than $14 million in grants in 1999-2000.

The ideal candidate will have a deep appreciation for and the ability to articulate the benefits of a small residential College dedicated to the education of women. The successful candidate will possess proven leadership skills as well as outstanding oral and written communication skills. In addition, the successful candidate will have extensive relevant experience, the ability to work well with many constituencies, an understanding of the uses of technology in the admissions and financial aid areas, the ability to manage effectively an office in which staff play an essential role, and, importantly, energy, intelligence, and a sense of humor.

The search committee will begin reviewing applications in August 2001 and will continue until the position is filled. For fullest consideration, please send materials by September 1, in confidence, to:

Southwestern University
AT GEORGETOWN, TX.

Provost and Dean of the Faculty

Southwestern University invites nominations and applications for the position of Provost and Dean of the Faculty.

The University seeks a strong, creative, dynamic educator with a distinguished professional record to provide academic leadership for Southwestern's ambition to establish itself among the front rank of national liberal arts colleges.

The Provost must be a person who approaches administration in a collegial fashion, must be attuned to the major national issues in higher education, and must be able to lead the faculty in pursuit of its long-term educational plans and goals. The Provost is the chief academic officer of the University, coordinates the University's total educational program, and oversees planning, development, and evaluation relating to all academic departments and interdisciplinary programs. The person in this position reports directly to the President.

Southwestern University is a private, selective, undergraduate liberal arts institution. It has two academic units - the Brown College of Arts and Sciences, of which the Provost serves as Dean, and the Sarofim School of Fine Arts. For almost two decades, Southwestern has embraced a comprehensive, long-range planning process, which has shaped a commitment to intellectual prominence, ethical engagement, and diverse perspectives. Participation in this process has involved all constituencies of the Southwestern community and has become a significant part of Southwestern's cultural fabric. The Provost will play a critical leadership role in this ongoing process and will contribute to the achievement of the University's goals.

The University is located in Georgetown, Texas, 20 miles north of Austin, the state capital. It has 1,300 students and 108 full-time faculty with a historic of stable enrollment and balanced budgets. With a permanent endowment of more than $320 million, Southwestern's per student endowment ranks among the highest in the nation. Visit www.southwestern.edu for more information about the University.

Candidates must have an earned doctorate and a distinguished record of teaching, scholarship, and administration. A person with significant teaching and/or administrative experience in a liberal arts institution is preferred. Southwestern is committed to fostering diverse perspectives in its community and welcomes and encourages applications from women and minorities.

Nominations and applications will be accepted until the position is filled. Candidate screening will begin September 3, 2001. Applicants must submit a cover letter with a statement of approach to academic leadership, a current c.v. and the names, addresses, and phone numbers of at least four professional references. All communications will be treated confidentially.

Send nominations and applications to:

Provost Search Committee

**FACTOR OPPORTUNITIES**

**September 2001**

Brookdale Community College is recognized for its focused commitment to its students and community. Brookdale provides a world of opportunities for study, learning and working experience, in the traditional classroom, via the Internet, through experiential learning opportunities, and by distance education courses. Brookdale has grown dynamically into an institution with limitless horizons, as it continues to meet the evolving needs of its students and its community. Located on 220 acres in central coastal New Jersey, the sprawling campus provides a pastoral setting, and is approximately 50 miles south of New York City and 70 miles northeast of Philadelphia.

The College invites applications for Faculty positions for September 2001. Brookdale is an innovative and comprehensive open admission two year college with an enrollment of approximately 11,500 credit students (approximately 7,500 FTE). We seek colleagues who share our unequivocal commitment to quality instruction, collaborative relationships and who value service, diversity, innovation and technological literacy. These are full time, tenure track entry level positions.

**INSTRUCTOR, ART:** Master’s Degree in Art History and/or Architectural History required (candidates with Master’s in Architectural History, an undergraduate degree in Art History is preferred). Successful candidate must be able to teach Art History, Art Appreciation, Architectural History (courses ranging from ancient through modern periods). Additional duties include maintenance of slide/CD ROM library.

**INSTRUCTOR, RADIOLOGIC TECHNOLOGY**: Bachelor’s degree (Master’s Degree preferred). RT certification and NJ licensure are required, as well as three years clinical experience. *This position may be staffed at the Assistant Professor level.

**Additional Preferences:** Candidates should have familiarity with current technological advances related to the discipline. These positions may require participation in community-based activities. Candidates invited for an in-person interview may be required to present a teaching demonstration.

**Compensation:** Annual salary range for **Instructor** level positions, is $34,250-$39,388. Positions are entry level and salary is commensurate with qualifications/experience within the identified range. The only position that may be staffed at the Assistant Professor level is the noted Radiologic Technology position. Faculty members teaching extra courses during the academic year and in the summer receive additional compensation.

**APPLICATION PROCESS:** Applicants interested in any of the above positions should submit letter of application (indicating desired position), curriculum vitae, copies of graduate transcripts and three letters of recommendation to Human Resources via fax at (732) 224-2890, or by mail to the address as noted below. Our Job Hotline telephone number is (732) 224-2891.

**APPLICATION DEADLINE:** Materials must be received postmarked no later than June 29, 2001.

Assistant Chancellor for Advancement &
President of UW-La Crosse
Foundation, Inc.

Outstanding leadership opportunity in historic La Crosse, combining the scenic beauty of the Mississippi River and towering limestone bluffs with a diversified economy and educated populace. The city is a regional center for culture and entertainment, medical care, shopping and recreation. The university, part of the University of Wisconsin System, enrolls 9,200 students in an array of undergraduate and selected graduate programs.

The assistant chancellor reports to the Chancellor of the University and is responsible for strategic planning, leading and supervising those programs related to institutional advancement and fund raising. The following key positions report directly to the Assistant Chancellor: Director of Alumni Programs, Director of University Relations, Vice President-Administration and Planned Giving, Director of Finance, and Directors of Collegiate Fund Raising. The assistant chancellor also serves as president of the foundation, providing management and support services to its board of directors, committees and affiliated organizations.

Review, develop and implement an overall campus development plan to enhance the university’s stature and ability to raise private funds, consistent with the university’s mission of instruction, public service and research. Coordinate activities, programs and operations which advance the university’s relationships with constituent groups. Major areas of responsibility, with the help of a professional staff, include all fund-raising and development activities, alumni affairs, university relations (media relations, publications and community relations), and foundation administration and finance. Preferred start date is September 1, 2001, or as soon thereafter as possible.

Must exhibit exceptional leadership, fund-raising, management, communication and interpersonal skills; professional working knowledge of all aspects of university advancement, including experience managing a complex organization; demonstrated ability to work with faculty, staff and university administrators; travel is required. Minimum of five years active fund raising experience; bachelor’s degree required; advanced degree and/or CFRE certification preferred.

Applications must include letter of interest, resume, and names, addresses and phone numbers of five professional references who would be available during the summer.

Send to: Dr. Carl Wimberly, Chair, Search & Screen
University of Wisconsin-La Crosse
Clarey Center, 1725 State St., La Crosse, WI 54601

Fax: (518) 564-5060.

Plattsburgh
STATE UNIVERSITY OF NEW YORK
www.plattsburgh.edu/hr/
Purdue University invites nominations and applications for the position of Director of Affirmative Action. Reporting to the Vice President for Human Relations, the Director of Affirmative Action will be responsible for providing leadership in developing and directing Purdue University’s Affirmative Action Office (AAO). The Director will work collaboratively with other units to improve the quality of life for students, staff and faculty at Purdue.

The Director will:
• Promote affirmative action goals and commitments in their broadest sense.
• Develop, coordinate and evaluate affirmative action plans and programs at the West Lafayette campus. Assist the academic schools and other units in meeting their affirmative action goals and promote equal opportunity and diversity in hiring.
• Serve as the systemwide resource person in matters related to affirmative action and equal employment opportunity.
• Serve as the Americans with Disabilities Act coordinator for the West Lafayette campus.
• Investigate and resolve discrimination and harassment complaints and grievances.
• Acquire, interpret and disseminate information to the University community on current legislation, regulations, investigating agencies’ activities and related issues.
• Sponsor campus-wide educational programs on affirmative action, equal opportunity, equal access, nondiscrimination and related issues.
• Serve the data needs of the AAO for internal monitoring and reporting.
• Coordinate compliance with federal and state reporting requirements.

Demonstrated commitment to diversity and equity, sensitivity to the interests of all underrepresented groups, and working knowledge of the laws and regulations relating to affirmative action, equal opportunity required. Proven track record in developing and implementing affirmative action programs with a variety of constituencies desired. Experience in a university setting preferred; ability to work with faculty, staff and students in an academic setting required. Must have success in program initiation, development and implementation through effective collaboration with other offices and individuals; demonstrated recruitment, management, interpersonal, communication and analytical skills; and experience in investigating and resolving grievances and complaints. Advanced degree strongly preferred. A faculty appointment in a relevant academic department is possible, depending upon qualifications.

Purdue University is Indiana’s Land Grant University and one of the nation’s leading institutions of higher education and research. Purdue University at West Lafayette enrolls approximately 37,000 students in its 10 schools and over 60 graduate programs, and employs approximately 2,300 faculty.

Please submit nominations or letters of application with vita to: Personnel Services, ATTN: WLDHO 1075200, 1126 Freehafer Hall, West Lafayette, IN 47907-1126

Review of applications will begin June 1, 2001. Applications will be accepted until the position is filled.

Purdue University is an equal opportunity/affirmative action employer fully committed to achieving a diverse workforce.

UNIVERSITY OF MINNESOTA

University Librarian

The University of Minnesota, Twin Cities, invites applications for the position of University Librarian and Archivist. We are seeking a candidate with a dynamic vision for the future of library services and collections and an ability to formulate, advocate, and implement strategies that will ensure the Libraries’ continuance as one of the best academic library systems in the United States. The University Libraries is the 17th largest academic research library system in North America, with almost six million volumes, numerous important special collections, and a distinguished and dedicated staff numbering nearly 400. The University Librarian should have a vision for identifying and developing state-of-the-art technologies and information systems and for integrating these with traditional library collections and services. A successful candidate will have a proven track record of effective library leadership and a demonstrated knowledge of trends and developments in libraries as well as higher education. The Libraries’ Vision Statement is available at http://staff.lib.umn.edu/vision/vision.html.

Qualifications: A Masters degree in library/information science from an ALA-accredited institution or strong evidence of established leadership in the library profession is required. Preferred requirements include a terminal degree such as the Ph.D.; evidence of scholarly activity, such as a record of research, publication, or presentation; and established leadership experience at a major academic or research library. The successful candidate will have a knowledge of the evolving system of scholarly communication including digital and other information technologies; excellent interpersonal and communication skills; an ability to inspire and be engaged with the Libraries staff; fund-raising/development experience; a demonstrated commitment to diversity and multiculturalism; and a demonstrated ability to recruit a diverse staff and a commitment to staff development. The University librarian is expected to have strong skills in the development of library budgets and management of resources.

Appointment to be effective October 1, 2001. Applicants should submit a resume and the names of at least three references. Review of applications will commence after July 1, 2001, although applications will be accepted until the position is filled. Applications, nominations, and questions should be directed to: University Librarian Search Committee, c/o Vice President for Research and Dean of the Graduate School, University of Minnesota, 420 Johnston Hall, 101 Pleasant Street SE, Minneapolis, MN 55455

The University of Minnesota is an equal opportunity educator and employer.
Assistant/Associate Professor - Special Education
Department of Education
St. John Fisher College in Rochester, New York, invites applications for Assistant/Associate Professor in Special Education. St. John Fisher College is an independent college serving over 2,000 students at a suburban campus. The College currently offers 26 majors and 11 graduate programs.

Rochester, New York, is noted for its excellent symphony orchestra as well as its arts and science museums. Rochester also has a high concentration of some of the largest international corporations and best hospitals in the nation. Close proximity to the Finger Lakes region and the Adirondack mountains is another asset to living in Rochester.

The Department of Education is committed to excellence in teacher education. The department values superior teaching, scholarship, appreciation of diversity and service to the community.

Full-time Position
Assistant/Associate Professor - Special Education

The qualifications for this tenure track position include:
- Ed.D., Ph.D. in Special Education from an accredited institution or significant progress toward completion of the doctorate.
- Some background or training in Reading/Literacy desirable.
- Three or more years of teaching experience desirable.
- Experience working with diverse populations and in urban areas desirable.
- Public school teaching experience desirable.
- The 9-month positions requires graduate and undergraduate teaching.

Applicants should submit a cover letter describing their relevant academic interests and backgrounds; a curriculum vitae; evidence of teaching effectiveness; selected reprints of scholarly work; at least three letters of recommendation; and names, addresses, and telephone numbers of three additional references who have granted permission for direct contact to the Chair of the Search committee. Position begins September, 2001. Review of applications will begin immediately and continue until the position is filled. St. John Fisher College values diversity and encourages individuals from underrepresented populations to apply. EOEA/A.

EEO/AA/Title IX Employer

The Ohio State University seeks applicants for the position of Director of its new Institute for the Study of Race and Ethnicity in the Americas. The Director is expected to provide the intellectual, multidisciplinary, and administrative leadership for the development and maintenance of the Institute. He or she will report directly to the Executive Vice President and Provost and will simultaneously hold a tenured faculty appointment in an academic unit. Candidates for this position should have a record of excellence in scholarship pertaining to the study of race and ethnicity in the Americas, as well as teaching and service records appropriate for appointment as a full professor at The Ohio State University. The ideal candidate will also have appropriate administrative experience.

The Ohio State University's Institute for the Study of Race and Ethnicity in the Americas is a new interdisciplinary center created to promote research, teaching, learning, and dissemination of knowledge regarding the history, current conditions, and future prospects for members of racial and ethnic minority groups in the Americas. The Colleges of Humanities, Law, and Social and Behavioral Sciences were involved in the initiation of the Institute proposal, but a range of departments and disciplines contribute to the strong scholarly foundation for an institution on race and ethnicity at Ohio State. For more details about the initial vision for the Institute, please review the original proposal which appears at www.osu.edu/dierew.

The primary focus of the Institute is to encourage and enhance interdisciplinary and inter-college research on race and ethnicity in the Americas. The Director of the Institute is expected to shape the development of this multidisciplinary center. In collaboration with affiliated faculty, he or she will oversee the research agenda and the day-to-day administration of the Institute; seek outside funding to support the research work of the Institute; and interface with relevant organizations within and outside the University community. To this end, the Institute will host conferences and seminars; sponsor a regular survey on race and ethnicity; house pre- and post-doctoral fellows; recruit new faculty (in collaboration with affiliated departments and colleges); and support teaching and service activities related to race and ethnicity.

Nominations of distinguished candidates are encouraged and should be sent to the search committee chair. Applicants should submit a curriculum vitae, the names of three references, and a cover letter describing their interests in and qualifications for the position, including administrative experience and examples of leadership in multidisciplinary efforts to:
Ruth D. Peterson, Chair, ISRE Search Committee, Office of Academic Affairs
The Ohio State University 203 Bricker Hall, 190 North Oval Mall, Columbus, OH 43210
Phone: (614) 247-6379; Fax: (614) 292-3658; e-mail: Peterson.5@osu.edu
The search committee will begin reviewing applications on July 1, 2001. However, the search and review process will continue until the position is filled.

The Ohio State University is an Equal Opportunity, Affirmative Action Employer. Women, minorities, veterans and individuals with disabilities are encouraged to apply.
Committed to growing the New Jersey economy through education, research, and economic development, New Jersey Institute of Technology (NJIT) will offer new degree programs in applied life sciences in the fall of 2001. These programs will help build and support NJIT partnerships with the biotechnology, pharmaceutical and health care industries.

- Biomedical Engineering, B.S., M.S., Ph.D., focusing on biomedical materials, laser technology, development of micro and nano machines and new prosthetic devices.
- Computational Biology, M.S., utilizing computing, mathematical and statistical methods to translate genetic data into practical, life-enhancing applications.
- Pharmaceutical Engineering, M.S., focusing on drug development and production and pharmaceutical operations.
- Master of Public Health, a program that applies an environmental perspective to address critical health issues in high-risk, urban populations.

Excellor College.

Vice President for Finance & Administration

Excellor College, (formerly known as Regents College), a private, independently chartered institution, and recognized leader in the field of alternative higher education, seeks applicants for the position of Vice President for Finance & Administration. The College provides a highly flexible and cost-effective means of working adults to earn accredited college degrees. A staff of 250+, currently serves approximately 17,000 enrolled students world wide.

The Vice President for Finance & Administration is the chief business and financial officer of the institution and is principal steward of the College's financial and physical resources and provider of technology services in support of the academic mission. Reporting to the President, the Vice President for Finance & Administration will be responsible for budgeting, audit, tax, accounting, purchasing, real estate, long-range forecasting, business partnering, and risk management activities. This position is the custodian of funds, securities and assets of the organization and serves on the Executive Staff of the College. The position directs and coordinates building of budget programs and interfaces with the Board of Trustees, including participation on the Budget, Audit and Finance Committee of the Board of Trustees.

Additional duties include responsibility for financial statements and audits, as well as required federal and state tax returns. Other leadership responsibilities may include direction of information technology, institutional research, human resources, facilities, and mailroom operations.

Qualifications: Bachelor's degree in Accounting or Business Administration, and a CPA required, with a minimum of ten years of progressive experience, ideally in an educational institution. An MBA would be a distinct plus. Knowledge of financial management and control, excellent management and team-building skills, strong decision-making skills, and a proficiency in oral and written communication required. Experience with information technology, human resources, facilities management preferred.

Excellor College offers competitive compensation, plus a comprehensive fringe benefit package. Interested candidates should forward a resume with salary history to:

Anticipated Starting Date: July 1, 2001

Minimum Qualifications: Bachelor's degree required; RID or NAD level IV certification required; one year of work experience in the field of interpreting for deaf and hard of hearing persons; demonstrated ability to respond to and work with multiple constituencies.

Applicants who do not meet the minimum qualifications as stated are encouraged to put in writing precisely how their experience has prepared them for the responsibilities of this position and by providing appropriate references. Exceptions to the degree requirements may be made for compelling reasons.

Responsibilities: Under the supervision of the Director, the Interpreter provides interpreting and translation of oral proceedings for deaf staff members; assists in coordination of note-taking services for students; and other related duties.

Minimum Salary: $36,763 approximate annual, excellent health benefits.

Application Procedure: Send letter of intent and resume (with names of three references) to: Margaret Krimmel, Director of Human Resources, Northwestern Connecticut Community College, Park Place East, Winfield, CT 06098

Application Deadline: Must Be On File By June 15, 2001

NCCC, a Connecticut Community College, is an AA/EOE Employer, M/F. Protected group members are strongly encouraged to apply.
Manhattanville College

Provost and Dean of the Faculty

Manhattanville College invites applications and nominations for the position of Provost and Dean of the Faculty. This opening provides an opportunity for an academic leader to help guide the future of the college with strong values and a proud heritage to its next level of achievement. The new Provost and Dean of the Faculty will be actively engaged in the ongoing deliberations on academic priorities and will strive to further elevate the strength and stature of its academic programs.

Manhattanville College, an independent, coeducational liberal arts institution was founded in 1841 by the Society of the Sacred Heart as a Catholic college for women. While the values of the Society of the Sacred Heart continue to define the College, it has been coeducational and non-sectarian since 1971. Manhattanville College looks to a beautiful 100-acre site in Westchester County, 28 miles north of NYC, offering the spaciousness and leisurely pace of a suburban location combined with the resources of NYC. The College has been recognized as one of the top liberal arts colleges in the nation by U.S. News and World Report, the Princeton Review, and the Chronicle of Higher Education. According to Yahoo! The global Internet communications company, Manhattanville is among the top colleges in the nation providing students access to computers and Internet services.

Serving a diverse student body of more than 400 full-time undergraduate students, Manhattanville offers more than 40 undergraduate majors. In addition to the undergraduate program, the College also includes a School of Graduate and Professional Studies and a School of Education. Manhattanville College consists of 69 full-time and 140 part-time faculty members. Small class sizes and a low student-faculty ratio of 12:1 allow Manhattanville to afford its students a distinctive level of individualized instruction.

Qualifications - Candidates should possess:

- A record of significant academic leadership and management achievement
- A collaborative leadership style that assesses the collective wisdom of constituents while focusing on results
- A capacity to communicate clearly, effectively, and collegially with the many constituencies whose contributions are required for the success of the College
- A demonstrated ability to guide an organization through a period of ongoing institutional change
- A proven track record of strategic planning
- A commitment to educating a racially, culturally, and economically diverse student body
- A record of recruiting and retaining excellent faculty
- A commitment to shared governance
- An earned doctorate or equivalent degree and a record of teaching and scholarly or professional attainment that merits appointment as a professor with tenure within one of the College’s departments.

Submit nominations, inquiries, or application material including a letter of application, curriculum vita and the names, addresses, and email addresses of five or more references in confidence to: David A. Haley or Anny E. Tapia, Isaccson, Miller, 334 Boylston Street, Suite 500, Boston, Massachusetts 02116-3899 Telephone: 617-262-6500, x171 or x106 Fax: 617-262-6509 E-mail: haley@masssearch.com or atapia@masssearch.com.

The Search Committee will be reviewing applications in June 2001 and will continue to do so until the position is filled.

Excellence requires all points of view. Manhattanville College proudly values diversity. Candidates of all backgrounds are encouraged to apply.

EEO/AA Institution
Admissions Counselor

The University of Illinois at Springfield has an opening in its office of Admissions for an Admissions Counselor. Located in the state capital, UIS is an undergraduate and graduate institution with 18 graduate and 20 undergraduate programs. With the addition of the Capital Scholars Program in 2001, the campus will become a four-year institution of higher education. The campus emphasizes excellence in teaching, small classes, and a personal atmosphere.

The Admissions Counselor will be located on the UIS campus and will be responsible for recruiting undergraduate and graduate students. Bachelor’s degree required. The ability to work independently and with minimal supervision is also required. The successful candidate will be an enthusiastic, self-directed person with good organizational, planning, and communication skills. Oversight travel and some evening/weekend work will be required. Interviewing and counseling skills are preferred to be able to provide students with proper academic advising, guidance, and assistance with academic planning, as well as experience in higher education/admissions counseling. Familiarity with the University of Illinois at Springfield is also preferred.

Applicants should send official transcripts, resume and a letter of application describing qualifications and experience, and have three current letters of reference sent to Dr. Jonathan Goldberg-Belle, Ph.D., Office of International Affairs, CPV 169, P.O. Box 19243, University of Illinois at Springfield, Springfield, IL 62794-9243.

Review of applications will begin May 18, 2001 and continue until the position is filled.

The University of Illinois at Springfield is an affirmative action/equal opportunity employer. Women, minorities and persons with disabilities are encouraged to apply.

ASSISTANT VICE CHANCELLOR FOR STUDENT LIFE

The State University of New York System Administration, located in Albany, New York, is seeking an Assistant Vice Chancellor for Student Life to serve as the student life officer responsible for supporting and coordinating campus efforts in a variety of student related areas such as Health Centers, Counseling Services, Alcohol Education, Career Development, Housing, Leadership, Greek Life, Child Care, Student Union/Activities, Discipline, Governance, Disability Services, Hispanic American Affairs, and Athletics and Intramurals. Reporting to the Associate Vice Chancellor for University Life, the Assistant Vice Chancellor will need to develop a collaborative model for supporting campus efforts and System Administration initiatives. Significant attention will be placed on accountability and assessment models, policy development, vertical and horizontal integration of staff to address issues, and an eagerness to explore creative problem solving techniques.

Qualifications: Master’s degree (Doctorate/ABD preferred) with at least 10 years of progressive experience in a higher education setting. The successful candidate will be self-motivated and directed, able to manage multiple assignments, effectively write and present reports, and responsive to the concerns and needs of a wide range of constituent groups.

Salary Range: Competitive.

Applicant review will begin June 15, 2001 and continue until filled. Send letter of application and resume to: Search Chair, State University of New York System Administration, c/o Office of Human Resources Room S-125, State University Plaza, Albany, New York 12246.

The State University of New York is an EEO/AA employer. Applications from qualified women, minority persons, disabled workers and/or Vietnam Era Veterans are especially welcome.

College Of Education

The Florida State University is a comprehensive, graduate-research university with a liberal arts base located in Florida’s capitol city of Tallahassee. The College of Education has a long and honored history as the second founded College in the University.

The College seeks accomplished, motivated, enthusiastic, and energetic candidates for the following positions.

Assistant/Associate Professor
ECONOMICS OF EDUCATION
(Tenure-earning)

The Department of Educational Foundations and Policy Studies seeks a faculty member with a background in economics of education and development, with specialties in development economics, labor economics, economics of education and policy studies. Candidates must have a strong comparative/international focus, to include domestic issues. Professional and academic interests would be in the areas of development issues in education and the economy, cost analysis, educational planning and policy, and political economic perspectives emerging in the field. Teaching responsibilities include working with graduate level International/Intercultural Development Education students, Social Sciences and Education students, Educational Administration, Higher Education and Educational Policy majors. Graduate courses include Education and Economic Development, Economic Evaluation of Education, Economics and Educational Planning (sector analysis), and Economics of Education. Undergraduate courses for teacher education majors are in the area of social foundations.

Minimum qualifications include: Earned doctorate in education or economics with international experience in cost evaluation of educational projects and economic policy research and evaluation. Demonstrated experience, and/or potential for, obtaining funding for research, and direct experience with international education and social policy agencies is desired.

Please send application package to Dr. George Papagiannis, Chair, Economics of Education Search Committee, Department of Educational Foundations and Policy Studies, 306 Stone Building, College of Education, Tallahassee, FL 32306-4451. For further information, contact Dr. Papagiannis at (850) 644-8167, fax (850) 644-6401, or by email at papagi@coe.fsu.edu.

*****************************************************************************

Assistant Professor
EDUCATIONAL POLICY
(Tenure-earning)

The Department of Educational Foundation and Policy Studies seeks a faculty member to teach graduate and undergraduate level courses in Educational Policy, coordinate the Graduate Certificate in Educational Policy, advise and mentor master’s and doctoral students, conduct research and engage in scholarly activities, and provide services to the education community.

Minimum qualifications include: Earned doctorate in education, public policy, or the social sciences, and evidence of, or strong potential for, significant research and publications concerned with enduring social and political problems. Specific research interests might include K-12 policy focusing on school reform, demonstrated experience, and/or potential for, obtaining funding for research, and direct experience with educational policy or social agencies is desired.

Please send application package to Dr. Sande Milton, Chair, Educational Policy Search Committee, Department of Educational Foundations and Policy Studies, 306 Stone Building, College of Education, Florida State University, Tallahassee, FL 32304-4451. For further information, contact Dr. Milton at (850) 644-8168, fax (850) 644-6401, or by email at mliton@coe.fsu.edu.

Application package should include letter of application documenting interest and qualifications; current vita; and list of names, addresses and telephone numbers of five references who may be contacted (three letters of reference will be required prior to interview), and writing samples. Applications for these positions will be reviewed on June 29, 2001. Position will begin no later than August, 2001.

The Florida State University is an equal opportunity, affirmative action employer and women, minorities and individuals with disabilities are strongly encouraged to apply.
BOSTON COLLEGE

POSTDOCTORAL POSITIONS IN BIOLOGY AT BOSTON COLLEGE. Boston College, a nationally ranked university that offers outstanding research facilities, has the following postdoctoral openings in the Biology Department.

CYTOKINESIS. Dr. David Burgess (David.Burgess@bc.edu). Cytokinesis, the division of the cytoplasm during mitosis, is mediated by an actin-myosin based contractile ring in the cleavage furrow. Opportunities are available to study the cleavage stimulus and the response system orchestrating assembly and dynamics of the contractile ring.

B CELL ACTIVATION AND SIGNAL TRANSDUCTION. Dr. Thomas Cailes (thomas.cailes@bc.edu). A NIH-supported position is available to study the regulation of cell cycle entry in B lymphocytes in response to B cell antigen receptor (BCR) ligation. The proposed research includes study of the role of hsp90/Cdc37 in D-type cyclin-cdk4 holenzyme complex assembly and of the regulation of Cdc37 function by phosphorylation during negative signaling in mature B cells.

FUSION YEAST SIGNAL TRANSDUCTION. Dr. Charles Hoffmann (hoffmann@bc.edu). Two NIH-supported positions are available to study glucose detection and cAMP signaling in the fission yeast Schizosaccharomyces pombe. The proposed research includes: (1) study of the gtp3 glucose receptor and (2) cloning and characterization of the S. pombe sgl1 gene proposed to encode a direct phosphatase activator of adenylyl cyclase.

STRUCTURAL BIOLOGY OF MYELIN AND AMYLOID. Dr. Daniel Kirschner (kirsch@dolphins.hc.edu). Positions are available studying: (1) the ultrastructural neurotubulism of, and adhesive mechanisms in, CNS and PNS myelins and (2) fibrillogenesis and the molecular organization of amyloid assemblies.

HOST-PARASITE INTERACTIONS IN MALARIA. Dr. Marc Musavvati (musavat@bc.edu). Positions are available to study the developmental and cell biology of the midgut in the malaria vector mosquito, Anopheles gambiae. Understanding the biology of the An. gambiae midgut, a tissue central to the reproduction of malaria parasites, will advance our understanding of host-parasite interactions in malaria, and may help us develop strategies to disrupt this interaction.

DROSOPHILA NOTCH SIGNAL TRANSDUCTION. Dr. Marc Musavvati (musavat@bc.edu). Positions are available to study signal transduction and cell-fate specification in the development of the fruit fly, Drosophila melanogaster. Studies will focus on ligand structure-function relationships, receptor processing, and activation in the Notch signal transduction pathway.

For more information on each of these labs please visit: http://www.bc.edu/bc_org/avp/bsc/biotech/html.

Applicants for all positions must have a Ph.D., demonstrated skills in the chosen subject area, and fluency in spoken and written English. To apply for a position, please send a curriculum vitae and three letters of reference addressed to the appropriate faculty member at Boston College, Biological Sciences, Higgins Hall, Chestnut Hill, MA 02167.

Boston College is an Equal Opportunity Employer. We encourage applications from women and from members of groups underrepresented among life science professionals.

NETWORKED SYSTEMS MANAGER

Reporting to the Head of Systems, oversees the installation, maintenance and inventory of all computerized instructional and staff information systems, including several local area networks in the Hunter Main Library and three branch libraries, design instructional modules for training workshops in the internet and CD ROM database, supervises computer technicians; Webmaster for the Libraries' web page; assists library staff in the effective use of PCs by developing instructional guides and conducting workshops in the use of Windows and applications software; supervises the operations, database administration, systems analysts for all Library computing and networking systems and related applications on OS, Windows 95/98/NT, NacOS, UNIX, Novell Network, TCP/IP platforms. Advises on computer hardware and software acquisitions and supervises unit in the absence of the Head of Systems.

Qualifications: Bachelor's degree and 4 years of appropriate experience. Highly desirable: Knowledge of Novell 4 and/or UNIX; supervisory experience; minimum three years in network environment plus experience running a network; excellent written and oral communication skills.

Salary: $32,703 - $57,049, commensurate with qualifications and experience. Excellent fringe benefits.

Review of applications will begin immediately and will continue until the position is filled. Send resume and names (with addresses, telephone, fax numbers, email addresses) of at least three current references to: Dr. Louise S. Sherby, Chief Hunter College Libraries 695 Park Avenue New York, NY 10021.

Email: Louise.Sherby@hunter.cuny.edu

VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

THE UNIVERSITY OF TEXAS AT AUSTIN

The University of Texas at Austin seeks candidates for the position of Vice President and Chief Financial Officer (VP & CFO). The VP & CFO reports to the President and is a member of the University's administrative management team and participates in university-wide sections. The VP & CFO has the general responsibility for the financial integrity of the University. The VP & CFO serves as financial controller and is responsible for the certification of revenue and expenditures. The VP & CFO holds responsibility for optimal management of the University's cash balances and reserves. In addition, the VP & CFO is responsible for the management of financial operations, business contracts, and procurement.

The functional areas reporting directly to the Vice President and Chief Financial Officer are: Accounting, the Budget Office, the Controller's Office, the Historically Underutilized Business Program, Purchasing and Central Receiving, and Military Property.

Candidates should possess an undergraduate degree with a focus on finance or accounting, or should possess a strong educational background in finance or accounting at the MBA level or in other graduate work. Candidates should have at least 10 years of related experience in business or financial administration of which at least 5 years must be progressive executive-level experience at an institution of higher education, in government, or within a large corporation or enterprise. Demonstrated strategic planning ability and strong and effective interpersonal, organizational, analytical, and communication skills.

The University of Texas at Austin was founded in 1883, and is the academic flagship of the 15 component campuses of the University of Texas System. It is ranked among the nation's most distinguished educational and research institutions. The diverse campus includes approximately 50,000 undergraduates and graduate/professional students, and 11,000 faculty and staff members.

Salary: Negotiable based on experience.

For full consideration, nominations and applications should be submitted by June 22, 2001. Applications will be accepted until position is filled. Send letter of interest, current resume, and a list of three references to:

**DIRECTOR, STUDENT ACADEMIC SERVICES**
The University of Illinois at Springfield has an opening in its office of Admissions for a Chicago Area Representative. Located in the state capital, UIS is an undergraduate and graduate institution with 18 graduate and 20 undergraduate programs. With the addition of the Capital Scholars Program in 2001, the campus will become a four-year institution of higher education. The campus emphasizes excellence in teaching, small classes, and a personal atmosphere.

The Chicago Area Representative will be located in the Chicago area and will be responsible for recruiting undergraduate and graduate students in the city and surrounding suburbs. Bachelor's degree required, master's degree preferred. Bilingual skills (Spanish) and the ability to work independently with minimal supervision are also required. The successful candidate will be an enthusiastic self-directed person with good organizational, planning, leadership, and communication skills. A familiarity with diverse populations and assistance with minority recruitment activities is preferred, as well as the ability to provide academic advising, guidance, and assistance with academic planning. Overnight travel and some evening/weekend work will be required. Interviewing and counseling skills are preferred as well as experience in higher education/admissions counseling. Two years admission counseling experience and familiarity with the University of Illinois at Springfield are also preferred.

Applicants should send official transcripts, vita, and a letter of application describing qualifications and experience, and have three current letters of reference sent to Jonathan Goldberglee, Ph.D., Office of International Affairs, CPV 169, P.O. Box 19243, University of Illinois at Springfield, Springfield, IL 62794-9243

Review of applications will begin May 18, 2001 and continue until the position is filled.

The University of Illinois at Springfield is an affirmative action/equal opportunity employer. Women, minorities and persons with disabilities are encouraged to apply.

SAINT MARY'S COLLEGE
NOTRE DAME - INDIANA
The Nation's Premier Catholic Women's College

Center for Women's InterCultural Leadership
Saint Mary's College, a Catholic, four-year liberal arts institution for women located approximately 90 miles east of Chicago, has recently established the Center for Women's InterCultural Leadership through support of a Lilly Endowment, Inc. grant. Qualified individuals are being sought to fill the following two positions:

Community Connections Coordinator
Specific duties include collaborating with community and women leaders and groups, building a network to support the work of the Center and developing planning and implementing various programs and seminars. Qualifications: include a Master's degree with demonstrated experience working with community groups. Also necessary is experience in developing and facilitating workshop and seminars, program development, implementation and evaluation, and excellence as a speaker and writer in communicating to diverse audiences in both one-on-one and group settings. The ability to work collaboratively with a wide variety of constituencies as well as an understanding of and participation in the critical issues of diversity is essential.

Director of International and Intercultural Learning
Specific duties include overseeing the College's current international programs, coordinating all study-abroad activities, assisting faculty in global programs and new faculty/student travel and study grants, facilitating exchange agreements, advising international students, developing new programs and working with the Center to plan, create, and promote intercultural/international dimension of programs. Qualifications: include a Master's degree and experience in an appropriate field of study. Administrative experience is necessary as is study abroad experience as a student, faculty member or administrator. Experience in advising international students necessary as well as familiarity with INS policy. A knowledge of teaching/curriculum planning as pertinent to advising needed. A proficiency in a second language is preferred. Must have outstanding interpersonal, communication and organizational skills.

Qualified candidates should submit a resume, letter of interest, and the names of three references to: Director of Human Resources, Saint Mary's College, Facilities Building, Notre Dame, IN 46556. For full consideration, completed applications should be in by July 6, 2001. EOE

WASHBURN UNIVERSITY
DIRECTOR OF MULTICULTURAL AFFAIRS

The Human Resources Office is accepting resumes for the full-time position of Director of Multicultural Affairs at Washburn University. Reporting to the Vice President of Student Life, the Director is responsible for heightening awareness of multicultural and diversity issues by assisting and creating a campus environment that encourages and values the full participation of Washburn University students, faculty, and staff.

QUALIFICATIONS: A Master's degree in Counseling, Student Personnel, Social Work, Administration, or other related field with 3-5 years in a University setting with progressive levels of responsibility required. Must have abilities to address the following: diversity and multicultural issues, student group advisement, budget management, community outreach, program implementation, and public relations.

APPLICATION PROCEDURES: Submit a letter of application, resume, transcript(s), names and phone numbers of three professional references to the Human Resources Office, 135 Morgan Hall, 1700 College, Topeka, Kansas, 66621. Review of resumes will begin on Monday, June 11, 2001.

SUL ROSS STATE UNIVERSITY, Alpine Campus invites applications for the following Faculty and Staff positions:

Assistant Professor of Bilingual Education/English
Assistant or Associate Professor of Computer Science/Mathematics
Assistant or Associate Professor of Criminal Justice
Assistant Professor of Education/Counseling
Assistant Professor of Education/Early Childhood
Assistant or Associate Professor of Industrial Technology
Electrician/Supervisor
Institutional Research and Effectiveness Director
Programmer I
Sign Language Interpreter
Technical Support Specialist I
Vocational Nursing Director

The following Faculty and Staff positions are available at the SRSU/Alpine Campuses at Del Rio, Eagle Pass, and Uvalde:

Assistant Professor of Education/Early Childhood
Assistant Professor of Education/Reading
Assistant Professor of English
Assistant Professor of Mathematics

ExcET Coordinator/Title 5
Nursing Education Director

University of Connecticut
Anticipated Faculty Position
School of Family Studies

The School of Family Studies at the University of Connecticut seeks to fill an Assistant Professor position at the West Hartford campus. The School is an interdisciplinary social and behavioral science unit with a large undergraduate program, strong graduate and professional programs, and distinguished outreach and service. Minimum requirements: Ph.D. or equivalent in Family Studies, Psychology, Sociology, Anthropology, Political Science, Social Work, or a related discipline, with a scholarly focus on families and human development; evidence of commitment to undergraduate teaching; and a record of promise or outstanding empirical scholarship. Specialties of particular interest include: policy, family development and dynamics, urban issues, diverse populations and conditions, and service delivery. Duties are expected to begin August 2001. The anticipated position will be full-time, tenure-track, Assistant Professor level, based at the West Hartford campus with occasional duties at the Storrs campus. Applicants should send cover letter, curriculum vitae, representative publications, and names and addresses of three potential references to: Dean Charles M. Super, School of Family Studies, University of Connecticut, 348 Mansfield Road, Unit 2058, Storrs, CT 06269-2058. Screening of applicants will begin immediately and continue until position is filled. We encourage applications from underrepresented groups, including minorities, women, and people with disabilities (Search # 01A431).

HISPANIC YOUTHS WHO KILL: IT IS TIME TO KNOW MORE

Some kids are unforgettable. I would put Carlos and Juan in that category. Carlos shined brightly in his senior year in high school. He had a 4.0 GPA and won a four-year scholarship to a major university. President of student government and participating in sports and other extracurricular activities, he was also working about 35 hours per week and spent one weekend a month training with the military. He was absorbed with life and had no interest in drugs or alcohol.

Carlos wanted to excel to please his father, a well-known surgeon from South America. Carlos’s parents were divorced. He and his brother lived with their father, who was rarely home during the week. It became Carlos’ job to take care of his younger brother and maintain their large house.

By all accounts, Carlos’ father demanded a great deal from his son. Family members verified that Carlos’ dad was physically, verbally, and psychologically abusive to Carlos. However, Carlos kept trying to win his father’s approval. Eventually, like a rubber band that is pulled too far, Carlos snapped. Moments after an argument, Carlos grabbed a rifle and shot his father. As his father lay dying in his arms, Carlos implored his younger sibling to call 911 and begged God to let his father live. Carlos’ prayers were not answered; he was subsequently charged with murder.

Juan, in sharp contrast to Carlos, did poorly in high school and dropped out. He could not hold a job or maintain a steady relationship with a girl. He hated his life, and he became addicted to alcohol and drugs. The boy drank beer and liquor frequently and acknowledged a long history of drug use, beginning around age 15. He smoked marijuana daily and did his favorite drugs, crystal methamphetamine and LSD, hundreds of times over the course of several years.

Juan’s parents were both drug addicts. His father was reportedly a drug dealer and a violent man. When his parents divorced, Juan stayed with his mother. His father, who was Mexican, moved to join his family in a border town in the U.S. hundreds of miles away. Juan acted out repeatedly. As a punishment, his mother would send him to his father to straighten him out. Juan hated being with his father, who was verbally and physically abusive to him. On Juan’s last visit, his father wanted to change their relationship from “father and son” to “friends.” As the two spent days “getting high” together, Juan lost his grip on reality. In his intoxicated state, Juan tried to resist the voices in his head commanding him to kill his father. While the man lay sleeping, Juan put a bullet in his head. Afterward, Juan took the remaining dope, returned to his mother’s neighborhood, and spent several days in a motel getting high with his friends, until he was arrested for murder.

These are sad cases—homicides that did not have to happen. How common are such crimes by Hispanic youth? We have no idea, whether the question is the number of parents killed by Hispanic youth or their involvement in overall rates of homicide. The FBI, which compiles data on all homicides in the U.S., currently collects data on four categories of race—White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander—but does not report data on ethnicity. The FBI reported arrest data in terms of Hispanic and “Non-Hispanic” categories from 1980 through 1986 and then stopped. The absence of these analyses is troubling. The 2000 census indicates the Hispanic population is emerging as the largest minority group in the U.S. Demographers have indicated that its reported increase is largely due to waves of new immigrants.

For years, criminology literature has paid little attention to the extent and seriousness of the Hispanic homicide problem. With the dramatic rise in youth homicide since the mid-1980s, the time has come to examine the proportionate involvement of Hispanic youth in murder. As the Hispanic population increases, it is imperative to determine whether there are factors that put Hispanic youth at greater risk of responding more violently than non-Hispanic youth. Once we have this information, we are in a better position to reduce such conditions and to create interventions that increase the likelihood that Hispanic youths will respond adaptively even when faced with difficult circumstances.

Hispanics Surge Ahead
in New Census

BY GUSTAVO A. MELLANDER

The number of Americans who described themselves as Hispanic grew by nearly 60 percent in the 2000 Census and now totals 33.5 million, about 3 million more than the Census Bureau had predicted.

The nation's Hispanic population has grown so rapidly that the 2000 Census shows their numbers are roughly equal to those of African Americans, a demographic shift that has broad implications for politics and culture at the beginning of the millennium. New census figures also reveal a higher-than-expected number of Blacks who included themselves in more than one race. One in 20 residents who identified themselves as Black—4.76 million people—also checked at least one other race in the 2000 Census.

These are the first demographic details to emerge from the long-awaited and politically contentious 2000 Census. The once-a-decade figures are considered critical for many reasons: they affect congressional district boundaries, federal funds, housing, health and education policies, and, in the private sector, sales and marketing decisions.

Ahead of the Forecast

Demographers have said for years that Hispanics would become the nation's largest minority group early this century, but that milestone is arriving earlier than forecast. The increase in Hispanics is probably due mainly to high levels of immigration and poor census counts in the past. John Long, chief of the Census Bureau's population division, noted when these figures were released that earlier government estimates might have missed many recent immigrants, both documented and undocumented ones. Since much of the 1990s immigration was Hispanic, the possibility of an Hispanic undercount is higher than with other cohorts.

For the 2000 Census, the government staged the most extensive outreach campaign ever conducted to encourage minority residents to be counted. While the new racial counts reflect real demographic shifts, they also result from changing census policies, including the new ability to report more than one race. The numbers available so far have not included racial breakdowns for Hispanics. As readers of HO know, Hispanics are represented in all ethnic groups but are generally considered to be people whose ancestors are from Spanish-speaking countries. In the United States, about two-thirds of Hispanics are of Mexican descent.

Tensions and Trends

The demographic milestone reflected in the new Hispanic population totals carries implications not only for political power in this country but for cultural dynamics. The growing Latino population, for example, might sometimes mix uneasily with African Americans, in political life and in neighborhoods. Around the country, the relationship between the nation's two largest minority groups has at times been tense. The political alliances of the '60s and '70s have weakened. A civil disturbance a decade ago in Washington, D.C., and sharp political disputes in Compton, Calif., a formerly Black Los Angeles suburb that is now mostly Hispanic, are not isolated incidents. Many hope those disagreements are growing pains that might soon fade.

The increasing Hispanic population has had an impact on everything from political campaigns to business marketing. More Hispanic candidates are winning local elections in a variety of states throughout the nation. Hispanics also represent a growing consumer block. Major corporations pay millions to advertise on Spanish-language television, where ratings in some cities surpass those of English stations.

Multi-race Option

The government plans to release more detail on race from the census, including counts for Asian Americans, Native Americans, Whites, and Others. One of the most closely watched numbers will be how many people checked more than one race box. The new census figures provided a glimpse into the mixed-race figure. The numbers showed that far more people than expected checked off Black and another race in the census. Recent national studies had indicated that 1 percent or 2 percent would, although some experts think the publicity about the new option might have driven the numbers up.

The multi-race option was added to the census form at the urging of the growing number of people who had married someone of another race or who were children of mixed-race parents. The option was opposed by many civil rights groups, who feared it would diminish their influence and cause confusion in enforcing equal-protection laws.

High multi-race numbers will, it is suggested, make it more difficult to track whether Hispanics have made progress in school test scores, health, access to jobs, housing, and other important social goals. But advocates for the multi-race option say it reflects the real United States, where racial categories are not as fixed as many believe. Clearly the United States is not made up of a single-race people; that reality is evolving faster than the census count.

The Uncounted

What about the millions who were not counted? Will they be served? How? Hundreds of thousands of Hispanics, probably undocumented ones, are in that category. Commerce Secretary Donald L. Evans has already approved a Census Bureau recommendation that unadjusted population figures be released for redistricting purposes. Civil rights groups had hoped Bureau officials would recommend releasing numbers adjusted statistically to compensate for three million people left out of the count. That was not done. But Evans has not ruled out using adjusted numbers later on for another major purpose of the census, the distribution of billions of dollars in federal funds.

Dr. Mellander is a professor at George Mason University.
Identifying and addressing critical points in education. Finding more ways to improve instruction from the early grades through postsecondary and graduate levels. Charter schools and cyberschools. Incorporating technology to widen outreach and narrow achievement gaps among students. Professional development. Teachers training teachers. These are a handful of educational headlines in academia. In this issue, our cover story takes a closer look at a recent trend in the last several years—higher education institutions collaborating with elementary schools (or preschools) in what is commonly referred to as K-16 or P-16 systems. (There is also P-20 or P-16+, which includes graduate school education.)

The Education Commission of the States defines these efforts as a way for individual states and local communities to try to create a "seamless system of education" in which all levels, prekindergarten through college, coordinate, communicate, and educate as one system. Rosemont Elementary in Baltimore paired with Coppin State College is an example of a successful union. In the past, nearly two-thirds of students in this district didn't graduate from high school, and students did not read at grade level. "Last year, more than 90 percent of Rosemont first graders read at grade level or above." Currently, 24 states report this type of collaboration, and counting.

Also in this issue, we have more on turning classroom conflict into teachable moments; a three-year study entitled "Hispanic Churches in American Public Life," funded by the Pew Charitable Trusts, that examines the influence of organized religion on Hispanics' political and social activism; and much more.

Seguimos con Hispanics in the media, Latino leadership in Iowa, and education reform strategies.

Hasta la próxima reseña,
W. Suárez

Letter To HD

A New Reader

I am a University of Maryland College Park sophomore who just finished up my term as vice president of the student government association. Motivated by the terribly low graduation rate of the University's Latino population—only 20 percent of all Latinos graduate in four years, and only 53 percent graduate in seven years—I began the following two programs:

"La Familia" is a peer-mentoring program. I was proud to see close to 15 percent of first-year Latino students involved in it and am looking to get an even larger proportion of first-year students in Fall 2001.

ALAS, the Alliance for Latino Advancement and Success, a program that I began with other Latinos, aims to research, discover, and take steps to solve the causes of the poor retention rates of Latinos at the University. We have begun to open the eyes of University faculty and administration, which never previously recognized the importance of the community.

I came across your website and am very thankful for your publication. I was hoping you could give us, here at the University of Maryland, advice with regards to what roads we should take to accomplish our goals. Latino retention is a national problem.

Please keep up the good work for the Latino community as we try to do the same in Maryland!

Sincerely,
Ariel Oxman, Rockville, Md.

Dear Ms. Oxman

I'm delighted that you found our publication, and consider it a helpful resource. For the last decade our magazine has been reaching academic institutions nationwide—examining, analyzing and delivering news about Latinos in higher education—their accomplishments, aspirations, needs, conflicts and resolutions. And it is our goal to continue to expand our coverage in order to better serve as a form of edification for our readership who are interested in Latina/o involvement in academic issues.

Your personal contribution to higher education is as industrious as it is admirable and newsworthy. I trust that the La Familia peer-mentoring program and the development of ALAS, the Alliance for Latino Advancement and Success, will positively impact the Hispanic community at the U. of Maryland. We are all anxious for retention and graduation rate improvements, narrowing the achievement gaps, etc., and it is endeavors like yours that contribute to reversing negative trends that plague communities of color. Perseverance and communication will yield the desired results. And our magazine strives to be a medium through which information about and for Latinos can be disseminated for the betterment of all higher education.

Stay in touch. It is always a pleasure to meet new readers.

Bienvenida a nuestra familia.
M.S.
Universities Working with K-12 Schools

Programs at UTEP, Coppin State, USF, Yale, and Beyond

BY
ISIS ARTZE

Prekindergarten students at Rosemont Elementary School in Baltimore, Md., receive some of their lessons from tenured university faculty. And during the summer, the school's third and fifth graders spend six weeks taking courses on a nearby college campus. Is it a case of college prep gone mad? Not at all. Actually, it's an example of a current trend in U.S. education reform, commonly known as K-16 partnerships, in which universities and neighboring K-12 schools form alliances.

"K-16" refers to the underlying belief that a common thread should exist in the education process, from as early as kindergarten through the fourth year of college, or grade "16." An alternate name for these relationships, and that employed by the Education Commission of the States (ECS), is P-16 Education. In its report "What Is P-16 Education?" ECS articulates that "such initiatives reflect the central vision of a coherent, flexible continuum of public education that stretches from preschool to grade 16, culminating in a baccalaureate degree."

In some cases, the relationship entails university professors and student teachers teaching courses at the lower-level schools. In others, colleges offer seminars or free tuition programs to K-12 teachers. Other universities design the schools' curricula, provide funding, or even create and run their own charter schools.

Steve Sánchez, principal of Marian Manor Elementary in El Paso, Texas, spearheaded the K-16 initiative shortly after he assumed his position five years ago, he says, because he realized the teachers had not maintained and expanded upon their skills. Sánchez was especially concerned that the student body had become increasingly diversified (today it is 983 percent Hispanic) while the staff had remained predominantly Caucasian.

His goals are to get teachers "to recommit themselves, to upgrade their skills, and work with a different population," Sánchez says. "I wanted to create an environment of learners," he adds, "where everyone modeled lifelong learning." He decided that in order to upgrade the whole academic program, he would need help, and the nearby University of Texas at El Paso (UTEP) was the obvious place to go. Sánchez contacted UTEP's education school and proposed that they work together, and the partnership was born.

Today, K-16 initiatives such as theirs are increasingly common, but a Time magazine article dated Jan. 8 of this year explains that the concept behind them is not at all new but a return to the way things once were. "More than a century ago," it explains, "universities and their local public schools talked at every turn. In those days, before the SAT, many colleges designed their entrance exams, down to which passages from Homer students ought to be able to translate, and high schools tailored their lessons accordingly.

"But as the nation's public schools swelled and colleges started recruiting applicants from farther afield, universities lost touch with their neighborhood schools. Over time, the relations became icier, with schoolteachers carping that all they got from colleges were airy theories of school reform, spun from on high."

Luckily, this deep-rooted tension has begun to fade and has given way to an undoubtedly more productive relationship, the collaboration. ECS reports that five years ago, only two states ran K-16 programs, while today, 24 do. And this figure does not take into account the many partnerships involving private colleges.

How and why did this transformation come about?

For one, colleges and universities are conscious of the substandard condition of America's public school system and are, therefore, taking these measures out of civic interest.

But the Time magazine article points out that universities are not acting only out of good will. "When students show up for freshman year ill-prepared, colleges pay the price," it states. "Today half of all college students must take at least one remedial course, at an annual cost of $1 billion to the nation's public universities."

The article continues to explain that the recent ban on affirmative action programs in Texas and
California also promotes the K-16 movement because universities must now make extra efforts to recruit and prepare minorities for admittance.

Finally, with many public schools complaining that their teachers are poorly trained, K-16 partnerships offer the university's education students hands-on training in the field.

**Different Approaches**

While many programs are classified as K-16 (or P-16) partnerships, each adjusts its format to the specific needs of the participating schools. Sánchez describes the relationship between Marian Manor and the University of Texas at El Paso as “two-pronged.” The first branch of the alliance is a close association with the University in teacher preparation. “When I was pitching the idea to UTEP,” Sánchez explains, “I used the medical field as an analogy.”

“Student doctors work in a clinical setting with professors,” he explained. “There's no segregation; they're there assisting.” So he suggested they do the same with teaching so that UTEP's student teachers and professors would work together at Marian Manor's campus.

Today, Sánchez’s brainchild is a daily reality and an integral part of the relationship. UTEP's student teachers and professors spend three hours a day at Marian Manor, from Monday through Thursday. For 45 minutes, the professors lecture the University students, as they would in a typical college course.

Then, for the next hour and a half, the student teachers apply the theory they just learned by teaching Marian Manor students. All the while, University professors watch and evaluate their performance. Finally, the professors and student teachers converse and reflect on the lessons of the day.

The second branch of the relationship involves the El Paso Collaborative for Academic Excellence, an initiative housed at UTEP's campus. Founded in 1991, the Collaborative works with three of the largest and lowest-performing school districts in El Paso. One of the organization's main goals is “to reduce the achievement gap between ethnic minority and poor students and their more privileged peers.” And since its inception, the Collaborative has raised more than $30 million in grants and has helped overhaul the district's curriculum and teaching methods.

A comparable K-16 partnership has been established between Rosemont Elementary in Baltimore, and its neighbor, Coppin State College. Dr. Russell Perkins, Rosemont’s principal, describes Coppin as the “operator” of Rosemont.

The union was initiated three years ago when Rosemont scored poorly on state exams and was placed on a list of failing schools. Frank Kober, a professor of education at Coppin, told Time, “We had to ask ourselves, If we didn’t help, who would?”

Today, Coppin participates in everything from hiring Rosemont’s principal to ensuring that students receive their immunizations. Specifically, Coppin professors teach several courses at Rosemont, and undergraduates serve as teachers’ aides. In a unique summer program, third and fifth graders can take courses on Coppin’s campus, among them, technology, reading, math, and swimming. Another aspect of the partnership is that the tuition is waived for Rosemont teachers who enroll in Coppin, thereby encouraging them to enhance their knowledge and upgrade their skills.

The University of South Florida (USF) took the usual K-16 relationship a step further and was the first public university in the country to establish a charter school. Located on its campus, the charter school includes grades K-3 and is exclusively for “at-risk” students.

In addition, USF opened Pizzo Elementary School, also on its campus, in the fall of 1998. USF’s website describes Pizzo as a professional development school “devoted to the preparation of preservice teachers, the continuing staff development of experienced professionals, and the research and development of practices that will lead to superior educational outcomes for children.”

A completely different approach to the K-16 alliance is the National Demonstration Project, centered at the two-decades-old Yale-New Haven Teachers Institute. Serving urban school systems that enroll students who are mainly from low-income and minority communities, the Project features seminars, organized by participating universities, that are available to teachers in nearby school districts.

One “K-16” feature of the Project is the exchange of ideas between K-12 teachers and university professors that takes place during the seminars. University faculty contribute their knowledge of a particular field, and the K-12 teachers contribute “their expertise in elementary and secondary school pedagogy, their understanding of the students they teach, and their grasp of what works in the crucible of the classroom,” states the Project’s website.

Yale University, one of the participating institutions, works with 44 schools that serve nearly 20,000 students, 28 percent of whom are Hispanic. Two of its seminar topics have been “Women Writers in Latin America” and “Ethnicity and Dissent in American Literature.”

The other four teachers institutes are housed in Pittsburgh, Houston, Albuquerque, and Santa Ana, the latter consisting of a student population that is 90 percent Hispanic.

Other K-16 systems are organized and run by states as opposed to individual schools or districts. In Georgia, for one, former Gov. Zell Miller started the Georgia P-16 Initiative in 1995. He created the Georgia P-16 Council and appointed members from a broad range of businesses, community groups, and education agencies, including the Board of Regents and the State Board of Education.

**Visible Results**

Perhaps even more important than describing how these partnerships work is demonstrating that they actually do work. And fortu-
nately, success has been identified in both K-16 theory and reality.

In its report, ECS outlines the many conjectural benefits of P-16 partnerships. They improve student achievement, it argues, by improving communication among students, parents, and educators, resulting in "unimproved pathways to the next level of learning." They also increase access to college, says ECS, because the pathway to college is clearly marked.

In terms of university admissions, ECS mentions Oregon's Proficiency-based Admission Standards System (PASS) as one of the most advanced attempts to link K-12 standards with university admissions. The PASS system provides a "tangible road map for college admission" and, according to David McDonald, director of enrollment and high school relations for the Oregon University System, is able to "tell a 16-year-old or, more importantly, a 12-year-old what they need to be doing to prepare for college."

Another K-16 goal, according to ECS, is to make it easier for high school students to enroll in college courses prior to completing all of their requirements for high school graduation. Utah encourages this through its New Century Scholarship program, which mandates that the State Board of Regents and the State Board of Education "shall jointly award New Century scholarships to students in Utah schools who complete the requirements for an associate's degree by Sept. 1 of the year they qualify to graduate from high school."

The achievements of existing K-16 partnerships, such as Rosemont's and Coppin's, are also extensive. Not long ago, nearly two-thirds of students in the district didn't make it through high school. On a standardized test conducted three years ago, only 50 percent of Monroe first graders read at grade level or above. Time reports that in Maryland's university system, educators credit K-16 outreach for a drop in remediation rates and a rise in SAT scores and minority enrollment.

Likewise, in El Paso, K-16 partnerships are a success. "Before UTEP stepped in, just a small percentage of students took Algebra II and Chemistry; now more than half do," Time states. "Compared with 1994, when just one school in the university-aided districts netted an exemplary rating on state exams, last year 18 did. Most importantly, the University ascribes this year's 3 percent increase in student enrollment to the partnerships' efforts."

Sánchez says both UTEP and Marion Manor reap the benefits. "Our teachers are exposed to new teaching strategies and research on instructional strategy," he says. Testing results attest to the positive effect on students. In math, for instance, nearly 95 percent of Marian Manor's students passed examinations last year whereas during Sánchez's first year, only about 50 percent had passed.

In addition, the partnership "minimizes the investment of bringing in new teachers with limited practice," says Sánchez, and UTEP's student teachers have scored higher in their methods courses than ever before.

Then there are the powerful yet intangible results. Perkins, Rosemont's principal, says the alliance "lets students see people who came from their community" and gives them hope that they too can succeed and attain a college degree.

Sally Blake, coordinator of the partnership's science program and associate professor of teacher education at UTEP, teaches physical education twice a week at Marian Manor. "It's wonderful," she says. "I've learned so much. And the kids love the inquiry-based instruction," says Sánchez. Their curiosity and creativity have improved."

Nevertheless, as with all new programs, there are glitches in K-16 partnerships. Even at Marian Manor, there were significant problems in the early period of implementation, particularly because of the dedication of time required of teachers. Sánchez advises that administrators "prepare the teaching staff to work in this type of setting, especially with time management."

Another way to alleviate problems is to designate a liaison between the two institutions, as Rosemont and Coppin did, to ensure continual communication. It's impossible to know if and how K-16 partnerships will affect the face of the American education system. But one can hope that the results will mirror those at Marian Manor, which has become, in Blake's words, "a community of learners."

Major Goals of a P-16 System
• Expanding access to early learning for children ages 3 to 5, and improving their readiness for kindergarten.
• Smoothing student transitions from one level of learning to the next.
• Closing the achievement gap between White and minority students.
• Upgrading teacher education and professional development.
• Strengthening relationships between families and schools.
• Creating a wider range of learning experiences and opportunities for students in the final two years of high school.
• Improving college readiness and college success.

New Study Examines Hispanics, Religion, and Politics

Notre Dame, Vanguard, AMEN, and MACC
Join Forces in Pew-funded Project

BY INÉS PINTO ALICEA

A major study is being conducted on the influence of organized religion on political and civic activism in the Latino community, both in the U.S. and in Puerto Rico. Results are expected to present a powerful and positive image. The study is entitled “Hispanic Churches in American Public Life.”

“I hope this shows that Latinos are engaged in American public life and that we can make an impact, that our voice does count,” said Dr. Jesse Miranda, co-director of the research project and distinguished professor and director of the Center for Urban Studies and Ethnic Leadership at Vanguard University in Costa Mesa, Calif. “I hope that Latinos will see themselves not just as followers but as leaders, not just as consumers but producers, and that Latinos will be looked upon as citizens, not as clients.

“Hispanic political leaders such as César Chávez, Dolores Huerta, Reies López Tijerina, and Luis Rivera Muñoz all drew upon religious imagery and symbolism in their struggle for political and social justice. Despite this fact, little has been written concerning the dynamic relationship between religion and civic engagement in the Latino community.”

The project, a three-year study funded by a $1.3 million grant from the Pew Charitable Trusts, has two sponsors. One is the Alianza de Ministerios Evangélicos Nacionales (AMEN)—National Alliance of Evangelical Ministries, a multi-denominational association of Hispanic Protestant lay and clerical leaders in Canada, Mexico, the United States, and Puerto Rico. The other is the Mexican American Cultural Center (MACC) at the University of Notre Dame. The University of California at Santa Barbara serves as the administrative office for the project.

“We want to take the church from behind four walls and out into the street to make the church more relevant in the lives of our people,” said Miranda, founding president of AMEN, which represents 27 denominations, 70 para-church agencies, and 22 nationalities of Hispanics. The

“I hope that Latinos will see themselves not just as followers but as leaders, not just as consumers but producers, and that Latinos will be looked upon as citizens, not as clients.”

DR. JESSE Miranda,
DIRECTOR OF THE CENTER FOR URBAN STUDIES AND ETHNIC LEADERSHIP, VANGUARD UNIVERSITY
Allianse fosters unity among religious leaders, churches, and organizations and promotes a central voice for Hispanic Protestants. Miranda is an executive presbyter with the General Council of the Assemblies of God and in this capacity was the first Latino to serve on the national board.

AMEN and MACC have contracted the Tomás Rivera Policy Institute to conduct a national survey of 2,400 Latinos and 800 Latino leaders across the U.S. and Puerto Rico. It will be followed up by community studies in six major cities—Los Angeles, San Antonio, Chicago, Miami, New York City, and San Juan, Puerto Rico—and two rural areas in Colorado and Iowa. The Tomás Rivera Policy Institute, the project directors and project manager, and an advisory council of nationally recognized scholars of religion, political science, sociology, history, and public policy will supervise the survey and ethnographic work.

"People are familiar with the impact of religion on the African American community, but in the Latino community, that has not been explored in the same way," said Dr. Gastón Espinosa, a visiting scholar in the department of religious studies at UC Santa Barbara, where he oversees the research project and teaches courses on North American Latino religions. "If someone asked about Latinos, there would be few answers, and not definitive."

The study, now in its second year, is comprised of the surveys and an anthology. The anthology, which is nearly finished, gives the project the sense of history it was seeking, said Espinosa, adding that a book proposal is in the works on the research compiled for the anthology.

The anthology was divided into four parts: religious and political activism in the Southwest, church-based civic empowerment, church-state conflicts in the United States and Puerto Rico, and César Chávez and the politics of civic engagement, said Espinosa.

The leaders of the project conducted a national search for proposals of papers to be included in the anthology. Each of the scholars selected received $3,000. Some 11 scholars presented papers for the section, which will provide insight into religion’s impact on political and civic engagement.

Dr. Virgilio Elizondo, a Catholic priest, is the founder of MACC, through which thousands of community leaders and citizens have been introduced to Latino spirituality. Father Elizondo said that the leaders of the project have discovered that as they move forward, they realize that their study is just a ‘serious beginning’ and a launching point for further study of the vast subject.

"The study is not going to do it," said Elizondo. "The study will indicate that more research needs to be done. We’re hoping that our study will give the Latino community a better understanding of itself, particularly since it is a survey of ourselves by ourselves."

The surveys, which the Tomás Rivera Institute is handling, include a telephone survey with 59 questions that take about 18 minutes, and a leadership survey distributed to 5,000 political, civic, education, and community leaders. The return rate on the leadership survey is projected to be small but providing a large enough statistical sample to provide a good picture of the thoughts of Latino leaders on religious issues and their effects on political and civic engagement.

"Some of the questions we asked the leaders included the impact the church has on getting them involved in politics, in getting them involved in voter registration, and in fighting poverty," said Espinosa. "We wanted to know how the views and attitudes of leaders were different from the rest of the population."

The studies in the cities and rural communities will be used to clarify any issues that arise through the surveys. People from different religions will be interviewed in each city for that section.

"The future of America will depend not only on the workforce but also on the engagement in the civil life of people of color," said Miranda.

Miranda said he has been pleased at how smoothly the project has gone so far since it’s the first major effort of its kind conducted between Catholics and Protestants.

"There is no competition, and there is no conflict," Miranda said.

Espinosa said he hopes the study will be a benchmark for future studies. He expects that the executive summary for the study will be released in April 2002, but the anthology will probably be released sooner. The study should answer many questions, he said, such as how many Catholics and Protestants are Democrats or Republicans, how Hispanic women differ from Hispanic men in their political and civic participation, how churches are trying to address key social problems, how Catholics differ from mainline Protestants and mainline Protestants from Pentecostals in their level and type of political affiliation and civic participation, and which of the 500 Protestant denominations are growing in the Latino community, among other questions.

"Because the sample size is so large, the findings will be definitive," said Espinosa, adding that the researchers’ initial estimates indicate that some 22 percent of Latinos report they are Protestant while 70 percent report they are Catholic.
Moreover, the comparative nature of the study will reveal important regional and subethnic group differences among Mexican American, Puerto Rican, Cuban, Central American, Spanish, and Latin American immigrants. It will also reveal important differences between Latinos and African Americans and Anglos.

The study has five major goals:
• to examine the impact of Catholic, mainline Protestant, Evangelical, Pentecostal, and new religious communities on participation in American politics and civic life;
• examine presidential election voting patterns, type and level of civic and political engagement, religious affiliation, church-state debates, and regional and sub-ethnic group variation on these and related topics;
• determine and respond to the needs of churches and religious communities attempting to engage in American public life;
• stimulate creative discussion on the intersection between religion and political and civic life in the United States and Puerto Rico; and
• spotlight the vital contributions and perspectives of women in religion and civic life.

Elizondo said he was heartened to discover that, among the initial survey findings, 90 percent of the respondents said that churches should help immigrants.

"That was very affirming," said Elizondo.

Elizondo hopes that once the researchers get past the fact-finding stage, they will be able to translate the findings into documents that will help others prepare for ministry.

"The reason I took on this project was to determine whether religion has or doesn't have an impact on society," said Elizondo. "The findings will impact the type of preaching that is done, the kinds of church activities held, and other things."

Elizondo has been cited by Time magazine as one of the nation's leading spiritual innovators. As part of a series titled "Time 100: The Next Wave," the weekly news magazine features the innovative men and women who are likely to be the most influential individuals of the future in 18 fields, including religion, politics, music, technology, science, design, and justice. The series is a sequel to last year's popular "Time 100" survey of the leading figures of the 20th century.

As one of six named as spiritual innovators, Father Elizondo was recognized in part for his work at the San Fernando Cathedral in San Antonio, Texas, where he has made Mexican religious customs and traditions a component of the church's Mass and has initiated an internationally televised bilingual service. He is a faculty member at the University of Notre Dame and author of more than a dozen books, including The Human Quest, The Future Is Mestizo: Life Where Culture Meets, and Guadalupe: Mother of the New Creation.

The Hispanic Churches in American Public Life project is part of a much larger Pew study, "Religious Communities and the American Public Square." This $10-million study is sponsoring seven major studies on religion and public life among African American, Catholic, Evangelical, Hispanic, Jewish, mainline Protestant, and Muslim communities across the United States. Dr. Luis Lugo directs the Religious Communities and the American Public Square project. This larger study seeks to foster greater public understanding of the importance of the religious voice in the renewal of American democracy and to provide people of faith with the institutional resources they need to translate their religious beliefs into healthy civic engagement.

The Pew Charitable Trusts support nonprofit activities in the areas of culture, education, the environment, health and human services, public policy, and religion. Based in Philadelphia, the Pew Charitable Trusts make strategic investments to help organizations and citizens develop practical solutions to difficult social problems. In 1999, with about $4.49 billion in assets, the organization committed more than $250 million to 206 nonprofit organizations.
Established in 1975, Los Angeles Mission College recently celebrated its 25th anniversary. When it first opened its doors to higher education, President Adriana D. Barrera says it did so utilizing "storefronts, bungalows, and any space with the capacity to convene classes." Dr. Barrera, officially inaugurated on Dec. 1, 2000, adds, "During its brief history, the College has withstood the challenges of being the only institution bringing college-level instruction to the communities of the northeast San Fernando Valley. Its first students were primarily working adults focused on job-related and career-path upward mobility." Then, the president says, there was another opening of the doors at LAMC in 1991. "This time, the doors were to its new campus and new buildings on land of its own," she emphasizes. "Gradually, the faculty and staff saw their students change in terms of their age, goals, and preparedness."

President Barrera energetically took the helm of LAMC last July after working her entire professional career in Texas, where she was born and raised. The former president of El Paso Community College, she is the first Latina to head the campus. This should begin an era of administrative stability. There have been four acting presidents among nine presidents and a host of active vice presidents in the community college's 25 years.

Barrera promises a personal presence people can count on. "I'm here, and I'm not going anywhere anytime soon," she vows.

The construction of a new instruction building, with high-tech classrooms and science laboratories, began during the Fall 2000 semester. Barrera says that the faculty and staff, many of whom have been employees since the days of those early teaching storefronts, together with new, enthusiastic educators, offer students the opportunity to enrich their lives, expand horizons, and "learn for the sake of learning."

Los Angeles Mission College is one of nine in the Los Angeles Community College District (LACCD). The District encompasses 882
square miles and serves more than 100,000 students from a population base of nearly five million. The District includes the city of Los Angeles and several surrounding communities.

Mission College is located on 22 acres in the foothills of the northeast San Fernando Valley, in the city of Sylmar, close to San Fernando. In 1991, after its 16 years in storefronts and various leased spaces and with the completion of its permanent campus, the College experienced a surge in enrollment and higher visibility.

So far, the College has served three generations of students. During its 25 years, more than 100,000 students have pursued one form or another of higher education at the College. Mission College provides lower-division general education, A.A. and A.S. degree programs, occupational education, occupational certificates, transfer education, developmental education, counseling, and community services. The College has operated numerous workforce development programs; empowered immigrants through language and citizenship programs; enabled thousands to transition through the continuum of education linking high school, college, and the workplace; and graduated a number of community leaders in business and civic affairs.

Educators at Mission College report that the school experiments with the latest technology in order to provide students with access to the skills and knowledge they need for success. It encourages young people to pursue their potential with classes taught in area high schools for high school students. Mission supports growth programs with numerous community events and business seminars, promotes lifelong learning with classes offered in community locations, and advocates social and economic development in the community through dynamic partnerships with local businesses and civic organizations.

This relatively young institution demonstrates dynamic movement and offers many points of interest; the new president with her seven-day workweek and the rapid growth of the physical campus are but two. Student demographics tell much of this story. In its recent history, female enrollment has been high, averaging 65.1 percent between Fall 1995 and Fall 1999. The age distribution of the College population

has remained fairly constant, although the percentage of students, under 20 increased from 159 percent in Fall 1995 to 21.3 percent in Fall 1999 while the percentages of older age groups declined only slightly. The ethnic composition of the student body has also shifted somewhat. Hispanic enrollment increased from 654 percent in 1995 to a high of 695 percent in 1999, then leveled off at 685 percent, 4,760 of the total of 6,953 students for Fall 2000. There were 418 African-Americans, 404 Asian-Americans, 1,025 Whites, and 340 others. Total enrollment is projected to climb to 10,000 during the next five years.

The percentage of Hispanics leads by far all of the other component institutions of the Community College District. The District average is 46.4 percent Hispanic.

In Fall 1995, 63 percent of students reported English as the language spoken at home, with Spanish being the second most predominant, at 30.1 percent. By Fall 1999, English declined to 60.7 percent, and Spanish increased to 33.0 percent.

LAMC students typically devote a significant amount of time to employment while attending the college. About 41.6 percent of the students work 35 or more hours per week. Another 215 percent work between 21 and 34 hours a week.

The total faculty at LAMC consists of 91 regular faculty members and 187 hourly, including non-teaching faculty. Of the total regular faculty, 20 (22.0 percent) are Hispanic; seven, African-American; four, Asian-American, and 60, Caucasian. The instructional staffing pattern at LAMC has shifted since Fall 1995, when 475 percent of instructional faculty was regular full-time equivalent (FETP). In Fall 1999, that percentage was 55.6. Hourly faculty comprised 40.8 percent of total faculty in 1995. This figure increased to 58.8 percent in 1999. The total number of College employees (excluding student employees) was 394 in January 2000. Females made up 40 percent of all College employees, and total minority representation (consisting of Asian, African-American, and Hispanic groups) was 39.1 percent. Minorities comprised 62.5 percent of the College administration and 60 percent of classified staff. Minorities comprised 32.1 percent of the regular faculty.

The proportion of students declaring vocationally related educational goals increased from 36.8 percent in the fall of 1995 to 41.0 percent in Fall 1999. The proportion of students declaring general education and transitional education (such as improving basic skills) has increased over this period from 73 percent to 85 percent and from 59 percent to 86 percent respectively. Also of note, the proportion of students declaring transfer as a goal has increased only slightly, from 24 percent in Fall 1995 to 24.9 percent in Fall 1999. The College reports that the percentage of students who have not decided on an education goal has declined significantly, from 26.0 percent to 17.1 percent over this period.

Statistics do tell much of the story, yet individuals have stories of their own. Fred Flores, a disabled veteran, returned to college and while working full-time was able to complete his Associate of Arts degree in five semesters. Flores graduated magna cum laude from Mission and has been accepted to UCLA's School of Communication. After the commencement ceremony, Fred said, "I can't believe it; I didn't think it was possible, but Mission College made it possible."

Gabriel Dávila is an engineering major. The story he tells is representative of many studying at Mission. "I did not expect to go to college after graduating from high school. I had a decent job as a box-person at a local supermarket, a steady source of income and benefits...no bills, and life was good. As time progressed, I began to realize how limited my career options were without a college degree. I was doomed to a life of mind-numbing, dead-end, and physical occupations that offered no mental challenges." He decided to enroll at L.A. Mission College but had no plan of what direction to take, and he was unclear about his career goals. Like many, he put off taking the more difficult math and science classes. But this is where he found his career. He decided to be an engineer, a field in which Hispanics are traditionally underrepresented. He says he has the chemistry, engineering, math, and physics faculty to thank, not just for reaching him coursework but also for taking an interest in his work and goals, and for changing his life.

"I have been hired in a professional position in the Mechanical Properties Laboratory at Superior Industries." He reflects, "I am now able to observe engineers operating in their professions, and I am gaining real-world experience in industry. Soon I am going to be an engineer, just like them."
At the Top of His Game

Mike Salazar—the new head baseball coach at Rio Hondo College

Before so much as any other sport, baseball is a game of paying your dues. Even the most highly touted of prospects know that before they can reach their ultimate goal of playing in the big leagues, they must first endure a few seasons in the bush leagues. The endless bus rides, threadbare motels, and meager wages are a part of the journey.

And it's no different in the coaching ranks. Those who aspire to become full-time managers—be it at the professional or college level—know that they will first have to work their way up the coaching totem pole.

Mike Salazar, the new head baseball coach at Rio Hondo College in Whittier, Calif., has finally seen his dues pay off. After an impressive playing career at Azusa Pacific University, a brief flirtation with a professional baseball career, and six years as an assistant coach at Citrus College in Glendora, Calif., the 28-year-old Salazar now has a program to call his own. Salazar took over the Rio Hondo team in July of 2000, replacing coach Mike Scalinos.

"Full-time coaching jobs are very hard to come by in this area," says Salazar, who learned about the Rio Hondo opening from Robert “Skip” Claprood, his head coach and athletic director at Citrus College. "And you always want to go to your own place of work and have your own team and be full-time there—that's always ideal if you can get it."

Salazar, who grew up in the nearby Ontario/Chino area, didn't always know that coaching baseball would become a way of life. It wasn't until he attended Azusa Pacific that he found his true calling.

"I started off as a business major, and I thought I'd have a normal job," says Salazar, who was also an outfielder for Azusa Pacific, helping the team win two district and three straight league championships.

"All of a sudden, as I went through college, I realized that baseball was a part of my life and I couldn't really leave competitive sports. So one way to stay around it was to become a coach. It seemed logical."

After earning his business degree, Salazar obtained his master's in education, with an emphasis on physical education. Upon graduating in 1994, he began working as a PE instructor in the Montclair Unified School District. He also stayed close to baseball by becoming an assistant coach at Citrus. But in 1997, Salazar's coaching/teaching track took a slight detour. It all began when he went back to Azusa Pacific for an alumni baseball game.

"I went back to my old alumni game, and I pitched a few innings," recalls Salazar, a left-hander who apparently impressed a few of his fellow alumni. "Someone said, 'Why don't you pitch?' and I said, 'I don't know.' He said, 'Let me make a call for you,' and he actually made a call to his old manager."

The next thing Salazar knew, he was invited to spring training. "I went as a pitcher, and I made it," Salazar recalls with a laugh. "Left-handed pitchers are definitely needed in baseball."

Assigned to an Independent Western League team in Washington called the Tri Cities Posse, Salazar had to leave his teaching and coaching posts a month early to report to camp. He also had to leave behind his new bride, Krista.

While Salazar was thrilled to be living out his dream of playing professional baseball, adversity soon struck. Pitching out of the bullpen for the Posse, Salazar says he began to develop some inflammation in his throwing arm. Adding insult to his injury, the Posse released Salazar a short time later. But on the very same day of his release, he was signed by a team in Michigan called the Kalamazoo Kodiaks.

"I had to drive home, tell my wife I was re-signed by Michigan, and then fly out to Michigan the next weekend," says Salazar, whose inflammation subsided, thanks to the week's worth of rest. "When I got out to Michigan, I was fine."

Salazar finished the season with the Kodiaks and then came to a decision. "After I finished playing with Kalamazoo, I had reached my goal of playing pro baseball," he says. "I decided I could just shut it down. I just stopped playing; I didn't need to play anymore. I could have played; I just didn't want to play anymore."

Instead, he reset his sights on his teaching and coaching careers and on settling down in his native Southern California. While at Citrus, he became an adjunct faculty member. His responsibilities with the team included working as the third base and outfielders coach while also playing an active role in recruiting.

Salazar got a taste of international baseball while at Citrus, going to Europe with the team to participate in the Rotterdam Tournament, where they faced teams from Cuba, Taiwan, and the Netherlands.
While Claprood appreciated Salazar's work at Citrus, he also knew that when the Rio Hondo job opened up last summer, it was something his assistant had to go for. “I had known Mike since he played with my son at Azusa Pacific, and then he came over to coach with us, and he was always a dedicated individual,” says Claprood, who has seen 31 of his players go on to become high school or college coaches during his 32-year tenure at Citrus. “I’ve seen him grow from a novice into an outstanding college coach. I think he’s going to do a wonderful job at Rio Hondo. We were sorry to lose him, but this opportunity came up. He and I talked all summer about it and felt it was something he had to take. There aren’t too many California community college full-time jobs that open up, and this was an opportunity I felt he had to go after.”

But with Salazar getting the Rio Hondo job during the summer months, he had already missed out on the prime recruiting period for the 2001 season. Incoming first-year students are vital to a two-year junior college program, and Salazar had to do something to bolster his numbers. That’s when he turned to his former mentor at Citrus.

“I had recruited the whole world to go to Citrus, and all of a sudden, I got the Rio Hondo job in mid-July,” says Salazar, who sat down with Claprood and selected players from the Citrus roster—both returnees and recruits—whom he could bring with him to Rio Hondo.

When all was said and done with the pseudo “expansion” draft, Salazar brought three players from the 2000 Citrus team as well as nearly a dozen recruits.

Salazar actually got his first look at his new team during the fall, when he held a baseball clinic, which was essentially a semester-long tryout for the spring team. At Citrus, Salazar says, they usually had upwards of 100 players participate in fall baseball, but last year at Rio Hondo, he only had about 60 players. Regardless, Salazar evaluated the talent during the 27-game fall ball season and hammered out his final roster at the beginning of January. By Feb. 2, the team was on the diamond and playing games for real.

The Roadrunners, who finished second in the Roadkill Conference in 2000, got off to a so-so start this spring, going 12-12 over their first 24 games. But two of those games came against Citrus, and Salazar was able to lead Rio Hondo to a split of the series. “It just happened to be in that one game,” says Claprood with a laugh, “that all those players that we allowed to go over with him came back and bit us.”

With only one of the 20 incoming students from last year’s team returning for the 2001 season, Salazar realizes that this year’s team will have to put up with some growing pains. But he’s patient, with an eye toward next season. “This year will be our first full year of recruiting with our own guys in here, so we’re excited for next year because we knew this year, we just had to survive and do OK,” says Salazar, who brought in a pair of former college teammates—Tom Woff and Tom Allyn and Tom Wolff—along with Steve Bray to work as his assistants at Rio Hondo. Together, Salazar says, we are trying to build a new image of Rio Hondo baseball.

“With no exceptions, our main intention is to win, go to the playoffs, and do well in the playoffs. And eventually, a state championship is on our mind,” Salazar says. “But right now, it’s just building a foundation for this program, getting kids in here, and making it a place where they will want to come.

Before, it wasn’t the most well-respected place in the world. But now we have new grass on the field, new uniforms...everything is new. The key thing was just getting to the place where people would want to come here and see the place.

“So now that foundation has been laid, we have very, very high goals and aspirations of how we want this place to be—a top-level place in the area where people will want to come. We’re getting good response from the recruits. People around the community, scouts, and everyone are noticing a big change here, so it’s just a matter of time.”

Of course, Salazar’s job isn’t just to teach young men the game of baseball. He knows he’s also responsible for their education. During his time at Citrus, he saw 86 percent of the players continue with their education on athletic scholarships. It’s an impressive track record that Salazar hopes not only to emulate but to improve upon at Rio Hondo.

“This year we might even have all six of our sophomore move on to four-year schools—100 percent—and hopefully with some kind of scholarship, so that’s our goal,” says Salazar, who has implemented a mandatory study hall for his players each day after practice. “That’s something I felt strongly about....I wanted to make sure that these kids knew: This is what you’re doing. You’re going to go to study hall no matter what, with a coach there monitoring you, and you can’t screw up. They need to know that we’re serious about their academics and getting them out of here.”

Salazar, on the other hand, is in no rush to leave Rio Hondo. He and his wife recently had a baby daughter, so the family roots are taking hold. Salazar also knows how rare the full-time coaching jobs are, and after years of paying his dues, he believes he’s with the Roadrunners for the long haul.

“I love JC baseball because we get the best of both worlds,” Salazar says. “We can recruit the high school kids, which is exciting—it’s a competitive recruiting area around here—and I get to send them on to a four-year school when they graduate, and they can go and play baseball. So I’m right in the middle of developing them and then moving them off, not just recruiting them and letting them play.”

And while they’re playing for him at Rio Hondo, Salazar feels he can help his players along by sharing his own life’s experiences.

“My philosophy has always been—as you make your career choice, you always want to pick something that you love and enjoy,” he says. “And with players, it’s the same thing. As you’re in school and as you plan your career, choose an occupation that you love to go to because it’s very important to come home to your family and be happy at the end of the day. Coaching is what made me happy, so I chose to do it.”
HBLI Preparing Leaders, Border Style

Five-State Consortium Headquartered at ASU

BY JEFF SIMMONS

When we look at the idealistic fellows who’ve embarked on the same path as she has, Liz Gutiérrez easily stands out.

Not because of her goals and enthusiasm but because of her age.

"Here I am at the ripe old age of 50 getting a greater understanding of this," says Gutiérrez. "Most of the others are between 27 and 30 years old."

Gutiérrez is among a group of Hispanic women and men accepted into the Hispanic Border Leadership Institute’s fellowship program. The awards give them a chance to pursue doctorates in education and become leaders in education.

Gutiérrez has a good head start. She arrived on the University of California at Riverside campus with life experience and lessons from the workforce, the political landscape, and not-for-profit outfits.

"It’s wonderful and exhilarating to be in a campus environment," she says. "I think the dynamics are interesting because we bring a lot of different backgrounds and experiences to the table. It’s just a wonderful group of people."

Gutiérrez was motivated to follow through on a nagging urge, one that she had tried to ignore for years. By applying for the fellowship, she says, she has gained a greater appreciation of the struggle that many younger students face.

"It takes money and strong professors who believe in you, and," she adds, "it takes a good cohort of supportive students surrounding you."

That she has.

The Hispanic Border Leadership Institute was launched in 1996 to foster change in educational organizations. Founded by four Hispanic educators, the six-year initiative has evolved into a consortium of eight higher education institutions in Arizona, California, Colorado, New Mexico, and Texas.

In recent years, faced with the booming Hispanic population, the colleges have all focused their attention on improving education for Hispanics. HBLI pins its hopes on generating more Hispanic administrators, teachers, and leaders.

The organization hopes its fellows become “change agents” to influence their charges and...
public policy. Additionally, its mission is to influence state educational policies and help elected local school board members and community college trustees understand policies.

Working with state legislators, HBLI members have offered training sessions and educated officials on the consequences of proposed policies. For instance, HBLI distributed papers on the California bilingual proposition in other states, projecting what would happen if a measure passed—or didn’t.

Its mission seems pivotal in the wake of this year’s Census 2000 figures, which paint a portrait of a much more diverse American landscape. The border states have witnessed much of that change.

“As Hispanics, we now should be taking more leadership positions and expressing the conditions for our people and the future for people of color in the United States,” says HBLI’s director, Leonard A. Valverde, professor of educational leadership and policy studies at Arizona State University.

“The African American community has had that role, given that they’ve been the largest group, and they’ve done a very good job pointing out to America what our plight and circumstances have been. So I think the role is going to change and now the burden falls on us.”

The Census figures, he adds, reveal that education should be a critical focus of future efforts. The dropout rate is far higher for Hispanics than for Whites, and the graduation rate much lower. The acceptance rate into four-year institutions lags behind that of Whites.

“They are indicators that the educational system is not up to par,” Valverde says.

“We have not done a good job of educating our minority populations, and if they’re going to be a majority of the workforce and a majority of the citizens, if America is to remain competitive worldwide, we’re going to have to build a stronger, more educated citizenry.”

HBLI, which is funded largely by the W.K. Kellogg Foundation, is headquartered at Arizona State.

It began with four members in 1996, grew by three in 1998, and then came to include an eighth school last year. The group is comprised of schools with sizable Hispanic enrollments.

They are: Arizona State University, New Mexico State University, Palo Alto College, Paradise Valley Community College, Southwest Texas State University, the University of California at Riverside, the University of Texas-Pan American, and the University of California at Bakersfield.

The fellowship program is its pride and joy. Since its foundation, HBLI has poured over hundreds of applications from potential fellows. Currently, it has 30 doctoral fellows on four campuses. Several schools waive tuition—and boost the program’s funding, as well. Nine fellows have already completed three years of study, and eight of them have earned their doctorate. The second group had 10 fellows, and the most recent, 11. Officials boast about a retention rate well above the national average.

Fellows are chosen based on their desire to take part in research studies and serve leadership roles in college and community projects. Even if a fellow wants to be a college president, the program still encompasses primary and secondary education studies. Leaders say they want the fellows to embrace a holistic view.

“Traditionally, people come in and say they want to concentrate on one thing,” says Valverde. “And all of their study revolves around that. We say, if you want to be a community college president, you still need to know what’s involved in K-12 because you receive their products and you need to know what’s happening.”

Fellow Luis Cruz agrees. He is specializing in institutional leadership and policy studies at the University of California at Riverside.

“My goal is simply to give back to the community I came from,” says the 30-year-old. “As a superintendent, I want to be able to go in and prove to folks that kids we often think cannot make it are...
absolutely capable if we have the passion and the desire to succeed."

Cruz, who is completing his second year at the school, says, "I want to go back to a K-12 institution as a superintendent, and so I'm going to have to understand policy in order to be a leader."

Cruz hopes to engage in that influence where he grew up, or somewhere nearby. He was reared about 30 miles east of downtown Los Angeles, and that experience inspired him to want to help generations of younger students.

"Having been first-generation myself, I feel an obligation to go back to those environments and be a part of the team that addresses the fact that these communities don't usually have strong educational commitments," says Cruz, whose family is from Ecuador. "I want to say that doesn't have to be the case."

It was a teacher who initially led him down this path. As a third grader, Cruz watched classmates ignore their teacher, and one day, he stepped up to the chalkboard to lead them in a lesson.

"I remember getting up in front of the class and deciding I was going to teach it because she wasn't able to," he recalls. "She looked at me and said, 'I think you're going to be a teacher someday.' I later realized that it was my calling."

After graduation from college, Cruz taught fifth grade for six years in the Baldwin School District in Los Angeles. Eventually, he transferred out of the classroom and professional manner when things weren't going right," he says.

There were startling discoveries along the way, such as the whiter face of the administrative ranks. Where he worked, 95 percent of the students were Latino and poor. Yet, district offices were largely White and male.

"I began to see that there was a clash in understanding exactly how this population of students needed to be served because these people were driving 45 minutes to get into the district and they wanted to know how I was able to connect with these families and understand them," he says.

There was a disconnection between what they experienced growing up and the community they were serving.

The fellowship program has helped Cruz hone his leadership skills, primarily by giving him a chance to see how others negotiate and weigh diplomacy and assertiveness.

"It's something that is amazing because I really get to learn from them," Cruz says. He also brings in-the-trenches experience to the table. "Meeting these folks has been a very exciting, motivating experience. They bring experience and advice to the table. What we really are is a family."

However, he sees the horizon obscured by many obstacles, often recalcitrant officials and educators unwilling to diversify their ranks. Says Cruz, "I think some school districts really want to be progressive and might see this as an asset, but to be honest, others might see it as a threat."

"We need to make some changes in order to address the fact that historically many people of color had been marginalized," he adds, "and unable to obtain what everyone else was able to: a great education."

HBLI FELLOW LUIS CRUZ

"We need to make some changes...historically many people of color had been...unable to obtain what everyone else was able to: a great education."
education of others as well, including school board members. Within its scope are neighborhoods that have seen voters send more Hispanics onto the policymaking boards.

"Many of them are not well-informed about educational practices," says Dr. Miguel Nevárez, president of the University of Texas-Pan American, a consortium member. "I think the education of these school board members will be a benefit to a school district because your members understand educational theory."

HBLL's workshops, held in each of its members' states, instruct members on issues concerning Hispanic education. The hope also is that trustees can effect change in their own school districts. The reasons are simple, says Nevárez. A majority of the students in their districts often are Hispanic.

"It's about 86 percent in our area," he says, reflecting on the need for trustees to also push to diversify the workforce in their districts. "We do have a number of superintendents and principals who are Hispanic in the schools, but they do not have a doctoral degree. Many have at most a master's or an administrative certificate."

Bringing the border states together under the HBLL umbrella is fashioned to address issues particularly to those regions. Many of the students and their families migrate back and forth, he says, between America and Mexico. Dual-language programs are continuing efforts, often needing more attention.

"Our fellows are identifying dissertation topics that deal with the ongoing problems you find in the Southwest states along the border—in particular, dual-language students in the public schools," he says.

HBLL's six-year term is nearing its end. But leaders don't want it to end. Last November, two dozen advisory panel members began talking not just about its survival but its expansion.

"We are identifying other foundations to see if they will invest in this so we can get another round of fellows and train more school board members and trustees," says Valverde.

Kellogg originally provided HBLL with $2.8 million to stretch over five years. But when the doctoral fellows program expanded, so did HBLL's run, by one year, and funding was boosted to $4.2 million.

Organizers believe that by the time the first leg of the program ends, they will be able to gauge success by looking at the positions held by its graduates. One is already a dean of students at a community college in Southern California. Two are directors of bilingual programs in New Mexico. Another serves as a Latino Affairs officer in Washington, D.C.

"You can see that they're spread out and in different places in the pipeline," says Valverde. "We will look at their initial placement and where they move to in their career."

Cruz is poised to embark on a new chapter in his career. He maintains that the program has given him a solid boost and solid footing. And though he sees obstacles on the road ahead, his confidence is boosted because he believes there is strength in numbers.

"We're challenging the status quo," Cruz says. "We're saying that things are not as they should be and that we know how to make it better."
Turning Classroom Conflict into Teachable Moments: Part II

BY ANGELA PROVITERA McGLYNN

In Part 1 dealing with this topic, I discussed how to manage yourself when a student makes a comment that pushes one of your hot buttons. To sum up, it is important to know what your hot buttons are so as not to be surprised by your reaction but to stay calm (perhaps by counting to 10), to be comfortable with a moment of silence to allow the comment to sink in for the whole class, and to be open to allowing the students to respond to the offending comment.

Dr. Lee Warren, associate director of the Derek Bok Center for Teaching and Learning at Harvard University, says that it is the responsibility of the teacher to help students to learn from these tense moments. It is also the teacher's responsibility to care for and protect all the students so it is possible for learning to take place. In Part 1, I also presented the results of two brainstorming sessions of a faculty group on our campus in which we created strategies for turning prejudiced comments made in class into teachable moments.

This article will further explore how to keep the classroom atmosphere hospitable to the learning process in the face of hot topics and hot emotions. Even though many of us do not like conflict in the classroom, Professor Warren suggests that exploring these tensions can lead to deep learning. Warren says that some instructors dislike classroom conflict so much that they do all in their power to avoid it or stifle it, while other instructors thrive on such tension, encourage hot moments, and use them for learning opportunities. Warren suggests several strategies for handling the difficult moments so that we can discuss topics we formerly might have avoided and can deal with classroom dynamics and atmospheres we previously might have neglected.

In one of our campus discussions of hot moments in the classroom, a communications professor described her presentation of a topic that frequently gets students hot under the collar. In her mass media course, in which she presents federal regulations about hiring employees who reflect audience demographics, invariably a student says something such as, “I don’t like the fact that the federal government requires the hiring of unqualified people.” This professor then has the opportunity to point out that the search for employees is always among the qualified and that some people might assume that women and minorities are automatically unqualified. She then explains the history of discrimination in the media business so students can understand why the government is attempting to remedy a societal injustice. [Ed. Note: A recent FCC ruling, seen by some as anti-affirmative action, changed related requirements.]

I suggested presenting the history first so that students would have a context within which to understand the reasoning behind the regulations. Some of my colleagues disagreed; they suggested that it would work better if students became engaged in the discussion first rather than have them be passive recipients of information that might even dampen their willingness to express their ideas. Another communications teacher suggested adding a reading or a text when presenting sensitive information so that the class discussion could be data-based. In this example of the media, there is a lot of material, which the students could research and gather, that would show them the ongoing discrimination in the industry.

Warren describes a class in which a student said she didn’t think the United States should have gone to war to prevent the Holocaust because “they weren’t Christians.” One of the strategies, suggests Warren, for dealing with hot moments is to “listen for the song” beneath the words of the student. In other words, by pursuing the conversation, try to discern what the student is really saying.

Warren explains that the student who made
what seemed to be an anti-Semitic comment was African American. Her subtext might have been that we need to deal with our own racial issues in the United States before taking on ethnic/racial/religious issues of other nations. Had the instructor pursued further conversation with the student rather than avoiding her remarks altogether, the class might have had a rich discussion about several important topics.

Warren suggests several strategies for getting students to think in the face of such hot moments. She encourages the establishment of norms for discussion either early in the semester or even as the hot moments arise. She says that we need to model norms that encourage an open discussion of intense material by being open ourselves to multiple perspectives on issues. Our goal should be to take the issue off the student who makes the offending remark and put it on the table for general discussion. We should not allow students to make personal attacks on other students. All participants need to feel safe to voice their ideas. To achieve the goal of removing the offensive remark from the offender, we could say something such as, "Many people seem to hold this view in our society. Why do they hold such views? And why do others who disagree hold their views?" This takes the heat off the student and creates a climate that is hospitable for discussion.

Another strategy suggested by Warren for dispersing the emotional intensity of the classroom is actually a therapy technique often used in treating couples having relationship difficulties. Each person must carefully listen to what the other person has to say. He or she may ask for clarification and then must be able to paraphrase the partner's point of view. Having students engage in this process in the classroom can diffuse the emotional intensity of the moment and create a long way in getting students to hear and understand other students' perspectives.

When the class seems to be getting out of control, writing about the issue is another strategy that works quite well. The process of writing gets students to calm down and to collect their thoughts. When the conversation resumes, students seem more open to listening to other students' ideas.

An outside-of-class research and writing assignment on a sensitive topic is another strategy to get students to open to multiple perspectives. You might assign that they write a balanced essay on a hot topic. You might even suggest that they come to class prepared to argue against what they believe to be true.

Warren says that it is sometimes necessary to speak outside of class to students whom you perceive to have been particularly troubled by the conversation. She says that we ought to be able to help students learn something substantive from the experience. These students need to learn something about the issue that was being discussed in class, and also something about themselves and about other students. They might need to learn something about how to express themselves in class so that their views can be heard. Warren says that these out-of-class conversations can help students and can keep them coming to class with an open mind. In cases where we think the student is deeply troubled by what the class stirred up, we recommend that the student visit with a counselor on campus.

Warren offers another strategy that seems similar to what Dr. Elizabeth Paul (The College of New Jersey) refers to as a content-to-process shift. When the classroom atmosphere becomes emotionally charged, Warren suggests asking students to step back and reflect upon what they might learn from the moment. Paul suggests that we call attention to the classroom dynamic and ask students to reflect on the meaning of what is happening in the class at that moment. Getting students to step back and do such an analysis might take the discussion to a new level of understanding. Students might be able to see the issues more clearly and to understand what the emotional intensity of the clash is all about.

Warren says that this approach worked well in a class in which a White student and an African-American student were arguing at length with no apparent movement toward understanding. When the teacher asked students to explore what they might learn from the arguing, the discussion quickly shifted gears. I would suggest getting students to first write their responses before resuming the discussion—to diffuse the heat and perhaps to bring more people into the discussion, as writing seems to do in so many instances.

After the students considered what they might learn from the altercation in class, students began to think about the difficulties in communications between people of diverse backgrounds when different belief systems were operating. They even went further to explore the reasons for those differences and possible ways to bring people of divergent views together.

Warren also discusses using the class dynamics if they illustrate the topic being covered. For example, in my own Psychology of Women class, we discussed how men speak three to five times more than women do in mixed-gender groups and how men interrupt women six to 10 times more often than women interrupt men. We talked about this topic intellectually and analyzed the dynamics of male/female power differences. I was able to use a class assessment technique that actually measured how much the men and women in my own class spoke. We were able to use the students' firsthand understanding of their own classroom dynamics to demonstrate a topic we had been studying.

Warren warns against avoiding hot moments by ignoring offensive remarks. Ignoring offensive remarks might allow some students to learn that such offensive behavior is allowed and okay, and other students might learn that they are not protected against such offensive behavior. She says that students then miss the opportunity to learn about their own behavior and its consequences. She adds that students also miss the possibility of experiencing a more open classroom where the atmosphere is conducive to exploration of a wider range of ideas.

Warren leaves us with one final strategy that was comforting to me. She says that if we cannot find a workable position right in the hot moment, it is okay to defer. We could tell students that this is an important issue and that we will discuss it at a later time. This gives us time to plan our strategies for dealing with the topic. This also lets students know that we take such issues seriously. Even though many of us are not comfortable with conflict in the classroom, it can actually be a powerful tool for diversity training.

Win/Win Enterprise for Miller Brewing and Others

Latinos are becoming the largest ethnic minority in the U.S., but their growing numbers are not equally represented in most professional fields, giving rise to concern. Today, only 11 percent of Latinos are in managerial and professional positions, compared to 27 percent of non-Hispanics. And Latinos are less than 15 percent of all senior managers in the nation’s Fortune 1000 companies. These statistics stem from the sad fact that about 37 percent of employed Hispanics do not have a high school degree, and only one in ten aged 25-29 completes a four-year degree, compared to one in four Anglo-Americans.

It is exactly this combination—poor representation in the professional arena and rapidly expanding numbers—that has drawn companies and corporations to take interest in supporting and helping Latinos advance in education.

Gus B. Fernández III, Hispanic marketing manager of Miller Brewing Company in Texas, put it this way: “When you start looking at the statistics on Hispanics and the growth of their population, I think companies will want to look for Hispanics to make sure they know how to market themselves to the Hispanic consumer. We and other companies see that in supporting them, we are helping ourselves in the future.” He added, “To poise ourselves to be in the right place in the future, we need to set up the foundation, and the main foundation is education. We feel that education and building that base for Hispanic students would help elevate them into the business world.”

Fernández is especially familiar with his company’s efforts not only to help graduate Hispanics from college but to prepare them for a future in business. Since 1993, Miller has funded a program that today is known as the ¡Adelante! U.S. Education Leadership Fund. Located in San Antonio, Texas, the Fund sets out to help students complete their college education and succeed in the world of business and corporate America through scholarship assistance, leadership training, and internships.

¡Adelante! was established as a multi-year program by the Hispanic Association of Colleges and
Universities (HACU) and Miller during the early '90s but became independent from HACU in 1999. With Miller's continued support, in 1999 ¡Adelante! helped 22 students in 44 cities and 17 colleges with $3,000 scholarships and leadership training. Additional corporate sponsors during the academic 2000-2001 year increased scholarships to 47 to students in 30 cities and 40 universities nationwide.

Although in its infancy, the Fund sets itself apart from others by its combination of financial assistance and leadership training for the workplace. ¡Adelante! specifically targets junior and senior Latina students who are attending Hispanic Serving Institutions. The program targets students who have already made it through several years of school but are potential dropouts due to financial pressures. All eligible students are pursuing degrees in business or another major specified by the donor, and maintaining a minimum 3.0 GPA.

For juniors who apply and are accepted, scholarship monies are automatically renewed the following year. While Miller grants $3,000 in scholarship money for each student, Texaco, a recent donor to the program, gave $1,200 in scholarships to each of 10 students, and ITYM (Transporte Integrado y Masivo), one $2,000 scholarship. Last year alone, Miller provided 36 scholarships, 16 of which were sponsored by Texas Miller Lite and were given only to Texas students. (In its first year participating at the local level, Miller contributed $70,000 to assist students in Texas through its fundraising programs such as Miller Lite Texas Title Belt, Fiestas Patrias, and Texas ¡Adelante! Miller Lite Super Softball Series.)

Students who are accepted into ¡Adelante! are also invited to attend free of charge the four-day leadership institute, which in 2000 took place in San Antonio from May 25 through May 28. Last year, 50 students attended, including students not ¡Adelante! scholars, and they underwent what has been described as "corporate boot camp."

The curriculum was designed and implemented by participating corporations' management and training professionals, in partnership with member schools of HACU. Students were taught how to get into the corporate world and become effective leaders, as well as given tips on networking, time management, and more.

Ruben Garza, ¡Adelante!'s assistant executive director, placed special emphasis on the lessons of networking taught to students at the institute. "I had to learn the hard way that to get ahead in a corporation—it's not about doing your job well but in knowing how to network. If nothing else, the leadership institute offers the students the opportunity to network with one another and to realize the value of networking."

The final part of ¡Adelante! is the internship process. Last year was the first in which students became interns through the program. Many of the positions that students held at such companies as Target, Miller Brewing Company, and Marquez Brothers International were funded by Miller. Last year, there were five student interns; this year, up to 20 are likely.

According to Garza, the average students of the Fund are in their early 20s, outgoing, and, typically, ladies.

"They have normally accomplished quite a bit to get where they are. They've overcome hurdles, taking courses at night to get through," said Garza. "They are also very optimistic about the future, and they want to play a role. Most of them want to help other students, and they want to give back."

Leadership qualities and the desire to give back to the community are important criteria in selecting scholars for the Fund. "We are looking not only for a good GPA but for those who have demonstrated extra-curricular activity and community involvement," said Garza. "We don't want people..."
who are going to join organizations to put it on their résumé. We want someone who has joined an organization and moved into positions of leadership.

García doesn’t actually meet students until after they have been accepted into ¡Adelante!. But even prior to meeting them, he claims, “if the person has done things, it just stands out” in letters of recommendation and in the information they provide. “It’s remarkable. A lot of these young people are the first in their family to go to college. A good number of their parents didn’t graduate high school,” he said. “That’s why it’s exciting when I get to see these young people face to face.”

Alejandra Rodríguez, a recent graduate of California State University in Los Angeles, was one of several ¡Adelante! scholars who was the first in her family to attend college. “I felt I had to do it, but once I got into it, it was tough,” she said of her earlier years in school. She learned about the Fund while working in the dean’s office at her school. “Months later, I was there in Texas at the leadership institute,” she said. “The speakers were great.”

While the financial support helped Rodríguez through school, she especially valued the emotional support that ¡Adelante! provided. “It’s a type of network. It’s like a big home that we have that will never disappear. If we need something, we know we can ask,” she said. “Many times when you have so many things to do, you think, Will I make it through? Then people like ¡Adelante! come and offer to help, and that helps a lot. It’s a great organization.”

Although Rodríguez is currently working as an auditor for an accounting firm in Los Angeles, she is giving back to the program that helped her. She is collaborating with other ¡Adelante! graduates to create bylaws for current scholars of the Fund. “What stands out about ¡Adelante! is that they want their Hispanic students to grow so they can give back to their community,” said Rodríguez. “My goal would be to work with them. By doing what they do, you are giving back to the community. That is what I want to do.”

Arselia Villanueva is a current ¡Adelante! scholar and a senior at California State University in Los Angeles. Being a Fund recipient “has meant a lot,” she said. “It is a recognition of your achievement. A lot of times, students who excel in academics or who put a great effort into their education sometimes get discouraged because they don’t feel that other people are taking an interest in what they do, in what they are trying to achieve. But when you have something of this magnitude, when you have a major company that has dedicated a major part of its funds and its personnel toward Hispanic achievement and improvement, it makes you want to work even harder. It makes you see that people out there actually do care about your betterment, about you becoming a better person, not only for yourself but for your society and culture.”

Although Villanueva received offers from many companies to be an intern last summer, she declined because she needed to attend school full-time. But, she said, “I know now what it feels like to be offered a position.” Villanueva, however, has more than benefited from the program thus far. As she said, “I don’t have to sit down and say, ‘How am I going to pay for books this semester?’ But it’s much more than that, the recognition and achievement you feel is much more important. It helps you not only in scholarships but in networking. It gives you a lot of resources. A lot of students are really lost. They don’t know what to look for when they are done.”

While Latino students have much to gain from ¡Adelante!, the outcome of their successes will clearly benefit corporations and companies such as Miller. The Fund has a student data pool that companies can access in
order to find scholar interns or employees. And those businesses that are Adelante! sponsors at one point or another are given the first opportunity to dip into the pool.

According to García, each company has expressed what it considers to be the professional and leadership areas within which it sees a need for more Hispanics. For Miller, he said, "They see a tremendous need for Hispanics with business backgrounds." Texaco, on the other hand, defines those areas as accounting, finance, and marketing. Of one student, Jovia Hernández, a senior marketing student at the University of Houston who held an internship position at Miller, García said, "They are after her. They have seen what she can do.”

Fernández at the Miller Brewing Company has his own words of praise for the pool of scholars he has seen advance through Adelante! “The talent level that comes out of these young people is immense. With that kind of talent, all companies want to get at these students. There is no question that we and other Adelante! sponsors want to use these students as a pool for the future," he said. After all, explained Fernández, "you see a lot of companies that are showing that they care about their diversity among their ranks. I think you are starting to see a lot of companies being involved in Hispanic scholarship funding. You see all kinds of interest groups and companies doing these things."

While Miller has been involved with Adelante! for nearly a decade, as Fernández pointed out, "It takes a long time to get a fund started. It takes a long time for companies to believe in it. The Fund is starting to get more recognition." His company is using marketing to help propel the Fund forward. It's what he describes as "being a good corporate neighbor.

Beyond being a good corporate neighbor, Fernández has enjoyed the personal satisfaction of seeing Hispanic students excel. He ended his words on a personal note, having followed in the footsteps of his grandfather, who had only an eighth grade education and insisted on his family’s achieving more. "When you get a letter from these kids saying thank you and telling you of their aspirations for the future—that makes you feel so good," he said. "It makes you feel so good that you are making a difference in somebody’s life—beyond community. And corporate dollars are being invested into the neighborhood."

---

**ASSISTANT PROFESSOR MICROBIAL GENOMICS**

The Department of Fisheries and Allied Aquacultures at Auburn University has established a priority program in Aquatic Genomics and is seeking candidates for an Assistant Professor, 9-month tenure-track faculty position. Position is available immediately.

Responsibilities include development of an active externally funded research program in microbial genomics focusing on pathogenic microorganisms of aquatic animals.

Minimum qualifications include a Ph.D. in microbiology, molecular biology, or a closely related field and one year of postdoctoral experience, demonstrated skills in knowledge in analysis of DNA sequence, DNA sequencing, development of PCR probes and primers, RNA manipulation, cloning and engineering of bacteria, and developing and using microarray-based genomic technology or bioinformatics. Demonstrated productivity as measured by peer reviewed publications, and demonstrated professional leadership for independent research in addition to a strong ability for collaborative research. Proof of authorization to work in the U.S. must be provided.

Minorities and women are encouraged to apply.

Candidates should submit a letter of application, curriculum vitae, transcripts and names, phone numbers, and e-mail addresses of four references to:

Dr. John Liu, Search Committee Chair
Department of Fisheries and Allied Aquacultures
203 Swingle Hall
Auburn University
Auburn, AL 36849
Phone: 334-844-4054
Fax: 334-844-9208
E-mail: dliu@aseage.auburn.edu

Review will begin June 1, 2001 and continue until a suitable candidate is selected.

Auburn University is an Affirmative Action/Equal Opportunity Employer.

---

**Admission Officer/Assistant Director of Admission**

The successful candidate will have an assigned geographic territory working with all students plus assume primary responsibility for enrolling Hispanic and Latino students. This staff member will create an outreach plan for Hispanic and Latino students and families. In addition, he or she will have traditional admission responsibilities that include 8-10 weeks of travel in the fall and spring, interviewing candidates for admission, applicant file review, and other related projects as assigned.

Bachelor's degree required. The successful candidate will understand liberal arts and sciences education and be able to clearly and persuasively articulate those values to prospective students, parents and secondary school counselors. Excellent organizational skills, outstanding public speaking ability, high attention to detail, strong work ethic, and a good sense of humor are also required.

DePauw University is an entirely undergraduate institution with 2,250 students from 43 states and 15 foreign countries. The University has a College of Liberal Arts and a School of Music. The campus in Greencastle is located forty-five minutes west of downtown Indianapolis. Currently our multicultural population is fourteen percent. Admission is selective.

The position is available on July 1. We will accept applications until the position is filled and will begin reviewing applications immediately. Interested individuals should submit a letter of interest, resume, and the names, addresses and phone numbers of three references to the following:

Stefanie Niles
Senior Associate Director of Admission
DePauw University
101 East Seminary Street
Greencastle, IN 46135

The position is a twelve-month position with a competitive salary and benefits.

DePauw University is an affirmative action, equal opportunity employer and encourages applications from women and under-represented groups.
Casino Workers Ripe for Distance Education

Atlantic Cape Community College Targets the Swing-Shift Population

By Joe Beck

In the 21st century, one can drop off dry cleaning and order a pizza at 4 a.m. How about a college degree in the middle of the night? Why stop there? How about writing your papers and studying anywhere you choose, without ever having to step inside a classroom? No problem.

Atlantic Cape Community College (ACCC), a comprehensive two-year public college serving New Jersey’s Atlantic and Cape May counties, is recruiting a new college population with distance education.

According to ACCC’s President Dr. John May, “ACCC is the first community college in the state to offer a full degree program at a distance, something driven by the needs of the casino industry, where rotating shifts make attending a traditional college class impossible.”

ACCC’s turf includes Atlantic City and employees of the area’s 13 casinos. To reach out to casino workers, ACCC became a pioneer in offering Internet-based classes. Taking a class online allows them to study at times convenient to them.

“We have students who sign on at 4 a.m. after work to complete assignments,” said Dr. Mary Wall, associate dean for business/computer information systems, English, and social science.

As a leader in educational technology, ACCC offers associate’s degrees through distance education. Most of the programs are offered through online classes, available via the Internet. The rest are offered through television courses that students can take by watching televised programming or videotapes. Because the courses require minimal on-campus presence, students with family and job responsibilities are able to take more courses than they could if their options were limited to traditional classes. Most telecommunicated courses are self-paced, so students are able to work them more efficiently into their weekly schedules.

A pioneer in distance education, ACCC is part of a growing trend on campuses nationwide. The larger picture of distance education reflects a change in the very nature of communication. Access to education is increasing for more people. With telecourses and other distance education technologies, college credit and college degrees are closer than many people think.

At ACCC, courses are offered through e-mail “bulletin boards” and the World Wide Web. The College offers eight distance degrees and more than 80 online continuing education courses. The interest in online courses and distance education in general is growing. Spring enrollments at ACCC were up more than 3 percent as online classes continued their popularity. Enrollment credits totaled 43,510. About 9 percent were in online sections, and approximately 18 percent of all students took at least one online class. Thirty-three percent of ACCC students were taking online classes, compared to 31 percent in Spring 2000.

When online classes were first offered in 1997, there were six courses. The number has been growing steadily since that time. This spring, 68 Internet-based sections of 61 different courses were offered. Total registration of 5,010 students included 1,854 full-time, and 3,156 part-time. Distance education degree programs offered
include Associate in Science in General Studies, and Associate in Arts in Liberal Arts, History, Business Administration, Computer Information Systems, Psychology, Literature, and Humanities.

For online courses, students use their home computers with a connection to an Internet Service Provider (ISP). The College advises that students should have a Mac or Windows-based computer with a 28.8-or-higher modem, connection to an Internet Service Provider (e.g. Bell Atlantic or America Online), and some knowledge of downloading and installing software.

In addition, according to College literature, students must be independent learners who can manage their time effectively. ACCC uses conferencing software to help faculty and students communicate with one another as if they were in a regular classroom.

Students are encouraged during the first week of classes to log in and write a note to say hello to their professors and fellow students. Then, depending on how the class is structured, they are given the opportunity to post comments to class discussions, to submit homework, to “chat” with fellow classmates, and to use the Web for homework.

Once students register for their classes, they are asked to call or e-mail their instructors immediately to receive course materials. Later, they are asked to visit a Web address to find their course listing. Once students find their particular courses online, they also find instructions on using the software that is most compatible with their home computers. Some of the questions answered include: How are courses conducted, How much does it cost, What do I need at home, How do I register, How do I acquire course materials and textbooks, How can I access library materials, and How is testing conducted?

After registering for online classes and shortly before the start of each semester, students receive a “welcome letter” from instructors that includes their user ID and password for accessing their online courses.

About ACCC

The ACCC campus is located on 537 acres in the New Jersey Pinelands. ACCC is 15 miles west of Atlantic City’s boardwalk, 45 miles from Philadelphia, and 115 miles from New York City. The College offers 37 transfer and career degree programs as well as non-credit professional development and training services. It awards Associate in Arts, Associate in Science, and Associate in Applied Science degrees. The College operates nationally recognized casino career and culinary arts programs, and has extension centers in Atlantic City and in Cape May County.

ACCC was the second community college organized in the state of New Jersey in 1964. However, its history extends farther back. In 1947, the President’s Commission of Higher Education brought the concept of the community-centered state Department of Education granted approval for the establishment of ACCC. The site was selected in November of 1964, and official groundbreaking ceremonies for its nine-building complex in Mays Landing were held in November 1966. ACCC opened its doors to students in September 1966, using facilities rented from Atlantic City High School.

In February 1968, the College moved to its present campus on the Black Horse Pike in Mays Landing. In the spring of 1982, major work was completed on a two-year, $7-million expansion project. The project included two new buildings, expanded student service facilities, the Academy of Culinary Arts, and additional classroom and office space. In that same year, the former Atlantic City Electric Company building, located in Atlantic City, was purchased by Atlantic County for ACCC. By 1984, a $4 million renovation project transformed the aging building into a beautiful modern facility.

The William J. Spangler Library, which was expanded and renovated in 1999, added a mezzanine level, a computer lab with space for more than 90 personal computers, faculty and administrative offices, small study/meeting rooms, a classroom meeting room, and typing, video, and audio tape rooms.

Since 1991, the College has made major strides with technological improvements. In July 1995, the New Jersey Commission of Higher Education declined Cape May County’s request for an independent college and recommended that it enter into a partnership with a neighboring community college, citing such benefits of a joint college as a larger population base, economies of scale, immediate availability and accreditation of curricula, and elimination of duplication of efforts and costs.

To date, plans are being developed for a comprehensive Cape May County Campus. The facility is expected to be ready for occupancy by this fall or next spring.
A&E and History Channel Listed as Top of Educational Support Providers

NEW YORK, N.Y.

A&E and The History Channel truly make the past come alive in the classroom, according to teachers across the country. Topping the list ahead of such esteemed organizations as Scholastic and National Geographic, A&E and The History Channel are the most popular providers of social studies educational support materials, according to a "Complete K-12 Report" survey. To gain a better understanding of the sources of supplementary materials utilized by teachers, respondents to the K-12 social studies survey were asked whose supplementary materials they use the most.

"At A&E Television Networks, we believe very strongly in our mission as good corporate citizens. Central to that mission is how we contribute to the educational needs and aspirations of our most precious commodity, our children. That so many teachers value our programming and support materials speaks volumes about the importance of A&E and The History Channel in the daily lives of America's classrooms," said Nickolas Davatzes, president and CEO, A&E Television Networks.

Fifty-five percent of teachers surveyed said they used A&E/History Channel materials the most in the classroom. The closest competitors on the list were National Geographic (52.5 percent) and PBS (46 percent). Not limited to television networks, this survey included traditional providers such as Rand McNally, World Book, Scholastic, and Microsoft.

In addition to supplementary educational materials, websites were evaluated. The History Channel website, www.HistoryChannel.com, was tied for second with National Geographic and The Library of Congress, 51 percent of respondents said they used HistoryChannel.com in their social studies classrooms.

"The Complete K-12 Report" analyzes the domestic K-12 school market in all of its facets—textbooks, supplementary materials, computer hardware, software/CD-ROM, video, Internet—and in each of its grade levels and major curriculum areas. Much of the data reported come from original studies conducted by Education Market Research, using a school-market information-gathering network comprised of tens of thousands of educators at all grade levels.

A&E offers viewers a unique blend of original programming, including the highly acclaimed Biography series, original movies, drama series, and documentaries. The History Channel reveals the power and passion of history as an inviting place where people experience history personally and connect their own lives to the great lives and events of the past.

NACE Publishes 2001 Graduating Student & Alumni Survey

BETHLEHEM, Pa.

The National Association of Colleges and Employers (NACE) recently released its 2001 Graduating Student & Alumni Survey.

Among the findings:

Employers seeking experienced college graduates for entry-level positions should be happy with the Class of 2001.

The vast majority of new and prospective graduates have been employed in various capacities. Only 1.3 percent of 985 survey respondents indicated that they had no work experience. By type of employment, respondents had held part-time (759 percent), summer (66.3 percent), and full-time (48.4 percent) jobs.

Additionally, respondents acquired experience in their field via internships (46.4 percent) and cooperative education programs (13.2 percent). Participation in these programs often works to the advantage of college job seekers. NACE's Job Outlook 2001, a survey of HR/staffing professionals, found that 85 percent of employers use experiential education programs to recruit for their own work forces.

From liberal arts to engineering majors, most college students have a realistic idea of what they will earn in their first jobs following graduation.

Half (50.6 percent) of 985 respondents to the 2001 Graduating Student & Alumni Survey said they expect to make between $25,000 and $35,000.

By discipline, almost three-fourths (74.5 percent) of visual and performing arts majors and two-thirds (67.1 percent) of education majors anticipate earning $30,000 or less in their first job. More than half of engineering majors (57.6 percent) said they expect to earn $45,000 or more. Meanwhile, one-fourth (26 percent) of M.B.A.'s expect to earn more than $50,000.

According to NACE's Spring 2001 Salary Survey, visual and performing arts majors are receiving starting salary offers averaging $27,010, and elementary and secondary education majors are averaging $27,917 and $28,058, respectively. Starting salary offers to engineering majors average $40,377 for civil engineers and $53,477 for petroleum engineers. M.B.A.'s with non-technical undergraduate degrees and no experience are commanding offers of $45,048, with one-fourth of their offers exceeding $50,000.

Of course, the money will only go so far. The respondents reported owing an average of $14,813 in student loans and $1,651 in credit card debt.
Former U. of Wisconsin-Madison Chancellor Is Named ACE President

WASHINGTON, D.C.

David Ward, chancellor emeritus of the University of Wisconsin (UW)-Madison, has been named president of the American Council on Education (ACE), the nation's principal higher education association. His appointment, effective Sept. 1, 2001, was announced following a unanimous vote by the ACE board of directors.

Ward is Charles Kendall Adams University Professor at UW-Madison, director of the Wisconsin Center for the Advancement of Postsecondary Education, and a visiting scholar at the Center for Studies in Higher Education at the University of California-Berkeley. He will be the 11th president of ACE since its founding in 1918, and succeeds Stanley O. Ikenberry, who last year announced plans to resign following five years as ACE president.

"ACE is very fortunate to have as its president-elect a distinguished leader who has the vision, passion, and intellectual strength to articulate an agenda for all of higher education that puts access and excellence at the core of our endeavor," said ACE board chair Janet Holmgren, president of Mills College in California. "We greatly appreciate the hard work of search committee chair Mike Adams [president of the University of Georgia], who guided the deliberations that resulted in such a fine choice."

Ward is eager to join the national policy debate in Washington as ACE president. "The genius of American higher education is its broad access and the great variety of high quality higher education institutions that serve society," said Ward. "We are looking at a future that I believe will be much more collaborative than competitive, especially in the development of instructional technology and distance learning. It will be incredibly exciting to be at the very center of the national debate and public policy process at ACE and to help shape the future.

"Colleges and universities in the United States are still the envy of the world, but that also means we have much to share with the world and can continue to improve as we interact with campuses in other countries. I look forward to engaging in this international dialogue and hope to find new ways to improve the international scope of American higher education through my work at ACE."

NCLR Helps Form New Educational Partnership

WASHINGTON, D.C.

According to the National Council of La Raza (NCLR) publication AGENDA, NCLR has joined with three prominent Latino organizations to form the 2010 Alliance, a new partnership founded to improve the educational status of Latinos. The principal goal of the Alliance is to close the achievement gap that exists between Latino students and their non-Latino peers, by the year 2010. The other founding members of the Alliance are the National Association for Bilingual Education, the National Association of Latino Elected and Appointed Officials, and the National Council for Community and Education Partnerships.

Many Latino children are underrepresented in quality preschool education programs and overrepresented in poorly funded, underperforming schools. As a result, they lag behind their non-Latino peers in several measures of academic well-being, such as secondary school completion and college attendance. Although there are myriad examples of "best practices" for improving Latino achievement and attainment, implementation of these programs has been uneven or nonexistent. This is the case, in some part, because there is no mechanism currently in place to hold schools and school systems accountable for changing their practices to better serve Latinos. The Alliance hopes to fill this void.

The Alliance’s founding organizations understand that making positive change happen in the education arena requires political will. Thus, all sectors of society must become involved, a mechanism must be devised to hold the school system accountable, and a media campaign must be waged to keep the issue of Latino education on the forefront of the nation’s consciousness. That is why educators, policymakers, corporations, foundations, and community leaders have been invited to join the Alliance.

The Alliance will issue “report cards” demonstrating the progress the nation is making toward meeting the goals the Alliance sets. In addition, press releases will be issued and other media efforts will take place to let the nation know how our schools are serving Latino children. These activities are intended to pressure the school system to implement policies and programs that will improve academic outcomes for Latinos.
SUNY Upstate to Enroll Underrepresented in Clinical Studies

The State University of New York (SUNY) Upstate Medical University created a special office to ensure that people from underrepresented populations are part of clinical research trials.

The Office of Diversity Enhancement in Clinical Research will help attract African American, Hispanic, American Indian, Alaskan Native, and non-White European individuals for participation in various clinical trials and other research studies.

The University, by reaching out to these targeted populations, hopes to develop a better understanding of how cultural and religious sensitivities might inhibit one's participation in such research.

Hispanic Themes in Daytona Beach Lecture and Seminar Series

Daytona Beach Community College (DBCC) in Florida held the seminar "Spanish Speaking Immigrants in Search of the American Dream," by Ana María Aburto. She explored the reasons why Spanish-speaking immigrants have come, and continue to come, to the U.S., and whether those reasons have been fulfilled.

Another DBCC lecture, "El buscar Cuba," featured six Cuban American photographers discussing their recent return to Cuba.

David León, California State University professor and director, Chicano studies, presented the lecture "The U.S.-Mexican Border: A Barrier to the American Dream?"

Houston-Downtown Showcased as a Top 25 College for Hispanics

The University Of Houston-Downtown (UHD) was showcased on the Univision website, www.univision.com, as one of the top 25 colleges for Hispanics.

The website featured UHD alumna Reyna Romero and several Hispanic students who wrote essays about their life at UHD—René García, Ivan Hernández, Diana Leal, Veronica Martínez, and Diana Rocha. Students Edwin Cisneros, Roberto Mena, and April Palomo narrated video highlights of UHD.

Univision gears its website toward U.S. Hispanics and provides Internet connection, news, entertainment, and shopping opportunities. It augments programming for its Spanish-language affiliate stations around the country.

UHD is nationally recognized for its student diversity, outstanding academic opportunities, and productive community partnerships.

Cal State-San Bernardino Prepares Minority Students for Doctoral Degrees

The time, effort, and mental discipline needed to obtain a doctorate in any field of study can prohibit or frighten most college graduates from even attempting to earn such a degree. But graduate students who are accepted into the McNair Scholars Program at California State University-San Bernardino can be confident that they will be well-prepared if they decide to do so.

"If you can make it through this summer program, then you know that you have what it takes to obtain your doctorate," said Carolyn Marquez, a McNair scholar. "This program is about endurance and obtaining the work ethic that you will need."

The program is named for Robert E. McNair, the African American astronaut who died in the Space Shuttle Challenger accident in 1986. His accomplishments are honored by the federally funded program, which actively recruits minorities and prepares them for doctoral studies. The program runs over the summer months. Mentor professors guide students in research projects, conference presentations, and study for the doctoral exam.

California-San Diego Holds Chávez Film Festival

The University of California-San Diego held a César Chávez Film Festival featuring award-winning films on Chávez and the struggle of the Mexican American worker. Independent filmmaker Paul Espinosa curated the festival.

Guest speakers included Rosalinda González, professor of history, Southwestern College, Richard Griswold del Castillo, professor of Chicano Chicana studies, San Diego State University, Gail Pérez, professor of English, University of San Diego; and Rña Sánchez, professor of English, San Diego Mesa College.

NASA Scientist Speaks at UNC-Chapel Hill Forum

Dr. Luz Marina Calle, lead scientist at NASA and professor at Randolph-Macon Woman's College in Virginia, was a keynote speaker at the Spring 2001 Health Professions Forum at the University of North Carolina-Chapel Hill.

The Forum was held in conjunction with the Inspirational Speakers in Science Lecture Series, affiliated with the North Carolina Health Careers Access Program.

Loyola University Chicago Hosts Cuban Youth Leaders

Students at Loyola University Chicago (Ill.) got a rare glimpse of life in Cuba, courtesy of a visit to Loyola's Lake Shore Campus by Yandel Martínez, a fifth-year law student from the University of Camaguey, and Javier Dueñas, a journalism professor at the University of Havana.

Martínez and Dueñas participated in "Youth in Cuba Today: Politics, Media, and Culture," part of a forum designed to foster greater understanding among future leaders. The talk was part of a three-week tour of universities organized by the Cuban Youth Lectures Committee. Serving on
the committee are university faculty, graduate students, and others interested in bringing Cuban citizens to the United States "to tell their side of the story."

"It is important that both sides of the spectrum get a chance to meet and interact, to debate perspectives in a way that is rational, and to welcome that debate," said Loyola communication professor Elizabeth Lozano (pictured).

Loyola Marymount Hispanic Engineers Host Conference
The Society of Hispanic Professional Engineers’ (SHPE) student chapter at Loyola Marymount University in California hosted the 2001 Regional Student Leadership Conference "Shaping Today’s Students into Tomorrow’s Leaders."

KABC-TV Eyewitness News reporter Sid Garcia was master of ceremonies. Ronald Gastelum, CEO and general manager of the Metropolitan Water District of Southern California, was the keynote speaker. Los Angeles City Councilman Alex Padilla chaired the gala banquet.

Founded in 1974, SHPE seeks to expand the opportunities for the advancement of Hispanic engineers, scientists, architects, and entrepreneurs.

North Florida Director Receives Award from ACHA

Doreen Pérez, University of North Florida director of student health services, received the E. Dean Lovett Award for 2001 from the American College Health Association (ACHA). The prestigious award recognizes ACHA members who have directed a college health service or have contributed significantly to the development of a college health service program.

Pérez was praised for transforming student health services from a highly limited wellness center into a comprehensive health center providing a vast array of healthcare and wellness services. She has been affiliated with the operation for the last 14 years.

$1-Million NSF Grant Benefits Rutgers-Newark Urban Program

Science students at Rutgers University-Newark (N.J.) will work with elementary and middle school teachers in the city of Newark to develop science mini-courses as part of a new $1-million, three-year National Science Foundation grant that aims to nurture and encourage the interest of urban students.

"This program encompasses a major effort to reach out and bring the passion and excitement of real science to minority children in Newark schools," said Jeffrey Kidder, director of science outreach at Rutgers-Newark's Academic Foundation Center and principal investigator of the grant. He said the program will create a partnership between graduate and undergraduate students and fourth to eighth grade teachers in Newark public schools. It might also include students studying for technology, engineering, and medical careers at the New Jersey Institute of Technology and the University of Medicine and Dentistry of New Jersey.

Bush Nominates Notre Dame Professor to Treasury Department

President Bush nominated Jimmy Gurulé, professor of law at the University of Notre Dame (Ind.), to serve as undersecretary of enforcement in the Department of the Treasury. As the Department's principal law enforcement official, Gurulé would oversee efforts to prevent drug smuggling, counterfeiting, and the criminal use of guns and bombs. The nomination was awaiting Senate approval.

This would be Gurulé's second appointment to a federal government position. As assistant attorney general in the Department of Justice, he was the highest-ranking Hispanic in the department's history.

Gurulé previously was an assistant U.S. attorney in Los Angeles and president of the Hispanic National Bar Association, an organization that honored him for his leadership in the Hispanic American community and in the legal profession. He is among 12 Hispanics nationwide selected as "Pillars of Society" for their efforts to serve the cause of justice in the Hispanic community.

Gainesville College President Appointed to ACE Commission

Gainesville College (Ga.) President Dr. Martha T. Nesbitt was elected to a three-year term on the American Council on Education (ACE) Commission on Leadership and Institutional Effectiveness.

The Commission, which generally meets twice a year in Washington, D.C., and serves as an advisory body for ACE policy and operations, seeks to strengthen the nation's colleges and universities by providing a forum for discussion of leadership and leadership development and by sponsoring programs that promote institutional improvements and change.

Nesbitt said that she is honored to be one of only 40 U.S. college presidents chosen to serve on the Commission.

Pérez and Santiago-Hudson Appear in Lehman "Teatro Latino" Series

Lehman College (N.Y.) presented some of today's most popular stars and previewed plays from the Manhattan theatre scene at the "Teatro Latino" series. Actors from Rosie Pérez and Tony Award-winner Rubén Santiago-Hudson were featured at the free event.

"The richness of the Hispanic and Latino culture in theatre, dance, and music affirms life and is both joyful, lyrical, and passionate," noted Professor Betsy Shevey producer of Lehman's Lovelier Theatre. "The keynote to culture is inclusion, and that is what this 'Teatro Latino' is all about. As Americans from many diverse cultures, we can share in the richness of each other's experiences and strengths."

Other entertainers at the series included actors John Ortiz and Lidia Ramirez, Latin jazz group the Bronx Horns, and Compañía General Electrica, an internationally acclaimed performance ensemble from Spain.

Saint Peter's Hosts Model United Nations

Luis Méndez, a Saint Peter's College junior majoring in political science, was secretary general at the 10th Annual Saint Peter's College High School Model United Nations, a two-day conference that brought together nearly 400 students from around the state of New Jersey to discuss international issues.

The Model United Nations provides New Jersey high school students with an insight into the processes of international conference diplomacy, characteristic of the United Nations. Each student represents a nation-state and researches agenda topics.

His Excellency Inocencio F. Arias, ambassador and permanent representative of the Permanent Mission of Spain to the United Nations, was a keynote speaker.

Pictured l. to r.: Méndez, Arias, and James N. Loughran, chancellor of Saint Peter's College.
North Carolina Latin American Institute Receives $800,000

The Institute of Latin American Studies at the University of North Carolina (UNC)-
Chapel Hill received its largest-ever private grant, which will fund student travel to Latin
America and bring distinguished visiting professors from that region to campus.

The New York-based Andrew W. Mellon Foundation gave an $800,000 challenge
endowment to the Institute, a part of UNC’s College of Arts and Sciences. The
College’s Arts and Sciences Foundation will seek private gifts to double the endowment
in five years to $1.6 million, as required by the Foundation’s one-to-one match.

The award will further the College’s plan to step up its international focus, said Evelyne
Huber, a UNC political science professor and director of the 64-year-old Institute, which
was among the nation’s first centers for Latin American teaching and scholarship. “The
grant will enable us to support our very best undergraduates who wish to study or conduct
research in the region,” said Huber. “Honors students, for instance, will be able to write a
first-class honors thesis on a topic based on original research in Latin America.”

Brown Addresses Hispanic Law
Students at St. Mary’s

Sarita Brown, former executive director of
the White House Initiative on Educational
Excellence for Hispanics in the Clinton admin-
istration, now a top executive with the National
Hispanic Scholarship Fund in Washington, D.C., was a keynote speaker at this year’s St. Mary’s
University (Texas) School of Law Hispanic
Law Students Association banquet.

Thirteen St. Mary’s students are pursuing
their dreams of a college degree, thanks to the
Gates Millennium Scholars program, which supports recipients through the Hispanic
Scholarship Fund.

Brown, a Chicana, is continuing her activism on behalf of Hispanic educational
needs through the 2010 Alliance, a private-sector effort aimed at decreasing educational
disparities among Hispanics. She discussed ways in which St. Mary’s and the law school
can play an important role in the 2010 Alliance, which is a follow-up to the White
House Strategy Session on Improving Hispanic Student Achievement, held in June 2000.

Grossmont-Cuyamaca Students to
Study in Spain

Students from the Grossmont-Cuyamaca
Community College District in California will
spend a few weeks this summer perfecting
their Spanish and immersing themselves in
the life and culture of Spain during Cuyamaca College’s
2001 study abroad program in Burgos,
June 29-July 30.

Students will live with a family in Burgos in
north central Spain and attend language classes
at the local university for five hours each
weekday. The program permits students to
earn up to eight units of academic credit while
they learn Spanish in small, intensive classes.

Dr. Ezequiel Cárdenas, chair of the depart-
ment of foreign languages, has led similar
student tours for the past 20 years. “It’s not
just the foreign language skills that students
gain from these trips,” said Cárdenas. “They
come back with a new appreciation of their
own country, of being able to do something
like picking up a phone and getting in touch
with anyone around the world almost instantaneously. It is during these world travels that
students realize that the convenience and access to information that we take for granted here in the U.S. are not always the norm when you go beyond our borders.”

SDSU Talent Search Students
Participate in Mural Painting

In California, San Diego State
University (SDSU) Talent
Search students from San Diego Unified
District middle schools and high schools, along with local artist and SDSU graduate
Victor Ochoa and SDSU mentors, took part in a mural-painting project to mark the 31st
anniversary of Chicano Park in Barrio Logan.
SDSU’s Pre-College Institute sponsored the
event, which perpetuates community pride,
service, and beautification.

The Talent Search Program is one of three
federally funded TRIO programs housed in the
University’s Pre-College Institute. The program helps 7th-12th grade students complete high
school and pursue postsecondary education.

California State Aims to Offer
Education Doctorates

The California State University (CSU)
board of trustees is seeking legislative
authority to offer the education doctorate.

David Spence, CSU executive vice chancel-
lor and chief academic officer, said that
throughout the past 10 years, the tremendous
growth of the state’s student population and
the changing complexity of its educational
system have resulted in an increased need for
more educators with education doctorates.

Lt. Gov. Cruz Bustamante ( pictured), a CSU
trustee and a University of California (UC)
regent, attended a recent board meeting. “We
need to think of the needs of students first.
We need more doctorates in education, and
UC is not meeting that demand,” said
Bustamante. “CSU must become involved. It’s
CSU who trains our teachers.”

The community college system will need
thousands of new faculty and administrators over the next decade, based on increasing enrollment and anticipated retirement rates. California’s schools of education also have a need for more education doctorates. At CSU, teacher education has become one of the top five discipline areas
classified as “most difficult to recruit.”

Barry Names New Community
Program Coordinator

Rolando Barrios ( pictured) was named
program coordinator at Barry University’s
(Fla.) Academy for Better Communities
(ABC) and will oversee a new neighborhood
revitalization program funded by a three-year, $400,000 grant from the U.S. Department
of Housing and Urban Development.

Barrios received a bachelor’s degree from
the University of Rochester and a master’s from the University of Pennsylvania. He
worked with the New York City Housing Preservation Office for seven years before joining the Miami Beach Housing Authority as project coordinator in 1998.

Dr. Jackie Mondros is director of ABC, the University’s outreach arm working with low-income communities in South Florida and the agencies and organizations that serve them

Texas A&M-Kingsville Holds Barraza Book-Signing

Santa Barraza, Texas A&M University-Kingsville associate art professor and department chair, signed copies of her new book, *Santa Barraza, Artist of the Borderlands*, in the University’s Bailey Art Gallery.

The book, published by Texas A&M University Press, contains 34 of Barraza’s most powerful and characteristic works in full color. Scholars María Herrera-Sobek, Antonia Castañeda, Shifra M. Goldman, Tomás Ybarra-Frausto, and Dori Grace Udéagbor Lemeh contribute analyses in the book of the font’s that shaped Barraza as a Chicana artist and the images and aesthetics characterizing her work.

Pictured with Barraza are Charles Backus (L), director of Texas A&M University Press, and Marc Cenneros (R), president of Texas A&M-Kingsville.

City College of San Francisco Will Link Health Care to Underserved

A nonprofit program developed to help internationally trained health professionals gain a foothold in California’s medically underserved areas of high ethnic diversity received a $2 million shot in the arm from The California Endowment.

Welcome Back, a program of the California Community College Chancellor’s Office Economic Development Network, will operate under the auspices of the San Francisco Bay Area Regional Health Occupations Resource Center. It will function as a counseling, education, and job placement service for immigrant health professionals, helping them navigate the state's licensing system and obtain the necessary credentials required to work in the United States.

"Welcome Back is yet another example of our commitment to contributing to the quality and diversification of the health workforce," said Dr. Philip Day (pictured), chancellor of City College of San Francisco, which will operate the program in partnership with San Francisco State University.

North Texas Health Science Center Recognized for Minority Outreach

North Texas Health Science Center (NTHSC) Health Science Center a "Role Model Institution" for its efforts in recruiting minority students.

Ongoing outreach efforts of its Graduate School of Biomedical Sciences contributed to an increase in African American and Hispanic students at the Health Science Center, while national enrollment figures were declining.

Minority Access helps federal agencies, universities, and corporations to diversify their work sites and/or classrooms. The organization works with the National Institutes of Health’s (NIH) Office of Minority Research to identify institutions with an exemplary commitment to and success in producing minority biomedical student researchers. It will provide the names of all role-model institutions to NIH’s newly established National Center on Minority Health and Health Disparities.

Bronx Museum Showcases New Generation of Chicano Artists

The Bronx Museum of the Arts (N.Y.) welcomes a group of 12 contemporary Chicano artists in “Aztlan Today: The Chicano Postnation,” a photo-based, digital media, and video exhibition. “Aztlan Today” places this recent generation of artists within the cultural discourse of what Chicanos have referred to as Aztlan, the territory originally named by the Aztecs to designate their homeland and located partially in what is today the U.S. Southwest. The term Aztlan was reintroduced by artists and activists to refer to the Chicano nation that they hoped would emerge from the Chicano civil rights movement.

The exhibition, which currently runs through Sept. 9, goes beyond territorial constraints and geopolitical boundaries. The works move toward an inclusive global context and present how artists are reexamining their hybrid marginality and approaching newer understandings of a Chicano "post national space.”

News from Miami-Dade Community College

- Miami-Dade Community College (M-DCC) hosted a group of Fulbright scholars from around the world for one day during their visit to Miami, Fla. More than 150 Fulbright scholars visited the city for four days to study diversity in...
a special intensive seminar sponsored by the U.S. State Department. While at M-DCC, they discussed the economic, political, social, and educational contributions of Cubans and Cuban Americans in Miami, and they visited various sites related to Cuban history and Cuban American life in Miami, such as the Bay of Pigs Memorial, Domino Park in Little Havana, a cigar-making company, and the Freedom Tower. Professor German Muñoz coordinated the scholars' M-DCC visit, as did Alex Gancedo, associate dean of natural and social sciences.

- More than 70 business students from M-DCC's Kendall Campus volunteered to spend a day during their spring break cleaning up the trash in the protected mangrove preserve at historic Matheson Hammock Park in South Florida. The project was intended to make businesses and advertising students more aware of the environmental impact of consumer products.

**CU-Boulder Hosts Book Reading on American Indian History**

Distinguished Professor Charles Wilkinson (I) of the University of Colorado-

Wilkinson, in his book, explores the historical, legal, and social context of American Indian fishing rights in the Pacific Northwest, as well as the life of one of the principal activists in this struggle, Frank Frank Jr. (r).

Frank, an American Indian with a deep understanding of the area and his people, helped create a consensus that ultimately led to a 1994 ruling by federal Judge George H. Boldt affirming the treaty rights of Northwest tribal fishermen.

**Loyola Marymount Professor Studies Mexican American Museums**

Karen Mary Davals, assistant professor of Chicano/a studies at Loyola Marymount University (Calif.), authored a book that is being hailed for its detailed study of art exhibition practices among Mexican American museums and cultural centers.

In *Exhibiting Mestizaje: Mexican (American) Museums in the Diaspora*, published by the University of New Mexico Press, Davals challenges the sometimes hidden and/or blatant assumptions that underlie the practice of creating museum exhibits and asks what happens when people of Mexican American descent put themselves in command of the collection, display, and interpretation of their cultural products.

Davals explores the history of 19th- and 20th-century museum practices and the recent phenomenon of physically locating Mestizo/Chicano art within "insider spaces" such as ethnically or racially specific cultural institutions and alternative galleries.

**López Wins Curbstone's Miguel Márquez Prize**

Curbstone Press (Conn.) announced that the First Annual Miguel Márquez Prize for a First Book of Fiction, judged by accomplished author Sandra Cisneros, was awarded to Lorraine M. López, writer, teacher, and current professor at Brenau University in Gainesville, Ga. Her book, *Soy la Avon Lady and Other Stories*, is a collection of short stories that explore identity issues in the Latino community.

In the title story, an aging Avon representative has become so estranged from the Spanish language she spoke as a child that she no longer remembers that she spoke it or what happened in her childhood. Other characters in her stories include a young boy who seeks to save an abandoned baby, an elderly man attempting to invoke his dead wife by donning her clothing and makeup, and a young woman determined to give birth to a murdered man's child.

Cisneros noted, "I was impressed with the mastery of the storytelling, the swiftness of movement, the voices, the characters—really wonderful. The characters were zingers; the dialogue, sharp; the motion, quick."

**Chicano/Latino Homoeotropic Identities**

David William Foster, ed.

The interfacing of queer and Chicano/Latino still produces a certain level of discomfort among Chicano/Latino scholars. But queer studies have begun to do and can continue to enrich academic research on Chicano/Latino culture. The papers included in this volume began with a research symposium, held at Arizona State University in November 1997, on queer issues in Hispanic culture.

**Readers and Writers in Cuba: A Social History of Print Culture, 1830s-1990s**

By Pamela Maria Smorkaloff

This study examines the evolution of Cuban literature and culture from its origins in the 19th century to the present.

**Islands of Women and Amazons: Representations and Realities**

By Batya Weinbaum

From the beginning, myths have told of women who lived apart from men—the Sirens who sang on the Aegean rocks, the Amazons of the Brazilian jungle, the self-reproducing women on islands in Polynesian, and more. In this interdisciplinary book, Batya Weinbaum explores how the myth of Amazons has served varying psychological needs in different cultures over time.

Leasing the Ivory Tower: The Corporate Takeover of Academia
By Lawrence C. Soley

By dwelling on a few stories about "political correctness," the media have missed the "red story" about academe. The "real story" is about university physics and engineering departments being seduced by Pentagon contracts; biology and chemistry departments being wooed by drug companies and biotech firms; and computer science departments being in bed with Big Blue and a few high-tech chip makers.

Este es mi testimonio: María Teresa Tula, luchadora pro-derechos humanos de El Salvador
(Spanish)
By María Teresa Tula, con Lynn Stephen

There are thousands of women in El Salvador with little formal education, no political experience, and extraordinarily difficult lives who have participated in a wide range of struggles. This book documents the life of one such woman, María Teresa Tula, a working-class housewife who became an internationally known human rights organizer. Translated by Marisol Abarrega.

Ventana abierta: Revista latina de literatura, arte y cultura
(Spanish)
Center for Chicano Studies, University of California-Santa Barbara

Ventana abierta es una revista independiente fundada con el propósito de llenar un hueco en las vías de comunicación hoy existentes entre latinos/as que desean expresarse en Español.

Reclaiming Identity: Realist Theory and the Predicament of Postmodernism
Paula M. L. Moya and Michael R. Hames-García, eds.

"Identity" is one of the most hotly debated topics in literary theory and cultural studies. This bold and groundbreaking collection of essays argues that identity is not just socially constructed but has real epistemic and political consequences for how people experience the world.

White Slavery and Mothers Alive and Dead: The Troubled Meeting of Sex, Gender, Public Health, and Progress in Latin America
By Donna J. Guy

This book brings together a diverse set of essays exploring topics ranging from public health and child welfare to criminology and industrialization. What the essays have in common is their gendered connection to work, family, and the rise of increasingly interventionist nation-states in Latin America, particularly in Argentina.

Ciencia y salud con clave de las escrituras
(Spanish)
By Mary Baker Eddy

This non-denominational book is a bilingual translation of Mary Baker Eddy's best-selling title Science and Health with Key to the Scriptures. Because Christianity is so prevalent within most Latino cultures, a love for the Bible is very common. Ciencia y salud begins with this scriptural basis and presents a practical approach to spiritual healing, which is also very much a part of Latino cultures.

La Mujer, el SIDA y el activismo
(Spanish)
By ACT UP, New York/Grupo Mujer y SIDA
The first comprehensive and progressive book in Spanish about women and AIDS. Enfoca la problematica de la mujer en relación a la epidemia del SIDA, desde un punto de vista liberatorio e integral. Spanish edition of Women, AIDS, and Activism by Beatriz y Ana Simo.

Many publications featured in this section are available through amazon.com.

CONFERENCES

National Conference on Critical Thinking and Educational Reform
Atlanta area June 23-26
San Francisco area July 21-24

The Center for Critical Thinking presents "Critical Thinking in Subject Fields.
Contact: (800) 833-3645; website, www.criticalthinking.org.

AAHE Assessment Conference
June 23-27

"From Expectations to Results: What Are We Finding, and How Are We Improving" is this year's theme. Opening plenary speaker is Richard Light, professor of education and public policy at Harvard University and author of Making the Most of College: How Assessment Can Help Both Students and Us. In Denver, Colo.

HERS, Mid-America Summer Institute
June 24-July 20

The University of Denver's HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.
Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

The Barahona Center Summer Workshops 2001
June 25-27
July 9-11
July 23-25

The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/La literatura en Español dirigida a los lectores infantiles y juveniles at CSU-San Marcos.
Contact: Isabel Schon, director, (760) 750-4070; e-mail, ischon@csusm.edu.

Deaf Education Technology Conference
June 25-29

"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, NY.
Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

Gender on the Borderlands Conference
July 12-14

Sponsored by St. Mary's University, the conference will explore gender in the geographic region that becomes the Spanish/Mexican/U.S. Borderlands, now the Mexico-U.S. border In San Antonio, Texas.
Contact: Antonia Castañeda, History Dept., (210) 436-3608; e-mail acastan@almu.stmarytexas.edu; website, http://aus.stmarytx.edu/~bdlands/.

AFT Quest 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for PreK-12 teachers, school staff, and state and local education leaders, including the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

UNM's Taos Summer Writers' Conference
July 14-20

There are weekend workshops and week-long workshops to select from. Among the many workshop leaders are Pat Mora, "Los cuentos: Family Stories for Beginners," and Alma Luz Villanueva, "Stories: Dreaming Characters to Life." Some scholarships are available. In Taos, N.M.
Contact: website, www.unm.edu/~taosconf.

The Summer Institute for Intercultural Communication 2001
July 18-20
July 23-27
July 30-August 3

This is the 25th summer institute under the auspices of the Intercultural Communication Institute (ICI) in Oregon, which provides professional training and development to thousands who work in multicultural environments throughout the world. Workshops range from "Foundations" to "Who You Gonna Call? Hate-Busting on College Campuses" and much more. Certificate and Master of Arts in Intercultural Relations programs are available.
Contact: ICI, (503) 297-4633; e-mail, ici@intercultural.org; website, www.intercultural.org.

EACUBO/Cornell Administrative Management Institute
July 22-27

The Eastern Association of College and University Business Officers and the Cornell University School of Continuing Education and Summer Sessions present AM2001, a professional seminar for college and university administrative/business managers and department heads. In Ithaca, N.Y.
Contact: (607) 255-7259; e-mail, cusp@cornell.edu; website, www.sce.cornell.edu/EXEC/.
Leadership Alliance 6th Annual National Symposium
July 27-29

The Symposium is the culmination of the Leadership Alliance’s Summer: Research Early Identification Program—10-week research internships at 15 of the Alliance’s 28 member institutions. Dr. Ruth J. Simmons, newly appointed president of Brown University, will deliver the opening keynote address. At the Evergreen Conference Center in Stone Mountain, Ga.

Contact: (401) 863-1474; website, www.theleadershipalliance.org.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

Diversity Advisory Council Colloquium
September 14

The Kent State University Diversity Advisory Council presents a one-day colloquium, “A Country of Strangers: Blacks and Whites in America.” At KSU in Ashtabula, Ohio.

Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashtabula.kent.edu.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLearning People will sponsor “TeleLearning 2001,” “the premier event in distance education and educational telecommunications.” At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

ACE 2001 Conference
October 13-20

“The nation’s most important national conference on diversity and improving minority participation in postsecondary education.” Sponsored by the American Council on Education’s Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

College Board National Forum 2001
October 26-30

This year’s College Board National Forum has as its theme “Measuring Success,” looking at the measures of “success for yourself, your school, your students.” At The Adam’s Mark Hotel in Denver, Colorado.

Contact: (212) 713-8050; website, www.collegeboard.com.

HACU 15th Annual Conference
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme “Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future.” In San Juan, Puerto Rico.
By Dr. Mark Saad Saka

The Illusion of Inclusion addresses a fundamental question for American society: do factors other than elections and electoral politics determine the welfare of communities?

Rodolfo Rosales answers this question in an important political history of one of America's 10 largest cities, San Antonio, Texas. The city and the state were the incubator for Mexican American political activism—fom the founding of LULAC in Corpus Christi, the G.I. Forum, La Raza Unida, the election of Raymond Telles as mayor of El Paso, to numerous Supreme Court decisions. This book fills a vacuum in southwestern urban history, which largely neglected the Mexican American presence until the 1982 election of Henry Cisneros as mayor of San Antonio.

The broader implications of this study are its applicability to the Mexican American political experience, the nature of middle-class politics, and the importance of grassroots activism. This book would be useful in an upper-level undergraduate course in ethnic politics, modern Mexican American history, or urban studies.

In the aftermath of World War II, the Mexican American middle class of San Antonio emerged as a viable political force, possessed the resources to provide key leadership in city politics, and developed the political sophistication needed to form crucial alliances with anti-machine and liberal Anglo political factions. Mexican Americans faced formidable barriers, including segregated public schools, barriers to higher education, restrictive covenants in real estate purchases and home mortgages that isolated Mexican Americans to the west side barrios, and discrimination in public facilities that rivaled Jim Crow of the South. Between 1945 and the early 1980s, the Mexican American middle class challenged the pro-business Good Government League by working within the Democratic Party. These actions ultimately led to independent political activism that broke down discriminatory barriers in public facilities and schools and succeeded in electing such political mavericks as Henry B. Gonzalez, first Mexican American to represent Texas in the U.S. Congress.

By the early 1960s, Mexican Americans would play an increasingly visible role through participation in the VIVA Kennedy! campaign and through the formation of the Political Association of Spanish-Speaking Organizations, or PASSO, which became the vehicle with which the liberal sector of the Chicano middle class could "politicize the people." San Antonio was the launching point for the desegregation of South Texas—a concerted thrust by urban Chicanos into rural conservative anti-Mexican strongholds. The first big victory was in Crystal City, where, in 1963, in conjunction with local Chicano activists and organized labor, PASSO overthrew the local city council in what many historians regard as the beginning of the Chicano movement. National newspapers began to refer to the emerging Mexican American vote as "the sleeping giant."

A major asset of Rosales' book is that it dispels this notion of a sleeping giant by demonstrating that the giant has been awake for years and was beginning to kick in the door.

Another strength is the book's emphasis on the role women played in grassroots mobilization and political activism. During the 1950s and 1960s, many Chicanas became politically active through the House of Neighborly Services, a welfare rights organization involved in protest politics. These were mainly working-class women whose political mobilization led them directly into that middle-class process, electoral politics. Latina women worked in election campaigns, confronted local issues such as education and health, and recruited younger Chicanas into the movement. Rosales provides personal case studies of activist women such as Maria Antonietta Berriozabal, who helped found the Mexican American Business and Professional Women organization and, in 1981, became the first Mexican American woman elected to San Antonio's city council, replacing Henry Cisneros after his successful bid for mayor. While a council member, she constantly challenged the pro-business establishment, which often promoted policies contrary to the well-being of Chicanos.

Since the 1960s, Chicanos have made significant advances in political representation as San Antonio adopted single-member districting, which allowed for proportional representation of Mexican American and African American communities. The process, however, led to the fragmentation of the politics of community organization and to the reconsolidation of the business agenda of growth and expansion of the Anglo north side and the tourism industry, at the expense of community development. As middle-class Chicanos have left the traditional west side barrio, moving into previously segregated Anglo neighborhoods, the working-class barrios have deteriorated, due to lack of investment and shrinking economic opportunities. Thus, most of the Chicano community has not benefited from political inclusion and now finds itself with the legacy of cheap labor jobs geared towards tourism, shabby housing, and poorly financed school districts.

The Illusion of Inclusion thus addresses the fact that for the past five decades, political inclusion has occurred at the expense of more radicalized community issues and contemporary electoral politics has proved a very middle-class-oriented system with no benefits trickling down to the working class. Rosales' insightful political history of San Antonio thus answers the question first posed: there are factors besides elections that determine the welfare of a community.

Dr. Mark Saad Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, Professor Saka has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

For full consideration apply by July 15, 2001, application review will continue through July 30, 2001. For complete job announcement and requirements see web site at: http://www.orst.edu/dept/meo or call (541) 737-9030

Oregon State University is an AA/EEO Employer and has a policy of being responsive to the needs of dual-career couples.

The University of West Florida, one of the ten state universities in Florida, is located in Pensacola, Florida, and enrolls over 12,000 students as its Pensacola and Ft. Walton Beach campuses. This position is located on the Pensacola campus of approximately 1,600 acres that has been designed as a nature preserve. Over 1,000 students live on campus with another 2,000 living nearby. The University seeks a qualified individual to serve as Director, Facilities Management.

Responsibilities: The position reports to the Associate Vice President for Facilities Management. The Director leads a work force of approximately 100 employees in the management and stewardship of the main campus buildings in excess of 347 million square feet of space on 1,600 acres. Develops, operates, and maintains the physical facilities of the University including: building maintenance, mechanical maintenance, electrical maintenance, landscape services, building services, preventive maintenance, utility system, and motor pool; interacts with other University officials, operating contractors and state and federal government agencies; manages and directs the work of clerical, skilled craft, technical, skilled and unskilled personnel. Other duties as assigned.

Qualifications:
- Ten years progressively responsible facilities management experience at a higher education institution with at least five years in a supervisory capacity preferred.
- Demonstrated experience in the development, maintenance, and operation of a modern comprehensive computerized work order system.
- Successful experience in developing teams and leading others.
- Demonstrated ability in identifying problems and implementing creative solutions.
- Demonstrated commitment to customer service and a continuous quality improvement focus.
- Sensitivity in working with diverse groups and experience with modern management trends.
- Excellent communications and public relations skills.
- Experience with the development and control of budgets.
- Bachelor's degree in Engineering, Architecture, Construction Management, or a related academic area and eight years experience as noted above (10 years preferred).
- Master's degree in one of the aforementioned disciplines preferred and six years experience as noted above (10 years preferred).

Salary Range: $70,000-$95,000

Application: UWF is an equal opportunity employer. Women and minorities are especially encouraged to apply. To ensure full consideration, candidates are asked to submit the following:
- Letter summarizing qualifications
- Detailed resume
- Name, mailing address, e-mail address, and telephone number for 3 - 5 professional references.

This position will remain Open Until Filled. Preference will be given to materials received by July 15. Materials received after this date will be held in reserve and will not be forwarded for review upon request by the screening committee or the hiring supervisor. Desired starting date is September 1, 2001.

Send application to:

Administrative Affairs
The University of West Florida
11000 University Parkway, Building 30
Pensacola, Florida 32524

An Equal Opportunity/Access/Affirmative Action Employer

CARLSON SCHOOL OF MANAGEMENT
UNIVERSITY OF MINNESOTA

After 10 years of exemplary service as Dean, David Kidwell has announced his desire to retire this summer. As a result, the University of Minnesota announces a nationwide search to recruit a new Dean for the Carlson School of Management.

Founded in 1919, and re-named the Curtis L. Carlson School of Management in 1986, the Carlson School is recognized as one of the nation's leading business schools. The school is located in a new, state-of-the-art facility on the West Bank of the Mississippi River, between the centers of commerce for the Twin Cities of Minneapolis and St. Paul, a vibrant business community offering strong opportunities for partnership between the school and business and industry. Many of its programs and departments are consistently ranked among the top 20 in the nation; the school itself was recently ranked seventh overall among top business schools in published research.

The Carlson School offers Ph.D., Masters, MBA, and Bachelor's degrees, together with several non-degree programs. Current enrollment is approximately 1,500 undergraduates and 450 graduate students, and 100 part-time MBA students. There are 113 faculty members and approximately 250 staff and adjunct teaching faculty.

The Dean is the Chief Executive Officer of the college and reports directly to the Executive Vice President and Provost. It is expected that the new Dean will be a visionary leader of unquestioned integrity who possesses outstanding interpersonal and communications skills. The new Dean will likely have an entrepreneurial spirit, collegial management style, and a passion for the mission of the school. An ability to foster relationships with the business community and other appropriate external constituencies, and a commitment to academic excellence is necessary, as is the need for a clear understanding of the role of a school such as Carlson in the 21st Century.

The University of Minnesota is an Association of American Universities (AAU) institution, a Carnegie I Research Designee, and one of the most comprehensive and respected Land Grant universities in the country. The Twin Cities campus has a student enrollment of over 45,000 students.

Candidate evaluation will begin immediately and will continue until the position is filled. To assure optimal consideration, materials should be received by July 15, 2001. Please send applications and nominations to:

R. William (Bill) Funk
Korn/Ferry International Education Practice
2100 McKinney Avenue, Suite 1800
Dallas, Texas 75201
Fax: 214/954-1849
Email: ashley.garvin@kornferry.com

Both the University of Minnesota and Korn/Ferry International are equal opportunity/affirmative action employers.
Dean, College of Arts & Sciences

Arizona State University West, located in Phoenix, Arizona seeks a dean to lead its College of Arts and Sciences. The College consists of six interdisciplinary departments offering 12 traditional disciplinary degrees and 6 interdisciplinary degrees. One hundred faculty and staff work with a current enrollment of 1,020 undergraduate majors.

The dean reports directly to the Provost and works with other campus deans to develop interdisciplinary approaches to teaching, research, and service. He/she represents the College both within and outside the University. The dean must be committed to working with faculty -- both through the administrative structure and faculty governance system -- to achieve university academic goals in research and learning and to further the campus goals of diversity, equal opportunity, and affirmative action. Responsibilities include budget, planning, development, personnel decisions, student academic affairs, faculty development, promotion of research, and planning and implementation of degree and non-degree programs.

QUALIFICATIONS

REQUIRED
A successful candidate must exhibit leadership and strategic vision, and have:

• Relevant administrative experience.
• A demonstrated commitment to cultural diversity that includes supporting the diversity of the faculty, students, and staff.
• A terminal degree in a discipline and a strong record in research, teaching, and service that merits appointment as a Professor with tenure in a department of the College.
• A demonstrated commitment to excellence in research and creative activities.
• Demonstrated effective interpersonal and communication skills.
• A demonstrated commitment to excellence in teaching.
• A demonstrated understanding of the integration of teaching, research, and service.
• A demonstrated commitment to working with multiple constituencies on and off campus.

APPLICATION PROCEDURE

Applicants must address how they meet the qualifications listed above in their letters of application. Please send letter of application, curriculum vitae and the names, addresses, and telephone numbers of three referees to:

Dean Michael A. Avender, Chair, Search Committee
c/o Laraine Garndt
Arizona State University West
P. O. Box 37100
Phoenix, Arizona 85069-7100

For more information: 602/543-3254 Fax: 602/543-7731

Confidentiality of all applications will be maintained. Referees will be contacted only after permission from the candidate has been obtained.

Arizona State University West is an Equal Opportunity/Affirmative Action Employer that actively seeks diversity among applicants and promotes a diverse work force.

APPLICATION DEADLINE
August 1, 2001, or the 1st. Monday of each week thereafter until the position is filled.

STARTING DATE:
January 1, 2002, or as negotiated.

The Woodrow Wilson Center in Washington, DC is looking to fill a position responsible for assisting a fast-paced development office with the planning and implementation of numerous high level special events; managing all aspects of event preparation to include budgeting, vendor procurement and oversight, onsite management, and follow-up activities for both domestic and international meetings and conferences. Negotiates contracts with caterers and other vendors. Conducts walkthroughs with vendors and staff before major events to assure that appropriate menus, decor, seating arrangements, and logistics’ support for persons with disabilities have been adequately arranged. Regularly briefs the director and deputy director of development. Prepares bi-monthly reports for the office on event schedules and financial status. Serves as office liaison to the Center’s Public Affairs Office to facilitate the coordination of development activities. For information regarding qualifications and instructions on how to apply, please visit the Center’s Web site at www.wilsoncenter.org. Applications are due by June 26, 2001 to: Woodrow Wilson Center, Human Resources Office, One Woodrow Wilson Plaza, 1300 Pennsylvania Avenue, NW, Washington, DC 20004-3027 (Attn: WC-01-23T).
ASSISTANT OR ASSOCIATE PROFESSOR FISH EPIDEMIOLOGY

The Department of Fisheries and Allied Aquacultures at Auburn University is seeking candidates for the position of Assistant or Associate Professor of Fish Epidemiology. This is a 9-month, tenure-track faculty position with a research appointment. Position is available immediately.

Responsibilities include developing an externally funded research program and supervision of a laboratory for diagnosis of fish diseases and related problems that are important to aquaculture, sportfish, and environmental issues. Research emphasis will be related to prevention and control of fish diseases, including evaluation of fish health management procedures, transmission of pathogens, and environmental effects on diseases. Opportunities will be available to teach graduate-level courses and advise graduate students.

Minimum qualifications include: Ph.D. or equivalent degree in Fisheries, Biomedical Sciences, or related field with experience in clinical and epidemiology and epizootiology; experience with diseases of fish; documented evidence of individual and collaborative research in epidemiology resulting in peer reviewed publications in internationally recognized journals; ability to work with others to develop collaborative research programs; familiarity with federal, state, industry and other sponsored funding agencies; willingness to travel domestically and internationally; and ability to communicate effectively, both orally and in writing. Proof of authorization to work in the U.S. must be provided.

Minorities and women are encouraged to apply.

Ranks and salary are commensurate with education, years of experience, and evidence of productivity in the field of fish epidemiology. Applicants should submit a letter of application, curriculum vitae, transcripts, and names, phone numbers, addresses, and e-mail addresses of three references to:

Dr. John Grizzle, Search Committee Chairman
Department of Fisheries and Allied Aquacultures
Auburn University, AL 36849
Phone (334) 844-3747
E-mail jgrizzle@caqse.auburn.edu

Review will begin June 1, 2001 and continue until a suitable candidate is selected.

Auburn University is an Affirmative Action/Equal Opportunity Employer.

MIAMI UNIVERSITY OXFORD OHIO

EDUCATION

One of the oldest institutions of higher education in this country, the University of Delaware today combines tradition and innovation, offering students a rich heritage along with the latest in instructional and research technology. The University of Delaware is a Land-Grant, Sea-Grant, and Space-Grant institution with its main campus in Newark, DE, located midway between Philadelphia and Baltimore.

Chair
UNIVERSITY OF DELAWARE
Department of Individual and Family Studies

The Department of Individual and Family Studies at the University of Delaware invites applications for the position of Chair, available after July 1, 2002. The Chair is appointed for a renewable five-year term. The Department offers B.S., M.S., and Ph.D. degrees. Twenty-four faculty and staff teach and supervise approximately 400 undergraduate and 50 graduate students. REQUIREMENTS: Earned doctorate in individual and family studies or a related field. National recognition for research and scholarship and significant teaching experience in higher education is required. Experience in administration or management is desirable. For additional information visit the Department Web site at http://www.udel.edu/ifst. Candidates should send a letter of application, a current vita, and three letters of reference by September 15, 2001 to: Timothy Barnakow, Ph.D., Chair IFS Search Committee, Center for Community Development and Family Policy, 184 Graham Hall, University of Delaware, Newark, DE 19716.

The UNIVERSITY OF DELAWARE is an Equal Opportunity Employer that encourages applications from Minority Group Members and Women.

The University of Delaware is committed to ensuring equal opportunity to all persons and does not discriminate on the basis of race, color, gender, religion, ancestry, national origin, sexual orientation, veteran status, age, or disability in its educational programs, activities, admissions, or employment practices as required by Title IX of the Educational Amendments of 1972, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, the Americans with Disabilities Act, other applicable statutes and University policies. Inquiries concerning these statutes and information regarding campus accessibility should be referred to the Affirmative Action Officer, 305 Hulihan Hall, (302) 831-2835 (twice), (302) 831-4563 (TDD).

Seeking Candidates for
President

PHOENIX COLLEGE

For more information about this and other opportunities visit our web site: www.dist.maricopa.edu/hrweb or call 480-731-8465 for a brochure.

Applications are required

The Maricopa Community Colleges are located in the Phoenix, Arizona metropolitan area.

The Maricopa Community College District is an EEO/AA Institution.
**Wheelock College Dean of Graduate Programs**

**The Position**

Reporting to the Vice President of Academic Affairs, the Dean of Graduate Programs is responsible for ensuring a positive, comprehensive student-focused experience for graduate students, and for working collaboratively with the Deans of the four academic divisions to implement cutting-edge graduate seminars, institutes, and programs that promote the growth of graduate programs. The Dean of Graduate Programs coordinates graduate student services, supports all aspects of the out-of-classroom experience, and is responsible for building institutional collaborations that ensure the quality of graduate student life. The Dean oversees the graduate programs, as well as off-campus, summer school, and international programs.

**Qualifications**

The successful candidate will possess an earned doctorate, preferably in an academic discipline that relates to Wheelock’s graduate studies—education, child and family life, or social work—with progress towards completion of higher education administration. Demonstrated experience in college life and an entrepreneurial vision for program implementation, identifying programmatic trends, and coordinating and delivering student services are all important considerations in the selection of the new Dean. The successful candidate will possess a professional appreciation for teaching and learning, as well as an understanding of the relationship between student life and academic life, and a commitment to implementing new programs and to providing an exceptional out-of-classroom experience for students.

**Application and Nomination**

To ensure full consideration, a resume with an accompanying cover letter should be received by June 29, 2001. Nominations of individuals for this position may be submitted to: The Spelman & Johnson Group, 38 Mulberry Street, Box 304, Leeds, MA 01053. Phone: 413-584-7089. Visit Wheelock’s website at www.wheelock.edu.

**The Spelman & Johnson Group**

**BROWN UNIVERSITY**

**SERN DEVELOPMENT OFFICERS/ADVISORS**

**Development/Major Gifts:** The Brown University Development Office seeks candidates for these Senior Development Officers/Advisor positions. The incumbent will oversee and project management within the Major Gifts unit of the Brown Development office, and will identify, cultivate, and solicit key donors capable of giving $250,000 or more to the University Requirements. Bachelor’s degree and 5+ years’ related experience, or an equivalent combination of education and experience. Development funding experience preferred, if not direct fundraising experience, applicants must demonstrate transferable experience from another field (customer service, sales, etc.). Must have excellent written and oral communication skills, and must have proven ability to solicit and close gifts at the $250,000+ level, or equivalent experience in a related field (such as sales). Should also have a high degree of computer literacy and information management skills.

For the above positions, please send resume with cover letter to Human Resources, Box 1879, Providence, RI 02912.

An Equal Opportunity/Affirmative Action Employer. Visit our website at www.brown.edu
Diversity Vitae Bank

Appalachian State University, one of the sixteen constituent institutions of the University of North Carolina System, is dedicated to diversity. To augment our diversity recruiting efforts, the University’s Equity Office has established a diversity vitae bank and will maintain for an extendable period of six months the credentials of individuals from underrepresented populations who have interests in candidacy for full or part-time faculty appointments. Underrepresented populations include individuals from economically or culturally disadvantaged backgrounds, Native Americans, African Americans, Mexican Americans, Puerto Ricans, and Asian Americans.

When a position becomes available, the credentials of prospective candidates who meet the position specifications will be sent to either the academic department chair or the hiring supervisor. Such individuals will also receive notice of the position opening and a contact name if he or she wishes to inquire further about a position.

SCHOOL OF COMPUTATIONAL SCIENCES

Faculty Position in Bioinformatics and Informatics

The School of Computational Sciences (SCS) at George Mason University is seeking candidates for tenure-track and tenured faculty positions in the Molecular Bioinformatics and Informatics (MBI) group.

The successful candidate will have a Ph.D. in a postdoctoral experience, and strong research interests in bioinformatics or computational approaches to molecular biociences. Areas of interest include but are not limited to complex modeling, structural genomics, molecular genetics and molecular evolution. Additionally, a strong commitment to contributing to quality MS and PhD programs in Bioinformatics is expected. Junior and senior level positions are available. Senior level applicants must have demonstrated the ability to obtain competitive research grants, to direct independent research projects, and should show evidence of excellent academic teaching ability.

SCS offers an interdisciplinary Ph.D. in Computational Sciences and Informatics with a concentration in Bioinformatics, and an innovative professional MS program with concentration in bioinformatics/biotechnology and forensic bioinformatics. Excellent molecular biology, analytical instrumentation and computational facilities are available in the HFF facilities, located in a new research and teaching building on the GMU Prince William campus. The GMU Prince William campus is located in northern Virginia near the Washington D.C. metropolitan area.

For more information about these positions, please contact Dr. Curtis Jamison at cjamison@gmu.edu. General information on SCS and HFF is available at our websites:

Please send your CV, a statement of research interests, and three references to either in electronic (preferred form to cmflannery@gmu.edu or in hard copy to:

Soaring Higher

Houston Community College System (HCCS), a public comprehensive community college, is one of the largest higher-learning institutions in the Gulf Coast area of Southeast Texas. With an enrollment of 55,000 credit and noncredit students and 223 instructional programs, HCCS is organized into five regional colleges that serve a culturally, ethnically and economically diverse student body.

Vice Chancellor, Finance and Administrative Services

This position is responsible for the management and coordination of Business Affairs, Security, Risk Management and facilities.

The candidate will direct through subordinate managers, the following financial activities: budget, development, purchasing, accounting, accounts payable and receivable, property management, investment of funds, state and federal funds, grants, cost studies, travel, revenues, expenditures, financial statements, insurance, auditing and related operational functions of the institution. You will prepare and submit the annual system budget to the Chancellor for Board of Trustees approval, coordinate and ensure compliance of fiscal policies and procedures pertaining to state and federal transactions, formulate and recommend to the Chancellor, policies and procedures governing institutional financial activities, and assist the Chancellor in fostering economy throughout the Houston Community College System by the most efficient and effective use of allocated funds.

Other responsibilities include assisting the Chancellor in the supervision and monitoring of expenditures of the system; initiate, prepare and maintain all correspondence, reports and studies necessary or appropriate to the position; hire, train and evaluate personnel directly responsible to the position; work cooperatively and effectively with all system and governance and policy-recommending bodies; overseeing the development, maintenance, and management of the facilities of the system, and overseeing and ensuring, through the offices of System Police and Risk Management, the safety and security of all persons and property throughout the Houston Community College System.

Qualifications include the the ability to perform essential duties and responsibilities listed above. Candidates must have an undergraduate degree in Business Administration and a CPA or MBA with an emphasis in Finance or Accounting. This position also requires five (5) years of experience at a senior-level fiscal management position. Higher education or public agency administration experience preferred. Candidates should also be able to balance strong, action-oriented leadership with collegial, decision-making practices.

Fax resume with salary history and cover letter to (713)439-8201.

ASSOCIATE VICE CHANCELLOR FOR HUMAN AND PUBLIC RESOURCES

UNIVERSITY OF COLORADO AT COLORADO SPRINGS

This reconfigured senior level officer reports directly to the Vice Chancellor for Administration and Finance and acts as the Vice Chancellor in his absence. The Associate Vice Chancellor for Human and Public Resources will provide executive leadership and strategy for campus human resources and public safety.

This officer will participate in executive leadership and planning processes, identifying the human resources implications of planning and policy decisions, as well as ways that human resources contribute to the achievement of the campus master plan and the academic, administrative, and infrastructure goals of the campus. Initial emphasis will be placed on improvements to existing human resources services and identification and implementation of services not currently provided, including professional training and development. This officer will be responsible for implementation of the State of Colorado Performance Pay System and will act as liaison to the CU System Payroll and Benefits Services Center. In addition, this person will supervise the Director of the Department of Personnel and the Director of the Department of Public Safety, which includes campus police, parking services, and risk management.

Minimum Qualifications: Master's degree in a related field from an accredited college or university. Ten years of progressively responsible leadership and management experience. Strong interpersonal and communication skills and an interest in working collegially in a shared governance environment. Knowledge and professional training and education in human resources strategies and programs. Demonstrated ability to work with a diverse workforce.

Preferred Qualifications: Doctorate or terminal degree in a related field. Professional higher education work experience. Specific professional education, training, and knowledge of public safety, parking services, and risk management.

The University of Colorado at Colorado Springs is one of three general campuses of the University of Colorado. The campus is evolving as a new generation university, committed to student success, and valuing teaching and research equally. CU-Colorado Springs is located in Colorado’s second-largest metropolitan area with a population of over one-half million people. For more information about the University, please visit our website at http://www.uccs.edu/

The successful candidate will be a people oriented person of high integrity who has experience in team building and conflict resolution and an understanding of the legal and statutory issues related to human resources administration.

Application: Please send letter of application, resume, and names and telephone numbers of five references to:

Susan Szpyrka,
Search Committee Chair,
University of Colorado;
P.O. Box 7150;
Colorado Springs, CO 80933-7150.

Screening of applications will begin June 25, 2001 and will continue until position is filled.

The University of Colorado is an AA/EEO employer and encourages a diversity of applicants.
Columbia College Chicago is looking for an Assistant Vice President/Chief of Staff in the Office of the President. The office has five staff and is responsible for a cabinet of five Vice Presidents and an Advisory Council of twenty-five.

Responsibilities include facilitating operational matters on behalf of the President, representing the office to internal/external constituencies, designing and managing special projects, documenting cabinet level interaction with the President as well as research, report presentation and senior level communication.

At minimum an M.A., terminal degree preferred, should be combined with significant academic administrative experience preferably with an emphasis in arts and media.

Oakton Community College

Director of Instructional Support Services

Oakton Community College is a dynamic, comprehensive community college with two campuses serving the North Shore suburbs of Chicago. The College is known for its commitment to serving students, academic innovations and solid financial position. With an annual budget of $60 million and an enrollment of 20,000 headcount/7,000 FTE students, Oakton is seeking candidates to fill the position of Director of Instructional Support Services (ISS). The Director of Instructional Support Services works closely with faculty and staff to conceptualize, initiate and deliver programs and services at both campuses. ISS services include: course placement, make-up, and contract testing; individual and group tutoring; study skills workshops; services and accommodations for special needs students; ESL, non-native student assistance; College Success courses; and the Teaching and Learning Center (the College’s professional development center for faculty and staff).

ISS employs 55 full and part-time staff and more than 75 faculty, professional and peer tutors. The ISS budget is approximately $1 million annually, some 45% of which comes through state and federal grants.

The successful candidate will be creative, able to work well with diverse groups, and have the ability to move projects from idea to implementation. He or she must appreciate and endorse academic support services for all students and provide creative leadership for the College’s professional development program. The director must have strong organizational skills, sound judgment and flexibility, demonstrated ability to supervise professional and clerical staff, and the commitment and willingness to work with a team.

The Director must have a master’s degree in Developmental Education, Reading, ESL, Composition and Rhetoric or a related field (a doctorate is preferred) as well as a combination of five years of teaching and progressively responsible administrative experience in education (higher education preferred). Two years of experience in a Learning Center or Academic Support Services and experience in developing professional development training/programs are preferred.

To apply, submit your resume, cover letter and at least one letter of recommendation to: Oakton Community College, Human Resources, 1600 E. Golf Road, Des Plaines, IL 60016-1268, Call (847) 635-1765 or fax (847) 635-1764 e-mail: admsrch@oakton.edu

Nominations may be submitted to Human Resources at the above address or via e-mail to lbers@oakton.edu or garyn@oakton.edu

Additional information about Oakton can be found at www.oakton.edu

Confidential screening of applicants will begin July 2, 2001 and continue until the position is filled. Preferred starting date is October 1, 2001.

EQUAL OPPORTUNITY / ADA EMPLOYER
WOMEN AND MINORITY GROUPS STRONGLY ENCOURAGED TO APPLY

Founded in 1861, the State University of New York at Oswego is a highly regarded comprehensive regional institution offering Bachelor’s, Master’s and Certificate of Advanced Study degrees in more than 100 academic programs to more than 8,000 students. The campus of nearly 700 acres on the shores of Lake Ontario is just 40 minutes from Syracuse. With more than 1000 employees and an annual operating budget of more than $100 million dollars, Oswego has a significant economic and educational impact on the Central New York Region.

The Vice President for Administration and Finance reports directly to the President, serves as a member of the President’s executive staff, and is responsible for providing strategic direction and operational guidance for the Division of Administration and Finance. As the college’s chief financial officer this position is responsible for coordinating the development of the college’s budget, developing and maintaining financial records and reports, and the implementation of financial policies and procedures that strengthen the overall operation and effectiveness of the institution. Divisions reporting directly to the Vice President include Physical Plant, Health and Safety, Finance, Purchasing, Bursar and Campus Information Services. This position includes oversight for over 300 division employees and a total division budget in excess of 10 million dollars. The Vice President also serves as the principal liaison with SUNY System Administration as it relates to business activities.

Qualifications: MBA or comparable degree in a related field such as finance or administration; a minimum of seven years effective senior management experience in a complex environment, preferably in higher education; demonstrated expertise in strategic and financial planning, investment management, budgeting and accounting; proven record of administrative effectiveness including demonstrated ability to integrate technology into administrative systems; strong written and verbal communication skills, and an ability to present financial information clearly to diverse constituencies; ability to establish solid interpersonal working relationships with university and external constituencies.

Review of applications will begin July 16, 2001 and will continue until the position is filled. Send letter of application, current vitae, and the names, addresses and telephone numbers of three professional references to:

SUNY Oswego is an Affirmative Action Employer
The University of Maryland invites applications and nominations for the position of Dean of the College of Health and Human Performance. The College is composed of the Departments of Family Studies, Kinesiology, Public and Community Health, and the Center on Aging. The College houses a Wellness Research Laboratory for faculty and staff and the Family Service Center that provides marriage and family therapy services for area families.

The College has responsibility for approximately 70 faculty, 200 graduate students, and 800 undergraduate students in the three departments. Family Studies offers a bachelor's degree, a master's degree programs, including an accredited Marriage and Family Therapy program, and a doctoral program. Kinesiology, consistently ranked in the top 20 programs nationally, offers bachelor's, master's and doctoral degrees. Public and Community Health offers bachelor's and doctoral degrees, a CEPH accredited Master's in Public Health, as well as a Gerontology Certificate through the Center on Aging. The College has a full annual budget of approximately $5 million and has experienced substantial growth in research productivity over the past several years, with $5 million per year in current research support. The College is located in modern facilities and possesses state-of-the-art experimental laboratories and service clinics.

The Dean is expected to be forward-looking, provide visionary leadership, and build upon the superior research and educational activities within the College and University. The primary responsibilities of the position include: supporting interdisciplinary research, maintaining and enhancing opportunities for development with alumni and government and industrial partners; and supplying administrative oversight and direction. Candidates must demonstrate a distinguished record of scholarly achievement, strong commitment to excellence in teaching, research, and service, demonstrated administrative ability, a strong record of promoting diversity and excellence, and excellent interpersonal and communication skills. Candidates must meet the criteria for full professor in one of the College departments. The Dean reports directly to the Senior Vice President for Academic Affairs and Provost, the chief academic officer for the University.

Counseling and Psychological Services (CAPS), University of Kansas. Full-time, unclassified position beginning August 19, 2001 or as soon as possible thereafter. Required qualifications: Master's degree in Social Work from a CSWE accredited program, licensed at the LMSW level in Kansas within 6 months of the appointment, strong written and oral communication skills. CAPS desires to strengthen its capacity to serve special student groups including, but not limited to, African Americans, Asian Americans, Latinos/as, Native Americans, students with disabilities, gay/lesbian students, and/or International Students. Therefore, a preferred qualification is training or experience in counseling or outreach programming to diverse populations. Salary $29,000 - $38,100. Review of applications begins immediately and will continue until the position is filled. Priority will be given to applications received by June 29, 2001. A complete application will include a letter outlining relevant experience and interest, curriculum vitae, and three letters of reference. Original copies of application materials are required. Submit to Pam Botschi, Ph.D., Chair, Search Committee, Counseling and Psychological Services, Watkins Health Center, University of Kansas, 66045. Phone (785) 864-2277. For inquiries only, e-mail pbotschi@ku.edu. A complete position announcement and application procedures are available upon request or see http://www.ku.edu/~stlle/.

The University of Kansas is an EO/AA Employer.
President
Natural History Museum of Los Angeles County

The Natural History Museum of Los Angeles County, one of Los Angeles' oldest cultural institutions, is among the largest and most respected institutions of its kind. The Museum complex includes the main campus in Exposition Park, the Page Museum/La Brea Tar Pits, and the Willard S. Hart Museum. The Museum is a unique public/private partnership supported by the County of Los Angeles and private funds, combining both natural science and cultural history. Annual budget is approximately $28 million.

The new president will lead an ambitious agenda including funding and building of a new headquarters museum. Additional challenges will include strategic and operational alignment of the organization to meet future aspirations/goals, increased positioning and marketing efforts, maintaining effective and productive board and community relations, and enhanced cooperation with the Museum's public partner, Los Angeles County.

Candidates may emerge a variety of fields, including industry, government and education. Candidates outside the museum field should evidence meaningful connection to the content of the organization. Package includes housing.

Please respond to Hadrick & Stullings, attn: Natural History Museum, One California Street, Suite 2400, San Francisco, CA 94111.

The Natural History Museum encourages applicants from all backgrounds.

NORTHERN VIRGINIA COMMUNITY COLLEGE
DIRECTOR, COMMUNITY AND WORKFORCE DEVELOPMENT #FA128-HO
Alexandria Campus Salary $54,983-$75,601 + benefits. Twelve-month administrative faculty position. Provide leadership for financially self-supporting unit responsible for community education, workforce development, and business and industry contract training. Will become involved with several challenges facing the division, including the reorganization of Continuing Education and Workforce Development at the college level, rebuilding contract training at the campus level, and the ongoing effort to fully integrate the unit into the campus environment. Serve as primary liaison with various community organizations (Chambers of Commerce, city/county governments), and clients such as area businesses, federal government agencies, and corporations, as well as having responsibilities for service on college-wide committees and college and system-wide working groups. The campus maintains large non-credit programs in ESL and IT, and offers a full range of community education and life-long learning classes. The Director will provide program development support for existing programs and potential new programs, serve as chief fiscal officer for the unit (including creating and managing department budgets), and develop an overall business and marketing plan. Supervise five full-time and seven part-time staff and an off-site workforce development center. Report to campus Provost and become an integral member of the campus management team. Requires: Specialist degree (24 graduate semester hours beyond the master's) in a related field and extensive experience in the management of a community education and/or workforce development program in an academic institution. Significant experience in fiscal and personnel management. Two years teaching experience. Position requires a change agent who is solution-oriented and a problem solver; a team player who can both communicate and listen, build consensus, maintain flexibility, is willing to take risks, and welcomes the challenge of working with diverse groups of people on the campus and in the surrounding community. Desired: Earned doctorate in a related field. Four years teaching experience and prior work in a community college. Previous experience with ESL programs and knowledge of visa regulations. Experienced with adult education and contract training programs. A well-developed sense of humor will be a major asset. Send application to NVCC-HR, 4601 Wakefield Chapel Rd, Annandale VA 22003 by 5pm on 7/6/01. EEO/AA

I WAS NOT SUPPOSED TO MAKE IT

As a young Puerto Rican raised in the U.S., I was never privy to my history or culture. Growing up in Orlando, Florida, I was told I was a "problem child." After countless evaluations by school psychologists, it was determined that I was hyperactive. It seemed that nothing in school interested me. My mother, Margarita, was my shield, protecting my interests during numerous parent-teacher conferences. My mother believed there were inconsistencies between my behavior at home and at school, as she had been witness to my above-grade-level reading skills and conversations. Certainly, I had been prepared to attend school. What was happening?

I distinctly remember being told by my second grade teacher that if I was not quiet in class, I would be tied up in my chair with a piece of rope. This instilled a slight degree of fear. My third grade teachers, according to my estimations, despised me because I always disrupted class. I did not know it then, but I was also rebelling against the notion that education was nothing more than an attempt to overemphasize rote memorization, and it did not foster freedom of expression or creativity.

My (mis)education continued throughout middle school and high school, where popularity contests and the clothes you wore determined your social standing and prospects for the future. I was often made to believe that acting white meant forgetting or ignoring your language and culture. Individual differences were not celebrated but denigrated. In high school, I rebelled by not applying myself to the best of my academic abilities. The fact that I lacked an Anglo cultural and social capital disempowered me.

I soon figured out that a Puerto Rican-based way of knowing or seeing the world was not encouraged, and someone like me was not encouraged to apply to Cornell, Harvard, or Brown. Instead, I was told by "guidance" counselors that my 2.3 GPA and my 800 combined SAT score (a score that determines your mastery of Anglo, upper-middle-class cultural/social capital) would only get me into the U.S. military. I was lacking intrinsic motivation. Not knowing who I was by way of knowing the history of my people, I had no hope of knowing where I was headed and had no hope for the future.

Knowing I had more to offer society, I enrolled at Valencia Community College in Orlando, where I came across a curriculum that encouraged the freedom of expression and the opportunity to do research that was interesting to me, not just to the classroom teacher. After two years at this community college, I was able to increase my GPA, and I was awarded a Florida Board of Regents Minority Scholarship for study at the University of Central Florida. After earning my Summa Cum Laude in Spanish, I decided it was time to discover my history and culture, and moved to Puerto Rico, where I earned a master's in the Teaching of ESL. I decided to become a teacher so that I could provide children with an education that I had not received as a young child. However, it would not be until I was awarded a Title VII Bilingual Education Fellowship in 1998 to pursue a doctorate at Pennsylvania State University that I would become a "political" teacher.

At Penn State, I was encouraged to ask the following questions: "Who does education serve or not serve?" "Whose knowledge is valued?" "Does education serve to challenge a status quo or merely perpetuate it?" "How can we use education as a resource with which to transform our world via social justice?" These questions led me to undertake a qualitative study of the Dr. Pedro Albizu Campos High School located in Chicago, Illinois.

This alternative high school was founded to provide Puerto Rican, Mexican-American, and African-American students with knowledge of their respective cultures and world views in relation to their positions as colonized peoples, while taking courses in the traditional content areas of language, science, and mathematics. This high school's curriculum works to decolonize the minds of its students and affirm their identities. This makes education more meaningful for them, as they are able to apply their knowledge to the society in which they live. The central message of the school is, "You can become a success and role model for your people and community!"

As I conclude my doctoral studies, I realize that education has the potential to be meaningful in the lives of students. More important, I found out that learning is a path that leads to pedagogical and personal liberation. Education can free your mind and lead you to discover who you are and how others view you. Yes, I can make it! Are the rest of us willing to lead others down the same path of liberation?

Latinas: Their Education and Future

by Gustavo A. Mellander

The respected American Association of University Women (AAUW), with headquarters here in Washington, D.C., has long led the fight to secure equal opportunities for 51 percent of the nation's population—its women.

It has been an uphill battle. AAUW's record is liberally peppered with its share of victories. Women have yet to achieve salary parity with men. But 86 cents versus $1.00 is a lot better than the 57 cents versus $1.00 of a few decades ago.

What about education? We have all read about the digital divide between affluent, mostly White suburbs and those areas inhabited by Hispanics. It is a vicious divide, and it is pervasive. Let's take that down a notch. What about the education provided Hispanics? Specifically, Hispanic girls. In a few sharp words, AAUW points out that "our schools are not meeting the educational needs of America's fastest-growing female minority population—Latinas." That is the essence of its new report, *Sí, Se Puede! Yes, We Can. Latinas in School.*

It reviews the K-12 educational status and progress of Latinas. It explores the cultural interaction between America's Hispanic children and the schools they attend. Carefully researched and poignantly written by Angela B. Ginorio and Michelle Hus ton, the report examines Latinas and how their futures, or "possible selves," are fashioned by a multiplicity of influences—their families, their culture, their peers, their teachers, the media, and the interaction among all of them.

According to the report, Latinas lag behind other racial and ethnic groups of girls in several key educational measures. They have not benefited from gender equity advances to the degree or extent that other groups of girls have.

**Differences**

Analyzing the differences in educational achievement between Latinas and other girls, the report finds that:

- The high school graduation rate for Latinas is lower.
- Latinas are less likely to take the SAT exam than are their White or Asian counterparts, and those who do so score lower, on average.
- Compared with their female peers, Latinas are under-enrolled in Gifted and Talented Education (GATE) courses and in AP courses.
- Latinas are the least likely of any women to complete a bachelor's degree.

**Latino Men**

Well, are Latino men doing any better? No. Although Latinas fare worse than do other racial and ethnic groups of girls on most measures of educational performance, they perform better than do their male peers on many measures. Comparing Latinas to Latinos, the report finds that:

- In the fourth grade, Latinas score higher in reading and history; by eighth grade, they score higher in mathematics and reading; and by the 12th grade, they score higher in science and reading.
- Latinas outnumber Latinos in taking the SAT exam (58 to 42 percent in 1999), yet they score lower than do Latinos on both the math and verbal section. The gender gap among Hispanics is greater than that of any other group. Latinas take the same number of or more AP exams than do Latinos but score lower in AP math and science exams. Latinas are nearly three times less likely to be suspended and less likely to be referred for special education than are Latinos.

The report provides clear and compelling evidence that both Latinas and Latinos still face stereotyping and encounter other obstacles that discourage success in school.

Some obstacles are different for Latinas than for Latinos. Latinas are three times as likely to fear for their personal safety in school as are other girls. And teachers and counselors often assume that Latinos are gang members simply because they speak Spanish, seem foreign, and act different.

**Recommendations and Suggestions**

All adults who relate to young Hispanics need to encourage academic success. Latinas need to hear from all the adults in their lives that college and professional careers are rewarding options and ones that they can achieve. Advisors must curb tendencies to promote gender and racially stereotyped careers and must ensure that Latinas are not underrepresented in college-prep classes.

More schools and colleges must recruit and train teachers from the Hispanic community as role models who can better connect educational goals to the students' cultural background.

The whole family has to be actively involved in the college preparation process. College requirements need to be demystified. Families need to understand long-term benefits of attending college.

Finally, teen pregnancy, which impacts school performance, has to be addressed in an honest and forthright fashion. Strategies presently exist to keep youngsters from getting pregnant, but failing that, those new mothers must be kept in school. That can be accomplished by offering child care and alternative scheduling, and by recognizing that being a young mother and a student intent on completing her education are not incompatible.

Dr. Mellander is a professor at George Mason University.
S

Sometimes progress can be a conundrum. Women's salaries still lag behind those of men. Yes, they've gone up, but, for the moment, figures from AAUW, the American Association of University Women, still show no parity. Currently, it's 86 cents to a dollar, up from 57 cents. Comparative income data among ethnic groups also reveal a gap, and if you include the genders, well, it's no different.

Interestingly, while we continue to work on leveling gender/income disparities, spending power among Hispanics as a whole is booming. The numbers are mind-blowing: $500 billion annually now and expected to rise to $1 trillion by 2050! I wonder if improvements in retention, graduation, education access, and diminishing the racial and digital divide will be as prominent. Let us pray.

One of our features reports on how Hispanics are increasingly being noticed, represented, and addressed in the media. An important point is the recognition that while our community shares one language, we are not one. Hispanic is an umbrella under which a kaleidoscope of people are represented. Advertisements for automobile manufacturers, department stores, phone companies, fast food chains, the music industry, and the like have begun to make that distinction and are benefiting from our flourishing population and our discretionary dollars. “Savvy advertisers have recognized the value and importance of targeting the Hispanic population. The Census figures brought this to light, and they have sent a clear signal to corporate America that this group simply cannot be ignored,” says Horacio Gomes, AHAAs president and CEO of HeadQuarters Advertising in San Francisco, Calif. Take a look.

Próximo—slated for our next issue are stories on ASPIRA, a consortium for minorities at liberal colleges, an update on the White House Initiative and the SAT...y mucho más.

Seguimos informando,

M. Saezert

MARK YOUR CALENDAR  October 18-20, 2001  Cincinnati, Ohio

Educating All of One Nation

Plan Now to Attend.
The Nation's Most Important National Conference on Diversity and Improving Minority Participation in Postsecondary Education

Sponsored by the
American Council on Education's Division of Programs and Analysis
Office of Minorities in Higher Education

OFFICE OF MINORITIES IN HIGHER EDUCATION
Celebrating 20 Years of Diversity (1981-2001)
This spring in Washington, D.C., the Hispanic Caucus of the American Association for Higher Education (AAHE) honored the Latino leaders and administrators from across the country presented each honoree with a standing ovation. At the AAHE Hispanic Caucus awards ceremony at a luncheon sponsored by the Hispanic Caucus, members presented each honoree with a certificate of recognition. The event was attended by members of the AAHE executive board and members of the AAHE executive committee. The event was attended by members of the AAHE executive board and members of the AAHE executive committee. The event was attended by members of the AAHE executive board and members of the AAHE executive committee.
Arizona State University, Ricardo Fernández of Lehman College, Juan González of Georgetown University, and Gustavo Mellander of George Mason University.

Outgoing Caucus chair Dr. Henry Ingle, associate vice president for technology planning and distance learning at the University of Texas at El Paso (UTEP), expressed his excitement about a new immigration museum in the works for downtown El Paso. The museum is being sponsored by UTEP.

Juan González, incoming chair of the AAHE Hispanic Caucus, is vice president for student affairs at Georgetown University. "The Outlook was very gracious in sponsoring the Hispanic Caucus awards and reception," said González. "The Outlook truly made a huge difference in the Hispanic Caucus experience at this year's national conference."

At the awards luncheon the next day, Ingle told the guests that it was important for the Caucus to honor those "Latino leaders in education who make outstanding achievements for the Latino community."

"The awards ceremony was able to acknowledge in a small way the dedication to the service of Hispanic education by our award recipients," González told HO. "The ceremony was a tribute to individuals who have given of themselves to the greater good of the Hispanic population both here in the United States and in Puerto Rico."

Douglas X. Patiño

Douglas X. Patiño, vice chancellor for university advancement at California State University, a 23-college system, received the Alfredo G. de los Santos Jr. Distinguished Leadership in Higher Education award, which is given to an outstanding administrator. Patiño, who is president of the CSU Foundation, said, "The greatest honor one can receive is to be honored by one's own community."

Patiño has held leadership posts both in and out of higher education. Before joining CSU, he was director of the Arizona Department of Economic Security, secretary of the California Health and Welfare Agency, director of the California Employment Development Department, and vice president for student affairs at the University of Southern Colorado in Pueblo.

Patiño is known for his efforts to raise funds in support of Hispanic students and faculty, to serve as a mentor to Hispanic administrators and faculty in colleges and universities, and as a spokesperson for the hiring and tenure of Hispanics as faculty and administrators.

He commented on the low numbers of Latino males pursuing higher education, expressing a concern that too many Latino males might, as have too many African American males, fail to finish high school. He urged Latino leaders to study the matter more closely to make a turnaround more attainable.

"It's very depressing," Patiño told HO. "I don't know why this is occurring. I don't know if there are enough support systems for Latino males. I don't think this country has high expectations of Latino males. What a shame if we let that happen in the Latino community. I am happy that the numbers of Latinas going to college are up."

Virginia Sánchez Korrol

The Outstanding Latina/o Faculty in Higher Education award was given to Virginia Sánchez Korrol, professor and chair of the Department of Puerto Rican and Latino Studies at Brooklyn College, CUNY, in Brooklyn, N.Y. She is currently working on Latinas in the United States: An Historical Encyclopedia, a two-volume book honoring Latinas who have made their mark in politics, arts, media, and business between the 16th century and the 1970s. The Indiana University Press slated it for publication in 2003.

Dr. Sánchez Korrol has been instrumental in revising her department's curriculum, has coordinated various international meetings on the theme of women's research, served as co-director of the Symposium on Latina Worker's History, and has been active on a number of boards, including the board of advisors for the Women's Museum in Austin, Texas, the editorial boards of Journal of American Ethnic History, Latino Studies, Latino Review of Books, and others.
Sánchez Korrol said she was surprised to be selected. "I am flabbergasted and honored by the award," she said. "You work in your own niche and don't know that anybody is looking. You have honored who I am and the work to which I have dedicated myself. But this award is not for me alone. You have given it to all the pioneers in Latino studies, Puerto Rican studies, Chicano studies, and Mexican American studies."

Teófilo Jaime Chahín

The Outstanding Latino/a in Higher Education Creativity and Publications award was given to Teófilo Jaime Chahín, associate vice president for human resources and dean of applied arts and technology at Southwest Texas State University in San Marcos, Texas. The award considers work done in the area of new technology, as well as more traditional creative endeavors in scholarly work, that has reached national prominence and that has enhanced the culture and understanding of the Hispanic community. Chahín, a founding member of the AAHE Hispanic Caucus and previous chair, is not only an outstanding traditional scholar but was instrumental in securing funds for the production of the documentary, Las Colonias: the Forgotten Americans, a film that portrays the conditions of life for Mexican U.S. citizens who live along the Texas-Mexico border. The film, narrated by former San Antonio mayor and Clinton cabinet member Henry Cisneros, has been aired by PBS and seen, says Chahín, by 162 million people. Attention garnered by the documentary has led to other efforts to revamp living conditions along the border. Chahín said he is trying to help residents secure funding to build several thousand homes.

Chahín said the living conditions he encountered on the U.S. side of the border while filming the documentary were "unacceptable," and that those under which he lived in the 1960s in the labor camps of Walla Walla, Wash., were better.

Luis Valdez

The Latino Cultural Arts awardee was Luis Valdez, internationally renowned playwright and filmmaker. Valdez founded El Teatro Campesino, which supports Latinos pursuing careers in theater. He is the author and director of Zoot Suit and La Bamba. He has been a college-level instructor. Valdez was unable to attend the awards ceremony due to conflicts with Hollywood's Academy Awards and his involvement as a set designer.

Jesús Rangel

The Outstanding Support of Hispanic Issues in Higher Education award was given to Jesús Rangel, vice president for corporate relations for Anheuser-Busch Companies. Rangel has an outstanding and long record of support for higher education initiatives, especially those that impact Latinos. He is responsible for continued support of the AAHE Hispanic Caucus. His responsibilities at Anheuser-Busch include overseeing community development programs at the international, national, and state levels. As a result of his work, his company is recognized by the Hispanic community as a socially responsive organization that provides jobs, scholarships, internships, and employment for Hispanics.

González, new chair of the Caucus, praised the award recipients and said he was moved by their "heartfelt and humble" acceptance speeches.

"It is the goal of the Hispanic Caucus to bring attention to the contributions of outstanding educators who would otherwise not receive recognition," said González. "All too often, the greatest contributions are by our own Hispanic colleagues, but too often, we have failed to support and celebrate their significant contributions. The Hispanic Caucus, along with The Hispanic Outlook, working collaboratively, attempt to showcase and honor our Hispanic leaders."

Another important event for the Hispanic Caucus was The Tomás Rivera Lecture, "Latina/os in the Acapulco: Have We Come a Long Way to Nowhere?"—given by Dr. Felix Gutiérrez, senior vice president of the Newseum in Washington, an interactive museum devoted to media. (An acapa-

DIRECTOR OF STUDENT ACTIVITIES

Montclair State University, a comprehensive state-assisted institution offering a rich array of programs to approximately 13,000 undergraduate and graduate students, is seeking a director of Student Activities. Under the supervision of the associate dean of students, the director of student activities coordinates all student activities on campus. The director develops and implements a strategic plan for the provision of campus-wide co-curricular programs. Provides leadership to a campus-wide effort to invigorate campus life and create a more active and involving community for all students. Collaborates with and provides support to all campus departments and student organizations involved in student programming. Supervises, advises and coordinates all student organization programming.

Qualifications: Master’s degree in student personnel administration or related field with a minimum of five years’ experience in student affairs with an emphasis in student activities or student programming. A high-energy professional with a strong student development focus and evidence of creativity. Ability to work with a diverse student population.

Salary Range: $47,000 - $65,000

Apply by: Review of applications will begin immediately and continue until position is filled.

Starting Date: August 1, 2001 or sooner.

Send letter and resume (include V/VI) to: Margaree Coleman-Carter, Associate Dean for Student Life, Montclair State University, Box C316-V/VI, Upper Montclair, NJ 07043.

Race and Education: 
Examining the Gaps

Public Education Network Chronicles Racial Disparities

QUALITY NOW!

by Marilyn Gilroy

When it comes to education, most parents want the same things for their children: good, safe schools that offer high academic standards and a well-trained, caring group of educators. This basic desire for quality education is a matter of common sense. After all, there are plenty of studies showing that more rigorous curricula and highly qualified teachers produce higher achievement among students. But studies also show that Latinos and Blacks have less access to these resources than Whites do.

Why does this disparity continue after years of trying to legislate and enforce equal opportunity measures? One answer is found in the latest Census data, which show that the nation is more racially and ethnically diverse than ever but that people still live in largely segregated communities.

This ongoing demographic pattern has grave implications for the achievement levels of minority students who attend schools in poor and failing districts. Very few organizations are willing to tackle this issue head-on or call it what it is—a racial divide. But the Public Education Network (PEN), the nation's largest community-based school reform organization, has released a report based on an examination of issues of race and education in eight very different communities across the United States.

The findings indicate that unaddressed issues of race continue to influence the performance of students nationwide. It reports that even when communities are committed to addressing the resource and achievement gaps that separate minority and White students, school systems fail to hold all students to the same high standards and expectations.

“Talking about race is never easy, especially when it involves the future of our nation's children,” said
"With the assistance of concrete data," notes Puriefoy, "the public is being forced to recognize the stark discrepancies between education opportunities afforded students from different backgrounds."

Paterson, N.J.

In Paterson, New Jersey's third largest city, where the enrollment of 24,000 students is 51 percent Hispanic and 45 percent African American, the project was entitled Levante Cada Voz (Lift Every Voice). In the early 1990s, the city was plagued by poverty and unemployment, and the schools were characterized as "failing and mismanaged." In 1991, the state took control of the schools. The Paterson Education Fund (PEF), a founding member of PEN, organized a series of forums to explore issues concerning race and education. A key objective was to identify specific challenges that impact student achievement gaps among different racial and ethnic groups.

"PEF took on the project because local students were not doing well," said Rev. Doug Maven, who serves on the PEF board of directors and is a member of the Paterson Affiliate of the Congress of National Black Churches. "People were constantly asking, 'Is race having an impact? If so, how? And why?'

Maven chaired a steering committee, which included representatives from Aspira Inc. of New Jersey; the Paterson Public Schools, and other community organizations. Conversations and forums were held over a five-month period during which participants gathered data on student achievement and set about to create an action plan to improve the schools and student performance.

As a result of the discussions, PEF produced and distributed a report entitled Does Student Achievement Have Color? that offered views and recommendations based on the forums. The action steps include:

- publication and distribution of student achievement data, dropout rates, and graduation rates (disaggregated by race);
- adoption of an inclusive curriculum to raise ethnic pride and self-worth among all students;
- sharing of successful strategies.

Wendy D. Puriefoy, president of PEN, "But in order to improve educational opportunities for all students, we must work through the issues that divide us. Consensus isn't necessary, but a collective strategy to respond to real evidence is needed."

Public Education Network, a Washington, D.C.-based advocacy group, forms strategic alliances with national organizations trying to improve the public schools. Its partners include the Ford Foundation, the DeWitt Wallace Reader's Digest Fund, and the Kellogg, Mott, and Rockefeller Foundations. PEN and its members have recently tackled educational reform projects that include transforming public school libraries, improving access to technology, improving America's middle schools, improving the academic success of girls, and implementing standards-based reform.

The latest PEN report, Quality Now! Results of National Conversations on Education and Race, found that minority parents who participated in a series of more than 60 forums around the nation are increasingly concerned that their schools have fewer resources and lower standards than do those with predominantly White students.

Indeed, inequities do exist, as research shows that minority students are more likely than are White students to have uncertified or unqualified teachers, dilapidated buildings, and inadequate resources. These students are less likely to have access to computers and college preparation programs. Black and Hispanic students consistently perform lower than do White or Asian students on achievement measures. For example, on the 1999 reading test given by the National Assessment of Educational Progress (NAEP), the gap in scores between White and Black students actually increased for two of the three grade levels that were tested. Among Hispanic 12th graders, 1999 reading scores are no higher than they were in 1988.
among schools and community groups;
• budget development training for school staff, parents, and community members to ensure adequate resources for schools, personnel, and professional development.

Rosie Grant, PEF project director, said that as a result of the forums, she has seen a philosophical change in school board members, educators, parents, and other participants. “We’ve seen personal change and institutional change,” she said. “There is a genuine interest in the issue...in digging deeper.”

Irene Sterling, executive director of the PEF, is also heartened by response to the forums. “We’ve been engaging in district-wide internal conversations with educators on their attitudes toward the curriculum and their attitudes toward diversity,” she said. “There is a realization that we’ve got work to do, and we have seen a variety of initiatives to improve the overall health of our school systems.”

Sterling says that PEF will be eager to examine data from next year’s tests, which will give them a sense of whether or not progress has been made.

Denver, Colo.

In Denver, forums were organized by the Public Education and Business Coalition (PEBC), which worked with local partners that included the Latin American Research and Service Agency (LARASA) and the Latino Campaign for Education. The group was especially concerned about Denver’s “Westside,” which is predominantly Latino neighborhoods, and northeast Denver, which is comprised of many African American communities. Schools in this district face a widening achievement gap between their students and those in more affluent communities, which are often composed of a White majority.

Jan Merck, project coordinator in Denver, said that organizers decided not to promote the discussions via the media. Rather than begin the dialogue as a highly publicized event, participation in the forums was cultivated by one-to-one relationships and word-of-mouth connections.

Organizers took great care to draw participants from all areas and to anticipate communication barriers. They provided child care, used Spanish interpreters, and disseminated Spanish translations of materials.

Even when communities are committed to addressing the resource and achievement gaps...school systems fail to hold all students to the same high standards and expectations.

“Working with LARASA made a difference and established a real partnership for our work,” said Merck. “They enabled us to reach deeper into the communities and have more of an impact.”

Among the many issues raised in the Denver forums were the importance of parents on the move to raise standards and student achievement, the need for bilingual communication with parents, and the challenges and benefits of bilingual education.

Finding ways to involve parents means overcoming a variety of obstacles. One of the key findings of Quality Now! is that language differences often impede the process. Parents who cannot speak English simply can not communicate with teachers and students. They are intimidated by and unfamiliar with school system operations and often do not show up at conferences or events.

In addition, even when there is no language barrier, teachers must learn to speak about education issues in ways that are clear and easy to understand. Otherwise, teachers and parents literally can not understand one another.

Oakland, Calif.

While there were substantial outcomes from forums at most sites, the effort at Oakland ran into political conflict and scheduling difficulties that forced organizers to modify their initial plans. Oakland, one of the most racially diverse cities, has a student body reflecting the changes that have occurred through immi

address the concerns of both minority and White parents. The first half of the report profiles the eight participating communities that held forums and explains that many areas of consensus were reached, such as the need for standards to be closely tied to the curricula, for knowledgeable teachers to be in every classroom, and for readily available student performance data. The second half outlines the strategies and materials used and recommended by forum participants, from establishing a budget to evaluating the results. The report is a useful resource for anyone hoping to bring parents together from communities divided by race but united by a desire to improve all children’s education.

“We’ve had 10,000 copies of the report downloaded from our website and another 3,000 mailed out by request,” said Richard Tagle, senior associate at PEN. Tagle, who has worked for the Network since 1994, says response to the report has been very positive and follow-up efforts are under way.

PEN has begun several new initiatives that are instrumental in achieving equality in schools. One is related to teacher quality, that is, examining how to promote the equitable distribution of high-quality teachers where they are needed. Another project deals with standards and accountability.

“We are trying to define what is meant by ‘accountability,’” said Tagle. “We are also asking questions about how to measure achievement. Is it just test scores, or are there other measures, such as civic involvement of students? Shouldn’t we be measuring the safety and overall health of the schools?”

At the heart of all of PEN’s educational initiatives is the attempt to build school and community partnerships.

“We want to empower parents to understand what their children are supposed to be learning,” said Tagle. “We also want to increase community and public ownership of schools so that they are central institutions of the community once again.”
Florida State University
Plenty to Celebrate on Its 150th Year

by Roger A. Deitz

There are a fair number of candles on the birthday cake—150 to be exact! FSU President Talbot "Sandy" D'Alemberte proudly marks the important milestone, the sesquicentennial anniversary of the school's establishment. "In 1851, only 75 years after this country became an independent nation and just six years after Florida achieved statehood, the Seminary West of the Suwannee River was established. The role of that forerunner of Florida State University was to educate young people who would help civilize the frontier of Florida." President D'Alemberte says the original location of this institution—the site where the Wescott fountain now stands—is the oldest continuous site of higher education in the state of Florida.

"Thanks to our founder, Francis Eppes, grandson of Thomas Jefferson, we embrace the liberal arts approach that has prevailed throughout our history." The president points out that the institution has been known by various names and had a variety of missions over the past 150 years. Yet, with every change, he observes, "Florida State University has been willing to accept the pioneering roles and adapt successfully to new times." D'Alemberte continues, "We believe that this ability to adapt to frequent changes in our mission has given us a unique philosophy of higher education and unique potential as a national research university.

Florida State University is one of ten universities of the State University System of Florida. Established by the Florida Legislature in 1851, it first offered postsecondary-level education in 1857. In 1905, the Buckman Act reorganized higher education in the state and designated the Tallahassee school as the Florida Female College; renamed Florida State College for Women four years later. The school returned to coed status in 1947, and it became Florida State University.

The story is that in 1946, a flood of applicants seeking admission to the University of Florida created a crisis situation as the number seeking admission was one-third more than could be accommodated. As a result, a branch suitable for 500 men was opened in Tallahassee at Dale Mabry Field, a deactivated army installation. The state Legislature took further action in 1947, designating both the University of Florida and the Florida State College for Women as coeducational. The institution has grown from an
enrollment of 2,588 in 1947 to 34,477 in the fall semester of 2000. Located in Tallahassee, Florida's capital, the University offers both students and faculty opportunities to interact with state and federal agencies for internships, research, and part-time employment. Tallahassee also offers myriad social, cultural, and recreational activities. The main campus in Tallahassee is situated on 465 acres; the Panama City branch, 26. The University owns a total of 1,422 acres and operates other facilities in Leon, Bay, Franklin, Sarasota, and Gadsden counties.

For the most recent school year, FSU comprised 16 colleges and schools. Baccalaureate degrees are offered in 93 fields; master's degrees, in 99 fields; 28 advanced master's/specialists degrees, and 71 doctorates. Academic divisions include the Colleges of Arts and Sciences; Business; Communication; Education; Engineering; Human Services; Law; and Social Science; as well as the Schools of Criminology and Criminal Justice; Information Studies; Motion Picture, Television and Recording Arts; Music; Nursing; Social Work; Theatre; and Visual Arts and Dance.

As FSU entered the 21st century, something brand new joined the sesquicentennial celebration of something old, with the establishment of the first new medical school created in the United States in more than 20 years. Last year, the Florida Legislature passed a bill that would approve funding for "an innovative new model of medical education in this state." The FSU College of Medicine has its mission centered on primary care, geriatric training, and service to rural and underserved areas. The new medical school will provide the first two years of medical education on campus in Tallahassee and the last two in community clinical settings around the state. A spokesperson for the FSU College of Medicine notes that technology is the basis and foundation for its design, to be utilized in serving patients and in research efforts that are expected to span a variety of disciplines.

The Panama City branch campus of FSU enrolled 770 in the fall of 2000. In addition to branch campuses, the University offers a wide variety of overseas study opportunities during the regular academic year and in special summer programs. Included are programs in

Florida, Italy; Valencia, Spain; and London, England, during the academic year; a Panama Branch Campus; and Oxford, England; London, England; and Southeast Europe Summer Programs. There is a Hospitality Administration Summer Program in Switzerland; and a Summer Term in Law at Oxford, England; Prague, Czech Republic; and the University of the West Indies. Other programs are offered in San José, Costa Rica; Prague, Czech Republic; and Chalkidiki, Greece; and field excavations in Chianti, Italy.

Through the Center for Professional Development and Public Service, the University conducts off-campus credit courses and degree programs as well as non-credit programs, workshops, seminars, and conferences. The Center provided administrative support for more than 1,145 credit courses in 1999-2000. In addition, it managed more than 1,036 non-credit professional development programs during 1999-2000, offered throughout Florida, the U.S., and worldwide. The CPD attracted about 60,000 participants to the 2,181 credit and non-credit programs offered.

There are 27,996 full-time and 6,781 part-time students, for a total of 34,777, with an average age of 23.6 years. Undergraduates sort out as 23,226 full-timers and 1,685 part-timers. Females make up 56.2 percent of the total. Ethnicity for the total student population includes 4,108 African Americans (11.9 percent), 2,530 Hispanics (73 percent), 910 Asian Americans (2.6 percent), and 135 Native Americans (0.4 percent). Non-resident aliens account for 1,279 students (3.7 percent). Of the 22,273 prospective first-year students who applied for Fall 2000 admission, 11,559 were admitted, and 4,091 were enrolled. Among new entering students, 40 were Merit Scholars, 18 were Achievement Scholars, and five were Hispanic Scholars, for a total University roster of 245 Merit, 77 Achievement, and 28 Hispanic Scholars.

There are 1,520 full-time traditional faculty on regular salary, and a total of 1,897, which includes part-time faculty. The 2000-2001 operating budget includes $351,756,105 for education and general, $107,774,751 for contracts and grants, $99,247,612 for auxiliary enterprises, and $97,461,876 for other expenses.

Florida State University was designated a “Research 1” university by the Carnegie Foundation in 1994, placing FSU in an elite group of the nation’s top research universities. The school has had five faculty Nobel laureates, including physicists Paul Dirac, the father of modern physics, memorialized in London’s Westminster Abbey. FSU is home to the $100 million National High Magnetic Field Laboratory with the world’s most powerful magnets. Faculty include Robert Schrieffer, the 1972 Nobel Prize winner in physics and an author of the first microscopic theory of superconductivity, published in 1957, when he was 26. Florida State developed LEXIS(r)-NEXIS(r) Academic Universe, becoming the first in the nation to be provided with access to the extremely powerful and in-depth database of information. More than 800 U.S. colleges and universities are now using it.

In the arts, the campus boasts one of the nation’s oldest and largest schools of music, ranked fifth among public institutions. It holds hundreds of concerts annually, fields the country’s largest collegiate marching band, has more than a dozen world music ensembles—and graduated Ellen Taaffe Zwilich, the first woman to win a Pulitzer Prize in music, who also was named the 1999 Composer of the Year by Musical America.

To honor University founder Francis Eppes, who secured Tallahassee as the location of the seminary with a $10,000 donation, a parcel of land, and an annual $2,000 endowment, Francis Eppes Professorships were begun last year. Capitalizing on the work of past and current FSU scholars, last year the FSU Research Foundation began using profits from the interest generated by royalties to recruit these "superprofessors."

“We are delighted with the standard established thus far with our Eppes Professorships,” observes President D’Alemberte. “We have found seven of the most distinguished professors in a wide array of fields, those individuals who possess both a passion for teaching as well as research.”

Honorees include Charles McClure, an expert in electronic communication information; FSU alumna Ellen Taaffe Zwilich, a computer science notable Geoffrey Pax, and Gerald R. Ferris, who has studied the influence of politics and interpersonal relationships on hiring decisions in the workplace, providing a unique union of psychology and business management. The list also includes Leonard “Chick” LaPointe, a visionary in communication disorders, and Robert Olen Butler, who joins the creative writing department. Butler won a Pulitizer Prize for his collection of stories, A Good Scent from a Strange Mountain. The latest Eppes Professor, who joins the School of Visual Arts and Dance, is Suzanne Farrell, muse to the great George Balanchine and the embodiment of American Ballet as the inspiration and prima ballerina of Balanchine’s greatest ballets.”

Explosion Expected in Hispanic Advertising

Corporations Recognizing Potential

BY JEFF SIMMONS

The awards ceremony that unfolded in Los Angeles last September spoke volumes about the growing influence of Latin music on the global scene. It was the first time that the Latin Grammy Awards were presented at the Staples Center.

And over the course of several hours, 40 awards were distributed to musical artists in an event televised in 120 countries. In the United States, CBS-TV broadcast the ceremony, and the network’s president called the event a “new chapter for America.”

It wasn’t just what was displayed during the ceremony that caught the attention of Stuart Elliott, advertising columnist for The New York Times for the last decade. It was what happened during commercial breaks.

“The commercials were broadcast in Spanish,” Elliott says. “It was one of the first times I saw this.”

The advertising scribe sees much more of that on the horizon.

“This is only going to become more and more popular as the Hispanic population grows,” Elliott adds.

It’s expected that Hispanic advertising expenditures will explode in the coming years, as corporations reach out to a ballooning population. On the heels of Census 2000 figures exposing a diverse, growing Hispanic population (around 35 million), experts predict an infusion of cash into campaigns orchestrated to target a previously ignored audience.

Hispanic Business Inc. predicts that Hispanic advertising expenditures will jump to $2.38 billion this year, an increase of 25 percent from $1.89 billion.

With television remaining the medium of choice, the company’s research arm predicted $800 million will be spent on network/national TV advertising, a $100 million increase from last year. Local television spending would increase from $391 to $450 million.

The U.S. Hispanic media market is booming. Univision, for example, has become the fifth largest television network for prime-time viewers, with Telemundo not far behind. More than
more likely to turn to an agency that specializes in Hispanic advertising. And there has been an explosion of them over the last few years. Simply put, Gomes says, they are flourishing.

"Agencies that specialize in Hispanic advertising are making inroads in advertising in English directed to Hispanics," he says.

AHAA was founded in May 1996 when a group of Hispanic-owned or -managed agency heads met to discuss common concerns and forge an agenda to promote the growth of the Hispanic marketing industry.

At the time, business leaders from 21 agencies filled the room. Today, there are 65—and that’s just the number of agencies affiliated with AHAA. AHAA agencies collectively have billings exceeding $25 billion—97 percent of the country’s Hispanic ad industry.

“What’s really changing is that it is becoming less stereotypical. Doing stereotypical advertising is always easier, but what’s now happening across the board is that advertising is becoming more creative. The messages have deeper meaning.

“I believe what’s happening in this scope of new advertising, particularly in the last five years, is that it has been based on strategies that are well-founded. The messages are culturally relevant to the market.”

The Newport Beach, California-based Mendoza Dillon Asociados is one of the oldest Hispanic advertising agencies in the country. Founded more than 20 years ago, it has thrived, has offices now in Chicago and New Jersey, and does $90 million in billings annually.

On its current roster of clients is Sears, Roebuck & Company, which came to Mendoza in 1987. Sears was listed among the top 50 advertisers in the Hispanic market last year, ranking in fourth place, according to Hispanic Business and AHAA.

“Companies like Sears, AT&T, and Procter & Gamble are making a tremendous effort in reaching this market in all media, not just television,” says Ingrid Otero, Mendoza’s president and chief operating officer, and president-elect of AHAA.

Hispanic Business named the top 10 advertisers cultivating the Hispanic market last year as: Procter & Gamble, MCI WorldCom, AT&T, Sears, McDonald’s, Americatel, Miller Brewing Co., Philip Morris, Anheuser-Busch, and Toyota Motor Corp. Spending ranged from Procter’s $46.2 million to Toyota’s $22 million.

“Right now we are seeing Hispanics representing big portions of the population almost everywhere in the United States,” Otero says, “so as the market continues to grow and spread out, we’re also seeing growth in media outlets in all of those markets.”

But experts caution that reaching that market is more complicated than including Hispanic faces in advertisements. They say corporations and marketers are becoming savvier at distilling cultural differences within the Hispanic market.

Selling a product is more than just packaging, and advertisers are analyzing which media draw the greatest response from each group—whether the group be Mexican, Puerto Rican, or Dominican. They’re analyzing the geographic structure of the market, how to market to each segment successfully, and how to achieve brand loyalty from each group.

Much of the research is looking at Hispanic teenagers because half of all Hispanics in the United States are younger than 26 years of age. The median age for Hispanics is 26, in comparison to 35 for the rest of the U.S. population. Advertisers view young Hispanics as a profitable segment that can be influenced by appealing commercial messages.

“Demographically, not only is the Hispanic population growing, but Hispanics tend to be younger,” Elliott says. “They have larger families, more people in the household, and are more likely to buy household products than the ‘mainstream’ household.”

Population projections maintain that by 2010, one in two young people in the United States will be Hispanic.

AHAA notes that product trends start in urban areas, which are heavily influenced by Hispanic ethnicity. That, experts reason, is why it’s critical to any marketer appealing to youth to
embrace Hispanic youth.

Gomes' agency, HeadQuarters, opened its doors in 1987. Its client list now includes Del Monte, NYNEX/Bell Atlantic, Pacific Gas & Electric (PG&E), Mother's Cookies, Pacific Bell, and California Federal Bank (Cal Fed). By 1999, the company's billings had surpassed $34 million.

He says that much of the advertising still concentrates on television but that other media are growing rapidly. "Hispanics have tended to be more broadcast oriented," he says, but he predicts that will be changing as the landscape evolves.

"The new trend will be that all of the other media will be used, especially prist. Ten years ago, we didn't have many Hispanic publications, and now there are over 1,200. We are seeing a diversity of the media where messages are being put out to Hispanic consumers."

**Fine Tuning**

Experts lament that it took the Census 2000 figures to drive home the relevance of reaching out to the Hispanic consumer—especially if marketers want to retain a profitable grip. Many had been reluctant to design campaigns focusing on Hispanics at the risk of losing non-Hispanic consumers.

"I think that certainly there's been some reluctance among marketers toward ethnic advertising in general. It's the fear of the unknown," says Elliott. "The fact is that it's easier to reach out to the majority than the minority consumer."

"The Hispanic market provides particular difficulties culturally because of linguistic differences among Hispanics, as well as other cultural differences. There are always cultural differences between a majority and minority, but with Hispanics, there are cultural and language barriers plus the idea that you have to create different campaigns to reach different Hispanic consumers."

He adds that "you usually can't run the same commercial to appeal to Puerto Ricans in New York and Spanish-speaking consumers in Los Angeles."

Otero views it a bit differently, contending it's not fear but often ignorance. "I think it's a lack of knowledge of the statistics," she says, "and it's surprising how many times we go to big corporations and find people are totally surprised by the kind of statistics and the kind of results we show them." The Hispanic population in the United States is the size of Canada. You would never think of putting a product on the shelf in Canada and not supporting it with marketing," she says. "Is the United States, when they have a product on the shelf and don't support it in the

Hispanic market, they will see that impact in sales in areas where half the market is Hispanic, like Los Angeles. They won't be reaching them."

One avenue toward boosting sales is to tout products that already have a following, though one that might not be on American soil yet. Marketers are now more often trumpeting new products here that are already popular in Puerto Rico, for instance, and known to Spanish-speaking consumers in the United States.

"The benefit is you are selling people a product that they are already familiar with in their home countries, and that children remember growing up with. It's easier to sell something that people are familiar with than an 'Anglo' product they may not have known."

Researchers say their work backs that up, that Hispanic families are more likely to stick with products they're pleased with or found in their childhood homes.

One study by Yankelovich Hispanic Monitor concluded that 94 percent of Hispanic households with children feel the need to sustain ethnic traditions, while 93 percent seek to take part in activities that celebrate Hispanic heritage.

Another study, by Market Segment Research & Consulting, noted that 678 percent of Hispanic women in the United States between the ages of 25 and 44 agreed with the statement, "Once I find a brand I like, it is difficult to convince me to change."

That same study pointed out that 69 percent of women aged 25 to 34, and 57 percent of those between 35 and 44, believed there should be more advertising specifically targeting the Hispanic consumer.

More marketers are also keeping a close eye on online advertising. Studies are showing that 85 percent of Hispanics have computers at home and three-quarters have access to the Internet.

Nearly a third of Hispanic Internet users have shopped online, and Reuters reported that Hispanics in the United States are expected to spend $426 million over the Internet on everything from CDs to airline tickets and electronics, about a 100 percent jump from last year.

With the increase in population has come an increase in AHAA's efforts. The group now publishes a directory of Hispanic advertising agencies, considered the definitive guide to the Hispanic market.

Additionally, AHAA developed a multimedia campaign to promote education among Hispanics and garnered $25,000 from Procter & Gamble and Telemundo for a scholarship fund assisting Hispanic advertising and marketing students.

Earlier this year, HispanicAd.com and AHAA held the third annual HispanicAd.com Media Planning Awards to honor the best Hispanic media plans in television, radio, the Internet, magazines, newspapers, cable, direct mail, and out-of-home advertising.

Among the winners were Starcom for Walt Disney World's Theme Parks, The Vidal Partnership for Heineken USA's Heineken Beer, and Ornelas & Associates for Nissan Motor Corporation's USAS Nissan Frontier Crew Cab.

As viewers witnessed during the Grammys, commercials and advertisements in Spanish in traditionally non-Hispanic media are becoming part of the landscape. Just last year, MTV premiered a VOTO spot, a non-partisan campaign designed to increase Latino voter registration. It was the first Spanish-language ad to run on MTV.

"You can look at this two ways," Gomes says. "It's a recognition that English-speaking and Spanish-speaking Hispanics would be watching that. It was also a recognition and validation of the culture. It was knowing your market and recognizing the industry."

In the future, he predicts that advertising will become more segmented, more culturally relevant to specific groups within the "umbrella" of the Hispanic community.

"This is a market that is very sophisticated in many ways and will respond to things that are culturally relevant," he says.
Grinnell Students Prove
"YOU CAN DO IT NOW"

BY MICHELLE ADAM

Warren Morrow and six other students who graduated from Grinnell College in Grinnell, Iowa, are living proof that you don't need to wait until you graduate from college to make a difference.

Back in 1998, Morrow and his comrades set out to train Latino high school students to become leaders for the future. They established the Latino Leadership Project (LPP), which today has mushroomed into a successful program that inspires and empowers Latino youth.

Morrow recounted the beginning of their ventures. "The LLP was started by college students. I was the oldest one. I was 20. All of us had come to Iowa to experience something different than what we knew," he said. Morrow, a Mexican American born in Mexico City, came to Iowa from Tucson, Ariz., in order to step out of his comfort zone, as did his Latino comrades, who came from Chicago, Houston, Los Angeles, and other places. "The isolation we felt made us a lot more conscious of inequalities," he said. "Here we were expected to be representatives of our culture."

During Morrow's junior year, he and the six other students attended a March conference put on by the National Hispanic Institute (NHI). It was at the conference that they were inspired to make a difference for Latinos. "We knew we wanted to work with youth," said Morrow about the effect the conference had on him and on his colleagues.

"When we got back to Grinnell, we faced the two hardest months at the college [preparing and taking finals]. But every night of those two months, our group met three hours just to show our commitment. We didn't want to lose the energy we planned to have something for the summer."

With determination and hard work, the team established a curriculum, a location, funds, and resources for a summer program. "Everything worked out," said Morrow. Four high school students attended their first seven-week summer leadership program, called Verano para Lideres. The curriculum included, among other things, training in résumé writing, job interviewing, test-taking, diversity, substance abuse, writing, debating,
researching, and information on issues affecting the Latino community. The program served to provide a blueprint and the credibility needed to expand upon their initial dream in the years to follow.

When asked what leadership is, Morrow said, "Leadership is knowing that there are people following and that you are willing to give direction. It is being willing to educate yourself and being aware of the issues. Leadership is also feeling capable and confident to do something about those issues."

It is important to develop leadership skills in Latinos at an early age, says Morrow.

"We felt that students in high school were at an extremely critical age, a last chance for a lot of students," he said. "It's the first time they think about what they want to do. We wanted to help define what goals they wanted to set for themselves. And we all saw that being close in age to these high school students, we had a lot of influence on them."

Although only four students attended the first summer program, it set the groundwork for what would become the Latino Leadership Project. During the following year—Morrow's senior year—he and his colleagues decided to ask Grinnell College for funding. With a long proposal of what they had in mind and the example of their successful first summer, they approached the school, which, impressed with their work, agreed to fund the program for a year. The school agreed to pay their salaries, which included the summer and school year. With the funds in hand, they taught leadership skills to a group of 12 students during the summer of 1999.

Although Grinnell College is located in a small town of few Latinos, the Project offices are in Des Moines, where 10 to 15 percent of the population is Latino. It is here, in their larger numbers, that Latinos face inequalities and issues of concern that make a program like LLP a benefit to the community. The high school students who have thus far participated in the LLP give back to the community. These included creating murals in downtown Des Moines, conducting immigration and civil rights workshops for adults (the high school students ran and taught the workshops themselves), and producing a radio show that focused on Latin American culture and issues that affected Latinos.

"I tell them that you are in charge, you are responsible, and you represent your community. They did these things and got awards for it," said Morrow. Besides him and his associates, other college students also gave their time to help mentor the group of Latino high school students during the Represent! program. Although 12 students might seem like a small number, as Morrow has witnessed, through the radio show, mural, and workshops, more students have become involved and are tuning in to what the Leadership Project has to offer them. "We look at this as a little leadership army that we have formed," he said.

To add to the list, LLP also created its first one-day leadership conference, which took place in March of 2000. A total of 170 high school students attended and participated in workshops and forums. This included workshops on communication skills, social issues, financial aid, access to college, gangs, and leadership for young Latinas. "There were a lot of students who just needed to hear something. A conference could inspire them," said Morrow. LLP was able to receive support for the conference from the public schools, Grinnell College, and Drake University.

Morrow commented on the conference, "It was awesome. We had enough money to bring in major speakers, and they pumped up the students. Students were asking what they could do now that they were inspired. Some of them became involved in Represent!" In a manner similar to how Morrow and his colleagues were inspired to create LLP after attending a conference, they were now inspireing younger students with their own leadership conference.

During the summer of 2000, LLP led its third summer leadership program, with 12 new students. Although the numbers in attendance didn't increase from the prior year, as Morrow stated, "You can affect a lot of students in a weak way, or you can affect a few students who will help you affect hundreds more." At the end of the summer as part of the second school year of Represent!, these students wanted to work with the police department to build a better atmosphere of trust between the Latino community and law enforcement. They created Latino Youth Academy, which, during a nine-week period, consisted of 30 high
school students participating in workshops with the police department. The police department provided one officer each week to conduct workshops on their departments, while students were given the opportunity to share their experiences and concerns with the officer.

Morrow described how one police officer specifically came into the workshop with fear and trepidation, and left saying, "What a great experience that was." "The Latino Youth Academy had a lot of effect on how Latinos are seen within their community," said Morrow. "The Academy demonstrated that our community was making efforts to improve its relationship with the police. It helped the police meet us half way." The police have since agreed to provide a police academy to 30 new students each year, and thanks to Represent!, the police department now has a liaison from the Latino community.

It was only days prior to our interview with Morrow that LLP conducted its second March conference. This time, however, the number of students attending was smaller—about 50—because LLP created specific requirements for high school students to meet in order to attend. Students were asked to write about issues of concern in their schools. Principals, school boards, the Department of Education, among other school representatives, were invited to provide answers to questions posed in their writing. For an hour and a half, students and school administration engaged in a question-and-answer dialogue. Community agents were also invited to attend, and they were there to meet students and inspire them to participate in their organizations. Morrow said, "I told the students how proud I was of them. It’s all about allowing the students to see how much power they have so they can set higher expectations for themselves and to help achieve these goals."

Rudy García, a senior at Hoover High School in Des Moines who emigrated from El Salvador three years ago, serves as a prime example of Morrow’s vision. "I came here not expecting anything. All I wanted to do is work, to graduate from high school, and get on with life," he said. Work and, if he was lucky, graduating from high school were all García expected. "I didn’t care about community," he said. "The Latino Leadership Project was a base for starting to develop my skills and for learning what was going on in the community. Once I learned what it was like to help your peers, I learned that that was really what I wanted to do, to help youth."

García first participated in LLP’s summer program in 1990. He was also a member of Represent! the following school year and, as part of that, worked on producing bilingual radio programs that would focus on discussing issues that affect the Latino community. García was a volunteer during the recent Latino Youth program. "It was like a summer job," he said. "I wanted to help out the community. There are a lot of problems in the Hispanic community." She recalled having lunches with prominent figures in the community. "We let them know that we were not all gangsters and high school dropouts," she said. As part of the summer program, Olvera also attended the National Council of La Raza conference in Philadelphia, where she joined 1,500 other Latinos to talk about issues of concern to Latinos. "It gave me knowledge about what’s really going on," she said. About LLP’s effect on her life, Olvera added, "I feel more confident in myself and more proud of my culture and community. I feel like I am a better person. It has also given me another reason to go to college."

Olvera later participated in Represent! 1999, and through the program decided to conduct civil rights workshops. She researched civil rights problems facing the community and presented her workshops in a local church. "If I hadn’t been a part of the Latino Leadership Project, I wouldn’t have as many goals," said Olvera. "I probably wouldn’t have scholarships for college, and I wouldn’t believe I could do all the things I want to do."

As LLP has grown, so has the number of funding sources. While Grinnell College is offering less funding at this point, other groups, such as the National Council of La Raza, the Greater Des Moines Community Foundation, and even outfits such as Sears, have helped defray costs.

With all the changes, Morrow is proud of having come this far so soon, beginning with his junior year in college. "It’s been a tremendous experience. At 23, I am amongst the most prominent leaders in Des Moines, which carries a tremendous responsibility," he said. "This has been about being able to work on a new vision, on a new reality. Instead of being reactive, we are being proactive in raising the Latino community. It has meant not just leadership in the Latino community but also in the community as a whole."

When asked what he has learned from creating LLP, said Morrow, "It has demonstrated to me that I can do anything I want to. It is a message I want to impart to students, and especially college students who wait until they graduate to do something. They can do it right now."

Latin American culture and history murals

Conference. He said, "The program has been great. I’ve learned so many things. I learned that we don’t see what we can do, what we can really become, until we try it. This program makes you choose what you really want to do in life."

This year, García has been an intern with Midwest Educational Resources, helping people with legal needs. "I really love doing this. I educate myself every day," he said. García has also begun a Latino club in his high school, after others were denied the opportunity to do so in the past. When asked if he is looking forward to graduating, the answer was a resounding "Oh, definitely." García foresees attending college and possibly studying medicine.

Lizeth Olvera is another high school student who has benefited from LLP. She was one of the first students to participate in the Summer 1998
BY INÉS PINTO ALICEA

In the seven years since an independent task force denounced the Smithsonian Institution for its "willful neglect" of the Latino community, the world's largest museum, research, and educational complex has had a mixed record for its steps to rectify the situation.

The Institution's efforts to include the Latino community seemed to progress steadily after a May 1994 report entitled Willful Neglect: The Smithsonian Institution and U.S. Latinos, in which a task force painted a picture of Latino exclusion at the Smithsonian in governance, staffing, programming exhibits, and collections. A later report, Toward a Shared Vision: U.S. Latinos and the Smithsonian Institution (October, 1997), kept the Institution moving forward with its denouncement of the Institution for not fully involving, representing, or reflecting the Latino community. The lack of Latino inclusion "is evident on the Mall and in the offices and boardrooms of the Smithsonian," it said.

"Some good will has been created, but it has not yet been translated into permanent structures, programs, or employment," the 1997 report concluded. "A stronger foundation for systemic change is now in place, but it remains fragile."

Those words continue to ring true. Even high-ranking officials agree that more needs to be done. Smithsonian Undersecretary Sheila done for the Latino community.

"The Latino component needs to be second nature," said Steve Velásquez, collections manager for the National Museum of American History and chair of the Smithsonian's Latino Working Committee, a volunteer organization comprised of Smithsonian employees. "There were a lot more programs and progress in 1998. There was a lot of momentum, but the momentum has died down a bit. There is concern about that. We want to make sure that this stays on the radar screen. We want to have the administration know that this is a priority for us and that it becomes a priority to them."

Burke said Latino inclusion is a top priority for the Smithsonian administration. The museums are increasing bilingual docents (academic lecturer) and Spanish materials for the public. A number of Latino-related exhibits have been launched, including a traveling bilingual one on Santos (saints). She said the administration has launched a study of the composition of all of the boards and commissions serving the Smithsonian and its many facilities to develop guidelines on how to diversify them and how to better meet their goals. The administration also has developed guidelines or, as she called it, "an outcome-driven initiative," for all the museums to follow to
improve diversity in hiring and programming.

"We are holding managers accountable to a performance plan to get a diverse workforce," said Burke. "We want them to develop programming that will draw a greater percentage of Latinos into our museums. We are paying attention to these activities and exhibits."

"If you make a commitment to welcoming Latinos," said Burke, "you will also draw students and professional staff members.

The Smithsonian Institution is comprised of 16 museums in Washington, D.C., and New York City; the National Zoological Park; and seven research facilities in the U.S. and overseas. The Smithsonians mission, as expressed by Congress in its founding charter in 1846, is "an establishment for the increase and diffusion of knowledge." It has a collection of 112 million items.

"One part of our strategic plan is that we serve a diverse population and hire a staff that is as diverse," said Burke.

In fiscal year 2000, the Smithsonian facilities received $543 million for operations, of which Congress appropriated $438 million from tax dollars.

"As an institution supported financially by all Americans, the Smithsonian should reflect all of America," said the report "Toward a Shared Vision."

The report said that the exclusion of Latinos was also troubling because it prevents Latinos from feeling that they were part of the country's heritage, and it perpetuates an inaccurate belief among the general population that Latinos have contributed little to U.S. culture and development.

The exclusion so concerned former Smithsonian Secretary I. Michael Heyman that he identified inclusiveness as one of his top three priorities. Under his leadership, the Smithsonian established a "Latino pool" of $1 million per year to seed and encourage Latino initiatives, hired a permanent counselor on community affairs and special projects, Miguel Bretos, and appointed a Latino Oversight Committee to advise on the implementation of the recommendations made in the Willful Neglect report. He also moved forward the creation of the Center for Latino Initiatives, to which he gave a prominent home in the Arts and Industries Building on the Mall in Washington, where many of the Smithsonian's museums are located.

But the Center came at a cost to the Latino community, Bretos said. Latino leaders agreed to give up Bretos' position as the Latino advisor to the secretary for an institutional presence.

"Now we have the Center, but we don't have the access to the top management that we had before," said Bretos. "It's part of the bargain." Not only does the top management lack a voice on Latino issues; it no longer has an independent task force prodding it into action. Much of the responsibility has been shifted to the Center for Latino Initiatives and the Latino Working Committee, neither of which has the time, the resources, institutional support, or mandate to carry out the work once conducted by the independent task forces that put together the 1994 and 1997 reports.

"The Center is not mandated to look into questions of employment," said Bretos. "It is not our primary calling."

Velásquez described the relationship between the Center and the Smithsonian administration as "unclear" with many "undeveloped parameters." The scenario is clearly different from the relationship that was cultivated during Heyman's five-year tenure. While Heyman put into motion a number of initiatives to better serve Latinos, his successor, Lawrence M. Small, who was installed on Jan. 24, 2000, has, by some accounts, either moved more slowly on the issue of Latino inclusion or not clearly communicated his commitment to the employees.

"The members are hopeful but are starting to voice concern," said Velásquez of the Latino Working Committee's apprehension over the new Smithsonian administration's progress on Latino inclusion. The group met with Small in June 2000 and at press time was working on setting up meetings with other key leaders of the Institution to discuss its concerns. But others remain optimistic about Small's administration.

"There has been tremendous progress in key areas," said Bretos. "I know the secretary means well. I put great hope on his administration."

Dr. Manuel L. Ibáñez, who was on the committee that helped select Small for secretary, said he was "quite pleased with the selection."

"He is quite sensitive to Hispanic issues," said Ibáñez, adding that Small is married to a Latina, speaks Spanish fluently, and plays Spanish guitar.
The severe underrepresentation of Latino employees in the Smithsonian, however, might be the impetus that generates more activity from the Smithsonian administration. Latino representation stood at 3.4 percent in 2000, a drop since 1998 when Latinos comprised 35 percent, or 230, of its 6,337 employees, but up from 1990, when they were 2.3 percent. Latinos are said to be nearly 11 percent of the civilian labor force.

Moreover, none of the museums has a Latino serving as a director. While conducting interviews for this story, Smithsonian officials announced that Bretos had been named acting director of the National Postal Museum. Still, few Latinos are in the leadership ranks. Latinos held only five of 189 senior-level positions at the Institution in September 2000 and only 29 of the 944 professional posts—curators and researchers. The position of curator is a key position in shaping cultural offerings, said Hamiet Paolotti, executive director of the task force that produced the "Wilful Neglect" report, now in the Smithsonian's office of public affairs.

"Staffing levels have dropped," said Velásquez. "People are leaving."

Burke said the institution was conducting a national search to hire someone who will handle diversity issues at the Smithsonian.

Burke argues that many employees view the Smithsonian as a good training ground and move on to other opportunities, but she said recruitment practices at the Institution must be strengthened to attract more Latinos to the employment ranks.

"We have a real challenge in terms of employment," said Burke. "We're not moving quickly enough."

Burke added that turnover is low at the Smithsonian, so the administration is pushing for a more aggressive recruitment effort to diversify the pool of applicants for a few slots that do arise. The problem is compounded, said Bretos, because few Latinos in Washington apply to the Smithsonian.

"We're simply not wired in the Latino community," he said. "Being in Washington, we're off the beaten track of our mainstream community."

Likewise, Bretos said, the situation has not improved in getting more Latino representation on the museums boards and commissions. Each museum appoints its own board, and the board members themselves pick other members, in most cases. When the Smithsonian's office of public affairs asked the 16 museums to report how many Latinos served on each of their boards, only 12 responded. Eight Latinos serve on the boards that responded. In addition, there are 25 Latinos on the board of the Center for Latino Initiatives, and the Museum of American History has a separate Latino Advisory Board comprised of 12 members, said Smithsonian spokeswoman Lindz St. Thomas.

"Only if Latinos serve on all governing bodies and advisory groups and reach a critical mass among senior staff can the Smithsonian ensure that the Latino perspective is consistently included in discussions and that Latino contributions and inclusion are considered in planning and decision-making related to programs, collections, exhibits, research, and other activities," said the report Toward a Shared Vision.

A board of regents that, by law, is composed of the vice president of the United States, the chief justice of the United States (who also serves as the Institution's chancellor), three members of the Senate, three members of the House of Representatives, and nine citizen members, governs the Smithsonian. One Latino is on the board of regents—Manuel Ibáñez, former president of Texas A&M at Kingsville. Ibáñez has been on the board since 1994 and is slated to serve until 2006, as he was appointed to a second six-year term.

"My appointment was a signal to the Hispanic community that the Smithsonian was going to change," said Ibáñez. "The Smithsonian has shown the figures were provided by the Smithsonian's Office of Equal Employment and Minority Affairs (OEEMA) on Feb. 2001.

remarkable change. Latinos were ignored before, so any improvement is a good improvement. Like any big institution, progress comes slowly. There has been a big improvement in the recognition that Latinos are important in U.S. culture."

Bretos said the Smithsonian is slowly improving its collections but that more work is needed in that area because collections form the foundation for other Smithsonian activities.

Collections, said the 1997 report, are what educational curriculum is "developed around, outreach programs focus upon, magazine articles highlight, and research supports collections."

"To accurately present U.S. Latinos as part of the changing American social reality, the Smithsonian must ensure continuous updating not only of its collections but also of its collective knowledge and understanding of U.S. diversity."

---

**TO BE OR NOT TO BE...**

...a full-fledged museum of the Smithsonian Institution. That is the debate that surrounds the Smithsonian Center for Latino Initiatives, a three-year-old facility created to assure that Latino contributions to U.S. culture, history, and society are not overlooked by the Smithsonian's 16 museums.

It is a debate unlikely to be resolved in the near future. Some argue that using the Center for Latino Initiatives, a Smithsonian research facility, to assure that Latino contributions are included throughout all Smithsonian exhibitions, is a better path to follow than to demand a museum. They argue that a museum similar to the Anacostia Museum and Center for African American History and Culture and the National Museum of the American Indian would result in isolating, or, even worse, "ghettoizing" Latino contributions to one museum. Moreover, Congress has expressed a strong reluctance to adding any more museums to the Smithsonian system. Instead, a movement is under way to expand the number of traveling exhibits to reach more communities nationwide, including Latino, said Undersecretary Sheila Burke.

Indeed, when the Center was created, the Smithsonian's governing board, acknowledged the importance of the Latino community, saying: "The Latino presence in the Americas is centuries old, culturally rich, and demographically vast and growing...The Center is dedicated to the generation of new knowledge...to the end that American history to prove our mettle that we are worthy of the investments," said Bretos of the challenge the Center faces.

Bretos cites the Archives of American Art and the Hirshhorn Museum as facilities in the system that have gone out of their way to make sure Latinos are included.

"These are the shining stars—and then there are places that are darker," said Bretos, a former professor at William Paterson University in Wayne, N.J., who served on both task forces studying Latino inclusion at the Smithsonian before joining it as an employee. "We need to have Latino representation across the board everywhere."

The Center, whose mission is to advance knowledge and understanding of Latino contributions to U.S. history, culture, and society, opened its doors on Aug. 10, 1998. Its mission is accomplished by generating knowledge through research and scholarship; by interpreting and communicating knowledge through exhibitions, public programs, and online and electronic capabilities; and by building dialog and relationships among U.S. Latino communities, the Smithsonian Institution, and other educational and research organizations, foundations, corporations, and government agencies. The Latino Initiatives Fund, administered by the Center, supports Latino-focused research, educational, and public programs, and promotes the inclusion of Latinos and Latino perspectives in the activities of the Smithsonian.

"Our Center is here to make sure culture and history reflect Latinos," said Rochín, adding that he hopes the Center will become the "national center for information, new knowledge, and recognition for U.S. Latinos."

One challenge the Center faces in reaching that goal is to boost interest within the Latino community for Smithsonian offerings. The Smithsonian has about 40 million visits per year to its museums, the Zoo, and its traveling exhibitions around the country. But according to a 1997 report, Latinos comprised only 3 percent of Smithsonian visitors compared to 6 percent each of African Americans and Asians.

"We have been more successful in some communities than others," said Bretos.
Miami and Chicago Latinos have been very responsive to exhibits and other outreach programs, but Latinos in Washington have been dubbed the least likely of all populations in the nation's capital and its surroundings to visit the facilities. Bretos said many of the Latinos in Washington are newer immigrants who are working hard to survive in such an expensive environment and many "don't come from places with a tradition of going to museums."

"Locally, we still have a long way to go," said Bretos. "There is a disconnect there."

Ibañez said Latinos must participate in more Smithsonian activities and increase attendance if the community wants the Smithsonian to be more responsive to its needs.

"Without participation, you can't make demands," said Ibañez.

Rochin said the Center has launched five original exhibitions in less than three years, among them "Americanos," a photography exhibit; "Ritmos de Identidad," on Caribbean percussion music; and "Corridos Sin Fronteras," on the tradition of the ballad. The Center also launched Latino Designers in the Fashion Industry, an ongoing effort to research, document, preserve, and present existing pieces in the Smithsonian's costume collection that are made and/or worn by Latinos.

"I've been pleased with what we've been able to achieve," said Bretos. "We need more exhibitions. The collections have improved, but we still need to work on the collections. We need to infiltrate the narratives the Smithsonian offers to the public."

The Center offers a Latino Arts and Culture symposium and sponsors movie premieres. It also offered a music series that showcased the tradition of exchange among the musical cultures of the Americas. Included were music performances, pre-concert discussions, and educational activities that focused on Latin Jazz.

"We don't want Latin music to be just Ricky Martin and a weekend of salsa," said Rochin. "We want the nation to know its richness. Music crosses all of our nationalities."

Rochin said the objects in the exhibitions help tell the histories of Latinos. The exhibit on ballads featured one about Pancho Villa, and a gun used by Villa was on display as well. The ballads and the related objects helped visitors learn about the significance of the ballads and their ties to history.

"We merge history with music and oral traditions," said Rochin.

A major goal of the Center, he said, is to make the Center a world-class research facility. Toward that goal, it has created several programs to provide training for graduate and undergraduate students who are young professionals and to increase the numbers of Latinos in the museum and archival professions.

"This is especially critical in the curatorial ranks and senior museum administration where decisions about collecting, exhibitions, and programming are made," said a Center brochure.

The vitality of the museum profession depends very much on the development and recruitment of a new generation of scholars to initiate research and collecting initiatives focusing on Latino history and culture and to bring new perspectives and interpretations to existing archival and museum collections."

The Center's website lists three program offerings for Latinos interested in museum professions. A Latino Studies Fellowship Program provides two pre-doctoral and two post-doctoral 12-month fellowships for Latinos to conduct research related to Latino history, art, and culture with members of the Smithsonian professional research staff and utilizing its resources.

The Center, in conjunction with the Inter-University Program for Latino Studies, headquartered at the University of Notre Dame, offers graduate student fellowships in Latino Studies. The fellowships last 10 weeks and are at the Smithsonian. Fellows receive a stipend to help support expenses incurred during their residency.

The National Museum of Natural History offers a Research Training Program for undergraduate students to explore natural history and science and pursue meaningful research projects with mentoring Smithsonian professionals in the biological, geological, and anthropological disciplines.

More information on Center programs can be seen at its website—www.latino.si.edu.
Milestone anniversaries often trigger introspection—the thoughts that accompany turning 30, 40, 50, or 60, for example. A similar self-analysis took place at the DeWitt Wallace-Reader's Digest Fund and the Lila Wallace-Reader's Digest Fund in 1999, following their first 10 years as national foundations and combined grants totaling $745 million. The Funds' leadership looked at the work of the preceding decade and decided to make a turnabout in how it supported education, the arts, and communities.

First, it combined the resources of the two Funds into one organization called the Wallace-Reader's Digest Funds. Then, in the area of education, the Funds chose to strike out on an entirely new path. After reviewing its past achievements and consulting with experts, the Funds decided to refocus its efforts on building strong educational leaders.

"It became increasingly obvious to our board that unless you acknowledged that the principal—or person with formal authority—is competent and well-prepared and
has moral convictions that all kids can learn well, then a lot of the efforts at standards-based reform are not going to work," said Dr. Mary Lee Fitzgerald, director of the Funds' education programs.

"We have been very involved for a decade in trying to improve K-12 education, mostly in places with concentrations of low-income kids. But our efforts are not going to advance without strong leaders."

This new path builds upon the past successes of both Funds. The Funds have been supporting education since being founded in the 1950s by DeWitt Wallace and Lila Acheson, who together created the Reader's Digest Association in 1922. The magazine has grown into today's global publisher of books and magazines and seller of home entertainment products. From a merger of four smaller foundations, two separate Funds were established in 1987—the DeWitt Wallace Reader's Digest Fund, which mainly focuses on education, and the Lila Wallace Reader's Digest Fund, primarily a supporter of the arts and cultural and community institutions.

In the '90s, one of the key accomplishments of the DeWitt Fund was the Pathways to Teaching Careers program, which now operates at 45 colleges and universities nationwide. This initiative has supported the preparation of some 2,600 highly qualified new teachers from nontraditional career paths. It allowed returning Peace Corps volunteers, military personnel, mid-career shifters, and teachers' aides to get into the teaching profession. The Fund also inaugurated Library Power, which supports improvements in 700 public schools in 19 communities across the country. And the Fund helped in efforts to raise teacher quality as a founding partner of the National Board for Professional Teaching Standards.

The next step was to move out of the classroom and into the principals' and superintendents' offices.

"We want to create awareness of this issue," said Soneni Smith, a spokeswoman for the Fund. "People seem to know about the teacher shortage. But at the same time, there is a huge short"age of principals, yet this is not on the national agenda."

To launch their efforts in this area, last year, Wallace-Reader's Digest Funds publicly unveiled its new commitment to creating a cadre of strong educational leaders. In June, the Funds announced the single largest commitment in its history. It said it would give a record

M. Christine DeVita, president of the Funds, said, "What has been overlooked too often is the power of a skilled superintendent or principal to inspire both teachers and students in a true community of learning. What has yet to be embraced is the notion that excellent leadership is a critical element for system-wide school renewal."

In addition to strengthening school leaders and supporting them, the Funds seeks to address the growing shortage of principals and superintendents. "You used to
district says only 2.4 years. "You can't create a strategic plan in that short period of time, and you hold little credibility as a leader when it's likely you'll be gone soon," said Fitzgerald. "So, there is very little leverage from the superintendents' office to effect change. There just isn't enough time for deep planning."

This leaves urban districts, where the challenges are more significant than in the suburbs, begging for candidates and in trouble.

"If you just got your Ph.D. and you're looking for a career in administration, the suburbs are much more attractive," said Fitzgerald. "The pay is often higher, and the stress is less."

The impact on children in large urban districts is devastating; improvement and reform become impossible.

High on the Funds' agenda is diversifying the pool of school leaders. Currently, only 12 percent of superintendents are women, and only 6 percent are minorities. Part of the problem is that few women and minorities become high school principals, which is the usual gateway toward a superintendent's post.

Another issue is gender bias. "There are districts where they quite simply want a man for the job," said Fitzgerald, who, as a former superintendent in the Montclair, N.J., school district, speaks from experience on the front lines.

Again, minority children are adversely impacted. With few minority teachers at the top, they don't see role models leading their schools. What's the message sent to minorities when virtually every person of authority in their school—from the teacher to the superintendent—is White?

To help set its priorities, the Funds conducted six regional meetings in Spring 2000 in Atlanta, Philadelphia, San Antonio, Denver, Chicago, and San Francisco. These attracted more than 400 educators; state, federal, and local officials; representatives of community-based groups; business people; and

The Institute for Learning, University of Pittsburgh, will get $3.9 million over three years to develop the instructional expertise of principals, intermediary supervisors, and superintendents needed to improve student learning.

$150 million over the next five years to address "a leadership deficit that is crippling efforts at achieving lasting, widespread school improvements, especially in districts with children most in need."

The goal was ambitious. The Funds put a stake in the ground saying it wanted to "foster a national movement to attract, prepare, and keep high quality school leaders." Called "Leaders Count," this new initiative grows from the Funds' belief that without better superintendents and principals—and a climate that supports them—schools will continue to "fall short of achieving system-wide gains in learning for all students."

At the time of the announcement, advertise a principalship and get 40 or 50 applicants," explained Fitzgerald. "Now they are hiring consultants to fill these positions because no one wants the job."

These job openings aren't attracting candidates for a number of reasons, and the problem is exacerbated in large, urban districts. The pay schedule is one obstacle. Teachers in many cases do better than their administrators in the long run. Another issue is that the job is politicized in many large districts. Just take a look at New York City's revolving door for its schools chancellor's post. In addition, the job is stressful and doesn't offer much security. The average superintendent in an urban
others. Then, last fall, the Funds sponsored a National Conference on Education Leadership at Teachers College, Columbia University, attended by nearly 500 leaders from education, government, business, foundations, and community organizations. New York City Schools Chancellor Harold Levy and former U.S. Secretary of Education Richard W. Riley were featured speakers. In addition, Riley was honored with the Funds' first Leaders Count award.

With its redirection, the Funds also approved nine initial grants totaling nearly $97 million. One grant, to Teachers College, Columbia University, might lead to the establishment of a National Center on Education Leadership, which, in partnership with the Funds, would become a vehicle for gathering and sharing information about innovative approaches to school leadership.

The Institute for Learning, University of Pittsburgh, will get $3.9 million over three years to develop the instructional expertise of principals, intermediary supervisors, and superintendents needed to improve student learning.

The Center on Reinventing Public Education, University of Washington—Seattle, was awarded $2.3 million over three years to examine the causes of leadership shortages and to propose ways to increase the quality and quantity of superintendents and principals.

The Big Picture Company, the Aspiring Principals Program, in Providence, R.I., gets $1.3 million over three years to test and develop an innovative program for recruiting and preparing principals.

The RAND Corporation, based in Santa Monica, Calif., is getting $1.05 million over three years to create an analytical synthesis of data about leadership preparation and career progression among principals and superintendents.

The Southern Regional Education Board, in Atlanta, will receive $383,000 over one year to design a leadership preparation program for use by universities in preparing leaders to improve student achievement in low-performing schools and districts.

The Council of Chief State School Officers, in Washington, D.C., was approved for $370,000 over nine months to establish a national consortium of five state-policy organizations to address legal and policy issues affecting the ability of leaders to improve achievement in high-poverty schools and districts.

The American Association of School Administrators, in Arlington, Va., will get $168,000 over six months to plan a program to recruit and prepare candidates to lead urban school districts.

The Hechinger Institute on Education and the Media, at Teachers College, Columbia University, is receiving $90,000 to conduct a three-day seminar in Winter 2001 for journalists on education leadership.

The Funds believes it already has made an impact in putting these issues on the agenda of other institutions.

“There are a half-dozen foundations that have moved their assets over into raising public awareness that there is a deficit of principals and superintendents,” said Fitzgerald. “And developing better leadership has become a primary goal of other influential groups, such as the Education Commission of the States and the Council of Chief State School Officers. These are important first steps.”

Department of Education to Get Major Boost in Funding

WASHINGTON, D.C.

President Bush's first budget request, delivered to Congress in April, called for an 11.5 percent increase in federal funding for the Department of Education (DOE), which would inject an additional $4.6 billion into the DOE for fiscal year 2002.

"Since his first day in office, President Bush has demonstrated his commitment to providing every child in America with access to a quality education at all levels," said U.S. Secretary of Education Rod Paige. "He has made 'No Child Left Behind' his No.1 legislative priority and his No.1 domestic budget priority."

Combined with a rigorous accountability system and increased flexibility, the president’s initial proposal of increased funding for public education would provide much-needed assistance for disadvantaged students and include major increases in several programs:
- $1 billion more for special education grants to states to provide assistance to students with disabilities;
- $1 billion more for Pell Grants to provide disadvantaged students with financial assistance for higher education;
- $641 million more for Reading First state grants to ensure that every U.S. child can read;
- $459 million more for Title I grants to Local Education Agencies to assist low-performing schools and disadvantaged students;
- $575 million more for state grants for improving teacher quality;
- $320 million to help states develop and implement annual state reading and math assessments to measure the performance of all students every year in grades 3-8;
- $175 million for a new Charter School Homestead Fund to expand parental options; and
- $137 million more for public school buildings on military bases and Native American lands.

In addition to increasing DOE funding, the president wanted to provide other federal agencies with a $490 million increase to support their initiatives related to his education reform agenda. The president's budget also would support education through innovative tax exemptions and other non-discretionary investments in education. Both houses of Congress have passed budget resolutions that closely reflect the president's budget priorities.

For the latest news of DOE funding and a state-by-state analysis of proposed allocations, visit the website, www.ed.gov/offices/OS/budget.html, or call, (800) USA-LEARN, (800) 872-5327.

TV411 Wins Emmy Award for Second Consecutive Year

NEW YORK, N.Y.

TV411, a national half-hour television series that teaches adults basic educational skills, won the Emmy Award for "Outstanding Educational Programming" from the National Academy of Television Arts & Sciences, New York Chapter. The honor marks the second consecutive year that TV411 has been recognized by the Academy. Last year, the series garnered an Emmy for "Outstanding Direction."

"This is a show with heart and purpose that helps millions of adults all over the country to create a better life for themselves. Receiving this award really encourages us to continue developing quality educational programming for an audience that often goes unnoticed."

It is estimated that some 70 million American adults cannot compute, read, or write English well enough to effectively seek a job promotion, write a business letter, or help their children with homework. Moreover, fewer than 10 percent of these adults are able to attend a literacy class due to the demands of work schedules, child-care responsibilities, and long waiting lists. TV411 was created as a way to give these adults the help they need, right in their own homes.

TV411 features celebrities and real-life adult learners discussing practical strategies to improve their reading, writing, and math skills. Segments have included Dennis Franz from NYPD Blue discussing how to get meaning from a newspaper article, the Dallas Cowboys using football to explain decimals and percentages, and an Oprah-inspired book club series. To date, more than 100 PBS stations—including eight of the top 10 markets—have committed to broadcasting TV411.

TV411 is produced by ALMA—the Adult Literacy Media Alliance—and Picture This Television. ALMA is a not-for-profit organization that leverages the power of popular media—television, video, print, and the Internet—combined with grassroots outreach to teach adults essential life skills at home, at work, and in community centers.
Collegeboard.com Launches New Version of Website Focused on What Students and Parents Need

NEW YORK, N.Y.

The broadly upgraded website of collegeboard.com can now swiftly help students and their families find key dates and deadlines, save college searches, and gain instant, online access to their SAT registration and test prep status. The new version of the site introduces “My Organizer”—a unique feature that allows students to create a personal home page that can be updated and used throughout the college planning and application process—and “Parents Guide”—a new resource that helps parents through the college planning process.

“Collegeboard.com is pleased to introduce our new website to students, parents, and educational professionals,” said Richard Weingarten, president of collegeboard.com. “We’ve completely changed the ‘look and feel’ of the site to make it more attractive to students and easier to use and navigate. We’ve also added new content and features that should make the site more useful and interesting. Informative articles and helpful hints are personalized and targeted to students in different years of high school. College officials and school counselors offer up-to-date, practical advice, and students share their college-going experiences.”

Collegeboard.com remains the only website where students can register for the SAT, select a test date and site, obtain immediate confirmation, and prepare for the SAT with genuine test questions. There is no faster way to send SAT scores to colleges than on collegeboard.com, which offers many more services to help students.

Report Shows Bachelor’s Degree Recipients Find Employment in Their Majors Following Graduation, Says ACE

WASHINGTON, D.C.

Although most bachelor’s degree recipients find employment soon after graduation, individuals who major in “applied fields” (which include education, business, engineering/architecture, computer science, nursing and other health fields, social work, and communications) are more likely than other graduates to find positions related to their majors, according to a report released earlier this year by the National Center for Education Statistics. The study reviews employment outcomes of 1992-93 bachelor’s degree recipients.

The American Council on Education provided the following brief summary:

- Among 1992-93 bachelor’s degree recipients who did not enroll in graduate school, more than one quarter (28 percent) had majored in a business-related field. The next most popular fields of study were social science (15 percent), arts and humanities (13 percent), education (9 percent), and engineering or architecture (7 percent).
- Less than 2 percent of 1992-93 graduates were unemployed in 1997, while 86 percent were working full time. Engineering and computer science graduates were most likely to be employed full time (more than 90 percent), while humanities and arts majors were somewhat less likely (79 percent) to have full-time positions.
- Nearly three-quarters of education majors (74 percent) were working as teachers, and 60 percent of engineering majors were working as engineers in 1997. In addition, among those who majored in nursing and other health fields, 96 percent and 68 percent respectively were employed in occupations related to their majors.
- Sixty percent of social work/protective service majors were working in social service fields. However, communications/journalism majors were more likely than graduates in other fields to be employed in a service position four years after graduation (33 percent).
- About one-quarter of graduates who majored in either biological sciences or mathematics/physical sciences were working as teachers, and the same percentages in both fields had positions in research, science, or technology.
Earlier, students met with alumni who are now in their first year of medical school. Xavier García-Rojas, Jeff Pierce, Lupita Luna, and David Jiménez answered students' questions about the program. García-Rojas called the UTPA-Baylor program a blessing because it gave him a support system of friends and colleagues who share his interests in the medical field.

"I think we are going to have a hard time making the selection for the new group because they were very in-depth and showed a lot of enthusiasm and poise," said Dr. Cindy Martínez Wedig (pictured), Baylor Pre-Medical Honors College program coordinator.

[See HOs Jan. 29 and June 4, 2001, issues for more on Baylor College of Medicine.]

Study Assesses "Top 10 Percent" Results at UT-Austin

Dr. David Montejano, associate professor of history and sociology at The University of Texas (UT)-Austin, said "Top 10 Percent" legislation enacted by the Texas Legislature in 1997 has helped ensure that the state's diversity is reflected at UT-Austin. Montejano had led research efforts that yielded the Top 10 Percent policy.

Montejano, in a research study, "Access to the University of Texas at Austin and the Ten Percent Plan: A Three-Year Assessment," revealed that the law appears to have broadened, in a modest way, the high schools' "sending" or "feeding" pattern to UT-Austin and in a way that benefits all regions of the state.

"The real winners," he said, "are the inner-city minority high schools and the rural White high schools....This preliminary look at the 'new senders' suggests that the law has made the state flagship university more accessible to the best high school students, regardless of race, economic standing, or residence."

Campbellsville Announces Partnership with Brazilian Seminary

Dr. Michael V. Carter, president of Campbellsville University (Ky.), announced an educational partnership with the Baptist Theological Seminary of Northern Brazil that will enable Seminary undergraduates to earn a graduate degree in music from Campbellsville's School of Music.

According to Dr. Robert Gaddis, dean of the School of Music, the students, once enrolled by Campbellsville, will enter an M.A. degree program designed specifically with the international student in mind. Gaddis said that Campbellsville will take the initial steps by offering courses this month in Recife, Brazil.

Justice Brennan Award to Nassau President

At a ceremony at the U.S. Supreme Court in Washington, D.C., Nassau Community College (N.Y.) President Sean A. Fanelli received the prestigious William J. Brennan, Jr., Award. Presented by the Thomas Jefferson Center for the Protection of Free Expression, the award honors the legacy of U.S. Supreme Court Justice Brennan's devotion to the principles of free expression, recognizing those with a similar commitment to enhance the liberties of free speech and press.

Dr. Fanelli is the first college president ever to receive the award. Nassau president since 1982, he has been a strong educational leader and an eloquent and courageous defender of academic and intellectual freedom.

Speaking at the ceremony, Justice Ruth Bader Ginsburg said, "Justice Brennan loved mercy and did justice for some 34 years on this Court....He would have applauded Dr. Fanelli's caring, courageous endeavors to preserve and advance academic freedom."

Texas-Austin UT Teach Program Receives $5 Million Pledge

National Instruments cofounder and former University of Texas (UT)-Austin graduate student Jeff Kodosky and his wife Gail Kodosky pledged $5 million to UT-Austin's UT Teach program, which guides interested students to and
through the teacher certification process in math and science.

"We live in an increasingly technological society with an increasing need for a scientifically literate and informed population," said Jeff. "U/Teach will provide the excellent science and math teachers we need to achieve that goal."

The $5 million gift goes toward a $12 million U/Teach endowment campaign started by the College of Natural Sciences last year to pay for mentor-teacher compensation, free tuition for the first two courses, and other program elements that can not be funded from the state-appropriated instructional budget.

Dr. Manuel J. Justiz, dean of the College of Education, said the gift "will provide us an opportunity to build on this excellent collaborative program with the College of Natural Sciences."

**HSF Names Cruz Chief Operating Officer**

The Hispanic Scholarship Fund (HSF), the nation's premier Hispanic scholarship-granting organization, has named Emilio Burton Cruz chief operating officer. The former director of economic development for the city and county of San Francisco will be responsible for all aspects of HSF’s day-to-day operation, from community outreach to program development.

"The Hispanic Scholarship Fund is thrilled to have someone of Emilio's caliber joining our team," said Sara Martinez Tucker, HSF president and CEO. "Emilio is a role model for the Latino students we assist, and his success as a professional embodies the work that we do at HSF."

A Stanford-trained engineer, Cruz began his career as a project director of San Francisco's waterfront transportation projects. He later became Mayor Willie Brown's chief of staff and was asked to take over San Francisco's troubled public transit agency, where he reversed years of government neglect.

In its 25-year history, HSF has awarded more than 41,000 scholarships, totaling $50 million.

**Syracuse Hosts Caribbean Writers**

Syracuse University's (N.Y.) Latino-Latin American Studies Program hosted some 20 of the most prominent living writers and intellectuals from the Caribbean during the Spring 2001 Ray Smith Symposium, "Caribbean Writers Imagine the Millennium." Guests addressed issues concerning the prospects of Caribbean literature and culture, recognizing the modern-day economic decline that urges people to leave their homelands and form émigré communities in the U.S. and Europe. They also reflected on current academic trends that subsume Caribbean literature and thought.

Prominent Spanish-speaking writers and scholars attending the symposium included Antonio Benitez Rojo, Aracadio Diaz Quiñones, Roberto Márquez, Charo Oquet, Sonia Rivera-Valdés, Luis Rafael Sánchez, and Mayra Santos-Febres.

**Cal State-Northridge Honors Zavala**

California State University-Northridge (CSUN) biology professor Maria Elena Zavala received a Wang Family Excellence Award for her outstanding work with students, one of five faculty and administrators from the 23-campus Cal State system to be so honored this year. The Excellence Awards celebrate those "who through extraordinary commitment and dedication have distinguished themselves by exemplary contributions and achievements in their academic disciplines and areas of assignment."

Among her varied honors, Zavala received White House recognition for helping build the CSUN biology department's Minority Access to Research Careers and Minority Biomedical Research Support programs. She received CSUN's Award for Outstanding Achievement in Equity and Diversity, and she was elected president of the Society for the Advancement of Chicanos and Native Americans in Science.

**Urban College of Boston and UMass Boston Agree to Help Underserved**

Urban College of Boston, a two-year college, and the four-year University of Massachusetts-Boston's College of Public and Community Service signed an articulation agreement that will enable transfer students from Urban College to receive academic credit for all college-level courses applied toward their associate's degree requirements and to enter UMass as juniors.

The agreement will provide a direct path from the Associate of Arts degree attained at Urban College to the baccalaureate degree programs at UMass-Boston. Urban College has documented success in serving inner-city, low-income students by providing educational and career opportunities to students who are traditionally underserved by higher education.

UMass Chancellor David J. MacKenzie and Dean Ismael Ramirez-Soto (pictured), were instrumental in making the accord with Urban College possible.

**USIU Hosts Friendship Festival**

United States International University (USIU), in Calif., held its 12th annual International Friendship Festival. The outdoor event featured food, crafts, and live entertainment from around the world.

The festival, with the theme "Join Hands with the World," was organized and presented by USIU's multicultural, multinational student body. Students from more than 90 countries attend USIU, and many international student clubs sponsored festival booths highlighting food and crafts from their home countries.

**Maynard Receives Mt. SAC Diversity Award**

California's Mt. San Antonio College (SAC) communication professor Phillip Maynard was given the Center for the Study of Diversity in Teaching and Learning's Campus Faculty Award at a national conference in Miami, Fla.

Maynard, who has taught at Mt. SAC since 1988, has been a staff and organizational development trainer on diversity in the workplace, and he wrote a chapter on service delivery to diverse students and staff for Mt. SAC's five-star customer service training program. He has taught classes in learning communities designed for students in developmental English and math courses and served as an advisor to various Mt. SAC student organizations.

**DePaul Hosts Forum on Sweatshops**

DePaul University (Ill.) hosted a two-day forum, "Sweatshops, Cross-Border Trade, and
the Global Economy,” addressing the unfair wages, unsafe working conditions, and human rights violations occurring in U.S.-owned garment factories, known as maquiladoras, in Mexico.

The forum featured the film Maquila: A Tale of Two Mexicos, which provided an overview of the unfair practices. The forum also featured Mexican women workers’ testimonies on the conditions in the factories.

Forum organizer Elvia Arriola introduced two Mexican women who, as volunteers for the Committee for Women Workers at the Border, are helping develop strategies for surviving poor conditions in the factories. Arriola, a DePaul humanities fellow and visiting legal scholar, talked about her own research on the topic. Also featured were representatives of labor groups, human rights scholars, and activists from the Chicago community.

California-San Diego Symposium Examines Migrant Labor

A University of California-San Diego (UCSD) symposium, “The State of Migrant Labor in the Western United States: Then and Now,” examined the challenges facing migrant farmworkers and their struggle for equitable working conditions. Wayne Cornelius (pictured), Gilruth Professor of political science and director of the Center for Comparative Immigration Studies at UCSD, moderated the event.

Five nationally prominent scholars were featured—Manuel García y Griego, Fred Krissman, Philip L. Martin, Juan Vicente Palerm, and Lynn Stephen. They discussed the changing relations of migrant farmworkers with employers, labor contractors, and labor unions; the ways in which undocumented immigration status affects migrants’ access to jobs and terms of employment; and varied social, legal, and political issues affecting the well-being of migrant workers. Claudia Smith, a Guatemala-born public interest lawyer and executive director of the California Rural Legal Assistance Foundation in Oceanside, was commentator.

Southwestern College Professor Receives Lifetime Achievement Award

In California, Southwestern College (SWC) theatre professor William Virchis was given the prestigious Shiley Award for Lifetime Achievement in Theatre at the Fourth Annual KPBS Patté Awards, a ceremony that honors contributions of groups and individuals to the San Diego theatre.

Virchis has directed and/or produced more than 250 plays and is the former artistic director of Teatro Meta, a Latino training program at the Old Globe Theatre. One of his recent theatrical projects was the world college premiere of the musical review Latin Twist.

The SWC professor serves on the Chula Vista Commission for Arts and Culture, is president of the Horton Plaza Theatre Foundation, and was selected to serve on the California Arts Council Granting Panel for multicultural entry grants.

Texas A&M-Kingsville Students Present Research at National Conference

Two Texas A&M University-Kingsville students in the McNair scholars program made presentations at the 15th National Conference on Undergraduate Research in Lexington, Ky.

Yvonne Puentes, senior chemical engineering major, presented “Low Pressure Unimolecular Rate Constants and the Fall-off Pressure for Cyclopentene Pyrolysis” in a poster board session. Dr. Ronald E. Marcotte, chemistry professor, worked on the research with Puentes.

Laurie Lomas, senior animal science and biology major, presented “The Effect of Various Day Lengths on the Oculatory Cycles of the House Mouse (Mus musculus)” in an oral session. Lomas’ research was done with Dr. Glenn Perrigo, associate biology professor.

Urrúa Speaks at College of DuPage

Luis Alberto Urrúa (pictured), novelist, poet, essayist, and 1999 American Book Award winner, spoke on “Across the Wire: An American Journey” at the College of DuPage (III).

Urrúa’s novels include In Search of Snow. His poetry collections are Ghost Sickness, The Fever of Being, and Natos.

His nonfiction books study the evolving cultural identities in the United States. Those works include Across the Wire: Life and Hard Times on the Mexican Border, By the Lake of the Sleeping Children, and Nobody’s Son: Notes on an American Life.

Arizona College of Medicine Grads Become Resident-Physicians

Mariana Amaya and Martin Hernández, members of the University of Arizona (UA)

College of Medicine Class of 2001, will spend the next several years as resident-physicians.

Amaya’s experience growing up in a rural community sparked her interest in a medical career, and she graduated from UA in 1997 with a degree in community health education. The daughter of field workers, she is the first in her family to graduate from medical school. (Her sister, Gina Amaya, will graduate this year from the UA College of Nursing.) Amaya will pursue a residency in obstetrics and gynecology.

Hernández is the first college graduate in his immediate family. While an anthropology major at UA, he decided to pursue his dream of becoming a physician. After graduating in 1994, he earned a UA master’s degree in public health, interning with the El Rio Health Center diabetes self-management program and graduating in 1996. He will pursue a family practice residency.

Amaya and Hernández met as UA undergraduates and married two years ago. They are committed to helping improve the health care of underserved communities and plan to return to Arizona to practice.

Indiana University Professor Introduces Young Latinos to College

Indiana University Purdue University Indianapolis (IUPUI) education professor José Rosario brought local Hispanic high school students to the University for a videoconfer-
ence with students in Granada, Spain. The Indianapolis students, who attend Arsenal Tech and Northwest high schools, are members of Chic Latino, an organization developed by Rosario to engage students in their community through service.

Rosario, who himself grew up in a poor inner-city neighborhood, brought the students to IUPUI to introduce them to college life.

Portland Community Latino Club Organizes Film Festival

Students from Portland Community College’s (Ore.) Latino Club at the Cascade Campus organized the Second Annual Latin American Film Festival. Keynote speaker Victor Villaseñor is the author of nine novels, 65 short stories, and the critically acclaimed screenplay Ballad of Gregorio Cortez, which starred Edward James Olmos.

The film festival began last year as an instructor-driven event designed to help students in Spanish classes. It attracted 200 to 250 students. This year, students from the Latino Club took charge and worked hard to involve the Latino community and open the event to the public.

“It’s an opportunity for Latino students to develop skills and get involved with a worthwhile project,” said Jorge Espinosa, speech instructor and advisor to the Latino Club.

Bergen Professors Honored for Teaching Excellence

Bergen Community College (N.J.) Professors Amparo Codding, Dr. Corrine Kallman, and William Leonard received Excellence Awards from the National Institute for Staff and Organizational Development (NISOD) at this year’s NISOD Conference in Austin, Texas.

Codding (pictured) is coordinator of the foreign languages department and Spanish professor; Kallman is professor of mathematics; and Leonard, a radiology teacher.

Bergen Community College is one of the largest colleges in New Jersey. More than 12,000 students are enrolled in courses offered by the division of health and science; the division of business, mathematics, and social sciences; and the division of arts and humanities. An additional 10,000 are enrolled in non-credit continuing education programs.

Noguera in Panel Discussion at Rhode Island College

Olga Noguera, one of five women featured in “Sifting Our Roots,” a panel discussion at Rhode Island College (RIC), began lecturing in Spanish to a baffled audience because—not understanding a word of what was being said—that was what happened to her when she came to the United States from strife-torn Guatemala in 1967.

“As a Latino woman, I have experienced racism and bigotry,” said Noguera (pictured). “Sometimes people act like we don’t understand things—they talk down.”

Noguera struggled with ESL classes and worked as a domestic to get by. Then, encouraged to go back to school, she studied social work at RIC. Today, as an assistant coordinator of community relations for the Rhode Island Department of Human Services and cofounder of Progreso Latino and the Center for Hispanic Policy and Action, she works to help improve the community and lives of others.

Judith Mitchell, RIC professor of English, organized the discussion as part of a “Multicultural Female Gazing of Age Narratives” class.

Cal Poly Pomona Student Life Director Receives Award

California State Polytechnic University-Pomona employee Rebecca Gutiérrez Keeton was honored with a national award. She received the Multicultural Education Award from the American College Personnel Association for her work as director of student life at Cal Poly Pomona.

“This is a great honor,” Gutiérrez Keeton said. “Multicultural education is important to me because I believe in social justice, and at Cal Poly Pomona, this work supports the cultural pluralism, retention, persistence, and graduation of our students.”

$830,777 Grant to Alamo District for Online Education

The Alamo Community College District (ACCD) in Texas was awarded an $830,777 Discovery 4 Higher Education Distance Learning grant from the state Telecommunications Infrastructure Board.

The grant will build upon the extensive resources and programs the district has in place to create a comprehensive, state-of-the-art system for online education of all kinds.

The speed of the District’s entire Internet network will be substantially increased. High-speed Internet links will be created among five ACCD campuses and between the District and a large number of K-12 school districts in the San Antonio area.

“This funding will allow us to move forward in our continuing efforts to increase access to education, especially in underserved and rural areas where such access is critical,” said ACCD Chancellor Robert W. Ramsay.

Hunter Honors Pantoja and Sepúlveda

Hunter College in New York honored two noteworthy professionals from the Puerto Rican community: Dr. Antonia Pantoja and John U. Sepúlveda.

Pantoja, a 1952 Hunter graduate, received the Outstanding Professional Achievement Award. The driving force behind the development of two financial investment and credit corporations in Puerto Rico—Proviendia, Inc., a not-for-profit housing development and management corporation, and Producir, Inc., a rural community development corporation—she is perhaps best known for founding the organization ASPIRA in 1961, a network of clubs for Puerto Rican youth that builds pride and identity through education in Puerto Rican culture and history.

Sepúlveda, a 1977 Hunter graduate, was inducted into Hunter’s Hall of Fame, which consists of alumni—including Pantoja—honored for their outstanding professional achievements. Sepúlveda directs the Department of Housing and Industry Outreach at the Federal Home Loan Mortgage Corporation, aka Freddie Mac, in Virginia. He is in charge of several initiatives that reach out to minority and immigrant organizations to promote
home ownership, affordable housing, and community development.

**South Mountain Student Participates in NASA Internship**

South Mountain Community College (Ariz.) student José Chavarría was selected to participate in the Spaceflight and Life Sciences Training Program at the Kennedy Space Center in Florida. The National Aeronautics and Space Administration is sponsoring the six-week program.

 Participants learn how to successfully design and conduct biological research and operations in space and how to assess the environmental impacts of a launch site.

Only four community colleges are represented at the program, along with 26 other institutions and Ivy League schools.

Chavarría plans to become a mechanical aerospace engineer.

**Professional Engineers Launch Nationwide Campaign**

The National Society of Professional Engineers launched the "American Engineering Campaign," a nationwide effort to promote the unprecedented opportunities that exist in today’s modern engineering profession.

The campaign will demystify engineering and emphasize the exciting and innovative role engineers play in improving the quality of everyday life and solving wide-ranging societal problems.

"The reality is that the future begins with engineers—from many of today’s high-tech advances to the electricity that powers our homes, to the highways, bridges, and roads we use, to the medical technologies that help us live longer, healthier lives," said NSPE executive director Patrick J. Natale.

**Valle New York City Tech “Scholar on Campus”**

New York City Technical College chose humanities Professor Carmen Valle as its 2000-01 “Scholar on Campus” for her contributions to Latin American poetry and her research on Latin American literature. Valle read from her work and lectured on "Map of Words," her musings on the artistic process.

Valle has taught poetry workshops in Puerto Rico and at the St. Mark’s Poetry Center and Elders Share the Arts, both in New York City. She is a board member of Teachers and Writers, a 35-year-old organization that connects poets with New York City’s public schools. Her work is included in several anthologies in the U.S., Latin America, Ireland, and Spain, and in numerous poetry journals in several countries.

"Nothing disturbs a poet more than words; nothing makes a poet happier," says Valle. "The catch? The poet has to find the perfect word. The solution: solitary, endless work."

**Cal Poly Pomona Honors Achievement**

California State Polytechnic University-Pomona honored nine outstanding Chicano and Latino students at the fifth annual Hilda L. Solis Scholarship Dinner—recognizing them for their community involvement and academic achievement.

Local KABC-TV news co-anchor and Emmy award-winner Laura Díaz was presented with the Nopal Award, given annually to a Latino/a community role model.

The Hispanic Alumni Association, the César E. Chávez Center for Higher Education, the office of student life, and Associated Students, Inc., sponsored the event.

**Minneapolis College of Art and Design Holds ESL Institute**

In Minnesota, the Minneapolis College of Art and Design (MCAD) will be running its innovative English as a Second Language Institute for the second year. The 25-hour-per-week intensive prepares ESL students for the study of art and design in the United States within an art school setting. This year's Institute runs July 16-August 17.

In addition to daily skill-improvement workshops and exercises in conversational English, students will concentrate on three areas of art-related study: art and design vocabulary/terminology, critique, and presentation and public speaking. Class trips—including visiting artist presentations and lectures—will be made to the renowned Minneapolis Institute of Arts and the Walker Art Center and Sculpture Garden.

**NJCU President Shares Views on Latino Youth**

Dr. Carlos Hernández, president of New Jersey City University—wearing an article in Matices, a publication of the New Jersey Department of Community Affairs’ Center for Hispanic Policy, Research, and Development—shared his views on the factors he believes are preventing young Latino students from completing and obtaining degrees in higher education.

Hernández cited the pressure that comes from being the first generation to attend college as one of the major factors affecting Latino students. Many students and their families are not aware of what to expect from a higher education institute.

Many Latino students need motivation, said Hernández. "They tend to enroll in colleges or universities because everyone else is doing it or because it is now expected of them." He also noted that the scarcity of professional Latino role models and mentors within higher education institutions does not help the situation.

Hernández believes that Latino leaders and Latinos in general need to unite, open dialogue, experiment with ideas, shake things up, and continue with what works.

**Selected Poetry**

By Cecilio García-Camarillo

Popularly known as "the Chicano Nation's cultural attaché," Cecilio García-Camarillo first exerted cultural leadership in the Chicano Movement during the 1960s and 1970s through...
his editing of El Magazín, Caracol, and Rayas. Subsequently, as a radio host, he has brought to the public's attention literary works and people who have since become legend, lore, and canon. These poems have long been only a memory, until now. Introduction by Enrique R. Lamadrid.

Playing with Light
By Beatriz Rivera

Rebecca Barrios, a well-off Miami Beach housewife who has decided to revive the old Cuban tradition of the tertulía, or women's get-together, convinces old friends to gather as a reading group at her house every week. As the friends read deep into their chosen story, the saga of a 19th-century clan of Havana dressmakers, strange things begin to happen to them, causing Rebecca to wonder what kind of story they all have gotten themselves into.

Testimonio: A Documentary History of the Mexican American Struggle for Civil Rights
By F. Arturo Rosales

F. Arturo Rosales has pursued and meticulously put in order a wealth of essential, illuminating papers—such as petitions, correspondence, government reports, political proclamations, newspaper items, first-hand accounts, manifestos, congressional testimony, memoirs, and treaties—that all together tell, more vividly than any composed narrative could, the history of Mexican Americans in the United States.

Leadership for Change and School Reform: International Perspectives
Kathryn A. Riley and Karen Seashore Louis, eds.

School reform initiatives often focus exclusively on school leaders rather than looking at other organizations that affect schools, such as national and local governments, professional associations, and school communities. The editors offer a comparative perspective on leadership for reform and change, using an expanded view of leadership, seen as a network of relationships among people, structures, and cultures.

Red
By Alfred Arteaga

Written partly in Spanish and partly in English, these poems by acclaimed writer and critic Alfred Arteaga move between vivid, sensual impressions and sophisticated, intellectual wordplay. Life in Hollywood, sex and relationships, racism and injustice, and the nature of experience itself are among the themes he addresses in spare and elegant language.

The Invention of Dolores del Río
By Joanne Hershfield

Dolores del Río came to Hollywood from Mexico, became an international film star, worked with Hollywood's top directors, and was billed as one of cinema's most "exotic" and "aristocratic" beauties. Joanne Hershfield explores the intersection of ethnicity, gender, and stardom in American popular culture through the lens of del Río's successful and unusually lengthy career, which lasted until the 1960s.

Conservative Parties, the Right, and Democracy in Latin America
Kevin J. Middlebrook, ed.

This book examines the relationship between the Right and democracy in select Latin American countries during the 1980s and 1990s. It focuses particularly on the challenges that democratization might pose to upper-class groups; the political role of conservative parties and their electoral performance during these two crucial decades; and the relationships between conservative party strength or weakness, different modes of elite interest representation, and economic and social elites' support for democratic policy.

Before Roe: Abortion Policy in the States
By Rosemary Nossiff

This book reveals that there was more to states' choosing abortion legislation than just meeting the interest of the people. It shows that the clashes of influence between abortion activists, grassroots groups, and powerful organizations from both sides of the issue tried to sway the state legislatures and courts. The strategies and discourses used by these interested parties—such as the National Council of Catholic Bishops and the National Organization for Women—further explain why some groups were successful and why others were not.

1651

07/02/2001 O HISPANIC OUTLOOK 39
The Shadow of Ulysses: Public Intellectual Exchange across the U.S.-Mexico Border
By José Antonio Aguilar Rivera

This book explores intellectual exchanges between the United States and Mexico from the 1920s to the present. It illustrates how the dialogue was affected as the role of intellectuals in the two countries changed over time. Foreword by Russell Jacoby.

Poetry Lover
By Gary Soto

Silver Mendoza, introduced to us by author Gary Soto in his book Nickel and Dime, is a down-on-his-luck poet who is invited to Madrid to participate in a conference on Chicano literature. Having no job, home, or even a typewriter to his name, Silver needs money—for a plane ticket, a new passport, and a place to stay. Despite these imposing obstacles, he is determined not to miss this chance at the life a poet should live.

Many publications featured in this section are available through amazon.com.

AFT QuEST 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for Pre-K-12 teachers, school staff, and state and local education leaders, including the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

Contact: website, www.aft.org/QuEST2001

UNM's Taos Summer Writers' Conference
July 14-20

There are weekly workshops to select from. Among the many workshop leaders are Pat Mora, "Los Cuencos: Family Stories for Beginners," and Alma Luz Villanueva, "Stories: Dreaming Characters to Life." Some scholarships are available. In Taos, N.M.

Contact: website, www.unm.edu/~taosconf

The Summer Institute for Intercultural Communication 2001
July 18-20
July 23-27
July 30-August 3

This 25th summer institute is under the auspices of the Intercultural Communication Institute (ICI) in Oregon, which provides professional training and development to thousands who work in multicultural environments throughout the world. Workshops range from "Foundations" to "Who You Gonna Call? Hate-Busting on College Campuses" and many more. Certificate and Master of Arts in Intercultural Relations programs are available.

Contact: ICI, (503) 297-4633; e-mail, ici@intercultural.org; website, www.intercultural.org.

National Conference on Critical Thinking and Educational Reform
San Francisco area July 21-24

The Center for Critical Thinking presents "Dimensions of Critical Thinking." In San Francisco, Calif.

Contact: (800) 833-3645; website, www.criticalthinking.org
The International Telecommunications Council and The TeleLEARNING People will sponsor "TeleLearning 2001," the premier event in distance education and educational telecommunications. At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

**ACE 2001 Conference**

October 13-20

"The nation’s most important national conference on diversity and improving minority participation in postsecondary education." Sponsored by the American Council on Education’s Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

**College Board National Forum 2001**

October 26-30

This year's College Board National Forum has as its theme "Measuring Success," looking at the measures of "success for yourself, your school, your students." At The Adam's Mark Hotel in Denver, Colo.

Contact: (212) 713-8050; website, www.collegeboard.com.

**HACU 15th Annual Conference, in Puerto Rico**

October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme "Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future." In San Juan, Puerto Rico.

Contact: (210) 576-3218; website, www.hacu.org.

**FIU Conference on Spanish and Latin American Literature**

November 8-10

The Department of Modern Languages at Florida International University will hold the conference "Spanish and Latin American Literature: New Trends for a New Millennium." At FIU in Miami, Fla.

Contact: Ricardo Casellas, (305) 348-2130; e-mail, castells@fiu.edu.
Book Reviews

By Mark Saad Saka

Harvest of Empire is an all-encompassing walk through the history of Latinos in the Americas—an epic view of the Puerto Rican, Dominican, Cuban, Mexican, Colombian, and Central American experiences in both their home nations and in the United States.

This is one of the best histories of the Latino experience in the Americas that I have read, an excellent choice as a text or supplemental reading in an undergraduate or graduate course covering immigration, the Latino experience, or the impact of U.S. foreign policy on domestic American society.

One of its many strengths is González's ability to demonstrate linkages. The first third of the book focuses on the 19th-century relationship between the U.S. and the newly independent nations of Latin America. The "rape and plunder" of Latin America's agricultural wealth, mineral resources, and national territory malformed the region's political economies and locked these nations into economic and political dependency on the U.S. The wealth accrued during this century created many of America's greatest capitalist families and industrial/mining/agro-enterprises.

During the 20th century, the nations in which the U.S. played the most prominent roles are the same nations that have provided the majority of immigrants. The 19th-century exploitation of Latin America thus had the boomerang effect of pushing and pulling the citizens of those nations into the U.S. In an ironic twist of history for those racist theorists who justified the domination of Latin America on the supposed inferiority of Latinos, within a few decades, Latino citizens will be the majority in most of our largest states; hence the title "Harvest of Empire." González's linkages are illuminating.

Another strength is the integration of family histories into an overall thematic treatment of immigration, a beautiful synthesis of macro and micro narratives. Many personal testimonies confirm how the economic and political displacement of Latinos in their home countries led to their direct migration to the U.S. The case of Estela Vázquez is one illustration. During the 1965 American occupation of the Dominican Republic, in an attempt by the Johnson administration to prevent the Bosch government from implementing democratic reforms and a redistribution of land, Vázquez, a high school student, was arrested as an alleged revolutionary. She was subsequently imprisoned and, on her release, migrated to the United States. Within three decades of U.S. intervention, Dominicans are the second largest Latino group in the Northeast, a figure that would surprise most Americans.

González, born in Puerto Rico and raised in New York, provides a solid synthesis of the Puerto Rican experience, both in an historical and a contemporary context. He presents possible solutions to the "Puerto Rican question," an unresolved dilemma over America's last colony, and takes on many right-wing polemists who attribute much of Puerto Rico's high poverty and unemployment rates to welfare dependency and out-of-wedlock childbirth.

González again provides linkages, demonstrating that much of the Puerto Rican displacement rises from American corporate domination of the island's economy, and that Puerto Rico has provided more wealth to the U.S. through corporate tax and patent loopholes (corporate welfare, anyone?) than has any other country in the world.

Harvest of Empire also provides a view of the future. Despite attempts by conservative or liberal xenophobes, Latino immigration will continue, and Latinos will soon represent the largest minority group in the U.S., the largest of any group in several states, and a sizable presence in such places as North Carolina, Georgia, and other states usually perceived as Euro-American strongholds. Factors accounting for this growth and continued immigration include a catastrophic economic crisis in Latin America that pushes immigrants here; a corporate globalization that inexorably pulls Latin Americans here, and a declining birth rate and aging of the White population of the U.S. that assures a continual demand for low-paid Latino labor.

We in higher education must make our institutions aware that if we are to remain relevant to American society, our universities and colleges must adapt and incorporate our growing population of Latino youth.

Finally, González addresses some myths and realities of the immigration phenomenon, especially myths propagated by xenophobic elements. He notes that most of the 20 million foreign-born residents in the U.S. came here during their prime working years, Latinos most often with a high school education from their home country. They did not arrive as children. Their home governments now in fact have lost their investment in human capital, an investment that benefits the U.S., which obtains young workers to whose education it did not contribute.

Harvest of Empire contains the trials and triumphs of Latinos from across the Americas, whether as indigenous Mexicanos of the Southwest, colonized Puerto Ricans, or Central Americans driven from their places of birth by the brutal counterinsurgencies of the 1980s. The complexities of their experiences and successes in the U.S. are testimony to the triumph of the human spirit and our common hemispheric destiny, a destiny that makes us all truly Americanos.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. A Mexican specialist, his interests include peasant social movement and agrarian unrest. An American of Arab ancestry, he has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.
By John S. Robey

Susanne Jonas and Suzanne Thomas are the editors of this volume and members of the editorial board of *Social Justice*. They have gathered together 13 extremely well-written original essays dealing with issues relating to immigration. The essays and essayists represent a wide variety of academic disciplines and points of view.

The editors maintain that the passage of Proposition 187 in California, the beating of undocumented immigrants fleeing immigration officials in 1997, and the documentation by scholars from the University of Houston of more than 1,000 migrant deaths led them to the belief that a volume such as this one was needed. The hope of the editors is that this volume will "...close the gap between progressive movements and progressive scholars."

In the first essay, freelance writer J.C. Malone describes what it is like to emigrate from the Dominican Republic and face anti-Latino racism while looking for work in Michigan.

Saskia Sassen, professor of urban planning at Columbia University, examines how governments have come to focus on border areas as zones of enhanced regulation and control. She views increased regulation by the state as an effort to fight larger, more global economic forces.

Nestor Rodríguez, sociologist at the University of Houston, envisions the creation of a new transnational community on the border. He foresees the day when new technologies will enable governments to do away with rigidly monitored borders.

Juan Vicente Palerm, professor of anthropology at the University of California-Riverside, presents a statistical analysis of California's economy and its relationship to immigrant labor. He views recent policy developments (e.g., welfare reform and Proposition 187) as attempts to punish immigrants. These punishment efforts will result in many immigrants' going "underground" and will delay long-term solutions to problems associated with illegal immigration.

Linda Miller Matthei, professor of sociology and anthropology at East Texas State University, reviews the literature pertaining to women, networking, and migration. Although a little dated (no research since 1995 is reviewed), it contains some useful insights.

John Isbister, economist at the University of California-Santa Cruz, argues the need for immigration policies to be subjected to ethical analysis, which he contends teaches us that all human beings have equal moral worth. He presents thought-provoking questions.

Susanne Jonas, also affiliated with UC-Santa Cruz, critiques existing policies and proposes a reconceptualization of citizenship and the need for a civil society.

John Horton, emeritus professor of sociology at UCLA, uses both census data and ethnographic interviews to examine the impact of immigration by both the Chinese and Mexicans on the economic, social, and political characteristics of a community in Los Angeles.

In his second essay, Nestor Rodríguez compares the interactions of Latinos and African Americans in Houston and Los Angeles and finds that "tensions, conflict, and community instability are not the only resulting relations between African Americans and Latinos in contexts of high immigration."

Lowell Sachs, a governmental affairs representative with Sun Microsystems, argues that given the current political climate, the road ahead for immigrants is "...fraught with hazards." He presents a view from Washington, D.C., and outlines many of the systemic fears driving U.S. immigration policies today.

David Bacon, a board member of the Northern California Coalition for Immigrant Rights, adds an insightful essay that examines the uneasy relationship between the AFL-CIO and undocumented immigrants. It is his view that the arrival of new immigrants can reenergize the labor movement in the United States.

Sara Diamond, affiliated with California State University at Hayward, compares immigration attitudes of the "Christian Right" and the "Paleoconservative Right." In her view, the "Christian Right" would like to attract new members to its evangelical movements from the immigrant communities and is thus more sympathetic to the concerns of the immigrants.

The volume concludes with an essay by Michael Welch, a professor in the Administration of Justice Program at Rutgers University (N.J.). He traces the changes in the INS' detention policies and finds that "INS detention practices are costly, unnecessary, and unjust for most undocumented immigrants."

Generally, the essays are well written, and most present thought-provoking alternatives to our current immigration policies. Those who would like to see these issues subjected to more rigorous quantitative analysis would have to look elsewhere; however, that does not detract from the thoughtfulness of the essays. The book should be of interest to a wide variety of academicians as well as those interested in issues of concern to the Hispanic population. The volume could have been improved by including an index, but the essays are timely, well researched, and thoroughly documented.

*Dr Robey writes on issues of concern to the Hispanic population and is a specialist in public policy and American politics. He has taught in the social sciences department at the University of Texas-Brownsville since 1996.*

Director, Institute for Simulation and Training (IST)

The University of Central Florida is seeking an internationally recognized leader to further the development of research and education in computer-based simulation and training. The IST Director will represent and coordinate the University’s activities in modeling, simulation and training.

The University of Central Florida is a major public institution of higher education with nearly 34,000 students. The University has strong research programs in several areas related to the growing high-technology industries in Central Florida, including Human Factors, Psychology, Computer Science and Engineering, Photonics and Optics, and Microelectronics. Minimum qualification is an earned doctorate in a relevant area. Other requirements include an understanding of technical and scientific issues related to the position; demonstrated support and sensitivity to multi-disciplined research activity; strong leadership, management and interpersonal skills; and a record of securing research funding. Preference will be given to candidates who can hold a senior appointment in an academic department, have a distinguished record of research, and who have demonstrated a genuine interest in education, training and academia.

Applicants should forward a complete resume, with the names of seven references, to Dr. Brian Tonner, Chair of the IST Director Search Committee, the University of Central Florida, 12443 Research Parkway Suite 302, Orlando, FL 32826. Screening of candidates will begin on July 1, 2001 and will be pursued until the position is filled.

UCF is an affirmative action employer.

Harvey Mudd College (HMC), a member of The Claremont Colleges, is a highly selective, private, liberal arts college of engineering, science and mathematics, and is located about 35 miles east of Los Angeles.

HMC is seeking an experienced advancement professional as its VP for College Advancement. The successful candidate will have a positive track record at major gift prospect development and gift receipt, demonstrated ability managing both development and public relations in a small, liberal arts college environment, and enthusiasm for and ability to promote this distinctive college. Candidates will also have successful experience in providing leadership, program, guidance, and stewardship for all fund raising and public relations functions. The VP Advancement serves as secretary of the corporation. Qualifications include a bachelor's degree (an advanced degree is a plus) and the flexibility, humor, and sensitivity to interact successfully with individuals of varying abilities, backgrounds, interests and beliefs. Salary is dependent upon qualifications.

Please submit a résumé, letter of interest, salary history and the names, addresses and telephone numbers of three professional references to:

Harvey Mudd College

Smith College

Director of Student Financial Services

Smith College seeks an experienced professional for the position of Director of Student Financial Services. Smith College is a highly selective women's college of 2,500 students located in Northampton, Massachusetts. Founded in 1871, this private, liberal arts institution offers outstanding programs in the arts and sciences.

Reporting to the Dean of the College, the Director of Student Financial Services is responsible for overseeing a comprehensive, service-oriented unit including financial aid and student accounts. The director oversees strategic planning in the allocation of financial aid resources and provides leadership in the formulation, implementation and assessment of financial aid and enrollment strategies. The director serves as a member of the Dean's revenue and enrollment team. The director supervises a staff of 12 in the creative implementation of enhanced services to students and families.

Qualifications: Bachelor's degree; a graduate degree is preferred, comprehensive knowledge of financial aid policies and programs is required. The director should have extensive experience with current technologies in accounts and financial aid processing; demonstrated supervisory skills, as well as a record of working effectively with students, parents, faculty and staff are also necessary. Excellent oral and written communications skills are required. The salary for this position will be at a nationally competitive, senior administrative level and includes a comprehensive benefits package.

Review of applications will begin June 25 and continue until the position is filled, with a preferred start date of Fall 2001. Nominations are welcome. Please forward a letter of application, a curriculum vitae and a list of at least three references to: Director of Student Financial Services Search Committee, Smith College, Box 595, 21 College Hall, Northampton, MA 01063. Smith College is an equal opportunity employer encouraging excellence through diversity.

The University of Texas Pan American

Dean

College of Science and Engineering

The University of Texas-Pan American (UTPA) invites nominations and applications for the position of Dean of the College of Science and Engineering.

The University is a comprehensive regional university serving the lower Rio Grande Valley, located in Edinburg, Texas. The university is in close proximity to Mexico and South Padre Island, home of the university's Coastal Studies Laboratory. UTPA is the fifth largest component of The University of Texas System and the 10th largest public university in Texas. Enrollment numbers consist of 12,700 students, 85% of whom are Hispanic and many are first-generation college students.

The College of Science and Engineering is one of six colleges at UTPA. The College has Departments of Biology, Chemistry, Computer Science, Engineering, Mathematics, and Physics and Geology. Eight Bachelor's and four Master's degrees are offered. Doctoral programs are planned for Biology and other departments, and a School of Engineering and Computer Science is pending approval. College level research and externally funded activities are ongoing in alternative energy, bioengineering, biomedicine, information technology, high-energy physics, materials exploration, subcritical studies, and mathematics and science teaching. Since 1993, $56 million have been allocated toward the building of 348,000 sq. ft. of new office and laboratory space to support Science and Engineering.

Responsibilities: Provide dynamic, visionary leadership in the college; supporting the University's goals to become a Carnegie Research Intensive institution within the decade and assist with the development of a biomedical biotechnology focus for the college. The Dean is also expected to provide an environment for teaching excellence, faculty scholarship and professional services; promote research opportunities for faculty within the college and university. Administrative support and guidance are expected in the areas of curriculum and program development, accreditation, fiscal, personnel, and student services management. The Dean reports to the Provost/Vice President for Academic Affairs, has an active role in external fundraising and in the development of institutional policy as a member of the Deans' Council.

Qualifications: An earned doctorate with credentials to qualify for the rank of Professor with an academic appointment in one of the Departments of the College; preference will be given to applicants in Biology, Chemistry, Mathematics or Physics and Geology; five years administrative experience as Department Chair or above; a demonstrated record of excellence in teaching, research, service and external funding; a strong record of leadership and management with a commitment to student access, retention, and success; effective communication skills with students, faculty, and other groups; demonstrating the ability to attract and retain excellence in faculty; and a commitment to student access, retention, and success; ability to work well with other administrators.

Application and Nomination: Review of applications will begin on July 13, 2001 and will continue until the position is filled. Nominations of individuals for this position may be made to The Spelman & Johnson Group as indicated below. A resume and cover letter may be submitted by e-mail attachment to mail@spelmanjohnson.com or online at www.spelmanjohnson.com. If you are unable to submit materials electronically, please mail a resume and cover letter to:

Smith College
Director of Student Financial Services

Smith College seeks an experienced professional for the position of Director of Student Financial Services. Located in Northampton, Massachusetts, Smith College is a highly selective women's college serving 2,500 students.

Founded in 1871, this private liberal arts institution offers outstanding programs in the arts and sciences and recently launched an engineering program for undergraduate women.

The Position
Reporting to the Dean of the College, the Director of Student Financial Services is responsible for overseeing a comprehensive, service-focused unit that includes the offices of financial aid and student accounts. The Director oversees the strategic allocation of financial aid resources and provides leadership in the formulation, implementation, and assessment of financial aid and enrollment strategies. Smith College administers approximately $30 million dollars annually in federal, state, and institutional funds. Serving as a member of the Dean's retention and enrollment team and managing a staff of 12, the Director is responsible for insuring the comprehensive and effective delivery of financial services to students and families.

Qualifications
The successful candidate will possess a Bachelor's degree, a Master's degree is preferred, and demonstrated success in the strategic use of financial aid in the recruitment of students, as well as strong management and administration skills. Extensive expertise with the use of technology in student accounts and financial aid processing, a background in delivery of services with a customer focus, and demonstrated success in working effectively with students, parents, faculty, and staff are important factors in selection of the new Director. A comprehensive knowledge of financial aid policies, delivery, and administration at a highly selective institution is a plus.

Application and Nomination
Review of applications will begin on July 13, 2001 and will continue until the position is filled. Nominations of individuals for this position may be made to The Spelman & Johnson Group as indicated below. A resume and cover letter may be submitted by e-mail attachment to mail@spelmanjohnson.com or online at www.spelmanjohnson.com. THE S P E L M A N & J O H N S O N G R O U P
ASSOCIATE VICE CHANCELLOR
FOR COMMUNITY PARTNERSHIPS

Applications and nominations are invited for the position of Associate Vice Chancellor for Community Partnerships effective Spring 2002.

UCLA has created a new and important senior executive position to coordinate and synchronize its community partnerships and civic participation in the Los Angeles area. The position is to add value to both the academic enterprise and to Los Angeles. By coordinating its extensive academic and community activities, UCLA hopes and plans to build stronger and broader relationships with the various communities in the Los Angeles and southern California region. This initiative, referred to as UCLA in LA, currently includes partnerships with schools, non-profit and community based organizations, businesses, labor unions, and communities of faith.

Internally, the Associate Vice Chancellor for Community Partnerships will provide executive academic leadership for UCLA’s ongoing community partnerships. The AVC for Community Partnerships will work with Provosts, Deans, UCLA faculty (individually and in research groups), centers and institutes, and student and staff groups to coordinate, support and leverage their efforts and goals for community engagement. In close consultation with Provosts, Deans, faculty and administrative leadership, the AVC will develop a UCLA vision for community partnerships and be expected to build and lead a new “Center for University Partnerships.” This Center will serve as a clearinghouse to respond to external requests and to link community needs with faculty research, teaching and service activities related to the greater Los Angeles area. Externally, the AVC will reach out to and work with community groups, their leadership, and other involved individuals to find sustainable partnerships. The AVC will work with an advisory board composed of UCLA faculty, administrators, and community members, and will assess and evaluate UCLA in LA’s partnership efforts.

The AVC for Community Partnerships will report to the Executive Vice Chancellor and Chancellor and will be a member of the Chancellor’s Executive Committee.

UCLA celebrates 80 years of growth, from a small two-year college to a comprehensive institution in the company of the nation’s most prestigious research universities. UCLA is a large and complex institution devoted to undergraduate and graduate teaching, research, and public service. The campus includes 142 buildings on 419 acres, and is organized into the College of Letters and Science plus 11 professional schools. Over 3400 faculty serve more than 33,550 students. UCLA faculty and students come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment.

Candidates must have the academic credentials to qualify for a tenured appointment at UCLA. They should have a good understanding of community partnerships involving teaching and research in the Los Angeles area, as well as demonstrated experience in the development of collaborative research ventures. Ability will be commensurate with background and experience.

For additional information, please go to: http://www.ucla.edu/avp_partnerships

To be ensured full consideration, nominations and applications should be sent by July 30, 2001 to:

EEO/AA
University of Missouri - Kansas City
Vice Chancellor for Administrative & Financial Services

The University of Missouri-Kansas City seeks a chief financial officer for its growing campus. Located in the heart of Kansas City, Mo., and adjacent to the city’s arts and shopping district, UMKC is a comprehensive urban university with nationally recognized programs in the arts, health sciences and business/urban affairs.

Reporting directly to the Chancellor, the Vice Chancellor for Administrative & Financial Services oversees an operating budget of $200 million. The successful candidate will serve on the Chancellor's Cabinet and as an executive officer/team leader for the Blueprint for the Future, UMKC's strategic planning process defining the new standards in higher education. The Blueprint is creating opportunities to develop new budget and allocation systems. The successful candidate will lead the Blueprint’s budgeting breakthrough project and participate in others relating to the University’s financial and human resources.

The duties of the Vice Chancellor for Administrative & Financial Services include overseeing the budget process for the campus, which offers undergraduate, graduate and professional degree programs to more than 13,000 students. The Vice Chancellor for Administrative & Financial Services directs financial modeling of new projects and programs, oversees the development and implementation of budget guidelines and policies, oversees the management and utilization of space in campus-owned buildings, and provides leadership for the approval and implementation of capital improvements projects.

UMKC's Vice Chancellor for Administrative & Financial Services directs six administrative departments totaling approximately 400 employees: Business Affairs (mail services, real estate, contracts, ticket office), Campus Facilities Management (buildings, grounds, maintenance, construction, repairs), Financial Services (budgeting, accounting), Human Resources (personnel, benefits), Police (protection services, parking), and Purchasing (accounts payable, bids, inventory).

UMKC seeks a strong leader with a proven record of visionary leadership and ten or more years in financial and administrative management at an executive level. A master’s degree in business administration or higher education administration (or an equivalent combination of education and experience) is requested. The successful candidate will have highly developed interpersonal skills, the ability to interact with diverse groups and foster partnerships, and experience in wide-range and long-term strategic planning in a leadership capacity. Previous experience in the integration of PeopleSoft into a business setting is highly desirable.

How to apply:
Application review will begin June 30 and continue until the position is filled. Send a letter of application and supporting materials to:

Darlene Scott-Scarry
Office of the Chancellor
University of Missouri-Kansas City
5100 Rockhill Road
Kansas City, Missouri 64110-2499

POSITION:

ASSISTANT DEAN FOR ACADEMIC ADVISING:

Moravian College invites applications for the position of Assistant Dean for Academic Advising. The Assistant Dean for Academic Advising works with students, faculty, and administrative staff to support the work of the Office of Academic Affairs. The Assistant Dean combines highly developed people skills with the ability to organize large amounts of data related to the progress of many students and to the academic program in general.

Moravian College is a selective liberal arts and sciences institution with an enrollment of over 1450 students and 18 academic departments. Services offering undergraduate degrees, the College offers masters degrees in business administration and education.

The Assistant Dean for Academic Advising’s responsibilities include:

- Work with the Associate Dean for Academic Affairs to provide, develop systems for, and oversee academic advising.
- Work with faculty and the Learning Center to provide academic support to students.
- Participate in the coordination of the registration process for first-year and transfer students.
- Participate in the computerization of academic advising.

The Assistant Dean for Academic Advising must have:

- A bachelor's degree in a related field.
- Excellent written and oral communication skills.
- Strong organizational and interpersonal skills.
- Ability to work with a diverse population.

Salary commensurate with qualifications and experience. The twelve (12)-month position begins as soon as the successful applicant is available.

Moravian College offers a competitive benefits package.

Applicants should submit a cover letter, curriculum vitae, and three professional references to the Chair of the Search Committee. The cover letter should include evidence of their philosophy of liberal education, teaching, and advising at institutions with the scope and mission of Moravian College. Applications received by July 23, 2001 will be reviewed. Review of applications will begin after July 23 and continue until the position is filled. Moravian College values diversity and encourages individuals from under-represented populations to apply.

Application materials should be sent directly to:

Human Resources; Chair, Assistant Dean Search Committee; Moravian College, 1200 Main Street, Bethlehem, PA 18015-6550; 610-625-7852 (fax); email: employment@moravian.edu.

DIRECTOR OF INTERNATIONAL PROGRAMS

Loyola College in Maryland invites applications for the position of Director of International Programs. Loyola College is a dynamic, highly selective Jesuit school steeped in the liberal arts tradition and recognized as a leading independent, comprehensive university in the mid-Atlantic region. Located on 65 acres in a beautiful residential section of Baltimore, Loyola enrolls over 5,000 students in its undergraduate programs and 3,000 students in its graduate programs. Loyola College operates with a budget of approximately $112 million and holds and endowment of $150 million.

For the first year this person will function as an associate director, becoming familiar with all aspects of the position and working closely with the current director. At the end of one year the associate will become director and will report to the Vice President for Academic Affairs.

The director is responsible for assessing and maintaining academic quality and community service opportunities in Loyola's study abroad programs in a manner consistent with the standards of excellence of the College. The director oversees Loyola's programs in Spain, New Zealand, Thailand, China, Ireland, Belgium, Australia, and England. The director is also responsible for nine exchange programs, and nineteen other study abroad opportunities. Each year over 400 students, equivalent to 45 percent of the junior class, study abroad. The director must continually evaluate and improve our study abroad opportunities.

The director supervises four people in the International Programs Office and four on-site directors. The director must work collaboratively with faculty advisors and with administrators in the areas of finance, student life, admissions, and the Assistant Vice President for Academic Affairs and Diversity. The director works with academic department chairs to develop and assess study abroad opportunities for their majors. The director also is responsible for the undergraduate international students coming to campus, for internships abroad, and for finding opportunities for Loyola students who do not go abroad to experience international cultures. The director manages a $1.5 million budget and works with an advisory committee of faculty and staff.

The qualifications for the position are extensive experience with study abroad programs, a master's degree, and a background of working with students, faculty, and administrators. Screening of applicants will begin in mid-June and the position will remain open until filled. Please send letter of application, resume, and contact information for five references to:

THE UNIVERSITY OF SCRANTON
A JESUIT UNIVERSITY

DIRECTOR of EQUITY and DIVERSITY

The University of Scranton is inviting applications for the position of Director of Equity and Diversity. The Director provides the leadership and vision necessary to promote equity and diversity throughout all aspects of the University.

Reporting to the President, the Director of Equity and Diversity is responsible for the management of an effective diversity program to support the University's commitment to social justice and multiculturalism for students and employees. Additional responsibilities include: dealing with issues of gender, disability, sexual orientation, and HIV; coordinating training related to compliance, sensitivity, and acceptance of differences; coordinating student and employee requests for accommodations for learning and physical disabilities; monitoring and enforcing University policies related to diversity and equal opportunity; and ensuring the University's compliance with various federal, state, and local regulations.

Qualifications for the position include an advanced degree in a relevant field and five or more years of professional experience with equity, diversity, and affirmative action programs, preferably in higher education. The successful candidate will have a high degree of energy, creativity, and integrity, as well as strong intellectual, analytical, and interpersonal skills. An in-depth knowledge of government regulations as they relate to the EEO/AA requirements, sound presentation skills, and the ability to work collaboratively with all employees and students is also required.

The University of Scranton is a broadly regional institution of 4,800 undergraduate and graduate students located in northeastern Pennsylvania near the Pocono Mountains. Recognized nationally for the quality of its education, Scranton is one of 28 Jesuit colleges and universities in the United States. It is committed to 20 liberal arts education and strong professional and pre-professional programs in the context of Ignatian educational principles, especially the care and development of the whole person.

The University is proud of its mission of liberal arts education in the Catholic and Jesuit tradition and spirit. The successful candidate is expected to make her/his contributions to this mission.

The Director of Equity and Diversity is a twelve-month position available 1 August 2001. Review of candidates begins immediately and continues until the position is filled. Interested candidates should submit a cover letter, resume and the names, addresses, and phone numbers of three references to:

An Equal Opportunity/Affirmative Action Employer.
MOUNT HOLYOKE COLLEGE

Director of Library, Information, and Technology Services

Mount Holyoke College invites applications and nominations for the position of Director of Library, Information, and Technology Services (LITS). LITS serves the information needs of the College broadly defined, including library services, administrative and academic computing, and the infrastructure needed to sustain them. The Director oversees a budget of $7,500,000 and a staff of 73 persons, reports to the Dean of Faculty/VPA and is a member of the President’s senior staff. We seek a creative leader who combines a respect for the traditional roles of the library and academic computing with a sense of the transformative possibilities that information and information technologies bring to an educational institution, who will sustain and develop new collaborations among faculty, students, technologists and librarians, and who can build on and enhance the distinctive strengths of our integrated organization.

Founded in 1837, Mount Holyoke is an undergraduate liberal arts college for women with about 2000 students and 200 faculty. It is located about 80 miles west of Boston in the Connecticut River valley, and is a member of the Five College Consortium which consists of Amherst, Hampshire, Mount Holyoke, and Smith Colleges and the University of Massachusetts at Amherst. The Five Colleges collaborate closely in planning and program development on both library and information technology issues ranging from a shared library information system to interactive classroom and network infrastructures.

Qualifications: An advanced degree (e.g. Ph.D. or M.L.S.), demonstrated leadership in an academic setting, substantive knowledge in information services and library fields, strong personal and management skills, effective oral and communication capabilities, and the desire and ability to work collaboratively with others.

Salary will be commensurate with experience and qualifications. Review of applications will begin on August 1 and continue until the position is filled. Please submit nominations or applications to:

LITS Search Committee

Mount Holyoke is committed to fostering multicultural diversity and awareness in its faculty, staff, and students and is an Affirmative Action, Equal Opportunity Employer. Women and people of color are especially encouraged to apply.

WESTERN CONNECTICUT STATE UNIVERSITY

Ancell School of Business
MANAGEMENT DEPARTMENT

Position: WCSU has an anticipated tenure-track position in General Management (emphasis on Total Quality Management, Supply Chain Management, and Operations) beginning August 2001. A twelve-hour per semester teaching load in the Bachelor’s of Business Administration program, an MBA program in Management in Waterbury but also at the Danbury campus. Primary emphasis is on teaching, scholarly productivity, and service to the university. At Waterbury and Danbury are expected. Rank and salary are dependent upon qualifications.

Qualification: An earned doctorate in General Management or a related field; ABDS near completion will be considered. Other graduate degrees will be considered if coupled with professional experience in General Management that is relevant, significant in duration and level of responsibility, and current at time of hire. Demonstrated teaching and general management experience are preferred. Evidence of research productivity is required. Teaching assignments may include Total Quality Management, Supply Chain Management, and Operations as well as classes such as Current Issues or Strategic Management.

The Department: Eight full-time faculty, plus adjunct instructors, provide a BBA Management major and an MBA degree and also support an M.B.A. program.

Application Process: Email, send, or fax a letter of application, a current vita, and three letters of recommendation to: Dr. Stanley Buzan, Chair, Management Department, WCSU, 181 White Street, Danbury, CT 06810. (203) 837-8527 (Fax). Buzan@wcsu.ctstateu.edu Review of applications will begin on July 16, 2000.

WCSU is an AA/EEO Educator/Employer.

PRESIDENT/CEO

The Kentucky Community and Technical College System (KCTCS) seeks an entrepreneurial leader to serve as Founding President/CEO of the comprehensive Community and Technical Colleges in Northern Kentucky.

For a detailed job advertisement, please see our website at:

www.kctcs.net
The University of South Florida invites applications for the position of:

ASSOCIATE VICE PRESIDENT
OF PUBLIC AFFAIRS

POSITION AND QUALIFICATIONS
USF is a public metropolitan research university serving more than 35,000 students in nine colleges on four campuses in Tampa, Lakeland, St. Petersburg, and Sarasota. Classified as a Doctoral/Research-Extensive institution by the Carnegie Foundation for the Advancement of Teaching, USF offers degree programs in 77 undergraduate disciplines, 83 masters' and specialist programs, and 28 doctoral programs, including the MD. The faculty numbers more than 2,000.

The Associate Vice President for University Relations directs university media relations, marketing, publications and web operations and is responsible for developing and implementing an effective overall communication strategy to support the institution's needs as a major American research university. The Associate Vice President plans, directs, and coordinates the dissemination of timely communications to inform and educate the general public, the media, prospective students, students, faculty, staff and alumni of the work of the university and issues affecting the institution.

This senior professional's background should include experience at a major research university, or comparable institution, that demonstrates a strong understanding of the communication issues of a complex, decentralized institutional environment. This official must demonstrate a strong understanding of the importance of credible, accurate communications and the demands of the strict Sunshine Laws of the State of Florida.

A major component of the Associate Vice President's job will be developing and implementing a comprehensive "branding" program to help create a strong position for USF within the context of institutions in Florida and nationally, and to create local, state and national awareness of USF's stature as reflected by such recent achievements as: Doctoral/Research-Extensive status; Division I-A athletics; an important medical center; a vital traditional undergraduate experience; and strong regional campuses. This official must demonstrate a strong understanding of the role of an effective, credible media relations operation in maintaining public support and instituting a comprehensive institutional branding effort. A strong background in marketing and the ability to coordinate efforts in media relations, marketing, publications and web-based communications to support the branding effort are essential.

This official should have the demonstrated leadership ability and management experience that includes supervision of personnel and budgetary responsibility. This official should have strong interpersonal skills, including the ability to effectively work in teams to accomplish the university's communication objectives.

This official should have the demonstrated ability to design, implement, and evaluate communications strategies using appropriate technologies; disseminate information through media appropriate to the diverse and specialized audiences of a major research institution; analyze audiences and readership; determine key issues; evaluate and synthesize complex issues and ideas; and speak effectively, persuasively, and concisely under pressure.

Experience in, or direct knowledge of, a higher education research environment or similar organization is desired. The position requires a Bachelor's degree and a minimum of ten years' professional communications experience. Salary will be competitive and commensurate with experience.

ABOUT THE UNIVERSITY
The major campus of USF, in north Tampa, is at the hub of the Tampa Bay metro area. The campus covers 1,700 acres and houses more than 320 buildings. It is the site of the university's major library holdings, health science center, research facilities, central administration and the majority of USF's faculty and student body. Three regional campuses — USF St. Petersburg, USF Sarasota-Manatee and USF Lakeland — amplify USF's presence throughout West Central Florida.

ABOUT THE COMMUNITY
The Tampa Bay area, one of the nation's major media markets, is a multicultural metropolis offering a wealth of art and leisure activities, including a professional orchestra, performing arts centers, museums and major league sports teams. Among its natural attributes are hundreds of miles of beaches and an average annual temperature of 75 degrees.

APPLICATION PROCESS
Mail or fax cover letter, resume and three professional references to: ASSOCIATE VICE PRESIDENT Search Committee, c/o Sherry Forkel, University of South Florida, 4202 E. Fowler Avenue, ADM 254, Tampa, FL 33620-8500. Fax: (813) 974-2888.

Applications must be received no later than 5:00 PM, July 16, 2001. References will not be contacted until advanced stages of screening, and candidates will receive prior notification.

The State of Florida has a Public Records Law and all university searches are conducted under the terms there of. All meetings of the search committee are publicly announced and conducted. All documents submitted to the committee are treated as open material with the exception of evaluative documents specific to the performance of the faculty of the State University System of Florida concerning health or disabilities.

The University of South Florida is an equal opportunity, affirmative action, equal access institution. For disability accommodations, contact Sherry Forkel at (813) 974-4014 at least five working days in advance of need.

FINDING PERSPECTIVE,
ACCEPTING RESPONSIBILITY

Dr. José Hernandez is program coordinator for the McNair Scholars Program at the University of South Florida.

I could have been a high school dropout, a criminal, or someone marginalized by society. These are outcomes and expectations many people have for Hispanic-Americans, based on stereotypes. Growing up poor in Cuba, leaving my land of birth at age nine, I had no guarantees of what my life would bring. My parents had high expectations and did their best to ensure my success. I was fortunate that my family moved to Puerto Rico, where the people embraced me like one of their own. I was accepted and encouraged, particularly by my teachers. I attended the University of Puerto Rico my first year of college and left for the US, which I believed was the land of boundless freedom and opportunity.

On arrival, I was first struck by being labeled a “minority” student and by the perception that I was different and therefore not as capable. Puerto Rico and Cuba seemed like remote countries with very little in common with the US. But I was inquisitive and motivated. I managed to learn the ways of my new home and became acclimated and assimilated into the American way of life. Many people expressed respect for my hard work, praised my effort, and made me feel supported. In spite of many barriers, I completed undergraduate studies in psychology and graduate studies in counseling and education. I tried hard to understand myself and my place in the world. I felt a quiet resistance to total assimilation and held fast to my roots, deeply planted in my fertile Cuban spirit. I carry that wonderful Spanish tongue and the need for rhythm and passion, coffee and sea breeze, dominos, family, plantains and black beans.

The number of Hispanic-Americans swelled in the 1990s, and yet, as a group, many remain on the fringes of our society, struggling and trying to preserve our culture. I felt a responsibility to myself and to those who will follow. I found it was not enough to claim membership in the human race and be part of a fuzzy concept of a “unified and global culture.” I also began to question my role as an educator.

Since then, I have accepted the responsibility of being a cultural transmitter for my Hispanic culture, and that I should be more active in ensuring that we maintain our culture, and that our way of life encompasses all things Hispanic and American. I began to share my perspective through my teaching, my research, and student activities—not with loud and sounding voice, but one person at a time at every opportunity. I also recognized a responsibility to nurture our future Hispanic leaders at a very personal level—that my experiences could be shared in such a way as to decrease the barriers they will likely face in completing their education.

Most Hispanic undergraduates need information and assistance to maximize their options, particularly expanding their potential for a graduate education that could help them become scholars. I believe these students also need a more intrusive approach that reaches them in a real way. I make this effort because we need them to replace us and become leaders in a future that demands their scholarship and goodwill.

These future scholar-leaders might not come to accept the responsibility I have accepted. They all have unique missions to accomplish in a variety of disciplines. But every effort I make to ensure their success could have a ripple effect that would impact many people in the days ahead. If each of us would focus on developing a future generation of Hispanic scholar-leaders while they are still young, developing adults, then we could prepare them to strengthen their cultural understanding or, if abandoned, reclaim it.

We can begin by supporting their accomplishments and leading them to success through access to knowledge. Herein lies the real key to our future: preparing future Hispanic scholar-leaders to acquire the knowledge—not just information—that will lead them to the truth about themselves. All these activities require institutional support, programmatic and funding increases, and changes in how we nurture our future scholar-leaders.

In accepting this responsibility, we are saying yes to the challenge of developing a more thoughtful and caring generation of Hispanic American scholar-leaders.

The beginning, at least for me, has been in making a personal commitment to this goal.

New, Improved Visa Waiver Program

Governments aren't always open or forthcoming. Sometimes they develop a bunker mentality out of necessity and a need to be secretive. Some even become paranoid. They are also becoming much more conservative than many realize. Radical and revolutionary as they may be at the beginning, they bring with them their true-believing bureaucracies. Clearly, bureaucrats who believe in the mission are necessary to implement programs in a systematic fashion. But they tend to grow and expand year in and year out. As time goes by, they are less and less inclined to consider, much less accept, change. In short, it is also safe to conclude that those in power shrug chance and repudiate fresh ideas.

Visas

For centuries, nations have insisted on having non-citizens apply for visas before they could visit the country. There were valid security and other reasonable reasons. But there was also a downside. The restrictions and red tape were an impediment to progress, to free trade, to increasing tourism, and to fostering better relations.

During George Bush Sr's term in office, a pilot program was initiated at the State Department to make it easier and less cumbersome to visit the United States. The pilot program proved highly successful here and overseas, so much so that virtually everyone agreed last year that it should become a permanent part of the nation's foreign policy. Congress agreed. In the waning days of Clinton's administration, it presented him a bill to reform the nation's visa system. Clinton signed H.R. 3767, the Visa Waiver Permanent Program Act, into law. It has significance for many Hispanics here and those in their ancestral lands as well.

The new law, among other things, permits nationals of many countries to enter the United States for business and tourism without first obtaining a U.S. visa. That privilege is to be granted as long as U.S. citizens are granted similar privileges in the visitors' countries.

By facilitating travel, the Visa Waiver Program will help generate billions of dollars in tourist expenditures and business revenues for U.S. companies. At the same time, it will foster a feeling of openness and good will toward the U.S. Another consequence can be to create an understanding of who we are as a people by giving millions of citizens from participating countries an easier way to visit the U.S. The pilot Visa Waiver Program saved money as well. The Department of State was able to reallocate resources from issuing routine visas in low-risk waiver countries to doing more to combat fraud in high-risk countries.

The New Law

H.R. 3767 establishes new requirements that will strengthen the existing program. Provision will enhance America's security by requiring that within specified time frames, all foreign nationals entering the U.S. under the program have machine-readable passports. That type of passport is less susceptible to fraud and can help the Immigration and Naturalization Service track the entry and timely departure of foreign nationals.

For the hundreds of thousands of recently arrived Hispanics, the new law makes it easier for their family and friends to visit them in this country.

H.R. 3767 requires the attorney general to consult with the secretary of state prior to admitting a new country into the program. An element to be considered is the effect of the admission on the law enforcement and security interests of the U.S. Continual monitoring of those considerations with respect to all other countries in the program is also required. Finally, H.R. 3767 provides emergency procedures for terminating a country's participation. This could occur when the attorney general, in consultation with the secretary of state, determines that events in that country, such as a severe breakdown of law and order or economic collapse, would pose a threat to America's law enforcement or security interests.

This Act also includes immigration-related provisions that will further the Administration's objective of promoting the rapid and pro-competitive privatization of the International Telecommunications Satellite Organization (INTELSAT), a goal widely shared by INTELSAT member countries. Its salubrious encouragement of free and open discussion and travel will, many believe, foster democratic ideals as well.

By ensuring that the immigrant status of the current employees of this intergovernmental entity will not be adversely affected, the United States, a nation of immigrants and visitors, will affirm its commitment to a smooth privatization. Further, the way is opened to foster its desire to welcome a pro-competitively privatized INTELSAT as a valued U.S. corporate citizen.

Who says government cannot change? Beginning as a pilot program, the Visa Waiver Program was a great success. Building on that success, it has been expanded and formally institutionalized. Now, as a result of this legislation, it may not only be a better program, but it has become a permanent fixture of the nation's immigration system. It is also helping to reform the visa system worldwide.

One Washington-based academic has suggested that all new federal programs should follow the model of being a pilot program first before being formally institutionalized.

Dr. Mellander is a professor at George Mason University.
The debate over the use of the SAT is by no means winding down. Opinion is split among teachers, administrators, and students alike as they question the test's true function and usefulness. Some questions: Is it an IQ test? What does the SAT measure—aptitude, intelligence, and/or achievement? What does it test? Does it test the SAT equalize opportunity for the less privileged to access higher education?

A quick chronology on the evolution of the SAT: 1905, Alfred Benet invents the first IQ test; Robert Yerkes, a Harvard professor, administers the IQ test to nearly two million recruits during WWI in order to choose officer candidates and help build a record of statistical evidence: 1923-26 Carl Brigham has his own version of the IQ test given to first-year Princeton and Cooper Union applicants; The College Board puts Brigham in charge of developing a test, which becomes the SAT.

One of our features, entitled "Farewell to the SAT" presents various schools of thought regarding the test. Some of the points made include: how teachers are under pressure to teach to the test; how last year alone an estimated 150,000 students paid more than $100 million for test coaching; and how generally students of color perform lower than their White counterparts. While defenders of the SAT argue that it is "the only common yardstick," others believe that the SAT is misused. Richard Atkinson, president of the University of California, raises an important point, "...standardized tests can help the public assess the effectiveness of schools. The problem is overemphasis on tests that do not have a demonstrable relationship to the student's program of study." The SAT does not have such a relationship. The jury is still out on whether the SAT will become optional. It is a useful testing tool. But we need to take a closer look at how the results are applied, how much emphasis is placed on a student's performance, and how the scores are interpreted.

Also in this issue are stories on the recent Census data, ASPIRA, an AAUW report on the educational status of Latinas, and Florida Atlantic University. Future features will cover seeking a dream job online, Hispanic participation in advanced placement courses, y mucho más.

M. Salascent

Letters To HO

A Note of Disappointment

Congratulations on a successful magazine focusing on Latino issues. I am a subscriber and am always impressed by its content and message, however, I must express my disappointment in the Harvard University Honor Roll article.

As I read the article, specifically where you mention notable Harvard and Radcliffe alumni, you did not mention one single notable Latino. I couldn't believe that a publication that focuses on Latino issues could not mention (or find) a notable Latino alumni. It may seem like a petty, small detail, but for those of us in the field of education that try to motivate our Latino youth to attend colleges ranging from Santa Ana College to Cal State Los Angeles, to UC Irvine, to Stanford, this small, petty oversight does make a difference.

Keep up the good work but pay a bit more attention to detail as we move the Latino community forward.

Gracious,
Santana Ruiz

Dear Mr. Ruiz,

Thank you for making a point that is anything but petty.
Honor Roll author Roger Deitz, says: "Be assured we request such information from the colleges and universities. Sometimes these facts are easily forthcoming, other times much less so. We ultimately must work with the information the institution does (and does not) provide."

Do we care, as you do, when no Latinos and Latinas are listed? You bet. So does Roger. And your letter will inspire us all to try harder.

We also hope it inspires readers to encourage their institutions to take full advantage of the positive power of alumni as role models—especially those so often left out.

HO Editors

Pleased To See

I was pleased to see Dr. Theo Guerrero's picture on the front of The Hispanic Outlook magazine (May 21). His accomplishments are a testament to his perseverance, his talents, and his boundless energy to strive for higher goals. He has accomplished much at USC and rightfully deserves the accolades of his peers. We expect his future will be equally bright as he now accepts the responsibilities as President of Stephen F. Austin State University in Nacogdoches, Texas. USC will note his loss, but he will be a tremendous asset to SEASU.

I am glad to be counted among those who think highly of Dr. Guerrero.

R. Lynn Stevens
Regent, Stephen F. Austin State University
Emphasis on Engineers, Activism, Health Care

The Many Strengths of Florida Atlantic University

BY MICHELLE ADAM
Florida Atlantic University (FAU) is located in the southeast region of Florida, one of the fastest growing areas of the nation. The University and its seven campus locations in Palm Beach, Broward, and St. Lucie counties have seen an influx especially of Latinos. Many moved into the region after Hurricane Andrew. This change of demographics has resulted in a dramatic increase in the enrollment of Latinos, from 589 in 1987 to 2,380 in 2000. While the total population at the University has doubled, the number of Latinos has quadrupled.

Florida Atlantic has made a point of attracting further diversity to its campus, working directly with and for local communities where sizable populations of Latinos live. As one of Florida’s ten public universities, FAU boasts a 30 percent minority recruitment, topped only by Florida A&M, an historic Black college with 95 percent minority enrollment, and Florida International University with 69 percent. This is also a place where, within its various schools and departments, outreach and community service play a central role.

At FAU’s College of Engineering, where 109 percent of the students are Latino, outreach programs encourage the participation of young minority students and females, offering scholarships and opportunities to FAU to those interested. One of the most popular and successful outreach efforts has been through the Southeastern Consortium for Minors in Engineering (SECM), a national program whose primary goal is to increase the pool of under-served students completing postsecondary studies in math, science, engineering, and technology.

SECM is the largest pre-college alliance in the country, linking universities with school systems, industry, and government. FAU is one of many universities that offer summer programs in engineering, math, and science for SECM teams, which are established in the middle and high schools. At each member school, SECM teams are composed of principals, counselors, and teachers. These teams link up with the University for training and supervision in math, science, and technology, and in turn, incorporate this information into their own curricula, thus exposing students to the fundamentals for a career in engineering and the like.

FAU-SECM leads the nation in scholarships, program growth, and industry involvement, and provides 25 four-year full-tuition scholarships, more than any other participating university. It has grown from 10 Broward and Palm Beach County high school programs in 1988 to today’s 88 programs serving K-12 students. “We have increased the participation of females and minorities thanks to SECM,” said Sharon Schlossberg, director of student services for the division of engineering.

Schlossberg cited as a success story Patricia Díaz Veloso, a SECM scholar for four years. As a high school student, Veloso had participated in the University’s Technology Connection program, a summer offering in engineering and technology for high school and middle school students. Through her experience, she decided to become a computer engineer, and as a SECM scholar attended four years at FAU. Although Veloso got married at the end of her high school senior year and then worked forty hours a week while attending college, “she finished with accolades,” said Schlossberg.

Her single mother, a domestic who had saved money to bring her children to this country, raised Veloso. And now her daughter is working for Motorola, with a beginning salary close to $50,000. “She could not touch the earth. She was floating,” said Schlossberg about Veloso’s reaction to her job offer with Motorola after college. Today, Veloso’s sister is also studying at FAU to become a nurse.

Schlossberg, who has worked hard to bring opportunities to those students who would normally not pursue degrees in engineering, math, or science, has seen the number of Latino engineers in their program increase right in front of her. “I see a definite increase. I see many more women. I see many more Hispanics. These students coming in would not have thought of becoming an engineer due to lack of exposure. This program is raising the bar and the level of exposure, especially for Hispanic females,” she said. “Now they are not only coming through the pipeline but graduating college and going on to graduate school or contributing to the workforce.”

When Schlossberg arrived at FAU in 1989, there were only a handful of Latino students. Due to their small numbers, they joined the African American engineering club at times. “Now we even have a Society of Hispanic Professional Engineers because there is a popu-
lation that merits it," she said. These students attend conferences and network with others across the country. "These kids are dynamite," said Schlossberg. "I see these students who are now coming in better prepared. Because of SECME, students are so much better prepared for what is in front of them."

Having been a counselor in high schools for many years prior to FAU, Schlossberg is all too familiar with the low expectations placed on minorities and women when it comes to math, engineering, and science. But with programs such as SECME and others through FAU, the success stories abound. "We are doing more outreach. Kids are exposed to more through our summer programs," said Schlossberg.

Hernando Nieto is one such student. Through his middle school SECME program, he was introduced to technology through Technology Connection, a popular summer offering at FAU that drew more than 1,100 middle and high school students during 15 years. Although today the program is no longer offered, it was through Technology Connection that he became inspired and eventually received a SECME scholarship to attend FAU as an ocean engineering student. The son of a night watchman, Nieto will be a senior in the upcoming year and is also currently in the school's STEP program.

Students To Engineering Practice (STEP) is a new College of Engineering and National Science Foundation partnership that offers $2,500 annual scholarships, academic support, and professional development for 30 students with financial need during their last two years of school. Schlossberg described the group of students receiving these scholarships as ethnically diverse. She chose to specifically support these students in their last two years because, as she put it, "We have had people in the pipeline, but they weren't coming out fast enough.

Many bad jobs and money problems, and in some cases, they were throwing in the towel."

Schlossberg is proud of the large number of outreach programs offered through the College of Engineering, many more than have been listed here. However, the purpose of the programs is much the same. Many of them, she said, "have gained both local and rational acclaim because of their effectiveness and their focus on recruiting students whose ethnicity is underrepresented in the field of engineering. We are getting more and more native students. Diversity is our goal."

College of Nursing

For FAU's College of Nursing, community outreach has also become central to its mission. Dr. Marilyn Parker, professor of nursing and director of the Center for Innovation in School and Community Well-Being, explained the beginning stages of their outreach work.

"Nurses over history have gone to underserved areas and into places where other people didn't want to go," said Parker, explaining her reason for establishing the Community Nursing Project in 1995. "I strongly believe that nursing faculty should try to demonstrate that nursing can be alive and well in the community. We should share our resources."

Parker arrived at FAU in 1988 and at that time sought out the funding necessary to create community centers that would demonstrate her nursing philosophy. In 1995, she and other nurses and students from the College began providing health and support services for migrant workers in the western part of Palm Beach County. They also offered assistance in five schools where there were multicultural and medically underserved populations, which consisted of a large number of Spanish-speaking children of farmworkers. "The work we demonstrated led the Palm Beach County Healthcare District to fund a nurse in every school," said Parker. The schools didn't have nurses prior to this.

Florida Atlantic University's College of Nursing Outreach programs help diverse populations in community health centers.

FAU's College of Nursing eventually established wellness centers in the schools, providing health care in the evenings to its students and their families. Three of their four main centers attract significant numbers of Latinos, with one center catering to 90 percent Latinos. The group conducts inquiry groups with many Latinos and others in the area to determine what their needs are and how to service them best. Beyond medical care, faculty members act as a bridge on behalf of individuals, documented and undocumented, in working with the state to find health insurance and more traditional coverage for those in need. "We have been great partners," said Parker. "If the people in the community need our help, we will help."

The nursing faculty brings diverse groups of children from the community centers to the campus and labs to open their eyes to the possibilities of higher education. "Our faculty has been committed to diversity," said Parker. Today,
approximately 8 percent of the 920 students in nursing are of Hispanic origin. The department is at least 25 percent minority. "It mirrors society," said Anne Boykin, dean of the College of Nursing. "As a university as a whole, we are very much seeing an increase in the Hispanic population," she said. During this past year, the College was awarded about $100,000 in scholarship money, of which 13 percent went to Hispanics. "We understand the importance of having Hispanic nurses. We are committed to that."

Activist Professor Campoverde

Within the department of sociology at FAU, Associate Sociology Professor Cecilia Campoverde is a noted figure for her work in the community, especially among Latinos at home and abroad. She came to FAU in 1989 with the awareness that there wasn't an agency present in the area to serve the needs of the Hispanic community. With a large population of Guatemalans having immigrated to the area, she established the Latin American Immigration and Refugee Organization, providing guidance to Latinos in the community. She created this organization shortly before obtaining her post at FAU.

"Agriculture and tourism are the top industries here, and the Latino community is key to their successes. But the lowest paid are the Guatemalan and Mexican farmworkers, maids, and restaurant workers" said Campoverde.

Campoverde has established multiple agencies and organizations on behalf of Latinos and other groups in the area since joining FAU. She formed the Guatemalan Center; the Guatemalan Maya Quetzal Organization; Reaching Potentials and Renaissance School, which trains children with autism; and the Migrant, Autism, and Social Work Fund, which helps students in need. Because of all of her contributions to the community, Campoverde was named one of the "Eckerd 100," through the Eckerd Salute to Woman program, from a field of 2,900 candidates.

Of her work, said Campoverde, the purpose is not charity. She sets up organizations and helps establish a structure, which is then upheld autonomously by those who hand from the University grounds and out into her community, FAU's Honors College, which opened its doors in 1999, has been attempting to draw diversity to its new campus. Currently, 7 percent of its students are Hispanic, and 19 percent, minority. Students from at least a dozen countries are represented as promising students. This holistic approach to the application process provides an opportunity to find strong minority students who might not be good test-takers.

"Everyone would like to have diversity, but then schools create strict enrollment standards," said Rosen. "I know that the Honors College did not want that to happen."

All Honors College students receive a merit-based scholarship of $2,000 to $5,000 every year with admission (tuition is $2,400 a year). Students who are National Merit Finalists, National Achievement Finalists, or National Hispanic Finalists are awarded $6,500 for each academic year. Currently, the Honors College has one National Hispanic Scholar Finalist and is expecting another two next year. Also, the Roberto Goizueta Family Foundation has agreed to fund scholarships for Hispanic Floridians to attend the Honors College this upcoming year.

"The challenge is to share the opportunities of the Honors College... Our challenge is getting the word out to attract a diverse group of students—and to keep our academic standards high," said Rosen.

By the year 2010, student enrollment at FAU is expected to reach 46,000, double what it is now. Given the demographics of Florida, Hispanics will surely play a large role in this increase.
A Farewell to

Praiseworthy More Holistic Approach at UC, UT-Austin, CUNY

Enrolling more than 100,000 undergrads, UC is the largest user of the SAT I.

According
1. TORPID : SLUGGISH ::
   (A) wrong : illogical
   (B) complex : intricate
   (C) apathetic : indifferent
   (D) merry : morose
   (E) emphatic : fervent

2. DOGGEREL : VERSE ::
   (A) animation : cine
   (B) verse : melod
   (C) burlesque : drama
   (D) chisel : sculptor
   (E) headline : article

Sentence Completion
3. Some critics described the photographer's work as ____, citing his obvious ____, of the work of his renowned predecessors.
   (A) distinctive . . assimilation
   (B) sycophantic . . dismissal
   (C) derivative . . adaptation
   (D) controversial . . veneration
   (E) pedantic . . ignorance

4. The essay was both ____ and ____: although concise, it was profoundly moving.
   (A) meandering . . denigrating
   (B) compact . . enervating
   (C) fictional . . touching
   (D) argumentative . . rationalistic
   (E) terse . . poignant

Math
5. The diagram above represents six building lots along a street. There are no other residential sites in the area. Five families—v, w, x, y, and z—are each interested in purchasing a lot.
   (A) y and z will occupy lot 6.
   (B) y and x will live on different sides of the street.
   (C) w and x will live on the same side of the street, and x will be the only next-door neighbor that w has.

   One lot will remain unsold.

If all five families purchased lots and fulfilled all the restrictions, which of the following pairs of lots could be the ones purchased by y and z?

   (A) 1 and 2
   (B) 1 and 3
   (C) 2 and 3

6. On a number line, point A has coordinate -3 and point C has coordinate 12. Point D is half way from A to B. What is the coordinate of point D?

   (A) -1
   (B) 2
   (C) 6

7. When tossed in the air, a coin is equally as likely to land with heads up as it is with tails up. The coin is to be tossed 98 times.
   (A) tails up on the second toss
   (B) if the relationship cannot be determined from the information given
   (C) heads up on the second toss

8. Chairs number 9, 19, 29, 39, 49, and 59 will be checked, with every fifth chair not checked. If 67 chairs were checked, how many of them were not checked by two inspectors?
an extensive cover story, "The SATs, Why Some Colleges are Junking Them."

Why does Atkinson exert so much influence? For one, enrolling more than 100,000 undergraduates, UC is the largest user of the SAT I. Perhaps, more importantly, Atkinson's reputation as a cognitive psychologist and his previous post at the College Board, the organization that administers the test, add authority to his opinion. In addition, his premise that the SAT I is misused in this country is indisputable by supporters and adversaries of the test.

Atkinson's words packed a strong punch, especially when he described how SAT mania extends beyond students: "Teachers are under pressure to 'teach to the test.' College admissions officers are under pressure to increase the SAT scores of each entering class, which affect college rankings. Some universities have been known to manipulate—and indeed falsify—SAT scores. Some affluent parents have been known to shop around for a psychologist willing to certify that their child is learning disabled. This would qualify them to have extra time on the test. Last year alone, an estimated 150,000 students paid more than $100 million for test coaching."

Even Gaston Caperton, president of The College Board, concedes that "there is a tendency to overemphasize The College Board's SAT, and all other admission tests." He adds, "I welcome the opportunity to join forces with educators to curb this growing obsession."

Nevertheless, Caperton defends the value of the SAT I. "Not only does it incorporate the highest standards of what is required for success in our nation's most demanding colleges," he says, "but it is the only common yardstick in an era of grade inflation, and where students complete different courses with different teachers who use different grading standards."

Indeed, the common yardstick metaphor is one of the strongest and most popular arguments in favor of the SAT I. But Atkinson's plan is not inconsistent with this theory. He insists that he is not against standardized tests, per se. "Developed properly and used responsibly, standardized tests can help students gauge their progress and help the public assess the effectiveness of schools," he says. "The problem is overemphasis on text, to apply math concepts, to read critically, and to make inferences based on partial data."

Cámara adds that the SAT I is the best predictor of college grades and graduation rates. Atkinson disputes this claim, however, saying that high school grades are by far the best predictor of first-year college performance.

Moreover, according to Atkinson, the SAT II is a better predictor of performance than the SAT

```
About 280 of the nation's 2,083 four-year colleges and universities make the SAT optional for some or all applicants, including Mount Holyoke, Bowdoin, Bates, Bard, and Connecticut.
```

"It's considered to be a predictor of success," González says, "as opposed to a test of specific skills that have to be taught. A better predictor of success is a child's work ethic," he says. "Even in a crummy school, it demonstrates the ability to learn and to maneuver in the school system."

Undoubtedly, many consider SAT scores a determinant of merit, indicating which of the nation's students deserve to attend the top institutions of higher learning. But who would agree with the equation that higher-order reasoning skills are equivalent to merit?

According to Atkinson, this presumption is not compatible with the American tenet that achievement should be what matters most. "Students should be judged on what they have accomplished during four years of high school, taking into account their opportunities," he says.

The Race Question

While critics have long argued that the SAT I is inherently biased against Blacks and Latinos, Atkinson has another theory. He blames the disjunction between what students are being taught and what is actually tested in the SAT I.

It cannot simply be said, as defenders of the test have tried, that the lower performance reflects the fact that these groups are clustered in poor schools, Atkinson says. Instead, "the real basis of concern [of minority community leaders] is that they have no way of knowing what the SAT measures and, therefore, have no basis for assessing their fairness—or helping their children acquire the skills to do better."

But The College Board stands up for itself, calling the SAT I the most researched test in history. It assures that it is constantly studied and revised to detect and eliminate potentially discriminatory questions.

González says he is, and believes everyone should be, weary of the College Board's claims of fairness. "It engenders some genuine skepti-
cism," he says.

Stanford psychologist Claude Steele has yet another assessment of the racial question. Research has shown that even when economic disparities disappear, Blacks and Latinos score lower than their White and Asian peers.

Steele says minorities encounter test-taking stress. He explains that precisely because they fear that they will confirm the stereotype about their poorer performance, they do.

On the other hand, Louise Mirrer, executive vice chancellor of the City University of New York (CUNY), says that the SAT I requirement, which they established only two years ago, has worked favorably for minorities.

CUNY is very diverse and enrolls students from the lower segment of the socioeconomic spectrum, she says. "For us," she adds, the SAT "is a way of motivating high school students, just like kids in the suburbs, to start thinking about college earlier."

The reason for implementing the requirement, Mirrer explains, is that the school was "trying to expand the number of credentials that a student presented, so that, for example, a student who did not do well in high school but had high scores on his SATs could be accepted.

"It's important for us to give students as many opportunities as possible," she says. "It's one measure among a number of predictors."

CUNY also factors in the results of New York's Regents exams, subject tests comparable to the SAT IIs, but which, according to Mirrer, are aligned with the state's high school curriculum. CUNY does not use a cutoff SAT score to reduce its applicant pool, but she affirms that the test is useful.

The SAT I, in combination with other factors, is a good predictor of a student's grade point average in the first year of college," she says, "which is crucial because if students are not successful in their first year, they won't be retained."

The Holistic Alternative

CUNY's system, by factoring in many variables, begins to approximate what many consider the only fair college admissions method: the holistic one.

Agustin Garza, admissions deputy director at the University of Texas at Austin, strongly advocates this approach. Today, under Texas law, his university must grant admission to all Texas students who graduate in the top 10 percent of their class.

But Garza says the University had completely revamped its admissions procedure before this law was passed. For many years, UT-Austin's admissions criteria could be found in a simple chart, based solely on test scores, GPA, and other easily measurable conditions.

The University decided to eliminate the one-dimensional "sliding scale," and began to require applicants to submit essays and a detailed activities résumé, in addition to the black-and-white data.

While admittedly time consuming, Garza says it was definitely worth it. "It was the first time we got a look at the whole student," he says. UT now uses this holistic method to evaluate those applicants who are not ranked in the top 10 percent of their class.

Garza says he looks forward to an assessment instrument that tells you about the whole individual. "But even then," he says, "you can't measure attitude or motivation, or what students are willing to do for their family, their high school, their culture, and to improve things around them."
University at Albany

Ambitious Goals, Extraordinary Progress

BY ROGER A. DEITZ

The Middle States Commission of Higher Education reaccredited the University at Albany, State University of New York in 2000. Following a full-scale review, the report concluded, "The University at Albany has made extraordinary progress in becoming a nationally recognized research university and is well positioned to achieve its ambitious goals."

University at Albany President Karen R. Hitchcock says this "positive report by a distinguished team of outside evaluators was a welcome affirmation of the remarkable progress made by this University in the decade since its last accreditation."

"It was no coincidence," says Hitchcock, "that even as the Middle States evaluation was under way, the University was enrolling a record number of high-achieving students in the class of 2,200 freshmen who entered in September 2000." The University had attracted 16,500 freshmen applications, the most in the State University system, for that class.

The president reports there was yet another affirmation of the quality of the institution's academic programs. Gov. George Pataki, Senate Majority Leader Joseph Bruno, Assembly Speaker Sheldon Silver and other state leaders came to campus last year to announce state support for the construction of a new wing of the Center for Environmental Sciences and Technology Management (CESTM). The expansion will house a $55 million, 300-millimeter wafer prototyping and workforce training facility, which will position the University at the leading edge of research and development in microelectronics. The president states, "Thanks to the support of governmental and corporate partners both for CESTM and for our one-of-a-kind biotechnology center at our East Campus, we are creating distinctive opportunities for faculty and students, and advancing the economic vitality of the region."
The president notes that current demographics, economic and geopolitical forces are “requiring nothing short of transformation in our nation’s institutions of higher education.” She stresses, “Engagement—interactive, collaborative and innovative engagement—is essential to achieving the required transformations.”

On the issue of diversity, Hitchcock adds, “We are strongly committed to providing first-rate, student-centered learning experiences to students who reflect the rich diversity of this state. Here at Albany, our Latino students are leaders in the community and in the classroom. Scholars in the best tradition, they are talented, capable, diligent, and resourceful, and we are very grateful for the wonderful things our Latino students do—for as here at the University and for the entire nation.”

UAlbany enjoys a “wonderfully diverse” student body with 24 percent of last year’s entering population coming from a multicultural background. This past year approximately 9,220 freshmen (56 percent of first-year applicants) were offered admission. A total of 2,300 freshmen from 21 states and 20 foreign countries started classes in September. More than 80 percent of the new students were ranked in the top two-fifths of their high school class, and the middle 50 percent of the entering class scored between 1100 and 1250 on the SAT-I exam.

Hispanic American students number 737, including 347 traditional and nine non-degree students. Those admitted through the Minority Recruitment Program number 207. Another 174 were admitted through the Educational Opportunity Program.
to earn both in five years. In addition, there are a number of joint degree programs with institutions such as Albany Medical College, Boston University Goldman School of Dental Medicine, Albany Law School, R.P.I., and Clarkson University.

UAlbany is ranked 17th in the nation among public research universities in The Rise of American Research Universities, published by Johns Hopkins Press. The University has many nationally recognized programs. Four of its Rockefeller College programs are among the best, according to U.S. News and World Report. They are Criminal Justice #3; Social Welfare #3; Public Administration #11; and Information Science and Policy #15. Other disciplines ranked best in the nation by U.S. News are Public Finance and Budget #7; Clinical Psychology #20; Sociology #21; and Education #49. The Management Information Systems program has been ranked in the Top 10 in the nation by a Computeworld poll of corporate recruiters.

The excellence of the school's faculty is confirmed through numerous awards and grants. In the 1997-98 fiscal year the University received nearly $123 million in total research funding. There are 920 faculty members and staff numbers 4,405.

Established in 1844, the University at Albany is the oldest state-chartered institution of public higher education in New York. Designated as a University Center of the State University of New York in 1962, UAlbany has a broad mission of undergraduate and graduate education, research, and public service. A plus for students is that the Capital Region is a great college community. It is home to 18 colleges and some 65,000 students, creating a greater student population density than that of Boston. The Pepsi Arena in downtown Albany hosts American Hockey League games and concerts by artists such as Elton John and The Dave Matthews Band. Downtown Albany is also host to many plays and musical performances, and students may visit the New York State Museum. In less than two hours, one can access great downhill skiing on some of the best slopes in the Adirondacks, the Berkshires, the Green Mountains, or the Catskills. For hiking and camping, there is Adirondack Park, the largest natural area in the United States. And, for study or recreation, Albany is a short drive from New York City, Boston, or Montreal.

UAlbany competes at the NCAA Division I intercollegiate athletics level. It offers men's and women's basketball, cross country, lacrosse, soccer, and indoor and outdoor track as well as baseball, football, softball, volleyball, and women's field hockey, golf, and tennis. More than 6,000 students compete in intramural sports, as well as recreational and club sports.

Because of UAlbany's reputation and location in the capital of New York State, internships abound with state and federal agencies, public interest and lobbying groups, health care organizations, businesses and financial institutions, professional sports teams, and the communications media. In addition, a Washington Semester offers an opportunity for "hands-on" experience and practical insights into the world of federal government. There are 277 student groups and organizations, including 43 social fraternities and sororities and 12 sports clubs at the University. UAlbany students also contribute more than 50,000 hours of community service through public and private agencies.

With UAlbany's Study Abroad opportunities, students can take advantage of more than 300 international programs in 50 countries. Project Renaissance is an innovative approach to the first year that combines the advantages of a small college environment with the opportunities found at a major research university. The Presidential Scholars program is a way of recognizing and nurturing outstanding students. Throughout their four years at Albany, Presidential Scholars study together as well as receive scholarships, special housing, and other benefits.

The Institute is said to have the largest group of full-time Mesoamericanists of any institution north of Mexico.

The Center for Latino, Latin American, and Caribbean Studies (CELAC) was established in 1984 as a "structured mechanism for focusing collective expertise and collaborative research and development efforts, and for providing dissemination and resource services to the public, pertinent to these regions." The Center provides an internal focus for the work of numerous departments and scholars, and brings together specialists on Latin America and the Caribbean and their corresponding U.S. Latino populations, from a wide variety of disciplines.

The Institute for Mesoamerican Studies (IMS) is a nonprofit educational research institute dedicated to the study and dissemination of knowledge concerning the peoples and cultures of Mesoamerica (Mexico and northern Central America). IMS serves to organize and coordinate the work of the Mesoamericanist faculty at UAlbany. The Institute is said to have the largest group of full-time Mesoamericanists of any institution north of Mexico. Members of IMS are among the most prominent scholars in the field of Mesoamerican anthropology. The primary activities of IMS are research and publication.

UAlbany's Department of Latin American and Caribbean Studies (LACS) offers a Ph.D. track in Latin American, Caribbean, and U.S. Cultural Studies. The program leading to the Doctor of Philosophy degree in Spanish, with a specialty track in Latin American, Caribbean, and U.S. Latino Cultural Studies, requires 60 credits. This new specialty is administered by the Department of Latin American and Caribbean Studies (LACS), in collaboration with the Hispanic Studies Program of the Department of Modern Languages and Cultures. The program's originality lies in the integration of area ethnic studies within a disciplinary framework that includes the humanities as well as the social sciences, and is therefore different than conventional language and literature programs.
Creating the Will

"The Money Comes with the Will"

By Jeff Simmons

Hispanics Achieving Educational Excellence

President's Advisory Commission on Educational Excellence for Hispanic Americans
While some viewed the 75-page report as a roadmap, others saw it as a rehash of previous reports. And still others, a study guide. But what its authors hoped more than anything was that it would be perceived as a call to action.

Released last year, *Creating the Will* was crafted to inspire everyone from parents to top public officials to get off the couch and aggressively work to improve educational opportunities for Hispanics.

“Our mission was to really create a will, the political will, the individual will, the community will, the organizational will, to make substantive change, given the condition of Hispanics in education,” says Deborah Santiago, former deputy director of the White House Initiative.

“That was the gelling of it. We know what’s working; we know what’s not. So we wanted to bring things to scale and wanted to get people to pay attention.

“It’s not rocket science,” she admits. “It’s not a magic bullet for every sector. But different organizations, groups, and educators can pull out specific components.”

The report is a decade in the making. Its foundation was laid under former President George Bush, who signed an executive order in 1990 to focus on improving educational opportunities for Hispanics. Four years later, Bill Clinton signed a follow-up order establishing the President’s Advisory Commission on Educational Excellence for Hispanic Americans. Soon after, the commission released *Our Nation on the Faultline: Hispanic American Education*.

That report characterized the alarming growth of Hispanics in America and shed a harsh light on shortcomings in the educational system. Commission members hoped it would prod legislators and policymakers to enact swift improvements. But, commissioners say, that was not a fluid process. Some steps were taken, but organizers describe them as piecemeal, effective on some levels but absent of sweeping reforms. That sense is summed up early in *Creating the Will*, when the authors note: “The concerted national action necessary to raise this level of educational achievement has not materialized…. Much has been accomplished, but there is still much to do.”

On the heels of the report came a shift in party dominance in the White House, one that has commissioners worried that a new panel of experts will attempt to “reinvent the wheel.”

“For us, the content was not purely political,” Santiago says. “We want the new administration to know they don’t have to take time to reinvent the wheel. I’m hopeful the new administration will move forward, and there are signs it will do so. I know they definitely won’t ignore the Latino population.”

---

**ENLACE**
**ENGAGING LATINO COMMUNITIES FOR EDUCATION**
**INITIATIVE—W.K. KELLOGG FOUNDATION**
**(Nationwide)**

ENLACE is derived from the Spanish word “enlazar,” which means to link or to weave together. ENLACE is a new initiative focused on assisting communities to strengthen the educational pipeline for Hispanic youth. Through ENLACE, participating colleges and universities will form partnerships with communities, K-12 public and private schools, and businesses. These partnerships will give Hispanic students the support they need to succeed from kindergarten through high school and beyond.

The three key components of ENLACE are: a common vision of a brighter future for Latino youth; collaborative work in coalitions; and a focus on strengthening public school-university-community partnerships.

Planning grants were awarded to 18 colleges and universities to continue their work to improve higher education opportunities for Hispanic youth under Phase I of the Kellogg Foundation’s six-year, $28.7 million ENLACE initiative. Under Phase II, 8-10 partnerships will be selected for multi-year funding with priority given to coalitions that bring together diverse organizations who pool their resources to design long-term community and institutional structures to impact system change. The last phase of the initiative will focus on disseminating the impact of the efforts, as well as institutionalization and sustainability of the vehicles of success.

---

Added Commission chair Guillermo Linares: “The new administration realizes that we cannot afford to wait any longer, and we have to build on the work that was started by the Bush administration in 1990 and continued in the eight years of the Clinton administration.”

The Commission’s first report presented a multifaceted list of recommendations, and its follow-up report builds upon that. The Commission set a number of standards in its plan of action but had one key goal: to raise the academic performance of Hispanic students to the same level of achievement of other students by the year 2010.

Commission members reason that what is needed is a coordinated effort to achieve that goal, and that responsibility lies with everyone: from parents to teachers to community groups to politicians. All sectors, they say, have a vested interest in aiding Hispanic youth.

“It sends a very powerful message of concern, a very strong message of concern to the leadership of the country, both in the public and private sectors, that the nation needs to pay attention to this and make a commitment to bring the level of academic performance of Latinos to the same level of other groups in the next few years,” Linares says.

“The time has come for the country to realize that we have neglected the assets that immigrant families bring to this country. We need to be attuned to cultural diversity.”

“Creating the Will” identifies people, pro-
grams, and strategies from across the United States that supported higher standards and higher performance for Hispanic students. Spanning the entire educational tier, it provides workable options to improve achievement. And it bases its conclusions on the hard realities facing many Hispanic students in the U.S.

One-third of Hispanics in the United States are under 18, and about 15 percent are enrolled in kindergarten through 12th grade. By 2015, Hispanics will be the largest minority in the states, and, by 2050, will represent a quarter of the population. But educational achievement is lagging. According to the report, only 55 percent of Hispanics 25 or older have completed high school or more. This is considerably lower than the 84 percent of Whites and 76 percent of Blacks [25 or older] who have done the same.

Eleven percent of Hispanics attained a bachelor’s degree or more, compared with 25 percent of Whites and nearly 15 percent of Blacks. Hispanics have a 62 percent high school completion rate, and, at 30 percent, the dropout rate is high.

“...The main challenge is that, for a number of reasons, Latinos are way below in academic achievement when compared to other groups,” Linares says. “Whites and African Americans are faring much better academically.” But, the commissioners note, there have been signs of progress, slow but steady. Hispanic high school students earned more credits in computer science, foreign languages, and English than any other group.

Hispanic enrollment and completion have increased over the last two decades. Hispanics now comprise 15 percent of the traditional college-age population, and 11 percent of the post-secondary population. And from 1976 to 1996, Hispanics doubled their enrollment in graduate education, from 2 to 4 percent. They now represent about eight percent of first-year professional students. But, there are also signs of concern. On average, Hispanic students still take longer to graduate and do not complete college at the same rates, and they tend to be concentrated in key states, such as Texas, California, and New York.

“We are nowhere where we need to be,” Santiago says. “We are better off than where we were. Fundamentally, if you look at every single level of education and educator, we are not where we can be, and we should always strive to be.”

Commissioners lay blame for the disparity in academic performance at a number of doorsteps. They cite low expectations of school personnel, poorly trained teachers and administrators, poverty, lack of involvement by parents, and the practice of tracking Hispanics into non-academic classes. Compounding these problems is a worsening teacher shortage, tougher demands for accountability, stepped-up standards, and the pressing need to advance technology in the classrooms.

“We cannot afford to continue at the same pace. We need to multiply the volume of Latino students accessing higher education. Otherwise, it would be detrimental to the country,” Linares says.

Acknowledging the weaknesses and strengths, the report’s authors take readers—whether parents, politicians, or educators—through the educational gauntlet, starting with early childhood education and reaching graduate and professional education.

In Closing the Gap, which focuses on undergraduate education in America, the authors note that steeper members of Hispanics are stepping into college classrooms these days. But, too often, those successes are eclipsed by their high school dropout rate.

Hispanics comprise 14.5 percent—or 36 million—of the total traditional college-age population (between ages 18 and 24). Hispanic enrollment in undergraduate education rose by nearly 50 percent in just six years to 1.3 million in 1996. Community colleges enroll about half of all Hispanic students in undergraduate education. That information should be enough to prompt a closer look by educators in that many Hispanics sway toward community colleges because of their proximity.

“The feeder pattern is unlike any other ethnic group,” Santiago says. “They go to colleges close to where they attended kindergarten through 12th grade.”

“There are meaningful ways to reach these kids, and I don’t think a lot of people look at that. We are used to looking at it from a broader perspective.”

More than 50 percent of Hispanics are enrolled in higher education in California and Texas, and nearly 75 percent in those two states and New York, Florida, and Illinois.

Commissioners say the bottom line is that all sectors must work so that students can succeed in college. Parents, for instance, should discuss college early on with kids, become knowledgeable about financial aid, and ask students about their career goals.

Commissioners arranged six conferences in a year and a half to focus on parents and children as they headed toward college. They discussed what they needed to know and what parents could do to
give their children a supportive boost. "The parents are a child's first teacher, so we wanted to reach out to the parents. For us, that was a critical component," says Santiago, who is now vice president for data and policy analysis at the Los Angeles County Alliance for Student Achievement. "They thought they were advisors to the president, but their mission was to advise Latinos throughout the country. They felt parents were a large part of who we represent."

"We wanted to address parents in a meaningful way," she says. "They are not things that are very difficult, but you'd be amazed without enumerating them how many people wouldn't think of them."

Commissioners recommend that colleges and universities offer first-year Hispanic students training in study skills and academic procedures, expand admissions recruitment into high schools with large Hispanic populations, offer information to parents of Hispanic middle-school students, and disseminate admissions materials in Spanish. They also suggest that campus officials study why Hispanic students drop out of college, diversify their faculty, and improve the transition between community colleges and four-year institutions.

"The intent of the report was to give folks some answers," says Juliet Garcia, president of the University of Texas at Brownsville, "and not just report the problems associated with reaching parity for Hispanics in the United States."

"The whole notion of the title is its focus. We know what works. We know which programs work. We know where to put the money when it's available and how to apply those resources. What's often lacking is simply the will to focus on the issue of getting more Hispanics successfully through the system."

That responsibility also lies with community-based organizations. The commissioners suggest they advocate college attendance, facilitate mentorships and internships, organize SAT preparation courses, form "Adopt-A-Student," recognition, and after-school programs.

Additionally, the private sector should share some of that weight. Its leaders should partner with local colleges and Hispanic Serving Institutions, found scholarships, encourage employers to finish post-secondary education, and recruit Hispanic college students for both regular and summer jobs.

"This requires a commitment on all levels and with all of the stakeholders," Linares says. "The stakeholders are major corporations in this country. The leadership of the three levels of government, and, in particular, local leadership must play leadership roles."

Linares, a city councilman in New York City, says politicians also must understand their responsibility. "We need to redefine our perspective—to formulate policies that allow us to capture the assets that this diverse population brings," he says. "Latinos represent the new atmosphere in the country. We bring dimensions that can articulate us as new Americans."

The commissioners say elected officials must do a better job of distributing information on effective programs, and helping communities and school districts collaborate to improve achievement. They should also increase the pool of available financial aid.

"What I am talking about is putting our resources to focus on these issues," adds Garcia. "I've seen many reports that have raised issues similar to the ones we've raised, but there hasn't been a will. The money comes with the will."

The number of Hispanic students who go on to graduate and professional education may have grown, but not by much. In the chapter, "Influencing the Future," commissioners note the dearth of Hispanics in many fields. Hispanics are woefully underrepresented in engineering, mathematics, and computer and physical science. In 1995-1996, 7 percent of all first-professionals were Hispanic, 6 percent were Black, and 76 percent were White. In 1996, Hispanics earned 4 percent of all master's degrees and 2 percent of all doctoral degrees awarded in the United States.

The result of these low numbers: few Hispanics move into faculty and administrative positions in the nation's colleges and universities. In 1992, Hispanics represented less than three percent of full-time instructional faculty and staff in higher education. This, commissioners say, did not change substantially by 1998. They fault inadequate financial support, low levels of mentoring, and low expectations of Hispanics attaining graduate education. Again, commissioners diverge in their suggestions, indicating that parents should offer more support to their children and learn about the benefits of graduate and professional education.

Colleges and universities should set tangible goals to improve graduation rates in undergraduate education, and develop combined baccalaureate and master's degree programs. They should target outreach to Hispanic students and foster diversity on campus. And they should develop a faculty development program that targets Hispanics.

Community-based organizations should sponsor leadership training for Hispanic graduate students and include graduate and professional education in their organizational agendas. And the private sector should establish fellowships and internships for graduate students.

Garcia hopes the report will help each sector see the problems—and solutions—from a fresh perspective.

"I don't think we thought it was a serious enough problem," she says. "I think we thought it was a minority issue: whoever was the minority had to pull themselves up from their own bootstraps and work harder to get smarter."

"We know that's not the case. We know that while we understand everyone has to do his or her part, there's much more than self-intent in mind. The interest is the common good of the country. It is the quality of our nation's economic health and wealth that is now at stake."

"There needs to be a sense of urgency on this issue now, and that's what we are talking about."
The Educational Status of Latinas

¡Sí, Se Puede! Yes, We Can

by Maria Villar

Earlier this year, the American Association of University Women Educational Foundation published ¡Sí, Se Puede! Yes, We Can. Latinas in School, a report by Angela Ginorio and Michelle Huston.

Introduction

Where do we learn what we can be? How do such understandings affect our aspirations and accomplishments? This is the main focus of ¡Sí, Se Puede! Yes, We Can, a comprehensive report on the educational status of Latinas, ¡Sí, Se Puede! explores the social contexts in which Latina students develop a sense of self and perceptions of future options. It contends that Latinas learn of their possibilities in communities that share different cultural outlooks and opportunity structures—families, schools and peers. To foster Latinas' educational accomplishments, the report concludes that schools must recognize value conflicts and provide more support and encouragement to students. Yes, we can, if schools capitalize on Latinas' cultural strengths and resources.

¡Sí, Se Puede! presents a complex array of data on Latinas in school. As the authors clearly state, our understanding of Latinas' educational trends is partial. Measures of educational progress are not always disaggregated by ethnicity and sex, or by variables known to affect educational processes (e.g. socioeconomic class, immigration status, country of origin, racial traits). Comparisons between (gender, ethnic, and racial) groups are complicated by differences in analytical units, research settings, and methodological approaches. Continuing population flows make the long-term analyses of the Latino student body virtually impossible. Given such confounding factors, I will concentrate on highlighting broader educational trends and synthesizing the authors' main arguments and recommendations. I will close with a few personal remarks stressing the role of families and include several quotes from Latina students at William Paterson University (N.J.) that support central arguments.

Latinas in School: Trends, Arguments, & Recommendations

What do we know about Latinas in school?

What can we infer from studies on their educational achievements?

Ginorio's and Huston's review of educational outcomes shows that our knowledge about Latina students can not be generalized. We must infer educational trends during the 1990s from sources that rarely focus on similar populations or variables. Within this scenario, we can discern three broad trends.

Latinis and Latina students, as a whole, lag behind other groups in most measures of educational success. Latinis/as are at greater risk of leaving school and leave school earlier than any other group, even when controlling for immigration and generational status. They are overrepresented in remedial math and Limited English Proficiency programs; underrepresented in advanced placement courses, college-preparatory, and gifted-education programs; and less likely to take core curriculum conducive to college enrollment. By the time they enter high school, nearly one-third of the Latino students do not know what kind of program they will enroll in. Latinos have lower grades than their peers even after controlling for social class. By age thirteen, according to National Assessment of Educational Progress exams (NAEP), they are two years behind White students in mathematics and science. Yet, Latinas completing high school are as likely as other graduates to pursue college studies (60 percent continue). Most enroll in two-year institutions and cluster in specific community colleges.

Latinas outperform their male counterparts in some educational measures but not others. They drop out from school at slightly lower rates than boys but are less likely to persist after 9th grade or complete school once they leave. They take more standardized tests and persistently do better in NAEP exams than boys, but they score lower on both the math and verbal sections of the Scholastic Aptitude Test (SAT). Latinas have higher grades than Latinos in 9th grade and college. They complete more associate's, bachelor's, and master's degrees but less doctoral and professional degrees than Latinos. They are less likely to attend college on a full-time basis than
males, and more likely to join languages, health sciences, psychology, and education programs.

Latinas lag behind other female groups in most measures of educational progress. They are the least likely group of women to graduate from high school or complete a bachelor's degree. They are less frequently enrolled in college-preparatory tracks; take less advanced placements exams and standardized tests; have lower grades in school and lower scores in tests than their White peers. They are suspended from school at higher rates than White girls, but they are less likely to be diagnosed as SED (seriously emotionally disturbed) or SLD (specific learning disabled). Latinas are more likely to report gangs and to feel unsafe at schools. They have higher pregnancy rates than any other teen group and are as likely to engage in risky behaviors—sexual activity, using alcohol, drugs, and weapons—as their White peers. Their involvement in risky behavioral patterns is growing in contrast to their White classmates.

How can we explain the educational outcomes of Latinas?

What factors influence their achievements in school?

Ginorio and Huston believe that class resources and value conflicts between families, schools, and peers are central to understanding the educational achievements of Latinas.

**Latino families face class barriers that hinder the educational attainments of their children**. Low-income parents do not have resources to pay for study facilities or better educational opportunities. They depend on their children for taking care of relatives and younger siblings, doing household chores, and communicating in English. Migrant families do not have the support networks associated with permanent settlement and stable school enrollment. Low-income Latino parents with little or no education lack knowledge of (and experience with) school systems. They cannot help with assignments, talk about studies with children, or discuss remedial programs and tracking options with teachers. They may not recognize the importance of time for study and extra-curricular activities, or realize that academic achievement involves more than the acquisition of English. Low-income Latino families value education ideals and want their children to excel in school, but they lack class resources to mobilize on behalf of their children.

**Latino families face cultural barriers that hinder the educational attainments of their children**. The Anglo-American school system values assertiveness, independence, and competitiveness. Latino families value respect for authority, commitment to family, female nurturing, and domesticity. Latino parents approach the educational system with distrust and ambivalence; they restrain from participating in schools and using pre-school programs. They place more value on marriage and motherhood than on educational accomplishments; discourage daughters from pursuing postsecondary studies in distant places; and fear career paths that weaken family ties and commitments. Teachers and counselors, who are accustomed to well-informed parents and independent children, perceive apathy, submissiveness, and lack of interest in the Latino community. They lower their expectations of performance, track students into remedial courses and/or non-college bound programs, and concentrate on behavioral (disciplinary) problems. They dismiss Latino cultural values, and implicitly or explicitly belittle their intellectual abilities.

**Latino students torn between the expectations of family and teachers face obstacles at school**. Latino youngsters develop their sense of identity while negotiating incongruent social contexts. At school, poor grades, low expectations of performance, and dismissive attitudes contribute to absenteeism and disengagement from studies. At home, lack of resources, family responsibilities, and weak support for schooling endeavors thwart their educational progress. Latino students alienated from home and school seek support among their peers and engage in risky behaviors that jeopardize academic achievements. Gangs offer them a place to fit in while growing up, urge students to dismiss family, school values, and institutional norms. Facing intellectual and cultural belittlement, poor grades, and scarce opportunities, Latinos lose their sense of self-efficacy in schools. Latinas, who start school with higher self-esteem than their White peers, lose their self-confidence markedly as they become young adults.

**Data on high-achieving Latinas illustrate the importance of class and cultural resources**. Latina students with higher socioeconomic status are less burdened with family responsibilities and more likely to persist in school. Bilingual students are better informed about schools and graduate at higher rates than their monolingual counterparts. Students who have middle class aspirations, do not adhere to traditional gender roles, and are familiar with both (Latino and Anglo-American) cultures, reach higher educational goals, and are more (academically) successful. Latina students feel a sense of responsibility to family, and benefit from caring and supportive networks; high-achievers invariably attribute their academic success to encouraging parents, spouses, and/or mentors who affirm their values and support their educational goals.

**Class and culture barriers have a compounding effect on the schooling experience of Latinas**. Latino students cluster in schools that lack economic resources and face difficulties attracting high-quality teachers, particularly in mathematics and science. Their schools offer less (academically) rewarding programs, which curtail their perception of and access to wider opportunity structures. Most Latino students come from low-income families; they do not have the sense of efficacy shared by students from higher socioeconomic status. Many come from monolingual, unacculturated families; they are not familiar with Anglo-American mores and lack information networks that are functional in schools. Although Latinos have higher occupational aspirations than Anglos, their expectations of achievement are lower. Class and cultural barriers affect their visions of self-realization and options.

**Latina "selves" are shaped by families, schools, and peers**. Collectively, they encourage and affirm or discourage and dismiss images of what is possible. While growing up, schools dismiss values that are central to their identity as Latino women and threaten traditional family ties and roles. Class and cultural barriers obstruct academic progress, narrow opportunity structures, and curtail visions of what they can be in the future.

What are the recommendations?

How can we improve the educational outcomes of Latinas?

Ginorio and Huston conclude the report by proposing ways of fostering the educational achievements of Latinas. Although their analysis focused on three primary social contexts—family, peers, and schools—their recommendations speak exclusively to schools. They affirm that educational success depends on the respect schools show for students' backgrounds, their ability to work with students' families, and their access to financial and human resources.

Ginorio and Huston recommend that schools develop an affirming and supportive environment for Latina students. They must aggressively recruit students out of remedial tracks, provide more challenging coursework, and foster positive attitudes.
Cynthia, sophomore, born in Brooklyn, Puerto Rican heritage

“Success is being independent, not having to rely on mommy and daddy any more. What has helped me [most to achieve success] is to know that my parents are always, always going to be with me. When I call my mom on the phone and tell her, ‘Mom, I just got an “A” on my paper,’ she gets so excited! I like seeing her excited, I like seeing her happy.”

Sandra, senior, born in Colombia, migrated to New Jersey at age 7

“My husband needs help with money and wants us to get ahead. He is pushing me to finish my studies.... My parents have always been very supportive. I can't say that my child derailed me from school. I always had the help of my parents.... If they [parents] help you, why can't you just help them for a couple of minutes and translate, or whatever?”

María, sophomore, born in Venezuela, migrated to New Jersey at age 7

“I was planning to go to study in Florida, but I was not sure if I was ready to live so far away. I am so close to my family. My mom is a single parent, and I felt bad leaving her since everything she has done has been pretty much to give me the best. Sometimes I am the mom.... I still cannot live too far from my mom.”
about the future. In addition, they must offer meaningful support in the form of information, scheduling, and childcare to young mothers and affirm Latino values by celebrating their culture. Teachers and advisors must help Latinas set realistic educational goals from middle school on, discuss college-bound courses and career options, and talk about college life and financial aid programs. Schools must encourage teaching programs to recruit a diverse student body (of future teachers) and researchers to do more exhaustive studies of Latinas in school.

Conclusion

The comprehensive report presented by Sí, Se Puede! strongly suggests that family is the most influential force in Latinas’ lives. Latinas attribute their academic success to encouragement from families; enroll in colleges close to their homes because of family; persist in school after pregnancy thanks to supporting families; and, in many cases, forfeit postsecondary studies to create and/or sustain their families. Yet, surprisingly, Gironio and Huston pay little attention to families in their concluding remarks.

From my perspective, it is clear that schools are not likely to succeed in their efforts unless they also involve Latino families. Latino parents value the education of their children and respect the authority of teachers. To assist Latina students, schools must mobilize their families through culturally appropriate strategies. They must make parents, particularly those with low socioeconomic status, a cornerstone of affirming and encouraging environments. This does not mean requiring parents’ participation in school-related activities, for low-income parents lack time, as well as class and cultural capital. It means to request parents’ formal commitment, to work through the authority of traditional family structures, to rely on notions of family honor to gain parents’ support, and make students acquire to school demands. The story of success lived by the teacher Jaime Escalante (featured in the movie Stand and Deliver) was more than a story of intellectual challenge. His success depended on the assistance of parents. Schools and families are two sides of the same coin; we must address both fronts to affirm, encourage, and support Latinas in school.

Latinas have many faces but share a single voice. This voice says “commitment to family.”

The Income-Ethnicity Link

Attendance Gaps Widening, reveals U.S. Census

BY ANGELA PROVITERA MCGLYNN

We Americans like to believe that as a democratic nation, we promote equal opportunity for all people. In many of my social-psychology classes, when we discuss social problems in America, students are reluctant to give up the myth of equality in America. They want to believe that anyone can achieve whatever he or she wants in America, regardless of social class, race/ethnicity, and gender.

I share their reluctance to believe differently. However, I tell my students that until we recognize that the playing field is not level for all people, we will be unable to change the reality of unequal opportunity.

Katherine Hunt Scott reported in USA Today (March 5, 2001) that many experts suggest that the significant gap between the rich and the poor in completing a college degree is growing. The data supporting this contention are calculations based on statistics from the Census Bureau and the Department of Education. I connected "Income-Ethnicity" in the title of this article because Black and Hispanic Americans are disproportionately poor. Several experts agree that although the percentage of high school graduates who go to college has increased greatly since 1980, the gaps between rich and poor students, and between White and minority students, have stayed the same or actually grown.

Scott's analysis of the causes of this widening gap includes several factors that contribute to keeping higher education out of reach of poor students. She says that there are tax breaks to help middle and upper-middle income families pay for tuition, but the poor miss these breaks since they pay little or nothing in taxes. Secondly, many new state aid programs reward students with high grades, who, more often than not, come from affluent families. The third factor is that most of the increase in student aid has been in the area of loans rather than grants. Poorer people are reluctant to take on loans for fear of not being able to pay them back. A fourth factor keeping the poor out of the higher education loop is the drop in state funding, causing tuition hikes throughout the nation. And finally, federal Pell Grants, the best aid program for low-income students, have not kept pace with the increasing costs of a college education.

For those not convinced that the college-completion gap is widening between the rich and the poor, consider what a higher education policy analyst has found. Thomas Mortenson, higher education policy analyst, Postsecondary Education Opportunity Senior Scholar, Oskaaloosa, Iowa, says that in 1980, students of families in the top quarter income bracket earned five times as many bachelor's degrees by age 24 as those students of families in the bottom quarter. Today, recent data show that the gap is now about eight times.

Analyzing the disparity according to ethnicity, the picture is bleak, clearly showing a widening gap when comparing the attainment of degrees by Whites with that of Blacks and Hispanics. Census Bureau data on percentages of 25- to 29-year-olds who had four or more years of college show these increases: In 1980, the gap between Whites and Blacks in America was 13.4 percent. By the year 2000, the gap increased to 16.2 percentage points. During the same time span, Whites' college rate advantage over Hispanics grew from 17.3 percent to 24.3 percent.

Mortenson and other higher education policy experts suggest changes in student aid as a way of making a college education accessible to poor students. Specifically, the team concluded that the most efficient and fairest way to use financial aid is to make it available to low-income students. The policy analysts suggest an increase in available grants that do not have to be repaid.

Apart from the belief of many that making higher education more accessible to low-income students is the right thing to do for fairness, we need to recognize the necessity of such an endeavor for the benefit of society. Consider recent census data reported by The Washington Post and The New York Times showing dramatic demographic changes in our nation. Schmitt (The New York Times, 3/8/01) reports that the growth of Blacks in America rose about 16 percent, and the growth of Hispanics in the same time period rose 60 percent. The rate of growth among Hispanic Americans greatly outpaced that of Blacks in America, making Hispanics the nation's largest minority population earlier than originally predicted. This new picture of America has far-reaching ramifications culturally and politically.

Schmitt reports that while Hispanics are still concentrated in the Southwest, California, Florida, and New York, more recent immigrants from Central America and Mexico are settling in states such as North Carolina, Georgia, and Iowa. Ten years ago, those states had virtually no Hispanic population. According to another New York Times article (3/18/01), the New Jersey State Labor Department reported that 51 percent of New Jersey's growth occurred among Hispanics. The numbers of Blacks also rose in New Jersey to nearly 14 percent of the state's population. (The Asian New Jersey population increased by 77 percent, and Asians now make up 6 percent of the state population).

The data also shows that Hispanics have become a mainstay in many low-paying, labor-intensive industries. Clearly, these workers are necessary and should be rewarded for their labors with decent wages. On the other hand, our nation needs more highly educated workers to keep America moving forward.
A Surge in Hispanic Population in Latest Census

Early data from the 2000 Census shows that the Hispanic population in the United States has grown by 61 percent since 1990, and Hispanics are now nearly even with Blacks as the largest minority group.

The Hispanic population grew much faster than that of Blacks...

...with the number of Hispanic men and women ages 30 to 49 growing the fastest.

When it comes to facing the challenges in education, the current administration talks mostly about accountability in public schools, based on an elaborate testing system that has many critics. There's not much concern about the teacher shortage that is fast becoming a major educational crisis this nation faces. And on the issue of helping poor students to attend college, the Bush team suggests that Pell Grants should be “front-loaded,” meaning first-year students should be able to borrow more money.

On the face of it, this makes some sense—it would help get poor students into college and through their freshman year. On the other hand, critics say that students most often drop out of college before their sophomore year. A big drop in their financial aid at that time could worsen that trend. Furthermore, Terry Hartle, senior vice president of government relations and public affairs, the American Council on Education, a Washington D.C.-based group representing 1,800 colleges, says that offering larger Pell Grants for first-year students would encourage poor students to attend two-year colleges and trade schools rather than four-year colleges. Hartle says in the U.S. Today article (3/5/01, p. 8D): “The front-loading may well help more low-income students become dental hygienists. I doubt it will help more low-income students become dentists.”

Terry Hartle's point is well taken; it certainly makes sense to continue Pell Grants through the four years of college. However, I do take issue with Hartle's point about low-income students being limited because of their attendance at two-year colleges. The reality is that low-income students generally do start college at community colleges because of the much lower tuition and fees.

The March 12, 2001 issue of The Hispanic Outlook featured a major study conducted by the American Association of Community Colleges and ACT Inc., Faces of the Future: A Portrait of America's Community College Students. This was the first national survey of both credit and noncredit courses at 245 community colleges in 41 states. The report states that 45 percent of all U.S. undergraduates are enrolled in community colleges and about one-third of them receive some form of financial aid. In fact, the study showed that more than half of these students are the first to attend college from their families. Twenty-two percent of those surveyed had household incomes of less than $20,000. These students are also more likely to come from homes where English is not the primary language spoken.

“The report concludes that community colleges are the best and sometimes the only hope to ensure career and earning competitiveness for the least skilled and most economically disadvantaged” (Gilroy, 3/12/01, p. 8).

So, rather than seeing low-income students limited by attendance at a community college, the community college can be the stepping stone towards their bachelor's degrees.

I believe it is the government's responsibility to fund these students' continuing education, and it is the responsibility of the community college sector to prepare these students for transfer to four-year colleges and universities. Whether low-income students start at a two-year or a four-year college is not as significant as what they find when they get there. By now, the retention research is pretty conclusive about what keeps the high-risk student and, in fact, any student, in college. Beyond the necessary financial resources, the climate of a college seems to be a critical variable for retention. Is the college atmosphere a welcoming one? Is there an inclusive atmosphere in their classes so that
students feel valued and respected? Do students feel a sense of belonging at an institution? Do they have friends attending the same college?

Pascarella et al. (1986) and many other researchers have discovered the importance of the personal relationships that students develop with faculty and staff to their perseverance in college. Judith Johnson's study of persistence in commuter college students (1997) found that the significant factors that contribute to college completion rates for commuter and nontraditional students are similar to those found for successful traditional campus-based college students. Johnson found that a sense of community is a critical variable for the retention of all college students, regardless of whether they commute or live on campus. Again, there are so many studies supporting this contention, it is clear that the academic climate is the factor that needs special attention if we are committed to retaining more college students, especially low-income and minority students.

Financial support seems to be the foundation necessary for a college education to become a possibility for low-income students. Once a student has the financial resources to study at an institution, the college can go a long way in supporting that student in ways that promote academic success: provide developmental courses, if needed, to make up for academic deficiencies; and offer orientation to college sessions and a freshman seminar, which teach students what they need to know to be successful in college.

Also significant are faculty development sessions to raise faculty consciousness about creating a welcoming, inclusive classroom atmosphere, the importance of connecting with their students, and the importance of having students work collaboratively in class, which fosters bonding with other students as well as enhancing learning and retention.

Other positive actions include providing support personnel services to help students get information they need from courteous helpers, as well as providing guidance in academic and non-academic areas. (With one in five college students said to be in a clinical depression, colleges also need to strengthen their counseling departments).

Persisting in college to earn a degree is difficult for most students. For students who start college behind the eight ball due to an uneven playing field, staying the course in college can be an overwhelming task. As a nation, we must provide these students with the financial assistance that makes college accessible to them, as well as the academic and non-academic support they will need once they are attending college.

REFERENCES

DEAN OF ACADEMIC AFFAIRS
Corning Community College invites applications and nominations for the position of Dean of Academic Affairs. Located in the Finger Lakes Region of New York State, CCC instructs approximately 3,000 FTEs. A member of the SUNY system, CCC is widely known for its commitment to excellence in teaching.

CCC seeks an educator to provide leadership, vision, and direction to the academic life of the College; who is able to lead an established faculty and integrate new faculty into existing academic traditions; who has a progressive outlook toward program development; and who understands transfer, career and technology programs. The successful candidate must have the ability to relate well to people in an environment that promotes collegial relationships of mutual respect.

Qualifications: Applicants must have an earned doctorate, five years of demonstrated excellence in academic administration, and a minimum of three years of successful, full-time teaching. Preference will be given to candidates with community college experience.

Corning Community College is prepared to offer the successful candidate a competitive salary and an excellent benefits package. The Dean's appointment will be effective January 2002. The position description and the appointment criteria may be found at http://www.corning-cc.edu/about_ccc/announce.

Please submit curriculum vitae and names, addresses, and phone numbers of three professional references by September 7, 2001 to: Director of Human Resources, Corning Community College, 1 Academic Drive, Corning, NY 14830.

AA/EOE.
Aspirantes Pass the Quarter-Million Mark

ASPIRA Programs in 400 Schools Nationwide

BY INÉS PINTO ALICEA

Like the Spanish word it takes its name from, ASPIRA, the national nonprofit organization dedicated to the education and leadership development of Latino youth, aspires to continued, phenomenal growth and success.

"We had major growing pains, but we managed to stay loyal to our goals," said Myrna Rivera, chair of ASPIRA's national board and president and CEO of Consultiva Internacional, an independent Hispanic investment research firm based in Puerto Rico.

"A lot of nonprofits are formed around the passion for an issue and then back into the administrative infrastructure needed to make it grow. We've spent the last five years getting our house in order. We still hold on to our issues. The challenge is to do that again for the next 20 years."

Since its formation more than 37 years ago, ASPIRA has grown from a small nonprofit agency in New York City to a national association with associate organizations in Connecticut, Florida, Illinois, New Jersey, New York, Pennsylvania, and Puerto Rico, with its national office in Washington, D.C. Its 500 staff members work with thousands of youth and their families each year to develop the youths' leadership potential. The organization calls the youngsters Aspirantes—youth who will become educated, committed leaders for the community's future benefit.

"I would like to see ASPIRA reach many more people," said Ron Blackburn Moreno, executive director of ASPIRA. "We reach 30,000 students right now. That is a drop in the bucket when you look at the size of the Latino community. Expansion is critical, but we want to expand with quality programs. We also want to increase our visibility and influence in public policy at the national, state, and local levels.

"We also want to make sure we are as efficient an organization as any business. We want to make sure that the people who move through the ranks to management at ASPIRA have the skills to manage effectively and be accountable to the communities they serve."

While ASPIRA continues to maintain the passions of a nonprofit, it has taken a more businesslike approach to achieving its future goals, which many leaders in the organization said was necessary to continue growth and expansion. Rivera said the organization developed an investment policy and created an endowment that the board hoped would eventually cover 25 percent of ASPIRA's budget, relieving its dependence on outside funding. Since the endowment was created seven years ago, the board has managed to double its value, said Rivera.

Still, locating the resources to expand ASPIRA's programs remains one of the organization's biggest challenges, said Blackburn Moreno.

In 1997, Antonia Pantoja, the organization's founder, received the highest honor the nation bestows on a civilian, the Presidential Medal of Freedom, for her work on behalf of Latinos. President Clinton awarded the medal in a ceremony at the White House.

Pantoja said funding has been an issue for the organization since its founding but that it is an issue not uncommon among nonprofits.

"We don't have all of the money we'd like to have to serve all of the youth we'd like to serve," she said.

Pantoja and a group of Puerto Rican educators and professionals created ASPIRA back in 1961 to address the exceedingly high dropout rate and low educational attainment of Puerto Rican youth. They believed that the way to free the Puerto Rican community from poverty and promote its full development was to focus on the education of young people, and develop their leadership potential, self-esteem, and pride in their cultural heritage. The youth would become not only productive members of society, but also lead the development of their own community.

"All young people need to have an identity, and they need to know they belong to a community," said Pantoja, who is working on her memoirs, for which she hopes to find a publisher soon. "That is why we have been so successful. It is very rewarding to me to see how the organization has grown all over the nation and how it has expanded its services to other youth as well as Puerto Ricans."

Strategic Plan

The organization continues to evolve. Two years ago, ASPIRA developed its first national strategic plan. The plan called for a new curriculum for its well-known youth leadership development program that also included components on entrepreneurship and community organization, to get more young people interested in both areas. The strategic plan also allowed for the creation of ASPIRA-run charter schools in Florida, Pennsylvania and Illinois, and a junior technical college in Illinois as well.

While local school districts provide some funds for the charter schools, ASPIRA must provide the funds for the capital expenditures. Blackburn Moreno said it is vital that these schools have the resources to operate and skilled teachers to teach.

"We want to make sure these are model schools for the rest of the country," he said.

To strengthen the organization's infrastructure, ASPIRA revamped its own technological capabilities. It created a website with thousands of links to other sites as well as 500 pages on ASPIRA programs and activities. ASPIRA also created a database to track how successful it is in reaching the community it serves. It tracks the progress of people served by the organization. Moreover, Pantoja is busy forming an alumni network of all former ASPIRA participants.

"Everybody tells us ASPIRA is wonderful, but the question is how do you measure wonderful?" asked Rivera. "The database will help us understand what works and what doesn't work."

Since its founding, ASPIRA has provided a quarter of a million youth with the personal resources they need to remain in school and contribute to their community. After extensive research, ASPIRA founders developed a process for leadership development that remains the core of all ASPIRA activities. Over the years, ASPIRA has developed a highly suc-
cessful intervention model—the ASPIRA Process. The model consciously accentuates the positive, putting the stress on developing the potential of aspirantes rather than trying to overcome their perceived deficits.

While still mainly a Puerto Rican organization, ASPIRA now reaches out to include all Latinos and a significant group of non-Latinos throughout the United States. Its core program, the Youth Leadership Development Program (LPD) and its school-based ASPIRA Clubs reach young people in more than 400 schools. Students learn the "ASPIRA Process" of awareness, analysis, and action through the clubs. The ASPIRA Process of leadership development teaches youth to become aware of their current situation, to analyze its consequences, and to take action for change in their personal lives and the life of their community. ASPIRA brings together school and community members, students, and parents, to promote educational success and community service.

Youth play an important role in the organization. The local boards all have student representatives, as does the national board. Blackburn Moreno said that 40 percent of the board members are youths—16 years and older—and they have a full vote like the other board members.

"That honors the students and not just the adults," said Rivera. "What the kids say is essential to the equation."

Technology and Culture

One of the biggest projects ASPIRA has undertaken in recent years is the development of technology centers throughout the country. Most are located in ASPIRA community centers, and they allow access to computers and the Internet. The project was launched thanks to a $1.7 million grant from the U.S. Department of Education and a partnership with the Power Up organization, which is affiliated with many of the technology industry's foundations. The computer software and hardware as well as Internet access were donated by some of the giant technology companies, including America Online, Dell, Gateway, and Microsoft.

ASPIRA also wants to take the lead in forming a national Hispanic technology consortium of national and local organizations, and colleges and universities that want to provide access to technology to the Latino communities.

"We want the consortium to be the voice on technology to influence policy for Latinos," said Blackburn Moreno. "There is no such voice."

Rivera said ASPIRA remains highly concerned about the high dropout rate in the Latino community and hopes that increased access to technology will help reduce it.

The program provides leadership training, cultural enrichment activities, and community action projects that teach students how to develop their leadership abilities. ASPIRA also works with foundations, corporations, and the government to improve educational opportunities for young Latinos.

Rivera said that while the organization remains loyal to its basic premise of education and leadership development, another important component is to cultivate pride and awareness about Puerto Rican heritage and culture.

"We want to keep the heritage alive," said Rivera. "We want to keep the pride alive. It is important to help kids set their identity and for them to feel proud of their culture."

Cultural isolation from their history or their language, says Rivera, is "too high a price to pay."

The national board met in February, said Rivera, to begin discussions on how to maintain the culture and language in a technologically advanced world.

"The affirmation of culture, heritage, and language is a key component to ensure people feel good about themselves," said Blackburn Moreno.

He believes the organization will soon offer additional cultural, historical and language activities, and courses at its centers nationwide. In addition, he envisions more Latino-related activities on the organization's website.

Along with the improvements occurring at ASPIRA, Blackburn Moreno said there are also improvements in working relationships among national Latino organizations. He has seen a shift in the eight years he has been with the organization in that national Latino organizations are cooperating far more now than when they were first launched. Most of the 32 national Latino organizations that comprise the National Hispanic Leadership Agenda are relatively young—less than 30 years. With maturity and time, he said, the organizations and their leaders have worked for more unity on a variety of topics, including education reforms, immigration, voting rights, access to capital, and access to technology.

"We're almost a single voice on every issue," he said. "That makes us more powerful than we were years ago. We'll continue to stand firm."
Liberal Arts Consortium Seeks Minority Scholars-in-Residence

Diversity a Goal at Bowdoin, Grinnell, Occidental, Wellesley, and More

BY INÉS PINTO ALICEA

Bowdoin College

Grinnell College

Glória Cuadraz recently received two notes from students that reinforced her commitment to teaching. Both were from students praising her for her work teaching them several years ago.

Cuadraz, now an associate professor at Arizona State University West, in Phoenix, said her time at Colorado College, a small liberal arts school, was quite positive. While there, a unique program was designed to encourage minorities to consider teaching and research careers at liberal arts colleges.

"I always speak highly of my experience there," said Cuadraz. "It exposed me to a culture that highly values teaching. You feel revered in that environment. They have an attitude that you do important work, so we're going to take care of you."

The unique experience is the Minority Scholars-in-Residence Program, offered each year to post-doctoral students or students ready to write their Ph.D. dissertations by the Consortium for a Strong Minority Presence at Liberal Arts Colleges, an association of small liberal arts undergraduate colleges.

A brochure about the program
describes the twofold effect of having minority scholars on campus: "greater diversity of experience and perspective within the faculty and in the curriculum" and "necessary role models who help attract minority students to liberal arts colleges and enhance their experience once there."

Fellowships are open to U.S. citizens who are students in all disciplines of liberal arts and engineering. Applicants should be working toward a Ph.D. or M.F.A. degree or should have been awarded the degree no more than five years before applying. In addition, they should have no more than five years of teaching or relevant experience.

"I had not had experience with these types of institutions," said Cuadraz. "It was very uplifting. They have very well-prepared students."

After completing their residencies, the scholars are believed to be strong candidates for tenure-track positions at member institutions of the consortium, or at similar institutions.

"The goal is to familiarize our visitors with liberal arts curricula and careers," said Helen Scott, associate dean and associate professor of Russian at Grinnell College in Iowa, a consortium member.

When Cuadraz finished her year as a fellow, program officials talked to her about teaching opportunities in liberal arts colleges, but, for personal reasons, she had her heart set on returning to her home state of California to a position at a larger university. She said she felt compelled to teach at an institution where many of the students were first-generation college students, something not true of some of the liberal arts colleges, in her experience. She later went to Phoenix but said she is open to returning to teach at a liberal arts college.

Grinnell, with a student population of 1,500, serves as the clearinghouse for the consortium. Participating institutions pay dues of $500 to cover the costs of advertising the program and handling the applications. Twenty-four institutions participate in the consortium, but the list keeps growing.

"We weren't looking for new members, but more and more colleges have wanted to join," said Scott.

The consortium was launched in 1987. Among the member colleges are Bowdoin, Bryn Mawr, Carleton, Colorado, Connecticut, Gettysburg, Grinnell, Hamilton, Haverford, Juniata, Macalester, Mount Holyoke, Oberlin, Occidental, Pomona, Rhodes, Swarthmore, Union College (N.Y.), Vassar, Wellesley, and Wheaton College (Mass.). Member universities include DePauw and University of the South.

Scott said each participating institution funds the students' stay. Fellows receive a stipend equal to the typical salary for beginning instructors (dissertation fellows) or assistant professors (post-doctoral fellows) at the host institution. In exchange, scholars are expected to do some teaching and research. They are also expected to participate in other activities under the supervision of a mentor.

"It's a big commitment we're all making," said Scott.

Cuadraz said that when she won the fellowship, it was the first time that she had medical insurance and that Colorado College was very generous with helping fund any of her research needs. She said that she was offered a Woodrow Wilson Fellowship at the same time but felt committed to the consortium's fellowship.

"I have no regrets about doing that," said Cuadraz. Moreover, she said her earnings as a beginning college teacher helped her later in her career.

"When I was negotiating for my faculty position here, it helped me negotiate for a higher salary," said Cuadraz.

Victor Nelson-Cisneros is associate dean at Colorado College, in Colorado Springs, a consortium member with 1,900-or-so students, about 300 of them, minorities. Fellows make at least $40,000 for their year at his institution, he said. They also receive a $1,000 stipend for research or book expenses and funding for a round-trip ticket to defend their dissertations if they are Ph.D. candidates.

"It is difficult to support yourself with a full-time job while writing your dissertation," said Nelson-Cisneros.

At Colorado College, the fellows enjoy the benefit of a block schedule. Students take one course at a time over an 18-day period, so fellows only teach for seven weeks during their year stay. This gives them more free time for writing a dissertation or working on other projects for publication.

"Colorado College gives them a lot of time to write," he said, adding that the college took on four fellows last year and was recruiting four for the latest round. "We try to make it attractive to the students."

Cuadraz said she did some of her best writing during her fellowship year and that the snow and cold of the area helped her focus her work.

The program does not guarantee that there will be a tenure-track position open at the institution where the student completes a fellowship, but many do end up at their host institutions or at other liberal arts colleges. Nelson-Cisneros said that of the more than 25 fellows his institution has sponsored since the program began, four have been hired for tenure-track positions.

Many graduate students gravitate to the larger, more well-known
research institutions, but Nelson-Cisneros said he hopes the program will make many of them reconsider and pursue jobs at small liberal arts colleges, which can offer very rewarding careers.

"At my college, our feeling is that this is not for sabbatical replacements or for leave of absence replacements," he said. "There is a greater good here. We want to give the students a leg up in the process, so they will consider seeking and taking a job in a liberal arts college. This is our contribution to the pipeline issue."

But officials involved in the program agree that it is important to keep better track of the program participants. One of the goals is to start tracking the progress of the consortium. The group wants to know how many of the participating students are indeed teaching at liberal arts colleges.

"We'd like to know how we're doing," Scott said. "We'd hope that these scholars are teaching at one of the consortium institutions or at least at a liberal arts college."

"We know that not everybody goes to liberal arts colleges," said Nelson-Cisneros, adding that he keeps unofficial track of the fellows who come to Colorado College and finds that many pursued jobs at liberal arts colleges.

Nelson-Cisneros said the goal is to assist minority scholars at an early stage in their careers. And that he's helped his own fellows, as needed, with job placement at other institutions and with preparing job application packets.

Scott says, "We want to make this a positive experience for the fellow. We want to have them included in the activities of the institutions. We just don't plunk them down and have them teach courses."

Ph.D. candidates are strongly encouraged to finish writing their dissertation in their fellowship year. Scott said that while she encourages the schools to teach the students how a department operates, she wants to ensure students can complete that dissertation.

"I don't want to say they have to have 100 percent participation in the department, and then they don't get their dissertations done," said Scott. "Their presence is helpful to the institution, and it's helpful to themselves."

Scott said she would like to create a more unified presence for the students participating. Some institutions succeed in getting them together for different activities, but the overall consortium has not been so successful in that endeavor.

The consortium offers two types of fellowship awards—the dissertation fellowship and the postdoctoral fellowship.

The dissertation fellowship is designed for Ph.D. or MFA candidates who have completed their research and are ready to (or have just begun) writing their dissertation. The program allows the fellow to complete the final requirements for the degree during the year of residency. Scholars will receive a stipend based on an average starting salary paid to instructors at the host institution. Modest funds will be made available to finance proposed research, subject to the usual institutional procedures. Scholars will be expected to teach one semester course (or the equivalent), to participate in functions such as departmental seminars, and to interact regularly with students. Ideally, applicants for the dissertation fellowship program should have completed their research before the beginning of the fellowship year, said Nelson-Cisneros.

"We want to expose minority graduate students to the life of teacher scholars at small liberal arts colleges, but their first responsibility is to advance their writing as much as possible... We give them a reduced teaching load so they will have a head start on publishing," said Nelson-Cisneros.

During the fellowship year, those in the postdoctoral stage are encouraged to begin publishing.

Scott said the program is largely voluntary. The institutions receive copies of the application packets and decide each year whether they will accept and fund any of the applicants that year. A packet includes a graduate school transcript, curriculum vitae, and three reference letters, one of which must be from the dissertation advisor. A pre-doctoral applicant has to provide information about progress toward the degree.

The institutions are not required to take on any fellows, but must take at least one. Historically, Grinnell has taken two students each year.

All participating institutions see application packets from all prospective candidates, even though students declare their three top choices. Last year, the consortium had 70 applicants. This year, 138, said Scott. Each consortium institution handles the selection process in accordance with its own internal selection processes.

Completed applications are to be forwarded by Nov. 15 to Jean Cousins, CSMP Administrative Assistant, Grinnell College, President's Office, 1121 Park Street, Grinnell, IA 50112-1690. For more information or an application, email: cousins@grinnell.edu

---

Member colleges include Bowdoin, Bryn Mawr, Carleton, Colorado, Connecticut, Gettysburg, Grinnell, Hamilton, Harvard, Juniata, Macalester, Mount Holyoke, Oberlin, Occidental, Pomona, Pembroke, Swarthmore, Union College (N.Y.), Vassar, Wellesley, and Wheaton College (Mass.). Universities include DePauw and University of the South.
BENTLEY COLLEGE
Walsham, Massachusetts

Provost and Vice President
for Academic Affairs

Bentley College, one of the nation's most innovative business schools, invites nominations and expressions of interest in the position of Provost and Vice President for Academic Affairs.

Founded in 1917 and located in Boston's high tech corridor, Bentley College prides itself on providing a business education for the information age. As a Carnegie II Research Institution, Bentley has nearly 4,000 undergraduate, 1,800 graduate, and 3,300 executive and professional education students learning in an environment that integrates information technology with a broad business and liberal arts curriculum, gaining knowledge, skill and experience for careers in a global economy. In its "Best Colleges 2001" survey, U.S. News & World Report ranked four of Bentley's undergraduate offerings among the best business programs in the nation. Out of 1,600 U.S. colleges and universities with business programs, Bentley ranked 13th in e-commerce, 21st in management information systems, 23rd in accounting, and 44th in general management. Bentley's McCallum Graduate School of Business was ranked 20th in entrepreneurship and 25th in management information systems in the same survey. Computerworld ranks Bentley's Information Age MBA 16th among the nation's top techno-MBA programs. Moreover, Bentley is the only small college in the country nationally ranked in e-commerce, information systems and accounting.

As the largest business school in New England, Bentley has dedicated over $80 million to technology including an investment of $22 million in recently opened academic technology facilities. Additionally, Bentley has the nation's oldest student laptop requirement. The college was a pioneer in service learning for non-profits and has a nationally known business ethics center. Bentley offers a tight-knit community with accessible professors, small classes, and an excellent ratio of students to faculty.

As the chief academic officer, the Provost will lead a committed, enthusiastic, unified faculty in building the college's academic excellence. The Provost, with the President, Trustees and senior officers, shares in institutional strategic planning and college-wide leadership for policy formulation and administration.

The successful candidate will have the intellect, integrity and administrative acumen to lead evolutionary change in partnership with the faculty and other members of the Bentley community. The Provost will have a distinguished academic record with evidence of excellence in teaching, capacity to connect with faculty in a variety of fields, enthusiasm for information technology, an understanding of faculty governance and experience with fiscal policy.

Nominations, expressions of interest, and inquiries should be directed, in confidence, to the college's consultants:

Bentley College is an Equal Opportunity Employer, building strength through diversity.

Educational Management Network/Witt/Kieffer
Education Week Issues "Technology Counts 2001" Report

BETHESDA, Md.

With the latest statistics showing a rapid infusion of computers into the nation's schools, some educators, researchers, and policymakers are tempted to declare the digital divide closed. "Technology Counts 2001," Education Week's fourth annual report on school technology, looks beneath the overall numbers, and finds that simply judging the digital divide by comparing basic student-to-computer ratios obscures more subtle digital inequities.

The report reveals that access to the Internet is significantly lower in the nation's poor schools than in more wealthy schools. Also ending up on the wrong side of the digital divide are minority youngsters, girls, rural students, low achievers, children with disabilities, and students who are learning to speak English as a second language. "Technology Counts 2001" shows that the new digital divides have as much to do with how students and teachers use technology as with access to the machines themselves.

The report also explains that even when access to computers is high, there are reasons to worry about whether school technology is being used effectively to promote student learning. The report includes a new Education Week survey of middle school students and high school students that shows that a large percentage of students say knowing about computers is not that important to how well they do in school. A high percentage of students with access to computers at school say they used them for only a limited amount of time per week. Many learn most of what they know about computers at home, the study reveals.

The report also looks at policies, state by state, finding that few states require schools to set aside time for technology-related professional development for teachers or even require prospective teachers to take a technology test. A special state-by-state analysis of national computer-access figures, conducted for Education Week by Market Data Retrieval, shows that poor children are still losing out compared to wealthier students when it comes to more sophisticated technology. And some states seem to be having more difficulty than others in providing equal access to all students. This year's report also analyzes how well services and projects designed to close the digital divide are working and what problems they are facing.

HACU National Internship Program Wins Commerce Department Contract

WASHINGTON, D.C.

The Hispanic Association of Colleges and Universities (HACU) won a major new contract with the U.S. Commerce Department for the nation's largest Hispanic student internship program.

The Commerce Department signed a three-year contract with HACU to renew its long-standing participation in the HACU National Internship Program. The new contract will be worth as much as $15 million over its three-year duration.

"We applaud the Commerce Department for its foresight and commitment to encourage diversity for our future federal workforce, which must be more reflective of our multicultural population," said HACU President and CEO Antonio R. Flores.

"Hispanics are the nation's youngest and largest minority population. Yet, they remain the only population group underrepresented in federal workforce ranks. Providing Hispanic college students paid internships in key Commerce offices introduces them to federal career opportunities while allowing them to obtain valuable professional experience," he said.

Since 1992, the HACU National Internship Program has provided paid internships to more than 2,700 undergraduate and graduate students with top academic credentials. The Commerce Department has hosted 423 interns.

HACU National Internship Program students participate in paid spring, summer, or fall internships at more than a dozen federal agencies and private sector corporations in Washington, D.C., and throughout the country. The program also allows students to learn career skills relevant to their fields of study, and provides them professional networking opportunities.

"This program each year attracts hundreds of college students with exceptional qualifications. Many of our former interns are now full-time federal employees," said William Rafael Gil, executive director of the Washington, D.C.-based HACU National Internship Program. "We are deeply grateful for the continuing support of the Commerce Department, which has contributed to making this program a success."

HACU represents more than 270 colleges and universities that serve the largest concentrations of Hispanic college students in the United States and Puerto Rico.
New Study Questions Value of Coaching for SAT I, Reports College Board

NEW YORK, N.Y.

The College Board posed the question: How much does coaching affect SAT I scores?

Not much, according to the latest study on the subject by Derek C. Briggs, a doctoral candidate at the University of California-Berkeley.

The College Board News reported that in Briggs' study of 14,600 students—the largest coaching study on record—he found that SAT I: Reasoning Test scores of coached students were, on average, just 20 points above those of the uncoached students. The average boost from coaching was only six to eight points on SAT I: verbal, and 14 to 15 points on SAT I: mathematical scores. The study also showed that only 10 percent of the students had participated in coaching.

"Briggs' findings match those of at least six other independent studies," said Wayne Cámara, The College Board's senior research scientist. "All found minimal results from coaching."

In a major study in 1998, Donald Powers and Donald Rock of the Educational Testing Service also found minor score increases for students who took test-prep courses. In their study of 4,200 students who had taken the SAT I: Reasoning Test more than once, coached students experienced an average score boost of eight points above the average scores of uncoached repeat test-takers on the SAT I: verbal section. On the SAT I: mathematical section, they had an average 18-point increase above the average scores of uncoached repeat test-takers. Two major coaching companies had slightly higher average increases of up to 19 points on verbal and 38 points on math. Although 97 percent of the students had prepared for the SAT I in some way, average prep time was just 11 hours.

Cámara says that coaching is a complex phenomenon, with many variables and with results that reflect the intensity, duration, and content of the course and the ability and motivation of teacher and student. In general, the longer the course and the closer it is to genuine instruction and learning, the better the scores. Thus, successful coaching resembles good schooling. This should be expected, since good schooling prepares students for college as well as the SAT I. In general, SAT I scores reflect the number of challenging academic courses students can take, and the grades they earn.

ACE: State Spending on Student Aid Topped $4 Billion in 1999-2000

WASHINGTON, D.C.

State student aid saw an increase of 12.6 percent over the 1998-99 academic year, with merit-based aid programs growing faster than need-based programs, according to an annual survey by the National Association of State Student Grant and Aid Programs, an organization representing the 50 states and six territories that provide financial aid to postsecondary education students. The survey covered all 50 states, Washington, D.C., and Puerto Rico.

The American Council on Education reported the following survey findings:

- Merit-based aid rose about 20 percent in 1999-2000 to nearly $925 million. Merit-based programs accounted for approximately 22 percent of all student-aid spending during that time period.
- Six states—California, Illinois, New Jersey, New York, Pennsylvania, and Texas accounted for about 60 percent of all need-based state student aid. Need-based aid spending increased about 8.5 percent to $3.2 billion in 1999-2000.
- Almost 78 percent of full-time Georgia undergraduates receive aid, compared with 52.7 percent in New Mexico, 51.4 percent in New York, 50 percent in New Jersey, and 43.2 percent in Ohio. When it comes to need-based aid, New York is in the lead with 50 percent of its undergraduates receiving need-based aid.
- Alabama, Delaware, and Georgia eliminated need-based aid last year. Georgia's merit-based aid program provided more than $1,300 per full-time undergraduate.
- State aid totaled $4.15 billion for the 1999-2000 academic year, up from $2.86 billion five years earlier. Appropriations for 2000-2001 are estimated at $4.67 billion, an increase of 12.5 percent over last year.
- Less than 1 percent of need-based aid, and about 6 percent of merit-based, went to graduate students.
- New Jersey and New York spent more than $2,000 in grants and scholarships for each full-time undergraduate student. Arizona, Hawaii, and Wyoming spent less than $50 per full-time undergraduate student.
Ambrosino Named Vice President of UTSA Student Affairs

The University of Texas—San Antonio (UTSA) appointed Rosalie Ambrosino vice president of student affairs. Ambrosino had been vice provost for undergraduate studies and enrollment management.

She will oversee and be responsible for student organizations, admissions, registrar, financial aid, career services, health services, academic advising, multicultural programs, the testing center, and other services and programs.

A licensed social worker with a special interest in multicultural education, Ambrosino was director of the School of Social Work and the undergraduate program at UT—Austin prior to coming to UTSA in the summer of 1999. She has a bachelor's degree from the University of Minnesota, a master's from Antioch University, and a doctorate from UT—Austin.

Ornelas & Associates Launches Latino Scholarship

The American Association of Advertising Agencies gave a 2001 O'Toole Multicultural Award to Ornelas & Associates, a Dallas, Texas-based Latino marketing communications agency. The agency will use the $25,000 award, and match it, to start a scholarship fund for Latinos. Victor Ornelas, president and CEO of Ornelas & Associates, set a $1 million goal for the scholarship fund, to be raised over 10 years.

The Ornelas Advertising Scholarship will be open to qualified American citizens of Latino heritage who pursue a degree in advertising or marketing communications at an accredited college or university in the U.S. The selection of the winners will be based on demonstrated academic ability and community involvement.

Cal Poly Pomona Names Morales Vice President for Student Affairs

California State Polytechnic University-Pomona announced the appointment of Dr. Tomás D. Morales as vice president for student affairs. He is a former dean of students and vice president of student affairs at the City College of New York and has served higher education for more than 25 years.

Said Morales, "It's exciting to join a wonderful and extraordinarily diverse student-centered community of learners."

Morales will lead one of the diverse divisions of the University. Its branches include athletics, enrollment services and financial aid, public safety, student development and disabled student services, student support programs, and student enhancement and housing.

Chicanos and Latinos Introduced to Cal State-Fullerton

California State University-Fullerton (CSUF) welcomed Chicano and Latino first-year students, sophomores, and their parents to Día de los Padres, a daylong event designed to help parents understand university life. It featured workshops, entertainment, and student skits conducted in English and Spanish. Parents were encouraged to develop and maintain communication ties with members of the campus community.

Lending support to the event were Mesa Cooperativa, an umbrella council of several student organizations promoting ethnic, cultural, academic, and political awareness in the Chicano/Latino community, and the Links Mentoring Program, which helps students network with the CSUF community.

North Texas Center to Educate Hispanics about Heart Disease

The University of North Texas (UNT) Health Science Center-Fort Worth is one of six organizations/Institutions chosen by the National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health to start a national education effort in low-income and minority communities about cardiovascular disease. The NHLBI plans to create a network of community-based organizations implementing targeted, culturally sensitive heart health education strategies aimed at changing local physician practices and patient behaviors.

Public health and medical school faculty from UNT's Health Science Center will use NHLBI funding to develop comprehensive promotion, education, and outreach to increase awareness and knowledge of cardiovascular disease prevention and to promote heart-healthy lifestyles among Hispanics.

Dr. Hector Balcazar, School of Public Health professor and principal investigator on the project, said it will utilize the Salud para su Corazón (Health for your Heart) model, which equips lay health educators with in-depth and user-friendly tools to promote heart health and family wellness.

Valdez Honored by UTSA Faculty and Administrators

The University of Texas—San Antonio (UTSA) vice president for extended services, Jude Valdez, was honored with a Lifetime Achievement Award from the La Raza Faculty and Administrators' Association (LRFAA). Valdez is credited with playing a key role in the creation of the UTSA Downtown Campus.

LRFAA is an informal group of faculty members and administrators at UTSA, formed
in the early 1980s to highlight issues involving Mexican Americans in higher education. The group is devoted to improving minority student enrollment and retention and ensuring the recruitment and promotion of minority faculty members.

**Londono Recognized For Leadership Role at Barry**

Esther Londono, a 25-year-old graduate student and elementary school counselor, was recognized for her leadership role at Barry University (Fla.), Chi Sigma Iota, a counseling academic and professional honor society, honored her.

Londono, a Colombian American, won an award for outstanding service and a fellowship for her role as vice president of Barry's Beta Upsilon Chapter. She is editor of *Beta Upsilon News*, the chapter's monthly newsletter, and is involved in several community service projects, including the Children's Home Society, My Sister's Closet Program, which provides work clothes for indigent women, and the Miami Rescue Mission. She recently traveled to Spain as a volunteer English tutor.

Londono, a counselor at Wesley Mathews Elementary in Miami, is pursuing a master's degree in counseling from Barry's School of Education.

**Rutgers Hosts Talk On Dominican Community**

Rutgers University-New Brunswick (N.J.) hosted “Red de Pescadora: Reflections on Dominican Studies in the United States,” a lecture by literary scholar and cultural activist Daisy Cocco De Filippi.

Cocco De Filippi discussed the history of Dominicans in this country and current interpretations and divergent theories about culture and identity issues as they affect the Dominican community here. Her lecture was part of the Rutgers Global Futures Symposia 2000-2001 series “Leaders and Communities: Lessons of the Past, Prospects for the Millennium,” which examines the processes and consequences of contemporary globalization.

Cocco De Filippi is a professor of Spanish and chair of the department of foreign languages, ESL, and humanities at York College of the City University of New York. She has worked on many publications as an editor and translator.

**Santiago Named UAlbany Provost and VP of Academic Affairs**

Following a yearlong national search, the University at Albany (N.Y.) appointed Dr. Carlos E. Santiago provost and vice president of academic affairs. He had been interim provost and vice president of academic affairs and professor of Latin American and Caribbean studies and economics.

“I'm delighted to accept this appointment,” said Santiago. “My tenure at SUNY-Albany has marked a time of tremendous growth and change, but there has always been one constant, the exceptional faculty and staff. I feel very fortunate to be among such exceptional colleagues.”

Santiago is founding co-editor of the *Latino Research Review*, a member of the U.S. Congressional Hispanic Caucus International Relations Advisory Group, president of the Puerto Rican Studies Association, and has held leadership roles with the Latin American Studies Association. In 1996, he was named one of the top 100 most influential Hispanic leaders in the U.S. by *Hispanic Business*.

**Penn State Researches Puerto Rican Mothers and Infants**

A study conducted by Pennsylvania State University reveals that Puerto Rican women living in the U.S. have significantly less social and emotional support at the time of childbirth than do their peers in Puerto Rico, although this does not adversely impact their infants' health.

Penn State sociologist and demography professors Dr. Nancy S. Landale and Dr. R.S. Oropesa conducted the research as part of their ongoing Puerto Rican Maternal and Infant Health Study, which analyzes maternal and infant health outcomes among Puerto Ricans living in the U.S. and Puerto Rico.

Puerto Rican women in Puerto Rico are more likely to live close to their mothers; they tend to have more relatives living nearby; and they receive more emotional support and help with childcare, chores, and medical expenses than do those in the U.S.

Landale and Oropesa presented their findings in the paper “Migration, Social Support and Prenatal Health: An Origin-Destination Analysis of Puerto Rican Women.”

**Echevarría Delivers Cervantes Lecture at Fordham**

Yale University (Conn.) Professor Roberto González Echevarría delivered the 45th Annual Cervantes Lecture, “The Prisoner of Sex: Love and the Law in Cervantes (Don Quixote, Part I Chapter 22)” at Fordham University in New York.

Begun at Fordham in 1952, the lectures inform scholars, students, and the public about Miguel de Cervantes, the man many consider the creator of the modern novel. Echevarría, Sterling professor of Hispanic and comparative literature and chair of the department of Spanish and Portuguese at Yale, is the author of *Myth and Archive: A Theory of Latin American Narrative*.

**Western Illinois Student Covers Latin Music Awards**

Western Illinois University broadcasting graduate student Angela Mauricio was chosen by the National Association of Hispanic Journalists (NAHJ) to cover *Billboard Magazine's* International Latin Music Awards. Mauricio, one of nine selected nationwide, was an official on-air reporter for Chicago’s Spanish-speaking television and radio stations. The event, held in Miami, Fla., featured Latin pop stars Ricky Martin and Christina Aguilera.

Founded in 1984, NAHJ fosters a greater understanding of Hispanic culture, interests, and concerns. The organization's 1,500 members include working journalists, journalism students, academic scholars, and other media-related professionals.
Vargas Llosa Speaks At Georgetown

Universally acclaimed Spanish author, scholar, and political figure Mario Vargas Llosa spoke on "Literature and Life" at Georgetown University in Washington, D.C. Vargas Llosa was named Georgetown's Ibero-American literature and culture chair in the Spanish and Portuguese department.

Considered one of the greatest living writers in Spanish, he has had his works translated into more than 20 languages, and he continues to be a powerful voice on behalf of the role of literature in society and human life.

Santa Barbara City College Professor Re-Elected to State Board

Dr. Elida Moreno, professor of English skills and ESL at Santa Barbara City College (SBCC) in California, was re-elected to the executive board of the state's Latina Leadership Network (LLN).

LLN promotes Latina leadership within the California community college system, provides support for Latina faculty, staff, and students, and celebrates Latinas' cultural and social heritage.

Moreno has taught at SBCC since 1976 and was instrumental in developing SBCC's basic skills program, disabled students program, and ESL as a discipline. SBCC this year nominated her for the Hayward Award for Excellence in Education, the state's top award for California's community college faculty. She is a member of the National Council of Teachers of English and Teachers of English as a Second Language and other professional organizations.

Bermúdez Named Associate VP at Houston-Clear Lake

The University of Houston-Clear Lake (UHCL) named Andrea B. Bermúdez associate vice president for academic affairs. At UHCL since 1978, she has been a professor in the School of Education, director of the Research Center for Language and Culture, and more.

"I was thrilled to be selected...as this opportunity will allow me to translate into action the experiences I have gained as an integral member of the UHCL academic family," said Bermúdez, who was interim associate vice president.

Bermúdez is an active member of the editorial board for the Journal of Educational Issues of Language Minority and an editor of the Bilingual Research Quarterly. Her many publications include the series The Language of Literature (grades 6-12) and the Teacher's Sourcebook for Language Development.

Northeastern Illinois Student Granted ¡Adelante! Scholarship

Northeastern Illinois University (NEIU) computer science major Hiren S. Patel was granted the ¡Adelante! U.S. Education Leadership Fund scholarship for the 2000-2001 academic year and is eligible for a renewed award in 2001-2002. Patel recently attended a four-day leadership institute in San Antonio, Texas.

NEIU is one of 40 institutions participating in the ¡Adelante! Fund, created in 1998 by the Hispanic Association of Colleges and Universities and the Miller Brewing Company to provide Hispanic American students with educational assistance through scholarship funding and internship experience.

Portillo Film Debut at Delaware

Señorita Extraviada: The Fate of 200 Women, a film by Academy Award-nominee film critic, led a discussion after the free screening.

Señorita Extraviada tells the true story of more than 200 kidnapped, raped, and murdered young women from Juarez, Mexico. The murderers came to light in 1993, but young women continue to "disappear." And there is little hope of bringing the perpetrators to justice. The women have been employees of factories located in wage-frugal Mexican border towns. Portillo investigates the murders and the horror, fear, and courage of the families whose children have been taken.

First Hispanic Woman New President of Community College of Denver

The Colorado Board for Community Colleges and Occupational Education appointed Dr. Christine Johnson president of the Community College of Denver. A unanimous selection, Johnson is the first woman to head the institution and the first Hispanic woman to be president of a Colorado community college. She has been vice president for educational services at Community Colleges of Colorado.

Johnson joined the state system in August 1998. Earlier she was director of urban initiatives with the Education Commission of the States and chair of the Colorado Commission of Higher Education. The U.S. Secretary of Education appointed her to the National Assessment Governing Board, charged with developing the "nation's report card" and defining what American students should know and be able to do.

Johnson received a Kellogg Fellowship with the League for Innovation in Community Colleges and a Distinguished Educator Award from the Colorado Alliance of Business. She has a bachelor's degree from New Mexico State University and a master's and doctorate from the University of Colorado-Boulder.

Southwest Texas State Student Receives National Fellowship

María Tinajero, a Southwest Texas State University junior, received one of 25 national fellowships from the Rockefeller Brothers Fund. The fellowship offers minority students in the arts and sciences who are entering the teaching profession a grant for a graduate program. Tinajero also is receiving a grant for an
undergraduate summer project.

An interdisciplinary studies major with a concentration in bilingual education, she is a first-generation college student, born in Mexico City and raised in Guanajuato, Mexico. She says her passion is to teach the next generation of immigrant children.

When asked about goals for her future students, she said: "a positive self-esteem and an experience of success. I want them to know that they will all succeed in my classroom, which I hope will motivate them to continue to succeed."

News from St. Edward's University

St. Edward's University (Texas) announced that Gwen Santiago, executive director of the Texas Association of School Business Officials, received the University's 2001 MBA Distinguished Alumni Award. Santiago, who received her undergraduate and graduate degrees from St. Edward's, said that one of her greatest personal accomplishments was "being able to complete my bachelor's degree while juggling a full-time job, a husband, and two teenagers."

St. Edward's also announced that Manuel "Manny" Chávez, founder and owner of Harvard Manufacturing Texas, was named to the University's board of trustees. He has received many community and business awards, including the 2000 National Businessman of the Year Award from the U.S. Hispanic Chamber of Commerce.

Long Island-Brooklyn Seniors Showcase Their Works

The art and media arts departments of Long Island University's Brooklyn Campus showcased the work of graduating seniors in the "AMAZE" exhibition, a mixed-media showing of paintings, drawings, sculptures, and photographs.

The art department featured the work of five women: Mathar Gómez, Sonya Mull, Niurka Rosario, Fay Smith, and Naimah Walker. Students in this department concentrate on classes in drawing, painting, ceramics, sculpture, printmaking, color, calligraphy, and art history.

Twenty seniors from the media arts department displayed computer animation, and digital, experimental, and black-and-white photography, fusing traditional art theory, methods, and production with the technology of today's new media.

Texas A&M-Corpus Christi Concert Benefits Scholarship

The Texas A&M University-Corpus Christi Center for the Arts presented Flicka Rahn and Andy Moore in "Noche de Amor," benefiting its music scholarship fund. Rahn, assistant professor of voice at the university, has been reviewed as "possessing a glorious voice of lovely, rapturous quality."

The performance featured highlights from Carmen, Les Miserables, and La Bohème, "Music," said Rahn, "that takes the audience from the majestic stages of opera, to the spotlights of Broadway, to the gilded theaters of Barcelona."

Rahn recently toured Mexico and South America, appearing in Queretaro, Tuxpan, and Cuernavaca, Mexico, and Belize City, Belize, where she sang for the president of Belize. Moore is a frequent performer with Rahn.

EWU Celebrates Cinco de Mayo

Eastern Washington University (EWU) celebrated Cinco de Mayo this year with a variety of activities, including three new events, a Canto Al Pueblo (Song to the Community), an open-air fair, and a car show.

"We wanted to do some different things this year. We want to keep things fresh," said Carlos Maldonado, chair of the Chicano Education Program at EWU. The events provided a good view of Chicano/Latino culture, celebrations, history, issues of interest—and a lot of fun.

The weekend celebration featured an art exhibit, discussions on topics from Latino art to farmer-worker unionization, and dancing. EWU invited K-12 students from the region to the Cinco de Mayo Booth Fair. Canto Al Pueblo featured mariachi Huenuachi, the nationally recognized youth mariachi from Wenatchee; Xiye Topec, Aztec dancers from Mexico City; and Los Campesinos de Michoacán, traditional Mexican-style music. Proceeds from the show benefited EWU's Chicano education program scholarships.

M-DCC, Local Colleges, Host Congressional Luncheon

U.S. Rep. Lincoln Diaz-Balart was a special guest in the first of a series of luncheons hosted by Miami-Dade Community College (M-DCC), St. Thomas University, and Carlos Albizu University, introducing Florida's congressional representatives to innovative new hospitality programs being developed at the institutions as the result of more than $1.7 million in recent funding from Title V grants from the U.S. Department of Education's Hispanic Serving Institutions Program.

Pictured (L. to r.): Teresa Albizu-Rodriguez, vice president of Carlos Albizu University and daughter of its founder, Monsignor Franklyn Casale, president of St. Thomas University; Diaz-Balart; and Dr. José Vicente, president of M-DCC's Inter-American Campus.

Gonzales Speaks at Central Connecticut State

Noted journalist and political activist Juan Gonzales lectured at Central Connecticut State University (CCSU) on his book "Harvest of Empire: The History of Latinos in America." Gonzales is a staff columnist with the New York Daily News, having covered events such as the 1989 U.S. invasion of Panama, the Los Angeles riots, and political upheaval in Mexico and the Caribbean.

Gonzales' visit was part of CCSU's Center for International Education's ongoing initiative to create bridges to the world community.
while enriching the intellectual environment of the campus community. "He's known for his hard-hitting columns on the labor movement, race relations, and problems of the inner city," said Professor Ronald Fernández, director of the Center for Caribbean and Latin American Studies. "He has courage and charisma, and he's worked to make the world a better place."

Gonzales has spent the better part of his life working to expose injustice. He was active during the 1960s civil rights movements and became a leader at the National Congress for Puerto Rican Rights in the '70s. A founding member of the National Association of Hispanic Journalists, Gonzales was acknowledged as one of the 100 most influential Latinos in the United States by Hispanic Business magazine.

Loyola Chicago Throws High Schoolers Educational Lifeline

Loyola University Chicago (Ill.) provided a scholarship opportunity to Chicago public high school students. Loyola, along with DePaul University, Northeastern Illinois University, and Roosevelt University, gave 40 high school seniors a chance to compete in "Who Wants to Win a Scholarship?"—modeled after the popular ABC-TV game show Who Wants to be a Millionaire? Students were given a chance to win a full-tuition scholarship to one of the sponsoring universities.

GEAR UP, the Chicago Gaining Early Awareness and Readiness for Undergraduate Programs Alliance, launched "Who Wants to Win a Scholarship?" to improve the city's public schools. GEAR UP is designed to encourage more young people to have high expectations, stay in school, study hard, and go to college.

"Who Wants to Win a Scholarship?" encourages local students to prepare for college by providing an exciting opportunity to earn education-related prizes through academic competition, said Mary Charles, research project director in the Loyola School of Education and GEAR UP scholarship program coordinator.

NHLI Board of Directors Elects New Members

The National Hispania Leadership Institute (NHLI) welcomed four new members to its board of directors: Dr. Sandra E. Madrid, Haydee Ortiz-Oliver, Luz Sarmina-Gutiérrez, and Isabel Valdés. They all come from diverse professional backgrounds, bringing unique expertise to the organization.

Madrid, assistant dean at the University of Washington School of Law, brings her knowledge of the courts to the board. Ortiz-Oliver, division general counsel for the Great Lakes Division, McDonald's Corporation, brings her business expertise. Sarmina-Gutiérrez, president and CEO of Valle Del Sol, was elected alumnae chair, hopes to inspire other Latinos. Valdés, pioneer and expert in "InCulture" Hispanic marketing, represents Latinos who have worked hard to break down barriers for the next generation.

Getty Program Provides Internship Opportunities

The J. Paul Getty Trust's (Calif.) Multicultural Internship Program awarded $12,400 to fund 156 visual arts internships at 77 organizations. The internship program is designed to assist outstanding students from groups traditionally underrepresented in museum and visual arts professions. Students get $3000 for 10-week internships, with additional funds going to the organizations to offset administrative expenses.

The internships enable Latinos/Hispanics, Native Americans, African Americans, Asians, and Pacific Islanders who either reside in Los Angeles County or attend an area college or university to gain direct experience in areas such as exhibitions, publications, education, and conservation. Students work in museums; with film, literary, performing arts, and visual arts organizations; and for local art agencies.

New Mexico Highlands Contributes to Vatican Calendar

Members of the New Mexico Highlands University (NMHU) physics department shot three of the photographs published in the 2001 Vatican Observatory calendar, which features photographs taken through telescopes or from outer space.

The calendar "New Beginnings" includes pictures of the earth and the universe from sources that include NASA and the Vatican Advanced Technology Telescope (VATT), based in southeast Arizona. NMHU professors Drs. William and Eileen Ryan and students Carlos Martinez and Lawrence Tafoya captured April's photo of the Ring Nebula M57 through the VATT.

A second photo, of the Whirlpool Galaxy, by the Ryans and NMHU graduate Amanda Roybal, is featured on the October page. The month of December features a photo of the Dumbell Nebula Messier 27, also by the Ryans, Martínez, and Tafoya.

Lamar Music Students Honored in Regional Competition

In Texas, six Lamar University vocal music students won top awards at a regional performance competition. The Greater Houston Chapter of the National Association of Teachers of Singing conducted the auditions and competition in conjunction with its annual meeting.

Lara Morales, Jeremy Hunt, and Kimberly Guidry won first place—Morales in senior women, Hunt in senior men, and Guidry in competition for junior men and women combined. Richard Reeves won second place in junior men and women combined, Tommy Millner won second place among beginning adult men, and Joshua Leger placed third in competition for sophomore men.

The University of Houston hosted the event.

López Nuñez Scholar-in-Residence at Cal State-San Bernardino

Noted Cuban author César López Nuñez, winner of the 2000 Cuban National Prize for literature and the Alejo Carpentier Medal, recently taught at California State University-San Bernardino.

López Nuñez, during the spring quarter, was a scholar-in-residence with the University's department of foreign languages and literatures. He worked with department professors and teamed with Cal State Associate Professor María Antonietta Gallegos-Ruiz.

He has taught at several universities in his native Cuba and was an adjunct faculty member at the University of Glasgow, Scotland; the University of Catania, Italy; and the University of Clermont-Ferrand, France. He has represented Cuba at many symposia and conferences in Mexico, South America, Europe, Asia, and Africa.

LaGuardia Administrator Writes Book on College Transfers

LaGuardia Community College (N.Y.) administrator Dr. Janet Lieberman has written a book examining college transfer trends throughout
the country. *The Road to Equality* is based on an 18-month research study that looked at several successful transfer models and investigated the attitudes and legislation that support and impede transfer.

"Transfer from community colleges to four-year institutions, and the ensuring attainment of a bachelor's degree, is a critical route to success for minority students," said Lieberman, noting that 50 percent of minority students in higher education are in community colleges and that only 20-25 percent of community college graduates transfer to four-year institutions.

The report defines the obstacles that must be removed to permit community college students to make the leap to a senior college—issues such as financial aid, college preparation in high schools, and articulation and transfer agreements between two-year and four-year schools.

---

**Passport Photos**

By Amitava Kumar

This report on the immigrant condition is a multi-genre book combining theory, poetry, cultural criticism, and photography. It explores the complexities of the immigration experience, intervening in the impersonal language of the state. Seeking to link cultural, political, and aesthetic critiques, it weaves together issues as diverse as Indian fiction written in English, signs put up by the patrol at the U.S.-Tijuana border, and ethnic restaurants in New York City.

**Spanish Colonial Gold Coins in the Florida Collection**

By Alan K. Craig

Dazzling treasures await readers of this new volume that catalogues and characterizes the splendors of the Florida Collection of Spanish Coins. Presented in accordance with current numismatic standards of description, analysis, and publication, Alan Craig's account of the coins goes far beyond ordinary standards to bring alive the history of the coins' production, transport, and loss at sea.

**Behind the Label: Inequality in the Los Angeles Apparel Industry**

By Edna Bonacich and Richard P. Appelbaum

The flight of the apparel industry has led to a huge rise in apparel imports to the United States and to a decline in employment. Los Angeles, however, remains a puzzling exception in that its industry employment has continued to grow, to the point where L.A. is the largest center of apparel production in the nation. Not only the availability of low-wage immigrant (often undocumented) workers but also the focus on moderately priced, fashion-sensitive women's wear makes this possible.

**Cuba and the Politics of Passion**

By Damián J. Fernández

Cuban politics has long been remarkable for its passionate intensity, and yet few scholars have explored the effect of emotions on political attitudes and action in Cuba or elsewhere. This book offers an important new approach by bringing feelings back into the study of politics and showing how the politics of passion and affection have interacted to shape Cuban history throughout the 20th century.

**U.S. Protestant Missions in Cuba: From Independence to Castro**

By Jason M. Yaremko

Following the end of the Spanish-Cuban-American war in 1898, the U.S. Protestant Church embarked on a religious mission in Cuba that evolved into a zealous secular crusade to reconstruct Cuban society. The church had set a collision course with Cuba's revolutionary nationalism. This book offers striking implications for the study of education as transmitter of a foreign worldview and of religious and cultural elements of U.S. foreign relations.

Cantinflas and the Chaos of Mexican Modernity
By Jeffrey M. Pilcher

Here is a revealing probe into the life and times of Mario Moreno, Latin America’s most famous film star from the 1940s to the 1970s. The book helps illuminate the social and cultural history of 20th-century Mexico. Cantinflas (Moreno’s film persona) was the most popular movie star in Mexican history. A fast-talking, nonsensical character, he helped Mexicans embrace their rich mestizo identity and cope with the difficulties of modernization.

Financial Decision-Making in Mexico: To Bet a Nation
By Sidney Weintraub

Mexico’s economic meltdown of 1994-1995 has been described as the first financial crisis of the 21st century because of the speed with which repercussions—the “tequila effect”—spanned the globe. This book provides an analysis of the economic and political events taking place in Mexico, the decisions made to deal with these events, and the reactions of international financial actors outside Mexico, thus offering the first integrated analysis of the Mexican market crash.

Audacious Reforms: Institutional Invention and Democracy in Latin America
By Merilee S. Grindle

This book examines the creation of new political institutions in three Latin American countries: direct elections for governors and mayors in Venezuela, radical municipalization in Bolivia, and direct election of the mayor of Buenos Aires in Argentina. These “audacious reforms,” explains the author, reinvented the ways in which public problems are manifested and resolved, the ways in which political actors calculate the costs and benefits of their activities, and the ways in which social groups relate to the political process.

Selected Writings of Andrés Bello
By Andrés Bello

Andrés Bello was a towering figure in 19th-century Latin America, as influential and as famous there as Thomas Jefferson was (and is) in the United States. Poet, politician, educator, essayist, philosopher, he wielded astonishing influence and played a major role in shaping the national identities of newly independent Latin American countries. Translated from Spanish by Frances M. López-Morillas. Edited by Iván Jaksic.

Memories of a Ballplayer: Bill Werber and Baseball in the 1930s
By Bill Werber and C. Paul Rogers III

Former major league baseball player Bill Werber is the last man alive who traveled with the legendary 1927 New York Yankees, a team hailed by many as the best of all time. Werber’s memories of the players, umpires, managers, executives, reporters, and fans of the 1930s provide an inside look at an unsentimental, rough-and-tumble game populated by tough, skilled young men and punctuated by friendship and enmity, hilarity and tragedy.

Many publications featured in this section are available through amazon.com.

CONFERENCES

The Summer Institute for Intercultural Communication 2001
July 18-20
July 23-27
July 30-August 3

This 25th summer institute [under the auspices of the Intercultural Communication Institute (ICI) in Oregon] provides professional training and development to thousands who work in multicultural environments throughout the world. Workshops range from "Foundations" to "Who You Gonna Call? Hate-Busting on College Campuses" and much more. Certificate and Master of Arts in Intercultural Relations programs are available.
Contact: ICI, (503) 297-4633; e-mail, ici@intercultural.org; website, www.intercultural.org.

National Conference on Critical Thinking and Educational Reform
July 21-24

The Center for Critical Thinking presents "Dimensions of Critical Thinking." In the San Francisco, Calif., area.

Contact: (800) 833-3645; website, www.criticalthinking.org.

EACUBO/Cornell Administrative Management Institute
July 22-27

The Eastern Association of College and University Business Officers and the Cornell University School of Continuing Education and Summer Sessions present AMI2001, a professional seminar for college and university administrative/business managers and department heads. In Ithaca, N.Y.

Contact: (607) 255-7759; e-mail, cusp@cornell.edu; website, www.sce.cornell.edu/EXEC/

Leadership Alliance 6th Annual National Symposium
July 27-29

The Symposium is the culmination of the Leadership Alliance's Summer Research Early Identification Program--10-week research internships at 15 of the Alliance's 28 member institutions. Dr. Ruth J. Simmons, newly appointed president of Brown University, will deliver the opening keynote address. At the Evergreen Conference Center in Stone Mountain, Ga.

Contact: (404) 863-1474; website, www.theleadershipalliance.org.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and the Sheraton New York Hotel and Towers in New York City.

Diversity Advisory Council Colloquium
September 14

The Kent State University Diversity Advisory Council presents a one-day colloquium, "A Country of Strangers: Blacks and Whites in America." At KSU in Ashfordula, Ohio.

Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashfordula.kent.edu.

Telelearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor "TeleLearning 2001," "the premier event in distance education and educational telecommunications." At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

ACE 2001 Conference
October 13-20

"The nation's most important national conference on diversity and improving minority participation in postsecondary education." Sponsored by the American Council on Education's Division of Programs and Analysis, and the Office of Minority in Higher Education. In Cincinnati, Ohio.

College Board National Forum 2001
October 26-30

This year's College Board National Forum has as its theme "Measuring Success," looking at the measures of "success for yourself, your school, your students." At The Adam's Mark Hotel in Denver, Colo.

Contact: (212) 713-8050; website, www.collegeboard.com.

HACU 15th Annual Conference, in Puerto Rico
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future. In San Juan, Puerto Rico.

Contact: (210) 576-3218; website, www.hacu.org.

WCET 13th Annual e-Learning Conference
October 31-November 3

The Western Cooperative for Educational Telecommunications holds its 13th annual conference, "eEvolution@edu: New Policies, Practices, and Services." This event draws leaders from higher education institutions, government agencies, corporations, and non-profit organizations involved in distance learning. In Coeur d'Alene, Idaho.

FIU Conference on Spanish and Latin American Literature
November 8-10

The Department of Modern Languages at Florida International University will hold the conference, "Spanish and Latin American Literature: New Trends for a New Millennium." At FIU in Miami, Fla.

Contact: Ricardo Castells, (305) 348-2130; e-mail, castells@fiu.edu.

Landscape Ecologist and Aquatic Environmental Biologist

As continuation of planned expansion of Department of Biology of Case Western Reserve University, the department invites applications for an appointment of one or two ecologists at the Assistant Professor level. Candidates for these positions should have interests in Landscape Ecology or the Environmental Biology (e.g., physiology, behavior, or endocrinology) of aquatic organisms. Applicants will be expected to have both experimental and quantitative skills and have an interest in integrative Biology. Successful candidates will also be expected to lead a strong independent externally funded research program as well as develop and teach courses at the undergraduate and graduate level. See http://www.cwru.edu/artsci/biol/biol.htm for more information about the department and its plans.

Applications from women and minority candidates are especially welcome. Applicants should send letter that describes their research and teaching interests, a current curriculum vitae, and three letters of recommendation sent directly to:
Joseph F. Koonce, Chair
Department of Biology
CASE WESTERN RESERVE UNIVERSITY
10900 Euclid Avenue
Cleveland, OH 44106-7080

To receive full consideration, applications should be submitted by September 30, 2001. The search will continue until the positions are filled.

In employment as in education, CWRU is committed to Affirmative Action and Equal Opportunity.
Book Reviews

By Michael Hall

Eduardo Galeano’s finely blended literary embellishment of history—the first part of a trilogy—chronicles the key events and figures of American history, especially Latin American, from the origins of the Indians to the conquest and colonization of the Western Hemisphere by European explorers, conquistadors, and colonists. Under the guise of Christian missionary zeal, the Spanish enslaved and destroyed their cultures, and burned their cities in their quest for territorial and economic expansion in the New World. Believing that Latin America “has been condemned to amnesia by those who have prevented it from being,” Galeano’s stated purpose in writing the Memory of Fire trilogy is to “contribute to the rescue of the kidnapped memory of all America, but above all Latin America.”

Galeano, an Uruguayan writer, editor, and political activist, uses 358 short but powerful written vignettes, based on 227 historical primary and secondary sources, to record the mythological and historical soul of the Latin Americans. Considering the political, economic, and social fragmentation of Latin America, Galeano’s literary unification of diverse fragments is an extraordinary act of interpretive history.

In Part 1, “First Voices,” Galeano recounts the pre-Columbian indigenous myths thematically; in Part 2, “Old New World,” Galeano approaches American history from 1492 to 1700 chronologically. Galeano imaginatively recreates and repositions historic episodes in a huge mosaic that reveals his screeching indictment of Latin America’s victimization at the hands of European powers. Also the author of Open Veins of Latin America: Five Centuries of the Pillage of a Continent, Galeano acknowledges that he is not writing an objective work. Although each fragment is based on a solid documentary foundation, Galeano informs the reader that he will interpret history in his own style and manner.

His point of view is that of an enraged Marxist poet who has conducted extensive historical research. Not unlike Gabriel García Márquez, Galeano provides an extensive amount of knowledge in a readable, literary form. His style is more literary than scientific. The Spanish subtitle, “Los Nacimientos,” is more accurate than the English one, “Genesis,” in that it conveys the understanding of the plurality of the various pre-Columbian Indian cultures. Galeano’s text intertwines Indian myth and folklore with the brutality of the Spanish conquest and colonization of Latin America. These beginnings continue to exert a negative influence on the region today. Except for the passages that have been literally transcribed—those portions in italics—Galeano’s savage lyricism, captured by translator Cedric Belfrage, reconstructs historic episodes in a dramatic form. Galeano, not unlike Carlos Fuentes, is conscious of the difference between imagination and reality. Fuentes once stated in a public lecture at Ohio University: “You [North Americans] want to live better. We [Latin Americans] want to die better. You feel you must redeem the future. We feel we must redeem the past.”

In Open Veins of Latin America, Galeano writes, “History is a prophet who looks back: because of what was, and against what is, it announces what will be.” Galeano believes that history classes are taught “about the past so that we should resign ourselves with strained consciences to the present.” Galeano implies that the violent reality of Latin America is more shocking than seemingly unrelated small acts of barbarism.

For Galeano, literature must have a social purpose. Unfortunately, his perpetuation of the “myth of the noble savage” permeates his vignettes. He is one in a long line of Latin Americans who idealizes the pre-Columbian Indian myths and cultures. Although the Indians’ attempt to rationalize reality through myth and fable makes interesting reading, Galeano’s all-too-apparent romanticizing of pre-Columbian brutality and condemnation of Spanish brutality are contradictory.

Of the pre-Columbian Indians, Galeano writes that “men must cut open their chests with obsidian daggers and surrender their hearts’ to receive the gift of fire. Huiztilopochtli and Aztec human sacrifice are romanticized. Conversely, Galeano reports that the sinister Spanish tried to burn and destroy the Indians’ cultural heritage. Bishop Zumarraga “threw the Aztec codices into the fire.” Galeano records that the “invaders [the Spanish] have expelled them [the Indians], seizing their lands and uprooting their memory.” Galeano’s attempt to record this uprooted memory preserves and perpetuates the Indian myths and fables.

Galeano blames all of Latin America’s woes on external factors. His disregard for critical analysis ignores examination of internal factors. His distillation of history through literary interpretation presents an unrealistic, though often entertaining, picture of Latin American realities by camouflaging serious internal irregularities.

Galeano’s literary interpretation makes for interesting reading. However, his literary embellishments—although historically based—distort history and make it unsuitable for serious historical research.

By Mark Saad Saka

_Caballero_ represents a lost jewel in Chicana literature. Written during the 1930s and 1940s by Jovita González and Eve Raleigh, this is a powerful novel of Mexican women's experience in 19th-century Texas.

Jovita González obtained her M.A. in history at the University of Texas in 1930 and wrote _Caballero_ as part of her research on the Mexican American culture, folklore, and social history of South Texas. Buried for decades, with very few people actually knowing of the manuscript's existence, _Caballero_ came to light after her death. It was donated in manuscript form to the Special Collection and Archives Department of Texas A&M University at Corpus Christi by Isabel Cruz, a longtime friend of González. Edited by Dr. José Limón and Maria Coter, _Caballero_ was published in 1996 by Texas A&M Press. The importance of this invaluable novel, written nearly a half-century before the explosion of Chicana literature, cannot be underestimated. It makes a unique contribution to the Mexican American literary tradition.

An historical novel, _Caballero_ takes place in South Texas immediately after the American occupation resulting from the U.S.-Mexico War 1846-1848. It revolves around a large Mexican landholding family and the internal struggles of its patriarch, Don Santiago de Mendoza. Caught in a tumultuous world of change and shifting loyalties, Don Santiago witnesses the demise of a traditional rural order based on patriarchal values, hierarchical social relations, and an anti-democratic political culture. Much of the saga centers on the novel's heroine, Susana, the youngest daughter who, to her father's horror, falls in love with and eventually marries Robert, a young American army officer stationed at Fort Brown. Her brother Lus, a sensitive and talented painter, befriends an American, moves to Baltimore to pursue a life of the arts, rejecting the rural life of his ancestors. Álvaro, favorite son and violent embodiment of a rural macho culture, joins a guerrilla band, is captured, and then rescued by Susana, who disgraces the family honor by riding unchaperoned to plead for his release. Disowned by her father and brother, she escapes a prearranged marriage to an old landowner and runs off with her American lover.

In addition to Don Santiago's own family's defiance of his traditional authority, many of the peons, abused and exploited through centuries of feudal custom and culture, begin questioning the basic premise of an anti-democratic social order.

The book has two major themes, one overt and the other quite subversive. The overt theme revolves around the ethnic and cultural assimilation of Susana, Luis, and the hacienda peons to the new Anglo-American order. The novel can be read as a reflection of the 1930s, written at the time of LULAC's initial push for middle-class assimilation into the American political and economic mainstream. However, assimilation travels in two directions as the Anglo newcomers adapt Mexican customs and mores, producing a bicultural synthesis. In addition, the book ends with Susana giving birth to Robert's baby, reflecting the new mestizo reality of the Borderlands.

The book is laden with many subversive themes that place Jovita González as an early and previously unrecognized Chicana feminist—its direct assault on the hypocritical patriarchal world of rural society and on its double standard on sexual mores, arranged marriages, and the author's deconstruction of the myth of the warrior-hero (the negative portrayal of the promiscuous and violent behavior of Álvaro challenges the archetypal macho image of the guerrilla-fighter). Another subversive theme apparent to anyone familiar with Texas historiography is her direct challenge to the image of the Texas Ranger. Traditional histories of Texas, written until recently primarily by Anglo males, presented the Texas Rangers as macho Anglo warriors, products of a conquering army of noble fighters, wresting the frontier from barbarism. While this image has been largely debunked since the emergence of Chicana literary historical perspectives, González's portrayal predates these cases by decades (which may explain her difficulty in publishing the manuscript in the 1940s).

I have used this novel in both my Texas and Mexican American history classes and have found that its subversive themes create many open discussions over such issues as assimilation, parental interference in love and marriage, machismo, police brutality, and other lively topics.

The rediscovery of such lost treasures of the Chicana literary experience is essential for rectifying the historical vacuum that has largely omitted Mexican women's perspectives on historic events. Such recovered manuscripts serve as a light and a reminder that Mexican women have always been writing their own history, their own literature, and shaping their own destiny.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. A Mexican specialist, his interests include peasant social movement and agrarian unrest. An American of Arab ancestry, he has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

Assistant/Associate Professor Childhood and Special Education
Department of Education
TWO FULL-TIME POSITIONS

St. John Fisher College in Rochester, New York, invites applications at the rank of Assistant/Associate Professor in Childhood (Elementary) and Special Education. St. John Fisher College is an independent college serving over 2,000 students at a suburban campus. The College currently offers 26 majors and 11 graduate programs.

Rochester, New York, is noted for its excellent symphony orchestra as well as for its arts and science museums. Rochester also has a high concentration of some of the largest international corporations and best hospitals in the nation. Close proximity to the Finger Lakes region and the Adirondack Mountains is another asset to living in Rochester.

The Department of Education is committed to excellence in teacher education. The department values superior teaching, appreciation of diversity and service to the community.

The qualifications for these tenure track positions include:
- Ed.D. Ph.D. in Special Education or Childhood (Elementary) Education from an accredited institution or significant progress toward completion of the doctorate.
- Meaningful training and experience in both Childhood and Education required.
- Experience in Literacy Education is highly desirable.
- Three or more years of teaching experience desirable.
- Experience working with diverse populations and in urban areas desirable.
- Public school teaching experience desirable.

These 9-month positions entail both graduate and undergraduate teaching. Applicants should submit a cover letter describing their relevant academic interests and backgrounds; a curriculum vitae; evidence of teaching effectiveness; selected reprints of scholarly work; at least three letters of recommendation; and names, addresses, and telephone numbers of three additional references who have granted permission for direct contact to the Chair of the Search Committee.

Position available for September 2001. Review of applications will begin immediately and continue until the position is filled. St. John Fisher College values diversity and encourages individuals from under-represented populations to apply.

Application materials should be sent directly to:
Dr. Larry Pounds, Chair
Department of Education
St. John Fisher College
3600 East Avenue
Rochester, New York 14618

Woodrow Wilson School
Master's Degree in
Public Policy
Princeton University
Princeton, NJ 08544-1013

Applications must be received by January 2, 2002.

The Woodrow Wilson School also offers a two-year Master's degree in Public Affairs (M.F.A.) and a Ph.D. degree program.

Our M.P.P. program provides rising leaders in the international and domestic policy arenas an opportunity to expand their organizational skills and intellectual breadth to compete in an increasingly complex global environment.

The Princeton Difference. The resources of the Woodrow Wilson School and Princeton University provide the ideal setting for this rigorous one-year residential program. The School's faculty, curriculum, and research facilities are recognized throughout the world for excellence.

Financial Assistance. Our generous policy meets the full demonstrated needs of all admitted students. More than three-quarters of graduate students at the School receive financial aid, which for most includes full tuition and a stipend for living expenses. Thanks to a grant from the Christian A. Johnson Endeavor Foundation, special funding is available to candidates from the nonprofit and nongovernmental sectors.

Qualifications. Applicants must possess a minimum of 7 years of professional experience in domestic or international government agencies, and/or experience in the nonprofit sector. Successful candidates demonstrate creativity, leadership, a commitment to public service, and the intellectual capacity to thrive in a demanding academic setting.

COLUMBIA UNIVERSITY
IN THE CITY OF NEW YORK
Executive Director for Corporate and Foundation Relations

Columbia University, one of the country's great international institutions of higher education, seeks a highly motivated, entrepreneurial individual to build a professional team and lead the University's corporate and foundation relations program. The successful candidate will: attract multimillion-dollar grants for key initiatives; aggressively cultivate corporate support for large-scale and interdisciplinary projects. Build a corporate and foundation relations team that adds indispensable value to the University.

The requirements are: at least 10 years' experience in fund-raising; at least 5 years in corporate and foundation relations with a proven ability to initiate projects, build a program, and effect institutional change. Bachelor's degree; advanced degree preferred. Please apply to Lucy Solymar, Leodas Solymar: phone (781) 209-8960; fax: (781) 209-8961, or e-mail Lucy@LeodasSolymar.com

Columbia University is an affirmative action/equal opportunity employer.

UNIVERSITY OF MAINE

Director of Judicial Affairs

The Director of Judicial Affairs has two main functions: 1) adjudication of alleged violations of the Student Conduct Code and the administration of the University's student judicial affairs program, and 2) promotion, coordination, and presentation of programs in student development, ethics, community standards, and community development to enhance an appreciation for citizenship responsibility.

Applicants are required to have a graduate degree in higher education, social work, counseling, law or a related discipline (at time of employment), substantial work experience in higher education, and experience in student judicial systems, citizenship development, and/or community development programming is preferable. Applicants should have working knowledge of student development theory, mediation, residence hall communities, laws relating to student privacy and right-to-know. Excellent written and oral communication skills are essential.

A complete list of qualifications is available online at http://www.umanine.edu/hr/jobs/ This is a full-time, fiscal year position. Send letter of application, resume, and the names, addresses and telephone numbers of three (3) references to: Dr. George Crier, The University of Maine, 206 Winslow Hall, Orono, ME 04469-5922

criner@maine.edu

Applications and nominations will be accepted until the position is filled. Review begins June 29, 2001.

The University of Maine is an EO/AA employer.
Dean, Douglass College, Rutgers University

Rutgers, The State University of New Jersey, invites nominations and applications for the position of Dean of Douglass College.

Douglass is the largest undergraduate women's college in the United States, with approximately 5000 students, and has the distinction of being a college for women within a leading public research university (since its establishment in 1928 as the New Jersey College for Women). Rutgers provides an education of discovery for women as tomorrow's leaders in all areas, including the worlds of research, education, business, public policy, communication, and community service. In 1935 the College was renamed for Mabel Smith Douglas, its founder and first dean.

Douglass College is dedicated to the educational development, professional advancement, and personal achievement of women in contemporary society. Douglass offers a college environment in which women from diverse backgrounds are encouraged to develop their full potential, while taking advantage of the many programs of study and leadership training available in the larger university setting. The College's mission is to provide a learning environment as a center for research, teaching, and public service opportunities focusing on women, including the Douglass Project for Rutgers Women in Math, Science, and Engineering, which was honored with the National Science Foundation's 1999 White House President's Award for Excellence in Science, Mathematics, and Engineering Mentoring. There are specialized residence opportunities for undergraduates in math, science, and engineering, as well as seven language and cultural houses. Douglass also offers an international certificate program, several study abroad options, and leadership opportunities that include internships in the state and national capitals as well as internationally. The University's distinguished Department of Women's and Gender Studies is located at Douglass, as well as several research centers focusing on women and society.

Desired Qualifications: The University seeks a dean who can provide strong leadership to the College's students, collegiate staff, and the approximately 650 Douglass Faculty Fellows. The dean is the chief administrative officer of the College and reports to the Executive Dean of the Faculty of Arts and Sciences. The dean is responsible for advising the College's mission and overseeing the operations of the College in all areas, including fund raising, program development, academic policies, counseling, honor's programs, scholastic standing, student affairs, and budgeting. The dean works closely with the deans from the other three New Brunswick undergraduate colleges and with the deans of the New Brunswick faculties. The dean also participates in the governance body of the Institute for Women's Leadership, a consortium of six universities—Douglass College, the Department of Women's and Gender Studies, the Center for American Women and Politics, the Center for Women's Global Leadership, the Center for Women and Work, and the Institute for Research on Women—based on the Douglass campus and devoted to developing research and programs supportive of women's advancement and achievement.

Candidates with a traditional academic background should have an earned doctorate in an academic discipline and a proven record of excellence and accomplishment in teaching, scholarship, and service. Candidates from outside of the traditional academic disciplines should have educational credentials appropriate to their field, and a demonstrated record of excellence and accomplishment. The University seeks an individual who can work effectively in the context of the New Brunswick college structure, and who has demonstrated leadership as well as strong commitment to the education and professional advancement of women.

Review of applications will begin October 1st and continue until a suitable candidate is selected. Applications should include a letter of interest and a curriculum vitae. Nominations should be sent to: Chair, Douglass College Dean's Search Committee, Office of the University Vice President for Academic Affairs, Old Queens Building, Rutgers The State University of New Jersey, 85 Somerset Street, Room 302, New Brunswick, New Jersey 08903. To learn more about Douglass College, visit the College website:

Admissions Officers

Multiple Positions

The Office of Undergraduate Admissions is seeking four (4) creative and energetic individuals who share our commitment to excellence. On behalf of a comprehensive public University that holds land, sea and space grant charters, we administer an extensive outreach program and a selective admission program that bring to UNH a talented and increasingly diverse group of students. Building upon a strong professional staff, the current search will allow us to identify new colleagues whose own experiences and abilities will both complement and enhance our staff and our efforts. Specific areas of interest in this search include: outreach to multicultural students, families, and communities; administering on-campus and off-campus recruitment programming; and coordinating the efforts of alumni, parents, and student representatives. These are full-time opportunities. The Associate Director level has been defined for a position related to Multicultural Outreach and Inclusion. The rank for each of the other three positions will be determined based on experience and qualifications.

RESPONSIBILITIES: The Associate Director for Multicultural Outreach and Inclusion will provide overarching leadership to the University’s efforts to increase the diversity of the undergraduate student population through the development of effective partnerships, programming, and communication strategies. Effective leadership, management, and communication skills are essential.

General responsibilities for all four (4) positions will include recruitment travel within assigned territories to represent UNH at high school and college fair programs; communication with prospective students and their parents; establishing and maintaining good working relationships with secondary school counselors and others who are influential in the college planning process; application review, and other duties as assigned. Additional responsibilities may include leadership and supervision related to the supervision of ongoing admissions office initiatives such as the student volunteer efforts, alumni admissions program, on-campus visitation, and early outreach programming.

MINIMUM QUALIFICATIONS: A Baccalaureate degree is required for each position. Consideration for a position at the Associate Director level requires five to seven years of relevant experience related to college admissions; a Master’s degree is preferred. One to three years of relevant experience are expected for consideration for a position at the Assistant Director level. Three to five years of relevant experience are required for consideration for a position at the Senior Assistant Director level. Candidates for senior positions should present evidence of effective supervisory experience. All candidates should demonstrate strong oral and written communication skills, significant presentation skills, and the ability to build and manage relationships with organizational units. Ability to work independently and with a team, sense of humor, creativity, flexibility, strong work ethic and the ability to interact effectively with diverse populations are essential. Valid driver’s license and willingness to travel evening, and some weekends is required. Salary for all four positions will commensurate with education and experience.

The review of candidates will begin immediately and continue until the positions are filled. Qualified candidates should submit a cover letter, resume, and names, addresses and telephone numbers of 3 references to:

Ms. Carleen Kruczek
Associate Director for Admissions Operations
University of New Hampshire
4 Garrison Avenue, Durham, NH 03824

UNH is committed to excellence through diversity among its faculty and strongly encourages women and minorities to apply.

The College of New Jersey

Vice President for Development

The College of New Jersey seeks nominations and expressions of interest for the position of Vice President for Development.

Founded in 1855 as the New Jersey State Normal School, The College of New Jersey is one of the country’s leading public institutions of higher education, offering broad and diverse programs for academic and co-curricular programs. The College applies highly selective admissions standards and provides students with challenging undergraduate and targeted graduate programs enriched by a prestigious faculty, small classes, student leadership development, and a community-oriented residential experience. The schools of Art, Music, and Media; Business, Government, and Society; Education; Engineering; Nursing; and Science offer more than fifty liberal arts and professional programs on a picturesque residential campus of 289 acres in suburban Ewing, New Jersey. The College of New Jersey is conveniently located mid-point between New York City and Philadelphia.

The Vice President for Development reports to the President and is responsible for: administering all facets of The College's development program including the design, planning and execution of capital campaigns; implementation of programs and activities designed to increase financial contributions; supervision of professional and support staff; management of departmental budgets; recruitment, training and support of volunteers; oversight of The College's alumni and foundation funds.

The College seeks an outstanding professional in the development field with proven success in fund raising, especially in the area of major gifts. The successful candidate will demonstrate extensive expertise in all areas of development, including development of annual gifts, capital campaigns, a commitment to and knowledge of higher education, and experience with managing and motivating volunteers. Strong supervisory, administrative and organizational skills, written and oral communication, and interpersonal skills are essential. A bachelor's degree is required, a master's degree is preferred.

Nominations and expressions of interest in this position may be forwarded to:

DARTMOUTH COLLEGE

STUDENT COUNSELING CENTER

Dartmouth College is recruiting a talented therapist to join the diverse staff of its Counseling and Human Development Office. Candidates should have a masters or doctoral level counseling degree, or be a clinical nurse specialist. The successful applicant will be expected to demonstrate multicultural experience and competency in clinical and educational work. Clinical responsibilities include: individual, couples, and group counseling; educational responsibilities include participating in in-campus outreach and presentations; training, experience, and interest in some of the following: substance abuse, cognitive behavioral therapy, chronic illness, anxiety, depression, and personality disorders.

APPLICATION DEADLINE: Application to be on file by July 31, 2001

NCCCT, a Connecticut Community College, is an AA/OEO M/F/Protected group members are strongly encouraged to apply.

Purdue University invites applications and nominations for Dean, School of Education. The school has approximately 110 faculty, 80 staff, 1550 graduate students, and 2250 undergraduates on three campuses, (West Lafayette, Calumet, and North Central) in the Purdue University system. Another 850 undergraduates from other schools are in its teacher education programs at West Lafayette. Formed in 1899, the School of Education is a flourishing academic community poised to make major contributions to educational excellence in the decades ahead. You can visit the School on the web:

www.soe.purdue.edu

As the school's chief academic officer, the dean is expected to support an intellectual and cultural environment that encourages research and program development in addition to the field of education; to facilitate collaboration among programs within the School and the University, including the regional campuses; and to coordinate the School's efforts with school districts, other colleges and communities, and with state, federal, and international agencies.

Major qualifications for the position include academic accomplishments as a scholar and teacher that meet the standards for a tenure appointment at the rank of Professor within one of the School's departments; a successful record of administrative experience in higher education; skills in securing and allocating resources to provide quality undergraduate and graduate instruction, research, public service and outreach activities; ability to work with other deans and administrators in developing goals and programs; experience in strategic planning, policies and procedures that reflect the increasing diversity of faculty, staff, and students; and experience and skills in working with institutions of higher education and other agencies.

Nominations and applications should be sent to Dean Margaret Moon Rowe, Chair, Selection Advisory Committee for Dean of Education, LAEB 2590, Purdue University, West Lafayette, Indiana 47907. Nominations and applications should be sent to Dean Margaret Moon Rowe, Chair, Selection Advisory Committee for Dean of Education, LAEB 2590, Purdue University, West Lafayette, Indiana 47907. Telephone (765) 494-3641. Applicants must submit a statement of interest in the position that also expresses briefly their concept of a School of Education within a comprehensive university; a curriculum vitae, and the names and addresses of at least four references. Purdue's strong commitment to diversity makes applications from women and members of minority groups especially welcome.

Purdue University is an equal opportunity/affirmative action employer.

Associate Vice Chancellor for Administration,
University of Houston System
Associate Vice President for Administration,
University of Houston

The University of Houston System and the University of Houston are seeking qualified candidates to fill the position of Associate Vice Chancellor for Administration, University of Houston System and Associate Vice President for Administration, University of Houston. While both components of this position are important, the major part of time and effort will be devoted to leadership at the University of Houston, with additional responsibility for coordinating administrative activities among the four UH System universities (UH, the University of Houston, UH-Clear Lake, UH-Downtown, and UH-Central). The University of Houston Carnegie Foundation classification is a Doctoral/Research University-Extensive with approximately 35,000 students and an annual operating budget of over $440 million. The University of Houston System is an urban, public university system comprised of four universities with a total enrollment of over 60,000 students and an annual budget in excess of $778 million. The main campus encompasses 500 acres of parks, fountains, plazas, sculptures, and recreational fields surrounding modern classroom, laboratory, and study facilities in the heart of the nation's fourth largest city.

Position Description
The position reports directly to the Vice Chancellor of Administration and Finance, University of Houston System and the Vice President of Administration and Finance, University of Houston. Principal responsibilities include the following:

Serve as an advisory and policy-making role as part of the Division of Administration and Finance team on matters of corporate and business development, procurement, and campus auxiliary activities. Provides leadership and strategic direction in developing and implementing entrepreneurial partnership and corporate fundraising activities. Provides leadership and strategic direction in the management of corporate administration, purchasing, printing, postal services, parking, and transportation, fleet management, food service contract, bookstore contract, campus debit card, travel management, chemical and biological safety, radiation safety, fire and physical safety, risk management, and police operations. Provides leadership, vision, and direction for the University of Houston System in the development and implementation of appropriate system-wide administrative policies and procedures.

Qualifications
Bachelor's degree required. A graduate degree preferred. A minimum of seven years' administrative experience in a senior management position is essential. Experience at the level of a senior management position is preferred. A broad understanding of the complexities of higher education administration, and outstanding communication skills.

Nomination and Application
Nominations and applications, including resumes and three references, should be submitted to:

Ms. Randy J. Harris
Vice Chancellor for Administration and Finance,
University of Houston System
Vice President for Administration and Finance,
University of Houston
236 E Cullen Building
Houston, Texas 77204-2016

The deadline for applications is July 31, 2001.

The University of Houston is an Equal Opportunity/Affirmative Action Institution. Minorities, women, veterans, and persons with disabilities are encouraged to apply.

The University of Houston is an Equal Opportunity/Affirmative Action Institution. Minorities, women, veterans, and persons with disabilities are encouraged to apply.
Dean, College of Arts & Sciences

Arizona State University West, located in Phoenix, Arizona, seeks a dean to lead its College of Arts and Sciences. The College consists of six interdisciplinary departments offering 12 traditional disciplinary degrees and six interdisciplinary degrees. One hundred faculty and staff work with a current enrollment of 1,020 undergraduate majors.

The dean reports directly to the Provost and works with other campus deans to develop interdisciplinary approaches to teaching, research, and service. He/she represents the College both within and outside the University. The dean must be committed to working with faculty -- both through the administrative structure and faculty governance system -- to achieve university academic goals in research and learning and to further the campus goals of diversity, equal opportunity, and affirmative action.

Responsibilities include budget, planning, development, personnel decisions, student academic affairs, faculty development, promotion of research, and planning and implementation of degree and non-degree programs.

QUALIFICATIONS

REQUIRED
A successful candidate must exhibit leadership and strategic vision, and have:

- Relevant administrative experience.
- A demonstrated commitment to cultural diversity that includes supporting the diversity of the faculty, students, and staff.
- A terminal degree in a discipline and a strong record in research, teaching, and service that merits appointment as a Professor with tenure in a department of the College.
- A demonstrated commitment to promoting excellence in research and creative activities.
- Demonstrated effective interpersonal and communication skills.
- A demonstrated commitment to excellence in teaching.
- A demonstrated understanding of the integration of teaching, research, and service.
- A demonstrated commitment to working with multiple constituencies on and off campus.

DESIRED
Preference will be given to candidates with demonstrated experience in:

- Organizational change.
- Evaluation of faculty for promotion and tenure purposes.
- Budget management.
- Curriculum and program development and assessment.
- Technology applications in teaching and research.

APPLICATION PROCEDURE

Applicants must address how they meet the qualifications listed above in their letters of application. Please send letter of application, curriculum vitae and the names, addresses, and telephone numbers of three referees to:

Dean Michael A. Awender, Chair, Search Committee
3935 South Campus Drive
Arizona State University West
Phoenix, Arizona 85069-7100

For more information: 602/543-3254 Fax: 602/543-7731

Confidentiality of all applications will be maintained. Referees will be contacted only after permission from the candidate has been obtained.

Arizona State University West is an Equal Opportunity/Affirmative Action Employer that actively seeks diversity among applicants and promotes a diverse work force.

APPLICATION DEADLINE
August 1, 2001, or the 1st Monday of each week thereafter until the position is filled.

STARTING DATE:
January 1, 2002, or as negotiated.
Endowed Professorship in Anti-Violence
Mandel School of Applied Social Sciences

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for the Dr. Semri J. and Ruth W. Begun Professor in anti-violence. The position involves primary responsibility for leading the newly established Begun Center for Violence Prevention, Research and Education, with secondary responsibility for teaching and service in the Master's and Doctoral programs. The goals of the Begun Center include: (1) forming interdisciplinary academic partnerships to research and analyze the causes and effects of violent behavior; (2) combining advanced research methods and state-of-the-art technology to create a system of identifying “at-risk” populations; (3) establishing active networks among parents, educators and key community constituencies so as to effectively intervene in the cycle of violence; and (4) building on existing interventions and curricula that address the persistent and emerging social stressors associated with youth violence. The Professorship will be co-terminus with the Directorship of the Begun Center.

Requirements will include a M.D. or Ph.D. in Social Work, Public Policy, Psychology, Criminology, Anthropology, or a related science. The Director will lead and manage all Center activities, including research, training, advocacy, and technical assistance. The Director must be considered an expert in the field of violence prevention and have made significant contributions to scholarly literature. As such, candidates should possess a record of scholarship, teaching, and service for a tenure track or tenured appointment at the School. The Director will be responsible for securing ongoing funding for the center’s programs and initiatives. The ideal candidate must also have a firm understanding of the funding community and be able to identify new opportunities.

The Mandel School of Applied Social Sciences currently offers Master’s and Doctoral degrees to over 300 students. We offer joint degrees in Social Work and Law, Social Work and Nonprofit Management and Social Work and Business. MSASS faculty is multidisciplinary representing professions such as social work, psychology, sociology, public health and economics. A number of MSASS faculty hold secondary appointments with other departments and faculty have collaborative projects with other departments. The School has a long history community based agency based research with the centers and institutes having major roles in these initiatives, such as the Center on Urban Poverty and Social Change, and the Cuyahoga County Community Mental Health Institute.

Applicants must submit a curriculum vita and five references. Please send applications or nominations to:

Applications will be accepted until the position is filled.

CASE WESTERN RESERVE UNIVERSITY
CWRU is an Equal Opportunity/Affirmative Action Employer
DIRECTOR OF ADVANCEMENT OPERATIONS

Founded in 1821, Amherst College is among the nation’s most highly selective liberal arts colleges, with an enrollment of 1,600 students and 680 faculty and staff. Amherst is located in the Pioneer Valley of Western Massachusetts and participates with Hampshire, Mount Holyoke, and Smith Colleges, and the University of Massachusetts in the Five College Consortium.

Amherst seeks an experienced, results-oriented Director of Advancement Operations as the College concludes a successful, comprehensive campaign. Reporting to the Chief Advancement Officer, the Director will serve as a key senior manager on a 60-person team of Alumni & Parent Programs, Development, Public Affairs, and Advancement Operations professionals. Primary responsibilities will include administrative services (budget, human resources, and planning), information services (computer operations, data reporting, and management, gift and pledge processing, application development, and user support), donor relations (gift acknowledgment and crediting, stewardship, named gift opportunities, and special events), and donor research (research and records).

The successful candidate will have the ability to establish policy, motivate talented colleagues, and manage internal operations in a collegial setting. Bachelor’s degree or equivalent required. Minimum of five years of progressively responsible management experience, preferably in higher education. Previous advancement experience, especially in the area of development and donor relations, will be given very favorable consideration. Excellent supervisory and planning skills, a commitment to the thoughtful use of technology, service-mindedness, and the ability to lead in a dynamic work environment are all essential.

Interested candidates should forward a letter of application and resume to: Office of Human Resources, Amherst College, P.O. Box 5000, Amherst, MA 01002-5000. A review of applications will begin on August 15, 2001 and continue until the positions are filled.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities and persons with disabilities to apply.

ASSISTANT DIRECTOR OF MULTICULTURAL SERVICES

Kutztown University enrolls approximately 8,200 students in graduate and undergraduate programs. The University is located in the borough of Kutztown in a charming rural setting that is within twenty minutes driving time of the diverse metropolitan areas of Allentown/Reading and Reading, and within thirty minutes of the Philadelphia metropolitan area. The University is searching for employees who have extensive experience with diverse populations, especially African American and Latino populations represented in these adjoining metropolitan areas.

Assistant Director of Multicultural Services (Kutztown University is seeking a highly motivated, energetic individual to initiate and implement educational, cultural, and social activities concerning multicultural programming relevant to student retention. Program development will focus on retention of African American and Latino American academic, cultural, and social experiences and promote interaction and services between multicultural and majority populations. Primary responsibilities include: student leadership development, race relations and inter-cultural programming, manage resource library, and initiate collaborations with the Multicultural Center and other university departments. Some evening and weekend hours will be required. Three to five years professional experience in Multicultural programming and/or Higher Education in the area of student retention required. Bachelor’s degree required, Master’s degree preferred. Please send a letter of interest, resume, and names and addresses of three references to: Assistant Director of Multicultural Services Search, Department of Human Resources, Kutztown University, P.O. Box 730, Kutztown, PA 19530. Review of applications will begin on July 23, 2001 and will continue until positions are filled.

Successful interview and demonstration of ability are requisite qualifications for all positions. Kutztown University is a member of Pennsylvania’s State System of Higher Education and is an AA/EEO employer.

For more details, please see our website at: www.kutztown.edu/employment/nonint

ASSISTANT DIRECTOR of Student Activities for Programs University Unions and Student Activities

Virginia Tech invites applications/nominations for the professional faculty position of Assistant Director of Student Activities for Programs in the department of University Unions and Student Activities. The Assistant Director supervises two full-time faculty Program Coordinators, a full-time Accounts Manager, a full-time Office Manager and two Graduate Assistants. The Assistant Director is the senior leader for student programming on a campus of 25,600 students and oversees combined program budgets of nearly $800,000 annually. The Office of Program Advising and Student Entertainment (PASE) consults with any student organization asking for programming help and maintains ongoing advisement of the Virginia Tech Union (union program board); the Black Student Alliance; the Lesbian, Gay, Bisexual and Transgender Alliance; and the Homecoming Board. The Assistant Director provides overall leadership of campus programming (175-200 programs per year), directly advises Lively Arts programs and the Homecoming Board, negotiates program contracts, oversees a student organization computer lab, and serves as a member of the UUSA Leadership Group.

The successful candidate for this position will have at least a master’s degree in college student personnel or a related area and at least 5 years of post-master’s experience with at least 3 years full-time experience in union programming. Salary and benefits will be highly competitive and commensurate with experience.

Review of applications will begin immediately and applications will be accepted until a successful candidate is identified. Desired start date is August 15, 2001 but a date as late as December 1 can be negotiated. To apply, send an application letter and a current resume including names and phone numbers of at least four references to:

Ms. Nicki Cantrell
Search Committee Chair
225 Squires Student Center (0138)
Virginia Tech
Blacksburg, VA 24061

Applications may also be sent via e-mail: cantrell@vt.edu. For more information on Virginia Tech and UUSA visit our web site: www.uusa.vt.edu.

Virginia Tech has a strong commitment to the principles of diversity and in that spirit, seeks a broad spectrum of candidates including women, minorities, and people with disabilities.

Individuals with disabilities desiring accommodations in the application process should contact Nicki Cantrell at 540-231-5431 or the Virginia Tech Telecommunications Relay Service at 1-800-528-1120.
Located on four campuses and two centers in suburban Atlanta, Georgia Perimeter College provides an attractive and progressive learning environment leading to an Associate's degree for a motivated, multicultural student body of approximately 14,000. We offer you the chance to become a vital part of this thriving academic community.

All positions require an ALA-accredited Master's degree in library or information science. Candidates must have experience with online library systems, particularly GALILEO, Gil, and Internet resources with a strong public service commitment.

The following positions are available for 2001-02. Salary placement is commensurate with education and experience, entry-level salary $33,541 with excellent benefits. The starting date for all positions is ASAP. The College reserves the right to extend searches, or in the event of budget restrictions, not offer positions advertised.

**Information Services/Serials Librarian**
Provides library instruction and research assistance to students, faculty, and staff. Primarily responsible for maintaining serials, coordinating local serials information disseminated to online databases. **Position #02-42.**

DePauw University invites applications and nominations for the position of Director of the Grotver L. Hartman Center for Civic Education and Leadership. The successful candidate will provide leadership and vision for the Hartman Center and will have overall responsibility for assuring that the mission and goals of the Hartman Center are accomplished. The Director of the Hartman Center provides leadership development and service internships for students; serves as a significant mentor for students, supervises a staff of six professionals and manages a budget of $500,000. The Director advises 33 student coordinators involved in various volunteer service programs (including the Bonner Scholars Program) and coordinates the work of 30 student civic interns to effect the best possible involvement of students in leadership and community service activities and the creation of a life-long service ethic. The Director works collaboratively with the Compton Center and Religious Life Center to ensure integrated developmental services as our students consider ethical, social justice and civic issues.

Candidates must have a commitment to and history of strong belief in mentoring students, demonstrated experience working with young adults and managing programs in volunteer or community service, social justice or religious service activities, and evidence of a positive regard for the power of students and the ability to empower others. Qualifications for this position include advanced degree in related field (college student personnel, higher education, divinity, non-profit management, etc.) or other advanced academic preparation; five or more years of senior administrative experience in an educational setting or equivalent; and experience working collaboratively with other administrators, faculty and staff to advance institutional goals. Must also have a willingness to be accessible to students and attend all major Hartman Center programs; expertise in the main functions of service learning, leadership development, civic education and curriculum development; demonstrated experience with and sensitivity and commitment to individuals of diverse cultural backgrounds; excellent written, oral and interpersonal skills; and an understanding of and/or experience in a residential, liberal arts college environment.

Send letter of application, resume, references and have three letters of recommendation sent to: Director of the Hartman Center Search, Office of the Vice President for Student Services, Mezzanine, Administration Building, DePauw University, 333 South Locust Street, Greencastle, IN 46135. Review of applications will begin on July 25, 2001 and continue until the position is filled.

DePauw University is an Affirmative Action, Equal Opportunity employer. Women and members of under-represented groups are encouraged to apply.

Penn State University

DIRECTOR OF AFFIRMATIVE ACTION

The Pennsylvania State University is seeking a Director of Affirmative Action to oversee the Office of Affirmative Action and the Diversity Support and Education Center. The Director is responsible for:

- Developing, implementing, and maintaining the University's Affirmative Action Compliance Plan within federal and state statutes and regulations;
- Responding to complaints and concerns of alleged discrimination and harassment;
- Coordinating compliance with disability and equity laws and policies;
- Representing the University with external regulatory and human rights agencies;
- Coordinating and providing educational training throughout the University on sexual harassment, affirmative action and diversity.

A Master's degree (Ph.D. or J.D. preferred), experience working with affirmative action/equal opportunity laws and a demonstrated commitment to diversity are required. Excellent verbal and written communication skills, the ability to work collaboratively with diverse constituents in the handling of confidential and sensitive issues, and effective interpersonal and administrative skills are essential.

Please submit a detailed letter of interest and resume along with three (3) names and addresses of references to: Chair, AA Screening Committee, Penn State, 201 Old Main - Pos #: H-11190, University Park, PA 16802; Email: jsl1@psu.edu, FAX: (814) 863-4631

The Committee will begin screening applications September 4, 2001. Please visit our Web site at: http://www.psu.edu

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
CENSUS AND CANON CONSIDERED

Recently, the identity problem has become complicated—the last census provided so many options by which to identify oneself.

Today, more than ever before, we Hispanics are hyphenated. Some have a father who is Hispanic, hence the Spanish surname, while having an Irish-American born mother. Others are Cuban-American of German descent. Still others, like my great nephew, are Mexican, Italian, and Albanian Jew as a fifth-generation American.

In academia, the problem has been addressed by umbrellas that fold, because in their attempt to cover all, they exclude. Centers for Chicano Studies, Latin American Studies, Caribbean Studies, Afro-Hispanic Studies are noble attempts to identify part of the Hispanic mix taking shape in America. But stereotyping took place forty years ago, when professors and students first demanded ethnic and cultural studies in academia.

But the canons, those sacrosanct components of all departments that determine by some historical and traditional formula the must-be-read texts of any discipline in the arts and humanities, would not allow for an incipient new literature that was not British, Germanic, French, and American with a WASP tinge. Those who suffered those interminable department and across-the-curriculum meetings will recall how often Shakespeare, Cervantes, Lope, and Calderón dominated the discussion to find texts that would stand the so-called test of time.

Eventually, Latin American literature was given a space in the pantheon of literature, and only because the Chilean Gabriela Mistral, the Guatemalan Miguel Angel Asturias, the Colombian Gabriel García Márquez, and later the Mexican Octavio Paz became members of a different Olympus, where so very few go—the Nobel in Literature. But what about those born in the U.S. of Hispanic origin who wrote in inglés? If they were lucky, they got some consideration in an ethnic studies department, and maybe in a certificate program. Because of overwhelming peer pressure, a “balkanization” took place that created entrenched minds that would fight to survive at any cost. Chicano studies fought hard, almost too hard, to get a credible space in academia. The main body of the arts and humanities did not want Chicano literature as part of its canon. Departments were established for the overflow.

For better or for worse, these departments with an ethnic and cultural bent relied on a literature that was primarily autobiographical; from *Pocho* (1959) by José Antonio Villareal, to *Peel My Love Like an Onion* (1999) by Ana Castillo.

These works, self-focused and personal, did not threaten the canons. And the more self-deprecatory and the greater the flagellation of self, the more interested publishers were in making them known. As one Hispanic writer told me, “If you scraped the brown skin off your face, or had a gender identity crisis, agents and N.Y. publishers were interested in what you had to say. They wanted a personal story with some level of low self-esteem.” Now Ilan Stavans writes about growing up as a Mexican-Jew in Mexico City. More of the same.

However, if you follow Melville, Steinbeck, Hemingway, Faulkner, or Fitzgerald in America, or Tolstoy, Dostoevsky, and Greene in world literature, and write about the human condition that goes beyond the “ghetto” or “barrio,” you are ostracized by academia and critics, who do not know where to place you. Consider Danny Santiago (aka Daniel Lewis James) and Thomas Sánchez. When Danny wrote *Famous All Over Town* (1983), his novel was hailed a great Hispanic first. When it was discovered he was not Hispanic, Chicano Studies and American Studies in literature did not know where to place James, what to do with this spiritual “wannabe” Hispanic. Thomas Sánchez, a writer with Iberian roots in Spain and Portugal, was praised for *Rabbit Boss* (1973), a milestone novel of four generations of the Washo Indians of California. He wrote *Zoot-Suit Murders* (1978) about the L.A. “Pachuco Riots”; and *Mile Zero* (1989) about derelicts in Key West. His latest, *Day of the Bees* (2000) about love in the midst of the French Resistance in WW II, received mixed reviews. Hispanic academics who have been “balkanized” and American critics who do not know what to do with an author who breaks out of a category put Santiago and Sanchez in a quandary, because they do not fit a stereotype.

The recent census revealed that Hispanic academics and publishers must revise their concept of an Hispanic American. A time will come in the new millennium when an Hispanic American will write the great American novel that will form part of the canon of American and world class literature. Will Hispanic academics be ready to seize this moment when it comes? And will publishers be ready to let go of their stereotypes of Hispanic literature? Not all morenos scarpe the skin off their face.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.
AFFIRMATIVE ACTION IN THE COURTS

The Michigan Union

Advanced Placement Enrollment Latina in the White House Job Searching Online
ASIAN/PACIFIC AMERICAN STUDIES:  Assistant Professor, tenure track. Joint appointment in anthropology and sociology, specializing in Asian/Pacific American Studies. Specialization in comparative ethnic studies especially welcome. Subfields should include one or more of the following areas: U.S. immigration experience, qualitative research methods, urban social issues, diasporic communities; gender studies. Appointee will be encouraged to participate in the Center for Ethnicities, Communities and Social Policy. Applicants must have teaching experience and a Ph.D. in anthropology, sociology or ethnic studies at the time of appointment. Send letter of application, CV, statement of teaching and research interests, writing sample, syllabus for a course in Asian/Pacific American Studies, and three current letters of recommendation to Search Committee Chair, Department of Sociology. Review of applications will begin on November 15, 2001. Preliminary interviews will be conducted at the ASA meetings in Austin, CA and at the AAA meetings in Washington, DC.

COMPUTATIONAL SCIENTIST:  Assistant Professor, tenure track. The candidate should be a scientist who uses computer modeling as a primary research tool. The successful candidate will be expected to teach a course in scientific computation, courses in algorithm design for scientific problem solving, including numerical model development and applications, as well as introductory and advanced courses in his or her scientific field of specialty. The candidate will also be expected to develop an active, funded research program involving undergraduate and graduate students. The position will be hosted by one of the college’s natural science departments (Biology, Chemistry, Geology, or Physics), depending on the successful candidate’s area of expertise. A Ph.D. at the time of appointment is required. Applications should include CV, a description of teaching philosophy and experience, and current letters from at least three professional references. Applications should be sent to P. Piacrelli, Department of Geology. Review of applications will begin December 10, 2001. For more information about the position, visit the web pages of the individual departments.

ECONOMICS:  Assistant Professor, tenure track position in the fields of international trade and economic development. Both new Ph.D.s and individuals with additional teaching and research experience are invited to apply. In addition to courses in international trade and economic development, candidates must be willing to teach a one-semester introductory course and should also be willing to teach a course in microeconomic theory, statistics, or econometrics. The candidate’s background in trade and/ or development should include an area specialty in Africa, Asia, Europe, or Latin America. A strong commitment to teaching and to continuing research is required. The successful candidate will have the opportunity to interact with faculty pursuing research on international issues from a range of disciplinary perspectives through Bryn Mawr’s recently established Center for International Studies. Send CV, three current recommendation letters, evidence of excellence in teaching, and a writing sample to Lorraine Kirschen, Department of Economics. To be assured of consideration for interviews at the ASSA meeting in Atlanta, complete applications must be received by December 1, 2001.

FILM STUDIES:  Assistant Professor, tenure track. Teach all levels, undergraduate through graduate. Ph.D. required, teaching experience desired. Applicants must have a broad understanding of cinema history, criticism, and theory in the aesthetic and cultural contexts of the worldwide production, consumption, and interpretation of films. Teaching responsibilities may include survey courses of international genres and national schools, specialized topical seminars (e.g., feminist film theory at undergraduate and graduate levels, and possibly in cross-disciplinary College Seminar program. Appointee will be a member of the department of History of Art, possibly jointly with another of the humanities departments, and will be expected to participate in the College’s interdisciplinary Center for Visual Culture. Review of application will begin December 1, 2001. Send letter of application, CV, description of publication projects, statement of teaching interests, a writing sample, and three current letters of reference to: Steven Z. Levine, Chair, Department of History of Art.

LATIN:  tenured position in Latin literature at the rank of Assistant or Associate Professor. The position will involve teaching of Latin at all levels, undergraduate and graduate, and Greek at the undergraduate level, in addition to courses in classical culture and society. Applications from those with special interests in art and material culture, social history or late antiquity will be especially welcome. Applications should be addressed to Professor R.T. Scott, Chair, Department of Greek, Latin, and Ancient History, and must be complete with writing sample(s) and three current letters of reference. Review of applications will begin December 10, 2001. The departmental search committee expects to conduct some interviews at the annual A.I.A./A.P.A. meeting in Philadelphia in early January 2002.

LATIN AMERICAN URBAN STUDIES:  Assistant Professor, tenure track, in the Growth and Structure of Cities Program, an interdisciplinary undergraduate major combining work in the history of architecture, urban design, and the built environment with socio-cultural and policy studies. We seek a versatile specialist in the study of Latin American cities, with Ph.D. or the equivalent in Latin American Studies, urban studies, geography, anthropology, sociology, history, planning, political science or economics. Publications and teaching experience desirable. Candidates should be able to teach both quantitative and qualitative methods and to participate fully in a program that focuses equally on the urban built environment and social and cultural processes. Teaching five courses annually (at all undergraduate levels, and includes the senior research seminar) and possible participation in the College’s concentration in Hispanic, and Hispanic-American Studies and the interdisciplinary Center for International Studies. Send CV, three current letters of recommendation, sample publications/writings and sample syllabi. Review of applications will begin November 15. Gary McDonough, Search Committee Chair, Growth and Structure of Cities Program. E-mail gmdconog@brynmawr.edu.

POLITICAL SCIENCE/PHILOSOPHY:  Assistant Professor, tenure track, for a newly created position in legal studies. While the appointed tenue-home will be in the Political Science Department, we seek a Ph.D. in Philosophy, Political Science, or a related field whose work and teaching focuses on various aspects of the law, both within and beyond the borders of the contemporary U.S. Qualified candidates will have a philosophical orientation toward law plus the belief that the study of constitutional law is a good way to introduce students to such an orientation. Competence in the history of legal and political philosophy is expected. The successful candidate will offer an introductory course in Constitutional Law each year, plus intermediate and upper-level undergraduate courses in areas such as the following: legal theory and jurisprudence, philosophy of law, law and literature, law and ethics, law and cultural studies, feminism, legal theory, comparative law. Most of these will be new to our curriculum, and we seek applicants who welcome a considerable degree of freedom and responsibility in establishing such courses. Candidates should also be disposed toward interdisciplinary work, and will contribute to our cross-disciplinary College Seminar program for first and second-year students. Send letter of application, CV, writing sample, and three current letters of reference to Lorraine Kirschen, Secretary, Legal Studies Search Committee. If you have questions about the position, please email Stephen Salkeve, Chair of the Legal Studies Search Committee, at salskeve@brynmawr.edu.

RUSSIAN:  Assistant Professor, tenure track. Primary specialization in twentieth-century literature, ability to teach courses in post-Soviet literature and culture and some department administrative experience highly desirable. Requirements: Ph.D. in hand, native or native-like Russian, teaching experience in Russian language and literature at all levels, strong commitment to research and publication. Primary responsibilities include teaching five courses per year in Russian language, literature and culture serving as undergraduate major advisor. Review of applications will begin November 19, 2001. Send letter of application, CV, and three current letters of recommendation to Elizabeth Chereesh Allen, Chair, Department of Russian.

SPANISH:  tenure track, open rank. Specialist in 19th and/or 20th-century Peninsular Literature. We seek a scholar with an excellent publication record and/or potential plus a firm commitment to teaching a variety of courses ranging from advanced literature and culture to all levels of language instruction. Candidates must be native or near-native fluency in Spanish. Send letter of application, curriculum vitae, and writing sample. Applicants at rank of Assistant or Associate Professor should also submit three current letters of recommendation; those at the rank of Full Professor should submit the names and addresses of at least three referees. Review of applications will begin November 15, 2001. Maria Cristina Quintero Chair, Department of Spanish.

IN NOTA PENNA!
Chicanos and Higher Education back cover

Cover Photo Courtesy of The University of Michigan
Most Hispanics in this country live either in middle-income or low-income families. A few Hispanic families have moved up to a high-income existence, but very few. It is thus particularly distressing to note that one in six children in America lives in poverty, and many are Hispanic.

Poor and middle-income families are finding it harder to make ends meet, according to the Children's Defense Fund annual "green book." The report tracks the welfare realities of America's children. It is noted that government poverty figures for 1999 showed more than 12 million of America's children lived below the federal poverty level of $13,290 a year for a three-person family. It is astounding to read that the U.S. child poverty rate is roughly twice that of Canada and Germany, according to the report, and at least six times higher than that of France, Belgium, or Austria.

In releasing the report, Marian Wright Edelman, founder of the Children's Defense Fund, a nonprofit advocacy group, stated, "It's time to build a mighty movement for children in the richest and most powerful nation on Earth."

After 10 years of a raging bull market on Wall Street, which reflected a booming economy and an era of unparalleled prosperity, we find vast discrepancies among the nation's population. The Fund's report indicates that so many children live in poverty because of their parents' low-paying jobs, an increase in single-parent families, and a lack of strong government support for low- and moderate-income families.

Susan Martínez, vice president for policy at the Fund, noted, "Parents are in the workforce but are not able to earn enough to lift them out of poverty. We need to get people into higher-paying jobs and get them good child care, good health care, and other things. The problem is not that parents are not caring or not working. The main problem is that many of the working poor have jobs that do not provide benefits, are frequently seasonal, and simply do not pay enough money.

The scourge of single-parent families is vivid and deleterious. Children living with married parents are far less likely to be poor--8.4 percent of children in married-couple families were poor in 1999 compared with 42 percent of all children with a single mother. The societal realities that still produce thousands of single mothers must be addressed, it will not go away by itself.

In March 2000, the report said two out of three mothers worked outside the home, up from fewer than one in two 20 years ago. The biggest employment increase was among low-income, single mothers. They are clearly trying to be self-sufficient. But the report also states that they were spending more and more on child-care costs but not earning better wages to offset that expense. This is not a new phenomenon. Many a so-called "welfare mother" has found it difficult (if not impossible) to remain in the low-paying jobs she can secure. It is difficult because she does not earn enough to pay for quality child care while she works. Furthermore, her children frequently lose their government-subsidized health benefits once she is employed, and her job does not provide comparable health benefits.

Looking at just one variable, the report notes that poor families spent 35 percent of their income on childcare, compared with the 7 percent paid by richer families.

Highlighting what was identified as a child-care crisis in America, the report said nearly 7 million children between the ages of five and 14 were forced to care for themselves on a regular basis, without any adult supervision, because a parent was at work.

Inadequate Health-care Coverage

The report reflects on the inadequate health-care coverage that is a reality for millions of children. It is pervasive and spread throughout the rural and urban areas where the poor live. But there had been some improvement in recent years. In 1999, 10.8 million children aged 18 and under lacked health coverage, down from 11.9 million in 1998. Government programs and better coverage by private-sector companies have helped alleviate this problem.

Children of color were far more likely to be uninsured. One in six Black children and one in four Hispanic children are not covered, compared with one in 11 White children. Hispanic children, particularly those from immigrant families, are more likely to lack health coverage and access to health care.

On a brighter note, the Fund's report noted there had been some success in immunization programs, with 80 percent of 2-year-olds being fully immunized compared to only 55 percent in 1992. Another bit of good news was a drop in juvenile crime rates over the past 15 years, although, the arrest rate for girls had risen.

The report said nearly three million children were reported abused or neglected each year and that 40 to 80 percent were involved in alcohol and substance abuse, yet only one in four received treatment. It is generally believed that those problems have impacted the nation's schools. As has been reported previously, only 31 percent of fourth graders are reading at proficient levels.

Placing the whole matter in perspective, Mrs. Edelman said, "We've sent humans to the moon, spaceships to Mars, cracked the genetic code, and amassed tens of billions of dollars from a tiny microchip. Why can't we teach all of our children to read by fourth grade?"

Dr. Mellander is a professor at George Mason University. 
A time when states are debating the use of proficiency tests in the fourth, sixth, eighth, and 12th grades, are questioning the usefulness of SATs, and evaluating academic standards, Advanced Placement support and participation seem to be on an up-trend.

According to The College Board, the number of AP exams taken by students has risen to 1.27 million since 1990. And more Hispanic students have risen to that challenge.

A recent article in Education Week noted that “college admissions officers have begun to view AP courses on student transcripts as something more than a free pass out of an introductory course: they are seen as a measure of college readiness.”

And AP courses are open to anyone who wants to take them, although there still are schools that are not AP-established. This is another problem that’s being addressed.

In this issue, an article on Advanced Placement reveals, “In the U.S., 90 percent of colleges and universities recognize the grades students get on the exams for credit placement. Roughly half of all institutions in the states allow students to start as sophomores if they’ve achieved a sufficient number of qualifying grades on the AP exams. Additionally, nearly 300 institutions outside of America use the program for admission, credit, and placement decisions.”

The fact that more Hispanics are learning about AP, are taking courses, and are passing the exams is a silver lining in light of ongoing news regarding test-score disparities and achievement gaps among ethnic groups. At the very least, this exposure is good preparation for college and offers students a heads-up to get in, or once they are enrolled.

Celebrating 20 Years of Diversity (1981-2001)
Affirmative Action in the Courts: An Update

BY WEE PINTO ALICEA

Michigan, Washington, and Now Georgia

1870, the law school of the University of Michigan became the second U.S. university to confer a law degree on an African American, Gabriel Franklin Hargo. The following year, Sarah Kilgoe graduated from the law school, becoming the first woman in the English-speaking world to be awarded a university law degree.

Thirteen decades later, the University of Michigan, which receives some 3,500 applications for 350 seats in its law school yearly, along with other universities throughout the country finds itself under fire with regard to diversity.

Many suspect that the U.S. Supreme Court might soon revisit the issue of whether race should be considered to promote diversity in education. A string of recent court rulings involving racial preferences in college admissions might force the nation's highest court to review the issue for the first time since 1978.

Higher education officials at a number of universities were battling several challenges to affirmative action policies at their campuses throughout the spring and early summer.

University of Michigan Law School

In April, the University of Michigan Law School won a reprieve in its battle to preserve its ability to use race as a factor in admissions. A federal appeals court put on hold a judge's order that the law school stop using race as a factor in admissions.

One month earlier, a federal judge had struck a blow against the Law School when he rejected the school's use of race as a factor in admissions.

In the ruling on Grutter v. Bollinger, the judge said that the Law School's practice of accepting minority students with lower grades and test scores than those of Whites is not justified by the school's quest for racial diversity.

Barbara Grutter, an unsuccessful White applicant for the Fall 1997 entering class, brought the case.

Gary Orfield, a professor who heads the Harvard Civil Rights Project, had testified on behalf of the Law School, saying that some minority students need the affirmative action policies because of inequalities in public high schools, including a lack of college preparation.

Professional education will be segregated unless there is an explicit commitment to integrating it because of the extraordinarily unequal opportunities that exist, he testified on Jan. 25.

Other Court Rulings

The ruling further muddied the legal landscape on the issue because other recent court decisions—including one involving the entire University of Michigan—contradicted the ruling against the law school.

Earlier in December, both a federal appeals court and a federal district court said in separate rulings in Washington and Michigan that colleges can consider an applicant's race in admissions decisions in some circumstances.

The rulings are clearly at odds with the Hopwood case, the landmark
1996 federal appeals court ruling against the University of Texas Law School, which resulted in barring colleges from using race as an admissions factor in Texas, Mississippi, and Louisiana.

University of Michigan Case
In the case involving the University of Michigan, U.S. District Court Judge Patrick J. Duggan of Detroit ruled that the University affirmative action program is justified by the educational benefits of racial diversity. He said the University practice of giving an edge to Hispanic, Native American, and African American applicants—as it does to the children of alumni, scholarship athletes, and others—is constitutional.

The judge said in the Dec. 13, 2000, ruling in Grutter v. Bollinger that the University provided solid evidence regarding the educational benefits that flow from a racially and ethnically diverse student body. He agreed with the University that it has a compelling interest in maintaining diversity on campus. In doing so, he rejected a challenge by a group of White students to the University of Michigan’s undergraduate admissions policies for its college of literature, science, and the arts.

Judge Duggan struck down the University admissions criteria in use from 1995 to 1998 because they reserved places for minorities and amounted to rigid racial quotas. But the current criteria are fine because they do not seek to achieve a specific proportion of minority students nor a proportion that represents the community.

“This decision is a victory not only for the University of Michigan and for our students, but also for the leaders, corporations, labor groups, education associations, religious organizations, and others across the country who have affirmed the rightness of this principle,” said Lee C. Bollinger, the University’s president. The court ruled that the current system for admitting students to the University of Michigan is legal and the reasons for the consideration of race are completely justified. “I am deeply gratified by the court’s decision to recognize and affirm the critical nature of diversity in higher education.”

The University currently grades prospective students on a 150-point scale, awarding points for factors such as applicants’ high school GPAs, the perceived rigor of their high schools, and their states of residence. Hispanics, Native Americans, and African Americans receive 20 points for race—more than the 12 points a student receives for scoring 1600 on the SAT and the same number as scholarship athletes or White and Asian American students from socioeconomically disadvantaged backgrounds. The University receives about 23,000 applications for 5,000 undergraduate positions.

The University of Michigan, which spent $4.3 million to battle the case, launched an extraordinary legal and public relations campaign. It hired outside lawyers, compiled a lot of social science information about the educational benefits of diversity, and solicited statements of support from major corporations and leaders such as former president Gerald Ford.

“Tolerance, breadth of mind, and appreciation for the world beyond our neighborhoods: these can be learned on the football field and in the science lab as well as in the lecture hall only if students are exposed to America in all her variety,” wrote Ford in a New York Times editorial about the case.

The University of Michigan, founded in 1817, is considered one of the nation’s most prestigious public universities and is also one of the more racially diverse. The University reports that 78 percent of its 38,000 students are White, 43 percent are Hispanic, 06 percent are Native American, 12 percent are Asian American, and 66 percent are White. The remaining students do not report their race.

The University of Washington
On May 29, the U.S. Supreme Court let stand an appeals court ruling in a case involving the University of Washington School of Law. The New York Times reported that the appeals court in that case found diversity to be an adequate justification for public colleges to consider race in admissions.

The New York Times called the court’s order something of a victory for supporters of affirmative action. And quoted a lawyer representing the University as saying that the order was a very good sign that the Supreme Court justices are not eager to change the status quo.

A three-judge panel of the U.S. Court of Appeals for the 9th Circuit, in San Francisco, ruled in December that the University of Washington School of Law acted legally when it considered an applicant’s race in admissions decisions from 1994 to 1998. In 1998, the state passed an initiative against racial preferences so the University eliminated the consideration of race. But the ruling meant that other publicly funded schools throughout the circuit, which includes most western states, can continue to use affirmative action programs, said Dan Tokaji, a staff attorney for the American Civil Liberties Union, which supported the University in its case.

A group of White applicants who were denied admission to Washington’s law school challenged the University past race-based admissions. Both a federal district court and the 9th Circuit panel ruled against the applicants. The panel said in Smith v. University of Washington that the U.S. Supreme Court’s 1978 ruling in Regents of the University of California v. Bakke still is the controlling legal precedent on the issue of considering race to promote diversity in education. In the Bakke case, the nation’s highest court allowed the consideration of race as one factor among several in admissions decisions, but it struck down...
the use of racial quotas in school admissions. Because the Bakke ruling was made with such a narrow vote, many in higher education speculate that if a similar case were brought before the Supreme Court today, the case would be overturned.

With all of the recent activity in Washington and Michigan, and another case involving the University of Georgia pending before the 11th U.S. Circuit Court of Appeals, there is much talk in higher education circles that this could be the year that the Supreme Court revisits the issue. Another reason there is speculation is the recent court rulings contradict an earlier major one—the Hopwood case.

“We are well aware of the fact that much has happened since Bakke was handed down,” said Judge Ferdinand F. Fernández, writing for the three-judge panel of the 9th Circuit in the Washington case. “Since that time, the court has not looked upon race-based factors with much favor. Still, it has not returned to the area of university admissions.”

In both the University of Washington Law School and the University of Michigan cases, the judges rejected the rationale of a panel of the U.S. Court of Appeals for the 5th Circuit, in New Orleans, in its Texas v. Hopwood decision. Several White applicants rejected by the University of Texas Law School filed the case.

The Hopwood Case

In that decision, the 5th Circuit panel ruled 2-1 that race-based affirmative action could not be justified on the basis of encouraging campus diversity. Higher education officials across the country were shocked by the ruling, but the Supreme Court refused to review the ruling later that year.

The Hopwood case was then returned to the federal district court, in December, in Austin, Texas, for consideration of several issues, such as whether the plaintiffs would have qualified for admission under a race-blind admissions policy. The court ruled that the White applicants would not have been admitted even if the law school had not taken race into account, but it also issued a broad injunction against any consideration of race in admissions to the school. lawsuits to dismantle affirmative action. The firm also represented Cheryl Hopwood in Texas.

The issue of using race to make college admissions decisions is highly contentious. Some argue that race-based affirmative action for college admissions is needed to level the playing field for minority students, who graduate in higher numbers from urban school districts that often fail to provide them with the college preparation background they need, making it difficult for them to compete. Others argue that diversity on campus is important to enhance the learning environment and reflect the reality of the changing face of the nation's population. Still others argue that affirmative action is no longer needed, that it was just a temporary remedy for past injustices to the Black community.

John McWhorter, a professor of linguistics at the University of California at Berkeley, argues against such affirmative action policies. In his book Losing the Race: Self-Sabotage in Black America, McWhorter said that as long as there is affirmative action, high-achieving Blacks can never be properly confident about or fully credited for their achievements. Moreover, he argues that the beneficiaries of affirmative action will come to feel entitled to evade rigorous competition and to make less than their best efforts to earn university admissions. McWhorter, who is Black, said he is “angry that affirmative action advocates believe that the children I will have by 2020 ought to be held to a lower academic standard because my father was not allowed to fly planes in the Navy in 1944.”

University of Georgia

The other major test of affirmative action in higher education is pending in Georgia. One case involving the University of Georgia revolves around the University's undergraduate admissions. That case remains in court.

In a July 2000 ruling, a district court held that the use of race as one of many factors in a small portion of the undergraduate admissions process was unconstitutional. The case is now before the U.S. Court of Appeals for the 11th Circuit in Atlanta. Briefs were filed, and oral arguments had been scheduled for the end of May.

A lawsuit alleging reverse discrimination against two White applicants to the University of Georgia School of Law was settled out of court. As a result of the law school settlement, there will be no change in the law schools admissions process.

Georgia Gov. Roy E. Barnes issued a statement in support of the settlement: “I concur with the decision to settle for several reasons. The settlement preserves the law schools admissions process as is, saves a considerable amount of taxpayer's money, and clears the deck for the important appeal of the undergraduate admissions case.”

Lee C. Bollinger, president, University of Michigan-Ann Arbor
Ayeola Boothe has her work cut out for her. She joined The College Board in February as assistant director for equity and access to initiatives. Her goal: to bring more Hispanic and African American students into advanced placement courses.

“The main problem has been communication,” she says. “Students and teachers wanted to get across that we have not made an effort to reach out to the minority community to address their needs.”

But now—as the Advanced Placement program witnesses a continuing surge in enrollment—The College Board is striving to surmount just that obstacle. Over the last few months, Boothe has spearheaded projects to get the word out and get minority numbers up.

The College Board staffers organized a number of focus groups at New York City public schools and met with African American and Hispanic teachers and students. They asked participants what was lacking, what was strong, and what was needed.

“We wanted to know what they thought they needed in predominantly minority and low-income districts,” says Boothe.

The immediate result: the Advanced Placement’s entire line of publications is being revamped to “reflect more diverse images,” she says. And more publications also will be translated into Spanish.

“Often, Advanced Placement is not promoted in a school,” she says. “While the information is out there, it’s not always trickling down. Some schools know what Advanced Placement is, but it’s not getting to the students we want it to get to.”

“We have to make a stronger effort to get the word out.”

The needs are extremely pressing, not just because this year’s heighten ed Census 2000 triggered awareness of a Hispanic population burst. The AP program has encountered a dramatic rise in Hispanic involvement over the last decade.

The pace of Hispanic students involved in the program is exceeding that of all students involved in Advanced Placement.

National efforts to beef up standards and toughen graduation requirements are partly the cause of this, experts say. But so are financial considerations, as students devise ways to get more bang for their buck and shave swelling college costs.

Started in 1956, the Advanced Placement program offers students the chance to take college-level courses while in high school. The program initially gave first-year students a chance to skip course work they had mastered in high school.

A dozen colleges and a dozen secondary schools wrote course work descriptions for 11 subjects. The Educational Testing Service subsequently developed three-hour examinations for each of these subjects.

The exams—there are currently 33 courses and tests in 18 disciplines—test students’ skills in reasoning and problem-solving, analyzing, and critical thinking in subjects ranging from biology to physics and Spanish literature to history.

Experts revisit each course every four or five years and survey the curriculum to update standards. The reviews check whether the courses cover all of the right information, activities, and assignments that are part of college courses.

This past year, The College Board debuted the human geography exam, and a 34th is due to be unveiled in world history during academic year 2001-02. More than 300 world history teachers already have been trained to teach this course.

Students earn college credit while in high school, and that gives them the chance to save on college tuition and graduate early from college. However, many use the opportunity to take more advanced courses rather than graduate in less than four years.
AP Data

Signs of progress can easily be found in the numbers. In 1956, when the first exams were administered, 1,200 students took part. By the year 2000, when an estimated 60 percent of all U.S. high schools offered the courses and exams, more than 768,000 students took more than 1,250,000 exams.

Of that total pool, more than half were women, and almost a third belonged to an ethnic minority. In 1999, for instance, of the 686,000 students who took the exams, 32,600 were Mexican-American, 4,600 were Puerto Rican, and 25,640 identified as Hispanic or Latino.

"What we hear from students most is that it gives them tremendous preparation for the rigors of college work," says Lee Jones, executive director of the Advanced Placement program. "Advanced Placement courses are modeled after introductory college-level courses."

In the U.S., 90 percent of colleges and universities recognize the grades students get on the exams for credit placement. Roughly half of all institutions in the states allow students to start as sophomores if they've achieved a sufficient number of qualifying grades on the AP exams. Additionally, nearly 300 institutions outside of America use the program for admission, credit, and placement decisions.

Much of the focus in recent years has been on reaching out to segments of the student population that have not been as actively involved in Advanced Placement. In some states, such as California, critics maintain that an inequitable system favors students in wealthier communities. Many schools in lower-income neighborhoods don't have AP programs, and students enrolled therein aren't earning college credits earlier.

Jones concedes that, noting that AP is now in about 62 percent of all public high schools and just above 50 percent of all private high schools nationally, for a total of 13,500 schools.

More than a dozen states and the federal government currently provide some sort of financial aid to low-income students to cover the costs of the exams. In South Carolina and Texas, for instance, aid covers the costs of course materials and professional development for teachers.

Florida now uses funds to establish incentive programs for schools and teachers. California authorized a $16.5 million Challenge Grant Program to expand AP opportunities in 550 public high schools, the largest single-year expenditure to support AP at a state or federal level in the program's history.

Nine states also provide other support systems. Virginia now requires every high school to offer two AP courses and offers special diplomas to students who pass the courses. Utah supplies grants to schools for supplies and professional development.

Recently, Advanced Placement officials opted to expand their Hispanic Recognition Program and will be sending materials to Hispanic teenagers before they enter 10th grade.

"We want them to know how they can start planning early on to take AP courses," says Boothe.

The College Board recently signed a Memorandum of Understanding with the Hispanic Association of Colleges and Universities (HACU) to reach out to undocumented immigrant students in border states as well as migrant students.

"They're not in any one school long enough to take Advanced Placement courses, and we want to make sure that if they travel from school to school, their course work will be consistent and they will be placed in the right courses," says Boothe.

Officials are examining how undocumented immigrants (who are financially strapped) can gain access to scholarship monies after high school. "We are doing a College Board-wide effort to find financial opportunities available to them," she says.

That collaboration comes as HACU members press Congress for more federal funding to improve the education of Hispanics.

In April, a group of college and university presidents and chancellors converged on Capitol Hill to meet with members of Congress to press for more funding. HACU represents more than 270 colleges and universities that serve more than two-thirds of all Hispanic higher education students.

The organization is calling for record spending increases in initiatives, including those that prepare students for college. Leaders also stressed the

*This number is slightly inflated because some candidates take exams in more than one year.

I.N. 989558
need for more public and private partnerships to help Hispanic youth obtain the academic tools they need to attend college. And that, says The College Board, is a key goal of the Advanced Placement program.

“Advanced Placement is growing tremendously, and schools have latched onto AP as a gold standard by putting challenging courses in place in their schools,” says Jones.

“It requires a lot of work, not only on the part of The College Board, but teachers and students. Many schools are just getting AP courses stared, and they’ve got to have a whole set of supports in place.”

Even though minority involvement has grown dramatically, Jones laments that it still woefully pales in comparison with White participation. “We have a long way to go,” he says.

He also concedes a disparity in the student scores. White and Asian students have routinely scored higher on most exams, although not across the board. Hispanics often score at the same level, if not higher, on the Spanish language and Spanish literature exams.

The AP grading system is done on a scale of one to five—five being extremely well qualified and three being qualified. A score of two means a student is possibly not qualified, and one means the student is not recommended.

Each college decides which AP exam grades it will accept for credit or advanced placement.

Across the nation, the push for higher standards has stirred a backlash against testing, or too much of it, Jones agrees with the notion that students are being tested too much, but says that AP exams aren’t “the culprit.”

“It’s the multiple days of testing that students undergo to meet state standards and requirements,” he says. “The cumulative effect of all of the testing done on students is a concern.

“But as a national program, we depend on exam results to provide colleges and universities with a standard measure. I’m not sure how we could go about doing business if we did not have an end-of-course exam.”

Benefits of AP

Bob Schaeffer, public education director for the Cambridge, Mass.-based FairTest, which has challenged testing policies and exams, says the Advanced Placement program is a “gateway rather than a gatekeeper.”

“There is no harm done to a student by the AP exam,” he says. “Rather, it’s an opportunity to get a leg up on college, to earn college credit, and take more challenging courses, if that’s what someone wants to do. It’s the carrot, not the stick.”

Schaeffer says the exams also gauge work over time and are consciously designed to balance multiple-choice questions with ones requiring essays and written responses.

“If one believes in the approach of standards and tests linked to them, this is probably the best example the country has because the standards for the content covered in AP courses are clear,” he says.

“Teachers are not supposed to be leading AP courses unless they’ve learned how to properly cover material in those courses, and the assessments are clearly linked to the curriculum,” he adds.

There are more than 100,000 Advanced Placement teachers worldwide, and 15,000 new ones take part in the program each year. AP offers professional development workshops and summer institutes for teachers.

In the early 1970s, The College Board began running workshops and insti-

---

**What is the AP® Program?**

The College Board’s Advanced Placement Program® (AP) is an opportunity for students to pursue college-level studies while still in secondary school. Through this program, they may earn credit, advanced placement, or both, for college. By challenging and stimulating students, the AP Program provides access to high quality education, accelerates learning, rewards achievement, and enhances both high school and college programs.

**How Do Students, Teachers, and Schools Benefit?**

- **Students study in greater depth.** Students who take AP courses learn a subject in depth, develop analytical reasoning skills, and form disciplined study habits that can contribute to continued success at the college level.

- **Students improve their chances of being accepted by the college of their choice.** College admissions personnel view AP experience as one indicator of future success at the college level. As college admissions become more selective, participation in an AP course is a great advantage.

- **Students are often exempted from introductory courses at college.** Over 90% of the colleges and universities in the United States, as well as colleges and universities in 19 other countries, use AP grades. The associated cost savings can be as much as $3,000 per course! Course exemption also gives students time to broaden their college experience by exploring additional subject areas, participating in internships, and studying abroad.

Source: The College Board
tutes for master AP teachers and college faculty. More than 50,000 teachers take part annually; and they get a chance to brush up on new content and strategies.

"In this whole professional development milieu has grown a tremendous network and camaraderie among AP teachers all over the country," says Jones.

Every year, 5,000 faculty members gather to score exams. That used to take place at one college in New Jersey, but now it is spread out to six locations from New Jersey to San Antonio, Texas.

Robert Blackey, history professor at California State University at San Bernardino, in Southern California, has been involved with Advanced Placement for more than three decades.

He began as an exam "reader" and soon supervised those who read the exams. He is now a chief faculty consultant with the AP program and on The College Board's Western Regional Council, which recommends policy changes.

"My campus has a great many AP students," he says. "They tend to be more experienced and brighter kids. Those who go through the Advanced Placement program profit a great deal from the experience." He has found that AP course graduates do better in college than non-AP students.

"When AP is done well, and I mean the teacher is prepared and the classes are not too big, the rigor of the class prepares a student for the rigors of the university," he says. "That's a tremendous benefit."

Schools also must be ready for a sizeable undertaking. Introducing the program means not only adding a course but recruiting staff and resources and adjusting the curriculum.

"You cannot just parachute AP into a school where it hasn't existed before and expect it to be successful. You must have a professional development strategy and pre-Advanced Placement strategies in place to prepare students."

Lupe L. Sonnie feels very fortunate these days. The 17-year principal of the Abraham Lincoln High School in Los Angeles recently was lavished with praise for a big boost in AP scores at her school.

The school was among 10 high schools to win a $10,000 award for high student performance in math and science advanced placement courses. "I have a large number of teachers interested in teaching AP courses," she says. "They attend workshops and conferences. Many of them volunteer. I just don't have any problem enlisting them for this."

"It was a combination of staff preparation, commitment, and dedication; students who love to learn; and parents who were supportive."

Hispanic participation in the program is at 58 percent. In some classes, it's at or near 100 percent. All 136 students in the Spanish language AP courses are Hispanic, 59 out of 60 in Spanish literature, 20 out of 31 in English Literature, and 13 out of 24 in U.S. government and politics.

She notes that Hispanic enrollment at the 2,600-student school is at 80 percent. But the percentage of Hispanic students in the AP courses is steadily rising.

The school has been providing extra counseling and tutoring to students, many of whom arrive with poor academic training and from low-income families. When she talks with parents and students, Sonnie sells the Advanced Placement program as a rigorous pursuit. "It gives them an opportunity to receive credit not only for high school but also at college," she tells them.

At Lincoln, 35 students overall took AP exams in 1998; 372 in 1999; 413 in the year 2000; and 558, this year. This year, 615 percent of those students who took the exams scored three or above--a jump from 513 percent the year before.
names "Loyola" and "Marymount" have long been associated with higher education in countries around the globe.

Loyola Marymount University of Los Angeles is a Catholic university in the Jesuit/Marymount tradition, one of 28 in the U.S. founded by the religious order formally known as the Society of Jesus. Today, LMU is a comprehensive Catholic independent university emphasizing the liberal arts in the educational traditions of the Society of Jesus and the religious traditions of the Sacred Heart of Mary (the Marymount Sisters), a tradition of "academic excellence, education of the whole person, sensitivity to values, appreciation of cultural diversity and career preparation for today's world."

Undergraduate and graduate instruction is provided in four colleges: Liberal Arts, Business Administration, Communication and Fine Arts, and Science and Engineering. There is also the School of Education and the School of Film and Television. The University offers master's-level degree programs and education credential programs. Loyola Law School grants the juris doctor degree. LMU also offers continuing education and summer session programs.

The Rev. Robert B. Lawton, S.J., president of the University, reports that Loyola Marymount is a "special place where people become more fully alive—their imaginations empowered, their skills developed, their compassion enriched." He reflects, "Loyola Marymount University is committed to educating young people to be contemplatives-in-action, reflective practitioners, and practical dreamers. We seek to stretch their imaginations, helping them to look at themselves and the world in new ways, encouraging them to think beyond their likely careers and their society's status quo, to dream large about the possibilities for their own lives and for the world around them. And we seek to develop those skills that enable action in the world: the ability to read carefully, to process information intelligently, to judge critically, to communicate persuasively, to understand what constitutes scientific proof.

"In short, we want to give our students those skills that will enable them to turn their dreams into reality; at least somewhat, in a swirling, technological, beautifully complicated world. Put another way, we want to harness the richness of both this city and the church.
to help our students, in all their uniqueness and diversity, to become fully alive. And we want them to help this great world grow into God's dream for it.

The president found great joy in developments around campus last year, remarking: "The Burns Recreation Center, three new student residences, Sullivan, Huesman, and O'Malley, a renovated dining facility, all beautifully bridged to the extraordinary University Hall and landscaped as well. In August, new students came to a different campus from the one May's graduates left. A million square feet built or renovated, a hundred million dollars worth of projects brought this about.

Buildings, of course, do not make a university. What gives us joy in our new campus is how well it works and how alive it feels. The Recreation Center has been averaging 7,000 visits per week. The students love their new residences. In new classrooms, ideas charge the air amidst clouds of chalk dust and the most modern of multimedia. The flow of movement through the campus ties all our spaces together more naturally than most of us foresaw. And miracle of marvels, I've even heard students praising the food!"

Last year, he says, 6,300 applicants competed for spaces in the first-year undergraduate class, yielding nearly 200 more admissions than expected. More than a thousand transfer applications vied for 187 available spaces. Lawton continues, "The academic quality is high, the average SAT of the first-year class is 1139. And their number is as widely diverse as the campus they've entered. At the Law School, nearly 3,300 applicants competed for the day program's 346 spaces (the evening program, 96), and the median LSAT is 158." The Westchester Campus hired 15 tenure-track faculty and 18 visiting faculty, the Law School hired several, and staff was added to both campuses.

LMU is the largest Catholic university in Southern California, eighth largest of the nation's 28 Jesuit institutions, and regularly ranked among the top regional universities in the western U.S. by U.S. News & World Report. In the magazine's first-ever rankings of schools based on teaching commitment (schools that showed an unusually strong commitment to undergraduate teaching), LMU was
listed fourth among regional universities in the west. LMU is regularly ranked among the top 10 "Best Regional College Buys" in the west. And since 1997, U.S. News has listed LMU among the top 15 regional universities in terms of diversity.

Its Origins

The University was founded in 1911 as an outgrowth of St. Vincent's College, the first in Los Angeles. In 1928, the then Loyola College moved to its current location on the Westchester bluffs and, two years later, became Loyola University. In 1973, the University merged with Marymount College to become Loyola Marymount University.

Loyola Law School, in downtown Los Angeles, was founded in 1920. The University’s 100-acre main Fritz B. Burns campus in the Westchester area of Los Angeles occupies a bluff facing the Santa Monica Mountains and overlooking Marina del Rey and the Pacific Ocean. Development of the adjacent 275-acre Levee Campus is ongoing, with three residence halls, a 900-car underground parking structure topped by an athletic field, and the Conrad N. Hilton Center for Business. In 1999, LMU acquired University Hall, the former Raytheon Corporate headquarters.

The Campus

The University has II residence halls housing more than 2,500 students. In 2000, the Fritz B. Burns Recreation Center opened, replacing the Alumni Gym, and a Jesuit residence was completed in 1999.

Enrollment for Fall 2000 ran to 4,851 undergraduates, 1,300 graduate students, plus 1,564 attending the Law School, for a total of 7,515. Undergraduate multicultural enrollment totals 39 percent–19 percent Hispanic, 6 percent African American, 13 percent Pacific Islander, and 1 percent Native American. Full-time faculty at the Westchester campus number 361 (6 percent Hispanic) and 60 at the Law School (8 percent Hispanic). The student/faculty ratio is 12.8 to 1. There are an estimated 50,000 alumni. Tuition and fees for 2000-2001 ran to $19,100.

The School of Film and Television is the largest undergraduate film school in the country. The Center for the Study of Los Angeles conducts research programs and conferences exploring issues that shaped the city and on how to plan for the future. LMU students and staff give more than 85,000 hours of service annually to community organizations and activities such as the Emergency Medical Technicians Program, Westchester Senior Citizens, De Colores Orphanage, the Peace Corps Fellows Program, the Westside Food Bank, Special Games, Suicide Prevention Center, and more.

LMU and the Peace Corps coordinate a program in which returned Peace Corps volunteers work at the Nickerson Gardens housing development in Watts and the Mar Vista Gardens in Mar Vista while they earn a master's degree in business administration.

Loyola Marymount's College of Business Administration has one of the top entrepreneurship programs in the nation, according to the 1998 rankings issued by Success magazine. Loyola Law School was the first in California to establish student participation in a pro bono program as a graduation requirement. LMU is a training ground for teachers committed to serving inner-city schools. The two programs—one for public, the other for Catholic schools—are the result of separate partnerships the University's School of Education has formed with Teach for America and the Archdiocese of Los Angeles. Fifty public school teachers in the Teach for America program entered a two-year commitment, teaching with emergency permits in the Los Angeles, Long Beach, Compton, Lynwood, and Pasadena school districts, and working toward their teaching credentials at LMU. LMU and the Archdiocese of Los Angeles teamed up to launch the Teacher Service Corps Program to serve inner-city Catholic schools. A program coordinator spent the last school year recruiting the 20 to 25 graduating college seniors who will teach in 2001-2002. The recruits will be expected to live near the schools in which they teach and will earn their teaching credentials at Loyola Marymount. Last summer, LMU officially dedicated its new $18 million Fritz B. Burns Recreation Center. The 70,000-square-foot recreation facility replaces the Alumni Memorial Gymnasium and connects to Gerstien Pavilion. It contains a massive weight and fitness room; three basketball/volleyball courts; multipurpose rooms for aerobics, kick boxing, yoga, etc.; juice bar; locker room; 50-meter outdoor pool, and a recreational programming office providing support for more than 6,000 students, particularly the 1,700 students participating on 22 intramural teams. Faculty, staff, and alumni also will be able to use the facility. "This extraordinary facility will help LMU achieve, in an exemplary way, the millennia-old ideal of education," says President Lawton, "a sound mind in a strong body."
Creative approaches are needed to address the needs of the growing Latino population in the U.S. One promising model involves community-university outreach and scholarship models.

In a time of diminishing resources, it is important that universities and communities collaborate to support and create change that will ultimately enhance the quality of life of youth, families, and communities. There is an expanding body of literature that highlights the need to develop these types of models (see Boyer, 1990 for review; Lerner & Simon, 1998). For example, Boyer (1990) calls on universities to redefine scholarship to include the scholarship of discovery (research that contributes to a body of knowledge), integration (conducting research in a multidisciplinary context), application (community outreach/service), and teaching.

In this article, we will attempt to show how this collaborative framework for research and programming can help enhance and enrich our understanding of the growing needs of the Latino community and, more importantly, provide effective and feasible means to address these needs.

The growing Latino population in Nebraska (U.S. Bureau of the Census, 1999) has created an increased demand to develop and implement community programs that are culturally relevant and sensitive. In recognition of this population's needs, a group of scholars from the University of Nebraska-Lincoln (UNL), together with the Hispanic Community Center (HCC) director, collectively implemented the Latino Research Initiative (LRI), a community-university outreach and scholarship model (see González-Kruger, Zamboanga, Carlo, Raffaelli, Carranza, Hansen, Cantarero, & Gajardo, in press, for review). This model was developed using Boyer's (1990) conceptual framework. In accordance with this model, the LRI's philosophy is grounded on the following core principles: A belief in the strength of community-university collaboration to enhance teaching, research, and service; the importance of having university faculty and administrators who are engaged with the community and commit to addressing and responding to the needs of underserved populations in their community; a commitment to the skills development of community service professionals; a commitment to applied research and the dissemination of knowledge that helps understand and serve minority populations; and the importance of serving as a resource to academic and non-academic professionals, as well as community members.

Consistent with Boyer's model, the LRI has formed a collaborative
partnership with the Hispanic Community Center (HCC), a private, nonprofit organization whose core mission is to enhance the quality of life of the Hispanic community, empower Hispanic people to participate in a meaningful way in society, and develop linkages between the Hispanic community and the community at large.

Together, the LRI’s core principles and the HCC’s mission serve as a foundation to guide research, service, and programming in the community, helping enhance the quality of life of Latino families.

The Significance of and Need for the Program

The LRI has identified school-related challenges as an important issue among Latino youths in the Lincoln community.

According to Lincoln Public Schools (LPS), Latino youths are disproportionately likely to suffer from academic underachievement, and LPS records indicate that school dropout rates among Hispanic youths have increased considerably (from 8 percent in 1991-92 to 15 percent in 1997-98). Therefore, Latino youths are less likely to enroll in college.

UNL figures indicate that first-year Latino enrollment during the past decade has remained below 2 percent of the total college first-year enrollment. These figures, however, provide limited information with respect to other challenges that can hinder Latinos’ ability to succeed in school. For example, many Latino children and adolescents experience school-related difficulties that are unrelated to their academic ability, including language difficulties, family stress due to poverty, and cultural barriers, including discrimination and negative stereotyping.

Despite a number of community-based youth programs in Lincoln, culture-specific programs are lacking. Furthermore, many programs do not fully address other areas of need such as psychosocial support for Latino youths experiencing difficulties at school, or help accessing community resources. In response to these needs, the LRI and the HCC have worked together to develop and implement the Latino Achievement Mentoring Program (LAMP).

LAMP is a community-university program aimed at reducing school failure and underachievement among Latino youths. Specifically, LAMP goals are to promote healthy youth development by providing emotional, academic, psychological, and social support through individual mentoring by successful college student role models; address the specific needs of Latino families and children (e.g., language barrier issues, cultural adjustment/identity issues); involve other family members in a meaningful way (e.g., Family Education Weekend Activity; Family Advocacy; Latino Empowerment Day); and strengthen the skills of the college student mentors, who have the potential to become future community leaders.

Together, the program goals will help enhance the quality of life of Latino youths and their families in the Lincoln community. Simultaneously, this program facilitates the professional development of Latino and non-Latino UNL students and allows them to remain connected with their community in a meaningful way.

Development and Implementation of LAMP

The LRI and HCC combined their efforts to obtain funding from local community agencies to develop LAMP. Upon receiving funding, the HCC hired a bilingual program director and a bilingual activities coordinator who are based at the HCC. Based on their growing Latino population, four Lincoln Public Schools were identified as schools that would benefit from LAMP.

After several meetings with LPS, principals were asked to identify and recommend potential candidates for LAMP at their respective school sites. Youths nine to 18 years of age experiencing one or more of these challenges were recruited: low levels of psychosocial support, low parental involvement with school, peer and/or social difficulties at school, lack of academic support and educational goal-setting skills.

Principals made initial contact with parents to introduce LAMP and obtained permission to release their children’s names to LAMP staff. LAMP staff then contacted and conducted in-depth, face-to-face interviews with each child and obtained parental permission allowing participation. Interviews were conducted in Spanish, English, or both.

LAMP mentors are recruited from sources throughout UNL, including the Office of Multicultural Affairs, Teachers College, Latino and Latin American Studies, Modern Languages, and Psychology. All prospective mentors are required to have a 25 or above GPA and possess a sensitivity to, and cultural understanding of, Latino youths and families. Background information, including amount of volunteer expe-
rience, bilingual skills, and dedication and motivation in helping children from diverse backgrounds, is collected. Prior felony or arrest records are also obtained. Mentors are assigned a mentee according to cultural and background similarities, common interests, and other relevant factors (e.g., bilingual needs). LAMP mentors are required to commit one full year to the program and are eligible to receive up to three academic fieldwork credit hours through several academic departments at UNL.

Boyer's (1990) scholarship of teaching involves engaging in active teaching and learning where knowledge is transmitted, transformed, and extended. Consistent with this notion, mentors develop their mentoring skills and acquire valuable leadership skills through training sessions and weekly workshops. Workshops conducted by academic faculty at UNL and community professionals cover a variety of topics, including empathic listening, risk assessment, multicultural sensitivity and competency training, substance use, confidentiality issues, and reporting suspected child abuse or neglect. Through these activities, UNL students are educated about issues confronting Latino adolescents and acquire skills needed to work effectively with these youths.

Program Activities

Mentorship and tutoring takes place at the respective schools and homes of the mentees. Mentors are required to spend a minimum of two hours per week with their mentee(s) engaging in activities that are consistent with the goals of LAMP. Mentors assist mentees with their schoolwork, provide psychological and emotional support during times of peer or family difficulties, and provide guidance on how to effectively deal with potentially risk-provoking situations (e.g., physical fighting, substance use). Mentors also engage in leisure activities with their mentees, including attending cultural events (e.g., Hispanic Heritage Festival), visiting art and children's museums, participating in community service projects, doing Internet-based activities, playing sports, baking, and going to plays, musicals, or dances. Mentors and mentees also engage in education-related activities such as visiting a local granting agency's educational cession activity with successful Latino/a college students and community members. The last section of the workshop was devoted to a technology introduction, where parents and mentees worked together to explore educational and culture-specific websites. This activity has enhanced knowledge of educational opportunities and, interpersonal growth, communication, and meaningful involvement with families, LAMP staff schedule home visits. These visits give families the opportunity to ask specific questions and provide input about the program, upcoming LAMP activities, and other community events (e.g., parent/teacher conferences, festivals, family/parenting workshops). Families may also express thoughts pertaining to the relationship between their child and his or her mentor. Home visits work to promote the continued support and involvement of families in LAMP.

Program Evaluation

A comprehensive evaluation program has been designed to assess the effectiveness of LAMP in achieving its stated goals. LRI team members helped create the program evaluation and oversee the implementation. Two LRI faculty members direct the ongoing evaluation process with the help of a graduate student evaluation coordinator.

Both qualitative and quantitative measures are being used to assess the impact of LAMP on mentors' psychosocial and educational adjustment. Mentees will complete structured measures at six-month intervals, and information regarding school performance and adjustment is collected at the same intervals. Factors measured include, but are not limited to, academic performance, social relationships, risk-taking and pro-social behaviors, ethnic identity, and decision-making skills. Mentees complete weekly reports and provide qualitative information regarding the mentoring process. The evaluation also assesses the mentors' ability to provide culturally competent services to these Latino youths. Data gathered from the mentors provide an holistic understanding of the mentoring process. Analysis of evaluation findings will serve to document the effectiveness of LAMP and improve the program in future years. Dissemination of
findings will provide interested individuals an opportunity to understand the strengths and challenges presented by this approach.

Conclusions and Implications

The LRI operates in accordance with Boyer's community-university outreach and scholarship framework. One outcome of the partnership between UNL and HCC was LAMP. This kind of collaborative model warrants serious consideration by faculty and college officials at other institutions for several reasons. First, it creates a bridge and facilitates meaningful relationships among universities, community agencies, and members of the community. Second, the collaborative exchange of ideas and knowledge enhances programming directions. Finally, this partnership provides opportunities for applied, meaningful research that addresses the critical needs of diverse populations, ultimately enhancing the quality of life for families and children within the community.

We hope that the Latino Research Initiative can serve as a template for future community-university collaborations, resulting in outreach programs that are culturally sensitive and specific to community needs. As communities become increasingly diverse, and as resources become limited, community-university collaborative partnerships can play a vital role in helping to remedy growing needs and promote the importance of cultural issues.

Position Announcement

Associate Vice Provost for Student Affairs

University of Oklahoma Health Sciences Center

Oklahoma City, OK

Nominations and applications are invited for the position of Associate Vice Provost for Student Affairs at the University of Oklahoma Health Sciences Center, Oklahoma City.

Responsibilities include: direction of the Office of Student Services which is responsible for student recruitment, oversight for all campus student organizations and community-based programs for health professions awareness; working with each of the seven colleges to facilitate their recruitment and student services to assure the goals and objectives of the Student Diversity Plan are accomplished; and coordination of Health Sciences Center student programs with the Norman campus programs.

The individual should have an advanced degree; experience with a strong commitment to student diversity, recruitment, and academic support services; evidence for leadership and management skills; understanding of the academic environment of a comprehensive health sciences center, with undergraduate, graduate, professional and post-professional students and a commitment to the development and maintenance of partnerships with educational, professional and community organizations. Effective writing, speaking and interpersonal skills are essential.

Candidates should submit a letter addressing their qualifications for meeting the job responsibilities defined above. Include a current curriculum vitae and list of five references with name, address, and telephone number. Applications will be reviewed beginning September 1, 2001, and will continue until the position is filled. All correspondence should be directed to Dr. Ray Kling, Vice Provost for Academic and Student Affairs, Search Committee for Associate Vice Provost, University of Oklahoma Health Sciences Center, 1000 Stanton Young Blvd., Oklahoma City, OK 73190, (405)271-2085.

Information concerning the University of Oklahoma Health Science Center can be obtained via the World Wide Web at http://www.ouhsc.edu.

The University of Oklahoma is committed to Equal Employment Opportunity and Affirmative Action. Women and minorities are encouraged to apply.

---

Case for Advancement and Support of Education (CASE) is recruiting for a Special Assistant to the President for Diversity Initiatives. CASE is the premier international association for alumni relations, communications, and fund-raising professionals at educational institutions. Minorities are encouraged to apply.

Responsibilities

- Develop and implement strategies designed to increase the cultural diversity of advancement professionals in CASE as members, leaders, and speakers. These programs serve to attract professionals of color to the educational advancement field.
- Develop strategies and specific activities that will create an active support network for advancement professionals of diverse backgrounds.
- Identify and pursue opportunities for partnerships and sponsorships to support the objectives set by the CASE Board of Trustees.
- Assist director of development in identifying, cultivating, and soliciting funding sources that could provide support for diversity initiatives.

Qualifications

- Bachelor's degree with 5-7 years' relevant work experience. Educational advancement experience preferred (alumni relations, communications, fundraising). Demonstrated creative and entrepreneurial experience; proven leadership skills; experience working with volunteers. Awareness of cultural diversity issues and demonstrated commitment to diversity in education and educational administration. Excellent writing and oral communication skills.

Application Procedure

Send cover letter, resume, and salary requirements to: Box Diversity Initiatives Search, CASE, 1307 New York Avenue, NW, Suite 1000, Washington, DC 20005-4701. Online: www.case.org

CASE is an EEO employer.
Nearly 25 years ago, when Noelia Rodríguez reluctantly asked her high school guidance counselor about pursuing a college education, he told her to acquire secretarial skills instead. Today, as she settles into her new post as First Lady Laura Bush's press secretary, the 42-year-old Mexican-American reflects on the unconventional road she's taken to the White House, and says she wouldn't change a single step of the way.

"I love it!" Rodríguez says enthusiastically of her new position. "It's unlike anything else."

So what's the secret of this Latina's success? Her colleagues say it's her ability to remain cool, collected, and poised, even when the world is shattering around her. But she attributes it to hard work. "Nothing was ever handed to me," she says. "I had to take the longer way around."

Rodríguez also recognizes the important role her early family life has played. "I was born an adult," she says, explaining that as the oldest of four children, she was always the responsible one who set the example. Born in Brownsville, Texas, she and her family moved to Los Angeles when she was five. As she learned to speak English at school, Rodríguez came home and taught it to her siblings, she recalls.

After high school, she heeded her counselor's advice, learned shorthand and typing, and went to work at a downtown Los Angeles bank. "I always had my eye on the goal," she says, "even when it was learning typing and shorthand; I kept moving forward."

Rodríguez then became a full-time secretary in the corporate communications department of Southern California Edison (SCE), where she was employed for the next 15 years. It was there that she...
met Don Sedán, the man she now describes as “the mentor of my life.” Sedán, Rodríguez’s supervisor, motivated her to enter a four-year college, she recalls.

She had been taking night classes at East Los Angeles College and earned an Associate’s in Arts degree. A year after completing a social ecology program at the University of California at Irvine, she transferred to California State University-Los Angeles, where she earned a Bachelor of Science degree in business administration.

During that time, as she completed her studies, Rodríguez became involved with The College Board. In November 1983, George Hanford, then the president of the organization, appointed her to the advisory council on adult learning services, as a student representative. She was also a member of the advisory panel on student concerns and served a brief internship with the SAT program.

Rodríguez says her experience with The College Board was a turning point in her life. “I started to recognize the value of having an opinion,” she says. On one occasion, while reviewing SAT questions, she came across one that made a reference to water polo. Rodríguez suggested that the topic was racially skewed, it was removed from the exam, and she saw for the first time that her voice could effect change.

Fred Dietrich, The College Board’s senior vice president for operations, says Rodríguez was skilled in communications even then and was always pleasant and easy to work with. “She has worked very hard to achieve the success she has today,” he asserts.

One of her contributions to The College Board was penning an article entitled “Break the Wishful Thinking Cycle,” urging high school students, especially minority youngsters, to continue their studies to the college level. She wrote, “Not going to college is the kind of ‘tradition’ you shouldn’t mind breaking, especially if you have friends and family as supportive as mine.” In fact, Rodríguez was the first college graduate in her family.

Meanwhile, at SCE, she took on increasing responsibility, directing corporate advertising and managing a $4-million, general market ad budget and its $1-million Spanish-language counterpart. Rodríguez suggested a campaign to explain such concepts as energy efficiency and payment plans to customers who spoke Spanish, Chinese, and Vietnamese, and thereby found herself in the sector of public service.

Managing the Mayor

In 1994, Los Angeles Mayor Richard Riordan hired Rodríguez as his press secretary. Today, she is his close friend, respected advisor, and, as he puts it, “my alter ego.”

Rodríguez quickly gained a reputation for remaining calm during crises and for being able to speak candidly to the mayor. Riordan frequently tells the story of an incident during which Rodríguez reprimanded him. She attempted to end a news conference, but the mayor took one last question that caused him to bristle.

Disregarding Rodríguez’s party affiliation, First Lady Laura Bush was impressed by Rodríguez’s ability to run such a large-scale venture.

They went out in the corridor, and Rodríguez said, “Mayor, with the deepest, fondest respect, when I say no more questions, shut up!” Riordan recounts, laughing. Rodríguez says she never imagined he would share the story with reporters, time and time again, to depict their relationship.

“I can probably talk to the mayor like nobody else can,” Rodríguez realizes. “I’m very proud of that relationship,” she adds, “because I earned it; I earned his respect, and he earned mine.”

What Rodríguez fails to mention, however, is that the mayor is not alone in his estimation of her. “She is such a humble woman that she would never have tooted her horn,” says Peter Hidalgo, Mayor Riordan’s new press secretary. “She would never have admitted that she ran the office. The truth is, whatever Noelia says, it goes, because she has the ear of the mayor.” Her counsel to the mayor was often so “right-on,” he explains, “that it gave her credibility and credence.”

Hidalgo says Rodríguez is a trusted advisor, even now, to Mayor Riordan, “primarily because she has an incredible sense of what the people want and need. And she has a natural ability to understand and assimilate political issues, especially those not familiar with the political arena.”

Hidalgo also applauds Rodríguez’s writing ability, one of the reasons she was tapped while working at SCE. “She’s very articulate and is an outstanding speech writer.” But much more impressive than her composition skills is the incredible amount of responsibility Rodríguez assumed at Riordan’s office. “It was two full-time jobs,” Hidalgo explains.

Rodríguez is undoubtedly missed at the office, but it’s not her first absence. Last year, the lifelong Democrat took a break to serve as president and CEO of the troubled LA Convention 2000, the host committee for the Democratic Convention. Disregarding Rodríguez’s party affiliation, First Lady Laura Bush was impressed by Rodríguez’s ability to run such a large-scale venture.

Flanking the First Lady

In early January, after an acquaintance who worked for former First Lady Barbara Bush recommended Rodríguez for the position, she met with the First Lady at the governor’s residence in Texas. “It was such a big-ticket item that I was nervous,” Rodríguez admits, “but she made me feel comfortable right away.”

While the decision to take the job was a “no-brainer,” she says with a laugh, “I think she appealed to me more than anything.”

The First Lady, “makes you feel like you’re the most important person in the world.”

Rodríguez was also persuaded to work with Bush because of her sincerity and genuine concern for education and for children. She hopes to work with the First Lady “to advance her message—tao show, at the end of four years, that we made a difference in recruiting teachers and in making education more important to Americans, regardless of whether or not they have children.”

What else does the future hold for the dynamic Rodríguez? More than likely, she’ll remain in the realm of public service. “It’s rewarding to use your influence to make life better for people,” says Rodríguez.

She advises youngsters to be flexible in their definition of a mentor. “People who looked like me were not in positions of power,” She notes that Sedán, with whom she still keeps in touch, is very much a “White guy.”

Rodríguez says one of her personal goals is to expand her influence on the next generation by continuing to mentor young people, as she did with interns in the mayor’s office, but also by serving as a role model. She hopes her fellow Latinos will look to her as an example of all that “a little Mexican-American girl from a hard part of town” can accomplish.
MBA for Minorities

Never Enough Applicants, Says Consortium CEO

BY INÉS PINTO ALICEA

Patti Castañeda, an MBA student at the University of Southern California, can't say enough positive words about the Consortium for Graduate Study in Management (CGSM) and the opportunity it offers minorities interested in pursuing degrees in business administration.

"I wish more people knew about the Consortium," said Castañeda, who graduated in May and was heading to New York to work in banking for Goldman Sachs. "They pay for your full tuition and fees. They provide you with this wonderful network, which is what you need in business. It's just an amazing opportunity."

The CGSM is an alliance of 12 leading American business schools, in partnership with the business community, that encourages minorities to pursue business careers. The CGSM member schools recruit college-trained minorities with some work experience and invite them to compete for merit-based fellowships for graduate study leading to a master's degree in business administration. The organization is celebrating its 35th year.

Phyllis Scott Buford, president and chief executive officer of the Consortium, said she would like to see more Latinos apply for the Consortium fellowships. The CGSM has invited Sarah Martínez Tucker, president of the National Hispanic Scholarship Fund, to be on its board to find ways to increase outreach to the Latino community.

The CGSM is a not-for-profit corporation founded in 1966 following a feasibility conference that included 60 educators, business managers, and community action leaders. Conference participants agreed that a cooperative university program to hasten the entry of minorities into management...
positions in business was both desirable and feasible. Washington University, Indiana University, and the University of Wisconsin-Madison were the first three schools to participate in this endeavor.

Since then, the Consortium has experienced tremendous growth. More schools have joined. They are Dartmouth, UC-Berkeley, UT-Austin, University of Michigan, NYU, University of North Carolina, University of Rochester, University of Southern California, and the University of Virginia. Two more are expected to join soon.

Eloy García, director of the MBA program-Administration at the Graduate School of Business at UT-Austin and a member of the CGSM board of directors, said the relationship with the Consortium helped his school reach out to minorities after the landmark Hopwood court ruling, which ended affirmative action programs in Texas higher education.

"It was a very devastating decision," said García. "It really hurt us. We were considered by many people to be a university that wasn't as accessible as other universities. Even still, some students won't consider Texas because of the Hopwood ruling."

García said that since the school has been unable to provide scholarship money to minorities, the funding that the consortium provides to students helps the school attract about 30 minority students yearly to its MBA program.

"They stepped up to the plate and helped," said García. "They provide the funding for the students. They have always been a good partner. UT always has been interested in the best minds," García said. "They are able to identify outstanding minority candidates for us." The Consortium, he said, "has given us access to a pool of people we wouldn't have had otherwise."

Castañeda also spoke about the effects at her school of Proposition 209, an anti-affirmative action measure passed by California voters. She said that her school, the University of Southern California, which is private, enjoys a diverse student population and has attracted a number of large corporate sponsors to recruitment fairs because the corporations know that the California state schools have experienced diminished minority enrollments under Proposition 209.

"It seems that their loss is our gain," said Castañeda. "These corporations have limited recruiting dollars, so they go to the universities where they can get everything they need. It has greatly disadvantaged the University of California system."

In its first three years, the Consortium provided fellowships only to Black males. The first class consisted of 21 Black males, and there were 27 corporate sponsors. After 1979, the scope was broadened to include women, Hispanics, and Native Americans. In 2000, 67 percent of the applicants were African American, 32 percent were Hispanic, and 1 percent was Native American, and females comprised 44 percent of the pool. There were 238 students enrolled and 40 corporate sponsors.

"People need to know that there is money out there to help them get this degree," said Buford. "They not only get into a top school but they can get out of school with no debt."

Castañeda said that many people she has met, who have expressed an interest in going back to graduate school, fear being saddled by loans and that the Consortium fellowship has helped tremendously "because you feel you have a fresh start" and are not in debt.

The fellowships are funded by various American businesses and the universities affiliated with the Consortium. The CGSM receives 40 percent of its budget from corporate sponsors and 60 percent from the participating schools through tuition remission. The network of companies affiliated with the Consortium seems committed to the diversity of graduates the Consortium supplies. The corporate partners offer internships and even permanent jobs to many of the students who graduate through the CGSM program. Some 315 fellowships covering full tuition and fees were offered to students last year, but not all accepted the packages that were offered. Buford said the average MBA costs about $25,000.

Once the students are accepted into the CGSM program, they are invited to a three-day event, held usually in June, where they meet with other CGSM fellows from their home university and other universities, as well as corporate sponsors. The organization held its last annual orientation conference June 7-12 in Cincinnati, Ohio.

People interested in applying must have had a 3.0 GPA in their undergraduate studies, a good score on the GMAT standardized test, two years of employment, and a demonstrable record of community leadership. Buford recommends that if students think they would eventually like to pursue an MBA, they should take the GMAT while still in college and still in the test-taking mode.

Buford said one of the challenges of the program is to make sure students understand that the CGSM fellowship is merit-based and not an affirmative action program. "I tell them that when people see 'Consortium' on their resumes, they know they are getting top quality," said Buford. "The schools are not lowering their standards for Consortium students. We are giving these students the opportunity of a lifetime for a lifetime."

Since 1986, more than 4,000 minorities have earned MBAs through the Consortium program. Buford said the goal is to keep encouraging more minorities to get business degrees. Six percent of all MBAs are minorities.

Buford adds that the degrees are instrumental in helping the communities help themselves. She argues that people with MBAs have the skills needed to start successful businesses that create jobs and simply make people savvier in the business world, which is a vital skill in today's economy. "Big businesses are making a lot of money on minorities, and minorities have to be at the table to make decisions about how their products should be targeted to us," said Buford.

Buford wrote in the Winter 2001 issues of The View about a recent CGSM survey of minority MBA employment preferences. The survey found that a whopping 66 percent of minority MBAs prefer to work in a large global company.
